Welcome to the 2013-2014 academic catalog for the Johns Hopkins University full-time undergraduate and graduate programs in the Zanvyl Krieger School of Arts and Sciences and the G.W.C. Whiting School of Engineering. This catalog contains information about academic and student life programs and policies. It also includes links to external websites; these are provided as a convenience to the reader and the content contained therein is not part of the catalog.

The University reserves the right to change without notice any programs, policies, requirements, or regulations published in this catalog. The catalog is not to be regarded as a contract.
About the Catalog

Welcome to the 2013-2014 academic catalog for the Johns Hopkins University full-time undergraduate and graduate programs in the Zanvyl Krieger School of Arts and Sciences and the G.W.C. Whiting School of Engineering. This catalog contains information about academic and student life programs and policies. It also includes links to external websites; these are provided as a convenience to the reader and the content contained therein is not part of the catalog.

The University reserves the right to change without notice any programs, policies, requirements, or regulations published in this catalog. The catalog is not to be regarded as a contract.
About the University

The Unique Appeal of Johns Hopkins

The fusion of learning and research is the hallmark of graduate and undergraduate study at the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering of The Johns Hopkins University. The catalog contents represent the university’s unique intellectual life and educational philosophy. The academic programs described here, and the faculty who teach them, constitute the strengths that have long distinguished Hopkins as a private, selective institution.

The unique educational philosophy of Johns Hopkins was first articulated more than a century ago by Daniel Coit Gilman, the university’s first president. Gilman believed that the highest quality education can only be carried out in a research environment, and that the best training, whether undergraduate or graduate, takes place under the supervision of an active researcher. This belief in the inseparability of education and research has become the distinguishing feature of the university’s academic programs. In both the School of Arts and Sciences and the School of Engineering, undergraduate education, graduate education, and the conduct of primary research are interrelated in an organic way. There has never been a separate undergraduate college at Hopkins.

This educational philosophy has also led to the remarkably low student to faculty ratio on the Homewood campus, for it requires the kind of close interaction between faculty and students that occurs in small seminars, in the supervision required for independent projects, or in the research laboratory. Academic requirements for undergraduates are highly flexible and designed to enhance rather than restrain creativity. Graduate and undergraduate students are largely free of university-wide curricular requirements, so that every scholar can proceed at his or her own speed. As a result, many Hopkins undergraduates quickly find themselves enrolled in advanced seminars, engaged in independent study projects, or incorporated into research teams with faculty, graduate students, and postdoctoral fellows. Courses that focus on some well-defined objective in depth are more characteristic of the Hopkins curriculum than broad introductory surveys. Upper-level courses are heavily attended by both undergraduates and graduates in a continuation of the Hopkins tradition of relaxing the distinction between the two groups.

Homewood Campus

The Zanvyl Krieger School of Arts and Sciences and the G.W.C. Whiting School of Engineering, the two divisions represented in this catalog, are the heart of a small but unusually diverse coeducational university. These Homewood schools are located on a wooded, 140-acre campus of great beauty in a residential area of north Baltimore. Originally the home of Charles Carroll Jr., son of a signer of the Declaration of Independence, the Homewood estate was given to the university in 1902. The Faculty of Philosophy began instruction on the campus in 1915.

While the number of academic programs has grown substantially since that time, the schools of Arts and Sciences and Engineering have managed to maintain a small student body and a low student-faculty ratio. They presently have a combined enrollment of approximately 4,980 undergraduates, 1,840 graduate students, and 230 postdoctoral fellows, and a combined faculty of more than 450.

History and Divisions

History of the University

Privately endowed, The Johns Hopkins University was founded in 1876 as the first true American university on the European model: a graduate institution with an associated preparatory college, a place where knowledge would be created and assembled, as well as taught. The men and women on the Hopkins faculty achieve a balance between their activities in scholarship and research and their commitment to teaching. Their active involvement as leaders in their professional fields cannot help but benefit their students.

Divisions of the University

The university is comprised of 10 divisions, nine of which are degree-granting schools. The schools of Arts and Sciences and Engineering share the Homewood campus. The School of Education also offers courses at Homewood, as well as in Columbia, downtown Baltimore, and Montgomery County. The Advanced Academic Programs of the Krieger School of Arts and Sciences offers courses in Washington, as well as in Montgomery County and at Homewood. The Engineering for Professionals Program offers courses in multiple locations throughout the Baltimore/Washington region as well as online. The Carey Business School offers courses at Baltimore Harbor East, Columbia, Montgomery County, and Washington, D.C. The schools of Medicine and Public Health are in East Baltimore, next to the renowned Johns Hopkins Medical Institutions (JHMI) and in 1984 these two schools were joined by the School of Nursing. The Peabody Institute, one of the leading professional schools of music in the United States, became a formal affiliate of the university in 1977. It is located in the historic Mount Vernon section of Baltimore, about one mile from the Homewood campus. The Paul H. Nitze School of Advanced International Studies (SAIS) is in Washington, D.C., with centers for foreign study in Bologna, Italy, and Nanjing, China. The one university division that does not offer formal courses is the Applied Physics Laboratory (APL), noted for its contributions to the applied sciences in a variety of research fields. APL headquarters are midway between Baltimore and Washington.

Accreditations

The Johns Hopkins University is accredited by The Middle States Association of Colleges and Schools, Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104-2680.

The following Bachelor of Science programs in the Whiting School of Engineering are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET): Biomedical Engineering, Chemical and Biomolecular Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics, Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering.

The Bachelor of Science program in Computer Science is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

Graduation Rates

In compliance with the federal Student Right-to-Know Act of 1990 (Public Law 101-542, Sec. 668.46), the Johns Hopkins University provides the
following information to prospective and currently enrolled undergraduates in the schools of Arts and Sciences and Engineering:

<table>
<thead>
<tr>
<th>Entering Freshman Class, September 2006: 1207</th>
</tr>
</thead>
<tbody>
<tr>
<td>returning as sophomores</td>

<tr>
<td>graduating within 4 years</td>
</tr>
<tr>
<td>graduating within 5 years</td>
</tr>
<tr>
<td>graduating within 6 years</td>
</tr>
</tbody>
</table>

Questions about these data should be addressed to the Office of Institutional Research, 130 Garland Hall, 410-516-4107.

Libraries

University Libraries

The Johns Hopkins library network includes the principal research library on the Homewood campus as well as libraries specializing in medicine, public health, music, and international relations, and earth and space science located on other JHU campuses. Regional campus librarians serve the centers operated by the Carey Business School, the School of Education, the Krieger School of Arts and Sciences, the Whiting School of Engineering, and the Bloomberg School of Public Health. In addition to the print resources available to all students and faculty in these distributed collections, the libraries provide 24/7 access to a rich collection of electronic resources, including over 120,000 print and e-journals and more than 900,000 full-text electronic books. Students have access to all of the libraries throughout the university.

Sheridan Libraries

The Sheridan Libraries encompass the Brody Learning Commons, the Milton S. Eisenhower Library and its collections at the John Work Garrett Library, the Albert D. Hutzler Reading Room, the George Peabody Library, and the Montgomery County and Washington, D.C. regional sites.

Brody Learning Commons

Opened in summer 2012, the Brody Learning Commons is a 24/7 space that connects on all floors to the Milton S. Eisenhower Library and provides 16 group study rooms, 6 teaching and seminar rooms, a 100 seat quiet reading room, teaching and research space for the Department of Special Collections, and a laboratory for the Department of Conservation and Preservation. The building is designed to foster collaborative research and learning and features a robust technology infrastructure.

Eisenhower Library

Located on the Homewood campus, the Milton S. Eisenhower Library is Johns Hopkins’ main research library and a university-wide resource supplementing the specialized libraries on other campuses.

The library’s materials and services reflect the development and increasing diversification of resources used for teaching, research, and scholarship. Librarians with subject expertise serve as liaisons to the academic departments, build electronic and print collections, and provide research consultation and instructional services to meet the teaching and research needs of the university.

The collection includes over 4 million printed volumes, more than 120,000 print and electronic journals, 15,000 videos and DVDs, more than 900,000 electronic books, and over 211,000 maps.

Complementing the library’s general research collections are numerous specialized collections. The U.S. government documents collection is particularly strong in congressional and statistical material. United Nations e-resources and materials from international organizations are also accessible. Geographic Information System software is available for compiling and analyzing demographic data.

Other special collections materials include rare books, manuscripts, archives, sheet music, maps, and photographs. Notable digital collections provide enhanced access to American sheet music and medieval manuscripts. For more information, visit library.jhu.edu/specialcollections.

The Peabody Library

The George Peabody Library is located in downtown Baltimore at Mount Vernon Place. The 300,000 volume collection is remarkable for its depth and breadth and includes 15th-century books, Greek and Latin classics, British and American history and literature, works on decorative arts and architecture, the history of science, and an extensive map collection. The library’s magnificent interior features an atrium surrounded by five tiers of ornamental cast-iron balconies. An exhibition gallery is located adjacent to the reading room. For more information, visit guides.library.jhu.edu/specialcollections.

The Garrett Library

The John Work Garrett Library is located at Evergreen Museum, built in the 1850s, and now one of the university’s house museums. Located approximately one mile north of the Homewood campus, the Garrett Library’s 30,000 volume collection contains 16th- and 17th-century English literature and history, works on natural history, architectural history, American colonial travel and history, and maps.

Washington Metropolitan Regional Library Services/System

The Montgomery County Campus Library, located on the university’s Rockville campus, and the Washington, D.C. Resource Center, located at 1717 Massachusetts Avenue, serves the needs of primarily part-time graduate students in business, education, engineering, arts and sciences, and public health. These libraries offer access to the university libraries’ extensive collections of print and electronic resources and maintain small onsite print, video, and DVD collections. Professional staff provide services for faculty and students studying at the centers or online.

Albert D. Hutzler Reading Room

The Hutzler Reading Room, located in Gilman Hall on the Homewood campus, is a popular quiet study space.

Welch Library

The William H. Welch Medical Library provides services and resources that support research, teaching, and patient care at the Johns Hopkins Medical Institutions. WelchWeb (welch.jhmi.edu/ (http://welch.jhmi.edu)) guides users to a rich array of electronic information resources and library services.

Welch’s online medical collection includes subscriptions to over 7,000 electronic journals, 8,500 electronic books and 400 databases; it is tailored to medicine, public health and nursing; and it is available to Johns
Hopkins faculty, students and staff anywhere in the world. Because all the Johns Hopkins Libraries share a common online library, Welch patrons also enjoy full access to an additional 100,000 journal subscriptions, 1,300 databases, 900,000 electronic books and a total of 3.7 million print volumes. For patrons who need materials in the print collection the Document Delivery service scans the print versions and deliver electronic copies to patrons at their desktops. Materials outside of the library’s collections are requested through the InterLibrary Loan service.

The Welch Library offers a full range of information services including consultation with patrons on their literature and data needs, classes, online tutorials and interlibrary loan. Welch’s service strength lies in its customized Informationist service, delivered wherever our patrons are outside of the library building: at their points of research, teaching or clinical care. Embedded within departments, Welch Medical Library’s clinical, public health and basic science informationists provide expert services. By integrating into their patrons’ workflow, Informationists are able to answer questions quickly, fill information needs effectively, and act as information experts on research and care teams.

The Friedheim Library

The Arthur Friedheim Library of the Peabody Institute is located on the Plaza level of the Peabody campus at 17 E. Mount Vernon Place. University bus service brings the resources of this distinguished music library of over 150,000 books, journals, and musical scores; 45,000 audiovisual materials; and 5,500 linear feet of archival material and special collections within easy reach of the Homewood community. For more information, visit musiclibrary.peabody.jhu.edu.

Applied Physics Laboratory–Information Group

The Applied Physics Laboratory is located in Howard County. The Information Group of the Information Technology Service Department conducts information research and manages special collections that support Laboratory staff in their work with the Department of Defense, NASA, and other government agencies.

The Mason Library

The Sydney R. and Elsa W. Mason Library of the Paul H. Nitze School of Advanced International Studies (SAIS) in nearby Washington, D.C., offers comprehensive library services to SAIS students, faculty, and staff. The library has a specialized collection in international relations of 110,000 print volumes, over 900 print journals and newspapers.

In addition to the Mason Library in Washington, SAIS also has libraries in Italy and China. The Robert H. Evans Library at the SAIS Bologna Center in Italy supports the full-time graduate program in international relations and contains approximately 75,000 volumes and 1,000 periodicals.

The Hopkins-Nanjing Center for Chinese and American Studies Library in Nanjing, China, supports the graduate-level program in Chinese and American studies. The only uncensored, open-stack library in the People’s Republic of China (Hong Kong excepted), the Hopkins Nanjing Center Library houses approximately 80,000 volumes and 400 periodicals in English and Chinese.

For more information, visit sais-jhu.edu/library.

Public Libraries

Baltimore has an excellent system of public libraries. Especially noteworthy in downtown Baltimore is the Enoch Pratt Free Library prattlibrary.org which features a Maryland collection. The library of the Maryland Historical Society specializes in Maryland history and genealogy (mdhs.org).

The vast collections of the Library of Congress (loc.gov) and the National Library of Medicine (nlm.nih.gov) in Washington are also accessible, either through interlibrary loan or on-site visits.

Research, Information, and Academic Centers

The Arrighi Center for Global Studies

The Arrighi Center for Global Studies was established in 2012 as a transdisciplinary research center devoted to the study of urgent contemporary problems arising from processes of globalization. It expands upon the work done in the previous 40 years by the Institute for Global Studies in Culture, Power, and History and the Program in Atlantic History, Culture, and Society. The Center is named in memory of Giovanni Arrighi (1937–2009), former Director of the Institute for Global Studies and George Armstrong Kelly, Professor of Sociology.

The objective of the Center is to undertake a serious rethinking of dominant intellectual paradigms combined with rigorous empirical research on themes related to contemporary processes of globalization including financial crises, environmental sustainability, shifts in the geographical center of world-economic growth and political power, the crisis of welfare states and the rise of a politics of austerity, and the emergence of new forms of war, violence, and social conflict.

The Arrighi Center aims to serve as a hub for international collaboration between Hopkins faculty, graduate students, advanced undergraduate students, and counterparts from around the world, especially Asia, Africa, Latin America, and the Middle East. The Center carries out its mission through various activities including sponsoring research working groups; organizing seminar series, workshops, and mini-conferences; hosting post-doctoral fellows and visiting scholars from around the world; establishing partnerships with local civil society organizations working in the Center’s main areas of concern; and promoting transdisciplinary graduate and undergraduate training through collaborative research projects and curriculum development.

For more information visit http://arrighi.jhu.edu.

Biocalorimetry Center

The Biocalorimetry Center is dedicated to the development and application of new technologies aimed at measuring the energetics associated with protein interactions and the development of thermodynamic-based algorithms for drug design. The algorithms developed at the Center are widely acknowledged to be at the forefront of the available technologies for drug development.

During the last decade, extraordinary advances have been made in technologies for the structure determination of biological macromolecules. The structures of thousands of protein molecules have been determined at atomic resolution, opening the doors to new developments in our understanding of biological systems. Since all biochemical reactions, including the binding of pharmaceutical drugs to their targets, are controlled by their energetics, knowledge and manipulation of the energetics at the atomic level provides the researcher with an unprecedented degree of control over biological binding reactions. Having access to the overall and atomic-level partitioning of the binding
energetics effectively accelerates the design of new and more effective drugs toward specific targets.

The research work at the Biocalorimetry Center involves the application of state-of-the-art microcalorimetric instrumentation to biological systems, the development of new computational algorithms for thermodynamic analysis, the development of molecular computation models aimed at dissecting the binding energetics of drug/protein interactions, and the development of thermodynamic based strategies for drug design and optimization. The Biocalorimetry Center collaborates with academic and pharmaceutical laboratories around the world.

Center for Astrophysical Sciences

The Center for Astrophysical Sciences (CAS) is an organization created at the Johns Hopkins University in 1985 to promote and coordinate the development of research in astrophysics and closely related sciences on the campus, with the goal of establishing the university as a world leader in the field. Its current director is Professor Timothy Heckman. Complementing the activities of the Space Telescope Science Institute, also on the university's Homewood campus, CAS fosters a broad range of scientific activities in theoretical, experimental, and observational astrophysics and planetary space science.

Members of the center come primarily from the faculty and research staff of the university’s department of Physics and Astronomy. At present, the center has about a hundred members, engaged in a wide variety of research projects ranging from laboratory studies and spectroscopy of the Earth’s upper atmosphere to observational and theoretical investigations of the origin and destiny of the universe.

Hopkins is one of a small number of universities that builds and flies space instrumentation. Hopkins astronomers helped build the Faint Object Spectrograph for the Hubble Space Telescope (HST) and one of the two instruments (COSTAR) that corrected the spherical aberration in the HST’s primary mirror. They then used the corrected HST instruments to demonstrate the presence of a 2 billion solar mass black hole in the center of M87.

The Hopkins Ultraviolet Telescope (HUT) flew twice aboard the space shuttle, obtaining spectra of active galaxies, hot stars, supernova remnants, and planets. The most significant result obtained was the first measurement of the amount of ionized helium in the intergalactic medium. Ionized helium is an important tracer of the evolution of structure in the universe, and this measurement is the first hard constraint for current cosmological models.

From 1999 through 2007, CAS operated the Far Ultraviolet Spectroscopic Explorer (FUSE), a satellite for high-resolution spectroscopy. FUSE observed with much higher sensitivity and spectral resolution than HUT. Its primary scientific accomplishments were to measure the deuterium abundance in different environments throughout the galaxy, a key parameter in models of Big Bang cosmology, and to determine the distribution of hot gas in the interstellar medium of our own galaxy.

CAS led the development of the Advanced Camera for Surveys (ACS), which was launched aboard the space shuttle Columbia on March 1, 2002. A CAS team of scientists used ACS to study the evolution of galaxies and clusters of galaxies at high redshift, investigate Jupiter and Io, and discover planets and protoplanetary disks around nearby stars. ACS increased the discovery efficiency of the HST by a factor of 10 or more in the blue and the near infrared. ACS has been a major contributor in our expansion of knowledge about the universe.

The Wilkinson Microwave Anisotropy Probe (WMAP) was a major NASA mission led by CAS. WMAP’s observations of the subtle structures present in the cosmic microwave background (the universe at an age only 300,000 years after the Big Bang) have resoundingly substantiated the Big Bang model and confirmed the existence of Dark Energy WMAP ushered in the era of “precision cosmology”.

CAS was a major partner in the Galaxy Evolution Explorer (GALEX) satellite. GALEX surveyed the entire sky for stars, galaxies, and quasars that are bright in the ultraviolet. GALEX helped determine the history of star formation in galaxies at redshifts from 0 to 2, and identify one million quasars. The GALEX data archive is been developed and managed in a major part by JHU astronomers and computer scientists.

CAS’s NASA-supported sounding rocket program is one of only a small number of such programs nationwide. They offer students the opportunity to gain hands-on experience building payloads for sub-orbital rocket flights at White Sands, New Mexico.

CAS is involved in a number of ways with the JHU Applied Physics Lab (APL) in areas of space science and technology. Examples include the “New Horizons” mission to Pluto which is scheduled to arrive at Pluto in July 2015, and a project to develop the next generation of CMOS detectors that have application to both optical and X-ray astronomy.

CAS is also heavily engaged in major programs in ground-based astronomy, particularly those that involve large surveys. This involvement includes both the scientific exploitation of these surveys but also the development of the advanced data-mining tools that allow scientists to use these vast databases to make discoveries.

CAS plays a leading role in the Virtual Astronomical Observatory (VAO), which is uniting the astronomical databases of many earthbound and orbital observatories. This project is taking advantage of the latest computer technology, data storage, and analysis techniques to build the framework for the Virtual Observatory, a facility that will organize all available astronomy data and literature into a coherent whole, regardless of differences in data formats. The VOs will be accessible by anyone, from anywhere on the Internet. The National Science Foundation, which has started this project with a five-year, $10 million Information Technology Research grant titled “Building the Framework of the National Virtual Observatory,” announces that this will “put the universe online.” The system will provide an efficient synthesis of data over a wide range of wavelengths and time intervals, from many different observatories and instruments. It will open up new areas of research that are currently impractical or impossible. The Virtual Observatory will provide a unique and powerful base for teaching astronomy, for demonstrating the process of scientific discovery to students and the public, and for sharing the benefits of new developments in information technology.

CAS is an active partner in the Sloan Digital Sky Survey (SDSS). CAS members served as the CEO and Program Manager of the SDSS project during its construction phase, built the two spectrographs for the 2.5-m SDSS telescope, and designed the data structure and software for the SDSS data archive. SDSS has surveyed one-quarter of the sky in five colors, providing the raw data from which a catalog of 100 million objects, associated photometric parameters, and postage stamp images has been produced; spectra have also been taken of 1 million galaxies and 100,000 quasars. These data have been to measure the structure of the universe and the formation and evolution of galaxies and black holes. The SDSS is currently undertaking a new survey of our Milky Way Galaxy, is also measuring the properties of Dark Energy, and is searching for planets orbiting other stars.
CAS is also a member of the Pan-STARRS1 project which built on the heritage of the SDSS by conducting a series of multicolor imaging surveys of the sky using the world’s most advanced astronomical “gigapixel” camera and a widefield 1.8-m telescope in Hawaii. Pan-STARRS1 has opened the time domain to a wide range of scientific areas, including everything from the detection of near-Earth asteroids to the detection of extra-solar planets, to the determination of the cosmic evolution of Dark Energy. CAS members are playing leading roles in several of the science-driven key projects and are playing a key role in the development of the massive Pan-STARRS data archive.

CAS has joined the Subaru Prime Focus Spectrograph (PFS) project, which over the next several years will build a 3-channel spectrograph that will cover the full wavelength range from 380 to 1300 nm using 2400 robotically deployed fibers at the prime focus of the 8.2 meter Subaru Telescope at Mauna Kea. Over a five year program beginning in 2017 PFS will undertake a 300 night program that encompasses cosmology, galaxy evolution, and Galactic archaeology. PFS will be far and away the most powerful optical/near-IR spectrograph in the world for undertaking large surveys.

CAS is a member of the Large Synoptic Survey Telescope, recently endorsed as the highest-priority new large project in ground-based astronomy by the National Academy of Sciences decadal survey “New Worlds, New Horizons in Astronomy & Astrophysics”. CAS members served on both the main decadal survey panel and its program prioritization panel for Electromagnetic Observations from Space.

CAS is home to a major effort in experimental cosmology, focused primarily on observations of the cosmic microwave background (CMB). They have lead roles in the NSF-funded Cosmology Large Angular Scale Surveyor project, Atacama Cosmology Telescope, and the Atacama B-mode Search project.

Members of CAS also undertake a vibrant and wide-ranging program in theoretical and computational astrophysics with topics ranging from the formation and dynamics of planetary systems, to the properties of supermassive black holes, to the nature of dark energy.

Graduate students at JHU participate in all aspects of research within the center. Students at JHU, in calibrating optics and detectors for space instruments and then using data from these instruments for their thesis, are working at the forefront of observational astrophysics.

Center for Imaging Science (CIS)

The CIS was established in 1998 as a research center at The Johns Hopkins University, Whiting School of Engineering. The CIS brings together a diverse group of scientists whose work is highly interdisciplinary, revolves around the symbolic interpretation of high-dimensional data, and rests on theoretical advances in mathematics and statistics, traditional signal and systems processing, and information theory.

The director of CIS is Dr. Michael I. Miller. CIS faculty has its principal appointments across a wide range of academic units, including Computer Science (Greg Hager), Applied Mathematics and Statistics (Donald Geman, Bruno Jedynak, Carey Priebe, Laurent Younes), Electrical and Computer Engineering (John Goutsias), and Biomedical Engineering (Patrick Barta, Michael Miller, Tilak Ratnanather, Rene Vidal). More information about participating faculty and their research can be found at cis.jhu.edu.

Research: Researchers at CIS conduct foundational and multidisciplinary research in modern imaging science, which is viewed in very broad terms. The focus is on the development of the mathematical and algorithmic foundations of imaging science, including image formation, analysis, representation, synthesis, and compression and especially image understanding including specific applications, for instance to neuropsychiatry and machine vision.

Education: The educational program at the CIS is embedded within the newly-created Institute for Computational Medicine, which offers a multi-year plan for a coherent, cross-departmental program of study in imaging science, accounting for necessary preparation in mathematics, computer science and classical signal and image processing.

Technology Transfer: The CIS faculty is also involved in student consulting, patent protection, software licensing and industrial collaboration. In addition, the CIS sponsors weekly seminars presented by researchers who are leaders in imaging.

Visit the Center for Imaging Science website for more information at cis.jhu.edu or contact Erika.Lance@jhu.edu.

Center for Language and Speech Processing

The Center for Language and Speech Processing (CLSP), housed in Hackerman Hall, was established in the Whiting School of Engineering in 1992. CLSP receives substantial support from the federal government to promote education and research in the science and technology of language and speech. Multidisciplinary in nature, the center has close ties to faculty in the Whiting School of Engineering, the Krieger School of Arts and Sciences, and the School of Medicine. CLSP also maintains relations with industrial, academic, and governmental organizations all over the world.

CLSP maintains a comprehensive research and education program leading to a Ph.D. degree. Research is conducted by faculty, and graduate students affiliated with five associated academic departments: Biomedical Engineering, Cognitive Science, Computer Science, Electrical and Computer Engineering, and Applied Mathematics and Statistics. The research involves work in all aspects of language and speech science and technology, with fundamental studies under way in areas such as language modeling, pronunciation modeling, natural language processing, machine translation, neural auditory processing, acoustic processing, optimality theory, and language acquisition. Graduate students interested in conducting research at the center must first be admitted to a graduate program in one of the departments associated with CLSP.

The center coordinates a full complement of courses dealing with language or speech science and technology, taking advantage of the latest biological, physiological, biomedical, psychological, cognitive, linguistic, mathematical, and engineering resources available. CLSP regularly updates the subject material and augments the course offerings to reflect the changing technology. As part of its educational mission, the center offers a wide range of lectures from prominent speakers throughout the academic year and organizes summer research workshops. Selected for their current achievements, expository ability, and lecture subjects, internationally known speakers present the seminars. The workshop is an intensive six-week research effort by CLSP affiliates and participants from other universities, industry, and the federal government.
CLSP serves as a centerpiece for world-class research at Johns Hopkins in speech and language processing. Visit the CLSP website for more information at clsp.jhu.edu.

Center for Social Organization of Schools

The Center for Social Organization of Schools (CSOS) is an educational research center at the School of Education, funded through federal grants from the Department of Education, National Institutes of Health and other agencies, as well as private foundations and organizations. The center has two primary objectives:

1. to develop scientific knowledge about how schools affect their students and
2. to use this knowledge to develop better school practices and organization.

The center focuses on K-12 programs in high-poverty, low-achieving schools throughout the country, especially the comprehensive Talent Development secondary reform model. The common objectives of the center’s programs are to apply scientific designs, measures, and methods to provide clear tests of the true impact of new educational approaches and to provide empirical evidence on how to improve the education of students in high-poverty schools.

CSOS also includes the Center on School, Family, and Community Partnerships. The mission of this center is to conduct and disseminate research, development, and policy analyses that produce new and useful knowledge and practices that help families, educators, and members of communities to work together to improve schools, strengthen families, and increase student success. Major projects include the National Network of Partnership Schools, which includes schools, districts, and state educational agencies that are working to develop partnerships.

Work at the center maintains a balance among basic research, studies of specific problems in schools, and development of useful products and information for school use. The Talent Development secondary implementation center works with more than 50 middle and high schools across the country, providing professional development, curriculum materials, and school organization assistance, as well as the broader services of school transformation plans.

In partnership with the Baltimore City Public Schools, CSOS opened the Baltimore Talent Development High School in September 2004 with approximately 150 ninth-graders. The school graduated its first class in 2008 with a graduation rate of more than 80 percent.

Curriculum developers continue to develop social studies, math, and language/literature materials for both middle and high school courses used by many schools across the country. A new social and study skills course, Mastering Middle Grades, addresses issues that keep adolescents from adjusting to, and succeeding in, grades 6-8.

The center’s research serves a variety of audiences: scientists in the sociology of education and the social psychology of the learning process, education policymakers, and state and local education personnel all the way into the classroom.

CSOS also houses The Baltimore Education Research Consortium (BERC), a partnership of Johns Hopkins, Morgan State University and Baltimore City Public Schools (baltimore-berc.org) and the Everyone Graduates Center (every1graduates.org). BERC’s purpose is to coordinate and disseminate long- and short-term data analysis and research to help Baltimore students and their families. The Everyone Graduates Center brings together the research and best practices of all programs at CSOS, in an attempt to identify and eliminate the hurdles that keep students from graduating from high school ready for college, career training and a productive civic life.

CSOS is also home to Diplomas Now (diplomasnow.org) a new collaboration that helps the toughest middle and high schools in America’s largest cities ensure that every student graduates ready for college or career. Diplomas Now is a partnership among Talent Development, City Year and Communities In Schools; it is the first fully integrated approach to improving a school’s curriculum and instruction, while providing the right students with the right support at the right time.

In 2010, Diplomas Now won a federal Investing in Innovation grant to expand this program to 60 more schools in the next four years. In 2012–2013, Diplomas Now worked in more than 40 schools in 12 cities.

Center for Talented Youth

A global leader in gifted education, The Johns Hopkins University Center for Talented Youth (CTY) identifies and develops the talents of the most advanced precollege learners worldwide. As part of Johns Hopkins, CTY helps fulfill the university’s mission of preparing students to make significant future contributions to our world.

CTY was founded in 1979 by Dr. Julian Stanley, then professor of psychology at Johns Hopkins, based on his pioneering work from 1971 onward with precocious middle school students. His work built the foundation for the Talent Search model, which uses above-level testing to identify students whose abilities can benefit from the additional challenge and intensity of CTY’s summer programs (9,450 enrollments in 2012) and CTY Online courses (12,800 enrollments in 2012). Rounding out the Center’s services are family learning programs, a magazine for gifted students, specialized testing, college counseling, and services to profoundly gifted young people offered through the Study of Exceptional Talent (SET).

CTY makes special efforts to recruit and serve top students from groups historically underrepresented in gifted programs. The Center also carries out research to inform and improve education for advanced learners. More recently, CTY’s approach is being adopted in countries around the world. CTY has a main office located in Baltimore and a regional office in Los Angeles.

Chemical Propulsion Information Analysis Center

The Chemical Propulsion Information Analysis Center (CPIAC), continuously operated by The Johns Hopkins University since 1946, is a full-service Department of Defense (DoD) information analysis center in the fields of missile, space, and gun propulsion technologies. The mission of the CPIAC is to serve as the U.S. national clearinghouse for worldwide information, data, and analysis on chemical, electrical, and nuclear propulsion for missile, space, and gun propulsion systems. The CPIAC library contains over 115,000 documents dating from the 1930s.

The technical scope involves collection, analysis, synthesis, and dissemination of scientific and technical information to support research, development, technology, engineering, acquisition, logistics, and maintenance activities carried out by the DoD and their contractors, and appropriate international organizations.
The products and services provided by the CPIAC are thorough, unbiased, and referenced propulsion information and data for the propulsion community in the form of literature and data compilations, technical inquiry responses, technology assessments, publications, propulsion manuals, computer codes, web-based databases, and technical and administrative support of the Joint Army-Navy-NASA-Air Force (JANNAF) Interagency Propulsion Committee and its 11 subcommittees.

A third function of the CPIAC is to perform technical area tasks (TATs) relevant to our core mission. TATs are analytical and technical in nature and are separately sponsored and funded.

Institute for Biophysical Research

The Institute for Biophysical Research was established in 1988. It spans two campuses and includes researchers from four schools. Its mission is focused on collaborative efforts and training in integrative biophysics.

Since its inception, the institute has been interdisciplinary and includes an affiliated NIH predoctoral program (Program in Molecular Biophysics). Associated activities include an annual retreat where groups present their latest work and a well-attended monthly ‘Chalk it Up to Biophysics’ seminar series.

The Institute for Computational Medicine

The Institute for Computational Medicine (ICM) was launched in 2005. The mission of the ICM is to develop quantitative models of human disease, and to apply these models to improve individualized health care. The Institute is based in Hackerman Hall, and consists of one other affiliated center—The Center for Imaging Science. Research is focused in three broad areas. Computational Molecular Medicine is developing new methods for statistical modeling of molecular networks in health and disease, and for discovery of new network-based disease biomarkers. Computational Physiological Medicine is improving the understanding and treatment of disease through development of dynamical systems models. Current research areas are integrative modeling of heart disease to develop improved therapies for preventing life-threatening arrhythmias, systems-level modeling of neuronal networks and their application to develop new therapies for treating motor and seizure disorders, and computational modeling of the microvasculature, the process of angiogenesis, and individualized treatments in cancer. Research in the area of Computational Anatomy is directed at mathematical characterization and computational analysis of anatomic shape and structure, and its variation in health and disease. These methods are being used to identify structural changes in the brain that are early anatomic biomarkers of different neuro-developmental and neuro-psychiatric diseases. Each of these research areas brings together teams of ICM researchers, clinicians, and clinician-scientists to advance individualized medicine.

Institute for Policy Studies

Public Policy, M.P.P. has moved to the Bloomberg School of Public Health, Department of Health Policy and Management. For more information, please visit jhsp.h.edu/academics/degree-programs/ (http://www.jhsp.h.edu/academics/degree-programs) or contact Dr. Carey Borkoski, Assistant Director at cborkoski@jhu.edu.

The Integrated Imaging Center

The Integrated Imaging Center (IIC, jhu.edu/iic), established in 1998, is a Homewood campus microscopy and imaging resource serving the diverse research needs of the Whiting School of Engineering and the Krieger School of Arts & Sciences. It is variously located in Dunning and Olin Halls on the Johns Hopkins University Homewood campus; and it is a close partner with the Institute for NanoBioTechnology. Additionally, it also houses the imaging core for the Engineering in Oncology Center; the Homewood Flow-Cytometry Resource; and the High-Resolution Analytical Electron Microbeam Facility.

As rapid advances have been made in the development of new techniques for cellular, environmental, and materials imaging, the visualization of molecules and proteins at the light and electron microscopic level has become an essential component of any comprehensive study of the natural and engineering sciences. This is because cutting-edge microscopy can provide detailed information on the relative distribution/relationship of molecules within cells and materials that cannot be obtained by any other method. Accordingly, microscopy not only complements but greatly extends the results obtained by other approaches such as biochemical, immunochemical, and analytical methods. Such state-of-the-art tools and methodologies employed regularly by the IIC include fluorescence and laser scanning confocal microscopy; scanning and transmission electron microscopy, cryoTEM, fluorescence correlation spectroscopy, phosphorimaging, and energy dispersive and electron energy loss spectroscopy.

The Center has become an essential partner in numerous research projects with investigators at Hopkins, as well as with other researchers at institutions nationally and internationally. Moreover, the IIC offers both undergraduate and graduate courses in microscopy (as well as regular workshops) as a means of providing to the JHU community training and exposure to the latest, most advanced microscopy techniques, emphasizing the cooperative integration of these techniques with other biological/engineering research tools.

Maryland Space Grant Consortium

Established in 1989, the National Space Grant College and Fellowship Program now consists of 52 partnerships (one in every state, plus the District of Columbia and Puerto Rico) funded by NASA to encourage cooperative university, government, and industry interdisciplinary research, training, and public service aerospace programs; to promote science, mathematics, and technology education; and to recruit and train women and minorities for aerospace careers. One of the partnerships is Maryland Space Grant Consortium. Its membership of ten institutions includes the Johns Hopkins University (Lead Institution) and the JHU Applied Physics Laboratory.

Maryland Space Grant Consortium offers a constantly changing variety of programs. The Earth/Space Science teacher certificate Program for Elementary and Secondary Mathematics and Science Teachers offers training consisting of graduate courses in Earth and space science. The Outreach Programs include a Balloon Payload Program, where students launch payloads to near space on weather balloons.

Undergraduate scholarships and graduate fellowships are provided from NASA and consortium funds for selected students pursuing studies in the space-related subjects. Small amounts of funding for research activities are also available in cases where the proposed research involves students, females, and/or underrepresented minorities, and more than one member institution. To find out more, visit md.spacegrant.org/ (http://www.md.spacegrant.org).
Materials Research Science and Engineering Center (MRSEC)

Nanostructured materials with nanometer-scale entities have created a new area of materials research and made possible device applications that depend on the physical dimensions and intricate structures of these materials. In recent years, magnetic nanostructures have provided some of the most exciting areas for the exploration of new physical phenomena and new technologically important devices such as spin-valve giant magnetoresistance read heads, and magnetic random access memory (MRAM).

The Materials Research Science and Engineering Center (MRSEC) at the Johns Hopkins University (JHU), one of 26 MRSECs funded by the National Science Foundation, is composed of scientists at JHU, Brown University, Carnegie Mellon University, and the National Institute of Standards and Technology (NIST). Research in the center focuses on the science and engineering of magneto electronics. Research areas include:

- Perpendicular spin transport in magnetic tunnel junctions.
- Magnetic nanorings and other novel device architectures.
- Materials with perpendicular magnetic anisotropy
- Spin transfer torque effects
- Organic magnetoelectronic materials.
- Explorations of magnetoelectronic effects in lateral structures.

The research effort encompasses synthesis and processing, characterization of nanostructures, measurements of properties, theoretical modeling, and prototype device fabrication and applications. These five tightly linked components form the research basis of this MRSEC.

The JHU MRSEC also has extensive Education Outreach programs and extensive collaborations with other academic institutions, national labs, and industrial concerns.

Paul B. Rothman  Vice President for Medicine, Frances Watt Baker and Lenox D. Baker Jr. Dean of the School of Medicine, Chief Executive Officer, Johns Hopkins Medicine
Fritz W. Schroeder  Vice President for Development and Alumni Relations
Phillip Spector  Vice President, Strategic Initiatives

**Deans and Directors**

David W. Andrews  Dean of the School of Education
Andrew S. Douglas  Interim Dean of the G.W.C. Whiting School of Engineering
Bernard T. Ferrari  Dean of the Carey Business School
Patricia M. Davidson  Dean of the School of Nursing
Michael J. Klag  Dean of the Bloomberg School of Public Health
Vali R. Naṣr  Dean of the Paul H. Nitze School of Advanced International Studies
Katherine S. Newman  James B. Knapp Dean of the Zanvyl Krieger School of Arts and Sciences
Paul B. Rothman  Frances Watt Baker and Lenox D. Baker Jr. Dean of the School of Medicine
Ralph D. Semmel  Director of Applied Physics Laboratory
Jeffrey Sharkey  Director of the Peabody Institute
Winston Tabb  Dean of University Libraries and Museums

**Administrative Officers**

Jonathan A. Bagger  Vice Provost for Graduate and Postdoctoral Programs and Special Projects
James Brierley  Assistant Provost for International Student and Scholar Services
Pamela Cranston  Vice Provost for International Programs
Sean Fahey  Vice Provost for Institutional Research
Caroline Laguerre-Brown  Vice Provost for Institutional Equity
Barbara Landau  Vice Provost for Faculty Affairs
Cathy Lebo  Assistant Provost for Institutional Research
David Phillips  Vice Provost for Admissions and Financial Aid
Kevin G. Shollenger  Vice Provost for Student Affairs
Philip Tang  Assistant Vice Provost
Scott L. Zeger  Vice Provost for Research

**Arts and Sciences, Engineering, Homewood Academic Services, and Homewood Student Affairs**

**Zanvyl Krieger School of Arts and Sciences**

Katherine S. Newman  James B. Knapp Dean of the Zanvyl Krieger School of Arts and Sciences
Richard E. McCarty  Dean Emeritus
Gregory F. Ball  Vice Dean for Science and Research Infrastructure
Pier Larson  Acting Vice Dean for Humanities, Social Sciences, and Graduate Programs
Steven R. David  Vice Dean for Undergraduate Education
William Eggington  Vice Dean for Centers & Interdepartmental Programs and Graduate Education
Kathleen M. Burke  Associate Dean for Graduate and Professional Programs
Daniel A. Cronin  Senior Associate Dean for Finance and Administration
Debra G. Lannon  Associate Dean of External Affairs
James Fry  Assistant Dean for Academic Advising

**G.W.C. Whiting School of Engineering**

Andrew S. Douglas  Interim Dean for the G.W.C. Whiting School of Engineering
Edward R. Scheinerman  Vice Dean for Education
James B. Aumiller  Senior Associate Dean for Finance and Administration
Dexter G. Smith  Associate Dean, Engineering for Professionals
Megan Howie  Associate Dean for Development and Alumni Relations
Hedy V. Alavi  Assistant Dean for International Programs
Janet H. Weise  Assistant Dean for Academic Advising
Christine Newman  Assistant Dean for Engineering Education Outreach
Daniel A. Horn  Assistant Dean, Engineering for Professionals
Christine Kavanagh  Director of Graduate Academic Affairs

**Homewood Academic Services and Homewood Student Affairs**

Susan K. Boswell  Dean of Student Life
Joshua McIntosh  Dean of Academic Services
Dorothy F. Sheppard  Associate Dean of Student Life
H. Carol Mohr  Associate Dean of Housing, Residential Life and Dining Services

University Commencement
Changes for 2014-2015 Academic Year

Changes effective for the 2014-2015 academic year.

• 100 Credit Hour Policy (p. )
  • Distribution Requirements (p. )

100 Credit Hour Policy

• New residency requirement of 100 credits and implications for UNOFFICIAL transcript:

  • Effective fall 2014, ASEN UG students must earn a minimum of 100 Hopkins credits to graduate. Students will be able to use AP credits and transfer credits to satisfy the 120 credits required for their degree program. The maximum number of transfer credits will be 12. So for a degree program that requires 120 credits, the formula for implementing this policy would be: \( AP + T \times \) of CREDITS REQUIRED FOR DEGREE PROGRAM MINUS 100. (CONSTANT: T \# 12)

  • Maximum range of AP credits for 120 credit degree = 20 Our policy will be to bring in all of the AP credits that we normally accept, but EFFECTIVELY we will only apply a maximum of 20 to degree program.

  • Maximum range of AP credits for 128 credit degree = 28

  • UNOFFICIAL transcript will need to be modified to include the following data points at the end of each semester: HOPKINS credits earned AND TOTAL (AP + T + Hopkins) credits earned.

Distribution Requirements

• All KSAS students are required to earn a minimum number of credits in three different academic areas. The academic areas in the Hopkins curriculum are humanities (H), natural sciences (N), social and behavioral sciences (S), quantitative and mathematical sciences (Q), and engineering (E).

  • Currently, students must earn 30 credits in courses outside their major area:
    • Twelve credits must be in N, Q, and/or E areas
    • Eighteen must be in H and/or S areas.

  • Next fall, students will be required to earn 27 credits divided thus:
    • Nine credits must be in the humanities (H)
    • Nine credits must be in the social sciences (S)
    • Nine credits must be in natural science (N), quantitative and mathematical sciences (Q), and/or engineering (E).

  • all students will be required to take nine credits in the humanities and nine credits in the social sciences.

  • Previously, students could take all 18 credits in one area (H) or the other (S). This revision forces nine credits in both areas.

  • The requirement to complete 12 writing intensive credits remains constant.

### Notes on the Degrees

1. Candidates for the master’s as a terminal degree are accepted, but financial aid generally is not available.
2. Candidates for the master’s as a terminal degree may be accepted in special cases, but financial aid generally is not available.
3. Candidates are admitted to the Ph.D. program only, but the M.A. is awarded to students who (a) complete one year of courses, pass an examination in one foreign language, and submit an acceptable master's essay to a member of the faculty or (b) complete two years of courses and pass an examination in two foreign languages. 
4. Candidates for the master's as a terminal degree are not accepted. However, a student is awarded a master's degree en route to the Ph.D. after the successful completion of the Graduate Board oral examination. 
5. A master of science in engineering or a master of materials science and engineering are offered. 
6. See department listing. 
7. M.S. available only to Arts and Sciences baccalaureate students. 
8. M.A. only. 
9. B.A. only. 
10. B.A. or B.S. available. 
11. Candidates are admitted to the Ph.D. program only, but the M.A. is awarded to students who complete requirements set by the director of graduate studies. 
12. Applicants must currently be JHU undergraduate. 
13. Within the Department of Biomedical Engineering. 
14. Within the Department of Applied Mathematics and Statistics. 
15. Within the School of Medicine. 
16. Master's degree awarded by the School of Advanced International Studies. 
17. Master’s degree awarded by the School of Public Health. 
18. Qualified Undergraduates from any AS or EN program are eligible to apply. 

Minors

Part-time Graduate Programs in Arts and Sciences and Engineering

Advanced Academic Programs
Drawing upon over a century of research and teaching expertise, the Krieger School of Arts and Sciences Advanced Academic Programs offers advanced instruction in scientific fields of current interest and innovative graduate study in the humanities and social sciences. While based on the latest scientific and scholarly knowledge, course work emphasizes the application of such knowledge to practical problems. Classes are designed to provide individual attention, relevant application, and to encourage student contribution. Courses are offered on a part-time basis at the Homewood campus in Baltimore; the Montgomery County Campus in Rockville, MD; the Arts and Sciences Washington Center in Washington, D.C.; and online. Most degree programs in AAP may be completed partially or fully online. The School of Arts and Sciences recognizes the intellectual strength and education requirements of working adults and offers master’s degrees through the Advanced Academic Programs. Students can earn their master’s degree in: 
Applied Economics 
Bioinformatics 
Biotechnology 
Biotechnology Enterprise and Entrepreneurship 
Communication 
Energy Policy 
Environmental Sciences and Policy 
Geographic Information Systems 
Government 
Global Security Studies 
Liberal Arts 
Museum Studies 
Public Management 
Regulatory Science 
Writing 

There are also a variety of certificates and concentrations from which to choose, including certificates in: 
Biotechnology Education 
Biotechnology Enterprise 
Geographic 
National Security Studies 
Nonprofit Management 
Post-master’s Certificate in Sequence Analysis and Genomics 
Health Science Intensive Concentration 
AAP also has a number of dual MBA programs with the Carey Business School. 

Further information, admission details, and catalogs may be obtained by phone (202) 452-1940, Email to aapadmissions@jhu.edu, or by visiting advanced.jhu.edu.

Johns Hopkins Engineering for Professionals
Engineering began at Hopkins in 1913, when university leaders decided to establish a curriculum that focused on professional education but included significant exposure to the liberal arts and scientific inquiry. Fostering interdisciplinary creativity, this unique approach to engineering education was in turn emulated by many engineering schools throughout the United States. 

Over the intervening decades, thousands of working engineers and scientists earned engineering degrees at Hopkins through part-time study, achieving professional goals without interrupting their careers. That tradition continues today through the Whiting School’s Engineering for Professionals program, which offers part-time graduate courses in 15 disciplines that address industry trends and the latest advances in engineering and applied science. Classes are scheduled at convenient times during late afternoons and evenings and on Saturdays at campuses throughout the Baltimore-Washington region, including Aberdeen, Baltimore, Elkridge, Laurel, Rockville, Southern Maryland, Washington, D.C., and Crystal City, VA. Courses are also available online.
on their academic program, students earn either a master's degree or a graduate or postgraduate certificate upon completing their studies.

Further information, applications, and catalogs may be obtained by calling 1-800-548-3647; visiting ep.jhu.edu; or writing to Johns Hopkins Engineering for Professionals, 6810 Deerpath Road, Suite 100, Elkridge, MD 21075. Email inquiries may be sent to jhep@jhu.edu.

Advanced Degree Programs in Other Hopkins Divisions

Carey Business School

Master of Business Administration Degrees (full-time)
- Johns Hopkins Global MBA
- Master of Business Administration/Master of Public Health

Master of Business Administration Degrees (part-time)
- Executive MBA
- Flexible MBA

Master of Science Degrees
- Enterprise Risk Management (part-time)
- Finance (full- and part-time)
- Health Care Management (part-time)
- Marketing (full- and part-time)
- Real Estate and Infrastructure (full- and part-time)

Joint and Dual Degrees (part-time)
- Master of Business Administration/Master of Science in Nursing
- Master of Business Administration/Master of Arts in Communication
- Master of Business Administration/Master of Arts in Government
- Master of Business Administration/Master of Science in Biotechnology
- MBA/Master of Environmental Engineering
- MBA/MS in Environmental Engineering and Science
- MBA/MS in Environmental Planning and Management
- MBA/MS in Design Leadership

Undergraduate Students

The policies, procedures, resources, and opportunities included in this section are relevant for undergraduates enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering on the Homewood campus. Please use the links at the left to navigate to your topic of interest.

Admissions and Finances

Every year the Johns Hopkins University enrolls a freshman class of approximately 1,300 men and women from all parts of the United States and many foreign countries. In addition, transfer students from other colleges and universities are admitted to the sophomore and junior classes.

Intellectual interests, academic performance, and institutional “fit” are of primary importance in the admissions decision. The Admissions Committee carefully examines each applicant’s complete scholastic record and aptitude test results. Essays and recommendations from secondary school officials and other sources about a student’s character, intellectual curiosity, seriousness of purpose, and range of extracurricular activities and leadership are also considered.

The cost of higher education is a major concern to students and parents in their selection of a college. The Johns Hopkins University welcomes all students of superior academic ability and provides need-based financial assistance to those who qualify.

Financial aid is based on the premise that parents and students are expected to contribute to educational costs to the extent that they are able. A family contribution, using a federal formula with institutional adjustments, consists of student and parent components. This family contribution is subtracted from the total college cost for the year. The net amount is the student’s financial aid eligibility or need. The student’s financial aid award will meet this eligibility on a funds-available basis, through a combination of grants, loans, and work opportunities.

A college education is a major investment. It is important that both the student and the family plan ahead, investigate funding alternatives, apply for aid carefully and on time, and, most importantly, ask questions. Applicants and their families should not hesitate to call the Office of Student Financial Services at 410-516-8028 or visit us at jhu.edu/finaid or email fin.aid@jhu.edu for more information.

Please use the links to the left to view detailed information about undergraduate admissions, fees and expenses, financial aid and veterans’ educational benefits.

Admissions

Application Procedures for Freshmen

Applications for admission to the freshman class must be filed by November 1 for Early Decision (ED) and January 1 for Regular Decision (RD). The applicant should also arrange to take the required standardized tests by the October test date (ED) or the December test date (RD).

Additional application information and required forms can be found at apply.jhu.edu/apply/application.html. The Common Application and the Universal Application are both accepted; a Johns Hopkins Supplement is required for both. The completed application should be submitted with a nonrefundable $70 application fee. The university will also consider College Board fee waiver certificates or fee waiver requests submitted by counselors.

Early Decision applicants are notified of their decision by December 15, Regular Decision applicants by April 1. Those who have applied for financial assistance will be notified of financial aid decisions at that time. Students must notify the Undergraduate Admissions Office of their intention to enroll and submit a nonrefundable $600 enrollment and housing deposit by the Candidate Reply Date of January 15 for Early Decision and May 1 for Regular Decision.

Please note this important policy: Students wishing to enroll in the biomedical engineering (BME) major must indicate BME as their first-choice major on their applications. Students are admitted specifically into the BME major, based on evaluation of credentials and space available. Students can be admitted to the university without acceptance to the BME major. No separate application is required. Notification of acceptance into the BME major is given at the time of decision notification. (For more information, see Biomedical Engineering.)

Secondary School Preparation

Applicants are responsible for seeing that all supporting materials, including two teacher recommendations and a complete transcript of work in high school, are submitted to the Office of Undergraduate Admissions by the appropriate deadline. The Midyear School Report must be returned by February 15 with the first-semester/trimester grade record. See all requirements at apply.jhu.edu/apply/deadlines.html.

Johns Hopkins does not have rigid course requirements for entrance. Students are expected to have completed a course of study in a secondary school that provides both a sound basic education and a solid preparation for the Johns Hopkins academic program. While the university recommends a broad preparation in high school, the Admissions Committee realizes that individuals have different strengths and welcomes applications from students with varied academic backgrounds. The quality of course preparation is considerably more significant than the number of courses completed. In all cases, students are expected to be skilled in the use of the English language (including writing) and to have a solid foundation in mathematics.

Standardized Testing

All freshman applicants must submit scores from all SAT tests (including subject tests) taken or all ACT tests taken; the Office of Undergraduate Admissions strongly recommends taking standardized tests by October for Early Decision applicants and December for Regular Decision applicants. Results of tests taken before the senior year are acceptable. The applicant must request that an official report of all required test results be sent to Johns Hopkins from the Educational Testing Service or ACT Inc.

The SAT Reasoning Test or the ACT with Writing Test is required. For those submitting SAT scores, Johns Hopkins recommends submitting SAT subject test scores.

Students who choose to take SAT subject tests are recommended to take tests in areas directly related to their academic interests. Applicants interested in an engineering major are strongly encouraged to submit scores from the Mathematics Level 2 SAT subject test and at least one science SAT subject test.
Early Decision Plan

Students whose first choice is Johns Hopkins are encouraged to apply under the Early Decision Plan. Each year, more than 30 percent of the university’s entering freshmen have taken this option. Students may apply under Early Decision to only one college or university. To do so at Johns Hopkins, they must file their application by November 1, signing the Early Decision Agreement with their parents and counselors. Candidates should take the required standardized tests no later than the October test date. (While students applying Early Decision to Johns Hopkins may not apply early decision elsewhere, they may apply under early action or regular decision plans to other colleges or universities.)

Early Decision candidates receive notification by December 15. Students accepted under Early Decision must notify the Undergraduate Admissions Office of their intention to enroll and submit a nonrefundable deposit by the Candidate Reply Date of January 15. Accepted Early Decision candidates must immediately withdraw their applications to other schools.

Students who are accepted ED and qualify for assistance will receive an estimated aid offer along with their acceptance packets. This offer is based on information submitted on the College Scholarship Service PROFILE form.

A final aid offer will follow in the spring, pending receipt of the student’s Free Application for Federal Student Aid (FAFSA), and the student’s parents’ prior calendar year federal income tax returns. In the unlikely event that information on the FAFSA and tax returns varies significantly from original estimates, the financial aid package could change.

The Admissions Committee can deny admission at the ED review. A small number of students who are not admitted Early Decision are deferred and re-evaluated as Regular Decision candidates.

Early Decision applicants who applied to but were not admitted to the BME major are released from the Early Decision contract to enroll at Johns Hopkins and may apply to other colleges but must make a decision about enrollment at Johns Hopkins University and return their Candidate Reply Form to the Office of Undergraduate Admissions by January 15.

Deferred Entrance Option

The deferred entrance option is designed to give students a chance to take a break in their studies. Some students benefit from a change of pace between high school and college. To let students take full advantage of work and travel opportunities, the university allows some students to defer their entrance into the freshman class for one year or, in certain cases, two years, after graduation from high school. Requests for deferment are evaluated and approved on an individual basis. Students seeking deferrals must notify the Director of Undergraduate Admissions of their intention to defer entrance as soon as possible and submit the nonrefundable deposit by the Candidate Reply Date. Students who take advantage of this option can enter the university only in the fall semester. They must confirm in writing, by February 15, their intention to enroll the following September and must submit all required financial aid applications by that date.

Admission of Transfer Students

Each year a number of highly qualified students from other colleges and universities are accepted into the university’s sophomore and junior classes. Decisions on transfer applications are usually announced in May. Applicants should show evidence of strong academic preparation in courses comparable to those offered at Johns Hopkins, and above-average performance (at least a B+ average) in college. Consideration is also given to the availability of space in the university’s academic programs; there are times when additional students cannot be accepted in specific programs. Applicants to the Whiting School of Engineering should have a solid curriculum background in science and engineering to assist them in the transition to Johns Hopkins. In addition to the application and nonrefundable application fee of $70, applicants must submit official transcripts from all secondary schools and colleges they have attended and a letter of recommendation from a professor or academic counselor. Official results of the SAT or ACT are not required for transfer admission. For full requirements and deadlines, visit apply.jhu.edu/transfer.

The Office of Academic Advising or the Office of Academic Affairs will make a formal evaluation of credit accepted toward a Johns Hopkins degree after the transfer student has matriculated and final transcripts have been received. Credit is normally transferred for courses comparable to those offered at Johns Hopkins that have been completed with grades of C or better, when taken at another college or university campus.

Admission of International Students

Johns Hopkins welcomes students from all around the world, and each year accepts international students from many different countries. The application for admission, along with the nonrefundable $70 fee, must be received by the November 1 deadline for Early Decision candidates and the January 1 deadline for Regular Decision candidates. Each candidate is also responsible for ensuring that all supporting materials, including an official transcript of academic work for the years equivalent to the 9th, 10th, 11th, and 12th grades in the U.S. system, are sent directly to the Office of Undergraduate Admissions by the appropriate school official. If the transcript is in another language, it must be accompanied by an official English translation, certified as a true copy by the proper school official. Two letters of recommendation in English or with an English translation are also required.

International students seeking to transfer to the university must submit the application with fee by the deadlines noted above under Admission of Transfer Students.

An international candidate who is pursuing the G.C.E. Advanced Level studies, the French Baccalaureate, the Abitur, the International Baccalaureate, or any similar program, but who has not begun studies at the university level, is considered for admission as a freshman applicant. A candidate who has begun, but not completed, university-level studies is considered for admission as a transfer applicant.

All international students must submit the Certification of Finances form, available online at apply.jhu.edu/apply/application.html. While international students are ineligible for federal financial aid at the undergraduate level, Johns Hopkins does provide limited need-based financial assistance. Visit jhu.edu/finaid for details.

All international candidates must arrange to take and have official scores for the ACT or SAT sent directly to the Office of Undergraduate Admissions. Freshman candidates taking the SAT are encouraged to also submit scores for at least three SAT subject tests.

The Test of English as a Foreign Language (TOEFL) is required of all applicants who do not speak English at home AND have not attended an English-language school for five years or longer. All other international applicants are not required to submit TOEFL scores but may do so to supplement their applications.

Johns Hopkins prefers a score of 600 on the written test. The preferred sub-scores for the Internet-based TOEFL (iBT) are 26 (Reading), 26...
Placement and Standing

**Advanced Placement Program**

Johns Hopkins participates in the Advanced Placement Program conducted by the College Board and grants academic credit for scores of 4 or 5 (or, in some cases, 3) on certain Advanced Placement (AP) examinations. Students who take any AP examinations should have the results forwarded to the Undergraduate Admissions Office. For an updated list of credits awarded for a particular AP examination, please visit [http://apply.jhu.edu/apply/examcredit/](http://apply.jhu.edu/apply/examcredit/).

**International Baccalaureate Placement**

Students may receive college credit for higher level International Baccalaureate (IB) courses if they attain IB grades of 6 or 7 for some subjects. For an updated list of credits awarded for a particular IB course, please visit [http://apply.jhu.edu/apply/examcredit/](http://apply.jhu.edu/apply/examcredit/).

Students who obtain grades of A or B on G.C.E. Advanced Level exams are eligible for credit commensurate with the comparable course at Johns Hopkins. International curriculum students interested in receiving credit for other advanced-level studies may have their work evaluated by the appropriate academic departments.

**Please note:** In addition to allowable credits from AP or IB higher-level exams, entering freshmen may transfer up to 12 credits from course work taken at other colleges. If a student enters the university with AP or IB credits for a specific course and then takes an equivalent course offered by the university, his or her AP or IB credits are disallowed.

**Fees & Expenses**

- **Full-time undergraduates:** $45,470.00 or $22,735.00 per semester
- **Part-time:** $1,515.00 per undergraduate credit hour
- **Study abroad undergraduates in non-Hopkins-sponsored programs:** $2,630.00 per semester
- **Matriculation Fee** (Entering students): $500.00

**Tuition Refund Policy**

**First Six Weeks of Classes**

During the first six weeks of classes, a full tuition refund will be provided to students who withdraw from the University. Leave will be retroactive to the beginning of the semester, and registration and tuition charges will be cancelled. Federal aid will be prorated per federal regulations, and Johns Hopkins University Grant will be cancelled. Federal aid will be prorated per federal regulations, and Johns Hopkins University Grant will be cancelled. Room and board charges will be prorated based on the day the student leaves the University.

**Week Seven Through Eleven**

During weeks seven through eleven, a 50% tuition refund will be provided to students who withdraw from the University. W’s will be recorded as grades on the student transcript. Federal aid will be prorated per federal regulations, and up to 50% of a Johns Hopkins University Grant will be applied to outstanding tuition charges. A student will not receive a cash refund from a JHU Grant award. Room and board charges will be prorated based on the day the student leaves the University.

**Week Twelve Through the End of the Semester**

During week twelve through the end of the semester, no tuition refund will be provided to students who withdraw from the University. W’s or
Incompletes will be recorded as grades on the student transcript. Students will be permitted to keep their financial aid awards. Room and board charges will be prorated based on the day the student leaves the University.

No refund will be granted to students suspended or dismissed for disciplinary reasons. The University reserves the right to dismiss a student whose academic standing or general conduct is considered unsatisfactory.

**Financial Aid**

**Financial Aid Application Process**

Each year, students must apply for financial aid by submitting the following documents by the published deadlines: November 15 for Early Decision applicants, March 1 for Regular Decision applicants, and March 1 for transfer applicants.

- The CSS/Financial Aid Profile application which is available online at [profileonline.collegeboard.com](http://profileonline.collegeboard.com). Johns Hopkins school code is 5332.
- Signed copies of prior year federal individual tax returns (student and parents'), all pages, including W-2s and other supplemental documents as required by the College Board's Institutional Documentation Service (IDOC). These documents are submitted in a single packet to IDOC along with the IDOC coversheet.
- If parents are involved in a business, partnership, or corporation, signed copies of the appropriate tax returns for the prior year must also be submitted to IDOC.
- Other documents required if applicable: CSS Non-Custodial PROFILE; CSS Business/Farm Supplement; appropriate corporate tax returns.

Application status may be viewed online at [jhu.edu/finaid/self_service.html](http://jhu.edu/finaid/self_service.html).

**Renewal of Financial Aid**

Students reapply for financial aid each year. Financial aid awards cover one academic year and are not automatically renewed. The deadline for returning students to submit completed applications is May 1. Limited Hopkins Grant assistance is available for the summer. Students must complete the Summer Aid Application online to be considered.

Students may expect comparable awards for a total of eight semesters if they meet all the following conditions:

- Family financial situation remains the same.
- The student submits all the required documents on time.
- The student maintains satisfactory academic progress.

Based on written appeal, a ninth semester of grant aid may be awarded to students with extenuating circumstances. Federal and state aid may be available for additional semesters.

**Academic Progress for Financial Aid**

The typical time-to-degree for a full-time undergraduate student is four years; the university considers completion within five years to be satisfactory.

For Financial Aid purposes, a student who has amassed 24 credits is considered to have sophomore standing; 54 credits gives junior standing; 84 credits gives senior standing. These credits include both Hopkins and transferable off-campus credits.

Satisfactory academic progress refers to minimal standards for grades and cumulative credits required to remain in good academic standing. Eligibility for financial aid is linked to satisfactory academic progress.

**Eligibility for Financial Aid**

Financial aid eligibility is based on a federal formula that considers the family income as well as other factors, including the number of family members, the number of children in college, and the assets of both the student and the parents. Institutional parameters may be added to the federal calculation to determine eligibility for Johns Hopkins aid.

**Undergraduate Student Budget, 2013–2014**

(see [jhu.edu/finaid](http://jhu.edu/finaid) for current cost of attendance)

<table>
<thead>
<tr>
<th>Category</th>
<th>Amount</th>

<tr>
<td>Personal and Books</td>
<td>$2,200</td>
</tr>
<tr>
<td>Travel (varies depending on home state)</td>
<td>$200-$1,400</td>
</tr>
</tbody>
</table>

* Charged to first-time students only.

** Financial Aid Package**

Once a student’s eligibility has been established, Johns Hopkins University will attempt to meet that eligibility through a combination of grants, loans, and Federal Work-Study (FWS) awards. Self-help or the loan and FWS components of the financial aid package are applied against eligibility first. Remaining eligibility is met by grants or scholarships, including Federal Pell Grants, state scholarships, and Hopkins grants. The average self-help award typically includes a $2,500 work opportunity, plus a loan amount based on year of study as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>First-Year Students</td>
<td>$3,500</td>
</tr>
<tr>
<td>Sophomores</td>
<td>$4,500</td>
</tr>
<tr>
<td>Juniors</td>
<td>$5,500</td>
</tr>
<tr>
<td>Seniors</td>
<td>$5,500</td>
</tr>
</tbody>
</table>

The amount of the loan in a student’s aid package will increase in the upperclass years as eligibility increases.
Financial Aid Types
The financial aid package may include four different types of financial aid: grants, self-help, merit-based scholarships, and private scholarships.

Grants
Grants are awards that do not have to be repaid. These gifts come from a variety of sources: state and federal governments, individuals, corporations, and the university.

Baltimore Scholars
Baltimore Scholars are citizens or permanent residents admitted from Baltimore City public high schools who make their residence in the city (three consecutive years minimum residency required). Scholars receive full-tuition scholarships for undergraduate study, and additional assistance for remaining need. No separate application is required.

Bloomberg Scholarship
Bloomberg Scholarships are awarded annually to entering freshmen. The value of the Bloomberg Scholarship will vary, depending on need, but will meet the scholar’s full financial need in grant, minus a work-study requirement. The Bloomberg Scholarship provides additional grant to replace the normal loan expectation in the financial aid award. No separate application is required. Selection will be based on need, superior academic performance and test scores, and demonstrated leadership in school or community activities.

Hodson-Gilliam Success Scholarship
The Hodson-Gilliam Success Scholarship is awarded annually to entering freshmen with demonstrated financial need who are outstanding students from underrepresented minority groups and others. This competitive scholarship replaces loan in the financial aid package. No separate application is required. Selection is based upon outstanding academic performance and test scores, and demonstrated leadership in school and community activities.

Hopkins Grant
Hopkins provides grants to assist students who have demonstrated eligibility. These are awarded from institutional funds and endowments. The amount of the grant varies and may be renewed each year according to the level of financial need.

Federal Pell Grant
If a student meets the strict eligibility criteria, she/he is entitled to this federal grant. Currently, the maximum Pell Grant is $5,550 per academic year.

Federal Supplemental Educational Opportunity Grant (FSEOG)
The Federal SEOG program provides grants to students who demonstrate exceptional need. When awarding FSEOG, priority is given to Federal Pell Grant recipients and other students with exceptional need. Hopkins matches this federal grant with institutional funds.

Reserve Officers’ Training Corps (ROTC)
Any Hopkins student that meets ROTC eligibility requirements can compete for a federal merit-based two-, three- and four-year scholarship that includes full tuition, books, fees, and a tiered monthly stipend: jhu.edu/rotc.

State Scholarships
Students from certain states may be eligible for state grants or scholarships to help fund their education at Hopkins. Hopkins expects all eligible financial aid applicants to apply for these state funds. Failure to apply for these scholarships may result in a reduction of Hopkins grant. The student should apply early, as each state has a specific deadline and application process. Some states also have a separate scholarship application.

Students may contact their state higher education agency via the web at the following address: ed.gov, click on State Information.

Federal Work-Study (FWS)
The Federal Work-Study program, including community service and America Reads, allows students to earn money by working part time on or off campus or in a community service setting. FWS is federally funded, and only students with demonstrated financial need are eligible for this employment program. Unlike funds from other aid programs, FWS earnings are not applied as a direct credit to a student’s college expenses; they are an allotment of money that the student may earn in a given year.

A wide variety of jobs are offered, with hourly rates from $7.25 per hour and up. Most students work an average of eight to 10 hours per week. Students are paid on a semi-monthly basis. These funds are generally used to help cover the student’s out-of-pocket expenses such as books and personal travel costs. FWS job openings are available on the web at jhu.edu/stujob, through the Annual Job Fair in early September, and at the Office of Student Employment Services in 72 Garland Hall.

Federal Perkins Loan
This federal loan is available to students who demonstrate exceptional financial need. The Federal Perkins Loan program is administered by Hopkins, and the money borrowed is paid back to Hopkins. The present rate of interest is 5 percent. Interest does not accrue until the loan goes into repayment, which begins nine months after completion of studies and may extend up to 10 years. Deferment and repayment information is sent to all borrowers.

Hackerman Loan
The Hackerman Loan is an interest-free loan that may be offered as part of the financial aid package to Whiting School of Engineering students. Funds are limited. Borrowers are expected to repay the loan over a period of eight years after completion of studies.

Federal Direct Student Loan
Johns Hopkins University participates in the Federal Direct Student Loan Program. Students obtain a Direct Loan from the federal government.

Interest-subsidized Direct Loans are need-based and available to students who demonstrate eligibility. The interest rate for 2012–2013 is fixed at 3.4 percent. The government pays the interest on the loan until the student leaves school. Repayment begins six months after the student leaves school.

Unsubsidized Direct Loans are available for students who do not qualify for a need-based loan. The interest rate is fixed at 6.8 percent. Interest accrues on these loans immediately and may either be capitalized or paid
while the student is in school. All other terms of the loan are identical to the subsidized program.

Students must file the Free Application for Federal Student Aid (FAFSA) form to determine eligibility for either type of Federal Direct Loan. A Master Promissory Note must be signed by all first-time borrowers. Loan proceeds will be credited directly to the students' accounts.

Merit-Based Scholarships

All merit-based scholarships require superior academic achievement in a challenging program, the highest test scores, and demonstrated leadership in school and/or community, state, regional, or national activities.

Hopkins offers the Hodson Trust Scholarship, to approximately 20 first-year students. The value of the scholarship for 2013–2014 is $30,500. The scholarship is renewable for up to three additional years of undergraduate study if the recipient maintains a 3.0 GPA including the first semester of freshman year. (Letter grades from that semester are covered, but a GPA is still calculated to determine eligibility for scholarships.) All admitted students are considered for this award.

Charles R. Westgate Scholarships provide full tuition for up to two first-year engineering students. The scholarship is renewable for up to three additional years of undergraduate study if the recipient remains enrolled in the Whiting School of Engineering and maintains at least a 3.0 GPA. There is no separate application required, and all Whiting School of Engineering candidates will be considered.

Outside/Private Scholarships

Scholarships from private organizations are an additional or alternative method for the student to help finance a Hopkins education. Many agencies and organizations offer scholarships to students continuing their education at a college or university. Links to some of the free scholarship search engines are available on the web at jhu.edu/finaid and through high school guidance offices, local libraries, and community organizations.

Students must report outside/private scholarships received to the Office of Student Financial Services. All scholarship checks should be sent to that office. Need-based scholarships, Johns Hopkins University Grant, and Johns Hopkins University funded, merit-based scholarships will not be reduced for freshmen receiving private scholarship unless they exceed the student’s financial need or cost of attendance. Holding a need-based grant “harmless” from reduction is intended to provide a financial incentive for obtaining private scholarships the freshman year. If an outside scholarship is renewed for subsequent years, the amount of the scholarship will reduce the student’s Bloomberg Scholarship and/or Johns Hopkins University Grant. For more information about outside/private scholarships, please review the Student Financial Assistance Brochure online at jhu.edu/finaid.

Veterans Educational Benefits

Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans and the widows and children of deceased veterans under the provisions of the various federal laws pertaining to veterans’ educational benefits. Information about veterans’ benefits and enrollment procedures may be obtained at web.jhu.edu/registrar/veterans.html or the Office of the Registrar, 75 Garland Hall, 410-516-7071.

Students eligible for veterans’ benefits register and pay their university bills in the same manner as nonveteran students. The Department of Veteran Affairs determines the educational benefit a veteran is eligible to receive. Veterans educational benefits payments cover only a portion of assigned course fees. To receive veterans educational benefits the student must comply with the following procedures:

Initial Enrollment

Once admitted to the university, the student must complete an Application for Program of education or Training (VA Form 22-1990) from the Department of Veteran Affairs at www.gibill.va.gov (http://www.gibill.va.gov). A copy of the completed application, along with a certified copy of the DD-214, is sent to the Veterans Desk, Office of the Registrar, 75 Garland Hall, The Johns Hopkins University, Baltimore, Maryland 21218.

The student who is transferring from another university or college will need to obtain a Request for Change of Place of Training (VA Form 22-1995) from the Department of Veteran Affairs at www.gibill.va.gov (http://www.gibill.va.gov). The completed form should be sent to the Veterans Desk at the university.

Re-enrollment

Students who received veterans’ benefits at the university the preceding semester and plan to enroll with no change of objective should inform the Registrar’s Office at the time of registration that they want to be recertified under the provisions of their original VA Form 22-1990.

Students receiving veterans’ benefits must take courses that lead toward the exact objective (usually a specific degree) on the original VA application. Otherwise, they must submit a Request for Change of Program (VA Form 22-1995). Students utilizing veterans’ benefits must let the registrar know immediately of any change in their program or status that might affect the amount of their VA payment. If they fail to do so, the Department of Veterans Affairs will seek reimbursement from the student for any overpayment.

Standards of Progress

Continuation of VA payments depends on the student’s meeting the university’s academic standards for all students. The student must also meet any standards of progress which may be established by VA regulations.

Academic Policies

The Krieger School of Arts and Sciences and the Whiting School of Engineering offer myriad opportunities for intellectual exploration, academic challenge, and personal growth. To satisfy your academic goals and assure your progress toward graduation, take action and responsibility for the following:

• Seek advice from multiple faculty and other university professionals.

• Meet with your assigned advisor at least once a semester.

• Learn the information contained within this online catalog. Failure to do so does not excuse you from responsibility for the rules and procedures.

• Track your completion of your degree requirements.

• Consult your advising office and your major department about any questions concerning academic policy.
Personal difficulties, illness, or advice contradicting the rules and procedures do not constitute automatic grounds for exemption from these rules or procedures. Waivers or exceptions to these rules and procedures must be reviewed and approved in advance and are effective only when endorsed by your advising office. The University reserves the right to change rules, procedures and other information within this website as appropriate. This website is not to be regarded as a contract. If you have questions, contact your school’s advising office.

Registration Policies

Registration Periods and Advising

In the School of Arts and Sciences, students meet with their faculty and/or academic advisor well in advance of the registration period. The advisor grants permission to register to an advisee by releasing an electronic hold. Questions about course selection should be discussed with the faculty and academic advisors prior to registration.

Each student in the School of Engineering must schedule an appointment with his/her faculty advisor prior to registration. Engineering Advising Week is set aside in early November and early April for these meetings. Students should come to this appointment prepared to discuss courses required for the major, as well as other academic and career issues. Once the faculty member releases the electronic hold, the student can register online.

Undergraduates register for intersession and the spring semester in November, and register for the summer and fall terms in April. Detailed instructions about registration will be emailed to all students before the registration period each term. If the student has not received this information at least two weeks before the start of classes for a fall or spring term, perhaps because of a change of address or status in the university, the Registrar’s Office should be contacted immediately.

It is important that students keep all copies of registration and add/drop forms in case there is any question about which courses they are taking and whether a course is being taken for Satisfactory/Unsatisfactory credit. It is not possible to correct a registration error unless the student or the university has a copy of the relevant form.

Full-Time Student Status

Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester. Students who have not completed degree requirements after eight full-time semesters may register for less than 12 credits and pay for courses on a per credit basis.

Reviewing and Printing the Registration Schedule

Students are responsible for verifying their official schedules by going online to the Registrar’s website to review their course schedules. Students should also print a copy of the schedules for their records. All changes to schedules should be verified by printing a new copy of the amended schedule. As a final precaution, students are advised to check their schedules online prior to the add, drop and withdrawal deadlines. Changes to a student’s schedule will not be approved after these deadlines have passed. Failure to review and print out a registration confirmation will not be considered grounds for approving exceptions to these deadlines.

Final Examination Schedule for Fall and Spring Semesters

The Registrar establishes the final examination schedule. Official university policy is that students will have no more than two final exams on the same day. In rare cases, the official final exam schedule available on the Registrar’s website, may slot three final exams on one day for a student. Students should contact their advising office for assistance in these instances. Instructors may administer final examinations only at the officially scheduled time, not during class time or during the reading period. Take-home final examinations, and other final exercises (such as papers), that are expected to be prepared for an completed after classes have concluded, are due at the end of scheduled in-class final examination time for the course. All other papers can be due at any deadline during the semester set by the professor, including the reading and final examination periods. Students who are concerned that any of these policies are being violated by their instructors should notify their academic advising office.

Adding a Course

Students are expected to give serious thought to their course selections when registering for courses so that schedules do not require adjustment when the semester begins. Students who registered during the regular registration period may make necessary changes until the end of the second week of classes and pay no fees to add or drop courses. During this time students may add and drop courses without written approval, unless the course is filled or will cause a credit overload. If the course will cause a credit overload, AS students need a signature from the AS Advising Office, while EN students need their faculty advisor’s signature and the approval of the EN Advising Office. An instructor’s signature is required to add a course that is filled. By the end of the second week of classes, students should have the schedule they want to keep.

If the course is a four-week course offered during the fall or spring terms that begins at the beginning of the semester, the course may be added only during the first week of classes.

When adding courses in other divisions or at schools in the cooperative program, Homewood undergraduates must follow the deadlines set by the host school or division.

Dropping a Course

Courses may be dropped from the student’s record until the end of the sixth week of the semester, provided that the student remains registered for a minimum of 12 credits. The faculty advisor’s approval to drop a course is required only for engineering students dropping after the second week of classes.

If the course is a four-week course, drops may be made during the first week of the course without a record on the transcript. The course may be dropped with a W notation during the second week of classes (with the approval of the faculty advisor).

The rules and procedures of the host school apply when undergraduates drop courses in other divisions of the university or at one of the schools that participate in the academic cooperative program. In the School of Public Health, the drop deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.
**Withdrawing from a Course**

After the end of the sixth week and until the end of the eighth week, a student may withdraw from a course with a W on the academic record. Engineering students need the signature of their faculty advisor on an add/drop form. A record of the course will remain on the academic record with a W appearing in the grade column to indicate that the student registered and then withdrew from the course. Students are not allowed to withdraw from a course after the end of the eighth week of the semester.

**Credit Limit**

Credit is an approximate measure of the work required in a course. For undergraduate courses, the number of credits is normally equal to the number of hours that the class meets each week. Some laboratory courses are exceptions to this rule, meeting more hours per week than the credits awarded. Graduate-level courses are generally awarded the same number of credits as an upper-level undergraduate course (3 credits).

For Arts and Sciences students, the average course load is 15 credits per semester for eight semesters. For Engineering students, the standard load is 16-18 credits. AS freshmen are limited to 16.5 credits, while AS upperclassmen are limited to 18.5 credits. EN freshmen are limited to 18 credits (18.5 if including a foreign language), while EN upperclassmen are limited to 19.5 credits. Students must maintain full-time status by registering for at least 12 credits.

Students in the School of Arts and Sciences are encouraged to register for the standard undergraduate load of 15 credits each semester. While upperclass AS students may take up to 18.5 credits if they are in good academic standing, given the very demanding nature of courses at Johns Hopkins in all fields, students are strongly discouraged from taking more than five courses per semester. Even if perfect grades can be maintained, course overloads can contribute significantly to a student’s feelings of stress and anxiety. Moreover, academic overload often restricts the student’s life in other important ways, affecting health, happiness, and future success. According to a recent study of premedical education, for example, medical schools are looking for students with well-balanced achievements and skills in addition to research competence.

**Exceptions to These Credit Limits**

**Arts and Sciences students who wish to take a credit overload must meet one of the following criteria:**

- Double degree students who are taking courses at both Peabody and Homewood
- Students taking excess credits due to university mandate, e.g., if the Romance Languages Department requires a student to take French Elements (4.5 credits) rather than Intermediate French (3.5 credits), or if the East Asian Studies Department moves a student from Intermediate Chinese to Accelerated Chinese
- Seniors in their eighth semester
- Upperclass students with a 3.5 cumulative GPA who have requested and been granted a waiver to take an additional course for other reasons
- Students who exceed the limit because they are taking a 1 or 2 credit music lesson at the Peabody Conservatory
- Neuroscience majors registered for Research and Scientific Communication may exceed the credit limit by 0.5 credits

**Additional Exceptions for AS Freshman**

- Peabody lesson (1 or 2 credits)
- ROTC required classes (1 credit)
- Biophysics majors taking Calculus (4), Chemistry and Lab (4), Physics and Lab (5), Topics in Biophysics (1), and a humanities/social science elective (3)
- Taking five classes and two are foreign languages, where at least one is a continuation of previous study
- Freshmen taking five courses including a foreign language course along with a 1-credit lab (when taken in conjunction with the lecture course)

**Exceptions for EN Students**

Credit overloads for engineering students are approved on a case-by-case basis. Engineering students who wish to overload need their faculty advisor’s signature, then final approval by the Engineering Advising Office. Usually, the student’s most recent academic performance is a factor in the decision. First-semester freshman are not granted credit overloads.

**Restrictions on Registration**

**Holds on Registration**

Students who have three or more Incomplete grades from the previous semester will have a hold placed on registration activity. The student must have the approval signature from the advising office of their school to register, add, or drop. Holds may be placed on a student’s registration for many other reasons as well: outstanding financial obligations, or concerns related to international status, insurance and health clearances. A student whose registration has been placed on hold for a non-academic reason must obtain clearance from the office or offices that placed the hold on the registration.

Each student must pay the tuition or make an appropriate financial arrangement to do so with the Office of Student Accounts before registration can be confirmed. Transcripts may not be released for students with unpaid balances. A student will not be permitted to register if the financial account is in arrears from a previous semester because of unpaid tuition, rent, library or parking fines, or other university bills.

**Late Registration Fees**

Registration in the School of Arts and Sciences and the School of Engineering is not permitted after the end of the second week of the semester, except in extraordinary circumstances as approved by the Assistant Dean for Academic Advising for their respective school. Students must register on time, even when they lack sufficient funds. The university provides many financing alternatives that permit students to register in most financial situations.

Students who for any reason do not complete their registration until after the prescribed registration period will be required to pay a late registration fee before that registration will be finalized by the registrar. The fee is $150 for registrations completed from the first day of classes through the end of the first week of classes, $200 for registration completed during the second week of classes, and $300 for registration completed after the second week.

**Prohibition on Registering for Courses that Meet at the Same Time**

Registering for two classes that meet at the same time or overlapping times is not permitted except as a temporary measure during the first...
weeks of the semester when students are still deciding on which classes to take. By the end of the first two weeks of classes, students must resolve time conflicts in their schedules.

Restrictions on Equivalent Courses and Courses Taken Out of Sequence

Courses that are sequential in nature, e.g., elementary, intermediate, and advanced language courses, or the Calculus sequence, must be taken in their proper order. One exception to this policy is that 210 301-302 may be taken in reverse order with permission of the department.

Credit will be awarded only once for equivalent courses covering the same material. Examples of equivalent courses are Intermediate French and Advanced Intermediate French, AP Chemistry and Introductory I and II, Chemistry, AP Calc AB and Calculus I. This restriction does not apply to the Expository Writing course which may be taken twice. Be aware that departments may change course numbering or titles without changing the course content. Students who believe that they have registered for an equivalent course should consult with their academic advising office.

The following restrictions apply to overlapping and the sequencing of courses in the Mathematics and Applied Mathematics and Statistics Departments:

- Students who earn credit for AS.110.201 Linear Algebra cannot receive credit for the combined course EN.550.291 Lin Alg & Diff Equations or for the course AS.110.212 Honors Linear Algebra.
- Students who earn credit for AS.110.302 Diff Equations/Applic cannot receive credit for EN.550.291 Lin Alg & Diff Equations.
- Students who earn credit for AS.110.202 Calculus III cannot receive credit for AS.110.211 Honors Multivariable Calculus.
- A student who earns credit in EN.550.291 Lin Alg & Diff Equations may receive credit for further study of linear algebra or differential equations by enrolling for independent study while auditing the appropriate course. Normally students will earn 2 credits for such an independent study, but the number of credits may vary and is to be decided by the faculty sponsor. These students may not earn credit for AS.110.302 Diff Equations/Applic, AS.110.201 Linear Algebra, or AS.110.212 Honors Linear Algebra.

Policy on Statistics Courses Sequencing

Undergraduate students at the Homewood Schools of Johns Hopkins University enjoy a wide selection of courses on statistics; however, it is not proper for a student to be awarded credit for two courses that cover essentially the same material. Likewise, it is not proper for a student to receive credit for a more basic course after having received credit for a more advance course in the same subject.

Our statistics courses fall into one of the following four categories, listed in increasing level of sophistication:

1. Non-calculus based, basic
2. Non-calculus based, intermediate
3. Calculus based, intermediate
4. Calculus based, advanced

A student may take at most one course (or course sequence) from within one of these categories. A student may not take a course in a lower numbered category after having taken a course in a higher numbered category.

Some departments may require their undergraduate majors to take specific statistics courses; that is their prerogative. This policy simply precludes students from receiving credit for two courses that have much the same content, with possibly different emphases. It does not imply that one course in a category may be substituted for another.

The list below shows how the courses (and course sequences) are allocated to these categories.

**Category 1: (Non-calculus based, basic course)**
- EN.550.111 Statistical Analysis I/EN.550.113 Statistics Through Case Study
- AS.230.205 Introduction to Social Statistics
- AP Statistics

**Category 2: (Non-calculus based, intermediate course)**
- EN.550.211 Probability and Statistics for the Life Sciences
- EN.550.230 Introduction to Biostatistics
- AS.280.345 Public Health Biostatistics
- AS.200.314 Advanced Statistical Methods/AS.200.315 Advanced Research Design and Analysis

**Category 3: (Calculus-based, intermediate course)**
- EN.550.310 Probability & Statistics for the Physical and Information Sciences & Engineering/EN.550.311 Probability and Statistics for the Biological Sciences and Engineering
- EN.560.435 Probability and Statistics in Civil Engineering

**Category 4: (Calculus-based, advanced course)**
- EN.550.420 Intro To Probability/EN.550.430 Introduction to Statistics

Some courses do not fall into one of the four categories:

- AS.200.207 Research Methods in Experimental Psychology This is not a probability/statistics course and may be taken in combination with any of the other courses listed in this document in any sequence.
- EN.550.413 Applied Statistics and Data Analysis This course is mostly independent of the other probability/statistics courses, but subsumes enough of the non-calculus, basic course material that none of those courses (category 1) may be taken after EN.550.413.
- EN.550.112 Statistical Analysis II may be taken after any category 1, 2, or 3 course. However, the preferable sequence is EN.550.111 Statistical Analysis I-EN.550.112 Statistical Analysis II.

Equivalent Statistics Courses

- **•** EN.550.112 Statistical Analysis II
- **•** AS.230.205 Introduction to Social Statistics
- **•** AS.200.207 Research Methods in Experimental Psychology
- **•** EN.550.420 Intro To Probability/EN.550.430 Introduction to Statistics
The courses EN.550.310 Probability & Statistics for the Physical and Information Sciences & Engineering and EN.550.311 Probability and Statistics for the Biological Sciences and Engineering are considered equivalent to each other and can be used interchangeably. A poor grade in one may be absolved by the opposite course.

The courses EN.550.111 Statistical Analysis I and EN.550.113 Statistics Through Case Study are considered equivalent to each other and can be used interchangeably. A poor grade in one may be absolved by the opposite course.

Instructor's Permission

Many graduate (600-level) courses in the School of Arts and Sciences and the School of Engineering offered in the graduate divisions of the university and some advanced undergraduate courses require the instructor's approval signature on a registration form. Engineering students also need their faculty advisor's approval. The Registrar's Office will not enroll a student in such a course without the instructor's signature. Therefore, students cannot add these courses online, but must use a paper registration or add/drop form. English, Writing Seminars, and Film and Media Studies hold preregistration hours for majors in the weeks before registration begins. Contact the department for information about how to preregister for a class.

Registering for Independent Academic Work

"Independent academic work" is the collective term used to encompass independent study, research, and academic internships. Independent study means a program of study and reading under the tutelage of a faculty member. Academic credit for independent study is based on work equivalent to class-based courses. Research involves planning and conducting experiments, collection and analysis of data, and the reporting of results. Academic internships are practical work experiences which have an academic component as certified by a member of the faculty.

All forms of independent academic work require early planning with a faculty sponsor. To receive academic credit, the independent academic work must include some activity, exercise or product that can be evaluated by a regular member of the AS/EN faculty whose field of expertise is closely enough related to the work for the faculty sponsor to evaluate the work competently and certify that it merits academic credit.

Academic credit for independent academic work must be sponsored by a full-time member of the Homewood faculty. This is the case whether the work is done on campus or not. The work supervisor and the faculty sponsor may be the same individual. If the faculty sponsor is not the work supervisor, the work supervisor must provide the faculty sponsor with a report on the student's achievements while doing the independent project and the faculty member must certify how much academic credit the project merits.

Students who wish to pursue independent academic work must begin by discussing their ideas with an appropriate faculty sponsor. That discussion must focus on what type of project the student envisions and what possibilities for academic credit the faculty member envisions. If the student and faculty member agree on the type of project and its academic value, then the student should find a suitable research or work environment for the project.

No more than three credits may be earned for independent academic work in one semester or summer (sessions I and II combined); only one credit may be earned for an academic internship during one semester or summer. Additionally, no more than 6 credits of any type of "independent work" may be earned in one academic year. The academic year begins in June with the first summer session and ends in May at the conclusion of the spring semester. Independent work done for academic credit must be unpaid. Credits for research and independent study may vary from 1-3 credits and may be graded with either letters grades (A, B, etc.) or Satisfactory/ Unsatisfactory. Credit for an internship is limited to 1 credit, and the grading method is Satisfactory/ Unsatisfactory only.

As with other academic courses, students must register for independent work by the end of the second week of the semester. Students must also observe the registration and add/drop deadlines in January Intersession and JHU Summer School.

Although academic credit is awarded for independent academic work, area designations are not assigned and the credit may not be used to satisfy the distribution requirement. The use of credit for independent academic work to satisfy the requirements of a major or minor is subject to prior written approval by the appropriate department or program.

Registering for Summer Courses at JHU

The Office of Summer Programs at Johns Hopkins offers a wide range of undergraduate KSAS and WSE credit courses over two five-week terms each summer. The majority of the courses are at Homewood, but Hopkins offers several study abroad courses and summer on-line courses, too. Both grades and credits for JHU summer courses taken after matriculating at JHU are entered on the student's academic record. Only one course per summer may be taken for Satisfactory/Unsatisfactory credit.

A course listing is published at http://www.jhu.edu/summer. Students may register online or in person beginning with the spring registration up to the summer session deadlines, which are published on the web site above.

Summer courses in other divisions must be taken for a grade. Credit is not given for mini or weekend courses in the Carey Business School and the School of Education.

Registering for Courses in Other JHU Divisions During the Fall and Spring Semesters

Qualified undergraduates may take courses at other divisions of the university by registering in person with the Homewood Registrar. In addition to the registration or add/drop form, students must submit a Supplemental Registration Form for Interdivisional Registration. Forms are available in the Homewood Registrar’s Office in 75 Garland and in the Office of Academic Advising, Garland, Suite 3A, or the Office of Engineering Advising, 103 Shaffer. Courses taken at other JHU divisions must be taken for a letter grade, not S/U, unless the course at the host division is offered on an S/U basis only.

Peabody Conservatory

Performance courses at the Peabody Conservatory may either be as part of a grade and credit, or may be audited. Graded performance courses will receive 1 credit per semester unless taken for a double degree program. With the approval of a student's teacher, performances that are audited may appear on a student's academic record.

Homewood undergraduates who are not enrolled in a music major, minor, or degree program may take only one nonperformance course per semester at the Conservatory or Preparatory. These students may also take one performance course concurrently with the approval of the student's academic advising office. Students taking lessons for the first
time at Peabody must also complete an Extension Application form which is available in the same locations as the Supplemental Registration Form.

Students may take private lessons at Peabody Conservatory with an instructor who is a Conservatory faculty member or a Preparatory faculty member approved by the Deans of the Preparatory and Conservatory. Acceptance is on a space available basis following an audition to demonstrate intermediate or advanced skills. Auditions for Conservatory lessons are held in September. Students will be notified of their audition time by letter from the Conservatory Registrar’s Office. Space in lessons is limited and registration is on a first-come, first-served basis. There is a $165 fee per semester for one half-hour lesson per week. Students who wish to take additional lessons will be charged for them.

The Peabody schedule and deadlines can differ from those at Homewood. Students taking courses and lessons at the Conservatory must check these dates in the Peabody Master Schedule of Courses.

Students who wish to take beginning level music lessons may enroll through the Preparatory on a non-credit basis.

The Carey Business School and The School of Education

Students may register for approved courses in these two schools on a case-by-case basis. Student are limited to no more than 12 credits in the Carey Business School or 12 credits in the School of Education. In order to register in the Carey Business School or the School of Education, students in Arts and Sciences and Engineering programs should use the Interdivisional Registration Form, available from the Homewood Registrar’s Office, which requires permission of their academic advisor and the appropriate school program director or advisor. Note that the Carey Business School and the School of Education students have priority in registering for these schools’ courses.

School of Medicine and Bloomberg School of Public Health

Except for Public Health Studies majors taking course at the School of Public Health who require only the faculty advisor’s approval signature, undergraduates may register for courses in these schools with the approval of the faculty advisor, the course instructor, and the student’s academic advising office. Students must have an adequate background for the courses, and courses must be taken for a grade.

Registering for Courses at Other JHU Divisions During the Summer

Degree-seeking students are permitted to enroll in other JHU divisions through the interdivisional registration process during the summer terms. Students should register and pay for the course at their home division. The course, along with credits and grade, will appear of the student’s home division transcript. Approval is required from both the home and host divisions to ensure that the interdivisional enrollment is appropriate for the student’s degree.

Registering for Courses at Cooperative Schools

Undergraduates may take one course per semester at one of the several area colleges and universities that comprise the academic cooperative program. The cooperative program includes the following colleges in the Baltimore area: Coppin State University, Goucher College, Loyola University Maryland, Morgan State University, Notre Dame of Maryland University, Towson University, the University of Maryland Baltimore County, and Stevenson University. Similar arrangements on a limited basis are in place with the Maryland Institute College of Art.

Students who have received Air Force ROTC scholarships will register for the required ROTC courses at the University of Maryland College Park using the cooperative institution registration process described in this section.

Courses that are equivalent to those offered at the Homewood campus may not be taken through the cooperative program. Students register in person with the Homewood Registrar. Students must submit a registration or add/drop form along with a supplemental registration form for cooperative program courses. The form is available from the Registrar’s Office, 75 Garland or from the student’s academic advising office. The faculty advisor’s approval signature is required for all cooperative school courses. An academic advisor from the student’s advising office must also sign the form. Submit completed registration materials to the Homewood Registrar’s Office.

Immediately before classes begin at the host school, visiting students should report to the host school’s registrar. Visiting students are not required to complete registration forms at the host school, and no academic record is established at the host institution. There is no additional fee or tuition charge for courses taken through the cooperative education program, except when the host school charges a laboratory or materials fee. In that event, the student pays the fee directly to the host institution.

Courses at cooperative schools must be taken for letter grades. Both grades and credits appear on the Hopkins academic record along with an indication of where the courses were taken. The grades are included in calculations of the grade point average.

Registering for Courses after Graduation

JHU alumni who completed their bachelors degree through the Krieger School of Arts and Sciences or the Whiting School of Engineering may take additional courses in those divisions with permission of the advising office of the school from which they graduated. Courses, grades, and credits will appear on a new academic record. Students must follow the rules for earning a second major or a minor after graduating, if applicable.

Student Status

Matriculation Status

Contact Information

All matriculated students are required to have on record with the university accurate local and permanent contact information at all times. This includes local address, local telephone number, and valid JHU e-mail address. Parent or legal guardian emergency contact information also must be on record and updated as necessary. This information should be maintained with the Registrar’s Office by using Student Web Services at http://web.jhu.edu/registrar.

Student Classification (Year of Study)

Student classification refers to the familiar names for the four undergraduate years: freshman, sophomore, junior, and senior. A student’s classification is generally determined by the academic year in which the student’s cohort began the first year of college. In the first year, students in the cohort are designated freshmen. The number of credits
a student has earned does not determine class standing. A student who graduates after three years would graduate as a junior.

In the case of students transferring to the university, or students who have been on leave and missed two or more semesters, classification will be determined by the student’s academic advising office when the student returns to the university. If, for example, a student was on leave of absence for an entire academic year, the advising office could assign the student to a cohort one year behind the student’s original cohort.

Students are required to register with their cohort, not on the basis of total credits or expected date of graduation. Plans to graduate early are not grounds for registering before a student’s cohort. If a student with early graduation clearance is closed out of a required course for the major, the student may petition the department offering the course for approval to add the course. The decision rests with the department.

**Leave of Absence**

Students may be granted a term leave of absence for personal reasons with the approval of the academic advising office for the student’s school and with a letter from the student’s parent or guardian acknowledging the request for leave. Written requests for a leave of absence should be submitted to the academic advising office in the student’s school. Leaves of absence are granted for specific periods, generally up to one year, and such leaves are regarded as approved interruptions of a student’s program. No tuition or fees are charged while on leave.

Students who fail to return to the university when expected will be considered to have withdrawn from the university.

Peabody double degree students may request a leave of absence from the double degree program, but they cannot be granted leaves from only the Homewood or Peabody portion of the program.

**Withdrawal from the University**

A student who wishes to withdraw from the university should first consult with his/her faculty advisor and with the student’s academic advising office. Generally the student must provide a letter from parents or guardians acknowledging the student’s request to withdraw.

An enrolled student who leaves the university without notice, or who fails to register by the second week of the semester, may be considered to have withdrawn from the university if they do not inform the university of their intent to return and request a leave of absence. Parents or guardians will be notified in this case.

**Readmission after Withdrawal**

Students who wish to return after a withdrawal should appeal to their respective advising office. A student must be formally readmitted before they can return. Readmitted students do not pay another matriculation fee.

**Combined Bachelors/Masters (Predoctoral)**

Students in either the School of Arts and Sciences or the School of Engineering must be accepted into a combined program no later than the first semester of their senior year (some departments set an earlier application deadline).

**School of Arts and Sciences**

Students in a combined program are full-time students and are charged full tuition. This category is reserved only for current JHU full-time undergraduate students who are accepted into a combined graduate program. Such students are eligible to become full-time graduate students upon completion of their undergraduate degree requirements.

**School of Engineering**

The registration status of Whiting School of Engineering students who have been admitted into a combined bachelor’s/master’s degree program will switch from undergraduate to graduate once they obtain clearance from their respective departments and either:

1. complete the requirements for a bachelor’s degree, or
2. complete eight semesters of full-time study, whichever comes first.

As soon as this occurs, a student is guaranteed health insurance benefits and becomes eligible for a partial tuition waiver and research and teaching assistantships (the graduate program determines the student’s level of support).

**Requirements for a Bachelor’s Degree**

**Completing a Major**

Every student who earns a bachelor’s degree must satisfy the requirements of a major. A major is a structured curriculum, usually within the confines of a particular academic field. At Johns Hopkins, an option exists for students, under the guidance of a faculty member, to design an interdisciplinary major that draws upon the subject matters from several departments. Generally the requirements for a major provide a student with a broad over-view of the field through introductory courses, followed by more specialized courses tailored to meet the student’s interests in the field. The requirements for the major may also include courses in other disciplines that provide skills and information of importance to professionals in the major field. Courses required for the major must be taken for a letter grade. Many majors require a grade of C- or better in required courses.

**Distribution Requirements**

It is widely recognized that an undergraduate education must provide the groundwork for a student’s career and professional development. However, undergraduates are also expected to develop broad intellectual interests that will enrich their own lives and their contributions to society. In many institutions, this second goal is embodied in a required set of core courses taken by all students. At Johns Hopkins, students are given a choice in the matter.

Area designators represent an association between the course and a broad field of knowledge. In general, courses offered in a particular department tend to reflect the intellectual traditions and approaches of the discipline embraced by the department. Courses with area designators are expected to do more than employ basic techniques, they are to advance knowledge and increase a student’s understanding of the theory. Courses that are teaching a basic skill, and therefore do not expose the student to modes of analysis and scholarship that represent the essence of a given discipline, will not be assigned an area designator.

If taught within a Homewood academic department, the department is responsible for assigning area designators to their courses. Courses not
offered through Homewood academic departments will be reviewed by the appropriate deans’ office to review proposed designators.

All students are required to earn a minimum number of credits in academic areas outside their majors. The academic areas in the Hopkins curriculum are humanities (H), natural sciences (N), social and behavioral sciences (S), quantitative and mathematical sciences (Q), and engineering (E).

The area designations of courses (H, S, N, Q, and E) are included in the course information in the JHU catalog and in the online schedule of classes. The area designation also appears beside the course title on a student’s academic record. When a course has more than one area designation (HS, EN, EQ, etc.), students may use only one of the designations to satisfy the distribution requirement.

Only courses or other credit-bearing opportunities with area designations may be used to satisfy the distribution requirement. Area designators are not assigned to the following:

- Independent study
- Research
- Internships
- Music performance (unless taken as part of a music minor, in which case the course will be designated H)
- Dance performance
- Foreign language elements courses (see additional foreign language rules)
- Medical tutorials

Area designations can be assigned to courses taken elsewhere, to courses taken in other divisions of the university, or to graduate courses taken by undergraduates. These assignments are made by the appropriate deans’ office based on the course content and the recommendations of the faculty. The most useful criteria for determining an appropriate area designator will be the course description and a similar JHU departmental offering.

The following courses at the Peabody Conservatory have H or S designations:

**Area Designators for Peabody Courses**

**Distribution Requirements for Arts & Sciences Majors**

Students must earn at least 30 credits in courses from areas outside their major area.

To assure that all students in the humanities or social sciences have some exposure to the sciences and math, at least 12 of the 30 credits required for distribution must be in N, Q, and/or E areas. Students in the natural sciences or quantitative studies must earn at least 18 in H and/or S areas.

In Arts and Sciences, courses taken for the distribution requirement may be taken for a letter grade or for Satisfactory/Unsatisfactory credit. Courses passed with a letter grade of D or better, or passed with a Satisfactory grade, may fulfill the distribution requirement even though the grade will appear as Unsatisfactory (UCR) on the official record. Satisfactory grades (representing a C- or higher letter grade) earned in a student’s first semester at JHU may satisfy the distribution requirement if they have the correct area designations.

**Distribution Requirements for Engineering Majors** (a heading smaller than “Distribution Requirements”)

Students in engineering must complete the following distribution requirements:

- 18-21 credits (6 or 7 courses at least 3 credits each) designated H and/or S. Although language elements courses do not carry an area designator, engineering students may use these courses as substitutes for humanities courses in meeting the distribution requirement.
- At least 75 credits earned in courses coded E, Q, or N, with at least 30 credits in courses coded N or Q, with no course counted twice. At least 30 of the 75 credits must be earned outside the student’s major department.

In Engineering, each department determines whether or not the Satisfactory/Unsatisfactory grading option will be permitted for courses used to satisfy the distribution requirement. Satisfactory grades (representing a C- or higher letter grade) earned in a student’s first college semester at JHU may satisfy the distribution requirement if they have the correct area designations.

**Writing Requirement**

To encourage excellence in writing, across disciplines, the university requires all undergraduates to take a number of writing-intensive courses. A writing-intensive (W) course is one in which students write at least 20 pages of finished writing, distributed over multiple assignments, usually 3 or 4 papers, throughout the semester. Instructors respond to students’ work in written comments or in conference, or both; and students have at least one opportunity to receive their instructor’s feedback on a draft and then revise. A writing-intensive course guides students’ practice in writing and makes writing an integral part of the course. The writing-intensive requirement is administered by Patricia Kain, Director of the Expository Writing Program, 120 Greenhouse Annex.

Writing-intensive courses are indicated by a “W” in the JHU course schedule. An asterisk (*) denotes writing-intensive courses on a student’s transcript. Courses taken to satisfy the writing requirement must be taken for a letter grade and passed with a grade of C- or better. Writing-
intensive courses taken to satisfy the requirements of a major or the distribution requirement may also count toward the writing requirement.

All students in the School of Arts and Sciences and candidates for a B.A. degree in the School of Engineering must complete 12 credits (four courses) in writing-intensive courses. Candidates for a B.S. in Engineering must complete 6 credits (two courses) in W courses.

Students who wish to receive writing-intensive credit for a course taken at another college or university must obtain written approval from Professor Kain. No more than 6 credits may be transferred to meet the writing requirement. Students must have a grade of B or higher in the course and must provide Professor Kain with the course syllabus. Please see the procedure for transferring writing credits (http://krieger.jhu.edu/ewp/writing%20requirement).

Students in the School of Arts and Sciences who enter the university with SAT scores below 600 on the SAT writing test or the SAT verbal test are advised to take during the fall term of their first year.

Number of Credits Required for Graduation

The Bachelor of Arts degree requires 120 credits. The Bachelor of Science degree, whether in Arts and Sciences or Engineering, requires from 120 to 130 credits, depending on the major. No program may require more than 130 credits. At least 60 of the total credits must be earned while a full-time student at Johns Hopkins. These 60 credits may include one course per semester taken at another division of the university or at one of the cooperative education schools. No more than a total of 12 transfer and summer credits from other schools may be applied toward graduation, whether earned before or after matriculation. Students earning a double-degree at Peabody must complete at least 48 credits on the Homewood campus in either the Krieger School of Arts & Sciences or the Whiting School of Engineering.

Minimum Grade Point Average Required for Graduation

Students must have a grade point average of at least 2.00 in the courses required for the major, i.e., not including elective courses or courses used only for the distribution requirement. University policy allows no more than 18 credits from courses with grades of D or D+ to be counted toward the credits required for graduation. Departments may set a lower limit on the number of permissible D or D+ grades for a specific major. Many departments do not accept any D or D+ credits for major requirements.

Number of Full-time Semesters in Residence Required for Graduation (Residence Requirement)

Students who enter the university from high school are expected to complete graduation requirements in eight full-time semesters, but may graduate earlier if all requirements have been met. All candidates for a bachelor’s degree in either the School of Arts and Sciences or the School of Engineering must complete a minimum of four semesters in residence as a full-time student in these schools. Prior to graduation, students must be in residence for at least two of the final four semesters, including the final semester prior to graduation.

All transfer students must complete at least four full-time semesters in residence at JHU. Transfer students may be required to complete additional full-time semesters and this will be determined at the time of matriculation at JHU. Transfer students must be in residence for at least two of their final four semesters, including the final semester prior to graduation.

Students who study abroad during the fall or spring semesters are not considered to be in residence in the schools of Arts and Sciences or Engineering while abroad.

Statute of Limitations

A student must fulfill all degree requirements for graduation within 10 academic calendar years from the date of matriculation at the university.

Policies on Majors & Minors

Departmental Directors of Undergraduate Studies

For every major and minor that is offered at Johns Hopkins, there is a faculty member or their designee who serves as the program’s Director of Undergraduate Studies (DUS). They are available to answer questions about their major(s) and/or minor(s). The directors also assign faculty advisors to students who declare a major or minor.

Click for a list of Directors of Undergraduate Studies in Arts and Sciences (http://www.advising.jhu.edu/directors.php) or in Engineering (http://engineering.jhu.edu/academics/degrees-at-a-glance).

Declaring a Major in Arts and Sciences

Students who enter the Krieger School of Arts and Sciences from high school may indicate an intended major on the advising materials sent to them over the summer. However, they will be advised by the Office of Academic Advising during the freshman year and are classified as pre-majors. In April, freshmen in Arts and Sciences will meet with an academic advisor to declare their major. To declare a major at a later time, see “Changing Majors or Advisors.” Students must declare a major by the end of their second year in order to assure that they will complete requirements for graduation in four years.

Declaring a Major in Engineering

Students who enter the Whiting School of Engineering (WSE) declare a specific engineering major on their application for admission. A student must take direct action to change the major.

Students who enter the Biomedical Engineering major must be accepted into the program at the time of application for admission. The student’s offer of admission to the university will indicate either:

- acceptance into the BME program
- acceptance into any Engineering or Arts & Sciences major except BME

On a space available basis, BME may accept a limited number of students into the program after the freshman year based on the overall academic credentials of each applicant. However, this option is exercised very infrequently by the BME department.

Students may also select the more general “undecided engineering” category on the admissions application to enter the WSE. It is recommended that undecided engineering students select a specific major no later than the end of freshman year.
Interdisciplinary Major

Students in the humanities and social sciences who wish to design their own major, or who wish to divide their studies between departments, may be able to create their own program by following the requirements for an interdisciplinary major. The interdisciplinary major is designed for the student whose academic interests straddle several traditional disciplines but who maintains a substantive focus. For example, a student interested in the Revolutionary period may construct a curriculum using courses from History, English, History of Art, and Sociology. Another may wish to focus on children in poverty, drawing from Anthropology and Economics. Proposals for the interdisciplinary major should be submitted at the end of the sophomore year. Though rarely a viable option, engineering students who want to pursue an interdisciplinary major as a second major must follow the same guidelines.

This major requires the support of a faculty advisor and the approval of the Arts and Sciences Curriculum Committee. A student wishing to complete this major must work with a full-time faculty member from the Homewood campus to construct a curricular plan of past and future course work. This plan should offer a list of courses representing 45 to 60 credits. These courses can include all related prerequisites and related courses, such as language study. Independent study, research, and internships may be included. Twenty-one of these credits must be earned at the 300-level or higher. Courses from the School of Engineering are not permitted, except by petition.

The written proposal should show how each of these courses provides insight on a given topic, concept, issue, time period, etc. There is no need to defend the principle of interdisciplinary study, as that is a given, but the student must show that the courses from two or more departments represent a conceptual whole.

After receiving approval from a sponsoring faculty advisor, the student then works with the Office of Academic Advising to finalize the proposal and to present it to the Curriculum Committee, consisting of faculty and undergraduates, who must approve the proposal by majority vote. After approval, the student continues to work with the faculty advisor and Academic Advising to oversee completion of requirements.

Changing Majors or Advisors

Once students in Arts and Sciences have declared a major, they may change their major or their faculty advisor at a later date by completing a Change of Major form available from the Office of the Registrar (75 Garland) or the Office of Academic Advising (Garland, Suite 300) and submitting the new form to the Office of the Registrar.

After students in Engineering have enrolled at Hopkins, they may change their major or their faculty advisor by completing a Change of Major form available from the Office of the Registrar (75 Garland) or the Office of Engineering Advising (Shaffer 103). Note that students may declare the BME major only as entering freshmen or as one of a limited number of students accepted into the program after the freshman year based on the overall academic credentials of each applicant and on space available.

Completion of the Change of Major form requires that a student contact the director of undergraduate studies in the new major department to be assigned a new faculty advisor. The completed Change of Major form should be submitted to the Registrar’s office.

Double Majors

Students may fulfill the requirements for more than one major. Students may add or drop an additional major by completing the appropriate form, available from the Registrar or from the student’s academic advising office. The form must be signed by the Director of Undergraduate Studies for the major before it is submitted to the Registrar. The DUS will also assign a faculty advisor to the student.

Upon graduation, a notation is placed on the academic record acknowledging completion of requirements for the additional major(s). A student with a double major receives the degree (B.A./B.S.) associated with the student’s primary major. Completing a second major does not entitle the student to a second degree. When completing a double major, students need only satisfy the distribution requirements of one of the majors.

Declaring a Minor

Students who wish to complete the requirements for a minor should declare their intentions to the minor department or center sponsoring the minor. Forms for that purpose are available in the Registrar’s Office and both advising offices. A notation regarding completion of a minor is placed on the transcript, but the minor does not appear on the diploma.

Official recognition with notation on the academic record is not given for completion of majors or minors at other divisions of the university of other colleges.

Restrictions Applying to Double Majors and Minors

Within the Hopkins curriculum, requirements for the completion of undergraduate majors are established by academic departments and approved by the Homewood Academic Council, acting on recommendations from the Curriculum Committees of the Krieger and Whiting Schools. Students who fulfill the necessary prerequisites and satisfy the specified course requirements for a major will be certified as having completed that major. While departments are free to designate the range of courses that may satisfy major requirements for their own academic programs, they may not prohibit the use of course work presented for their department’s major from being used to satisfy the requirements of other majors. In other words, students may “double count” coursework that independently meets the requirements of more than one major.

Students are encouraged to choose additional areas of study to complement their major. However, students may not choose a minor with an identical name to their major. For example, a student majoring in Africana Studies may not declare a minor in Africana Studies.

Other prohibited combinations include:

1. Students majoring in Molecular and Cellular Biology may not major in Biology.
2. Students majoring in the Natural Sciences Area may only double major or minor in a program outside of the natural sciences.
3. Students majoring in Romance Languages may not major or minor in one of the individual Romance Languages (except for the Spanish for the Professions minor).
4. Students majoring in French may not complete either French minor option.
Closely-related majors and minors that are allowed include:

1. Economics majors may complete a Financial Economics minor.
2. Spanish majors and Romance Languages Majors may complete the Spanish for the Professions minor.
3. Computer Science majors may complete a Computer Integrated Surgery minor.

The examples provided above may not be an exhaustive list and students who have questions about combinations of related programs should consult an advisor in their respective advising office.

Graduation Policies

Applying to Graduate

Students who intend to graduate in the next academic year must complete an Application for Graduation as directed by their respective academic advising office.

Students will select their conferral date based upon their ability to complete their graduation requirements. The university confers degrees three times per year in August, December, and May and conducts one graduation ceremony in May.

Students will be responsible for completing the requirements for a Bachelor degree. If students must deviate from the recommendations of the advisors or if the student intends to use a different course to meet a requirement, the student must obtain approval of the change in writing.

All grades and credits for courses that are required for graduation must be submitted in time to clear students for graduation. Graduating students who are taking courses at cooperative schools or in other divisions of the university must make arrangements with their instructors on the first day of class to have final grades submitted to the host registrar and then to the Homewood Registrar by the deadline for submitting grades for graduating students. If such an arrangement cannot be made, students should not register for the course.

The university commencement ceremony is held once each year in May. Students may participate in the graduation ceremony when all graduation requirements have been satisfied. Students who are seeking an August degree conferral date should speak to their academic advising office regarding their ability to participate in the preceding commencement ceremony.

The university does not guarantee the award of a degree or a certificate of satisfactory completion of a course of study or training program. The award of degrees and certificates of satisfactory completion is conditional upon a) satisfaction of all current degree and instructional requirements at the time of the award, b) compliance with the university and divisional regulations, and c) performance meeting the bona fide expectations of the faculty. No member of the faculty is obliged to provide students or graduates with an evaluation or letter of recommendation which does not accurately reflect the faculty member’s true opinion and evaluation of the student’s academic performance and conduct.

Completing Graduation Requirements

Students are eligible to graduate after the fall or spring semester when they have completed all graduation requirements (p. 35), including the four-semester minimum residence requirement and the minimum JHU credit requirement of 60 JHU credits. Four years of undergraduate study is but a short time to refine existing talents and explore new interests. The entire university community is dedicated to making these short years productive and exciting for all of our students.

Students who have met all requirements for graduation in the School of Arts and Sciences or the School of Engineering as of December of their senior year may remain in university housing and/or continue to participate in student organizations only if they enroll for a minimum of 6 credits in these schools for the spring semester.

Students who have not completed degree requirements after eight full-time semesters in college may register for less than 12 credits and pay for courses on a per credit basis. With approval of the director of the student’s academic advising office and the major department (in the case of courses required for the major), these students may take courses elsewhere to meet the remaining graduation requirements, but must observe the 12 credit limit on transfer credit. These students also may have part-time status in the semester when they graduate.

A student will not be graduated with unresolved outstanding charges of misconduct or academic ethics violations.

Each student expecting to graduate will receive a final bill from the university. It is university policy that all outstanding accounts must be paid in full before a student’s diploma may be released.

Restrictions on When Students Can Complete Graduation Requirements

Graduation requirements can only be completed in the fall or spring semester unless a student has already completed eight full-time semesters. Because of the requirement that students have full-time status in the semester immediately prior to graduation, students must register for at least 12 credits in the final semester even if all course and credit requirements could be met with fewer than 12 credits.

Students who have already completed eight full-time semesters and at least four semesters in residence without completing graduation requirements may stay on for additional semesters to complete graduation requirements on a full-time or part-time basis and may complete requirements in summer session.

Transfer students who have already completed the required number of semesters may stay on for additional semesters to complete graduation requirements on a full-time or part-time basis and may complete requirements in summer session.

Graduating Early (less than 8 semesters)

Students are eligible to graduate early at the end of the fall or spring semester if they have completed all requirements for graduation, including the residence requirement. Students graduating early may not use intersession to complete remaining graduation requirements. Students may not graduate early during the summer.

Incomplete Grades and Graduation Status

Students with incomplete grades or missing grades in required courses at the date of conferral will not graduate.

Students who have completed at least 8 full-time semesters and have also met the residency requirement and who receive one or more incompletes in their last semester in attendance, may complete those
Students who have completed less than 8 full-time semesters and who receive one or more incompletes in their intended last fall or spring semester in attendance, are required to register for another full-time fall or spring semester (at least 12 credits) in order to complete all degree requirements (including the residency requirement).

**Last Semester Option**

In their last semester before graduation, students may request that they be excused from taking the final examination in one or more courses. This option is solely at the discretion of the course instructor. This option is not available to students who are graduating early.

**S/U Option in the Last Semester**

Students in their final semester, who will have completed at least eight full-time semesters in college when they graduate and who are taking more credits than are needed to complete graduation requirements, may take one or more of the extra courses for S/U credit. Engineering students must have the faculty advisor’s permission, indicated by his/her signature on an add/drop form, to request this option. The faculty advisor’s signature indicates that the student will have completed all degree requirements without this course. In addition, a signature from the Engineering advising office is needed to confirm that the senior has applied for graduation in the spring semester. Arts & Sciences students must seek approval from the Academic Advising Office.

The extra courses may also include up to 6 credits of independent academic work, either graded or S/U. In addition, the usual limit of no more than 6 credits per year of independent academic work will be waived if the additional credits are for extra credit work done in the final semester.

**General and Departmental Honors at Graduation**

Students may receive general honors, departmental honors, or both at graduation. General honors are awarded to students with cumulative grade point averages of 3.50 or better. The final determination is made after all grades have been reported. Departments set their own standards for the award of departmental honors. Students should consult with Director of Undergraduate Studies for their major about the requirements for honors. If a student believes that s/he has met the requirements for departmental honors, the student must complete a departmental honors form with the department’s advising coordinator and submit the form to the Office of Academic Advising (AS) or the Office of Engineering Advising (EN) with the coordinator’s approval signature.

General and departmental honors are noted on a student’s academic record following the student’s last undergraduate semester before graduation. In addition, honors are noted in the Commencement program. However, because the program is printed several weeks before the date of Commencement, not all honors are announced in time for inclusion in the program.

**Completing an Honors Thesis**

Students who are completing an honors thesis for departmental honors must complete the thesis before graduating. Students may not stay on after graduation to complete an honors thesis. Similarly, students graduating at midyear may not register part-time in the spring semester to finish an honors thesis.

**Graduation Closes the Undergraduate Record**

Upon graduation, the undergraduate record is closed. The only permitted changes are the resolution of incomplete grades, missing grades, and grade errors. These changes must be resolved by the first Monday after 30 days have lapsed since the degree conferral date. A student who has been cleared for graduation by completing all credit and course requirements for the bachelor’s degree in more than four and less than eight semesters may choose to enroll for an additional semester as a special student following completion of all degree requirements, subject to approval by the student’s advising office. A new transcript is started for students staying on after graduating.

**Participation in Commencement**

Commencement is a celebration for students who have completed all requirements for graduation. The student’s academic advising office determines whether students have completed all requirements and clears the student for graduation and participation in Commencement. Students expecting to complete their degree requirements for an August degree conferral should speak to their respective academic advising office with regard to their eligibility to participate in Commencement. The diploma will not be awarded until the final course is completed successfully and recorded.

**Earning a Second Major or a Minor after Graduating**

Students who have completed eight or more semesters in college may take additional courses after graduation to complete a second major or minor, or to further their studies on either a full-time or part-time basis. The courses, grades, and credits will appear on a new academic record. If the additional courses satisfy the requirements for a second major or a minor, a notation indicating the additional major or minor will be added to the new academic record. Students must notify their academic advising office when additional courses taken after graduation satisfy another major or minor.

Students who graduate in fewer than eight semesters may also take courses after graduation as a full-time or part-time student if not completing an additional major or minor. Students who graduate early lose the opportunity to complete additional majors or minors after graduation.

Students should seek assistance of their respective advising office in order to register for a course after graduation.

**Second Degrees**

Krieger School of Arts and Sciences and Whiting School of Engineering undergraduate-degree alumni who wish to earn a second bachelor’s degree at Hopkins must contact their advising office. Students who receive approval must have already completed the requirements for the first bachelor’s degree and complete an additional 60 credits at Hopkins and an additional four full-time semesters at Hopkins beyond what they have done for the first degree.
Academic Standing: Credits, Grades, Absences

Sources of Credit

Overview

Students complete most of the requirements for a bachelor’s degree through courses taken at Johns Hopkins University while a matriculated student.

There are, however, a variety of other sources of college credit which may contribute towards a student’s degree completion. Credit is accepted for college-level work completed at another college. Credit is not awarded for college-level courses taken on a high school campus. Credit is granted for some Advanced Placement (AP) examinations, General Certificate of Education (GCE) A-level courses (British and Singapore) and higher-level International Baccalaureate courses (IB). Foreign certificate programs like the French Baccalauréate and the German Abitur are considered on a case-by-case basis by the advising office in consultation with the faculty.

Credit is not awarded through exams in the College Level Examination Program (CLEP). Scores on the SAT-II tests and departmental placement tests (such as the math or foreign language placement tests in use at Hopkins) are used for placement purposes only and do not receive academic credit.

This section includes the policies governing these other sources of credit, and is divided into the following categories:

1. For students admitted to JHU as freshmen (from high school/secondary school)
   a. Sources of credit before matriculation as a degree candidate at JHU
      i. Advanced Placement (AP) exams
      ii. International Baccalaureate
      iii. GCE A-level exams (British and Singapore)
      iv. other foreign certificates/exams
      v. courses taken at other college and universities
      vi. JHU Pre-College Program
   b. Sources of credit after matriculation as a degree candidate
2. For students admitted to JHU as transfer students from another college or university
   a. Sources of credit before matriculation as a degree candidate at JHU
   b. Sources of credit after matriculation as a degree candidate
3. Details about transferring writing intensive credit

Policies for Students Admitted to JHU as Freshmen

Sources of Credit Prior to Matriculation as a Degree Candidate

A. Credit for Advanced Placement Exams

To receive credit, Advanced Placement examinations must be taken prior to admission to the university.

If a student enters the university with credit for an advanced placement course and then takes an equivalent course at the university for credit, the advanced placement credits (and lab class waiver, if applicable) will be disallowed. The credits and grade for the Hopkins course will appear on the academic record. The advanced placement exam title remains on the record as well, but the credit value is converted to zero. This policy also applies to IB credit, GCE credit, and other foreign exams.

* Macroeconomics: Students who score a 5 on the Macro AP exam are placed out of AS.180.101 Elements of Macroeconomics and receive University credit. However, it does not count as one of the ten courses required for the economics major.

** Microeconomics: Students who score a 5 on the Micro AP exam, AND who pass a diagnostic test administered by Professor Hamilton will place out of AS.180.102 Elements of Microeconomics and receive University credit for it. However, it does not count as one of the ten course required for the economics major. Interested students should make an appointment with Professor Hamilton.
Students who are awarded credit for AP Biology or AP Physics are exempt from taking the corresponding lab courses (for AS.171.101 General Physics: Physical Science I and AS.171.102 General Physics: Physical Science Majors II and for AS.020.153 General Biology Laboratory I-AS.020.154 General Biology Lab II). The lab courses are waived but no credit is awarded. Effective fall 2009, students who have credit for AP Biology but take General Biology Lab 1 and/or General Biology Lab 2 will lose all eight credits of AP Biology credit.

Effective fall 2010, students who have credit for AP Chemistry but take either lab semester without the lecture course, will lose 4 of their AP credits. Students who take either lecture class without the lab will lose AP credit for the corresponding lab in addition to the lecture.

Note: Effective fall 2008, students completing AS.171.105 Classical Mechanics I and AS.171.106 Electricity and Magnetism I retain AP Physics credits.

### C. Foreign Certificate Exams

Credit is awarded for grades of A or B on the British and Singapore General Certificate of Education A-Level courses in the same subject areas included on the Advanced Placement exams and International Baccalaureate courses listed above. A grade of A in Physics on the GCE is awarded 8 credits. A grade of B is awarded 4 credits. AS and O levels are not accepted. Foreign certificate programs like the French Baccalaureate and the German Abitur are considered on a case-by-case basis.

### D. Placement in Courses

Undergraduates with prior knowledge of a foreign language or college mathematics are placed into the appropriate level of foreign language courses and mathematics courses based on their scores on one or more of the following:

- Advanced Placement tests, I.B and G.C.E. examinations
- Departmental examinations or evaluations

Scores on the SAT-II tests and departmental placement tests are used for placement purposes only and do not receive academic credit.

Most department placement examinations for foreign language and mathematics are given to entering students online in June. Upperclass students who have not taken a placement examination should consult the language department or Mathematics Department about placement before registering for a language or mathematics course.

All students who receive a grade of C- or better in Calculus II will receive a waiver for Calculus I if they were placed into the Calculus II course as a result of a high placement test score.

No academic credit is awarded when a course is waived.

### E. JHU Pre-College Summer Program

Pre-college students who take JHU Summer School courses prior to matriculation receive credit for courses with grades of C or better, but the grades are not included in the undergraduate record. Because the pre-college courses are taken at JHU, there is no limit on the total number of JHU credits that may be transferred to the undergraduate record. Students must request that these courses be transferred to their academic record by contacting Academic Advising or Engineering Advising.

### F. Deferred Admission

Students who have been accepted to the university may defer admission for up to two years with approval from the director of undergraduate admissions. Freshmen who have deferred admission begin their studies in the fall semester. The purpose of a deferral is to allow students to take time off in order to travel, work, or experience another culture. Deferrals are not granted for the purpose of studying at another institution. Students who wish to pursue academic studies during the deferment period may do so; however, the credits earned during the deferment period will not be applied toward the university’s degree requirements.

### G. Transferring Credits for College Courses Taken at Other Colleges or Universities

Students who enter the university from high school may transfer up to 12 credits from approved courses taken at other institutions, whether taken before or after matriculation. The grades earned in these courses do not appear on the Hopkins record and therefore do not contribute to the Hopkins grade point average. The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.

Students who have completed coursework at a college or university prior to entering Hopkins must complete a “College Course Information Form” and have the form approved by the high school guidance counselor. The form, along with an official college transcript and course description, should be submitted to the student’s advising office. The transfer of a
math course typically requires the student to submit for review a syllabus that lists all topics covered by the course. The approval of the Director of Undergraduate Studies is necessary to use a transfer course for a major or minor requirement.

To be eligible for transfer credit, an approved course must be taken for a grade at an approved college and completed with a grade of C or better. Ungraded or pass/fail courses taken prior to matriculation, if approved, may receive credit if the host school states in writing that the mark represents a grade of C or better. Credit for approved courses taken at a community college will be transferred only if taken prior to matriculation at Johns Hopkins. Credit for courses earned at a school using the quarter system will be converted to a comparable number of semester credits. One credit in a quarter system is equivalent to 2/3 of a credit earned in a semester system.

A maximum of 6 credits may be granted for courses which are in curriculum areas not covered by the programs of the School of Arts and Sciences and the School of Engineering.

Some students enter the university from high school with additional college course work beyond the 12 credits that may be transferred. If these additional courses are equivalent to AP subjects that the university accepts for credit, and if the courses are needed to complete requirements for a major or are prerequisites for higher level courses that the student will take at JHU, then students may request that the department waive the comparable courses at JHU. To obtain a waiver, students must contact their academic advising office.

Sources of Credit After Matriculation as a Degree Candidate

Students who enter the university from high school may transfer up to 12 credits from approved courses taken at other institutions, whether taken before or after matriculation.

A. Registering for Summer Courses at Other Colleges and Universities

Courses must be completed at a four-year college or university. In order to take a course during the summer at another accredited school, the approval of the faculty advisor and the academic advising office of the student’s school is required. A form for this purpose is available in the Registrar’s Office and the advising offices. The student must complete the form and take the form and a course description to the appropriate individuals for their approval signatures. A course taken to fulfill a requirement for a major/minor must also be approved by the major/minor department. In addition, all students taking general physics, economics, German, or a romance language elsewhere in the summer must have the approval of the appropriate department, whether the course is a requirement or an elective. Courses must be taken for a grade.

In order to transfer credit for previously approved summer work done elsewhere, students must arrange for an official transcript to be sent to the Homewood Registrar’s Office. A grade of C or better is required. The course title and the number of credits, but not the letter grade, are reported on the Hopkins academic record. If the summer work has not been previously approved, send the transcript to the student’s academic advising office along with a course description.

B. Study Abroad

See Study Abroad (p. 46) in the Academic and Professional Opportunities and Resources section.

C. Courses at Colleges and Universities in the Baltimore Cooperative Program

See Registering for Courses at Cooperative Schools (p. 28) in the Registration Policies section. The cooperative program does not operate during the summer session; courses taken at cooperative institutions are considered transfer credit and are subject to the same rules and limits as courses from other colleges and universities.

D. Policy on Online Courses

Students are not permitted to take online courses at other institutions while taking courses during the fall and spring semesters at JHU. Online courses taken from another institution during the summer or Intersession will be accepted for transfer credit if within the 12-credit limit and with prior approval from the student’s advising office.

Policies for Students Admitted to JHU as Transfer Students

Credits Earned before Matriculation as Degree Candidate at JHU

Transfer students who completed Advanced Placement or other exams during high school are subject to the same policies as students admitted directly from high school.

At the time of matriculation, transfer students into the Krieger School of Arts and Sciences may bring in up to 60 transfer credits towards a degree requiring 120 credits. Students earning degrees requiring more than 120 credits in both KSAS and WSE may bring in more than 60 credits.

A. Maryland Institute College of Art Transfer Students

Maryland Institute College of Art students who transfer to Johns Hopkins may receive full credit for up to eight fine arts courses in their major program. In addition they may receive credit for any non-fine arts courses and normal academic courses. After matriculating at Johns Hopkins, MICA students may continue to take one additional fine arts course per semester at the Institute for credit and a grade.

B. Peabody Conservatory Transfer Students

Students who transfer from the Peabody Conservatory will be granted full credit for performance courses in their major instrument. For performance courses in other instruments, only one credit per semester will be awarded.

Sources of Credit after Matriculation as a Degree Candidate

All transfer students must complete at least four semesters in residence as a full-time student at JHU. Transfer students must be in residence for at least two of their final four semesters, including the final semester prior to graduation.

At least 60 of the total degree credits must be earned while a full-time student at Johns Hopkins. All transfer students may transfer up to an additional 12 credits after matriculation in accordance to the policies established for students who matriculated at JHU as a freshman.

Regardless of the number of total transfer credits, all transfer students must complete 60 credits at Hopkins and at least 4 full-time semesters.
Details about Transferring Writing Intensive Credit

Students who transfer to Johns Hopkins from another college or university, and Hopkins students who study abroad for a semester, may transfer up to 6 credits of writing-intensive credit for a course(s) under these conditions:

1. The course must meet University criteria for a writing intensive course;
2. Students must take the course during the regular academic year, in either fall or spring semester (there is no writing-intensive transfer credit for summer courses); and
3. Students must have a grade of B or higher in the course.

Students who meet these criteria need to present an official transcript for the course to their respective advising office and present course materials to Patricia Kain, Director of the Expository Writing Program. To arrange a meeting, she may be emailed at kain@jhu.edu. Students should bring a syllabus, course description from the catalog or website, and the papers written for the course.

Transcripts

Students who want transcripts of their academic records at Johns Hopkins or who want them forwarded elsewhere should submit a written request to the Office of the Registrar three to five days before the transcript is needed. Transcripts may also be requested online at www.jhu.edu/registrar/transcript.html. Partial transcripts of a student’s record will not be issued.

Transcripts are normally issued only at the request of the student or with his/her consent. The only exception to this policy is the issuance of transcripts to offices and departments within the university.

Grading Policies

Grades are submitted to the Registrar at the end of the semester. Grades can be viewed online by students using their JHED account and password. Parents may be authorized to view grades in ISIS with permission from the student.

Parents are informed when students are in serious academic difficulty so that they may work with the university to help the student to improve academic performance. Parents are notified when a student is placed on academic probation or is dismissed for academic reasons.

Undergraduates who are financially independent may file a notarized statement of financial independence with the Registrar. This action assures that grades and notification will not be released to parents without the student’s consent.

Letter Grades and Grade Point Average

Each letter grade corresponds to a numerical grade point equivalent to allow the computation of a grade point average. The letter grades and their grade point equivalents are as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Performance</th>
<th>GPA Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>Excellent</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>Good</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>Good</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>Satisfactory</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>Satisfactory</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>Passing</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>Passing</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>0.0</td>
</tr>
</tbody>
</table>

For first semester freshmen:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Performance</th>
<th>GPA Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>S</td>
<td>Satisfactory: C- or above (credit earned)</td>
<td></td>
</tr>
<tr>
<td>UCR</td>
<td>Unsatisfactory with Credit: D or D+ (credit earned)</td>
<td></td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory: F (no credit earned)</td>
<td></td>
</tr>
</tbody>
</table>

For all other undergraduates:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Performance</th>
<th>GPA Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>S</td>
<td>Satisfactory: C- or above (credit earned)</td>
<td></td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory: D or F (no credit earned)</td>
<td></td>
</tr>
</tbody>
</table>

Other marks are used in special circumstances as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>I/Grade</td>
<td>Incomplete/Reversion Grade (incomplete grade reverts to this letter grade at deadline unless alternate grade is submitted prior to that)</td>
</tr>
<tr>
<td>MR</td>
<td>Missing grade roster</td>
</tr>
<tr>
<td>MT</td>
<td>Multi-term</td>
</tr>
<tr>
<td>ND</td>
<td>Not officially dropped</td>
</tr>
<tr>
<td>R</td>
<td>Course repeated</td>
</tr>
<tr>
<td>W</td>
<td>Official withdrawal</td>
</tr>
<tr>
<td>X</td>
<td>No grade reported by instructor</td>
</tr>
</tbody>
</table>

Grade Points and Grade Point Average

To determine the grade point average, multiply the grade point equivalent by the number of credits for the course. Add the products (grade points earned), then divide the total by the number of credits in the computation.

A Sample Calculation of a Grade Point Average

(Insert table to be inserted after it is programmed)

Freshman First-Semester Grading Policy

Covered Grades

The letter grades earned by students in their first semester at the university are not reported on the transcript. Each course that was passed with a grade of C- or above is assigned the letter S (for Satisfactory) in place of a grade. These courses can be used to satisfy requirements for the major, for distribution, and for the writing requirement. Letter grades of D and D+ are assigned the grade UCR (for Unsatisfactory with Credit). Letter grades of F are assigned the grade of U (for Unsatisfactory, no credit earned). First semester courses that receive UCR grades and credits may be used to meet distribution requirements.
Transcript of First Semester Grades

All courses appear on the student's permanent academic records. First-year students are assigned letter grades (A+, A, A-, B+, B, B-, C+, C, C-, D+, D, or F) by the professor for each course taken. The letter grades are not entered on the official transcript; rather, they are represented by the S, UCR or U values described above. The actual grades are said to be "covered" by the S/U grades.

No first-semester grades are included in a student's cumulative grade-point average. However, an internal GPA is used by the advising offices and faculty advisors to determine that a student has made academic progress during the first semester.

A transcript of first semester grades is not released outside the university. Faculty members may not release a student's first semester grades. If a first-year student applies to transfer from the university in the spring term, before spring grades have been recorded, the student's advising office can approve release of the actual first semester grades directly to the transfer institution. Once grades from the spring term or additional semesters have been added to the record, the covered grades will not be released.

Students who are applying for or renewing a scholarship may request a letter from their academic advising office stating whether the first semester grades meet the requirements for the scholarship. Students who can demonstrate that failure to release covered grades will prevent them from applying for scholarships or verifying eligibility for scholarships may request that their advising office approve release of the grades. A letter from the scholarship granting institution must state that the application cannot be considered without the actual grades.

Student's Access to First Semester Grades

It is very important that students know what grades they have received in their first semester. Students may access their first semester grades in ISIS for Students.

Satisfactory/Unsatisfactory Grades

(Other than first-semester grading policy described above)

Beginning with the second semester of the first year, undergraduates may select one course each semester and summer at JHU to take for Satisfactory/Unsatisfactory credit. Students indicate their S/U choice on their add/drop form. AS students need the Advising Office approval for courses within their major or writing intensive courses. EN students need approval from the faculty advisor. Course instructors are unaware of which students in a class are registered for S/U credit. They submit letter grades to the Registrar for all students in their course.

Students must decide whether to take a course on a Satisfactory/Unsatisfactory basis by the end of the eighth week of the semester. This deadline applies to all courses, even those which may not have any graded work assigned or returned before the end of the eighth week.

S/U grades have no effect on a student's grade point average. On the academic transcript, students who earn a grade of C- or above in an S/U course receive Satisfactory credit and a mark of S is entered on the academic record. Students who earn a grade below C- in an S/U course receive no credit and a mark of Unsatisfactory is recorded on the academic record.

Restrictions on Satisfactory/Unsatisfactory Grading

The S/U option applies only to courses in the fall, spring and summer terms in the School of Arts and Sciences and the School of Engineering. Only one course per semester or summer may be taken for S/U credit.

However, an eligible student who registers for a course that is only offered for S/U credit may select an additional S/U course in the same semester. Language elements courses must be taken for a letter grade with the exception of Russian elements. Courses fulfilling a requirement for a major or minor must be taken for a grade (except in the first semester of the first year). If a student has taken a course for S/U credit and then changes to a major or minor that requires the course, the grade can be changed to a letter grade before graduation with the approval of the student's academic advising office.

Incomplete Grades

Students who are confronted with compelling circumstances beyond their control that interfere with the ability to complete their semester's work during the normal course of a term may request an Incomplete grade from the instructor. Approval of such a request is neither automatic nor guaranteed. Procrastination or distraction by other pursuits are not regarded as compelling circumstances, and extensions in these situations are unfair to students who have completed their course requirements within the allotted time.

If the instructor agrees to grant an Incomplete grade, the instructor and student must establish a timetable for submitting the unfinished work. When entering an Incomplete grade in ISIS, the instructor must also enter a reversion grade. This is the grade that the student will receive if the missing work is not completed. For example, if the student-based on the coursework completed by the end of the semester-would receive a C+ grade without the missing work, then the grade of I/C+ is entered on the transcript. If the incomplete grade is not resolved within the allowed period (the end of the third week of the subsequent semester), the incomplete grade is automatically converted to the reversion grade (a C+ in this example).

Students who are in good academic standing have until the end of the third week of the next semester to finish Incomplete work. Exceptions to this deadline require a petition from the instructor and appeal to the appropriate advising office before the end of the third week of the following semester. When appealing to change the deadline, faculty memebers must specify a new date for completion of the work which must be before the end of the current semester. Incomplete grades cannot be held over to another semester in order to complete the missing work by repeating the course. Students and instructors do not have an option in this situation. Graduating seniors are expected to resolve incompletes by the close of their undergraduate record. If the work is not finished by the deadline, the reversion grade will be recorded.

Incomplete grades do not affect a student's grade point average, which is based upon the grades that are available for the term. However, students with three or more Incompletes on their record at the start of a semester may be prevented from making changes to their registration for the semester without the approval of the student's advising office. Students who are on academic probation are not allowed to take Incompletes in courses without the approval of the student's advising office. Unauthorized Incompletes will be treated as failures when evaluating the work of students who are on academic probation. Authorized Incompletes must be resolved no later than the deadline established by the Advising Office if the student is on academic probation.
Policy on Changing a Grade

Once an instructor has submitted a grade to the Registrar, grade changes can be made only in the case of error in grading, calculation, or transcription. If a student has questions about a grade, s/he should contact the faculty instructor, who has sole authority to assess and assign course grades. If the instructor determines a change is warranted because of error, the change must be submitted to the Registrar's Office by the end of the following semester. Grade changes for graduating seniors must be submitted by the close of their undergraduate record.

Late Withdrawal from a Course

With extenuating circumstances, the following procedure may be used to withdraw a student from previous graded courses:

- Official notification to change a grade to a withdrawal must be submitted from the Office of the Dean of Student Life to Arts and Sciences Office of Academic Advising or the Office of Engineering Advising
- All notifications must include the last date of attendance and the instructor’s approval
- The Registrar’s Office will process the withdrawal and note the academic record
- Late withdrawals may adversely affect a student’s academic standing or satisfactory academic progress even with official approval.

Retaking a Course

Students may retake a course to absolve a grade of C+ or lower. The grade for the second attempt and the associated credits are recorded on the transcript and are calculated into the GPA. The original grade remains along with the notation “R” to indicate the course was retaken. Such R grades do not affect grade point calculations and do not carry credit toward graduation. Only the grade in the retaken course accrues credit and applies to the GPA, even when the retaken grade is lower than the original grade. A student may retake one course without written permission. Taking the same course a third time or retaking another course requires written permission of the student’s academic advising office.

A course originally taken for a letter grade must be retaken for a letter grade. A course taken under the Satisfactory/Unsatisfactory grading option must also be taken under the Satisfactory/Unsatisfactory grading option. First semester courses whose grades are covered by S/U notation are considered to have been taken for a grade. If a student wants to retake a course from the first semester, the second attempt must also be for a letter grade.

To absolve a grade, the same course must be taken at Hopkins, not another college or university. In situations where the same course is no longer offered, students may be able to absolve a grade in one of two ways:

1. by repeating a course of comparable content and level, or
2. as an independent study

Both of these options require approval of the department and/or instructor responsible for the course and the student’s academic advising office.

Other Restrictions on Absolving a Grade

Grades may not be absolved by retaking a course after graduation.

Grades assigned by the Ethics Board due to an academic ethics violation may not be removed from the academic record by retaking the course. Both the new grade and the assigned grade will be shown.

Important Note About Credit and Grades for Language Elements Courses

Both semesters of language elements courses in French, German, Greek, Italian, Latin, Portuguese, Spanish, and languages offered in the Near Eastern Studies Department must be completed with passing grades in order to retain credit for the courses. If study of the language is terminated after the first semester, the student will lose the credit for the course. The course and grade will remain on the academic record, but no credit will be awarded and the grade will not affect the grade point average. This change to the record is generally made in the last semester prior to graduation by the student’s academic advising office, but students can also request that the advising office make the change at an earlier point. Students do not have to take both semesters of the first year of languages taught through the Language Teaching Center to retain credit from the first semester.

Students must take the language elements (or beginning) courses for a letter grade, with the exception of the Russian Elements course. The letter grade for first-semester freshmen will be covered on the transcript.

Students in the School of Arts and Sciences do not receive an area designation for these elements courses. For students in the School of Engineering, language elements (or beginning) courses can be substituted for humanities courses in meeting the distribution requirement.

Dean’s List

Students who earn a term grade point average of 3.50 or above in a program of at least 14 credits with at least 12 graded credits will be placed on the Dean’s List for academic excellence. An appropriate notation is made on the students’ academic records. Letters are sent to parents. Students’ hometown newspapers are also notified. To help the University place notification in your appropriate hometown newspaper, you may identify the newspaper in your community that is most likely to publish student news by completing this form.

Class Rank

The university does not calculate class rank and therefore, cannot provide this information to students outside parties.

Academic Standing

All students are expected to monitor their grades each semester and to be aware that term grade point averages below 2.0 are unacceptable and put them at risk of dismissal if the unsatisfactory work continues the following semester. A student whose term GPA falls below 1.0 or earns less than 6 credits may be dismissed without having been on academic probation the previous semester.

The university notifies students about academic probation or unsatisfactory academic performance in writing. However, when incomplete or missing grades prevent the advising office from making a decision about academic standing, it may not be possible to send a timely notice to the student. In these cases, decisions about academic standing and dismissal will be based on the final grade report, whether or not previous letters regarding academic standing have been sent to the student. Also, a student who has ceased to keep up with his/her
studies may be dismissed or suspended from the university even when satisfactory academic standards have been met in previous semesters.

**Academic Probation**

At the end of each semester, the Office of Engineering Advising (EN) and the Office of Academic Advising (AS) review the records of all undergraduate students to evaluate the academic progress of each student. A term grade point average of 2.0 or above in a program of at least 12 credits is required for good academic standing. Students who fail to attain this minimal level of performance will be placed on academic probation. A letter informing a student of this status and the terms of academic probation are sent to the student in January (for fall performance) or June (for spring performance). A copy of the letter may also be sent to the parent(s). Students with a term grade point average below 2.0 should consult with an academic advisor about their academic standing, even if they have not received a letter from their advising office.

The terms of academic probation are as follows: Students must complete at least 12 credits in the next semester, with a minimum G.P.A. of 2.0 and a cumulative G.P.A. of 2.0 or above. In making the G.P.A. calculation, incomplete grades (I) will be calculated as failures (F). In addition, any grade in a satisfactory/unsatisfactory course may be taken into consideration.

Students on academic probation may be restricted from registering for the maximum course load. Engineering students on academic probation are permitted a maximum of 14 credits during the probation semester.

**Dismissal for Unsatisfactory Academic Performance**

Decisions about the academic status of students on academic probation are made at the end of each semester by the Academic Review Committee. A student on academic probation who has not met the terms of probation will be withdrawn from the university for a minimum of one semester and a summer.

When a student is withdrawn from the university, several university offices are notified and several important consequences follow.

- Registrar’s Office: cancels the student’s registration for the next semester and authorizes a refund of tuition paid for that semester;
- Office of Student Financial Services: suspends financial aid and work-study aid to the student;
- Housing Office: cancels the student’s housing contract if the student is in university housing;
- Office of International Student and Scholar Services: performs duties as required by U.S. federal regulations regarding persons not eligible to study at the university.

The terms for readmitting a student who has been withdrawn for academic reasons are established by the Academic Review Committee. The readmission process is described in the dismissal letter. Students who have been dismissed should discuss the process with their advising office.

Students who receive prior approval to complete courses at another college or university during the period of dismissal are subject to the university’s 12-credit limit on the number of transfer credits that can be applied toward graduation.

A student whose term GPA falls below 1.0 or earns less than 6 credits may be dismissed without having been on academic probation the previous semester.

**Satisfactory Academic Progress**

Satisfactory academic progress (SAP) refers to minimal standards for grades and cumulative credits required to receive financial aid. The SAP policy is described here: http://www.jhu.edu/financialaid/return.html#satisfactoryacademicprogresspolicy.

**Eligibility for Financial Aid**

All regular degree-seeking students who are eligible to register are also eligible to apply for financial aid.

However, students should be aware that JHU scholarship funds are awarded for a maximum of eight semesters. Under some circumstances, a ninth semester of scholarship may be awarded on appeal. Federal and state aid may be available for additional semesters.

**Eligibility to Register**

Each semester, students are expected to pass at least 12 credits with a grade point average of at least 2.0. Students who fall short of these criteria will be placed on academic probation. Failure to meet these minimal standards for two consecutive semesters will make a student ineligible to register and result in academic dismissal for a minimum of one semester and one summer.

An academic appeals committee will consider student appeals of these decisions. The appeals committee will have the authority to rescind a decision to dismiss a student.

While students are required to maintain full-time status by registering for at least 12 credits per semester, rare circumstances may lead to a student receiving permission to register for less than 12 credits in a given semester because of illness, disability, or other unusual circumstances. Less than full-time status may affect some types of financial aid.

Academic standing will be reviewed at the conclusion of each regular term (fall and spring). Incomplete or missing grades may prevent timely notification to the student. A student’s academic performance during the summer term or intersession will not affect his/her academic standing.

**Attendance and Absences**

A Hopkins education is based on the exchange of ideas with distinguished faculty in the classroom and elsewhere. Although there are no university regulations concerning attendance, students are expected to attend all courses regularly. Students should consult with their instructors and/or teaching assistants when they have missed classes to explain the reasons for their absence and to stay on track in the course. Instructors are encouraged to establish their own policies regarding attendance, and it is the student’s responsibility to know those policies.

In certain courses regular attendance is given special importance. These include foreign language courses and the introductory courses in the Writing Seminars and Expository Writing. Instructors in these courses will lower a student’s grade for unexcused absences.

If a student is absent from classes over a period of several days without explanation, instructors are encouraged to inform the advising office of his/her school. In some cases, withdrawing from a class may be
considered; however, the student must withdraw before the end of the eighth week of the semester and still remain in at least 12 credits.

Absence From Class Due to Illness
The Health and Wellness Center does not provide documentation for students who miss individual classes. In these cases, students should communicate directly with their instructors.

If a student experiences a serious or extended illness that causes the student to miss a significant number of classes or major academic assignments, including mid-term examinations, the student can provide a physician’s documentation of the illness to the Dean of Student Life who will notify the student’s instructors.

Students who have significant illnesses that interfere with their ability to meet their academic obligations are encouraged to seek treatment at the Student Health Center and to confer with the appropriate academic advising office, which can assist students facing serious health problems. Students should also notify faculty when they are not able to complete work due to illness. Faculty who see a pattern of absences or late work are encouraged to confer with the student’s advising office.

Falsely reporting an illness or injury is a violation of the code of student conduct and is subject to disciplinary action.

Absence for Religious Holidays
Religious holidays are valid reasons to be excused from class. Students who must miss a class or an examination because of a religious holiday must inform the instructor as early in the semester as possible in order to be excused from class or to make up any work that is missed.

Approved Absences
The university encourages students to participate in varsity athletics and other significant extracurricular activities. Students who must miss a class or an examination because of participation in a scheduled in-season varsity athletic event must notify the course instructor as early in the semester as possible. Approved absences are granted at the discretion of the course instructor. When students must miss a scheduled examination, several solutions have been found by instructors. Students have been permitted to take an examination before leaving for the event, or coaches have served as proctors for examinations taken during the athletic event at approximately the same time as the other students in the course. Students have also been allowed to take the examination, or an alternative examination, upon their return from the athletic event.

Exceptions to Academic Policies and Procedures
All students are expected to observe the academic policies and practices of the university. In special cases and with documentation, a student may request an exception to a policy or practice. Written requests should be submitted to the student’s academic advising office.

Academic and Professional Opportunities and Resources
These programs provide additional opportunities for undergraduate students to explore.

Intersession
The Krieger and the Whiting schools set aside approximately three weeks in January for students and faculty to participate in a variety of credit and noncredit courses and activities that enrich the intellectual and social life of the campus. In addition to traditional offerings, courses designed to help students branch out and explore other skills are offered. Alumni and outside experts augment faculty to offer instruction in a diverse array of applied courses and insight into worlds such as finance, communications, and biotechnology. The Office of Student Activities offers informal noncredit subjects ranging from personal enhancement, Zen and the art of listening, through practical skill-building and corporate etiquette, to the performing arts. Participation is voluntary on the part of both faculty and students.

The Intersession Program at Homewood offers courses for academic exploration, experiential learning, study abroad and personal enrichment. Courses and activities are open to any Hopkins undergraduate who was enrolled in the previous fall semester. Students may earn up to 3 credits. Intersession course grading and tuition is determined by program and student status as follows:

- **Academic Exploration:** 1 or 2-credit courses are offered for a satisfactory/unsatisfactory grade. The tuition cost of Homewood KSAS and WSE courses is free to undergraduates who were enrolled full-time in the previous fall semester; part-time students must pay tuition. All students must pay fees (please refer to http://www.jhu.edu/ intersession/). Students who are returning from a leave of absence or were studying abroad in the fall semester may register for intersession if they pay tuition per credit hour.
- **Experiential Learning:** 1 or 2-credit courses are offered for a satisfactory/unsatisfactory grade. All students must pay program fees.
- **Study Abroad:** 3-credit courses are offered for a letter grade. All students must pay program fees.
- **Personal Enrichment:** Non-credit courses are offered through the Department of Student Development and Programming. All students must pay program fees.
- **Interdivisional Registration:** Students who register for Hopkins courses outside KSAS/WSE are subject to tuition charges determined by the individual school. Weekend courses offered by the Carey Business School or the School of Education during Intersession are not accepted.

A list of offerings is published in mid-November at http://www.jhu.edu/ intersession. Students register online, or in-person at the Registrar’s Office. Students should register before winter break. Students who register for research, independent study, or an internship during Intersession must have the approval signature of their faculty sponsor. Independent work may be completed for a letter grade if allowed by the department of the faculty sponsor. Internships are graded S/U only.

Summer Session
The JHU Summer Session offers a wide selection of undergraduate courses in two five-week terms. Summer courses, sponsored by the same academic departments that oversee the university’s full-time degree
programs, are designed to reproduce, as closely as possible, similar courses offered during the spring and fall semesters. In most cases, Johns Hopkins students can count summer courses toward fulfillment of departmental degree requirements. Hopkins students may earn a maximum of 14 credits in the JHU Summer Session (inclusive of session one, two and online courses).

**Study Abroad**

The mission of the Office of Study Abroad at Johns Hopkins University is to promote, support, and develop international programs that foster creativity, discovery, and excellence in undergraduate education. These international programs are developed and evaluated in collaboration with the faculty and deans of the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering to ensure that they complement the Hopkins curriculum, promote intercultural competencies, and encourage students to reflect on their values, identities, and roles as world citizens.

The Office of Study Abroad helps undergraduates in Arts and Sciences and in Engineering to locate and apply to exciting and challenging educational opportunities overseas. Students will find many resources through the office, including: a website with listings around the world, personal advising to match their interests with programs, program brochures and information, and years of feedback from students who have returned from abroad. The office, in partnership with a standing faculty committee, works to ensure that students will study in programs that are as rigorous as those at Hopkins. Inquiries may be directed to:

**Office of Study Abroad**

Levering Annex 04B  
3400 N. Charles Street  
Baltimore, MD 21218  
Tel: 410-516-7856  
Email: jhuabroad@jhu.edu  
Website: [web.jhu.edu/study_abroad](http://web.jhu.edu/study_abroad)

**Study Abroad Academic Policies**

**Credit for Courses Taken Abroad**

Students must be approved for study abroad and registered for their overseas programs by the Office of Study Abroad. Students may study abroad for a semester, academic year, summer session, or intersession. While abroad, students are considered full-time, off-campus matriculated (OCM) students at Johns Hopkins. A maximum of 30 credits for work done on authorized study abroad programs may be transferred to the Hopkins academic record. Credit for study abroad in the summer is counted toward the 30 credit limit. If a student who has earned 30 credits for study abroad takes additional summer credits abroad, the additional credits will be counted as transfer credits. If the student has already received 12 credits for transfer courses and 30 credits for abroad courses, no additional credit may be transferred for summer abroad course work.

To receive abroad credit, students must have taken courses for a grade and have received the equivalent of a C or better. Except for grades earned on Departmental Programs Abroad, grades will not be recorded on the Hopkins transcript, nor will they be included in the Hopkins GPA. Grades earned on Departmental Programs Abroad will be posted on the Hopkins transcript and will be calculated into the students’ Hopkins GPA.

**International Travel Registry**

All students are required to register their study abroad plans with the International Travel Registry accessible at [my.jhu.edu](http://my.jhu.edu).

**Eligibility for Study Abroad**

Students must meet both Johns Hopkins eligibility requirements and those of their study abroad program. Students are required to meet with a study abroad advisor prior to applying for a program overseas. In addition, students must obtain pre-approval from the Director of Undergraduate Studies in their major(s) or minor(s) to apply abroad credits toward major or minor requirements. Students are required to take the equivalent of 15 U.S. credits to maintain full-time status while abroad.

In order to graduate from Hopkins, students must complete at least 60 credits at the Homewood Campus and must complete their last semester in residence at the Homewood Campus.

Johns Hopkins eligibility requirements include:

- A term GPA of 3.00 or better the semester of application for a program abroad
- Good academic, financial, and disciplinary standing

**Study Abroad Eligibility: Leave of Absence**

Students are required to have a minimum term GPA of 3.00 the semester of application in order to be eligible to study abroad. Students who have been on Leave of Absence the semester prior to application may be conditionally accepted pending academic performance in the semester of application. Students may not apply for study abroad while on Leave of Absence.

**Study Abroad at Locations Under Department of State Travel Warning**

Johns Hopkins does not permit undergraduates to study abroad at locations subject to travel warnings. Students who have a sound academic reason to study at the chosen site and can address issues of safety may appeal for an individual exemption in order to have course work recognized for academic credit.

**Study Abroad Housing Policy**

Johns Hopkins University requires the use of program-established housing in home stays, student residences, dormitories, or program-provided apartments by all Hopkins students on study abroad programs. Furthermore, Johns Hopkins strongly encourages students to participate in a home stay if that option is available. Students who wish to make independent housing arrangements should set up an appointment to meet with the Director of Study Abroad.

**Study Abroad Financial Policies**

**Cost of Study Abroad**

Students who choose to study abroad on Direct Matriculation or Vetted Programs are charged the cost of the program, as determined by the host university or program provider. Hopkins assesses an additional study abroad fee equivalent to 12% of Hopkins tuition for the term(s) abroad.

Students who choose to study abroad on Hopkins Departmental Programs or Exchanges are charged Hopkins tuition. In some cases, the overseas housing fee is also posted to the students’ accounts. The 12% fee is not charged for tuition-based programs.
In addition to tuition and housing, students should be prepared to cover the costs of domestic and international travel, visas, personal items, meals, in-country travel, and other incidental expenses. The Office of Study Abroad recommends that students discuss their plans with parents and set reasonable budgetary limits.

Financial Aid for Study Abroad

Financial aid, including institutional aid, may be used by students registered for study abroad to cover the eligible costs of their overseas programs. Students on study abroad programs are officially registered as full-time. OCM students. OCM students thereby retain full eligibility for federal grants and education loans.

Institutional grants awarded by JHU will be adjusted to reflect the Cost of Attendance on study abroad programs. Financial aid packages for the term(s) abroad will be based on the Cost of Attendance reflected in this budget. If the Cost of Attendance is less than a semester or full-year at Hopkins, the level of institutional aid will be reduced to reflect anticipated costs. Only loan assistance may be available to cover additional expenses greater than the costs of a semester or a full year at Hopkins.

Study Abroad Refund Policies

Voluntary Withdrawal from Study Abroad

Students should consider their study abroad options carefully prior to making a written commitment. Should students voluntarily withdraw from a study abroad program after having submitted their program acceptance forms, they are responsible for all nonrefundable fees and nonrecoverable costs associated with their programs. Depending on the date of withdrawal, nonrecoverable costs may equal the full cost of the program. Hopkins will refund recoverable expenses, excluding nonrefundable deposits and fees, upon receipt of a final billing statement from the program provider(s). Recoverable expenses are determined by the program provider in consultation with Johns Hopkins. If, for any reason, students’ study abroad plans change, they should contact the Office of Study Abroad to determine the financial impact of voluntary withdrawal.

Involuntary Withdrawal from Study Abroad

Should Johns Hopkins cancel or suspend a study abroad program for any reason, the Office of Study Abroad will work with students to refund recoverable costs or apply fees toward alternate academic programs.

Bologna Center

The School of Arts and Sciences sponsors a one-year program for selected upper-level undergraduates at the Bologna Center of The Johns Hopkins University in Bologna, Italy. The program is open to students majoring or concentrating in history, international studies, political science, or economics. This opportunity for interdisciplinary study in a European-American setting offers small classes, close contact between faculty and students, and a series of guest lecturers and study trips.

Students pay the regular Johns Hopkins tuition charges, a student activity fee, an intensive language course fee, their transportation to Italy, and their room and board in Bologna. Financial aid based on need is available on a competitive basis. Interested students should consult the Study Abroad Office for additional information.

Full credit is given for all courses completed with grades of B or better at the School of Advanced International Studies’ Bologna Center. This may exceed the 15 credit per semester limit and the 30 credit limit on the total number of study abroad credits.

Peabody Institute

The Peabody Institute, a division of Johns Hopkins University, comprises the Conservatory of Music and a noncredit preparatory school. Through cross-registration, full-time undergraduate degree candidates in the schools of Arts and Sciences and Engineering are eligible to participate in classes, lessons, and ensembles at Peabody on a space-available basis. At the Conservatory, auditions are required for assignment to private lessons and ensembles. There is a per-credit charge each semester for private lessons at the Peabody Conservatory. Please see the Peabody Conservatory website for current rate.

Peabody faculty also teach selected music courses on the Homewood campus.

Combined Bachelor’s/Master’s Programs

Many departments and institutes offer undergraduates the opportunity to complete some of the requirements for a master’s degree while still working on the requirements for a bachelor’s degree. Some of these programs offer early admission to the graduate school and may enable a student to complete both bachelor’s and master’s degrees in four years. Other programs are considered five-year programs. For information on what offerings are available in a specific department, refer to the departmental entry in the Hopkins catalog.

Scholarships and Fellowships

The National Fellowship Advisor helps undergraduates prepare and apply for national scholarships such as the Fulbright, Goldwater, and Rhodes. These scholarships can fund undergraduate and/or graduate study, international travel (including undergraduate study abroad), academic research, and public service projects. Please visit the website at web.jhu.edu/scholarships for a listing of those we support. These scholarships are open to both AS and EN students.

Nursing

Hopkins undergraduates interested in nursing may want to consider earning the typical nursing school prerequisites during their undergraduate years. Students may want to consider the accelerated nursing program at the Johns Hopkins School of Nursing after completing their undergraduate degree.

Cooperative Education in Engineering

Engineering students may participate in government or industry-based cooperative education programs. Students who have received an offer from an employer should contact the Engineering Advising Office at 410-516-7395 or wseadvising@jhu.edu.

Student Life Resources

Homewood Student Affairs supports the university’s educational mission by providing a safe, supportive environment in which students are integrally involved with faculty and staff at all levels of the institution. The division is led by the Vice Provost for Student Affairs, who oversees major components within the area. The areas under the Vice Provost’s purview include Academic Services, Student Life, Business Operations & Administrative Services, and Athletics & Recreation.

The Vice Provost and the areas reporting to the Vice Provost are committed to a student-centered approach and meet both individually and jointly with students to hear their concerns, to support their activities, and to receive feedback on the multiplicity of the division’s programs.

The Office of the Dean of Academic Services, located in Garland Hall, is directly responsible for providing services and programs that support student needs. The offices that comprise the Dean of Academic Services area are: Office of the Registrar, Office of Multicultural Affairs, Center for Social Concern, National Fellowships and Scholarships Program, Career Center, Student Affairs Research and Analysis, and Office Student Disability Services. These offices strive to register, serve, advise, educate, and graduate a highly diverse group of students who will be actively engaged citizens in our society. Academic Services provides leadership, guidance, and support in the maintenance, development, and evaluation of programs which serve students, parents, alumni, faculty, staff, and trustees, and which contribute to a community characterized by mutual caring, respect, and responsibility.

The Office of the Dean of Student Life is responsible for the co-curricular programs on campus. The dean and her staff are accessible advocates for the individual and group needs of students. On a campus where academic expectations are rigorous, the dean of student life and all her staff strive to provide an atmosphere in which responsive program activities and services for students can flourish. The Office of the Dean of Student Life is located in the Mattin Center, Offit Building, Suite 210. Students are encouraged to stop by to schedule an appointment or to send an email to offer their suggestions or concerns.

The Office for Business Operations and Administrative Services assists the division in the overall fiscal management of student affairs. The office also administers the areas of housing and dining, ID card services, student accounts, and student employment. Additionally, the office oversees the human resources component for the division.
Orientation

An orientation period is scheduled for the four days prior to the start of the academic year. All incoming undergraduates participate in this program. It allows them to get to know other students, faculty, and staff and to learn about academics, support services, and campus life. Specific activities are designed for incoming freshmen and their parents, commuters and transfer students, and international students. Each new student is guided through orientation by a student advisor who serves as a first friend and source of information.

Departmental and faculty advisor meetings, special sessions with the deans, and a variety of informative programs introduce students to their programs of study and to academic expectations, opportunities, and resources. An array of recreational and social events fosters new friendships and acquaints new students with the campus, the neighborhood, and the city. For more detailed information regarding orientation, please visit the JHU Orientation Program website: web.jhu.edu/orientation.

Entering graduate students normally take part in informal events in their departments during the fall pre-registration period. A mandatory orientation session for all new graduate students is scheduled the Friday morning before classes begin and provides an overview of the variety of campus services available. The Graduate Representative Organization (GRO) sponsors numerous social and educational events and has a website listing information specific to graduate students, www.jhu.edu/gro.

Student Activities

Once students are accustomed to the academic schedule, they are encouraged to become involved in co-curricular activities. Leadership opportunities are available through participation in student organizations, which plan and implement social, cultural, recreational, and educational programs for the campus community. Entertainment, including plays, lectures, concerts, and cultural events, abounds in the Baltimore area and on campus.

Information about specific student activities and organizations is available from the Office of Student Activities, 410-516-4873 (Mattin Center, Ross Jones North Building, Room 131), web.jhu.edu/studentlife/activities/index.html.

Baltimore

As an urban center, Baltimore has undergone tremendous revitalization in recent years. The city showplace is the Inner Harbor, which has boutiques and cafes, as well as the National Aquarium, the Maryland Science Center, and the Pier 6 Concert Pavilion. Throughout the summer, the city sponsors ethnic festivals of every description. Special resources in cinema are available through the International Film Festival and the Maryland Film Guild. The performing arts in Baltimore range from experimental theater to Broadway hits and from classical symphony to modern rock.

Many of our students enjoy spending time in the surrounding neighborhoods such as Little Italy, Fell’s Point, and Hampden. Baltimore is full of historical sites that are often free to visit, or if you are in the mood you can take a boat cruise around the Inner Harbor. For sports fans, the Ravens are a huge draw, and the Orioles have weekly “College Nights” that offer discounted tickets to Hopkins students for every Friday home game.

The Baltimore Museum of Art, which adjoins the campus, is known for its collections of primitive and modern art, as well as its sculpture garden. The collections of the Walters Art Museum in downtown Baltimore represent the span of civilization from Egypt to the 19th century. Many smaller museums, local galleries, and outdoor showings feature local artists. Washington, D.C., with its treasure trove of monuments, museums, libraries, parks, and theaters, is only an hour away.

While Baltimore may not be thought of as a college town, there are 15 other colleges and universities in close proximity to the Homewood campus to enhance a student’s academic and social life, with opportunities that range from joint degree programs to intramural sports competitions. The Baltimore Collegetown Network connects college students to numerous resources like restaurants, nightlife, internships, roommate matching services, community service, leadership enhancement, and local festivals. In addition, Collegetown sponsors a shuttle to places like Penn Station with free access to the Inner Harbor, other colleges, and local shopping centers. The Collegetown website can be accessed at collegetown.org.

Athletics and Recreation

The Department of Athletics and Recreation is responsible for intercollegiate athletics, sports clubs, intramural programs, and the campus recreational programs for students, staff, and faculty. The facilities of the Newton H. White Jr. Athletic Center include a competition-sized swimming pool, numerous basketball and volleyball courts, a wrestling room, a fencing room, and varsity weight training room. The Ralph S. O’Connor Recreation Center facilities include a large multipurpose court for basketball, volleyball, and badminton, racquetball/ squash courts, a 30-foot climbing wall, a fitness center for strength and cardiovascular conditioning, an indoor jogging track, and a multipurpose room for group fitness and martial arts training.

The Office of Recreation directs an extensive array of programs for the Hopkins community. The intramural sports program is organized into coed, women’s open, men’s open, residence hall and Greek divisions. Currently, the sports club program offers competition and instruction in the following groups: badminton, body building, Brazilian jujitsu, capoeira, cheerleading, cricket, cycling, field hockey, golf, men’s ice hockey, karate, kung fu, men’s and women’s lacrosse, men’s rugby, men’s and women’s soccer, women’s softball, soo bahk do, swim, taekwondo, table tennis, tennis, men’s and women’s ultimate Frisbee, men’s and women’s volleyball, water polo, and wrestling. Additionally, a fun and social opportunity for fitness is offered through various group fitness classes. Held in the Evans multipurpose room, the group fitness schedule runs year-round and offers a variety of exercise sessions including yoga, step aerobics, muscle conditioning, spinning, pilates, and others.

The Experiential Education Program oversees Outdoor Pursuits, Hopkins Outdoor Leadership Training (HOLT), Pre-Orienteering Outdoor Program, Hopkins Teambuilding, the Outdoors Club, Indoor Climbing Wall, and Bouldering Cave. Outdoor Pursuits runs backpacking, canoeing, climbing, hiking, ice climbing, mountaineering, mountain biking, sea kayaking, and white water kayaking trips. All trips are reasonably priced and can be registered for online at jhu.edu/op. Hopkins Teambuilding runs interactive initiatives to build stronger teams. Our facilitators have increased the effectiveness of student groups, business classes, sports teams, and professional staff offices.

For undergraduates interested in more competitive activities, the university has 13 varsity intercollegiate teams for men (lacrosse, football,
soccer, cross country, basketball, wrestling, swimming, water polo, fencing, baseball, indoor and outdoor track, and tennis) and 11 varsity intercollegiate teams for women (tennis, fencing, swimming, basketball, lacrosse, field hockey, cross-country, indoor and outdoor track, soccer, and volleyball). All the Hopkins sports squads, with the exception of men’s and women’s lacrosse, play in Division III of the NCAA, and primarily in the Centennial Conference. The men’s and women’s lacrosse teams are perennial contenders for national honors in NCAA Division I.

Student Centers and Programs

The Levering Hall, a multipurpose student center, offers space for relaxation and conversation, diversion, cultural enrichment, a quick snack, or a hot meal. The Levering desk sells newspapers and provides general campus information. The Glass Pavilion, the Great Hall, and Arellano Theatre are the sites of a variety of social activities. Levering Hall also has a comfortable lobby area with a coffee shop and fireplace, meeting rooms, a study lounge, and a food court.

The Mattin Center is the location for the Office of the Dean of Student Life, the Office of Student Activities and the work areas for student groups. It also houses classrooms for the Homewood Art Workshops, the Digital Media Center, the fully equipped Swirnow Theater, 11 individual music practice rooms, two group rehearsal rooms, three meeting rooms, a darkroom, and a dance studio. A café in the theater lobby offers Asian-inspired cuisine and computer terminals for student use. During the early summer, there is a Performing Arts Series of regional professional groups in the Swirnow Theater.

The Hopkins Organization for Programming (the HOP) offers informal programs for relaxation. Just as much fun are the impromptu lacrosse and football games on the campus grounds, ultimate Frisbee games, picnics, and live music.

Graduate students find that their academic and social lives tend to center around their departments. The off-campus apartment buildings and weekend social activities provide ample opportunities for students and their families in different disciplines to meet and enjoy a feeling of community.

Student Organizations

Over 300 student organizations cater to interests including academic and research, advocacy and awareness, community service, cultural, fraternities and sororities, graduate, honor and professional societies, performing arts, publications and journals, religious and spiritual, special interest and hobby, sports, student government, student services and support. For a full list of all Hopkins student groups, go to groups.jhu.edu.

The majority of registered student organizations fall under the Student Government Association (SGA). The SGA is the elected body that meets weekly to serve as the undergraduate voice to the university’s faculty and administration. Graduate students are represented by the Graduate Representative Organization (GRO). The GRO sponsors an annual academic symposium and casual happy hours, and publishes a graduate newsletter and handbook. For more information, go to jhu.edu/gro.

Writing and Publishing

Those interested in writing or publishing can participate in one of our 16 publications. Some examples of our many publications include News-Letter, a weekly student newspaper; the Black and Blue Jay, a humor magazine; Thoroughfare, a digital publication; East Asian Forum and Review, Film Society, a publication that discusses film and cinema; or Zeniada, a student-run literary magazine.

Performing Arts

Hopkins has a long history of supporting the arts; the Peabody Preparatory School as well as Homewood students take advantage of the many programs that we offer for our performing arts groups. Many of our performing arts students can be found in the Mattin Center practicing their instruments in the practice rooms, or on stage in the Swirnow Theatre. The Band, the Choral Society, and the Gospel Choir are open to all students with an interest in instrumental or choral music. The Hopkins Symphony Orchestra has many student players, and auditions are held each September. A cappella groups, including both coed and single gender, are also very popular. For dancers, there is a variety of student groups, each focusing on a specific type of dance. Opportunities to act or direct and produce plays are numerous. The Barnstormers, Witness Theatre, and Dunbar Baldwin Hughes Theater undergraduate groups put on many performances throughout the year, including the ever-popular Freshman One Act Plays in the fall, student-written original plays, and the spring semester musical. Theatre Hopkins, a company under professional direction, performs plays with actors from the university and community. For a list of student arts groups please visit web.jhu.edu/studentlife/homewood_arts/student_arts.html.

Cultural and Religious

The 35 cultural groups and 12 religious and spiritual groups represent a wide diversity of Homewood student-sponsored programs, films, concerts, and lectures. Cultural groups include the Chinese Student Association, Black Student Union, Caribbean Cultural Society, South Asian Society of Hopkins, Organizacion Latina Estudiantil, and DSAGA (Diverse Sexuality and Gender Association). Religious and spiritual groups include Agape Campus Ministry, Catholic Community, Hindu Students Council, Hopkins Hillel, Muslim Association, and Hopkins Christian Fellowship.

Special Interest and Hobby

There is a wide range of special interest and hobby groups on campus. These groups include Model United Nations Conference, Foreign Affairs Symposium, and the Woodrow Wilson Debate Council. If you have an interest in sports or recreation, the university offers cycling, soccer, table tennis, numerous martial arts, or the Outdoors Club, just to name a few. For most activities, the only requirement is the initiative to join and the interest to participate. Any full-time student who believes that a new organization is needed can apply to start a new group.

Honor and Professional Societies

Along with various co-curricular activities, Johns Hopkins has organizations to foster academic achievement and recognize students for their accomplishments. In addition to Phi Beta Kappa, which honors scholarship of a high order, there are honor societies in student leadership; sciences, such as chemistry, psychology, and pre-medicine; drama; language; journalism; engineering; political science; military science; and literary studies.

Special Events and Programs

The university sponsors many events simply for pleasure, including Fall Fest, Homecoming, and the hugely popular Spring Fair weekend. The Hopkins Organization for Programming (HOP) is always looking for
volunteers to help plan and implement social, cultural, and educational programs for the Hopkins community.

**Shriver Hall Concert Series**

Praised by The Sun as “Baltimore’s finest importer of classical music talent” and five times awarded Baltimore magazine’s “Best Concert Series,” Shriver Hall Concert Series for 47 years has been presenting to Maryland music enthusiasts world-class chamber music and solo recitals by the world’s most famous artists. All series subscription events are free to all Johns Hopkins students. For more information, stop by 105 Shriver Hall, call 410-516-7164, or visit shriverconcerts.org.

**Symposia, Lectures, and Seminars**

The nationally known Milton S. Eisenhower Symposium has achieved a significant reputation since it began in 1968. Entirely student organized and directed, the symposium explores a different theme each year. Recent topics have included “Global Network,” “A Transition Between Generations in a Changing America,” and “Finding Our Voice: The Role of America’s Youth.” The symposium attracts outstanding speakers from all over the world.

The Martin Luther King Jr. and Kennedy lectureships have brought to the campus in recent years such speakers as Coretta King, Thomas Eagleton, Walter Mondale, Joseph Heller, Cornell West, Michael Eric Dyson, C.T. Vivian, and Roger Wilkins. The Black Student Union and the Student Council help plan these lectureships.

**Spring Fair**

The annual Johns Hopkins Spring Fair is a student-organized event. The three-day fair features a major outdoor arts and crafts exhibition, numerous food booths, and entertainment. Spring Fair is in its 42nd year.

**Art Workshops**

Drawing, painting, photography, and other visual arts courses are offered on a credit basis in the studios of the Mattin Center. Directed by artist Craig Hankin, the workshops are open to all full-time undergraduates without charge. Most classes are geared to students with little or no previous studio experience. Further information is available in the section on Art Workshops (http://e-catalog.jhu.edu/arts-sciences/art-workshops) and at jhu.edu/artwork.

**Student Services**

**Living Accommodations**

An important element of a Hopkins education is the interchange of ideas beyond the classroom, as students share intellectual, social, and recreational activities with fellow students of diverse backgrounds and interests.

**Residence Requirement**

The Homewood Schools’ freshman and sophomore residence requirement applies to students engaged in their first two years of full-time undergraduate study. Transfer students entering the university with freshman or sophomore status are subject to this same requirement. Since students cannot complete their residence requirement in the middle of the academic year, transfer freshmen entering the university in January must live in the residence halls their entering semester and the following academic year. Transfer sophomores entering in January fulfill the residence requirement by living in the residence halls their entering semester. Exceptions to this policy are made for individuals living at home in the Baltimore area with parents or guardians.

The benefits of the residence requirement are many. It is designed to provide the students with a variety of services and conveniences. Living oncampus supports the academic mission of the university and affords students the opportunity to interact, socialize, and unwind with their classmates.

**Campus Residence Halls**

Freshmen and sophomores are housed in the campus residence halls or apartments, which are designed to offer far more than simply a room for sleeping and studying. Resident advisors assigned to various wings or floors are available to act as a resource for information, to initiate diverse programs and opportunities for student interaction, and to provide general support in all aspects of residence living. Through representation in the Residence Advisory Board, students are able to plan for a wide range of activities in the student living areas.

The Alumni Memorial Residence complex includes four residence halls: the two Alumni Memorial Residences and Buildings A and B. Each of the Alumni Memorial Residences contains rooms for student activities and study areas. The halls are further subdivided into residence units called houses, which offer coeducational living accommodations. Although the houses maintain their own particular character and name, they are both physically and ideologically a part of the entire residence hall. Single and double rooms are available with shared bathrooms on each floor. Buildings A and B are adjacent to the Alumni Memorial Residences. These buildings offer suites consisting of either a single and a double room or two double rooms, both with shared bath facilities. Both male and female students are housed in the buildings, but suites are assigned on a single-sex basis.

McCoy Hall (consisting of freshmen and sophomore students) and Wolman Hall provide suite-style residential living. Approximately 40 students live in each wing of the buildings, sharing a common lounge. These buildings offer suites consisting of either two double rooms or a double and one or two singles, all with shared bath facilities and a small kitchenette. The suites are assigned on a single-sex basis, but the wings are coed. As is the case in the Alumni Residences and Buildings A and B, student amenity space in Wolman and McCoy includes social lounges, study lounges, and student meeting space.

The residence halls are served by one central (all-you-care-to-eat) dining hall. The Fresh Food Café is located between the Alumni Residences and Buildings A and B. Nolan’s, in Charles Commons, is a retail dining location, and on the first floor of Wolman Hall is the Charles Street Market. The market is a small grocery/convenience store with an Einstein’s Bagel Shop, ready-to-eat foods, and a wide array of produce, frozen, and packaged items. Each residence hall has its own laundry facilities and lounge space. Residence hall rooms are rented for nine months.

**Other Sophomore Year Options and Upper Class Housing**

In their sophomore year, and as upperclassmen, students may also have the opportunity to choose space in Charles Commons, McCoy (see Campus Residence Halls), or the university apartments. Charles Commons is the newest residential facility housing over 600 students in suites with two or four single rooms and one or two bathrooms. There are kitchenettes in each unit with a sink, refrigerator, and two-burner stove top. All of the four-bedroom suites and some of the two-bedroom suites have a living room. There is ample community space in Charles...
Commons including a community kitchen, exercise room, numerous study rooms, meeting rooms and lounges, music rooms, computer cluster, laundry room, and game room. In addition to the large dining facility (Nolan’s), Charles Commons houses the university bookstore. Both nine- and 11-month contracts are offered in Charles Commons. The Bradford and Homewood apartments offer modern living facilities in an area of older apartment buildings next to campus. Homewood and Bradford apartments range in size from efficiencies to four-bedroom units. All of these buildings offer wall-to-wall carpeting, air conditioning, and wiring for cable TV and Internet (wired and Wi-Fi). All utility costs and Internet connections are included in the rent. In the multiple-occupancy units, students are financially responsible only for their own space; the Housing Office fills any vacant spaces.

The Homewood apartment building houses approximately 220 undergraduate students and the Bradford houses approximately 150 under-graduate students. Each building is conveniently close to the campus. The Homewood also houses a number of university offices, the Student Health and Wellness Center and the Counseling Center, and space for student-oriented retailers. University housing affords students the opportunity to establish residence without having to rent through a commercial landlord. The apartment buildings are fully furnished and offer 11-month contracts only. The apartments contain a private bedroom for each occupant, plus a common living room, kitchen, and bath(s). Furniture includes a bed, desk, chest of drawers, mirror, sofa, table, and chairs. All university housing is maintained by the university’s Maintenance Department and patrolled by Campus Security.

### Off-Campus Housing

After sophomore year, some students choose to participate in the room selection process to remain in university housing while most students find suitable non-university housing in the area surrounding the university. Available housing ranges from row houses subdivided into apartment units to high-rise buildings where individual apartments are available for a student alone or for groups of students. Rental accommodations vary in price and range from single rooms to houses.

The Off-Campus Housing Office provides comprehensive services to upper-class students looking for off-campus housing. Up-to-date listings are available on various types of living accommodations, and referral services and lease information are provided. Students are able to locate housing from a distance by visiting the Off-Campus Housing website at http://offcampushousing.jhu.edu/.

### Housing Information

Further information on the Alumni Memorial Residences I and II or Buildings A and B can be obtained from the Housing Office in the Alumni Memorial Residence II, 3400 N. Charles St., Baltimore, MD 21218, 410-516-8282. Information on Wolman, McCoy, Charles Commons, Homewood, Bradford or off-campus housing can be obtained from the Housing Office in Wolman Hall, 3339 N. Charles St., Baltimore, MD 21218, 410-516-7960.

### Homewood Campus Dining and Vending Services

#### Dining Options

Homewood campus dining options reflect the diversity of our community, and have been designed to provide quality, variety, and convenience. Many dining choices abound—from early morning each day until the wee hours of the next—as there’s always a convenient dining option just steps from wherever you may be on campus.

### Freshman Dining at the Fresh Food Café (FFC)

Considered a fundamental element of the freshman experience, communal dining at the Fresh Food Café provides freshmen with a number of dining choices all under one roof in a comfortable, congenial environment. Fresh, seasonal, and locally sourced ingredients are the foundation of every meal served at the FFC.

### Fresh Food Café Stations include:

- A self-serve deli featuring Boar’s Head brand meats, house-made premium salads, a selection of premium cheeses, and a variety of artisanal breads;
- A char grill offering chicken breast, sirloin burgers, Hebrew National brand hot dogs, and an ever-changing offering of daily specials;
- An extensive salad station featuring a bounty of fresh, seasonal fruits, vegetables, and toppings;
- A dedicated grill at the salad station provides guests with daily variety of grilled salad toppers including vegetables, fish, shellfish, poultry, and beef;
- A homestyle station providing hot, homestyle entrees including hand-carved meats, made-from-scratch soups and garden-fresh vegetables;
- A hearth station baking pizzas, pastas, and calzones;
- A separate and distinct vegan and vegetarian station offering made-to-order specials, baked casseroles, and daily soup;
- A dessert island offering cakes, cookies, pies, and more;
- A dazzling variety of beverages, both cold and hot, including soy milk, rice milk, lactose-free milk, cappuccino, no-sugar-added juices, sodas, teas, and of course, pure filtered water.
- Taam Tov, the university’s kosher servery, provides a wide array of tempting, wholesome kosher meals.

Beyond the culinary, the dining experience at the Fresh Food Café includes a 510-seat dining room furnished with bamboo tables, comfortable maple seating, indirect lighting, and a light contemporary color scheme.

### Nolan’s at Charles Commons: The New Campus Living Room

Named in honor of the contribution made to the university by the David Nolan Family, this campus eatery is located on the third level of the university’s Charles Commons complex. Nolan’s has quickly become a favorite dining, meeting, and social space for students.

Both the dining room and menu options at Nolan’s were conceived and designed as upscale and sophisticated—with the dining room featuring high banquettes and intimate, comfortable seating while the menu features the freshest premium ingredients each season has to offer.

Those premium ingredients result in unparalleled quality with a variety of options. In addition to retail dining, Nolan’s includes ample soft seating, a two-sided cozy fireplace, a private dining room accommodating groups up to 40, a performance stage, two pool tables, and a balcony for seasonal alfresco dining.
Levering Food Court and Chesapeake Bay Roasting Company: The right place at the right time

The Levering Food Court provides a variety of lunchtime dining options right in the middle of campus. Stations include pizza, salad, deli, grill, sushi, and Asian cuisine.

Chesapeake Bay Roasting Company—locally roasted coffee, baked goods, grab and go sandwiches, and salads.

The Charles Street Market

From gluten-free pasta to kosher salami to hand-rolled sushi, the Charles Street Market at Johns Hopkins University has everything the campus community could ever need or want.

Developed, designed, and built to serve a diverse university population, the Charles Street Market provides the campus community with an unending variety of fresh produce, grocery items, frozen foods, and health and beauty aids. Also, freshly made sushi. And last, but not least, a made-to-order submarine sandwich station turns out great subs and sandwiches all day long. Located in the university’s Wolman residence hall, the Charles Street Market provides customers with unprecedented convenience, variety, and quality. Operating from early morning to late night, the JHU campus community now has a retail store befitting the Johns Hopkins name. In addition to the variety of items offered, the Charles Street Market is home to its very own Baltimore favorite, Stone Mill Bakery Cafe, offering a selection of freshly baked bagels, pastries, sandwiches, salads, and the best coffee around.

Please note:
• All freshmen are required to participate in a campus meal plan
• All Students who enroll in a meal plan do so for the entire academic year.
• Students will be allowed to change meal plans during well-publicized specified change periods twice each academic year.
• Dining Dollars can be used in JHU Dining by Bon Appetit facilities and are non-taxable.
• Additional Dining Dollars can be purchased in $200 increments at any time throughout the year.
• Dining Dollars can only be purchased by meal plan participants.

Vending Services

With more than 40 locations throughout the Homewood campus, vending is available in virtually every major building. Bottled water, juices, and other soft drinks are available in addition to a wide variety of snacks. Accepts Jcash, credit/debit cards, and cash at some locations.

Questions?
Contact Housing & Dining Services, 410-516-3383 or at dining@hd.jhu.edu.

Campus Ministries

JHU Campus Ministries, located in the Bunting-Meyerhoff Interfaith and Community Service Center, promotes and supports spiritual development, theological reflection, religious tolerance, and social awareness within the university community. A collaborative effort of the university chaplain and the Campus Ministries staff, the denominational campus ministers, and the student-led Interfaith Council, JHU Campus Ministries seeks to enhance the spiritual and ethical educational experience of the whole person—mind, body, and soul. It offers prayer services, religious reflection series, and interfaith education and dialogue opportunities, as well as special community and fellowship events. Further information may be obtained by calling 410-516-1880, by visiting our website www.jhu.edu/~chaplain, or by stopping by the center at the corner of University Parkway and North Charles Street.

Disability Support Services

JHU welcomes students with disabilities and values their diverse experiences and perspectives. The Office of Student Disability Services (SDS) coordinates appropriate and reasonable accommodations for qualified students with disabilities in accordance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990 and the ADA Amendments Act of 2008. SDS also works with various offices on campus to ensure that students with disabilities have equal access to university programs, facilities, technology, and websites.

Students who wish to request reasonable accommodations must submit documentation that establishes a disability, details the current functional impact of that disability, and confirms the need for each accommodation requested. Documentation guidelines are available on the SDS website at http://web.jhu.edu/disabilities/students/admitted/documentation/index.html.

Students seeking accommodations are encouraged to submit their specific requests at least two weeks prior to the start of the semester to ensure that accommodations are provided in a timely manner.

Full-time undergraduate and graduate students in the Krieger School of Arts and Sciences or the Whiting School of Engineering with questions and concerns regarding the registration process, implementation of accommodations and/or identification of other support services, should contact:

Dr. Brent Mosser, Director
Academic Support and Student Disability Services
bmosser1@jhu.edu
410-516-4720
web.jhu.edu/disabilities

Questions regarding JHU’s documentation guidelines or physical and programmatic access at JHU should be directed to:

Abigail Hurson, JD
Disability Services Officer
Office of Institutional Equity
ahurson1@jhu.edu
410-516-8075 (voice), 410-516-6225 (TTY)
web.jhu.edu/administration/jhuoie/disability.html

Student Health and Wellness Center

The Student Health and Wellness Center (SHWC), located in the Homewood Apartment Building at 3003 N. Charles (N200, 2nd floor, entrance on 31st Street), provides comprehensive, confidential health services to students enrolled in the schools of Arts and Sciences and Engineering and the Peabody Institute. Staffed by clinicians (physicians and nurse practitioners) credentialed through the Johns Hopkins Hospital, the SHWC offers the following services: management of acute and chronic illnesses, laboratory testing, reproductive health care for women and men (contraceptive counseling, emergency contraception, gynecologic care, and testing for sexually transmitted infections including...
HIV), health education, and international travel consultations (including immunizations). A part-time nurse midwife is also on staff. Allergy shots are offered by appointment. Services rendered within the Health Center are free of charge; there is a charge for prescription medications purchased from our pharmacy service and for some medical supplies (crutches, wrist splints, etc).

When necessary, students are referred to an extensive network of community-based and Johns Hopkins specialists. A limited pharmacy service is available to students who receive their health care directly from SHWC staff. During the academic year (freshman move-in to May), the center is open Monday through Friday and on Saturday mornings; complete hours are listed on the SHWC web-site (www.jhu.edu/studenthealth). We encourage students to schedule appointments when possible (410-516-8270), but students with acute problems can almost always be seen the same day as we offer Open Access scheduling beginning each day with approximately 60% of our appointments available. After hours advice (for use when the center is closed) is provided by a nationally certified nurse triage service. This system can be accessed by calling our main number, 410-516-8270. When we are closed, calls are automatically forwarded to Sirona Health. Our website contains up-to-date information on our services and policies and on a wide variety of health topics. The SHWC is a “Safe Place” for all students regardless of race, ethnicity, gender, or sexual orientation.

Center for Health Education and Wellness (CHEW at JHU)

The Center for Health Education and Wellness (CHEW), a subdivision of the Student Health and Wellness Center, promotes and supports a healthy campus community by focusing on risk reduction and prevention initiatives. CHEW at JHU is your leading source for health information and programs to support a healthier JHU community. The CHEW CREW of health promotion professionals and trained student volunteers is dedicated to make the most of teachable moments to influence student health practices. Their vision is to create and sustain a learning environment where healthy behaviors are an integral component of academic and individual success.

CHEW provides programming and health promotion on college health issues such as stress management, alcohol and other drugs, sexual health, nutrition, physical activity, and sleep management to foster and promote a healthier JHU community. The CHEW CREW offers a variety of programs that promote and affirm student health and wellness through the delivery of fun and interactive programming. CHEW student groups include the Stressbusters, PEEPs (peer health education), and Hopkins Kicks Butts, an antitobacco coalition.

Information on programming, resources, and individual consultation may be obtained by calling 410-516-8396, stopping by the office at the Homewood Annex, 3003 N. Charles Street, South Entrance, Suite S183, or on the web at www.jhu.edu/health.

Counseling Center

Mission

The mission of the Counseling Center is to facilitate the personal growth and development of full-time undergraduate and graduate students enrolled in the Krieger School of Arts and Sciences, the Whiting School of Engineering, the Peabody Conservatory of Music, and the Post-Baccalaureate Premedical Program. The counseling services and outreach programs offered are designed to enhance the personal and interpersonal development of students and to maximize students’ potential to benefit from the academic environment and experience. The Counseling Center also strives to foster a healthy, caring university community, which is beneficial to the intellectual, emotional, and physical development of students.

Individual Counseling Services

The Counseling Center offers brief individual therapy to eligible students free of charge. Severe emotional problems are not a prerequisite for coming to the Counseling Center. Students may avail themselves of counseling services for personal growth and enrichment. All eligible students are encouraged to utilize the services offered by the center.

Some typical concerns that might lead a student to contact the Counseling Center are:

- Feeling overwhelmed/having difficulty coping
- Difficulties in interpersonal relationships
- Academic anxieties and pressures
- Problems with family members
- Inability to make decisions
- Loneliness or depression
- Grief over death or loss
- Concerns about sexuality
- Problems adjusting to college life
- Alcohol/drug concerns
- Eating disorders, weight control
- Desire to understand and feel better about oneself
- Motivational or time management problems
- Concerns relating to career direction

Students who come to the Counseling Center for counseling will meet individually with a professional staff member to determine which center services may best suit their needs. Individual counseling sessions generally occur once a week and last 50 minutes. The number of sessions per student per year is almost always limited to less than a semester.

Psychotropic Medication

In the event that psychotropic medication may be indicated, a consulting psychiatrist is available to evaluate the student and prescribe and monitor medication, upon referral by a Counseling Center staff counselor. Students can meet with a Counseling Center consulting psychiatrist only if they are in ongoing treatment with a Counseling Center staff counselor. If more extensive, more accessible, or more specialized psychiatric care is needed than the psychiatric consultant can provide, the Counseling Center will help you find a private psychiatrist who can meet your needs.

Group Services

The Counseling Center also offers group counseling services to eligible students free of charge. Each semester a variety of counseling groups, support groups, and skills-building groups are offered. Counseling groups might be thematic such as “Substance Abuse Education and Recovery,” “Parent Loss,” or “Survivors of Sexual Abuse,” or more general, such as a “Personal Growth” group. Groups usually meet for 75 to 90 minutes weekly, and may run for a few weeks, a semester, or longer.

Workshops/Outreach Programs

Workshops are offered each semester to enhance personal growth and development. Examples of workshops are ‘Assertiveness Training’ and
‘Stress Management’. Additional programming is available to residence halls and to other organizations and departments on campus that deal with student life issues.

Referral
If a student’s needs can be better met by another agency or person, the student is referred, on a voluntary basis, to that resource.

Confidentiality
All contacts in the center are strictly confidential (no information is released on or off campus without the student’s prior written authorization), and all therapy, counseling, and referrals are strictly voluntary. However, there are some situations in which the Counseling Center is legally obligated to disclose information or take action to protect you or others from harm. Please note that exceptions to confidentiality are extremely rare. If they should occur, it is the Center’s policy that, whenever possible, we will discuss with you any action that is being considered.

Counseling Center Staff
The Counseling Center is staffed by licensed, professional psychologists, consulting psychiatrists, and social workers. Services are also provided by advanced doctoral students in professional psychology who work under the supervision of senior staff.

Appointments
Students desiring Counseling Center services can make appointments in person at 3003 N. Charles Street, Suite S-200, or by telephone at 410-516-8278. In addition, a professional staff member is on duty each day for immediate assistance in case of an emergency. Further information about our services can be found at http://web.jhu/counselingcenter.

Career Center
The Career Center is actively involved in assisting students as they explore potential careers. In the Career Center, students of all class years receive individual guidance as they clarify their career directions, explore their career options, seek internships, or search for opportunities. Career counselors teach students how to conduct an effective job or internship search, create resumes and cover letters, develop interview skills, and gain effective networking and search strategies. Intersession trips offer students an in-depth view into industries and organizations. Additionally, the Career Center offers vocational assessments that are designed to assist students with translating a major into a career choice.

The center’s resources include a career library, extensive online job and internship offerings, and on-campus recruiting. Annual job and internship fairs bring representatives from business, industry, government agencies, and nonprofit organizations to campus to recruit students for internships and full-time opportunities.

The center also emphasizes the importance of interacting with alumni. Students may access a nationwide database of graduates who stand ready to offer career information. Information sessions, networking events, and a range of career panels and networking events bring Hopkins graduates back to campus to discuss career opportunities and trends in many different fields.

Information is available at www.jhu.edu/careers, by calling 410-516-8056, or by stopping by the office on the third floor of Garland Hall.

Student Employment Services
Working while attending college is among the most universal experiences of college students, and we are proud to say that the JHU Office of Student Employment Services sets the standard. Located in Garland Hall, Student Employment Services plays an intricate role in the student’s career development and academic achievements while helping to ease his or her financial demands.

The student employment program provides students the opportunity to apply their academic learning while developing professional skills in real work settings. The office offers a multitude of part-time work and career experiences year-round. Positions range from Research Assistant at JHMI to Web Manager at a local library; from Lab Assistant in Arts & Sciences to tutoring a local elementary school student. For students who want to work within the community, Student Employment Services works with area businesses to develop student job opportunities in a variety of fields in and around the Baltimore area.

The office offers a comprehensive website where, among other things, students can search for a job, create an online application, download tax forms, view their pay stubs, and print their W-2 form. Annually, the Office of Student Employment Services hosts a Campus Job Fair and National Student Employment Week celebration.

For more information about Student Employment visit www.jhu.edu/stujob or call us at 410-516-8421.

Office of Multicultural Affairs
Office of Multicultural Affairs (OMA): The Office of Multicultural Affairs (OMA) is committed to supporting the academic success of students from populations underrepresented in higher education and collaborating with members of the campus and greater Baltimore communities to enhance cultural awareness and create an inclusive campus community.

- Underrepresented Populations include minorities, low-income/first generation college students, students with disabilities, populations underrepresented in various disciplines and/or GLBTQ students enrolled at JHU.

OMA’s specific programs and services include (but are not limited to) the following:

- Mentoring Peer Assistant Program (M.A.P.P.)
- Students Empowering and Educating for Diversity (S.E.E.D)
- JUMP (a collaborative program with the Office of Pre-Professional Advising and the Office of Student Diversity, Johns Hopkins School of Medicine)
- Academic Support Services
- Cultural Heritage Celebrations
- Ghana Study Abroad Program
- Advising for Multicultural Student Organizations

Multicultural Affairs Student Center (MASC):

The MASC is a place where all members of the university community can participate in academic and social events in a relaxed environment. The MASC also provides meeting rooms for campus offices and student organizations. Residents of the MASC include several of the university’s multicultural student organizations and the Office of Multicultural Affairs.
Acceptance of membership in the University community carries with it an obligation on the part of each individual to respect the rights of others, to protect the University as a forum for the free expression of ideas, and to obey the law. This Undergraduate Student Conduct Code pertains to misconduct arising from offenses against persons and/or property committed on University property; to misconduct committed off University property against members of the University community; and to misconduct occurring off campus that causes significant harm to others. The University’s undergraduate student conduct system is designed to enforce the University’s conduct regulations.

The University reserves the right to institute disciplinary action whether or not the offense results or may result in action by a civil or criminal court.

**Undergraduate Student Conduct Code**

In addition to maintaining good academic standing, students are expected to refrain from conduct that injures persons or property. The University expects all students, including those living on or off campus, students studying abroad or at any off-campus university facility, or are on break to be law-abiding citizens, to respect the rights of others, and to refrain from behavior that impairs the University’s purpose or its reputation in the community. Students who have committed acts which are a danger to their own personal safety or which harm or have the potential of harming others, or who destroy, damage, or wrongfully appropriate property, will be disciplined and may forfeit their right to be members of the University community.

For example, students are expected to refrain from:

1. Conduct that disrupts or interferes with the orderly operation of teaching and research, or with other lawful or authorized activities.

2. Conduct that causes, or can be reasonably expected to cause, or threatens physical harm to a person.

3. Physical or verbal threats against or intimidation of any person which results in limiting her/his full access to all aspects of life at the University.

4. Conduct or a pattern of conduct in which a person approaches or pursues another person with intent to place the person in fear of physical harm or with intent to harass or to intimidate the person.

5. Conduct that violates the University’s hazing policy, or other conduct or a pattern of conduct that harasses a person or group.

6. Conduct that constitutes sexual abuse, assault, or rape of another person.

7. Conduct that constitutes sexual harassment of another person.

8. Theft or vandalism of University property, property of others, or knowingly possessing stolen property.

9. The unauthorized use, possession, or storage of any weapons, chemicals, or explosives, including fireworks, on University property.

10. The unauthorized distribution, possession, or use of any controlled substance (such as, but not limited to, illegal drugs).

11. The possession or consumption of alcohol by individuals under the legal drinking age in Maryland (21 years of age), or the provision of alcohol to minors.

12. The distribution or sale of alcohol to individuals under the legal drinking age.

13. Failure to comply with the directions of University officials, instructors, administrators, staff, or the Baltimore City Police acting in performance of their duties.

14. The unauthorized or improper use of University property, facilities, resources, or the University name or seal.

15. Failure to observe University policies, procedures, rules, or regulations.

16. Misuse or abuse of any University computer, computer system, computer or communications service, program, data, network, or resource.

17. Violation of any law of the United States, law of the State of Maryland, or municipal ordinance which occurs on or off campus which impinges on the rights of others or which impairs the University’s reputation.

18. Conduct that disturbs the peace or impinges on the rights of residents of neighborhoods where students reside, including, but not limited to: loud parties or excessive noise, shouting or talking that unreasonably disturbs other students or community members; public urination; drinking in public; littering or not disposing of trash appropriately; failure to reasonably maintain yard or premises.

19. Hosting or conducting an event in violation of university policies.

20. Conduct that hinders, obstructs, or interferes with investigations, hearings, sanctions, and other implementation processes of the Student Conduct Code.
21. Failure to appear for a University disciplinary hearing to respond to a charge or to testify as a witness when reasonably notified to do so.

22. Failure to comply with the terms of a judicial sanction. Other behavior may be equally inconsistent with the standard of conduct expected of a University student and the University’s commitment to providing an environment conducive to learning and research.

Student Conduct System

Overview

The Office of the Dean of Student Life has responsibility for disciplinary matters relating to the non-academic life of undergraduates in the Homewood Schools of Arts and Sciences and Engineering. Included in this are:

- formulating and refining a student conduct code;
- formulating and refining a system for addressing and adjudicating complaints of misconduct;
- educating the undergraduate community about conduct standards and resolution mechanisms; and
- upholding the conduct code and related policies governing undergraduate life, including residential living.

When a complaint is made alleging violation of the conduct code, the matter may be resolved by:

- the Student Conduct Board,
- the Dean of Student Life, or
- a designee of the Dean of Student Life, most frequently the Associate Dean of Students or the administrative staff in the Office of Residential Life.

Mechanisms used to resolve incidents or misconduct include:

- administrative resolution of minor, non-disputed conduct violations,
- Student Conduct Board hearings,
- administrative hearings with the Associate Dean of Students or a designee, or
- a mediation process, with an administrative mediator or through the University’s mediation service, when mediation is an appropriate alternative to a disciplinary hearing process.

Authority of the Conduct Board

Members of the University community have the responsibility to conduct themselves in a manner that upholds the law and respects the rights of others. The Student Conduct Code outlines the standards of behavior established by the University for undergraduates.

The conduct code is enforceable until the undergraduate degree is conferred on commencement day. The code governs behavior which occurs on or off University property. It is enforceable throughout the entire matriculation period, regardless of whether classes are in session or the student is enrolled in classes.

The University may institute action on a disciplinary matter when the interests of the University community are at stake. The conduct system is not intended to replace public law enforcement or to provide non-Hopkins community members with a personal redress mechanism.

Some acts of misconduct also may constitute violations of criminal law. The University’s policy is to cooperate fully with law enforcement authorities. The University’s conduction of its disciplinary proceedings is independent of any criminal proceedings arising out of the same incident.

The conduct system coordinated by the Office of the Dean of Student Life addresses alleged violations of the student conduct by individual undergraduate students. The disciplinary structures and processes of the Interfraternity Council and the Student Activities Commission address alleged violations by fraternity and student organizations of the policies of those groups. A student who commits misconduct that violates both the conduct code and student organization policies may be held accountable through both the conduct system and the disciplinary structure of their organization. Academic misconduct is addressed by the Undergraduate Academic Ethics Board.

Complaint Process

Conduct system complaints may be generated by:

- undergraduate and graduate students
- staff and faculty
- neighbors, landlords, and community groups
- law enforcement reports
- campus security reports
- individuals and entities not affiliated with the university community.
- An individual who wishes to make a complaint speaks to the Associate Dean of Students in the Office of the Dean of Student Life, or the administrative staff of the Office of Residential Life.

The Associate Dean manages complaints of major conduct code violations regardless of where they occur and of any violation that does not occur in University housing. The Director of Residential Life, or her designee, manages complaints of minor violations that occur in University housing.

As a preliminary step, the conduct process is explained to the complainant, options are discussed, and the complainant decides whether to pursue the complaint. If the complainant decides to do so, and in instances in which the University is the complainant, the process continues through the following steps:

The investigating administrator meets with the accused student and other individuals involved in the case as warranted.

The investigating administrator determines whether there is sufficient cause for charges to be initiated against the accused student.

If the accused student is charged, the investigating officer evaluates whether the case should be handled administratively, referred to the Student Conduct Board, or referred for mediation.

When warranted, the investigating officer works with the complainant and respondent to identify witnesses and to assemble information relevant to the case. The complainant and the respondent are given opportunity to review this information in preparation for the hearing.

The complaint and respondent are responsible for notifying their witnesses of the hearing date and time and for bringing all relevant evidence to the hearing. Minor disciplinary cases that occur in University housing in which the accused student admits to the misconduct are likely handled administratively by Office of Residential Life staff. In most other instances, cases are referred to the Student Conduct Board. Cases of high sensitivity and complexity may be referred to an administrative
hearing with the Dean of Student Life or her designee, including cases alleging sexual assault or sexual harassment.

**The Student Conduct Board**

The Student Conduct Board is part of an undergraduate student conduct process created by the Dean of Student Life to assist her in resolving cases of non-academic misconduct. It is designed to give students a formal role in upholding the standards of community life at the University and to give students who are victimized by or accused of violations of these standards the opportunity to have their cases heard by their peers.

The Board reports to the Associate Dean of Student Life. The Board is comprised of up to 20 students and 4 to 10 staff/faculty members who hear cases on a rotating basis in groups of five. These five-person hearing panels are composed of three student members and two staff/faculty members. A student member of each panel serves as the presiding officer for that hearing. Membership on the Board is open to all full-time undergraduates through a selection process coordinated by the Associate Dean of Student Life.

**Administrative Hearing Process**

In hearings conducted by the Student Conduct Board and by administrative hearing officers, the panel or hearing officer:

- Reads the charge to the respondent and asks the respondent to indicate whether s/he is responsible or not responsible for the misconduct in question
- Asks for a full statement from both the complainant and respondent describing the incident and giving relevant background
- Hears statements from witnesses
- Questions the complainant, respondent, and witnesses.

The complainant and respondent have the opportunity to respond to all statements and information presented to the panel or hearing officer. In most cases, the respondent will be present when the complainant presents his/her statement and is questioned by members of the panel or the hearing officer. However, the Associate Dean of Student Life may direct that the complainant appear outside the presence of the respondent for good cause.

The complainant and respondent are entitled to the same opportunities to bring their parents or another individual to provide personal support to a hearing. Legal counsel representing any participant is not permitted in the hearing. In private session, the hearing panel or administrative hearing officer:

- Makes a determination of the responsibility or non-responsibility of the respondent for the misconduct charged;
- Determines a sanction, when there has been a finding of responsibility;
- Students are given 5 days notice of the hearing except in the case of a senior. In order to participate in graduation, a student hearing. Administrative or Conduct Board must take place before graduation.

**Sanctions**

The following sanctions may be imposed singly or in combination by a hearing panel or administrative hearing officer. The University, in its sole discretion, may impose any sanction or combination of sanctions, up to and including expulsion, for any violation of University policy or the student conduct code. In imposing sanctions, the nature and circumstances of the offense, the student’s prior record, and other factors deemed pertinent may be considered.

1. **Disciplinary Warning:**
   - The student receives written notice that continuation or repetition of conduct that has been judged wrongful or inappropriate, within a period of time stated in the warning, will be cause for more serious disciplinary action. A letter of warning creates a disciplinary file in the Office of the Dean of Student Life that exists until the student leaves the University by graduation or transfer.

2. **Disciplinary Probation:**
   - The student is notified that s/he is no longer in good conduct standing with the University and that further violation of University regulations during the probation will likely result in disciplinary separation. A file is maintained in the Office of the Dean of Student Life. Students on disciplinary probation are generally ineligible to represent the University in intercollegiate activities, hold elected or appointed office or campus committee chairpersonship, or pledge a fraternity or sorority for a set period of time as set forth in the notice of the probation.

3. **Disciplinary Suspension:**
   - A student must withdraw from the University for a specified length of time. Suspension from academic coursework includes exclusion from all academic privileges and co-curricular activities. A file is maintained in the Office of the Dean of Student Life and a copy of the notification letter is filed in the student's academic records. A notation on the student’s permanent record may also be ordered. Parents will be notified of suspension.

4. **Additional Sanctions in Cases of Warning, Probation, or Suspension:**
   - As part of either disciplinary warning or disciplinary probation, the following conditions may be applied:
     - Restitution
     - Fines
     - Compensatory services
     - Restitution services
     - Rehabilitative and/or educational activities
     - Exclusion from specific aspects of community life such as participation in commencement exercises or entry into residence halls.

5. **Expulsion:**
   - An individual’s status as a student of the university is terminated.

6. **Separation from the Residence Halls:**
   - Students residing in University housing face an additional potential sanction of expulsion from housing. If they are found to have committed any of the following acts of misconduct:
     - Knowingly or recklessly endangering the health or safety of other residents of University housing.
     - Any activity involving firecrackers, explosives, or firearms; any act of arson within University housing.
     - Throwing or dropping items from the buildings.
     - Threatening, harassing, or abusing any member of the residential community.
     - Distribution, possession, or use of illegal drugs
     - Serious violations of the University’s alcohol policy
     - Intentionally or recklessly destroying, damaging, disabling, or stealing University property
     - Repeated violations of housing regulations
If a student is removed from housing they will not receive a refund.

7. Off-campus and Community Violations and Sanctions:
As set forth in the student conduct code, students residing in housing off-campus may be sanctioned for engaging in conduct that impinges on the rights of other students, neighbors, and community members. Violations of restrictions on noise, the hosting of events, trash disposal, maintaining yard and premises, underage drinking, distribution/ sale of alcohol and other offenses that impact or may impact negatively on the community will result in sanctions as follows: for a first offense, at a minimum, a written warning; for a second offense, at a minimum, university probation, a fine and parental notification; for a third offense, suspension and possible expulsion. As is the case with any violation of the student conduct code, any violation, even a first offense, can be punished with sanctions up to and including expulsion, depending on the nature and circumstances of the violation, the prior record of the student, and other factors deemed pertinent.

Transcript Notations
Hearing panels and officers may order the entry of a notation explaining disciplinary action on the transcript of a student found responsible for misconduct. Hearing officials also may permit the student to appeal to the Dean of Student Life for removal of the notation after a specified period of time and upon completion of sanctions and fulfillment of other specified conditions.

Post-Hearing Process
Both the complainant and respondent are informed of the outcome of the hearing. The respondent is given written notification of the decision. The requirements of confidentiality of student records are observed. An appeal process is available for findings and/or sanctions, on limited grounds, to the complainant and the respondent.

Options in Cases of Sexual Assault or Sexual Harassment
Cases involving charges of sexual harassment or sexual assault shall be heard by the Dean of Student Life, unless, with the agreement of the complainant, the Dean deems the case appropriate for disposition by the board. In either case, the hearing procedures described above apply.

Both the complainant and respondent are informed of the outcome of the hearing, which means the final determination with respect to the alleged sex offense and any sanction that is imposed against the respondent. This notice will be provided to the complainant and the respondent in the same manner and in the same time frame.

In addition to the above, upon written request, the Dean of Student Life shall disclose to the alleged victim of any crime of violence (as that term is defined in section 16 of title 18, United States Code), or a non-forcible sex offense, the report on the results of any disciplinary proceeding conducted against a student who is the alleged perpetrator of such crime or offense with respect to such crime or offense. If the alleged victim of such crime or offense is deceased as a result of such crime or offense, the next of kin of such victim shall be treated as the alleged victim for purposes of this paragraph.

Persons who believe they have been sexually abused or assaulted by Johns Hopkins students are encouraged to contact the Office of the Dean of Student Life. Referrals to support services will be made and the disciplinary process for sexual assault complaints will be explained for those who wish to consider initiating a complaint. Students may bring complaints about acts of sexual harassment committed by Johns Hopkins students to the Office of the Dean of Student Life for disciplinary action. Students also may bring complaints of sexual harassment committed by faculty, staff or students to heads of departments, the dean or director of a division.

Interim Suspension
The Dean of Student Life or Associate Dean of Student Life reserves the right to suspend a student when his or her behavior indicates that his/ her continued presence on campus constitutes a danger to the normal operation of the institution, or to the safety of himself or herself or others, or to the property of the University or of others. The suspension shall continue until the completion of disciplinary proceedings or until the behavior giving rise to the suspension is resolved.

For More Information
The Associate Dean of Student Life in the Office of the Dean of Student Life is available to provide students with more information about any aspect of the Student Conduct System.

Undergraduate Academic Ethics Board
Constitution of the Krieger School of Arts and Sciences and the Whiting School of Engineering

Preamble
Throughout its history, The Johns Hopkins University has enjoyed a distinguished reputation for academic excellence and integrity. Each member of the University bears a personal responsibility to uphold the ethical standards of the Institution. The Undergraduate Academic Ethics Board has adopted the following procedures for responding in a timely and impartial manner to infractions of the high ethical standards of the academic community. Faculty and undergraduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering are expected to understand their responsibilities as members of the Johns Hopkins University academic community and are bound by these procedures.

The Undergraduate Academic Ethics Board
Section A
The Undergraduate Academic Ethics Board (hereinafter "The Ethics Board") is a subcommittee of the Academic Council and an independent committee of the Student Council. The Ethics Board is comprised of eight full-time faculty members (four from each school) and twelve undergraduate students, as well as a Presiding Official and a Chairman, both of whom are undergraduate students. The faculty members are selected by the dean of the school and the undergraduate members are selected by the Student Council’s Committee on Leadership Appointments. Undergraduate members shall serve terms of one academic year, beginning on September 1st. A board member may be removed from the Ethics Board if they have not met the expectation of the board.

Section B
The Ethics Board is responsible for the maintenance of the academic integrity of the undergraduate programs in the Krieger School of Arts and Sciences and the Whiting School of Engineering and for all matters concerning adherence to this Constitution, including but not limited to:
receiving reports of suspected violations, consulting with members of the University community on ways to reduce possible violations, appointing hearing panels, maintaining confidential records, orienting new students to the ethic standards of the community.

Section C
1. The duties of the Chairman are:
   a. to plan and oversee all general meetings of the Board
   b. to be available for contact by the accused student to answer any questions or concerns
   c. to organize training of the board members selected for the subsequent year
   d. to assist in the selection of new board members when requested
   e. to act as Presiding Official when needed and to provide assistance to the Associate Dean of Student Life and the Presiding Official in their duties when requested
2. The duties of the Presiding Official are:
   a. to oversee all Ethics hearings and to make procedural decisions as outlined in Article VI
   b. to provide assistance to the Associate Dean of Student Life and the Chairman in their duties when requested.

Jurisdiction
The Ethics Board shall have jurisdiction over all undergraduates in the Krieger School of Arts & Sciences and the Whiting School of Engineering. The Ethics Board may assume jurisdiction over a case involving a full time undergraduate in a class in the School of Education and the Carey School of Business.

Violations of Academic Integrity
Undergraduate students enrolled in the Krieger School of Arts and Sciences or the Whiting School of Engineering at the Johns Hopkins University assume a duty to conduct themselves in a manner appropriate to the University’s mission as an institution of higher learning. Students are obliged to refrain from acts which they know, or under circumstances have reason to know, violate the academic integrity of the University. Violations of academic ethics include, but are not limited to: cheating; plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one’s own the same or substantially similar work of another; knowingly furnishing false information to any agent of the University for inclusion in academic records; falsification, forgery, alteration, destruction or misuse of official University documents or seal.

Responsibilities of Students and Faculty
Section A
Faculty members are responsible for specifying at the beginning of each semester the basic rules and procedures for any and all coursework, examinations, and other academic exercises. They are also responsible for exercising a reasonable degree of caution while writing, transporting and administrating examinations and other graded work. All faculty members and teaching assistants are responsible for taking appropriate actions in accordance with the Constitution in all cases of suspected violations of academic ethics.

Section B
It is the responsibility of each student to report to the professor in charge of the course or to the Ethics Board any suspected violations of academic ethics.

Procedures for Handling Suspected Violations of Academic Integrity
Section A
If a student is suspected of a possible violation of academic ethics, the professor in charge of the course will review the evidence and the facts of the case promptly with the student. If, after speaking with the student(s), the professor believes that a violation of academic ethics has occurred, the professor may (a) settle the case directly with the student with appropriate notification to the Office of the Dean of Student Life or (b) promptly notify the Ethics Board in writing, through the Office of the Dean of Student Life, setting forth the details of the case.

Section B
1. A professor has the authority to settle a case with a student if (a) the current offense does not constitute a second or subsequent offense, and (b) the settlement does not call for a notation on the student’s transcript. It is the responsibility of the professor to check with the Office of the Dean of Student Life to determine whether the student has any prior record of misconduct. If the circumstances surrounding the case do not satisfy the above criteria, then the professor must send the case to the Ethics Board for resolution.
2. If the professor settles a case with the student(s), the penalty or penalties imposed may only be selected from items (b) through (e) listed under the Penalties section. If the professor feels that none of these penalties are appropriate, he/ she must submit the matter to the Ethics Board for resolution.
3. If a case is settled directly between the student and the professor, then the professor must submit the name of the student and the settlement agreed upon to the Office of the Dean of Student Life.

Section C
1. If the student(s) and professor are unable to reach a settlement, then the professor must file a written charge of a violation of academic ethics to the Office of the Dean of Student Life for resolution. Professors should make every effort to take such action within one week of the alleged occurrence of academic misconduct.
2. In the event that a case arises near the end of a semester, the professor must submit a charge (as outlined above) at least one week before the official last day of classes. Any charge received after this date may be held over until the following semester. When possible, hearings could be held during Intersession and summer. For summer hearings, officers and board members may be drawn from the Board for the subsequent academic year at the discretion of the Associate Dean of Student Life.

Section D
Upon receipt of a charge of a violation of academic ethics from a professor, the Associate Dean of Student Life shall appoint a hearing panel to consider the charge(s). The panel shall decide the issue of responsibility and, if the student is found responsible or not responsible, shall impose an appropriate penalty, as specified in Penalties.
Section E
When the Associate Dean of Student Life receives a charge of a violation of academic ethics from a professor, he/she shall:

1. file the professor’s written charge in the Ethics Board’s file in the Office of the Dean of Student Life.
2. collect all pertinent evidence.
3. set a hearing date, time, and location.
4. notify the accused student(s) of the charge and hearing date, time, and location.
5. select members of the Ethics Board to serve on the hearing panel

Hearing Panels
Section A
When required under the conditions warrant a hearing, the Associate Dean of Student Life shall appoint a hearing panel of unbiased persons to consider the case.

Section B
A hearing panel shall consist of two faculty members and three students and shall ordinarily be selected from the members of the Ethics Board. A Presiding Official shall conduct the proceedings of the hearing panel. He or she is responsible for maintaining records of all procedural decisions.

Section C
If any member of the panel feels they are unable to treat all parties fairly, they should remove themselves from the board, and the Associate Dean of Student Life may appoint a hearing panel of faculty or full-time undergraduate students from the Krieger School of Arts and Sciences and the Whiting School of Engineering who are not members of the Ethics Board. Such a circumstance might occur if a panel could not be appointed from among the members of the Ethics Board.

Section D
The professor shall submit all relevant documents to the Associate Dean of Student Life at least five business days prior to a hearing. The accused student shall submit all relevant documents to the Associate Dean of Student Life at least two business days prior to the hearing. If any evidence is submitted after this date, both parties will be notified of its addition.

Section E
The accused student shall be notified in writing of a charge of a violation of academic ethics at least five business days prior to a hearing. Upon receipt of notification, the accused student(s) shall have the opportunity to inspect all documents under the supervision of the Associate Dean of Student Life.

Section F
The hearing panel members shall not be informed of details of the charge(s) before the hearing is convened and shall keep all information confidential.

Section G
The accused student may discuss procedures with the Presiding Official, the Chairman, or the Associate Dean of Student Life but may not approach members of the panel, the accuser, or the accuser’s witnesses concerning any matter directly or indirectly related to the hearing.

Section H
1. Students charged with misconduct arising from a single incident or occurrence may have their hearings joined at the discretion of the Associate Dean of Student Life. Charges of academic misconduct against a single student arising from several incidents or occurrences may also be heard at one hearing at the discretion of the Associate Dean of Student Life.
2. The accused student shall receive written notification of a joinder of charges.
3. When a hearing involves a joinder of charges, the guilt or innocence of each student shall be ruled upon separately. Similarly, joined charges against a single student shall be ruled upon individually.

Section I
1. If an accused student fails to appear for the hearing after having been duly served with notice, or withdraws from a hearing before its conclusion without the written permission of the Associate Dean of Student Life, immediate suspension from the University may be imposed. Such a suspension shall continue until the Hearing can be concluded with the student present.
2. Students are responsible for appearing as witnesses before a hearing panel as requested by the Ethics Board, and no student may willfully interfere with the processes of the Ethics Board or its hearing panels. A student’s failure to appear and tell the truth in response to all relevant questions, or his or her interference with the processes of the Ethics Board or its hearing panels constitutes a violation of academic ethics.

Section J
Those present at a hearing of the Ethics Board are limited to the following: the Presiding Official, panel members, the member of the University bringing charges, the accused student(s), and not more that one representative of the accused student(s) who is a full-time student presently enrolled in either the Krieger School of Arts and Sciences or the Whiting School of Engineering. Any witness called by either party may be present only when their testimony is required. The Chairman may attend the hearing at the request of the Presiding Official, to assist the Presiding Official with any and all matters concerning the Official, to assist the Presiding Official with any and all matters concerning the hearing, but not to exercise final authority on procedural questions. The Associate Dean of Student Life or other administrative officer may also attend the hearing but cannot decide responsible or not responsible regarding the accused.

Section K
A full and complete record shall be made of the proceedings by tape recording. No record of the deliberation shall be made. The hearing panel may, however, prepare a brief written report detailing the reason(s) for the finding of guilt or innocence and any penalties imposed. The Office of the Dean of Student Life will maintain a permanent file of all such reports. If a student is found responsible, they will receive written notification of their sanction(s).

Section L
1. The Presiding Official shall conduct the hearing in an orderly fashion. He/She shall have the authority to rule on peremptory challenges, exclude testimony and evidence that is repetitious or irrelevant to the charges, and shall make final decisions of all questions of procedure. They may ask the Associate Dean of Student Life questions for clarification.
2. The Presiding Official may recess the hearing when it is deemed necessary. During a recess of a hearing, no discussion of the case by panel members, the accused student, the accuser, or witnesses will be permitted.

Section M
The accused student shall be presumed not responsible until found responsible. A determination should be reached during deliberations based solely upon the information presented during the hearing, and not upon any preconceived assumptions.

Section N
Upon calling the hearing to order and introducing the panel, the Presiding Official shall read the charge(s) and ask the accused student to enter a plea of responsible or not responsible.

Section O
If the accused student pleads guilty to the charge(s), the professor shall present testimony which can aid the hearing panel in determining the severity of the offense. The student shall then be given the opportunity to present information to the hearing panel which he/she wish to be considered in determining a penalty. The hearing panel may also ask questions of both parties in order to ascertain the severity of the offense.

Section P
1. If the plea is one of innocence, the professor shall present testimony and evidence in support of the charges. Evidence may include documents, the professor’s own testimony, and that of any witnesses. Before calling a witness, the professor should be prepared to establish that the witness will present evidence relevant to the case at hand. Only the panel may ask questions of the accused or the professor. The Associate Dean of Student Life may curtail questioning if it is determined to be irrelevant or repetitious.
2. Following the professor’s presentation, the accused student shall present testimony and evidence under the same restrictions.
3. Following the accused student’s presentation, the professor and the accused student may recall witnesses if they can establish the need to do so. Such a recall of witnesses shall be subject to the discretion of the Associate Dean of Student Life.
4. After testimony from both sides has been heard, the professor and the accused student shall be given the opportunity to present a closing statement and any mitigating circumstances which they feel are appropriate. If the charge being heard constitutes a second or subsequent offense by the student, the student shall have the opportunity to comment on each prior offense individually.
5. Following the closing statements, the professor, the accused student, his/her representatives, and all witnesses are excused. All parties shall remain available and shall inform the Presiding Official of their whereabouts.

Section Q
1. The panel shall deliberate the charge(s) until each member is ready to vote or the Associate Dean of Student Life determines that any further deliberation will not be productive.
2. The accused student, professor, and/or any witnesses may be recalled for further testimony at any time during the panel’s deliberation.
3. The individual decision of each hearing panelist on responsible/not responsible shall be based upon a preponderance of the evidence.
4. Voting of the hearing panel may be by secret ballot or verbally. Majority of votes will determine responsible or not responsible.
5. The accused student will be asked to return, and told of the results of the panel.

Section R
Notice of the outcome of the hearing shall be sent to the student(s), professor, and the Dean of the Whiting School of Arts and Sciences or the Whiting School of Engineering, depending on the school in which the student is enrolled.

Penalties
Section A
If a student is found guilty of a violation of academic ethics, whether by direct settlement with the professor, by pleading guilty at a hearing, or by a ruling of a hearing panel, a notification of the violation must be made in the student’s file explaining the violation.

Section B
1. One or more of the following penalties may be imposed upon students found guilty of violations of academic ethics:
   a. A notation placed on the student’s permanent transcript explaining the violation and punishment.
   b. Retake of the examination, paper or exercise involved.
   c. Score of zero on the examination, paper, or exercise involved.
   d. Lowering of the course grade.
   e. Failure in the course.
   f. Failure in the course with a notation on the transcript that the failing grade was for a violation of academic ethics.
   g. Failure in the course with suspension from the University.
   h. Failure in the course with suspension from the University and notation on the transcript that the failing grade was for a violation of academic ethics.
   i. Suspension from the University for at least one Semester.
   j. Suspension from the University for at least one Semester with a notation on the transcript that the cause was a violation of academic ethics.
   k. Expulsion from the University with a notation on the transcript that the cause was a violation of academic ethics.
2. Hearing panels shall make every effort to select a penalty appropriate to the severity of the offense, and may take into consideration any mitigating circumstances brought to its attention, as well as any record or absence of prior misconduct. A hearing panel may also impose a penalty that is not enumerated above if to do so would appropriately reflect the severity of the offense.
3. The penalty for a second or subsequent finding of guilt must be selected from items (f) through (k) of Section B-1 above.

Section C
The penalty decided upon by the hearing panel must be agreed upon by the majority of the panel.

Section D
A student found guilty of a violation of academic ethics in a course forfeits the right to withdraw from the course or to change a graded course to pass/fail, and any withdrawal from that course or change effected prior to the finding of guilt shall be voided.
Section E
A student who has committed a violation of academic ethics has the option of making a timely and personal report of the offense to the professor in charge of the course or to the Dean of the respective school. A self-reported violation of academic ethics reported and dealt with under this section shall not constitute a first offense.

Appeals
Section A
A student found guilty of a violation of academic ethics may appeal the decision of the hearing panel to the Vice Dean of Undergraduate Education (or his or her designee) of the Krieger School of Arts and Sciences, the Vice Dean of Education of the Whiting School of Engineering, or the respective Deans of the School of Education or the Carey School of Business, whichever is applicable. The appeal must be filed within 10 business days from the date of the decision from which the appeal is taken. The appeal must be in the form of a written statement setting forth the grounds for the appeal. The Vice Dean may disallow an appeal of any procedural error if that error did not cause harm to the accused student. A full written report of the disposition of each appeal shall be made by the Vice Dean of the respective school and to the Associate Dean of Student Life.

Records
Section A
Records of the Ethics Board are available to members of the Board, faculty, and administrative staff, including the pre-medical and pre-law advisors. Records will only be released if a written request has been made and approved by the Associate Dean of Student Life.

Section B
The records of the Undergraduate Academic Ethics Board shall be held in the Office of the Dean of Student Life.

Section C
1. If formal charges have not been brought against an accused student within three months or within the first month of the fall semester for charges carried over from the previous academic year, then any references to the accusation(s) shall be eliminated from all files into which they had been placed.
2. A case file concerning an accused student shall be retained for seven (7) years after that student graduates or otherwise leaves the University.

A Summary of Procedures for Responding to Infractions of the Academic Ethics Code
Violations of Academic Integrity
Violations of academic ethics include, but are not limited to: cheating, plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one's own the same or substantially similar work of another; knowingly furnishing false information to any agent of the University for inclusion in academic records; falsification, forgery, alteration, destruction or misuse of official University documents or seal.

Suspicion of a Violation of Academic Integrity
Faculty members and teaching assistants have a responsibility to act in accordance with the ethics code in all cases of suspected violations of academic ethics. Students have a responsibility to report suspected violations of the ethics code to the professor in charge of the course or to the Ethics Board.

The Associate Dean of Student Life in Mattin Suite 210, 410-516-8208, is the liaison for the Ethics Board. If a student is suspected of a violation of academic ethics, the professor in charge of the course must contact the liaison for the Ethics Board to determine whether the student has a record of a previous violation of academic ethics. The professor will review the evidence with the student. If the professor believes that a violation of academic ethics has occurred, the professor may

1. settle the case directly with the student
2. promptly request a hearing by the Ethics Board (by contacting the liaison) and submitting a written charge, describing the details for the case.

Direct Settlement between the Professor and Student
If this is a first offense, the professor may settle the case with the student if the student admits guilt. Written notification of the violations and the settlement, signed by the professor and countersigned by the student, should be sent to the liaison for the Ethics Board. The penalty imposed may be selected from the following: retake the examination, paper or exercise involved; earn a lower grade in the course; or fail the course. If the professor or student feels that none of these penalties is appropriate, the case must be submitted to the Ethics Board for resolution. If this is a student’s second violation of academic ethics, the case must be submitted to the Ethics Board.

Ethics Board Hearings
When direct settlement is not possible, the case is brought before the Ethics Board. A hearing panel of two faculty and three student members is then scheduled. The accused student will be notified of the charge(s) and hearing date, time and location. If the case is reported at the end of the semester, when students and faculty are busy with examinations or have left campus, the case may be held over until the start of the next semester.

The professor submits all relevant documents to the liaison of the Ethics Board prior to the hearing. The accused student is given an opportunity to inspect all documents prior to the hearing under the supervision of an official of the ethics board. The student may also bring one representative to the hearing. The representative must be a full-time student presently enrolled in the School of Arts and Sciences or the School of Engineering. A tape of the hearing is made and can be furnished to the accused student for the purpose of preparing an appeal. No recording of the deliberation is made, although a brief written report is prepared detailing the reason(s) for the panel’s decision and the penalties imposed.

The hearing panel members are not informed of the details of the charges until the hearing is convened. The accused student may not approach the members of the panel, the accuser, or the accuser’s witnesses regarding any matter related to the hearing.

The hearing is conducted in an orderly fashion with testimony taken in turn from the accuser, the accused, and from witnesses. Cross-examination and closing statements are allowed. The decision of the hearing panel on guilt or innocence shall be based upon a preponderance of the evidence. At least four votes are required for a finding of guilt, otherwise the case is dismissed.
Penalties and Records
If a student is found guilty of a violation of academic ethics, either by direct settlement with the professor, or by a ruling of a hearing panel, a notation explaining the violation must be made in the student’s academic advising records. Penalties for a violation that is heard by a Hearing panel may include those available to a professor who reaches a direct settlement with the student, plus others including notations on a transcript and suspension or expulsion from the University. A student found guilty of a violation of academic ethics in a course forfeits the right to withdraw from the course, to change the graded course to satisfactory/unsatisfactory, or to absolve the grade by repeating the course.

Self-Reports of Violations
A student who reports his/her own violation of academic ethics to the professor in charge of the course, or the Dean of the school, is subject to penalties, but the violation is not considered a first offense.

Student Life Policies
Drug, Alcohol, and Firearms Policies for Students
The University, in keeping with its basic mission, recognizes that its primary response to issues of alcohol and drug abuse must be through educational programs, as well as through intervention and treatment efforts. In addition to providing appropriate educational programs throughout the year, each division of the University will include such programs as part of its orientation for new students.

The University further recognizes that alcoholism and drug addiction are illnesses that are not easily resolvable by personal effort and may require professional assistance and/or treatment. Participation in such programs may be required of a student as a “condition of continual enrollment.” The university will adhere to strict policies of confidentiality for all participants in drug/alcohol abuse rehabilitation programs as described in University and Federal regulations covering confidentiality of student health records. Maryland and District of Columbia laws prohibit the possession or consumption of alcoholic beverages by persons under the age of 21. The possession, use, or distribution of illegal drugs as defined by federal, state, and local statutes is prohibited.

Students are expected to obey the law. Individuals who violate the law, in addition to being subject to criminal penalties, may be subject to University disciplinary measures. The University will not excuse acts of misconduct committed by students whose judgment is impaired due to alcohol or drug abuse.

Student Activities Alcohol Provisions
Generally, alcohol is not served at events sponsored by University-affiliated student groups. If a student group does desire to sponsor an event at which alcohol will be served, it must receive permission of the Director of Student Activities prior to the event taking place. The conditions under which permission will be granted are as follows:

1. Only beer and/or wine may be served. Kegs and other bulk quantities are not permitted.

2. The organization must agree to follow the procedures for assuring that persons attending the event who are underage will not be served. In addition, the organization and/or individuals in the organization may be subject to University disciplinary action if underage patrons are served alcoholic beverages.

3. Publicity (posters, etc.) for events at which alcoholic beverages are served must not include any mention of beer/wine. “Refreshments available” or some facsimile thereof will be acceptable. News-Letter ads may publicize beer/wine, but it cannot be the main thrust of the ads.

4. Persons who violate or attempt to violate these regulations (restrictions) will be asked to leave the event and may be subject to University disciplinary action. The Associate Dean limits the number of events at which alcohol may be served. Organizations that violate the alcohol policy will lose the privilege of serving alcohol at their events and may be subject to University disciplinary action.

5. No alcoholic beverages may be purchased through student organization funds nor may the purchase of alcoholic beverages for members or guests be undertaken or coordinated by any member in the name of or on behalf of the student organization.

6. The sale of alcoholic beverages at Johns Hopkins’ student organization events must be through a State of Maryland licensed vendor and must be sold on a “per drink” basis; “open bar” events are prohibited. Beverages should be sold at reasonable market value and prices should be included in the event contract. Profit sharing is prohibited The distributing of drink tickets/vouchers at student organization events is prohibited.

7. No member of Johns Hopkins’ student organizations, collectively or individually, shall purchase for, serve to, or sell alcoholic beverages to anyone under the age of 21. It is the role of the third party vendor to acquire, distribute and monitor the alcohol.

8. Alcohol events hosted on campus by Johns Hopkins’ student organizations must comply with university policies regarding the reservation of adequate security and age verification procedures.

9. All recruitment activities hosted by a Johns Hopkins’ student organization must be dry, meaning no alcoholic beverages will be served.

10. Johns Hopkins University student organizations may not collect admissions fees (cover charges) in order to defray the cost of alcohol.

Policy on Firearms
The possession, wearing, carrying, transporting, or use of a firearm or pellet weapon is strictly prohibited on University premises. This prohibition also extends to any person who may have acquired a government-issued permit or license. Violation of this regulation will result in a disciplinary action and sanctions up to and including expulsion, in the case of students, or termination of employment, in the case of faculty and staff. Disciplinary action for violations of this regulation will be the responsibility of the divisional student affairs officer, Dean or Director, or the Vice President for Human Resources, as may be appropriate, in accordance with applicable procedures. Any questions regarding this policy, including the granting of exceptions for law enforcement officers and for persons acting under the supervision of authorized University personnel, should be addressed to the appropriate chief campus security officer.

Policy Against Sexual Harassment
A. Preamble
The Johns Hopkins University is committed to providing its staff, faculty and students the opportunity to pursue excellence in their academic and professional endeavors. This can only exist when each member of our community is assured an atmosphere of mutual respect, one in which they are judged solely on criteria related to academic or job performance. The university is committed to providing such an environment, free from all
forms of harassment and discrimination. Each member of the community is responsible for fostering mutual respect, for being familiar with this policy and for refraining from conduct that violates this policy.

Sexual harassment, whether between people of different sexes or the same sex, is defined to include, but is not limited to, unwelcome sexual advances, requests for sexual favors, sexual violence and other behavior of a sexual nature when:

1. submission to such conduct is made implicitly or explicitly a term or condition of an individual’s employment or participation in an educational program;
2. submission to or rejection of such conduct by an individual is used as the basis for personnel decisions or for academic evaluation or advancement; or
3. such conduct has the purpose or effect of unreasonably interfering with an individual’s work or academic performance or creates an intimidating, hostile or offensive working or educational environment.

Fundamental to the University’s purpose is the free and open exchange of ideas. It is not, therefore, the University’s purpose, in promulgating this policy to inhibit free speech or the free communication of ideas by members of the academic community.

**B. Policy**

The University will not tolerate sexual harassment, a form of discrimination, a violation of federal and state law and a serious violation of university policy. In accordance with its educational mission, the university works to educate its community regarding sexual harassment.

The University encourages reporting of all perceived incidents of sexual harassment, regardless of who the alleged offender may be. Individuals who either believe they have become the victim of sexual harassment or have witnessed sexual harassment should discuss their concerns with the university’s equity compliance director. Complainants are assured that problems of this nature will be treated in a confidential manner, subject to the University’s legal obligation to respond appropriately to any and all allegations of sexual harassment.

The University prohibits acts of reprisal against anyone involved in lodging a complaint of sexual harassment. Conversely, the university considers filing intentionally false reports of sexual harassment a violation of this policy.

The University will promptly respond to all complaints of sexual harassment. When necessary, the university will institute disciplinary proceedings against the offending individual, which may result in a range of sanctions, up to and including termination of university affiliation.

Complaints of sexual harassment may be brought to Caroline Laguerre-Brown, Vice Provost for Institutional Equity for the university, Allison J. Boyle, Title IX Coordinator and Director for Equity Compliance & Education, Garland Hall 130, Telephone: 410.516.8075, TTY: Dial 711.

**The Johns Hopkins University Sexual Violence Policy**

The Johns Hopkins University is committed to providing a safe educational and working environment for its faculty, staff, and students. The University is particularly concerned about the increase in reports of sexual offenses occurring on the nation’s campuses. The University has adopted this policy addressing sexual violence [1] (includes sexual assault) in order to inform faculty, staff, and students of their rights in the event they are involved in an incident of sexual violence, and of the services available to victims of sexual violence. Members of the University community who are the victims of, or who have knowledge of, an incident of sexual violence occurring on University property, or occurring in the course of a University sponsored activity (including academic, educational, extracurricular, athletic or other programs), or perpetrated by or against a member of the University community, are urged to promptly report the incident to campus authorities identified in this policy.

This policy applies to all members of the University community, including, but not limited to students, faculty and staff, and also applies in certain instances, to certain third parties (e.g., visitors, volunteers, vendors, and contractors while on University property, participating in a University sponsored activity, or providing services to the University, applicants for admission to or employment with the University, and former employees of the University).

All academic and administrative units of the University (including all schools, divisions, departments and centers) must comply with, and ensure that their policies and procedures comply with, this policy.

“Sexual violence” encompasses sexual assault (see examples below) and is a form of sexual harassment.

Sexual harassment, which is a form of discrimination, violates federal and state law and University policy (see the University’s Policy Against Sexual Harassment)

Sexual violence includes physical sexual acts that are performed against a person’s will or where a person cannot give consent.

A person may be unable to give consent to a sexual act for a number of reasons, including, but not limited to: if he or she is physically or psychologically pressured, forced, threatened, intimidated, unconscious, drunk, or drugged; due an intellectual or other disability or health condition; or by operation of laws governing the age of consent. Physical resistance need not occur to fulfill the definition of sexual violence. Examples of sexual violence include, but are not limited to:

- Sexual intercourse or other sexual acts that one party says “no” to;
- Rape (including “date rape”) or attempted rape;
- Someone forcing you to perform oral sex or forcing you to receive oral sex; or
- Sexual assault, sexual battery, or sexual coercion.

Persons who are the victims of sexual violence may pursue internal University disciplinary action against the perpetrator in accordance with the University’s Procedures on Discrimination, Harassment, Sexual Harassment and Sexual Violence Complaints The University’s disciplinary process may be initiated by bringing a complaint of sexual violence to the attention of a Dean, department chairman or director, supervisor, divisional personnel office, security officer, administrative officer, or the University’s Title IX Coordinator:

Allison J. Boyle, JD, MPH
The Johns Hopkins University
Office of Institutional Equity
Garland Hall, Suite 130
3400 North Charles Street
Baltimore, MD 21218
Telephone: 410.516.8075
Electronic Mail: aboyle7@jhu.edu
TTY: 410.516.6225
Facsimile: 410.516.5300

A victim of sexual violence should also immediately notify campus security. Campus security contact information for the following campuses is available at:

Homewood Campus Safety and Security (http://www.jhu.edu/security/contact.html)

Shriver Hall
3400 N. Charles Street
Baltimore, MD 21218
Telephone: 410.516.4600 or 410.516.7777

550 N. Broadway
Suite 503
Baltimore, MD 21205
Telephone: 410.614.3473

Peabody (http://www.peabody.jhu.edu/campussecurity)

Schapiro House Basement
Peabody Campus
Baltimore, MD 21202
Telephone: 410.234.4605 or 410.234.4600

For security contacts at other University locations, please call Lt. Mark E. Long, Investigations Section, Homewood Campus Safety and Security, at: 410.516.6629.

Campus security will arrange for transportation to the nearest hospital. Victims in Baltimore City will be taken to Baltimore City’s designated rape treatment center: Mercy Hospital, 301 St. Paul Place (410.332.9000). Mercy Hospital is equipped with the State Police Sexual Assault Evidence Collection Kit. Victims in other cities will be taken to a local hospital designated as a rape treatment center. Persons who are victims of sexual violence will also be advised by campus security of their option to file criminal charges with local police of the jurisdiction where the offense occurred. Campus security and the University’s Title IX Coordinator will provide assistance to a complainant wishing to reach law enforcement authorities. Information on local and state law enforcement units and databases maintained by them is available on the Homewood Campus Safety and Security website (http://www.jhu.edu/security/emergency_preparedness.html).

The University will provide counseling to any member of the Hopkins community who is a victim of a sexual violence, and also will provide information about other victim services. Students can seek the assistance of counseling through their divisional counseling offices, and members of the faculty and staff can seek assistance through the Faculty and Staff Assistance Program (FASAP) (http://www.jhu.edu/hr/fasap).

A student who is a victim of sexual violence may request a transfer to alternative classes or housing if necessary to allay concerns about security. The University will try to accommodate the request if such classes and housing are reasonably available.

The University reserves the right to independently discipline any member of the student body, staff or faculty who has committed an offense of sexual violence or other assault whether or not the victim is a member of the University community and whether or not criminal charges are pending. Disciplinary actions against students accused of sexual violence will be processed by the appropriate student affairs office of the School or campus attended by the accused student in accordance with the University’s Procedures on Discrimination, Harassment, Sexual Harassment and Sexual Violence Complaints and established disciplinary procedures pertaining to the School in which the student is enrolled. Disciplinary actions against staff members will be governed by the University Procedures and procedures set out in the University’s personnel policies. Disciplinary actions against members of the faculty will be processed by the offices of Dean of the appropriate academic division according to the University Procedures and procedures established by that division.

Both a complainant and the person accused of a sexual violence will be afforded the same opportunity to have others present during a University disciplinary proceeding. Attorneys, however, will not be permitted to personally participate in University disciplinary proceedings. In cases alleging a sex offense, both the complainant and the accused will be informed of the disciplinary board or panel’s final determination with respect to the alleged sex offense and any sanctions imposed against the accused [2]. The University will, upon written request, disclose to the alleged victim of any crime of violence [3] or a non-forcible sex offense [4], the report on the results of any disciplinary proceeding conducted by the University against a complainant who is the alleged perpetrator of such crime or offense with respect to such crime or offense.

The disciplinary measures which may be imposed for a sexual violence offense will vary according to the severity of the conduct, and may include expulsion of a student from the University and termination of the employment of a member of the staff or faculty.

[1] The term “sexual violence” as used in this policy includes “sex offenses.” A forcible sex offense is any “sexual act directed against another person, forcibly and/or against that person’s will; or not forcibly or against the person’s will where the victim is incapable of giving consent and includes forcible rape, forcible sodomy, sexual assault with an object, and forcible fondling. A non-forcible sex offense means “unlawful, nonforcible sexual intercourse” and includes incest and statutory rape. 34 CFR Part 668, Subpart D, Appendix A.[4] See footnote 1 for the definition of a non-forcible sex offense.

Open Space Policy

This policy governs any open space on campus, and applies to all Johns Hopkins University students, alumni, employees, and visitors.

Alcoholic beverages are prohibited in open spaces at all times, except by written permission of the Office of the Dean of Student Life.

Glass bottles of any kind are prohibited in open spaces after dark.

All trash must be disposed of in trash cans or removed from open space.

Parking along Goodnow Drive is prohibited at all times except as designated by officially-posted signs. The operation of any non-University vehicle in open space is strictly prohibited.

Disorderly conduct, disruptive or mischievous behavior, vandalism, fights, assaults, or any other violation of University policy, the Student Conduct Code, state law or city ordinance is prohibited in open spaces.

All persons on open spaces, including Johns Hopkins University students and guests, must comply promptly and completely with the requests of university staff acting in accordance with their duties, including, but not limited to, requests for identification, for noise or activity abatement,
dispersal, and for the surrender of beverages for examination and/or confiscation.

While voluntary compliance with open space policy is expected, where violations are found, enforcement staff may, at their discretion, issue a warning, or, without warning require any person or group of people to leave open space for a policy violation and/or for exigent circumstances.

Enforcement staff, at their discretion, may confiscate alcoholic beverages from persons in open spaces.

Violators of state law or city ordinances may be subject to arrest by Campus Security Officers or Baltimore City Police.

Students are responsible for informing their guests of all University policies in and out of buildings, and are accountable for the actions of their guests.

Students who are found in violation of the alcoholic beverage restriction in this policy may be subject to disciplinary action, including up to a $50 fine for a first violation, and may face additional sanctions based upon the nature and circumstances of the misconduct incident. Additional violations of the policy will bring more severe sanctions. In addition to fines, sanctions for misconduct may range from a warning through expulsion.

Students who violate other sections of this policy, or who fail to comply with Campus Security Officers and other staff acting to enforce this policy, may face disciplinary action. Open Space Policy Enforcement Procedures

Undergraduate students suspected of violating an open space policy may be referred to the Office of the Dean of Student Life and may face disciplinary action. Graduate students may be referred to their academic Dean. The Hopkins Security Department is working in conjunction with the division of Homewood Student Affairs to ensure enforcement of this policy. Campus Security Officers will patrol open spaces regularly to promote adherence to the open space policy. The following guidelines will be used:

- Alcoholic beverages may be confiscated.
- Beer kegs will be confiscated.
- Glass bottles may be confiscated or their proper disposal directed.
- Individuals who possess alcoholic beverages may be asked for personal identification. Individuals found violating policy or individuals who fail to comply with request of enforcement staff acting in performance of their duties, may be asked for personal identification and/or directed to leave the area.

If proof of identity is not provided:

- the individual may be escorted from University property as a trespasser
- the individual may be detained at the discretion of Campus Security Officers in order to establish his or her identity.

Reports of violations of open space policies will be submitted to the Office of the Dean of Student Life and will include the identity of the person involved. Undergraduate first-time violators may be subject to disciplinary action including, but not limited, a fine of up to $50. Undergraduate violators who have committed a prior offense, or have committed misconduct in open spaces, in addition to an alcohol possession violation, may face additional disciplinary action. Individuals who violate state law or city ordinance on open space may be subject to arrest by Campus Security Officers or Baltimore City police. Trials for arrested persons are conducted in the State Courts of Maryland.

Skateboarding is permitted on paved and bricked paths only. Skateboarding on stairs, benches, railings, and any other than paved or bricked paths is prohibited. Skateboarders are urged to use caution and yield to pedestrians.

**University Policy on Hazing**

The Johns Hopkins University prohibits hazing. Hazing is defined to be:

- Any action or situation which recklessly or intentionally endangers the mental or physical health or safety of a student; or willfully destroys or removes public or private property for the purpose of affiliation, initiation, admission or as a condition of continued membership in any organization recognized as a fraternity, sorority, athletic team or student organization by Johns Hopkins University, on or off University, fraternity, or sorority property.

Examples of conduct that would violate this policy may include but are not limited to:

1. All forms of physical activity not part of an organized, voluntary athletic context or not specifically directed toward constructive work
2. Any activity (including voluntary athletic contests and constructive work) that might reasonably bring harm to the individual
3. Paddling, beating, or otherwise permitting undergraduate or alumni members to hit individuals
4. Depriving individuals of the opportunity for sufficient sleep, decent and edible meals, or access of means of maintaining bodily cleanliness
5. Activities that interfere with an individual’s academic efforts by causing exhaustion, loss of sleep, or loss of reasonable study time
6. Requiring individuals to consume alcohol or drugs
7. Forcing, coercing, or permitting individuals to eat or drink foreign or unusual substances
8. Any requirement which compels an individual to participate in any activity which is illegal, perverse, publicly indecent, contrary to the individual’s moral and/or religious beliefs, or contrary to the Student Code of Conduct and/or policies and regulations of the University.

Groups such as fraternities, athletic teams, and student organizations may be held accountable for misconduct by individuals committed in the context of group membership.

**Student Activities Policies Room Reservation Policy for Levering Hall, Shriver Hall and the Mattin Center Meeting Rooms 160, 161 and 162**

At the conclusion of each semester, recognized student groups may reserve space for the subsequent semester during scheduling week. All groups are limited to reserving one ninety-minute weekly meeting and two special events. Two weeks after scheduling week, groups may reserve additional spaces with the approval of the Scheduling Coordinator. Each student organization will designate not more than two people per academic year who will take responsibility for reserving rooms with the Scheduling Coordinator. Please contact Pat Forster, Scheduling Coordinator, at 410-516-8018 or e-mail her at pataf@jhu.edu, with your scheduling representative’s name, telephone numbers and e-mail address.

Any group failing to use a confirmed room for 2 consecutive meetings without formally canceling the room with the Scheduling Coordinator.
may have their remaining reservations canceled for that semester. In addition, if your group has been suspended and appears on the FROZEN ACCOUNT list, please resolve those issues before coming to reserve rooms. If your group does not appear on the list of Recognized Student Groups, please see the Student Activities Office staff so that your status can be verified.

**Poster Locations (Subject to Change)**
- Levering Hall: Outside Levering Market (Garland and Arellano sides), lower Levering hallway, and Union Desk
- MSE Library: M-Level by pay phones, on B, C, and D levels near elevators
- Remsen: First and third floors
- Residences: A & B, each AMR house, Wolman, McCoy: one board per floor, AMR and Wolman mailrooms, McCoy lobby, and the top steps next to the Snack Bar
- Maryland Hall: First floor
- Shaffer: Next to rooms 3 and 100
- Outside: Outside Levering, and between MSE and the Remsen - Charles Street Gate.

**Poster Policy**
Postering is one of many ways to publicize your group’s events. There are a number of community bulletin boards in the Mattin Center Courtyard and Levering Hall. Academic and other departments may maintain their own bulletin boards. When you poster, be sure you know on whose board you are placing the flyer, and follow that group’s rules. These rules and regulations govern posters and other forms of advertising on campus in a fair manner. In addition, posters and other forms of advertising should not disrupt academic classes, programs, or activities and should not damage the property of JHU. Failure to comply with the following guidelines may result in removal of poster, fines, and/or disciplinary measures.

1. Posters and flyers may be placed on campus bulletin boards only.
2. Bulletin board flyers should be 8.5” x 11” and not fixed over another flyer. Requests for exceptions for larger flyers or posters must be forwarded to the Office of Student Activities in the Mattin Center.
3. Flyers advertising expired events or not meeting this policy’s criteria, may be removed.
4. Chalk is allowed to promote events on sidewalks only. Any group that uses chalk anywhere other than the sidewalks will receive a bill from Plant Operations charging the group for the clean up. This is not negotiable. Chalking should only be done in areas that can be rain-soaked. Check with the Office of Student Activities for allowable locations.
5. Banners may be hung on approved campus structures. Contact the Office of Student Activities in the Mattin Center for scheduling, approval, and necessary arrangements for hanging banners on campus.
6. Painted mural boards are coordinated by the Center for Social Concern located in Levering Hall.

Note: The University considers placing posters on glass to be a fire hazard and custodians are instructed to remove any potentially hazardous posters. These restrictions exist in order to improve the appearance of the Hopkins campus and to maximize the usefulness of the bulletin boards.

Check with Residential Life Office before posting in any residential area, designated boards excepted, and check with department offices before posting on their boards. Flyers posted in residence halls must include all necessary information; no teasers.

**University Policy on Automobiles and Parking**
Undergraduate resident students are strongly discouraged from bringing cars to campus. The City will not grant residential parking permits to students residing in University housing and students who are residing in University housing are not eligible for University parking permits. Without campus or residential parking access, resident students with cars face ticketing and towing.

Violators are subject to the applicable University and City penalties, which include substantial fines, “Denver boots”, and towing fees, which typically
amount to several hundred dollars. Students who live more than one mile from campus can purchase a parking access card to park on campus while using University facilities. Owners of two-wheeled motor vehicles must also pay for parking.

The parking rules are in effect Monday through Thursday from 7 a.m. to 8:30 p.m., Friday 7 a.m. to 7 p.m., and on Saturday and Sunday the campus is open. Those who are eligible for paid parking must bring with them the following to show proof of eligibility:

- A valid J-CARD
- Vehicle registration in your name, your parent’s name or your spouse’s name
- Proof of local address
- Paid registration form (permit to register receipt)

### University Policy on Pets

No pets of any kind are permitted in university housing. The University also has the following policy on dogs:

1. While on university property, dogs must be leashed, licensed, and under the control of their owners or handlers at all times.
2. Dogs are not allowed in the common areas of any University building, including classrooms, except when being taken to and from non-public areas. (Guide dogs for the visually impaired are permitted in common areas.)
3. Dogs may not be tied up and left unattended on any campus grounds.
4. Owners or handlers are responsible for the removal of excrement deposited by their animals on University property.

If any infraction of these rules is observed, Campus Security should be notified (410-516-4600), and they will attempt to resolve the problem with the owner. If unsuccessful, or unable to locate the owner, the Municipal Animal Shelter will be notified to impound the dog in accordance with applicable animal control laws. Owners will be responsible for all impoundment fees.

The University strongly encourages students not to bring their pets to school unless they have cleared it with both their landlord and their roommates and are sure they have the means to care for their pets properly. Pets are often abandoned because there is no one to care for them over vacations, or the landlord threatens to evict the owner. If you do own a pet and cannot keep it, contact Animal Rescue (410) 636-1360, the Humane Society (410) 833-8848, or Baltimore SPCA (410) 235-8826 which will do its best to find the animal a new place to live.

### Information Technology Policies

The Student Technology Policies listed below represent a consolidated version of IT Policies at Johns Hopkins. For the comprehensive policy go to http://it.jhu.edu/policies/itpolicies.html.

### Student Technology Policies

The Johns Hopkins University is committed to providing a robust information technology environment to support its students and faculty in the pursuit of their research and instructional objectives. In general, undergraduate and graduate students are afforded the same access to computing and networking resources as are faculty and staff.

Understanding that for the University to maintain an environment of open access to networked computing resources is important, those who use these facilities must comply with the written policies coercing their use as well as the "spirit and intent" of these policies. Appropriate use of the resources includes instruction, independent study, authorizes research, and the official work of the offices, departments, recognized student organizations, and the agencies of the University. Any activity that intentionally obstructs or hinders the authorized use of campus computing and network resources is prohibited.

Examples of inappropriate activities include (but are not limited to):

1. **Interfering with system security or integrity by**
   - Breaking into a system and/or accessing data files and programs without authorization
   - Releasing a virus or other program that disables system performance or hinders other clients
   - Exploiting security gaps
   - Hindering supervisory or accounting functions of the systems
   - Tapping phone or network lines.

2. **Obstructing users from authorized services by**
   - Monopolizing computing resources or computer access
   - Obtaining, possessing, using, or attempting to use someone else’s account or password without notification or permission
   - Accessing, or attempting to access, another user’s data or information without proper authorization

3. **Harassment**
   - Sending unsolicited e-mail, junk mail, or propagating chain letters
   - E-Mail “bombing,” spamming, * etc.
   - Ethnic, racial, and sexual harassment

4. **Forging Electronic Information**
   - Creating, altering, or deleting the attribution of origin (e.g., “from” in e-mail, IP address in headers)
   - Sending messages under someone else’s address (e.g., hoax messages, even if intended as a joke).

### Using University computers and networking resources for personal or private commercial purposes or financial gain

The dramatic increase in the use of computers and shared networks during the past few years has correspondingly increased the potential for abuse of the system. As a matter of policy and sound security practices, the University routinely logs the use of its shared computing systems and monitors the traffic and performance of the campus network. So that the entire campus community can benefit from the shared systems as they are intended to be used, all users are expected to follow them as well. If you know someone who is willfully performing any of the inappropriate activities listed above and need assistance dealing with them, send an e-mail to abuse@jhu.edu.

Student Privacy on JHU computer systems and networks means that each account, and the contents of files associated with that account, belong to the designated user(s); they must not be used or intruded upon by anyone else without the explicit permission of the designated owner; however, pursuant to the Electronic Communications Privacy Act of 1989, Title 18, United States Code, Sections 2510 and following, notice is hereby given that there are no facilities provided by the University that guarantee the confidentiality of files. The University reserves and intends
to exercise the right to review, audit, intercept, access and disclose messages created, received or sent over its computer and/or email systems for any purpose.

A user of the University’s computer systems has no right of privacy in email messages or other communications that are created, sent, received or stored on these systems. Users of the University’s computer systems and networks are advised that they should not assume the confidentiality of any message. Further, a personal password does not guarantee the confidentiality of email messages. Even when a message is deleted or erased, it is still possible to retrieve and read the message. However, it is not the routine policy of the university administrator’s or designees to view others’ files, and the intention is to keep files private, even though such privacy cannot be guaranteed.

Computer access for students is for educational purposes only. In general, educational use is interpreted loosely; however, abuse for economic gain or uses of a computer or network that adversely affects others will not be tolerated. If a concern emerges or there is a complaint regarding the usage of networks or university computers, the University or designated administrator has the right to review the contents of your computer memory and storage, trace information, backups, file server accounts and any multi-user computer account contents, to determine your involvement. Use of files or other software that is solely for the purpose of harassing other persons is considered just cause for administrative action. Possession of software solely intended to compromise system security or performance is also prohibited and will not be tolerated.

**Descriptions of Sample Violations (Not Exclusive) E-Mail**

You must not overload the communications servers; do not abuse your communication privileges. E-mail is a fast, convenient form of communication. That makes it easy to send mail to multiple recipients and puts a strain on shared systems. Note: If abuse is suspected, some e-mail is saved and is subject to examination by proper authorities as evidence.

**Do not help propagate chain e-mail letters**

Forwarding chain e-mail is a violation of University Computer policy. Chain e-mail can usually be identified by phrases in the subject line, such as "Forward- do not delete," "don't break the chain," etc. Some chain e-mails promise good luck, tell stories and ask for help, or warn of false e-mail viruses. If there are a large number of addresses in the message, chances are very good that it is a chain e-mail. Do not be fooled. Delete all chain e-mail from your account. Contact abuse@jhu.edu with any questions.

**Do not "bomb" e-mail accounts**

Sending numerous or large e-mail messages to one person is considered "e-mail bombing." This may or may not be done in an attempt to disrupt the recipient’s network services. Sometimes e-mail "bombs" are used as a method of retaliation. Even if no harm was intended or it was simply a "harmless prank," a single e-mail "bomb" can cause service disruptions to thousands of users.

**Forgery**

You must not alter any form of electronic communication (especially via forged electronic mail and news postings). Messages, sentiments, and declarations sent as electronic mail or sent as electronic postings should meet the same standards for distribution or display as if they were tangible documents or instruments. Forgery includes using another person’s identity.

Forgeries intended as pranks or jokes are still violations. Attempts to alter the attribution of origin (e.g., the “from” or “addressee” lines) in electronic mail, messages, or postings, will be considered transgression of University rules. You are free to publish your opinions, but they should be clearly and accurately identified as from you, or, if you are acting as the authorized agent of a group recognized by the University, as coming from the group authorized to represent.

**Commercial Use of University Resources**

The use of University resources, such as, but not limited to, e-mail or any shared computing system in order to advertise or solicit sales is strictly prohibited. Any commercial use of the University's systems (through a network connection or stored on an e-mail account) resulting in a financial gain to yourself or someone else is a violation of this policy.

**Copyright Violations**

Copyright exists in any original work that exists or is fixed in any tangible medium of expression. Images displayable on computer screens, computer software, music, books, magazines, scientific and other journals, photographs, and articles are some of the things subject to copyright. A copyright notice is not required. Subject to exceptions, it is a violation of copyright law to copy, distribute, display, exhibit or perform copyrighted works without authority of the owner of the copyright (for information about copyright law and various exceptions, see http://www.library.jhu.edu/researchhelp/general/copyright/index.html#howusecopyrightteach).

Transmission electronically includes both copying and distributing. Such things as downloading music or displaying photographs without authority of the copyright owner may be a violation. Civil penalties can be substantial. Under the Digital Millennium Copyright Act (DMCA), Johns Hopkins is permitted to immediately take down any infringing site on the Johns Hopkins network and block access to any infringing sites on other networks, upon proper notice from the copyright owner or upon actual knowledge of infringement.

Learn more about DMCA at http://www.copyright.gov/ondlinesp/.

Learn more about copyright law in general at http://www.copyright.gov/.

**Harassment**

Any repeated or unwanted communication may constitute harassment. Any communication with the direct intention of harassing, threatening, implying or otherwise causing harm to individuals, classes of individuals is a violation of University policy. If you should receive any harassing messages electronically, you may consider notifying the sender. Many times the sender may not realize that their communication is unwanted or offensive unless you tell them. However, if the sender continues after being notified, you do not wish to contact the sender, or if the situation is serious, you should contact abuse@jhu.edu. If the situation requires immediate attention, call University Security at 6-4600. Be sure to save copies of all harassing material.

**Interfering with a User’s Authorized Services**

Any activity that causes disruptions in service to other users is considered interference. In some cases, using more resources than you are entitled to can also be considered interference (e.g., using excessive storage space on shared systems, flooding chat channels or newsgroups.) More
Sharing Resource Accounts and Passwords

Your network login and password are for your personal use. If you share your login and password with your spouse, family members, friends or roommates, then you are giving them access to services they are not authorized to use. They may embarrass you by sending an email, posting messages, or even chatting with people while posing as you. Do not share your account or password with anyone. If you suspect that someone may have obtained your password, change it immediately. If you suspect that someone has repeatedly accessed your login and password, contact the Helpdesk at 410-516-HELP (4357) immediately or send an email to help@jhu.edu. Conversely, using someone else’s password to access services or data is also a violation of policy, regardless of how the password was obtained. Do not use anyone else’s password, account, or e-mail.

Disruption of System Security or Integrity

Tampering with the operation of any server or network resource is prohibited. Any such activity constitutes a threat to the normal operation of that resource and can potentially affect thousands of users. Any attempt will be regarded as malicious in intent and will be pursued in that perspective.

Tapping Phone or Network Lines

Running a network “sniffer” program to examine or collect data from the network is considered tapping a network and may constitute a violation of State or Federal civil and criminal statutes. The University will pursue any suspected cases of network “tapping” accordingly.

Unauthorized Access

Legitimate use of the University’s computer systems does not extend to what one is capable of doing on that system. In some cases, there may be security loopholes through which people can gain access to a system or to data on that system, a network, or data. This is unauthorized access. If a student accidentally permits access to his or her files through the network, you do not have the right to access those files unless you have been given explicit authorization to access the material. This is similar to accidentally leaving your dorm room unlocked. You wouldn’t expect your neighbor to use that as an excuse for entering your room.

Consequences of Misuse

Infractions of this shared use policy may result in loss of system and network privileges. If the University has a reason to believe a user has violated the shared system policy, it may suspend the user’s account pending the outcome of an inquiry into the matter. 

If, in addition to withdrawing privileges, it is believed the violation warrants additional disciplinary action, the infraction may be referred to the Associate Dean of Student Life. Undergraduate Ethics Board or the Vice Dean responsible for graduate students in the school in which the accused student is enrolled for disciplinary procedures administered by them.

Certain violations may constitute criminal activity, which may be referred to local or federal law enforcement authorities. In particular, Federal statutes 18 USCS 2511 (Electronic Communications Privacy Act), 18 USCS 1030 (Computer Crime Act) and Maryland State statute Article 27, Section 146, deal with the use of information technology and networking. Members of the University community are expected to respect any applicable local, state, or federal laws. Should further action be applicable, as in cases which violate local, state, or federal laws, the appropriate authorities may be notified.

Conclusion

The Johns Hopkins University recognizes that our clients are extremely diverse in their needs and requirements. Providing this large range of services for research and instruction necessarily entails providing a relatively unrestricted and flexible systems’ and networks’ organization. To this end, we depend on and request that our users practice considerate and responsible computing and adhere to common sense standards. When problems arise they will be dealt with to insure the unimpaired operation of our systems and network, but we request that all users are considerate and prudent in their use of resources. The shared systems are an extremely important and ever changing resource for the JHU community. As a member you are responsible for staying informed about the policies and procedures updates.

University Policies

The following university policies are detailed in this section:

- Policy on Alcohol and Drug Abuse and Drug-free Environment (p. )
- Policy on Possession of Firearms on University Premises (p. )
- Policy on the Privacy Rights of Students (FERPA) (p. )
- Annual Security Report (p. )
- Equal Opportunity/Nondiscrimination Statement (p. )
- Anti-Harassment Policy (p. )
- Policy Against Sexual Harassment (p. )
- Sexual Violence Policy (p. )
- Photography and Film Rights Policy (p. )

University Policies for Students

Policy on Alcohol and Drug Abuse and Drug-free Environment

(https://pol-man/appendices/sectionE.cfm)

Johns Hopkins University recognizes that alcoholism and other drug addictions are illnesses that are not easily resolved by personal effort and may require professional assistance and treatment. Faculty, staff, and students with alcohol or other drug problems are encouraged to take advantage of the diagnostic, referral, counseling, and preventive services available throughout the university. Procedures have been developed to assure confidentiality of participation, program files, and medical records generated in the course of these services.

Substance or alcohol abuse does not excuse faculty, staff, or students from neglect of their employment or academic responsibilities. Individuals whose work or academic performance is impaired as the result of the
use or abuse of alcohol or other drugs may be required to participate in an appropriate diagnostic evaluation and treatment plan. Further, use of alcohol or other drugs in situations off campus or removed from university activities that in any way impairs work performance is treated as misconduct on campus. Students are prohibited from engaging in the unlawful possession, use, or distribution of alcohol or other drugs on university property or as a part of university activities.

It is the policy of Johns Hopkins University that the unlawful manufacture, distribution, dispensation, possession, or use of controlled substances is prohibited on the university property or as a part of university activities. Individuals who possess, use, manufacture or illegally distribute drugs or controlled dangerous substances are subject to university disciplinary action, as well as possible referral for criminal prosecution. Such disciplinary action of faculty and staff may, in accordance with the university policy on alcohol abuse and maintenance of a drug-free workplace, range from a minimum of a three-day suspension without pay to termination of university employment. Disciplinary action against a student may include expulsion from school.

As a condition of employment, each faculty and staff member and student employee must agree to abide by the university Drug-Free Workplace Policy, and to notify the divisional human resources director of any criminal conviction related to drug activity in the workplace (which includes any location where one is in the performance of duties) within five days after such conviction. If the individual is supported by a federal grant or contract, the university will notify the supporting government agency within 10 days after the notice is received.

Policy on Possession of Firearms on University Premises

The possession, wearing, carrying, transporting, or use of a firearm or pellet weapon is strictly forbidden on university premises. This prohibition also extends to any person who may have acquired a government-issued permit or license. Violation of this regulation will result in disciplinary action and sanction up to and including expulsion, in the case of students, or termination of employment, in the case of employees. Disciplinary action for violations of this regulation will be the responsibility of the vice president for human resources, as may be appropriate, in accordance with applicable procedures. Any questions regarding this policy, including the granting of exceptions for law enforcement officers and for persons acting under the supervision of authorized university personnel, should be addressed to the appropriate chief campus security officer.

Policy on the Privacy Rights of Students

The Johns Hopkins University complies with the provisions of the Family Educational Rights and Privacy Act of 1974 (P.L. 93-380), as amended, and regulations promulgated thereunder. Eligible students, as defined in the regulations, have the following rights: (1) to inspect and review their education records, as defined in the regulations; (2) to request the amendment of their education records if they are inaccurate or misleading; (3) to consent to the disclosures of personally identifiable information in their education records except to the extent permitted by law, regulation, or university policy; and (4) to file a complaint with the United States Department of Education if the university has failed to comply with the requirements of law or regulation. Copies of the university’s policy on Family Educational Rights and Privacy are available from the Registrar’s Office or may be accessed on the JHU website.

Annual Security Report

In accordance with the Crime Awareness and Campus Security Act of 1990 (P.L. 102-26), as amended, and regulations promulgated thereunder, the university issues an Annual Security Report, which describes the security services at each of the university’s divisions and reports crime statistics for each of the campuses. Copies of the report are available from the university’s Security Department, 14 Shriver Hall, 410-516-4600.

Equal Opportunity/Nondiscrimination Statement

The Johns Hopkins University admits students of any race, color, gender, religion, age, national or ethnic origin, disability, marital status or veteran status to all of the rights, privileges, programs, benefits, and activities generally accorded or made available to students at the University. It does not discriminate on the basis of sex, race, color, gender, marital status, pregnancy, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, veteran status, or other legally protected characteristic in any student program or activity administered by the University, including the administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other University-administered programs or in employment.

Questions regarding Title VI, Title IX, and Section 504 should be referred to the Office of Institutional Equity, Wyman Park Building, Suite 515, Telephone: 410-516-8075, (TTY): 410-516-6225.

Anti-Harassment Policy

A. Preamble

The Johns Hopkins University is committed to providing its staff, faculty and students the opportunity to pursue excellence in their academic and professional endeavors. This opportunity can exist only when each member of our community is assured an atmosphere of mutual respect. The free and open exchange of ideas is fundamental to the University’s purpose. It is not the University’s intent in promulgating this policy to inhibit free speech or the free communication of ideas by members of the academic community.

B. Policy Against Discriminatory Harassment

1. The University is committed to maintaining learning and working environments that are free from all forms of harassment and discrimination. Accordingly, harassment based on sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression*, veteran status, or other legally protected characteristic is prohibited. The University will not tolerate harassment, sexual harassment or retaliation in the workplace or educational environment whether committed by faculty, staff, or students, or by visitors to Hopkins while they are on campus. Each member of the community is responsible for fostering civility, for being familiar with this policy, and for refraining from conduct that violates this policy.
2. For purposes of this policy, harassment is defined as:
   a. any type of behavior which is based on sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, veteran status, that
   b. is so severe or pervasive that it interferes with an individual's work or academic performance or creates an intimidating, hostile or offensive working or academic environment.

3. Harassment when directed at an individual because of sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, personal appearance, veteran status, or any other legally protected characteristic may include, but is not limited to: unwanted physical contact; use of epithets, inappropriate jokes, comments or innuendos; obscene or harassing telephone calls, emails, letters, notes or other forms of communication; and, any conduct that may create a hostile working or academic environment.

4. Sexual harassment, whether between people of different sexes or the same sex, is defined to include, but is not limited to, unwelcome sexual advances, requests for sexual favors, sexual violence and other behavior of a sexual nature when:
   a. submission to such conduct is made implicitly or explicitly a term or condition of an individual's employment or participation in an education program;
   b. submission to or rejection of such conduct by an individual is used as the basis for personnel decisions or for academic evaluation or advancement; or
   c. such conduct has the purpose or effect of unreasonably interfering with an individual's work or academic performance or creates an intimidating, hostile or offensive working or educational environment.

5. Sexual harassment may include, but is not limited to: unwelcome sexual advances; demands/threats for sexual favors or actions; posting, distributing, or displaying sexual pictures or objects; suggestive gestures, sounds or stares; unwelcome physical contact; sending/forwarding inappropriate emails of a sexual or offensive nature; inappropriate jokes, comments or innuendos of a sexual nature; obscene or harassing telephone calls, emails, letters, notes or other forms of communication; and, any conduct of a sexual nature that may create a hostile working or educational environment.

6. Retaliation against an individual who complains of discriminatory harassment under this policy, is strictly prohibited. Intentionally making a false accusation of harassment is also prohibited.

C. Responsibilities Under this Policy
The University is committed to enforcement of this policy. Individuals who are found to have violated this policy will be subject to the full range of sanctions, up to and including termination of his/her University affiliation.

1. All individuals are expected to conduct themselves in a manner consistent with this Policy.
2. Staff, faculty and/or students who believe that they have been subject to discriminatory harassment are encouraged to report, as soon as possible, their concerns to the Office of Institutional Equity, their supervisors, divisional human resources or the Office of the Dean of their School.
3. Individuals who witness what they believe may be discriminatory harassment of another are encouraged to report their concerns as soon as possible to the Office of Institutional Equity, their supervisors, divisional human resources or the Office of the Dean of their School.

4. Complainants are assured that reports of harassment will be treated in a confidential manner, within the bounds of the University's legal obligation to respond appropriately to any and all allegations of harassment.

5. Managers, including faculty managers, who receive reports of harassment should contact human resources or the Office of Institutional Equity for assistance in investigating and resolving the issue.

6. Managers, including faculty managers, are required to implement corrective action where, after completing the investigation, it is determined corrective action is indicated.

7. The University administration is responsible for ensuring the consistent application of this policy.

D. Procedures for Discrimination Complaints Brought Within Hopkins
(The current procedures can be accessed at: web.jhu.edu/administration/jhuoie/sexual_assault.html.)

Inquiries regarding procedures on discrimination complaints may be brought to Caroline Laguerre-Brown, Vice Provost for Institutional Equity for the university; or Allison J. Boyle, Title IX Coordinator and the Director for Equity Compliance & Education, Wyman Park Building, Suite 515, Telephone: 410-516-8075, TTY: Dial 711.

Policy Against Sexual Harassment
(weapps.jhu.edu/jhuniverse/administration/minutes_policies_reports/policies/sexual_harassment_policy/sexual_harassment_policy.pdf)

A. Preamble
The Johns Hopkins University is committed to providing its staff, faculty and students the opportunity to pursue excellence in their academic and professional endeavors. This can only exist when each member of our community is assured an atmosphere of mutual respect, one in which they are judged solely on criteria related to academic or job performance. The university is committed to providing such an environment, free from all forms of harassment and discrimination. Each member of the community is responsible for fostering mutual respect, for being familiar with this policy and for refraining from conduct that violates this policy.

Sexual harassment, whether between people of different sexes or the same sex, is defined to include, but is not limited to, unwelcome sexual advances, requests for sexual favors, sexual violence and other behavior of a sexual nature when:

1. submission to such conduct is made implicitly or explicitly a term or condition of an individual's employment or participation in an educational program;
2. submission to or rejection of such conduct by an individual is used as the basis for personnel decisions or for academic evaluation or advancement; or
3. such conduct has the purpose or effect of unreasonably interfering with an individual's work or academic performance or creates an intimidating, hostile or offensive working or educational environment.

Fundamental to the University’s purpose is the free and open exchange of ideas. It is not, therefore, the University’s purpose, in promulgating
Sexual Violence Policy

(weapps.jhu.edu/jhuniverse/administration/minutes_policies_reports/policies/sexual_violence/)

The Johns Hopkins University is committed to providing a safe educational and working environment for its faculty, staff, and students. The University is particularly concerned about the increase in reports of sexual offenses occurring on the nation’s campuses. The University has adopted this policy addressing sexual violence (includes sexual assault) in order to inform faculty, staff, and students of their rights in the event they are involved in an incident of sexual violence, and of the services available to victims of sexual violence. Members of the University community who are the victims of, or who have knowledge of, an incident of sexual violence occurring on University property, or occurring in the course of a University sponsored activity (including academic, educational, extracurricular, athletic or other programs), or perpetrated by or against a member of the University community, are urged to promptly report the incident to campus authorities identified in this policy.

This policy applies to all members of the University community, including, but not limited to students, faculty and staff, and also applies in certain instances, to certain third parties (e.g., visitors, volunteers, vendors, and contractors while on University property, participating in a University sponsored activity, or providing services to the University, applicants for admission to or employment with the University, and former employees of the University). All academic and administrative units of the University (including all schools, divisions, departments and centers) must comply with, and ensure that their policies and procedures comply with, this policy.

“Sexual violence” encompasses sexual assault (see examples below) and is a form of sexual harassment. Sexual harassment, which is a form of discrimination, violates federal and state law and University policy (see the University’s Policy Against Sexual Harassment).

Sexual violence includes physical sexual acts that are performed against a person’s will or where a person cannot give consent. A person may be unable to give consent to a sexual act for a number of reasons, including, but not limited to: if he or she is physically or psychologically pressured, forced, threatened, intimidated, unconscious, drunk, or drugged; due an intellectual or other disability or health condition; or by operation of laws governing the age of consent. Physical resistance need not occur to fulfill the definition of sexual violence. Examples of sexual violence include, but are not limited to:

- Sexual intercourse or other sexual acts that one party says “no” to;
- Rape (including “date rape”) or attempted rape;
- Someone touching, fondling, kissing, or making any unwanted contact with your body;
- Someone forcing you to perform oral sex or forcing you to receive oral sex;
- Sexual assault, sexual battery, or sexual coercion.

Persons who are the victims of sexual violence may pursue internal University disciplinary action against the perpetrator in accordance with the University’s Procedures on Discrimination, Harassment, Sexual Harassment and Sexual Violence Complaints. The University’s disciplinary process may be initiated by bringing a complaint of sexual violence to the attention of a Dean, department chairman or director, supervisor, divisional personnel office, security officer, administrative officer, or the University’s Title IX Coordinator:

Allison J. Boyle, JD, MPH
The Johns Hopkins University
Office of Institutional Equity
Wyman Park Building, Suite 515
3400 North Charles Street
Baltimore, MD 21218
Telephone: 410-516-8075
TTY: 410.516.6225
Electronic Mail: aboyle7@jhu.edu
TTY: 410.516.6225
Facsimile: 410.516.5300

A victim of sexual violence should also immediately notify campus security. Campus security contact information for the following campuses is available at:

Homewood Campus Safety and Security
301 Remington Avenue
Baltimore, MD 21218
Telephone: 410.516.4600 or 410.516.7777

Johns Hopkins Medicine Corporate Security
550 N. Broadway, Suite 503
Baltimore, MD 21205
Telephone: 410.614.3473

Peabody
Schapiro House Basement
Peabody Campus
The University reserves the right to independently discipline any member of the student body, staff or faculty who has committed an offense of sexual violence or other assault whether or not the victim is a member of the University community and whether or not criminal charges are pending. Disciplinary actions against students accused of sexual violence will be processed by the appropriate student affairs office of the School or campus attended by the accused student in accordance with the University’s Procedures on Discrimination, Harassment, Sexual Harassment and Sexual Violence Complaints and established disciplinary procedures pertaining to the School in which the student is enrolled. Disciplinary actions against staff members will be governed by the University Procedures and procedures set out in the University’s personnel policies. Disciplinary actions against members of the faculty will be processed by the offices of Dean of the appropriate academic division according to the University Procedures and procedures established by that division.

Both a complainant and the person accused of a sexual violence offense will be afforded the same opportunity to have others present during a University disciplinary proceeding. Attorneys, however, will not be permitted to personally participate in University disciplinary proceedings. In cases alleging a sex offense, both the complainant and the accused will be informed of the disciplinary board or panel’s final determination with respect to the alleged sex offense and any sanctions imposed against the accused. The University will, upon written request, disclose to the alleged victim of any crime of violence or a non-forcible sex offense, the report on the results of any disciplinary proceeding conducted by the University against a complainant who is the alleged perpetrator of such crime or offense with respect to such crime or offense.

The University reserves the right to independently discipline any member of the staff or faculty.

The disciplinary measures which may be imposed for a sexual violence offense will vary according to the severity of the conduct, and may include expulsion of a student from the University and termination of the employment of a member of the staff or faculty.
Graduate Students

Johns Hopkins University is proud to offer a rigorous and interdisciplinary graduate education taught by faculty who are academic and research leaders in their fields. Across the nine divisions of the university there are approximately 20,000 full-time and part-time graduate students working in over 180 fields of study. Combined with exceptional university facilities and resources, the endeavors of graduate students have contributed to groundbreaking discoveries, expansive and innovative collaborations, and the advancement of knowledge throughout the university and beyond.

The policies, procedures, resources, and opportunities included in this section are relevant for graduate students enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering on the Homewood campus. Please use the links at the left to navigate to your topic of interest.

Admissions and Finances

Admissions

Graduate Admissions Office

The Graduate Affairs and Admissions Office is available to answer questions about the Krieger and Whiting Schools' full-time graduate program application process and respond to general admissions inquiries and requests for information. Please visit grad.jhu.edu for a complete list of graduate programs offered by the Krieger School of Arts and Sciences and the Whiting School of Engineering and for information regarding the admissions process.

General Admissions Checklist

- Application
- Application Fee ($75)
- Statement of Purpose
- Transcripts
- Letters of Recommendation
- GRE Scores
- TOEFL or IELTS
- Samples of Work (department dependent)
- Financial Assistance
- Supplementary Application Form (department dependent)
- The online application is designed for admission to full-time graduate study in the schools of Arts and Sciences and Engineering only. Students applying to more than one program must submit separate applications. The application is available at grad.jhu.edu.
- All application documents must be provided in English. Translations of original documents will only be accepted as official if the translation is done by an authentic third party institution, such as World Education Services.

Application Policies

Accuracy is expected in all documents provided by applicants to the full-time graduate programs. Applicants for full-time graduate admission must not make inaccurate statements or material omissions on their applications, nor submit any false materials related to or in connection with seeking admission. Violation of this requirement may result in the application being rejected.

Authentication of Documents

Letters of recommendation, transcripts, publications (samples of work), test scores, and supplemental documents may be traced back to their origin in order to establish authenticity.

Documents uploaded into the online application are verified through TurnItin for Admissions. For more information, please visit: turnitin.com/
(http://turnitin.com)

If a violation is discovered after an applicant has been admitted but prior to matriculation, admission may be rescinded. All applicants may also be subject to a background check. If a violation is discovered after a full-time graduate student has registered, the case will be reviewed by the Vice Dean of Graduate Education for the Krieger School of Arts and Sciences or the Vice Dean of Education for the Whiting School of Engineering, who will determine what action is to be taken, up to and including dismissal from the University. If the discovery occurs after a degree has been awarded, the University may revoke the degree and/or take other appropriate action.

Applications and supporting documents for graduate admissions to the Krieger School of Arts and Sciences and the Whiting School of Engineering become the property of the University. The University does not return documents to applicants, nor does it forward documents to third parties. Applicants who anticipate a need for documents submitted to the University are advised to retain photocopies or to obtain duplicate copies from the originator.

Application Fee

A non-refundable fee of $75.00 is required for each application to the Krieger School of Arts and Sciences and the Whiting School of Engineering, with the following exceptions: the departments of Civil Engineering, Chemical and Biomolecular Engineering, Computer Science, Mechanical Engineering, and the Information Security Institute charge a non-refundable $25.00 application fee. Materials Science and Engineering waives the application fee for U.S. citizens and permanent residents. Payment may be made online via Visa, MasterCard, or Discover.

The application fee may be waived for applicants with documented participation in one of the following programs: Institute for the Recruitment of Teachers, Posse Foundation Alumni Network, Graduate Horizons, McNair Scholars Program, GEM, Vietnam Education Foundation, SACNAS, Choctaw/Chickasaw Scholarship Advisement Program, Baltimore Scholars Program, Leadership Alliance, UMBC Meyerhoff Program, LSAMP, and the Mellon Mays Undergraduate Fellowship Program. For further information please complete the Contact Form on the admissions website (grad.jhu.edu). Requests must be made prior to submitting the application.

Statement of Purpose

The statement of purpose articulates and demonstrates an applicant’s specific qualifications for a program of study. Programs are interested in an applicant’s intended course of study, why that applicant wishes to pursue that field, what research or academic experience the candidate will bring to Johns Hopkins University and finally, what that applicant’s end goal might be once their work is completed. This document is to be submitted only through the online application.

Writing Seminars M.F.A. Applicants

An M.F.A applicant’s statement of purpose should consist of a two-page (at most) introduction and critique. This statement should give admissions
faculty a view to the scope and thoughtfulness of the work submitted and a sense of the student’s ability to contribute in the writing workshops.

Transcripts
All applicants are required to upload unofficial transcripts of all previous college and university study to their online ApplyYourself application. Failure to upload unofficial transcripts will result in an inability to complete and submit the online application.

In addition to uploading unofficial transcripts, all applicants are required to submit official transcripts of all college and university study in sealed envelopes, or via third party electronic distributors such as ScripSafe, WES, or Interfolio. Official transcripts must be received by the departmental admissions deadline. Please consult with your institution to see if it participates in sending electronic transcripts. All official transcripts sent electronically should be sent to graduateadmissions@jhu.edu. Mailed transcripts should be sent in their fully sealed, institutional envelopes and using the mandatory mailing label and cover sheet.

Applicants should also send a list of current courses and any other courses that will be taken before beginning graduate study at Johns Hopkins that do not appear on their transcripts.

Students applying to more than one department may request to use the same set(s) of official transcripts for each application. When mailing hard-copy official transcripts, applicants must include the mandatory cover sheet, clearly noting on the cover sheet every department and corresponding ApplyYourself PIN or ID for which they have a current application. If the transcripts are being sent electronically, via third party electronic distributors such as ScripSafe, WES, or Interfolio, please contact us using our online contact form and select the category ‘Application Requirements and Process’ and sub-category ‘Applying to More Than One Program’. Please note that applicants with multiple applications are still required to upload unofficial transcripts to each application separately.

Letters of Recommendation
Applicants should ask faculty members to write letters of recommendation on their behalf. The required method of delivery is for the letter to be submitted through our online application system. Some departments require two letters of recommendation, while others require three letters. Applicants should check grad.jhu.edu/admissions/apply/ for the list of which departments require two and which require three.

Graduate Record Examination (GRE)
Applicants are required to request recent GRE scores from ETS. Results should be sent directly to the Graduate Affairs and Admissions Office by the Educational Testing Service (ETS) and must be received prior to the application deadline.

In order for the scores to be delivered successfully, the applicant must do two things. First, the correct institution code (5332) must be given to ETS when requesting the scores. Second, on the application you must enter the ETS registration number from when you took the test, not when you make the request for the scores to be sent. Entering the wrong registration number on the application it will delay posting your score to your application.

Information about the GRE General and Subject Exams are available at grad.jhu.edu/admissions/apply/ and at the ETS website ets.org/gre (http://ets.org/gre).

English Proficiency (TOEFL and IELTS)
Johns Hopkins University requires graduate students to have adequate English proficiency for their course of study. Graduate students must be able to read, speak, and write English fluently upon their arrival at the University. Successful study demands understanding oral lectures and taking comprehensive notes during lectures. Applicants whose native language is not English must submit proof of their proficiency in English before they can be offered admissions and before a visa certificate can be issued. Johns Hopkins prefers an International English Language Test System (IELTS) Academic Band Score equal to 7, or a minimum score of 600 (paper-based), 250 (computer-based), and 100 (internet-based) on the Test of English as a Foreign Language (TOEFL).

Results should be sent directly to the Graduate Affairs and Admissions Office by either the IELTS Global Recognition System or the Educational Testing Service (ETS) which administers TOEFL. Scores sent by applicants are not accepted. Further information about the TOEFL and the IELTS can be found at grad.jhu.edu/admissions/apply.

Samples of Work
Some departments require each applicant to submit a sample of work, such as a paper, thesis or publication. Applicants should consult the department before submitting any documentation. Further details about departmental guidelines can be found at grad.jhu.edu/admissions/apply.

Financial Assistance
Applicants in need of financial assistance should indicate their need on the application. Federal loans and work study are available on the basis of financial need to U.S. citizens and permanent residents. Interested students should go to the Student Financial Services website at jhu.edu/finaid for further information.

Mailing Instructions
Applicants are required to use the Mailing Label and Cover Sheet when submitting application materials. Using these documents as directed ensures the accurate and timely processing of admissions documents. For detailed mailing instructions, applicants should visit: grad.jhu.edu/admissions/mailing.

Frequently Asked Questions
Graduate applicants may consider reading the Frequently Asked Questions page on the graduate admissions website (grad.jhu.edu/faqs/), or completing the online Information Request Form (grad.jhu.edu) before applying to our graduate programs. The FAQs page is a helpful, self-service way of learning more about the application process, life in Baltimore and making the transition to graduate life on the Homewood campus.

Visiting and Volunteer Graduate Student Information
The schools of Arts and Sciences and Engineering recognize and appreciate the contributions of volunteers and visiting graduate students to its mission of education and research and has policies in place to enable both schools to retain and set forth requirements pertaining to volunteers and visiting graduate students. Interested applicants should visit: http://grad.jhu.edu/visitingstudent for more information.
Costs of Attendance and Financial Aid

Costs of Attendance
See http://Grad.jhu.edu/admissions/cost-financial-aid/.

Financial Aid and Student Loans
All financial aid is distributed by individual departments. Graduate students should contact their departments for information concerning aid disbursement or the availability of funds. Students are required to fill out a new FAFSA form every year if they wish to continue receiving financial aid. For more information on student loans and work-study opportunities, go to the Student Financial Services website (http://www.jhu.edu/finaid/grads.html) or visit their office in Garland Hall.

Fellowships

Fellowships
Johns Hopkins is a community committed to sharing values of diversity and inclusion in order to achieve and sustain excellence. We firmly believe that we can best promote excellence by recruiting and retaining a diverse group of students, faculty and staff and by creating a climate of respect that is supportive of their success. This climate for diversity, inclusion and excellence is critical to attaining the best research, scholarship, teaching, health care and other strategic goals of the Health System and the University. Taken together these values are recognized and supported fully by the Johns Hopkins Institutions leadership at all levels. Further, we recognize that the responsibility for excellence, diversity and inclusion lies with all of us at the Institutions: leadership, administration, faculty, staff and students.

See http://grad.jhu.edu/admissions/diversity/fellowships/.

WSE-Specific Graduate Fellowship Information
The Whiting School of Engineering offers a number of endowed fellowships that provide supplemental financial aid to incoming and current full-time engineering students. Full-time degree seeking graduate students are automatically considered for the fellowships. Visit this link for more information.

KSAS-Specific Graduate Fellowship Information
The Krieger School of Arts and Sciences offers an incredible array of opportunities for student researchers in the areas of natural science, social science, and humanities. Visit this link for more information.

Veterans Educational Benefits
Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans and the widows and children of deceased veterans under the provisions of the various federal laws pertaining to veterans' educational benefits. Information about veterans' benefits and enrollment procedures may be obtained at web.jhu.edu/registrar/veterans.html or the Office of the Registrar, 75 Garland Hall, 410-516-7071.

Students eligible for veterans' benefits register and pay their university bills in the same manner as nonveteran students. The Department of Veteran Affairs determines the educational benefit a veteran is eligible to receive. Veterans educational benefits payments cover only a portion of assigned course fees. To receive veterans educational benefits the student must comply with the following procedures:

Initial Enrollment
Once admitted to the university, the student must complete an Application for Program of education or Training (VA Form 22-1990) from the Department of Veteran Affairs at www.gibill.va.gov. A copy of the completed application, along with a certified copy of the DD-214, is sent to the Veterans Desk, Office of the Registrar, 75 Garland Hall, The Johns Hopkins University, Baltimore, Maryland 21218.

The student who is transferring from another university or college will need to obtain a Request for Change of Place of Training (VA Form 22-1995) from the Department of Veteran Affairs at www.gibill.va.gov. The completed form should be sent to the Veterans Desk at the university.

Re-enrollment
Students who received veterans’ benefits at the university the preceding semester and plan to enroll with no change of objective should inform the Registrar’s Office at the time of registration that they want to be recertified under the provisions of their original VA Form 22-1990.

Students receiving veterans’ benefits must take courses that lead toward the exact objective (usually a specific degree) on the original VA application. Otherwise, they must submit a Request for Change of Program (VA Form 22-1995). Students utilizing veterans’ benefits must let the registrar know immediately of any change in their program or status that might affect the amount of their VA payment. If they fail to do so, the Department of Veterans Affairs will seek reimbursement from the student for any overpayment.

Standards of Progress
Continuation of VA payments depends on the student’s meeting the university’s academic standards for all students. The student must also meet any standards of progress which may be established by VA regulations.

University Policies
The following university policies are detailed in this section:

- Policy on Alcohol and Drug Abuse and Drug-free Environment (p. )
- Policy on Possession of Firearms on University Premises (p. )
- Policy on the Privacy Rights of Students (FERPA) (p. )
- Annual Security Report (p. )
- Equal Opportunity/Nondiscrimination Statement (p. )
- Anti-Harassment Policy (p. )
- Policy Against Sexual Harassment (p. )
- Sexual Violence Policy (p. )
- Photography and Film Rights Policy (p. )
University Policies for Students
Policy on Alcohol and Drug Abuse and Drug-free Environment
(hmt.jhu.edu/pol-man/appendices/sectionE.cfm)

Johns Hopkins University recognizes that alcoholism and other drug addictions are illnesses that are not easily resolved by personal effort and may require professional assistance and treatment. Faculty, staff, and students with alcohol or other drug problems are encouraged to take advantage of the diagnostic, referral, counseling, and preventive services available throughout the university. Procedures have been developed to assure confidentiality of participation, program files, and medical records generated in the course of these services.

Substance or alcohol abuse does not excuse faculty, staff, or students from neglect of their employment or academic responsibilities. Individuals whose work or academic performance is impaired as the result of the use or abuse of alcohol or other drugs may be required to participate in an appropriate diagnostic evaluation and treatment plan. Further, use of alcohol or other drugs in situations off campus or removed from university activities that in any way impairs work performance is treated as misconduct on campus. Students are prohibited from engaging in the unlawful possession, use, or distribution of alcohol or other drugs on university property or as a part of university activities.

It is the policy of Johns Hopkins University that the unlawful manufacture, distribution, dispensation, possession, or use of controlled substances is prohibited on the university property or as a part of university activities. Individuals who possess, use, manufacture or illegally distribute drugs or controlled dangerous substances are subject to university disciplinary action, as well as possible referral for criminal prosecution. Such disciplinary action of faculty and staff may, in accordance with the university policy on alcohol abuse and maintenance of a drug-free workplace, range from a minimum of a three-day suspension without pay to termination of university employment. Disciplinary action against a student may include expulsion from school.

As a condition of employment, each faculty and staff member and student employee must agree to abide by the university Drug-Free Workplace Policy, and to notify the divisional human resources director of any criminal conviction related to drug activity in the workplace (which includes any location where one is in the performance of duties) within five days after such conviction. If the individual is supported by a federal grant or contract, the university will notify the supporting government agency within 10 days after the notice is received.

Policy on Possession of Firearms on University Premises
(hmt.jhu.edu/pol-man/appendices/sectionF.cfm)

The possession, wearing, carrying, transporting, or use of a firearm or pellet weapon is strictly forbidden on university premises. This prohibition also extends to any person who may have acquired a government-issued permit or license. Violation of this regulation will result in disciplinary action and sanction up to and including expulsion, in the case of students, or termination of employment, in the case of employees. Disciplinary action for violations of this regulation will be the responsibility of the vice president for human resources, as may be appropriate, in accordance with applicable procedures. Any questions regarding this policy, including the granting of exceptions for law enforcement officers and for persons acting under the supervision of authorized university personnel, should be addressed to the appropriate chief campus security officer.

Policy on the Privacy Rights of Students
(Full policy: jhu.edu/news_info/policy/ferpa.html)

The Johns Hopkins University complies with the provisions of the Family Educational Rights and Privacy Act of 1974 (P.L. 93-380), as amended, and regulations promulgated thereunder. Eligible students, as defined in the regulations, have the following rights: (1) to inspect and review their education records, as defined in the regulations; (2) to request the amendment of their education records if they are inaccurate or misleading; (3) to consent to the disclosures of personally identifiable information in their education records except to the extent permitted by law, regulation, or university policy; and (4) to file a complaint with the United States Department of Education if the university has failed to comply with the requirements of law or regulation. Copies of the university’s policy on Family Educational Rights and Privacy are available from the Registrar’s Office or may be accessed on the JHU website.

Annual Security Report

In accordance with the Crime Awareness and Campus Security Act of 1990 (P.L. 102-25), as amended, and regulations promulgated thereunder, the university issues an Annual Security Report, which describes the security services at each of the university’s divisions and reports crime statistics for each of the campuses. Copies of the report are available from the university’s Security Department, 14 Shriver Hall, 410-516-4600.

Equal Opportunity/Nondiscrimination Statement

(webapps.jhu.edu/jhuniverse/administration/minutes_policies_reports/policies/equal_opportunity_statements/)

The Johns Hopkins University admits students of any race, color, gender, religion, age, national or ethnic origin, disability, marital status or veteran status to all of the rights, privileges, programs, benefits, and activities generally accorded or made available to students at the University. It does not discriminate on the basis of sex, race, color, gender, marital status, pregnancy, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, veteran status, or other legally protected characteristic in any student program or activity administered by the University, including the administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other University-administered programs or in employment.

Questions regarding Title VI, Title IX, and Section 504 should be referred to the Office of Institutional Equity, Wyman Park Building, Suite 515, Telephone: 410-516-8075, (TTY): 410-516-6225.

Anti-Harassment Policy

(webapps.jhu.edu/jhuniverse/administration/minutes_policies_reports/policies/anti-harassment/anti-harassment_policy.pdf)

A. Preamble

The Johns Hopkins University is committed to providing its staff, faculty and students the opportunity to pursue excellence in their academic and professional endeavors. This opportunity can exist only when each member of our community is assured an atmosphere of mutual respect. The free and open exchange of ideas is fundamental to the University’s purpose. It is not the University’s intent in promulgating this policy to
inhibit free speech or the free communication of ideas by members of the academic community.

B. Policy Against Discriminatory Harassment

1. The University is committed to maintaining learning and working environments that are free from all forms of harassment and discrimination. Accordingly, harassment based on sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression*, veteran status, or other legally protected characteristic is prohibited. The University will not tolerate harassment, sexual harassment or retaliation in the workplace or educational environment whether committed by faculty, staff, or students, or by visitors to Hopkins while they are on campus. Each member of the community is responsible for fostering civility, for being familiar with this policy, and for refraining from conduct that violates this policy.

2. For purposes of this policy, harassment is defined as:
   a. any type of behavior which is based on sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, veteran status, that
   b. is so severe or pervasive that it interferes with an individual's work or academic performance or creates an intimidating, hostile or offensive working or academic environment.

3. Harassment when directed at an individual because of sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, personal appearance, veteran status, or any other legally protected characteristic may include, but is not limited to: unwanted physical contact; use of epithets, inappropriate jokes, comments or innuendos; obscene or harassing telephone calls, emails, letters, notes or other forms of communication; and, any conduct that may create a hostile working or academic environment.

4. Sexual harassment, whether between people of different sexes or the same sex, is defined to include, but is not limited to, unwelcome sexual advances, requests for sexual favors, sexual violence and other behavior of a sexual nature when:
   a. submission to such conduct is made implicitly or explicitly a term or condition of an individual's employment or participation in an education program;
   b. submission to or rejection of such conduct by an individual is used as the basis for personnel decisions or for academic evaluation or advancement; or
   c. such conduct has the purpose or effect of unreasonably interfering with an individual's work or academic performance or creates an intimidating, hostile or offensive working or educational environment.

5. Sexual harassment may include, but is not limited to: unwelcome sexual advances; demands/threats for sexual favors or actions; posting, distributing, or displaying sexual pictures or objects; suggestive gestures, sounds or stares; unwelcome physical contact; sending/forwarding inappropriate emails of a sexual or offensive nature; inappropriate jokes, comments or innuendos of a sexual nature; obscene or harassing telephone calls, emails, letters, notes or other forms of communication; and any conduct of a sexual nature that may create a hostile working or educational environment.

6. Retaliation against an individual who complains of discriminatory harassment under this policy, is strictly prohibited. Intentionally making a false accusation of harassment is also prohibited.

C. Responsibilities Under this Policy

The University is committed to enforcement of this policy. Individuals who are found to have violated this policy will be subject to the full range of sanctions, up to and including termination of his/her University affiliation.

1. All individuals are expected to conduct themselves in a manner consistent with this Policy.

2. Staff, faculty and/or students who believe that they have been subject to discriminatory harassment are encouraged to report, as soon as possible, their concerns to the Office of Institutional Equity, their supervisors, divisional human resources or the Office of the Dean of their School.

3. Individuals who witness what they believe may be discriminatory harassment of another are encouraged to report their concerns as soon as possible to the Office of Institutional Equity, their supervisors, divisional human resources or the Office of the Dean of their School.

4. Complainants are assured that reports of harassment will be treated in a confidential manner, within the bounds of the University's legal obligation to respond appropriately to any and all allegations of harassment.

5. Managers, including faculty managers, who receive reports of harassment should contact human resources or the Office of Institutional Equity for assistance in investigating and resolving the issue.

6. Managers, including faculty managers, are required to implement corrective action where, after completing the investigation, it is determined corrective action is indicated.

7. The University administration is responsible for ensuring the consistent application of this policy.

D. Procedures for Discrimination Complaints Brought Within Hopkins

(The current procedures can be accessed at: web.jhu.edu/administration/jhuoie/sexual_assault.html.)

Inquiries regarding procedures on discrimination complaints may be brought to Caroline Laguerre-Brown, Vice Provost for Institutional Equity for the university; or Allison J. Boyle, Title IX Coordinator and the Director for Equity Compliance & Education, Wyman Park Building, Suite 515, Telephone: 410-516-8075, TTY: Dial 711.

Policy Against Sexual Harassment

(webapps.jhu.edu/jhuniverse/administration/minutes_policies_reports/policies/sexual_harassment_policy/sexual_harassment_policy.pdf)

A. Preamble

The Johns Hopkins University is committed to providing its staff, faculty and students the opportunity to pursue excellence in their academic and professional endeavors. This can only exist when each member of our community is assured an atmosphere of mutual respect, one in which they are judged solely on criteria related to academic or job performance. The university is committed to providing such an environment, free from all forms of harassment and discrimination. Each member of the community is responsible for fostering mutual respect, for being familiar with this policy and for refraining from conduct that violates this policy.

Sexual harassment, whether between people of different sexes or the same sex, is defined to include, but is not limited to, unwelcome sexual
advances, requests for sexual favors, sexual violence and other behavior of a sexual nature when:

1. submission to such conduct is made implicitly or explicitly a term or condition of an individual’s employment or participation in an educational program;
2. submission to or rejection of such conduct by an individual is used as the basis for personnel decisions or for academic evaluation or advancement; or
3. such conduct has the purpose or effect of unreasonably interfering with an individual’s work or academic performance or creates an intimidating, hostile or offensive working or educational environment.

Fundamental to the University’s purpose is the free and open exchange of ideas. It is not, therefore, the University’s purpose, in promulgating this policy to inhibit free speech or the free communication of ideas by members of the academic community.

B. Policy

The University will not tolerate sexual harassment, a form of discrimination, a violation of federal and state law and a serious violation of university policy. In accordance with its educational mission, the university works to educate its community regarding sexual harassment.

The University encourages reporting of all perceived incidents of sexual harassment, regardless of who the alleged offender may be. Individuals who either believe they have become the victim of sexual harassment or have witnessed sexual harassment should discuss their concerns with the university’s equity compliance director. Complainants are assured that problems of this nature will be treated in a confidential manner, subject to the University’s legal obligation to respond appropriately to any and all allegations of sexual harassment.

The University prohibits acts of reprisal against anyone involved in lodging a complaint of sexual harassment. Conversely, the university considers filing intentionally false reports of sexual harassment a violation of this policy.

The University will promptly respond to all complaints of sexual harassment. When necessary, the university will institute disciplinary proceedings against the offending individual, which may result in a range of sanctions, up to and including termination of university affiliation.

Complaints of sexual harassment may be brought to Caroline Laguerre-Brown, Vice Provost for Institutional Equity for the university; or Allison J. Boyle, Title IX Coordinator and Director for Equity Compliance & Education, Wyman Park Building, Suite 515, Telephone: 410-516-8075, TTY: Dial 711.

Sexual Violence Policy

(webapps.jhu.edu/jhuniverse/administration/minutes_policies_reports/policies/sexual_violence/)

The Johns Hopkins University is committed to providing a safe educational and working environment for its faculty, staff, and students. The University is particularly concerned about the increase in reports of sexual offenses occurring on the nation’s campuses. The University has adopted this policy addressing sexual violence (includes sexual assault) in order to inform faculty, staff, and students of their rights in the event they are involved in an incident of sexual violence, and of the services available to victims of sexual violence. Members of the University community who are the victims of, or who have knowledge of, an incident of sexual violence occurring on University property, or occurring in the course of a University sponsored activity (including academic, educational, extracurricular, athletic or other programs), or perpetrated by or against a member of the University community, are urged to promptly report the incident to campus authorities identified in this policy.

This policy applies to all members of the University community, including, but not limited to students, faculty and staff, and also applies in certain instances, to certain third parties (e.g., visitors, volunteers, vendors, and contractors while on University property, participating in a University sponsored activity, or providing services to the University, applicants for admission or employment with the University, and former employees of the University). All academic and administrative units of the University (including all schools, divisions, departments and centers) must comply with, and ensure that their policies and procedures comply with, this policy.

“Sexual violence” encompasses sexual assault (see examples below) and is a form of sexual harassment. Sexual harassment, which is a form of discrimination, violates federal and state law and University policy (see the University’s Policy Against Sexual Harassment).

Sexual violence includes physical sexual acts that are performed against a person’s will or where a person cannot give consent. A person may be unable to give consent to a sexual act for a number of reasons, including, but not limited to: if he or she is physically or psychologically pressured, forced, threatened, intimidated, unconscious, drunk, or drugged; due an intellectual or other disability or health condition; or by operation of laws governing the age of consent. Physical resistance need not occur to fulfill the definition of sexual violence. Examples of sexual violence include, but are not limited to:

• Sexual intercourse or other sexual acts that one party says “no” to;
• Rape (including “date rape”) or attempted rape;
• Someone touching, fondling, kissing, or making any unwanted contact with your body;
• Someone forcing you to perform oral sex or forcing you to receive oral sex; or
• Sexual assault, sexual battery, or sexual coercion.

Persons who are the victims of sexual violence may pursue internal University disciplinary action against the perpetrator in accordance with the University’s Procedures on Discrimination, Harassment, Sexual Harassment and Sexual Violence Complaints. The University’s disciplinary process may be initiated by bringing a complaint of sexual violence to the attention of a Dean, department chairman or director, supervisor, divisional personnel office, security officer, administrative officer, or the University’s Title IX Coordinator:

Allison J. Boyle, JD, MPH
The Johns Hopkins University
Office of Institutional Equity
Wyman Park Building, Suite 515
3400 North Charles Street
Baltimore, MD 21218
Telephone: 410.516.8075
Electronic Mail: aboyle7@jhu.edu
TTY: 410.516.6225
Facsimile: 410.516.5300
A victim of sexual violence should also immediately notify campus security. Campus security contact information for the following campuses is available at:

**Homewood Campus Safety and Security**
301 Remington Avenue
Baltimore, MD 21218
Telephone: 410.516.4600 or 410.516.7777

**Johns Hopkins Medicine Corporate Security**
550 N. Broadway, Suite 503
Baltimore, MD 21205
Telephone: 410.614.3473

**Peabody**
Schapiro House Basement
Peabody Campus
Baltimore, MD 21202
Telephone: 410.234.4605 or 410.234.4600

For security contacts at other University locations, please call Lt. Mark E. Long, Investigations Section, Homewood Campus Safety and Security, at: 410.516.6629.

Campus security will arrange for transportation to the nearest hospital. Victims in Baltimore City will be taken to Baltimore City’s designated rape treatment center: Mercy Hospital, 301 St. Paul Place (410.332.9000). Mercy Hospital is equipped with the State Police Sexual Assault Evidence Collection Kit. Victims in other cities will be taken to a local hospital designated as a rape treatment center. Persons who are victims of sexual violence will also be advised by campus security of their option to file criminal charges with local police of the jurisdiction where the offense occurred. Campus security and the University’s Title IX Coordinator will provide assistance to a complainant wishing to reach law enforcement authorities. Information on local and state law enforcement units and databases maintained by them is available on the Homewood Campus Safety and Security website.

The University will provide counseling to any member of the Hopkins community who is a victim of a sexual violence, and also will provide information about other victim services. Students can seek the assistance of counseling through their divisional counseling offices, and members of the faculty and staff can seek assistance through the Faculty and Staff Assistance Program (FASAP).

A student who is a victim of sexual violence may request a transfer to alternative classes or housing if necessary to allay concerns about security. The University will try to accommodate the request if such classes and housing are reasonably available.

The University reserves the right to independently discipline any member of the student body, staff or faculty who has committed an offense of sexual violence or other assault whether or not the victim is a member of the University community and whether or not criminal charges are pending. Disciplinary actions against students accused of sexual violence will be processed by the appropriate student affairs office of the School or campus attended by the accused student in accordance with the University’s Procedures on Discrimination, Harassment, Sexual Harassment and Sexual Violence Complaints and established disciplinary procedures pertaining to the School in which the student is enrolled. Disciplinary actions against staff members will be governed by the University Procedures and procedures set out in the University’s personnel policies. Disciplinary actions against members of the faculty will be processed by the offices of Dean of the appropriate academic division according to the University Procedures and procedures established by that division.

Both a complainant and the person accused of a sexual violence will be afforded the same opportunity to have others present during a University disciplinary proceeding. Attorneys, however, will not be permitted to personally participate in University disciplinary proceedings. In cases alleging a sex offense, both the complainant and the accused will be informed of the disciplinary board or panel’s final determination with respect to the alleged sex offense and any sanctions imposed against the accused. The University will, upon written request, disclose to the alleged victim of any crime of violence or a non-forcible sex offense, the report on the results of any disciplinary proceeding conducted by the University against a complainant who is the alleged perpetrator of such crime or offense with respect to such crime or offense.

The disciplinary measures which may be imposed for a sexual violence offense will vary according to the severity of the conduct, and may include expulsion of a student from the University and termination of the employment of a member of the staff or faculty.

**Photography and Film Rights Policy**
[jhu.edu/news_info/policy/photography.html](http://jhu.edu/news_info/policy/photography.html)

The Johns Hopkins University reserves the right from time to time to film or take photographs of faculty, staff, and students engaged in teaching, research, clinical practices, and other activities, as well as casual and portrait photography or film. These photographs and films will be used in such publications as catalogs, posters, advertisements, recruitment and development materials, as well as on the university’s website, for various videos, or for distribution to local, state, or national media for promotional purposes. Classes will be photographed only with the permission of the faculty member.

Such photographs and film—including digital media—which will be kept in the files and archives of The Johns Hopkins University, will remain available for use by the university without time limitations or restrictions. Faculty, students, and staff are made aware by virtue of this policy that the university reserves the right to alter photography and film for creative purposes. Faculty, students, and staff who do not want their photographs used in the manner(s) described in this policy statement should contact the Office of Communications and Public Affairs.

Faculty and students are advised that persons in public places are deemed by law to have no expectation of privacy and are subject to being photographed by third parties. The Johns Hopkins University has no control over the use of photographs or film taken by third parties, including without limitation the news media covering university activities.

**Graduate-Specific Policies**

**Academic and Research Misconduct Policy**

The Krieger School of Arts and Sciences and the Whiting School of Engineering full-time programs and Engineering for Professionals have established the Academic and Research Misconduct Policy to address instances of misconduct by all graduate students enrolled in full-time, part-time or non-degree (special student) Krieger School of Arts and Sciences and Whiting School of Engineering graduate programs. Procedures for handling
allegations of misconduct by full-time and part-time graduate students: Graduate Student Misconduct Policy (PDF)

WSE Procedures for Dealing with Issues of Research Misconduct
(Applies to all Whiting School graduate students, both full-time and part-time)

Assistant Leave Policy

To ensure the personal well-being and productivity of our graduate students, safeguard against excessive demands on graduate students' personal time, and introduce a minimum standard across the two Homewood schools regarding leave, the Deans of the Krieger School of Arts and Sciences (KSAS) and Whiting School of Engineering (WSE) have established guidelines for Research and Teaching Assistants to be able to take leave. A detailed description of the policy can be found here.

Grievance Policy

The Whiting School of Engineering (WSE) and the Krieger School of Arts and Sciences (KSAS) created a Grievance Policy. Any faculty member, postdoctoral fellow or graduate student of either school may grieve an adverse action or failure to act, or for a violation of University, School or departmental policy. Typically a complaint or dispute is brought to the attention of a department chair or center director and is resolved through informal discussion. In some circumstances, the Dean is asked to help in the informal resolution of grievances. The formal procedure set forth below is not meant to supplant attempts at resolving complaints through informal means. When at all possible, complaints and disputes should be settled through informal discussion, though there are no circumstances under which a grievance must be settled informally.

Please note that nothing in our policy should be construed to impinge upon the responsibilities of any office and/or regularly constituted body of the University, and should be applied only after every effort has been made to settle disputes informally. Moreover, no action may be taken with respect to a grievance that would conflict with or modify any policy approved by the Board of Trustees of the University, any policy of the University or WSE/KSAS, any federal, state, or local law or regulation, or any contract to which the University is a party.

The policy, along with proper procedure for filing a grievance is provided online at http://grad.jhu.edu/student-life/policies.

Jury and Witness Duty

A Krieger School or Whiting School graduate student employed by either school (i.e., a teaching assistant, research assistant paid by the university, research assistant paid by an external grant/fellowship or hourly worker) summoned for jury duty or subpoenaed to testify, is authorized to be absent from his/her work for the actual time required by such service. A graduate student employee must present the summons or subpoena to his/her immediate supervisor before a leave can be issued.

Graduate student employees are eligible for paid leave of absence as a juror or court witness. Federal work study funds, however, cannot be used in these instances -- departments should fund this work using other resources.

Jury duty or duty as a court witness is service and time spent away from a University position as a result of a subpoena issued by a court. Service as a volunteer expert witness or other volunteer court duty is not included in the provisions in this leave of absence.

Homewood Schools Policy for Graduate Student Probation, Funding Withdrawal, and Dismissal

This policy addresses consequences of student underperformance, including funding withdrawal. Students who might lose financial support as a result of the termination of funding from an advisor's sponsor should be given prompt notice, whenever possible.

1. Academic and Graduate Assistant Probation Notification

If it is determined that a graduate student has failed to meet minimum academic or graduate assistant (research assistant or teaching assistant) requirements, he/she may be placed on probation. This must be done with a formal letter and requires a meeting between the student and either his/her faculty advisor, his/her supervisor, the departmental director of graduate studies, or the department chair. The letter should clearly outline the student's academic or graduate assistant shortcomings, indicate the corrective measures necessary to remain in the program or to retain funding, and state the length of the student's probationary period (see section 2). Any funding ramifications for the student should be included as well. Departments must ensure receipt of the letter. A copy of the letter should be forwarded to the cognizant Dean (the Vice Dean for Humanities, Social Sciences, and Graduate Programs in the School of Arts and Sciences or the Vice Dean for Education in the School of Engineering) as well as the Office of Student Financial Services and the Office of International Student and Scholar Services (if appropriate).

2. Academic and Graduate Assistant Probation Timing

A student may be placed on probation at any time, however:

• If the probation can be resolved with coursework, the student should be notified before the first day of classes in a particular semester. He/she will have until the end of that semester (when grades are posted) before a final decision can be made.

• If the probation is related to research progress and cannot be resolved with coursework, the probation period must span at least 8 work weeks before a final decision can be made. Departments are at liberty to provide a longer probationary period.

• If the probation can be resolved with a formal letter and requires a meeting between the student and either his/her faculty advisor, his/her supervisor, the departmental director of graduate studies, or the department chair. The letter should clearly outline the student's academic or graduate assistant shortcomings, indicate the corrective measures necessary to remain in the program or to retain funding, and state the length of the student's probationary period (see section 2). Any funding ramifications for the student should be included as well. Departments must ensure receipt of the letter. A copy of the letter should be forwarded to the cognizant Dean (the Vice Dean for Humanities, Social Sciences, and Graduate Programs in the School of Arts and Sciences or the Vice Dean for Education in the School of Engineering) as well as the Office of Student Financial Services and the Office of International Student and Scholar Services (if appropriate).

3. Academic and Graduate Assistant Probation Appeal Process

A student may appeal the probation decision within ten business days, to the Program Chair, with a letter stating why he/she feels this decision is unmerited. The program must render a decision on the appeal within ten business days. The student may then appeal that decision within ten business days to the cognizant Dean, again, with a letter stating why he/she feels this decision is unmerited.
4. Academic and Graduate Assistant Probation Final Decision Process

- If the probation can be resolved with coursework: As soon as possible, but no later than one month following the conclusion of the stated probationary period, the program must inform the student of his/her status based upon whether the student has met the requirements as stated in the probation letter. The options are as follows: (a) remove the student from probation, (b) extend the probationary period, or (c) dismiss the student.

- If the probation is related to research progress: Within one week following the conclusion of the stated probationary period, the program must inform the student of his/her status based on whether the student has met the requirements as stated in the probation letter. The options are as follows: (a) remove the student from probation, (b) extend the probationary period, (c) withdraw the student’s funding (if applicable) but permit the student to remain in the academic program, or (d) dismiss the student from the academic program; dismissal decisions must be made by the student’s home department. (NOTE: If the decision is to dismiss the student, he/she should be permitted to complete the semester if enrolled in coursework, but funding may be withdrawn following the conclusion of the probationary period.)

- If the probation is related to teaching assistant performance: Within one week following the conclusion of the stated probationary period, the program may inform the student of his/her status based on whether the student has met the requirements as stated in the probation letter. The options are as follows: (a) remove the student from probation, (b) extend the probationary period, or (c) withdraw the student’s teaching assistantship funding but permit the student to remain in the academic program. In all cases, if the decision is to withdraw funding or dismiss the student, the action can be made effective immediately once the student is informed of the decision. However, departments are encouraged to provide a grace period to assist students in this transition.

5. Dismissal or Funding Withdrawal Notification

If the decision is to dismiss the student or withdraw funding, this must be done with a formal letter citing the reason for dismissal and requires a meeting between the student and either his/her faculty advisor, his/her supervisor, the departmental director of graduate studies or the department chair. This letter should contain information regarding the readmission process, if deemed appropriate. A copy of the letter should be forwarded to the cognizant Dean, the Office of the Registrar, the Office of Student Financial Services, and the Office of International Students and Scholars Services (if appropriate). Academic dismissal will be noted on the student’s transcript at the request of the program and with the approval of the cognizant Dean.

6. Dismissal without Probation

A student may be dismissed without a formal probation period under three circumstances: (1) if he/she meets the conditions for dismissal based on coursework as stated by the academic program in its department handbook or on its website; (2) if he/she fails an oral or written examination for which successful completion is necessary to continue in the program and whose retake options have been exhausted (as stated in the program’s degree requirements), or if he/she fails to meet any condition resulting from a qualifying or GBO exam; or (3) if he/she is expelled pursuant to Homewood Procedures for Handling Allegations of Misconduct by Full#Time and Part#Time Graduate Students, the KSAS Policy on Integrity in Research or the WSE Procedures for Dealing with Issues of Research Misconduct. Under these circumstances, programs are expected to follow the same procedures for Dismissal cited above (in section 5). In addition, students are also subject to immediate dismissal on non-academic grounds in accordance with the Homewood Procedures for Handling Allegations of Misconduct by Full#Time and Part#Time Graduate Students as well as applicable policies at http://www.jhu.edu/news_info/policy.

7. Funding Withdrawal without Probation

A student’s funding may be withdrawn without probation if the student is dismissed without probation (see above), or as the result of a decision rendered pursuant to the Homewood Procedures for Handling Allegations of Misconduct by Full#Time and Part#Time Graduate Students, the KSAS Policy on Integrity in Research or the WSE Procedures for Dealing with Issues of Research Misconduct. A student’s funding may also be withdrawn without probation if the student is found to have egregiously disregarded his/her research or teaching duties (or as appropriate under University or Homewood Schools policy); such action requires the approval of the cognizant Dean.

8. Dismissal Consequences

When a student is dismissed from the university, several consequences follow:

- The Office of the Registrar cancels the student’s registration for the next semester and authorizes a refund of tuition paid for that semester, if applicable.

- Notation of dismissal may be placed on the student’s transcript at the request of the program and with the approval of the cognizant Dean.

- The Office of Student Financial Services suspends financial aid to the student and workstudy aid.

- The Office of International Student and Scholar Services performs duties as required by U.S. federal regulations regarding persons not eligible to study at the university.

9. Readmission Following Dismissal

On rare occasions, students may be presented with the option to be readmitted. The terms for readmitting a student who has been dismissed are established by individual departments. The readmission process should be described in the dismissal letter, if deemed appropriate. Students who have been dismissed should discuss the readmission process with their advisor.

10. Dismissal or Funding Withdrawal Appeal Procedures

A student may appeal the dismissal or funding withdrawal decision within five business days, to the Program Chair, with a letter stating why he/she feels this decision is unmerited. The program must render a decision on the appeal within five business days. The student may then appeal that decision within five business days to the cognizant Dean, again, with a letter stating why he/she feels this decision is unmerited. In the case of funding withdrawal, the Department will continue funding the graduate assistant during the appeal process, provided that the graduate assistant continues with his/her assistantship duties. The student’s visa and registration status will not be affected until the appeal process is complete. If the student believes the decision was made in an arbitrary or capricious manner, he/she may file a grievance following the
Homewood Grievance Policy (see http://www.grad.jhu.edu/downloads/HwGrievancePolicy_Final.pdf). If the decision is made to dismiss an international student, immigration regulations require that the student depart the country within fifteen days. This does not preclude the student from filing a grievance, however.

NOTE: Graduate students who believe that their language ability prevents them from properly expressing themselves during the written appeal process may seek assistance in composing the appeal from the JHU Office of the Dean of Students or the JHU Graduate Representative Organization.

*As an example, consider a student placed on probation for coursework as well as for his/her research assistantship at the start of a semester. If after eight weeks, the advisor wishes to remove the student from probation relating to the research assistantship, the coursework probation remains in effect until the end of the semester. However, if after eight weeks the research is still deficient, the student’s funding may be withdrawn or s/he may be dismissed.

Information Technology Policies
All users of Johns Hopkins University computing resources must comply with the University’s information technology policies. For the comprehensive policies go to http://it.jhu.edu/policies/itpolicies.html

G.W.C. Whiting School of Engineering - Specific Policies
See http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/

Zanvyl Krieger School of Arts and Sciences - Specific Policies
See http://krieger.jhu.edu/research/policies/

Academic Policies
Much of the material contained in this section gives details pertaining to School-wide (Krieger School of Arts and Sciences and/or Whiting School of Engineering) or University-wide policies. However, there are graduate student issues and policies that are department specific. In those instances, students are referred directly to their department administrator or department handbook for further information.

Student Enrollment Statuses
Graduate students in the full-time ASEN degree programs are initially enrolled as full-time and are given a Resident status. Other registration statuses include: Graduate Study Abroad, Nonresident, Leave of Absence, Part-time and Visiting. Prior to a student changing his or her registration status, approval from the student’s degree program and appropriate office (s) must first be secured.

Degree-Seeking Graduate Students, School of Arts and Sciences
Graduate students who are full-time students are charged full tuition. The office of the deans must approve any exceptions.

Degree-Seeking Graduate Students, School of Engineering
Most graduate students enrolled in research-oriented degree programs (M.S., M.S.E., Ph.D.) in Engineering are full-time students. However, part-time study consistent with residency requirements is common in many engineering departments. Students should consult with individual departments to determine the possibilities for part-time study.

Visiting (Not Degree-Seeking) and Part-time Graduate Students
Visiting graduate students (those not candidates for a Johns Hopkins graduate degree) may be enrolled on a full- or part-time basis with the approval of the chair of the department and the dean of their respective school. Visiting graduate students will be limited to two consecutive terms of either full- or part-time study.

Part-time graduate students may be enrolled with the written approval of the chair of a department or director of a degree program and the documented confirmation of the dean. Students will generally not be eligible if they are working primarily on the Homewood campus or working full-time on research for the degree. Part-time graduate students must meet one of the residence requirements before they receive an advanced degree.

International students wishing to change status to part-time must first meet with OISSS to determine eligibility.

Postdoctoral Appointments
Postdoctoral fellows are at the university to undertake a research program in cooperation with a member of the faculty. All appointments are arranged through the individual departments.

Residency Requirements
Every full-time WSE Master’s student must register as a full-time graduate student for at least two semesters or satisfy an equivalent requirement approved by the appropriate department. (Combined bachelor’s-master’s degree students are exempt, as are those who enter a WSE master’s degree program after two or fewer semesters following completion of a JHU undergraduate degree.)

Every full-time KSAS Master’s student must register for a minimum of two consecutive semesters as a full-time, Resident graduate student.

Every full-time PhD Student (WSE and KSAS) must register for a minimum of two consecutive semesters as a full-time, Resident graduate student.

Graduate Study Abroad (KSAS)
The status of Graduate Study Abroad is usually limited to those students in the Humanities Center and the departments of Anthropology and German & Romance Languages and Literatures, who are required as a part of their regular degree program to complete a semester or more of full-time study at a foreign university. While in the case of the History of Art Department study abroad is not a general requirement, many of its graduate students do go abroad to conduct dissertation research. The category of Graduate Study Abroad is considered a full-time status. The use of this category for situations other than those noted above requires the approval of your department chair of the Homewood Graduate Board.
A student on Graduate Study Abroad is required to pay 10% of the full-time tuition rate for each semester abroad.

Students are encouraged to contact the Student Insurance Coordinator in the Registrar’s Office prior to leaving campus to find out details regarding your health insurance coverage while abroad.

The Graduate Study Abroad Application is available here.

**Graduate Study Abroad (WSE)**

The Graduate Study Abroad status applies to degree-seeking WSE master’s and doctoral students engaged in graduate education at a different institution (coursework and/or research) with departmental/advisor approval. These students will be required to pay 10 percent of the full-time tuition rate for each semester abroad. The remaining 90 percent will be paid for by the Dean’s Office. As this is not a full-time resident status, health insurance benefits are not guaranteed. Graduate Study Abroad students should discuss this with their department/advisor. The Graduate Study Abroad Application is available here.

**Nonresident Status**

Nonresident status is typically reserved for students who have completed all required coursework and are working on their thesis or dissertation. The University does not cover the cost of the University issued health insurance for Nonresident students. Though students are not required to carry health insurance, they are eligible to purchase themselves the University-sponsored plan.

**Eligibility**

All KSAS and WSE full-time program graduate students are eligible for Nonresident Status if they:

- Have completed all coursework and requirements for the graduate degree other than the presentation and defense of the master’s essay or doctoral dissertation
- Have reached the end of their departmental support period or have exhausted support from grants and cannot be fully supported by the department.
- Work 19.9 hours per week or fewer during the academic year if employed by Johns Hopkins University in any capacity (intersession or summer employment can be full-time, however). If working, students must be on salary (not stipend) and paid hourly. NOTE: Research or teaching assistants expected to work more than 19.9 hours per week do not qualify for Nonresident status.

**Tuition**

Students on Nonresident status are charged 10% of full-time tuition per semester.

**Restrictions**

Nonresident students are permitted access to campus, faculty advising and JHU services, however, they are not permitted to enroll in any courses, with one exception under certain and specific circumstances, international students who file for Curricular Practical Training F1 (CPT1) through the Office of International Student & Scholar Services may register for a course entitled “Research and Teaching Practicum” (KSAS) or “Engineering Research Practicum” (WSE).

The maximum amount of time that a student may retain Nonresident Status is four semesters for master’s students and ten semesters for doctoral students. Upon reaching this limit, the student will be required to register for either part-time status (WSE only) or full-time Resident status until degree completion.

**Application Procedures**

Students are required to complete and sign an Application for Nonresident Status indicating that they meet the requirements as stated above. The form should be signed by the department, the Office of International Student & Scholar Services (if applicable) and either the Graduate Board for doctoral students or the WSE Vice Dean for Education (or designee) for WSE master’s students.

Students should apply for Nonresident status well in advance of the first semester for which it is desired. When requesting a change of status for the current term, such petitions should be submitted no later than the end of the second week of the semester.

**Leave of Absence**

A Leave of Absence (LOA) is an approved absence from the University during which time students are not charged tuition nor required to register. Time spent on an LOA is regarded as an approved break in study and is not counted toward the total time-to-degree. If a student fails to register without obtaining an approved LOA the student will be considered withdrawn from their degree program.

Students are encouraged to contact the Student Insurance Coordinator in the Registrar’s Office prior to applying for an LOA to find out details regarding health insurance coverage while on LOA.

International students are encouraged to contact OISSS before filing for LOA.

**Eligibility**

All KSAS and WSE full-time and part-time program graduate students are eligible for LOA if one of the following conditions prevents them from continuing with their graduate studies:

- A documented physical or mental medical condition.
- Compulsory military service.
- Personal or immediate family hardship.
- NOTE: Financial difficulty alone is not a valid reason for requesting an LOA.

**LOA Tuition and Financial Support**

Students on LOA are not charged tuition for the semesters they are granted the leave; the period of leave is simply regarded as an approved interruption of the degree program; however, the University cannot guarantee that financial support will be available when students resume their studies. After taking an LOA, students must re-apply for tuition assistance, research assistantships, fellowships and/or teaching assistantships. Such matters are left to the discretion of the department. Before applying for a LOA, students should consult their department for information regarding funding opportunities upon return from LOA.

**LOA Restrictions**

Graduate students may apply for up to four semesters of LOA (not including the summer term) when medical conditions, compulsory military service, or personal or family hardship prevents them from continuing their graduate studies.
Continued approval is based on the reason(s) for the request. Additional information may be requested by the department, the Graduate Board, or the WSE Vice Dean for Education (or designee).

Students on LOA are not to use any University student services or facilities (e.g., computing labs, library, labs, athletic facilities, etc.) and may not be enrolled at another University.

Students on LOA who wish to continue working at Johns Hopkins are not eligible to be paid through the Student Payroll Office and must therefore be hired through the appropriate divisional Human Resources Department.

No progress toward degree completion or coursework can be made while on an LOA.

**Application Procedures**

To be awarded a LOA, students are required to complete and sign an LOA Application form and to provide a letter stating the reason for their application. The form must be signed by the student’s department, the Office of International Student & Scholar Services (if applicable), and either the Graduate Board for all Homewood doctoral and KSAS master’s students or the WSE Vice Dean for Education (or designee) for all WSE master’s students.

Students wishing to return from an LOA must complete an Application to Return from LOA form.

**Visiting Student Status**

In some cases, graduate students from other institutions may participate in a visitation or residency at the Homewood Campus. These students are designated as “Visiting.” Although not candidates for a Johns Hopkins advanced degree, these visiting students may be enrolled on a full- or part-time basis with the approval of the chair of the department and the cognizant dean.

For more information on the application process, interested students are encouraged to contact the department in which they would like to visit.

**Withdrawal/Readmittance**

The departure of a student from one of the Homewood Schools without prior arrangement of Nonresident status or a Leave of Absence will be deemed a permanent withdrawal from the student’s program. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the University. If readmitted, they do not pay a second application fee, but must satisfy the residency requirement for the degree following readmission (even if previously satisfied) and pay all outstanding fees.

**Satisfactory Progress**

**Homewood Schools Graduate Student Academic Review Policy**

This policy applies to all full-time WSE doctoral students and master’s students conducting thesis research. Each graduate program is required to publish its own policies and standards with respect to academic standing. At the end of each semester, all full-time Homewood graduate programs are expected to review the academic records of their graduate students to evaluate academic progress.

Once per academic year, all full-time Homewood graduate programs are required to provide a written review to: (a) all doctoral students, and (b) all master’s students conducting thesis research.

Departments are encouraged to include mention of funding continuation, as appropriate. This review must include the opportunity for the student to offer self-evaluation.

Students who fail to attain a program’s minimum level of performance may be placed on academic probation or dismissed using the procedures outlined in the Homewood Schools Policy for Graduate Student Probation, Dismissal, and Funding Withdrawal. In making these decisions, particularly that of dismissal, the program will take into consideration extenuating circumstances beyond the student’s control.

**Probation/Dismissal/Withdrawal**

**Academic Probation**

Whenever it is determined that a graduate student has failed to meet minimum academic requirements, that student may be placed on academic probation. This change in status requires a formal letter and a meeting between the student and his/her faculty advisor or the departmental director of graduate studies. The letter should clearly outline the student’s academic shortcomings, indicate the corrective measures necessary to remain in the program and state the length of the student’s probationary period. Any funding ramifications for the student should be included as well. The probationary period must span at least four months and would typically end at the completion of an academic semester.

Within one month following the conclusion of the stated probationary period, the program must inform the student of his/her status based upon whether the student has met the requirements as stated in the probation letter. The options are as follows:

1. remove the student from probation
2. extend the probationary period, or
3. dismiss the student.

**Academic Dismissal**

**Dismissal After Probation**

This must be done with a formal letter citing the reason for dismissal and requires a meeting between the student and his/her faculty advisor or the departmental director of graduate studies. Academic dismissal will be noted on the student’s transcript at the request of the program and with the approval of the cognizant Dean. A student may appeal this decision.

**Dismissal Without Probation**

A student may be dismissed without a formal probation period under three circumstances:

1. if he/she meets the conditions for dismissal based on coursework as stated by the academic program in its department handbook or on its website;
2. if he/she fails an oral or written examination for which successful completion is necessary to continue in the program (as stated in the program’s degree requirements), or if he/she fails to meet any condition resulting from a qualifying or GBO exam; or
3. if he/she is found to have committed academic or research misconduct and expulsion is the outcome of the deliberations as outlined in the Homewood Procedures for Handling Allegations of Misconduct by Full-Time and Part-Time Graduate Students, the KSAS Policy on Integrity in Research or the WSE Procedures
for Dealing with Issues of Research Misconduct. Under these circumstances, programs are expected to follow the same procedures for Dismissal After Probation. In addition, students are also subject to immediate dismissal on non-academic grounds in accordance with the Homewood Procedures for Handling Allegations of Misconduct by Full-Time and Part-Time Graduate Students as well as applicable policies at jhu.edu/news_info/policy.

Academic Dismissal Consequences
When a student is dismissed from the University, several consequences follow:

- The Office of the Registrar cancels the student’s registration for the next semester and authorizes a refund of tuition paid for that semester.
- Notation of dismissal may be placed on the student’s transcript at the request of the program and with the approval of the cognizant Dean.
- The Office of Student Financial Services suspends financial aid to the student and work-study aid.
- The Office of International Student and Scholar Services performs duties as required by U.S. federal regulations regarding persons not eligible to study at the University.

Readmission Following Dismissal
The terms for readmitting a student who has been dismissed for academic reasons are established by individual departments. The readmission process should be described in the dismissal letter, if deemed appropriate. Students who have been dismissed should discuss the readmission process with their advisor. Procedural instructions for this policy can be found at grad.jhu.edu/student-life/policies/.

Withdrawal
Students wishing to withdraw from the University must file written notice with their Department. A Termination/Withdrawal Report must be generated by the departmental administrator. Graduate students are encouraged to consult the chair of their department prior to submitting their written notice. Students who have been withdrawn and are then readmitted to the University must re-satisfy the residency requirement even if that requirement had been fulfilled previously. Once a student withdraws from the University, their student transcript is closed – changes to their academic record will not be permitted.

Registration
All students must complete registration at the beginning of each term in accordance with instruction issued by the registrar before they can attend classes or use university facilities. Detailed instructions about registration will be provided to all students before the registration period each term. If the student has not been notified at least two weeks before the start of classes for any fall or spring term, the Registrar’s Office should be contacted immediately.

Students who for any reason do not complete their registration until after the prescribed registration period are required to pay a late registration service fee. The fee is $150 for registrations completed from the first day of classes through the end of the first week of classes, $200 for registration completed during the second week of classes, and $300 for registration completed after the second week. Graduate students must obtain permission from the chair of their department to register after the second week of classes.

Students will not be allowed to register if there are unpaid bills from a previous term. The student is required to pay tuition or make financial arrangements with the Student Accounts Office before registering for a given term.

Grades
While policies in most departments vary, most graduate students receive letter grades or Pass/Fail grades for their coursework. Students should consult their department chairs and instructors to determine their grading requirements. Registrar deadlines and policies concerning grade changes are as follows:

Letter Grades (A through F)
Changing letter grades of “A” through “F” to a “Passing” grade is not permissible at any time.

All other grade change requests (e.g., “B” to “A”) are acceptable within one year only. Change requests beyond one year can only be changed as a result of clerical error, and must be accompanied by a written explanation/justification from the course instructor.

Incomplete Grades (I)
The grade of “Incomplete” (denoted by an “I” on the transcript) is reserved for instances in which it is expected that a course’s work will be completed in one semester, but for reasons beyond the student’s control, the work cannot be completed within that timeframe.

Dropping an “Incomplete” grade from the transcript is not permissible at any time.

Changing an “Incomplete” grade to a final grade (“A” through “F”, “Pass”) may be done by the instructor within one year without Dean’s Office approval. After one year, the student must submit an Incomplete Grade Extension Request form to the cognizant dean (the KSAS Dean of Graduate Education or the WSE Vice Dean for Education) for that grade to be eligible to be changed at a later date. The form may be submitted no later than the last day of the second semester following the semester the student initially enrolled in the course.

If the “Incomplete” grade remains after one year and the student does not submit an Incomplete Grade Extension Request form, the “Incomplete” grade becomes permanent and cannot be changed.

If the student successfully submits an Incomplete Grade Extension Request form but then fails to finish the course before the stated extension deadline, the “Incomplete” grade becomes permanent and cannot be changed. Under special circumstances, students may submit multiple Incomplete Grade Extension Request forms for the same course.

In-Progress Grades (IP)
Reserved for classes in which it is expected that the assigned work will require more that one semester to be completed, but the class itself will meet for only one semester, such as graduate seminar courses.

Dropping an “In-Progress” grade is permissible only with the approval of the instructor and the Dean’s Office.

Changing an “In-Progress” grade to a final grade (“A” through “F”, “Pass”) is acceptable at any time before the student’s departure with the instructor’s approval.
Missing Grades (MR, X)
A “Missing” grade (denoted by an “MR” or an “X” on the transcript) appears if the instructor has not submitted a grade within that timeframe.

An instructor may submit a Grade Change form directly to the Office of the Registrar to change a “Missing” grade to a final grade.

Dropping a “Missing” grade from the transcript is not permissible, nor is changing it to an “Audit.”

Audit (AU)
When a graduate student enrolls in a course with “audit” status, he/she must reach an understanding with the instructor as to what is required to earn the “Audit.” If the student does not meet those expectations (e.g., fails to attend class), the instructor must notify the Registrar’s Office in order for the student to be retroactively dropped from the course. The course will not appear on the student’s transcript.

Changing a course registration from “Audit” [student receives no letter grade] to “Credit” [student receives letter grade], or from “Credit” to “Audit” is permissible during the Office of the Registrar’s official add/drop dates. Registration changes beyond this deadline are not permissible.

Changing a final grade (“A” through “F”, “Pass”), “Incomplete” grade, “In-Progress” grade or “Missing” grade to “Audit” is not permissible at any time.

Add/Drop
Prior to the beginning of classes: Returning graduate students may make changes to their registration by mail, in-person, or online through the ISIS system. The ISIS system is available for use up to ten weeks prior to the first day of classes.

First six weeks of classes: Graduate students may add or drop classes online (as long as the electronic Advisor Hold has been released) or in-person at the Office of the Registrar. All in-person adds and drops must have a signature from the faculty advisor or department chair. Any drops within the first six weeks of classes will not be noted on the transcript.

Seventh and eighth week of classes: Graduate students may withdraw from a course with the signatures of the instructor, department chair, and the student’s respective Dean’s Office personnel (either the Graduate Board Coordinator for Krieger School of Arts and Sciences students or the Director of Graduate Academic Affairs for Whiting School of Engineering students). All withdrawals during the seventh and eighth weeks will be noted with a “W” on the student’s transcript.

Detailed instructions for how to add or drop classes online are available on the Registrar’s website. A calendar with specific dates for adding/dropping courses is also available on their website.

Registration Holds
A registration hold will be placed on students who have not obtained clearance from the Office of International Student and Scholar Services (OISSS), Student Accounts, Student Health Insurance or Student Health and Wellness Offices. Students should meet with the office that placed the hold so that the hold can be removed. Students who have an advisor’s hold on their registration must get their advisor’s signature on their registration form and then submit that to the Registrar’s Office in person in order for the hold to be lifted.

Transferring Courses
Whiting School of Engineering Master’s degrees (M.A., M.S., M.S.E)
For WSE master’s students who earned an undergraduate degree outside of the Whiting School of Engineering or the Krieger School of Arts and Sciences, no coursework completed before the undergraduate degree was conferred can be applied to a WSE master’s degree, regardless of whether that course was applied to the undergraduate degree.

WSE master’s students may transfer in up to two courses from another institution which were completed after the undergraduate degree was conferred and not applied to a degree elsewhere. The student must obtain approval from the WSE master’s program to do so. EXCEPTION: WSE master’s students in a department#approved study abroad program can transfer in additional coursework (i.e., beyond two courses), but in total, at least half of the courses/credits applied to the WSE master’s degree must be taken/earned at Johns Hopkins. Individual graduate programs reserve the right to enforce stricter policies.

Research and Scientific Writing Courses
Through the Center for Leadership Education graduate students may enroll in writing courses designed to assist with dissertation and grant writing. Students may enroll for this course at no additional charge. The course is offered in the fall and spring semesters however, space is limited. For additional information go to web.jhu.edu/Leadership.

Transcripts
Transcripts may be requested from the Registrar’s Office. A request for one copy is normally processed within two to three working days of receipt of the request. Requests for multiple transcripts require additional time. Standard delivery of transcripts is made by U.S. Mail first-class. Transcripts may also be requested online at iwantmytranscript.com. Partial transcripts of a student’s record will not be issued.

Summer and Intersession Courses
Summer Courses: While most summer courses offered at the Homewood Campus are undergraduate level courses, graduate students may enroll in these courses with permission from their department chair and the course instructor. No financial assistance is available for graduate students who wish to take summer courses. In special cases, graduate students may also take courses at the Peabody Conservatory. In such cases, students should contact the Registrar’s Office for registration instructions.

Graduate students may register for the course Summer Independent Research (990.892) with the approval of their department chair. There is no charge for this course as independent research projects conducted during the summer are not graded and carry no academic weight. An NG (“no grade given”) will appear on the student’s transcript.

Intersession Courses: Graduate students are also eligible to enroll in Intersession. Grades are generally given on an P/F scale. Some students use this period to participate in research, independent study or internships. A list of Intersession offerings is published in late November or early December. A special form, available in the Registrar’s Office, is used for Intersession registration. Students should register before winter break. Students who register for research, independent study, or an internship during Intersession must have the approval signature of their faculty sponsor and academic advising office. This opportunity is offered tuition-free.
Course Re-Take Policy

At the discretion of the Homewood graduate program, a graduate student may retake a course, but the grade from the initial effort will remain on the transcript. This applies whether the initial effort occurred while the student was an undergraduate student or a graduate student.

Transcripts are normally issued only at the request of the student or with his/her consent. The only exception to this policy is the issuance of transcripts to offices and departments within the university.

Official transcripts of work at other institutions that the student has presented for admission or evaluation of credit become the property of the university and cannot be copied or reissued. If a transcript of this work is needed, the student must get it directly from the issuing institution.

Graduate Degree General Requirements

Doctor of Philosophy

- A minimum of two consecutive semesters as a full-time, resident graduate student.
- Completion of registration in the semester during which degree requirements are met.
- Certification by a department or program committee that all school*, departmental, program, and/or committee requirements have been fulfilled.
- A dissertation approved by at least two referees appointed by the department or program committee and submitted to the Commercial Binding Office.
- Successful completion of a Graduate Board Oral examination. As determined by the department or program committee, this is classified as either a preliminary or a final examination.
- Though time-to-degree is determined by the department and may not exceed 12 years, continuation in the program will be based/contingent upon satisfactory academic progress after eight years of enrollment.

Krieger School of Arts and Sciences Master’s Degrees (M.A., M.F.A., M.S.)

- A minimum of two consecutive semesters as a full-time, resident graduate student.
- Completion of registration in the semester that during which requirements are met.
- Certification by a department or program committee that all requirements have been fulfilled.
- A thesis approved by at least one referee and submitted to the Commercial Binding Office when the department requires a thesis.
- Meets the requirements of the school’s time-to-degree policy (see grad.jhu.edu/student-life/policies).

Whiting School of Engineering Master’s Degrees (M.A., M.S., M.S.E., M.S.E.M.)

- Every student must register as a full-time graduate student for at least two semesters or satisfy an equivalent requirement approved by the appropriate department. (Combined bachelor’s-master’s degree students are exempt, as are those who enter a WSE master’s degree program after two or fewer semesters following completion of a JHU undergraduate degree.)
- Every student must be registered in the semester during which degree requirements are met; this includes students who have no courses remaining in which to enroll but must resolve coursework for which an “Incomplete” grade was assigned.
- Every student must provide certification by a department or program committee that all departmental or committee requirements have been fulfilled.
- If the student is submitting a formal essay to the MSE Library to help complete master’s degree requirements, the essay must be approved by at least one reader. (See the Homewood Academic Council Faculty Status table, under “Thesis Supervision of Graduate Students,” to determine who may serve as the reader/advisor. Additional readers, if required by program, need only program approval.)
- All courses applied to the master’s degree must be at the 300-level or higher. At their discretion, individual graduate programs may institute a higher course level as the minimum for their own students.
- Every student must earn the master’s degree within five consecutive academic years (10 semesters). Only semesters during which a student has a university-approved leave of absence are exempt from the 10-semester limit; otherwise, all semesters from the beginning of the student’s graduate studies—whether the student is resident or not—count toward the 10-semester limit.
- Every student must complete training on academic ethics.
- Every student must complete training on the responsible and ethical conduct of research, if applicable. (Please see the WSE Policy on the Responsible Conduct of Research.)

Time to Degree (TTD)

The time-to-degree (TTD) limit for degree candidates is typically determined by a specific program. However, Johns Hopkins University’s general policy requires that TDD not exceed twelve years for Ph.D. candidates, and five years for Whiting School and Krieger School terminal master’s candidates. TTD count begins with the first semester of registration as a matriculated student. Time spent on an approved Leave of Absence will not be counted toward the graduate student’s TTD. Students unable to complete degree requirements within the required time limit are required to withdraw from the University. Full TDD policies for the Krieger and Whiting Schools can be found at grad.jhu.edu/student-life/policies.

Co-tuttelle de Thèse

It is the University’s current policy that Johns Hopkins will recognize dissertation research and subsequent dissertation submission for the purposes of a degree from Johns Hopkins alone. It will sign no agreement that supports the concept of a student submitting the same work to different universities to receive two distinct degrees.

The University, however, wants to promote international exchange and in this spirit the Graduate Board has agreed to accommodate students with a desire to include faculty from a foreign university to participate in their research and defense process. Upon submission and review of a current curriculum vita, the Graduate Board will allow one advisor to be a faculty member of the foreign university and in certain cases will allow the committee to be expanded to include other faculty from the foreign university as long as the majority represent Johns Hopkins. The university will provide no funds to cover expenses. Funding for travel would be up to the department or the foreign university.
All proposed co-tutelle agreements be submitted to the Graduate Board for review.

**Commencement and Degree Conferral**

The University Commencement Ceremony is held once per academic year, traditionally in May. Students who have not satisfied all graduation requirements by the deadlines determined by the Graduate Board or the WSE Office of Academic Affairs are not eligible to participate in the graduation ceremony. Students who complete the degree requirements prior to the ceremony in May can request an official statement of completion from the Office of the Registrar or the Homewood Graduate Board Office.

There are three official conferral dates for the University (December, May, August), but only one formal commencement ceremony each year.

Visit the registrar’s graduation website for deadlines and official conferral dates.

The conferral date is printed on diplomas.

**Application for Graduation**

All graduate students must complete an Application to Graduate in order to generate degree conferral and receive a diploma. The application is distributed by the Office of the Registrar. Students should consult with their Graduate Coordinator, the Homewood Graduate Board’s website and the WSE Office of Academic Affairs’ website respectively to find out about the current deadlines. The dates of these deadlines change each academic year.

In addition to submitting the general application to graduate, engineering students preparing to graduate from a master’s or doctoral program must complete paperwork indicating the courses they intend to apply to their degree. This paperwork is distributed by each department’s Graduate Coordinator and once completed should be returned to them.

**Degree Completion Deadlines and Information**

The Graduate Board and the WSE Office of Academic Affairs (for WSE master’s students) issues deadlines for submission of theses and essays in the spring semester for the following academic year. These deadlines must be met for a student to be listed as a degree candidate. Students must be met for a student to be listed as a degree candidate. Students preparing to graduate from a master’s or doctoral program must complete paperwork indicating the courses they intend to apply to their degree. This paperwork is distributed by each department’s Graduate Coordinator and once completed should be returned to them.

- Students who complete their master’s essay or doctoral dissertation during the summer are not required to register for the summer term.
- Students who complete their master’s essay or doctoral dissertation during the summer are not required to register for the summer term.
- Graduate students completing a final degree during the first eight weeks of the fall semester or the first four weeks of the spring semester will generate a tuition reimbursement for that semester to whatever entity covered the cost - the student, the department, the advisor, etc. This applies only to students for whom completion of a master’s project, master’s essay, master’s journal submission or doctoral thesis is the sole remaining degree requirement at the start of the final semester.
- If a student completes a Tuition Deferral Form indicating an expectation to complete the degree within a specific grace period, no payment is required to register for that semester. If the grace period deadline is not met, however, that semester’s tuition charge will be added to the student’s account.
- Graduate students who complete their degree requirements by the winter deadline listed are not required to register for the spring semester.

**Grades towards Degree Completion**

Grades for courses that are required for graduation must be turned in by the grade-submission deadline. Graduating students who are taking courses at cooperative schools or other divisions of the University must make arrangements with their instructors on the first day of class to have final grades submitted to the host school’s Registrar and then to the Homewood Registrar by the Homewood grade-submission deadline. If such an arrangement cannot be made, students should withdraw from the course.

**Graduation Closes the Graduate Record**

Upon graduation, the graduate’s record is closed. No changes thereafter can be made to the graduate’s transcript.

**Completing Graduation Requirements**

Departmental graduation requirements vary; therefore, students are encouraged to speak with their departmental administrator to learn details of their requirements.

**Graduate Board**

The Homewood Graduate Board is responsible for the administration of policies and procedures for the award Doctor of Philosophy, Ph.D. of the Schools of Arts and Sciences and Engineering, and for Masters degrees in the School of Arts and Sciences.

The Graduate Board oversees:

- Leave of Absences for ASEN PhD Students and KSAS Master’s students
- Non-resident applications for ASEN PhD Students and KSAS Masters’ students
- Graduate Study Abroad for ASEN PhD Students and KSAS Master’s students
- Graduate Board Oral Exams for ASEN Phd Students: With the approval of the department chair, a Graduate Board oral examination may be scheduled at any time during the academic year. Requests for a Graduate Board oral examination must be submitted to the Graduate Board a minimum of three weeks before the exam is to take place. More information can be found at grad.jhu.edu/academics/gradboard/policies/gbo. Incomplete Grade Extension for ASEN PhD students and KSAS Master’s students who have reached the one-year time limit on an Incomplete (I) grade.
- Dissertation/Thesis Instructions
- The student is responsible for obtaining and observing the detailed instructions concerning submission of their dissertation/thesis from their departmental office, the Homewood Graduate Board Office (grad.jhu.edu/academics/gradboard/policies/candidacy/).
- Initial PhD Degree confirmation
- Dissertation submissions
- Recommendations for conferral to the Doctor of Philosophy Board
- Dissertation and Degree Completion Deadlines for the Graduate Board can be found here.
Doctor of Philosophy Board

The Doctor of Philosophy Board advises the Provost about University-wide issues pertaining to the Ph.D. It approves new degree programs and sets guidelines and policies that affect all Ph.D. students. The Board respects the strong tradition of local autonomy of the Schools and seeks to enhance the visibility and prominence of Ph.D. education across the University.

Master's Degree Completion

All Whiting School of Engineering master's students must complete the following steps for the degree to be conferred and to generate a diploma:

- An Application to Graduate must be submitted to the Office of the Registrar (Garland Hall) either online or on paper, depending upon status;
- Department-specific certification forms must be submitted to and approved by the department graduate coordinator, and then those forms must then be submitted to the WSE Office of Academic Affairs by the deadlines listed below;
- If a formal master's essay is used to complete degree requirements, the student must submit a properly-formatted essay to the MSE Library Commercial Binding Office by 4:00 p.m. on the date listed on the WSE website; the submission receipt (generated by the library) must be included in paperwork forward to the WSE Office of Academic Affairs.

Visit: http://eng.jhu.edu/wse/page/masters-schedule/ for deadlines and additional policies.

Dissertation and Thesis/Essay Submission

ETD (Electronic Theses and Dissertations)

An electronic thesis or dissertation (ETD) is digital version of a dissertation that is available to the public via the Internet. Universities and colleges in the United States and abroad have been moving toward this type of publication for the past decade. In the fall 2013, Johns Hopkins launched its own ETD portal and process.

Effective September 1, 2013 all thesis and dissertation submissions must be through the ETD process and portal. See the ETD page for more information, deadlines, and instructions.

The student is responsible for obtaining and observing the detailed instructions concerning submission of their dissertation/thesis from their departmental office, the Homewood Graduate Board Office (grad.jhu.edu/academics/gradboard/policies/candidacy/) and ETD guidelines http://guides.library.jhu.edu/etd of the Johns Hopkins Libraries and Museums. Students may also contact the ETD coordinator at dissertations@jhu.edu.

After submitting their dissertation to the ETD Submittal Tool http://etd.library.jhu.edu, the library will check the dissertation for proper formatting and either approve it or contact the student to make required changes. After the ETD is approved the student will receive an approval confirmation from the system. Students are required to forward this approval email to homewoodgradboard@jhu.edu with the following items:

- The title of their dissertation typed in the body of the email in title case format with correct spelling and punctuation.
- The degree type and program/department

Student Life

Johns Hopkins is an active and supportive community, filled with students of different viewpoints, different cultures, and different backgrounds. The thing that brings them all together is their desire to be here and to celebrate everything Johns Hopkins has to offer. The following section details campus resources specifically relevant to the graduate student experience.

Orientation and Welcome Events for New Graduate Students

There are many resources available to assist new students in their acclimation to the Johns Hopkins Community. Orientation and Welcome Events information can be found at http://grad.jhu.edu/student-life/orientation/, and resources on getting settled in Baltimore as a new graduate student can be found here: http://grad.jhu.edu/student-life/orientation/

J-Card

The J-Card is the multi-use identification card used for Johns Hopkins students, faculty and staff. It is issued to students after registering for the first time. The Office of ID Card Services is located in the basement of Garland Hall.

The card features typical identification information such as the person's name, photograph, classification (student, faculty or staff) and a randomly generated ID number.

The J-Card acts as the individual's library card for the Sheridan Library network. It allows the student to enter the MSE Library beyond Q-Level, to reserve and borrow books and to pay for photocopies or document printing on library printers.

Students must show their J-Card in order to gain access to any campus computer lab. Additionally, student employees need to present their J-Card to pick up their paychecks from the Student Payroll Office.

The J-Card is also used for identification if a student has purchased a campus dining plan. J-Cash can be used at a number of restaurants and vending machines, on and off-campus. Money can be added to any J-Card account by mail or in person at the Student Accounts Office, located at 31 Garland Hall. For a full list of locations where J-Cash can be used, visit their website: jcardonline.com.

Lost or stolen J-Cards should be reported to the Office of ID Card Services by calling (410) 516-5121 (weekdays 8:30 A.M. to 5 P.M.) or the Office of Security by calling (410) 516-4600 (all other times). The account will be temporarily suspended and a new J-Card will need to be issued for a nominal fee.

Bookstore

The University's bookstore is located at the Barnes & Noble in Charles Commons on Saint Paul Street. Graduate students can purchase textbooks and supplies at this location. Please visit their store website for hours of operation and other pertinent information.
Computer Access

Computers available to all faculty, staff, and students are located in several public computer labs and kiosks across the Homewood Campus. Labs in Krieger Hall and the Milton S. Eisenhower Library feature extensive software allowing users to print, access email and the Internet and perform other general tasks as well as more advanced computing required for coursework and research. Computer kiosk locations in Krieger, the Mattin Center, Hodson Hall, Levering Hall and throughout the MSE library are more limited.

The largest of all the Homewood labs is the Krieger Academic Computing Lab, located in 160 Krieger Hall. To gain access to the lab, students must swipe their J-Card at the locked gate. A lab consultant can be contacted during working hours by calling (410) 516-4242 or emailing consult@jhu.edu.

Security, Shuttles and Transportation

Security

The Johns Hopkins University Campus Safety and Security Office is dedicated to establishing and maintaining a safe and secure environment in which to work and visit. The Homewood Communication Center operates 24-hours a day seven days a week at the Homewood Campus. In keeping with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, the Campus Safety and Security Office publishes crime reports and security bulletins. These may be found on their Campus Safety and Security Website.

Campus Security and local emergency services including Baltimore City Police, Fire or Ambulance can be summoned through Homewood’s Communication Center from any campus phone by dialing 6-7777. The universal 911 number may also be used to reach Homewood’s Communication Center from any on-campus phone. From off-campus, dial (410) 516-4600 to reach security. Crime and safety concerns may be reported to Campus Safety and Security by calling on-campus emergency numbers, (410) 516-7777 or 911. Additional services include the following:

- Anonymous Tip Hotline
- Crime Prevention Tips
- Escorts
- Lost and Found
- Property Registration
- Rape Aggression Defense (RAD)

Visit the Campus Safety and Security Website for more information.

Shuttles and Transportation

Homewood Parking and Transportation provides several services to faculty, staff and students. The primary services include:

- Homewood - Peabody - JHMI Shuttle
- Keswick - Homewood - Eastern - JHMI Shuttle
- Homewood to Mt. Washington Shuttle
- Blue Jay Shuttle
- Carey Business School - Homewood (evening) Shuttle

Handicapped Services

Visit their website for schedules, locations and more information.

Student Employment

Student Employment Services is the human resources and employment center for full-time Homewood students who work for or wish to work for the University during their enrollment at Hopkins. Student Employment processes all student paychecks and maintains employment records and supporting documents. The office also supports a web based job search program which students can access through the Student Employment Services website. Students on Nonresident status must keep in mind that they can be paid at an hourly rate only and the number of hours worked on campus may not exceed 19.9 per week.

A student job fair, hosted by Student Employment, is held annually in September. Students have the opportunity to meet and interview with a variety of on- and off-campus employers at the fair. All tax forms and any other required paperwork must be filed with the Student Employment office before students are eligible to receive their first paycheck from the University.

Volunteer opportunities and community-service information can also be found at this office.

Federal Work Study: Graduate students who meet certain financial-aid requirements have the option of applying for Federal Work Study (FWS) positions. FWS is a federally funded program that allocates funds to the University to pay a portion of the student’s salary. Approximately one-third of Hopkins students receive FWS funding. Eligibility for FWS positions is based on both the Free Application for Federal Student Aid (FAFSA) and the JHU Application for Financial Aid. The Office of Student Financial Services determines eligibility based on federal regulations. An FWS award is valid for one academic year. Students must reapply each year. The maximum FWS award is $2,000. Awards may be less, depending on the type and amount of other financial assistance a given student receives. FWS employees are limited to 20 hours of work per week.

Travel Resources

As graduate students prepare to go overseas for research or to attend a conference it is helpful to consider administrative, health, and safety issues before leaving the country. Graduate students are also urged to complete the Johns Hopkins Travel Registry. Though this service is optional, travel registration can facilitate faster support in the event of an overseas emergency.

For more information and resources, visit http://grad.jhu.edu/student-life/travel/.

Career Center

The Career Center has services ranging from resume and curriculum vitae development to on-campus recruiting. As graduate students begin thinking about professional opportunities to pursue with their degree, the Career Center can help explore how skills, values, interests, and personality fit into this decision-making process. The Career Center has
Graduate Student Workshop Series
Each semester, the Career Center sponsors workshops specifically addressing the needs of graduate students. In the fall, look for “Writing your CV” and “The Academic Job Search for Graduate Students.” In the spring, the Career Center typically conducts two workshops for those seeking to explore opportunities outside academia.

Individual Career Counseling
The Career Center also offers practical services for graduate students, including resume or CV support and taped mock interviews.

Dossier Service
The Career Center offers a dossier service for Ph.D. students in Arts & Sciences and Engineering disciplines Writing Seminars master’s students. This service provides a central location for housing recommendation letters when applying for academic positions.

Disabilities
Johns Hopkins University does not discriminate on the basis of gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, veteran status or other legally protected characteristic in any student program, activity administered by the University, admission or employment.

A person with a disability is defined by the Rehabilitation Act of 1973 and by the Americans with Disabilities Act of 1990 as an individual who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.

Student Disability Services Office (SDS)
Assists the University in compliance with the provisions of the Americans with Disabilities Act of 1990 (ADA), ADA Amendments Act (2008) and Section 504 of the Rehabilitation Act of 1973 for full-time undergraduate and graduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering.

Johns Hopkins University
Student Disability Services
3400 North Charles Street
385 Garland Hall
Baltimore, MD 21218
Phone: (410) 516-4720
studentsdisabilityservices@jhu.edu
http://web.jhu.edu/disabilities

Tax Information
Student earnings are NOT automatically exempt from tax withholding, including Federal Work-Study earnings. All students are encouraged to complete/submit Tax Withholding Exemption Forms. For more information, please visit: https://orchid.hosts.jhmi.edu/stujob/tax.cfm. The JHU Tax Office is available for general questions and to point students to tax resources.

Please note that the Tax Office is unable to advise specifically on or prepare tax returns for JHU affiliates.

Parking on Campus
Parking is available for graduate students on campus at the San Martin and Decker Garages at monthly rates. Graduate students receiving a paycheck from the University are eligible for payroll deduction to pay for parking. Hang tags for free evening and weekend parking along academic buildings are also available. Hang tags can be purchased for a nominal fee which are valid for a maximum of 3 years. Go to the Parking Office, with your J-Card, to pick up your hang tag.

In addition to these spaces, there are a number of metered and timed parking zones around campus. Check the ordinances governing these roadside spaces. Many have two-hour time limits.

Campus Life

Recreation Center
Membership to the O'Connor Recreation Center is open to all faculty, staff, and students of the university. This includes Johns Hopkins University-Homewood, Peabody, School of Medicine, School of Public Health, School of Nursing, School of Education, Carey Business School, Bayview Medical Center, Johns Hopkins Hospital, School of Advanced International Study (SAIS), Johns Hopkins Medical Institutions, and the Applied Physics Lab (APL).

Gym
• Fitness and weight rooms
• Climbing wall
• Fields
• Tennis courts
• Pool (indoor)
• Experiential education
• Fitness classes (yoga, yogalates, pilates, step aerobics, cardio kickboxing, muscle classes and dance-based classes)
• Website: http://web.jhu.edu/recreation/ or (410) 516-5229

Campus Ministries
Johns Hopkins University Campus Ministries promotes and supports spiritual development, theological reflections, religious tolerance and social awareness among students, faculty and staff within the university community. At its heart, Campus Ministries is a prophetic and pastoral presence which seeks to enhance the spiritual and ethical educational experience of the whole person mind, body and soul.

Website: www.jhu.edu/~chaplain or (410) 261-1880

Community Engagement
The Center for Social Concern emphasizes the value of service with others. Volunteers and community members enter into an educational process where both benefit from the interaction, and reciprocal learning is the common ground for all of our initiatives. Our programs and efforts are striving to create a strong community in and around the Johns Hopkins campus.
GSCEP
The Graduate Student Community Engagement Program is designed to facilitate meaningful collaborations between individual Krieger, Whiting and the School of Education Johns Hopkins University graduate students and interested community partners. The main goals of GSCEP are to:

- Give Johns Hopkins graduate students the opportunity to enrich their graduate experience by giving them real-world opportunities in which to practice/apply their developing personal, professional, and academic skills (which serve to enhance their research and/or marketability while concurrently benefiting those served).
- Simultaneously support Johns Hopkins' actions to be a valued, committed and active member of the Baltimore community by providing specific (and at times, expert) graduate student support to valued community partners.
- [Website URL]

Housing
Johns Hopkins University does not offer graduate student housing. Prior to or upon arrival, graduate students should secure their own independent housing. The Baltimore City neighborhood immediately surrounding the Homewood campus is called Charles Village. In addition, there are lots of other proximal areas in which students may consider living including Hampden, Waverly, Roland Park, Guilford, Remington, Mt. Vernon and others. Incoming graduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering who need housing accommodations while looking for a place to live can contact the Off-Campus Housing Office for information on temporary housing: [Website URL]

Dining Services
An assortment of entrees, snacks, coffee beverages and other fare is available at a variety of on-campus locations that are open during all three meals and snack-times. Homewood’s dining services can accommodate students with dietary restrictions whether that would be kosher, vegetarian, vegan or some other requirement. All locations accept J-Cards and cash, and some take credit cards.

Off-Campus Dining: There are many restaurants surrounding the campus and in adjacent neighborhoods. For the “insider’s guide” to these venues, please contact the Graduate Representative Organization (GRO), which publishes information and student reviews on these and other Baltimore eateries.

Meal Plans: Graduate students may opt to enroll in a meal plan. Meal plans on the Homewood campus are based on a block meal system, designed for both convenience and flexibility. Each block counts as one meal. Blocks expire at the end of each semester. Added to blocks, points allow students to purchase food at the Levering Food Court, and Blue Jay Café. Points have a dollar-for-dollar value and roll over from the fall to the spring, expiring at the end of the spring semester.

Additional information on specific plans, kosher or other dining options is available through the Office of Housing and Dining Services: [Website URL]

Weather Emergencies
When there is an alteration or curtailment of the operating schedule of the University or a designated unit, an official announcement will be made on the University Emergency Telephone Hotline. As conditions may vary in the geographic areas where Johns Hopkins has campuses, there may be times when the Required Attendance Policy is invoked for some campuses and not others. In addition, conditions may be different on campus than they are in the area where a student lives. In times of bad weather, students should call the University Emergency Telephone Hotline to check on the status of the campus where they work.

- Baltimore - (410) 516-7781
- Outside Baltimore – (800) 548-9004

Each year the University publishes a list of radio and television stations that will be requested to announce operation changes. Because there can be mistakes in the message broadcasted, students can verify the message by calling the University Emergency Telephone Hotline. Students may also check the JHU emergency resources website.

Graduate Student Organizations and Advocacy
There are a variety of graduate student organizations on campus, ranging from cultural, athletic, academic and social. For a sample of what is available to graduate students, please visit the following link ([Website URL]). For additional academic, cultural, athletic and social groups/organizations/clubs, please visit the following link ([Website URL]). Every group/organization/club is different, and some may only be open to undergraduate students or to students from a certain campus. Other may not be bound by similar parameters. Graduate students are encouraged to contact the GRO to request a list of organizations that they are interested in joining.

Graduate Representative Organization
The Johns Hopkins University Graduate Representative Organization (GRO) works with specific divisions to represent graduate student interests (health insurance subsidies, compensation) to various levels of the JHU administration. The GRO organizes graduate student orientation, social events, sports activities, funds campus groups, and much, much more. Indeed, the GRO is proud to have earned the National Association of Graduate-Professional Students’ (NAGPS) 2000 – 2001 Outstanding Graduate Student Association award, its highest honor.

The GRO is made up of graduate student representatives from every department at Homewood. This group of representatives, the GRO General Council, elects an Executive Board for an annual term. Together, the Council and Executive Board are responsible for programming, advocating, and facilitating communication for graduate students on the Homewood Campus. The GRO also holds occasional programs with the student government on the Medical Campus.

[Website URL]

Guide to Living in Baltimore
Baltimore, the largest city in Maryland, is the center of a metropolitan area of 1.5 million people. Baltimore is a vital city long known for its ethnic neighborhoods where each wave of immigration to the United States has added to its character. People of many different backgrounds give the city a melting pot vitality that is reflected in the wide variety of restaurants, shops, and festivals.
Health and Wellness

Health Insurance (Aetna)
It is University policy that all full-time students in the Schools of Arts and Sciences and Engineering maintain adequate health insurance coverage to provide protection against unexpected accidents and illnesses. As a full-time student, you must either purchase the University plan or sign a waiver indicating you have health insurance coverage comparable to the University plan (International Students are required to purchase the University plan). Details about the student health plan offered by the University are provided in a brochure available upon request or at www.aetnastudenthealth.com.

Health and Wellness Center
The Johns Hopkins University Student Health and Wellness Center exists to affirm the clear role of health and wellness in advancing academics. Its primary mission is to maintain and contribute to a healthy and safe learning environment for the student community in the Schools of Arts and Sciences and Engineering.

Website: http://ww2.jhu.edu/shcenter/ or (410) 516-8270

Counseling Center
The Johns Hopkins University Counseling Center serves full-time undergraduate and graduate students from the schools of Arts and Sciences, Engineering, Nursing, and the Peabody Institute. All of these students are encouraged to utilize the services offered by the Counseling Center. All services are confidential and free of charge.

The Counseling Center offers the following services:
• Counseling
• Groups
• Consultation
• Referral
• Career Decision-Making

Website: http://www.jhu.edu/~ccenter/ or (410) 516-8278

International Graduate Students
The Office of International Students and Scholar Services (OISSS) assists Hopkins’ international community with visa status and with the challenges of making a transition from one setting to another.

The OISSS staff is prepared to help with daily issues students face in adapting to an academically and culturally different environment. This office should be considered by international students as their primary source for important information regarding their status in the United States.

OISSS staff members can answer questions and advise students on immigration regulations, financial concerns, health matters, housing, employment possibilities and other issues relating to an international student’s period of stay in the U.S.

International Bridge Program (http://grad.jhu.edu/student-life/bridge)
Studying in a foreign country can be both challenging and exciting. International students often experience a period of cultural adjustment when they first arrive to the United States and specifically Johns Hopkins University.

The International Graduate Student Bridge Program is designed to better support this transition process for new international graduate students through monthly informational seminars and presentations on practical subjects—such as adjusting to graduate school in the US, taxes, credit in the United States, career preparations and enhancing communication and networking skills.
Departments, Program Requirements, and Courses

Course Identification

Courses listed in the catalog are those the departments plan to offer, however, not every course is available during a given year. Necessarily, some courses will be canceled and other courses scheduled. The schedules of graduate and undergraduate courses for a given term are published before the end of the preceding term. In the course listings that follow, the credits shown are for one semester only. No credits are listed for graduate (600-level) courses; many departments indicate instead the hours of class time per week.

A code number, indicating the department or program; a course number, indicating level; and sometimes a code letter, indicating area, for purposes of the distribution requirements, identify courses.

Code Numbers

Department and program code numbers for the School of Arts and Sciences and Engineering are as follows:

Zanvyl Krieger School of Arts and Sciences
All the undergraduate and graduate programs in Arts and Sciences come under the direction of the dean of the Krieger School of Arts and Sciences. The excellence of these programs has been maintained and enhanced ever since 1876, when Daniel Coit Gilman assembled a Faculty of Philosophy of international distinction. The creative vision of these first professors remains and is reflected in a school that encourages independent research and creative thinking at all levels. The departmental descriptions that follow are notable for the wide range of interdepartmental offerings and the opportunities available for a student to structure a unique field of study in the humanities, natural sciences, quantitative studies, and social and behavioral sciences.

Center for Africana Studies
The Center for Africana Studies (CAS) offers a broad inquiry into the ideas and experiences of African peoples on the continent of Africa, in the Americas, and elsewhere around the globe. It is an interdisciplinary program organized around African American Studies, African Studies, and African Diaspora Studies, its three major sub-fields. Spanning diverse academic disciplines—in humanities, social sciences, and public health—Africana Studies brings together several fields of interdisciplinary scholarship. While these fields possess distinctive intellectual traditions, they offer exciting possibilities for comparative as well as integrative inquiry.

The CAS provides an institutional home for faculty and students interested in critical and comparative study across the three sub-fields as well as specialized study within each sub-field. Through research, course work, and public programs, the CAS seeks to promote fundamental inquiry into the commonalities and contrasts between contemporary and historical experiences of Africans and African Americans, and the place of African Diasporas in both local and global contexts, historically and in the present.

Major Requirements
Students who choose to major in Africana Studies must complete at least 40 credit hours of course work, including three core courses, one year of foreign language study, and elective courses offered by the center and/or participating departments.

Core courses
Each student will take three core courses, one in each of the sub-fields of Africana Studies—that is, African Studies, African-American Studies, and African Diaspora Studies. Core courses will be offered on a regular basis—either annually or, at a minimum, once every other year. The core will include the following existing courses, plus one introductory course.

<table>

Electives
Each student must complete a minimum of 24 additional credit hours, comprised of elective courses offered by participating faculty.

Electives
Each student must complete a minimum of 24 additional credit hours, comprised of elective courses offered by participating faculty. The center staff will maintain an updated list of appropriate current course offerings, including courses offered by visiting faculty, postdoctoral fellows, Dean’s Teaching Fellows, etc., and assist students in selecting courses to construct a coherent program of study. Participating faculty will also be encouraged to develop courses specifically for Africana Studies, including interdepartmental and/or team-taught courses. Electives should be distributed as follows:

- At least 12 credit hours must be in courses at the 300-level or above.
- Research seminar. Students who wish to do honors in Africana Studies are required to take a two-semester (eight credit) research seminar, in which they will prepare an honors thesis in consultation with a faculty advisor in the student’s particular area of interest and the faculty coordinator of the undergraduate research seminar. The research seminar will provide guidance on research design, methodology, and analysis and presentation of findings, and give students an opportunity to discuss one another’s projects, share experiences, and receive constructive comments from their peers as well as the faculty coordinator.

In selecting research topics and collecting materials, students are encouraged to explore resources outside those immediately available on campus. With its rich collection of museums and archives, large and historic African-American communities, and growing populations of recent migrants from Africa, the Baltimore-Washington area offers many opportunities for research in Africana Studies. Students who wish to undertake research in Africa or in African American or African diasporic communities beyond the local area will be encouraged to take advantage of summer research grants and/or study abroad opportunities available at Hopkins. The center will work with other departments and programs at Hopkins on behalf of students who wish to combine their research in Africana Studies with work in another field or ongoing program, such as the joint Minority Health Program recently established by the School of Public Health and Morgan State University.

Undergraduate Minor Requirements
Students who wish to minor in Africana Studies must complete a minimum of 24 credits, including two core courses and electives. Three of the electives must be upper-level courses. Foreign language study is not required, but up to eight credits of course work in a foreign language may be counted toward the required electives.
For current faculty and contact information go to http://krieger.jhu.edu/africana/directory/index.html

Faculty

Director
Franklin W. Knight
Leonard and Helen R. Stulman Professor, Department of History: Caribbean and Latin America.

Director of Undergraduate Studies
Floyd W. Hayes III
Coordinator of Undergraduate Studies and Programs, Senior Lecturer: African American and African Diaspora.

Professors
Siba Grovogui
Department of Political Science: international relations, Africa.

Jane Guyer
George Armstrong Kelly Professor, Department of Anthropology: Africa.

Michael Hanchard
Department of Political Science: comparative politics, Latin American politics, and comparative racial politics.

Pier Larson
Department of History: Africa and African Diaspora.

Katrina Bell McDonald
Department of Sociology: African America.

Hollis Robbins
Professor and Chair, Department of Humanities, Peabody Institute: African American literature.

Associate Professors
James Calvin
Carey Business School: business leadership and management practice, global leadership and community transformation.

Debra Furr-Holden
Department of Mental Health, Bloomberg School of Public Health: community health, African America.

Lester Spence
Department of Political Science: black politics, race and politics, urban politics, American political behavior and public opinion.

Assistant Professor
Nathan Connolly
Department of History: the historical role of land in the making of racial categories; the intersection of Jim Crow segregation and capitalism; American liberalism and conservatism as reflections of black class politics; comparative racisms; and black encounters with postmodernism, with an emphasis on the economic and cultural consequences of late 20th-century “diversity” discourse in the United States.

Professor Emeritus
Sara Berry
Professor Emeritus, Department of History: Africa. Professor, The Academy

Affiliated Faculty
Niloofar Haeri
Professor and Chair, Department of Anthropology: international relations, Africa.

Richard Jasnow
Professor, Department of Near Eastern Studies: Egyptology.

Michael Johnson
Professor, Department of History: Southern United States.

Philip Morgan
Harry C. Black Professor, Department of History: slavery, Atlantic history.

Ron Walters
Professor. Department of History: 20th-century United States.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.362.101. Introduction to Africana Studies. 3 Credits.
Introduction to the content and contours of Africana Studies as a field of study – its genealogy, development, and future challenges. Focuses on historic and contemporary experiences of African-descended peoples in the Americas.
Instructor(s): A. Young
Area: Humanities, Social and Behavioral Sciences.

AS.362.103. Introduction to African Arts. 3 Credits.
This course provides an overview of principal visual arts of Africa, pre-historic to contemporary.
Instructor(s): N. Bridges
Area: Humanities
Writing Intensive.

AS.362.104. Introduction to the African Diaspora. 3 Credits.
This course will begin in Africa before Atlantic slave trade, move to cover that trade into Brazil, the Caribbean and South Carolina. Comparisons of slave systems with Africa, Brazil, some parts of the Caribbean and Carolina (later South Carolina).
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.

AS.362.105. Reading Seminar: Black Society in the Americas. 3 Credits.
Jointly offered with Moira Hinderer, based on themes developed from the archives of the Afro-American Newspaper and selected readings of African American Societies from across the hemisphere of the Americas.
Instructor(s): F. Knight; M. Hinderer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.111. Introduction to African American Studies. 3 Credits.
This course is an introduction to the origins and emergence of African American Studies as an academic discipline in the American academy. The course is centered on the social realities of people of African descent living in the United States.
Instructor(s): K. McDonald
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.362.122. History of Africa. 3 Credits.
Instructor(s): K. Lehner
Area: Humanities, Social and Behavioral Sciences.

AS.362.175. Freshman Seminar: Remembering the Black Power Movement. 3 Credits.
This course critically examines trends, developments, contradictions, and dilemmas related to the Black Power Movement for black identity and self-determination in the late 1960s and 1970s.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.200. African American Poetry and Poetics. 3 Credits.
This course will explore the history and development of African American poetry from 1750 to the present (blues, rap, and hip-hop) examining the role of race, art, and cultural identity.
Instructor(s): H. Robbins
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

This survey course addresses the making and historical experiences of African Americans from the early seventeenth century to the conclusion of World War I.
Area: Humanities.

AS.362.204. Women in African History. 3 Credits.
Selected readings written by or about notable African women from the 17th century to the present. Themes explored include slavery, power and religion, economics, health and politics.
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.

AS.362.206. Research Seminar: Baltimore History from the AFRO Newspaper Archives-Community Based Learning. 3 Credits.
This small, project-oriented class will introduce you to methods in historical research while exploring major topics in twentieth century Baltimore history. We will use the rich reporting of Baltimore’s Afro-American Newspapers, to explore Baltimore’s place in the larger history of Black urban experience. Students will analyze images and exhibits related to African-American history, as well as research and curate small online exhibits of primary source materials including photographs, newspaper clippings, correspondence, pamphlets, flyers, and maps. We will be among the first scholars to work in the Afro’s rich archival collections, which include over a million images.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.210. Queerness and the Caribbean. 3 Credits.
From popular songs to legal statutes, the Caribbean has come under attack from North American groups for rampant homophobia. But the relationship between this homophobia and everyday Caribbean life is not as simple as legal sanctions against same-sex relationships and vitriolic condemnations in popular culture may make it seem. In this course, we will examine some queer spaces of existence and resistance that can be located in public and private Caribbean culture.
Area: Humanities.

AS.362.217. The Civil Rights Movement: Struggles for Racial Justice in Twentieth Century America. 3 Credits.
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.218. Madness and Caribbean Literature. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.362.220. Discourses in the African Diaspora. 3 Credits.
The African Diaspora has emerged as one of the “hot” topics of discussion in contemporary global race relations. The purpose of this course is to engage in a semester-long study into the meaning of the “African Diaspora.” Beginning with a brief reflection on some of the theoretical overlays on the topic, the course moves quickly into the heart of the subject matter. The course posts that beyond theoretical discussions, there is much to be learned from a close examination of the narrative accounts of individuals who have lived transnationally - who have themselves been actors and agents of the Diaspora.
Instructor(s): B. Vinson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.306. Seeing Baltimore History: Race & Community. 3 Credits.
This course will explore major topics in 20th century Baltimore history, using local newspapers and the archival collections of the Baltimore Afro American Newspaper.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.308. From Civil Rights to Multi-Culturalism: Student Movements for Social Change. 3 Credits.
This colloquium examines the historical and contemporary connections between student activism and the struggle for civil rights in America, combining classroom study with practical community collaboration. Scholarly readings and class discussions will provide historical context, familiarizing students with the history of student activism and the struggle for African American civil rights in the United States since World War II. A key focus of the class will be the black experience on campus, in communities, and in American society more generally. Students will also participate in collaborative fieldwork, partnering with local high school students and community activists to create a documentary film focusing on civil rights and community relations in Baltimore. A historical understanding of the student and civil rights movements will both inform, and be enriched by, students’ participation in the documentary project.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences.
AS.362.312. Contemporary Africana Social and Political Philosophy. 3 Credits.
This is a Writing Intensive course that investigates the contours and debates within three major schools of thought in contemporary Africana social and political philosophy: the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Angela Davis, Lewis Gordon, Kwame Gyekye, Leonard Harris, Paget Henry, Achille Mbembe, Charles Mills, Oyèrónke Oyibo, Cornel West, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics. Area: Social and Behavioral Sciences Writing Intensive.

AS.362.313. The Construction of the African Diaspora in the Americas. 3 Credits.
An examination of the various ways in which an African Diaspora developed across the Americas between 1492 and the present. Attention will be paid to the period of the Transatlantic slave trade but the greater emphasis will be on the complex societies that emerged by the early twentieth century and the responses of people of African descent to these societies. Readings will range across history, demography, economics, politics and culture in order to define a Diaspora and examine the factors that encourage or inhibit its formation. Cross listed with Africana Studies.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.362.340. Power and Racism. 3 Credits.
This course investigates the impact of white supremacy and anti-black racism, as a global system of power, on the political development of the United States of America.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences Writing Intensive.

AS.362.343. The Power of Place: Race and Community in East Baltimore. 3 Credits.
Despite this long, rich past, much of the history of black East Baltimore has been lost, preserved only in limited fragments, in scattered repositories, or not at all. Today, the history of this neighborhood and the experiences of people who have made it home are at risk of being lost forever. Students in this class will help to change this. Focused on the "Middle East" neighborhood, nearby the site of JHU's new biomedical park and the downtown campus, over the next fourteen weeks we will document and explore this neighborhood's rich history from the 1920s to the present day. Collecting and analyzing oral histories with current and former residents and supporting the work of several community organizations dedicated to improving quality of life for those who make the neighborhood home today will be critical to our work. Interviews, photographs, and related material collected as part of this class will become part of the JHU Center for Africana Studies "East Baltimore Oral History Project." As such, they will be archived and also become part of a growing resource that will assist scholars, teachers, and community members in recovering and uncovering this neighborhood's rich past.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.362.346. Critical Thinking, Sports, and the African American Experience. 3 Credits.
This course examines the influence of sports on American history and how that history has affected black athletes. A critical approach emphasizes the interrelationship of race, class, and gender domination.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.362.351. Crossing "El Masacre": Racial Identity, Nationalism and Anti-Haitianism in the Dominican Republic. 3 Credits.
Instructor(s): L. Garcia-Pena
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.362.355. The Obama's: Race and Politics in Comparative Perspective. 3 Credits.
This course will compare racial politics in the United States and Brazil by examining issues such as race, religion, and political behavior that arose during Barack Obama’s political campaign and time in office.
Instructor(s): G. Mitchell
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.362.357. Black Existential Thought. 3 Credits.
Black existentialism is a branch of Africana philosophy—the philosophical tendencies that arose out of the experience of the African Diaspora. This course is a philosophical interrogation into the meaning of the lived experience of being black in the context of an anti-black world through addressing such existential questions as freedom, identity, anguish, dread, responsibility, embodied agency, evil, resentment, liberation, and nihilism.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.362.360. Political Freedom in Africana Thought. 3 Credits.
Area: Social and Behavioral Sciences Writing Intensive.

AS.362.361. Major Topics in 20th Century Black History. 3 Credits.
Area: Humanities.

AS.362.362. Before the Wire: Black Baltimore History in the 20th Century. 3 Credits.
This course focuses on the history of urban Black communities in the twentieth century, with emphasis on Baltimore City. We will pay particular attention to the idea of “the ghetto,” examining both the origins of this idea and its effect on the political, economic, social, and cultural development of urban communities. In this class each student will create an original research project focused on some aspect of African American life in twentieth century Baltimore.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences.
AS.362.370. Senior Seminar: Historical Perpectives in Africana Studies. 3 Credits.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.374. Black Cinema. 3 Credits.
Close examination of films directed by African American filmmakers as well as a focus on historical and cultural representation of African Americans in American film.
Instructor(s): H. Robbins; L. DeLibero
Area: Humanities.

AS.362.375. Beebop, Modernism, & Change. 3 Credits.
This course explores the socio-political content, meanings, & intent of bebop, from the 1940’s-1960’s & examines the broader history of jazz & its impact on the social transformation of modern America.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.401. Comparative Slavery in the Americas. 3 Credits.
This course examines the development of slavery and racial thought in Latin America and the Atlantic World from the fifteenth century until its demise in the middle and late nineteenth century. Readings in social and cultural history are intended to focus on the life and labor of slaves, while readings from economic and legal history evaluate slavery as an institution. Intellectual histories are also assigned in an attempt to map the development of slavery as an institution typified by racial caste.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.412. Black Political Thought and the Enlightenment. 3 Credits.
This course examines how modern black political thought emerged through a series of critical engagements with Enlightenment ideas about universalism, progress, the authority of reason, and the foundations of citizenship. Course readings include texts by W. E. B. Du Bois, Paul Gilroy, Cornel West, Frantz Fanon, C. L. R. James, and others.
Instructor(s): A. Culver
Writing Intensive.

AS.362.414. Jim Crow in America. 3 Credits.
This course explores the cultural, economic, legal, and political factors that led to the establishment and maintenance of racial apartheid in the United States during the nineteenth and twentieth centuries.
Instructor(s): N. Connolly
Area: Humanities
Writing Intensive.

AS.362.416. Black Nationalism and its Critics. 3 Credits.
This seminar will pursue an in-depth, critical analysis of the history and philosophy of black nationalism and its relationship to other trends in black political thought. Readings from Alexander Crummell, Martin Delany, Frederick Douglass, W. E. B. Du Bois, Marcus Garvey, Malcolm X, James Baldwin, and others.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.

AS.362.457. Richard Wright & Modernism: Philosophy, Literature & Politics. 3 Credits.
The purpose of this seminar is to develop an interpretation that accounts for Wright’s philosophical, literary, and political commitments. In order to understand his development as a writer and intellectual-activist, we will examine his personal life experiences in the South and later in the Communist Party, as well as the complex philosophical ideas that shaped his thinking and writing. Through a critical and close reading of his fiction and nonfiction, seminar members will examine Richard Wright’s contribution to Africana existential thought, which is premised upon concerns of freedom, anguish, resentment, responsibility, embodied agency, sociality, and liberation.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.495. Afromexican History. 3 Credits.
Area: Humanities
Writing Intensive.

AS.362.501. Independent Study. 0 - 3 Credit.
This course is available to students who wish to pursue selected, special work that may not be included in the Center’s other courses.
Instructor(s): F. Hayes; F. Knight; M. Shell-Weiss; S. Berry.

AS.362.510. Directed Research in Africana Studies. 3 Credits.
Instructor(s): F. Hayes; F. Knight
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.590. Independent Study for Africana Studies. 3 Credits.
Instructor(s): F. Hayes
Writing Intensive.

AS.362.595. Summer Internship. 1 Credit.

Cross Listed Courses

History of Art

AS.010.240. Introduction to the Arts of the African Diaspora. 3 Credits.
This is an introduction to the Art of the African Diaspora. It is designed to provide foundational knowledge of the major theoretical understandings of Diaspora and the ways in which they help to illuminate the artistic traditions of people of African descent. The course will present a series of case studies in order to begin to understand the art of the Diaspora and the complexities of its study.
Instructor(s): T. Wofford
Area: Humanities.
AS.010.242. African American Art. 3 Credits.
This is an introduction to the history of African American art. While organized chronologically, the course will emphasize a series of case studies of artists and movements in order to understand African American art and the complexities of its study. The course will explore how black artists in the United States have engaged with key issues such as race, gender, class and ethnicity as well as debates about representation and the role of the artist. Cross-list with Africana Studies
Instructor(s): T. Woford
Area: Humanities.

AS.010.254. Art and Architecture of Early Christian and Medieval North Africa. 3 Credits.
Survey of Early Christian and medieval art and architecture in North Africa, with an emphasis on indigenous developments and cultural exchange in the Mediterranean world, 4th to 13th century. Dean's Teaching Fellowship course.
Instructor(s): N. Dennis
Area: Humanities.

AS.010.345. The African City: Art and the Politics of Place. 3 Credits.
Area: Humanities
Writing Intensive.

English

AS.060.359. Traveling Literature in Africa and the African Diaspora. 3 Credits.
Instructor(s): O. Ibironke
Area: Humanities
Writing Intensive.

AS.060.369. The Harlem Renaissance. 3 Credits.
Instructor(s): S. Mott
Area: Humanities
Writing Intensive.

AS.060.376. The Imprisonment of the African Writer from Mandela to Present. 3 Credits.
An international newspaper report in 1965 on writers from an African nation reads thus: “A year ago, one playwright was acquitted of holding up a radio station. A month ago, one poet was principal actor in a gunrunning melodrama.” This course examines the phenomenon of writers in politics. It explores the concept of engagement or commitment in literature as developed by Jean-Paul Sartre, particularly in postcolonial African literature. We will discuss the traditional notions of art and activism, imagination and ideology. The questions that are crucial to our concerns in this course include: why is writing in Africa a very hazardous career? How do writers respond to the threat and actual experience of metaphor, physical, and spiritual confinement and harm? What does the precarious situation of the African writer reveal about the nature of postcolonial societies? Texts include selections from theoretical essays and autobiographical narratives such as: Nelson Mandela, "No Easy Walk to Freedom"; Wole Soyinka, "The Man Died"; Ngugi wa Thiong'o, "Detained: A Writer's Prison Diary"; Jack Mapanje, "The Chattering Wagtails of Mkiyu Prison"; Denis Brutus, "Letters to Martha and Other Poems from a South African Prison"; Ken Saro-Wiwa, "A Month and a Day: A Detention Diary"; and Michel Foucault, "Discipline and Punish".
Instructor(s): O. Ibironke
Area: Humanities
Writing Intensive.

AS.060.668. The Slavery Debate in the Atlantic World.
This graduate seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban antislavery novels, slave narratives, and “classics” of “American” literature like Melville’s Benito Cereno. Our historical investigations into the rhetorical field of anti- and proslavery will be framed by a theoretical interest in political theology. How might critical reflection on sovereignty, recent and not so recent—from Derrida back to Bodin (widely acknowledged as having provided one of the first philosophical defenses of antislavery)—help us recast the intellectual history of the slavery debate and Atlantic radicalism, more generally?
Instructor(s): J. Hickman
Area: Humanities.

Film and Media Studies

AS.061.321. The Uses Of Difference: Race in Hollywood. 3 Credits.
Instructor(s): L. Bucknell
Area: Humanities.

Anthropology

AS.070.103. Community Based Learning - Africa & The Museum. 3 Credits.
An introduction to Africa, artistic creativity, collection and exhibition: as African history, as anthropology of art and objects, and as public controversy in our national institutions. Works with the Baltimore Museum of Art. Cross-listed with Africana Studies and Programs in Museums and Society.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.109. The Social Lives of Global Health Programs. 3 Credits.
The course critically examines the techniques, practices, and experiences of global health policies and programs, and explores how global health programs affect the lives of individuals and communities in diverse locations.

AS.070.150. The Anthropology of Africa. 3 Credits.
This course revitalizes classic debates about the forms and dynamics of Africa self-governance, once depicted as "The African Genius". Anthropological approaches and artistic sources are brought to bear on current African politics and governance.
Area: Humanities, Social and Behavioral Sciences.

AS.070.294. Political Anthropology of Africa. 3 Credits.
The course will explore classical and contemporary ethnographies of the political in Africa, examining how their authors address issues of power, hierarchy and symbol. We will study various articulations of state, ethnicity and community that are analyzed by observing relations between power and resistance or between law, economy and violence through war, custom and ritual. The seminar will also address the way in which Africa has been constituted as a key source of the sub-field of political anthropology through colonial trajectories, postcolonial detours and the political imagination of the past and the future.
Instructor(s): J. Obarrío
Area: Humanities, Social and Behavioral Sciences.
AS.070.602. Black Musics in Latin America and the Caribbean.
This course asks how black Caribbean and Latin American musics are connected, firstly to the national societies in which they live, and secondly to the larger context of the African diaspora and its global representations, both theoretically and through case studies from various Afro-Latin and Afro-Caribbean populations. Open to graduate and advanced undergraduate students, although the latter might find the class reading-intensive. Musical training or experience are not required. Cross-listed with PLAS, Africana Studies, Musicology (Peabody)
Area: Humanities, Social and Behavioral Sciences.

AS.100.313. The Construction of the African Diaspora in the Americas. 3 Credits.
An examination of the various ways in which an African Diaspora developed across the Americas between 1492 and the present. Attention will be paid to the period of the Transatlantic slave trade but the greater emphasis will be on the complex societies that emerged by the early twentieth century and the responses of people of African descent to these societies. Readings will range across history, demography, economics, politics and culture in order to define a Diaspora and examine the factors that encourage or inhibit its formation. Cross listed with Africana Studies
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.338. Contemporary African Political Economies in Historical Perspectives. 3 Credits.
How have contemporary achievements and problems in Africa been shaped by past events? What insights may be gained into contemporary conditions by viewing them in historical perspective? Using a series of case studies, this course will examine the history of issues such as economic development, nation building, migration, poverty and social conflict that affect many African nations today. Cross listed with Africana Studies
Instructor(s): S. Berry
Area: Humanities, Social and Behavioral Sciences.

AS.100.336. Race, Slavery, and Emancipation: The U.S. and the Black Atlantic, 1600-1880. 3 Credits.
This readings seminar places race, slavery, and emancipation in US history into the larger context of Black Atlantic to understand how global slave systems adapted to conditions in North America.
Instructor(s): M. Heerman
Area: Humanities, Social and Behavioral Sciences.

AS.100.343. The Power of Place: Race and Community in East Baltimore. 3 Credits.
Instructor(s): M. Shell-Weiss
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.387. Black Intellectuals and the Idea of Africa: Symbolism, Invention, and Reality in Modern Black Cultural Production. 3 Credits.
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.399. Decolonization and Nationalism in Africa. 3 Credits.
The end of European colonization in Africa after World War II and its causes, with an examination of the emergence and various forms of African nationalism. Cross listed with Africana Studies.
Instructor(s): P. Larson
Area: Humanities
Writing Intensive.

AS.100.439. Cuban Revolution and the Contemporary Caribbean. 3 Credits.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences Writing Intensive.
AS.100.440. The Revolutionary Experience in Latin America. 3 Credits.
Comparative examinations of revolutionary political changes in Haiti, Mexico, Bolivia, and Cuba. Cross-listed with Latin American Studies
Instructor(s): F. Vinson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.458. Visions of Africa. 3 Credits.
This course examines the ways in which representations of, and journeys to, Africa have shaped the contours of African American political activity, literary production, and social thought, 1619-2011. Cross listed with Africana Studies
Instructor(s): A. Ewing
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.463. African Diasporas: The Brazilian Experience. 3 Credits.
Instructor(s): A. Russell-Wood
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Instructor(s): B. Vinson

AS.100.709. Modern Latin America.
This course will examine selected themes in Modern Latin American history such as legacies of the colonial administrations, the plural societies, political cultures, slavery, and other forms of servitude; religious impact, independence movements, globalization and narco trafficking. Reading knowledge of Spanish required. Reading knowledge of Spanish required. Graduate Students only
Instructor(s): F. Knight

AS.100.746. History of South Africa.
A reading seminar focusing on significant and/or recent studies in the social history of South Africa. Cross listed with Africana Studies.
Instructor(s): P. Larson.

Near Eastern Studies

This course will trace the archaeological rediscovery of ancient Nubia and explore its changing significance in American culture. No prior knowledge of ancient Nubia is expected. Cross-listed with Africana Studies, History, and Museums & Society
Area: Humanities.

AS.130.400. Introduction to Middle Egyptian. 3 Credits.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). In the second semester, literary texts and royal inscriptions will be read. Course meets with AS.133.600.
Instructor(s): K. Davis
Area: Humanities.

AS.133.611. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required.
Instructor(s): B. Bryan; R. Jasnow.

Political Science

AS.190.214. Introduction to Racial and Ethnic Policy. 3 Credits.
What do scholars mean when they use concepts of race and ethnicity, and what are the political implications of these concepts in everyday life? One aim of this course is to answer this question. The second aim of this course is to help first-year college students develop familiarity with these concepts and an understanding of how ideas about racial and ethnic difference have impacted the formation of societies, governments, laws, policies and individuals, even themselves. Comparative in scope, this course will lead students through readings about racial and ethnic relations in countries like Brazil, England, Northern Ireland and China, often utilizing the United States as a referent. (AP) Cross-listed with Africana Studies
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.384. Urban Politics & Policy. 3 Credits.
An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross-listed with Africana Studies
Instructor(s): L. Spence; R. Katz
Area: Social and Behavioral Sciences.

AS.190.395. Crime and Society. 3 Credits.
Contrary to the image most Americans have of their country, the United States is a tough nation with respect to crime. The U.S. has constructed a considerably more harsh criminal justice regime than any of its advanced industrial counterparts. In recent years, America’s prisons and jails have held more than one percent of the nation’s adults--2.3 million people--with many more on parole, probation or temporarily free on bail awaiting trial. In Western Europe, by contrast, fewer than two-tenths of one percent of the adult populace is behind bars. This enormous discrepancy in incarceration rates is more a function of the relative severity of America’s criminal laws than differences between Europe and the U.S. in the actual incidence of serious crime. And, of course, while Western European nations no longer execute convicted criminals, the U.S. remains committed to the use of capital punishment. We will explore these and related issues of crime and punishment in the U.S.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

AS.190.440. The Revolutionary Experience in Latin America. 3 Credits.
Comparative examinations of revolutionary political changes in Haiti, Mexico, Bolivia, and Cuba. Cross-listed with Latin American Studies
Instructor(s): F. Vinson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.190.458. Visions of Africa. 3 Credits.

Instructor(s): P. Larson.

African and African American Studies

AS.100.128. Nubia: An African Kingdom in American Thought, 1767-2009. 3 Credits.
This course will trace the archaeological rediscovery of ancient Nubia and explore its changing significance in American culture. No prior knowledge of ancient Nubia is expected. Cross-listed with Africana Studies, History, and Museums & Society
Area: Humanities.

AS.130.400. Introduction to Middle Egyptian. 3 Credits.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). In the second semester, literary texts and royal inscriptions will be read. Course meets with AS.133.600.
Instructor(s): K. Davis
Area: Humanities.

AS.133.611. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required.
Instructor(s): B. Bryan; R. Jasnow.
AS.191.340. Education Politics in Urban America. 3 Credits.
This seminar analyzes trends, developments, and future challenges related to the politics of urban public schooling with a concentration on community political dynamics and the struggle for equal educational opportunity and quality education. The course emphasizes the impact of socioeconomic class inequality, racial/ethnic conflict, and gender politics on the changing character of public school reform since the 1954 Supreme Court decision of Brown v. Board of Education. Cross-listed with Africana Studies.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences

AS.191.371. Theorists of African National Liberation. 3 Credits.
The second half of the 20th century witnessed a number of anti-colonial struggles across the African continent. This course reads the work of various theorists, novelists and organic intellectuals from these struggles in order to examine a number of important theoretical questions, such as: What is 'Africa'? How does colonial rule operate? What might political, economic and social liberation look like? These analyses will then be used to examine a number of contemporary issues facing the African continent. Cross-listed with Africana Studies.
Instructor(s): I. Kamola
Area: Social and Behavioral Sciences

Public Policy
Perm. Req’d. This course teaches students to think analytically and to apply analytic thinking to policy problems. Students work through several real-world problems primarily in social, urban, and health policy, to master the essential steps of any policy analysis: identifying the problem, assessing the available evidence, specifying goals and constraints, and examining policy alternatives. Course goals also include understanding some of the major policy debates of the day, and communicating in a simple, clear, and direct way.
Writing Intensive.

AS.195.685. Adolescents, Crime, and Justice.
Instructor(s): D. Altschuler.

German Romance Languages Literatures
AS.210.177. Portuguese Elements. 4 Credits.
This one-year course introduces students to the basic skills in reading, writing, and speaking the language. Emphasis is placed on oral communication with extensive training in written and listening skills. Class participation is encouraged from the very beginning. All classes are conducted in Portuguese. Extensive language lab is required. Students must complete both semesters with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. No previous knowledge of Portuguese is required.
Instructor(s): M. Bensabat Ott.

AS.210.277. Intermediate/Advanced Portuguese. 3 Credits.
More advanced training in the skills of the language with emphasis on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. All classes are conducted in Portuguese. Extensive language lab is required. May not be taken on a Satisfactory/Unsatisfactory basis.
Prerequisites: AS.210.177 AND AS.210.178 or placement exam
Instructor(s): M. Bensabat Ott
Area: Humanities.

AS.210.391. Advanced Portuguese Language & Literature I. 3 Credits.
This three-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read one or two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. Lab work is required. All classes are conducted in Portuguese.
Prerequisites: AS.210.277 AND AS.210.278 or placement exam
Instructor(s): M. Bensabat Ott
Area: Humanities
Writing Intensive.

AS.211.394. Brazilian Cult & Civ. 3 Credits.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)
Instructor(s): M. Bensabat Ott
Area: Humanities
Writing Intensive.

AS.212.305. Introduction to Francophone Caribbean Literature and Postcolonial Studies. 3 Credits.
This course is designed to introduce students to the history and cultural contexts of Francophone Caribbean writings. It offers a panorama of twentieth-century Francophone Caribbean Literature from the négritude movement to the contemporary period. It introduces to various texts by Aimé Césaire, Marie Chauvet, Maryse Condé, Patrick Chamoiseau, René Depestre, Frantz Fanon, Édouard Glissant, Dany Laferrière, Jean Mélélias, and Jacques Roumain. We will explore these writings of various literary genres in relation with topics such as memories of slavery, re-writings of history, representations of sexuality, exile, exoticism, métissage and créolité. Great emphasis will be laid on the specific historical and cultural background of Guadeloupe, Martinique and Haiti. Another significant component of this module will be the constant oscillation between theories and fictions, contexts and contents. More generally, this course will provide students with an insight into the French-language contribution to postcolonialism, and an examination of Francophone postcolonial thought and culture. Challenges will also be made with American and British literature (with authors such as James Baldwin and Graham Greene) and with Anglophone Caribbean literature (with authors such as Edward Danticat). Key notions of postcolonial theory such as exoticism, hybridity and métissage will be examined and, hopefully, challenged.
Prerequisites: AS.212.201 OR AS.212.202 or permission
Area: Humanities.

Taught by Visiting Professor Lydie Moudileno: The course will examine representation of Europe, mostly but not exclusively France and Paris in the fiction produced by writers from the former French colonies, from the 1950’s to the present.
Instructor(s): L. Moudileno.
AS.215.458. Cuba and its Culture Since the Revolution. 3 Credits.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.

Sociology

AS.230.112. Freshmen Seminar on Race & Education. 3 Credits.
The goal of this course is to explore issues of race and ethnicity in American education. We begin by studying the landmark Supreme Court case, Brown V. Board of Education, and related school segregation and resegregation issues. Through lectures, discussions, and films, students will become familiar with various sociological lens through which the educational issues facing blacks, Asians, Latinos, and American Indians are analyzed. Cross-listed with the Center for Africana Studies.
Instructor(s): P. Bennett
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.208. Introduction to Race and Ethnicity. 3 Credits.
This course offers an historical overview of race and ethnicity in American society, and the processes that have led to ethnic and racial boundaries. We explore the social dynamics of racial/ethnic hostility and racial/ethnic protest movements. In addition, we examine how race and ethnicity have begun to justify segregation, domination and genocide, but also to create a sense of community, shared responsibility and belonging. Cross-listed with Africana Studies
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences.

AS.230.309. Segregation & Social Inequality. 3 Credits.
This course presents an in-depth study of racial and ethnic residential segregation and its relationship to social inequality. Through various theoretical perspectives, students will explore the history and contemporary patterns of residential segregation in the United States. In doing so, students will learn about the persons, organizations, and social phenomena that contribute to neighborhood segregation, such as homeowner associations, federal and local governments, developers, as well as differences between groups in racial preferences and socioeconomic status. Through lectures, readings, discussions, and films, students will gain insight into the causes of segregation, as well as its social, economic, and demographic consequences. Cross listed with the Center for Africana Studies.
Instructor(s): P. Bennett
Area: Social and Behavioral Sciences.

AS.230.313. Space, Place, Poverty & Race: Sociological Perspectives on Neighborhoods & Public Housing. 3 Credits.
Is a neighborhood just a grouping of individuals living in the same place, or do neighborhoods have collective meanings and impacts on children and families? We will capitalize on research methodologies used to define and describe neighborhoods and their effects on economic and educational outcomes. These include case studies, census data, surveys, quasi/experimental data. Focus is on how research measures neighborhood effects and incorporates community level processes into models of social causation (e.g., social capital/control, community efficacy, civic engagement). Also examined: patterns in residential mobility, segregation, and preferences within black and white populations; development of housing policy in the U.S.; programs to determine how neighborhoods affect issues of social importance. Statistics and public policy background is helpful but not required.
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.316. African American Family. 3 Credits.
This course is an examination of sociological theories and studies of African-American families and an overview of the major issues confronting African-American family life. The contemporary conditions of black families are explored, as well as the historical events that have influenced the family patterns we currently observe. Special attention will be given to social policies that have evolved as a result of the prominence of any one perspective at a given point in time.
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences.

AS.230.320. Education & Inequality: Individual, Contextual, and Policy Perspectives. 3 Credits.
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.340. Sociology of Privilege. 3 Credits.
This course examines how privilege—as a system of advantage based on race, class, gender, and sexuality—operates in social institutions including family, education, occupation, wealth, housing, migration, and media.
Area: Social and Behavioral Sciences.
AS.230.356. Contemporary African Social Movements. 3 Credits.
This course is a survey of contemporary social movements in sub-Saharan Africa. The course will begin with an introduction to social movement theory. Subsequent weeks will each focus on a different type of movement (e.g. independence movements, labor movements, women’s movements, environmental movements, etc.) The limited coverage of African issues in the US media tends to focus on either catastrophes or on development projects that are driven by international NGOs and the governments of northern countries. Through this course, students will gain a clear understanding of the broad range of actions that African civil society is using to address social problems throughout the continent. Materials used will include academic analysis of movements, writings by movement participants themselves, and films. The course will also introduce students to the most widely used social movement theories. Because these theories have been largely developed by social scientists in northern countries, the students will be asked to assess their applicability to African movements. Through this critical application of social theory, students will investigate the specific possibilities and constraints facing social and political actors in contemporary Africa. Cross listed with Dean’s Teaching Fellowship, International Studies (CP) and Africana Studies.
Instructor(s): B. Scully
Area: Social and Behavioral Sciences
Writing Intensive.

Program in Latin American Studies
AS.361.350. Mestizaje and Race in Latin America. 3 Credits.
The course problematizes how race and mestizaje became socio-political realities and forms of lived experience in Latin America, shaping such things as governmental practices, spatial configurations, interpersonal relations, and political mobilizations. PLAS Teaching Fellowship.
Instructor(s): A. Reyes Kipp

Anthropology

The Anthropology Department specializes in socio-cultural anthropology: the study of social and cultural forms of human life using ethnographic, historical, and comparative methods. Faculty in our department are engaged in research that addresses topics considered traditional such as the study of ethnicity, language, family and kinship, or medical pluralism, and also new and emergent issues such as those relating to childhood, technological imaginaries, biomedicine, state, violence, and popular economies. In all cases, the acute awareness of shifting contexts in which institutions are embedded and the impact of global, regional, and national politics on social life is built into the methodology and the theory engaged by faculty and students. Faculty in our department have research expertise in the Americas, South Asia, the Middle East, and sub-Saharan Africa. Our research is oriented toward the investigation of a number of cross-cutting themes of trans-regional concern rather than a comprehensive coverage of global cultural areas.

The department’s distinctive orientation to anthropology can be characterized in terms of its orientation to non-European anthropological and philosophical traditions, alongside the dominant anthropologies which have been seen as definitive of the discipline in the past. In terms of specific topics, faculty in our department are engaged in research on violence, social suffering and theories of everyday life; the material and moral force of the state; money and value; environments; new kinship; anthropology of religion and secularism; anthropology of medicine; media and visual anthropology; health and well-being; and anthropology of language.

The department offers a B.A. program and a Ph.D. program. The B.A. prepares students either to continue to a higher job or degree in anthropology (and related fields) or to develop anthropological skills and imagination as complementary to pre-professional training, such as medicine, engineering, and international relations.

Undergraduate course work offers an introduction to the basic methodologies and theories of contemporary anthropology through discussion and directed research on these and other topical issues. Student advising helps interested students to develop concentrations, through sequences of complementary courses tailored to their own interests, including electives outside the department. In addition, majors have the option to pursue an honors program.

Undergraduate majors in anthropology are required to do seven courses, two of which are required courses and an additional two must be taken at 300-level or higher, in addition to a language requirement. Students wishing to write an honors thesis are also required to do two additional courses in which they work on their dissertation topics. Minors are required to take six courses. The Logic of Anthropological Enquiry is recommended but not required for the minor.

The core curriculum for majors develops a step-wise sequence from the freshman seminar to the senior honors option. We offer an elective 100-level Freshman Seminar that introduces anthropological approaches to a broad range of contemporary issues. Here, we hope to develop curiosity in anthropology as a way of knowing the world, and to encourage critical student reflection on their own life experiences. Our 100-level introductory course, Invitation to Anthropology, is geared toward freshmen and sophomores. The objective of this course is twofold: to offer anthropological knowledge and analytic skills to a broad range of students, and to prepare potential majors for further training in social theory and fieldwork methods. Following from this introductory course, our 300-level The Logic of Anthropological Inquiry is a requirement for majors. It deepens students’ capacity to link theory and method, prepares students to carry out field research, and guides students in the presentation of original research. Building on this foundation, the Junior/Senior Seminar, also required of majors, is a thematic capstone course that demands an extended engagement with classic debates and encourages integrative thinking across the range of anthropology courses taken. By the end of their junior year, majors in anthropology may decide to pursue an honors thesis based on an extended research project. Drawing from their previous course preparation and working closely with a faculty advisor, such students spend one summer conducting field research, one semester conducting secondary literature review, and the final semester writing their honors thesis.

Outside of the core curriculum, both majors and minors may take a wide variety of courses. Thematic courses are highly varied and reflect faculty interests, usually including (in any one year) courses in religion and philosophy; medical, legal, economic and linguistic anthropology; and study of diverse areas of the world. Courses on the state, law, and money offer a critical and comparative approach for students aiming toward political, economic, and legal careers. Courses in medical anthropology serve pre-med and public health students. Philosophical and theoretical courses are attractive to humanities students. We see teaching and research as integrally linked, and invite undergraduate students to envisage research as they take introductory and advanced courses in anthropology.

The training of graduate students focuses on providing students with a vocabulary and grammar to engage in anthropological reasoning in socio-cultural anthropology and with skills in research methods. The
department emphasizes training in anthropological theory in relation to new developments in other disciplines within the social sciences; understanding of regions in terms of cross-cutting questions rather than geographical questions alone; and the capability to place a problem within a broad history of anthropology that is engaged through multiple national and regional traditions.

Our faculty brings into the classroom an extraordinary range of personal and professional experiences. We are proud to have one of the most diversified faculties in the discipline worldwide, both in terms of gender and ethnic or national origins. Their collective fieldwork experience spans the world, including the Americas, the Middle East, sub-Saharan Africa, and South Asia.

Facilities
In addition to the regular departmental colloquium where invited speakers from Hopkins and other campuses around the world present their ongoing research, the department holds one or two special symposia every year, including one organized by graduate students. The department also invites a distinguished scholar each year to present the Sidney W. Mintz Lecture. The purpose of the Mintz lectures is to integrate scholarly and social concerns, focusing on questions of political and economic inequality, racism, gender, and ethnic differences from an interdisciplinary perspective. Previous lectures have subsequently been published in Current Anthropology.

The Baltimore-Washington area is unusually rich in library, archival, and museum resources relating to anthropology. In addition to the excellent collection in the Milton S. Eisenhower Library, the William H. Welch Medical Library, and other libraries at Johns Hopkins, major anthropological holdings are available at the Smithsonian Institution, the Library of Congress, and the other specialized libraries and museums in nearby Washington, D.C. Students can use the Smithsonian Institution’s ethnological and library collection through a cooperative arrangement.

Financial Aid
Undergraduate majors and non-majors are eligible to apply for a Provost’s Undergraduate Research Award to support special research and write-up projects in their senior year.

Graduate fellowships and teaching assistantships are available, and most students admitted receive support. Stipends are currently offered at $20,000 per year plus fellowships that cover tuition. Some additional funds are usually available on a competitive basis for summer field research (including travel grants from the Institute for Global Studies, the Program for the Study of Women, Gender, and Sexuality, and the Program for Latin American Studies), for special language-learning needs, and for dissertation write-up; the award of an Owen Fellowship in Arts and Sciences provides an additional $5,000 per annum for three years on a competitive basis. Write-up students may apply for a Dean’s Teaching Fellowship.

Requirements for the B.A. Degree
To fulfill the general requirements for the B.A. degree, students majoring in anthropology must complete a total of 21 credits (7 courses) in Anthropology. These include:

- AS.070.319 Logic of Anthropological Inquiry
- AS.070.317 Junior/Senior Seminar
- Five other courses
  - Two at the 100- or 200-level
  - At least three more courses at 300-level or higher, of which one can be a cross-listed course taught outside the department. After consultation with faculty, majors can take an independent study course toward the major. There is also a possibility of doing the anthropology major with a defined concentration, for which students are advised to consult the director of undergraduate studies.

Honors Thesis in Anthropology
Students with at least a 3.5 GPA (major GPA) by their junior year are encouraged to write a senior thesis by registering for a two-semester independent study with a faculty advisor. When there are five or more students who wish to write theses, a three-credit senior thesis seminar will be offered which can replace one of these independent studies.

Minor in Anthropology
A minor in anthropology is available to undergraduate students in any major. Students should discuss their intention to minor in anthropology with the department’s undergraduate advisor. Requirements for the minor are:

- One 100-level or 200-level course within the anthropology offerings.
- Five other courses at 200-level or above, of which at least three must be at or above the 300-level.

Ph.D. in Anthropology
The graduate program in anthropology leads to the Ph.D. degree. By admitting only a few students each year, the Department of Anthropology encourages close working relationships between students and faculty and the opportunity for students to develop their anthropological interests in ways that are uniquely suited to them to become researchers, scholars, and teachers.

Requirements for the Ph.D. Degree
Students will usually spend two to three years in residence, one year or more conducting field research, and a final year completing the dissertation. Requirements include:

- A total of 10 courses to be completed in the first two years, two of which are required courses on theory and method: Pro-Seminar and Anthropological Research Methods. For the sequencing of the required courses, students should consult the detailed guidelines available in the department.
- A student should be able to demonstrate a reading knowledge of at least one foreign language relevant to his/her field of study before completing the comprehensive exams in the second semester of the second year of study.
- For the comprehensive exams, students are required to write two essays (one conceptual and one on area). These essays will ideally also help develop their research proposal. The papers should
preferably be completed by the end of the second year. A course called “regions” has been developed to assist students in writing this essay.

- Students are expected to conduct exploratory fieldwork during at least one summer and to discuss their summer fieldwork in a departmental methodology workshop. The requirement must be completed before qualifying exams that allow students to proceed to their dissertation research. Students are also encouraged to take the proposal-writing course when offered and to apply for fieldwork grants from external agencies.

For further information about graduate study in anthropology, contact the academic program administrator in the Department of Anthropology or visit the departmental website at http://anthropology.jhu.edu.

**Interdisciplinary Ph.D. Degrees**

Students can petition the department and the graduate board to create joint Ph.D. courses of study. Current cases include Anthropology/Public Health and Anthropology/Intellectual History (in the Humanities Center).

For current faculty and contact information go to http://anthropology.jhu.edu/faculty.html

**Faculty**

**Chair**
Niloofar Haeri
Professor: Islamic prayers and experiences of religiosity, gender, ritual, repetition, and language, public appearance and notions of modesty among Jews, Christians and Muslims, language ideology, vernacularization and language standardization. Egypt, Iran and the Middle East.

**Professors**

Veena Das
Krieger-Eisenhower Professor: history and myth, philosophy and anthropology, violence, social suffering, medical anthropology; South Asia, Europe.

Jane Guyer
George Amstrong Kelly Professor: social and economic anthropology, money and culture, household and gender; West Africa.

Deborah Poole
visuality and representation; race and ethnicity; violence, liberalism, and the state; law and judicial reform; Latin America (Peru, Mexico).

**Associate Professor**

Anand Pandian
(Director of Undergraduate Studies): ethnography, experience, ecology, media, modernity, South Asia.

**Assistant Professors**

Emma Cervone
race, gender, ethnicity and the nation, contemporary indigenous movements in Latin America; aid, development and community building; race, gender and immigration in Southern Italy, engaged anthropology; Latin America.

Clara Han
medical anthropology; violence, urban poverty, subjectivity, care, and everyday life; Chile, Latin America.

Naveeda Khan
anthropology of religion, violence and everyday life, state and urban formations, political affect, Islam, South Asia.

Juan Obarrio
political theory, law and justice, development and value, temporalities; Southern Africa, South America.

**Professor Emeritus**

Sidney W. Mintz
Research Professor: economic anthropology, peasant society, food, life history; Latin America, Caribbean.

**Lecturer**

Aaron Goodfellow
Senior Lecturer: the social/cultural meaning of pharmaceuticals, the technology of sexually transmitted disease (std) prevention; the social/cultural meaning of medical interventions, social suffering, kinship, paternity, queer families, sexuality and gender.

**Joint Appointments**

Lori Leonard
Associate Professor (Health, Behavior and Society): social and economic change; natural resources and extractive industries; transnational governance; gender; health; longitudinal studies; Africa.

Erica Schoenberge
Professor (Geography and Environmental Engineering): economic geography, regional development, environment and society.

For current course information and registration go to https://isis.jhu.edu/classes/

**Courses**

**AS.070.103. Community Based Learning - Africa & The Museum. 3 Credits.**

An introduction to Africa, artistic creativity, collection and exhibition: as African history, as anthropology of art and objects, and as public controversy in our national institutions. Works with the Baltimore Museum of Art. Cross-listed with Africana Studies and Programs in Museums and Society.

Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.106. Brains/Minds: An Anthropological Critique. 3 Credits.**

Are our minds the products of our physical brains? Can biological mechanisms of the brain explain the diversity of our mental lives? This course will explore the strange ways in which contemporary neurosciences influence and change our conceptions of mind, selfhood and interpersonal relations. We will examine the psychobiological accounts of behavior and their anthropological critique thereby tracking the hopes and anxieties that accompany and surround the contemporary transformation of ideas and techniques in modern psychobiology.

Instructor(s): B. Polat
Area: Humanities
Writing Intensive.
Instructor(s): N. Mahadev

array of ideas and experiences that Catholic, Protestant and Pentecostal scholars of religion, how do we make sense of, and describe, the wide propelled in various regions of the world. and selected readings in anthropology.

AS.070.113. Freshman Seminar. 2 Credits.

Students will be introduced to anthropology through ethnographic films and selected readings in anthropology.

Instructor(s): N. Haeri

Area: Humanities, Social and Behavioral Sciences.

AS.070.123. Christianities in Cross-Cultural Perspective. 3 Credits.

This introduction to the budding field of Anthropology of Christianity will help students learn about the diversity of Christianities that have emerged as Christian religious ideas and practices have been promoted and propelled in various regions of the world. As students, investigators and scholars of religion, how do we make sense of, and describe, the wide array of ideas and experiences that Catholic, Protestant and Pentecostal Christians of various cultural backgrounds hold to be true?

Instructor(s): N. Mahadev

Area: Social and Behavioral Sciences.

AS.070.129. Introduction to the Anthropology of the Middle East. 3 Credits.

This course introduces the students to some of the main themes and debates shaping the anthropology of the Middle East. It will begin by critically analyzing the definition of the ‘Middle East’ and of the ‘Orient’ and by presenting an overview of the ‘zones of theory’ which characterized the discipline at its inception. It will then explore the contemporary re-articulations of such themes and the emergence of new themes and debates, such as the secular/religious divide, the modernity debate, the anthropology of Islam and the ethical turn, gender and feminism, neoliberalism, consumerism, cosmopolitanism, migration and mediation. The objective is to convey the main lines of anthropological inquiry within each theme, and to show their relevance to the understanding of contemporary Middle Eastern societies.

Instructor(s): P. Abenante

Area: Humanities, Social and Behavioral Sciences.

AS.070.132. Invitation to Anthropology. 3 Credits.

The course critically examines the techniques, practices, and experiences of global health policies and programs, and explores how global health programs affect the lives of individuals and communities in diverse locations.

Area: Humanities, Social and Behavioral Sciences.

Instructor(s): A. Goodfellow

AS.070.133. Freshman Seminar. 2 Credits.

The course seeks to engage students on the question of how well-being is construed in African contexts. By examining well-being through an ethnographic lens, we will explore the construction of “Africa” for the way it gives shape to particular ideas about the body, politics and experience. Well-being as an ethnographic object has a rich history in various African locales, and continues to be an important trope in contemporary life, whether figured as wealth, health, and stability or as loss, disease or disorder. In order to trouble both notions of well-being and the idea of “Africa”, the course will do two things: firstly, we will look for the ways in which the geo-cultural notion of an “African” experience has informed scholarly analysis, political histories, and modes of governance. Reading critically will allow us to de-stabilize the categories of life and well-being that are ascribed to, and claimed by, “Africans”. Secondly, we will examine particular forms of trouble that often attach to the imagination of Africa, with specific reference to forms of mental, physical and social disorder. Rather than arriving at a deconstruction of the idea of Africa, or suggesting a vital form that is essential to Africa, the course relies on ethnographic and historical modes of exposition to ask a series of questions about local lives. While grounded within anthropology the course will read texts that go beyond the borders of the discipline, both scholarly and popular, in order to track the development of specific ideas about well-being in Africa and to examine anthropology’s involvement in these ideas. The course is organized thematically rather than adhering to a chronological or spatial logic. The intention is to place together quite different texts that work in tension to illuminate the particular theme for each week.

Instructor(s): T. Cousins

Area: Social and Behavioral Sciences.

AS.070.135. Anthropology of Islam. 3 Credits.

Instructor(s): T. Cousins

Area: Social and Behavioral Sciences.

AS.070.138. Commodities and Comfort: The Anthropology of Mass & Popular. 3 Credits.

What tools do anthropologists use to understand the world in which we live and the objects that surround us in daily life. What might anthropologists have to say about hollywood films, cyber space, shopping malls, fast food, raves, hip-hop, and the 24 hour news media? Through an investigation of anthropological engagements with mass and popular cultural forms, as they are consumed, enacted, or resisted across the globe, students will explore different methodologies and approaches to the study of contemporary cultural forms.

Instructor(s): A. Goodfellow

Area: Humanities, Social and Behavioral Sciences.

AS.070.140. Undergraduate Seminar: Commodities & Comfort: The Anthropology of Mass & Popular. 3 Credits.

What tools do anthropologists use to understand the world in which we live and the objects that surround us in daily life. What might anthropologists have to say about hollywood films, cyber space, shopping malls, fast food, raves, hip-hop, and the 24 hour news media? Through an investigation of anthropological engagements with mass and popular cultural forms, as they are consumed, enacted, or resisted across the globe, students will explore different methodologies and approaches to the study of contemporary cultural forms.

Instructor(s): A. Goodfellow

Area: Humanities, Social and Behavioral Sciences.

AS.070.142. Commodities and Comforts: The Anthropology of Mass & Popular Culture. 3 Credits.

What tools do anthropologists use to understand the contemporary? How do anthropologists understand the world in which we live and the objects that surround us in daily life. What might anthropologists have to say about hollywood films, cyber space, shopping malls, fast food, raves, hip-hop, and the 24 hour news media? Through an investigation of anthropological engagements with mass and popular cultural forms, as they are consumed, enacted, or resisted across the globe, students will explore different methodologies and approaches to the study of contemporary cultural forms.

Instructor(s): A. Goodfellow

Area: Humanities, Social and Behavioral Sciences.

AS.070.150. The Anthropology of Africa. 3 Credits.

This course revitalizes classic debates about the forms and dynamics of Africa self-governance, once depicted as “The African Genius”. Anthropological approaches and artistic sources are brought to bear on current African politics and governance.

Area: Humanities, Social and Behavioral Sciences.

AS.070.152. Freshman Seminar: Human Rights in Anthropology. 3 Credits.

Area: Humanities, Social and Behavioral Sciences.
AS.070.166. Desire and Anthropology. 3 Credits.
Desire seems to lie at the heart of who we are. Has this always been the case? How did desire become the core of our identities in the Western world? How do people in other places imagine, manage, and struggle with what they want, for themselves and from each other? This course will introduce anthropological thinking and method through a focus on human desire. We will examine how objects of human longing are experienced around the world, in relation to questions of religion, sexuality, media, and ecology.
Area: Humanities, Social and Behavioral Sciences.

AS.070.179. Child Adoption and Family Making. 3 Credits.
The course takes child adoption as a starting point to critically explore how kinship and family are connected to legal practices, technological innovations, and broader historical, political, and socio-economic processes. Dean’s Prize Freshman Seminar.
Instructor(s): A. Reyes Kipp
Area: Humanities, Social and Behavioral Sciences.

AS.070.189. Islamic Critique: Ethical and Political Reasoning. 3 Credits.
This course investigates the concepts and practices of critique available in contemporary Muslim societies. Focusing on moral and political dimensions of critique, we examine genealogies and exchanges among Islamic traditions and those of the European Enlightenment. Dean’s Prize Freshman Seminar.
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences.

AS.070.195. Christianities in Cross-Cultural Perspective. 3 Credits.
This introduction to the budding field of Anthropology of Christianity will help students learn about the diversity of Christianities that have emerged as Christian religious ideas and practices have been promoted and propelled in various regions of the world. As students, investigators and scholars of religion, how do we make sense of, and describe, the wide array of ideas and experiences that Catholic, Protestant and Pentecostal Christians of various cultural backgrounds hold to be true? Dean’s Prize Freshman Seminar.
Area: Humanities, Social and Behavioral Sciences.

AS.070.199. Sexual Politics/Sexual Cultures. 3 Credits.
Sexual Politics, Sexual Cultures examines the place of sexuality in notions of citizenship, the human, and cultural life from a cross-cultural perspective. The class begins by evaluating early anthropological engagements with questions of sexuality and moves towards more recent efforts to understand public and political debates about queer families, emergent transnational sexual identities, and HIV/AIDS. The course draws from the work of such thinkers as Malinowski, Freud, Foucault, Cohen, Biehl, Weston, and Herdt.
Instructor(s): A. Goodfellow
Area: Social and Behavioral Sciences.

AS.070.200. On Secrets - Their concealment, Revelation & Beyond. 3 Credits.
We track secrecy as a social process. We examine secrets – their concealment and modes of existence (secret societies, esoteric rituals, state secrecy); the politics of their revelation (from colonial contexts to Wikileaks); and their modes of existence thereafter in the modern world (within public spheres, as intellectual property).
Instructor(s): U. Nair
Area: Humanities, Social and Behavioral Sciences.

AS.070.219. Anthropology & Public Action. 3 Credits.
Anthropologists have used their expertise in public debates, legal cases, advisory roles and so on, and have studied the “public sphere”. General case studies, following of our professional association, shows how anthropological knowledge has been mobilized.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.222. Africa in the 21st Century. 3 Credits.
Rapid urbanization has created new needs, occupations, entertainments, etc., outside the “formal sector”. We use anthropological studies, African literature, film and the press on-line to understand making a living.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.225. The Nature of Extraction. 3 Credits.
How are cultural and political lives shaped by the promise of subsoil resources? This course explore the multiple ways in which mineral extraction reshapes politics, law and ethical life.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

AS.070.229. Understanding What’s Normal. 3 Credits.
The course engages notions of “the normal”, “the abnormal”, and “the pathological” in contemporary thought. In what ways are such notions relevant between the scientific and the social, between living and non-living, between the rational and the irrational? In order to address these questions, the course focuses on readings by Georges Canguilhem (on the normal and pathological, on monsters and monstrosities, on disease and health), Michel Foucault (on perversion, on social norms), Lorraine Daston (on wonderment in science, on objectivity, on curiosities), and François Delaporte (on anatomical change, on facial transplantation). The course will also include several films (“Shock Corridor”, “Glen or Glenda”, and “Eyes without a Face”) to be considered alongside the readings. The disciplinary perspectives in the course draw from anthropology, philosophy of science, politics, epistemology, and the history of medicine.
Area: Humanities, Social and Behavioral Sciences.

AS.070.242. Korean Culture. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.070.248. Medical Anthropology. 3 Credits.
How can we explore illness as moral experience; the interplay of social processes, biology, and medicine; the social experiences of death and dying? We explore these questions in ethnographic work, as well as film, medicine and public health studies.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

AS.070.250. Introduction to Modern Religion and Secularism. 3 Credits.
We often hear about the resurgence of religion within our secular public sphere. In this class we will use ethnographies, histories, films and social theory to examine the concepts and claims that go into making this statement before we gauge its truth.
Area: Humanities, Social and Behavioral Sciences Writing Intensive.
AS.070.251. Coca, Cocaine, Demons and Wars. 3 Credits.
This course considers the social, political and cultural processes through which the coca leaf, as key ingredient of cocaine, has been put at the center of an international conflict that entails questions of traditional cultures, indigenous rights, social movements, national sovereignty, counter-insurgency and violence in US and Latin America. It examines the cultural uses of the coca leaf; the role of “panics” in shaping cocaine as a source of danger and leading to the US War on Drugs; and its consequences for both coca growing areas and US inner cities. Area: Humanities, Social and Behavioral Sciences.

AS.070.252. Drugs, Culture, Politics. 3 Credits.
Through the study of the ways in which drugs, states, and people are interlinked by the use, trade, and regulation of various legal and illegal intoxicants (and pharmaceuticals), this course will explore key areas of anthropological interest. We will look at the ways drugs work in and on the body, the person, and the collective, and investigate the place of drugs in religion, medicine, society, law, economy, and the family.
Instructor(s): J. Williams
Area: Humanities, Social and Behavioral Sciences.

AS.070.256. Monsters, Beasts & Aliens: Cosmology in Asian Religious Traditions. 3 Credits.
This course examines the types of beings that act as agents in Asian religious worlds. Using primary sources, along with literature from Anthropology and Religious Studies, we will explore issues of narrative, belief, personhood, otherness, and marginality. Some of the central questions of the course are: What types of creatures populate the Buddhist and Hindu cosmos? How do we make sense of worlds that contain different beings than our own? What makes us, or others, “believe” in the beings that are beyond our perception? Do religious traditions need monsters and beasts in the world in the same way they need gods? The course is organized around a three-part cosmology, found in many Asian religious traditions, which divides the universe into the realms (1) above the earth, (2) on the earth, and (3) below. The course thus first explores encounters with beings of the underworld and graveyards (“monsters”), and investigates religious practices and beliefs related to these monsters. The “beasts” section of the course turns to beings encountered on the earth: from local spirits and mountain deities, to monkey-men and yetis.

AS.070.259. Gift and Sacrifice. 3 Credits.
How do gifts become the foundation of society? How does the fetish take control over a person? What is the meaning of the ritual sacrifice of living beings and things? The course will provide an introduction to anthropology through ethnographic explorations of circulation, exchange, power, affect and desire. We will study key global social and political processes organized around local symbols and myths of gift-giving and reciprocity.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.261. Making Kin, Thinking Family. 3 Credits.
What makes one a relative? How do we know we are related as Kin, or as family? This course provides a survey of ethnographic material devoted to the modalities through which kin relations and family are made and come to be known. Students will engage the work of Strathern, Rapp, Das, Trawick, Carsten, Haraway, Malinowski, Morgan, Leach, and others.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.262. Cuban Intellectuals, Cinema, and the State. 3 Credits.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.

AS.070.265. Anthropology of Media. 3 Credits.
We will examine the mediation of contemporary cultural life through technologies such as cinema, television, radio, design, and the Internet, investigating questions of desire, power, identity, and belonging. Student coursework will center on the development of an ethnographic video project.
Area: Humanities, Social and Behavioral Sciences.

AS.070.267. Portraits of a Nation. 3 Credits.
This course focuses on the role that fiction and documentary films play in portraying people and places in association with poverty, violence, and criminality. Students will watch and read about documentary and fiction films in order to critically discuss the different perspectives and imaginary they propose. Special attention will be paid to portraits of so-called developing nations and countries.
Area: Humanities, Social and Behavioral Sciences.

AS.070.268. Anthropology of Health and Disease. 3 Credits.
This course offers a wide-ranging study of the problems of disease and health, including the areas of birth and reproduction, poverty and local ecologies of care, death and dying, and sexuality. Considering these areas across world regions, this course invites students to question the lines of normal and abnormal, the margins of institutions, the measures of success in global health, and the transformation of living and dying in relation to violence, institutional failure, and new technologies.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.271. Media, Culture, and Publics. 3 Credits.
How do media shape local and global publics? This course examines methodological and theoretical accounts of media and its impact on ideologies and practices of nationalism, religion, citizenship, and socialism.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.
AS.070.272. The Savage & the Primitive. 3 Credits.
This class will investigate the figure of the savage and the place of the primitive in anthropology, drawing on the disciplines engagement with hunting/gathering, stone age economics, head hunting, human sacrifice, and other practices considered primitive in the present and the past.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

AS.070.274. Interrogating Development. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.070.277. Indigenous Agency and Innovation. 3 Credits.
This course will introduce students to the diversity of indigenous peoples and their situations globally, as well as to their agency and innovation in grappling with challenges across a range of social systems, political contexts, and ecological conditions. Cross-list: PLAS
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.278. Social History of Languages. 3 Credits.
A look at the history of languages in terms of their social functions, codification, adaptations for administrative purposes, their use in literature, their dissemination, expansion, or decline. Examples of language we will consider in the course are Latin, Arabic, Hebrew, French and English.
Area: Humanities, Social and Behavioral Sciences.

AS.070.282. The Making of Everyday Life in Contemporary Afghanistan. 3 Credits.
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.283. Technologies of Health and Development. 3 Credits.
This course examines the ways in which expanding global health initiatives are re-imagining development and re-orienting ideas about global public goods, forms of risk, and modes of entitlement. Through an engagement with literature from anthropology, history of medicine, science studies, and from within public health, the course seeks to apply a critical perspective to the role of public-health-as-development programs and to explore how these global technologies map onto the lives of individuals.
Area: Humanities, Social and Behavioral Sciences.

AS.070.285. Understanding Aid: Anthropological Perspectives for Technology-Based Interventions. 3 Credits.
This course combines anthropological perspectives with the discussion and examination of technology–based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.
Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences.

AS.070.286. Crafting Community Development Projects in Baltimore. 3 Credits.
Students will craft community development project proposals in the areas of education, health, community building or economic development. This hands-on course will focus on Baltimore City as it introduces students to the theory and practice behind community development projects, and their application to the arts. Students will conduct their work in groups and elaborate their project proposal in the city of Baltimore.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

AS.070.287. Displaying Race. 3 Credits.
Through hands-on archival and museum research, students in this class will develop a proposal for displaying a small collection of plaster busts that were cast in the late 19th century from live indigenous subjects. Readings from the class will explore the ethical, legal and political issues surrounding the public display of anthropological and historical artifacts that were collected as part of now discredited regimes of racial classification. How can displays be used to reveal the distance that separates 19th century racial thought from our modern day understandings of physical and cultural difference? How can we responsibly display likenesses that may have been collected under coercive conditions? How can such objects be used to educate people about the place of indigenous peoples in the museum? What laws and ethical conventions govern the display of such objects? In addition to regular class meetings, students will be expected to carry out archival research and interviews in local archives and museums.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

AS.070.288. Tibetan Buddhist Culture. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.070.290. Modern South Asia: Bangladesh/Pakistan. 3 Credits.
Bangladesh and Pakistan, two major regional players in South Asia, originate in the 1947 Partition of India and shared nationhood between 1947 and 1971, ending with the War of Independence in 1971 in which Bangladesh separated from Pakistan. Since that time the two nation-states have been on different paths that have sometimes mirrored each other. This course brings together contemporary works of national histories, social movements and cultural production to consider the politics of self-differentiation and the points of convergences.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.291. Social Networks and Beyond. 3 Credits.
What is a network? We all cultivate, take part in, think with, are frustrated by, and utilize networks of all different kinds, but what are they? Can they be located? In what ways do they (not) exist? What counts as participation? This course investigates how social scientists and other have approached networks. The goal is to discuss connections and to discover the different agents at work in their making and imagination. Students will read literatures touching on the topics of rumor, conspiracy, the internet, kinship, epidemiology, and finance so as to become aware of how anthropologists conceive of and contribute to the formation of networks.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.293. Anthropology of Material Worlds. 3 Credits.
This course explores how anthropologists study material forms and objects in relationship to social, political and cultural life. Topics to be considered include, totemism, art, engineering, garbage, display, collection, and the fetish.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.294. Political Anthropology of Africa. 3 Credits.
The course will explore classical and contemporary ethnographies of the political in Africa, examining how their authors address issues of power, hierarchy and symbol. We will study various articulations of state, ethnicity and community that are analyzed by observing relations between power and resistance or between law, economy and violence through war, custom and ritual. The seminar will also address the way in which Africa has been constituted as a key source of the sub-field of political anthropology through colonial trajectories, postcolonial detours and the political imagination of the past and the future.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.296. Living in the Shadows of the City: Anthropological Perspectives on Urban Lives. 3 Credits.
How can we understand the city from positions of marginality and risk? What challenges does urban living pose to its most vulnerable residents? We will examine these questions, and methodological and conceptual issues they raise, with anthropological research from five cities: Johannesburg, São Paulo, Ibadan, New York, Kuala Lumpur. We will explore each city from the perspective of particular residents and the specific struggles they face, including crime and security, economic uncertainty, and sexual discrimination.
Instructor(s): J. Williams
Area: Humanities, Social and Behavioral Sciences.

AS.070.297. Violence in Contemporary Post War Cinema. 3 Credits.
This class takes contemporary feature films on political violence as ethnographic documents to consider the problem of (re)presentation of violence and suffering in the aftermath of devastating violence. Specifically, it takes as point of departure feature film’s ability to connect everyday life, fiction and major historical events through ordinary and epochal conversations to examine the relation between trauma and mechanical repetition of violence as well as the specific ways in which victims restore senses of intimacy and trust in everyday life.
Area: Humanities, Social and Behavioral Sciences.

AS.070.298. Political Anthropology. 3 Credits.
Is the state a myth? What is the connection between democracy and secrecy? How do gifts and magic work in relation to law and war? What social movements are emerging in the post-colonial world? This course revisits classical and contemporary ethnographies of power and authority, hierarchy and symbol. Studies of ritual and collective memory as critiques of state fetishism, nationalism and community. Local customs and rules, vis-à-vis international law, human rights and economic globalization.
Area: Humanities, Social and Behavioral Sciences.

AS.070.299. Visual Economies in the Americas. 3 Credits.
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.302. The Social Lives of Global Health Programs. 3 Credits.
The course critically examines the techniques, practices, and experiences of global health policies and programs worldwide, and the effects they have on individuals, families, communities, and states. Dean’s Teaching Fellowship Course
Instructor(s): L. Reynolds
Area: Humanities, Social and Behavioral Sciences.

AS.070.303. Junior/Senior Seminar: Children & Youth in Armed Conflict. 3 Credits.
Junior/Senior priority The course will examine anthropological theory by focusing on the situation of children and young people in war, violence, and on-going conflict. The nature and course of young people’s participation in such situations will be analyzed. A particular focus is on the parts played by the young in resistance movements and on their acquisition of political consciousness. Required course for majors.
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.304. Child Adoption and Family Making. 3 Credits.
The course takes child adoption as a starting point to critically explore how kinship and family are connected to legal practices, technological innovations, and broader historical, political, and socio-economic processes. Cross List: WGS, PLAS. Dean’s Teaching Fellowship Course.
Instructor(s): A. Reyes Kipp
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.305. Indigenous peoples and the modern state. 3 Credits.
Through diverse readings and films, this course will investigate the tense relationship between indigenous peoples and sovereign states, which has occupied scholars in disciplines like political science, law, anthropology, and history.
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.306. Healing: Politics and Poetics. 3 Credits.
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.309. Anthropology of Media. 3 Credits.
We will examine the profound mediation of contemporary human life through technologies like film, television, radio, mobile phones, iPods, and the Internet, investigating questions of desire, politics, production, and the virtual. SPECIAL NOTE: There will be a $30 lab fee for the course.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.310. Troubling Africa: Bodies, Politics, Experience of Well-Being. 3 Credits.
Dean’s Teaching Fellowship Course: Explores well-being in Africa in anthropological and popular accounts, paying special attention to the role of ritual, memory, experience, and the politics of sexuality.
Instructor(s): T. Cousins
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.311. Martyrdom between Judaism, Christianity, and Islam. 3 Credits.
The course proposes to follow the development, from Ancient times up to the present, of Jewish, Christian, and Muslim traditions that make martyrdom a contested form of witnessing to God’s power and justice.
Area: Humanities, Social and Behavioral Sciences.

AS.070.312. Monsters’ Lives. 3 Credits.
Drawing on anthropological theory the course examines cultural context and conditions that have shaped our ideas about the monstrous. We discuss the relationship between monsters and marginal forms of life, and how ideas and images about “monstrosity affect the life of human beings who happen to share the marginality of monsters.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

AS.070.316. ‘Casting’ India: Hierarchy, Inequality & Social Change in the Anthropological Imagination. 3 Credits.
Dean’s Teaching Fellowship Course: This course traces anthropological representations of the Indian caste system. It pays special attention to the afterlife of the ‘case study’ in modern scholarly, political and administrative accounts of India’s ‘untouchable’ castes.
Instructor(s): H. Betlem
Area: Humanities, Social and Behavioral Sciences.

AS.070.317. Junior/Senior Seminar. 3 Credits.
Topic: Understanding Baltimore. This course aims to teach basic fieldwork skills: Choosing and entering a community; establishing contacts; learning to listen and to ask questions and locating archival material that might be relevant. It is a hands-on course that will focus on the Arts District North Station in Baltimore.
Instructor(s): J. Guyer; N. Haeri
Area: Humanities, Social and Behavioral Sciences

AS.070.322. Anthropology and Fiction. 3 Credits.
Looking at fiction, poetry, visual montage, and other forms of experimental writing in contemporary anthropology, we will explore ethnography as a creative practice of provoking altered states such as compassion, dream, wonder, and shame.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences

AS.070.323. Money and Moral Economy. 3 Credits.
What is fairness in market economies? Anthropological study of money in the mediation between “goods” (as commodities) and “the good” (as a quality of life).
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences.

AS.070.326. Bodies in Anthropology. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.070.327. Poverty’s Life: Anthropology of Health & Economy. 3 Credits.
Area: Humanities, Social and Behavioral Sciences

AS.070.329. Care and Affliction in the Everyday. 3 Credits.
How are illness, suffering, and potentials for well-being shaped through our everyday relations? In this seminar, we will explore how relations of care make and unmake lives in contexts of inequality and precariousness. We examine how a multiplicity of social ties, from kinship to neighborhood networks, articulates with institutional margins, and mediates violence, scarcity, and material realities of disease and illness. Cross-listed with Public Health Studies
Area: Humanities, Social and Behavioral Sciences

AS.070.331. Anthropology of Poetry and Prayer. 3 Credits.
What kind of activity is prayer? Are we talking to God(s), to our ancestors, to ourselves? What do poetry and prayer share? The course will explore these and similar questions with particular attention to questions of repetition, memory, meaning and presence.
Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences

AS.070.337. Digital Media, Democracy, and Control. 3 Credits.
This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences

AS.070.338. Anthropology of Prayer. 3 Credits.
What kind of activity is prayer? Are we talking to God(s), to our ancestors, to ourselves? What are the differences between choosing our own words and repeating the words of an established prayer? The course will explore these and similar questions with particular attention to the language of prayers across a number of religious traditions.
Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences
AS.070.341. Senses of Community. 3 Credits.
How do ideals of community, place and belonging shape our sense of history and political possibility? This class explores this question through case studies that focus on competing experiences with, and desires for, community in modern Latin America. Cross-listed with Program in Latin American Studies
Area: Humanities, Social and Behavioral Sciences.

AS.070.344. Muslim Societies and Modern States: Ethnographic Encounters. 3 Credits.
Through a close reading of four recent ethnographies, this course explores the diverse ways Muslims encounter the power of modern states in the contemporary world. Topics include: state-led efforts to reform educational discipline and curricula in Yemen, the imaginary topos of dreams as a space of encounter in Egypt, and legal institutions in Egypt and Pakistan. Diverse ethnographic approaches to a common theme raise such questions as: how do legal reforms constrain, enable or express forms of moral striving in everyday life? what forms of knowledge are sanctioned by the state and what forms exceed its limits? what kinds of community become possible in the grip or the margins of modern governance?
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences.

AS.070.346. Cinema and Ethnography. 3 Credits.
Films, like ethnographies, stage encounters with foreign worlds. We will investigate this parallel by examining, side-by-side, cinematic and anthropological representations of subjects like environmental conflict, urban poverty, religious pilgrimage and media culture.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.347. Anthropology and Public Action. 3 Credits.
Anthropologists have used their expertise in public debates, legal cases, advisory roles and so on, and have studied the “public sphere”. General and case studies, following of our professional association, shows how anthropological knowledge has been mobilized.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.348. Anthropology of Mental Illness. 3 Credits.
Mental illness and madness have been powerful lenses for anthropologists to study the individual’s relationship to the social and how societies may secure the boundaries of the normal and the abnormal. We will examine genealogies of anthropological thought on mental illness and study the cross-pollination of anthropology and psychiatry.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

AS.070.349. Buddhism and Science. 3 Credits.
The discourse of Buddhism and Science represents these two distinct truth systems as commensurable. This course examines this discourse anthropologically, towards understanding the logics and practices whereby such commensurability comes to be claimed.
Instructor(s): U. Nair
Area: Humanities, Social and Behavioral Sciences.

AS.070.350. Evolving Ecology, Becoming. 3 Credits.
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.610
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.354. Engendering Life. 3 Credits.
This course explores the role of gender in the production and contestation of socio-economic inequality and political domination. Examples will be drawn from Latin America and other colonial and post-colonial societies.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

AS.070.356. Modern South Asia. 3 Credits.
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.368. Modern South Asia. 3 Credits.
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.371. Forms of Critique in Islam. 3 Credits.
This course examines concepts and practices of critique brought to bear in (and upon) Muslim societies. Readings classic ethnographic monographs along with primary texts of Muslim critics, we focus on forms of reasoning, ethical practices and aesthetic expressions of political critique. Dean’s Teaching Fellowship Course
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.373. Anthropology of Mental Illness. 3 Credits.
How can we understand mental illness from an anthropological perspective? A study of mental illness brings together a critical analysis of medical and psychiatric discourses, institutions of care, as well as economic inequality. It also challenges us to consider fundamental questions of how to engage with subjectivity and experience. In this course, we will work through historical analyses of psychiatric discourse, ethnographic explorations of mental illness and addictions, and social theory on subjectivity and science and technology.
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.375. Language in Ritual. 3 Credits.
This course focuses on language in ritual. It examines the roles of language in prayer, liturgical and other ritual performances from diverse shamanic and religious traditions, including Buddhism, Hinduism and Islam.
Area: Humanities, Social and Behavioral Sciences.
AS.070.377. Ethnographic Writing. 3 Credits.
We will closely examine the narrative form and force of a few major works of anthropological writing, and pursue experiments of our own in ethnographic description and expression. Co-listed with AS.070.603.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.378. Property-Politics Lat Am. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.070.384. The Image in South Asia. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.070.385. From Sexual Nature to Sexual Politics. 3 Credits.
This course traces anthropological concern with questions of sexuality. Students will explore anthropological notions of primitive promiscuity, cultural configurations of the correspondence between sex, procreation, and birth, and ideas about sexual rites of passage. The course will end with a discussion of sexual politics in Euro-America and public concern over HIV/AIDS. The course draws on the work of Freud, Malinowski, Meade, Herdt, Povinelli, Rubin, Bersani and Halperin. Cross-listed with Women Gender Studies
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.391. Religion and the Problem of Suffering. 3 Credits.
How do different religious traditions interpret the meaning of human suffering? How are secular responses to suffering inflected by religious or moral imaginations? Key authors include Nietzsche, Weber, Mauss, Deleuze, Rene Girard, Michael Taussig, Veena Das and the anthropological literature on social suffering.
Area: Humanities, Social and Behavioral Sciences.

AS.070.395. Anthropology of Clothes. 3 Credits.
Cross-cultural examination of the reasons for dressing in particular ways. We will look at economic and religious factors, the influence of fashion on our decisions, and conflicts over how we are to appear in public.
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.396. On the Question of Drugs. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.070.399. Back to the Future. 3 Credits.
What is the imagination of the future within and across cultures? We explore this question by reading among the following topics: memory and monuments; prophecy and divination; social engineering and dystopias; political eschatology and warfare; hope and revolution; cybernetic science; finance and future markets; Marxism and avant-garde; sci-fi and punk.
Area: Humanities, Social and Behavioral Sciences.

AS.070.408. Creative Expression. 3 Credits.
Tacking between theoretical and ethnographic texts on art and poetry, visual image and dramatic performance, living body and natural landscape, this course seeks anthropological ground for an impersonal and asubjective philosophy of creative expression. Drawing from thinkers such as Nietzsche, Bergson, Whitehead, Merleau-Ponty, and Deleuze, and studies set in China, India, Indonesia, Melanesia, and aboriginal Australia, we will confront the working intimations of artists and “creators” of various kinds with the unpredictable life of the worlds in which they work.
Area: Humanities, Social and Behavioral Sciences.

AS.070.410. Family and Household. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.070.412. Truths in Diaspora- From Revelation to Observation. 3 Credits.
The course examines four systems of truth (religious, mathematical, scientific, psychoanalytic), and four concepts of diaspora (publics, circulations, power, discipline). The aim is to understand how truths subist in diaspora amongst other truths – when dispersed beyond their institutional homes, when held to by members of scattered social groupings.
Instructor(s): U. Nair
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.414. Kinship at the Core. 3 Credits.
It is often said that the study of kinship defines anthropology as a distinct discipline within the social sciences. This course tracks the emergence of kinship as a subject and object of anthropological inquiry, and traces some of the transformations that mark the effort to develop theories of kinship (genealogical method, social contract, structural-functionalism, structuralism, psychoanalysis, etc). A sample of authors to be read include: Morgan, Rivers, Malinowski, Radcliffe-Brown, Leach, Levi-Strauss, Pateman, Schneider, Trawick, and Povinelli. Open to Graduate Students.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

AS.070.415. The Machine in Nature. 3 Credits.
The picture of nature as machine-like or systematic in its organization was once dominant in ecological anthropology and cognate disciplines but fell out of favor in the 1970s and 80s. More recently it is enjoying a revival in efforts to conceptualize anthropogenic climate change. In this course we will read classical and newer writings to understand the promise and problems with this mode of viewing nature. Readings include Pierre Hadot, Karl August Wittfogel, Roy Rappaport, Philippe Descola, Gregory Bateson, Clifford Geertz, Stephen Lansing, Anna Tsing and Stefan Helmreich.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.416. Visual Languages in Medical Knowledge. 3 Credits.
This interdisciplinary course will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Open to Graduate Students
Co-listed with AS.211.416 and AS.214.616
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.420. Anthropology of Death and Dying. 3 Credits.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.430. Anthropology and the Local. 3 Credits.
Attention to “the local” may be one defining feature of the discipline of anthropology today. This seminar examines pictures of the local within anthropological thought and ethnography as a genre. It will track how “the local” emerges within wider debates on scale and perspective; diversity and pluralism; and self-making in anthropological thought.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

AS.070.430. Anthropology and the Local. 3 Credits.
Attention to “the local” may be one defining feature of the discipline of anthropology today. This seminar examines pictures of the local within anthropological thought and ethnography as a genre. It will track how “the local” emerges within wider debates on scale and perspective; diversity and pluralism; and self-making in anthropological thought.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.503. Independent Study. 3 Credits.
Instructor(s): Staff.
AS.070.504. Independent Study. 0 - 3 Credit.
Instructor(s): Staff.

AS.070.505. Directed Research-Fall. 3 Credits.
Instructor(s): Staff.

AS.070.506. Directed Research. 0 - 3 Credit.
Instructor(s): C. Han; E. Cervone; J. Obbario; N. Haeri; V. Das.

AS.070.507. Directed Readings. 3 Credits.
Instructor(s): Staff.

AS.070.508. Directed Readings. 0 - 3 Credit.
Instructor(s): Staff.

AS.070.510. Directed Readings on Youth, Family, and Immigration in Baltimore. 2 Credits.
This directed readings course will help lay the conceptual and methodological foundations for research in Latino communities in Baltimore. Specifically, the course will focus on issues of youth and gang involvement, immigration and the concept of the family, and the particular context of Baltimore city in terms of its changing spatial configuration, race politics, and differences in access to healthcare.
Area: Humanities, Social and Behavioral Sciences.

AS.070.551. Internship-Fall. 1 Credit.
Instructor(s): J. Guyer; N. Haeri.

AS.070.552. Internship - Spring. 1 Credit.
Instructor(s): D. Poole; J. Guyer; V. Das.

AS.070.561. Senior Essay-Fall. 3 Credits.
Instructor(s): Staff.

AS.070.562. Senior Essay - Spring. 3 Credits.
Instructor(s): Staff.

AS.070.607. On Care and Well-Being.
Area: Humanities, Social and Behavioral Sciences.

AS.070.619. Ethnography and Literature.
This course will consist of close reading of anthropological and philosophical texts to trace some important aspects of the underlying presuppositions of social theory. We will try to see how regions generate both data and theory; and also see how some abiding concerns around the relation between structural formations and formations of subjects are expressed in classical and current anthropological thought.
Instructor(s): V. Das.

AS.070.626. Close Readings of a Selection of recent Ethnographies.
This course examines how anthropologists study the temporal, material and sensory domains through which people make sense of the state as a bureaucratic, governmental and sovereign presence in their lives.
Instructor(s): D. Poole.

AS.070.630. Senses of the State.
This course asks how black Caribbean and Latin American musics are connected, firstly to the national societies in which they live, and secondly to the larger context of the African diaspora and its global representations, both theoretically and through case studies from various Afro-Latin and Afro-Caribbean populations. Open to graduate and advanced undergraduate students, although the latter might find the class reading-intensive. Musical training or experience are not required. Cross-listed with PLAS, Africana Studies, Musicology (Peabody)
Area: Humanities, Social and Behavioral Sciences.

AS.070.603. Ethnographic Writing.
We will closely examine the narrative form and force of a few major works of anthropological writing, and pursue experiments of our own in ethnographic description and expression. Co-listed with AS.070.377.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.
AS.070.637. (Im)possible community.
Recent debates on community in continental thought and its relevance for historical and ethnographic studies of political communities. Emphasis is on questions of myth, futurity, labor, expenditure, sacrifice as political concepts. Bataille, Heidegger, Derrida, Nancy, Blanchot, and current political anthropology.
Instructor(s): J. Obarrio.

AS.070.651. Anthropology of "The Everyday.
In this course we will treat "the everyday" as an orienting concept by which to engage social theory and ethnography. We will read from among the following: Durkheim, Tarde, Lefebvre, de Certeau, Freud, Nietzsche, Cavell, Brooks, Das, Gilsenan, and Pandalfo.

AS.070.655. The Place of Law.
This course explores the intimate relationship of law to place. What affective force does law gain through its appeal to origins and custom? How does law invoke belonging as place?
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

AS.070.659. Proposal Writing.
The seminar will offer a forum for students to discuss research projects, prepare grant proposals and think further about issues of ethnographic methodology and writing. Open to Anthropology graduate students only.
Instructor(s): C. Han.

AS.070.661. Inquiries between Life and Death.
This seminar explores ethnographic and philosophical engagements with the articulations of life and death. It aspires to move through and beyond vital politics and necropolitics, to engage the interweaving of care and destruction in the everyday. We will put ethnography in conversation with selected texts of Freud, Laplanche, Lingis, Foucault, Deleuze, Cavarero, among others.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

AS.070.663. Semiotics.
Area: Humanities, Social and Behavioral Sciences.

AS.070.667. Anthropology of Death and Dying.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.674. Creative Expression.
Tacking between theoretical and ethnographic texts on art and poetry, visual image and dramatic performance, living body and natural landscape, this course seeks anthropological ground for an impersonal and asubjective philosophy of creative expression. Drawing from thinkers such as Nietzsche, Bergson, Whitehead, Merleau-Ponty, and Deleuze, and studies set in China, India, Indonesia, Melanesia, and aboriginal Australia, we will confront the working intuitions of artists and "creators" of various kinds with the unpredictable life of the worlds in which they work.
Area: Humanities, Social and Behavioral Sciences.

AS.070.675. Before the Law.
The course will explore the foundation of law and the political in classical political anthropology and postmodern philosophy. Kinship, custom, magic, sacrifice and war as prepolitical realms. State of nature, exception, and force of law; biopolitics, micropolitics and segmentarity. Readings: Africanist ethnography,Clastres, Sahlins, Deleuze, Derrida, Agamben, Nietzsche, Benjamin, Kafka.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.676. The Gift of Justice.
Area: Humanities, Social and Behavioral Sciences.

AS.070.677. Anthropology of Death and Dying.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.684. Genealogy as Method.
Notions of genealogy have long been central to anthropological inquiry. Whether seen as a method enabling the develop of Anthropology into a comparative science, or as critical constructions enabling the conditions of possibility for contemporary social structures to emerge, genealogical methods remain central to the production of anthropological knowledge. Yet, what is often overlooked is what genealogy consists of and what counts as genealogical knowledge. What are anthropologists doing when engaging notions of genealogy? By exploring ethnographic, philosophical, and historical texts, students will investigate the place of genealogical methods and their place in the production of knowledge. Scholars whose work will be explored include, W.H.R. Rivers, Malinowski, Levi-Strauss, Fassin, Nietzsche, Foucault, Asad, Strathern, and Povinelli.
Instructor(s): A. Goodfellow.
AS.070.685. About Time.
This seminar will explore conceptions of temporality in ethnographic, philosophical and literary sources. It will review the status of the 'ethnographic present', the contemporary, the future and the untimely. Relations between temporality, economy and the political: remains of time, surplus value, antagonism. Theologies of time. Time and the Real. Time and the Other. Social processes of development, finance, democracy and revolution.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.686. Ethnography of Emergence.
As 'locality' is being currently re-defined, these changes in spatial perception make the "contemporary" appear untimely and uncanny. What are the thresholds where the emergent becomes crystallized? The course explores unprecedented, sudden eruptions and reconfigurations, considering the ways in which Anthropology's long-cultivated sensibility to singularities, between salvage and prediction, now turns towards novel phenomena in the present. The focus will be on method and theory of ethnographic inquiry.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.688. Anthropology & Fiction.
Looking at fiction, poetry, visual montage, and other forms of experimental writing in contemporary anthropology, we will explore ethnography as a creative practice of provoking altered states such as compassion, dream, wonder, and shame.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

This course will cover performance theories in language, ritual, and theatre. It will also look at recent applications of performance theory to economics and law and ask if the assumptions underlying notions of performance remain constant across these fields.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.692. Death & Extinction.
The classical anthropological literature on death treats the restoration of the social in the aftermath of death through, for instance, the study of funereal practices and acts of mourning and commemoration. In this course we reverse the order, considering writings in the face of death, however defined, individual or collective. Course themes emphasize theological, political and ecological perspectives on death and species extinction, although students will be asked to suggest readings in line with their own research interests and lead seminar discussions on the readings.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.696. Philosophy & Anthropology.
This seminar will read selected philosophical texts in conjunction with anthropological texts, asking what are sites of mutual attraction? In what ways do anthropological texts leave traces in philosophical texts?
Instructor(s): C. Han; V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.698. Defining Region.
This course will be run on a workshop model to help those students writing their regional essay for the comprehensive exams. We will work toward defining a conceptual theme within a region that could be bounded one or one created through networks and movements. Each student will create an annotated bibliography, identify the shape of the argument as it emerges in engaging these readings, create an outline and work toward a draft of the final essay. Open to anthropology graduate students only.
Instructor(s): J. Guyer; V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.701. Colloquia Series.
In this year-long course, students will be introduced to the formative influences and major writings of visitors in advance of their coming to give talks in the Department of Anthropology's Colloquia Series. The students will also undertake interviews of visitors to be edited and posted online at the department website to build an archive. This is required course for incoming graduate students. Open to Anthropology Graduate Students Only.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.702. Colloquia Series.
The Colloquia Series is a seminar in which graduate students engage the work of invited speakers. Graduate students learn to develop questions and craft responses in relation to work-in-progress through engagement with the author and in relation to specific debates or tensions in which the author's work emerges. Required for first year graduate students. Open to anthropology graduate students only.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

The picture of nature as machine-like or systematic in its organization was once dominant in ecological anthropology and cognate disciplines but fell out of favor in the 1970s and 80s. More recently it is enjoying a revival in efforts to conceptualize anthropogenic climate change. In this course we will read classical and newer writings to understand the promise and problems with this mode of viewing nature. Readings include Pierre Hadot, Karl August Wittfogel, Roy Rappaport, Phillipe Descola, Gregory Bateson, Clifford Geertz, Stephen Lansing, Anna Tsing and Stefan Helmreich.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.718. Suspicious Interlocutors: Psychoanalysis and Anthropology.
The conversation between anthropology and psychoanalysis is long standing and often proves to be as contentious as it is complementary. This course investigates the dialogue between the two disciplines by tacking back and forth between the ethnographic materials inspired and informed by psychoanalytic insights, and the use of ethnographic sources and anthropological materials in psychoanalytic writings. Students will engage works from such scholars as Freud, Malinowski, Lacan, Levi-Strauss, Trawick, Cohen, Bose, Sachs.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.
AS.070.719. Suspicious Interlocutors Part II: Psychoanalysis and Anthropology.
This course is a continuation of Anthropology AS.070.718, offered in Spring 2013. Students will continue the previously begun investigation of the conversation between anthropology and psychoanalysis, which proves long-standing and often as contentious as it is complementary. The course will tack back and forth between ethnographic materials inspired and informed by psychoanalytic insights, and the use of ethnographic sources and anthropological materials in psychoanalytic writings. Students will engage works from such scholars as Freud, Lacan, Cavell, Klein, Derrida, Siegel, Das, Reynolds, Levi-Strauss, Seremetakis.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

AS.070.801. Dissertation Research.
Instructor(s): Staff.

Instructor(s): Staff.

AS.070.808. Directed Readings on Space and Territory.
Through close readings of theoretical and ethnographic texts, this class explores the concepts of space and territory that animate anthropological understandings of context, potentiality, environment, and emergence.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

AS.070.810. Reading Course: Anthropology & Translation.
Questions of translation come up at every turn in anthropological research and writing and yet the volume of work on the subject is rather thin. In literature, translation studies comprise a vast body of work but the more sociological and anthropological questions remain unposed: What is the relationship between translation and the production of knowledge both inside and outside the Euro-American zone? Who do university students in the social sciences read and why those authors? What would be an anthropology of translation? We will explore these and similar questions in the readings.
Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences.

AS.070.815. Reading Course: Experimental Ethnography.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.816. Risk.
This class explores ecologies of risk as they play out in law, environmental governance, and the fiscal and regulatory regimes that govern politics and life in neoliberal societies.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.822. Law and Political Theology.
The course will explore relations between law and sacredness in political theory and anthropology, regarding both Islam and Christianity. Colonial subjection and subjectivity. Benjamin, Kafka, Agamben, Nancy, Asad and recent anthropology of legal regimes and religion.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.832. Anthropology of Perspective.
Area: Humanities, Social and Behavioral Sciences.

AS.070.850. Readings in Medical Anthropology.
AS.070.851. Readings in Medical Anthropology.
Instructor(s): C. Han.

AS.070.864. Directed Reading: Medical Anthropology & History.
Instructor(s): C. Han.

AS.070.866. Directed Readings and Research.
Instructor(s): A. Pandian.

AS.070.867. Directed Reading and Research.
Instructor(s): C. Han; N. Khan.

AS.070.869. Directed Reading and Research.
Instructor(s): A. Pandian.

AS.070.870. Directed Readings and Research.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

AS.070.871. Directed Reading and Research.
Instructor(s): V. Das.

AS.070.872. Directed Readings and Research.
Instructor(s): V. Das.

AS.070.874. Directed Readings and Research.
Instructor(s): N. Haeri.

AS.070.879. Directed Reading and Research.
Instructor(s): J. Guyer.

AS.070.880. Directed Readings and Research.
Instructor(s): J. Guyer.

AS.070.883. Directed Reading and Research.
Instructor(s): N. Haeri.

AS.070.884. Directed Readings and Research.
Instructor(s): J. Obarrio.

AS.070.885. Directed Reading and Research.
Instructor(s): D. Poole.

AS.070.886. Directed Readings and Research.
Instructor(s): D. Poole.

AS.070.892. Directed Readings and Research.
Instructor(s): N. Khan.

AS.070.893. Directed Reading and Research.
Instructor(s): J. Obarrio.

AS.070.897. Dir Reading & Research.
Instructor(s): S. Berry.

Cross Listed Courses

History of Art

AS.010.254. Art and Architecture of Early Christian and Medieval North Africa. 3 Credits.
Survey of Early Christian and medieval art and architecture in North Africa, with an emphasis on indigenous developments and cultural exchange in the Mediterranean world, 4th to 13th century. Dean’s Teaching Fellowship course.
Instructor(s): N. Dennis
Area: Humanities.
AS.010.309. Gifts and Thefts in the Middle Ages. 3 Credits.
Why were some medieval objects valued as gifts, others appropriated as spolia, and still others taken by force? How does transferring objects from one cultural context into another change their meaning? Western, Byzantine, and Islamic art, 6th-13th centuries.
Instructor(s): R. Danford
Area: Humanities

AS.010.327. The Harem and the Veil: Space and Gender in the Islamic World. 3 Credits.
This course explores the constructed imagery of the harem and the veil in relation to politics and visual culture in the Middle East, North Africa, India, and Euro-America. Topics will include: Ottoman palace architecture, Orientalist painting, mandating/banning the veil, Islamic feminisms. We will address visual culture broadly, including advertising, architecture, contemporary art, film, news media.
Instructor(s): R. Brown
Area: Humanities

AS.010.303. The Epistemology of Photography. 3 Credits.
In this course, we explore different understandings of "love" and the way that film has dealt with the concept as a medium. We explore a variety of approaches to the question of "love" - from the agapic to the familial to the romantic - through a series of interdisciplinary readings ranging from philosophy to anthropology. We will also equally explore the question of how film has engaged with the question of love as a concept, and what depictions of human affection - from the general to the personal - it has offered us. Screenings are required for this course. $40 Lab fee. Cross-listed with Study of Women, Gender and Sexuality
Prerequisites: AS.061.140 or AS.060.141
Instructor(s): M. Ward
Area: Humanities

AS.100.343. The Power of Place: Race and Community in East Baltimore. 3 Credits.
Instructor(s): M. Shell-Weiss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.130.177. World Prehistory. 3 Credits.
An introduction to the archaeology of pre- and protohistoric cultures in key regions of the world, from the Neolithic revolution to the rise of complex societies. Discussions will focus on how they interacted with their neighbors, how this interaction would have played a part in their development, and the different approaches archaeologists use to understand their interconnections. Regions to be examined include the Near East, the Aegean, East Africa, East Asia, the Andes, and Central America. Cross-listed with Anthropology.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.
AS.130.351. The Emergence of Civilization: A Cross-Cultural Examination. 3 Credits.
A comparative study of the origins of urban, literate civilizations in five culture areas: Mesopotamia, China, the Indus Valley, Egypt, and Mesoamerica. For each area, we will review the physical setting, the archaeological and textual evidence for the development of states and urban civilization, and theories advanced to explain the rise (and eventual collapse) of these complex societies.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.131.635. Seminar: Near East Archaeology.
Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz; M. Feldman.

History of Science Technology

AS.140.425. Individualized Medicine from Antiquity to the Genome Age. 3 Credits.
A seminar for graduate students and advanced undergraduates. We will explore the notion of the individual in medicine over 25 centuries, from the Hippocrates to the invention of the case study during the Renaissance to the genetic, biochemical, and immunological individual in recent biomedicine. Recommended Course Background: AS.140.105, AS.140.106
Instructor(s): G. Pomata; N. Comfort
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Political Science

Grad Students only
Area: Social and Behavioral Sciences.

German Romance Languages Literatures

AS.211.174. Media of Propaganda. 3 Credits.
Today, promoting a particular political or personal point of view is not viewed as "propaganda," but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term "propaganda" will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.237. Literature and Medicine. 3 Credits.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore "illness as metaphor" (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s "In the Cold" and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: "Philadelphia" (Jonathan Demme, 1993), "Melancholia" (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.

AS.211.385. Documentary Production Practicum: Community Based Learning: Raqs Media Artists in Residence. 3 Credits.
This course accompanies the New Delhi based media art collective raqs, consisting of 3 artists, during their first residency in Baltimore during Spring 2013. Students will be helping prepare the media artists’ solo exhibition opening at the BMA on February 20, and be involved in a production workshop offered through the JHU Digital Media Center.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.213.237. Literature and Medicine. 3 Credits.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore "illness as metaphor" (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s "In the Cold" and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: "Philadelphia" (Jonathan Demme, 1993), "Melancholia" (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.

This class examines the areas of aesthetics, technology, and society critically in regard to media theory and practice following the 2010 anthology Critical Terms in Media Studies. The class also thematically accompanies the international conference Technologies of Meaning, March 3-4, 2011 with such speakers as Avital Ronell, Tom Gunning, and Sam Weber. Cross-listed with English, Political Science, and Anthropology.
Instructor(s): B. Wegenstein.
AS.215.311. Radicalism, Film & Literature in Modern Latin America-Community Based Learning. 3 Credits.
This course will explore the cultural symbiosis of radical politics, film, and literature in modern Latin America. Beginning with Cuban revolutionary Jose Marti and the definitive end of the Spanish Empire and concluding with current socialist movements in South America, we will analyze key radical texts by the likes of Friedrich Engels and Ernesto “Che” Guevara, classic films like The Battle of Chile by Patricio Guzman, and important works of literature by authors such as Pablo Neruda and Rigoberta Menchu. Note: Class will be conducted in English and all assigned texts will also be in English in order to encourage interdisciplinary enrollment and participation.
Instructor(s): M. Strayer
Area: Humanities
Writing Intensive.

AS.215.777. The Invention of Fiction.
Rather than understand fiction as a constant in human history, this course will consider it a historically specific form of cultural expression. We will examine and compare theories of the fictional from an array of historical moments in order to better understand what fiction is, how it differs from premodern notions of history and poetry, and how it both informs and depends on modern notions of knowledge and subjective agency.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

Humanities Center
AS.300.330. Trauma in Theory, Film, and Fiction. 3 Credits.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (“The Emigrants”), Lanzmann (“Shoah”), Spiegelman (“In the Shadow of No Towers”), McCarthy (“Remainder”), and others.
Instructor(s): R. Leys
Area: Humanities, Social and Behavioral Sciences.

AS.300.372. Holocaust Testimonies. 3 Credits.
A seminar on topics and issues associated with Holocaust testimony. Crosslisted with History, History of Science and Technology, and Anthropology.
Area: Humanities, Social and Behavioral Sciences.

AS.300.381. The Moses Complex. 3 Credits.
Instructor(s): R. Leys
Area: Humanities.

AS.300.399. Cinema and Philosophy. 3 Credits.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.

East Asian Studies
AS.310.104. Pacific Crossings: East Asia and the US from the 19th Century to the Present. 3 Credits.
This course examines the connections between US and East Asian history from the 19th century to the present day. We will explore how cultural exchange and confrontation shaped humanitarian, nationalist, and socialist projects in the US, China, Korea, and Japan. Readings include memoirs, travelogues, essays, and novels that provide a window into transpacific history.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.108. Introduction to Chinese Fiction and Drama. 3 Credits.
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.115. Ghost Tales from China and Japan, 14th-19th Centuries. 3 Credits.
We cannot express our own experience of death – only imagine life after death. How did people in the past conceptualize the world of the dead? Ghost tales will teach us what we imagine as the experience of dead and life after death. This course aims to introduce students to a variety of ghost stories in Late Imperial China and Tokugawa Japan and connect their literary imagination of the dead to the cultural, socio-historical, and religious context of each society as well as to the broad East Asian tradition of supernatural narratives. While we also touch upon earlier traditions on narrating the dead, most of the stories in class readings are from the Ming (1368-1644) and Qing (1644-1911) dynasties of China, and the Tokugawa period (1600-1868) of Japan. Key issues include family, gender, sexuality, body, medicine and many more. Although we will also take a look at visual and theatrical representations of the dead, we will primarily focus on literary texts about ghostly phenomena. Required film screenings are scheduled outside of regular class hours. All readings are in English.
Instructor(s): F. Joo
Area: Humanities.
AS.310.207. Mapping Migrations in East Asia. 3 Credits.
This seminar introduces students to the phenomenon of migration in Japan, South Korea, and Taiwan from theoretical, empirical, and comparative perspectives. The objectives of the course are to understand the 1) historical context behind present-day migrations in East Asia; 2) different patterns of migration flows and their consequences on receiving countries; and 3) various theoretical frameworks for migration. The course is divided into three parts. In the first part, the course will examine theoretical approaches to migration, structured around the question of whether East Asia as a region represents a distinct model of migration. In the second, students will explore the empirical cases in greater detail by comparing and contrasting the different types of migrations. The third part addresses the responses to migration by host governments and societies and the implications of migration on citizenship and identity. Recommended Course Background: any class related to the history or politics of Japan, Korea, Taiwan, and/or China.
Instructor(s): D. Kwek
Area: Humanities
Writing Intensive.

AS.310.221. Introduction to Eastern Religious Traditions. 3 Credits.
This course serves as an introduction to Hinduism, Jainism, Buddhism, Sikhism, Confucianism, and Daoism. Successful completion of this course will provide students with a critical understanding of these six traditions.
Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences.

AS.310.334. Southeast Asia: Contestations, Continuities, Changes. 3 Credits.
'Southeast Asia' designates a geographical region comprised of countries such as Thailand, Indonesia, Malaysia, Vietnam, the Philippines, and Singapore. These countries are often more different than alike, and their cultural, ethnic, religious and political diversity resists easy reduction. As such, this is not a survey course of the area. Rather, we will examine elements of the Southeast Asian experience that speak to contemporary debates on cultural, political, and religious diversity in globalization's second wave, and what it can teach us about assimilation, acculturation, and acceptance. We will try to get a feel of the variegated texture of Southeast Asian societies through historically and theoretically oriented texts drawn from different disciplines. Specifically, we will concentrate on responses to European colonialism, nationalist identity formations, and the impact of these histories upon contemporary contentions over the role of religion in public life, migratory practices, and second-wave globalization.
Instructor(s): D. Kwek.

Interdepartmental

AS.360.206. State and Family: Revisiting the Classical Perspective. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.360.228. Religion, Sexuality, and the Question of Indian Modernity. 3 Credits.
This course explores the relationship between religion, gender and sexuality within the context of Indian modernity. The course will rely on a mixture of historical and anthropological sources.
Area: Humanities, Social and Behavioral Sciences.

This class will survey the various ways in which women, sexuality, and violence are linked in the Hebrew Bible (often referred to as the Old Testament). We will employ a variety of perspectives, including philosophical, historical, and literary. No prior familiarity with the Hebrew Bible is presupposed.
Area: Humanities, Social and Behavioral Sciences.

AS.360.233. Feminist & Queer Theory. 3 Credits.
This course will encourage encounters with a number of concepts from a critical gendered perspective, including: sameness/difference, identity politics, race/ethnicity, loyalty, security, queer ethics, and queerness in media.
Instructor(s): C. Phillips
Area: Humanities
Writing Intensive.

AS.360.235. Martyrdom and the Enfleshment of the Law in the Abrahamic Religions. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

Study of Women, Gender, Sexuality

AS.360.242. Opium for the Masses. Intoxication, Religion, Bodies, and Reform. 3 Credits.
This course will investigate how questions of intoxication are approached as threats or possibilities from the perspective of different ethnic traditions, such as religious or political reform movements. The course thus seeks to understand notions of proper human and social bodies by exploring various understandings of intoxication, addiction, and sobriety.
Instructor(s): R. Begrich
Area: Humanities, Social and Behavioral Sciences.

Interdepartmental

AS.360.246. Islamic Literature, Beloved of Western Thinkers. 3 Credits.
This course examines political, erotic, aesthetic, and religious aspects of attraction between Western thinkers in a Christian milieu (e.g., Gide, Emerson, Thoreau) and classical works of Islamic literature (Rumi, Hafiz, Abu Nuwas, Arabian Nights).
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.360.255. The Politics of Sexual Empowerment. 3 Credits.
This course will survey a range of political problems regarding sexual empowerment and disempowerment, in particular concerning feminism(s), rights within the family, sexual orientation, sex work, pornography, sex trafficking, and related topics. No previous political theory experience required. Cross-listed with Humanities Center
Area: Humanities, Social and Behavioral Sciences.

AS.360.258. Topics in Health, Gender and Sexuality. 3 Credits.
Area: Social and Behavioral Sciences.
Program in Latin American Studies

AS.361.130. Introduction to Latin American Studies. 3 Credits.
Within a chronological frame that starts with early American-Indian civilizations and moves on to issues in contemporary culture and politics, the course introduces students to an interdisciplinary understanding of Latin American History and Culture. The course draws from historical geography, anthropology, history, politics, art, film, and literature.
Instructor(s): S. Castro-Klaren
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.361.271. Media Representation of Violence and Poverty in Latin America. 3 Credits.
This course focuses on the ways in which contemporary Latin American societies are depicted and represented in international media and films. Special attention will be given to the representation of the region under the lenses of violence and poverty as presented in media reports, documentary and fiction films made by Latin American and non-Latin American directors. Cross-listed with Film and Media Studies and Anthropology.
Area: Humanities, Social and Behavioral Sciences.

AS.361.275. Latin American Domesticities: households, families and intimacy. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.361.324. Knowledge, Power & the Configuration of Territories in Latin America. 3 Credits.
Knowledge and power have become key components in the formation of nation-sates elsewhere and particularly in Latin America. Since the emergence of “new republics,” disciplines have helped establish and shape nations through ideas, rituals and traditions. This course discusses how discourses and practices developed by academics and social scientists are influential in continuing or contesting ideas of nation states and regional/local territories. Emphasis will be given to the prominent roles of disciplines such as archaeology, linguistics, anthropology and sociology in nation building around the continent.
Area: Humanities, Social and Behavioral Sciences.

AS.361.325. Cinema, Expression and Social Life in Contemporary Latin America. 3 Credits.
Instructor(s): I. Rojas-Perez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.361.341. Peronismo and the Iconic Presence of Evita: Challenges of Representation. 3 Credits.
This course is designed to introduce students to the literary and artistic production originated by Peronismo and particularly by Evita. It explores the historical period that consolidated Peronismo and devotes great amount of time to the controversial figure of Evita. She has fed the popular imagination; her representations have reached far beyond the limits of Argentina. The materials will include different genres: biographical, historical, fictional, and documentary.

AS.361.350. Mestizaje and Race in Latin America. 3 Credits.
The course problematizes how race and mestizaje became socio-political realities and forms of lived experience in Latin America, shaping such things as governmental practices, spatial configurations, interpersonal relations, and political mobilizations. PLAS Teaching Fellowship.
Instructor(s): A. Reyes Kipp.

Center for Africana Studies

AS.362.200. Discourses in the African Diaspora. 3 Credits.
The African Diaspora has emerged as one of the “hot” topics of discussion in contemporary global race relations. The purpose of this course is to engage in a semester-long study into the meaning of the “African Diaspora.” Beginning with a brief reflection on some of the theoretical overlays on the topic, the course moves quickly into the heart of the subject matter. The course posts that beyond theoretical discussions, there is much to be learned from a close examination of the narrative accounts of individuals who have lived transnationally - who have themselves been actors and agents of the Diaspora.
Instructor(s): B. Vinson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.303. Global Africa. 3 Credits.
This course will examine the literature surrounding cross-cultural exchange, through an interrogation of key concepts in African and transnational studies namely “diaspora” “globalization,” and “transnationalism.”
Instructor(s): J. Ahlman
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Study of Women, Gender, Sexuality

AS.363.300. Thirty Years of AIDS: Fatigue, Failure and Fantasies. 3 Credits.
This course is designed to study the emergence of the concept of “AIDS Fatigue” that is being used to describe the current moment of this epidemic. Cross-listed with Anthropology.
Instructor(s): V. Saria
Writing Intensive.

AS.363.350. Gender, Sexuality, and Religion. 3 Credits.
This course explores the shifting concepts and practices through which Muslim men in various milieus have come to imagine desire, sexuality and marriage. How has the imagination of manhood in Muslim societies been shaped by theological reflection, historical experience and literary expression? What is the range of diversity available to such imaginations in contemporary societies? What are the broader political or theological stakes of governing that diversity in particular ways?
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences.

Program in Museums and Society

AS.389.201. Introduction to the Museum: Past and Present. 3 Credits.
This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered. Cross-listed with Anthropology, History, and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.340. Critical Issues in Art Conservation. 3 Credits.
The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology.
Instructor(s): S. Balachandran
Area: Humanities.
AS.389.345. Introduction to Museum Practice. 3 Credits.
Taking the JHU Archaeological Museum as a case study and working closely with its holdings, we discuss the principles and practice of managing and preserving museum collections. Earns M&S Practicum credit. Cross-listed with History of Art, Anthropology, Near Eastern Studies, and Classics.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.385. Global Perspectives on the Museum. 3 Credits.
Course examines practices of collecting, display and preservation beyond the western museum tradition, focusing on how these practices reflect and construct political, historical, ethnic and nationalist narratives. Counts towards the international studies major. Cross-listed with Anthropology.
Instructor(s): E. Rodini; S. Balachandran
Area: Humanities, Social and Behavioral Sciences.

AS.389.440. Who Owns Culture?. 3 Credits.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

Geography Environmental Engineering
EN.570.404. Political Ecology. 3 Credits.
Instructor(s): E. Schoenberger
Area: Humanities, Social and Behavioral Sciences.

Archaeology Undergraduate Major
The major in archaeology is an interdepartmental program that introduces students to archaeological theory, the analysis of archaeological materials, and the results of archaeological research in prehistoric and early historic periods in the Old and New Worlds. Archaeology studies human societies through examination of their material culture (physical remains), considering such issues as human subsistence, interaction with climate and physical environment, patterns of settlement, political and economic organization, and religious activity and thought. The field allows for the study of the entirety of human experience from its beginnings to the present day, in every region of the world and across all social strata.

Students in the major will have the opportunity to study and conduct research on materials stored in The Johns Hopkins Archaeological Museum, which consists of a diverse and extensive assemblage of artifacts from ancient Greece, Rome, Egypt, Mesopotamia, Palestine, and Mesoamerica. Opportunities may also be available to study materials in the Classical, Egyptian, and Near Eastern collections in the Walters Art Museum.

Requirements for the B.A. Degree
Requirements for the major include 13 courses (39 credits). These can be selected from a diversity of offerings available from different departments. In addition, students must take a core of three courses consisting of Introduction to Archaeology, World Prehistory, and Archaeological Method and Theory.

Core Courses
AS.130.110 Introduction To Archaeology 3
AS.130.177 World Prehistory 3

AS.130.354/131.654 Archaeological Method and Theory 3
Six additional courses in archaeology, both regionally specific and/or methodologically/theoretically advanced 18
AS.070.132 Invitation to Anthropology 3
Three additional courses, to be decided in conjunction with the student’s advisor, pertinent to the archaeological issues that the student has concentrated on. (For example, a student interested in Greek archaeology could enroll in Greek history or language courses, or a student interested in gender and archaeology could enroll in courses related to gender studies outside of archaeology).

Significant archaeological field experience to be determined in consultation with the student’s faculty advisor.

Total Credits 39

Honors Program
Senior archaeology majors have the option of writing an honors thesis under the supervision of a faculty member, which will count for three credits and is outside the requirements of the major. Successful completion of the thesis will result in the conferring of a B.A. with honors.

For current course information and registration go to https://isis.jhu.edu/classes/

Anthropology
AS.070.132. Invitation to Anthropology. 3 Credits.
Is there a distinctive anthropological mode of studying human societies? Examining different kinds of spaces – houses, streets, markets, forests – we learn how human sociality is expressed in and through the way these spaces are constituted. Cross-listed with Humanities Center and PLAS.
Instructor(s): D. Poole; V. Das
Area: Humanities, Social and Behavioral Sciences.

Classics
AS.040.111. Ancient Greek Civilization: Society, Archaeology, Literature, Philosophy. 3 Credits.
The course will introduce students to major aspects of the ancient Greek civilization, with special emphasis placed upon culture, society, archaeology, literature, and philosophy.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.112. Roman Civilization. 3 Credits.
Instructor(s): M. Sullivan
Area: Humanities.

AS.040.119. The World of Pompeii. 3 Credits.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.
AS.040.218. Celebration and Performance in Early Greece. 3 Credits.
Surviving imagery suggests that early Aegean societies engaged in
diverse celebratory performances, including funerals and palatial feasts,
puberty rites and ecstatic dance. We investigate archaeological evidence
of such celebrations, focusing on sociocultural roles, bodily experience,
and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.221. The Archaeology of Early Greece. 3 Credits.
This course explores the origins and rise of Greek civilization from the
Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing
on major archaeological sites, sanctuaries, material culture, and artistic
production.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.320. Myth In Classical Art. 3 Credits.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.359. Making Identities: How Archaeology Constructs People
in the Past and Present. 3 Credits.
Archaeology both examines the identities of people in the past and helps
construct those in the present. In this course we will explore how aspects
of our own lives (political, religious, cultural, etc.) are influenced by our
notions of the past and the people who populated it, and how our modern
identities in turn influence the way we understand past people.
Instructor(s): E. Anderson
Area: Humanities, Social and Behavioral Sciences.

Graduate courses that may be taken with permission of the instructor

Geography and Environmental Engineering

EN.570.406. Environmental History. 3 Credits.
Environmental history explores the interactions between social change
and environmental transformation, or the ways in which societies modify
landscapes and are themselves affected by geological, climatological
and changing ecological conditions. Topics include the relationship
between climate change and human evolution, the environmental
impacts of market-based commodity production and regional economic
specialization; the relationship between urbanization and environmental
change; how warfare affects and is affected by environmental conditions.
Instructor(s): E. Schoenberger
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

EN.570.423. Principles of Geomorphology. 4 Credits.
Analysis of the factors responsible for the form of the landscape. The
concept of the cycle of erosion is discussed primarily in terms of the
principles that govern the processes of erosion. Climate, conditions of soil
formation, and the distribution of vegetation are considered as they relate
to the development of landforms. Recommended Course Background:
AS.270.220 or permission required.
Instructor(s): P. Wilcock
Area: Natural Sciences.

History

AS.100.470. Monuments and Memory In Asian History. 3 Credits.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.010.105. Art of the Ancient Americas. 3 Credits.
Surveys the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.334. Problems in Ancient American Art. 3 Credits.
Selected topics which may include collecting the pre-Columbian past and
connoisseurship, the formation of national museums, post-Columbian
appropriations. Collections study in museums. May also be used toward
credit for the Archaeology major. Cross-listed with PLAS and Program in
Museum and Society
Instructor(s): L. Deleonardis
Area: Humanities
Writing Intensive.

AS.010.336. Hellenistic Art. 3 Credits.
Surveys painting, sculpture, and architecture after the fall of the Classical
period in Greece (4th c. BC), assess their spread throughout the
Mediterranean world, and will conclude with the role these artworks
played on the rising dominance of Rome in the 1st c. BC.
Area: Humanities.

AS.010.355. Art and Religion in the Roman World. 3 Credits.
This course explores the relationships between Roman art and religion
through a survey of key topics and issues, from the archaic period to
late antiquity, providing an introduction into how to use and analyze
both textual and material evidence as sources for understanding Roman
society. Temples, altars, public and private buildings, reliefs, statues,
sarcophagi, paintings, mosaics, coins, metal-ware, glass and pottery, all
give increasingly complex and interesting as the Roman world developed
and are important forms of evidence for political, intellectual, social and
economical life.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.365. Art of the Ancient Andes. 3 Credits.
Course surveys the visual arts of Andean South America and includes
discussion of royal Inka tunics, Nasca death imagery and the gold
sculptural traditions of Colombia.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.398. Tombs for the Living. 3 Credits.
Centering on the tomb as a unit of analysis, this course examines how
death and funerary ritual reflect the cultural values of the living and are an
active force in shaping them. Drawing on case studies from Mesoamerica
and the Andes we consider various approaches to entombment and
funerary ritual.
Instructor(s): L. Deleonardis
Area: Humanities
Writing Intensive.
AS.010.407. Ancient Americas Metallurgy. 3 Credits.
This course addresses the technology, iconography and social significance of metals and draws on case studies from Colombia, Peru, Hispaniola and Panama. Collections study in museums. May also be used as credit toward the Archaeology major. Cross-listed with PLAS
Instructor(s): L. Deleondaris
Area: Humanities.

AS.010.718. Art and Architecture in the Augustan Age.
This seminar investigates Roman art and architecture during the Augustan age (31 BC – AD 14), in Rome and in the provinces of the empire. Augustus’ cultural program influenced any aspects of the Roman way of life (religious ritual, clothing, state ceremony), leading to the creation of a new visual language that expressed and furthered the transformation of Roman society. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting) to reconstruct and discuss the images that a contemporary would have experienced in Rome and elsewhere.
Instructor(s): P. Tucci.
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies

AS.130.101. Ancient Near Eastern Civilizations. 3 Credits.
Review of important issues in ancient Near Eastern history and culture from the Neolithic era to the Persian period. Included will be an examination of the Neolithic agricultural revolution, the emergence of cities, states and writing, and formation of empires. Cultures such as Sumer and Akkad, Egypt, the Hittites, Israelites, Assyrians, Babylonians, and Persians will be discussed.
Instructor(s): G. Schwartz
Area: Humanities.

AS.130.102. From the Neanderthals to the Neolithic. 3 Credits.
Emphasizing theories about human biological and cultural development, this course consists of an in-depth survey of Neanderthal morphology and culture, a brief discussion of evolutionary theory and our fossil ancestors, and concludes with an exploration of the mechanisms and results of the shift from hunting and gathering to farming. (Course formerly known as Introduction: Human Prehistory.) Cross-listed with Anthropology.
Instructor(s): S. McCarter
Area: Humanities.

AS.130.110. Introduction To Archaeology. 3 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed. Cross-listed with Anthropology.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.130.135. Pyramids, Temples and Tombs. 3 Credits.
Introduction to the monuments and culture of Egypt from 3500 B.C. to 100 A.D. From the pyramids at Giza to Hellenistic Alexandria, this course surveys in slide illustrated lectures the remains of one of the world’s greatest early cultures.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.317. Akhenaten, Nefertiti and the Armana Period. 3 Credits.
This seminar will consider some of the historical and art historical issues of the time of Akhenaten, Nefertiti, and Tutankhamun. Why and in what ways did Akhenaten change traditional Egyptian religion? Was all of Egypt transformed by the king’s new sole god Aten? Who were the Atenists, and what happened to them in the time of Tutankhamun? Did Akhenaten have an unusual physical form, a genetic disorder, or other medical condition? Or was his image in sculpture solely an artistic fiction? Who was Nefertiti and did she become king after Akhenaten’s death? The course will investigate the primary evidence regarding these fascinating questions and will look into a variety of scholarly responses to them.
Area: Humanities.

AS.130.328. Ancient Egypt /Africa. 3 Credits.
Recent excavation and research have shed light on several ancient cultures of the Nile and its tributaries. We will look at the available archaeological and textual (all Egyptian) evidence for these societies and their interactions with Egypt between 3500 and 300 B.C. We will also discuss research aims and methods employed now and in the past in Egypt and the Sudan.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.329. Ancient Egyptian Art and Archaeology. 3 Credits.
A survey of Egyptian art as seen in the temples, tombs, funerary, and minor arts of Egypt between 3000 and 100 B.C. Slide lectures will provide a survey of art from the Pyramids to Augustus Caesar and will focus on such topics as the principles of Egyptian art; can the term art apply to early Egypt? How were artisans trained and what techniques and materials were utilized in their work? Co-listed (meets with) AS.133.750.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.
AS.130.334. Museum Study of Objects from the Eton College Myers Collection. 3 Credits.
Students will be introduced to studying Egyptian objects through an investigation of some pieces from the Eton College Myers Collection to be on long term loan to the University. Cataloguing and research on these objects will be part of the course. Taught with AS.133.706 Cross-listed with Program in Museums and Society
Instructor(s): B. Bryan
Area: Humanities.

AS.130.350. Near East Archaeology Issues. 3 Credits.
Selected problems are reviewed within a time span ranging from the Neolithic to the Hellenistic period. The focus is on the reasons for societal change (and societal stasis), with particular reference to transformations in social organization, economy, and ideology.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.130.351. The Emergence of Civilization: A Cross-Cultural Examination. 3 Credits.
A comparative study of the origins of urban, literate civilizations in five culture areas: Mesopotamia, China, the Indus Valley, Egypt, and Mesoamerica. For each area, we will review the physical setting, the archaeological and textual evidence for the development of states and urban civilization, and theories advanced to explain the rise (and eventual collapse) of these complex societies.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.130.353. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS. 3 Credits.
This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.131.653.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

AS.130.354. Archaeological Method and Theory. 3 Credits.
What questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review approaches to method and theory including evolutionary archaeology, culture-historical archaeology, processualist and post-processualist archaeologies, and explores the future of archaeology as a scientific and humanistic discipline. Previous coursework in archaeology or Permission of instructor required. Meets with AS.131.654.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

AS.130.357. Geographic Information Systems in Archaeology. 3 Credits.
Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI's ArcGIS software. Taught with AS.131.657.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.130.800. Readings & Research.
Instructor(s): Staff.

AS.389.340. Critical Issues in Art Conservation. 3 Credits.
The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.342. Objects in Focus: Materials, Techniques, History. 3 Credits.
What can art and archaeological objects reveal about materials, their craftsmanship and preservation? We investigate artists' treatises, visit studios and museum conservation laboratories and closely examine artworks. M&S practicum course. Cross-listed with Classics, History of Art, Near Eastern Studies.
Area: Humanities.

AS.389.345. Archaeological Conservation. 3 Credits.
Intermediate level course designed to examine the scientific and technical aspects of the conservation of archaeological materials. Topics may include materials science, restoration techniques, and approaches to conservation across a broad range of objects types. M&S practicum course. Cross-listed with Classics, History of Art and Anthropology
Instructor(s): S. Balachandran
Area: Humanities.

Graduate Courses that may be taken with permission of the instructor:

Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz.

AS.131.635. Seminar: Near East Archaeology.
Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz, M. Feldman.
What questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review approaches to method and theory including evolutionary archaeology, culture-historical archaeology, processualist and post-processualist archaeologies, and explores the future of archaeology as a scientific and humanistic discipline. Previous coursework in archaeology or Permission of instructor required. Meets with AS.130.354.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensible tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI’s ArcGIS software. Taught with AS.130.357.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.133.721. Egyptian Art of the Old thru Middle Kingdom.
Instructor(s): B. Bryan.

AS.133.750. Seminar in Egyptian Art and Archaeology.
The theme for this course will be archaeology of the Mut precinct in Luxor where Johns Hopkins is excavating. Study of the comparative materials from other sites will be central with the publication of the work approaching.
Instructor(s): B. Bryan.

Instructor(s): B. Bryan.

AS.389.205. Examining Archaeological Objects. 3 Credits.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

Faculty
Co-Director
Glenn Schwartz
Whiting Professor of Archaeology (Near Eastern Studies): Near Eastern archaeology, archaeological method and theory.
H. Alan Shapiro
W. H. Collins Vickers Professor of Archaeology (Classics): Greek and Roman art and archaeology.

Professors
Betsy Bryan
Alexander Badawy Chair in Egyptian Art and Archaeology (Near Eastern Studies): Egyptian archaeology and art.
Lisa de Leonardis
Austen-Stokes Professor (History of Art): art and archaeology of the ancient Americas.
Matthew Roller
(Classics): Roman material culture and history.

Assistant Professors
Michael Harrower

Pier-Luigi Tucci
(History of Art): Roman art and archaeology.

Hérica Valladares
(Classics): Roman art and archaeology.

Arts Workshops
Art Workshops
Although the university does not offer a degree program in art, the Homewood Art Workshops provide a studio environment in which undergraduates can pursue their creative interests and earn academic credit in a visual arts program. Courses in drawing, painting, and sculpture develop observational skills and techniques in the beginning student. Courses in photography, cartooning, and digital media balance studio work with research and critical analysis.

Visual Arts-Minor
Students may focus on either traditional studio courses or a digital curriculum. They have the option to combine the two tracks for a more diverse, if more general, experience.
A minimum range of 15 to18 credits, including two core requirements:
AS.371.131 Studio Drawing I 2 or AS.371.152 Introduction to Digital Photography
and a 100-200 level History of Art course pertinent to the student’s field of interest in the visual arts.

Students may count as many as two visual arts courses taken at MICA, but not offered at Hopkins, toward the Minor. These courses must be approved in advance by the advisor.

• One Independent Study course in the visual arts may be counted toward the Minor.
• One visual arts course, not offered at Hopkins, taken in a JHU-affiliated study abroad program may be counted toward the Minor.
• Each student’s complete program of study must be approved by the advisor.
Advising will be done by the Director (Studio) and the Photography Coordinator (Digital).

For current faculty and contact information go to http://www.jhu.edu/artwork/faculty.htm

Faculty

Director
Craig Hankin
Instructor: painting, portraiture, life drawing.

Instructor
D. S. Bakker
Aesthetics, visual philosophy, Surrealism.

Phyllis Berger
Photography Supervisor: photography, artists’ books, documentary photography.

Thomas Chalkley
Sequential imagery, political and social satire, popular culture.

Howard Ehrenfeld
Digital photography and imaging, location photography.

Barbara Gruber
Figure painting, plein air landscape.

Cara Ober
Watercolor, mixed media, color theory.

Larcia Premo
Sculpture, printmaking.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.371.131. Studio Drawing I. 2 Credits.
This course focuses on developing fundamental drawing skills for the student with little or no previous studio experience. Basic concepts of form and composition will be taught through exercises based on the book, Drawing On The Right Side Of The Brain, and with the aid of still-life setups and live models.
Instructor(s): C. Hankin.

AS.371.133. Painting Workshop I. 2 Credits.
This course offers the fundamentals of oil painting techniques for the serious student with minimal prior studio experience. Observational skills are taught through the extensive use of still-life setups, with particular attention paid to issues of light, color, and composition. Slide lectures and a museum trip give students an art historical context in which to place their own discoveries as beginning painters.
Prerequisites: Prerequisite AS.371.131 or permission of instructor.
Instructor(s): B. Gruber; C. Hankin.

AS.371.134. Painting Workshop II. 2 Credits.
Students who have mastered basic painting skills undertake sustained projects, including portrait and plein air landscape work. Slide lectures and handouts deepen students’ appreciation of representational traditions. Advanced techniques, materials, and compositional issues are also investigated. Recommended Course Background: AS.371.133 or equivalent.
Instructor(s): B. Gruber.

AS.371.135. Studio Drawing II. 2 Credits.
Building on basic drawing skills, this course explores various media, techniques, and compositional elements with special emphasis on still life, portrait, and life drawing. A visit to the Baltimore Museum of Art’s Print & Drawing Library supplements lectures and enriches the student’s understanding of the history of artists’ drawings. Recommended Course Background: AS.371.131 or instructor’s permission.
Instructor(s): C. Hankin.

AS.371.136. Drawing: The Portrait. 2 Credits.
An intensive look at the traditions and techniques of portrait drawing. Students work from live models in a variety of media and study master portraits by Holbein, Rembrandt, Ingres, Degas, etc. Trips to the Baltimore Museum of Art Print & Drawing Room and JHU Archaeological Museum will enhance knowledge and appreciation of the history and traditions of portraiture. Recommended Course Background: AS.371.131 or permission required.
Prerequisites: AS.371.131 permission req’d
Instructor(s): C. Hankin.

AS.371.139. Still Life/Interior/Landscape. 2 Credits.
This intermediate drawing class will examine three grand traditions in representational art. We will explore problems in still life that have occupied artists from Chardin to Morandi; in interiors from Vermeer to Giacometti; in landscape from Corot to Diebenkorn. We will also look at where the boundaries between these genres blur and how they overlap.
Prerequisites: AS.371.131 or permission required.
Instructor(s): C. Hankin.

AS.371.140. Cartooning. 3 Credits.
Not open to Freshmen. A history-and-practice overview for students of the liberal arts. The conceptual basis and historical development of cartooning is examined in both artistic and social contexts. Class sessions consist of lecture (slides/handouts), exercises, and ongoing assignments. Topics include visual/narrative analysis, symbol & satire, editorial/political cartoons, character development, animation. Basic drawing skills are preferred but not required.
Instructor(s): T. Chalkley
Area: Humanities.

AS.371.146. Basic Black/White Photo. 3 Credits.
Students must have a 35mm camera with manual aperture and shutter speed ATTENDANCE AT 1ST CLASS IS MANDATORY An introduction to the technical and creative process of producing black & white photographs. Working in the darkroom, students learn the fundamentals of film processing and print development. In-class critiques, discussion, and analysis of historic images develop critical vision. With the instructor’s guidance, students work on a project of their choice and produce a portfolio of ten mounted prints.
Area: Humanities.
AS.371.147. Art of Architecture. 3 Credits.
The study of architecture rises from diverse sources and stands at the nexus of critical, analytic, and creative faculties. This class will explore ways of describing the world, and transformations of the physical unique to architectural practice: sketching, drawing, writing, and the building of the physical artifact. Students will be introduced to practice and writings outlining modern landscape, architecture, and the imagination, and encouraged to develop collaborative and creative solutions to design problems. The class will include one or more visits from local experts in architecture and sustainability and a tour of campus projects under construction.
Instructor(s): C. Phinney
Area: Humanities.

AS.371.149. Visual Reality. 3 Credits.
In art, “Realism” is a simulation of visual reality. But art can also simulate alternative realities, those realities or truths which exist only in daydreams or nightmares. In this class, we will learn to explore and create representations of these additional moments of existence. This will require thinking creatively or “outside the box,” a useful skill in any field. Using a variety of media, students are asked to solve problems to which there is no one correct answer.
Instructor(s): D. Bakker
Area: Humanities.

AS.371.150. Life Drawing. 2 Credits.
An intermediate drawing course focusing on all aspects of the human form. Beginning with infrastructure (skeletal and muscular systems), we will work directly from the model using a variety of media and techniques to address problems in figurative art from the Renaissance to the present.
Prerequisites: 371.131 or Instructor’s Permission Required
Instructor(s): C. Hankin

AS.371.151. Photoshop/Dig Darkroom. 3 Credits.
Photoshop and the Digital Darkroom Photoshop is not only the digital darkroom for processing images created with digital cameras; it is also a creative application for making original artwork. In this course, students use Photoshop software as a tool to produce images from a fine art perspective, working on projects that demand creative thinking while gaining technical expertise. Students will make archival prints, have regular critiques, and attend lectures on the history of the manipulated image and its place in culture. We will look at art movements which inspire digital artists, including 19th century collage, dada, surrealism, and the zeitgeist of Hollywood films. Students must have a digital camera. Prior knowledge of Photoshop is not required. Attendance at first class is mandatory.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.152. Introduction to Digital Photography. 3 Credits.
Introduction to Digital Photography Students learn to use their digital cameras through a variety of projects, which will help them develop technical and creative skills. Students explore documentary, landscape and portrait photography. Critiques and slide lectures of historic photographs, which range from postmortem daguerreotypes to postmodern digital imagery, help students develop a personal vision. Students gain camera proficiency with one-on-one instruction in the field. Basics for print adjustment and output will be covered. Attendance at first class is mandatory.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.153. Landscape Painting Workshop. 2 Credits.
Area: Humanities.

AS.371.154. Introduction to Watercolor. 2 Credits.
Watercolor is simultaneously the most accessible of all painting media and the most misunderstood. This course provides experience and instruction in observational and expressive watercolor techniques, materials, concepts, and vocabulary. Topics to be reviewed include line, perspective, value, texture, composition, color, and pictorial space. There will be an introduction to contemporary practices in watercolor, as well as experimental and abstract exercises, collage, and conceptual work.
Instructor(s): C. Ober

AS.371.155. Introduction to Sculpture. 2 Credits.
A studio course introducing students to sculptural concepts and methods. Emphasis is on the process of creating. Even the simplest materials can effectively activate space, convey meaning, and elicit emotion when used thoughtfully and imaginatively. Students will learn different methods including additive and reductive techniques, construction, modeling, and mold-making. No prerequisites except a willingness to experiment, make mistakes... and clean up when you are done. Seniors only or permission required.
Instructor(s): L. Premo

AS.371.156. Pastel Painting Workshop. 2 Credits.
Instructor(s): B. Gruber.

AS.371.157. Basic Black & White: Wet Darkroom. 3 Credits.
This film-based class guides students through the technical and creative process of producing black and white photographs. Working in the darkroom, students learn the fundamentals of film and print development. In-class critiques explore the elements which make this medium unique. Students develop critical vision through discussion and analysis of historic images as well as images they make themselves. With the instructor’s guidance, students work on a project of their choice and produce a portfolio of ten mounted prints.
Instructor(s): P. Berger
Area: Humanities.

AS.371.158. Documentary Photography. 3 Credits.
Students explore different genres of Documentary Photography including: photojournalism, social documentary photography, the photo essay and photography of propaganda. In the process, they will learn the basics of digital photography as they work on a documentary series of their own. Weekly field trips give students time for one-on-one instruction with their professor. Students may submit their final portfolio as a slide show or giclee prints.
Area: Humanities.

AS.371.160. Mixed Media Narratives. 2 Credits.
In Mixed Media Narratives, students will experiment with mixed media materials and collage techniques, explore different approaches to visual narratives, examine mentor artists throughout history, and test various methods for combining image and text in order to develop the ability to successfully communicate their own visual stories.

AS.371.161. Sculpture in Second Life: Online. 2 Credits.
Second Life (http://secondlife.com/) is a virtual world with over 15 million residents. Meeting in the Second Life world, the class will learn to build and texture objects of your own design: from simple basic projects to more complex realistic or surrealistic ones. The class will also take field trips within the Second Life environment to view virtual art galleries such as the Dresden Museum and works by the artist AM Radio. Students must have a free Second Life account and a basic understanding of movement and communication within Second Life. This class will meet online on Tuesdays and Thursdays from 1-4 PM in the first session.
AS.371.162. Black & White: Digital Darkroom. 3 Credits.
In this digital course, students explore the black-and-white aesthetic. They develop camera skills on numerous field trips, including Cylburn Arboretum and the John Brown Liberty Ship. Students meet frequently for critiques and discussions based on historic and contemporary imagery. Techniques such as high dynamic range, panorama and infrared are covered. Emphasis is on composition and developing a photographic style via shooting and post-processing. Students are encouraged to make work that is meaningful to them and which communicates its intent to their audience. Digital SLR cameras are provided. Attendance at first class is mandatory.
Instructor(s): P. Berger
Area: Humanities.

AS.371.163. Digital Photography II. 3 Credits.
In this class, students will have the opportunity to expand the photographic skills learned in Introduction to Digital Photography. Through advanced photographic techniques and exploration of new aesthetic concepts students will produce a portfolio of high quality prints. Students will be introduced to creative techniques such as flash photography, light painting, professional studio lighting for portraiture and still life, night photography, time-exposure, macro and cameraless photographic experiments.
Prerequisites: AS.371.152
Instructor(s): G. Salazar
Area: Humanities.

AS.371.164. Introduction to Printmaking. 2 Credits.
Working with non-toxic/water based inks and both an engraving press and hand tools, students will explore several types of printmaking. Methods will include intaglio, collograph and both simple and multi-plate relief. As they develop their prints, students can then observe and exploit the strengths that each method has to offer. Drawing and Photoshop skills are helpful but not required.
Instructor(s): L. Premo.

AS.371.165. Location Photography. 3 Credits.
Working in the studio and in various locations, students will learn the fundamentals of lighting interiors and strategies for working in almost any environment. Field trips will include the National Aquarium, Evergreen Museum & Library, a Howard County horse farm, a Tiffany-designed church and a Hampden photo studio. Students will also concentrate on the fine art of printing in our new digital lab. They will develop a final portfolio of 10 photographs which express a personal vision about a location of their choice. A basic knowledge of digital photography is helpful, but not required.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.166. Landscape Photography. 3 Credits.
Landscape Photography, starting July 8th. In this course students will experience the drama and beauty of the urban and rural landscape. On numerous field trips they will hone their camera technique as well as learn elements of composition and develop a personal style. Students will learn the fundamentals of Photoshop and they will also be introduced to the beauty of black and white in Silver Efex software. Field trips include a water taxi trip to Fort McHenry, Maryland horse country and a visit to the murals of Station North.
Instructor(s): P. Berger
Area: Humanities.

AS.371.167. Lens to Page: The Photographer’s Book. 3 Credits.
In this unique course, a photographer, a museum curator, and a book artist mentor students as they create photography books on subjects of their choosing. The class will concentrate on elements of composition, narration, design, and aesthetics. Field trips to view both public and private book collections and libraries will provide historical context for the evolution of book production, while actual shared volumes may serve as inspiration or models for emulation. As final project, each student will create a hardbound book using Blurb software. Fundamentals of Photoshop will be covered. A culminating exhibition affords students the opportunity to showcase their respective volumes at JHU’s elegant Evergreen Museum & Library. Attendance at first class is mandatory.
Instructor(s): P. Berger
Area: Humanities.

AS.371.168. The Art of Architecture. 3 Credits.
In this course, students will learn to design, draw, and see like an architect. A series of progressive design exercises will teach the practical capacities and habits of mind that lead not merely to competence but success and advancement in the field. We will look at what architecture has been, discuss what it is becoming, and explore both formal and narrative methodologies for design. The class will use the built environment of the city and the Homewood campus as a classroom and a site for interpretive drawing and creative design work. Essential in the architect’s education is the sketchbook, which functions not merely as a place to ‘store’ what has been witnessed, but a place to interpret and explore implications of design in the world, whether close to home or traveling in exotic locales.
Instructor(s): C. Hankin; C. Phinney
Area: Humanities.

In most virtual worlds all of the content of that world has been created by the game’s developers. But there are some exceptions. In Second Life all the content, the world you navigate, has been entirely produced by the players or users of that world. Interestingly, in this way it mirrors or Real Life, all the content of our society- our books, homes, shoes, art- has been "user" created as well. You’ve already seen the art of Real Life. Now explore, as well as learn how to begin building, art in Second Life.
Instructor(s): D. Bakker.

AS.371.172. DIY Art: You Are the Medium. 3 Credits.
Art is not confined to the maker’s labors with traditional art materials. Art is transactional and can be made of anything. It brings forth personal narrative – one’s internal experience in a concrete form – and seeks resonance with the viewer. Art-making is a shared place of possibility and self-revelation, available to anyone with a desire to make visible their thoughts and feelings. Students will engage with novel creative processes and materials and will be challenged to broaden their perspectives on the essential nature of art. Personal narratives will be deepened through a class visit to the American Visionary Art Museum, as well as a short-term group residency with the artists of Make Studio.
Instructor(s): Staff
Area: Humanities.
AS.371.223. Smart Textiles Research Lab. 3 Credits.
Taught jointly by faculty from MICA’s Fibers and Interactive Media departments and the JHU Digital Media Center staff, this research-based lab/seminar course will teach students to analyze the nature and context of smart textile design. Students will explore wearable forms of interactive electronics, sensors, and active and passive techniques, as well as the introduction of textile methods. Basic electronics, fabrication, and programming techniques will be developed throughout the semester. Weekly meetings, visiting artists, historical lectures, and critical readings will enhance the students’ abilities to analyze their work and its relevance to contemporary culture and art. Faculty and graduate students from JHU’s Whiting School of Engineering will also present related research on new materials, methods, and techniques. Independent research, studio process, and teamwork required. Some knowledge of electronics, fabrication, and digital communications preferred. Instructor’s permission required.
Instructor(s): J. Freedman.

AS.371.301. Landscapes: Photographing the Burren. 3 Credits.
The Burren College of Art, located in a medieval castle on Ireland’s Atlantic coast, serves as the base for this digital photography course. Fundamentals of the Digital SLR are reviewed as well as image correction and manipulation in Photoshop. Focusing on the varied landscapes of Ireland, students will assemble a portfolio of digital photographs and exhibit their work in a group show at the end of the Program. Students of all majors and levels are welcome. Course must be taken for a grade.
Instructor(s): P. Berger
Area: Humanities.

AS.371.303. Documentary Photography. 3 Credits.
In this upper-level course, we will explore different genres of documentary photography, including the fine art document, photojournalism, social documentary photography, the photo essay and photography of propaganda. Numerous field trips provide opportunities to explore the city and its neighborhoods. Students will work on a semester-long photo-documentary project on a subject of their choice. Digital SLR cameras are provided. Attendance at first class is mandatory.
Instructor(s): P. Berger
Area: Humanities.

AS.371.304. Photo Seminar: Wet Darkroom. 3 Credits.
In this film based course, students develop a project of their choice over the semester working independently in the darkroom and meeting for weekly critiques and discussions. Using the zone system (a method of pre-visualization developed by Ansel Adams) students will experiment with different film, paper and developer combinations specific to their projects. Writing in the form of a journal as well as critical analysis of images are integral parts of the seminar experience.
Prerequisites: AS.371.146 or Permission Required
Instructor(s): P. Berger
Area: Humanities.

AS.371.306. Digital Photography: Photographing the Burren. 3 Credits.
The Burren College of Art, located in a medieval castle on Ireland’s Atlantic coast, serves as the base for this digital photography course. Fundamentals of the Digital SLR are covered as well as image correction and manipulation in Photoshop. Students will work one-on-one with their instructor and will exhibit their work in a group show at the end of the program. Students of all majors and levels are welcome. Course must be taken for a grade.
Instructor(s): P. Berger
Area: Humanities.

AS.371.501. Independent Study. 2 Credits.
Instructor(s): C. Hankin; P. Berger.

AS.371.502. Independent Study. 0 - 2 Credit.
Instructor(s): B. Gruber; C. Hankin; P. Berger.

AS.371.590. Independent Study. 3 Credits.

Cross Listed Courses

Political Science
AS.190.328. Black Visual Politics. 3 Credits.
Prerequisites: AS.190.340 OR AS.190.384 OR AS.190.385
Instructor(s): L. Spence; P. Berger
Area: Social and Behavioral Sciences
Writing Intensive.

Program in Museums and Society
AS.389.370. Camera Arts: Photographing Evergreen Museum and Library. 3 Credits.
Instructor(s): P. Berger
Area: Humanities.

AS.389.371. The Artist in the Museum: Making Books. 3 Credits.
Hopkins curatorial staff and photography instructor introduce the concept of books as art. Students create artist’s books inspired by campus collections for inclusion in an Evergreen exhibition. FIRST CLASS IS MANDATORY. M&S practicum course. Cross-listed with Homewood Art Workshops.
Instructor(s): J. Abbott; P. Berger
Area: Humanities.

Behavioral Biology Program

The David S. Olton Behavioral Biology Program seeks to establish a greater understanding of the relations of brain and behavior through an interdisciplinary program of study. Students in the Behavioral Biology Program examine the complex interplay between environment and behavior, and the processes and mechanisms that underlie behavior. One goal of the program is for students to learn how to integrate scientific discoveries from the wide array of scientific fields of inquiry that contribute to the study of behavioral biology, from molecular biology to sociology.

The interdisciplinary characteristics of the Behavioral Biology Program provide an excellent preparation for post-graduate work. For those interested in the health professions, behavioral biology can be integrated into a premedical curriculum that will provide a broad, humanistic perspective. For those who wish to pursue scientific careers in psychopharmacology, behavioral neuroscience, and physiological psychology, the program provides excellent preparation. Students interested in the fields of organismal or integrative biology should also consider this major.

Many students ask about the similarities and differences between the behavioral biology major and the neuroscience major. Both of these programs are interdepartmental, and a majority of professors teach courses that are listed for both majors. Behavioral Biology majors can explore many aspects of the biology of behavior, including the neural mechanisms of behavior (which obviously overlaps with the neuroscience major), but also biomechanical, evolutionary, ecological, and social aspects of behavior. The behavioral biology major also has fairly liberal course requirements which provide students with an opportunity to explore more choices in their liberal arts education. Students majoring in neuroscience focus directly on the brain and on neural function/mechanisms. Generally speaking, the Systems
Neuroscience concentration in the neuroscience major has the most overlap with behavioral biology.

The core program of the behavioral biology major provides breadth and background in five fundamental areas:

1. physics, chemistry, mathematics
2. biology
3. psychology, anthropology, sociology
4. neuroscience
5. history of science

The exact courses to be taken are determined by the student in conjunction with the faculty advisor. Only courses that fulfill the lower-level distribution requirements (15 Humanities and Social and Behavioral Sciences credits) may be used to fulfill the requirements of a second major or minor. Behavioral biology majors wishing to pursue a second major or a minor must first obtain the approval of the program director.

Hopkins undergraduates may enter the Behavioral Biology Program at any time, provided all requirements can be completed before graduation. Additional information regarding the Behavioral Biology Program is available through Hope Stein at hope.stein@jhu.edu or 410-516-6196.

Please consult our website for the most recent updates: http://krieger.jhu.edu/behavioralbiology/courses/

Advanced bio-behavioral science courses in two areas (9 credits).
Consult major checklist and website for current information.

Intermediate/Advanced Social/Developmental/Cognitive Sciences 6
Eighteen credits in humanities and social science courses. 18

Twelve credits of humanities, social, quantitative and/or engineering courses (twelve Quantitative Studies or Engineering credits taken for departmental requirements may be used to fulfill the distribution requirement).

Behavioral Biology Research—while not required by the major, it is highly recommended.

Additional University requirements—please consult your academic advisor.

Total Credits 101

* Students may substitute EN.550.211 Probability and Statistics for the Life Sciences or EN.550.311 Probability and Statistics for the Biological Sciences and Engineering for EN.550.111 and EN.550.112.

**Courses**

**AS.290.101. Human Origins. 3 Credits.**
This course examines the origins of human structure, function and behavior from an evolutionary perspective. It includes study of the evolution, behavior and behavioral ecology of nonhuman primates, hominin evolution (including the paleontological and archaeological records), and the origins of human cognition, social behavior and culture.
Cross-listed with Psychological and Brain Sciences
Instructor(s): P. Holland
Area: Natural Sciences, Social and Behavioral Sciences.
AS.290.301. Stress and the Brain. 3 Credits.
The purpose of this course is to explore the phenomenon of stress by investigating the neural, endocrine and molecular mechanisms involved. By reviewing both animal and human research, this course will consider disorders of the stress control system and the adverse impact of stress on human physical and mental health. Topics in this class will include, but are not limited to I) disorders such as PTSD, anxiety, major depression; II) interactions between stress and neurodegenerative disorders; III) stress-immune-inflammatory interactions; IV) the role of stress in obesity, hypertension, and other metabolic syndromes; V) stress effects on reproduction. Students will finish this course with a greater understanding for the fundamental neuroendocrine responses to stress and its consequent and/or associated adverse effects on human health. Prerequisites: AS.020.306 OR (AS.050.203 OR 080.203) OR AS.200.141 OR (AS.080.305 AND AS.080.306) Instructor(s): F. Madison
Area: Natural Sciences.

AS.290.303. Brain, Communication & Evolution. 3 Credits.
The study of animal communication involves the study of neural and hormonal mechanisms mediating the production of communication signals and the evolutionary function of the different signals animals produce to communicate with one another. In this course, information from both of these approaches to the study of behavior will be integrated to provide a comprehensive examination of the causes and functions of different animal communication systems. Topics will include both a consideration of the mechanisms of signal production and of signal perception. The course will review the basic features of communication and features of signaling systems. We will also discuss neural and endocrine functioning and the fundamentals of evolutionary theory relevant to the study of animal communication. Finally, this course will include a field component where students will quantify different aspects of communicative behaviors including song, mating, and parental behavior in several species. Prerequisites: AS.200.141 OR AS.200.208 OR AS.080.305 Instructor(s): F. Madison

AS.290.420. Human Sexual Orientation. 3 Credits.
 This course will examine the historical and current theories of sexual orientation and sexual variation development by examining the biological, psychological and social contributing factors that influence the development of sexual orientations and variations along with treatment and modification of problematic sexual behaviors. Limited to Juniors and Seniors with PBS, Neuroscience, Public Health, Behavioral Biology, and Biology majors, or Juniors and Seniors with PBS or Women’s Studies minors.
Instructor(s): C. Kraft
Area: Social and Behavioral Sciences
Writing Intensive.

AS.290.490. Senior Seminar: Behavioral Biology. 1 Credit.
Great ideas in Behavioral Biology. Discussion of classic and cutting edge articles in the original literature. Student presentations and reaction papers. Capstone course for senior Behavioral Biology majors.
Instructor(s): P. Holland
Area: Social and Behavioral Sciences.

AS.290.501. Research-Freshmen. 3 Credits.
Instructor(s): G. Ball; P. Holland.

AS.290.502. Research-Freshmen. 0 - 3 Credit.
Instructor(s): F. Madison; G. Ball; L. Gorman; P. Holland.

AS.290.503. Research - Sophomores. 3 Credits.
Instructor(s): G. Ball; L. Gorman; P. Holland.

AS.290.504. Research-Sophomores. 0 - 3 Credit.
Instructor(s): F. Madison; G. Ball; L. Gorman; P. Holland.

AS.290.505. Research - Juniors. 3 Credits.
Instructor(s): G. Ball; L. Gorman; P. Holland.

AS.290.506. Research-Juniors. 0 - 3 Credit.
Instructor(s): F. Madison; G. Ball; L. Gorman; P. Holland.

AS.290.507. Research - Seniors. 3 Credits.
Instructor(s): G. Ball; L. Gorman; P. Holland.

AS.290.508. Research-Seniors. 0 - 3 Credit.
Instructor(s): F. Madison; G. Ball; L. Gorman; P. Holland.

AS.290.519. Independent Study. 3 Credits.
Instructor(s): G. Ball.

AS.290.520. Independent Study. 0 - 3 Credit.
Instructor(s): G. Ball; P. Holland.

AS.290.594. Behavioral Biology Internship. 1 Credit.
Instructor(s): P. Holland.

AS.290.597. Research-Summer. 3 Credits.
Instructor(s): E. Fortune; G. Ball; L. Gorman; P. Holland.

Cross Listed Courses

Biology

AS.020.152. General Biology II. 4 Credits.
This course builds on the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology. The workshops that were introduced in AS.020.151 General Biology I will include the use of simulation software, a critique of the primary literature, and an exploration of current trends in medicine. Recommended Course Background: AS.020.151. Section 01: Not open to Freshmen. Section 02: Open to Freshmen only.
Instructor(s): C. Roberson; R. McCarty; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.153. General Biology Laboratory I. 1 Credit.
Student must have enrolled in AS.020.151 either this term or in past terms. Students who have credit for AP Biology but take General Biology Lab I will lose all eight credits of AP Biology credit. This course reinforces the topics covered in AS.020.151. Laboratory exercises explore subjects ranging from forest ecology to molecular biology to animal behavior. Students participate in a semester-long project, identifying bacteria using DNA sequencing. Cross-listed with Behavioral Biology.
Prerequisites: AS.020.151
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.154. General Biology Laboratory II. 1 Credit.

AS.080.330. Brain Injury & Recovery. 3 Credits.
This course investigates numerous types of brain injuries and explores the responses of the nervous system to these injuries. The course’s primary focus is the cellular and molecular mechanisms of brain injury and the recovery of function. Discussions of traumatic brain injury, stroke, spinal cord, and tumors, using historical and recent journal articles, will facilitate students’ understanding of the current state of the brain injury field. Cross-listed with Psychological and Brain Sciences and Behavioral Biology.
Prerequisites: AS.080.305 AND AS.080.306 OR AS.020.312 AND AS.020.306 OR AS.200.141 AND AS.200.376
Area: Natural Sciences
Writing Intensive.
Psychological Brain Sciences

AS.200.141. Foundations of Brain, Behavior and Cognition. 3 Credits.
Formerly listed as Introduction to Physiopsychology. A survey of neuropsychology relating the organization of behavior to the integrative action of the nervous system. Cross-listed with Behavioral Biology and Neuroscience.
Instructor(s): L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.208. Animal Behavior. 3 Credits.
Examines basic principles of animal behavior (orientation, migration, communication, reproduction, parent-offspring relations, ontogeny of behavior and social organization). Evolution and adaptive significance of behavior will be emphasized.
Instructor(s): F. Madison; G. Ball
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.343. Motivation. 3 Credits.
Current biological, behavioral, and cognitive research and theory concerning the motivation of behavior are examined. Both human and non-human animal research is reviewed. Topics include the role of genetics, arousal, biological regulatory systems, incentives, expectancies, attributions, social processes and self-actualization in the general of behavior. Recommended Course Background: AS.200.101 and AS.200.146 or instructor permission.
Instructor(s): D. Edwin
Area: Social and Behavioral Sciences
Writing Intensive.

AS.200.344. Behavioral Endocrinology. 3 Credits.
An examination of the effects of hormones on behavior in nonhuman and human animals. Topics will include the effects of hormones on sexual differentiation, reproductive behavior, parental behavior, homeostasis and biological rhythms, regulation of body weight, learning and memory. Cross-listed with Behavioral Biology and Neuroscience.
Prerequisites: Prereqs: ( AS.200.141 OR AS.080.305 ) OR (AS.020.151 AND AS.020.152) OR ( AS.200.305 AND AS.020.306 ) or instructor’s permission
Instructor(s): F. Madison; G. Ball
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.355. Psych of Decision Making. 3 Credits.
This course will apply insights from cognitive psychology decision-making research to the stock market. The course investigates whether investors can beat the market benchmarks by exploiting marketplace investor sentiment. Juniors and seniors only. Recommended Course Background: six credits of Psychology course work.
Area: Social and Behavioral Sciences.

AS.200.370. Functional Human Neuroanatomy. 3 Credits.
Cross-listed with Behavioral Biology and Neuroscience.
Instructor(s): S. Courtney-Faruqee
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.386. Animal Cognition. 3 Credits.
Examine relations between brain, mind, and behavior in nonhuman animals, focusing on topics such as learning, memory, attention, decision-making, navigation, communication, and awareness. We will take a variety of approaches, including behavioral, computational, evolutionary, neurobiological, and psychological perspectives.
Prerequisites: (AS.200.141 OR AS.200.208 OR AS.290.101) OR permission of instructor.
Instructor(s): P. Holland
Area: Social and Behavioral Sciences.

Bioethics Program

The practice of medicine, the development of public health policies, and advances in the biomedical sciences raise fundamental moral and philosophical issues. The bioethics program is designed to provide students with an understanding of these issues, and the background and the conceptual tools to think about them clearly. The program is a collaboration between the Johns Hopkins Berman Institute of Bioethics and the Department of Philosophy, and draws on the resources of both.

Biology

http://www.bio.jhu.edu

The Department of Biology offers a broad program of undergraduate, graduate, and postgraduate study in the biological sciences. Included among the areas in which instruction and research opportunities are available are biochemistry and biophysics, cell biology, molecular biology, microbiology, developmental biology, genetics, neuroscience, and immunology.

Research in the department has a strong molecular orientation: a common goal of the research carried out in departmental laboratories is to understand biological phenomena in molecular terms. Both the undergraduate and graduate curricula reflect this orientation. Courses offered by the department employ the basic quantitative approaches of biochemistry, biophysics, and genetics to provide training in molecular biology, broadly defined, with the breadth and opportunities for specialization necessary to prepare students for professional careers in biology and related fields.

In addition to its own graduate program in Cellular, Molecular, Developmental Biology and Biophysics (CMDB Program), the department participates in a collaborative program with the National Institutes of Health. Students in the CMDB Program may also complete their thesis work in specific laboratories in Biophysics, Chemistry, and the Carnegie Institution of Washington Department of Embryology.

Requirements for the B.A. Degree

(See also General Requirements for Departmental Majors (p. 33).)

The Biology degree is designed to provide students with a thorough grounding in modern biology, with special emphasis on the molecular aspects of the discipline.

All courses required for the biology major must be passed with a grade of C- or better with one exception. The department will accept one passing grade below C- in senior year provided that the average for all formal lecture and laboratory courses is at least 2.0.

Biology majors with a score of 4 or 5 in high school AP Biology are not required to take General Biology I and II.

Core Courses

Mathematics

AS.110.106 Calculus I 8
& AS.110.107 and Calculus II (For Biological and Social Science)

or AS.110.108 Calculus I 8
& AS.110.109 and Calculus II (For Physical Sciences and Engineering)

Physics

AS.171.103 General Physics I for Biological Science Majors 8
& AS.171.104 and General Physics/Biology Majors II

or AS.171.101 General Physics/Physical Science Major I 8
& AS.171.102 and General Physics: Physical Science Majors II

AS.173.111 General Physics Laboratory I 2
& AS.173.112 and General Physics Laboratory II

Chemistry

AS.030.101 Introductory Chemistry I 6
& AS.030.102 and Introductory Chemistry II

AS.030.105 Introductory Chemistry Lab I 2
& AS.030.106 and Introductory Chemistry Laboratory II

AS.030.205 Organic Chemistry I 8
& AS.030.206 and Organic Chemistry II

AS.030.225 Introductory Organic Chemistry Lab 3

Electives

At least three courses totaling at least eight credits (see list below) from the courses approved by the director of undergraduate studies 8

## B.S. Degree in Molecular and Cellular Biology

The Biology Department offers a B.S. degree in molecular and cellular biology. The B.S. program is designed to provide a more rigorous preparation for advanced study in the biomedical sciences. The program is tailored not only to students planning to enter Ph.D. programs or obtain employment in the biotechnology industry but also for premedical students.

### Requirements

The B.S. degree in molecular and cellular biology requires, in addition to the requirements for the B.A. degree in biology, at least two additional courses totaling five additional credits or more (for a total of at least 13 credits) from the elective list and six credits of research supervised by a faculty member in Biology, Biophysics, or basic science departments in the School of Medicine currently involved in graduate Ph.D. programs. The supervised research will include participation in group meetings and writing a summary of accomplished work at the end of the year. General Biology I and II are not required for the B.S. degree.
B.A./M.S. Degree in Molecular and Cellular Biology

The Biology Department offers a B.A./M.S. (or B.S./M.S.) if the student has completed the requirements for the B.S. degree in molecular and cellular biology. The B.A./M.S. (or B.S./M.S.) degree provides Hopkins biology majors with advanced training in preparation for careers in science and medicine.

Requirements

Students in the program must complete all requirements for the B.A. (or B.S.) degree. In addition, students enrolled in the combined bachelor's/master's program must complete the following requirements.

Four additional advanced or specialized courses, at least two of which are at the 600-level or above.

* AS.020.401 Advanced Seminar: Molecular and Cellular Biology 3
* AS.020.402 Seminar: Molecular & Cellular Biology 3
* AS.020.551 Mentored Research 9
* AS.020.553 Mentored Research 9
* AS.020.554 Mentored Research Program in Cellular and Molecular Biology

Final report and presentation

Teaching

* Eligible courses are listed on the Biology Department website.

** The Mentored Research Program culminates in the preparation of a written report of the research project in the form of a thesis. The written report and an oral presentation of the work are evaluated by a Thesis Committee. Passing performance, as judged by the committee, is required for the M.S. degree.

*** Teaching is an integral component of the master's degree. The teaching requirement is fulfilled as a teaching assistant for the General Biology and General Biology Laboratory courses (or other Biology lecture and lab courses) for two semesters.

Final report and presentation

Teaching

Students admitted to the B.A./M.S. program will be awarded the M.S. degree if they complete the above-described requirements, receive a grade of B or better in all courses during the one year duration of the program, and achieve passing performance on the final written report and oral presentation of the research project completed during the research year as judged by the Thesis Committee.

Admission

Admission to the B.A./M.S. Molecular and Cellular Biology program is selective. Hopkins biology majors and MCB majors who have achieved a minimum overall grade point average of 3.2, as well as a minimum natural science grade-point average of 3.0, and have had at least two semesters of previous research experience may apply for admission during the junior or senior years. Students with a GPA below the minimum requirement will be considered under special circumstances if a strong commitment to research is demonstrated. Students interested in applying to the master’s program should attend an information session prior to application.

Admission decisions are made by the MCB Program Committee, on the basis of:

1. the student's academic record,
2. a written proposal for a project to be completed in the Mentored Research Program,
3. letters of support and recommendation, and
4. an interview with the student if required. The committee reserves the right to require interviews for individual students for further clarification of application materials.

Students may matriculate into the program in either the fall or spring semesters. Please consult the Biology Department website for application deadlines and additional information.

Honors in Biology

Students earning either a B.A. in Biology or B.S. degree in Cellular and Molecular Biology are eligible to receive their degree with honors.

The B.A. in Biology with Honors requires, in addition to the regular requirements for the B.A. in Biology, a 3.5 GPA for Natural Sciences and Quantitative Studies courses, two semesters of research, presentation of a poster describing the research, and a recommendation from the research sponsor.

The B.S. in Cellular and Molecular Biology with Honors requires, in addition to the regular requirements for the B.S. in Cellular and Molecular Biology, two semesters of research, a 3.5 GPA for Natural Sciences and Quantitative Studies courses, a written report approved by the research sponsor, presentation of a poster describing the research, and recommendation from the research sponsor.

The research requirement must be completed under the direction of a faculty member in a department associated with the Johns Hopkins University or the Johns Hopkins Medical Institutions. If the student’s research director is not a member of the Department of Biology, a Biology faculty member must serve as a sponsor and approve the recommendation from the research director.

Requirements for the Ph.D. Degree in Cellular, Molecular, Developmental Biology and Biophysics (CMDB Program)

A program of study leading to the Ph.D. degree is open to students who are candidates for, or who already have, the bachelor’s or master’s degree in the biological or physical sciences. To be admitted, the applicant should have had either a thorough training in the fundamentals of biology and both organic chemistry and general physics, or a broad training in the physical sciences and mathematics. Special attention is given to the applicant’s quality of scholarship and his or her promise as an investigator.

In addition to the general university requirements for an advanced degree (see Academic Information for Graduate Students (http://catalog.jhu.edu/academic-info-graduate-students)), doctoral candidates must meet the following departmental requirements:

• Four core courses and four 600- and 700-level electives.
• At least one year of laboratory teaching during the period of graduate residence.
• A high level of achievement in a comprehensive written proposal and oral examination covering proficiency in the field of the student’s research interest and various areas of biology and related fields.
• A dissertation based on a program of independent research, a public seminar followed by an oral examination by the thesis committee.

All graduate students are required to complete the four core courses during the first year. In addition, students are required to complete four elective courses before graduation chosen from the list below of 600-level electives and 700-level seminars offered each semester. At least two out of the four courses must be 600-level.

Teaching Opportunities

Since most biology Ph.D.’s will teach at some time during their careers, experience in teaching is considered an essential part of the Ph.D. program. The minimum teaching requirement is three contact hours a week for one year in the laboratory sections of undergraduate courses. Further teaching experience is gained through the preparation and presentation of reports in seminars and journal clubs. The department stresses organization of material and clarity of presentation.

Facilities

The lecture rooms, teaching laboratories, and research facilities of the Biology Research Complex (consisting of Seeley G. Mudd Hall and Undergraduate Teaching Laboratories) offer a thoroughly modern research facility for molecular biology.

Financial Aid

The department has fellowship funds for the support of graduate students. Awards are granted for tuition and living expenses. Laboratory fees and research expenses are paid by the department.

Carnegie Institution for Science, Department of Embryology

The Carnegie Institution’s Department of Embryology is located on the Homewood campus, close to the Biology research complex. Members of this group hold part-time appointments in the Department of Biology and participate in the training of graduate students. With the approval of both the department and the Carnegie staff, a number of graduate students in biology conduct thesis research in the Carnegie laboratory. The interests of the Carnegie staff include developmental and molecular biology.

For current faculty and contact information go to http://www.bio.jhu.edu/Directory/TenuredPlusTenureTrack.aspx

Faculty

Chair

Beverly R. Wendland
Professor: endocytic mechanisms and membrane trafficking events.

Professors

Karen Beemon
retroviral RNA processing and transport; avian leukosis virus tumorigenesis.

Kyle W. Cunningham
Director of Graduate Admissions: calcium transport and signaling mechanisms in yeast.

Michael Edidin
membrane organization and dynamics, immunology.

Ernesto Freire

Edward M. Hedgecock
developmental genetics of the nervous system of Caenorhabditis elegans.

Vincent J. Hilser
Director of Graduate Studies: thermodynamics, protein structure and dynamics, molecular recognition, protein folding.

M. Andrew Hoyt
genetics of chromosome segregation and signal transduction in yeast.

Ru-Chih Huang
William D. McElroy Research Professor: gene regulation and chromosomal structure and function, principles of cancer biology and control of cancer and viral growth.

Evangelos N. Moudrianakis
assembly and dynamics of nucleoproteins and chromosomes, bacterial, and chloroplast bioenergetics.

Joel F. Schildbach
Director of Undergraduate Studies: structural biology of bacterial conjugation.

Robert Schleif
protein-DNA interactions and regulation of gene activity.

Trina Schroer
microtubule-based motors, organelle transport.

Mark Van Doren
gonad development and the formation of sexual dimorphism in the soma and germline.

Haiqing Zhao
cellular and molecular mechanisms underlying the development and function of olfactory sensory neurons.

Associate Professors

Samer Hattar
light reception for non-image detection: role of rods, cones, and the new photoreceptors (melanopsin-containing retinal ganglion cells).

Reiji Kuruvilla
local retrograde signaling by target-derived neurotrophins in neuronal development.

Assistant Professors

Xin Chen
genetic and epigenetic mechanisms that regulate germ cell differentiation.

Robert Johnston
Stochastic and long-range gene regulatory mechanisms that diversify neuronal subtypes.

Christian Kaiser
Single-molecule biochemistry studies of the machines and processes in protein translation, translocation, and folding.

Young-Sam Lee
regulation by small metabolites: phosphate signaling pathways.

David Zappulla
telomerase RNA-protein enzyme complex and its involvement in chromosome stability, cancer and aging.

Professors Emeriti

Maurice J. Bessman
Research Professor: biochemistry and enzymology, synthesis of nucleic acid derivatives, biochemical basis of spontaneous mutations.

Douglas Fambrough
membrane proteins, targeting, structure, function, and regulation, Na, K-ATPase, Ca-ATPase.

Richard E. McCarty
illiam D. Gill Professor Emeritus, Dean Emeritus: structure, mechanism, and regulation of the chloroplast ATP synthase, chloroplast metabolite transport.

Allen Shearn
developmental genetics, imaginal disk development in Drosophila studied in lethal and temperature-sensitive mutants.

Research Professor

Yuan Chuan Lee
glycoproteins, glycolipids, carbohydrate receptors, and cell-surface substances.

J. Michael McCaffery
Peter Privalov
physics of protein structure.

Associate Research Professor

Jocelyn DiRuggiero
Genomic diversity, DNA repair mechanisms and environmental stress responses in extremophiles.

Academy Professor

Ludwig Brand
fluorescence studies of protein and membrane dynamics.

Visiting Professor

Thomas Cebula

Senior Lecturer

Robert Horner
Carolyn Norris
Rebecca Pearlman

Lecturers

Emily Fisher
Kathryn Tifft Oshinaiye
Christov Roberson
Richard Shingles

Adjunct

Jef Boeke
Professor (Medicine).

Alex Bortvin
Assistant Professor: Genetic and epigenetic controls of germ cell development and function in vertebrates.

Donald D. Brown
Professor Emeritus: gene expression in development.

Orna Cohen-Fix
Adjunct Professor (NIH): nuclear structure and its effect on nuclear function.

Victor G. Corces
Professor (Emory): control of gene expression, molecular mechanisms of mutagenesis by transposable elements.

Chen-Ming Fan
Professor: molecular and cellular interactions that contribute to vertebrate embryogenesis.

Steven Farber
Associate Professor: Real-time imaging of lipid metabolism in live zebrafish; identification of genes which regulate cholesterol absorption using biochemical and genetic strategies.

Joseph G. Gall
Professor: chromosome structure and functions, nucleic acids in development.

Marnie Halpern
Professor: zebra fish development.

Audrey Huang
Lecturer.

Nicholas Ingolia
Assistant Professor: genome-wide analysis of translation in vivo.

Sharon Krag
Professor

Michael Lichten
Adjunct Professor (NIH): genetic recombination and chromosome structural changes that occur during meiosis and DNA damage repair, using budding yeast as a model system.

George Scangos
Professor.

Allan Spradling
Professor, and Director of Carnegie Institution for Science: molecular genetics of Drosophila.

Yixian Zheng
Professor: cell division, cell morphogenesis, and cell fate specification.

Joint Appointments

Doug Barrick
Professor (Biophysics).

Gregory Bowman
Assistant Professor (Biophysics).

Richard Cone
Professor (Biophysics).

David E. Draper
Professor (Chemistry).

Bertrand Garcia-Moreno E.
Professor (Biophysics).

Karen Fleming
Associate Professor (Biophysics).

Juliette Lecomte
Professor (Biophysics).

Paula Pitha-Rowe
Professor (Medicine).

Robert Siliciano
Professor (Medicine).

Craig A. Townsend
Professor (Chemistry).

Sarah Woodson
Professor (Biophysics).

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.020.103. Freshman Seminar: Intro to Biomedical Research. 1 Credit.
Instructor(s): S. Roseman; Y. Wei
Area: Natural Sciences.

AS.020.104. Freshmen Seminar: From Genes to DNA and Back. 1 Credit.
Students must obtain permission from Dr. Moudrianakis to register.
A course consisting of introductory lectures followed by student presentations in the form of seminars. The issues analyzed will be:
How did we arrive at the concept of the “gene”? Early experiments that gave substance to this concept. How did we arrive at the “one gene, one enzyme” dogma? What is the chemical nature of the gene? Is DNA enough for regulated gene expression? Is it “all in our genes”? What is genetic plasticity and epigenetics? What about genomics and proteomics?
Freshmen Only.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.106. Freshmen Seminar: Tuberculosis. 1 Credit.
Mycobacterium tuberculosis is an extremely successful intracellular bacterial pathogen able to manipulate phagocytic cells and its own metabolism to survive within a host. The molecular mechanisms of this survival and resistance to antibiotics will be studied. Freshmen only.
Instructor(s): R. Horner
Area: Natural Sciences.

AS.020.110. The Biology of Plastids. 1 Credit.
Plastids are remarkable organelles that are unique to plants. The function of plastids varies and depends on the tissue cells are located. The structure, function and developmental aspects of plastids will be considered.
Area: Natural Sciences.
AS.020.111. Freshmen Seminar: The 'Nobels' in Medicine and Chemistry. 2 Credits.
Key events in our understanding of the life sciences will be traced with the aid of Nobel awards.
Instructor(s): L. Brand
Area: Natural Sciences.

AS.020.113. Freshmen Seminar: Microbes in the Media. 2 Credits.
This course discusses scientific issues that are in the news today. Possible topics might include: genomics; adaptation and evolution of bacterial pathogens; emergence of antibiotic resistance; pandemic flu; microbial communities and impact on public health; food safety; bioterrorism; synthetic biology; bioremediation; microbial fuel cells; or other biotechnology topics that could emerge during the semester.
Instructor(s): T. Cebula
Area: Natural Sciences.

AS.020.114. Freshmen Seminar: Reading Science: Claims & Data. 1 Credit.
Instructor(s): M. Edidin.

AS.020.115. Freshmen Seminar: Living Off the Sun. 1 Credit.
This course is a combination of lectures and student presentations that address fundamental principles and also contemporary issues examining the way all forms of Life on Earth are ultimately dependent on sunlight to satisfy their food and energy requirements. Special emphasis will be on current developments in biotechnologies that utilize microbial populations to supply us with fuels and also to clean up environmental hazards.
The course will also consider ways to extract lessons from Nature's successful designs and harmonious adaptations so that we, in the long run, can utilize them towards a minimization of our negative impact on the environment.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.117. Molecular Biology of Aging. 3 Credits.
In this course we will discuss molecular mechanisms and pathways involved in aging and lifespan regulation, as well as exploring the biology of aging-related diseases such as Alzheimer's and Parkinson's. Students will have the opportunity to share and consider current primary literature in the field. Textbook required. Freshmen Only
Instructor(s): S. Soper
Area: Natural Sciences.

AS.020.120. Discover Hopkins: Introduction to Laboratory Research. 1 Credit.
This course will introduce students to a variety of biochemical and molecular biological laboratory techniques. These will include DNA analysis by restriction enzyme mapping, amplification of DNA segments by PCR, lipid analysis by chromatography. Additionally, students will visit a variety of biological laboratories to observe actual research projects.
Instructor(s): A. Ketchum; B. Scipioni; K. Oborn; P. Cummings
Area: Natural Sciences.

AS.020.121. Microbial Genomics. 1 Credit.
This course will cover next generation (NextGen) sequencing methods, genome and metagenome analyses, and the issues associated with them. We will review studies in microbial evolution, environmental microbiology, and host-associated microbial communities using recent papers from the primary literature. Topics such as the first ancient bacterial genome from the Black Death plague, ocean and soil viromes, the human gut microbiome, and microbial communities inside Antarctica rocks will be explored. This course will also provide students with a solid basis for critically analyzing the primary literature through discussions in class and a final written project (see below). Articles from the primary literature will be provided to the students.
Instructor(s): J. Diruggiero
Area: Natural Sciences.

AS.020.123. Genetics, Genomics and Evolution. 3 Credits.
An introduction to key principles of genetics, genomics, and evolution. Lectures will alternate lab exercises and discussion of primary literature. Freshmen only. Recommended Course Background: Score of 4 or 5 on AP Biology Exam.
Instructor(s): F. Spencer
Area: Natural Sciences.

AS.020.125. Biology in Film. 1 Credit.
This course will feature weekly presentations of highly acclaimed, Hollywood films. Each film will be hosted by a different member of the Biology faculty who will provide an introduction and discussion of the film. Film topics include early discoveries in the biomedical arena, genetic and infectious diseases, and the potential consequences of human genetic engineering. Students will be expected to attend all classes and complete a questionnaire based on each film.
Area: Humanities, Natural Sciences.

AS.020.126. Project Lab: Phage Hunting II. 2 Credits.
This is an introductory course open to all freshmen regardless of intended major. No science background is required. This is the second semester of a year-long research-based project course in which students will participate in a nation-wide program in collaboration with undergraduates at other colleges. In the spring, students will isolate and characterize novel bacteriophages (viruses that infect bacteria) from the environment using modern molecular biological techniques. The course includes two lab meetings per week. Continues in the spring. Each semester provides 2 credit hours of Natural Sciences (N) distribution credits and/or counts 2 hours toward the research requirement for the Molecular and Cellular Biology degree. No textbook is required. Freshmen only
Instructor(s): E. Fisher; J. Schildbach
Area: Natural Sciences.
AS.020.151. General Biology I. 4 Credits.
This course begins with an overview of the biosphere, followed by analysis of ecosystem and exploration of animal behavior in the context of ecosystems and evolution. Next, the cellular and molecular basis of life and the energetics of organisms are presented as unifying themes. The biochemistry of organic molecules, factors controlling gene expression, cellular metabolism, and advances in biotechnology represent topics of concentration. Mechanisms of inheritance and evolution are introduced. This course will also include a series of workshops that will explore current trends in research, experimental design and analysis, and molecular modeling. Cross-listed with Behavioral Biology. Note: The Tuesday workshop is a required part of this course.
Instructor(s): C. Roberson; R. McCarty; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.152. General Biology II. 4 Credits.
This course builds on the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology. The workshops that were introduced in AS.020.151 General Biology I will include the use of simulation software, a critique of the primary literature, and an exploration of current trends in medicine. Recommended Course Background: AS.020.151. Section 01: Not open to Freshmen. Section 02: Open to Freshmen only.
Instructor(s): C. Roberson; R. McCarty; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.153. General Biology Laboratory I. 1 Credit.
Student must have enrolled in AS.020.151 either term or in past terms. Students who have credit for AP Biology but take General Biology Lab I will lose all eight credits of AP Biology credit. This course reinforces the topics covered in AS.020.151. Laboratory exercises explore subjects ranging from forest ecology to molecular biology to animal behavior. Students participate in a semester-long project, identifying bacteria using DNA sequencing. Cross-listed with Behavioral Biology.
Prerequisites: AS.020.151
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.154. General Biology Lab II. 1 Credit.
This course reinforces the topics covered in AS.020.152. Laboratory exercises explore subjects ranging from evolution to anatomy and physiology. Students participate in a project using molecular biology techniques to determine whether specific foods are made from genetically engineered plants. Cross-listed with Behavioral Biology. Students who have credit for AP Biology but take General Biology Lab II will lose all four credits of their overall credit for AP Biology.
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.161. Biology Workshop I. 1 Credit.
The workshop covers applications and current trends in Biology through guest lectures from researchers and hands-on computer programs. Credit will be awarded for EITHER AS.020.151 or AS.020.161, but not both. Recommended Course Background: Score of 4 or 5 on AP Biology exam.
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.162. Biology Workshop II. 1 Credit.
Students will discuss current events and controversies in biology, ranging from genetic engineering to nanotechnology in medicine.
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.205. Introduction to Biological Molecules. 3 Credits.
Instructor(s): A. Ketchum; C. Roberson; E. Fisher; K. Tifft Oshinnaiye; R. Shingles
Area: Natural Sciences.

AS.020.207. Intro:Biological Anthro. 3 Credits.
The biology and evolution of humans and their closest living relatives.
Instructor(s): M. Teaford
Area: Natural Sciences, Social and Behavioral Sciences.

AS.020.209. Dinosaurs. 3 Credits.
This course covers all of the major groups of dinosaurs, from Triceratops to T. rex and its relatives living today, birds. It will also cover the origins of the group, their near demise 65 million years ago, their behavior, growth, and development, and a history of their study.
Instructor(s): D. Weishampel
Area: Natural Sciences.

AS.020.214. Self Organizing Patterns in Nature. 1 Credit.
The manifestations of all biological structures and related functions are the end effect of the formation and maintenance of complex molecular and cellular patterns. These patterns (macromolecules, cellular organelles, cells, and tissues) are assembled from their constituent parts under fundamental rules not too dissimilar to those that govern the formation of snowflakes or the dewdrops on a spider web. This course (lectures and student presentations) attempts to describe these common rules and to explain the formation and function of significant biological assemblies. Recommended Course Background: AS.020.305 or instructor’s permission. Freshmen with signed permission from instructor.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.227. Human Physiology. 3 Credits.
This is an introduction to Human Physiology. It will cover an overview of the subject that is appropriate for undergraduates and will be of interest to those planning to pursue medical or health related careers. While there is no formal prerequisite, a basic understanding of chemistry and biology at the undergraduate level will be helpful.
Instructor(s): T. Woolf
Area: Natural Sciences.

AS.020.293. Scientific Communication Skills. 3 Credits.
Instructor(s): C. Sheely; D. McNeill
Area: Natural Sciences
Writing Intensive.

AS.020.305. Biochemistry. 4 Credits.
The molecules responsible for the life processes of animals, plants, and microbes will be examined. The structures, biosynthesis, degradation, and interconversion of the major cellular constituents including carbohydrates, lipids, proteins, and nucleic acids will illustrate the similarity of the biomolecules and metabolic processes involved in diverse forms of life. Sophomores, Juniors, and Seniors Only.
Prerequisites: Prereqs: (AS.030.206 OR AS.030.212) OR EN.540.202
Instructor(s): E. Fisher; J. Schildbach; K. Tifft Oshinnaiye; V. Hilser; Y. Lee
Area: Natural Sciences.
AS.020.306. Cell Biology. 4 Credits.
How the molecules of living systems are organized into organelles, cells, tissues, and organisms will be explored, as well as how the activities of all of these are orchestrated and regulated to produce "life"—a phenomenon greater than the sum of its parts. Considerable emphasis is placed on experimental approaches to answering these questions. Topics covered include biological membranes, cytoskeletal elements, cell locomotion, membrane and protein traffic, the nucleus, second messengers, signal transduction, cell growth, the cell cycle, the extracellular matrix, cell contacts and adhesion, intercellular communication, epithelial structure and function, and the cell biology of early development and organ function. Sophomores, juniors, and seniors only. Recommended Course Background: (AS.020.151 or AS.020.305) or equivalent knowledge of biomolecules.
Instructor(s): E. Fisher; K. Tiff; Oshinaiye; M. Hoyt; R. Kuruvilla
Area: Natural Sciences.

AS.020.307. Enzymes, Metabolism and Metabolic Disorders. 3 Credits.
This course will cover basic and advanced concepts in enzymology and metabolic processes while focusing on how these processes contribute to human health and diseases. This course is composed of lectures, discussion sessions, and student presentations.
Prerequisites: AS.020.305 or with instructor’s permission
Instructor(s): Y. Lee
Area: Natural Sciences.

AS.020.312. Introduction to the Human Brain. 3 Credits.
This course explores the outstanding problem of biology: how knowledge is represented in the brain. Relating insights from cognitive psychology and systems neuroscience with formal theories of learning and memory, topics include (1) anatomical and functional relations of cerebral cortex, basal ganglia, limbic system, thalamus, cerebellum, and spinal cord; (2) cortical anatomy and physiology including laminar/columnar organization, intrinsic cortical circuit, hierarchies of cortical areas; (3) activity-dependent synaptic mechanisms; (4) functional brain imaging; (5) logicist and connectivist theories of cognition; and (6) relation of mental representations and natural language.
Instructor(s): E. Hedgecock
Area: Natural Sciences.

AS.020.315. Biochemistry Laboratory. 2 Credits.
This course will reinforce the topics presented in Biochemistry AS.020.305 or AS.250.307 through laboratory exercises which use quantitative measurement to study cellular components and processes. Topics include pH, proteins, carbohydrates, lipids, nucleic acids, and enzymes. Sections 6-10 are for BIOLOGY AND MOLECULAR & CELLULAR BIOLOGY MAJORS ONLY.
Prerequisites: Pre/Co-requisite AS.020.305 OR AS.250.307
Instructor(s): J. Schuldham; R. Horner
Area: Natural Sciences.

AS.020.316. Cell Biology Lab. 2 Credits.
This course will reinforce the topics presented in AS.020.306 Cell Biology through laboratory exercises which use visible and fluorescence microscopy to study chromosomes, cell organelles, cell surface receptors, contractile proteins, and microfilaments.
Prerequisites: Prerequisite or Corequisite: AS.020.306
Instructor(s): R. Horner
Area: Natural Sciences.

AS.020.317. Signaling in Development and Disease. 3 Credits.
An advanced undergraduate level seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease.
Recommended Course Background: AS.020.305, AS.020.306, and AS.080.306
Instructor(s): R. Kuruvilla; Staff
Area: Natural Sciences.

AS.020.322. Cellular & Molecular Biology of Sensation. 3 Credits.
Leading scientists in sensory biology from the Johns Hopkins community will present the most current knowledge in the cellular and molecular biology of sensation. A lecture and a student presentation of an exemplary manuscript will be presented each week on a different topic of sensory systems. Recommended Course Background: AS.020.304, AS.020.305, AS.020.306, AS.080.305.
Area: Natural Sciences.

AS.020.325. Introduction to the Protein World. 3 Credits.
The course will consider the chemical, physical and biological aspects of proteins; their primary, secondary, tertiary and quaternary structures; evolution of these structures and mechanisms of their formation and functioning.
Instructor(s): P. Privalov
Area: Natural Sciences.

AS.020.326. The Sugar Code: The Sweet Side of Life. 3 Credits.
Prerequisites: AS.020.305
Instructor(s): Y. Lee
Area: Natural Sciences.

AS.020.327. Molecular Biology of Extremophiles. 3 Credits.
Prerequisites: AS.020.151 AND AS.020.152
Area: Natural Sciences.

AS.020.328. Adopt a Genome: Genomics and Sequence Analysis. 3 Credits.
Prerequisites: AS.020.330
Instructor(s): J. Diruggiero
Area: Natural Sciences.

AS.020.329. Microbiology. 3 Credits.
This course explores the physiology and genetics of microorganisms within an evolutionary and ecological framework. Concepts in microbiology will be supported by molecular studies of microbial evolution and microbial communities including that of the human microbiome.
Recommended Course Background: AS.020.305
Instructor(s): E. Fisher; J. Diruggiero
Area: Natural Sciences.

AS.020.330. Genetics. 3 Credits.
Presentation of the principles of heredity and variation, and their application to evolution and development; physico-chemical nature of the gene; problems of recombination; gene action. Recommended Course Background: AS.020.306 or AS.020.151 (or equivalent knowledge of biomolecules; Corequisite: AS.020.305.
Instructor(s): J. Schuldham; K. Cunningham; M. Hoyt
Area: Natural Sciences.
AS.020.331. Human Genetics. 2 Credits.
Will examine the growing impact of human genetics on the biological sciences, on law and medicine, and on our understanding of human origins. Topics include structure and evolution of human genome, genetic and physical mapping of human chromosomes, molecular genetics of inherited diseases and forensic genetics.
Instructor(s): E. Hedgecock
Area: Natural Sciences.

AS.020.332. Photosynthesis by Land and Aquatic Organisms. 2 Credits.
This course analyzes the fundamental process of photosynthesis, the process on which all life on Earth depends for its existence. We begin from the level of the structural organization of the photosynthetic machinery and progress to the essentials of the photophysics of light capture by the primary pigments. Next we follow the conversion of photon flow to electron flow through the electron transport chain, and finally we study the formation of chemical gradients that serve as temporary “energy stores” utilized in the synthesis of the essential chemicals that are consumed to drive carbon dioxide and nitrogen fixation and yield biomass. Finally, we compare the specializations of land and aquatic photosynthetic systems that serve the two different ecosystems. Recommended Course Background: AS.020.305 or AS.020.306 or special permission by the instructor.
Instructor(s): E. Moudrianakis; R. Horner
Area: Natural Sciences.

AS.020.333. Adaptations Of Plants to their Environments. 2 Credits.
This course is an introduction to the ecological physiology of higher plants. Plants grow in the tropics and the tundra, in extremely dry or wet situations, and even in salt water. The adaptations of plants to their environments will be discussed.
Instructor(s): E. Johnson
Area: Natural Sciences.

AS.020.334. Planets, Life and the Universe. 3 Credits.
This multidisciplinary course explores the origins of life, planet formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions, and planetary protection. Recommended Course Background: Three upper level (300+) courses in sciences (Biophysics, Biology, Chemistry, Physics, Astronomy, Math, or Computer Science)
Prerequisites: Students may not register for this class if they have already received credit for AS.171.333 or AS.270.335.
Instructor(s): C. Norman; J. Diruggiero; N. Levin
Area: Natural Sciences.

AS.020.335. Photosynthesis by Land and Aquatic Organisms. 2 Credits.
This course analyzes the fundamental process of photosynthesis, the process on which all life on Earth depends for its existence. We begin from the level of the structural organization of the photosynthetic machinery and progress to the essentials of the photophysics of light capture by the primary pigments. Next we follow the conversion of photon flow to electron flow through the electron transport chain, and finally we study the formation of chemical gradients that serve as temporary “energy stores” utilized in the synthesis of the essential chemicals that are consumed to drive carbon dioxide and nitrogen fixation and yield biomass. Finally, we compare the specializations of land and aquatic photosynthetic systems that serve the two different ecosystems. Recommended Course Background: AS.020.305 or AS.020.306 or special permission by the instructor.
Instructor(s): E. Moudrianakis; R. Horner
Area: Natural Sciences.

AS.020.336. Immunology. 3 Credits.
A course for upper-level undergraduates that will introduce them to modern immunology and the application of this information to specific human diseases.
Prerequisites: Prereq: AS.020.330, AS.020.305, AS.020.306
Instructor(s): M. Edidin
Area: Natural Sciences.

AS.020.337. AIDS. 3 Credits.
AIDS is the world’s deadliest infectious disease. This course will cover the biology of human immunodeficiency virus (HIV, the infectious agent that causes AIDS), the effects of HIV on the immune system, the pharmacology of the anti-viral agents that are used to suppress HIV infection, and the ongoing quest for an HIV vaccine. Because HIV drugs cannot cure HIV-infected individuals and no HIV vaccine yet exists, we will also study the long-term consequences of HIV infection including opportunistic infections, comorbid conditions, and the HIV-related cancers Kaposi’s Sarcoma and AIDS-Related lymphoma. Recommended Course Background: AS.020.306
Instructor(s): T. Schroer
Area: Natural Sciences.

AS.020.350. Introduction to Clinical Medicine. 1 Credit.
Perm. Req’d. Post-Bac Students Only
Instructor(s): B. Winters; W. Merritt; W. Ziai
Area: Natural Sciences.

AS.020.353. Seminar: Examining Alternative Health Strategies. 2 Credits.
Seminar-style class which examines alternative health strategies that have a holistic basis, such as consumption of red wine (resveratrol, antioxidants), green tea (polyphenols, EGCG, etc.), megadoses of vitamins; acupuncture (endorphin & neurotransmitter release), high-fat low-carb diets, etc. Class will open with the topic of placebos and experimental design in human trials (or in epidemiological studies). Students will learn to find peer-reviewed research articles on topics of interest, take turns presenting articles, give a written analysis of each article, and discuss articles in seminar format. Grading will be based on finding quality research articles, class participation, written evaluation of articles, and presentation of articles to the class. Recommended Course Background: AS.020.305 and AS.020.306
Instructor(s): B. Kondo
Area: Natural Sciences.
AS.020.354. Planets, Life, and the Universe Seminar. 1 Credit.
Based on the course Planets, Life and the Universe in the Fall, this seminar series is for students who would like to read and discuss interesting current papers in the field, including the latest developments that may lead to interesting ideas on interdisciplinary research. Papers will be assigned to read each week. Recommended Course Background: AS.171.333/AS.171.699 or AS.020.334/AS.020.616
Area: Natural Sciences.

AS.020.360. Biology of Aging. 2 Credits.
Our understanding of the biology of aging has been revolutionized with the isolation of mutations that can double lifespan. Why would natural selection have failed to produce such long-lived individuals? In this course we will investigate not only how we age, but also why we age. Each class will begin with a lecture introducing an age-related topic, followed by student presentation and discussion of research papers. Grades will be based upon class participation, quality of presentations, and a final exam. Strong command of cell biology and genetics is recommended. Recommended Course Background: AS.020.306 or equivalent
Area: Natural Sciences.

AS.020.363. Developmental Biology. 3 Credits.
Development of invertebrates, vertebrates, and plants. The course will emphasize the experimental bases for the fundamental concepts of development.
Prerequisites: AS.020.306 AND AS.020.330
Instructor(s): C. Norris; M. Van Doren
Area: Natural Sciences.

AS.020.367. Primate Adaptation and Evolution. 3 Credits.
A close look at our closest relatives, the primates. Topics include: evolutionary theory, primate evolution, primate behavior and ecology, human evolution, and modern human variation.
Prerequisites: ( AS.020.151 AND AS.020.152 ) OR AS.020.207 OR AS.020.379 OR Permission of instructor.
Instructor(s): J. Perry
Area: Natural Sciences.

AS.020.368. Mammalian Evolution. 3 Credits.
An introduction to the evolutionary history and diversity of mammals, with emphasis on the first half of the Cenozoic - the beginning of the Age of Mammals. The course will focus primarily on the adaptive radiation of mammals (including our own order primates) that followed the extinction of the dinosaurs, exploring the origins and relationships of the major groups of mammals as well as the anatomical and ecological reasons for their success. Lectures will be supplemented with relevant fossils and recent specimens.
Instructor(s): K. Rose
Area: Natural Sciences.

AS.020.370. Emerging Strategies and Applications in Biomedical Research. 3 Credits.
Up-to-date primary literature manuscripts related to new discoveries and new strategies that are allowing scientists to make amazing progress in biomedical research will be presented. Examples include: labeling neurons with up to 90 different colors to trace their circuitry, evolution studies in glowing bacteria, detecting several viruses on a single chip and using fiber optics and channel rhodopsin to induce sleep. Students should be interested in reading primary literature research papers and discussing them in class. Recommended Course Background: AS.020.305 OR AS.020.306 or AS.080.305 or AS.080.306. Juniors and Seniors only.
Instructor(s): S. Hattar
Area: Natural Sciences.

AS.020.371. Emerging Strategies in Understanding Innate Behaviors. 3 Credits.
The hypothalamus is the central regulator of a broad range of homeostatic behaviors essential to survival, and plays a key role in controlling emotional and appetitive behaviors. This course offers an overview of both historical and recent work on this vital brain region. Topics covered will include the evolution and development of the hypothalamus, control of circadian rhythms and sleep, regulation of hunger and body temperature, as well as hypothalamic regulation of sexual, defensive, and affiliative behavior.
Prerequisites: AS.020.305 OR AS.020.306 OR AS.080.301 OR AS.080.302
Instructor(s): S. Blackshaw; S. Hattar
Area: Natural Sciences
Writing Intensive.

AS.020.373. Developmental Biology Lab. 2 Credits.
This laboratory explores the development of live animals, and students in each section will sometimes be required to return to lab on succeeding days to observe and record the results of their experiments. Corequisite: AS.020.363
Instructor(s): C. Norris.

AS.020.374. Comparative Animal Physiology. 3 Credits.
This class examines animal physiology from an evolutionary and comparative viewpoint. The goal is to examine the commonalities, as well as unique differences, in how various animal organisms address the necessary life functions. Topics will include metabolism, neural systems, respiration, muscle systems, water and salt homeostasis, thermal regulation, and reproduction
Instructor(s): B. Kondo.

AS.020.375. Human Gross Anatomy. 3 Credits.
This course is meant to be an introduction to human gross anatomy. It will seek to give students enough background in anatomical knowledge and vocabulary to help them in their initial training in medical school, however, it will not be a substitute for anatomy courses in medical school. It will focus on normal adult anatomy, and it will cover each of the main regions of the body – i.e., thorax, abdomen and pelvis, back and limbs, and head-&-neck. Lectures will cover descriptive and functional anatomy, ultimately leaving students with a better understanding of anatomical terminology and 3D relationships of structures within the human body, and better problem-solving skills as they begin to relate symptoms to causes, again at the gross anatomical level.
Prerequisites: ( AS.020.151 AND AS.020.152 ) OR AS.020.305 OR AS.020.306 OR AS.080.305
Instructor(s): V. Deleon
Area: Natural Sciences.

AS.020.376. Molecular Evolution. 2 Credits.
A history of life on earth has been recorded in the DNA of organisms that live today. But what language is it and how can we read that history? This course introduces basic principles of molecular evolution plus a wide array of methodologies used to interpret molecular sequence data. Many interesting studies of gene and genome evolution will be covered as examples of this burgeoning area of research. This fun and popular course now includes computer labs that will enable students to obtain first-hand experience in this exciting field of research.
Prerequisites: AS.020.330 (Genetics) or with permission of instructor
Instructor(s): K. Cunningham
Area: Natural Sciences.
AS.020.379. Evolution. 3 Credits.
This course takes a broad look at the impact of natural selection and other evolutionary forces on evolution. Emphasis is placed on what we can learn from genome sequences about the history of life, as well as current evolutionary pressures. Recommended Course Background: AS.020.306, AS.020.330, or permission required
Instructor(s): C. Norris
Area: Natural Sciences.

AS.020.380. Eukaryotic Molecular Biology. 3 Credits.
The field of molecular biology is fundamental for those interested in modern biological research and medicine. In this course students examine DNA, RNA and protein synthesis (i.e., the “central dogma” of molecular biology) in molecular detail, as well as how these processes are regulated and interrelated. There is significant examination of molecular structure-function relationships, with particular emphasis on RNA synthesis and processing and chromosomal organization, nucleosome regulation and epigenetics. Modern and fundamental experimental techniques and concepts are explored in detail. Students will learn how to use some genome databases and bioinformatics tools available online to improve their molecular biology research skills and knowledge. Readings are both from scientific journals as well as a textbook that includes interactive online content.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.383. Molecular Biology of Aging. 3 Credits.
In this Dean’s Teaching Fellowship Course, we will discuss molecular mechanisms and pathways involved in aging and lifespan regulation, as well as exploring the biology of aging-related diseases such as Alzheimer’s and Parkinson’s. Course readings will be taken directly from the primary literature. No textbook is required. Instructors: Megan Mayerle and Sarah Soper. Recommended Course Background: AS.020.306
Instructor(s): M. Mayerle; S. Soper
Area: Natural Sciences.

AS.020.390. Model Systems in Biology. 3 Credits.
This course will provide an in-depth overview of the influence of model systems on human health and their role in answering current research problems.
Prerequisites: AS.020.330
Instructor(s): Staff
Area: Natural Sciences
Writing Intensive.

AS.020.391. The Human Microbiome. 3 Credits.
This course will take an in depth look at how bacteria play a role in human health and disease.
Prerequisites: 020.305, Biochemistry; 020.306, Cell Biology.
Area: Natural Sciences.

AS.020.401. Advanced Seminar: Molecular & Cellular Biology. 3 Credits.
This is a weekly seminar designed for graduate students enrolled in the B.A./M.S. and Ph.D. programs. The seminar involves student presentations of research and discussion of topics of current interest in the field. BA/MS candidates only.
Instructor(s): K. Tifft Oshinnaiye
Area: Natural Sciences.

AS.020.402. Seminar: Molecular & Cellular Biology. 3 Credits.
This is a weekly seminar designed for students enrolled in the BA/MS program. The seminar involves student presentations of research and discussion of topics of current interest in the field. BA/MS students only.
Instructor(s): K. Tifft Oshinnaiye
Area: Natural Sciences.

AS.020.420. Build-a-Genome. 4 Credits.
In this combination lecture/laboratory “Synthetic Biology” course students will learn how to make DNA building blocks used in an international project to build the world’s first synthetic eukaryotic genome, Saccharomyces cerevisiae v. 2.0. Please study the wiki www.syntheticyeast.org for more details about the project. Following a biotechnology boot-camp, students will have 24/7 access to computational and wet-lab resources and will be expected to spend 15-20 hours per week on this course. Advanced students will be expected to contribute to the computational and biotech infrastructure. Co-listed with EN.580.420, AS.020.451 and EN.540.420. Successful completion of this course provides 3 credit hours toward the supervised research requirement for Molecular and Cellular Biology majors, or 2 credit hours toward the upper level elective requirement for Biology or Molecular and Cellular Biology majors. Must understand fundamentals of DNA structure, DNA electrophoresis, and analysis, Polymerase Chain Reaction (PCR), and must be either a) Experienced with molecular biology lab work or b) Adept at programming with a biological twist.
Instructor(s): J. Boeke; K. Zeller
Area: Natural Sciences.

AS.020.431. JHU Oxford: Advanced Biochemistry & Molecular Biology. 4 Credits.
Open to JHU Oxford participants only.
Instructor(s): J. Schildbach; Staff
Area: Natural Sciences.

AS.020.441. Mentoring in Biology. 1 Credit.
To become a mentor, students must have successfully completed AS.020.151/152, must apply using the form on the Biology Dept. Website, and must be accepted by the instructors. The deadline to apply is April 8th. This course provides students who have taken General Biology I & II the opportunity to mentor new students in General Biology I & II. Mentors collaborate with faculty on how to lead effective sessions, help student teams complete team assignments, and generally help students understand difficult concepts and principles in biology. Mentors must have a firm command of the topics covered in biology and must meet with both faculty and students through the course of the semester. S/U only. Perm. Req’d
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.442. Mentoring In Biology. 1 Credit.
This course provides students who have taken General Biology I & II the opportunity to mentor new students in General Biology I & II. Mentors collaborate with faculty on how to lead effective sessions, help student teams complete team assignments, and generally help students understand difficult concepts and principles in biology. Mentors must have a firm command of the topics covered in biology and must meet with both faculty and students through the course of the semester. To become a mentor, students must have successfully completed AS.020.151/AS.020.152, must apply using the form on the Biology Department website, and must be accepted by the instructors. The deadline to apply is April 8th. Recommended Course Background: AS.020.151/AS.020.152
Instructor(s): R. Pearlman; R. Shingles
Area: Natural Sciences.
AS.020.451. Build-a-Genome Mentor. 4 Credits.
In this combination lecture/laboratory, "Synthetic Biology" course students will learn how to make DNA building blocks used in an international project to build the world's first synthetic eukaryotic genome, Saccharomyces cerevisiae v. 2.0. Please study the wiki www.syntheticyeast.org for more details about the project. Following a biotechnology boot-camp, students will have 24/7 access to computational and wet-lab resources and will be expected to spend 15-20 hours per week on this course. Advanced students will be expected to contribute to the computational and biotech infrastructure. Must understand fundamentals of DNA structure, DNA electrophoresis, and analysis, Polymerase Chain Reaction (PCR) and must be either a) Experienced with molecular biology lab work or b) Adept at programming with a biological twist.
Instructor(s): J. Boeke
Area: Natural Sciences.

AS.020.501. Introduction Independent Study. 3 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Freshmen and Sophomores only. Perm. Req'd.
Instructor(s): Staff.

AS.020.502. Introduction Independent Study. 0 - 3 Credit.
Instructor(s): K. Cunningham; R. Horner.

AS.020.503. Introduction To Research. 3 Credits.
Perm. Req'd. Freshmen and Sophomores only
Instructor(s): Staff.

AS.020.504. Introduction to Research. 0 - 3 Credit.
Perm. Req'd. Freshmen or Sophomores only
Instructor(s): Staff.

AS.020.505. Internship - Biology. 1 Credit.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Consent of adviser required.
Instructor(s): H. Zhao; L. Brand; R. McCarty; Staff.

AS.020.506. Internship - Biology. 1 Credit.
Instructor(s): Staff.

AS.020.511. Independent Study. 3 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Perm. Req'd.
Instructor(s): Staff.

AS.020.512. Independent Study. 0 - 3 Credit.
Instructor(s): Staff.

AS.020.513. Research Problems. 3 Credits.
Planning and conducting original laboratory investigations on biological problems, collection and analysis of data, reporting of results. Juniors and Seniors Only. Recommended Course Background: Permission of full-time aculty member in Biology dept.
Instructor(s): Staff.

AS.020.514. Research Problems. 0 - 3 Credit.
Perm. Req'd. Juniors and Seniors only
Instructor(s): Staff.

AS.020.515. Build-a-Genome Mentor. 4 Credits.
This course provides BA/MS students with intensive research experience for a full academic year. Students in the program work under the direction of a research mentor on an original research project, produce a written report in the form of a thesis, and make a presentation of the work to the Biology Department. BA/MS or BS/MS candidates only.
Instructor(s): R. Horner.

AS.020.551. Mentored Research. 9 Credits.
BA/MS candidates only.
Instructor(s): R. Horner.

AS.020.554. Mentored Research Program in Cellular and Molecular Biology. 3 Credits.
BA/MS Candidates Only
Instructor(s): R. Horner.

AS.020.591. Summer Research Experience. 0 - 3 Credit.
Instructor(s): E. Hedgecock.

AS.020.594. Internship-Summer. 1 Credit.
Instructor(s): Staff.

AS.020.597. Research. 3 Credits.
Instructor(s): Staff.

AS.020.599. Independent Study. 3 Credits.
Instructor(s): C. Norris; M. Bessman; R. Horner; T. Schroer.

First year Biology Graduate students only
Instructor(s): Staff.

AS.020.606. Molecular Evolution.
A history of life on earth has been recorded in the DNA of modern organisms. But what information is contained in this record and how can we understand it? This course introduces basic principles of molecular evolution and a wide array of methodologies used to infer and interpret molecular sequence data. Many interesting studies of gene and genomic evolution will be covered as examples of this burgeoning area of research. Recommended Course Background: AS.020.330
Instructor(s): K. Cunningham.

AS.020.612. Introduction to the Human Brain.
This course explores the outstanding problem of biology; how knowledge is represented in the brain. Relating insights from cognitive psychology and systems neuroscience with formal theories of learning and memory, topics include (1) anatomical and functional relations of cerebral cortex, basal ganglia, limbic system, thalamus, cerebellum, and spinal cord; (2) cortical anatomy and physiology including laminar/columnar organization, intrinsic cortical circuit, hierarchies of cortical areas; (3) activity-dependent synaptic mechanism; (4) functional brain imaging; (5) logicoist and connectivist theories of cognition; and (6) relation of mental representations and natural language. Co-listed with AS.020.312.
Instructor(s): E. Hedgecock.

AS.020.613. Biology Science Writing.
Students will learn how to write abstracts and grant proposals, organize scientific manuscripts and thesis dissertations by writing and rewriting about their own research and editing other students' work. Focus will be on structure, substance, accessibility, and clarity of writing. Biology Graduate students only. Permission Req'd.
Instructor(s): A. Huang.
AS.020.614. Signalining in Development and Disease.
PermReq'd.A graduate level class covering current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease. Instructor(s): R. Kuruvilla
Area: Natural Sciences.

AS.020.616. Planets, Life and the Universe.
This multidisciplinary course explores the origins of life, planets’ formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions and planetary protection. Grad Students Only.
Instructor(s): J. Druggiero; N. Levin
Area: Natural Sciences.

AS.020.620. Stem Cells.
This course consists of introductory lectures given by faculty members, followed by student presentations in the form of seminars. The introductory part will cover the basic knowledge about stem cells, such as: What features make cells qualified as stem cells? What are the unique cellular and molecular properties of stem cells? How do stem cells maintain their identities? What are the mechanisms underlying stem cell differentiation and reprogramming? What are the therapeutic applications of stem cells? The student seminar will be based on selected literatures by the faculty. A summary mini-review paper is required for a chosen topic at the end of the semester. Instructor(s): X. Chen.

Lectures include recent findings in tumor genetics, cancer pathways, invasions and metastasis and cancer therapies. - Juniors and Seniors may register with instructor’s permission
Instructor(s): R. Huang.

AS.020.630. Human Genetics.
Will examine the growing impact of human genetics on the biological sciences, on law and medicine, and on our understanding of human origins. Topics include structure and evolution of human genome, genetic and physical mapping of human chromosomes, molecular genetics of inherited diseases and forensic genetics. Instructor(s): E. Hedgecock
Area: Natural Sciences.

AS.020.634. Chromatin/Gene Express.

AS.020.637. Genomes & Development.
This course covers gametogenesis, embryogenesis, post-embryonic development, genetic analysis, developmental genetics, model developmental systems, and cell determination. Biology graduate students only except with written permission from the instructor. Instructor(s): A. Bortvin; A. Spradling; M. Halpern; M. Van Doren; X. Chen.

AS.020.638. Regulation and Mechanism of the Cell Cycle.
Prerequisites: AS.020.686
Instructor(s): M. Hoyt.

AS.020.640. Epigenetics and Chromosome Dynamics.
It has become finally recognized that the primary structure of the DNA is not the sole and absolute determinant of the phenotype of an organism. Much depends on the modifications of the primary information by time and tissue specific enzymatic modifications of this information and the result is the epigenetic information potential within the nucleus. This potential is dynamic; it can be “written and re-written” in the life-trajectory of a cell. We will examine the various process and states of genome epigenetics, from simple genes to whole chromosomes, chromosomal subsets and even the whole nucleus. This graduate level course will consist of few special overview lectures given by the instructors and the rest will be student presentations. The topics will be selected by the faculty but we will also consider the inclusion of special and timely topics suggested by the students. The duration of each session will be 90 minutes. Upper level undergraduates may register with signature of the instructors. The evaluation of the students for grade assignment will depend on a) the quality of the student’s oral presentation; b) the students extent and depth of participation in the discussions of each and every seminar; c) the completion of papers given as homework assignments. Attention is mandatory for all sessions. No specific textbook will be assigned but the students will be sent to special Journals and books and are expected to search relevant literature and visit references beyond those provided by the instructors and share their findings with all in the class. Instructor(s): B. Migeon; E. Moudrianakis
Area: Natural Sciences.

Instructor permission required for undergraduate students
Instructor(s): K. Beemon; P. Pitha-Rowe
Area: Natural Sciences.

AS.020.644. RNA.
A graduate seminar course that will explore RNA from its beginning in the primordial RNA world to its present-day roles in gene regulation in bacteria, mammals, and viruses. Topics will include: The early RNA world, Riboswitches, Ribozymes, evolution of protein synthesis, splicing, telomerase, RNA interference, microRNAs, long non-coding RNAs, Viral non-coding RNAs, and RNA therapeutics. Biology PHD students only. MCB MS students with instructor’s permission during ADD/DROP Period.
Instructor(s): K. Beemon
Area: Natural Sciences.

AS.020.646. Biological Spectroscopy.
Instructor(s): L. Brand.

AS.020.650. Eukaryotic Molecular Biology.
The field of molecular biology is fundamental for those interested in modern biological research and medicine. In this course students examine DNA, RNA and protein synthesis (i.e., the "central dogma" of molecular biology) in molecular detail, as well as how these processes are regulated and interrelated. There is significant examination of molecular structure-function relationships, with particular emphasis on RNA synthesis and processing and chromosomal organization, nucleosome regulation and epigenetics. Modern and fundamental experimental techniques and concepts are explored in detail. Students will learn how to use some genome databases and bioinformatics tools available online to improve their molecular biology research skills and knowledge. Readings are both from scientific journals as well as a textbook that includes interactive online content. Students enrolled in AS.020.650 will have additional assignments compared to those enrolled in AS.020.380.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.
AS.020.666. **Biological Thermodynamics.**
An in-depth discussion of thermodynamics, statistical thermodynamics and their applications to the conformational equilibrium and the interactions of biological macromolecules with other macromolecules and small molecular weight ligands.
Instructor(s): E. Freire.

AS.020.666. **Advanced Molecular Biology.**
The course introduces students from a wide variety of backgrounds to the rigorous and elegant methods that have been used in modern molecular biology research, with an emphasis on analysis and reasoning.
Recommended Course Background: AS.020.665
Instructor(s): R. Schleif.

AS.020.670. **Emerging Strategies and Applications in Biomedical Research.**
Up-to-date primary literature manuscripts related to new discoveries and new strategies that are allowing scientists to make amazing progress in biomedical research will be presented. Examples include: labeling neurons with up to 90 different colors to trace their circuitry, evolution studies in glowing bacteria, detecting several viruses on a single chip and using fiber optics and channel rhodopsin to induce sleep. Students should be interested in reading primary literature research papers and discussing them in class.
Instructor(s): S. Hattar
Area: Natural Sciences.

AS.020.674. **Graduate Biophysical Chemistry.**
This course will provide an overview of protein and nucleic acid structure, fundamentals of thermodynamics and kinetics, ligand binding, folding and stability of macromolecules, and the principles of biophysical methods such as fluorescence spectroscopy, NMR, and X-ray crystallography.
Monday Discussion Session is optional. Recommended Course Background: AS.020.305, AS.020.306
Instructor(s): Staff.

AS.020.679. **Advanced Biological Microscopy.**
This course builds upon the basic skills and knowledge students acquired in 020.395 and 020.397. The course will emphasize the integration and use of various light and electron microscopy techniques and their application to various biomedical research related questions; with students participating in the design, implementation, and analysis of their own experiments or experiments pertaining to ongoing research in the Center. Additionally, the course will cover basic theory and applications of non-linear spectral imaging techniques with special emphasis on coherent Raman spectroscopy. The course will be comprised primarily of a practical hands-on component but will also include applied theory as students will read, analyze, and discuss current journal articles.
Instructor: McCaffery and Wilson
Prerequisites: AS.020.395 and AS.020.397 or permission of instructor
Instructor(s): J. McCaffery.

AS.020.684. **Fundamentals of Drug Discovery and Development.**
The creation and implementation of new approaches to the drug discovery and development process is a very active area of research. Currently, only one compound out of 5,000 that enter preclinical studies becomes a drug. Moreover, the development process is time consuming, lasting more than ten years on average. The rate of failure is extremely high. It has become evident that this field is in urgent need of revolutionary changes. This course will cover drug discovery issues ranging from the identification of hits to their optimization as drug candidates. Current as well as novel and proposed approaches aimed at accelerating discovery, potency optimization, selectivity, pharmacokinetics and other drug properties will be discussed. Grad students only.
Instructor(s): E. Freire
Area: Natural Sciences.

AS.020.686. **Advanced Cell Biology.**
All aspects of cell biology are reviewed and updated in this intensive course through critical evaluation and discussion of the current scientific literature. Topics include protein trafficking, membrane dynamics, cytoskeleton, signal transduction, cell cycle control, cell physiology, and the integration of these processes in neurons.
Recommended Course Background: AS.020.306
Instructor(s): K. Cunningham.

AS.020.699. **CMDB Responsible Conduct in Research.**
This course involves discussions of ethical conduct and the responsible practice of scientific research. Department signature only; restricted to graduate students in Biology PhD students only.
Instructor(s): Staff.

AS.020.716. **Planets, Life, and the Universe Seminar.**
Based on the course Planets, Life and the Universe in the Fall, this seminar series is for students who would like to read and discuss interesting current papers in the field, including the latest developments that may lead to interesting ideas on interdisciplinary research.
Recommended Course Background: AS.171.333/AS.171.699 or AS.020.334/AS.020.616 Reading material Papers will be assigned to read each week.

AS.020.731. **Critical Thinking in Biology.**
In this course, students will critically analyze modern and seminal primary research papers in molecular, cellular and developmental biology. This analysis will emphasize the logic and experimental design of a selected set of outstanding research publications from diverse fields. Graduate students enrolled will develop the skills needed to efficiently understand and critique the rapidly expanding literature and growing diversity of biological research methods. In preparation for each class, all course participants will be expected to read and thoroughly critique the assigned paper(s). All students will submit a short, critical analysis of each paper in advance of the class session in which the paper(s) will be covered.
A student will lead each discussion (once per semester, dependent upon enrollment). Recommended Course Background: AS.020.637, AS.020.668, AS.020.674, and AS.020.686
Instructor(s): A. Bortvin; D. Zappulla; N. Ingolia.
AS.020.735. Seminar: Membrane Trafficking.
The Membrane Trafficking seminar course consists of several weeks of lectures and discussions led by the professors discussing key background concepts in the field of membrane trafficking. Class meetings during the final weeks of the course are seminars on current topics in membrane trafficking, led by the students. Over the course of the semester, students will learn about the methods and logic of experiment design, model building and hypothesis testing, gain exposure to and skills in reading and summarizing scientific literature, and get experience with preparing and delivering an effective oral presentation. fall/odd years.
Instructor(s): B. Wendland; J. McCaffery
Area: Natural Sciences.

AS.020.738. Biological Spectroscopy.
Instructor(s): L. Brand.

AS.020.739. Topics in Biochemistry.
The course is open to graduate students and advanced undergraduates - Undergraduates with instructor's permission. - "Topics in Biochemistry" deals with minireviews taken from the Journal of Biological Chemistry. Students select a topic of their choice from the "Compendium of Minireviews" for the current year, and present it before the class for discussion.
Instructor(s): M. Bessman.

AS.020.753. Logic and Methods in Modern Biology.
The purpose of this course is to gain experience in critical thinking about the logic and methods used in modern biological research. The main approach will be the critical reading, presentation, and discussion of primary research papers, and the preparation and presentation of a research proposal. It is held once a week on the NIH Bethesda campus. Grad students only.
Prerequisites: AS.020.637 AND AS.020.668 AND AS.020.674
Instructor(s): M. Lichten; O. Cohen-Fix
Area: Natural Sciences.

AS.020.801. Research – Biological Problems.
Independent research for the Ph.D. dissertation. Biology Ph.D. students only
Instructor(s): B. Wendland; Staff.

AS.020.802. Research-Biological Problems.
Biology Graduate students only.
Instructor(s): D. Zappulla; R. Kuruvilla; Staff.

AS.020.823. Introduction to Biology Research.
First year Biology Graduate Students only
Instructor(s): Staff.

AS.020.824. Introduction to Biology Research.
First year Biology Graduate Students only
Instructor(s): Staff.

AS.020.825. Introduction to Research.
Open to first year Biology graduate students only.
Instructor(s): Staff.

AS.020.826. Introduction to Biology Research.
Open to first year Biology graduate students only.
Instructor(s): Staff.

Cross Listed Courses

Neuroscience

AS.080.305. The Nervous System I. 3 Credits.
The Nervous System is a fully integrated, two-semester course that surveys the cellular and molecular biology of neurons as well as the structure and function of the nervous system. Cross-listed with Biology. No Freshmen.
Prerequisites: AS.080.203 OR AS.050.203 OR AS.200.141 or 080.105 or Permission
Instructor(s): H. Zhao; S. Hendry
Area: Natural Sciences.

Biophysics

AS.250.351. Reproductive Physiology. 2 Credits.
Focuses on reproductive physiology and biochemical and molecular regulation of the female and male reproductive tracts. Topics include the hypothalamus and pituitary, peptide and steroid hormone action, epididymis and male accessory sex organs, female reproductive tract, menstrual cycle, ovulation and gamete transport, fertilization and fertility enhancement, sexually transmitted diseases, and male and female contraceptive methods. Introductory lectures on each topic followed by research-oriented lectures and readings from current literature.
Prerequisites: AS.020.305 or AS.250.307
Instructor(s): B. Zirkin; R. Cone
Area: Natural Sciences.

Biophysics

The Department of Biophysics offers programs leading to the B.A., M.A., and Ph.D. degrees. Biophysics is a field that should be of interest to students who wish to develop and integrate their interests in the physical and biological science.

Research interests in the Department cover experimental and computational, molecular and cellular structure, function, and biology, membrane biology, and biomolecular energetics. The teaching and research activities of the faculty bring its students in contact with biophysical scientists throughout the university. Regardless of their choice of research area, students are exposed to a wide range of problems of biological interest. For more information, and for the most up-to-date list of course offerings and requirements, consult the department web page at biophysics.jhu.edu.

Research Activities of Primary Faculty

Mucosal Protection and Reproductive Health (Dr. Cone)
The Mucosal Protection Laboratory is developing methods women can use for protection against both pregnancy and sexually transmitted diseases, including AIDS. Basic research projects include investigating the ability of mucosal antibodies and vaginal acidity (lactic acid) to inactivate viral and bacterial pathogens, and how normal vaginal lactobacilli suppress the array of anaerobic bacteria that causes BV (bacterial vaginosis). BV is the most common vaginal infection (one in three women at any given time) and women with this little-recognized infection are at markedly increased risk of sexually transmitted infections, miscarriage, and premature birth. Research and development of microbicides for preventing BV and sexually transmitted diseases is being sponsored by NIH in collaboration with ReProtect, Inc., through a research agreement with Johns Hopkins University. Research on
Protein Folding, Notch Signaling (Dr. Barrick)

The folding of proteins into their complex native structures is critical for proper function in biological systems. This spontaneous process of self-assembly is directed by physical chemistry, although the rules are not understood. We are using repeat-proteins, linear proteins with simple architectures, to dissect the energy distribution, sequence-stability relationships, and kinetic routes for folding. In addition, we are studying the molecular mechanisms of Notch signaling, a eukaryotic transmembrane signal transduction pathway. The transmission of information across the membranes of cells is essential for cell differentiation and homeostasis; signaling errors result in disease states including cancer. We are focusing on interactions between proteins involved in Notch signaling using modern biophysical methods. Thermodynamics of association and on interactions between proteins involved in Notch signaling using spectroscopy, "X-ray footprinting," and neutron scattering. Bacterial and yeast expression systems are used to study intracellular folding of RNA.

Protein Folding (Dr. Rose)

A globular protein will spontaneously self-assemble its components into a highly organized three-dimensional structure under appropriate physiological conditions in a process called protein folding. Our principal goal is to understand protein folding, using an approach involving simulation, modeling, and analysis. In the classical model of folding, an unfolded protein visits an astronomical number of possible conformations. In contrast, we recently reevaluated this popular model and found that the unfolded state is far less heterogeneous than previously thought. This realization has prompted us to pursue a novel strategy to predict folding.

Biophysics of RNA (Dr. Woodson)

The control of cell growth and type depends on the ability of RNA to fold into complex three-dimensional structures. RNA catalysts are good models for studying the physical principles of RNA folding, and the assembly of protein-RNA complexes such as the ribosome. Changes in RNA three-dimensional structure are monitored by fluorescence spectroscopy, "X-ray footprinting," and neutron scattering. Bacterial and yeast expression systems are used to study intracellular folding of RNA.

Protein Folding, Notch Signaling (Dr. Barrick)

The folding of proteins into their complex native structures is critical for proper function in biological systems. This spontaneous process of self-assembly is directed by physical chemistry, although the rules are not understood. We are using repeat-proteins, linear proteins with simple architectures, to dissect the energy distribution, sequence-stability relationships, and kinetic routes for folding. In addition, we are studying the molecular mechanisms of Notch signaling, a eukaryotic transmembrane signal transduction pathway. The transmission of information across the membranes of cells is essential for cell differentiation and homeostasis; signaling errors result in disease states including cancer. We are focusing on interactions between proteins involved in Notch signaling using modern biophysical methods. Thermodynamics of association and allosteric effects are determined by spectroscopic, ultracentrifugation, and calorimetric methods. Atomic structure information is being obtained by NMR spectroscopy. The ultimate goal is to determine the thermodynamic partition function for a signal transduction system and interpret it in terms of atomic structure.

NMR Spectroscopy (Dr. Lecomte)

Many proteins require stable association with an organic compound for proper functioning. One example of such "cofactor" is the heme group, a versatile iron-containing molecule capable of catalyzing a broad range of chemical reactions. The reactivity of the heme group is precisely controlled by interactions with contacting amino acids. Structural fluctuations within the protein are also essential to the fine-tuning of the chemistry. We are studying how the primary structure of cytochromes and hemoglobin codes for heme binding and the motions that facilitate function. The method of choice is nuclear magnetic resonance spectroscopy, which we use to obtain detailed structural and dynamic representations of proteins with and without bound heme. The ultimate goal is to understand the evolution of chemical properties in heme proteins and how to alter them.

Structural and Energetic Principles of Membrane Proteins (Dr. K. Fleming)

Membrane proteins must fold to unique native conformations and must interact in specific ways to form complexes essential for life. Currently, the chemical principles underlying these processes are poorly understood. Thermodynamic and kinetic studies on membrane proteins with diverse folds and oligomeric states are carried out with the goal of discovering the physical basis of stability and specificity for membrane proteins. Our research results in a quantitative understanding of sequence-structure-function relationships that can ultimately be used to describe membrane protein populations in both normal and disease states, to design novel membrane proteins, and to develop therapeutics that modulate membrane protein functions in desirable ways.

Chromatin Remodeling (Dr. Bowman)

Chromatin, the physical packaging of eukaryotic chromosomes, plays a major role in determining the patterns of gene silencing and expression across the genome. Chromatin remodelers are multicomponent protein machines that establish and maintain various chromatin environments through the assembly, movement, and eviction of nucleosomes. At present, the molecular mechanisms by which chromatin remodelers alter chromatin structure are not understood. Our long-term goal is to gain a molecular understanding of the remodeling process and in particular how remodeling is coupled to the transcriptional machinery. Our strategy is to couple structure determination with functional studies to determine how different components of a chromatin remodeler cooperate and interact with the nucleosome substrate.

Physical Systems Biology (Dr. Roberts)

The laboratory is devoted to understanding and modeling the behavior of cells as complex systems. We are using tools from the general area of biological physics: potential- and probability-based computational modeling along with limited applications of single-cell, single-molecule experimental techniques (split roughly 80% theoretical/computational and 20% experimental). We term this approach "Physical Systems Biology" and it lies at the interface of biology, computer science, and physics. While this approach absolutely requires in-depth characterization of particular components, an equally critical step is then stepping back to consolidate the knowledge gained into a model of the entire cellular system. Incorporating many varied types of biological data into a genuine in silico model for the cell is the long-range goal of the laboratory.
Theoretical Biophysics (Dr. Johnson)

Protein interaction networks capture the cooperation required by proteins to carry out complex functions in the cell. The ability of proteins to assemble to form transient or permanent complexes and transmit signals or nutrients depends on their concentrations, their binding partners, and their spatial and temporal dynamics in the cell. Using computation and theory, we are building models to accurately simulate these multi-protein assembly processes, such as those occurring in endocytosis, that are critical to cell survival. We complement these detailed simulations with coarse-grained models to extend to larger protein interaction networks and characterize the role of network topology on protein binding specificity and dynamics.

Facilities

The department shares state-of-the-art equipment for X-ray diffraction analysis, NMR spectroscopy, and numerically intensive computer simulations with other biophysics units within the University. In addition, the department houses a full complement of equipment for molecular biological and biochemical work, and for various kinds of spectroscopy.

Bachelor of Arts in Biophysics

The undergraduate major in biophysics is intended for the student interested in advanced study of biophysics or the related fields of biochemistry, molecular biology, physiology, pharmacology, and neurobiology. The biophysics major fulfills all premedical requirements with the exception of AS.030.225 Introductory Organic Chemistry Lab. The student majoring in biophysics, with the advice of a member of the department, chooses a program of study that will include foundation courses in biology, chemistry, and physics followed by advanced studies in modern biophysics and research.

For updated information on academic requirements and department events for majors, check the undergraduate website at biophysics.jhu.edu/undergraduate_program.html.

Requirements for the B.A. Degree

Total Credits | 160-167

* Denotes science or math courses required for premedical students.

Scheduling conflicts occasionally arise due to schedule changes in the departments of Physics, Biology, and Chemistry. Prospective biophysics majors should consult with the departmental undergraduate advisor to determine how the conflicts have been resolved. A grade of C or higher is mandatory for courses fulfilling departmental degree requirements.

Requirements for B.A.
The B.A. requires 120 credits, 30 of which have to fulfill distribution requirements (at least 12 writing intensive credits and 18 Humanities/Social and Behavioral Sciences credits; at least 6 Humanities/Social and Behavioral Sciences credits during each of first two years).

Ete Z. Szüts Undergraduate Research Travel Award
This award, named in honor of a Ph.D. graduate student from this department, will provide funds for up to 80 percent of the transportation costs of undergraduate research students in biophysics to attend a scholarly meeting. Recipients must be sponsored by a member of the departmental faculty who will be at the same meeting.

H. Keffer Hartline Award for Excellence in Undergraduate Research in Biophysics
To honor senior Biophysics Major for excellence in undergraduate research in Biophysics.

Detlev W. Bronk Award for Outstanding Scholarship in Biophysics
To honor senior Biophysics major for outstanding achievements in academics and research in Biophysics.

Honors in Biophysics
To be eligible for departmental honors at graduation, biophysics majors must achieve an overall GPA of 3.5 or better. In addition, a paper based on their mandatory six lab research credits must be submitted and acceptable to the student’s research supervisor and research sponsor.

Master’s Program
Fifth-Year Master’s Degree
Undergraduate biophysics majors interested in a fifth-year Master of Arts degree program must request admission to the program. Details for application can be found on the departmental website. Those accepted will be enrolled as graduate students.

Students in this program will be required to take courses such as:

Total Credits: 124

Doctoral Programs
The Thomas C. Jenkins Department of Biophysics offers two Ph.D. programs. Annual application deadline is January 15.

Program in Molecular Biophysics
The Program in Molecular and Biophysics (PMB), which began in 1990, brings together Johns Hopkins faculty at the Homewood and Medical School campuses. Its goal is to prepare students to deal with interdisciplinary problems in molecular biophysics and structural biology. For more information, see PMCB Web page at pmb.jhu.edu.

Admission
All applicants must have a B.S. or a B.A. degree. Applications from students in any branch of science are welcome; however, we are particularly eager to attract applicants with undergraduate majors in physics, chemistry, mathematics, or relevant areas of engineering. There are no required undergraduate courses. Instead, applications are examined for general strength of scientific background. The Graduate Record Examination, including a subject test, is required.

Please use the Johns Hopkins University online application, selecting biophysics under the School of Arts & Sciences. Supplementary materials (letters of recommendation, GRE scores, statement, etc.) should be sent directly to:

Program in Molecular Biophysics
Johns Hopkins University
101 Jenkins Hall
3400 N. Charles Street
Baltimore, MD 21218

Requirements for the Ph.D.
Programs are developed individually for each student, and due account is taken of previous training.

The following courses are required:

At the School of Medicine: AS.100.705/AS.100.712 Computer Modeling of Biological Macromolecules/Lab and AS.330.709 Organic Mechanisms in Biology.

Students have to demonstrate strength in the following four areas: biological sciences, chemistry, mathematics, and physics. Typically, incoming students already have strength in at least two of these areas from undergraduate training. Deficiencies will be remedied through additional course work or self-study. Students must pass a proficiency exam in biological sciences at the end of their first year. In the mathematics and physics areas, students will be required to have calculus.
through the study of several variables, and one year of calculus-based physics, respectively. In the chemistry area, students are required to have basic chemistry, organic chemistry, and physical chemistry. In biological sciences, students are required to have knowledge of biochemistry and cell and molecular biology.

Additional academic requirements include completion of three 12-week laboratory rotations, a one-hour seminar on a current topic of biophysical research, and passing the Graduate Board Oral Preliminary Examination, to be given near the end of the second year.

Completion of an original investigation and presentation of a dissertation are required. The dissertation must be accepted by the program and be considered worthy of publication by the referees. Students must then pass an oral examination on their dissertation and related topics.

The Program in Cell, Molecular Developmental Biology and Biophysics

The Program in Cell, Molecular Developmental Biology and Biophysics (CMDB) gives students a strong background in modern biology and physical biochemistry. This combination prepares students to study complex biological phenomena using quantitative physical methods. The training faculty reside in the T. C. Jenkins Department of Biophysics, the Biology Department, and the Carnegie Institution Department of Embryology, all located on the Johns Hopkins Homewood campus. Students take core graduate courses in cell, molecular, and developmental biology, and in biophysics, and complete four eight-week rotations their first year. Other requirements include the Graduate Board Oral Preliminary Examination, given before the end of the second year, and successful defense of the dissertation.

For more information about CMDB, please check its website (cmdb.jhu.edu). Interested applicants can apply online via the program website or by U.S. mail to:

Ms. Joan Miller (joan@jhu.edu)
Graduate Admissions Coordinator

Financial Aid

Two National Institutes of Health training grants currently provide stipend and tuition support: one is for students who enroll in PMB and the other is for those who enter CMDB. Students supported by these training grants must be U.S. citizens or permanent residents. In addition, several research assistantships funded by grants and contracts awarded to faculty by outside agencies may be available to qualified students. University fellowships providing remission of tuition are also available. Graduate students in biophysics are eligible for and encouraged to apply for various nationally administered fellowships, such as National Science Foundation fellowships. Information on these and other support mechanisms can be obtained through the fellowship advisor at the applicant’s college or from the National Research Council:

Attn: Fellowships
1000 Thomas Jefferson St.
Washington, D.C., 20007.

It is anticipated that financial support covering normal living costs and tuition will be made available to accepted students. Support for foreign students is extremely limited.

For current faculty and contact information go to http://biophysics.jhu.edu/faculty_and_research.html

Faculty

Doug Barrick
Professor: energetic and structural basis of Notch signal transduction, protein energetics, repeat protein folding.

Gregory Bowman
Assistant Professor: biophysical and biochemical characterization of chromatin-remodeling proteins; X-ray crystallography.

Richard Cone
Professor: mucosal protective mechanisms, contraception and prevention of sexually transmitted diseases, cellular and molecular mechanics.

Bertrand Garcia-Moreno E.
Professor (Chair): experimental and computational studies of protein energetics and electrostatics.

Karen G. Fleming
Associate Professor: energetics and folding of membrane proteins.

Margaret Johnson
Assistant Professor: computational and theoretical studies of protein-protein interactions; protein assembly and dynamics.

Juliette T. J. Lecomte
Professor: structure and dynamics of proteins in solution; NMR spectroscopy.

Elijah Roberts
Assistant Professor: development and application of in-silico cell models.

George Rose
Krieger-Eisenhower Professor: modeling and simulation of protein folding and protein structure.

Sarah A. Woodson
Thomas C. Jenkins Professor: folding and assembly of RNA and RNA-protein complexes.

Research/Teaching Faculty

Ana Damjanovic
Associate Research Scientist (part-time): computational studies of protein structure, dynamics and function.

Carolyn Fitch
Senior Lecturer: computational and experimental studies on protein structure, function, and energetics.

Patricia Fleming
Senior Lecturer: computational studies of protein folding, structure and solvation.

Secondary Appointments, Biology

Ernesto Freire
Professor: biophysical chemistry, thermodynamics of macromolecular assemblies in membranes, protein-lipid interactions, microcalorimetry.

Vincent J. Hilser
Professor: conformational fluctuations in function, disease, and evolution.

Evangelos Moudrianakis
Professor: mechanisms of enzyme action, especially of chloroplast and mitochondrial coupling factors. Human chromosome structure and function, self-assembly of chromosomal components.

Robert Schleif
Professor: protein-DNA interactions and regulation of gene activity.

Beverly Wendland
Professor (Chair): molecular mechanisms of endocytosis in yeast and mammalian cells.

Secondary Appointments, Chemistry

David E. Draper
Professor: physical biochemistry, protein-RNA recognition, structure and function of ribosomal RNAs, translational control of gene expression, RNA structural motifs.

Christopher Falzone
Teaching Professor: NMR spectroscopy of proteins.

Craig A. Townsend
Professor: organic and bioorganic chemistry, biosynthesis of natural products, stereochemical and mechanistic studies of enzyme action, application of spectroscopic techniques to the solutions of biological problems.

Joint Appointments

P. C. Huang
Professor (Biochemistry and Molecular Biology): organization and regulation of stress inducible genes and their gene products.

Affiliations with the School of Medicine

L. Mario Amzel
Professor: X-ray diffraction studies of biological macromolecules; enzymes involved in oxidate reductions and phosphorylation; experimental and modeling studies of binding proteins.

James M. Berger
Professor: structural and mechanistic biochemistry of protein/nucleic acid machines and assemblies.

Dominique Frueh
Assistant Professor: NMR studies of protein dynamic modulations and conformations in active enzymatic systems.

Albert Lau
Assistant Professor: characterization of receptor-ligand interactions and macromolecular conformational transitions using computational and crystallographic approaches.

Daniel J. Leahy
Professor: X-ray diffraction studies of cell-surface receptors and extracellular matrix components.

Jungsan Sohn
Assistant Professor: structure and function of biological stress sensors.

Herschel Wade
Assistant Professor: structural, functional, and energetic treatments of ligand-activated molecular switches.

Cynthia Wolberger
Professor: three-dimensional structure of protein-DNA complexes, X-ray crystallography.

Jie Xiao
Assistant Professor: dynamics of molecular process at single molecule and single cell level.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.250.106. Introduction to Biomedical Research and Careers I. 1 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Freshmen and non-science majors Co-listed with AS50.300 and AS.250.306
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.131. Topics - Biophysics Research. 1 Credit.
Introduction of contemporary biophysics research topics through presentations, discussion and hands-on exercise. Freshmen and sophomores only. S/U grading only.
Instructor(s): K. Fleming; R. Cone
Area: Natural Sciences.

AS.250.205. Introduction to Computing. 3 Credits.
Course introduces students to the use of computers for applications in many areas (natural and social sciences, humanities, and engineering). Students will obtain basic computing skills and tools, including familiarity with UNIX, with the use of complex UNIX commands (e.g. grep, awk, sed) and shell scripts, with the Python programming language, with graphing software and with a package for numerical and statistical computing, such as Mathematica or Matlab. Brief weekly lectures followed by extensive hands-on computer laboratories with examples from many disciplines.
Instructor(s): C. Fitch
Area: Natural Sciences.

AS.250.253. Protein Engineering and Biochemistry Lab. 3 Credits.
Enter-level project laboratory. Protein engineering and biotechnology techniques used to modify proteins to give them new structural or physical properties. Students introduced to standard biochemistry laboratory practice and protein science; perform experiments in site-directed mutagenesis, protein purification and structural and physical characterization of biological macromolecules.
Instructor(s): C. Fitch
Area: Natural Sciences.
AS.250.265. Introduction to Bioinformatics. 3 Credits.
Lectures and computer labs introduce bioinformatics concepts, algorithms and databases. Computer based exercises cover sequence comparisons, database searching, gene expression analysis, and phylogenetic relationships. Emphasis on algorithms and a critical interpretation of information obtained. Instructor permission required.
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.250.267. Medicine and Membrane Proteins. 1 Credit.
This course will introduce the concept of the molecular causes of human health and disease by using membrane proteins as case examples. It will also explore the challenges of drug discovery involving membrane protein targets. Details of the pharmaceutical business will be discussed.
Area: Natural Sciences.

AS.250.300. Introduction to Biomedical Research and Careers II. 1 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Sophomores, juniors and seniors. Science Majors; Co-listed with AS.250.106 and AS.250.306.
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.304. Mathematical Approaches to Biological Problems. 3 Credits.
Mathematical methods to solve real-world or equivalent biological problems. Methods including differential equations, matrix algebra, partial differentiation, and probability used to address related biological and biophysical questions. URL: http://roselab.jhu.edu/~lperskie/biological_math_online.html.
Prerequisites: (AS.110.106 AND AS.110.107) OR EQUIVALENT
Instructor(s): L. Perskie
Area: Natural Sciences.

AS.250.306. Introduction to Biomedical Research and Careers III. 1 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. For those who have already taken AS.250.106 or AS.250.300. Co-listed with AS.250.106 & AS.250.300.
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.315. Biochemistry I. 4 Credits.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Topics include chemical, physical, and energetic principles of biochemistry. Lecture and computer laboratory.
Prerequisites: AS.030.206
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.250.316. Biochemistry II. 3 Credits.
Molecular basis of gene regulation, signal transduction and control of cell metabolism, with an emphasis on physical concepts and mechanisms. Format will include lectures and class discussion of readings from the literature.
Prerequisites: AS.030.205 AND AS.250.315
Instructor(s): S. Rokita; S. Woodson.

AS.250.329. Statistics and Data Analysis for BioScience. 3 Credits.
This course covers topics in probability theory and statistics frequently used in analysis and interpretation of biomedical data. Applications of these theories in biosciences are extensively discussed using primary literature to enable students to apply covered materials in their own field of research.
Prerequisites: AS.110.106
Instructor(s): R. Behrouzi
Area: Natural Sciences.

AS.250.345. Cellular and Molecular Physiology. 3 Credits.
How cells and molecules function as parts of whole organisms. Topics include speeds of diffusion, motor proteins, and animal motility; bacterial size, shape, and chemotaxis; sensory and neuronal mechanisms; osmosis; mucosal protective mechanisms; cellular and organismic circulation and respiration.
Instructor(s): R. Cone
Area: Natural Sciences.

AS.250.351. Reproductive Physiology. 2 Credits.
Focuses on reproductive physiology and biochemical and molecular regulation of the female and male reproductive tracts. Topics include the hypothalamus and pituitary, peptide and steroid hormone action, epididymis and male accessory sex organs, female reproductive tract, menstrual cycle, ovulation and gamete transport, fertilization and fertility enhancement, sexually transmitted diseases, and male and female contraceptive methods. Introductory lectures on each topic followed by research-oriented lectures and readings from current literature.
Prerequisites: AS.020.305 or AS.250.307
Instructor(s): B. Zirkin; R. Cone
Area: Natural Sciences.

AS.250.353. Computational Biology. 3 Credits.
This course introduces several computational approaches to the study of biological macromolecules. Students will learn to use computational tools to analyze protein structure and to develop a basic understanding of computer programming. The focus is biological rather than mathematical, and no programming experience is required. AS.250.345 is strongly recommended.
Prerequisites: (AS.030.101 AND AS.030.102). AS.250.345 is strongly recommended.
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.250.372. Biophysical Chemistry. 3 Credits.
Course provides working understanding of physical chemistry of the cell, emphasizing problem solving. Topics include classical and statistical thermodynamics, thermodynamics of proteins and nucleic acids, protein folding, calorimetry, ligand binding thermodynamics, linkage, cooperativity and anticooperativity, allosteric models, lattice statistics, helix-coil transition, and polymer theory. When appropriate, students visit the laboratory to set up data collection and learn to analyze the resulting data computationally, using nonlinear least-squares methods. Recommended Course Background: Calculus, Organic Chemistry, and Introductory Physics
Instructor(s): D. Barrick
Area: Natural Sciences.
AS.250.381. Spectroscopy and Its Application in Biophysical Reactions. 3 Credits.
Continues Biophysical Chemistry (AS.250.372). Fundamentals of quantum mechanics underlying various spectroscopies (absorbance, circular dichroism, fluorescence, NMR); application to characterization of enzymes and nucleic acids.
Instructor(s): J. Lecomte; J. Schildbach; Staff
Area: Natural Sciences.

AS.250.383. Molecular Biophysics Laboratory. 3 Credits.
An advanced inquiry based laboratory course covering experimental biophysical techniques to introduce fundamental physical principles governing the structure/function relationship of biological macromolecules. Students will investigate a “model protein”, staphylococcal nuclease, the “hydrogen atom” of biophysics. Using a vast library of variants, the effect of small changes in protein sequence will be explored. A variety of techniques will be used to probe the equilibrium thermodynamics and kinetics of this system; chromatography, spectroscopy (UV-Vis, fluorescence, circular dichroism, nuclear magnetic resonance), calorimetry, analytical centrifugation, X-ray crystallography and computational methods as needed for analysis. These methods coupled with perturbations to the molecular environment (ligands, co-solvents, and temperature) will help to elucidate protein function.
Prerequisites: AS.250.253 OR AS.020.315 AND (AS.250.307 OR AS.250.315 OR AS.020.305) AND AS.250.372.
Instructor(s): C. Fitch
Writing Intensive.

AS.250.391. Proteins and Nucleic Acids. 3 Credits.
Basic computing for biological applications. First two weeks of class are an introduction to programming through Python. The rest of the course is on the structure of proteins, DNA and RNA, and their functions in living systems. Advanced lecture and discussion course, with discussions based on readings from the scientific literature.
Prerequisites: AS.020.305 AND AS.250.372
Instructor(s): G. Bowman; S. Woodson
Area: Natural Sciences.

AS.250.401. Advanced Seminar in Structural and Physical Virology. 3 Credits.
Illustrated fundamental contributions from biophysics and quantitative and physico-chemical approaches to study complex biological systems. Focus on the physical and structural basis of viral infectivity, emphasizing replication cycles and evolution and structural biology of human pathogens such as HIV and influenza. AS.250.372 - Introduction to Biophysical Chemistry useful.
Prerequisites: AS.030.205 AND (AS.020.305 OR AS.250.307)
Instructor(s): B. Garcia-Moreno
Area: Natural Sciences
Writing Intensive.

AS.250.411. Advanced Seminar in Structural Biology of Chromatin. 3 Credits.
Focus is on structural and physical aspects of DNA processes in cells, such as nucleosomal packaging, DNA helicases, RNA polymerase, and RNA inhibition machinery. Topics are meant to illustrate how the structural and chemical aspects of how proteins and nucleic acids are studied to understand current biological questions. Biochemistry (AS.250.307) or Biochemistry (AS.020.305) and Intro to Biophys Chem (AS.250.372) helpful.
Instructor(s): G. Bowman
Area: Natural Sciences
Writing Intensive.

AS.250.421. Advanced Seminar in Membrane Protein Structure, Function & Pharmacology. 3 Credits.
Topics are meant to illustrate the physical basis of membranes and membrane proteins towards understanding their functions and pharmacological importance including aspects of drug design as it relates to membranes. Contemporary issues in the field will be covered using primary literature articles, structural manipulations in pymol, and computational binding simulations. Recommended Course Background: AS.030.205, AS.250.307, and AS.250.372
Instructor(s): K. Fleming
Writing Intensive.

AS.250.519. Independent Study. 3 Credits.
Instructor(s): B. Garcia-Moreno; D. Barrick; J. Lecomte; R. Cone
Writing Intensive.

AS.250.520. Independent Study. 0 - 3 Credit.
Instructor(s): B. Garcia-Moreno; D. Barrick; R. Cone
Writing Intensive.

AS.250.521. Research Problems. 3 Credits.
Instructor(s): Staff.

AS.250.522. Research Problems. 0 - 3 Credit.
Instructor(s): Staff.

AS.250.531. Laboratory - Biophysics. 0 - 3 Credit.
Introduction to Independent research in Biophysics emphasizing basic laboratory techniques. Individual study arranged with faculty mentor. Permission from Faculty Sponsor.
Instructor(s): Staff.

AS.250.574. Research Problems. 2 Credits.
Instructor(s): K. Fleming; S. Woodson.

AS.250.595. Internship. 1 Credit.
Instructor(s): R. Huang.

AS.250.596. Laboratory-Biophysics. 3 Credits.
Instructor(s): D. Barrick; R. Cone; S. Woodson.

AS.250.597. Research. 3 Credits.
Instructor(s): Staff.

AS.250.599. Independent Study. 3 Credits.
Instructor(s): Staff.

Graduate students only. Students and invited speakers present current topics in the field.
Instructor(s): R. Cone.

Student and invited speakers present current biophysics topics. Permission required. Graduate student only.
Instructor(s): R. Cone.

AS.250.631. Lab Research/Biophysics.
Biophysics research training.
Instructor(s): R. Cone.

AS.250.632. Lab Rsch in Biophysics.
Instructor(s): B. Garcia-Moreno.

Graduate level seminar on physiology, immunology, and epidemiology of mucosal protection. Permission required.
Instructor(s): R. Cone.
AS.250.644. Graduate Biophysical Chemistry.
Review of classical & statistical thermodynamics, protein and nucleic acid structure, ligand binding, and enzyme kinetics. Biophysical methods such as fluorescence, NMR spectroscopy, and X-ray crystallography are also discussed. Recommended Course Background: AS.020.305, AS.020.306, AS.020.688, or equivalent.
Instructor(s): S. Woodson.

AS.250.649. Introduction to Computing in Biology.
Four week, intensive introductory course on the use of computers for applications in biology. The course will cover fundamentals of UNIX, PYTHON and Mathematica. Brief daily lectures followed by extensive hands-on experience in the computer laboratory. Examples from the world of biology are used to teach a large variety of concepts and computational techniques useful to examine a broad range of topics in biology.
Instructor(s): C. Fitch; Staff.

Advanced graduate students make a 10- minute presentation of their thesis work to the departmental faculty. The presentation is followed by a half-hour discussion.
Instructor(s): G. Bowman.

Departmental Majors Only.
Instructor(s): B. Garcia-Moreno.

Course introduces students to the use of computers for applications in many areas (natural and social sciences, humanities, and engineering). Students will obtain basic computing skills and tools, including familiarity with UNIX, with the use of complex UNIX commands (e.g grep, awk, sed) and shell scripts, with the Python programming language, with graphing software and with a package for numerical and statistical computing, such as Mathematica or Matlab. Brief weekly lectures followed by extensive hands-on computer laboratories with examples from many disciplines.
Instructor(s): C. Fitch
Area: Natural Sciences.

Basic computing for biological applications, with introduction to programming through Python. The structure of proteins, DNA and RNA, and their functions in living systems. Students are required to participate in class discussions based on readings from the primary scientific literature. Instructor permission for undergraduates.
Instructor(s): G. Bowman; S. Woodson.

AS.250.689. Physical Chemistry of Biological Macromolecules.
Introduction to the principles of thermodynamics and kinetics as applied to the study of the relationship between structure, energy dynamics, and biological function of proteins and nucleic acids. Topics include of classical, chemical, and statistical thermodynamics, kinetics, theory of ligand binding, and conformational equilibria.
Instructor(s): B. Garcia-Moreno.

AS.250.690. Methods in Molecular Biophysics.
Introduction to methods employed in study of energetics, structure and function of biological macromolecules. Topics include optical spectroscopy, transport methods, NMR, X-ray crystallography. Theoretical understanding and knowledge through problem solving and literature discussion emphasized.
Prerequisites: AS.250.685 AND AS.250.689
Instructor(s): G. Bowman; J. Lecomte.

AS.250.801. Dissertation Research.
Instructor(s): Staff.

Instructor(s): B. Garcia-Moreno.

Cross Listed Courses

Biology
AS.020.674. Graduate Biophysical Chemistry.
This course will provide an overview of protein and nucleic acid structure, fundamentals of thermodynamics and kinetics, ligand binding, folding and stability of macromolecules, and the principles of biophysical methods such as fluorescence spectroscopy, NMR, and X-ray crystallography. Monday Discussion Session is optional. Recommended Course Background: AS.020.305, AS.020.306
Instructor(s): Staff.

Interdepartmental
AS.360.701. Research Laboratory Safety.
An introduction to laboratory safety including chemical, biological, radiation, and physical hazards. Includes information on hazard assessment techniques, laboratory emergencies, and general lab standards for Whiting School of Engineering. The class will feature hands-on exercises with real-life experiments. Intended for students who have not yet begun working in a research laboratory.
Instructor(s): D. Kuespert.

Chemistry
The Department of Chemistry, in conjunction with other departments of the university, offers a broad education and the opportunity to do research in chemistry and related fields. The great diversity of the field of chemistry, ranging between physics and biology, is reflected in the research interests of the faculty. Undergraduate chemistry majors usually go on to graduate study in chemistry, chemical engineering, biology, oceanography, geochemistry, biophysics, environmental sciences, or medicine, while others enter the chemical industry. The Ph.D. in chemistry leads to professional careers in colleges and universities, research institutes, industry, and government laboratories.

Facilities
The department is well-equipped with instrumentation, both shared and in individual faculty research laboratories, to perform modern chemical research. The Departmental Instrumentation Facility houses the following pieces of major instrumentation:

- Bruker Avance 400 MHz FT-NMR spectrometers (2), one located in the Instrumentation Facility in Remsen Hall and the other on the first floor of the new chemistry building.
- Bruker Avance 300 MHz FT-NMR spectrometer.
- VG70S magnetic sector mass spectrometer, with EI, and CI ionization.
- VG70SE magnetic sector mass spectrometer, with FAB ionization.
- Finnigan LCQ ion trap mass spectrometer with electrospray ionization (APCI available as an option).
- Finnigan LCQ Duo ion trap mass spectrometer with electrospray ionization for inorganic and organometallic use.
- Bruker Autoflex III Maldi-ToF-ToF Mass spectrometer with MALDI ionization and collision cell.
- Shimadzu GC17A/QP5050A GC-MS with EI ionization.
- Bruker EMX EPR spectrometer equipped with a liquid helium cryostat and variable temperature controller.
- Bruker Vector 33 FT-IR spectrophotometer.
• Jasco P-1010 polarimeter.
• Xcalibur3 X-ray diffractometer with CCD area detector (located on the second floor of the new chemistry building).
• Microfocus dual-source SuperNova X-ray diffractometer equipped with CCD detector and cryo-cooling device.
• Protein Technologies Symphony Quartet Peptide Synthesizer.

NMR spectrometers suitable for studies of biological macromolecules are located in the Biomolecular NMR Center, located in an underground facility in front of the new chemistry building. The instruments include 500, 600, and 800 MHz FT-NMR spectrometers.

A variety of different mass spectral techniques are available in the expanding Mass Spectrometry Facility. High-resolution mass spectra of submitted samples are obtained on a service basis by a staff member using two magnetic sector instruments equipped with EI, CI, and FAB ionization methods. MALDI-TOF, GC/MS, and electrospray instruments are also available and operated by students and researchers following training by the facility staff.

The X-ray Diffraction Facility is operated by a staff member. The instruments are suitable for detailed molecular-level structural characterization of new organic or inorganic compounds.

The department has an established in-house peptide synthesis facility. This facility is equipped with a four-channel peptide synthesizer from Protein Technologies, an Agilent HPLC equipped with both a diode array and a fluorescence detector, and a lyophilizer.

The department shares with the Physics and Astronomy Department the use of the Physical Sciences Machine Shop, located in the Bloomberg Center. Electronics construction and repair is handled by a staff member in the Departmental Instrumentation Facility.

Programs for undergraduate majors can be tailored to individual interests so that a major in chemistry is excellent preparation not only for further work in chemistry, but also for any field that rests on a chemical foundation. It is a good choice for a premedical student interested in medical research.

Advanced Elective Courses

Advanced chemistry ** 6

Advanced chemistry, science electives at the 300-level or higher approved by a Department of Chemistry advisor, and/or mathematics beyond Calculus II * 9

Total Credits 70

* None of the advanced course requirements may be fulfilled with

* ** Although a student may take more than 12 credits of independent research, only 12 may count toward the 120 required credits.

Courses beyond AS.030.305 Physical Chemistry Instrumentation Laboratory I and AS.030.306 Physical Chemistry Instrumentation Laboratory II.

Lecture and laboratory courses should be taken in sequence. In particular, AS.030.228 Intermediate Organic Chemistry Laboratory must be taken before AS.030.356 Advanced Inorganic Lab.

To allow maximum flexibility in choosing electives, students should complete both physics and organic chemistry by the end of the sophomore year. AS.030.449 Chemistry of Inorganic Compounds and AS.020.305 Biochemistry are required for an American Chemical Society accredited degree.

Honors in Chemistry

To recognize exceptional performance, both in formal course work and in research, chemistry majors can receive a degree with honors. Honors in Chemistry may be achieved by one of two paths. 1: A student with a GPA of 3.75 or higher in (N) and (Q) courses or 2: A student with a 3.5 GPA in (N) and (Q) courses and with at least 2 semesters of research with a Chemistry faculty member or an approved advisor. These students must write a summary of their research and fill out the Honors Clearance form and the GPA checksheet (see: http://www.advising.jhu.edu/honors.php). Turn in these forms to the Director of Undergraduate Studies.

Each student’s background and interests determine the course of study. The normal program leads to the Ph.D. degree. A student is not usually accepted for a terminal M.A. degree.

Requirements for the M.A. and Ph.D. Degrees

Normally, the minimum course requirement for both the M.A. and the Ph.D. degrees is eight one-semester graduate courses in chemistry and related sciences. Exceptionally well-prepared students may ask for a reduction of these requirements.

Requirements for the Ph.D. degree include a research dissertation worthy of publication, and a knowledge of chemistry and related material as demonstrated in an oral examination. Each student must teach for at least one year.

Requirements for the M.A. degree, in addition to completion of formal course work and research, include a satisfactory performance on an oral examination.
Financial Aid and Admissions
Fellowships, research appointments, and teaching assistantships are available for graduate students. There are no fixed admission requirements. Undergraduate majors in chemistry, biology, earth sciences, mathematics, or physics may apply, as well as well-qualified individuals who will have received a B.A. degree.

For further information about graduate study in chemistry visit the Chemistry Department website at www.chemistry.jhu.edu.

For current faculty and contact information go to http://www.chemistry.jhu.edu/faculty.html

Faculty
Chair
John P. Toscano
Professor: organic chemistry, fundamental chemistry and biochemistry of nitroxy (HNO) including the design of new precursors to HNO, new analytical tools for its detection, and the characterization of HNO-induced protein modifications-time-resolved IR spectroscopy of organic reactive intermediates.

Professors
Kit H. Bowen
E. Emmet Reid Professor: experimental chemical physics—photoelectron spectroscopy of negative ions, structure and dynamics of gas phase, weakly bound molecular clusters.

Paul J. Dagdigian
Arthur D. Chambers Professor: experimental chemical physics—dynamics of gas-phase chemical reactions, collisional energy transfer, molecular electronic spectroscopy, laser-induced fluorescence and ionization.

David E. Draper
Vernon Kriebel Professor: physical biochemistry—RNA folding, RNA-ligand inter-actions, NMR of protein and RNA, translational control of gene expression.

D. Howard Fairbrother
Physical chemistry—the structure of chemically protective surfaces, chemistry of adhesives, environmental surface chemistry.

David Goldberg
Inorganic and bioinorganic chemistry—structure/function relationships in heme proteins, artificial enzyme design, biomimetic molybdenum and tungsten coordination compounds, redox active ligands, synthesis of tetrapyrrolic macrocycles (phthalo-cyanine and porphyrin-based systems) for small-molecule activation and materials applications.

Marc M. Greenberg
Organic and bioorganic chemistry—application of chemical, biochemical, and biological techniques to studies on DNA damage and repair, independent generation and study of reactive intermediates, development and application of methods for modified oligonucleotide synthesis, design of mechanistically inspired enzyme inhibitors radiosensitizing agents, and sensors.

Kenneth D. Karlin
Ira Remsen Professor: inorganic and bioinorganic chemistry—synthetically derived structural, spectroscopic and functional models for copper and iron proteins, copper-dioxygen reversible binding and metal-mediated substrate oxidation, O2-reduction with copper cluster compounds, porphyrin-iron and copper chemistry relevant to heme-copper oxidases, metal-catalyzed ester and amide hydrolysis, metal complex protein and DNA interactions.

Thomas Lecitka
Organic chemistry—the design and synthesis of theoretically interesting nonnatural products with applications in bioorganic and physical organic chemistry, materials science and supramolecular chemistry, novel approaches to asymmetric catalysis, theoretical organic chemistry.

Gerald Meyer
Bernard N. Baker Professor: inorganic chemistry—photochemistry and electrochemistry of metal complexes and inorganic solids, light-induced electron and energy transfer, materials science, artificial photosynthesis.

Douglas Poland
Theoretical chemistry—statistical mechanics, kinetics of cooperative biological and physical-chemical phenomena, use of moments to calculate energy and ligand-binding distributions, models for the persistence exponent of DNA.

Steven Rokita
Organic and bioorganic chemistry, sequence and conformation specific reactions of nucleic acids; enzyme-mediated activation of substrates and coenzymes; aromatic substitution and quinone methide generation in bioorganic chemistry, biological dehalogenation.

Harris J. Silverstone
Theoretical chemistry—development of mathematical techniques for applying quantum mechanics to chemical problems, high-order perturbation theory, semiclassical methods, divergent expansions, photoionization, LoSurdo-Stark effect, magnetic resonance spectral simulation, hyperasymptotics.

Craig A. Townsend
Alsoph H. Corwin Professor:—organic and bioorganic chemistry—biosynthesis and chemistry of natural products, stereo-chemical and mechanistic studies of enzyme action, small molecule/DNA interactions, application of spectroscopic techniques to the solution of biological problems.

David R. Yarkony
D. Mead Johnson Professor: theoretical chemistry—electronic structure theory, multi-configuration self-consistent-field methods, excited state chemistry, electronic energy transfer in chemical reactions, spin-forbidden processes, and electronically nonadiabatic processes.

Associate Professors
Rebekka S. Klausen
Organic and materials chemistry – the design and synthesis of well-defined organosilicon and organic materials, electronic characterization of novel materials.

Justine P. Roth
Inorganic chemistry and enzymology—rational design of redox catalysts, selective bond activation/oxidation by enzymes and transition metal complexes, synthetic systems for light to chemical energy transduction.

Joel R. Tolman
Biophysical chemistry—protein-protein interactions, protein dynamics and structure, NMR methodology.

John D. Tovar
Organic chemistry — organic electronics, conjugated and conducting polymers, electrochemistry, nanostructured materials, polymer chemistry bioinspired self-assembly, and supramolecular chemistry.

Assistant Professors
Arthur Bragg
Experimental physical chemistry — chemical dynamics and charge/energy transfer in condensed-phase systems, ultrafast spectroscopy.

Tyrel McQueen
Solid state inorganic chemistry — electronically and magnetically active materials — condensed matter physics.

Research and Teaching Professors
Christopher Falzone
Teaching Professor.

Louise Pasternack
Teaching Professor.

Mark Pederson
Research Professor

Gary Posner
Research Professor.

Adjunct, Emeritus, and Joint Appointments
David Gracias
Assistant Professor (Chemical and Biomolecular Engineering).

John W. Gryder
Professor Emeritus.

Howard E. Katz
Professor (Materials Science and Engineering).

Brown L. Murr
Professor Emeritus.

Alex Nickon
Vernon Krieble Professor Emeritus.

Lawrence M. Principe
Professor (joint appointment in History of Science and Technology).

Dean W. Robinson
Professor Emeritus.

Lecturers
Larissa D’Souza
Senior Lecturer.

Jane Greco
Senior Lecturer.

David Klein
Senior Lecturer (Summer Programs)

Courses
AS.030.101. Introductory Chemistry I. 3 Credits.
An introduction to the fundamental principles of chemistry. The main topics to be covered are atomic and molecular structure at the level of dot structures and VSEPR geometries, the periodic table, stoichiometry and the balancing of chemical equations, the gas laws, the law of mass action and chemical equilibrium, acids and bases, and elementary chemical thermodynamics. Switching sections requires instructor’s approval.
Corequisite: AS.030.105
Instructor(s): D. Fairbrother; D. Goldberg
Area: Natural Sciences.

AS.030.102. Introductory Chemistry II. 3 Credits.
Continuation of AS.030.101 emphasizing chemical kinetics, chemical bonding. Topics: energy levels and wavefunctions for particle-in-a-box and hydrogen atom and approximate wavefunctions for molecules including introduction to hybrid orbitals. Note: Appropriate adjusting caps should be used – to ensure both sections are approximately the same size
Instructor(s): K. Karlin; P. Dagdigian
Area: Natural Sciences.

AS.030.103. Applied Chemical Equilibrium and Reactivity w/lab. 4 Credits.
This course is designed for freshmen who have previously taken AP chemistry or have similar advanced chemistry experience. This course will review an advanced introductory chemistry sequence in a single semester. Chemical equilibrium, reactivity and bonding will be covered. These topics will be explored through the use of laboratory experiments and problem solving, and the use of these principles in current research areas will be discussed.
Instructor(s): J. Greco
Area: Natural Sciences.

AS.030.105. Introductory Chemistry Lab I. 1 Credit.
Lab lecture meets at 1:30pm on Thursday and Friday. Students may attend either lecture regardless of the section number for which they are registered.
Prerequisites: AS.030.101 OR EN.510.101
Instructor(s): L. Pasternack
Area: Natural Sciences.

AS.030.106. Introductory Chemistry Laboratory II. 1 Credit.
Laboratory work includes some quantitative analysis and the measurement of physical properties. Open only to those who are registered for or have completed Introductory Chemistry. Permission required for pre-college students.
Prerequisites: AS.030.105 AND (AS.030.101 OR EN.510.101)
Instructor(s): L. Pasternack
Area: Natural Sciences.

AS.030.112. Chemistry with Problem Solving I.
This course is for students who have had moderate or limited exposure to the subject. Special emphasis is placed on scientific problem-solving skills. There are two discussion sections per week, including one devoted exclusively to interactive quantitative problem solving. A typical student may have taken a year of descriptive chemistry as a high school sophomore, but has not been exposed to the problem-solving mathematical approach used in university-level science courses. Taken concurrently with AS.030.101 and AS.030.102.
Prerequisites: AS.030.101 OR AS.030.102
Instructor(s): G. Meyer.
AS.030.113. Chemistry with Problem Solving II.  
This course is for students who have had moderate or limited exposure to the subject. Special emphasis is placed on scientific problem-solving skills. There are two discussion sections per week, including one devoted exclusively to interactive quantitative problem solving. A typical student may have taken a year of descriptive chemistry as a high school sophomore, but has not been exposed to the problem-solving mathematical approach used in university-level science courses. Taken concurrently with AS.030.101 and AS.030.102.  
Instructor(s): J. Greco.

AS.030.204. Chemical Structure and Bonding w/Lab. 4 Credits.  
An introduction to the synthesis, structure, and reactivity of inorganic compounds. Modern approaches to chemical bonding, including molecular orbital, ligand field, and crystal field theories, will be applied to understanding the physical and chemical properties of inorganic materials. Other topics to be discussed include magnetic properties, electronic spectra, magnetic resonance spectra, and reaction kinetics. The integrated laboratory will cover basic synthetic, measurement, and calculation methods of inorganic chemistry.  
Instructor(s): J. Mcqueen  
Area: Natural Sciences.

AS.030.205. Organic Chemistry I. 4 Credits.  
The fundamental chemistry of the compounds of carbon. Methods of structure determination and synthesis. The mechanisms of typical organic reactions and the relations between physical and chemical properties and structures.  
Prerequisites: AS.030.102 OR AS.030.103 OR EN.510.101  
Instructor(s): C. Falzone; C. Townsend  
Area: Natural Sciences.

AS.030.206. Organic Chemistry II. 4 Credits.  
Continuation of AS.030.205 Organic Chemistry I with biochemical topics. This course is a continuation of Organic Chemistry I starting with carbonyl chemistry and organometallic reactions. Synthetic strategies and retro-synthetic analysis are emphasized. The second half of the course focuses on biochemical topics including biological pericyclic reactions, carbohydrates, amino acids, proteins, nucleic acids, RNA, DNA, catalysis, and lipids. The organic Chemistry of key metabolic steps will also be covered. Students may not simultaneously enroll for AS.030.212 and AS.030.206.  
Prerequisites: AS.030.205  
Corequisites: Students may not simultaneously enroll for AS.030.212 and AS.030.206.  
Instructor(s): C. Falzone; L. Principe  
Area: Natural Sciences.

AS.030.212. Advanced Organic Chemistry. 4 Credits.  
Must have done well in the first semester (AS.030.205). Second semester undergraduate organic chemistry from an advanced and rigorous prospective. Enrollment limited to, and highly recommended for, students who have done well in the first semester (AS.030.205.01). Topics include 2D NMR, synthesis with a stress on modern methods, chiral molecules, and mechanistic analysis. Students will be required to access the primary literature and to use molecular modeling programs such as Spartan. Students may not simultaneously enroll for AS.030.212 and AS.030.206.  
Prerequisites: Must receive a B+ or better in the first semester (AS.030.205)  
Corequisites: Students may not simultaneously enroll for AS.030.212 and AS.030.206.  
Instructor(s): T. Lectka  
Area: Natural Sciences.

AS.030.225. Introductory Organic Chemistry Lab. 3 Credits.  
Techniques for the organic chemistry laboratory including methods of purification, isolation, synthesis, and analysis. Chemistry majors should take this course in the fall semester. Course lecture meets at 9:00am. Freshmen are not eligible to register. Students may not simultaneously enroll in AS.030.225 and AS.030.227.  
Prerequisites: EN.510.101 OR (AS.030.101 AND AS.030.102) AND AS.030.105 AND AS.030.205. Permission required for a freshman to enroll.  
Corequisites: Students may not simultaneously enroll for AS.030.225 and AS.030.227  
Instructor(s): L. D’Souza  
Area: Natural Sciences.

AS.030.227. Chemical Chirality: An Introduction in Organic Chem. Lab, Techniques. 3 Credits.  
This is a project lab designed for freshman who are concurrently enrolled in AS.030.206 or AS.030.212. Techniques for the organic chemistry laboratory including methods of purification, isolation, synthesis, and analysis will be explored through a project focused on chemical chirality. Freshmen only. Students may not simultaneously enroll for AS.030.225 and AS.030.227  
Prerequisites: Corequisites: AS.030.206 OR AS.030.212  
Corequisites: Students may not simultaneously enroll for AS.030.225 and AS.030.227.  
Instructor(s): J. Greco  
Area: Natural Sciences.

AS.030.228. Intermediate Organic Chemistry Laboratory. 3 Credits.  
Lab skills already acquired in AS.030.225 will be further developed for synthesis, isolation, purification, and identification of organic compounds. Spectroscopic techniques, applications will be emphasized. Recommended Course Background: AS.030.225  
Instructor(s): J. Greco.

AS.030.301. Physical Chemistry I. 3 Credits.  
The laws of thermodynamics, their statistical foundation, and their application to chemical phenomena. Students should have knowledge of general physics, general chemistry, and calculus (two semesters recommended). Freshmen by permission only.  
Prerequisites: AS.030.305  
Instructor(s): D. Draper  
Area: Natural Sciences.

AS.030.302. Physical Chemistry II. 3 Credits.  
Introduction to quantum mechanics, its application to simple problems for which classical mechanics fails. Topics: Harmonic oscillator, hydrogen atom, very approximate treatments of atoms and molecules, and theoretical basis for spectroscopy. Recommended Course Background: AS.030.301  
Instructor(s): H. Silverstone  
Area: Natural Sciences.

AS.030.305. Physical Chemistry Instrumentation Laboratory I. 3 Credits.  
This course is designed to illustrate the principles of physical chemistry and to introduce the student to techniques and instruments used in modern chemical research. Chemistry majors are expected to take this sequence of courses, rather than AS.030.307. Chemistry majors only.  
Prerequisites: AS.030.301  
Instructor(s): A. Bragg  
Area: Natural Sciences  
Writing Intensive.
AS.030.306. Physical Chemistry Instrumentation Laboratory II. 3 Credits.
Designed to illustrate the principles of physical chemistry, introduce the student to spectroscopic techniques and instruments used in modern chemical research. Chemistry majors are expected to take this course rather than 030.307.
**Prerequisites:** Pre or Co requisite: AS.030.301 OR AS.030.302
Instructor(s): J. Tolman
Area: Natural Sciences.

AS.030.307. Physical Chemistry Instrumentation Laboratory III. 3 Credits.
This is a one-semester course which selects experiments that are most relevant to chemical engineering. Chemical Engineering majors only. Recommended Course Background: AS.030.301-AS.030.302 or equivalent.
Instructor(s): J. Tolman
Area: Natural Sciences.

AS.030.308. Elementary Computational Chemistry. 3 Credits.
This course introduces the student to the use of computers to address questions in chemistry. Basic notions of self consistent field and density functional theory will be introduced. Molecular wave functions (orbitals) for molecules of increasing complexity, starting from simple diatomic molecules and increasing to molecules of biological relevance, will be determined. Visualization tools will be used to understand the nature of chemical bonding and molecular interactions. Ligand field interactions will be quantified. Chemical reactions, for example SN2 reactions, will be described using rigorously computed reaction paths. Equilibrium and transition state structures will be determined and analyzed. Molecular vibrations will be computed, analyzed and visualized. Infrared spectra will be simulated. The effects of solvents will be considered. NMR chemical shifts will be studied.
**Prerequisites:** AS.030.205 AND AS.030.206
Instructor(s): D. Yarkony.

AS.030.315. Biochemistry I. 4 Credits.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Topics include chemical, physical, and energetic principles of biochemistry. Lecture and computer laboratory. Instructor permission required. Co-listed with AS.250.307
**Prerequisites:** AS.030.206
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.030.316. Biochemistry II. 3 Credits.
Molecular basis of gene regulation, signal transduction and control of cell metabolism, with an emphasis on physical concepts and mechanisms. Format will include lectures and class discussion of readings from the literature.
**Prerequisites:** AS.030.315
Instructor(s): S. Rokita.

AS.030.345. Chemical Applications of Group Theory. 3 Credits.
The theory of the representations of finite and continuous groups will be applied to problems in chemistry.
Instructor(s): D. Yarkony
Area: Natural Sciences.

AS.030.356. Advanced Inorganic Lab. 3 Credits.
Laboratory designed to illustrate the principles and practice of inorganic chemistry through the synthesis and characterization of transition metal and organometallic compounds. Methods used include vacuum and inert atmosphere techniques. Instrumental approaches and modern spectroscopic techniques are applied to the characterization of compounds generated.
**Prerequisites:** AS.030.228 required - AS.030.449 is strongly suggested as a prerequisite or corequisite.
Instructor(s): J. Roth
Area: Natural Sciences.

AS.030.402. Experimental Methods in Physical Chemistry. 3 Credits.
This course introduces the student to experimental methodologies used in gas phase physical chemistry. Topics to be covered include vacuum technology, charged particle optics, lasers, mass spectrometry, data acquisition, detectors, measurement of temperature and pressure, and design and fabrication of scientific apparatus. These topics will be tied together with examples of specific experimental studies.
Instructor(s): K. Bowen.

AS.030.421. Uses of Coordination Chemistry in Medicine. 3 Credits.
This course will introduce basic concepts of Medicinal Inorganic Chemistry and the variety of roles that metals play in contemporary medicine and their applications to both diagnosis and therapy. Students with potential future interests in chemistry, biochemistry, cell biology, pharmacology, and/or toxicology will find this course of great value. This interdisciplinary course is an excellent choice for undergraduates who aim to learn both sides of the coin, chemistry as an academic subject and medicine as an application; study of the combination, in addition to providing knowledge in new subject matter, may also equip students with insights which can aid the evaluation of their future professional career directions. This course begins with an introduction to coordination chemistry as a primary basis for the subsequent topics on diagnosis and therapy including the roles of metal-based drugs in modern medicine and the future development of clinically efficacious metal-complexes. Deans Teaching Fellowship Course.
**Prerequisites:** AS.030.101 AND AS.030.102 OR equivalent
Instructor(s): S. Hematian.

AS.030.441. Spectroscopic Methods of Organic Structure Determination. 3 Credits.
The course provides fundamental theoretical background for and emphasizes practical application of ultraviolet/visible and infrared spectroscopy, proton and carbon-13 nuclear magnetic resonance and mass spectrometry to the structure proof of organic compounds.
Instructor(s): J. Tovar
Area: Natural Sciences.

AS.030.442. Organometallic Chemistry. 3 Credits.
An introduction to organometallic chemistry beginning with structure, bonding, and reactivity and continuing into applications to fine chemical synthesis and catalysis. Recommended Course Background: AS.030.449 or equivalent.
Instructor(s): J. Roth
Area: Natural Sciences.

AS.030.443. Bioinorganic Chemistry. 3 Credits.
This course covers the chemistry of metal ions in biological systems. The structure and function of metalloproteins and metalloenzymes will be addressed. The principles of synthesis (organic and inorganic) for the design and characterization of small-molecule analogs of these systems will be discussed. Physical/spectroscopic methods (e.g., EPR, RR, Mossbauer, XAS) will be introduced as appropriate for understanding both the biological and synthetic inorganic systems.
AS.030.446. Mathematica as a Tool for Chemists. 3 Credits.
A systematic, hands-on introduction to Mathematica. Covers Mathematica’s basic “language,” analytic and numerical calculations, data manipulation, graphical representation, interactivity, programming, and document production. Prerequisite: Calculus (including power series) Instructor(s): H. Silverstone
Area: Natural Sciences.

AS.030.449. Chemistry of Inorganic Compounds. 3 Credits.
Physical and chemical properties of inorganic, coordination and organometallic compounds are discussed in terms of molecular orbital, ligand field and crystal field theories. Emphasis on structure and reactivity of these inorganic compounds. Other topics: magnetic properties, electronic spectra, magnetic resonance spectra, reaction kinetics. Instructor(s): G. Meyer
Area: Natural Sciences.

AS.030.451. Spectroscopy. 3 Credits.
Spectroscopy and structure of molecules starting from rotational, vibrational and electronic spectra of diatomic molecules and extending to polyatomic molecules as time permits. Instructor(s): P. Dagdigian
Area: Natural Sciences.

AS.030.452. Materials & Surface. 3 Credits.
The chemistry associated with surfaces and interfaces as well as a molecular level understanding of their essential roles in many technological fields. The first half of this course addresses various analytical techniques used to study surfaces including X-ray, photoelectron spectroscopy, and scanning tunneling microscopy. The second half of this course uses a number of case studies to illustrate the application of surface analytical techniques in contemporary research. Instructor(s): D. Fairbrother
Area: Natural Sciences.

AS.030.453. Intermediate Quantum Chemistry. 3 Credits.
The principles of quantum mechanics are developed and applied to chemical problems. Prerequisites: AS.030.301-302
Instructor(s): H. Silverstone
Area: Natural Sciences.

AS.030.501. Independent Research in Physical Chemistry I. 3 Credits.
Research under the direction of members of the physical chemistry faculty. Instructor(s): D. Draper; D. Fairbrother; D. Yarkony.

AS.030.502. Independent Research in Physical Chemistry. 0 - 3 Credit.
Research under the direction of members of the physical chemistry faculty. Instructor(s): D. Draper; D. Fairbrother; G. Meyer; K. Bowen.

AS.030.503. Independent Research in Inorganic Chemistry I. 3 Credits.
Research under the direction of members of the inorganic chemistry faculty. Instructor(s): D. Goldberg; G. Meyer; J. Roth; K. Karlin; T. Lectka.

AS.030.504. Independent Research in Inorganic Chemistry. 0 - 3 Credit.
Research under the direction of members of the inorganic chemistry faculty. Instructor(s): D. Goldberg; G. Meyer; J. Roth; K. Karlin.

AS.030.505. Independent Research in Organic Chemistry I. 3 Credits.
Research under the direction of members of the organic chemistry faculty. Instructor(s): Staff.

AS.030.506. Independent Research in Organic Chemistry I. 0 - 3 Credit.
Research under the direction of members of the organic chemistry faculty. Instructor(s): Staff.

AS.030.507. Independent Research in Biochemistry. 3 Credits.
Research under the direction of members of the biochemistry faculty. Instructor(s): Staff.

AS.030.508. Indep Rsch-Biochemistry. 0 - 3 Credit.
Instructor(s): C. Falzone; G. Meyer; J. Tolman; K. Bowen; T. Hendrickson.

AS.030.509. Independent Research in Biochemistry II. 3 Credits.
Research under the direction of members of the biochemistry faculty. Recommended Course Background: AS.030.507-AS.030.508 and permission of instructor. Instructor(s): C. Townsend; J. Tolman.

AS.030.510. Independent Research in Biochemistry II. 0 - 3 Credit.
Research under the direction of members of the biochemistry faculty. Recommended Course Background: AS.030.507-AS.030.508 and permission of instructor. Instructor(s): C. Falzone; C. Townsend; J. Tolman.

AS.030.511. Independent Research in Materials Chemistry. 0 - 3 Credit.
Instructor(s): T. Mcqueen.

AS.030.512. Independent Research in Materials Chemistry. 0 - 3 Credit.
Research under the direction of the materials chemistry faculty. Instructor(s): T. Mcqueen.

AS.030.521. Independent Research in Inorganic Chemistry II. 3 Credits.
Research under the direction of the inorganic chemistry faculty. Recommended Course Background: AS.030.503-AS.030.504 and permission of instructor. Instructor(s): C. Falzone; D. Goldberg; G. Meyer; J. Roth; K. Karlin.

AS.030.522. Independent Research in Inorganic Chemistry II. 0 - 3 Credit.
Research under the direction of the inorganic chemistry faculty. Recommended Course Background: AS.030.503-AS.030.504 and permission of instructor. Instructor(s): D. Goldberg; G. Meyer; J. Roth; Staff.

AS.030.523. Independent Research in Physical Chemistry II. 3 Credits.
Research under the direction of the physical chemistry faculty. Recommended Course Background: AS.030.501-AS.030.502 and permission of instructor. Instructor(s): D. Fairbrother; G. Meyer; K. Bowen.

AS.030.524. Independent Research in Physical Chemistry II. 0 - 3 Credit.
Research under the direction of the physical chemistry faculty. Recommended Course Background: AS.030.501-AS.030.502 and permission of instructor. Instructor(s): D. Fairbrother; D. Yarkony; G. Meyer; K. Bowen.
AS.030.525. Independent Research in Organic Chemistry II. 3 Credits.
Research under the direction of the organic chemistry faculty. Recommended Course Background: AS.030.505-AS.030.506 and permission of instructor. Instructor(s): J. Toscano; M. Greenberg; T. Lectka.

AS.030.526. Independent Research in Organic Chemistry II. 0 - 3 Credit.
Instructor(s): J. Toscano; M. Greenberg; T. Lectka.

AS.030.527. Independent Study. 3 Credits.
Instructor(s): D. Fairbrother.

AS.030.528. Independent Study. 0 - 3 Credit.
Instructor(s): D. Goldberg.

AS.030.551. Internship-Chemistry. 1 Credit.
Instructor(s): Staff.

AS.030.552. Internship - Chemistry. 1 Credit.
Instructor(s): Staff.

AS.030.592. Research-Inorganic Chemistry I. 3 Credits.
Instructor(s): G. Meyer; M. Greenberg.

AS.030.593. Research-Organic Chemistry I. 3 Credits.
Instructor(s): M. Greenberg; T. Lectka.

AS.030.597. Research-Summer. 3 Credits.
Instructor(s): Staff.

An introduction to statistical mechanics of cooperative phenomena using lattice gases and polymers as the main models. Covered topics: phase transitions and critical phenomena, scaling laws, and the use of statistical mechanics to describe time dependent phenomena. Instructor(s): K. Bowen.

AS.030.610. Chemical Kinetics.
The molecular mechanism of elementary physical and chemical rate processes will be studied. Topics such as elastic scattering, collisional vibrational and rotational energy transfer, chemically reactive collisions, and the theory of unimolecular decay will be covered. Instructor(s): K. Bowen.

AS.030.611. Electron Transfer Processes.
Electron transfer processes are distinguished by their ubiquity and essential roles in many physical, chemical, and biological processes. Rates of electron transfer in cytochromes and semiconductors span over 20 orders of magnitude. Therefore, it is important to understand the factors that underlie this large rate variation. This course is concerned primarily with this issue. Electron transfer theories will be developed from historic point of view. Basic concepts and terminology will be discussed as well as the spectroscopic and electrochemical techniques useful for quantitating electron transfer processes. Recent electron transfer studies in biology, the solid state, and solution will also be highlighted. Recommended Course Background: AS.030.356 or permission required. Instructor(s): G. Meyer.

AS.030.612. Nucleic Acids Chemistry.
A survey of physical properties of DNA and RNA. Areas explored: conformations of secondary and tertiary structures, polyelectrolyte properties, folding and unfolding reactions, and recognition by small molecules and proteins. Instructor(s): D. Draper.

AS.030.613. Chemistry-Biology Interface Program Forum I.
Chemistry-Biology Interface (CBI) program students and faculty will meet weekly in a forum that will host presentations from CBI faculty and students as well as invited guest speakers. These meetings will serve as a valuable opportunity for students to develop presentation skills and interact with CBI students and faculty. Enrollment is required for first- and second-year CBI students, and is recommended for advanced-year graduate students. Instructor(s): S. Rokita.

AS.030.614. Chemical-Biology Program Interface Forum II.
Chemistry-Biology Interface (CBI) program students and faculty will meet weekly in a forum that will host presentations from CBI faculty and students as well as invited guest speakers. These meetings will serve as a valuable opportunity for students to develop presentation skills and interact with CBI students and faculty. Enrollment is required for first- and second-year CBI students, and is recommended for advanced-year graduate students. Instructor(s): S. Rokita.

AS.030.615. Special Topics in Bioinorganic Chemistry.
Instructor(s): D. Goldberg.

AS.030.617. Special Topics in Inorganic Chemistry.
Topics from the recent primary literature in inorganic chemistry will be discussed, via instructor lectures and presentations by the graduate-undergraduate students enrolled in the course. Topics covered may range from bioinorganic to organometallic to environmental inorganic chemistry. Instructor(s): K. Karlin.

AS.030.619. Chemical Biology I.
Parts I and II constitute the core course of the Chemistry-Biology Interface (CBI) Program. An introduction to the structure, synthesis, reactivity, and function of biological macromolecules (proteins, nucleic acids, carbohydrates, and lipids) will be provided using the principles of organic and inorganic chemistry. Discussion will incorporate a broad survey of molecular recognition and mechanistic considerations, and introduce the tools of molecular and cellular biology that are utilized in research at the interface of chemistry with biology and medicine. Recommended Course Background: AS.030.206 or equivalent. Instructor(s): S. Rokita.

AS.030.620. Chemical Biology II.
Selected topics of current importance in chemical biology are covered. They include protein engineering and proteomics, cell signaling, protein-nucleic acid interactions (e.g. replication, transcription, DNA repair), catalytic RNA and the ribosome, biosynthesis of natural products, mechanisms of drug action, combinatorial chemistry and chemical genetics, and in vitro selection. Recommended Course Background: AS.030.619 or permission required. Instructor(s): S. Rokita.

AS.030.621. Literature-Organic Chemistry.
Instructor(s): J. Tovar.

AS.030.622. Seminar: Literature of Chemistry.
Seminars are presented by advanced graduate students on topics from current chemical journals. Most first-year graduate students are expected to attend for credit. Undergraduates may take the course on a satisfactory/unsatisfactory basis. Instructor(s): J. Tovar.
AS.030.625. Advanced Mechanistic Organic Chemistry I.  
The course covers the application of techniques in physical chemistry to the study of organic reaction mechanisms. Topics include chemical bonding and structure, stereochimistry, conformational effects, molecular orbital theory, methods to determine reaction mechanisms, reactive intermediates, and photochemistry. Recommended Course Background: AS.030.205-AS.030.206  
Instructor(s): M. Greenberg.

AS.030.626. Advanced Mechanistic Organic Chemistry II.  
This course covers advanced organic reactions and their mechanisms. Emphasis is given both to methods of postulating mechanisms for rationalizing reaction results and to the use of mechanistic thinking for designing reactions and reagents. This course is intended to be taken in sequence with AS.030.425. Recommended Course Background: AS.030.205-AS.030.206  
Instructor(s): J. Tovar.

AS.030.634. Topics in Bioorganic Chemistry II.  
Selected topics in modern bioorganic chemistry will be treated in greater depth emphasizing natural products chemistry, biosynthetic reaction mechanisms and drug design. Carbohydrates, lipids, polypeptides, terpenes and alkaloids will be discussed. Specific examples of drug design will be introduced throughout and methods of synthesis, combinatorial synthesis and genetics will be described.  
Instructor(s): C. Townsend.

Instructor(s): J. Tolman.

AS.030.638. Spectroscopy of Diatomic Molecules.  
A detailed study of diatomic molecules will be undertaken by rotational, vibrational, and electronic spectroscopy. The Born-Oppenheimer approximation, Hund’s coupling cases, angular momentum coupling techniques, Wigner-Eckart theorem, selection rules, intensity factors, external fields and other related topics will be discussed.  
Instructor(s): P. Dagdigian.

AS.030.677. Advanced Organic Synthesis I.  
The reactions and principles involved in the synthesis of simple and complex organic compounds. Discussion of famous natural product syntheses and practice in developing rational designs for organic syntheses. Problems in the design of syntheses and in the use of chemical literature.  
Instructor(s): R. Klausen.

AS.030.678. Advanced Organic Synthesis II.  
Advanced discussion of organic stereochimistry & its application to problems in asymmetric reactions and catalysis will be presented. Emphasis will be placed on the latest reports in the literature, especially with respect to the development of new catalytic, asymmetric processes.  
Instructor(s): T. Lectka.

Instructor(s): M. Greenberg.

Instructor(s): D. Yarkony.

AS.030.690. Intermediate Computational Chemistry.  
Instructor(s): D. Yarkony.

AS.030.691. Solid State Chemistry.  
The course is designed to provide the essential principles and concepts underlying the modern study of the structure and properties of solids in bulk crystals, thin films, and nanoscale objects. Topics include basic crystallography, structure determination by x-ray, neutron, and electron diffraction, fundamental concepts of bonding in solids, lattice dynamics, electronic band structure, magnetism, and strongly correlated electron behavior. Particular emphasis is placed on the impact of the structure, dimensionality, and electron count on electrical and magnetic properties (electric conduction, superconductivity, thermoelectricity, etc.). More course info available at <a href="http://occamy.chemistry.jhu.edu">http://occamy.chemistry.jhu.edu</a>. Cross-listed with Physics and Astronomy  
Instructor(s): T. Mcqueen.

In this course we will survey common time-resolved spectroscopic methods used to interrogate the dynamic and static properties of chemical systems. We will explore theoretical treatments both of key molecular processes (e.g. radiative and non-radiative transitions, solvation, coherence dephasing) and the spectroscopic tools used to interrogate them. Furthermore, we will survey the technical developments that are now allowing us to capture events that occur on ever faster timescales (currently down to the attosecond regime) and across the electromagnetic spectrum (from X-rays to Terahertz). Previous or concurrent concentrated study of Quantum Mechanics (graduate level or from a physics course) would be helpful, but not strictly required. Recommended Course Background: AS.030.301-AS.030.302  
Instructor(s): A. Bragg.
Today, the Classics Department seeks to maintain and enhance its tradition of leadership and innovation. Members of the current faculty are highly interdisciplinary, combining philological, historical, iconographical, and comparative methods in the study of the cultures, broadly conceived, of ancient Greece and Rome. The undergraduate and the graduate programs, leading to B.A., M.A., and Ph.D. degrees, reflect these emphases. Requiring rigorous study of the ancient languages and literatures, ancient history, and Greek and Roman art and archaeology, these programs aim to produce broad, versatile scholars who have a holistic view of the ancient cultures and of the evidence by which those cultures are comprehended.

Facilities

The department’s main scholarly resource is the Milton S. Eisenhower Library, which has broad and deep holdings in the various fields of classical antiquity. The department also has a significant collection of Greek, Roman, and Etruscan antiquities, housed in the Johns Hopkins Archaeological Museum (shared with Near Eastern Studies). Additionally, the department enjoys close ties with several local and regional institutions whose missions include the study of the ancient world: the Walters Art Museum, with its world-class collection of antiquities and manuscripts; the Baltimore Museum of Art, with its Roman mosaics; and the Center for Hellenic Studies in Washington, D.C. Finally, the department is a member of the American School of Classical Studies at Athens, the American Academy in Rome, and the Intercollegiate Center for Classical Studies at Rome.

The department offers undergraduate courses in Greek and Latin languages and literatures, ancient history, classical art and archaeology, Greek and Roman civilizations, history of sexuality and gender, ancient philosophy, mythology, and anthropological approaches to the classics. These courses are open to all students in the university, regardless of their academic year or major field of interest.

Requirements for the B.A. Degree

The B.A. program in classics is highly flexible, accommodating a variety of interests in and approaches to the ancient world. Twelve courses (36 credits) are required for a major in classics. All majors take a minimum of four language courses (Greek and/or Latin), two of which must be at the 200- (intermediate) level or above. Majors must also take at least four courses in ancient history or art history. The other four courses are chosen from among the department’s offerings, in consultation with the director of undergraduate studies (DUS) in the Classics Department, so as to build an intellectually substantial and coherent curriculum that fits the student’s interests. Possible areas of emphasis include language and literature, ancient philosophy, art and archaeology, and ancient history. Certain courses taken in other departments may count toward the major, with the approval of the DUS. Advanced undergraduates may participate in graduate seminars, with the approval of the DUS and the professor. The major also requires a reading knowledge (i.e., second-year proficiency) in French, German, or Italian.

Students intending to pursue graduate study in classics will need to do substantially more work in Greek and Latin than what the major minimally requires: most graduate programs expect successful applicants to have studied one language for at least three years and the other for at least two. Therefore, students interested in graduate work should be engaged in a language-intensive curriculum by the end of the sophomore year.

The Classics Department awards the Evangelia Davos Prize each year to the classics major or minor whose work in Greek studies is outstanding.

Honors Program in Classics

Under this program, senior classics majors have the opportunity to write an honors thesis in close consultation with a faculty member. This work of guided research and writing counts for three credits and is outside the requirements of the major. This program awards a B.A. with honors.

Study Abroad

The Department of Classics is a member of the Intercollegiate Center for Classical Studies in Rome and can provide information on other year-long, semester-long, or summer programs in Greece and Italy (e.g., the College Year in Athens and the summer session of the American School of Classical Studies at Athens). Interested students, especially classics majors and minors, are encouraged to consider these options for studying overseas.

Minor in Classics

The requirements for the minor in classics are extremely flexible: six courses (18 credits) from among the department’s offerings. These courses are selected, in consultation with the DUS, to meet the needs and interests of the student. Minors may wish to pursue the study of one ancient language, or create a curriculum that meshes with their other academic pursuits. Interested students should consult the DUS.

B.A./M.A. Degree

Admission to the B.A./M.A. program is based on outstanding performance in previous Classics courses.

Students considering a five-year program are expected to declare their interest during the spring semester of their junior year. Prior to application, students must consult with the Director of Undergraduate Studies, their faculty advisor, and the department administrator. A formal graduate application must be submitted no later than November 15 of the fall semester of the senior year in order to be admitted to the program in the spring of the senior year, thus meeting the requirement for concurrent status. In the students’ senior (fourth) year, they are to devise a program that would best prepare them to do advanced work in their final (fifth) year, in particular addressing any weakness in one or the other classical language. The student is to complete the requirements for the B.A. in their fourth year. For the M.A. the following additional work is required:

• Four semesters (12 credits) of Latin and/or Greek, six credits of which must be above the intermediate level (AS.040.207 Intermediate Latin, AS.040.205 Intermediate Ancient Greek)
• Two graduate seminars in the Classics Department
• Demonstrated reading knowledge of one of three modern languages: French, German, or Italian
• A thesis of 20,000 to 25,000 words representing original research. The thesis will be supervised by a member of the Classics Department faculty and graded by the supervisor and a second reader from Classics or an outside department.
Exceptionally well-prepared students may apply for the B.A./M.A. program, with prior approval from the DUS and the Department Chair, in the spring of their junior year. In this case it is possible to complete the bachelor’s/master’s degree in four years. These students are expected to express their interest to the department by the fall term of their junior year; the application deadline is March 15 of the spring semester of the junior year.

The B.A. and M.A. degrees are conferred concurrently at the end of the M.A. year. Please note that the department does not award degrees during the summer; students are expected to complete the degree requirements in conformance with the university Graduate Board spring deadlines. Specific departmental and Graduate Board deadlines are communicated to the student in due course.

Requirements for the M.A. Degree

Note: Students are not admitted for the M.A. as a terminal degree, but only for the Ph.D.

- Six seminars and translation examinations in Greek and Latin.
- A reading knowledge of German, French, or Italian. Student will demonstrate this knowledge by passing the departmental examination in one of the three languages.

Requirements for the Ph.D. Degree

To receive a Ph.D. in classics from Johns Hopkins University, students must complete successfully a range of seminar work and examinations, and then write a substantial dissertation. The Graduate Program in Classics is designed to be completed in five years, of which the first three are dedicated to seminar work and examinations, and the last two to the dissertation. Assuming satisfactory progress toward the Ph.D., all students admitted to the program receive five years of living expenses and tuition remission, in order to make it possible to complete the program in a timely manner. This support takes the form of a fellowship for the first two years, and teaching for at least two of the remaining years. The department is also able to offer teaching opportunities in the summer, as well as funded summer travel for program-related purposes. All students, upon reaching dissertation level, are encouraged to apply for outside funding to spend a year abroad. If outside funding is obtained, the Johns Hopkins fellowship may be held in reserve for an additional year. A detailed outline of the Ph.D. program, including a prospectus of all seminars and exams, can be found on the Classics Department website (http://classics.jhu.edu).

Application information may be obtained from the chair, Department of Classics, The Johns Hopkins University, 113 Gilman Hall, 3400 North Charles Street, Baltimore, MD 21218. Telephone: 410-516-7556; Fax: 410-516-4848; email: classics@jhu.edu. The application deadline is on or about January 15. For the precise date, please refer to the Graduate Admissions website (http://grad.jhu.edu).

For current faculty and contact information go to http://classics.jhu.edu/people/

Faculty
Chair
H. Alan Shapiro

W. H. Collins Vickers Professor of Archaeology (History of Art): Greek and Roman art and archaeology, Greek mythology and religion.

Director of Graduate Studies
Silvia Montiglio
Basil L. Gildersleeve Professor of Classics: Greek literature and culture; the ancient novel and narrative; philosophy.

Director of Undergraduate Studies
Dimitrios Yatromanolakis
Associate Professor (Anthropology, Humanities Center): Greek literature, Greek social and cultural history, theory and anthropology of Greek music, papyrology, epigraphy, performance cultures of Greece and Rome.

Professors
Matthew Roller
Latin literature, Roman social and cultural history, Roman material culture, Graeco-Roman philosophy.

H. Alan Shapiro
W. H. Collins Vickers Professor of Archaeology (History of Art): Greek and Roman art and archaeology, Greek mythology and religion. (Graduate Advisor)

Assistant Professor
Hérica N. Valladares
Roman art and archaeology, Latin poetry, Ovid in the Renaissance, 18th-century reception of antiquity.

Emeritus
Marcel Detienne
Basil L. Gildersleeve Professor Emeritus: Greek, social history, cultural history, mythology, anthropology and classics.

Lecturer
Emily Anderson
Senior Lecturer (History of Art): Aegean Bronze Age art and archaeology, material culture, sociocultural interaction, identity, glyptic.

Joint Appointments
Richard Bett
Professor (Philosophy): ancient philosophy, ethics.

Christopher Celenza
Professor (German and Romance Languages and Literatures): Renaissance Latin literature, literary culture, palaeology.

Pier Luigi Tucci
Assistant Professor (History of Art): Roman art and architecture.

For current course information and registration go to https://isis.jhu.edu/classes/
Courses

AS.040.104. The Roman Republic: History, Culture, and Afterlife. 3 Credits.
This introductory level course examines the history, society, and culture of the Roman state in the Republican period (509-31 BCE), during which it expanded from a small city-state to a Mediterranean empire. We also consider the Republic’s importance for the later phase of Western society, notably the American and French revolutions. All readings in English.
Instructor(s): M. Roller
Area: Humanities.

AS.040.105. Elementary Ancient Greek. 4 Credits.
This course provides a comprehensive, intensive introduction to the study of ancient Greek. During the first semester, the focus will be on morphology and vocabulary. Credit is given only upon completion of a year’s work. Cannot be taken Satisfactory/Unsatisfactory.
Instructor(s): T. Smith.

AS.040.106. Elementary Ancient Greek. 4 Credits.
Course provides comprehensive, intensive introduction to the study of ancient Greek. The first semester’s focus is morphology and vocabulary; the second semester’s emphasis is syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Instructor(s): N. Kauffman.

AS.040.107. Elementary Latin. 3 Credits.
This course provides a comprehensive, intensive introduction to the study of Latin for new students, as well as a systematic review for those students with a background in Latin. Emphasis during the first semester will be on morphology and vocabulary. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Instructor(s): J. Lamont; M. Mueller; Y. Zhao.

AS.040.108. Elementary Latin. 3 Credits.
Course provides comprehensive, intensive introduction to the study of Latin for new students as well as systematic review for students with background in Latin. The first semester’s emphasis is morphology and vocabulary; the second semester’s focus is syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Instructor(s): J. Lamont; M. Mueller.

AS.040.111. Ancient Greek Civilization: Society, Archaeology, Literature, Philosophy. 3 Credits.
The course will introduce students to major aspects of the ancient Greek civilization, with special emphasis placed upon culture, society, archaeology, literature, and philosophy.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.112. Roman Civilization. 3 Credits.
Instructor(s): M. Sullivan
Area: Humanities.

AS.040.117. Intro To Roman Culture. 3 Credits.
Instructor(s): T. Phin
Area: Humanities.

AS.040.119. The World of Pompeii. 3 Credits.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.

AS.040.121. Ancient Greek Mythology: Art, Literature, and Mythmaking. 3 Credits.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.133. Heroes: the Ancient Greek Way. 3 Credits.
The purpose of this course is to introduce students to Ancient Greek literature by reading and discussing its most important and famous texts, from the Iliad and the Odyssey to tragedy to philosophy. Knowledge of Greek is not required.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.134. Love, War, and Glory: The Gods and Heroes of Greek Mythology. 3 Credits.
Greek myths fascinate us as adventurous narratives, yet they always sound enigmatic and require interpretation. This course will combine the pleasure of reading stories and the concern for their understanding. Readings in ancient and modern texts. The course may not be taken S/U.
This course meets Hopkins’ requirements for a major in classics.
Instructor(s): N. Kauffman
Area: Humanities.

AS.040.135. The Grandeur That Was Rome. 3 Credits.
At the peak of its power, the Roman empire extended from Scotland to Syria, incorporating numerous cultures, attitudes, and lifestyles. This course examines Roman social practices, political institutions, and religion from the empire’s humble beginnings through its final period, using a wide variety of materials including drama, poetry, history, and oratory. This course may not be taken S/U and meets the Hopkins requirements for a major in classics.
Instructor(s): T. Smith
Area: Humanities.

AS.040.137. Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum. 3 Credits.
Limited to Freshmen. This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus. Cross-listed with Museums and Society and Near Eastern Studies.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.
AS.040.140. Gender and Sexuality in Early Greece and the Eastern Mediterranean. 3 Credits.
In this course we will explore evidence and interpretations of gender and sexuality in the region of the Aegean and eastern Mediterranean during the third and second millennia BCE. Material investigated will include the "snake goddess" figures from Minoan Crete, anthropomorphic figurines from the Cyclades and Cyprus, wall paintings, etc. In each case we will consider the history of interpretation as well as investigate the objects' archaeological and sociocultural contexts. Discussion topics will include representational ambiguity, the specific materialities of objects, and their possible roles in activities construing gender. The course will incorporate material from the JHU Archaeological Museum. Cross-listed with Women, Gender, and Sexuality Program.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.142. Spartacus, Caesar, and Cleopatra: Notorious Characters from Roman History and Hollywood Cinema. 3 Credits.
Since the invention of cinema, the ancient world has been an important vehicle for both lavish visual spectacles and the exploration of contemporary social issues. This course analyzes the depiction of the infamous figures of the late republic in both ancient sources and modern media, to examine how ancient Rome and contemporary America have used these characters to contemplate race, class, gender, and imperialism.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.201. Digging Up the Gods: The Archaeology of Roman Sanctuaries. 3 Credits.
This course will explore the major sites of Ancient Italy, such as Rome, Ostia, and Pompeii, from temples to dedications, and their role in religion and society. Cross-listed with History of Art.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.205. Intermediate Ancient Greek. 3 Credits.
Reading ability in classical Greek is developed through a study of various authors.
Prerequisites: AS.040.105 AND AS.040.106 OR Equivalent
Instructor(s): D. Dooley
Area: Humanities.

AS.040.206. Intermediate Ancient Greek. 3 Credits.
Reading ability in classical Greek is developed through a study of various authors, primarily Plato (fall) and Homer (spring). Recommended Course Background: AS.040.105-AS.040.106 or equivalent.
Instructor(s): D. Dooley
Area: Humanities.

AS.040.207. Intermediate Latin. 3 Credits.
Although emphasis is still placed on development of rapid comprehension, readings and discussions introduce student to study of Latin literature, principally through texts of various authors.
Prerequisites: AS.040.107 AND AS.040.108 OR Equivalent
Instructor(s): D. Dooley
Area: Humanities.

AS.040.208. Intermediate Latin. 3 Credits.
Reading ability in Latin is developed through the study of various authors, primarily Cicero (fall) and Vergil (spring). Recommended Course Background: AS.040.107-AS.040.108 or equivalent.
Instructor(s): T. Smith
Area: Humanities.

AS.040.218. Celebration and Performance in Early Greece. 3 Credits.
Surviving imagery suggests that early Aegean societies engaged in diverse celebratory performances, including funerals and palatial feasts, puberty rites and ecstatic dance. We investigate archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.219. Children and Childhood in the Ancient Mediterranean. 3 Credits.
Instructor(s): T. Phin
Area: Humanities
Writing Intensive.

AS.040.220. Representing Ancient Greece and Rome in Film and Television. 3 Credits.
This course examines modern representations of ancient Greece and Rome in film. Students will analyze films in both ancient and modern contexts, distinguishing historical fact from artistic choice. Screenings on Monday evenings. Cross-listed with Film and Media Studies.
Instructor(s): A. Ibarra
Area: Humanities.

AS.040.221. The Archaeology of Early Greece. 3 Credits.
This course explores the origins and rise of Greek civilization from the Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing on major archaeological sites, sanctuaries, material culture, and artistic production.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.223. Everything in Moderation? Exploring Wine in Ancient Greece. 3 Credits.
Area: Humanities
Writing Intensive.

AS.040.225. Tragedy and Athenian Culture. 3 Credits.
Tragedy is often considered the distinctive art form of Classical Athens. This class will read a selection of plays in the contexts of contemporary Athenian culture.
Area: Humanities.

AS.040.227. Warfare in Ancient Rome: From Republic to Empire. 3 Credits.
This course surveys Roman military history from the Iron Age through the fall of the Roman Empire. Topics include major military campaigns and the material production of the Roman army.
Instructor(s): A. Ibarra
Area: Humanities.

AS.040.229. Victory and Defeat in Ancient Rome. 3 Credits.
The Romans are known for their success at war which made it possible to build an empire. This course will explore two aspects of this success story: victory and defeat. Dean’s Teaching Fellowship course.
Instructor(s): E. Campbell
Area: Humanities.

AS.040.231. Word and Image in Ancient Greece: Art, Literature, Inscriptions. 3 Credits.
Focusing on art (mainly vase-paintings and sculpture), texts, and inscriptions, this course examines major aspects of archaic, classical, and Hellenistic Greek culture. Emphasis placed on the interplay of word and image.
Area: Humanities.
AS.040.232. Island Archaeology: The Social Worlds of Crete, Cyprus and the Cyclades. 3 Credits.
Islands present highly distinctive contexts for social life. We examine three island worlds of the third and second millennia BCE through their archaeological remains, each with its particularities. These are places where water had a unique and powerful meaning, where boat travel was part of daily life, where palaces flourished and where contact with other societies implied voyages of great distance across the sea. Class combines close study of material culture and consideration of island-specific interpretive paradigms; students work with artifacts in the JHU Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.305. Advanced Ancient Greek. 3 Credits.
Reading of prose or verse authors, depending on the needs of students. This semester’s reading will focus on Aristotle’s “Politics.” (Same as AS.040.705) Recommended Course Background: AS.040.205-AS.040.206 or equivalent.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.306. Advanced Ancient Greek. 3 Credits.
Reading of prose or verse authors, depending on the needs of students. This semester’s focus will be on poetry: Theocritus’ Idylls. Recommended Course Background: AS.040.205-AS.040.206 or equivalent. Co-listed with AS.040.702.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.307. Advanced Latin Prose. 3 Credits.
This course aims to increase proficiency and improve comprehension of the Latin language. Intensive reading of Latin texts, with attention to grammar, idiom, translation, etc. Specific offerings vary. This semester’s focus is on Cicero’s letters. (Same course as AS.040.707) Recommended Course Background: AS.040.205-AS.040.206 or equivalent. Co-listed with AS.040.702.
Instructor(s): D. Piana
Area: Humanities.

AS.040.308. Advanced Latin Poetry. 3 Credits.
The aim of this course is to increase proficiency and improve comprehension of the Latin language. Intensive reading of Latin texts, with close attention to matters of grammar, idiom, and translation. This semester’s reading will focus on Ovid’s Heroides. (Same as AS.040.710) Prerequisites: AS.040.207 AND AS.040.208 OR Equivalent
Instructor(s): H. Valladares
Area: Humanities.

AS.040.320. Myth In Classical Art. 3 Credits.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.330. The Age of Perikles. 3 Credits.
A survey of Athens in the High Classical period, focusing on primary sources read in translation (Thucydides, Plutarch) and archaeological evidence.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.340. The Art of Classical Greece. 3 Credits.
Area: Humanities.

AS.040.354. Slander, Abuse, & Mockery: Examining the World of Roman Invective. 3 Credits.
Slander, Abuse, and Mockery: Examining the World of Roman Invective
This course will examine the pervasive practice of verbal abuse in the Roman world and how such abuse shaped social and political realities. Dean’s Teaching Fellowship course.
Instructor(s): R. Webber
Area: Humanities
Writing Intensive.

AS.040.355. Roman Landscapes in Context. 3 Credits.
This course will explore Roman representations of landscape from the 1st century BCE to the 2nd century CE. We will also consider early modern fantasies of ancient landscapes. Cross-listed with History of Art and Interdepartmental.
Instructor(s): H. Valladares
Area: Humanities.

AS.040.357. The Art of Classical Greece. 3 Credits.
Instructor(s): J. Neils
Area: Humanities.

AS.040.359. Making Identities: How Archaeology Constructs People in the Past and Present. 3 Credits.
Archaeology both examines the identities of people in the past and helps construct those in the present. In this course we will explore how aspects of our own lives (political, religious, cultural, etc.) are influenced by our notions of the past and the people who populated it, and how our modern identities in turn influence the way we understand past people.
Instructor(s): E. Anderson
Area: Humanities, Social and Behavioral Sciences.

AS.040.360. The Archaeology of Daily Life. 3 Credits.
Limited to juniors and seniors from Classics, History of Art, Archaeology, and Museum and Society. Others with permission of instructor only. This course will examine objects of daily life from the Greco-Roman world in the Johns Hopkins University Archaeological Museum. Students will collaborate on an online catalogue, featuring their research. Cross-listed with History of Art, Near Eastern Studies, and Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.

AS.040.361. EMPIRE: A Case of Rome. 3 Credits.
In this course, students will consider varying concepts of empire in ancient and modern history. Rome will serve as the case study for determining the characteristics of an ancient empire, paying particular attention to socio-cultural, political, and martial developments in the history of Roman civilization.
Area: Humanities.

AS.040.363. Craft and Craftpersons of the Ancient World: Status, Creativity and Tradition. 3 Credits.
This course explores the dynamic work and social roles of craftpersons in early Greece, the eastern Mediterranean and Near East. Readings and discussion will query the identities and contributions of these people—travelers, captives, lauded masters, and even children—through topics including gender, class, and ethnicity. Special focus on late third–early first millennia BCE; local field trips. Cross-listed with Near Eastern Studies.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.
AS.040.366. The Archaeology of Ancient Cyprus: Investigating a Mediterranean Island World in the JHU Museum. 3 Credits.
This course explores the visual and materials worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.367. Memory and Oblivion: Rewriting the Past in Ancient Rome. 3 Credits.
This course examines concepts of memory and forgetting through Roman memory sanctions, which aimed to revise or even erase the past. Textual, archaeological, and iconographical sources will be considered. Dean’s Teaching Fellowship course.
Instructor(s): L. Garofalo
Area: Humanities
Writing Intensive.

AS.040.368. The Authority of Ruins: Antiquarianism in Italy, 1690-1890. 3 Credits.
(Same as 040.668) This seminar will focus on the transformation of antiquarianism in Italy after the discovery of Herculaneum and Pompeii. Students will work primarily with rare books from the collections at JHU. Cross-listed with History of Art and Museums and Society and Interdepartmental.
Instructor(s): H. Valladares
Area: Humanities.

AS.040.501. Independent Study. 3 Credits.
Instructor(s): A. Shapiro; D. Yatromanolakis; H. Valladares; S. Montiglio
Area: Humanities.

AS.040.502. Independent Study. 0 - 3 Credit.
Instructor(s): A. Shapiro; D. Yatromanolakis; S. Montiglio.

AS.040.519. Honors Research. 3 Credits.
Instructor(s): A. Shapiro; D. Yatromanolakis.

AS.040.520. Honors Research. 0 - 3 Credit.
Instructor(s): Staff.

AS.040.579. Master’s Research. 3 Credits.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.580. Master’s Research. 0 - 3 Credit.
Instructor(s): D. Yatromanolakis.

AS.040.599. Independent Study. 3 Credits.
Instructor(s): M. Roller.

AS.040.612. Ancient Greek Prose Composition.
Translation of modern English prose into ancient Greek. Emphasis on the Attic dialect.
Instructor(s): D. Yatromanolakis.

AS.040.618. The Gracchi: Culture, Politics, and Economics in Late Republican Rome.
This seminar examines the Gracchi both as a cultural phenomenon in the Late Republic and as historical agents pursuing particular political and economic aims.

AS.040.621. Proseminar to Classical Archaeology.
An introduction to research methods and current topics of discussion in the scholarship on Greek and Roman art and archaeology. Cross-listed with History of Art.
Instructor(s): P. Tucci.

AS.040.624. Hero or Villian? Odysseus in Greek Literature & Culture.
We shall read Greek literary and philosophical texts dealing with the figure of Odysseus, to see how he was regarded as a moral type.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.626. Athenian Festivals.

AS.040.627. Sanctuaries of Athens and Attika.
The seminar will explore the history and topography of the major Attic sanctuaries, with a focus on the dedications in their religious and archaeological context.

AS.040.628. Rome and Jerusalem: Archaeological Aspects of the Land of Israel During the Roman Period (1st century BCE to 3rd century CE).
We examine the complex society of Israel under the Roman rule: the different ethnic and religious groups, and the phenomena of “Hellenization/Romanization.” The approach is archeological, against an historical background.

AS.040.629. Representing Tiberius.
Tiberius was a quite different figure from his predecessor, Augustus–almost an “anti-princeps.” This seminar involves intensive Latin reading in the major sources for Tiberius’ life and career (Suetonius, Tacitus, Velleius, various epigraphic texts) as we investigate the evolving understanding of the emperor’s socialpolitical role.

AS.040.631. Athens 415: Empire and Theater.
Focusing on the year 415, this seminar explores relations between theater and democratic imperialism at Athens. Texts to be studied include Euripides’ Trojan Women, Aristophanes’ Birds, and selections from Thucydides’ History.

Close study of the structuration of Latin prose. We will read and analyze selections of various prose authors, observing word order and colon construction; we will also practice composing Latin prose in various styles.

Instructor(s): D. Yatromanolakis.

This seminar examines the “distinctively Roman” genre of verse satire and associated problems of form, content, and occasion. Substantial readings in Latin from the genre’s major authors: Lucilius, Horace, Persius, and Juvenal.
Instructor(s): M. Roller
Area: Humanities.

AS.040.636. Fragments.
Exploration of fragmentary literature, with emphasis on technical issues related to transmission, reconstruction, and reception.
Area: Humanities.

AS.040.638. Ancient Greek Seafaring.
The seminar will survey literary, archaeological, and iconographical evidence for Greek ships and seafaring, and lay the groundwork for an exhibition in 2012. Cross-listed with History of Art.

AS.040.639. Propertius.
Instructor(s): H. Valladares.
AS.040.640. The Ancient Greek Novel.
Graduate students only. Knowledge of ancient Greek is required. The Ancient Greek Novels are romantic love stories, with a beautiful heroine and a handsome hero. We shall read excerpts from a sample of novels in Greek and the entire corpus in English.
Instructor(s): S. Montiglio.

AS.040.642. Greek Vases in the Johns Hopkins Archaeological Collection.
The seminar will update the scholarship on selected vases in the collection published since the 1984 catalog and generate detailed labels to accompany the new installation.
Instructor(s): A. Shapiro.

AS.040.643. How to Persuade a Roman Emperor.
This seminar examines texts addressed directly to emperors, texts that seek to form, guide, persuade, or provide models for them. The principal readings are Seneca’s De Clementia and Pliny the younger’s Panegyricus.
Instructor(s): M. Roller.

AS.040.644. The Crisis of the Late Republic: Ancient and Modern Approaches.
This seminar focuses on the fall of the Roman Republic. We trace modern scholars’ rapidly changing understandings of the issues involved, along with influential ancient understandings, above all those of Sallust. Weekly assignments will include modern scholarship as well as substantial Latin reading; in the course of the term we will read the entire corpus of Sallust (the Bellum lugurthumin, the Coniuratio Catilinae, and the longer fragments of the Historiae).
Instructor(s): M. Roller.

AS.040.646. Greek Palaeography.
The seminar focuses on both early and later Greek manuscripts. Special emphasis placed on technical aspects of the discipline of Greek Palaeography (dating of manuscripts, transmission of literature and of specialized treatises related to ancient Greek sciences, etc.).
Instrument(s): D. Yatromanolakis
Area: Humanities.

AS.040.648. Homeric Archaeology.
This seminar surveys the archaeology of the Late Bronze Age in the Aegean, then explores the creation, diffusion, and reception of Homeric epic from the Iron Age to the end of the Archaic Period.
Instructor(s): A. Shapiro; E. Anderson.

AS.040.650. Curating the Roman House.
In this seminar, students will be asked to develop an exhibition on the theme of the Roman House based on the holdings of the JHU Archaeological Museum and the Walters Art Museum. Guest lectures by
Dr. Marden Nichols, Curator of Ancient Art at the Walters Art Museum.
Instructor(s): H. Valladares.

AS.040.651. Greek Art: Archaic into Classical.
An intensive exploration, based on current scholarship, of Greek sculpture and painting ca. 500-460 BCE and the origins of the Classical style.
Cross-list with History of Art.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.653. Ovid, Maker of Images.
In this seminar, we will read excerpts from Ovid’s “Metamorphoses” and consider the reception of these episodes in the visual arts from antiquity to the 21st century.
Instructor(s): H. Valladares.

In this seminar the main fields of art, namely architecture, sculpture and painting (frescoes and mosaics), in the Near East will be examined as reflecting the impact Greek and Roman culture had in the region. One of the main topics is the meeting between regional traditions (Jewish, Phoenician, Syrian, Nabatean) and the imported Greek and Roman trends. These aspects will be studied both at official and popular levels. Examination of official art and architecture will focus on religious and civic domains, taking into account also the use of marble, which had to be imported to this region. As to the popular art, domestic milieu will be taken into consideration. After introductory presentations by the instructor, students will be invited to bring their own contributions.
Instructor(s): M. Fischer.

AS.040.655. Attic Hero Cults.
This seminar will combine the evidence of literary and epigraphical sources with archaeological material (votive reliefs, vase iconography) to explore the central role of hero cult in the religious life of ancient Athens. Cross-listed with History of Art.
Instructor(s): A. Shapiro.

AS.040.657. Apollonius of Rhodes.
We shall read and discuss significant portions of Apollonius of Rhodes’ Argonautica in the original Greek.
Instructor(s): S. Montiglio.

AS.040.663. Heroes and Hero Cult in Greece.
Instructor(s): J. Neils.

AS.040.665. Survey of Greek Literature.
An intensive survey of Greek poetic and prose texts, which emphasizes reading for comprehension and speed. Texts range from Homer to Lucian.
Area: Humanities.

AS.040.666. The Authority of Ruins: Antiquarianism in Italy, 1690-1890.
(Same as 040.368) This seminar will focus on the transformation of antiquarianism in Italy after the discovery of Herculaneum and Pompeii. Students will work primarily with rare books from the collections at JHU.
Cross-listed with History of Art and Near Eastern Studies.
Instructor(s): H. Valladares
Area: Humanities.

This seminar focuses on early Greek hexameter poetry, especially Hesiod, in the context of ancient Greek performance culture and ancient reception. Students will be introduced to current research on comparative mythology and religion.
Instructor(s): D. Yatromanolakis.

AS.040.671. Greek Portraiture and Society.
This seminar will explore the development of Greek portrait sculpture from the Early Classical through the Hellenistic periods and the contexts of its display in Greek cities.
Instructor(s): A. Shapiro.

AS.040.673. The Iliad.
Readings will consist of large portions of The Iliad, focusing especially on literary aspects of the epic.
Instructor(s): S. Montiglio.

AS.040.674. Aeschylus and Sophocles.
This Graduate Seminar will explore major social and cultural aspects of some of the most influential fifth-century Athenian plays, including important archaeological material related to ancient Greek theatre.
Instructor(s): D. Yatromanolakis.
AS.040.675. The Roman House: Image, Text, Archaeology.
Instructor(s): H. Valladares.

Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.686. The Odyssey.
Instructor(s): S. Montiglio.

AS.040.687. Proseminar in Classical Philology.
An overview of research areas in Classics, with a focus on such disciplines as epigraphy, papyrology, palaeography, as well as various forms of critical theory.
Instructor(s): D. Yatromanolakis.

Overview of sources, collections, bibliography. Examination of important political, literary, social inscriptions. Reading primary evidence, Pompeian graffiti, new material from Vindolanda, and hands-on work with classical coins.
Instructor(s): G. Schmeling
Area: Humanities.

We shall read and discuss significant portions of Apuleius’ The Golden Ass in the original Greek.
Instructor(s): S. Montiglio.

AS.040.702. Reading Ancient Greek Poetry.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. This semester the course will focus on Theocritus’ Idylls. Co-listed with AS.040.306.
Instructor(s): S. Montiglio.

AS.040.704. Reading Ancient Greek.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. (Same as 040.305) Recommended Course Background: AS.040.105
Instructor(s): M. Sullivan.

AS.040.705. Reading Ancient Greek Prose.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. This semester’s reading will focus on Aristotle’s “Politics.” (Same as AS.040.305) Recommended Course Background: AS.040.105-AS.040.106
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.706. Reading Ancient Greek.
(Same course as 040.306) This reading seminar is intended to train graduate students in direct and critical work on primary sources. This semester’s focus will be on the Homeric epics and Aristophanes.
Instructor(s): S. Montiglio.

(Same course as AS.040.307) This reading seminar is intended to train graduate students in direct and critical work on primary sources. This semester’s focus is on Cicero’s letters.)
Instructor(s): D. Piana.

AS.040.710. Reading Latin Poetry.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. This semester’s reading will focus on Ovid’s “Heroides.” (Same as AS.040.308) Recommended Course Background: AS.040.107-AS.040.108
Instructor(s): H. Valladares.

AS.040.714. Survey of Latin Literature.
This seminar surveys Latin authors and texts represented on the Ph.D. reading list. Intensive, accelerated reading aims to familiarize students with the different authors and their styles, to improve reading speed and accuracy, and prepare students to tackle the remaining works on the reading list by themselves.
Instructor(s): M. Roller.

AS.040.717. Plato.
Open only to graduate students. The goal of this course is twofold: to improve fluency in reading Greek and to acquaint students with Plato’s philosophy. We will read at a sustained speed but also discuss literary and philosophical issues.
Instructor(s): S. Montiglio.

AS.040.719. Ovid’s Heroides.
Intensive reading course for graduate students, focusing on Ovid’s Heroides.
Instructor(s): H. Valladares.

AS.040.721. Tibullus.
In this seminar, students will engage in close readings of Tibullus’ works. We will also consider the poems attributed to Sulpicia and other aspects of the Corpus Tibullianum.
Instructor(s): H. Valladares.

AS.040.801. Independent Study.
Instructor(s): A. Shapiro; D. Yatromanolakis; H. Valladares; S. Montiglio.

AS.040.802. Independent Study.
Instructor(s): A. Shapiro; D. Yatromanolakis; S. Montiglio.

AS.040.804. Independent Study.
Instructor(s): D. Yatromanolakis.

AS.040.806. Master’s Thesis Research.
Instructor(s): D. Yatromanolakis.

No Audits.
Instructor(s): S. Montiglio.

AS.040.815. Dissertation Research.
No Audits.
Instructor(s): S. Montiglio.

Cross Listed Courses

History of Art

AS.010.208. The Disappearing Wall: Roman Frescoes in Context. 3 Credits.
The course introduces ancient Roman wall painting from Pompeii and Rome as images painted on “disappearing walls.” We will analyze these and other murals in historical, archaeological and museum contexts.
Instructor(s): S. O’Connell
Area: Humanities
Writing Intensive.

AS.010.314. Roman Art from Republic to Empire. 3 Credits.
Area: Humanities.
AS.010.324. Art and Architecture in the Augustan Age. 3 Credits.
Investigates Roman art and architecture during the Augustan age (31 BC – AD 14). Augustus’ cultural program influenced many aspects of Roman life, leading to the creation of a new visual language that transformed Roman society. Methodologically, the focus will be on the integration of diverse sources to reconstruct and discuss the images and the built environment of the Augustan age.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.355. Art and Religion in the Roman World. 3 Credits.
This course explores the relationships between Roman art and religion through a survey of key topics and issues, from the archaic period to late antiquity, providing an introduction into how to use and analyze both textual and material evidence as sources for understanding Roman society. Temples, altars, public and private buildings, reliefs, statues, sarcophagi, paintings, mosaics, coins, metal-ware, glass and pottery, all get increasingly complex and interesting as the Roman world developed and are important forms of evidence for political, intellectual, social and economical life.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.357. Monumentality in Classical Art and Architecture: From Greece to Rome. 3 Credits.
This course investigates the Romans’ reception of Greek and Hellenistic art and architecture, as well as Rome’s original contribution during the republican and imperial age. Its goal is to examine the effects of Hellenization on Roman society and the creation of a completely new visual language.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.385. Byzantine Art. 3 Credits.
This course will cover the arts of Byzantium in the medieval period, from the seventh to the fifteenth centuries.
Instructor(s): H. Maguire
Area: Humanities.

AS.010.392. Creating A Museum Exhibition: Micro-monuments. 3 Credits.
Area: Humanities.

AS.010.423. Roman Sculpture. 3 Credits.
The course examines all the major public and private monuments in Rome and in the provinces, from the Republican age to the end of the Roman empire. It considers their cultural, political, and social contexts, and of course the original architectural setting. New light is shed on the reception of statuary and reliefs by the Roman viewer, using primary texts as well as the sculptures themselves. The course illustrates the different types of sculpture that an ancient Roman would have encountered, explaining the nuances of meaning in the different words used by Roman and Greek authors in their descriptions. Sculpture was an integral part of Roman life: indeed the Romans placed statues and reliefs in their houses, villas, gardens, and tombs, as well as in their temples and public buildings. While Rome remains a focus for the course, western and eastern provincial examples are also offered to help further understand the role of Roman sculpture. May also be used as credit toward the Archaeology major. Cross-listed with Classics.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.424. Collecting Roman Art: From Antiquity to Present. 3 Credits.
A survey of the most important collections of Greek and Roman sculpture, from the late-Republican age through the Middle Ages and the Renaissance, until the creation of the main museums in Europe and in the United States.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.430. History of Roman Art and Architecture. 3 Credits.
This course explores the principal forms and contexts in which art and architecture developed in the Roman world. It surveys Roman art and architecture from the foundation of the city of Rome - against the background of the Etruscan tradition - to the divergent trends of late antiquity, including the interaction between Rome and the provinces of the empire. Overall the course encourages critical thinking about the purpose of studying art and architecture as a tool for understanding the Roman world, and provides an introduction into how to use visual and material evidence as a historical source. On completion of this course students will be able to describe and evaluate the architectural style and decorative of key Roman monuments, as well as their function in ancient society. Cross-list with Classics
Instructor(s): P. Tucci
Area: Humanities.

AS.010.646. Roman Portraiture.
Area: Humanities.

AS.010.655. Religion in Roman Art.
This course explores the relationships between Roman art and religion through a survey of key topics and issues, from the archaic period to late antiquity, providing an introduction into how to use both textual and material evidence as sources for understanding Roman art and society.
Instructor(s): P. Tucci.

The course investigates the earliest influence from Greece on Roman artists, architects and patrons during the Late Republic. Even before the conquest of mainland Greece, Roman society was transformed by a dramatic process of acculturation. Hellenistic art, quickly adapted by the Romans, played an important part in the development of late-republican Rome: the contrast between the old mos maiorum and what would soon be condemned as luxuria was striking. Archaeological material and literary sources prove that the new taste pervaded not only the Roman way of life but also art and architecture. The course examines in detail the inspiring struggle between Etrusco-Italic traditions and the overwhelming riches from the Hellenistic world. Cross-listed with Classics
Instructor(s): P. Tucci.
AS.010.717. Alternative Histories Through Art and Archaeology: from Archaic to Late Antique Rome.
This seminar investigates important areas and buildings of ancient Rome in relation to the culture and events of their time, and explores the role of art and architecture in Roman society. Methodologically the focus is on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting) to reconstruct and understand different aspects of Rome's development, from its foundation to the late antique period. This course provides a framework for critical discussion of historical and socio-cultural themes through the analysis and interpretation of material and visual culture as well as other forms of archaeological evidence. It addresses key debates on the construction and transformation of ancient Rome, exploring notions of identity, cult, language, economy as well as forms of political organization. Overall the course aims to give graduate students the tools to access those histories and ideologies which appear unattainable through the literary sources alone, allowing for the expansion of existing narratives and challenging the underlying models which inform our understanding of key historical and cultural processes. To be taught by incoming faculty member Pier Luigi Tucci.
Instructor(s): P. Tucci.

AS.010.718. Art and Architecture in the Augustan Age.
This seminar investigates Roman art and architecture during the Augustan age (31 BC – AD 14), in Rome and in the provinces of the empire. Augustus' cultural program influenced any aspects of the Roman way of life (religious ritual, clothing, state ceremony), leading to the creation of a new visual language that expressed and furthered the transformation of Roman society. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting) to reconstruct and discuss the images that a contemporary would have experienced in Rome and elsewhere.
Instructor(s): P. Tucci.

AS.010.719. Art and Architecture under the Flavian Dynasty.
This seminar investigates Roman art and architecture during the Flavian age (AD 69-96) in Rome and in the provinces. With the Flavian dynasty the empire enjoyed a period of renewed political and economic stability: this was the result of the principate of Vespasian. The 2009-celebration of the bimillenary of Vespasian's birth gave the opportunity to reassess the figure of this emperor and the role of his dynasty in the development of Rome. With the Flavians, the capital of the empire enjoyed a period of intense building activity (e.g. the Colosseum). The great projects of Vespasian and Domitian radically transformed its image. The embellishment of the city and the global re-planning of the urban spaces were the visible signs of the political revival of the empire. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting, epigraphy and literary sources) to reconstruct the built environment of Rome during the last three decades of the 1st century AD. Cross-list with Classics.
Instructor(s): P. Tucci.

Near Eastern Studies

AS.130.258. Ceramic Analysis in Archaeology. 3 Credits.
At archaeological sites following the invention of pottery roughly 10,000 BCE, ceramics are the single most frequent and ubiquitous class of artefact that archaeologists uncover. This class, which will be conducted in the Hopkins Archaeological Museum as a combination of lectures, discussions, and hands-on interactions with ancient and modern ceramics, surveys the methods and interpretive techniques that archaeologists use when studying this important category of material culture. Specific topics include manufacturing techniques, craft specialization, typology and chronology, production and exchange, scientific analyses, stylistic and functional analysis, and socio-political organization.
Instructor(s): J. Osborne
Area: Humanities.

AS.130.306. Creation: Man, the Gods, and the Cosmos in Ancient Myth. 3 Credits.
Instructor(s): M. Sullivan
Area: Humanities.

AS.130.311. Gilgamesh. 3 Credits.
An examination of the development of both the character of Gilgamesh and the composition of epic narrative in ancient Mesopotamia, beginning with the earliest Sumerian Gilgamesh stories of the third millennium B.C. The bulk of the course will consist of a close reading in English of the Akkadian Gilgamesh epic, focusing on its concerns with homosocial bonding, human sexuality, and mortality. Some attention will be paid to the influence of Gilgamesh on Greek epic, and the reception of Gilgamesh in the modern world since its recovery in the late 19th century.
Instructor(s): M. Sullivan
Area: Humanities
Writing Intensive.

Introduces students to the methods of analysis involved in the study of archaeological ceramics. In addition to the history of ceramic analysis and its place in archaeology, students will be introduced to the basic skills needed for processing ceramics in an archaeological setting, and introduce them to the basic corpus of ancient Eastern Mediterranean ceramics, from the Neolithic until the Hellenistic period, with an emphasis on assemblages from the region of Near East, Egypt, Aegean, Greece, and Rome. They will learn more technical forms of analysis aimed at identifying methods of production, and the function and use of ceramic vessels. The aim is to prepare students who intend to participate in archaeological field projects with the appropriate knowledge of the ceramics of the Eastern Mediterranean Region. Emphasis will be placed on linking analytical methods with the appropriate research questions they can address. Students will have the opportunity to work directly with existing collections at the university, and in the Walters Art Gallery.
Instructor(s): S. Batiuk
Area: Humanities.
Philosophy

AS.150.401. Greek Philosophy: Plato and His Predecessors. 3 Credits.
A study of pre-Socratic philosophers, especially those to whom Plato reacted; also an examination of major dialogues of Plato with emphasis upon his principal theses and characteristic methods. Cross-listed with Classics.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

German Romance Languages Literatures

AS.211.414. Body as Vehicle: The French 20th Century Approach to Theatrical Performance. 3 Credits.
From Greek tragedy to postmodern stage productions: 20th century theater practitioners revisit performance through the ritual and emotional experience of physical action on the stage. Hence, the actor’s body operates as a bridge relating traditional forms of expression to theatrical performance, as well as a creative — and sensitive — source of emotions. This vehicle becomes in the hands of some 20th century practitioners an object of experimentation, initiating the concepts and practices of an Anthropology of the Theater. A thorough study of theoretical texts, music, as well as videos showing contemporary performances in France, will explore the variety of this theatrical approach and the way some revolutionary theories influenced theater practice in France and worldwide.
Instructor(s): E. Vaou
Area: Humanities.

AS.214.352. Writing and Wonder: Books, Libraries, and Discovery 1250-1550. 3 Credits.
The invention of printing occurred amid two centuries of intense development in the conduct and material means of European scholarship. The transition from writing by hand to movable type was accompanied by a revolution in scholarship that involved a new attitude to Classical and Biblical antiquity, the recovery of neglected and “lost” works, the formation of secular libraries, and the development of tools for the study of ancient handwriting, writing materials, and the history of language and of history itself. The revolution in attitudes to and uses of the book eventually transformed every discipline related to reading, writing, and the organization of knowledge. Topics to be covered include writing as an object of wonder, the transformation of a mythology of writing into a true history of books, writing, and libraries, the scientific study of writing and of language, and the representation of writing and books in the art and literature of the Middle Ages and Renaissance. Extensive use will be made of Johns Hopkins’ large collection of books published before 1600, and student projects will be oriented toward relating the experiences of scholars in this period, including via computer-assisted means. Open to all undergraduates. Knowledge of a foreign language helpful but not required.
Instructor(s): C. Celenza; W. Stephens
Area: Humanities.

AS.214.612. The dichotomy ’prodesse’-’delectare’ from Horace to the Twentieth-Century.
Rooted in in antiquity, a crucial notion in theory of literature is that a literary work must provide both entertainment and instruction to its readers. In the history of human reflection on artistic production this notion’s importance can be compared to that of imitation. This course will examine instances of this notion’s appearance across the centuries, from Horace to Boccaccio, and all the way to our times. Special attention will be given to the connection between aesthetics and ethics and to the pleasure of reading.
Area: Humanities
Writing Intensive.

AS.214.681. Representing the Ancient Italian Past in the Renaissance.
The Renaissance was, among other aspects, a nationalistic movement, aimed at recovering the prestigious culture of the Roman and Etruscan past and counteracting the perceived decadence of the “modern” or “middle” age. Writers in both Italian and Latin pursued the “rebirth” of ancient Italic culture through a variety of literary and political strategies. After a brief review of familiar authors and texts from Petrarch to the Cinquecento, we will examine in depth a variety of texts in Latin and Italian that defended—often politically, and at times mendaciously—the ancient Italic cultural hegemony. Responses from other European cultures will be considered.

AS.214.761. Reading & Writing in Pre-Modern Europe.
This course has a fourfold aim: First, it is designed to familiarize participants with the basics of Latin paleography from Roman antiquity through the age of printing with movable type; throughout, we will practice deciphering literary and documentary sources of various types, even as we concentrate on the evolution of different writing styles. Second, we will think about paleography’s status as a “discipline.” That is, the term “paleography” dates back to 1708 and Montfaucon’s classic work, Palaeographia Graeca. However, it was only in the late nineteenth century in the world of the German research university that paleography came into the orbit of the Geisteswissenschaften as a “Hilfswissenschaft.” Both implicitly and explicitly throughout the seminar we shall be asking what consequences that move entailed. Third, we will study the manner in which printing with moveable type changed western graphic culture: was printing “revolutionary” or “evolutionary”? Did printing and its radical graphic changes introduce new forms of consciousness in readers? Fourth, we will become familiar with certain aspects of “the history of the book,” discovering as we do what sorts of questions scholars in this broad field of scholarly endeavor have been asking recently.
Instructor(s): C. Celenza.

Interdepartmental

AS.360.133. Great Books at Hopkins. 3 Credits.
Great Books at Hopkins is designed for first-year students and explores some of the greatest works of the literary and philosophical tradition in Europe and the Americas. In lectures, panel sessions, small seminars, and multimedia presentations, professors from a variety of academic disciplines lead students in exploring authors across history. Close reading and intensive writing instruction are hallmarks of this course, as is a changing reading list that includes, for this fall, Homer, Plato, Dante, Shakespeare, Douglass, and Woolf.
Instructor(s): E. Patton; K. Boyce
Area: Humanities
Writing Intensive.
Study of Women, Gender, Sexuality
AS.363.410. Worshipped Goddesses, Worshipping Women: Femininity, Religion, and Mythology in Ancient Greece. 3 Credits.
This course examines the Greek goddesses and heroines and the ways in which women worshipped them in antiquity, using an interdisciplinary approach, incorporating literary, iconographical, and archaeological evidence.
Instructor(s): S. Stern.

Center for Language Education
AS.383.112. Beginning Sanskrit II. 3 Credits.
This course is a continuation of 381.111. Additional emphasis will be placed on listening, reading, and writing of the language. Basic sentences will be drawn from the Sanskrit Literature. Simple Vedic Mantras from the Vedas and Ishopanishad, verses from the Ghagavad Gita, and the sootras from the Yoga Sookas will be read.
Prerequisites: AS.383.111.

Program in Museums and Society
AS.389.205. Examining Archaeological Objects. 3 Credits.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.342. Objects in Focus: Materials, Techniques, History. 3 Credits.
What can art and archaeological objects reveal about materials, their craftsmanship and preservation? We investigate artists’ treatises, visit studios and museum conservation laboratories and closely examine artworks. M&S practicum course. Cross-listed with Classics, History of Art, Near Eastern Studies.
Area: Humanities.

AS.389.345. Introduction to Museum Practice. 3 Credits.
Taking the JHU Archaeological Museum as a case study and working closely with its holdings, we discuss the principles and practice of managing and preserving museum collections. Earns M&S Practicum credit. Cross-listed with History of Art, Anthropology, Near Eastern Studies, and Classics.
Instructor(s): S. Balachandran
Area: Humanities.

Cognitive Science
http://www.cogsci.jhu.edu/
Cognitive science is the study of the human mind and brain, focusing on how the mind represents and manipulates knowledge and how mental representations and processes are realized in the brain. Conceiving of the mind as an abstract computing device instantiated in the brain, cognitive scientists endeavor to understand the mental computations underlying cognitive functioning and how these computations are implemented by neural tissue. Cognitive science has emerged at the interface of several disciplines. Central among these are cognitive psychology, linguistics, and portions of computer science and artificial intelligence; other important components derive from work in the neurosciences, philosophy, and anthropology. This diverse ancestry has brought into cognitive science several different perspectives and methodologies. Cognitive scientists endeavor to unite such varieties of perspectives around the central goal of characterizing the structure of human intellectual functioning. It is this common object of inquiry that integrates traditionally separate disciplines into the unified field of cognitive science.

Programs in cognitive science at Johns Hopkins University reflect the interdisciplinary nature of the subject, requiring the student to approach the study of the mind/brain from several different investigative perspectives. Programs in cognitive science draw on courses offered by several other departments as well.

Facilities
The department is located in Krieger Hall. Laboratory and office space is provided for graduate students. The department’s research facilities are provided by the following laboratories:

- Language and Cognition Lab (Landau)
- Language Acquisition Lab (Legendre)
- Cognitive Neuroscience Lab (McCloskey)
- Language Processing and Development Lab (Omaki)
- Visual Cognitive Neuroscience Lab (Park)
- CogNeuro Lab (Rapp)
- Semantics Lab (Rawlins)
- Computational Linguistics Lab (Smolensky)
- Phonetics/Phonology Lab (Wilson)
- Integrated Experimental/Theoretical Grammar Research (IGERT) Lab

Department members also conduct research in the F.M. Kirby Center for Functional Brain Imaging at the Kennedy Krieger Institute and in other laboratories at Johns Hopkins School of Medicine.

The required courses are divided into five general areas, as described below. The program is structured so as to ensure some exposure to each of the five areas. In addition, it provides in-depth training in two focal areas chosen by the student. Majors in cognitive science thus acquire a broad perspective which will enable them to situate particular research disciplines within the overall study of the mind/brain.

Requirements for the B.A. Degree
(See also General Requirements for Departmental Majors (p. 33).)

Three courses from each of the two focal areas (areas of concentration) the student chooses from among the five areas of concentration listed at the end of this section. At least one course in each area must be at the 300-600 level, not including research, readings, or practica.

One course at any level from each of the three non-focal areas.

Three additional courses at the 300-600 level, chosen from any of the five areas of concentration or from other offerings in the Department of Cognitive Science.

Either math option (A or B)

A. Any two of the following:
   - AS.110.106 Calculus I
   - AS.110.108 Calculus I
The requirements for the minor are:

- Declare their intention, preferably by the beginning of junior year.
- On one of their focal areas. Students intending to minor in linguistics should consult the Department, except for cognitive science majors who choose linguistics as their focal area.

A minor in linguistics is available to undergraduates majoring in any area of concentration. The requirements for each area of concentration is maintained on the Cognitive Science Department website. However, please note that courses change over time, and some courses are not offered every year. The Director of the department provides competitive levels of funding covering tuition and living expenses. Research expenses, including some support for travel to present papers at scholarly meetings, are also provided. Financial Aid for Graduate Students

The department provides competitive levels of funding covering tuition and living expenses. Research expenses, including some support for travel to present papers at scholarly meetings, are also provided.

For current faculty and contact information go to http://cogsci.jhu.edu/people/

**Faculty Chair**

Brenda Rapp
Professor: cognitive neuropsychology, spelling, spoken language production, spatial frames of reference, reading and neural bases of recovery of function.

**Professors**

Barbara Landau  
Dick and Lydia Todd Faculty Development Professor: language acquisition, cognitive development, spatial representation, and acquisition of the lexicon.

Géraldine Legendre  
syntax, optimality theory, Romance and Balkan morphology and syntax, acquisition of syntax.

Michael McCloskey  
cognitive neuropsychology, vision, spatial and lexical representation, foundations of cognitive science.

Paul Smolensky  

**Associate Professor**

Colin Wilson  
theoretical phonology (constraint interaction, targeted constraints, learnability), experimental phonology (artificial grammar learning, substantive bias), computational cognitive science (finite state, maximum entropy, and Bayesian methods).

**Assistant Professors**

Akira Omaki  
psycholinguistics, first language acquisition, second language acquisition, syntax.

Soojin Park  
cognitive neuroscience, vision, scene perception and memory, spatial navigation, functional neuroimaging.

Kyle Rawlins  
formal semantics, pragmatics, syntax and interfaces, lexical representation, mathematical linguistics, computational models of meaning and communication.

**Professor Emeritus**

Luigi Burzio  
thetical phonology, morphology, and syntax, Romance linguistics.

**Joint/Adjunct Appointments**

Dana Boatman  
Associate Professor (Neurology and Otolaryngology, School of Medicine): speech perception, auditory processing disorders, auditory neurophysiology.

John Desmond  
Associate Professor (Neurology, School of Medicine): neuroimaging, transcranial magnetic stimulation methods to investigate neural correlates of behavior.

Howard Egeth  
Professor (Psychological and Brain Sciences): perception, attention, cognition, psychology, law.

Jason Eisner  
Associate Professor (Computer Science): computational linguistics (syntax and phonology), natural language processing, statistical machine learning, programming language design.

Lisa Feigenson  
Associate Professor (Psychological and Brain Sciences): cognitive development, numerical cognition.

Barry Gordon  
Therapeutic Cognitive Neuroscience Professor (Neurology, School of Medicine): cognitive neurology, cognitive neuroscience, language, aphasia, memory, amnesia and memory disorders, autism, computational models of cognition, and cognitive disorders.

Steven Gross  
Associate Professor (Department of Philosophy): philosophy of language, philosophy of mind, metaphysics.

Justin Halberda  
Associate Professor (Psychological and Brain Sciences): cognitive development, reasoning, language acquisition.

Argye Hillis-Trupe  
Professor (Neurology, School of Medicine): language impairments in acute stroke, hemi-spatial neglect after stroke, relationship between cognitive impairments and regions of hypoperfused brain.

Guy McKhann  
Professor (Neurology, School of Medicine): neurological and cognitive changes after cardiac surgery.

Maureen Stone  
Adjunct Professor (Director, Vocal Tract Visualization Lab, Department of Neural and Pain Sciences, University of Maryland School of Dentistry): speech science, phonetics, vocal tract and tongue kinesiology, measurement and modeling.

Steven Yantis  
Professor (Psychological and Brain Sciences): visual perception, attention, long-term memory, aging, dementia.

For current course information and registration go to https://isis.jhu.edu/classes/  

**Courses**

**AS.050.101. Cognition. 3 Credits.**

Introductory course exploring the study of human mental processes within the field of cognitive science. Drawing upon cognitive psychology, cognitive neuropsychology, cognitive neuroscience, linguistics, and artificial intelligence, the course examines theory, methods, and major findings in work on vision, reasoning, and language.  
Instructor(s): C. Wilson  
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.102. Language and Mind. 3 Credits.
Introductory course dealing with theory, methods, and current research topics in the study of language as a component of the mind. What it is to “know” a language: components of linguistic knowledge (phonetics, phonology, morphology, syntax, semantics) and the course of language acquisition. How linguistic knowledge is put to use: language and the brain and linguistic processing in various domains. This course is restricted to freshmen and sophomores. Juniors and seniors must seek instructor approval to enroll. Cross-listed with Neuroscience and Psychology.
Instructor(s): A. Omaki
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.105. Intro To Cognitive Neuropsychology. 3 Credits.
When the brain is damaged or fails to develop normally, even the most basic cognitive abilities (such as the ability to understand words, or perceive objects) may be disrupted, often in remarkable ways. This course explores a wide range of cognitive deficits, focusing on what these deficits can tell us about how the normal brain works. Topics include brain anatomy and causes of brain damage, reading and spelling deficits, unilateral spatial neglect, hemispheric disconnection, cortical plasticity, and visual perception of location and orientation. Students read primary sources; journal articles that report deficits and discuss their implications. Cross-listed with Neuroscience.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.107. Language and Advertising. 3 Credits.
Advertising pervades our culture; interactions with advertising are an unavoidable fact of modern life. This class uses tools from linguistics and cognitive science to analyze these interactions, and understand the impact of advertising on its viewers. A central theme is to treat ads as communicative acts, and explore the consequences -- what can theories of communication (from linguistics, psychology, and philosophy) tell us about ads? How do ads use central features of human cognition to accomplish their aims? Do ads manipulate, and if so, how successfully? The theories of communication we explore include Greivean pragmatics, theories of speech acts, linguistic theories of presuppositions, and more. Students will collect, analyze, and discuss advertisements in all mediums.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.109. Minds, Brains and Computers. 3 Credits.
Mental processes such as language comprehension and visual perception involve complex computations carried out by the brain. But how do brains compute? What exactly does it mean to “compute” anyway? How do the brain and mind relate? Topics include cognition viewed as abstract computation, the brain viewed as a physical computer, and “neural network” computers viewed as models of both the mind and the brain compute.
Instructor(s): J. Chen-Main
Area: Natural Sciences, Social and Behavioral Sciences.

Using both seminal and contemporary readings as a foundation, this seminar explores how genetics and experience interact to influence thinking, understanding the underlying cognitive processes (both human and otherwise). In so doing, we will discuss how innate determination of various components of cognition ultimately influence human nature. Open to freshmen only.
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

AS.050.203. Cognitive Neuroscience: Exploring the Living Brain. 3 Credits.
This course surveys theory and research concerning how mental processes are carried out by the human brain. Currently a wide range of methods of probing the functioning brain are yielding insights into the nature of the relation between mental and neural events. Emphasis will be placed on developing an understanding of both the physiological bases of the techniques and the issues involved in relating measures of brain activity to cognitive functioning. Methods surveyed include electrophysiological recording techniques such as EEG, VEP, ERP, single/multiple unit recording and MEG; functional imaging techniques such as PET and fMRI; and methods that involve lesioning or disrupting neural activity such as WADA, cortical stimulation, animal lesion studies, and the study of brain-damaged individuals. (Co-listed as AS.080.203 in Neuroscience.)
Instructor(s): B. Rapp; S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.204. Visual Cognition. 3 Credits.
Vision is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd. While we take the visual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The goal of this course is to provide an introduction to visual cognition, including existing theoretical frameworks and recent research findings. We will explore questions such as: How do we see the stable world when our eyes are constantly moving? What is the relationship between seeing and knowing? Do infants see the world the same way as adults do? What are the neural mechanisms underlying visual perception?
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.205. Structure Of English. 3 Credits.
Area: Humanities, Natural Sciences.

AS.050.206. Bilingualism. 3 Credits.
Do children get confused when they grow up exposed to more than one language? Is it possible to forget one’s native language? Are the first and second language processed in different areas of the brain? How does brain damage impact the different languages of a polyglot? Does knowing a second language affect non-linguistic cognitive processing? This course will address questions such as these through an exploration of mental and neural processes underlying bilingual and multilingual language processing.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.231. Lab-based Survey of Cognitive Science. 3 Credits.
How can we study human behavior to understand how the mind works? In this class we will examine several classic human cognitive science experimental paradigms such as the Stroop, lexical decision, and n-back tasks. We will discuss the reasoning and motivation underlying each experimental approach and learn how they provide us with an understanding of the major domains of cognitive science, such as executive function, language, and working memory. This is a computer lab based course during which students will carry out cognitive science experiments during class.
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.240. World of Language. 3 Credits.
This hands-on course exposes students to the fascinating variety – and uniformity – to be found among the world’s 6000 languages through group lectures on a variety of topics as well as actual linguistic fieldwork conducted in small groups with a native speaker of a language unknown to the participants. Among the fundamental questions examined in lectures and tested against realistic linguistic data are the following. Is knowledge of language encoded in the genes? Is it unique to mankind? How do new languages emerge from the contact of two very different languages? How did English change over time? Are all languages related? Where does language come from?
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.301. Stress and the Brain. 3 Credits.
The purpose of this course is to explore the phenomenon of stress by investigating the neural, endocrine and molecular mechanisms involved. By reviewing both animal and human research, this course will consider disorders of the stress control system and the adverse impact of stress on human physical and mental health. Topics in this class will include, but are not limited to I) disorders such as PTSD, anxiety, major depression; II) interactions between stress and neurodegenerative disorders; III) stress-immune-inflammatory interactions; IV) the role of stress in obesity, hypertension, and other metabolic syndromes; V) stress effects on reproduction. Students will finish this course with a greater understanding for the fundamental neuroendocrine responses to stress and its consequent and/or associated adverse effects on human health.
Area: Natural Sciences.

AS.050.303. Mind, Brain and Beauty. 3 Credits.
What underlies our aesthetic response to art, music, and other facets of human experience? Do identifiable properties of objects and events evoke consistent aesthetic responses, or is beauty mostly in the eye of the beholder? Examining such questions from cognitive science, neuroscience, and philosophical perspectives, this course explores relevant research and theory in the visual, auditory, and tactile domains. Several researchers will discuss their ongoing studies with the class, and students will also have the opportunity to participate in demonstration experiments that illustrate phenomena under discussion. (Same as AS.050.603) Recommended Course Background: One or more courses in one of these: Cognitive Science, Neuroscience, Philosophy, or Psychology or permission of instructor.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.311. The Literate Mind and Brain. 3 Credits.
This course surveys both the historical development of written language as well as current cognitive theories that account for the manner in which the written language is represented and processed by "readers/writers" of the language. Issues regarding the relationship between the written and spoken language, the acquisition of written language skills, as well as developmental and acquired disorders of reading and writing will be examined.
Prerequisites: AS.050.101 or AS.050.102 or AS.050.105 or Instructor’s Permission
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences Writing Intensive.

AS.050.312. Cognitive Neuroimaging Methods in High-Level Vision. 3 Credits.
This course is an advanced seminar and research practicum course. It will provide the opportunity to learn about fMRI methods used in the field of vision science and for students to have hands-on experience to develop, design and analyze a research study on topics in the cognitive neuroscience field of high-level vision. In the first part of the course students will read recent fMRI journal papers and learn about common fMRI designs and analysis methods; in the second part of the course students will conduct a research study as a group to address a research question developed from readings. Students are expected to write a paper in a journal article format at the end of the course and to present their results in front of the class. Research topics will vary but with special focus on topics in object, scene and space recognition. Cross-listed with Neuroscience and Psychology; instructor’s permission required.
Prerequisites: AS.050.204 OR AS.050.319 OR AS.050.315 OR AS.200.312 OR AS.050.203 OR AS.080.203 or equivalent; instructor’s permission required.
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.314. Classic Papers in Language Learning. 3 Credits.
Classic and current issues in language acquisition focusing on enduring questions and issues – how different scientific disciplines and theorists and experimentalists have addressed these issues.
Area: Humanities, Social and Behavioral Sciences.

When we think about our ability to see, we tend to think about our eyes, but in fact vision happens mostly in the brain. This course explores the remarkable perceptual deficits that occur when the visual regions of the brain are damaged or fail to develop normally, focusing on what these perceptual malfunctions tell us about normal visual perception. Topics include visual system anatomy and physiology; functional specialization in the lower visual system as revealed by cerebral achromatopsia (color blindness resulting from brain damage) and akinetopsia (impaired motion perception); cortical plasticity in the visual system; spatial deficits in perception and action; and the implications of high-level visual deficits, including prosopagnosia (impaired face recognition), Charles Bonnet syndrome (complex visual hallucinations in blind areas of the visual field), blindsight (accurate responding to visual stimuli despite apparent inability to see them), and Anton’s syndrome (denial of blindness).
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.316. Morpho - Phonology. 3 Credits.
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.317. Semantics I. 3 Credits.
This is an introduction to the study of meaning in natural language. We address the conceptual and empirical issues in semantic theory and introduce some formal machinery that has been developed to deal with such problems. After discussing foundational questions, we turn to formal semantics and pragmatics, as well as their interfaces with syntax and the lexicon. Specific topics include presupposition, type-driven composition, quantification, lexical aspect, argument structure, and lexical representations of meaning.
Instructor(s): E. Zaroukian; M. Oliver
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.318. Practicum in Language Disorders-Community Based Learning. 2 Credits.
This course provides the opportunity to learn about adult aphasias, language disorders which are one of the most common consequences of stroke. You will receive training in supportive communication techniques and work as a communication partner with an individual with aphasia for two hours per week. Three class meetings for orientation and reading assignments will be held on campus; training and practicum will be conducted at a local aphasia support center. Transportation required. Junior or Senior status. Co-listed with Neuroscience (AS.080.400). Please see additional instructions on the Neuroscience Department website at: http://krieger.jhu.edu/neuroscience/courses/index.html-the Neuroscience Department Website</a>
Prerequisites: AS.080.203(C) OR AS.050.203(C) OR AS.050.105[C] OR AS.050.105[C]
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.319. Visual Cognition. 3 Credits.
Vision is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd. While we take the visual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The goal of this course is to introduce students to the field of visual cognition, including existing theoretical frameworks and recent research findings. We will explore questions such as: How do we see the visual world? Do we see and remember correctly what’s in the physical world? How many items can we keep track of and remember at a time? How is the visual system structured and what are the neural mechanisms underlying visual perception? Meets with AS.050.619.
Prerequisites: AS.200.101 OR AS.050.101 OR AS.080.203 OR AS.050.203
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.320. Syntax I. 3 Credits.
Introduces the basic methods and means of analysis used in contemporary syntax investigations, practicing with data from different languages. Also offered as AS.050.620.
Prerequisites: Prereqs: AS.050.102 OR AS.050.240
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.321. Syntax II. 3 Credits.
Building on AS.050.320, this course addresses and compares conceptions of syntactic theory that have emerged in the 1980s and 1990s. Discussion focuses on both the substantive and formal properties of the fundamental principles of syntactic theory, as well as the cross-linguistic evidence that has motivated them. When possible, connections will be made to other areas of linguistic inquiry such as processing, acquisition, and computation. The particular choice of topics and conceptions will vary from year to year but may include (1) the contrast between the Principles and Parameters view where syntactic theory is composed of a set of inviolable principles whose form admits a certain amount of cross-linguistic variation, and the Optimality Theory view where the principles are invariant though viable, and cross-linguistic variation is determined by the relative importance of satisfying the various principles; (2) the role of structure building operations in grammar, and the differences between characterizations of well-formedness in terms of sequences of derivational steps and representational well-formedness requirements. Meets with AS.050.621
Prerequisites: AS.050.320[C] or instructor’s permission.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.322. Semantics II. 3 Credits.
This course extends the material in AS.050.317 to cover advanced but central topics in semantic and pragmatic theory, focusing on intensional semantics (especially possible world semantics and situation semantics). Empirical domains of interest in this class include modality, tense, grammatical aspect, conditionals, attitude and speech reports, questions, and free choice phenomena. Three core theoretical issues addressed in this class are the nature of a compositional account of the above intensional phenomena, the representations of possibilities involved, and the role of the syntax/ semantics/pragmatics interface in such an account.
Meets with AS.050.622
Prerequisites: AS.050.317[C] or instructor’s permission
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.325. Phonology I. 3 Credits.
An introduction to the basic principles underlying the mental representation and manipulation of language sounds and their relation to human perception and vocal articulation: how units of sound are both decomposable into elementary features and combined to form larger structures like syllables and words. The role of rules and constraints in a formal theory of phonological competence and in accounting for the range of variation among the world’s languages. (Same as AS.050.625)
Previous experience with one other language-related course is desirable but not obligatory.
Instructor(s): C. Kirov
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.326. Foundations In Cognitive Science. 3 Credits.
This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology. Co-listed with AS.050.626.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.
AS.050.327. Phonology II. 3 Credits.
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.332. DevelopmentCog Neurosci. 3 Credits.
Prerequisites: AS.050.101 (Cognition) or AS.050.339/639 (Intro to Cog. Development) or AS.200.132 (Introductory Developmental Psychology) or instructors permission required. In-depth examination of the current literature on cognitive development in the context of development cognitive neuroscience. Same as 050.632.
Instructor(s): B. Landau
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.333. Psycholinguistics. 3 Credits.
This course provides a broad survey of current research on language processing in adult native speakers and language learners. Topics include speech perception, word recognition, and sentence production and comprehension. We will discuss the nature of representations that are being constructed in real-time language use, as well as how the mental procedures for constructing linguistic representations could be studied by various behavioral and physiological measures. Meets with AS.050.633
Prerequisites: AS.050.102 or AS.050.240 or instructor’s permission
Instructor(s): A. Omaki
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

AS.050.335. Introduction to Connectionist Modeling of Cognition. 3 Credits.
This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. (Same as AS.050.626) Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology.
Instructor(s): D. Mathis
Area: Natural Sciences, Social and Behavioral Sciences

AS.050.339. Cognitive Development. 3 Credits.
This is a survey course in developmental psychology, designed for individuals with some basic background in psychology or cognitive science, but little or none in development. The course is strongly theoretically oriented, with emphasis on issues of nature, nurture, and development. We will consider theoretical issues in developmental psychology as well as relevant empirical evidence. The principle focus will be early development, i.e., from conception through middle childhood. The course is organized topically, covering biological and prenatal development, perceptual and cognitive development, the nature and development of intelligence, and language learning. Also listed as AS.050.639. Cross-listed with Neuroscience. Instructor’s approval required.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.370. Formal Methods in Cognitive Science: Language. 3 Credits.
This course will be devoted to the study of formal systems that have proven useful in the cognitive science of language. We will discuss a wide range of mathematical structures and techniques and demonstrate their applications in theories of grammatical competence and performance. A major goal of this course is bringing students to a point where they can evaluate the strengths and weaknesses of existing formal theories of cognitive capacities, as well as profitably engage in such formalization, constructing precise and coherent definitions and rigorous proofs. Also offered as AS.050.670.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.371. Formal Methods in Cognitive Science: Inference. 3 Credits.
This course introduces techniques for computational modeling of aspects of human cognition, including perception, categorization, and induction. Possible topics include maximum likelihood and Bayesian inference, structured statistical models (including hierarchical and graphical models), nonparametric models. The course emphasizes the close connections among data analysis, theory development, and modeling, with examples drawn from language and vision.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.372. Formal Methods in Cognitive Science: Neural Networks. 4 Credits.
Introduction to continuous mathematics for cognitive science, with applications to biological and cognitive network models: real and complex numbers, differential and integral multi-variable calculus, linear algebra, dynamical systems, numerical optimization. Meets with AS.050.672
Prerequisites: Calculus I AS.110.106 OR AS.110.108
Instructor(s): P. Smolensky
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.050.446. Integrative Research Methods in Cognitive Science. 3 Credits.
Through a series of case studies, we will examine contemporary approaches to integrating the perspectives and research methods of multiple sub-disciplines of cognitive science. Also offered as AS.050.646.
Prerequisites: AS.050.326, or instructor’s permission required.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.480. Learning Theory. 3 Credits.
Recently, statistical learning has played a leading role in informing the empiricist/nativist and connectionist/ symbolic debates. But just what is “statistical learning” and what’s new about it? This course presents theories of statistical learning, such as Bayesian models, causal networks, information-theoretic models (e.g., Minimum Description Length and Maximum Entropy formalisms). These methods have caused revolutions in machine vision and natural language processing. During the course, these methods will be compared with other numerical learning methods such as connectionist networks, and with non-numerical learning theories such as Gold’s classic learnability theory and its probabilistic extension to PAC (probably approximately correct) learning theory. This recent work has fundamental implications for the ancient problem of induction. Prerequisites: With instructor permission, this course is open to upperclass undergraduates concentrating in computation. This course is open to upperclass undergraduates concentrating in computation.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.501. Readings in Cognitive Science/Freshmen. 3 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.502. Readings in Cognitive Science-Freshmen. 0 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.503. Research in Cognitive Science/Freshmen. 3 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.504. Research Cognitive Science-Freshmen. 0 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.505. Readings in Cognitive Science/Sophomores. 3 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.506. Readings Cognitive Science-Sophomores. 0 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.507. Research in Cognitive Science/Sophomores. 3 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.508. Research Cognitive Science-Sophomores. 0 - 3 Credit.
Permission Required.
Instructor(s): Staff.

Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.510. Cognitive Science Internship. 0 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.511. Readings in Cognitive Science/Juniors. 3 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.512. Readings Cognitive Science-Juniors. 0 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.513. Research in Cognitive Science/Juniors. 3 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

Permission Required.
Instructor(s): Staff.

AS.050.515. Readings in Cognitive Science/Seniors. 3 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.516. Readings Cognitive Science - Senior. 0 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.517. Research in Cognitive Science/Seniors. 3 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.518. Research Cognitive Science - Seniors. 0 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.599. Research-Cognitive Science. 3 Credits.
Instructor(s): B. Landau; B. Rapp; C. Wilson; K. Rawlins; M. McCloskey.

AS.050.603. Mind, Brain and Beauty.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

Instructor's permission required. (Also offered as AS.050.312.)
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

Classic and current issues in language acquisition focusing on enduring questions and issues – how different scientific disciplines and theorists and experimentalists have addressed these issues.
Area: Humanities, Social and Behavioral Sciences.

AS.050.616. Morpho - Phonology.
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.617. Semantics I.
This course is an introduction to the study of meaning in natural language. We address both the conceptual and empirical issues that a semantic theory must grapple with, as well as some of the formal machinery that has been developed to deal with such problems. After discussing foundational questions, we turn to formal semantics and pragmatics, as well as their interfaces with syntax and the lexicon. Specific topics covered include conversational implicature; presupposition, type-driven composition, quantification and scope, lexical aspect, argument structure, and the nature of lexical representations of meaning.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

Vision is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd. While we take the visual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The goal of this course is to introduce students to the field of visual cognition, including existing theoretical frameworks and recent research findings. We will explore questions such as: How do we see the visual world? Do we see and remember correctly what’s in the physical world? How many items can we keep track of and remember at a time? How is the visual system structured and what are the neural mechanisms underlying visual perception? Meets with AS.050.319.
Recommended Course Background: AS.200.101, AS.050.101, or AS.080.203/AS.050.203
Instructor(s): S. Park.

AS.050.620. Syntax I.
Also offered as AS.050.320.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.621. Syntax II.
Co-taught with AS.050.321. See description.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.622. Semantics II.
Co-taught with AS.050.322. See description.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.625. Phonology I.
An introduction to the basic principles underlying the mental representation and manipulation of language sounds and their relation to human perception and vocal articulation: how units of sound are both decomposable into elementary features and combined to form larger structures like syllables and words. The role of rules and constraints in a formal theory of phonological competence and in accounting for the range of variation among the world's languages. (Same as AS.050.325)
Previous experience with one other language-related course is desirable but not obligatory.
Instructor(s): C. Kirov
Area: Natural Sciences, Social and Behavioral Sciences.

This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. (Same as AS.050.326) Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology.
Instructor(s): P. Smolensky
Writing Intensive.

AS.050.627. Phonology II.
Recommended Course Background: AS.050.101, AS.050.339/
AS.050.639, AS.200.132, or instructor’s permission required.
Instructor(s): B. Landau.

Co-taught with AS.050.333. See description.
Instructor(s): A. Omaki
Writing Intensive.

AS.050.635. Introduction to Connectionist Modeling of Cognition.
Connectionism is an approach to studying cognition in which cognitive processes are modeled by the behavior of interconnected networks of simple processing units. Connectionist models have shown the ability to provide a precise match to experimental data with human subjects, and have provided examples of how complex processes such as position-invariant face recognition could conceivably be implemented by networks of simple processing units. This course provides a hands-on introduction to connectionist modeling. In addition to readings, students will construct and run computer simulations of connectionist networks and study their properties, utilizing a public-domain neural network simulation package. We'll study classic network architectures, as well as more recent developments. (Same as AS.050.335) Programming experience is helpful, but not required. Recommended Course Background: 100-level course in Cognitive Science or permission of instructor.
Instructor(s): D. Mathis.

Also offered as AS.050.339. Instructor approval required.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

It is recommended to have taken AS.050.626, but not required. Also offered as AS.050.446.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.

Also offered as AS.050.370.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

Also offered as AS.050.371.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

Introduction to continuous mathematics for cognitive science, with applications to biological and cognitive network models: real and complex numbers, differential and integral multi-variable calculus, linear algebra, dynamical systems, numerical optimization. Meets with AS.050.372
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.

Permission from instructor. Recently, statistical learning has played a leading role in informing the empiricist/nativist and connectionist/symbolic debates. But just what is “statistical learning” and what’s new about it? This course presents theories of statistical learning, such as Bayesian models, causal networks, information-theoretic models (e.g., Minimum Description Length and Maximum Entropy formalisms). These methods have caused revolutions in machine vision and natural language processing. During the course, these methods will be compared with other numerical learning methods such as connectionist networks, and with non-numerical learning theories such as Gold’s classic learnability theory and its probabilistic extension to PAC (probably approximately correct) learning theory. This recent work has fundamental implications for the ancient problem of induction. Same as 050.480
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.800. Directed Readings.
Guided independent readings in special fields of cognitive science. Sec.
01 Staff Sec. 02 Badecker Sec. 03 Burzio Sec. 04 Frank Sec. 05 Landau Sec. 06 Legendre Sec. 09 Smolensky
Instructor(s): Staff.

Participants in this graduate seminar will read and discuss current research articles in cognitive neuropsychology of vision or language, and present their own research.
Instructor(s): M. McCloskey.

Permission required. Current issues and ongoing research on human cognition are discussed.
Instructor(s): B. Rapp.

A specialized research seminar for individuals researching language acquisition, cognitive development and the interface between language and cognition. Students must actively carry out empirical or theoretical research in these areas. Permission required.
Instructor(s): B. Landau.

Instructor(s): K. Rawlins.
Participants in this graduate seminar will read and discuss current research articles in language development and present their own research. Permission required.
Instructor(s): G. Legendre.

Topics in phonological, morphological, syntactic, and/or semantic theory. Discussion of the current literature and specifically of the relevance of linguistic results for the study of the mind. Permission required.
Instructor(s): A. Omaki; G. Legendre.

Permission required A critical analysis of current issues and debates in theoretical syntax. Discussion of on-going research.
Instructor(s): G. Legendre.

AS.050.823. Research Seminar in Phonology.
Permission required.
Instructor(s): C. Wilson.

AS.050.825. Research Seminar in Optimality Theory.
A specialized research seminar on constraint based theories of human language, including Optimality Theory, Harmonic Grammar, and Maximum Entropy models.
Instructor(s): G. Legendre; P. Smolensky.

Readings and research presentations on varying topics in mathematics, computation, and formal linguistics with bearing on cognitive science.
Instructor(s): P. Smolensky.

AS.050.827. Research Seminar in Language Acquisition.
Focus is on current research in acquisition of syntax.
Instructor(s): A. Omaki; G. Legendre.

This seminar will read on-going and recent papers on the cognitive neuroscience research of vision. Permission required.
Instructor(s): S. Park.

Topics range from mathematical analysis of neural networks to computational studies of linguistic structure. Focus is ongoing research and current literature.
Instructor(s): P. Smolensky.

AS.050.832. Research Seminar in Language Processes.
Current Topics in Human Language Processing, with discussion of recent developments in theory and experimental study. Permission required.
Instructor(s): A. Omaki.

Current topics in any area of cognitive science, including language and vision, with discussion of recent developments in theory, experimental study, and computational modeling.
Instructor(s): Staff.

AS.050.849. Teaching Practicum.
Permission required. Essential for Teaching Assistants.
Instructor(s): Staff.

AS.050.850. Department Seminar.
Instructor(s): P. Smolensky.

Cross Listed Courses

Neuroscience
AS.080.203. Cognitive Neuroscience. 3 Credits.
This course surveys theory and research concerning how the human brain carries out mental processes. Co-listed as AS.050.203 in Cognitive Science.
Instructor(s): B. Rapp; S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.320. The Auditory System. 3 Credits.
This course will cover the neuroanatomy and neurophysiology of the human auditory system from the ear to the brain. Behavioral, electrophysiological, and neuroimaging methods for assessing peripheral and central auditory function will be discussed. Acquired and developmental disorders of auditory function will be reviewed using clinical case studies.
Prerequisites: Prereqs: AS.080.305 OR AS.020.312 AND AS.020.306 OR AS.200.141
Instructor(s): D. Boatman
Area: Natural Sciences.

Psychological Brain Sciences
AS.200.206. Foundations of Mind. 4 Credits.
An interdisciplinary investigation into the innateness of concepts: perception, number, language, and morality, physics discussed. Evidence from animals, infants, patients, brains. Students collect data in sections investigating claims from the readings. Cross-listed with Cognitive Science and Philosophy.
Area: Social and Behavioral Sciences.

Music
AS.376.371. Topics in Music Cognition I. 3 Credits.
What underlies our aesthetic response to music? How and why are we able to identify certain sounds as music? To what extent are music and natural language similar? What is it about music that evokes such powerful emotions such as happiness and sadness? What is unique to musical creativity? Examining such questions from cognitive science, neuroscience, psychology, and philosophical perspectives, this course explores relevant research and theory in the emerging domain of music perception and cognition. Students will complete a final research paper on the topic of their choice that integrates the course material.
Instructor(s): M. Lopez-Gonzalez
Area: Natural Sciences, Social and Behavioral Sciences.
AS.376.372. Introduction to Music Cognition II. 3 Credits.
Continuing from Topics in Music Cognition I, this course explores further the similarities and differences between music and language, the effects of musical training on cognitive development, and the expressive power of music, with an introduction to music and its role in film. We will read relevant research and theory on these topics from cognitive science, neuroscience, psychology, musicology, and philosophical perspectives. 

Instructor(s): M. Lopez-Gonzalez
Area: Natural Sciences, Social and Behavioral Sciences.

Computer Science
EN.600.625. Events Semantics in Theory and Practice.
This course explores selected topics in the nature of event representations from the perspective of cognitive science, computer science, linguistics, and philosophy. These fields have developed a rich array of scientific theories about the representations of events, and how humans make inferences about them -- we investigate how (and if) such theories could be applied to current research topics and tasks in computational semantics such as inference from text, automated summarization, veridicality assessment, and so on. In addition to classic articles dealing with formal semantic theories, the course considers available machine-readable corpora, ontologies, and related resources that bear on event structure, such as WordNet, PropBank, FrameNet, etc. The course is aimed to marry theory with practice: students with either a computational or linguistic background are encouraged to participate. 

[Applications]
Instructor(s): B. Van Durme; K. Rawlins.

Morton K. Blaustein Department of Earth and Planetary Sciences

The Department of Earth and Planetary Sciences offers programs of study and research in a wide range of disciplines including the atmosphere, biosphere, oceans, geochemistry, geology and geophysics, and planets. The undergraduate program in Earth and Planetary Sciences is flexible and lets the student, in consultation with a faculty advisor, devise a program that is challenging, individual, and rigorous. The graduate program develops skills in research through independent investigation under the general guidance of one or more members of the faculty, backed up by relevant coursework. The department gives particular emphasis to the integration of experimental investigation, theoretical calculation, and quantitative field observations.

The Department also offers an interdepartmental undergraduate program in Global Environmental Change and Sustainability. This program introduces students to the science of the Earth and its living and nonliving systems as well as how humans interact with Earth and its natural systems and how humans can use a variety of tools, such as policy, communication, individual and societal behavior change, and law to harm or help those systems. Students are exposed to theory, research, and the practical applications of both throughout their course work.

Facilities
The Department of Earth and Planetary Sciences is housed in Olin Hall, a modern building dedicated to the Earth sciences, nestled on a wooded knoll on the western edge of campus. Its facilities include state-of-the-art instrumentation, a departmental library, and modern computer equipment. There are laboratories for crystallography, evolutionary biology/ecology, stable isotope geochemistry, materials science, and fluid and solid mechanics. Olin Hall also contains equipment for modern petrographic work (including a computer-controlled image analysis system), darkroom facilities, and a laboratory for sectioning rocks. There is also a substantial collection of rocks, minerals, and fossils. Facilities are available for a wide spectrum of fluid mechanical experiments, including thermal convection and solidification.

A JEOL 8600 electron microprobe in Olin Hall is available to all members of the department. Crystallographic facilities include a modern specimen preparation laboratory for transmission electron microscopy and single-crystal X-ray diffraction studies. The transmission electron microscopy laboratory houses state-of-the-art instruments capable of both high-resolution imaging at the atomic scale and microanalysis at the nanometer scale.

The department contains several computer laboratories containing clusters of workstations and personal computers, together with printers and scanners. These computers are used for numerical simulations, graphics applications, data manipulation, and word processing.

Field studies and excursions form an integral part of the program of instruction and research in geology and are closely integrated with the laboratory and course work. Situated at the fall line between the Coastal Plain and the Piedmont and only an hour’s ride from the Blue Ridge and Appalachians, Baltimore is an excellent location for a department with a field-oriented program in geology. The department has a permanent field station for geological research, Camp Singewald, in the Bear Pond Mountains of Washington County, Maryland, and a vehicle for field use.

Supporting facilities on campus include the Milton S. Eisenhower Library, the Space Telescope Science Institute, and the Homewood High-Performance Computing Center. In addition, the JHU Applied Physics Laboratory, the facilities of the Smithsonian Institution and the Geophysical Laboratory and the Department of Terrestrial Magnetism of the Carnegie Institution of Washington are available by special arrangement for students qualified to use them. For students whose research requires substantial computation, special arrangements can be made to use the supercomputers at the NASA Goddard Space Flight Center and the National Center for Atmospheric Research.

The Department of Earth and Planetary Sciences offers programs of study for majors, joint majors, and minors in Earth and Planetary sciences (EPS) and in Global Environmental Change and Sustainability (GECS). The EPS major focuses on the study of the physical, chemical, and biological processes that shape the Earth and the other planets. It is designed primarily for scientists who wish to have careers researching the science of the Earth and planets, although it is also suitable for students planning careers in the health professions. The GECS major is an interdepartmental program introducing students to the science of the Earth and its living and nonliving systems, as well as how humans interact with Earth and its natural systems, and how humans can use a variety of tools, such as policy, communication, individual and societal behavior change, and law to harm or help those systems.

Earth and Planetary Sciences (EPS) Major
The EPS major is for undergraduates interested in the study of the physical, chemical, and biological processes that shape the Earth and the other planets, drawing on the disciplines of geology, geochemistry, hydrology, ecology, geobiology, oceanography, and atmospheric science. The student can design a specific plan of appropriate courses in consultation with the coordinator for undergraduate programs in the department. Depending on the student’s background, it may be appropriate initially to take a freshman seminar or 100-level course
designed for the non-major. Those who wish to be majors may proceed directly to courses at the 200- and, in many cases, the 300-level. Our courses provide a broad educational base in the Earth and planetary, and the environmental earth sciences, and enable exploration of a set of electives at the 300-level, depending on the area of interest.

Undergraduates majoring in the department must satisfy the general university requirements for the B.A. degree (see General Requirements for Departmental Majors (p. 33)). The department required a total of 9 credits at the 100- or 200-levels and a total of 12 credits at the 300-level within the department. Courses should be selected to reflect an Earth and Planetary Sciences emphasis and should include the following:

- AS.270.108 Oceans + Atmospheres 3 credits
- AS.270.220 The Dynamic Earth: An Introduction to Geology 3 credits
- AS.270.221 Lab Dynamic Earth 2 credits

In addition the following courses outside the Department of Earth and Planetary Sciences are required:

- AS.030.101 Introductory Chemistry I 3 credits
- AS.110.106 Calculus I 8 credits
- AS.110.107 Calculus II (For Biological and Social Science) 3 credits
- or AS.110.108 Calculus I 2 credits
- AS.110.109 Calculus II (For Physical Sciences and Engineering) 3 credits
- AS.171.101 General Physics/Physical Science Major I 8 credits
- AS.171.102 General Physics: Physical Science Majors II 8 credits
- or AS.171.103 General Physics I for Biological Science Majors 3 credits
- & AS.171.104 General Physics/Biology Majors II 3 credits

Recommended courses to satisfy university distribution requirements include:

- EN.500.200 Computing for Engineers and Scientists 3 credits
- EN.550.291 Lin Alg & Diff Equations (or an equivalent course) 4 credits
- EN.570.108 Introduction Environmental Engineering 3 credits
- EN.570.109 Environment & Society: Towards Sustainability 3 credits
- EN.570.239 Emerging Environmental Issues 3 credits
- EN.600.107 Introductory Programming in Java 3 credits
- EN.600.109 2 credits

Honors in EPS Major

To receive honors in Earth and Planetary Sciences, you must have met the following criteria:

- Have taken a challenging set of courses during the four years of study.
- Have a GPA in your major requirements of a 3.5 or higher.
- Complete a senior thesis at a level judged to be sufficiently high by the faculty of the Department of Earth and Planetary Sciences.
- Present the results of the thesis orally in the Department of Earth and Planetary Sciences.

To notify us that you are eligible for honors you must:

1. Obtain an honors checklist by either downloading it from www.advising.jhu.edu or by picking one up in the Office of Academic Advising.
2. Complete the checklist after February 1 of your senior year and take it to Dr. Naomi E. Levin.
3. Return the signed checklist to the Office of Academic Advising by April 1. You do not need to make an appointment to return the checklist, but it must be signed by the correct representative from your department or it will not be processed.

Minor in EPS

The Earth and Planetary Sciences minor is for science undergraduates interested in applying their major discipline to Earth’s environment through geology, geochemistry, ecology, geobiology, oceanography, and atmospheric science. Students are expected to have at least 16 credits in Natural Sciences, Quantitative Studies, or Engineering courses. Students will take 12 credits in the department, at least six of which are at the 300-level.

Global Environmental Change and Sustainability (GECS) Major

The major in GECS is an interdepartmental program designed to provide students with a solid knowledge base of the science of the Earth and its living and nonliving systems, as well as how humans interact with Earth and its natural systems, including social science tools of change, such as policy, communication, individual and societal behavior change, and law. Students will be exposed to theory, research, and the practical applications of both throughout their course work. Requirements for the major will include a total of 23 courses (78 credits) if the Science Concentration is chosen and 24 courses (75 credits) for the Social Science Concentration. Because the GECS major is inherently interdisciplinary, students in the GECS major are exempt from the University’s distribution requirements.

All GECS majors must complete 12 “core” courses listed in Table 1 below. Additionally, students will choose either the “Science Concentration” or the “Social Science Concentration” to determine their additional course requirements. For the Science Concentration, majors complete the additional science core courses listed in Table 2 below, 2 additional upper-level courses from Table 3 (Major Electives in Earth and Environmental Science), and 4 courses from Table 4 (Major Electives in Social Sciences), 2 of which must be upper-level. For the Social Science Concentration, majors complete an additional 2 courses from Table 3 (Major Electives in Earth and Environmental Science), at least 1 of which must be upper-level, and 10 courses from Table 4 (Major Electives in Social Sciences), at least 6 of which must be upper level.

All GECS majors must also complete a capstone experience in conjunction with the program director and relevant faculty. The capstone could consist of a research or internship-type project and will be a demonstration of integration and synthesis of knowledge and skills obtained during the 4-year program. Majors are encouraged to begin planning their capstone project during their junior year and must submit a proposal by the end of spring semester of their junior year. Subsequent milestones will be designated throughout the senior year to ensure that all majors are making satisfactory progress on their projects. All majors will make an oral presentation about their project to interested faculty and advisors during spring semester of their senior year and create a poster presentation prior to graduation.

Honors in GECS Major

To receive honors in GECS, you must have met the following criteria:

- Have a GPA of a 3.5 or higher in GECS courses.
- Receive an A on your capstone project.

To notify us that you are eligible for honors you must:
1. Obtain an honors checklist by either downloading it from www.advising.jhu.edu or by picking one up in the Office of Academic Advising.

2. Complete the checklist between February 1 and March 1 of your senior year and take it to Dr. Cindy Parker.

3. Return the signed checklist to the Office of Academic Advising by April 1. You do not need to make an appointment to return the checklist, but it must be signed by the correct representative from your department or it will not be processed.

**Minor in GECS**

The GECS minor consists of seven courses. All minors are required to take two core courses: Intro to Global Environmental Change provides the necessary content about the science of the Earth and its environments and Intro to Sustainability covers a thorough overview of the interactions between humans and the Earth’s systems and how those interactions could become sustainable. Students then have a choice of one of four other science courses that further explore a subset of interactions of humans with Earth’s living and nonliving systems, depending on the student’s area of interest. Students must choose two more courses from the list of Earth and Environmental Science Electives (Table 3) and two more courses from the list of Social Science Electives (Table 4). At least one course from each elective list must be upper level. A total of five Earth and Environmental Science courses provide the science basis of the minor, which is then rounded out with two relevant Social Science courses. Because students will be acquiring the methodological tools of their major discipline, this curriculum removes the science methodology required in the GECS major, while keeping the most important core content.

Check the GECS major/minor web pages for latest information.

**The lists of acceptable Earth and Environmental Science and Social Science Electives will be reviewed and updated annually by the Director, with guidance from the Advisory Committee. Courses no longer taught will be removed, although credit earned for courses that are removed will still count toward GECS major requirements as long as the course was on the list when it was taken, and new courses will be added. Relevant courses not included in the elective list may be able to be substituted for an elective with approval of the Director. Students wishing to make such a substitution should follow the procedure outlined on the major’s website.**

B.A./M.S. Option for Johns Hopkins GECS Majors

Undergraduates majoring in Global Environmental Change and Sustainability (GECS) may apply for accelerated status toward an M.S. in Environmental Science and Policy (ESP). These students should declare their intention to pursue the M.S. during their senior year or early in their senior year of undergraduate study by contacting either the undergraduate GECS Director, Cindy Parker (ciparker@jhsph.edu) or the Associate Director of the ESP Program, David Elbert (elbert@jhu.edu).

GECS students may apply up to three courses taken as undergraduates toward the M.S. in Environmental Science and Policy thereby leaving only seven more courses to complete the M.S. following receipt of their B.A.

Application

GECS students may apply for the B.A./M.S. anytime during the senior year or up to one year following the conferment of their B.A. The application procedure is the same as that of other AAP applicants and details are found online at: http://advanced.jhu.edu/admissions/index.html. Students admitted to the B.A./M.S. program will be assigned a graduate advisor, but will continue to be advised by their GECS advisor for all matters concerning the B.A. degree.

Course Requirements For B.A./M.S.

GECS students will receive two separate degrees and so the requirements of both degrees must be fulfilled. Students may not earn the M.S. degree without completion of the B.A., however, students who do not complete the M.S. retain their B.A. GECS B.A./M.S. students...
must complete all the requirements of the M.S. in ESP and may opt for either the general ESP degree or a concentration. Up to three courses completed while an undergraduate can count toward the ten courses required for the M.S. Specifically, up to two of the following courses can be used to satisfy the corresponding core course requirements for the M.S. in Environmental Science and Policy.

- AS.270.224 Oceans & Atmospheres 3
- AS.270.308 Population/Community Ecology 3
- AS.270.403 3

(Note that the Environmental Policymaking and Policy Analysis course will be a combined GECS undergraduate and ESP masters class.)

If a student wishes to apply a third course to both their GECS B.A. and their ESP M.S., the course must be approved by the graduate advisor and must be at the 300- to 600- level with content germane to environmental science and policy.

Requirements for Admission

Applicants must submit transcripts, Graduate Record Examination scores (aptitude exam only), and supporting letters to show their ability to do advanced study. The applicant should have his/her GRE scores, verbal and quantitative aptitude, sent to the department before the January 15 deadline for filing applications for admission.

The department expects applicants for advanced degrees to have completed undergraduate training in the basic sciences and mathematics. Normally this includes mathematics through at least integral calculus and a year’s course each in physics, chemistry, and biology. Further undergraduate study in one or more of these subjects or in mathematics is highly desirable for all programs in the Earth sciences; additional mathematics is essential for geophysics, atmospheric sciences, and dynamical oceanography. Extensive undergraduate work in Earth sciences is not a requirement for admission. If students lack formal training in this area or have deficiencies in the other related sciences, they may be admitted but will have to allow additional time in the graduate program to make up for deficiencies in their preparation.

Requirements for Advanced Degrees

Candidates for the Ph.D. must take courses and meet requirements specified by their advisory committee; must pass a comprehensive examination before a departmental committee and an oral examination administered by the Graduate Board of the university; and must submit an acceptable dissertation involving significant original research. A minimum of two consecutive terms registered as a full-time student is required.

The department rarely accepts candidates for the M.A. degree alone, but Ph.D. students can, with the consent of their advisors, complete a program that will qualify them for the M.A. degree at the end of the second year. Candidates for this degree must pass a comprehensive examination before a departmental committee, and must satisfy the residency requirement specified above for the Ph.D. degree. A student’s advisor may require an essay demonstrating research capability.

For further information about graduate study in the Earth and planetary sciences contact the Chair, Department of Earth and Planetary Sciences.

Fields of Graduate Study and Research

The department offers numerous graduate fields: sedimentology, geochemistry and petrology, mineralogy and crystallography, paleobiology, solid Earth geophysics, oceanography, atmospheric sciences, and planetary astrophysics. Descriptions of these fields and their various programs are given below.

Petrology

Modern research in petrology requires a flexible approach combining thermodynamics, solution chemistry, experimental petrology, and careful field observation. The department offers a broad range of courses that provide a thorough background in these areas and a detailed review of research to date. In addition to the facilities available on campus, those at the Geophysical Laboratory and the Department of Terrestrial Magnetism of the Carnegie Institution of Washington, the Smithsonian Institution, the University of Maryland, and the U.S. Geological Survey in Reston are available to students and faculty through a cooperative arrangement.

The program in mineral igneous-petrology is concerned with the chemistry and physics of the origin and evolution of magma. All aspects of the generation, extraction, ascension, cooling, kinetics of crystallization, convection, differentiation, eruption, and flow are considered in detail. The results of high temperature melting experiments as well as detailed chemical analysis are applied to these problems. A nontraditional approach to petrological problems is emphasized through an analytical treatment of volcanic field work. Students are encouraged to take thermodynamics, fluid mechanics, and heat transfer, in addition to AS.270.690 Igneous Petrology, AS.270.395 Planetary Physics & Chem, AS.270.652 Physics Of Magma, and AS.270.604 Sem:Geophysical Petrology.

The program in metamorphic petrology emphasizes studies of petrogenesis involving field work, chemical, and stable isotope analysis of rocks and minerals, fluid inclusion studies, interpretation of textures and structures, laboratory phase equilibrium studies, and computer modeling of metamorphic processes. Analytical data from mineral assemblages are rigorously interpreted within the framework of chemical thermodynamics and transport theory. All chemical aspects of metamorphism are of concern, including mineral-fluid reactions and reaction mechanisms; the role of heat-rock vs. fluid-rock interaction in driving metamorphism; the scale and mechanism of fluid-rock interaction; major and minor element mobility; pressure-temperature paths followed by rocks during metamorphism; and the interplay between metamorphism and deformation.

Mineralogy and Crystallography

An understanding of crystal structure and the subsolidus behavior of minerals is fundamental to the interpretation of many geological phenomena. The program in mineralogy and crystallography stresses the application of crystallographic theory and experimental approaches to petrologically, environmentally, and geophysically relevant mineral systems.

Research in crystal chemistry utilizes X-ray techniques but more strongly emphasizes the application of high-resolution transmission electron microscopy, electron diffraction, and analytical transmission electron microscopy. The electron microscopy laboratory in the Department of Earth and Planetary Sciences is used to investigate the defects and mechanisms of solid-state reactions in minerals, mechanisms of crystal growth, the structures of fine-grained and disordered geological materials,
the chemical and structural variations in synthetic run products and the structures of grain boundaries in rocks.

**Geochemistry**

The program in molecular surface geochemistry emphasizes fundamental research in how the Earth’s environment changes because of interactions between natural waters, minerals and rocks, and living organisms. It emphasizes understanding of the chemical reactions at water-electrolyte-mineral-biomolecule interfaces. Students are encouraged to undertake quantitative studies integrating field, laboratory, and theoretical methods that permit a predictive approach to a wide variety of geochemical and biogeochemical processes including weathering and soil formation, life in the oceans, the migration of toxic species in the environment, the binding of medical implants in the human body, and the role of mineral surface reactions in the origin of life. Collaborative research possibilities are available through joint projects with the geobiology program in the department, and at the Geophysical Laboratory of the Carnegie Institution of Washington.

The program in stable isotope geochemistry focuses on development and application of geochemical tools that allow for reconstruction and understanding of phenomena such as climate, ecology, biogeochemical cycling, tectonics, sedimentation, and metamorphism. Group members work on questions ranging from paleoenvironments of human evolution, history of the Tibetan Plateau and East Asian monsoons, global expansion of savanna grasslands, niche partitioning among fossil mammals, and temperatures of dolomite formation. Students may pursue their own research interests, and are encouraged to become proficient in all aspects of the science, including instrumentation and laboratory methods, fieldwork, theory, and modeling.

**Sedimentology Systems**

The teaching and research program in sedimentary systems is dedicated to understanding interactions between sediments, organisms, climate and tectonics in the Earth’s past. This program combines sedimentology, paleontology, geochronology, and geochemistry to study Earth history from sedimentary archives. Field and laboratory observations are equally essential to this kind of research, and students are expected to become proficient in both. Through course work and research students should develop literacy in a combination of disciplines, which may include but are not limited to stratigraphy, geochemistry, paleontology, ecology, geomorphology, geochronology, soil science, and meteorology. Interdisciplinary interactions are encouraged within the Earth and Planetary Science department and with members of other departments at Hopkins, such as the Department of Geography and Environmental Engineering in the School of Engineering and the Center for Functional Anatomy and Evolution in the Medical School.

**Geobiology and Paleoclimatology**

Research emphases within this discipline include soil ecology, soil formation, hydrobiology, plant-soil-animal interactions, biogeochemical cycling, paleoecology, and paleoclimatology. Methods of stable isotope geochemistry are used to investigate changes in the cycling of C, H, N, and O through Earth history. Students are invited to participate in ongoing collaborations with the Baltimore Ecosystem Study (Long-Term Ecological Research Site), Smithsonian Environmental Research Center, or to design an original research project under the advisement of our faculty. Instrumentation in the Department of Earth and Planetary Sciences includes stable isotope mass spectrometry, scanning electron microscopy, microprobe and transmission electron microscopy; fieldwork is ongoing at several international sites.

All Ph.D. students are expected to have a background of physics, chemistry, calculus, general biology, and sedimentary geology. Deficiencies can be made up in the first semesters at Hopkins. Students take a core program of statistics, Earth history, stable isotope geochemistry, and ecology. In conjunction with the Department of Geography and Environmental Engineering, Earth and Planetary Sciences offers course work opportunities in Aquatic Chemistry, Plant and Animal Ecology, Geobiology, Analytical Environmental Chemistry, and Sedimentary Geochemistry.

**Oceans, Atmospheres, and Climate Dynamics**

The oceans, atmospheres, and climate dynamics program focuses on the study of physical processes in the oceans and atmosphere, the interaction between the ocean, atmosphere and land surface, and their role in climate. The philosophy underlying the department’s program is a rigorous and thorough background in the physics of fluids and radiation, and their applications to climate and environmental problems, applied mathematics, laboratory experiments, and observations. Problems in radiative transfer and the dynamics of atmospheres and oceans are attacked by theory, laboratory or numerical experiments, and field observations. Johns Hopkins is a member of the University Corporation for Atmospheric Research.

The best preparation for graduate study in this program is an undergraduate degree in physics, applied mathematics, mechanical engineering, or another parent science such as chemistry or geology/geophysics. Prior course work in fluid dynamics, while highly desirable, is not mandatory to pursue graduate study in this area. It is essential to have a broad background in the parent sciences, specialization in one of them, and at least three years of undergraduate mathematics.

Research in physical oceanography focuses on the processes that maintain the global ocean circulation and the oceans’ role in climate and global biogeochemical cycling. In particular, attention is on the role of waves, eddies, and small-scale mixing in controlling the oceans’ part in Earth’s heat balance. We also study advection, stirring, and mixing processes in the interior ocean and their roles in dispersing atmospheric trace gases and nutrients.

Research in atmospheric dynamics focuses on large-scale dynamics, the transport of trace constituents, and understanding the composition of the global atmosphere (e.g., distributions of stratospheric ozone and tropospheric water vapor). Current interests include stratospheric vortex dynamics, troposphere-stratosphere couplings, transport and mixing processes, and global modeling of chemical constituents.

Research on climate and radiation includes study of the global climate system and its response to radiative forcing due to changes in greenhouse gases and solar luminosity, the feedback effects of water vapor and clouds, and the radiative and hydrological effects of aerosols. These studies involve global and regional scale modeling, and the analysis and interpretation of satellite observations.

Research on climate also includes studies on the interplay between atmospheric variability and surface processes, including hydrological states and fluxes, human modification of the landscape, and ecosystem activities. This research employs satellite image analysis, numerical modeling, and field observation to build a process-based understanding of the ways in which climate shapes landscape and vice versa. Particular
emphasis is devoted to the impact of climate variability on fresh water resources.

A new program of research, combining physical oceanography and atmospheric science, focuses on the role of ocean-atmosphere interactions in the climate of the North Atlantic region. The task is to isolate and understand the predictable mechanisms that govern mid-latitude climate oscillations lasting several years.

A new program of research in global biogeochemical cycling, focuses on applying and developing large-scale computational models that can be combined with observations remotely sensed data to characterize cycling of key elements (including carbon, nitrogen, and oxygen) in the earth system. Opportunities exist to link this work to the observational geochmistry work done in the department as well as to stimulate key periods and transitions in Earth History.

Solid Earth Geophysics
Solid Earth geophysics is the study of our planet’s interior. Our overarching goals are to understand the formation, structure, composition, and dynamics of the Earth as a whole, and their relationship to geological and surface environmental processes today, in the past, and in the future.

Modern geophysics requires an integrated approach that combines geology, solid and fluid mechanics, seismology, gravity, magnetism, and planetology. Students following the geophysics program are therefore encouraged to take advanced mathematics (including numerical modeling), classical physics, solid and fluid mechanics, as well as a broad range of EPS course work that includes geology, geochemistry, geophysics, and planetary science.

Some examples of broad-based geophysics research topics in EPS include study of Earth’s magnetic field, the surface expression of Earth’s “geodynamo,” which is powered by fluid flow in the Earth’s metallic core. Similarly, earthquakes arise from tectonic forces that are ultimately produced by large-scale motions of the Earth’s rocky interior, which moves at rates of a few cm per year. Much of earth’s surface topography, the presence of Earth’s ocean basins, and several physical and geochemical aspects of Earth’s surface environment, are a direct consequence of plate tectonics, which governs the internal dynamics of our planet. Volcanism and magma dynamics are other examples of fundamental processes that shape the Earth and its environment, a study that integrates geology, solid and fluid mechanics, and geochemistry.

Professors Olson and Marsh specialize in study of Earth’s interior and its influence on the surface environment, and Professor Strobel specializes in the study of the other planets, with emphasis on their atmospheres and magnetospheres.

Planetary Atmospheres/Astrophysics
The program in planetary astrophysics emphasizes the study of planetary atmospheres and magnetospheres. A broad range of fundamental problems in atmospheric chemistry, dynamics, physics, and radiation pertinent to the atmospheres of the giant planets and their satellites is addressed with the goal to understand the global structure of composition, pressure, temperature, and winds. The study of magnetospheric plasma interactions with extended satellite atmospheres is focused on the energy balance, ionospheric structure, and radiative output of their upper atmospheres, and the mass loading rates of the parent planets’ magnetospheres. The atmospheres and magnetospheres of the planets are investigated with the aid of theoretical models and the analysis and interpretation of data acquired by ground-based, Hubble Space Telescope, and satellite observations. Professor Strobel is an interdisciplinary scientist on the Cassini/Huygens Mission. An in-depth study of the Saturnian system is being conducted with the Cassini spacecraft and Huygens Probe. He is also a co-investigator on the New Horizons Pluto Kuiper-belt mission, which was successfully launched on January 19, 2006, and will arrive at Pluto in July 2015, after flying by Jupiter during February 2007 and performing observations of the Jovian system.

This research program is closely coordinated with the astrophysics program in the Department of Physics and Astronomy. Students are encouraged to take courses in astrophysics, chemistry, physics, and applied mathematics to gain the comprehensive background necessary for interdisciplinary research. The best undergraduate preparation is a broad background in physics, applied mathematics, and physical chemistry with a minimum of three years of course work in two of these fields. Advanced undergraduate courses in classical mechanics, fluid mechanics, electricity and magnetism, thermodynamics, and quantum mechanics are strongly recommended. The facilities of the Center for Astrophysical Sciences and the Space Telescope Science Institute are available for thesis research.

Financial Aid
The university makes available to the department a number of Gilman Fellowships, which provide for complete payment of tuition, together with Johns Hopkins’ fellowships and graduate assistantships that carry a nine-month stipend. Graduate assistantships cannot require more than 10 hours a week of service to the department, and all recipients of financial aid carry a full program of study. In addition, a number of special and endowed fellowships pay as much or more. In many areas of study, summer support is also available.

Applications for admission to graduate study and financial aid (including all supporting documents and GRE scores) should be submitted to the department before January 15.

For current faculty and contact information go to http://eps.jhu.edu/ directory/

Faculty
Chair
Thomas W. N. Haine
physical oceanography.

Professors
John M. Ferry
metamorphic geology.

Bruce D. Marsh
igneous petrology and geophysics.

Peter L. Olson
geophysical fluid dynamics.

Darrell F. Strobel
planetary atmospheres and astrophysics.

Dimitri Sverjensky
molecular surface geochemistry and environmental geochemistry.

David R. Veblen
crystallography.
Darryn W. Waugh
Morton K. Blaustein Professor: atmospheric dynamics.

**Associate Professor**
Anand Gnanadesikan
biogeochemical oceanography.

**Assistant Professors**
Naomi Levin
sedimentary geology, stable isotope ecology.
Benjamin H. Passey
geochemistry, paleoecology, paleoclimate.
Benjamin Zaitchik
climate dynamics, surface hydrology.

**Professors Emeriti**
George W. Fisher
global earth systems and religious ethics.
Lawrence A. Hardie
geology, geochemistry and sedimentation.

**Research/Teaching Faculty**
Albert Arking
Principal Research Scientist: atmospheric sciences.
Linda Hinnov
Associate Research Professor: quantitative stratigraphy and paleoclimatology.
Sakiko Olsen
Senior Lecturer: metamorphic petrology.
Richard Stolarski
Research Professor: atmospheric chemistry.
Katalin Szlavecz
Associate Research Professor: soil ecology.

**Joint Appointments**
Olivier Barnouin
Assistant Research Professor: Applied Physics Laboratory.
Carlos E. Del Castillo
Assistant Research Professor: Applied Physics Laboratory.
Robert A. Dalrymple
Professor, Civil Engineering.
Jocelyne DiRuggiero
Associate Research Professor, Biology.
Seth Guikema
Assistant Professor, Geography and Environmental Engineering.
Michael Harrower
Assistant Professor, Near Eastern Studies.
Kevin J. Hemker
Professor, Mechanical Engineering.
Takeru Igusa
Professor, Civil Engineering.
Cindy L. Parker
Assistant Professor: Environmental Health Sciences.
James Roberts
Assistant Research Professor: Applied Physics Laboratory.
Kenneth Rose
Professor, Functional Anatomy and Evolution.
David Weishampel
Professor, Functional Anatomy and Evolution.
Peter Wilcock
Professor, Geography and Environmental Engineering.

**Courses**

**AS.270.102. Conversations with the Earth. 2 Credits.**
A discussion of current topics on Earth's origin, evolution, and habitability. Topics will include extinction of life from meteorite impact, global warming, ozone depletion, volcanism, ice ages, and catastrophic floods, among others. Freshmen only. Sec. 01: 2 credits (normal participation) Sec. 02: 3 credits (requires term paper)
Instructor(s): B. Marsh
Area: Natural Sciences.

**AS.270.103. Introduction to Global Environmental Change. 3 Credits.**
A broad survey of the Earth as a planet, with emphasis on the processes that control global changes. Topics include: the structure, formation, and evolution of the Earth, the atmosphere, oceans, continents, and biosphere. Special attention is given to present-day issues, such as global climate change, natural hazards, air pollution, resource depletion, human population growth, habitat destruction, and loss of biodiversity. Open to all undergraduates.
Instructor(s): B. Passey; D. Waugh
Area: Natural Sciences.

**AS.270.104. History of the Earth and its Biota. 3 Credits.**
Instructor(s): L. Hinnov
Area: Natural Sciences.

**AS.270.107. Introduction to Sustainability. 3 Credits.**
Will introduce interactions between global environment and humans, discuss meaning of sustainability, and introduce use of tools to attain sustainability such as policy, law, communication, marketing, research, advocacy, international treaties.
Instructor(s): C. Parker
Area: Natural Sciences.

**AS.270.108. Oceans + Atmospheres. 3 Credits.**
This course is a broad survey of the Earth’s atmosphere and oceans, and their role in the environment and climate. Topics include: weather systems, atmosphere and ocean circulation, hurricanes and tornadoes, and global warming.
Instructor(s): A. Gnanadesikan; T. Haine
Area: Natural Sciences.
AS.270.110. Freshman Seminar: Sustainable + Non-Sustainable Resources. 1 Credit.
An introduction to the important resources involved in the origin and production of oil, natural gas, coal, cement, metals and geothermal fluids. Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.113. Freshman Seminar: Environmental Poisons. 1 Credit.
An exploration of the occurrence and potential effects of poisons in the environment, from naturally occurring ones such as arsenic to those that may be introduced by mankind such as nuclear waste. Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.114. Guided Tour: The Planets. 3 Credits.
An introduction to planetary science and planetary exploration primarily for non-science majors. A survey of concepts from astronomy, chemistry, geology, and physics applied to the study of the solar system. Instructor(s): B. Marsh; D. Strobel
Area: Natural Sciences.

AS.270.115. Environmental Photojournalism and Filmmaking in the Era of New Media. 3 Credits.
Students will review critical literature focusing on new media, visual representation theory, the relationship between images and social change, the history and typology of environmental photography and film, and an overview of modern environmental history, sustainability issues and environmental problems. Over the course of the semester, students will blend these conceptual frameworks with new media production. Based in Baltimore, students will identify an environmental narrative, document their particular story through photography or film, develop a new media platform through which to communicate that narrative effectively, and write a final paper analyzing their images, narrative and communication strategies using the theoretical frameworks covered throughout the course. The course is designed with an emphasis on independent research and practice, interdisciplinary analysis and application. One hour class time, plus two hours per week of independent field work and media production (times TBD by student groups) Instructor(s): A. Monopolis
Area: Natural Sciences.

AS.270.123. Intro To Oceanography. 3 Credits.
Area: Natural Sciences.

AS.270.201. Dinosaurs. 3 Credits.
This course covers all of the major groups of dinosaurs, from Triceratops to T. Rex and their relatives living, today birds. It will also cover the origins of the group, their near demise 65 million years ago, their behavior, growth and development, and a history of their study. Instructor(s): D. Weishampel
Area: Natural Sciences.

AS.270.205. Introduction to Geographic Information Systems and Geospatial Analysis. 3 Credits.
The course provides a broad introduction to the principles and practice of Geographic Information Systems (GIS) and related tools of Geospatial Analysis. Topics will include history of GIS, GIS data structures, data acquisition and merging, database management, spatial analysis, and GIS applications. In addition, students will get hands-on experience working with GIS software. Instructor(s): X. Chen
Area: Engineering, Natural Sciences.

AS.270.210. Environmental Field Methods. 3 Credits.
This course is designed to introduce students to field based environmental research with a focus on the ecology and geochemistry of the surface and sub-surface environment. Field activities will center around soils and the carbon cycle in the riparian ecosystem adjacent to the Homewood campus and on the urban ecology of the greater Baltimore region. Students will build skills in data collection, analysis and synthesis. Outdoor fieldwork is an essential part of the course. Prerequisites: AS.270.103 OR AS.270.220. Instructor(s): K. Szlavecz; N. Levin
Area: Natural Sciences.

AS.270.220. The Dynamic Earth: An Introduction to Geology. 3 Credits.
Basic concepts in geology, including plate tectonics; Earth's internal structure; geologic time; minerals; formation of igneous, sedimentary, and metamorphic rocks; development of faults, folds and earthquakes; geomagnetism. Corequisite (for EPS Majors): AS.270.221; optional for others. Prerequisites: AS.030.101 OR ( AS.171.101 AND AS.171.102 ) or equivalent
Instructor(s): D. Veblen; J. Ferry
Area: Natural Sciences.

AS.270.221. Lab Dynamic Earth. 2 Credits.
This course is a hands-on learning experience for introductory geological concepts and techniques using geological tools, such as mineral/rock samples, microscopes, and maps. Field trips is its essential part. Corequisite: AS.270.220
Instructor(s): S. Olsen
Area: Natural Sciences.

AS.270.222. Earth Materials. 4 Credits.
An introduction to the properties, occurrence, and origin of the basic constituents of the Earth, including minerals and rocks. Introductory training in the recognition of minerals and rocks in the laboratory and the field. Instructor(s): D. Veblen; J. Ferry
Area: Natural Sciences.

AS.270.224. Oceans & Atmospheres. 3 Credits.
A broad survey of the Earth's oceans and atmospheres, and their role in the environment and climate. Topics covered include waves, tides, ocean and atmosphere circulation, weather systems, tornadoes and hurricanes, El Niño, and climate change. For science and engineering majors Instructor(s): A. Gnanadesikan; T. Haine
Area: Natural Sciences.

AS.270.301. Geochemical Thermodynamics. 3 Credits.
Principles of chemical thermodynamics. Concept of and criteria for equilibrium. Properties of real fluids and solids. Applications to geologic processes. Recommended Course Background: AS.270.341 Prerequisites: AS.270.222 or equivalent or permission of instructor
Instructor(s): J. Ferry
Area: Natural Sciences.

AS.270.302. Aqueous Geochemistry. 4 Credits.
Thermodynamic basis for calculation of equilibria involving minerals and aqueous species at both low and high temperatures and pressures. Theoretical calculation of surface geochemical processes including adsorption and dissolution kinetics. Instructor(s): D. Sverjensky
Area: Natural Sciences.
AS.270.305. Energy Resources in the Modern World. 3 Credits.
This in-depth survey will inform students on the non-renewable and renewable energy resources of the world and the future prospects. Topics include petroleum, natural gas, coal, nuclear, hydroelectric, geothermal, solar, wind, biomass, and ocean energy. Global production, distribution, usage, and impacts of these resources will be discussed. 
Instructor(s): L. Hinnov 
Area: Natural Sciences.

AS.270.307. Geoscience Modelling. 4 Credits.
An introduction to modern ways to interpret observations in the context of a conceptual model. Topics include model building, hypothesis testing, and inverse methods. Practical examples from geophysics, engineering, and medical physics will be featured. 
Instructor(s): T. Haine 
Area: Natural Sciences.

AS.270.308. Population/Community Ecology. 3 Credits.
This course explores the distribution and abundance of organisms and their interactions. Topics include dynamics and regulation of populations, population interactions (competition, predation, mutualism, parasitism, herbivory), biodiversity, organization of equilibrium and non-equilibrium communities, energy flow, and nutrient cycles in ecosystems. Field trip included. 
Prerequisites: AS.270.103 or permission of instructor 
Instructor(s): K. Szlavecz 
Area: Natural Sciences.

AS.270.309. Designing Sustainable Wellness. 3 Credits.
Limited to juniors, seniors and graduate students. Otherwise permission of instructor. This project-based course will explore and re-imagine interdisciplinary conceptual frameworks aimed at promoting “sustainable wellness” (the convergence of social and ecological sustainability) within the built environment (the space, structures and systems humans generate for living, working and playing). Beginning with a conceptual overview of sustainability, the science of happiness, and design/planning principles, students will review relevant case studies and complete a final, hands-on, community-based studio project. 
Instructor(s): A. Monopolis; C. Parker 
Area: Social and Behavioral Sciences.

AS.270.310. Global Environmental Changes & Sustainability Seminar. 3 Credits.
By using guest speakers and published literature, students will investigate sustainability topics in greater depth, taking turns presenting relevant papers and leading a focused discussion about the topic. 
Prerequisites: AS.270.103 AND AS.270.107 Or Instructor Permission 
Instructor(s): C. Parker 
Area: Natural Sciences.

AS.270.311. Geobiology. 3 Credits.
A survey of the interactions between geological and biological processes at and near the Earth’s surface, covering topics such as biogeochemistry and nutrient cycles, soil chemistry, biomarkers, archives of paleobiology, and the evolution of life, with an emphasis on terrestrial systems. Recommended Course Background: AS.270.220 
Instructor(s): N. Levin 
Area: Natural Sciences.

AS.270.312. Mammalian Evolution. 3 Credits.
An introduction to the evolutionary history and diversity of mammals, with emphasis on the first half of the Cenozoic - the beginning of the Age of Mammals. The course will focus primarily on the adaptive radiation of mammals (including our own order primates) that followed the extinction of the dinosaurs, exploring the origins and relationships of the major groups of mammals as well as the anatomical and ecological reasons for their success. Lectures will be supplemented with relevant fossils and recent specimens. 
Instructor(s): K. Rose 
Area: Natural Sciences.

AS.270.313. Isotope Geochemistry. 3 Credits.
Instructor(s): B. Passey 
Area: Natural Sciences.

AS.270.314. Planetary Tectonics and Geodynamics. 3 Credits.
Fundamental physical processes relevant to interiors of terrestrial planets and icy satellites. Topics include: stress and strain; elasticity and flexure; rheology; internal structure; thermal evolution; fluid mechanics; tectonics; and faulting. Recommended Course Background: AS.110.108- AS.110.109 or equivalent; AS.171.101 or AS.171.105 or equivalent; AS.110.202 or equivalent. 
Instructor(s): J. Roberts; O. Barnouin 
Area: Natural Sciences.

AS.270.315. Natural Catastrophes. 3 Credits.
A survey of naturally occurring catastrophic phenomena, with emphasis on the underlying physical processes. Topics include hurricanes, tornadoes, lightning, earthquakes, tsunamis, landslides, and volcanic eruptions and climate change. Intended for students in science and engineering. 
Instructor(s): P. Olson 
Area: Natural Sciences.

AS.270.318. Remote Sensing of the Environment. 4 Credits.
This course is an introduction to the use of remote sensing technology to study Earth’s physical and biochemical processes. Topics covered include remote sensing of the atmosphere, land and oceans, as well as remote sensing as a tool for policy makers. Also offered as 270.618 
Instructor(s): B. Zaitchik 
Area: Natural Sciences.

AS.270.320. The Environment and Your Health. 3 Credits.
This course surveys the basic environmental health sciences (toxicology, risk assessment), current public health issues (hazardous waste, radon, water-borne diseases) and emerging global health threats (global warming, ozone depletion, sustainability). 
Instructor(s): M. Trush 
Area: Natural Sciences.

AS.270.322. GECS Fieldwork in Ecuador. 4 Credits.
Course will provide theory and hands-on practice of environmental science and social science fieldwork. 
Prerequisites: AS.270.103 and AS.270.107 AND consent of instructor. GECS majors only. 
Instructor(s): C. Parker 
Area: Natural Sciences.
AS.270.323. Ocean Biogeochemical Cycles. 3 Credits.
This course will examine the cycling of trace chemicals in the ocean, consider what we can learn from the distributions of these chemicals about the ocean circulation, and ocean ecosystems. Topics covered will include oceanic biological productivity, open water cycling of nutrients and oxygen, ocean acidification and sediment cycling.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.325. Introductory Oceanography. 3 Credits.
This class is an introduction to a wide range of physical, chemical, and biological phenomena in the world’s oceans. Underlying basic principles are exposed wherever possible. Topics covered include: seawater, waves, tides, ocean circulation, chemical oceanography, biogeochemical ocean processes, and remote sensing of the oceans. Recommended Course Background: freshman Physics, Chemistry, Calculus through ordinary differential equations.
Instructor(s): A. Gnanadesikan; T. Haine
Area: Natural Sciences.

AS.270.330. Atmospheric Chemistry. 3 Credits.
This course will examine the structure and composition of the atmosphere and the processes that determine how the composition has changed in the past and might change in the future. Emphasis will be on the chemistry of the stratospheric ozone layer. The chemistry of the troposphere and air pollution will also be covered. Prerequisites: AS.110.106 Calculus I and AS.110.109 Calculus II
Instructor(s): R. Stolarski
Area: Natural Sciences.

AS.270.332. Soil Ecology. 3 Credits.
The course introduces basic aspects of cycles and flows in the soil ecosystem, and provides students with an overview of the higher groups of soil organisms. Laboratory and field surveying methods are also covered.
Instructor(s): K. Sziavecz
Area: Natural Sciences.

AS.270.335. Planets, Life and the Universe. 3 Credits.
This multidisciplinary course explores the origins of life, planets’ formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions, and planetary protection.
Prerequisites: Students may not register for this class if they have already received credit for AS.171.333 or AS.020.334.
Instructor(s): C. Norman; J. Diruggiero; N. Levin
Area: Natural Sciences.

AS.270.340. Nature of the Solid Planets. 3 Credits.
The overall origin and evolution of the terrestrial-like planets in the Solar System is discussed and analyzed. As a starting point the detailed structure and dynamics of Earth is presented from the perspectives of seismology, gravity, geomagnetism, and volcanism. Extensions are also made to the origin, structure, and present state of the moons of Jupiter and Saturn and other icy bodies. Recommended Course Background: calculus through differential equations, physics, and chemistry, some grounding in Earth and/or Planetary Sciences.
Instructor(s): B. Marsh
Area: Natural Sciences.

AS.270.350. Sedimentary Geology. 4 Credits.
Introduction to sedimentary processes and sedimentary rocks. Focus is placed on linking physical observations to earth surface processes. Fundamental tools for interpreting the sedimentary rock record, such as depositional models, geochronology, and chemostratigraphy are reviewed. Weekend field trips. Graduate and advanced undergraduate level. Recommended Course Background: AS.270.220 or instructor permission.
Instructor(s): N. Levin
Area: Natural Sciences.

AS.270.360. Climate Change: Science & Policy. 3 Credits.
This course will investigate the policy and scientific debate over global warming. It will review the current state of scientific knowledge about climate change, examine the potential impacts and implications of climate change, explore our options for responding to climate change, and discuss the present political debate over global warming.
Prerequisites: AS.270.103 or permission
Instructor(s): B. Zaitchik
Area: Natural Sciences.

AS.270.369. Geochem Earth/Environmen. 3 Credits.
An introduction to all aspects of Geochemistry: theoretical, experimental, and observational, including the application of geochemistry to issues such as the migration of toxic metals and nuclear waste.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.377. Climates Of The Past. 3 Credits.
Earth’s climate history through study of forcing mechanisms, climate proxies, and paleoclimate modeling. Presentation of climate-sensitive archives will be followed by discussion of geochemical principles, climates through time, recent advances and emerging problems. For upper-level undergraduate and graduate students in the natural sciences. Recommended Courses Background: AS.270.220 or instructor permission.
Instructor(s): L. Hinnov
Area: Natural Sciences.

AS.270.378. Present & Future Climate. 3 Credits.
Intended for majors who are interested in the science that underlies the current debate on global warming, the focus is on recent observations one can glean from model simulations. Meets with AS.270.641. Recommended Course Background: AS.110.108-AS.110.109 and AS.171.101-AS.171.102
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.270.395. Planetary Physics & Chem. 3 Credits.
The fundamental principles governing the dynamic processes within and around the planets are treated in some detail. Core equations are developed and used to analyze nebula condensation, planetary accretion, convection in mantles and atmospheres, radiative and conductive heat transport, seismic waves, hurricanes, volcanism, and meteorite impacts, among others. Emphasis is on fundamentals and problem solving.
Prerequisites: AS.030.101; AS.171.101-102 or 103-104 or 105-106.
Instructor(s): B. Marsh; D. Strobel
Area: Natural Sciences.
AS.270.402. Scientific Survival Skills. 1 Credit.
Transitional from graduate school to a postdoc to a “permanent” job in the natural sciences requires a set of essential skills that are not covered as a formal component of most Ph.D. programs. This seminar will be a weekly discussion of career issues relevant to new scientists. Topics will include elements of good presentations, conferences, scientific writing and peer-review, employment trends, job interviews, and grant proposals. The class will conclude with a mock grant proposal review panel, conducted by the students. This seminar is aimed at graduate and advanced undergraduate students in the natural sciences planning careers in academia or industry.
Instructor(s): J. Roberts
Area: Natural Sciences.

AS.270.405. Modeling the Hydrological Cycle. 3 Credits.
Survey of modeling techniques for hydrological monitoring, analysis and prediction, including applied exercises with commonly used models. Topics include the terrestrial water balance, rivers and floods, groundwater, atmospheric transport, and precipitation processes. Focus is on numerical methods applicable at the large watershed to global scale.
Instructor(s): B. Zaitchik.

AS.270.407. Seminar in Planetary Sciences. 1 Credit.
Instructor(s): B. Marsh; O. Barnouin
Area: Natural Sciences.

AS.270.410. Planetary Surface Processes. 3 Credits.
Instructor(s): J. Roberts; O. Barnouin
Area: Natural Sciences.

AS.270.415. Climate Change Discussions. 2 Credits.
Discussion of current topics in climate change science. Open to Graduate students & Advanced Undergraduates. Instructor Permission.
Instructor(s): B. Zaitchik
Area: Natural Sciences.

AS.270.425. Earth & Planetary Fluids. 3 Credits.
An introductory course on the properties, flow, and transport characteristics of fluids throughout the Earth and planets. Topics covered include: constitutive relationships, fluid rheology, hydrostatics, dimensional analysis, low Reynolds number flow, porous media, waves, stratified and rotating fluids, plus heat, mass, and tracer transport. Illustrative examples and problems are drawn from the atmosphere, ocean, crust, mantle, and core of the Earth and other Planets. Open to graduate and advanced undergraduate students. Recommended Course Background: Basic Physics, Calculus, and familiarity with ordinary differential equations.
Instructor(s): P. Olson
Area: Natural Sciences.

AS.270.495. Senior Thesis.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Earth and Planetary Sciences. Open to Sr. departmental majors only. Required for department honors.
Instructor(s): B. Passey; D. Waugh
Area: Natural Sciences
Writing Intensive.

AS.270.496. Senior Thesis. 4 Credits.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Earth and Planetary Sciences. Open to Sr. departmental majors only. Required for department honors.
Instructor(s): B. Passey; T. Haine
Writing Intensive.

AS.270.501. Independent Study. 3 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses.
Instructor(s): B. Marsh; C. Parker; D. Waugh; K. Szlavecz; Staff.

AS.270.502. Independent Study. 0 - 3 Credit.
Instructor(s): B. Marsh; C. Parker; D. Sverjensky; Staff.

AS.270.503. Independent Research. 3 Credits.
Instructor(s): B. Marsh; B. Zaitchik; G. Ball.

AS.270.504. Independent Research. 0 - 3 Credit.
Research under the direction of members of the Earth & Planetary Sciences Faculty.
Instructor(s): B. Passey; B. Zaitchik; L. Hinnow.

AS.270.505. GECS Senior Capstone Seminar. 3 Credits.
The GECS Senior Capstone Seminar will provide the intellectual time and space to bring together the knowledge and tools acquired during the four years of interdisciplinary work on the GECS curriculum into a coherent framework in preparation for careers, and/or graduate work. In addition to the culmination of the capstone project, final paper, and presentations, students will look at relevant current events through the lenses of science, social science and the humanities, and engage in in-depth readings and discussion of these issues.
Instructor(s): C. Parker.

AS.270.507. Internship. 1 Credit.
Instructor(s): C. Parker.

AS.270.508. Internship. 0 - 3 Credit.
Instructor(s): A. Monopolis; C. Parker; Staff.

AS.270.595. Internship. 1 Credit.
Instructor(s): C. Parker; D. Sverjensky; D. Veblen.

AS.270.599. Independent Study. 3 Credits.
Instructor(s): A. Monopolis; B. Marsh; D. Sverjensky; K. Szlavecz; S. Stanley.

AS.270.601. Fluids Seminar.
Graduate discussion group ranging over all aspects of fluids in Earth and planetary sciences.
Area: Natural Sciences.

AS.270.602. Graduate Independent Study.
Instructor(s): B. Marsh.

AS.270.603. Geochemistry Seminar.
A variety of topics of current interest involving mineral-fluid interactions will be reviewed.
Instructor(s): D. Sverjensky.

AS.270.604. Sem:Geophysical Petrology.
Discussion of present research topics in geophysics and igneous petrology.
Instructor(s): B. Marsh.

AS.270.605. EPS Colloquium.
A weekly seminar series in which graduate students present their latest research results and attend Departmental seminars. This course is required for all graduate students in the Department of Earth and Planetary Sciences.
Instructor(s): T. Wright.
AS.270.606. EPS Colloquium.
A weekly seminar series in which graduate students present their latest research results and attend Departmental seminars. This course is required for all graduate students in the Department of Earth and Planetary Sciences. Instructor(s): T. Wright.

AS.270.607. Topics in African Climate.
Advanced research seminar on atmospheric dynamics, climate processes, and hydrology of the African continent. Instructor(s): B. Zaitchik; N. Levin.

AS.270.608. Sem Atmospheric Sciences.
Discussion of current research topics in atmospheric science. Area: Natural Sciences.

AS.270.610. Climate Modeling and Analysis.
Instructor(s): A. Arking
Area: Natural Sciences.

AS.270.611. Global Atmospheric Dynamics.
This course will examine the fluid dynamics that determine large-scale atmospheric circulation and variability using Ian James’ “Introduction to Circulating Atmospheres.” Topics covered will include the dynamics of Hadley cells, mid-latitude jets, baroclinic instability, monsoon circulations, and low-frequency variability of the circulation. Instructor(s): A. Gnanadesikan.

Transitioning from graduate school to a postdoc to a “permanent” job in the natural sciences requires a set of essential skills that are not covered as a formal component of most Ph.D. programs. This seminar will be a weekly discussion of career issues relevant to new scientists. Topics will include elements of good presentations, conferences, scientific writing and peer-review, employment trends, job interviews, and grant proposals. The course will conclude with a mock grant proposal review panel, conducted by the students. This seminar is aimed at graduate and advanced undergraduate students in the natural sciences planning careers in academia or industry. Instructor(s): J. Roberts.

AS.270.615. Inversion Modeling & Data Assimilation.
This graduate class will introduce modern inverse modeling and data assimilation techniques. These powerful methods are used in atmospheric science, oceanography, and geophysics and are growing more widespread. Topics will include: singular value decomposition, Green’s function inversions, Kalman filtering, and variational data assimilation. The course will include lectures on concepts and theory, and practical experience in the computer laboratory. Permission of Instructor Required.
Instructor(s): T. Haine.

AS.270.616. Geodesy, Gravity, and Tides.
Introduces physical geodesy problems, and the interpretation of geoid and gravity anomalies on Earth and other planets. Covers potential theory, measurement techniques from surface and spacecraft, planetary rotation, and tides. Recommended: AS.110.301 or EN.550.291 (or equivalent) Prerequisites: ( AS.110.202 OR AS.110.211 or equivalent) AND ( AS.171.101 OR AS.171.105 or equivalent)
Instructor(s): J. Roberts
Area: Natural Sciences.

Also offered as 270.318
Instructor(s): B. Zaitchik
Area: Natural Sciences.

AS.270.620. Seminar in Geophysical Turbulence and Transport.
This course introduces students to the concept of geophysical turbulence and its ability to describe certain aspects of ocean and atmosphere dynamics and associated transport processes. It covers the phenomenology of turbulence, Kolmogorov scaling, stratified geostrophic turbulence, coherent structures, as well as the dispersions theory and its application to the study of parameterization of turbulent transport processes. Students are given 3 assignments involving simple calculations based on theoretical exercises as well as processing of real ocean data and ocean model output (drifter data for dispersion, analysis of model fields for identification of vortices by OW and associated fluxes). Interested students should be familiar with the Navier-Stokes equations for fluid flow.
Instructor(s): A. Gnanadesikan; I. Koszalka.

AS.270.621. TEM: Practice and Applications.
A lab and lecture course covering the practical aspects of transmission electron microscopy. Electron diffraction, image formation, and analytical techniques are explained, and students are given an opportunity to gain hands-on microscopy experience. The detailed theory for these experiments is developed in 270.622.
Instructor(s): D. Veblen; K. Hemker.

This course, which follows and complements 270.621, introduces the student to more detailed aspects of kinematical and dynamical theories of electron diffraction. Theory of conventional TEM imaging, phase-contrast imaging (high-resolution electron microscopy), X-ray and energy loss analytical TEM, and computer-based image simulation are included.

AS.270.623. Planetary Atmospheres.
Instructor(s): D. Strobel
Area: Natural Sciences.

Discussion of the physical principles that underlie earth remote sensing. Topics include radiative transfer in Earth’s atmosphere, operating principles of active and passive remote sensing systems, and advanced methods for image analysis. Prerequisites: AS.270.318 OR AS.270.618 or permission of instructors.
Instructor(s): B. Zaitchik; C. Del Castillo.

AS.270.625. Seminar in Biogeochemistry.
In-depth exploration of emerging topics in biogeochemistry, including themes relevant to the evolution of Earth’s biogeochemical cycles, global change, paleoecology, and paleoclimate.
Instructor(s): B. Passey
Area: Natural Sciences.

AS.270.626. Ocean General Circulation.
The aim of this course is to achieve conceptual understanding of the large scale low frequency ocean general circulation. The role of the ocean circulation in earth’s climate is emphasized throughout.
Instructor(s): T. Haine.

Discussion of current research topics in soil ecology and biogeochemistry.
Instructor(s): K. Szelavec; Staff.
Instructor(s): D. Veblen.

AS.270.633. Advanced Topics in Isotopic Geochemistry.
Consent of instructor required. In-depth exploration of selected systems in stable isotope geochemistry, and examination of the physical basis of stable isotope fractionation. Topics vary annually.
Instructor(s): B. Passey; N. Levin
Area: Natural Sciences.

Instructor(s): D. Veblen.

AS.270.641. Present and Future Climate.
Meets with AS.270.378.
Prerequisites: (AS.110.108 AND AS.110.109) AND (AS.171.101 AND AS.171.102)
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.270.642. Surface Geochemistry.
Instructor(s): D. Sverjensky.

AS.270.644. Physics of Climate Variability.
This course is an advanced-level review of the ways in which climate varies on time scales of seasons to decades, including El Nino, the Pacific Decadal Oscillation, the Indian Ocean Dipole Mode, the North Atlantic Oscillation and others. Topics covered will include, depending on class’s interest: 1) Methods for isolating climate modes. (2) Key dynamic and thermodynamic processes involved in causing such fluctuations, including atmospheric and oceanic wave propagation, air-sea interaction and changes in the thermohaline circulation. (3) Impacts of climate modes on biogeochemical cycling, including some that are used by paleoclimatologists to reconstruct past variability. Geophysical understanding and links to fundamental mechanisms are emphasized.
Format will consist of a mix of lectures and paper discussions.
Instructor(s): A. Gnanadesikan; N. Levin
Area: Natural Sciences.

AS.270.645. Earth System Modeling.
Introduces students to using comprehensive Earth System Models. Students will learn about how such models are structured and configure experiments with such a model, based on their interests.
Instructor(s): A. Gnanadesikan.

AS.270.647. Earth’s Interior.
Mechanical processes in Earth’s core and mantle with applications to plate tectonics, the thermal and chemical evolution of the Earth, and generation of Earth’s magnetic field.
Instructor(s): P. Olson; Staff.

AS.270.652. Physics Of Magma.
The principles of viscous fluid flow, heat conduction and convection are treated in reference to all aspects of the mechanics of magma. Emphasis is placed on understanding petrologic processes as observed in rocks and rock sequences.
Instructor(s): B. Marsh
Area: Natural Sciences.

AS.270.653. Earth and Planetary Fluids II.
A sequel to AS.270.425 concentrating on planetary-scale atmospheric and oceanic circulation. Physical understanding of the underlying fluid dynamics will be emphasized.
Instructor(s): N. Paldor.

AS.270.661. Planetary Fluid Dynamics.
Recommended Course Background: AS.270.646 or equivalent.
Instructor(s): D. Strobel
Area: Natural Sciences.

Permission of instructor required
Instructor(s): D. Strobel.

Instructor(s): K. Szlavecz
Area: Natural Sciences.

AS.270.673. Time Series-Data Analysis.
Spectral analysis, digital filtering, convolutions, and other techniques for processing data will be covered.

AS.270.681. Advanced Metamorphic Petrology.
The interpretation of metamorphic processes based on mineral assemblages, mineral chemistry, chemical thermodynamics, transport theory, experimental petrology, and field studies. Geothermometry and geobarometry; mineral reactions and reaction mechanisms; heat transfer and fluid transfer; element and isotope mobility; thermal models for orogenic belts.
Prerequisites: AS.270.301
Instructor(s): J. Ferry
Area: Natural Sciences.

AS.270.690. Igneous Petrology.

AS.270.692. Igneous Petrology Lab.
Corequisites : AS.270.690[C]
Instructor(s): B. Marsh.

AS.270.807. Research.
Instructor(s): T. Haine.

AS.270.808. Research.
Instructor(s): T. Haine.

AS.271.107. Introduction to Sustainability. 3 Credits.
Will introduce interactions between global environment and humans, discuss meaning of sustainability, and introduce use of tools to attain sustainability such as policy, law, communication, marketing, research, advocacy, international treaties.
Instructor(s): C. Parker
Area: Natural Sciences.
AS.271.120. Environmental Photojournalism. 3 Credits.
Environmental cognition, consciousness, and communication are produced, reproduced, interpreted, and remembered with the support of visual representations and, in particular, photography. Images increasingly structure our experience of nature, environmental problems, human-environmental relations, and ecological awareness. Students will review critical literature focusing on visual representation theory, the relationship between images and social change, and the history and typology of environmental photography. A basic understanding of modern environmental history, sustainability issues, and environmental problems is required. Students will identify environmental narratives in Baltimore, document their stories through photojournalism, have their images critiqued in class every two weeks, and develop a final documentary project focusing on one particular environmental narrative. This project, active class participation, and a final paper analyzing the images and communication strategies used will make up the final grade for the course. The class is designed with an emphasis on independent research and practice, interdisciplinary analysis, and application. It is geared towards Global Environmental Change and Sustainability, Film & Media Studies, and Writing Seminars majors, in addition to students interested or experienced in photography, film, journalism, psychology, and public health.
Instructor(s): A. Monopolis.

AS.271.309. Designing Sustainable Wellness: the Convergence of Social and Environmental Sustainability within the Built Environment. 3 Credits.
The “built environment” refers to the space, structures, and systems humans generate for living, working, and playing. This includes everything from homes and office buildings, to neighborhoods and cities, to green spaces and parks. It also includes hard infrastructure, such as energy, transportation, and water systems, and soft infrastructure, such as formal human services (e.g. health, education, recreation). More recently, the term has expanded to include conditions related to public health, such as walkability, bikability, and access to healthy foods. This course will examine the conceptual frameworks that support the creation of built environments, assess their impact on environmental and social well-being, and re-imagine methodologies and designs that may better promote “sustainable wellness,” or socio-ecological sustainability, in the future. Through case studies and a final design-based project, students will learn and apply the fundamental principles behind socio-ecologically sustainable design. The course is designed with an emphasis on interdisciplinary analysis and systems thinking. The course is geared towards Global Environmental Change and Sustainability majors, in addition to students interested in design, architecture, and urban planning.
Instructor(s): A. Monopolis.

AS.271.360. Climate Change: Science & Policy. 3 Credits.
Prereq: 270.103 or permission of instructor. This course will investigate the policy and scientific debate over global warming. It will review the current state of scientific knowledge about climate change, examine the potential impacts and implications of climate change, explore our options for responding to climate change, and discuss the present political debate over global warming.
Instructor(s): D. Waugh
Area: Natural Sciences.

AS.271.401. Environmental Ethics. 3 Credits.
Environmental Ethics is a philosophical discipline that examines the moral relationship between human beings and the natural environment. Beginning with an analysis of their own values, students will explore complex ethical questions, philosophical paradigms and real-life case studies. Through readings, films, seminar discussions and debates, this course will help students strengthen their ability to communicate viewpoints rooted in ethical principles. Afterwards, students will apply these tools to an examination of contemporary environmental issues, ranging from natural resource depletion, pollution, species extinction, environmental justice, climate change, and overpopulation. This course is geared towards Global Environmental Change & Sustainability and Philosophy majors.
Instructor(s): A. Monopolis.

AS.271.403. Environmental Policymaking and Policy Analysis. 3 Credits.
This course provides students with a broad introduction to US environmental policymaking and policy analysis. Included are a historical perspective as well as an analysis of future policymaking strategies. Students examine the political and legal framework, become familiar with precedent-setting statutes such as NEPA, RCRA, and the Clean Air and Clean Water Acts, and study models for environmental policy analysis. Cost benefit studies, the limits of science in policymaking, and the impact of environmental policies on society are important aspects of this course. A comparison of national and international policymaking is designed to provide students with the proper perspective. This course is taught in conjunction with an identical graduate course. All students will be expected to perform at a graduate level.
Instructor(s): C. Bausch; R. Solomon
Area: Social and Behavioral Sciences.

AS.271.501. Independent Study. 3 Credits.
Instructor(s): A. Monopolis.

AS.271.505. GECS Senior Capstone Seminar. 3 Credits.
The GECS Senior Capstone Seminar will provide the intellectual time and space to bring together the knowledge and tools acquired during the four years of interdisciplinary work on the GECS curriculum into a coherent framework in preparation for careers, and/or graduate work. In addition to the culmination of the capstone project, final paper, and presentations, students will look at relevant current events through the lenses of science, social science and the humanities, and engage in in-depth readings and discussion of these issues.
Instructor(s): A. Monopolis; C. Parker.

Cross Listed Courses

History of Science Technology

AS.140.322. The Heavens and Earth in the History of Astronomy. 3 Credits.
How do we study the stars, and what do they tell us about the earth? In this course, we explore views of the heavens across history, from ancient Greece to international astrophysics. Special emphasis will be given to the ‘new stars’ of 1572 and 1604, whose remnants astronomers at Johns Hopkins University continue to study today. Crona-listed with Earth and Planetary Science, Physics and Astronomy
Instructor(s): P. Boner
Area: Humanities, Social and Behavioral Sciences.
Physics Astronomy

**AS.171.321. Introduction to Space, Science, and Technology. 3 Credits.**
Topics include space astronomy, remote observing of the earth, space physics, planetary exploration, human space flight, space environment, orbits, propulsion, spacecraft design, attitude control and communication. Crosslisted by Departments of Earth and Planetary Sciences, Materials Science and Engineering and Mechanical Engineering. Recommended
Course Background: AS.171.101-AS.171.102 or similar; AS.110.108-AS.110.109.
Instructor(s): H. Moos; S. Murray
Area: Engineering, Natural Sciences.

Public Health Studies

**AS.280.335. The Environment and Your Health. 3 Credits.**
This course surveys the basic concepts underlying environmental health sciences (toxicology, exposure assessment, risk assessment), current public health issues (hazardous waste, water- and food-borne diseases), and emerging global health threats (global warming, built environment, ozone depletion, sustainability). Public Health Studies, Global Environmental Change and Stability, and Earth and Planetary Science majors have 1st priority for enrollment. Your enrollment may be withdrawn at the discretion of the instructor if you are not a GECS, PHS, or EPS major.
Prerequisites: (Students may not have taken AS.270.320)
Instructor(s): M. Trush
Area: Natural Sciences.

East Asian Studies

The East Asian Studies major is interdisciplinary and interdepartmental. Its primary purpose is to introduce undergraduates to the knowledge, language skills, and research methods they will need to enter various academic and professional paths relating to China, Japan, and Korea. Majors in East Asian Studies engage in intensive Chinese, Japanese and/ or Korean language study through the Center for Language Education and work with faculty on such topics as China in the global economy, nationalism in East Asia, Korean identity and culture, modern Japanese history and politics, Chinese urban history, and women in East Asia. Students are encouraged to pursue original research projects in East Asia with the support of intersession and summer travel grants, stipends for conference presentations, a senior thesis honors option, and seminars that bring together research scholars, faculty, graduate students and undergraduates in a manner that is distinctly Hopkins. Alumni of the program are making their mark around the world in business and finance, academia, law, international development, medicine and public health, engineering, media, public service, and the arts.

China-Stem

Forward thinking and interdisciplinary, Johns Hopkins-China STEM embodies the best of the Johns Hopkins tradition. Building upon well-established partnerships in China and expertise in a variety of technical disciplines, the program addresses the increasing demand for advanced Chinese language education in specialized fields of study. Students, researchers, and practitioners who understand the language, culture, and context of China could significantly enhance their ability to discover new theories, new partnerships, and new practices.

The summer program is designed for undergraduate and graduate students, post-doctoral fellows, and researchers who seek to enhance their Chinese language proficiency for scientific, technological, engineering, and medical (STEM) disciplines. Over the course of eight weeks, students are immersed in rigorous language training, coupled with experiential research trips to laboratories, hospitals, and academic institutions in Nanjing and Beijing.

Complete information on the program, and the application process can be found at: http://krieger.jhu.edu/chinastem

Hopkins in Nanjing (HIN)

Developed by the East Asian Studies Program at Hopkins in collaboration with the JHU Study Abroad Office and Nanjing University, the fall semester program will include intensive language study as well as two content courses. Students take nine credits of intensive Chinese language courses at Nanjing University. The two content courses are taught by Hopkins faculty in English and vary each year depending on faculty specializations.

Having our own in-house study abroad program gives us more control over the content and quality of study abroad courses, ensuring that our students have a rigorous and challenging semester abroad curriculum tailored to their academic needs. The program also obviates the need for Hopkins undergraduates to transfer their study abroad credits, a process that many students have found frustrating. It also provides an opportunity for qualified undergraduate majors to conduct research in Nanjing in preparation for writing an honors thesis. In addition, it helps our undergraduates realize the goal of passing the qualifying language examinations for Hopkins Nanjing Center.

Successful applicants must have at least a 3.0 cumulative GPA, and have completed at least 4 semesters of college-level Mandarin (or the equivalent). Undergraduates with junior standing will be given preference in selection. Although the program initially only served Hopkins undergraduates, it is now open to undergraduates from several other institutions as well. For more information and application instructions, visit http://krieger.jhu.edu/east-asian/undergraduate/nanjing.html

Hopkins in Tokyo

In fall 2012, a full-year undergraduate exchange program began with the University of Tokyo, and it is off to a great start. This new study abroad program was designed with Hopkins’ East Asian Studies majors and Japanese language students in mind. As with other departmental study abroad programs at Hopkins, students’ credits and grades will be transferred between the two universities.

This is a direct exchange program between our universities, rather than a program run by Hopkins. For each Hopkins student who attends the University of Tokyo, one University of Tokyo student will attend Hopkins. Each Hopkins student has a Japanese student as his/her personal tutor. The tutors assist students in both academic matters and in daily life.

Limited to 1-3 students per year, admission to the University of Tokyo program is competitive. Students must have completed 4 semesters of college-level Japanese or the equivalent, have a term GPA of 3.0 or above, and submit two faculty references, one of which should be from a Japanese language instructor. For more information and application instructions, visit http://krieger.jhu.edu/east-asian/undergraduate/ tokyo.html.

Requirements for the B.A. Degree

(See also General Requirements for Departmental Majors (p. 33).)
The curriculum of the East Asian Studies major consists of a balanced
mixture of language and area studies. A major must fulfill the following requirements:

**Focus Area**

Starting in the fall of 2013, freshmen who decide to major in East Asian Studies will choose a focus area. They will be able to select from among three discipline-based focus areas—history, political science, or sociology—or create an individualized focus area. The introduction of focus areas will give the EAS major more structure. In addition to solid language training and content courses about the region, EAS majors will now get training in the methods and theory of a particular academic discipline. If they choose, East Asian Studies majors will still be able to double major in International Studies, as the requirements of each of the three focus areas overlap with those of International Studies.

Choose ONE (1) focus area and complete all requirements listed for that area: History, Political Science, Sociology, or an individualized program. The individualized focus area requires approval of the EAS Director and requirements will be determined in consultation with the Director.

### Requirements for the B.A. Degree

Select one of the following East Asian survey course offered by the History Department or History of Science and Technology Department:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.100.208</td>
<td>China: Neolithic to Song</td>
</tr>
<tr>
<td>AS.100.347</td>
<td>Early Modern China</td>
</tr>
<tr>
<td>AS.100.348</td>
<td>20th-Century China</td>
</tr>
</tbody>
</table>

Three (3) additional East Asian Studies Courses. At least one (1) course must be at the 300-level or above.

**History focus area**

Students who choose the History focus area will take the two-semester Undergraduate Seminar in History Seminar, in which they will learn to write a research paper based on primary materials. In addition, students will choose two (2) East Asian Studies history courses. This can include offerings from the History Department and the History of Science and Technology Department. At least one (1) course must be at the 300-level or higher.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.100.193</td>
<td>Undergraduate Seminar In History</td>
</tr>
<tr>
<td>AS.100.194</td>
<td>Undergraduate Seminar In History</td>
</tr>
</tbody>
</table>

Two (2) East Asian Studies history courses. Six credits and may count toward two of the eight required EAS courses.

**Political Science focus area**

Those who choose the Political Science focus area will choose two from among four courses that introduce the main subfields within political science—American Politics, Political Theory, Comparative Politics, and International Relations. In addition, students will choose two (2) East Asian Studies political science or sociology courses, one (1) of which must be at the 300-level or higher.

Two (2) core courses at the 100- or 200-level; in two of the following subfields - American Politics, Comparative Politics, International Relations, or Political Theory.

Two (2) East Asian Studies political science or sociology courses.

**Sociology focus area**

Those who choose the Sociology focus area will take two (2) of the four basic theory and methods courses offered by the Sociology Department. In addition, students will choose two (2) East Asian Studies sociology or political science courses, one (1) of which must be at the 300-level or higher.

Select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.230.101</td>
<td>Introduction Sociology</td>
</tr>
<tr>
<td>AS.230.202</td>
<td>Research Methods for the Social Sciences</td>
</tr>
<tr>
<td>AS.230.205</td>
<td>Introduction to Social Statistics</td>
</tr>
<tr>
<td>AS.230.213</td>
<td>Social Theory</td>
</tr>
</tbody>
</table>

Two (2) East Asian Studies political science or sociology courses. Six credits and may count toward two of the eight required EAS courses.

- Students who declared the EAS major before the fall of 2013 are not required to complete the focus areas. Instead, these students must complete eight East Asian Studies courses under a program of study worked out with his/her academic adviser. At least one of these eight must include an East Asian History survey course listed below. Two of these eight may be made up of additional language courses (beyond the required six semesters) or of "comparative" courses with a significant East Asian component, as approved by the Director of East Asian Studies.

- All students must also complete at least six semesters of coursework in an East Asian language or languages as an undergraduate. At least one language must be completed at the third year level or higher. If a student completes third year level language courses in one language and more advanced courses in that language are not available, the student may, with permission from the EAS director, substitute other EAS courses for up to two of the required language courses.

- Honors in the major may be earned by maintaining a GPA of 3.7 in the major and writing a senior honors thesis by taking a year-long seminar, AS.360.431 Senior Thesis Seminar: East Asian Studies. The thesis seminar is six credits and may count toward two of the eight required EAS courses.

### Other Departmental Requirement

No major requirements may be taken pass/fail. All courses required for the major must be passed with a grade of C- or higher. The University encourages students enrolled in this program to take advantage of foreign study options. Courses and programs must be pre-approved by the student's East Asian Studies advisor. Transfer credit policy: Up to six classes may be transferred from study abroad programs or other schools upon approval of the major advisor.

For current faculty and contact information go to [http://krieger.jhu.edu/east-asian/directory/](http://krieger.jhu.edu/east-asian/directory/)

**Faculty**

**Director**

Erin Chung  
Assistant Professor: Political Science

**Professors**

Lingxin Hao  
(Sociology).

William T. Rowe  
(History).

Kellee S. Tsai  
Vice Dean for Humanities, Social Sciences and Graduate Programs and Professor (Political Science).

**Associate Professors**

Joel Andreas  
(Sociology).
Departments, Program Requirements, and Courses

Ho-Fung Hung  
(Sociology).

Tobie Meyer-Fong  
(History).

Assistant Professors

Yulia Frumer  
(History of Science and Technology).

Marta Hanson  
(History of Medicine).

Associated Faculty

Rebecca M. Brown  
Visiting Associate Professor (History of Art and Political Science).

Victoria Cass  
Visiting Associate Professor (Humanities Center).

Aiguo Chen  
Lecturer (Center for Language Education).

Yuki Johnson  
Teaching Professor and Director (Center for Language Education).

Courses

**AS.310.103. Modern Japan - 1800 to the Present. 3 Credits.**  
An introduction to the history of Japan from the 18th century to the present. In lectures and discussion we will draw upon a combination of primary source materials (political documents, memoirs, oral histories, journalism, fiction, film) and scholarly writings in order to gain insight into the complex and tumultuous process by which Japan became an industrialized society, a modern nation-state, and a world power.  
Instructor(s): A. Bronson  
Area: Humanities, Social and Behavioral Sciences.

**AS.310.104. Pacific Crossings: East Asia and the US from the 19th Century to the Present. 3 Credits.**  
This course examines the connections between US and East Asian history from the 19th century to the present day. We will explore how cultural exchange and confrontation shaped humanitarian, nationalist, and socialist projects in the US, China, Korea, and Japan. Readings include memoirs, travelogues, essays, and novels that provide a window into transpacific history.  
Instructor(s): A. Bronson  
Area: Humanities, Social and Behavioral Sciences

**AS.310.105. Medicine and Society in China: From the Song to the Republican Period. 3 Credits.**  
This course introduces students to medical history in China in relation to gender history, legal history, publishing history, and literature from the Song to the Republican period.  
Instructor(s): Y. Zhang  
Area: Humanities.

**AS.310.106. Introduction to Chinese Fiction and Drama. 3 Credits.**  
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.  
Instructor(s): F. Joo  
Area: Humanities.

**AS.310.115. Ghost Tales from China and Japan, 14th-19th Centuries. 3 Credits.**  
We cannot express our own experience of death – only imagine life after death. How did people in the past conceptualize the world of the dead? Ghost tales will teach us what we imagine as the experience of dead and life after death. This course aims to introduce students to a variety of ghost stories in Late Imperial China and Tokugawa Japan and connect their literary imagination of the dead to the cultural, socio-historical, and religious context of each society as well as to the broad East Asian tradition of supernatural narratives. While we also touch upon earlier traditions on narrating the dead, most of the stories in class readings are from the Ming (1368-1644) and Qing (1644-1911) dynasties of China, and the Tokugawa period (1600-1868) of Japan. Key issues include family, gender, sexuality, body, medicine and many more. Although we will also take a look at visual and theatrical representations of the dead, we will primarily focus on literary texts about ghostly phenomena. Required film screenings are scheduled outside of regular class hours. All readings are in English.  
Instructor(s): F. Joo  
Area: Humanities.
AS.310.116. Romantic Love in Chinese Literature. 3 Credits.
This course aims to introduce students to a variety of literary texts featuring romantic love from the 9th to the mid-20th centuries in China. The target materials cover a wide range of literary products from Bo Juyi's court poem to the modern Shanghai novella by the woman writer Zhang Ailing (Eileen Chang). As we read romance in a variety of narrative forms such as fiction, drama, and poetry, we will examine changing ideas about marriage, love, sexuality, family, emotion, and morality within the literary discourse as well as in society. Thus, students are expected to connect various literary texts about romance to their socio-historical, literary, and political surroundings. At the same time, we will discuss the shifting significance of romance for writers and reading public and consider how literary texts formed ideas about romance in society. The course is organized chronologically and thematically. Reading assignments are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.203. Women Writers from East Asia, 11th to 19th Centuries. 3 Credits.
Introduction to women-authored texts in East Asia, 11th to 19th centuries. Historical and literary significance of their output in Chinese, Japanese, and Korean societies.
Instructor(s): F. Joo
Area: Humanities.

AS.310.204. Rural Development in Asia. 3 Credits.
We will examine the transformation of the Asian countryside from the beginning of the twentieth century up until the present by looking at agrarian structure, economic and social development, collectivization and decollectivization, rural industrialization, agribusiness, sustainable agriculture, and rural unrest. Course materials combine theoretical readings with empirical case studies. While theoretical readings examine global processes involving Asia and elsewhere, case studies cover several Asian countries, with an emphasis on China and India.
Instructor(s): B. Gurel
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.207. Mapping Migrations in East Asia. 3 Credits.
This seminar introduces students to the phenomenon of migration in Japan, South Korea, and Taiwan from theoretical, empirical, and comparative perspectives. The objectives of the course are to understand the 1) historical context behind present-day migrations in East Asia; 2) different patterns of migration flows and their consequences on receiving countries; 3) various theoretical frameworks for migration. The course is divided into three parts. In the first part, the course will examine theoretical approaches to migration, structured around the question of whether East Asia as a region represents a distinct model of migration. In the second, students will explore the empirical cases in greater detail by comparing and contrasting the different types of migrations. The third part addresses the responses to migration by host governments and societies and the implications of migration on citizenship and identity.
Recommended Course Background: any class related to the history or politics of Japan, Korea, Taiwan, and/or China.
Instructor(s): D. Kim
Area: Humanities
Writing Intensive.

AS.310.214. Empire and Hierarchy in East Asia. 3 Credits.
This course investigates the spectrum of unequal political authority in international politics. Empire, as one pole of hierarchical politics, persists in today's multilateral, rule-based order. We will examine the theoretical foundations of hierarchy and empire in the study of international politics in East Asia. In addition, we will look at why empires arose at particular junctures, and contemporary directions in the debate on empire.
Instructor(s): J. Wang
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.215. Enlightenment, Empire, and Democracy: Transnational Political Cultures in East Asia, 1880#1980. 3 Credits.
This course explores the global circulation of political ideas and the formation of transnational social, intellectual, and aesthetic movements in Japan, China, and Korea from the 1880s to the 1980s.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.221. Introduction to Eastern Religious Traditions. 3 Credits.
This course serves as an introduction to Hinduism, Jainism, Buddhism, Sikhism, Confucianism, and Daoism. Successful completion of this course will provide students with a critical understanding of these six traditions.
Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences.

AS.310.303. A World Upturned: Cultures of Catastrophe in Japan. 3 Credits.
Focusing on earthquake science and earthquake lore, radioactive mutation and nuclear decimation, this course will consider the relationship between technological culture and large-scale cataclysm. In addition to treating a broad array of written, graphic, and filmic representations of Japan's past and potential catastrophes, we will also be keeping a close and careful eye on present developments in Japan's 2011 earthquake/tsunami/nuclear disaster.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.

AS.310.304. The Architectonics of Tokyo: The Anthropology of City Life in Japan and Abroad. 3 Credits.
In this advanced undergraduate seminar on urban life and the anthropology of aesthetics, we will develop tools with which to think and write about city life in Japan and abroad. 'Architectonic' is a philosophical term referring to the ability to pull otherwise autonomous ideas together into a single coherent whole. In this course we will employ methodologies culled from class readings, lectures, web-based resources, and class discussions to collectively construct a digital patchwork of writings and images that will serve as the classes' own quasi-coherent whole, or 'architectonic' of city life in Tokyo.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.310.305. Southeast Asia and US Security. 3 Credits.
This survey course is designed to introduce students to Southeast Asia -- the ten member countries of the Association of Southeast Asian Nations (ASEAN) plus Australia and New Zealand. Southeast Asia is an integral part of the broader region of East Asia and a geographic bridge to the Indian subcontinent (South Asia). Southeast Asia has been one of the great success stories in the saga of modernization and development of post-colonial Afro-Asia over the last six decades. Its resulting economic importance is matched by its strategic significance given the presence of imbedded jihadist networks and the emergence of China as a regional great power and aspirant superpower. Nevertheless, the region has been largely overlooked by senior foreign policy and defense officials in Washington. This course will equip students to fill that void by examining the region from the perspective of national security strategy -- broadly understood in its multiple dimensions. Students will be challenged to formulate some element of a viable U.S. national security strategy for the region.
Instructor(s): M. Ott
Area: Social and Behavioral Sciences.

AS.310.306. Domestic Politics of Contemporary China. 3 Credits.
This course introduces students to China’s contemporary political history and current political system. It helps students develop a critical understanding of China’s governance institutions and processes, political economy, and state-society relations. The course focuses primarily on China’s domestic politics but also covers China’s changing role in Asia and the world.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.310.316. First Year Classical Chinese, Second Semester: Chinese Language and Literature of the Ancient Period. 3 Credits.
Readings in prose and poetic texts of the Zhou and Han Dynasties. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in western languages that treat the culture and writers of the Ancient period. Quizzes and Tests (Midterm and Final) will cover both language and cultural data. A short paper also required.
Instructor(s): V. Cass
Area: Humanities.

AS.310.321. Classical Chinese. 3 Credits.
This course introduces the basic syntax, grammar and vocabulary of Classical Chinese or Literary Chinese (guwen/wenyan wen # #), the written language from Old Chinese to the early twentieth century. Classical Chinese, which differs substantially from modern colloquial Chinese, is the language in which traditional Chinese historical, philosophical, religious and literary works are written. The structure, grammar and vocabulary of Classical Chinese still has large influence on modern Chinese formal documents and newspaper. Therefore, studying Classical Chinese is crucial not only to those who wish to understand original Chinese texts correctly but also to anyone who wants to attain a high level of reading proficiency in modern Chinese.
Prerequisites: AS.373.111 OR AS.373.112 OR AS.373.115 OR AS.373.116 AND AS.373.211 AND AS.373.212 OR AS.373.215 OR AS.373.216
Instructor(s): F. Chao
Area: Humanities.

AS.310.334. Southeast Asia: Contestations, Continuities, Changes. 3 Credits.
’Southeast Asia’ designates a geographical region comprised of countries such as Thailand, Indonesia, Malaysia, Vietnam, the Philippines, and Singapore. These countries are often more different than alike, and their cultural, ethnic, religious and political diversity resists easy reduction. As such, this is not a survey course of the area. Rather, we will examine elements of the Southeast Asian experience that speak to contemporary debates on cultural, political, and religious diversity in globalization’s second wave, and what it can teach us about assimilation, acculturation, and acceptance. We will try to get a feel of the variegated texture of Southeast Asian societies through historically and theoretically oriented texts drawn from different disciplines. Specifically, we will concentrate on responses to European colonialism, nationalist identity formations, and the impact of these histories upon contemporary contentions over the role of religion in public life, migratory practices, and second-wave globalization.
Instructor(s): D. Kwek.

AS.310.356. The Buddhist Experience. 3 Credits.
This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). In addition to studying the origins of Buddhism in India and its eventual spread across Asia, we will examine local interpretations of Buddhism. Particular focus will be on manifestations of Buddhism in art and material culture. Students will gain a critical understanding of the role of texts, art, doctrine, and practice play in the overall Buddhist experience. This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). In addition to studying the origins of Buddhism in India and its eventual spread across Asia, we will examine unique local interpretations of Buddhism. Particular focus will be on manifestations of Buddhism in art and material culture. Students will gain a critical understanding of the role of texts, art, doctrine, and practice play in the overall Buddhist experience.
Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.310.403. Women Writers from East Asia, 11th to 19th Centuries. 3 Credits.
Introduction to women-authored texts in East Asia, 11th to 19th centuries. Historical and literary significance of their output in Chinese, Japanese, and Korean societies.

AS.310.431. Senior Thesis Seminar: East Asian Studies. 3 Credits.
Students may earn honors in the East Asian Studies major by maintaining a 3.7 average in the major and completing a senior thesis by taking the year-long AS.310.431 & AS.310.432 Senior Thesis Seminar: East Asian Studies. Students are required to secure the mentorship of an advisor among the EAS faculty before asking for permission to enroll in the course.
Instructor(s): E. Chung
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.310.432. Senior Thesis Seminar: East Asian Studies. 3 Credits.
This course is the continuation of Senior Thesis Course AS.360.431 for students completing their thesis in the East Asian Studies program.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences Writing Intensive.
AS.310.435. International Relations Theory and the Margins: The Case of East Asia. 3 Credits.
This course explores how the concept of international relations was introduced, challenged, and negotiated in East Asia. Implicitly comparative, the course illuminates the divergent understanding of familiar terms such as order, hierarchy, history, community, border/territoriality, and law, in light of the East Asian modernity. Students will be asked to reflect on questions of identity in relation to China, Korea and Japan and to ponder the extent to which those identities may be translated and understood to Western categories. Specifically this course will consider the role played by Sino-centrism, the rise of Japan later, and Westernization in shaping international relations in East Asia.
Instructor(s): H. Koyama
Area: Humanities
Writing Intensive.

AS.310.600. Advanced Topics in East Asian Studies.
This interdisciplinary seminar gives graduate students in East Asian Studies opportunities to present and receive comments on their dissertation chapters, prospectuses, conference papers, and/or potential publications.
Instructor(s): E. Chung
Area: Humanities, Social and Behavioral Sciences.

Cross Listed Courses

History of Art

AS.010.359. Arts of East Asia. 3 Credits.
This course introduces students to East Asian art and, by extension, to East Asian history and culture. Lectures and discussions will address major movements in the visual culture of East Asia, including architecture, painting and sculpture. Readings include both art historical works and primary source material in translation. Themes will include religious art, particularly the introduction of Buddhist to East Asia from India, cultural interchange within East Asia, and the collection and display of East Asian art in America. Cross-listed with East Asian Studies Area: Humanities.

AS.010.351. Asian Art After 1945. 3 Credits.
Examines key political moments in China, Japan, and Korea from 1850 to the present, focusing on the way visual imagery shapes these events. Includes: Japanese occupation of Korea, Hiroshima and Nagasaki bombings, 1989 Tiananmen square protests, North Korean propaganda.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.353. Key Moments in East Asian Politics & Visual Culture. 3 Credits.
Examines key political moments in China, Japan, and Korea from 1850 to the present, focusing on the way visual imagery shapes these events. Includes: Japanese occupation of Korea, Hiroshima and Nagasaki bombings, 1989 Tiananmen square protests, North Korean propaganda.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.311. Japanese Print Culture and Western Collecting. 3 Credits.
The first half of this seminar will examine issues in Japanese print culture, especially the development and circulation of ukiyo-e prints, during the Edo and Meiji periods (1615-1912). Topics will include technological innovations, the role of publishers, censorship, and prints as didactic objects. The second half of the course will explore the popularity of Japanese prints in the West, including their impact on Japonisme and incorporation into Western collections Cross-list with East Asian Studies
Instructor(s): H. Snow
Area: Humanities.

AS.010.313. The Image in Japanese Visual Culture: Muromachi Painting to Manga and Anime. 3 Credits.
This course explores the Japanese image as a distinct and readily identifiable cultural expression. Through a series of five critical works serving as visual landmarks, the students trace the emergence of the Japanese image from its roots in imported Chinese paintings, through the interpretations of the Rimpaa painters, ukiyo-e printmakers, and decorative arts craftsmen of the early modern period, to the internationally acclaimed expressions we now find in 21st-century manga and anime. This course will be taught by Robert Mintz, Associate Curator of Asian Art at The Walters Art Museum.
Instructor(s): R. Mintz
Area: Humanities.

AS.010.355. Asian Art After 1945. 3 Credits.
This course examines the art and architecture of East, South, and Southeast Asia produced since the mid-twentieth century. We will engage with theoretical, visual, and political developments in the recent art of this region, reading statements by artists and architects, discussing the rising commercial and international profile of contemporary Asian art, and exploring established and emerging art histories of this period. Cross-list with East Asian Studies
Instructor(s): R. Brown
Area: Humanities.

AS.010.310. Advanced Topics in East Asian Studies. 3 Credits.
This interdisciplinary seminar gives graduate students in East Asian Studies opportunities to present and receive comments on their dissertation chapters, prospectuses, conference papers, and/or potential publications.
Instructor(s): E. Chung
Area: Humanities, Social and Behavioral Sciences.

AS.070.288. Tibetan Buddhist Culture. 3 Credits.
This course examines the types of beings that act as agents in Asian religious worlds. Using primary sources, along with literature from Anthropology and Religious Studies, we will explore issues of narrative, belief, personhood, otherness, and marginality. Some of the central questions of the course are: What types of creatures populate the Buddhist and Hindu cosmos? How do we make sense of worlds that contain different beings than our own? What makes us, or others, “believe” in the beings that are beyond our perception? Do religious traditions need monsters and beasts in the world in the same way they need gods? The course is organized around a three-part cosmology, found in many Asian religious traditions, which divides the universe into the realms (1) above the earth, (2) on the earth, and (3) below. The course thus first explores encounters with beings of the underworld and graveyards (“monsters”), and investigates religious practices and beliefs related to these monsters. The “beasts” section of the course turns to beings encountered on the earth: from local spirits and mountain deities, to monkey-men and yetis. Finally, we will look at transcendent or non-terrestrial beings (“aliens”), and examine how they act upon, or through, humans.
Instructor(s): C. Hatchell
Area: Humanities, Social and Behavioral Sciences.

AS.070.285. Tibetan Buddhist Culture. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.
History

AS.100.185. A Cultural History of Contemporary China. 3 Credits.
This course explores cultural and intellectual changes in post-Mao and contemporary China. In considering topics such as literature, cinema, art, music, and the media, it seeks to provide students with an understanding of the interactions between developments in popular culture and the profound social and economic transformations in China’s three decades of reform. We will pay attention to both domestic issues as well as the context of globalization.
Instructor(s): K. Ren
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.203. Modern Japan. 3 Credits.
Instructor(s): T. Steen
Area: Humanities, Social and Behavioral Sciences.

AS.100.206. China: Neolithic to Song. 3 Credits.
This class offers a broad overview of changes in China from Neolithic times through the Song Dynasty (roughly from 5000 BCE through the 13th century CE) and will include discussion of art, material culture, and literature as well as politics and society. Close readings of primary sources in discussion sections and extensive use of visual material in lectures will help students gain firsthand perspective on the materials covered. Cross listed with East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.213. The Rise of Modern Japan. 3 Credits.
This course begins in the year 1868, when Japan shed its samurai past and embraced a modernity centered around its imperial legacy. The new Meiji leaders made studied efforts to modernize (and at times, westernize) in an effort to create a Japan that was primed to compete on the international scene. We will explore the nation’s emergent imperialism at the end of the 19th century, its involvement in two world wars, post-Occupation economic growth in the 1960s and 1970s, and finally the economic and social troubles of the 1980s to the present. Cross listed with East Asian Studies
Instructor(s): J. Oakes
Area: Humanities, Social and Behavioral Sciences.

AS.100.214. Japan’s Last Shogunate, 1568-1868. 3 Credits.
This course begins in the last years of the Warring States period and explores the history and culture of Japan’s last samurai-based government—the Tokugawa Shogunate—that spanned the period 1600-1868. Known for its two and a half centuries of peace, the Tokugawa period witnessed significant changes for the samurai class, the advent of a new urban-based culture, and an increasingly complicated relationship with the west. Although this period is considered part of Japan’s pre-modern past, it laid the foundations for the country’s emergence as a modern nation in the latter part of the nineteenth century.
Instructor(s): J. Oakes
Area: Humanities, Social and Behavioral Sciences.

AS.100.219. Chinese Cultural Revolution. 3 Credits.
This introductory class will explore the Cultural Revolution (1966-1976), Chairman Mao’s last attempt to transform China, and a period marked by social upheaval, personal vendettas, violence, and ideological pressure.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.306. Bridging East and West: Chinese Cosmopolitans and Cultural Mediators in the 19th and 20th Centuries. 3 Credits.
This course explores the contributions that cosmopolitan Chinese intellectuals, revolutionaries, diplomats, artists, translators, politicians, and scholars made to cross-cultural understanding in Europe and China of the 19th and 20th centuries. Cross-listed with East Asian Studies
Instructor(s): K. Ren
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.329. Chinese Thought. 3 Credits.
Chinese classical philosophy, Confucianism, and Daoism. Cross-listed with East Asian Studies
Instructor(s): B. Lievens
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.330. National Identity in 20th Century China & Japan. 3 Credits.
Using primary sources, including literature and film, we will explore the changing ways in which ideologues, intellectuals, and ordinary citizens defined national identity in 20th century China and Japan. Cross-listed with WGS and East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.347. Early Modern China. 3 Credits.
The history of China from the 16th to the late 19th centuries.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.348. 20th-Century China. 3 Credits.
Cross listed with East Asian Studies
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.356. The Buddhist Experience. 3 Credits.
Introduction to Buddhist theory and practice - from India to East Asia.
Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.395. A Cultural History of Contemporary China. 3 Credits.
This course examines cultural and intellectual changes in post-Mao China through developments in literature, film, art, music, and the media, with attention to both domestic transformations and global contexts.
Instructor(s): K. Ren
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.407. The History of Science Policy and Diplomacy in Japan. 3 Credits.
This course traces and analyzes the history of Japan’s science policy and diplomacy. Students learn Japan’s unique position evolved under the influence of neighboring Asian countries, Europe and the U.S.
Instructor(s): T. Steen
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.422. Society & Social Change in 18th Century China. 3 Credits.
Reading knowledge of Chinese recommended but not required. Cross listed with East Asian Studies
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.424. Women & Modern Chinese History. 3 Credits.
This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women’s experiences for their own political and social agendas. Cross listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.437. Late Imperial China: History and Fantasy. 3 Credits.
Students in this seminar will look at the ways in which Chinese and Western scholars, novelists, film-makers, and artists have represented China’s Late Imperial period. We will look at the way foreigners have imagined China, and the ways in which Chinese writers past and present have fancifully, nostalgically, and inventively rendered their personal and national pasts. The course will explore issues of historical, geographical, and literary imagination. Cross-listed with East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.470. Monuments and Memory In Asian History. 3 Credits.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.479. Problems in Chinese Urban History. 3 Credits.
Reading and discussion of works in Western languages on the role of cities in Chinese society, from the Tang dynasty (628-906 A.D.) to the present.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.482. Historiography Mod China. 3 Credits.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.559. Women and Modern Chinese History.
Graduate students only. This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women’s experiences for their own political and social agendas. Cross listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.754. Advanced Topics in Chinese History: Early-Middle Period.
This course will survey and attempt to contextualize recent developments in the historiography of China’s “early” and “middle” periods. Intended for graduate students, this class is open to advanced undergraduates who have taken either East Asian Civilizations or Neolithic-Song - or by permission of instructor. Cross-listed with East Asian Studies.

History of Science Technology

AS.140.305. Science and Technology in East Asia. 3 Credits.
The course explores the historical and cultural context of scientific and technological developments in China, Japan and Korea, focusing especially on the rise of modern science in the 19th and the 20th century.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.307. War and Technology in East Asia. 3 Credits.
Instructor(s): M. Son
Area: Humanities, Social and Behavioral Sciences.

AS.140.346. History of Chinese Medicine. 3 Credits.
Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences.

AS.140.354. Science, Technology and Society in Modern East Asia. 3 Credits.
The course aims to survey the history of science and technology in East Asian countries—China, Japan and Korea—since the late 19th century. Since Japan was the only nation in East Asia that succeeded in modernizing itself by adopting western science, technology and politics, it will be studied first. The Chinese and Korean cases then will be reviewed from different angles. The course will emphasize the mutual influence between science & technology and society to answer how they became major industrial powers in the 21st century. Cross-listed with East Asian Studies.
Instructor(s): D. Kim; Y. Li
Area: Humanities, Social and Behavioral Sciences.

AS.140.369. The Cities of East Asia: A Cultural History. 3 Credits.
Instructor(s): M. Son
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.375. The History of Modern Science and Technology in East Asia. 3 Credits.
Area: Humanities, Social and Behavioral Sciences.

AS.140.377. When the West Came East: Science & Technology in East Asia 19th-Early 20th Century. 3 Credits.
This course is an exploration of 19th - 20th century China, Japan and Korea. We will examine the links between technology and imperialism to understand why by the 19th and 20th centuries these East Asian countries began to fall behind in the race for technological superiority.
Instructor(s): M. Son
Area: Humanities, Social and Behavioral Sciences Writing Intensive.
AS.140.398. Godzilla and Fukushima: Japanese Environment in History and Films. 3 Credits.
Juxtaposing Japanese environmental history and its reflection in popular media, the course will explore the intersection between technology, environment, and culture. The course will be accompanied by relevant movie screenings.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Philosophy

AS.150.227. Introduction to Asian Philosophy. 3 Credits.
What is the nature of reality? What is the mind? What is the meaning of life? How ought we to live? In this course, we will explore how some of the better known philosophical systems of India, China and Japan have attempted to answer these most central philosophical questions. We will focus on the following systems: Nyaya, Samkhya-Yoga, Vedanta, Buddhism, Carvaka, Confucianism, Taoism, and Zen.
Instructor(s): B. Miller
Area: Humanities.

Political Science

AS.190.315. Asian American Politics. 3 Credits.
This course examines issues of political identity, political incorporation, and political participation of Asian Americans. Themes include Asian American panethnicity, the struggle for immigration and citizenship, Asian American electoral politics, political activism and resistance since the 1960s, and the impact of Asian Americans on the politics of race and ethnicity in the United States.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.320. Politics Of East Asia. 3 Credits.
Examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. Topics include state-society relations, late development, nationalism, democratization, political culture, social movements, and globalization.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.330. Japanese Politics. 3 Credits.
This course introduces students to the major debates and issues of postwar Japanese politics. Topics include nationalism, electoral politics, civil society, and immigration.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.341. Korean Politics. 3 Credits.
This course introduces students to the historical and institutional foundations of modern South Korean politics. Topics include nationalism, political economic development, civil society, globalization, and ROK-DPRK relations. (CP)
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.348. Domestic Politics: Contemporary China (CP). 3 Credits.
This course examines key issues in contemporary Chinese politics, spanning the period from the Communist Revolution (1949) through the Mao (1949-1976) and reform eras (1978 to present). Particular emphasis will be placed on contemporary challenges, including the political economy of reform and alternative forms of political participation.
Area: Social and Behavioral Sciences.

AS.190.434. Adv Tpcs in Chinese Politics. 3 Credits.
This seminar is structured around key concerns in China’s domestic politics, including the politics of economic reform, central-local relations, corruption, increasing inequality, the role of intellectuals, the rise of quasi-governmental organizations, various channels for political participation and protest, and other contemporary issues. For undergraduates only.
Recommended Course Background: AS.190.348
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.436. China and the Global Political Economy. 3 Credits.
Prerequisites: AS.190.348 or 190.316 or permission of instructor or graduate students
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.610. Advanced Topics in Contemporary Chinese Politics. 3 Credits.
This seminar is structured around key concerns in China’s domestic politics, including the politics of economic reform, central-local relations, corruption, increasing inequality, the role of intellectuals, the rise of quasi-governmental organizations, various channels for political participation and protest, and other contemporary issues. Undergraduates who wish to be enrolled in this class must have taken AS.190.348 and by permission only.
Instructor(s): K. Tsai
Area: Social and Behavioral Sciences.

AS.191.204. Chinese Foreign Policy. 3 Credits.
The domestic sources of, and international constraints on, Chinese foreign policy-making will be examined. We will also study the development and evolution of Chinese foreign policy objectives and their implementation during and after the Cold War.
Instructor(s): P. Leon
Area: Social and Behavioral Sciences
Writing Intensive.

AS.191.215. Modern Tibet: Politics, Religion, and Culture. 3 Credits.
Drawing on histories, autobiographies, literature, and film produced by Tibetans, this course explores modern Tibet, focusing on Sino-Tibetan relations and contemporary religion and culture.
Instructor(s): C. Hatchell
Area: Social and Behavioral Sciences.

AS.191.226. Globalization and State-Society Relations in Contemporary East Asia. 3 Credits.
This course examines the extent to which globalization is reshaping state-society relations in contemporary East Asia, and how East Asian societies and political systems respond to, and influence, aspects of globalization in turn. Topics to be explored include the origins and trajectories of developmental states in East Asia, macroeconomic and industrial policymaking, social unrest and political organizing, export-led growth and political liberalization, the East Asian financial crisis and its aftermath, and today’s East Asian political and economic landscapes in a globalizing world.
Instructor(s): P. Leon
Area: Social and Behavioral Sciences
Writing Intensive.
AS.191.305. Southeast Asia and US Security Strategy. 3 Credits.
This is a survey course designed to introduce students to Southeast Asia -- defined as the ten member countries of the Association of Southeast Asian Nations (ASEAN) plus Australia and New Zealand. Southeast Asia is an integral part of the broader region of East Asia and a geographic bridge to the Indian subcontinent (South Asia). Southeast Asia has been one of the great success stories in the saga of modernization and development of post-colonial Afro-Asia over the last six decades. Its resulting economic importance is matched by its strategic significance given the presence of imbedded jihadist networks and the emergence of China as a regional great power and aspirant superpower. Nevertheless, the region has been largely overlooked by senior foreign policy and defense officials in Washington. This course will equip students to fill that void by examining the region from the perspective of national security strategy -- broadly understood in its multiple dimensions. Students will be challenged to formulate some element of a viable U.S. national security strategy for the region.
Instructor(s): M. Ott
Area: Social and Behavioral Sciences.

AS.191.315. Chinese Foreign Relations. 3 Credits.
This course examines China's foreign relations since the beginning of the economic reforms. Readings will draw on a diversity of perspectives, both Chinese and non-Chinese, to examine China's foreign policy debates and strategic choices.
Instructor(s): G. Christoffersen
Area: Social and Behavioral Sciences.

AS.191.323. Asian Energy Security. 3 Credits.
This course is concerned with the relationship between energy security and human security. It will study the energy issues of East Asian countries as they make difficult energy policy choices, attempting to achieve simultaneously economic growth, energy security, and environmental sustainability.
Instructor(s): G. Christoffersen
Area: Social and Behavioral Sciences.

AS.191.325. Contentious Politics of East Asia. 3 Credits.
An examination of contentious politics and its applications to Japan, South Korea and China.
Instructor(s): J. Wang
Area: Social and Behavioral Sciences.

AS.191.343. US Foreign Policy in East Asia. 3 Credits.
(IR)
Instructor(s): J. Ryu
Area: Social and Behavioral Sciences.

AS.191.347. U.S.-Chinese Relations. 3 Credits.
This course examines key issues in U.S.-Chinese relations. We will take an in-depth look at the politics, policies, and topics surrounding strategic balancing, trade, energy, nuclear proliferation on the Korean Peninsula, relations across the Taiwan Strait, China's rise and the response of the United States and its allies. We will place the relationship between the United States and China in the context of its geopolitical implications not only for the two countries but also for the international system.
Instructor(s): P. Leon
Area: Social and Behavioral Sciences.

AS.191.348. Domestic Politics of Contemporary China. 3 Credits.
This course examines salient issues in the domestic politics of contemporary China. It begins with a brief historical overview of China's developments that led to the revolutions of 1911 and 1949, as well as the Cultural Revolution. The main part of the course will explore the era of economic reform and opening that began in the late 1970s and that still continues today. Topics include the relationship between business and politics, obstacles to economic and political reforms, the interplay between foreign relations and domestic politics, institutional and bureaucratic sources of policy-making, the social and political impact of economic growth, the relationship between central and provincial governments, and the questions of political opening and leadership transitions.
Instructor(s): P. Leon
Area: Social and Behavioral Sciences
Writing Intensive.

AS.191.359. Politics and Thought in Japan. 3 Credits.
Instructor(s): N. Otobe
Area: Social and Behavioral Sciences.

AS.191.366. Chinese Domestic Politics. 3 Credits.
This course provides an introduction to the key institutions and relationships that make up the modern Chinese political system. The course will examine both theoretical and historical understandings of Chinese politics, considering alternative models of Chinese politics. It examines a range of current Chinese domestic governance issues: the political impact of the economic reforms, state-society relations, the legitimacy of the Communist Party, and Chinese understandings of politics.
Instructor(s): G. Christoffersen
Area: Social and Behavioral Sciences.

AS.191.368. International Relations of the Asia-Pacific. 3 Credits.
This course will introduce and analyze the international relations of the Asia-Pacific, weighing the various approaches that scholars use for theoretical understanding and policy prescription. From the 19th c. to the 21st c., realist balance of power politics have prevailed. Since the early 20th c., liberal-institutionalism has emerged to challenge realist assumptions in both Track I and Track II organizations such as the Institute of Pacific Relations, APEC, the ASEAN Regional Forum, East Asian Summit, and CSCAP. Constructivism questions these older approaches, focusing on national and regional identity formation in explaining foreign policy outcomes. The course will consider realist, institutionalist and constructivist approaches to Pacific Asia in examining prospects for peace and stability.
Instructor(s): G. Christoffersen
Area: Social and Behavioral Sciences.

AS.191.373. Asian Americans and the Law. 3 Credits.
Instructor(s): Staff
Area: Social and Behavioral Sciences
Writing Intensive.
AS.191.435. International Relations Theory and the Margins: The case of East Asia. 3 Credits.
This course explores how the concept of 'international relations' was introduced, challenged and negotiated in a region which we call 'East Asia.'Implicitly comparative, the course illuminates the divergent understanding of familiar terms such as "order," "hierarchy," "history," "community," "border/territoriality," and "law" in light of the East Asian modernity. Students will be asked to reflect on questions of identity in relation to China, Korea and Japan and to ponder the extent to which those identities may be translated and understood in Western categories. Specifically this course will consider the role played by Sino-centrism, the rise of Japan later, and Westernization in shaping 'international relations' in East Asia. Dean's Teaching Fellowship
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

Sociology

AS.230.145. Social Problems in Contemporary China. 3 Credits.
This course will introduce students to contemporary Chinese society in the era of reform through examination of major social problems. We will examine issues such as: urban-rural divisions and the hukou system; urbanization and the plight of millions of peasant workers migrating into China’s cities; changing class structure and the lives of the new urban underclass such as laid-off state workers; the one-child policy and its impacts on women, children, and society in China; education and gender inequality; land disputes and rural protests; corruption and stalled political reforms; government media control and contesting cyber-space; pollution and emerging environmental movement; ethnic conflicts; and challenges faced with China’s medical care and public health system. The course will also discuss the impact of the rise of China, and its past, current, and possible future development paths in the region and the world. Through lectures, discussions, group projects, and documentary films, students will get a bird’s eye view of contemporary Chinese society, and gain some insights on the problems of balancing economic growth and social development. Cross-listed with East Asian Studies
Instructor(s): L. Zhang
Area: Social and Behavioral Sciences.

AS.230.166. Chinese Migration in Modern World History
1500’s-2000’s. 3 Credits.
This interdisciplinary course applies theories of economic sociology to examine the effects of Chinese overseas migration on modern world economy from the sixteenth century to the contemporary era. It examines the contribution of overseas Chinese to the development of capitalism in the following junctures: the East-West economic integration in the pre-modern era, China’s modern transformation after the Opium War (1839-1842), the making of US national economy in the early twentieth century, as well as the postwar economic miracles in the Pacific Rim, among others. Cross-listed with History and East Asian Studies.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.175. Chinese Revolutions. 3 Credits.
This course introduces the origins, operation and impacts of five major revolutions in modern China between 1850 and 1950. These include the Taiping Rebellion, the republican revolutions, federalist and southern automatic movements, labor strikes as well as peasant rebellions. It draws on the existing historiography that examines China’s transition from an empire to a republic, impacts of western and Japanese influences to China, as well as the continuity and change of Chinese social organizations. Cross list with International Studies and East Asian Studies. Fulfills IS History requirement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.228. Colonialism in Asia and Its Contested Legacies. 3 Credits.
This seminar examines the theories and historiography of colonialism in Asia, with special focus on the development of British Straits Settlements and Hong Kong as well as Japanese Taiwan. We will review the competing discourses about the impact of colonial dominations in these areas from the 1800s to the present-day. In the beginning of the era, the British built up the economic linkage between Hong Kong and Penang, Malacca as well as Singapore to sustain its dominance throughout the “Far East.” In the middle of the period, the expanding Japanese empire developed Taiwan as a foothold to compete with the British interests in South China and Southeast Asia. Hong Kong and the Straits Settlements, especially Singapore, became the contested terrain where two colonial powers vied for their influences in the region. The competition was not only about trade, but about the construction of a new East Asian regional order after the end of the Chinese hegemony. In the end of the period, the intervention of the US power in postwar Asia facilitated the retreat of the colonial establishments, British and Japanese ones included. The course that compares the colonial establishments and discourses on colonial legacies among the three areas points out that colonialism constituted an inalienable part of Asian history. Cross listed International Studies (CP) and East Asian Studies.Fulfills History requirement for IS GSCD track students only.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.285. Maritime East Asia. 3 Credits.
This course examines the transnational connections among merchants and migrants in the waters of East and Southeast Asia from a historical and comparative perspective. In this class, we will explore how diplomatic ties, trade and migration between the thirteenth and eighteenth centuries contribute to the making of cosmopolitan cities such as Quanzhou, Macau, Nagasaki, Fort Zeelandia (Formosa), Malacca, Singapore and Batavia. The course will also address the role that transnational trade and migration networks played in the incorporation of East and Southeast Asia into the Western-led capitalism in the nineteenth century. The course will close with an examination of how the legacies of the long-standing transnautical maritime connections continue to shape contemporary inter-state competition and negotiation in the region. Key concepts to be introduced include tribute trade system, rice economy, pan-Asianism, and ASEAN free trade zone. Cross listed with East Asia Studies.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.
AS.230.321. Revolution, Reform and the Social Inequality of China. 3 Credits.
This course explores various aspects of social inequality in China during the Mao Zedong and the post-Mao reform eras. We will examine inequality within villages, the rural/urban divide, urban inequality, education and health policies, and gender and ethnic relations. Each of these issue areas will be tackled analytically, but the aim is also to understand what it was/is like to live in China during and after the Mao era. The course is designed for both undergraduate and graduate students. Cross-listed with East Asian Studies and International Studies (CP).
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.344. Health and Society in Contemporary China. 3 Credits.
This class examines the social and health consequences of systemic transformations in China, including collapse of the urban work-unit system, resurgence of infectious disease, and implementation of the One-Child Policy. Dean’s Teaching Fellowship; Cross listed with East Asian Studies, Public Health and International Studies.
Instructor(s): R. Core
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.360. Globalization, Labor and the State in East Asia. 3 Credits.
The course will examine the relationship between labor, state policies, and globalization in China, South Korea and Japan in comparative perspective. We will look at debates about the role of developmentalist states on economic and social development, as well as transformation in the nature of work and labor relations in the three countries.
Instructor(s): L. Zhang
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.415. Social Problems in Contemporary China. 3 Credits.
In this course we will examine contemporary Chinese society, looking at economic development, rural transformation, urbanization and migration, labor relations, changes in class structure and family organization, health care, environmental problems, governance, and popular protest. The course is designed for both graduate and undergraduate students. Undergraduates must have already completed a course about China at Hopkins. Cross-listed with East Asian Studies.
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences
Writing Intensive.

Humanities Center
AS.300.207. A Mix of Voices: Chinese Literatures from Late Imperial through Modern. 3 Credits.
This course examines the arts and culture of China from 1368-2000, with major focus on writers. We will begin with artists of the Ming (1368-1644) and Qing (1644-1911), focusing first on canonical voices: court poets, authors of classical fiction, literati essayists, calligraphers and painters. Outside of the court urban artists observed a dramatically changing world around them. Fiction, drama, memoir and mass-produced arts explored new social alignments and freedoms. The twentieth century brought revolution and party governance, along with arts born of mass media: periodicals, film and wood block print. Finally, post-Mao avant-garde artists both retrieved traditional aesthetics and explored new venues and visions. This look at the literature of China will require both close reading of texts as well as an interdisciplinary examination of the cultural factors that shape literatures.
Instructor(s): V. Cass
Area: Humanities.

AS.300.209. Chinese Literature and Culture of the Ancient and Early Medieval periods. 3 Credits.
We will read selections in the original, as well scholarship and criticism concerning the texts. We will consider issues specific to the variety of texts: the social and political context of the “philosophical schools” and writers, the religious and ritual contexts of medical literature and poetry, especially the Elegies of Chu (Chu Ci), the development of literati traditions and the craft of historiography, artistic responses to the collapse of the Han, and the rise of religious literatures of the Six Dynasties. We will introduce aspects of classical language texts: complex form characters, classical Chinese grammar and classical Chinese semantic values. Written assignments, classroom exercises and tests will be based on developing skills in reading and writing classical Chinese; however, tests, discussions, one short paper and one research paper will require interpretation of larger issues pertinent to the texts. Texts to be read in Chinese. Recommended Course Background: two years of Mandarin Chinese.
Area: Humanities.

AS.300.305. Asian American Literature. 3 Credits.
This course examines Asian American Literature with emphasis on East Asian American culture and history. Topics of discussion will include immigration, nation, conceptions of home, loyalty, navigation, and translation of various kinds. Throughout the course, we will explore how recognizable emotions, in tension with historical events, become manifest in art.
Area: Humanities
Writing Intensive.

AS.300.339. Asian American Literature and Culture. 3 Credits.
Topics include conceptions of home, law, loyalty, and belonging as they come up within Asian American texts. Works by Chang-rae Lee, Mei-mei Berssenbrugge, Maxine Hong Kingston, John Okada, Bich Minh Nguyen and others. The course will also explore theoretical and historical questions about how a literary canon is formed, as well as the idea of a post-ethnic America. Cross-listed with East Asian Studies
Instructor(s): S. Rhee
Area: Humanities
Writing Intensive.
AS.300.341. East Asian Cinema. 3 Credits.
A study of select films across East Asia in their aesthetic and institutional contexts. Highlighted directors will include Yasujirō Ozu and Akira Kurosawa, Chen Kaige, Wong Kar-wai, Im Kwon-Taek, and Gen Sekiguchi, Bong Joon-ho. Cross-listed with East Asian Studies and Film and Media Studies
Instructor(s): S. Rhee
Area: Humanities
Writing Intensive.

AS.300.348. Korean Modernism. 3 Credits.
Area: Humanities.

AS.300.358. Modern Korean Culture and Film. 3 Credits.
This course examines modern Korean culture through film and literature in translation. Emphasis will be on the politics of representation, especially in light of the many collective and personal traumas (caused by poverty and factionalism, colonial rule, war, and an accelerated pace of modernization) that mark twentieth century Korean history.
Instructor(s): S. Rhee
Area: Humanities.

AS.300.384. Modern Korean Literature and Film. 3 Credits.
We will examine twentieth century Korean culture through short stories that are canonical in modern Korean literature and through a series of films associated with New Korean Cinema. One aim of the course is to gain a sense of the history against which the literary and cinematic artifacts obtain their representative artistic status. A second aim is to inquire into the relationship between written and filmic texts in order to see the limits and advantages of one medium over another for representing national culture. No prior familiarity with Korean language is required.
Instructor(s): S. Rhee
Area: Humanities.

AS.300.408. Lyric Modernity. 3 Credits.
A comparative literature course on modern lyric and poetics. The main issue of the course is how the lyric voice is constructed and sustained under the pressures of modernization in the United States, Europe, and Korea. We will also emphasize issues of translation and the relationship of music and poetry. Readings will include texts by Adorno, Benjamin, Grossman, von Hallberg and Waters, and poems by Dickinson, Rilke, and Kim among others. All readings available in English. Cross-listing requested with East Asian Studies, GRLL, and English
Instructor(s): S. Rhee
Area: Humanities.

Interdepartmental
AS.360.244. Korean Culture: Past and Present. 3 Credits.
This course will provide an introduction to Korean society and culture through a close study of the recent and highly acclaimed film Chunhyang, which is a theatrical version of a famous 18th century Korean literary work. It provides a complex and visually effective window into late Korean traditional culture, educational system, family and gender issues, literature, and the performing arts. Through class work and readings, students will be able to study the concept of culture as a complex, intricate, and interrelated fabric of meanings and symbols. In this regard, the study of Korea will allow students to begin to acquire the tools to understand many cultures as well as current developments in South and North Korean inter-relations.
Instructor(s): S. Oh
Area: Humanities, Social and Behavioral Sciences.

AS.360.431. Senior Thesis Seminar: East Asian Studies. 3 Credits.
Instructor(s): J. Andreas
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.360.432. Senior Thesis Seminar: East Asian Studies. 3 Credits.
This course is the continuation of Senior Thesis Course 360.431 for students completing their thesis in the East Asian Studies program.
Prerequisites: AS.360.431
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences.

Center for Language Education
AS.373.111. First Year Heritage Chinese. 3 Credits.
This course is designed for students who were raised in an environment in which Chinese is spoken by parents or guardians at home and for those who are familiar with the language and possess native-like abilities in comprehension and speaking. The course therefore focuses on reading and writing (including the correct use of grammar). Cross-listed with East Asian Studies
Instructor(s): L. Lievens.

AS.373.112. First Year Heritage Chinese II. 3 Credits.
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Lab required. Continuation of AS.373.111. Recommended Course Background: AS.373.111 or permission required.
Instructor(s): L. Lievens.

AS.373.115. First Year Chinese. 4 Credits.
This course is designed primarily for students who have no prior exposure to Chinese. The objective of the course is to help students build a solid foundation of the four basic skills—listening, speaking, reading, and writing—in an interactive and communicative learning environment. The emphasis is on correct pronunciation, accurate tones and mastery of basic grammatical structures. Note: Students with existing demonstrable skills in spoken Chinese should take AS.373.111-112. No Satisfactory/Unsatisfactory. Students may choose to attend either lecture at 9am or 3pm on TTh. Cross-listed with East Asian Studies
Instructor(s): N. Zhao; Y. Chiang.

AS.373.116. First Year Chinese II. 4 Credits.
Introductory course in Modern Standard Chinese. Goals: mastery of elements of pronunciation and control of basic vocabulary of 800-900 words and most basic grammatical patterns. Students work first with Pin-Yin system, then with simplified version of written Chinese characters. Continuation of AS.373.115. Note: Student with existing demonstrable skills in spoken Chinese should take AS.373.111-112. Recommended Course Background: AS.373.115 or permission required.
Instructor(s): N. Zhao; Y. Chiang.

AS.373.211. Second Year Heritage Chinese. 3 Credits.
This course is designed for students who finished AS.373.112 with C+ and above (or equivalent). Students in this course possess native-like abilities in comprehension and speaking. The course focuses on reading and writing. Cross-listed with East Asian Studies
Instructor(s): A. Chen
Area: Humanities.
AS.373.212. Second Year Heritage Chinese II. 3 Credits.
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Continuation of AS.373.211.
Recommended Course Background: AS.373.211 or permission required.
Instructor(s): A. Chen
Area: Humanities.

AS.373.215. Second Year Chinese. 4 Credits.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters.
Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Cross-listed with East Asian Studies
Instructor(s): A. Chen; N. Zhao
Area: Humanities.

AS.373.216. Second Year Chinese II. 4 Credits.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters.
Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Recommended Course Background: AS.373.215 or Permission Required. Cross-listed with East Asian Studies
Instructor(s): A. Chen; N. Zhao
Area: Humanities.

AS.373.303. Chinese Calligraphy. 3 Credits.
This is an introductory course on Chinese brush writing. Knowledge of the Chinese language is useful but not essential. You will hear lectures on history, theory and techniques of brush writing plus aspects of Chinese culture associated with characters used. Remaining time will be used for hands-on practice. Taught in English. Cross-listed with East Asian Studies
Cross-listed with East Asian Studies
Instructor(s): R. Hsieh
Area: Humanities.

AS.373.313. Third Year Heritage Chinese. 3 Credits.
This course is designed for those who have already taken AS.373.212 or equivalent. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be introduced on a regular basis. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.211 AND AS.373.212 or instructor's permission
Instructor(s): A. Chen
Area: Humanities.

AS.373.314. Third Year Heritage Chinese II. 3 Credits.
This course is a continuation of AS.373.313. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be included on a regular basis.
Recommended Course Background: AS.373.313 or Permission Required.
Lab required.
Prerequisites: AS.373.313 or equivalent
Instructor(s): A. Chen
Area: Humanities.

AS.373.315. Third Year Chinese. 3 Credits.
This two-semester course consolidates and further expands students' knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible and written assignments will be given. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.216 or equivalent
Instructor(s): L. Lievens
Area: Humanities.

AS.373.316. Third Year Chinese II. 3 Credits.
This two-semester course consolidates and further expands students' knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible, and written assignments will be given. Continuation of AS.373.315.
Recommended Course Background: AS.373.315 or permission required.
Instructor(s): L. Lievens
Area: Humanities.

AS.373.415. Fourth Year Chinese. 3 Credits.
This course is designed for students who finished AS.373.316 with a C+ or above (or equivalent). Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students are supposed to be able to understand most of the readings with the aid of a dictionary, so that class discussion is not focused primarily on detailed explanation of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings' content. Cross-listed with East Asian Studies
Prerequisites: AS.373.315
Instructor(s): L. Lievens
Area: Humanities.

AS.373.416. Fourth Year Chinese II. 3 Credits.
Continuation of AS.373.415. Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students should understand most of the readings with the aid of a dictionary, so that class discussion need not focus primarily on detailed explanations of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings' content. Recommended Course Background: AS.373.415 or Permission Required. Cross-listed with East Asian Studies
Instructor(s): L. Lievens
Area: Humanities.

AS.373.421. Classical Chinese. 3 Credits.
Classical Chinese will introduce key features of grammar, syntax, and usage, along with the intensive study of a set of readings in the language. Readings are drawn from a variety of philosophical and historical texts. Students are required to have knowledge of traditional Chinese characters in order to read short selections of early literary prose. Recommended Course Background: Four years of Chinese Language courses at JHU or equivalent language skills.
Instructor(s): A. Chen
Area: Humanities.
AS.373.451. Topics in Chinese Media. 3 Credits.
The main focus of this course is to expand the student's knowledge of four essential skills in Chinese culture and to deepen the student's knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students' reading comprehension, maintain conversation skills through class discussion, increase understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Recommended Course Background: Completion of four years of Chinese language or permission required. Instructor(s): N. Zhao
Area: Humanities.

AS.373.452. Topics in Chinese Media II. 3 Credits.
The main focus of this course is to expand the student's knowledge of four essential skills in Chinese language and to deepen the student's knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students' reading comprehension, maintain conversation skills through class discussion, increase understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Continuation of 373.451. Recommended Course Background: AS.373.451 or its equivalent.
Area: Humanities.

AS.378.101. Slow-Paced Beg Japanese I. 3 Credits.
Part one of a two-semester introductory course for students who want to study Beginning Japanese at a slower pace, attending three classes rather than five classes per week. Lab required. Note: Those who wish to continue beyond these two semesters must enroll in Beginning Japanese 378.116 the following Spring. Cross-listed with East Asian Studies Instructor(s): S. Katagiri.

AS.378.102. Slow-Paced Beg Jap II. 3 Credits.
Part two of a four-semester introductory course for students who want to study Beginning Japanese at a slower pace, attending three classes rather than five classes per week. Lab required. A continuation of 378.101. Note: Students who wish to continue beyond these two semesters must enroll in Beginning Japanese AS.378.116 the following spring. Recommended Course Background: AS.378.101 or permission required.
Instructor(s): S. Katagiri.

AS.378.115. First Year Japanese. 4 Credits.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the year, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 150 kanji in context. Knowledge of grammar will be expanded significantly in AS.378.215. No Satisfactory/Unsatisfactory. Student may choose to attend either lecture at 10:30 am or 12 pm on TTh. Cross-listed with East Asian Studies Instructor(s): M. Johnson; S. Katagiri.

AS.378.116. First Year Japanese II. 4 Credits.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the fall term, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 60 kanji in context. Knowledge of grammar will be expanded significantly in 2nd year Japanese. May not be taken Satisfactory/Unsatisfactory. Recommended Course Background: AS.378.115
Instructor(s): M. Johnson; S. Katagiri.

AS.378.215. Second Year Japanese. 4 Credits.
Training in spoken and written language, increasing their knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Recommended Course Background: AS.378.115 and AS.378.116 or equivalent.
Instructor(s): M. Johnson; M. Nakao
Area: Humanities.

AS.378.216. Second Year Japanese II. 4 Credits.
Continuation of Beginning Japanese and Intermediate Japanese I. Training in spoken and written language, increasing students’ knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Lab required. Recommended Course Background: AS.378.215 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.311. Japanese Conversation. 2 Credits.
Advanced training in spoken Japanese, at the completion of Intermediate Japanese, available to those with equivalent proficiency. Students will develop more interactive skills, using authentic audio/video materials. No reading/writing instructions. Recommended Course Background: AS.378.216 or equivalent.
Instructor(s): K. Zon.

AS.378.312. Japanese Conversation. 2 Credits.
Instructor(s): K. Zon.

AS.378.315. Third Year Japanese. 3 Credits.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Cross-listed with East Asian Studies
Prerequisites: AS.378.215-216
Instructor(s): S. Katagiri
Area: Humanities.

AS.378.316. Third Year Japanese II. 3 Credits.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Lab required. Continuation of AS.378.315. Recommended Course Background: AS.378.315 or equivalent.
Instructor(s): S. Katagiri
Area: Humanities.
**AS.378.396. Fundamentals of Japanese Grammar. 2 Credits.**

This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It is also appropriate for graduate students who need to be able to read materials written in Japanese. Recommended Course Background: AS.378.115-116 or equivalent.

Instructor(s): M. Johnson

Area: Humanities.

**AS.378.397. Fundamentals of Japanese Grammar. 2 Credits.**

Continued from 378.396: Fundamentals of Japanese Grammar. This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It covers complex grammatical items introduced in the 2nd year level from a higher level, linguistic perspective. It is also appropriate for graduate students who need to be able to read materials written in Japanese.

Prerequisites: 378.116 or equivalent or 378.396

Instructor(s): M. Nakao

Area: Humanities.

**AS.378.415. Fourth Year Japanese. 3 Credits.**

By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Recommended Course Background: AS.378.315 and AS.378.316 or equivalent.

Instructor(s): M. Nakao

Area: Humanities.

**AS.378.416. Fourth Year Japanese II. 3 Credits.**

By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Lab required. Recommended Course Background: AS.378.415

Instructor(s): M. Nakao

Area: Humanities.

**AS.378.611. Readings in Japanese Studies.**

This course is designed for graduate students (particularly in East Asian Studies) and undergraduate students whose proficiency level is higher than 4th-year Japanese as offered at Johns Hopkins University or equivalent and those who plan to pursue studies utilizing written Japanese materials. Students will learn effective methods for reading Japanese materials, varying from works of literature to modern academic articles on topics of students’ interest.

Instructor(s): C. Kang

Area: Humanities.

**AS.378.612. Readings in Japanese Studies II.**

This course is designed for graduate students (particularly in East Asian Studies) and undergraduate students whose proficiency level is higher than 4th-year Japanese as offered at Johns Hopkins University or equivalent and those who plan to pursue studies utilizing written Japanese materials. Students will learn effective methods for reading Japanese materials, varying from works of literature to modern academic articles on topics of students’ interest. Cross-listed with East Asian Studies.

**AS.380.101. First Year Korean. 3 Credits.**

Introduces the Korean alphabet, hangeul. Covers basic elements of the Korean language, high-frequency words and phrases, including cultural aspects. Focuses on oral fluency reaching Limited Proficiency where one can handle simple daily conversations. No Satisfactory/ Unsatisfactory. Cross-listed with East Asian Studies

Instructor(s): C. Kang

**AS.380.102. First Year Korean II. 3 Credits.**

Focuses on improving speaking fluency to Limited Proficiency so that one can handle simple daily conversations with confidence. It provides basic high-frequency structures and covers Korean holidays. Continuation of AS.380.101. Recommended Course Background: AS.380.101 or permission required.

Instructor(s): C. Kang

**AS.380.201. Second Year Korean. 3 Credits.**

Aims for improving oral proficiency and confident control of grammar with vocabulary building and correct spelling intended. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness. Project due on Korean cities. Existing demonstrable skills in spoken Korean preferred.

Prerequisites: Prereqs: AS.380.101 and AS.380.102

Instructor(s): C. Kang

Area: Humanities.

**AS.380.202. Second Year Korean II. 3 Credits.**

Aims for improving writing skills with correct spelling. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness, including discussion on family tree. Continuation of AS.380.201. Recommended Course Background: AS.380.201 or equivalent.

Instructor(s): C. Kang

Area: Humanities.

**AS.380.301. Third Year Korean. 3 Credits.**

Emphasizes reading literacy in classic and modern Korean prose, from easy essays to difficult short stories. Vocabulary refinement and native-like grasp of grammar explored. Project due on Korean culture. Cross-listed with East Asian Studies

Instructor(s): C. Kang

Area: Humanities.

**AS.380.302. Third Year Korean II. 3 Credits.**

Emphasizes reading literacy in classic and modern Korean prose. By reading Korean newspapers and professional articles in one’s major, it enables one to be well-versed and truly literate. Continuation of AS.380.301. Cross-listed with East Asian Studies Prerequisite: AS.380.301 or equivalent.

Instructor(s): C. Kang

Area: Humanities.

**Program in Museums and Society**

**AS.389.369. Encountering the Art of East Asia: Museum Display, Theory and Practice. 3 Credits.**

Students reconsider the exhibition and interpretation of East Asian Art at the Walters Art Museum, developing a pilot installation to suggest a new permanent display. M&S Practicum Course. Class meets at the Walters Art Museum (extended time to allow for travel). Cross-listed with East Asian Studies.

Instructor(s): R. Mintz

Area: Humanities.
Geography Environmental Engineering
EN.570.407. Comparison of Environmental Challenges and Governance in China and the US. 3 Credits.
In cooperation with the School of the Environment at Nanjing University, Nanjing, China, this course will study China's environmental challenges and governance in the context of America's own environmental challenges and governance system. Case studies will involve greenhouse gas emissions and a comparison of water quality issues in Tai Lake and the Chesapeake Bay. We will consider how developments may shape business, government, and culture, and the ways in which China and America may learn from one another. The class sessions will be conducted in part "live," in part by teleconference with Nanjing University, and in part by web (including communications with Nanjing University students and faculty). The objectives for the course are to 1) Provide students with basic information and concepts of law, business, and governance needed to understand 21st century environmental governance challenges; 2) Provide students exposure to important environmental problems facing both China and America; 3) Provide students with alternative frameworks needed to sift through and understand the wealth of information about environmental challenges and opportunities faced by China in the globalized world; and 4) Encourage students to learn to observe and think independently about how to frame and address questions of China environmental challenges and governance which may be key to the 21st century.
Instructor(s): E. Bouwer; H. Alavi
Area: Social and Behavioral Sciences.

Economics
The Department of Economics offers programs designed to improve the understanding of important economic problems and to provide the tools needed for the critical analysis of these problems and for dealing with them in practice.

On the undergraduate level, the department provides both for those who want to become professional economists and for those interested in a specialty related to economics, such as business, law, government, history, health care management, or environmental engineering. Still other students are simply interested in improving their understanding of society or making informed assessments of economic policies as citizens or making wise decisions about personal finances.

On the graduate level, the department provides advanced training for students preparing for careers as professional economists. The program encompasses such fields as macroeconomics, microeconomic theory, econometrics, labor economics, international economics, industrial organization, economic development, and public finance, with an emphasis on the application of economic theory and quantitative methods. Because of the small number of graduate students admitted, they can work closely with faculty in graduate courses and seminars, and have easy and informal access to faculty members.

The introductory course AS.180.101 Elements of Macroeconomics-AS.180.102 Elements of Microeconomics is open to all students. Courses at the 200-level have Elements of Economics (AS.180.101 and AS.180.102) as prerequisites.

AS.180.301 Microeconomic Theory and AS.180.302 Macroeconomic Theory courses have AS.180.101 and AS.180.521 as well as Calculus I (AS.110.106 or equivalent) as prerequisites. All 300-level courses above 301 and 302 have Microeconomic and/or Macroeconomic Theory (AS.180.301, AS.180.302) as prerequisites (or, with permission of the instructor, corequisites), as well as Elements of Economics and Calculus. Some 300-level courses have additional prerequisites; see individual course listings. Independent study is available, subject to the consent of the department and of the faculty member with whom the student wants to work.

Subject to the consent of the instructor, graduate courses at the 600-level are open to qualified undergraduates. They receive 1.5 undergraduate credits per class hour. The 600-level courses for which advanced undergraduates are most likely to be qualified are AS.180.601 Microeconomic Theory and AS.180.603 Macroeconomic Theory.

Requirements for the B.A. Degree
(See also General Requirements for Departmental Majors (p. 33.).)
To receive the B.A. degree with a major in economics, the student must do satisfactory work in the following courses, or work judged at least equivalent by the department.

### Economics Core
- **AS.180.101 Elements of Macroeconomics**
- **& AS.180.102 Elements of Microeconomics**
- **AS.180.301 Microeconomic Theory**
- **& AS.180.302 Macroeconomic Theory**
- **AS.180.334 Econometrics**

### Economics Electives
- Five regular courses

### Mathematics
- At least one term of differential calculus

### Statistics
- **EN.550.111Statistical Analysis I**

* Courses may not be internships, independent study courses, or Intersession courses. At least two of the five electives must be at the 300-level. A minimum grade of C- is required for any course to be applied to meeting requirements for the major, including courses taken first semester freshman year. Except for AS.180.301 Microeconomic Theory, AS.180.302 Macroeconomic Theory, AS.180.334 Econometrics, AS.180.521 Research in Economics, and AS.180.522 Senior Thesis the department does not necessarily offer all 200- to 500-level courses every year. Students should plan their programs accordingly, in consultation with faculty.

** The above courses in mathematics and statistics may be used for part of the general requirements for the B.A. degree with a departmental major. EN.550.111 Statistical Analysis I or equivalent is a prerequisite for Econometrics. For the economics major AS.180.101 Elements of Macroeconomics and/or AS.180.102 Elements of Microeconomics may be taken in the JHU summer program. All other economics courses for the major must be regular courses offered during the academic year within the Department of Economics, except for other courses approved by the department’s director of undergraduate studies. (Qualifying courses that are part of a study-abroad program will generally be approved.) The Senior Honors Thesis sequence (AS.180.521 Research in Economics and AS.180.522 Senior Thesis) cannot be used to satisfy any of the requirements for the major.
Center for Financial Economics (CFE)

Founded in 2008 and housed in the Economics Department in the Krieger School of Arts and Sciences at Johns Hopkins, the Center for Financial Economics blends the study of finance and economics, providing in-depth training and cutting-edge research in both. The dual research and teaching missions of the Center are premised on the belief that a deep understanding of modern economies requires an integrated treatment of finance and the broader economic forces driving economic progress. The recent financial crisis vividly illustrates the vital need for improved understanding of these issues on the part of practitioners, policymakers, and academics.

The CFE offers an undergraduate minor, producing expertise in finance within the context of a top-notch liberal arts education. The minor will equip students with a thorough foundation in the workings of financial markets and their role in the broader economy, providing a foundation for careers in finance, business, academics, and government. The Center is working toward offering a financial economics major and a Ph.D. in financial economics.

The Minor in Financial Economics

The main objective of the minor is to provide students with training in the conceptual framework, guiding concepts, and technical tools of modern finance. The broader goal is to provide insights into the large and the small—the macro and micro—of how this framework helps us understand the workings of the economy. The minor in financial economics includes four required courses and two elective courses chosen from the list below.

**Required Courses**

</table>

The minor is open to all majors. One cannot take both the economics and financial economics minor. For economics majors, there is a restriction on double-counting; the two elective courses counting toward the minor cannot also count toward the economics major.

Requirements for Admission

To apply for admission, an application must submit an official transcript of all academic work beyond secondary school and at least two letters of recommendation from previous instructors. Applicants must submit scores from the Graduate Record Examination. All applicants who have not done their undergraduate work in a university where English is the sole language of instruction must take the TOEFL. We have a minimum
required score of 100 on the Internet-based test (IBT), or 250 on the computer-based test (CBT), or 600 on the old paper-based test (PBT).

Students should have knowledge of economic theory and statistics and a strong background in mathematics including differential and integral calculus and linear algebra. Admission decisions are primarily based on GRE scores (especially quantitative), academic record (especially in economics and mathematics courses), and letters of recommendation. We especially welcome applications from under-represented minorities, as diversity is important in our graduate program.

Requirements for the M.A. Degree

The department does not admit students from outside Johns Hopkins University who intend to work only for an M.A. However, it does offer this degree as an intermediate step toward the Ph.D. or as a final degree to some of those who do not complete their doctoral work.

Beyond the general university requirements, the department requires for the master’s degree either two years of satisfactory graduate course work or one year of satisfactory graduate course work and an acceptable master’s essay.

Requirements for the Ph.D. Degree

The departmental requirements for the doctor’s degree include the following:

- Basic course work in economic theory, mathematical methods of economics, and econometrics, and additional work in specialized branches of economics depending on his/her previous training and special interests. Candidates may take relevant work in related departments, such as History, Mathematics, Mathematical Sciences, Political Science, Sociology, Anthropology, and Public Health.
- The comprehensive examination. Administered by the department, this consists of two written examinations designed to test the candidate’s grasp of micro- and macroeconomics, and a research paper. The written examinations are usually taken at the beginning of the third term, and the research paper is submitted during the fourth term.
- A dissertation. This should be an original investigation worthy of publication, prepared under the supervision of one or more members of the faculty. The candidate must submit the dissertation in final typed form at least three weeks before the date of the Graduate Board Oral Examination.

Financial Aid

The department offers a variety of forms of financial support to graduate students enrolled in the Ph.D. program. Students may receive full or partial tuition fellowships, which may be accompanied by cash stipends or teaching assistantships. The department guarantees financial aid for a minimum of five years of graduate study conditional on satisfactory performance and often for a sixth year as well. In the 2013-2014 academic year, full stipends or assistantships will carry an award of approximately $21,000 per year. The T. Rowe Price Fellowship, established by the T. Rowe Price Associates Foundation to honor the memory of Mr. Price, is awarded to an entering graduate student each year. It covers tuition and adds several thousand dollars to the basic stipend for three years and provides for a teaching assistantship thereafter. At the same time, it is possible that the department will be able to offer one or more of the university’s Owen Fellowships to its outstanding graduate applicants. This fellowship consists of a stipend of $27,000 toward the student’s first three years. Although aid is provided on a yearly basis subject to the availability of financial support from the university, it is the department’s policy to continue aid for at least four and usually five years, provided the student is making satisfactory progress.

Carl Christ Fellowship

In the academic year 1989–90, the department established the Carl Christ Fellowship fund to honor one of its faculty members for his distinguished service and achievements. The proceeds of the fund are used to support outstanding graduate students at the dissertation stage of their research.

For further information about graduate study in economics, contact the director of graduate admissions, Department of Economics.

Faculty

Chair
Robert A. Moffitt
Krieger-Eisenhower Professor: labor economics, applied econometrics, public finance, population economics.

Professors
Laurence M. Ball
Macroeconomics.

Christopher Carroll
Macroeconomics.

Gregory Duffee
Carl Christ Professor: finance.

Jon Faust
Louis J. Maccini Professor, Director of the Center for Financial Economics: econometrics, macroeconomics, financial economics.

Mark Gersovitz
Development economics, public finance.

Olivier Jeanne
International macroeconomics.

Edi Karni
Scott and Barbara Black Professor: economics of uncertainty and information, microeconomic theory, decision theory.

M. Ali Khan
Abram G. Hutzler Professor: mathematical economics, microeconomic theory, intellectual history.

Jonathan Wright
Time series econometrics, empirical macroeconomics, finance.

Associate Professors
Hulya Eraslan
Political economics, game theory, corporate finance.

Yingyao Hu
Econometrics, applied microeconomics.

Assistant Professors
Jorge Balat
Industrial Organization, Applied Microeconomics, Applied Econometrics.
For current course information and registration go to https://isis.jhu.edu/classes/

**Courses**

**AS.180.101. Elements of Macroeconomics. 3 Credits.**
An introduction to the economic system and economic analysis, with emphasis on total national income and output, employment, the price level and inflation, money, the government budget, the national debt, and interest rates. The role of public policy. Applications of economic analysis to government and personal decisions. Students should have basic facility with graphs and algebra.
Instructor(s): R. Barbera
Area: Social and Behavioral Sciences.

**AS.180.102. Elements of Microeconomics. 3 Credits.**
An introduction to the economic system and economic analysis with emphasis on demand and supply, relative prices, the allocation of resources, and the distribution of goods and services; theory of consumer behavior, theory of the firm, and competition and monopoly, including the application of microeconomic analysis to contemporary problems. Students should have basic facility with graphs and algebra.
Instructor(s): B. Hamilton
Area: Social and Behavioral Sciences.

**AS.180.105. International Finance and the Current Economic Crisis. 3 Credits.**
Instructor(s): A. Chaboud.

**AS.180.171. Topics in Political Economy. 3 Credits.**
Societies make their key economic decisions under the constraints imposed by their political institutions. This course studies the interaction between economics and politics in public policy design, with topics ranging from fiscal policy to international development. Some recurring questions include why inefficient policies get enacted and how different political institutions give rise to different policy outcomes.
Instructor(s): L. Karakas
Area: Social and Behavioral Sciences.

**AS.180.201. Behavioral Finance. 3 Credits.**
In recent years, the assumptions of traditional finance models that market participants are generally rational and prices of securities accurately reflect all available information came under challenge. The field of behavioral finance argues that financial markets are best understood with models in which at least some agents are not fully rational. In this course, we will examine behavioral finance models and their practical applications. This course is based on Harvard Business School cases. Recommended Course Background: AS.180.102
Instructor(s): A. Scherbina.

**AS.180.203. Faculty Research in Economics. 1 Credit.**
This course will consist of a series of informal lectures by various professors in the Department of Economics. Each lecture will consist of a description of a professional research project which he/she has undertaken over the course of his/her profession career. S/U grading only.
Prerequisites: Prereqs: AS.180.101 AND AS.180.102
Instructor(s): B. Hamilton.
AS.180.215. Game Theory and the Social Sciences. 3 Credits.
This course provides an introduction to game theory with an emphasis on applications. Applications in economics, political science, business, military science, history, biology, theology and recreation will be covered. No prior knowledge of game theory is presumed and the required mathematical background is minimal (high school algebra and one term of calculus will be sufficient).
Instructor(s): L. Karakas
Area: Social and Behavioral Sciences.

AS.180.228. Economic Development. 3 Credits.
Diagnostic test on Elements of Economics is required to be taken in the second week. Recommended Course Background: AS.180.101-AS.180.102
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences.

AS.180.233. Introduction to the European Union. 3 Credits.
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

AS.180.234. Economics of the European Union. 3 Credits.
Prerequisites: AS.180.233
Writing Intensive.

AS.180.235. Introduction to International Political Economy. 3 Credits.
Instructor(s): D. Heisenberg
Area: Social and Behavioral Sciences.

AS.180.236. Business Gov’t & the Int. Economy. 3 Credits.
Writing Intensive.

AS.180.241. International Trade. 3 Credits.
Theory of comparative advantage and the international division of labor: the determinants and pattern of trade, factor price equalization, factor mobility, gains from trade and distribution of income, and theory and practice or tariffs and other trade restrictions.
Prerequisites: AS.180.101-102
Instructor(s): T. Bertrand
Area: Social and Behavioral Sciences.

AS.180.242. International Monetary Economics. 3 Credits.
Balance of payments concepts and the trade balance, exchange rates and the foreign exchange market, expectations, interest rates and capital flows, central banking and monetary policy in open economies, exchange rate regimes and macroeconomic policy. Formerly AS.180.342
Prerequisites: AS.180.101
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

AS.180.243. Memorandums of Misunderstanding. 3 Credits.
For centuries, international trade has been a source of intense debate within and among nations. Proponents of free trade claim that trade benefits all nations in terms of higher incomes, lower consumer prices, and greater product variety. Opponents point to the painful economic adjustments that accompany the removal of trade barriers. In recent years, the debate has expanded to include labor rights, the environment, health and safety, intellectual property, and national sovereignty. Through the lens of economic theory, we will evaluate the arguments put forth by proponents and opponents of free trade. We will apply these theories to several case studies, with a particular focus on the conflicts that have arisen since the establishment of the World Trade Organization.
Prerequisites: Prereq. AS.180.102
Instructor(s): P. Seneviratne
Area: Social and Behavioral Sciences.

AS.180.244. War and Peace in International Trade. 3 Credits.
Instructor(s): M. Linask
Area: Social and Behavioral Sciences.

AS.180.252. Economics of Discrimination. 3 Credits.
What does the empirical evidence show, and how can we explain it? How much of the difference in observed outcomes is driven by differences in productivity characteristics and how much is due to discrimination? How have economists theorized about discrimination and what methodologies can be employed to test those theories? What has been the impact of public policy in this area; how do large corporations and educational institutions respond; and what can we learn from landmark lawsuits? The course will reinforce skills relevant to all fields of applied economics, including critical evaluation of the theoretical and empirical literature, the reasoned application of statistical techniques, and analysis of current policy issues.
Prerequisites: AS.180.102
Instructor(s): J. Faust
Area: Social and Behavioral Sciences

AS.180.266. Financial Markets and Institutions. 3 Credits.
Understanding design and functioning of financial markets and institutions, connecting theoretical foundations and real-world applications and cases. Basic principles of asymmetric information problems, management of risk. Money, bond, and equity markets; investment banking, security brokers, and venture capital firms; structure, competition, and regulation of commercial banks. Importance of electronic technology on financial systems.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): J. Faust
Area: Social and Behavioral Sciences.
AS.180.276. Economics of the Internet. 3 Credits.
This course explores the Internet from an economist’s perspective, with the objective of understanding the effects on pricing and competitive behavior brought about by lower search and transaction costs in online markets. Unique features of information goods, product differentiation, market dynamics, reputation, and online auctions are among the topics examined. Dean’s Teaching Fellowship course.
Instructor(s): L. Tiererova
Area: Social and Behavioral Sciences.

AS.180.289. Economics of Health. 3 Credits.
Application of economic concepts and analysis to the health services system. Review of empirical studies of demand for health services, behavior of providers, and relationship of health services to population health levels. Discussion of current policy issues relating to financing and resource allocation.
Prerequisites: AS.180.102
Instructor(s): D. Bishai
Area: Social and Behavioral Sciences.

AS.180.301. Microeconomic Theory. 4 Credits.
An introduction to the modern theory of allocation of resources, starting with the theories of the individual consumer and producer, and proceeding to analysis of systems of interacting individuals, first in the theory of exchange, then to systems which include production as well.
Prerequisites: Corequisite/Prerequisite: AS.180.101 180.101 must be taken EITHER BEFORE (prerequisite) enrolling in 180.301 or AT THE SAME TIME (corequisite).
Instructor(s): E. Karnit; M. Uyanik
Area: Social and Behavioral Sciences.

AS.180.302. Macroeconomic Theory. 4 Credits.
The course provides a treatment of macroeconomic theory including a static analysis of the determination of output, employment, the price level, the rate of interest, and a dynamic analysis of growth, inflation, and business cycles. In addition, the use and effectiveness of monetary and fiscal policy to bring about full employment, price stability, and steady economic growth will be discussed.
Prerequisites: AS.180.101 and Calculus 1 or equivalent
Instructor(s): L. Ball; Staff
Area: Social and Behavioral Sciences.

AS.180.303. The Global Finance Crisis. 3 Credits.
The course will first review the main causes of the crisis in financial regulation, monetary policy, as well as global financial imbalances. The prospects for economic recovery and the current challenges to fiscal and monetary policies will then be discussed. The third part of the course will focus on the long-run implications of the crisis for economic policy. The course will rely on mathematical modeling of key microeconomic and macroeconomic aspects of the crisis, in particular in the areas of banking and monetary policy.
Prerequisites: AS.180.301 AND AS.180.302
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

AS.180.306. The Business of Sports. 3 Credits.
This course uses data from the sports industry to test standard microeconomic theories of individual and firm behavior. The major focus of this course will be applied empirical analysis.
Instructor(s): B. Phelan
Area: Social and Behavioral Sciences.

AS.180.307. Advanced Seminar in the Future of Finance. 3 Credits.
In this seminar, we will discuss broad ranging views on the future of finance. Most classes will involve presentations by and discussions with experts in the field on their perspectives regarding how finance will evolve in light of the current turmoil and rapidly changing conditions. We will place an emphasis on bringing in speakers with a wide range of views, including controversial views. Speakers will come from the finance industry, government, and academics. The grade will be based on classroom participation and a term paper.
Prerequisites: AS.180.301 AND ( AS.180.263 OR AS.180.367 )
Instructor(s): J. Wright; R. Barbera.

AS.180.308. Financial Regulations in the US. 3 Credits.
This course begins with the time of the great framers and adopts a historical approach to U.S. financial regulations. By examining all major crises and the respective policy responses, the course will provide a narrative on the evolution of the regulatory landscape in America. Students will also be exposed to influential academic papers that address the essentiality (and even the redundancies and failures) of key aspects of financial regulations, including deposit insurance, bank capital and liquidity requirements, and supervisory rules. Dean’s Teaching Fellowship course. Recommended courses: AS.180.261, AS.180.266, AS.180.302
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): H. Nguyen
Area: Social and Behavioral Sciences.

AS.180.310. Economics of Antitrust. 3 Credits.
This course explores the economic rationale for, and consequence of, antitrust laws. In addition to economic analysis we will study landmark antitrust cases.
Prerequisites: AS.180.301
Instructor(s): B. Hamilton
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.321. The Economics of Growing-Up. 3 Credits.
The goal of this course is to use economic models to investigate life events such as going to school, getting married, and having children. The course will focus on individual behavior and outcomes in six important stages of the life cycle: early childhood, schooling, adolescence, marriage and divorce, child bearing years, and retirement. While the course is designed to introduce students to a variety of economic theory and empirical techniques, the material is designed to prepare upper level students to write a proposal on an original research question.
Prerequisites: AS.180.301
Instructor(s): G. Pauley
Area: Social and Behavioral Sciences.

AS.180.334. Econometrics. 3 Credits.
Introduction to the methods of estimation in economic research. The first part of the course develops the primary method employed in economic research, the method of least squares. This is followed by an investigation of the performance of the method in a variety of important situations. The development of a way to handle many of the situations in which ordinary least squares is not useful, the method of instrumental variables, concludes the course.
Prerequisites: Prereq or Coreq: AS.180.301 or AS.180.302
Instructor(s): J. Balat; R. Bush
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.335. Topics in Econometrics. 3 Credits.
Area: Social and Behavioral Sciences.
AS.180.336. Economic Forecasting. 3 Credits.
Will sketch out a strategy for anticipating economic turning points. Business cycle basics, monetary policy/financial market/real economy interactions will be reviewed. Long-term growth issues will be explored. Prerequisites: AS.180.101 AND AS.180.102 AND AS.180.302 or Perm. Req'd.
Instructor(s): R. Barbara
Area: Social and Behavioral Sciences.

AS.180.337. Financial Econometrics. 3 Credits.
This course introduces financial models and the necessary techniques to estimate and test these models. E.g. ARCH models, GARCH models, option pricing models, efficient market hypothesis, as well as Risk management models. Recommended Course Background: AS.180.367
Prerequisites: AS.180.334
Instructor(s): J. Harrington; T. Woutersen
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.351. Labor Economics. 3 Credits.
The course discusses various issues in labor markets from the perspective of economic theory. We first study the major forces at work that shape labor market behavior; firms' labor demand and workers' labor supply. Then we discuss the equilibrium behavior of employment and wages. Using these tools, we also cover various applied topics in labor economics, such as minimum wage regulations, male-female wage differentials, human capital investment, worker mobility, and unemployment. Prerequisites: Prereq: AS.180.301
Instructor(s): Staff
Area: Social and Behavioral Sciences.

AS.180.355. Economics of Poverty and Inequality. 3 Credits.
This course focuses on the economics of poverty and inequality. It covers the measurement of poverty and inequality, facts and trends over time, the causes of poverty and inequality with a focus on those related to earnings and the labor market, and public policy toward poverty and inequality, covering both taxation and government expenditure and programs. By the nature of the material, the course is fairly statistical and quantitative. Students should have an intermediate understanding of microeconomic concepts. Basic knowledge of regression analysis is also helpful. Prerequisites: AS.180.301
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

AS.180.356. Public Finance. 3 Credits.
Prerequisites: AS.180.301
Area: Social and Behavioral Sciences.

AS.180.366. Corporate Finance. 3 Credits.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): G. Duffee
Area: Social and Behavioral Sciences.

AS.180.367. Investment-Portfolio Management. 3 Credits.
Instructor(s): J. Wright
Area: Social and Behavioral Sciences.

AS.180.368. Managerial Economics and Business Strategy. 3 Credits.
Seminar on quantitative concepts, decision-making, and strategy in business organizations. Overall context is ‘value’ – how it is measured and maximized long term. Microeconomic theory of the firm, competitive analysis, corporate finance. Prerequisites: AS.180.301 AND EN.550.111 AND ( EN.551.302 OR AS.180.367 ) or Perm. Req'd.
Instructor(s): J. Knapp
Area: Social and Behavioral Sciences.

AS.180.369. Research in Economics of Financial Markets. 3 Credits.
In this course, we undertake a semester-long research project from beginning to end. Students will gain advanced knowledge of the functioning of financial markets, will be able to apply their econometrics technique, and will develop a deep understanding of the process of creating research. The course is not based on lectures. Rather, the class will decide on a research question, and students will work together to develop hypotheses, gather data, and analyze the data to provide new insight onto the issue. Grading is based on participation, periodic drafts of the research in progress, a final paper, and a final presentation. In past semesters, we have analyzed the workings of new issues (IPO) markets, examined long-term patterns in M&A activity, measured the impact of technology on trading costs, and studied the impact of the 2008 ban on short selling in financial stocks. Prerequisites: AS.180.301 AND AS.180.334
Instructor(s): C. Fohlin
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.370. Financial Market Microstructure. 3 Credits.
Prerequisites: AS.180.301
Instructor(s): C. Fohlin
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.371. Industrial Organization. 3 Credits.
Investigation of firm behavior in markets characterized by imperfect competition. Imperfect competition lies in between monopoly and perfect competition and characterizes most major industries in modern capitalist economies. Central issues to be covered in the course include what determines the intensity of competition? What determines the extent of entry and exit? How is it that some firms consistently dominate their industries?
Instructor(s): E. Krasnokutskaya
Area: Social and Behavioral Sciences.

AS.180.373. Corporate Restructuring. 3 Credits.
The objective of this course is to familiarize students with financial, legal and strategic issues associated with corporate restructuring process. Main focus of the course is on the restructuring of financially distressed firms. The course surveys a variety of restructuring methods (out-of-court workouts, exchange offers, prepackaged bankruptcies, Chapter 11 bankruptcies, insolvency practices in other countries) available to troubled firms. A small portion of the course is concerned with restructuring employee contracts and equity claims (equity carve-outs, spin-offs, tracking stock). AS.180.263 Corporate Finance recommended.
Prerequisites: AS.180.301
Instructor(s): H. Eraslan
Area: Social and Behavioral Sciences.
AS.180.376. Economics of the Internet. 3 Credits.
The course covers advanced theory and econometric methods to analyze economics of on-line markets. The focus of the discussion is on implications of these new markets and institutions for economic policy and efficiency. The topics include: standards, advertising, on-line auctions, networks and platforms.

AS.180.385. Evolution and Economics. 3 Credits.
This course provides an introduction to evolutionary theory and its applications to modern economics. We start by introducing formal models of the driving forces of evolution: mutation, selection, and survival of the fittest. Next we investigate how these forces have shaped human preferences and behaviors that are typically taken as given in economic models. Finally, we discuss the evolution of social systems like the economy we live in.
Instructor(s): A. Korinek
Area: Social and Behavioral Sciences.

AS.180.389. Social Policy Implications of Behavioral Economics. 3 Credits.
Economists increasingly incorporate insights from psychology into models of rational decision-making. Known as "behavioral economics", this line of research considers how, for example, emotions, rules-of-thumb, biased beliefs and time-inconsistent preferences influence how we make choices. Behavioral economics increasingly pervades policy discussions on topics as diverse as: obesity, the role of media, subprime mortgages and voting patterns. Behavioral models are certainly novel, but do they help us to design superior social policies? With the goal of preparing students to address this question, this course (1) provides a thorough overview of the main contributions of behavioral economics, highlighting departures from more traditional economic models and (2) emphasizes how behavioral economic models might (or might not) improve how we think about social policy.
Prerequisites: Prereqs: AS.180.301 AND AS.180.334 or knowledge of statistical analysis up to the level of multi-variate regression.
Instructor(s): N. Papageorge
Area: Social and Behavioral Sciences.

AS.180.390. Health Economics & Developing Countries. 3 Credits.
Prerequisites: AS.180.301
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences Writing Intensive.

AS.180.391. Economics of China. 3 Credits.
Discussion of the economic experience of Post-War China, primarily emphasizing topics rather than historical narrative: agriculture, industry including corporate governance and public enterprises, international trade, population, migration, education, health, public finances among other topics.
Prerequisites: AS.180.301 OR AS.180.228
Instructor(s): M. Gersovitz Writing Intensive.

AS.180.393. Economics of Africa. 3 Credits.
Discussion of the economic experience of post-colonial Africa emphasizing topics rather than a historical narrative: agriculture, manufacturing, trade, population, education, health, public finances among others. Students are responsible for a research paper, topic choice and paper development in close consultation with the instructor, students to give a class presentation on paper findings. Course qualifies as writing intensive for the writing requirement.
Prerequisites: AS.180.228 or permission of instructor
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences Writing Intensive.

AS.180.501. Independent Study. 0 - 3 Credit.
Instructor(s): L. Ball; N. Papageorge.

AS.180.502. Independent Study. 0 - 3 Credit.
Instructor(s): Staff.

AS.180.503. Independent Study. 0 - 3 Credit.
Instructor(s): B. Morgan; O. Jeanne.

AS.180.521. Research in Economics. 2 Credits.
The assignment in this course is to complete the initial stages of research for the Senior Honors Thesis in Economics. Students will work independently under the supervision of a research/thesis advisor. The contact (in spring of Junior year) should be the course instructor listed for this course. He/she will coordinate registration and grade-reporting, and will also be available to discuss research ideas and to help put students in touch with possible thesis advisors. Open to Senior and Junior Economics majors. Note: This course can not be counted as one of the five elective economics courses required for the Economics major.
Instructor(s): L. Ball; M. Gersovitz; M. Khan; Staff
Area: Social and Behavioral Sciences.

AS.180.522. Senior Thesis. 3 Credits.
Students enrolled in this course will complete the Senior Honors Thesis under the supervision of a thesis advisor (who will have been chosen by the student prior to registration for AS.180.521). The formal course instructor will be in charge of overseeing registration and submitting grades. He/she will also be available for discussions of progress or problems on the thesis. Please note that your thesis advisor can be any faculty member in the Department of Economics, and need not be the same person as the course instructor. (This course cannot be counted as one of the 5 elective economics courses required for the Economics Major.)
Prerequisites: AS.180.521
Instructor(s): M. Gersovitz; M. Khan Writing Intensive.

AS.180.552. Internship. 1 Credit.
Instructor(s): G. Duffee.

AS.180.595. Economic Internship. 1 Credit.
Instructor(s): B. Hamilton; B. Morgan; S. Hanke; Staff.

AS.180.599. Independent Study. 3 Credits.
Instructor(s): Staff; T. Woutersen.

A systematic presentation of microeconomic theory in both its partial equilibrium and general equilibrium aspects. Topics covered include preferences and utility, exchange, production, theory of the firm, capital and interest, competition and monopoly, stability of equilibrium, and welfare economics.
Instructor(s): M. Khan.
First term: a systematic presentation of microeconomic theory both its partial equilibrium and general equilibrium aspects. Topics covered will include preferences and utility, exchange, production, theory of the firm, capital and interest, competition and monopoly, stability of equilibrium, and welfare economics. Second term: a more intensive discussion of selected topics, emphasizing recent contributions.
Instructor(s): E. Karni; H. Eraslan.

A comprehensive treatment of macroeconomic theory, including static analysis of aggregate output employment, the rate of interest, and the price level; aggregative theory of investment, consumption, demand and supply of money; empirical work on aggregative relationships.
Instructor(s): C. Carroll.

First term: a comprehensive treatment of macroeconomic theory, including static analysis of aggregate output employment, the rate of interest, and the price level; aggregative theory of investment, consumption, demand and supply of money; empirical work on aggregative relationships. Second term: the macrodynamic theory of growth, cycles, unemployment and inflation, and selected subjects.
Instructor(s): A. Korinek.

AS.180.605. Advanced Macroeconomics.
Topics of recent research in macro-economics. Content will vary from year to year. Likely topics include implicit contract theory, search theory and unemployment, disequilibrium macroeconomic models, monetary policy and the control of inflation, contract-based rational expectations models, imperfect competition in macrodynamic models, business cycle models, empirical tests of rational expectations models, theories of investment behavior, and debt neutrality.
Instructor(s): C. Carroll.

AS.180.606. Advanced Macroeconomics II.
Topics of recent research in macroeconomics. Prof. Ball’s course covers nominal rigidities, dynamic-consistency theories of inflation, inflation inertia and the costs of disinflation, monetary policy, costs and benefits of price stability, benefits of output stabilization, alternative policy rules, measuring inflation, unemployment, efficiency-wage theories, the behavior of the NAIRU, macro in middle-income countries, high inflation and stabilization, currency crises. Prof. Carroll’s course analyzes implications of the buffer-stock and habit formation theories of consumption for comovement of aggregate variables and asset pricing. The models are applied to study the phenomena of declining U.S. saving rate, the dynamic relationship between saving rates and growth, and the equity premium puzzle.
Prerequisites: AS.180.603 AND AS.180.604
Instructor(s): L. Ball.

AS.180.607. Macroeconometrics I.
The course is an attempt to provide a framework for discussing the techniques that are used in macroeconomic analysis. Generally the bias that it has is one of looking at these from the perspective of someone analysing macroeconomic data for policy analysis. Consequently, many of the applications considered are drawn from the type of research conducted in central banks and finance ministries. Its emphasis is therefore upon the issues raised by the analysis of time series of macroeconomic data. Today there is an emerging literature that looks at micro-economic data as well as conducting cross-country studies. We will tend to ignore that material as the methods used in such research are essentially those of micro-econometrics, although sometimes with adjustments made to reflect the nature of macro-economic time series.
Prerequisites: AS.180.633-634
Instructor(s): J. Wright.

AS.180.608. Macroeconometrics II.
Prerequisites: AS.180.601-603
Instructor(s): J. Wright.

AS.180.611. Economics of Uncertainty.
A review of the theory of decision making under uncertainty and its applications to problems of optimal insurance, portfolio selection, savings decisions and optimal search. Alternative approaches to decision making under uncertainty will be surveyed. Attitudes towards risk will characterized and the issues of measurement and comparability of these attitudes discussed, both in the univariate and multivariate cases; applications will be given. The theory of optimal search will be developed with emphasis on its usefulness for the study of labor markets and unemployment.
Prerequisites: AS.180.601 AND AS.180.603 or Permission
Instructor(s): E. Karni.

AS.180.612. Econ of Information.
Prerequisites: AS.180.601 AND AS.180.602 AND AS.180.603.

A course describing developments in the theory of choice of uncertainty, responding to evidence that observed behavior is inconsistent with the predictions of expected utility theory. The course will cover rank-dependent models of choice under risk and uncertainty, multiple prior models of choice in the absence of well-defined probabilities and the problem of responding to ‘unknown unknowns’, that is the problem that any model of a decision problem is necessarily incomplete and may be overturned by unanticipated contingencies. Recommended Course Background: AS.180.611-AS.180.612
Instructor(s): J. Quiggin.

This course traces the extent to which modern economic theory, particularly as it pertains to pure competition in market and non-market games under the rationality postulate, is grounded in the language of probability and measure theory. Special attention will be paid to the formal expression of ideas such as economic and numerical negligibility, on the one hand, and diffuseness and conditional independence of information, on the other. Towards this end, the course will develop rigorous formulations of basic ideas of (conceptual rather than computational) probability and apply them: first, to develop the fundamental theorems of welfare economics, including the core theorems; and second, to large anonymous and non-anonymous games as well as to finite-agent games with private information. The course will be self-contained from the technical point of view but will presuppose a level of mathematical maturity that ought typically to be achieved by taking courses such as AS.180.615 and AS.180.601.
Instructor(s): M. Khan.
A course in mathematics for economists not planning to work in quantitative areas, or for those whose mathematics background is weak. The emphasis is on optimization theory; also included are topics in advanced calculus and linear algebra.
Instructor(s): E. Karni.

AS.180.616. Mathematical Methods in Economics II.
This is a continuation of AS.180.615 and is a course in dynamic aspects of optimization models. Techniques of dynamic programming and the calculus of variations will also be developed.
Prerequisites: AS.180.615 or Perm. req’d
Instructor(s): M. Khan.

The course covers a set of numerical methods that facilitate computation and estimation of equilibrium outcomes in economic environments. The emphasis is put on dynamic models and their applications in multi-agent settings. Topics covered include, among others: solving dynamic programs in discrete and continuous time, approximate dynamic programing, dynamic games, approximations of Markov perfect dynamics, and CCP estimation of dynamic systems.
Instructor(s): P. Jezierski
Area: Social and Behavioral Sciences.

AS.180.618. Game Theory.
This course is an introduction to cooperative and non-cooperative games. Its focus is non-cooperative game theory with applications in economics. Topics include foundations of solution concepts, refinements of Nash equilibrium, repeated games, games with incomplete information, differential games, and experimental testing of hypotheses.
Prerequisites: AS.180.601
Instructor(s): Y. Sasaki.

Corequisites: AS.180.601, AS.180.603
Instructor(s): M. Gersovitz

AS.180.632. Topics in Applied Microeconometrics.
This course teaches methods for using micro-data to recover structural parameters of microeconomic models. We cover static models, but focus largely on single-agent dynamic programming, including “full solution” methods along with innovations that permit circumvention of daunting computational tasks. Additional topics will be partially based on students' interests, but will likely include: general equilibrium models, static and dynamic games, matching models, unobserved heterogeneity, structural methods with experimental data and biased expectations. The goal is to teach students to use structural methods in their own research, and so we will delve into the nuts and bolts of structural work, examining how researchers actually get from raw data to results. This includes: how the sample for analysis is chosen, how the model is specified, how the programming problem is solved, which moments are generated, how these are matched to the analogous moments in the data and, importantly, how identification is established.
Instructor(s): N. Papageorge.

Mathematical models of economic behavior and the use of statistical methods for testing economic theories and estimating economic parameters. Subject matter will vary from year to year; statistical methods, such as linear regression, multivariate analysis, and identification, estimation and testing in simultaneous equation models, will be stressed.
Prerequisites: AS.180.636 and AS.180.601 and ( AS.180.614 OR AS.180.615 )
Instructor(s): Y. Hu.

AS.180.636. Statistical Inference.
Theory and applications of statistical inference. Topics include probability and sampling, distribution theory, estimation, hypothesis testing, and simple regression analysis. Statistical applications will be drawn from economics. Limited to graduate students in Economics except by permission of the chair. Recommended Course Background: AS.110.201, AS.110.302
Instructor(s): Y. Sasaki.

AS.180.637. Microeconometrics I.
This is an advanced graduate course on major econometric techniques and models that are used in empirical microeconomics. The first half of the course introduces econometric theories of nonlinear extremal estimation, nonparametric estimation, and semiparametric estimation. The second half of the course illustrates applications of these theories to limited dependent variable models, selection models, and endogenous treatment models with unobserved heterogeneity.
Instructor(s): Y. Sasaki.

AS.180.638. Microeconometrics II.
This course introduces techniques that are used in applied research in microeconomics. Focus is on a particular class of models, namely discrete choice models. Well-known models in this class are the logit and probit models. Models that have better properties involve high-dimensional integrals, and this leads us to a discussion of simulation estimation. Finally, dynamic decision models for forward-looking agents who face irreversible decisions are introduced. As an application some models in economic demography are considered.
Prerequisites: AS.180.601AND AS.180.602
Instructor(s): Y. Hu.

Instructor(s): Y. Hu.

This is a graduate course in international trade. It will develop basic analytical tools and frameworks used in the general equilibrium analysis of international trade. Recent research topics will be discussed in the second half of the course.
Prerequisites: AS.180.601 AND AS.180.603
Instructor(s): P. Krishna.

AS.180.642. International Monetary Economics.
A link between the balance of payments and asset accumulation/decumulation, microeconomics of international finance and open-economy macroeconomics. The section on open-economy macroeconomics covers approaches to balance-of-payments adjustments, theories of exchange rate determination and monetary, fiscal, and exchange-market policies under fixed and flexible rate regimes.
Instructor(s): O. Jeanne.

AS.180.651. Labor Economics I.
Theories of the allocation of time and supply of labor, human capital, demand for labor, market equilibrium, and income distribution. As time allows, other topics, such as unemployment, unions, and compensating differences are discussed. Corequisite: AS.180.601
Instructor(s): R. Moffitt.

The course covers a set of numerical methods that are used to compute and estimate economic models. We focus on dynamic models and their applications in IO and labor economics, including dynamic discrete choice; dynamic games, two-step methods (CCP b sed), general equilibrium models. We also cover several technical tools, such as numerical integration, approximation, and optimization.
Instructor(s): Staff.
Instructor(s): S. Shore.

AS.180.662. Asset Pricing.
This course is an introduction and guide to the most important issues in asset pricing. It begins with classic concepts such as the Capital Asset Pricing Model and the Arbitrage Pricing Theory and continues through continuous-time dynamic no-arbitrage models. It covers both basic theory and classic empirical research. Recommended Course Background: AS.180.604, AS.180.633, AS.180.636 or instructor's permission.
Instructor(s): G. Duffee.

AS.180.671. Industrial Organization.
This course covers methods in applied empirical Industrial Organization. The focus will be on the use of econometric analysis and data both for descriptive and measurement purposes, and to test the predictions of economic theories. The course will cover demand estimation, cost and production function estimation, and estimation of auction models.
Prerequisites: AS.180.601
Instructor(s): J. Balat.

AS.180.672. Industrial Organization.
First term: This course covers methods in applied empirical Industrial Organization. The focus will be on the use of econometric analysis and data both for descriptive and measurement purposes, and to test the predictions of economic theories. The course will cover demand estimation, cost and production function estimation, and estimation of auction models. Second term: The emphasis in this course is on empirical analysis of firm behavior. The first part of the course focuses on models of the internal organization of the firm. The second part considers empirical analysis of firm behavior in markets, with an emphasis on the "new industrial economics."
Prerequisites: AS.180.601
Instructor(s): E. Krasnokutskaya.

Advanced econometric techniques are often essential to innovative empirical work, but finding and implementing the right methods for a particular problem poses formidable challenges. This course/seminar aims to address these challenges by combining lectures and discussions of foundational econometric methods in areas of student interest (whether those interests be specific for thesis work or more speculative) with examples of implementation, including software development, in more of a 'workshop' environment. The emphasis will be on drawing on the resources of econometric theory to address specific empirical issues while at the same time developing implementation skills.
Instructor(s): R. Spady.

This is a weekly seminar series that brings in speakers from other universities to present their research in the field of applied microeconomics. Graduate Students only.
Instructor(s): M. Khan; R. Moffitt
Writing Intensive.

This is a seminar series devoted to the presentation of research in microeconomic theory, typically by speakers from outside the department. Graduate students only.
Instructor(s): J. Balat.

This course features lectures by economists from other universities. They present research findings at the frontier of the field. Graduate students only.
Instructor(s): J. Wright.

The purpose of this seminar is to train students to do research in economics. This course is for second year graduate students in the Ph.D program in Economics. For Graduates Students Only.
Instructor(s): G. Duffee.

AS.180.698. Research/Teaching Practicums.
The purpose of the Ph.D. program in economics is to train students to teach and to do research in economics. This course is for graduate students in the Ph.D. program in economics to obtain graduate credit for work off campus that provides training and the development of skills in teaching and/or research. Before the practicum is begun, the graduate student must identify a sponsoring faculty member or seek permission from the student's faculty adviser. The faculty member or adviser must sign a form that certifies that graduate credit will be granted, verifies the nature of the work to be performed by the student, and explains how the practicum helps to fulfill a degree requirement. Once completed, the sponsoring faculty member or adviser submits a grade of pass or fail for the student. The course may be used for curricular practical training. Economic majors/Graduate students only.
Instructor(s): Staff.

AS.180.899. Independent Study.
Instructor(s): Staff.

Cross Listed Courses
Public Health Studies

This course introduces students to the controversial topic of who should pay for healthcare. Examines four themes of financing: pooling, purchasing and provision of healthcare and considers the financial, political and social implications of distinct health financing methods. Explores major principles and practices of health financing across countries with different political and economic frameworks, featuring Japan, Cambodia, U.K., Canada, Germany and the U.S.
Prerequisites: Prereq: AS.180.102 OR AS.180.101
Instructor(s): S. Ozawa
Area: Social and Behavioral Sciences.
Sociology

AS.360.247. Introduction to Social Policy: Baltimore and Beyond. 3 Credits.
How can we address pressing social problems, such as inner city poverty, inequality in educational attainment among children from different backgrounds, and disparities in access to health care? Social policy refers to the programs, legislation and governmental activities that regulate access to important social, financial and institutional resources needed by members of a society to address these concerns. Social policy also aims to reduce inequality, especially in the areas of education, health, income, housing, neighborhoods, and employment. The study of social policy is interdisciplinary, and this course will introduce students to the basic concepts in economics, political science, and sociology relevant to the study of social problems and the programs designed to remedy them. We will cover issues of national policy importance, as well as issues specifically affecting Baltimore City and the metropolitan region. This course is open to all students, but will be required for the new Social Policy Minor. The course is also recommended for students who are interested in law school, medical school, programs in public health, and graduate school in related social science fields. Cross list with Sociology, Economics and Political Science. Freshman, Sophomore and Juniors only.
Instructor(s): A. Sheingate; B. Morgan; S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

Interdepartmental

AS.360.528. Problems in Applied Economics. 3 Credits.
Permission Required. This course brings the principles of economic theory to bear upon particular problems in the fields of economics, finance and public policy. Micro, macro and international problems, from both the private and public sectors, are addressed. A heavy emphasis is placed on research and writing. Students learn how to properly conduct substantive economic research, utilizing statistical techniques and lessons from economic history. Findings are presented in the form of either memoranda or working papers. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise.
Instructor(s): S. Hanke
Area: Social and Behavioral Sciences
Writing Intensive.

Geography Environmental Engineering

EN.570.428. Problems in Applied Economics. 3 Credits.
This course brings the principles of economic theory to bear upon particular problems in the fields of economics, finance and public policy. Micro, macro and international problems, from both the private and public sectors, are addressed. A heavy emphasis is placed on research and writing. Students learn how to properly conduct substantive economic research, utilizing statistical techniques and lessons from economic history. Findings are presented in the form of either memoranda or working papers. Writing Intensive.

English

The Department of English offers separate undergraduate and graduate programs, each designed to suit the needs of its particular student body. The undergraduate program, in the context of university requirements and elective courses, provides the basis for a liberal education and prepares students for graduate work or professional schools, such as medicine and law, as well as professional teaching and literary scholarship. The graduate program prepares advanced students for professional teaching careers in English literature.

Facilities

Besides the Sheridan Libraries, Hopkins students have easy access to the 12 million volumes and innumerable historical manuscripts of the Library of Congress, as well as the library at Dumbarton Oaks, the Folger Library, the Freer Library, the library of the National Gallery, and many other specialized public collections. Students learn about advances in research and criticism and confer with leading American and European scholars and critics through participation in the activities of the Tudor and Stuart Club, the ELH Colloquium, and the department’s other programming.

Courses in the department are open to all qualified students in the university. Selected 100-level courses (e.g. AS.060.107 Introduction to Literary Study) may be used to satisfy the distribution requirement for the Humanities.

Requirements for the B.A. Degree

(See also General Requirements for Departmental Majors (p. 33).)

While completing the general requirements for the B.A. degree, the student who plans to major in English should include the following courses in his/her program:
Two courses in Humanities/Social Sciences, such as:
- AS.150.111 Philosophic Classics
- AS.100.102 The Medieval World
- AS.190.101 Introduction to American Politics
- AS.060.107 Introduction to Literary Study

One year classical language or modern spoken language at intermediate level

Ten semester departmental courses, including:
- AS.060.107 Introduction to Literary Study
  Two to four lecture courses (200-level)
- Advanced work (300-level seminars)
  Must be taken no later than sophomore year.

The department will not accept a grade of D or D+ in a required course, including a course taken by a first-semester freshman.

All students, whether their goals are professional or not, should choose courses in consultation with their major advisor to suit their individual needs and satisfy departmental requirements. Students who have not yet been assigned to a major advisor may discuss departmental requirements and curriculum planning with the director of undergraduate studies.

Honors in English

Departmental honors are awarded to undergraduate English majors who achieve a cumulative average of 3.6 or higher for all English courses taken to satisfy the major requirements. For more information about Honors in English, visit [http://english.jhu.edu/undergrad.html](http://english.jhu.edu/undergrad.html) or contact the director of undergraduate studies in English.

Senior Essay Option

Majors with a cumulative G.P.A. of 3.8 in English courses by the end of the fall semester of their junior year may apply to write a senior essay in the fall of their senior year. For further information and deadlines, visit [http://english.jhu.edu/essay.html](http://english.jhu.edu/essay.html).

English Minor

Students who wish to graduate with a minor in English must take AS.060.107 Introduction to Literary Study, generally within one year of declaring the minor. Six additional English courses are required, of which at least two and no more than three must be lecture (200-level) courses. At least one of the six courses must be a pre-1800 course.
19th- and 20th-century African-American literature, 20th-century German Idealism, French philosophy and aesthetics, theory.

**Assistant professors**

Andrew Daniel  
Early modern literature, critical theory, aesthetics.

Jared Hickman  
American literature, intellectual and cultural history of Atlantic (anti) slavery, religion and radical politics, critical race studies.

Jesse Rosenthal  
American literature, aesthetic theory, poetry and poetics, the history of sexuality.

**Professors emeriti**

Frances Ferguson  
Literature, aesthetic theory, and moral/legal philosophy in the 18th and early 19th centuries.

Allen Grossman  
Andrew W. Mellon Professor Emeritus of the Humanities: poetry and poetics.

Ronald Pauison  

**Research professor**

Larzer Ziff  
Caroline Donovan Professor Emeritus of English Literature: American literature.

**Joint appointments**

Neil Hertz  
Professor Emeritus (Humanities): Romantic literature and critical theory.

John T. Irwin  
Professor (Writing Seminars): American literature.

**Lecturers**

Aliza Watters  
Lecturer: Expository Writing Program

Anne-Elizabeth Murdy Brodsky  
Lecturer: Expository Writing Program.

Williams Evans  
Senior Lecturer: Expository Writing Program.

Patricia Kain  
Senior Lecturer and Director: Expository Writing Program.

Sarah Manekin  
Lecturer: Expository Writing Program.

George Oppel  
Lecturer: Expository Writing Program.

Marie O’Connor  
Lecturer: Expository Writing Program.

For current course information and registration go to https://isis.jhu.edu/classes/

**Courses**

**AS.060.100. Introduction to Expository Writing. 3 Credits.**  
Introduction to “Expos” is designed to introduce less experienced writers to the elements of academic argument. Students learn to recognize the paradigm of academic argument as they learn to read and summarize academic essays, and then they apply the paradigm in academic essays of their own. Classes are small, no more than 10 students, and are organized around three major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Intro” course teaches students to avoid plagiarism and document sources correctly. “Intro” courses do not specialize in a particular topic or theme and are available to freshmen only.  
Instructor(s): A. Brodsky; W. Evans  
Area: Humanities  
Writing Intensive.

**AS.060.105. Academic Writing. 3 Credits.**  
Instructor(s): C. McGill  
Area: Humanities  
Writing Intensive.

**AS.060.107. Introduction to Literary Study. 3 Credits.**  
See section descriptions.  
Instructor(s): A. Green; J. Kramnick; M. Thompson  
Area: Humanities  
Writing Intensive.

**AS.060.110. The African American Novel. 3 Credits.**  
This course will survey classic novels by African-American writers. From slavery to freedom, from subjection to the qualified triumph of integration, we’ll examine several examples of black writers writing about what it means to be “black” in America, and what it means to be “white” from a “black” perspective.  
Instructor(s): D. Tye  
Area: Humanities  
Writing Intensive.

**AS.060.113. Expository Writing. 3 Credits.**  
“Expos” is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please note: Each course has a different topic. To check individual course descriptions, go to the EWP web site. “Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission.  
Instructor(s): Staff  
Area: Humanities  
Writing Intensive.
AS.060.114. Expository Writing. 3 Credits.

“Expos” is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays as their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please see the following list of individual course descriptions to decide which sections of “Expos” will most interest you. “Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission.

Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.060.116. The Utopian Imagination. 3 Credits.

In this course we will consider how great thinkers and writers have imagined utopias -- visionary communities embodying their ideals -- and how others, suspecting the totalitarian motivations lurking behind such utopian projects, have created dystopias as a response. Moving from Biblical Utopias through texts from Plato (“The Republic”), Thomas More (“Utopia”), George Orwell (“1984”), and finishing with Peter Weir’s film, The Truman Show, we will explore questions concerning the forms and limits of the utopian imagination.

Area: Humanities.

AS.060.118. Asian American Literature and Film. 3 Credits.

This course offers students a survey of Asian American literature, film and cultural politics. Throughout the course we will evaluate the literary and filmic productions of Asian Americans in order to ask a series of questions: Who is American? Who is Asian American? How does “Asian American” work as a category that uncovers contestations over the meaning of ethnic, sexual, and national identity? We will look at a diverse array of Asian American groups while paying attention to the formation ofAsian American subjectivities across differences and the intersections of ethnicity, sexuality, class and gender. Cross-listed with Film and Media Studies

Instructor(s): R. Neutill
Area: Humanities
Writing Intensive.

AS.060.121. The British Empire and 20th Century Fiction. 3 Credits.

This course explores the ways in which the British Empire—which at its peak commanded a quarter of the world’s population and landmass—affected the development of British literature in the 20th century. In studying works set in Africa, South Asia, and the Caribbean, we will discuss themes of imperialism, culture, international development, and modernization. Authors include Rudyard Kipling, E.M. Forster, Graham Greene, Jean Rhys, and Arundhati Roy.

Instructor(s): R. Day
Area: Humanities.
AS.060.134. Franz Kafka. 3 Credits.
An introduction to one of the 20th century’s most eccentric and important writers. From his German-speaking Jewish background in Austrian-controlled Prague, Franz Kafka managed to overturn the conventions of modern fiction. Both bleak and zany, both logical and absurd, his writing shows the struggle of the individual against the modern institutional world. Discussion topics will include the political and religious views informing Kafka’s work, the role of bureaucracies in everyday life, and the impossibility of living within the law. Reading: short stories; his famous novella, The Metamorphosis; and two novels, The Trial and Amerika—all in English translation.
Instructor(s): R. Day
Area: Humanities.

AS.060.136. Literature of the American South. 3 Credits.
This course considers the development of southern identity in twentieth-century American fiction. Reading works from authors of different races, genders, and classes, students will explore the importance of region in determining ways of being and modes of expression.
Instructor(s): E. Steedley
Area: Humanities.

AS.060.138. No "I" in "News": The New Journalism, Hunter S. Thompson to David Foster Wallace. 3 Credits.
In 1972, Tom Wolfe noticed a trend in magazine reporting that he called “a ‘new’ journalism, a ‘higher’ journalism.” This novel breed of reporting, he claimed, was “causing panic, dethroning the novel as the number one literary genre, starting the first new direction in American literature in half a century.” It goes without saying that Wolfe considered himself on the cutting edge of the revolution. With no pretense of objectivity, the new journalists unapologetically wrote themselves into stories, stylizing their narratives with the techniques of fiction and recasting fact to suit their intended effect. This course will survey the field of new journalism, from Hunter S. Thompson’s drug-fueled, “gonzo” exposé of Southern culture, “The Kentucky Derby is Decadent and Depraved;” to mild-mannered George Plimpton’s chronicle of his tenure as a middle-aged professional football player, Paper Lion: Confessions of a Last-String Quarterback. We’ll also consider some of the movement’s precursors and heirs, from Stephen Crane’s efforts to brave the heat of battle as a war correspondent to David Foster Wallace’s attempt to understand the mild pleasures (and existential terrors) of a cruise ship vacation, “A Supposedly Fun Thing I’ll Never Do Again.”

Writing Intensive.

AS.060.139. Expository Writing: The Narrative Essay. 3 Credits.
Telling stories is one of the first and most important ways that human beings try to make sense of the world and their experience of it. The narrative art informs fiction and nonfiction alike, is central to the writing of history, anthropology, crime reports and laboratory reports, sports stories and political documentaries. What happened? The answer may be imagined or factual, but it will almost certainly be narrative. This course focuses on the narrative essay, a nonfiction prose form that answers the question of “what happened” in a variety of contexts and aims to make sense not only of what happened but how and why. We will begin by summarizing narrative essays, will move to analyzing them, and in the second half of the course you will write two narrative essays of your own, the first based on a choice of topics and sources, the second of your own design. Authors may include James Baldwin, Annie Dillard, Chang Rae Lee, Danielle Ofri, George Orwell, Richard Rodriguez, Richard Selzer, and Abraham Verghese. You will learn the power of narrative to inform and persuade as you test that power in your own writing.
Instructor(s): P. Kain
Area: Humanities
Writing Intensive.

AS.060.142. Censorship and Modern Literature. 3 Credits.
Whether because of its religious or political dissent, sexual deviance, or corrupting effects on readers, literature has often been perceived as threatening the social order. In this course, we will read a variety of famous literary works, which have each been censored, banned, or subject to public outrage. Alongside each work, we will also read documents related to that work’s suppression, such as reviews, court proceedings, and statements by the authors themselves. We will consider the ways in which literature is both the result of individual artistic achievement, and shaped by its social context. Possible authors include Oscar Wilde, Djuna Barnes, D.H. Lawrence, Vladimir Nabokov, Allen Ginsberg, Salman Rushdie, and Brett Easton Ellis. (This course is for non-majors)
Instructor(s): R. Day
Area: Humanities
Writing Intensive.

AS.060.144. Joyce’s Ulysses. 3 Credits.
James Joyce’s Ulysses is often described as both the greatest novel of the twentieth century (it may be) and as nearly impossible to read (it’s not). We’ll spend most of our time on a careful exploration of the novel’s 18 episodes, with some help from secondary sources. In the process we’ll try to get a handle on Ulysses’ vivid cast of characters, extravagant stylistic innovations, occasionally low comedy, incorporation of myth and history, relation to literary modernism, and the novel’s enduring influence.
Instructor(s): R. Higney
Area: Humanities

AS.060.145. Literature, Science, and Technology. 3 Credits.
This class will consider a range of reactions to scientific discoveries in literature, from electricity in the nineteenth century to bioengineering today. We’ll pay special attention to the utopian hope, doomsaying despair, and radical reconceptions of reality technological breakthroughs seemed and seem to provide. Authors will include Mary Shelley, Wells, LeGuin, Ishiguro.
Instructor(s): E. Tempesta
Area: Humanities.
AS.060.146. Detective Fiction. 3 Credits.
This course will look at the history of English-language detective fiction through the nineteenth and twentieth centuries. We will pay special attention to the way clues and suspense operate, the role of the reader in figuring out the mystery, and the complicated relationship of the detective with official authority. Authors will likely include some selection of Wilkie Collins, Edgar Allan Poe, Arthur Conan Doyle, Agatha Christie, Dashiell Hammet, and Raymond Chandler. This class is for non-majors.
Instructor(s): E. Sundquist; J. Hickman; J. Rosenthal; M. Thompson
Area: Humanities
Writing Intensive.

AS.060.150. Shakespeare and (Teen) Film. 3 Credits.
In this course, students will read four of Shakespeare’s plays (Romeo and Juliet, Othello, Taming of the Shrew and A Midsummer Night’s Dream) alongside a movie adaptation of each that belongs to a genre rarely subjected to serious study: teen film. Participants will consider the costs and benefits of viewing the Shakespearean canon through the lens of teenage experience.
Instructor(s): M. Vinter
Area: Humanities.

AS.060.151. American Literature, Race, and Civil Rights. 3 Credits.
The course will explore the role played by literature in advancing and reflecting upon the African American pursuit of freedom and civil rights over the course of the twentieth century, from the era of harsh segregation through the post-Civil Rights era. Although we will focus primarily on fiction, we will also consider essays, autobiography, and poetry. Writers to be considered, mostly black but some white, may include James Weldon Johnson, Ralph Ellison, Richard Wright, Ann Petry, James Baldwin, William Faulkner, Harper Lee, William Melvin Kelley, Malcolm X, Amiri Baraka, Toni Morrison, and Paule Marshall. This class is for non-majors.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.152. Shakespeare. 3 Credits.
This course introduces students to Shakespearean drama through a selection of comedies, tragedies, and histories. Class time will include lectures on the historical, political, and philosophical implications of Shakespearean drama, film clips from various cinematic adaptations, and a significant amount of student discussion of the plays. We will focus our discussion particularly on themes that were important to Shakespeare and that continue to concern us today, such as family relationships, intimacy, sexuality, power, religion, and war. Plays include the Taming of the Shrew, Merchant of Venice, 1 and 2 Henry IV, Hamlet, Macbeth, and the Tempest.
Instructor(s): B. Parris
Area: Humanities
Writing Intensive.

AS.060.154. Zombies. 3 Credits.
Why does the zombie figure so prominently in modern literary and cinematic texts? What particular anxieties does this figure of mindless violence disclose? Why does the zombie genre so often lend itself to political allegory? How do we make historical sense of this figure’s original association with Afro-Atlantic religions like Haitian voodoo? This course is designed for non-majors interested in developing critical reading and writing skills by investigating this surprisingly rich topic. Texts, literary and cinematic, may include: firsthand accounts of the Atlantic slave trade, Mary Shelley’s “Frankenstein”, Edgar Allan Poe’s short stories, Rudolph Fisher’s “The Conjure-Man Dies”, “The Invasion of the Body Snatchers” (dir. Don Siegel), “The Serpent and the Rainbow” (dir, Wes Craven), “Pontypool” (dir. Bruce McDonald), and “Zombieland” (dir. Ruben Fleischer).
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.156. Introduction to Poetry. 3 Credits.
This is a beginner’s guide to the varieties of poetry in English from the Anglo-Saxons to today, with a few detours, here and there, into poetry from other languages in translation. We will study how patterns of sound, image, rhythm, and ideas allow us to become better tuned-in to poetry. You should leave the class with a better appreciation of poetry, some improvement in your writing skills, and a new favorite poem. This course does not count toward the English major or minor.
Instructor(s): E. Tempesta
Area: Humanities
Writing Intensive.

AS.060.157. J.R.R. Tolkien and the Contemporary Fantasy Epic. 3 Credits.
J.R.R. Tolkien’s “The Lord of The Rings” trilogy can honestly be said to have initiated a new genre: a novel-based epic narrative set in a fantasy world. Since Tolkien’s works were first published in the 1940’s, there has been a massive flowering in similar works, as later authors expanded and developed the notion of the multi-volume fantasy narrative. However, these later texts are also, importantly, creative responses to the models Tolkien developed. In this course, we are going to study this genre, identify its history and formal features, and consider the nature of fantasy fiction more generally. What do authors hope to achieve by setting plots and characters in a completely imagined world? What narrative possibilities does such a decision enable, and what possibilities does it foreclose? Does the fantasy genre mask certain ideologies, and how can we uncover them? Authors will include Tolkien, Robert Jordan, George R.R. Martin, and Steven King, and may also include selections from Brandon Sanderson, David Eddings, Patrick Rothfuss, Ursula K. LeGuin, and Elizabeth Moon. This course is for non-majors. (Limit 18)
Instructor(s): P. Fessenbecker
Area: Humanities.
AS.060.158. Advertising and Literary Modernism. 3 Credits.
To say that certain modernist authors were skeptical about the growing power of advertising would be an understatement. H.G. Wells described it as a form of “legalized lying,” while F. Scott Fitzgerald quipped that “its constructive contribution to humanity is exactly minus zero.” Such views on marketing were hardly uncommon, as many modernist authors saw advertising as an enemy to true artistic creation. The modernist response to this form of popular culture, however, was not uniformly hostile. Avant-garde artists, who rejected mainstream commercial values, often turned to newspaper ads and posters for the material that they would repurpose for their own work. In the stream of consciousness epic Ulysses, the protagonist works in advertising and his eye is often drawn to the notice and promotions that cover the streets of Dublin. Virginia Woolf even paused her narrative to depict a fictional crowd of Londoners contemplating an airplane writing an ad in smoke letters. This course will explore the variety of stances toward advertising in the modernist period, as well as provide historical context. Novels include: “Sister Carrie”, “The Ambassador”, “Mrs. Dalloway”, “Turnabout”, as well as selections from Ulysses. Critical sources include: Benjamin, Adorno, Williams, Moretti, Brown, and Butler. This course is for non-majors.
Instructor(s): K. Wedekind
Area: Humanities
Writing Intensive.

AS.060.159. American Nightmares: Highsmith, Dick, Burroughs. 3 Credits.
Freshmen and sophomores only These three authors share a common starting point: Patricia Highsmith, William S. Burroughs and Philip K. Dick all began their careers writing mass market genre fiction in pre-Stonewall, pre-civil rights, Cold War 1950s America. Absorbing the stylistic codes of their respective marketplaces of suspense writing, and essay, “drug fiend” confessional, and science fiction, each writer’s conformist apprenticeship in pulp resurfaces in increasingly nightmarish forms in the violent and paranoid scenarios that dominate their mature work. Reading broadly in each author’s short fiction, novels, and prose, we will sequentially examine Highsmith’s free indirect discourse gone wrong, Burroughs’ “cut-up” techniques and “routines”, and Dick’s disorienting temporal experiments as inflamed allergic reactions to generic codes. We will also examine the cinematic afterlives of these authors by looking at three adaptations of their work: Alfred Hitchcock’s The Ambassadors on a Train (1951), David Cronenberg’s Naked Lunch (1991), and Richard Linklater’s A Scanner Darkly (2006). Likely Texts: Patricia Highsmith Stranger on a Train, The Price of Salt, Edith’s Diary; William S. Burroughs Junky, The Naked Lunch, The Place of Dead Roads; Philip K. Dick Eye in the Sky, Time Out of Joint, A Scanner Darkly.
Area: Humanities
Writing Intensive.

AS.060.168. Literature and the Civil Rights Movement. 3 Credits.
The course will examine the role of literature in the American civil rights movement. Both non-fiction and fiction played an essential role in motivating protest and shaping public views. Our focus will be on works that entered into the debates over race, rights, and freedom, and introduced a new vocabulary of cultural pride into African American discourse. Works to be studied will include Martin Luther King, Jr., selected speeches and Why We Can’t Wait (including “Letter from Birmingham Jail”); Malcolm X, selected essays and Autobiography of Malcolm X; James Baldwin, Notes of a Native Son; William Melvin Kelley, A Different Drummer; Ralph Ellison, selected short fiction and essays; William Faulkner, Intruder in the Dust; Amiri Baraka (LeRoi Jones), selected poetry and Dutchman; John Howard Griffin, Black Like Me; Paule Marshall, Praisesong for the Widow. This course does not count toward the English major or minor.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.176. The Russian Novel. 3 Credits.
“Exist” or how can I be a captain? We shall examine this and other religious, philosophical, and historical questions in Tolstoy’s and Dostoevsky’s titanic novels. Readings (in translation) include “War and Peace” and “The Brothers Karamazov.” Substantial reading: 6-8 page paper, 10 page paper, and exercises. Freshman/sophomore seminar.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.180. Introduction to the Gothic. 3 Credits.
Intended as a survey of American and British Gothic fiction (with some excursions into poetry, film, and television), this course will introduce students to the genre of the Gothic and some of its key terms via a selection of major works of Gothic literature from the 19th and 20th Centuries, as well as some of its more popular incarnations (True Blood, the Twilight series). By the end of the course students should have a better understanding of why the Gothic mode continues to play such an important role in our cultural imagination and be better equipped to think and write critically about any manifestation of Gothic terror, from In Cold Blood to True Blood. Students will write short (1-2 page) weekly response papers along with one longer 5-7 page paper.
Instructor(s): A. Zecca; E. Steedley
Area: Humanities.

AS.060.200. Introduction to Modern Fiction. 3 Credits.
This course will examine the formalistic innovations and major themes, as well as the interplay of aesthetics and politics in literary modernism, by looking in depth at the novels of four of the most influential modernist writers in the twentieth century. Novels will include Joseph Conrad’s Heart of Darkness; James Joyce’s A Portrait of the Artist as a Young Man; Virginia Woolf’s Mrs. Dalloway; and Franz Kafka’s The Castle.
Area: Humanities.

AS.060.201. The Nineteenth Century British Novel. 3 Credits.
Reading major novelists from the nineteenth century including Austen, C. Bronte, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities.
AS.060.202. What is Tragedy?. 3 Credits.
This course is an introduction to tragedy. What is a tragedy? How has the genre been defined and redefined over its long and varied existence? And why do authors and audiences keep returning to these spectacles of pity and fear? To consider these questions, we'll examine plays including Sophocles' Oedipus Rex, Shakespeare's Hamlet, Racine's Phèdre and Beckett's Endgame, ending with the Coen Brothers' film No Country for Old Men.
Instructor(s): W. Miller
Area: Humanities.

AS.060.204. British Literature II: 18th Century to the Present. 3 Credits.
A survey of major authors such as Wordsworth, Keats, Austen, Tennyson, Dickens, Wilde, Woolf, Joyce, and Rushdie. Substantial attention to formal conventions as well as stylistic innovation, to aesthetic value as well as social meaning. (Limit 60)
Area: Humanities
Writing Intensive.

AS.060.207. Shakespeare. 3 Credits.
Reading the major comedies, histories and tragedies alongside the narrative poem “Venus and Adonis” and the sonnets, this survey course considers Shakespeare’s hybrid career as poet and playwright. Pre 1800 course.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.

AS.060.208. Radical Politics and the English Novel. 3 Credits.
This course will examine radical politics and its relationship to popular print culture and the English novel from the late eighteenth century through the early Victorian period. Students will consider widespread fears of radical rebellion, the position of the English working class, and controversies over political reform. Readings will include the novels Caleb Williams, A Tale of Two Cities and North And South and political writings by Thomas Paine, Edmund Burke and George Eliot, among others.
Area: Humanities.

AS.060.209. The American Novel since World War II. 3 Credits.
This course surveys the formal and thematic developments of the American novel from 1945 to the present. Against the backdrop of American post-war triumphalism, we consider how contemporary writers, struggling with issues of identity, race and authenticity, express different and deeply troubled accounts of the American dream. We will pay particular attention to the relationship between fiction and history; the tension between individual and collective identity; the changing role of literature in American culture, and the gradual emergence of postmodernism as a significant force in American literary life. Possible authors include: Richard Wright, Flannery O’Connor, Jack Kerouac, J.D. Salinger, Thomas Pynchon, Philip Roth, Cormac McCarthy, Toni Morrison, John Barth, Saul Bellow, Maxine Hong Kingston.
Instructor(s): A. Wexler
Area: Humanities.

AS.060.211. British Literature I. 3 Credits.
What is British Literature? Beginning in the fourteenth century and concluding in the eighteenth century, this survey course examines the time period in which the notion of vernacular English literature, the corporate body of “Great Britain” as a national framework, and, with it, “British-ness” as an imaginary, synthetic identity, were all created. Participants will read a representative group of Geoffrey Chaucer’s “The Canterbury Tales”, Book I of Edmund Spenser’s “The Faerie Queene”, the entirety of John Milton’s “Paradise Lost”, and Alexander Pope’s “The Rape of the Lock.” The course is designed as an introductory level lecture course and is open to all students curious about the beginnings of the English literary canon. It is recommended that students follow this course with its sequel, Professor Mao’s “British Literature II,” which will be offered the following semester. Pre-1800 course
Instructor(s): A. Daniel
Area: Humanities.

AS.060.212. British Literature II: 18th Century to the Present. 3 Credits.
A survey of major authors such as Wordsworth, Keats, Austen, Tennyson, Dickens, Wilde, Woolf, Joyce, and Rushdie. Substantial attention to formal conventions as well as stylistic innovation, to aesthetic value as well as social meaning.
Instructor(s): D. Mao; E. Sundquist; J. Hickman; M. Thompson
Area: Humanities.

AS.060.213. Gothic Fiction. 3 Credits.
The Castle of Otranto (1764), considered by most to be the first Gothic novel, forged a volatile synthesis of the supernatural and the ordinary. We will consider this wildly popular genre from multiple angles: How do haunted ruins and ghostly visitors speak to the way we create history? What does terror reveal about psychology? And how does a genre so open to parody expose how narrative works? Authors will include Walpole, Lewis, Radcliffe, and Austen.
Instructor(s): S. Hershinow
Area: Humanities.

AS.060.214. Crime and Detective Fiction. 3 Credits.
This course will survey the nineteenth-century origins of detective and crime fiction and its development into the twentieth century. Students will examine how this self-reflexive genre uses suspense and narrative to reflect on acts of storytelling and interpretation. We will consider the role of the detective and how this genre portrays urban space, crime and class and gender relations. Course material includes readings from Poe, Collins, Conan Doyle, Chandler, Sayers and Auster, as well as the film The Maltese Falcon. Course will include two term papers and a final exam.
Instructor(s): J. Valdez
Area: Humanities.

AS.060.215. Advanced Expository Writing. 3 Credits.
Designed for juniors and seniors with experience in using analysis to make clear and persuasive arguments, but open to any students who have taken Expository Writing (060.113/114), this course focuses on the advanced skills of argument. Students learn to draw inferences from the evidence, use sources in a variety of ways to develop their thinking, and structure complex arguments.
Instructor(s): P. Kain; W. Evans
Area: Humanities
Writing Intensive.
AS.060.216. Wilde to Eminem: A Literary History of the Obscene. 3 Credits.
What is obscene? What is indecency? Where is the line between public and private? How have the answers to these questions changed over the past century? This course will examine artworks and performances from a variety of media which have been publicly accused of indecency or obscenity. Wilde, Joyce, Nabokov, Ginsberg, Bruce, Carlin, Kubrick, Serrano, Lyne, Prince, and Eminem among others will provide the materials for our inquiry.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

AS.060.217. American Literature Since World War II. 3 Credits.
This is a survey lecture covering American literature since about 1945, focusing on fiction from Saul Bellow, and James Baldwin to Toni Morrison and Don DeLillo, poetry from Robert Lowell, Sylvia Plath, Adrienne Rich, John Ashbery, and an array of and political journalism from the 1960s to today.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.219. American Literature to 1865. 3 Credits.
A survey course of American literature from contact to the Civil War.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.220. What is the Great American Novel?. 3 Credits.
This course will investigate the curiously persistent idea of the "Great American Novel" (GAN) through a close engagement with three exemplary candidates for the title that span American literary history (Moby-Dick, Song of Solomon, and Freedom). Students will also read several critical essays to provide both a history of the concept as well as criteria for what might make an American novel "great." Through analyses of the individual novels, students will be encouraged to reflect on the persistence, efficacy, and validity of the GAN.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.221. Coming of Age Novels. 3 Credits.
In this course, we will consider how "coming of age" is depicted in the novels of British and American modernism. We will discuss how questions of family, sexual love, education, work, and religion contribute to an individual's personal development in the novels of Virginia Woolf, James Joyce, F. Scott Fitzgerald, Virginia Woolf, and James Baldwin. We will also reflect on how the form of the coming of age novel in the early to mid twentieth century engages with important social and historical developments that protected adolescence as a stage of life, such as labor and education reform. Writing requirements include two 4-5 page papers.
Instructor(s): C. Gannon
Area: Humanities.

AS.060.222. American Literature, 1865 to today. 3 Credits.
The course will provide a portrait of modern American culture through representative works of literature by leading authors arranged in pairs that focus on key issues seen from contrasting perspectives and/or from very different moments in history. Lectures and discussions will explore the popular reception of the works in their own day as well as their claim to lasting importance as imaginative literature. The following writers and works will be included. Sexual conventions: Edith Wharton, "Summer", and Philip Roth, "Portnoy's Complaint"; ethnicity and the clash of traditions: Henry Roth, "Call It Sleep", and Leslie Marmon Silko, "Ceremony"; race and self-discovery: William Faulkner, "Light in August", and Ralph Ellison, "Invisible Man"; social satire: Nathanael West, "The Day of the Locust", and Don DeLillo, "White Noise"; narratives of war and trauma, John Hersey, "Hiroshima", and Cynthia Ozick, "The Shawl". Mid-term and final exam; two short papers.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.224. The Modern Novel. 3 Credits.
This course covers the British novel from the late nineteenth century to the present, with a particular focus on the decades around World War I. We'll balance attention to formal innovations and experiments with consideration of social and historical context, exploring issues such as gender, empire, psychology, the city, and war. Our goal will be to understand what makes these novels "modern" and sets them apart from their predecessors; to this end, we'll examine how many important authors also wrote extensively on the craft and aims of fiction. Readings will include representative selections by authors such as Henry James, James Joyce, Ford Madox Ford, E.M. Forster, Virginia Woolf, Jean Rhys, and Ian McEwan.
Instructor(s): A. Grener
Area: Humanities.

AS.060.225. Shakespeare: Then and Now. 3 Credits.
Shakespeare's plays remain vital in part because of their engagement with perennially provocative topics: sexuality, politics, social intolerance, the often vexed relations between men and women, parents and children. In this survey of some of the major comedies, histories and tragedies, we will both place Shakespeare’s plays in their historical context and consider their significance for present-day readers and audiences.
Instructor(s): R. Halpern
Area: Humanities.

AS.060.226. African American Literature to 1914. 3 Credits.
This course serves as an introduction to African-American literature, from its beginnings until the outbreak of WWI. In it, we will consider various genres of African-American literary production, such as the slave narrative, novel, the poem, and the essay. Through critical readings, we will explore recurrent themes in early African-American literature in its cultural and historical contexts, as well as the question of what constitutes the African-American literary tradition as such.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.227. The Female Novel of Development. 3 Credits.
This course investigates the female novel of development in the later nineteenth and early twentieth centuries, reading novels by George Eliot, Henry James, May Sinclair, and Virginia Woolf, as well as short historical texts of the period, and literary criticism about the Novel. We will consider how writers use the novel to engage with contemporary questions about women’s social roles, marriage, suffrage, and the expansion of women’s education.
Area: Humanities.
AS.060.249. Hardy, Conrad, James. 3 Credits.
This course will look in depth at the novels of three of the most important writers of the late nineteenth and early twentieth centuries: Thomas Hardy, Joseph Conrad, and Henry James. We will look at their central concerns and stylistic innovations, and consider their place at the crossroads of the Victorian novel and literary modernism. We will also look at selections of Hardy’s poetry and James’s critical writings.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.250. A Survey of 18th Century and Romantic Literature. 3 Credits.
The course will include readings that identify major literary innovations of the eighteenth and early nineteenth centuries in England—from Defoe’s Robinson Crusoe to Pope’s technique of using literature to criticize his contemporaries to Sterne’s cultivation of sentiment to Wordsworth’s efforts to simplify the language of poetry and to let it speak a language less learned and more colloquial and to Austen’s depiction of courtship and marriage as a system.
Area: Humanities. Writing Intensive.

AS.060.252. Popular Fiction of the Eighteenth Century. 3 Credits.
Forms like travel writing, erotic fiction, the sentimental story, and the gothic make up the early novel; each of these crowd-pleasing subgenres was dominated by female authors. We will read examples of these experimental—and often strange—varieties of the proto-novel, by Behn, Haywood, Burney, Radcliffe, and Austen.
Area: Humanities.

AS.060.254. Modern Poetry. 3 Credits.
This course will explore modern poetry, primarily in the first half of the 20th century, with a focus on poets’ own ideas of what makes their poetry distinctively modern; Our reading will also address some of Modernism important forerunners and inheritors, along with related movements such as Imagism, war poetry, and the Harlem Renaissance. We will pay particular attention to poetry’s place in the broader history of modern art and literature, and to central themes including nature and the city; love and sexuality; violence and myth. Authors will include W.B. Yeats, Robert Frost, T.S. Eliot, Ezra Pound, Marianne Moore, Wallace Stevens, William Carlos Williams, W.H. Auden, Hart Crane, Langston Hughes, Claude McKay, Philip Larkin, and Elizabeth Bishop.
Area: Humanities.

AS.060.256. African American Literature. 3 Credits.
This is an introductory course in African American literature. We will read Native American, Chicano, Latino, Asian American, and African American literatures. The class will pose questions such as: Why ethnic American literature? Why not simply American? What are the dissonances and similarities between these literary voices? We will explore themes such as identity, otherness, and the construction of race and Americaness. Readings in post 1945-course will include works by authors such as James Baldwin, David Henry Hwang, Toni Morrison, Sherman Alexie, Junot Diaz, Sandra Cisneros, Maxine Hong Kingston, and Jhumpa Lahiri.
Instructor(s): R. Neutill
Area: Humanities.

AS.060.276. Modern Drama. 3 Credits.
An introduction to drama of the late-19th and 20th centuries, with an emphasis on its ideological and political contexts. In modern drama, we find vivid accounts of key aspects of modernity: urbanization, industrialization, migration, war, democracy, capitalism, fascism, communism, and nationalism, to name a few. We will read a selection of plays that ask timely questions about the limits of human subjectivity and integrity in a modern, often dehumanizing world. Modern drama is shaped by, and responds to, social and political changes, such as the demise of the aristocracy, the ambitions of the middle class, totalitarian conquest of Europe, apartheid in South Africa, and the AIDS epidemic in the United States. This course also charts how major debates, movements, and theories in the arts have motivated drama’s diverse forms and themes. Playwrights may include Henrik Ibsen, Oscar Wilde, Anton Chekhov, Bertolt Brecht, Eugene O’Neill, Tennessee Williams, Samuel Beckett, Athol Fugard, Edward Albee, Caryl Churchill, and Tony Kushner. Secondary readings by the playwrights themselves, in addition to Georg Lukacs, T.S. Eliot, Raymond Williams, Eric Bentley, and more recent scholars and critics.
Instructor(s): D. Tye
Area: Humanities. Writing Intensive.

AS.060.278. Social Climbers and Charlatans in American Literature. 3 Credits.
“It’s good to be shifty in a new country,” declares Johnson Hooper’s swindling vagabond Simon Suggs. The ability to speak in many voices—to play many roles—is one key facet of the rags-to-riches American ideal of not only making something of one’s self, but of making one’s self. But how much social mobility or personal fluidity is too much? In this course, we’ll consider the problem of fashioning a self that is both flexible and authentic, both capacious and individual, as it is represented in a broad swath of American literature. We’ll begin with Benjamin Franklin’s Autobiography, in which Franklin reimagines his life into an intricate web of fact and fabrication. From there, we’ll explore the Transcendentalist ideal of the “Moral Sense,” in the form of Emersonian self-reliance and Thoreau’s revolutionary militancy, and its dark side in Poe’s “Imp of the Perverse.” After this, we’ll account for the great showman P.T. Barnum, who splits the difference between legitimate businessman and devisious swindler. We’ll see what happens when, in order to make yourself, you first have to steal yourself in “The Narrative of the Life of Frederick Douglass, American Slave”. In Mark Twain’s “Pudd’nhead Wilson” and Nella Larsen’s “Passing”, we’ll investigate how, why, and with what consequences black Americans might try to pass for white. As the semester winds down, we’ll reconsider the rise and fall of Fitzgerald’s Jay Gatsby, the mobster made good (if only for a while), before ending with Nathanael West’s “Miss Lonelyhearts”, a dark comedy about a man who writes an advice column as a woman. The course will explore some of the fine lines—between honest art and heinous hoaxing, belief and delusion, entrepreneurship and charlatany—relentlessly worked over in American literature since the nation’s inception. Throughout, we’ll take stock of the possibilities and pitfalls lurking in the seemingly incompatible goals of novelty and authenticity, fluidity and authority. Dean’s Teaching Fellowship course.
Instructor(s): R. Day
Area: Humanities. Writing Intensive.
AS.060.279. Law and Literature. 3 Credits.
This course queries the nature of legal authority both formally and historically. What distinguishes between law and literature? Is law more authoritative? Is it more ethical? Is it more “real”? Avenues of inquiry will include the power of language to embody, inhabit, or represent law; the relationship between law and ideas about self, liberty, and love; and conflicts and confluences between literary and legal claims to autonomy. Readings may include Sophocles’ “Antigone”, Andreas Capellanus’ “On Love”, Shakespeare’s “Measure for Measure”, William Godwin’s “Caleb Williams”, and Franz Kafka’s “The Trial”. Pre-1800 Course
Instructor(s): M. O’Connor

AS.060.280. The Modernist Novel and the Question of Culture. 3 Credits.
“The man ain’t got no culture!” declare Simon & Garfunkel, of someone who is so unhip as to confuse Bob Dylan with Dylan Thomas. How is such a statement possible, and what does “culture” mean? In some contexts, culture is something you can get by learning about art, music, and literature. But in other contexts, culture is something that everyone already has; we all live in the “culture” of our everyday habits and customs. Out of the tangle of these two meanings, we get concepts like “cultural districts” in cities, “cultural relativism” about moral issues, and even “multiculturalism.” In this course, we’ll read a selection of novels related to modernism, a literary and artistic movement preoccupied with the difference between the two forms of life that “culture” can name—a life of intellectual refinement, and a life of organic connection to one’s community. Along the way, we’ll discuss notions of prestige, sophistication, the relation of religion to the arts, the cultural life of imperialism, and the role of education in forming and reflecting students’ cultural aspirations. Background readings from Matthew Arnold, Walter Pater, Raymond Williams, Pierre Bourdieu, and Francis Mulhern; novels by Oscar Wilde, E.M. Forster, James Joyce, Virginia Woolf, Evelyn Waugh, and V.S. Naipaul. Dean’s Teaching Fellowship course.
Instructor(s): R. Day
Area: Humanities
Writing Intensive.

AS.060.281. Criminal Characters: Law and Order in the Early Novel. 3 Credits.
Thieves, prostitutes, and murderers populate the early English novel. This course will examine the rise of the novel alongside the emergence of law enforcement and the legal profession in the eighteenth century. We will examine how the novel as a genre coalesces around characters that are placed in risky situations and the legal fictions that develop around them (forms such as testimony, confession, and the arguing of a case). This will require a focus on individual laws (such as the 1662 Poor Relief Act and the 1753 Hardwicke Marriage Act), on the psychologies of guilt and innocence, and on the formal literary challenges of representing transgression and justice. We will also examine critical interpretations of several of the major works, paying special attention to the way they address the primary text’s engagement with law and the legal system. Readings from Defoe, Fielding, Goldsmith, and Austen. Dean’s Teaching Fellowship course.
Pre 1800 course
Instructor(s): S. Hershinow
Area: Humanities
Writing Intensive.

AS.060.282. Moral Philosophy and the Novel in Nineteenth-Century England. 3 Credits.
Can novels ask philosophical questions? What do literary narratives and moral arguments have to do with each other? Everyone who has read a novel recognizes that it is in part an expression of ideas: characters, narrators, authors, and so forth say and do things that express a way of thinking. In this course we’ll examine the connections between moral philosophy and literature in nineteenth-century England in a series of four units, each of which pairs a novelist and a philosopher. The novelists will be Jane Austen, Charles Dickens, George Eliot, and E.M. Forster; the major philosophers will include Edmund Burke, John Stuart Mill, Immanuel Kant, and G.E. Moore, and we’ll read excerpts from Jeremy Bentham, Ludwig Feuerbach, F.H. Bradley, and Henry Sigwick. Assignments will include reading quizzes, response papers, and a final essay with a research component. Dean’s Teaching Fellowship course.
Pre 1800 course.

Writing Intensive.

AS.060.283. Advertising and Modernism. 3 Credits.
To say that certain modernist authors were skeptical about the growing power of advertising would be an understatement. H.G. Wells described it as a form of “legalized lying,” while F. Scott Fitzgerald quipped that “its constructive contribution to humanity is exactly minus zero.” Such views on marketing were hardly uncommon, as many modernist authors saw advertising as an enemy to true artistic creation. The modernist response to this form of popular culture, however, was not uniformly hostile. Avant-garde artists, who rejected mainstream commercial values, often turned to newspaper ads and posters for the material that they would repurpose for their own work. In the stream of consciousness epic “Ulysses”, the protagonist works in advertising and his eye is often drawn to the notices and promotions that cover the streets of Dublin. Virginia Woolf even pauses her narrative to depict a fictional crowd of Londoners contemplating an airplane writing an ad in smoke letters. This course will explore the variety of stances toward advertising in the modernist period, as well as provide historical context. Novels include: “Sister Carrie”, “The Ambassadors”, “Mrs. Dalloway”, “Turnabout”, as well as selections from “Ulysses”. Critical sources include: Benjamin, Adorno, Williams, Moretti, Brown, and Butler.
Area: Humanities
Writing Intensive.

AS.060.290. Literary Theory. 3 Credits.
This course will provide a survey of many of the major theoretical positions that have been directly or indirectly influential for literary studies. We will read selections from the following: Russian Formalism (Propp, Shklovsky, Bakhtin), structuralism (Levi-Strauss, Barthes), deconstruction (Derrida, de Man), speech act theory (Austin, Butler), Marxism (Jameson), queer theory (Sedgwick, Miller), and distant reading (Moretti). Recommended Course Background: three courses in the English Department.

Writing Intensive.

AS.060.301. Colonial Modernism and the Novel of Youth. 3 Credits.
Focusing on the period 1900-1940, this course examines coming-of-age novels by writers from around the British Empire, emphasizing connections between aesthetic innovation and accelerating social change.
Instructor(s): R. Higney
Area: Humanities
Writing Intensive.
AS.060.303. Literature of London. 3 Credits.
Ian Watt famously linked the rise of the novel with the rise of the city in his seminal work, *The Rise of the Novel*. This course will survey British literature from the late eighteenth through the early twentieth century that explores the city of London. Students will consider how the city and urban life change over the course of the nineteenth century and how they transform literary depictions and understandings of selfhood and the social imagination. They will examine how nineteenth-century literature represents the space of the city and how these efforts to depict the city cause formal and stylistic innovations. How does the compressed space of the city and its intense stimuli affect characters’ sense of identity? Students will also consider the ways in which the city affects understandings of gender, class and race in these texts. The course will focus on the novel, but it will also include excerpts from newspapers, poetry and essays. Students will read Our Mutual Friend over the course of the semester in order to mimic the experience of nineteenth-century serial reading. Other readings will include Evelina, *The Secret Agent*, and *A Study in Scarlet*.
Instructor(s): J. Valdez
Area: Humanities
Writing Intensive.

AS.060.304. The Country House and the British Novel 1814-1910. 3 Credits.
In this course, students will read four of Shakespeare’s plays (Romeo and Juliet, *Othello*, *Taming of the Shrew* and *A Midsummer Night’s Dream*) alongside a movie adaptation of each that belongs to a genre rarely rooted in one’s own culture and a cosmopolitan orientation in Henry James, Joyce, Tagore, Hemingway, Isak Dinesen, and Hualing Nieh. This view of the novel's origins owes much to the influence of Ian Watt’s *The Rise of the Novel* (1957). Watt claims that the prose fiction written by these three authors is defined and distinguished from other varieties by its “formal realism” – a set of procedures that made the novel much more lifelike than picaresque tales, courtly novellas, or the romance. Watt’s view of the canon is now taken to be too restrictive, but his thesis concerning what was novel about the novel remains influential. In this course students will engage with two aspects of Watt’s argument that have been criticized by later critics but still retain some of their original force: the idea that eighteenth-century prose fiction marks a break with the past and that the tradition emerging at that point has English origins. We will be testing these two theses by reading and contrasting older and newer forms of prose fiction from England, France, and Spain, comparing their formal procedures, and discussing how satisfactorily Watt accounts for them. We will also be reading critiques and defenses of Watt by critics including Michael McKeon, J. Paul Hunter, Margaret Anne Doody, and Nicholas Seager. Primary sources will include excerpts from Roger Boyle’s romance *Parthenissa* (1651) alongside Defoe’s *Moll Flanders* (1722); the picaresque tale *Lazarillo de Tormes* (1554) together with Fielding’s road epic *Joseph Andrews* (1742); and the conjugal drama of Madame de Lafayette’s *La Princesse de Clèves* (1678) together with Richardson’s treatment of a similar topic in *Pamela* (1740). As we read the primary sources we will also be reading the relevant chapters of *The Rise of the Novel*. By gaining a first-hand view of the actual changes in prose fiction students will be able to appreciate the force of Watt’s thesis as well as its limitations. Toward the end of the course they will also engage with the provocative final chapter of Watt’s book, which claims that the problems raised by formal realism as practiced by Richardson and Fielding are finally resolved in the work of Jane Austen. Sense and Sensibility should provide the testing ground for this thesis. Pre 1800 course.
Instructor(s): C. Gannon
Area: Humanities
Writing Intensive.

AS.060.306. The Rise of the Novel. 3 Credits.
This course will look at the development of the novel form, from its earliest incarnations. We will pay special attention to questions of how changes in social, cultural, and economic context played a part in the growing popularity and relevance of the novel form. Authors will likely include Miguel de Cervantes, Daniel Defoe, Samuel Richardson, Henry Fielding, Jane Austen, and Henry James. [This course satisfies the pre-1800 requirement]

Writing Intensive.

AS.060.307. Training/Writing/Consulting. 1 Credit.
A one credit course for those undergrads who have been nominated as Writing Center tutors. Permission required.
Instructor(s): E. Steedley
Area: Humanities
Writing Intensive.

AS.060.308. The Novelty of the Novel. 3 Credits.
The English novel has been traditionally regarded as having originated in the eighteenth century, with the works of Defoe, Richardson, and Fielding. This view of the novel’s origins owes much to the influence of Ian Watt’s *The Rise of the Novel* (1957). Watt claims that the prose fiction written by these three authors is defined and distinguished from other varieties by its “formal realism” – a set of procedures that made the novel much more lifelike than picaresque tales, courtly novellas, or the romance. Watt’s view of the canon is now taken to be too restrictive, but his thesis concerning what was novel about the novel remains influential. In this course students will engage with two aspects of Watt’s argument that have been criticized by later critics but still retain some of their original force: the idea that eighteenth-century prose fiction marks a break with the past and that the tradition emerging at that point has English origins. We will be testing these two theses by reading and contrasting older and newer forms of prose fiction from England, France, and Spain, comparing their formal procedures, and discussing how satisfactorily Watt accounts for them. We will also be reading critiques and defenses of Watt by critics including Michael McKeon, J. Paul Hunter, Margaret Anne Doody, and Nicholas Seager. Primary sources will include excerpts from Roger Boyle’s romance *Parthenissa* (1651) alongside Defoe’s *Moll Flanders* (1722); the picaresque tale *Lazarillo de Tormes* (1554) together with Fielding’s road epic *Joseph Andrews* (1742); and the conjugal drama of Madame de Lafayette’s *La Princesse de Clèves* (1678) together with Richardson’s treatment of a similar topic in *Pamela* (1740). As we read the primary sources we will also be reading the relevant chapters of *The Rise of the Novel*. By gaining a first-hand view of the actual changes in prose fiction students will be able to appreciate the force of Watt’s thesis as well as its limitations. Toward the end of the course they will also engage with the provocative final chapter of Watt’s book, which claims that the problems raised by formal realism as practiced by Richardson and Fielding are finally resolved in the work of Jane Austen. Sense and Sensibility should provide the testing ground for this thesis. Pre 1800 course.

Writing Intensive.

AS.060.310. Work and Worth in American Literature. 3 Credits.
This course will engage contemporary discussions of economics, labor, and vocation with representations of people at work in the writings of Douglass, Melville, Hurston, Steinbeck, Frost, Yates, Springsteen, and others. Dean’s Teaching Fellowship Course
Instructor(s): E. Tempesta
Area: Humanities
Writing Intensive.
AS.060.311. On "Moral Insanity": Self-Control in Victorian Philosophy, Psychology, and Fiction. 3 Credits.

Standard utilitarianism, the dominant philosophical account of moral agency in the Victorian period, has a surprisingly unsophisticated account of self-control: both Jeremy Bentham and John Stuart Mill thought it was relatively straightforward, insofar as agents reliably pursued whatever end appeared to promise the greatest gain in happiness with little psychic effort. But other forms of intellectual life in the period—the now-forgotten "Intuitionist" school, the pre-Freudian psychologists, and perhaps most importantly, an important series of Victorian novelists—recognized that agency was much more complex, and tried to work through the problem that J.C. Prichard called "moral insanity." Conceiving it as a situation where agents cannot for some reason pursue their own reflectively endorsed goals, these authors developed a variety of richly complex accounts of and treatments for the loss of self-control. In this class, we are going to explore those accounts at some length. To start with the utilitarian model as a backdrop to the more complex accounts, we will read selections from Jeremy Bentham and John Stuart Mill in which they lay out their pleasure/pain account of agency, and then work through a set of theoretical materials for use throughout the course. First, we'll examine the intuitionist views of agency from William Whewell and John Grote, who held that moral action essentially required mastering oneself in such a way as to perceive and act upon moral intuitions; then, we'll turn to analyses from Prichard, Forbes Winslow, Henry Mausley, and other early forerunners in the developing field of psychology, and situate these arguments within the philosophical context. With this theoretical frame in place, we will spend the bulk of the course reading a series of novels that address the question of self-control. Beginning with Jane Austen and Charlotte Brontë, we'll consider the ways in which these novels represent the relationship between desire, reflection, and gender. Turning to George Eliot's Romola and Anthony Trollope's Can You Forgive Her?, we'll consider the way Eliot and Trollope analyze the nature of practical rationality. Finally, we'll conclude with two important challenges to the belief in the moral value of self-control: both George Eliot and Thomas Hardy argued for the necessity of mastering oneself at an Exhibition; Caryl Phillips, The Nature of Blood; and J. M. Coetzee Epstein King of the Jews; Sylvia Plath, selected poems; Philip Roth, The Plot against America; D. M. Thomas, The White Hotel or Pictures At an Exhibition; Caryl Phillips, The Nature of Blood; and J. M. Coetzee Elizabeth Costello.

Writing Intensive.

AS.060.312. Literature of the Gray Zone: The Holocaust and Its Shadow. 3 Credits.

Primo Levi's well-known essay "The Gray Zone" describes complex states of complicity and moral erosion between the categories of "victims," "perpetrators," and "bystanders" during and after the Holocaust. Literature written at the time or in the immediate aftermath, whether memoir, commentary, or fiction, contains many illustrative examples, but even more have arisen at one or another remove from the events, as later generations have confronted an atrocity frequently taken to be historically and morally unique. How did the Holocaust become a touchstone for both extremities of human behavior and problems of representation? When did the Holocaust become available to literature or to the once unthinkable strategies of satire, post-modernism, and even pornography, and can these strategies be considered examples of "the gray zone"?

The course will deal with the testimonies of perpetrators such as Rudolf Höss (commandant of Auschwitz) and historical documents setting forth plans for genocide; with memoirs of prisoners such as Filip Müller forced into participation in the Holocaust; and more particularly with literary depictions of life in "the gray zone." The sequence of readings will be organized mainly around literary texts, but these will be paired, sometimes in two-week sequences, with historical and critical materials that take up the problem of complicity through various perspectives: the role of Jewish leaders during the Holocaust; attempts to fictionalize extremities of evil (e.g., Hitler); the aestheticizing of atrocity; the moral responsibility of bystanders; and the extension of genocidal paradigms to other dimensions such as slavery and animal rights. Texts to be studied (mostly, though not exclusively, written first in English) may include: Primo Levi, The Drowned and the Saved; Rudolph Hoess, Commandant of Auschwitz; Tadeusz Borowski, This Way to the Gas, Ladies and Gentlemen; George Steiner, The Portage to San Cristobal of A. H.; Leslie Epstein King of the Jews; Sylvia Plath, selected poems; Philip Roth, The Plot against America; D. M. Thomas, The White Hotel or Pictures At an Exhibition; Caryl Phillips, The Nature of Blood; and J. M. Coetzee Elizabeth Costello.

AS.060.317. Time Well Wasted: Reading Fiction in the 18th Century. 3 Credits.

Is reading fiction just escapism? Or can novels speak to us about real life? We will discuss this question by reading classic works by Defoe, Swift, Fielding, and Sterne. Dean’s Teaching Fellowship Course. Pre 1800 course.

Instructor(s): R. Maioli dos Santos
Area: Humanities
Writing Intensive.
AS.060.318. The Theology of Narrative. 3 Credits.
Everything happens for a reason.” “I guess it wasn’t meant to be.” People often impose a narrative logic on life events by reference--however attenuated—to a transcendent order of meaning. This course asks two basic questions: How do theological concepts such as God’s omniscience, Providence, predestination, and prophecy get translated into particular narrative structures? How does narrative experimentation function as a critique of traditional theological viewpoints, particularly around the question of how divine agency is related to the existence of evil? Texts may include: “The Book of Job” (4th century B.C.E), Voltaire’s “Candide” (1759), Olaudah Equiano’s “Slave Narrative” (1789), Herman Melville’s “Moby-Dick” (1851), Rebecca Harding Davis’s “Life in the Iron-Mills” (1861), James Agee’s “Let Us Now Praise Famous Men” (1941), and Scarlett Thomas’s “Our Tragic Universe” (2010). Recommended Course Background: AS.060.107, a lecture course (200-level) in the English department, or instructor approval.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.319. Shakespeare’s Rome. 3 Credits.
This course will examine the plays and poems of Shakespeare inspired by ancient Rome. A strong emphasis will be placed on the analysis of relevant scholarly articles. Pre-1800’s course. Recommended Course Background: one English course.
Area: Humanities
Writing Intensive.

AS.060.320. Slave Narratives and Neo-Slave Narratives. 3 Credits.
This course will offer a critical and historical understanding of slave narratives. The course will also consider the ways in which neo-slave narratives adopt and transgress their literary-historical models, and to what effects. Texts under consideration may include Olaudah Equiano, ‘The Interesting Narrative in the Life of Olaudah Equiano’; Mary Prince, ‘The History of Mary Prince: A West Indian Slave’; Frederick Douglass, ‘Narrative of the Life of Frederick Douglass’; Harriet Jacobs, ‘Incidents in the Life of a Slave Girl’; Charles Johnson, ‘Oxherding Tale’; Ishmael Reed, ‘Flight to Canada’, Gayl Jones, ‘Corregidora’; Toni Morrison, ‘Beloved’; and Octavia Butler, ‘Kindred’.
Instructor(s): M. Thompson
Area: Humanities
Writing Intensive.

AS.060.321. Victorian Poetry. 3 Credits.
In this class, we’re going to briefly survey the major poets of the Victorian era: Alfred, Lord Tennyson, Robert and Elizabeth Barrett Browning, Dante Gabriel Rossetti and his sister Christina, Matthew Arnold, George Meredith, and others. Moreover, we’ll try to situate them in the social, political, and intellectual contexts that gave rise to their works, and investigate the questions that stimulated them and which their works address: we will, for instance, follow Arnold in thinking about the place of religion in the modern world, Meredith in thinking about the nature of moral egoism, and Elizabeth Barrett Browning in recovering the voices of oppressed classes. We’ll also try to address the various formal innovations of poetry in the Victorian era, attending to—for example—Tennyson’s complex re-imagination of the verse of the Arthurian legends and Robert Browning’s development of sophisticated forms of irony. Specific poems to be studied include Tennyson’s “Ulysses” and “The Lady of Shalott,” George Meredith’s “Modern Love,” and Christina Rossetti’s “Goblin Market.”
Instructor(s): P. Fessenbecker
Area: Humanities
Writing Intensive.

AS.060.322. Heart and Science: Forms of Knowledge in 19th Century Literature. 3 Credits.
This course focuses on science’s influence on nineteenth-century British literature, exploring how literature was thought to collaborate with scientific discoveries, but also tracing their gradual separation into distinct disciplines. Dean’s Teaching Fellowship Course
Instructor(s): E. Cohn
Area: Humanities
Writing Intensive.

AS.060.323. Modern British Poetry. 3 Credits.
In this course, students will consider the emergence and development of modern British poetry. Beginning with Hopkins and Hardy, two of the forebears of modernist literature, students will read and discuss the war poems of Owen and Sassoon before turning to major modernist poets like Eliot, Pound, and Auden. By reading pertinent critical pieces by and biographical information about these poets, students will acquire an understanding of modernism’s concern with form, its interest in experimentation, and its navigation of both tradition and modernity. Over the course of the semester, students will be asked to write three five-to-seven-page essays on the works previously covered in class.
Instructor(s): E. Steedley
Area: Humanities
Writing Intensive.

AS.060.324. A Literary Decade: Britain between 1789 and 1799. 3 Credits.
The course will particularly focus on how various writings of the decade involved conceiving of literature as what Wordsworth called “the history or science of feeling.” Readings will include Rousseau’s ‘Confessions’, selections from Wordsworth poetry, and two Gothic novels (Radcliffe’s ‘Mysteries of Udolpho’ and Godwin’s ‘Caleb Williams’). Pre- 1800 course.
Instructor(s): F. Ferguson
Area: Humanities
Writing Intensive.

AS.060.325. Renaissance Poetry. 3 Credits.
During the Renaissance, England experienced a flowering of the arts and sciences greatly inspired by the discovery of new lands and peoples, on the one hand, and the rediscovery of Classical texts in literature, history and philosophy, on the other. In this survey of Renaissance poetry, we will consider the ways in which poets of the period variously negotiate the creative challenge of reconciling the old with the new. Pre 1800 course
Instructor(s): D. Hershinow
Area: Humanities
Writing Intensive.
AS.060.326. Spectral Evidence. 3 Credits.
Rising to its greatest prominence during the 1692 Salem Witch Trials, "spectral evidence" refers to a category of evidence that involves supernatural claims--dreams, visions, etc. Even in 1692 within the largely homogeneous Euro-American Puritan community, the category raised profound questions about what should count as evidence in legal settings, and, more broadly, about the ontological status of the supernatural--to what extent are certain experiences of the supernatural mediated by private subjectivity and thus difficult to transmit or even illegible in the public sphere? These questions only intensified in cross-cultural contexts like the colonial Americas and postcolonial Australia and South Africa and often get reconfigured into debates about the limits of cultural relativism. This course will examine historical, literary, and filmic sites at which the question of "spectral evidence" comes into play. Texts may include: documents pertaining to the Salem Witch trials; Inquisition records; the novels of Charles Brockden Brown; Nathaniel Hawthorne, "The Scarlet Letter" and other fiction; Edgar Allan Poe, "The Tell-Tale Heart," "The Pit and the Pendulum," and other fiction; the spiritualist medium Fox sisters’ confessions; Mark Twain, "Personal Recollections of Joan of Arc"; Arthur Miller, "The Crucible"; Peter Weir, dir., The Last Wave; Gavin Hood, dir., A Reasonable Man; Scott Derrickson, dir., The Exorcism of Emily Rose. Recommended Courses Background: AS.060.107, 200-level English course, or instructor approval.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.327. Best Sellers in the Early Nineteenth Century: Sir Walter Scott, Lord Byron, and Jane Austen. 3 Credits.
Sir Walter Scott and Lord Byron were the best-selling authors of their day by a significant margin. In this course, we'll attempt to come to terms with their unprecedented success, which was felt within the business of the publishing industry as much as it was in the minds of their fellow writers. Readings include Scott’s poems set in Scotland’s legendary past, Byron’s scandalous and heroic poems (including his masterpiece, Don Juan), as well as a novel by their less-popular contemporary, Jane Austen, whose formally elegant novels must be understood as drawing on and competing with the works of her age’s most dominant literary figures. Additionally, we’ll place a strong emphasis on understanding how the workings of the publishing industry affected not only the habits of reading, but also of writing, during this crucial period in literary history. Secondary readings will help to situate the authors and primary texts in their historical and literary context, and provide practical tools for literary analysis. Assignments will include reading quizzes, response papers, and three longer papers. Required Texts: Walter Scott, The Poetical Works of Walter Scott (Wildside Press) Walter Scott, Waverley (Broadview) Lord Byron, The Major Works (Oxford) Jane Austen, Persuasion (Oxford)
Instructor(s): N. Bujak
Area: Humanities
Writing Intensive.

AS.060.328. Restoration and 18th Century Literature. 3 Credits.
This course is a survey of the major authors and genres in English from 1660-1800. Topics include the rise of the novel, politics and satire, gender and women writers, landscape and ecological consciousness, philosophy, science and literature.
Prerequisites: AS.060.107
Instructor(s): J. Kramnick
Area: Humanities
Writing Intensive.

AS.060.329. Prophecy after Science. 3 Credits.
Prophets and their prophecies are everywhere: whether preached by evangelical visionaries of Rapture, opined by prime-time sports forecasters, or sold at hourly rates by countless fortunetellers and astrologers. Our dizzying era, predicated economically, technologically, and politically on objective methods of prediction, comfortably accommodates and even welcomes pre-scientific, prophetic modes of futurity. We look up our horoscopes on our smartphones. How did we come to balance these futures so blithely? Do we -- and should we -- think of these modes as continuous or separate, complementary or conflicting? This course explores the history of prophecy, from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom, with a focus on the effect of the rise of science in shaping the course of prophetic writings. The majority of texts in this course come from the literature of 1600-1800 -- centuries that witnessed the emergence of our modern scientific disciplines, and the recasting of prophecy in terms of the human imagination.
Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.330. The Contemporary Novel. 3 Credits.
This course will survey a variety of novels written since 2000, from literary novels to best-sellers, both in English and in translation (into English). We’ll pay attention to formal and aesthetic questions -- what counts as a good story, at this point in history? -- and we’ll hone our skills in recognizing narrative patterns and motifs across different fictional styles. Authors likely to be considered include Arundhati Roy, Junot Diaz, Roberto Bolaño, Muriel Barbery, Marlene van Niekerke, David Mitchell, and Amitav Ghosh.
Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.

AS.060.331. Poetry and Perfect Worlds. 3 Credits.
A seminar exploring poetic representations of ideal realms. Beginning with classical pastoral, we will move on to medieval and Renaissance arcadian, Romantic geographies, modernist utopias, and the ecopoetics and necropastoral of the twenty-first century. We will consider in detail what makes a place Edenic or utopian and how the fabrication of an imaginary world relates to the construction of a poetic text. Writers studied may include Theocritus, Virgil, Chaucer, Spenser, Milton, Shelley, Tennyson, T. S. Eliot, W. H. Auden, Lisa Robertson, and Juliana Spahr.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.332. Jewish American Fiction. 3 Credits.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.
AS.060.333. American Jewish Literature. 3 Credits.
How did eighteenth-century writers respond to the culture of enlightenment? The English novel will be our primary focus, though some poetry, drama or autobiography will be included. Authors may include Swift, Pope, Defoe, Manley, Richardson, Equiano, Inchbald, Brown, Godwin.
Instructor(s): A. Wexler
Area: Humanities
Writing Intensive.

AS.060.334. Oaths, Pledges, Promises and Pacts: Literature and Obligation. 3 Credits.
Through readings of Scripture, medieval and early modern drama and prose fiction, and modern political theory and environmental writing, this course explores the complex and overlapping status of oaths, pledges, promises, pacts, and contracts. Starting with an examination of speech act theory, this upper division seminar will consider a range of literary "scenes of obligation" in which verbal promises or written contracts bind persons together. We will look at how promises and contracts mediate relationships between humanity and inhuman forces (pledges to God, pacts with the Devil), how they consolidate bonds between human beings (business contracts, marriage contracts), and how they are fulfilled, broken, or re-negotiated. Possible texts include: J. L. Austin, "How to Do Things with Words"; John Searle, "Speech Acts"; Anon., "The Building of the Ark", "The Flood" (York Corpus Christi Plays); Anon., "Arden of Feversham"; Christopher Marlowe, "Doctor Faustus"; Wil liam Shakespeare, "The Merchant of Venice"; Margaret Cavendish, "The Contract"; and chapters from Jean Jacques Rousseau, "The Social Contract"; Carole Pateman, "The Sexual Contract"; and Michel Serres, "The Natural Contract". Pre 1800 course.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.

AS.060.335. Lyric Poetry from Skelton to Marvell. 3 Credits.
This course charts two hundred years in the development of the English lyric. Authors include Skelton, Wyatt, Sidney, Shakespeare, Spenser, Campion, Donne, Jonson, Herrick, Herbert, Crashaw, Wroth, Vaughn and Marvell. Pre-1800's course
Instructor(s): Marvell. Pre-1800 course.
Area: Humanities
Writing Intensive.

AS.060.336. Scribbling Women: Female Authorship in Nineteenth-Century America. 3 Credits.
This course will introduce students to a range of texts by women in nineteenth-century America, with a particular focus on how these authors conceive of the relation between gender and the work of writing. We will consider why these authors write, how they understand the importance (or unimportance) of literary endeavor, whom they write for, how they present themselves to their audiences, and whether and how they suggest their gender authorizes or limits their authorial scope.
Instructor(s): C. Ellis
Area: Humanities
Writing Intensive.

AS.060.337. James Joyce. 3 Credits.
A seminar covering the oeuvre of James Joyce, including but not limited to Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and parts of Finnegans Wake. Selected readings in other writers and in relevant historiography; some attention to Joyce criticism.
Instructor(s): D. Mao; E. Sundquist; J. Hickman; M. Thompson
Area: Humanities
Writing Intensive.

AS.060.338. Trauma, Melancholia, and Ethnic Identity in American Literature. 3 Credits.
This seminar employs the psychoanalytic concepts of trauma and melancholia to analyze a selection of American literary texts in light of ethnic identity. Writers include Freud, Momaday, Wheatley, Faulkner, and Spiegelman.
Area: Humanities
Writing Intensive.
AS.060.345. Mapping Victorian England. 3 Credits.
The landscape of England changed dramatically during the course of the nineteenth-century, from the unprecedented expansion of the British Empire and the rapid growth of cities and urban environments, to the increasing psychological investment in more confined spaces like the home. In this course, we’ll explore how Victorian literature “maps” these various spaces and, perhaps more importantly, the connections between them. The bulk of our reading will be novels by authors such as Charles Dickens, Elizabeth Gaskell, George Eliot, Anthony Trollope, Thomas Hardy, and Rudyard Kipling, though we’ll also turn to poems, non-fiction prose, and short theoretical readings to enrich our understanding of how Victorian writers attempted to represent the spatial, social, and economic geography of their nation. In addition to examining the “horizontal” connections drawn by these novels—between, for example, the country and the city, the colonies and the capital, the home and the nation as a whole—we’ll also explore how these novelists draw on intellectual developments like the emerging Darwinian worldview and incorporate what we might call “vertical” mapping to understand how the past shapes the present. Throughout, we’ll pay careful attention to how these writers represent the specificity of place and investigate the influence of environment on character and personal development.
Instructor(s): A. Grener
Area: Humanities
Writing Intensive.

AS.060.346. Major British Authors: George Eliot. 3 Credits.
In this course we will read the major novels of George Eliot, one of the most significant writers in the history of British fiction. Her novels addressed a number of compelling moral and social issues through powerful narratives about fallen women, disappointed love, tense family dramas, and individual struggles to find meaningful vocation. We will read the works carefully, examining their formal features in relation to philosophical, social, and historical context. To read Eliot is necessarily to enter into a rich engagement with nineteenth-century culture and thought, and in order to further our understanding of her oeuvre, we will read a number of key critical appraisals of individual novels, as well as some of Eliot's own essays on various topics. Novels will include "Adam Bede", "The Mill on the Floss", "Felix Holt", "Middlemarch", and "Daniel Deronda".
Instructor(s): A. Anderson
Area: Humanities
Writing Intensive.

AS.060.347. American Bibles. 3 Credits.
This course will examine texts drawn from across the Americas—from Mather’s Magnalia Christi Americana to Melville’s Moby-Dick to Euclides da Cunha’s Os Sertões (Rebellion in the Backlands) to Kushner’s Angels in America—that are fundamentally biblical in their inspirations, aspirations, proportions, and allusions. We will consider these texts’ attempts, in the face of globalizing and secularizing forces like Atlantic slavery and German higher criticism, to affirm, undermine, appropriate, and redirect the authority of the ur-canonical text. Recommended Course Background: AS.060.107 or lecture course in English department.
Prerequisites: AS.060.107 or a lecture course in the English department.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.348. English Literary Culture After 1945. 3 Credits.
This course will introduce students to British writing (poetry, drama, novel) in the decades after the second World War, focusing on how social changes helped transform literature in the period.
Area: Humanities
Writing Intensive.

AS.060.349. Modern Drama. 3 Credits.
A survey of works by major modern playwrights. Ibsen, Chekhov, Pirandello, Beckett, Genet, Brecht, Pinter, Albee, Wilson, and others. Recommended Course Background: AS.060.107
Prerequisites: AS.060.107
Instructor(s): R. Halpern
Area: Humanities
Writing Intensive.

AS.060.350. Literature by Other Means: Experimental and Conceptual Fiction and Poetry. 3 Credits.
This course will introduce students to experimental, conceptual, and constraint-generated literature. In some cases, the texts we will read were created through the application of some particular premise, constraint, or rule-governed system. In other cases, practices of appropriation, creative re-use, or sampling were involved in the generation of textual material (sometimes subjected to editing and transformation, sometimes presented “as is”). What happens to literary meaning, genre identification, and the author/reader contract under these conditions? Can an experiment be evaluated as a success or failure as literature? What’s so “conceptual” about this practice, anyway? And why are the results- often typecast as difficult or resistant to understanding- frequently so funny? In search of answers, we will read widely in experimental and conceptual literature and in the manifestos and critical analyses that surround this work, and we will look at the overlap between experimental and avant-garde literary movements and concurrent processes of “dematerialization” in play within the related domain of the visual arts. Finally, we will consider the importance of digital tools, search engines, and databases in the construction of experimental literature at the present time. Possible authors/texts include Raymond Queneau “Exercises in Style”, Raymond Roussel “How I Wrote Certain of My Books”, Georges Perec “A Void”, Harry Matthews “Oulipo Compendium”, Walter Abish “Alphabetical Africa”, Marjorie Perloff “Unoriginal Genius”, William S. Burroughs “The Cut-Up Method”, Charles Bernstein, “The L=A=N=G=U=A=G=E Book”, Kenneth Goldsmith “The Weather”, Gary Sivan “The Flarf Files”, Aaron Kunin “The Sore Throat”, Christian Bok “Eunoia”, and David Trinidad and D. A Powell’s “By Myself, An Autobiography”.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.

AS.060.351. The Cosmic Race: Cosmopolitanism and Theories of American Culture. 3 Credits.
How do we make sense of transnational conceptions of American nationalities, both of the U.S. and “other” American cultures? What’s at stake in familiar notions of the U.S. as a “melting-pot,” a “teeming nation of nations,” or in Latin American celebrations of mestizaje? Do they speak to noble ideals, empirical realities, or imperial ambitions? We will follow the formation of “America” as an idea, a transcendent and pivotal point of reference in philosophical and theological discourses, and consider how a host of writers, from Crevecoeur and Paine to Henry James, Jean Toomer, and José Vasconcelos, have negotiated the universal and the particular in their utopian and messianic visions of American cultures.
Area: Humanities
Writing Intensive.
AS.060.352. Whitman, Frost, Stevens. 3 Credits.
This course will examine the way in which the body, nature, and the imagination are developed as central tropes in the poetry of Whitman, Frost, and Stevens. Recommended Course Background: at least two introductory literature courses.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.353. Passing and Identity in American Culture. 3 Credits.
This course will take up the subject of passing from a variety of different identity perspectives – race, class, gender, and sexuality. Through both early to mid-twentieth century films and novels, we will examine how passing functioned as both an experience and symbol that worked to challenge privilege and undermine power structures.
Instructor(s): S. Mott
Area: Humanities

AS.060.354. Marlowe and Shakespeare’s History Plays. 3 Credits.
The first folio of Shakespeare’s works groups his plays into three categories: “Comedies,” “Tragedies,” and “Histories.” This course will consider what a Renaissance history play was. What are the consequences of basing literature on real historical events? How do the ways in history has been dramatized on stage relate to renaissance understandings of history and how we understand history today? We will read all ten of the plays classed as Histories in the Folio, along with two other Shakespeare plays based on British historical chronicles (King Lear and Cymbeline) and Christopher Marlowe’s Edward II. We will also look at the chronicles and histories that served as sources for the playwrights, and theoretical discussions of the purpose and nature of history and literature from the early modern period. Pre 1800 course
Instructor(s): M. Vinter
Area: Humanities
Writing Intensive.

AS.060.355. Postmodern American Fiction. 3 Credits.
This seminar is a survey of so-called “postmodern” American fiction. Authors to be considered include Thomas Pynchon, Don DeLillo, Kathy Acker, Ursula LeGuin, William Gibson, Oscar Zeta Acosta, and Denis Johnson.
Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.

AS.060.356. Empire’s Fiction and Its Collapse: Colonial and Postcolonial Novels in Dialogue. 3 Credits.
Instructor(s): A. Wexler
Area: Humanities
Writing Intensive.

AS.060.357. The Novels of Jane Austen. 3 Credits.
An intensive study of Austen’s six major novels, read in their literary and historical context.
Instructor(s): J. Kramnick
Area: Humanities
Writing Intensive.

AS.060.358. Victorian Realisms. 3 Credits.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.359. Traveling Literature in Africa and the African Diaspora. 3 Credits.
Instructor(s): O. Ibironke
Area: Humanities
Writing Intensive.

AS.060.360. Jane Austen. 3 Credits.
All of Austen’s completed novels, as well as a selection of her letters. We will examine both her influence on the novel form, and her work’s relation with her social context. We will also consider why Austen has such unprecedented cultural authority today.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.361. Literature, War, Trauma. 3 Credits.
With a focus on the post-World War II period, a world redefined by the cataclysmic events of the Holocaust and the atomic bombing of Hiroshima and Nagasaki (as well as the more widespread strategic aerial bombing of civilian targets in Europe and Japan), the course will consider the nexus of literature, war, and trauma across a range of modern works in English, supplemented by some works in translation. What does it mean to live in the shadow of the Holocaust and the ever-present threat of nuclear war? How can annihilation on such a scale be accommodated to historical, theological, and ethical understanding? What is the role of the imagination in addressing such questions? What if the war had had a different outcome? We will investigate the consequences for literature as it attempted to address such questions in fiction, memoir, and commentary. In addition to a range of historical and theoretical readings, we will concentrate on literary works of several kinds: as a point of departure a few primary works by figures such as Primo Levi “The Drowned and the Saved” and John Hersey “Hiroshima”; fictional and non-fictional ruminations on the war's legacy by figures such as Kurt Vonnegut “Slaughterhouse Five”, D. M. Thomas “The White Hotel”, Msuji Ibuse “Black Rain”, and W. G. Sebald “On the Natural History of Destruction”; counterfactual narratives about the world that might have been, had the Axis powers prevailed, by figures such as Philip K. Dick “The Man in the High Castle”, Ira Levin “The Boys from Brazil”, Philip Roth “The Plot against America”, and Michael Chabon “The Yiddish Policeman’s Union”; and works in which the impact of catastrophic destruction is absorbed into other cultural arenas by figures such as Toni Morrison “Beloved”, Don DeLillo “White Noise”, and J. M. Coetzee “Elizabeth Costello”. Readings are tentative and may be modified. Requirements: class participation, short writing exercises, and two longer papers.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.362. Nature’s Nation: American Nature in Literature and Film. 3 Credits.
Instructor(s): H. Leach
Area: Humanities
Writing Intensive.

AS.060.363. Henry James. 3 Credits.
A reading of the major novels. Recommended Course Background: AS.060.107 or two lower level literature courses.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.364. The Un-Christian Renaissance. 3 Credits.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.
AS.060.365. Worlds of Postwar Fiction. 3 Credits.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.366. Life Sciences in the American Renaissance. 3 Credits.
This course considers works by several major authors of the period known
as the American Renaissance, examining the ways in which these literary
texts engage with contemporary scientific ideas about life. Recommended
Course Background: two English courses or permission of the instructor.
Area: Humanities
Writing Intensive.

AS.060.367. Emerson, Thoreau, Poe. 3 Credits.
We shall examine what "divinity," "nature," "Being in general" and
"personal identity" differently mean in the writings of Ralph Waldo
Emerson, Henry Thoreau, and Edgar Allan Poe, and consider the genres
(essay, excursion, home-cosmography, tale, and treatise) in which
these authors write. Finally, taking seriously Thoreau’s question—"Why
do precisely these objects we behold make a world?"—we’ll ask how
these nineteenth-century American authors construct worlds out of
their sustained visions of the intuitive (Emerson), the natural (Thoreau),
and the perilous (Poe). Junior/Senior seminar. Recommended Course
Background: AS.060.107 or two lower level literature courses.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.369. The Harlem Renaissance. 3 Credits.
Instructor(s): S. Mott
Area: Humanities
Writing Intensive.

AS.060.370. Black History and the Fictive Imagination. 3 Credits.
In this course, we will turn our attention to U.S. and Caribbean black
writers who used fiction to address, or sometimes redress, significant
historical events and moments. Alongside novels, we will read more
formal histories as a way to explore how fiction writers creatively weighed
in on historical debates as diverse as slavery and its legacies, the Civil
Rights Movement, black power, communism, and anti-colonial struggles.
Some of the writers we will consider include: Alice Walker, Edwidge
Danticat, Charles Johnson, Gayl Jones, Ann Petry, Michelle Cliff, and
Richard Wright.
Instructor(s): S. Mott
Area: Humanities
Writing Intensive.

AS.060.371. Major American Authors: Philip Roth. 3 Credits.
Over the course of his long career Philip Roth has struck a precarious
balance between identification as a Jewish American novelist and
insistence that his art escapes such ethnic enclosures. This tension lies
at the heart of his work, as indeed some would argue it lies at the heart
of the American Jewish experience of the twentieth century. Having
emerged as a decidedly rebellious figure who shocked the Jewish
community and the nation at large in the 1950s and 60s, Roth has written
more than twenty-five novels exploring issues that range from conflicts
over assimilation to the roles of the Holocaust and Israel in American
Jewish life to the countercultural turbulence of the 1960s to the identity
politics of the 1990s. Roth has revealed in forms of fictive autobiography
—"counter-lives," "counter-plots," and counterfactual histories—that have
enlarged the scope of fiction while still grappling with the tensions and
dangers of modern life. Works to be read include: "Goodbye, Columbus";
"Portnoy’s Complaint"; "Operation Shylock"; "American Pastoral"; "The
Ghost Writer"; "The Anatomy Lesson"; "The Plot Against America"; "The
Human Stain"; "The Facts"; "The Counterlife"; "Sabbath’s Theater"; and
"Nemesis". Requirements: two 8-10 page papers, a class presentation,
and participation in discussion.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.372. Melville,Poe,Hawthorne. 3 Credits.
We will read major fiction by Poe, Melville, and Hawthorne, and consider
how conceptions of identity are treated as psychological, philosophical,
and historical problems in the writings of these authors. We will also
be concerned with the formal inventions that accompany these mid-
nineteenth century American investigations of personal identity, and with
topics such as gothic horror; divinity; and the status of explanation.
Prerequisites: Prereq: AS.060.107 OR one lower level English
course.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.373. Victorian Poetry. 3 Credits.
Instructor(s): E. Cohn
Area: Humanities
Writing Intensive.

AS.060.374. Topics in Modern Literature: The Avant-Garde. 3 Credits.
This course considers the writings of avant-garde artists of the first half
of the twentieth century. Paying special attention to the manifestos of
movements in art such as cubism, futurism, dada and surrealism, the
course then links developments in the plastic arts to those in literature.
Area: Humanities
Writing Intensive.
AS.060.375. Literature of the Holocaust. 3 Credits.
The course will focus on reactions to, and representations of, the Holocaust in European, Israeli, and American literature. In moving from the initial response of eyewitness testimony, through the emergence of fiction as one means to test the adequacy of historical accounts and memoirs, and on to more recent reflections on the problem of adequately “remembering” the event, we will consider how the Nazi genocide has entered into world consciousness. What does it mean to have an artistic or aesthetic response to such an event? Why has the Holocaust assumed so a significant role in contemporary life that there are entire genres of literature and film devoted to it? We will also look at some more contemporary writers whose work deals indirectly with the after-effects of the Holocaust. Readings may include: Levi, Survival in Auschwitz; Borowski, This Way for the Gas, Ladies and Gentlemen; Delbo, Auschwitz and After; Kosinski, The Painted Bird; Grossman, See Under: Love; Ozick, The Shawl; Epstein, King of the Jews; Roth, The Plot against America; Appelfeld, Baddenheim 1939; Coetzee, Elizabeth Costello; Phillips, The Nature of Blood. Cross-listed with Jewish Studies.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.376. The Imprisonment of the African Writer from Mandela to Present. 3 Credits.
An international newspaper report in 1965 on writers from an African nation reads thus: “A year ago, one playwright was acquitted of holding up a radio station. A month ago, one poet was principal actor in a gun-running melodrama.” This course examines the phenomenon of writers in politics. It explores the concept of engagement or commitment in literature as developed by Jean-Paul Sartre, particularly in postcolonial African literature. We will discuss the traditional notions of art and activism, imagination and ideology. The questions that are crucial to our concerns in this course include: why is writing in Africa a very hazardous career? How do writers respond to the threat and actual experience of metaphoric, physical, and spiritual confinement and harm? What does the precarious situation of the African writer reveal about the nature of postcolonial societies? Texts include selections from theoretical essays and autobiographical narratives such as: Nelson Mandela, “No Easy Walk to Freedom”; Wole Soyinka, “The Man Died”; Ngugi wa Thiong’o, “Detained: A Writer’s Prison Diary”; Jack Mapanje, “The Chattering Wagtails of Mikuyu Prison”; Denis Brutus, “Letters to Martha and Other Poems from a South African Prison”; Ken Saro-Wiwa, “A Month and a Day: A Detention Diary”; and Michel Foucault, “Discipline and Punish”.
Instructor(s): O. Ibironke
Area: Humanities
Writing Intensive.

AS.060.377. The Literature of Crisis, Restoration to French Revolution. 3 Credits.
The long eighteenth century (1660-1800) has often been regarded as the tranquil Age of Reason, marked by the “Peace of the Augustans.” In fact it was a time of fiery political debate, religious controversy, and rapid social change. A plague that wiped out a fifth of the London population, the great fire a year later, succession crises, a revolution and an exiled monarch, wars, the birth of political parties, invasion fears (and three invasions), the American Revolution, radicalism at home, cries for liberty, the French Revolution—very little was tranquil or stable in this period. Writers responded with anger, disgust, fear: political crisis inspired a massive amount of polemic and propaganda, as well as some of the great masterpieces of English Literature. Readings will include works by Dryden, Defoe, Swift, Pope, Gay, Fielding, Churchill, Johnson, Burke, Wollstonecraft, Blake, and William Godwin.
Instructor(s): A. Marshall
Area: Humanities
Writing Intensive.

AS.060.379. Edmund Spenser. 3 Credits.
A comprehensive upper division undergraduate seminar on the writing of Edmund Spenser, spanning both his shorter poetry (“The Shepheardes Calendar”, “Muiopotmos”, “Colin Clouts Come Home Againe”, “Amoretti”, “Epithalamion”) and his allegorical masterpiece, “The Faerie Queene”.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.

AS.060.380. Law and Literature. 3 Credits.
Jurists and literary scholars have become increasingly interested in the relationship between law and literature, whether examining legal language and concepts in literature or bringing literary methods and the kinds of ethical concerns conventionally associated with literature to bear on law. This course queries the nature of legal authority, both formally and historically, without any starting assumptions about what constitutes “law” or “literature” or what distinguishes between them. Avenues of inquiry will include the relationship between law and genre; the power of language to embody, inhabit, or represent law; the relationship between law and ideas about interiority, liberty, citizenship, and empire; and conflicts and confluences between literary and legal claims to autonomy. Readings include Sophocles’ “Antigone”, Anne Askew’s “The Examinations of Anne Askew”, Shakespeare’s “Measure for Measure”, V. S. Naipaul’s “The Mimic Men”, and J. M. Coetzee’s “Waiting for the Barbarians”.
Instructor(s): M. O’Connor
Area: Humanities
Writing Intensive.

AS.060.381. American Poetry after World War I. 3 Credits.
A survey of American poetry written from about 1950 to today. We will look at a variety of schools and styles. Assignments will include short papers and the writing of at least one poem.
Area: Humanities
Writing Intensive.
AS.060.382. Renaissance Literature and the Sense of Time. 3 Credits.
One could do worse than to define the literary Renaissance by a newfound complexity, variety, and urgency in its attitudes to time. The Renaissance, it’s been argued, saw in its own preoccupation with temporal experience the mark of its difference from other times; and it’s of some importance (for both the history of literature and of time) that this event was far more decisive in literature than in formal philosophy. In this course, we will read some classic texts in Renaissance epic, lyric, drama, and prose that place specifically temporal problems and categories- eternity, immortality, memory, growth, the event, historical loss, prediction, duration, aging-at their center. Our investigations will center on three salient features of the Renaissance imagination of time: the “discovery” of a temporality of persistence and loss specific to the cultural past, often prompting a reworking of classical texts as if they were themselves “about” time; the alignment of literary creation and biological procreation as means of “defeating” (or inhabiting) time; and the tensions and negotiations between traditional eschatology-life and history lived in relation to a final end- and the notion of time as infinite, successive extension. Throughout the course, special emphasis will be placed on how the texts modify and extend philosophical questions by relating them to the temporal aspects of literary form, such as the regularity of meter or the unity of action. Pre 1800 course.
Instructor(s): A. Sisson
Area: Humanities
Writing Intensive.

AS.060.383. The Gothic Novel. 3 Credits.
This course surveys the history, major themes, aesthetics and politics of the Gothic novel, from its beginnings to the end of the nineteenth century.
Instructor(s): M. Thompson
Area: Humanities
Writing Intensive.

AS.060.384. Jane Austen and the Eighteenth-Century Novel. 3 Credits.
Although the robust presence of Jane Austen in popular culture attests to the broad historical appeal of her work, her novels are nevertheless deeply concerned with political, philosophical, and aesthetic questions of her own historical moment. In this course, we’ll read Austen in the context of the late eighteenth-century novel in order to understand how she engages with her literary predecessors. We’ll focus in particular on Austen’s innovations in narrative form and technique, innovations that led one of her early critics to claim that she constituted a “new school of fiction.” Readings by Austen will include “Northanger Abbey”, “Sense and Sensibility”, and “Pride and Prejudice” (all of which Austen conceived and began drafting in the 1790s), along with her “juvenilia.” Other readings will include works by Ann Radcliffe, Mary Wollstonecraft, Frances Burney, Charlotte Smith, and Edmund Burke. Pre 1800 course
Instructor(s): A. Grener
Area: Humanities
Writing Intensive.

AS.060.385. Passing and American Culture. 3 Credits.
This course will focus on the subject of passing from a variety of identity perspectives. Reading culture in its broadest sense, we will look at early-to late-twentieth century films, memoirs, essays, short stories, and novels to examine how passing functioned as both an experience and a symbol, challenging privilege and undermining power structures. We will look at narratives wherein white people masquerade as African Americans, gentiles pretend to be Jewish, the poor feign wealth, and blacks play white; we will consider how the color line affected the ways people were raced, classed, and gendered. And by focusing on the trope of passing, we will come to understand how people negotiated their identities, sometimes enforcing and at other times challenging societal notions of difference.
Instructor(s): S. Mott
Area: Humanities
Writing Intensive.

AS.060.386. Narrative, the Mind, and Human Experience. 3 Credits.
This course will explore how narratives operate as vehicles for organizing and communicating human experience. We’ll begin by examining the basic mechanics of narratives -- What makes a story a story? How do stories organize experience into meaningful sequences? -- before considering how narratives reflect patterns of human evolution and the development of consciousness. Indeed, our primary interest will be these cognitive elements of narrative; we will consider how narratives relate to the structure of the human brain, as well as their capacity to immerse us in the minds of other individuals, both fictional and real. By the end of the semester, then, you’ll not only have a better understanding of how narratives create meaning (and a robust set of terms and concepts with which to approach them), but also a heightened appreciation for how narratives relate to the architecture of your mind and your daily life. Primary texts include novels by Jane Austen, Raymond Chandler, Ford Madox Ford, Kazuo Ishiguro, and Virginia Woolf.
Instructor(s): A. Grener
Area: Humanities
Writing Intensive.

AS.060.387. The Empire of Books. 3 Credits.
Instructor(s): O. Ibironke
Area: Humanities
Writing Intensive.

AS.060.389. Whitman and Dickinson. 3 Credits.
An examination of the formal, conceptual, and philosophical innovations in the work of the two major nineteenth-century American poets. The seminar will consider such topics as: the public versus the private poet; the tropes of body and mind in Whitman’s and Dickinson’s verse; the revision fundamental to each poet’s “development”; the forms through which a reader is engaged by Whitman’s poetry and ignored by Dickinson’s. Finally, we shall examine the premises behind Whitman’s poetry of wholes (nothing left out) and Dickinson’s poetry of fragments. Junior/senior seminar. Writing Intensive. Recommended Course Background: two lower level English Department courses.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.
AS.060.391. Early American Literature. 3 Credits.
This course will introduce students to major texts of the colonial Americas, primarily from English-speaking North America, but also from the non-Anglophone Americas (in translation). From recovered and reconstructed pre-Columbian indigenous oral stories to political declarations of independence, with spiritual autobiographies and epic poems in between, all variously authored by writers of European, African, and Native American origins, we will work to situate a vast array of fictional, nonfictional, poetic, and dramatic texts in historical context. Ever lurking in the background will be that seminal question: At what point does this literature become identifiable “American”? Or, we will ask, is this an anachronistic question to ask? This course will satisfy the pre-1800 major requirement. Recommended Course Background: 200-level course or instructor approval
Prerequisites: AS.060.107 or 200-level English Course or Instructor Approval.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.392. Crossing the Literary Color Line. 3 Credits.
Turning to the early to mid-twentieth century, this course will turn to novelists who defined literary and social expectation and wrote novels with protagonists and secondary characters whose racial identity differed from the authors’. We will focus our attention on white writers who took up the subject of black life and American African writers who wrote white-life novels. Some of the questions we will consider include those around authenticity, political motivation, cross class/racial alliances, minstrelsy, psychoanalysis, and citizenship. Not only will we become more familiar with the mid-twentieth century literary terrain and how writers creatively grappled with volatile and sometimes taboo political matter, we will question and engage how America’s racial landscape always impacted the literary process.
Instructor(s): S. Mott
Area: Humanities
Writing Intensive.

AS.060.393. Shakespeare and the People. 3 Credits.
Was Shakespeare socially conservative or radical? This course approaches this question by exploring how Shakespeare represents “the people” and “popular culture,” keeping in mind that the sphere below the aristocracy in the early modern period was complex. We will begin by considering early modern theatre as a form of popular culture and by investigating Shakespeare's own representation of theatre, its audience, and its participants in “A Midsummer Night’s Dream”. From here, we will move on to consider topics such as how “the people” and their actions, including group action and rebellion, are figured; the role of comedy, inversion, and genre in such representations; and images of “the people” as participants and actors within the commonwealth. By the conclusion of the course, students will have gained knowledge of a range of critical, as well as imaginative, approaches to the issue of “the people” in Shakespeare and to the nature of Shakespeare’s political engagements. Readings will include “Richard II”, “King Lear”, “Coriolanus”, and “The Tempest”. Pre 1800 course.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.394. Class Fictions. 3 Credits.
This seminar investigates one of the central concerns of eighteenth-century fiction: social and economic class. Why did raising oneself from humble beginnings and falling into poverty, become such familiar stories? And why are they still so familiar today? We will look at how a number of writers approached the topic of class mobility, each with a unique blend of excitement and anxiety. Authors will likely include Jane Austen, Honoré de Balzac (in translation), Charles Dickens, and William Dean Howells. In order to understand our topic better, we will also look at a selection of theoretical work on the nature of class.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.395. Global Tales of Transformation. 3 Credits.
A traveling salesman turns into a giant cockroach, an American adman switches bodies with his wife, a Brazilian philosopher may or may not be reincarnated as his beloved dog, and a British scientist creates half-animal humanoids on a secluded island. These are just a few examples of the fantastical, allegorical, comical, dreamlike, grotesque, and bizarre stories that were produced throughout the world during the modernist period. Modernism has often been associated with social and political change; colonial rule was waning, cosmopolitanism emerging, and new modes of production were affecting social organization. In literature, modernist authors broke from the realist style and turned instead to myths, folktales, and new forms of expression. In this class, we will consider a range of cultural and historical conditions that inform these stories of transformation. Do these stories reveal anxieties about dehumanization in an increasingly high-pressure workplace or do they reveal fantasies about idleness? Are they nostalgic for a local folkloric tradition in an age of cosmopolitanism or are they creating a kind of mythic universalism? How do these character transformations allow for reassessments of identity in terms of gender construction, sexuality, or in terms of human and animal relations? Authors include: Edgar Allan Poe, Nikolai Gogol, Franz Kafka, H. G. Wells, Virginia Woolf, Rebecca West, Machado de Assis, T. S. Eliot, Charlotte Gilman Perkins, Thorne Smith, and James Joyce. Throughout the semester, the primary texts will be supplemented with secondary reading and critical interpretations.
Instructor(s): K. Wiedekind
Area: Humanities
Writing Intensive.

AS.060.396. The Postcolonial Novel. 3 Credits.
This seminar introduces students to a select group of “classic” postcolonial novels written between 1960 and the present. Over the course of the semester we will explore the history of such writing, how it developed and how it departs in significant ways from the colonial novels written during the height of British Imperialism. Through an exploration of the recurrent themes and images in these postcolonial novels, and with the help of secondary sources, we will clarify and deepen our understanding of the postcolonial condition. Authors include: Edward Said, Leela Gandhi, Elieke Boehmer, Achbe, Coetzee, Naipaul, Rushdie, Roy, Rhys, Kureishi.
Instructor(s): A. Wexler
Area: Humanities
Writing Intensive.
AS.060.397. Thomas Pynchon. 3 Credits.
This course is a study of the fiction of Thomas Pynchon. We will likely focus on two novels, Gravity’s Rainbow (1973) and Against The Day (2009). Along the way, we will discuss Pynchon’s particular interpretation of what character should look like, what the novel’s relationship to history might be, and whether and how his writing examples something called “postmodernism.”
Instructor(s): C. Nealon; E. Sundquist; J. Hickman; M. Thompson

AS.060.398. Obscenity and the Law in 20th-Century Literature. 3 Credits.
In order to log on to JHU’s GuestNet you must “agree that your activities on the Guest Network shall not...among other things] be obscene.”
But what is obscene? What does the law determine as obscene today, and how has that determination changed over the past century? These questions will lead us to considerations of publicity and privacy, morality and standards of decency. This course will examine artworks and performances in a variety of media that have been publicly accused of indecency or obscenity. We will read legal judgments of obscenity and discuss their implications for figures such as Wilde, Joyce, Miller, Ginsberg, Bruce, Carlin, Prince, 2 Live Crew, and others.
Instructor(s): J. Chilton
Area: Humanities
Writing Intensive.

AS.060.400. Imagining Education: 1800-1915. 3 Credits.
In a recent edition of Harper’s, Mark Slouka fears the vanishing role of the humanities in the university: “By downsizing ... the deep civic function of the arts and the humanities, we’re well on the way to producing a nation of employees, not citizens. Thus is the world made safe for commerce, but not safe.” Slouka questions the role of a liberal arts education in today’s world. How are the humanities and the sciences meant to relate to one another? What kind of individuals are we producing from a liberal arts education? How have capitalism and globalization changed the nature of education, and what role should education play in nation-building? This course traces the origins of our present-day educational debates in nineteenth- and twentieth-century texts. We will read poetry by Wordsworth, Shelley and Coleridge, novels by Dickens, Bronte, Hardy, and Lawrence, and a variety of historical and philosophical texts. As a writing-intensive course, students will develop their own opinions in weekly one-page response papers, as well as in two longer essays.
Dean’s Teaching Fellowship Course

Writing Intensive.

AS.060.402. The Literature of Atlantic Revolution. 3 Credits.
This course will consider how political revolutions in the Atlantic World, from the English Civil War of the 1640s to the European revolutions of 1848, were represented and theorized in contemporary literary texts and how those revolutions in turn affected literary history. We will consider questions like: What is revolution? Can revolution be represented? How do literature and history inform each other? Texts may include: John Milton’s tracts; Thomas Paine’s writings; US and Haitian founding documents; Edmund Burke’s “Reflections on the Revolution in France”; Leonora Sansay’s novel, “Secret History, or the Horrors of Santo Domingo”; selected Hawthorne and Melville short stories; Martin Delany’s “Blake, or the Huts of America”. Pre 1800 course
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.403. Theory of the Novel. 3 Credits.
We all know a novel when we see one, but it’s surprisingly hard to say just what one is. This seminar will introduce the theory of the novel by reading a number of novels along with the works of central thinkers about the novel. We will look at the connection of the rise of the novel form with historical and cultural changes and investigate key stylistic elements. Novelists will likely include Miguel de Cervantes, Johann Wolfgang von Goethe, Jane Austen, Gustave Flaubert, and Virginia Woolf.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.404. Literature in History. 3 Credits.
All texts have contexts. In this course we will explore the relationship of literature to history from a variety of perspectives. Part of the course will be devoted to literary texts which require contextual analysis if one is to arrive at anything like a sufficient interpretation—including Jane Austen’s “Pride and Prejudice”, Herman Melville’s “Billy Budd”, and the poetry of William Blake and T. S. Eliot. We will also look at literary depictions of history—perhaps Shakespeare’s “Richard II”, Daniel Defoe’s “Journal of a Plague Year”, George Bernard Shaw’s “Heartbreak House”, and Bertolt Brecht’s “Galileo”. Along the way we will ask what it means to recover “historical meaning,” consider the representation of history in literature and literature’s impact on history, and think about concepts of “literary history.” The last reading of the semester will be Tom Stoppard’s brilliant historical play “Arcadia”, a lively but forceful commentary on human attempts to reconstruct the past. Students will be free to write their papers either on historicist theory or on plays, poems, or fiction from any period, medieval to contemporary
Instructor(s): A. Marshall
Area: Humanities
Writing Intensive.

AS.060.405. Literature 1660-1740. 3 Credits.
This course will introduce students to poems and prose written in the fertile period that followed the Restoration in 1660. It will begin with the poet and satirist John Dryden and end with Samuel Richardson, arguably the inventor of the modern novel. Pre-1800 course.
Area: Humanities
Writing Intensive.

AS.060.406. Seventeenth Century Literature. 3 Credits.
A survey of major lyric poets and prose writers from 1601-1660. Works by Bacon, Burton, Donne, Herbert, Hobbes, Jonson, Lanyer, Marvell, and others. Pre-1800 course. Recommended Course Background:
AS.060.107
Instructor(s): R. Halpern
Area: Humanities
Writing Intensive.
AS.060.407. Dramatic and Fictional Narratives by Women. 3 Credits.
In this course, we will read a wide range of plays and novels written by women from as far back as Aphra Behn at the end of the seventeenth century to living writers. Works and writers likely to be featured in discussions and in suggested paper topics include: Behn’s Oroonoko, Jane Austen’s “Persuasion” (very different angle from Pride and Prejudice), Charlotte Brontë’s Jane Eyre and Jean Rhys’s “Wide Sargasso Sea” (a “prequel” to Brontë’s masterpiece), Gertrude Stein’s “Three Lives”, Virginia Woolf’s “Orlando”, Arundhati Roy’s “The God of Small Things”, Timberlake Wertenbaker’s “Our Country’s Good” (on early Australian convicts), Patricia Duncker’s “The Doctor”, and Jane Smiley’s “A Thousand Acres” (King Lear in Iowa). Women have produced a lot of wonderful and drastically different kinds of narrative work; there is no single ideological agenda in this course. Readings will be all over the map—some are ideologically and technically conservative, some radical; some are angry and strident, some funny and light; some are sober, some wild. Students should emerge from the course with a far richer sense of the issues and questions and crises with which women have concerned themselves over the last two centuries.
Instructor(s): A. Marshall
Area: Humanities
Writing Intensive.

AS.060.408. Rising and Falling in Marlowe and Jonson. 3 Credits.
This course considers the problem of negativity within two of the great “success stories” of English Renaissance literature: Christopher Marlowe and Ben Jonson. In praising “the sweet fruition of an earthly crown” or humbly recommending that one “keep thy shop, and thy shop will keep thee”, these authors both seem to extol tangible visions of worldly advancement. Yet each author’s work can also be read as a savage moral critique of those very ambitions and energies. What can the fierce competitions staged within the urban, masculine world of their plays and poems teach us about the lures and limits of success? Tracking their movements in and out of prison, in and out of royal favor, and in and out of critical fashion, we will read either one play or a substantial group of poems per week. Students will be asked to craft two short papers and an extended final essay. Possible texts include: “Tamburlaine”, “The Jew of Malta”, “Edward II”, “The Tragical History of Doctor Faustus”, “Sejanus His Fall”, “Volpone”, “The Alchemist”, “Catiline His Conspiracy”, “The Masque of Blackness”, and “Bartholomew Fair”. Pre 1800 course.

AS.060.605. Early Modern Literary Ontologies.
What is the matter of literature? How does literary form represent substance? What might early modern literary representations of material (and immaterial) forms of existence contribute to current conversations about the resources ontology has to offer in longstanding relativist deadlocks around politics, religion, and interpretation? To pursue these questions, our readings are divided into three interlinked sections: an introductory account of substance and ontology in Ancient Philosophy (potentially including Empedocles, Plato, Aristotle, Lucretius), a sequence of readings in early modern literary works which revise or customize those philosophical backgrounds (Sir John Davies “Orchestra, or a Poem of Dancing”, Phineas Fletcher’s “The Purple Island”, John Milton’s “Paradise Lost”, poems by Andrew Marvell and Margaret Cavendish), and a wide array of contemporary writings in metaphysics and early modern literary criticism at the intersection of ontology and poetics (potentially including Gilles Deleuze, Graham Harman, N. K. Sugimura, Daniel Tiffany, Jonathan Goldberg, Steven Shaviro).
Instructor(s): A. Daniel
Area: Humanities.

AS.060.607. Lives and Afterlives of Anti-Humanism.
This seminar will offer a preliminary history of the 20th-century critique of “humanism” -- a critique that has continued to take new forms, long after we might imagine humanism to have been laid to rest. Beginning with Heidegger and Carl Schmitt, we will spend time with Sartre, Althusser, the phenomenologists, and key post-structuralists, before moving on to the current variety of post- and anti-humanisms in philosophy (object-oriented ontology and speculative realism), and cultural and critical theory (eco-criticism and queer theory). Why has it been important to critique “humanism”? What is the ongoing appeal of making that critique?
Instructor(s): C. Nealon
Area: Humanities.

AS.060.610. What Is Baroque?.
This course examines the Baroque as an aesthetic movement and as a topic of theoretical interest. Works by Bal, Benjamin, Bersani, Deleuze; Browne, Caravaggio, Donne, Leibniz, Tourneur, Webster and others.
Instructor(s): R. Halpern
Area: Humanities.

AS.060.617. Poetry and Social Organization.
This course will consider how poets writing in English have described, imagined, and critiqued orderings of persons and institutions since the eighteenth century: texts examined will include poems, critical essays, and manifestos as well as writings in several non-literary disciplines. One matter of continuing interest will be the relationship between poems’ internal organization and the organization of societies: another will be the implications of thinking of societies as ordered or subject to ordering. Poets to be studied may include Pope, Wordsworth, Shelley, Eliot, Zukofsky, Oppen, Niedecker, Walcott, and Ronald Johnson.
Instructor(s): D. Mao
Area: Humanities.
AS.060.619. The Time is Out of Joint: Shakespearean Temporalities.
This course is designed to serve a double purpose: first, we shall read and analyze a substantial body of Shakespearean drama and poetry for its resources as a means for thinking about time, temporality, and historical change. Concurrently, we shall read and respond to debates in recent early modern literary scholarship about secularity, modernity and the problem of “presentism” as a critical orientation towards the past. If a previous critical generation enlisted Shakespeare into service as an exemplar of an incipient modernity based upon a tacit assumption of a secular bias, has that assumption been complicated by recent evidence and fresh readings? How might we rethink the relationship between religious discourse and academic periodization? In the process of answering these questions, it is hoped that a plurality of other Shakespearean - whether medieval, untimely, recusant Catholic, crypto-atheist, queer, anachronistic, or “presentist” - might emerge. In addition to Shakespeare, possible critical and secondary authors include Augustine, Henri Bergson, Johannes Fabian, Jan Kott, Madhavi Menon, Elizabeth Freeman, Kathleen Davis, Agnes Kottman, Eric Mallin, Hugh Grady and Stanley Cavell.
Instructor(s): A. Daniel
Area: Humanities.

AS.060.620. A Brief History of Reading and Practical Criticism.
Instructor(s): F. Ferguson
Area: Humanities.

AS.060.621. World Literature and the Global Sublime.
In this seminar, we will consider how the idea of world literature converges with forms of anxiety or exhilaration attending confrontation with the sheer scale of the world. The first three weeks will focus on key theoretical texts pertaining to colonial and postcolonial conditions, globalization, cognitive mapping, planetarity, and the market for world literature. The remaining weeks will consider such issues as refracted through literary works. Authors to be studied may include Francis Bacon, Olaudah Equiano, Anthony Trollope, T. S. Eliot, Virginia Woolf, Jean Rhys, Raja Rao, George Lamming, Chinua Achebe, Thomas Pynchon, Derek Walcott, and Jessica Hagedorn.
Instructor(s): D. Mao
Area: Humanities.

This course examines sociological and philosophical theories of the body in space with regard to its representations in 19th-century fiction. Some of the themes the course deals with are: how space shapes the body and determines subjectivity; how the 19th-century metropolis disseminates and supports capital as a system of signification; to what extent literary production is based on the desire and practice of accruing cultural capital; how certain readings of modernity understand the distribution of space and bodies as genitive of the literary field. Authors considered may be: Bourdieu; Foucault; Benjamin; Harvey; Goffman; Giddens; Balzac; Flaubert; and Zola.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.625. Modernism and Sacrifice.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.628. Literature of the Holocaust.
The seminar will focus on reactions to, and representations of, the Holocaust in literature. In moving from eyewitness testimony and survivor memoir, through the emergence of fiction as one means to test the adequacy of such accounts or extend them into a new register, and on to more recent reflections on the problem of adequately “remembering” the event in which memory is constantly at issue, we will consider how the Nazi genocide has entered into world consciousness. Although the focus of the course will be on literature, primary readings will be studied with close attention to historical contexts as they bear on questions of authorship, representation, and reception, and to the theoretical vocabularies that have emerged since successive stages of post-Holocaust inquiry. American works will be emphasized but not the sole concern. Primary readings (all in English) will include some of the following: Elie Wiesel, “Night”; Primo Levi, “Survival in Auschwitz”; Charlotte Delbo, “Auschwitz and After”; Tadeusz Borowski, “This Way for the Gas, Ladies and Gentlemen”; John Hersey, “The Wall”; Leon Uris, “Exodus”; Jerzy Kosinski, “The Painted Bird”; Jerome Sempurn, “The Long Voyage”; Irène Kertesz, “Fatelessness”; David Grossman, “See: Under Love”; Leslie Epstein, “King of the Jews”; Cynthia Ozick, “The Shawl”; Philip Roth, “The Plot against America”; and William Gass, “The Tunnel”, with various historical and theoretical works in accompaniment. Requirements: a circulated discussion paper; reports on critical/theoretical works; participation in discussion; a research paper.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.629. Poetry and Poetics after The ‘Linguistic Turn’.
This seminar will canvas a few of the many developments in English-language poetry, and in poetic theory, that have emerged since the heyday of post-structuralism, on the one hand, and “language”-driven poetry, on the other. The readings will include recent critical work by Joel Nickels, Ruth Jennison, Oren Izenberg, Maria Damon, and others; the poetry will be a combination of recent volumes by contemporary writers, and individual poems.
Instructor(s): C. Nealon
Area: Humanities.

This course will examine the work and career of arguably the 20th century’s most eminent anglophone man of letters. It will deal with the range of Eliot’s poetry, criticism (literary and cultural), drama, and editing as well as his role in UK publishing and the Anglican church. It will place him in context and analyse his legacy.
Area: Humanities.
AS.060.632. Sovereignty, Community, and 17th Century Literature.
Can we think sovereignty and community together? How might the vertical axis of sovereignty and the horizontal axis of community complicate or multiply each other? What conversations are possible when we attempt to reconcile these two contrary formations, and how does the early modern theory and practice of absolutism inflect contemporary theory? In this course we will read texts from across the seventeenth century (from Shakespeare and Ford to Milton, Dryden and Behn) in which the person of the monarch, sovereign, leader or judge and the larger structural institution of sovereignty slip out of alignment with each other. We will then read early modern political texts about sovereign power and the constitution of state power and monarchical authority from Jean Bodin, James I, and Thomas Hobbes. This early modern sequence will be placed in dialogue with contemporary theorists of sovereignty and/or community: potential authors include Schmitt, Nancy, Agamben, Esposito, Derrida, Blanchot, and De Landa.
Instructor(s): A. Daniel
Area: Humanities.

AS.060.636. Philosophical Literary Criticism.
Instructor(s): S. During
Area: Humanities.

This course is about the poetics of the lens and the mirror. From Wordsworth to Hardy, from Anna Barbauld to ‘Michael Field’ (the pseudonym of two women), poetry is haunted by the virtual image. Lens-made technologies, developed in the late Enlightenment, from the ‘high’ science of the telescope and microscope to the popular culture of the magic lantern and optical toys, created for a mass public for the first time a newly mobile screened image that could be thrown from one surface to another. This was a non-mimetic image made with the aid of the glass lens by light out of light. From this arose the screen practices of the phantasmagoria, diorama, panorama, kaleidoscope, and a host of optical toys exploiting visual ambiguities. The course explores the immanent presence of these in Romantic and Victorian poetry, studying poems and concurrently the documents of visual and optical theory generated by the new technologies. It includes work by male and female poets. We will consider how poets explored the philosophical implications of the poetics of the lens and a new epistemology. Technologies of the lens and mirror had repercussions across aesthetics and politics.
Instructor(s): I. Armstrong
Area: Humanities.

AS.060.642. Readings in Aesthetics.
This course offers a general survey of twentieth-century aesthetics, with particular emphasis on (but not limited to) the Interbellum (1919-1939) and its immediate aftermath. Some of the authors under consideration are: Heidegger; Levinas; Sartre; Blanchot; Bataille; Merleau-Ponty; Benjamin; Adorno; and Gadamer.
Instructor(s): M. Thompson
Area: Humanities.

Instructor(s): F. Ferguson
Area: Humanities.

AS.060.644. The Trouble with "Modernity.
This course will offer some genealogies and critiques of the various modernity-theses that provide us ready-to-hand (and perhaps too easy) periodizations in the humanities. Readings will include Hans Blumenberg, Martin Heidegger, Marshall Berman, Perry Anderson, Hans-Robert Jauss, Larry Norman, Charles Taylor, and Ellen Meiksins Wood.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.646. Transnational American Studies.
This seminar will consider the "transnational turn" in American studies in particular and the humanities more generally. What, if anything, is at stake in this turn? What sort of a corrective does it mean to offer? What political fantasies drive it? Half of the course will be dedicated to reconstructing the genealogy of the turn and will involve reading primarily theoretical and critical texts. Texts may include: Wai-Chee Dimock, "Through Other Continents"; Laura Doyle, "Towards a Philosophy of Transnationalism," Eric Lott, "Anti-American Studies"; Donald Pease, The New American Exceptionalism". The other half will be dedicated to reading American literary texts that have invited or might invite transnationalist readings. Texts may include: Joel Barlow, "The Vision of Columbus"; Herman Melville, "Moby-Dick"; Martin Delany, "Blake, or the Huts of America"; Leslie Marmon Silko, "Almanac of the Dead"; Karen Tei Yamashita, "Tropic of Orange". We will ask to what extent these texts are already doing something like "transnational American studies" and how the longstanding figuration of American nationality (not just the US but other American nations) as a species of transnationality ("a nation of nations") might cause us to reconsider the cultural work of recent transnational American studies.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.647. Capitalism for Humanists.
This course will examine different ways capitalism is understood in the humanities: how it shapes our attempts to interpret texts, periodize them, historicize them, or understand their political meanings. We will read some economic history, some history of the profession of economics, some contemporary critical theories of capitalism, and some literary scholarship that tries to think through the relationship between literary study and economic inquiry, as well as between literature and money.
Instructor(s): C. Nealon
Area: Humanities.

This seminar will explore George Eliot’s major novels alongside selections from the considerable body of criticism that has grown up around her oeuvre. Topics of discussion will be determined in part by seminar participants, but we will certainly address the following: the nature of her idealism (and its relation to her realism), her long argument with religion, the tension between her larger theories of the moral life and her treatment of embedded, struggling individuals, and the larger relations among her sociological, philosophical, and existential perspectives. Eliot was a polymath, and we will need to situate her thinking and her art in relation to a wide range of continental and English sources. We will also pay special attention to the formal features of her novelistic project: the function of her narrators, the character system considered within and across the novels, the role of argument and philosophy within the works, and the particular forms of plotting and mode she employs. Novels will include “Adam Bede”, “The Mill on the Floss”, “Romola”, “Felix Holt”, “Middlemarch”, and “Daniel Deronda”.
Instructor(s): A. Anderson.
AS.060.651. Form and Matter.
This course takes a look at revived interest in formalism and materialism in critical theory as it bears on the literature of the long eighteenth century: topics include formalism and close reading from the new criticism to the present, object oriented ontologies and eighteenth-century materialisms, cognitive criticism and phenomenology.
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.652. Narrative and the Unconscious before Freud.
TBD
Instructor(s): J. Rosenthal.

AS.060.653. Ralph Ellison and His Circle.
A study of Ellison’s peculiar career—from greatness to failure. After the success of “Invisible Man”, why could he not finish his second novel? Role as critic and lightning rod for arguments about black writing central to discussion.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.656. Literature and Philosophy, Locke to Wordsworth.
This is a class on epistemology, aesthetics, and literary form in eighteenth-century British writing. We will focus particularly on perception and look at how poetry, fiction, and the visual arts recruit and account for phenomenal experience or consider material and natural objects. We’ll ask (for example) what happens when the empirical psychology of consciousness or the categories of the sublime, beautiful, and picturesque take narrative or poetic form. Authors include Locke, Addison, Thomson, Hume, Burke, Sterne, Smith, Gilpin, Cowper, and Wordsworth, read alongside recent criticism and theory, including new work in phenomenology and the philosophy of mind.
Instructor(s): J. Kramnick
Area: Humanities.

Instructor(s): I. Armstrong
Area: Humanities.

AS.060.659. Reading Early Modern Affect (From Humor to Passion).
This course asks what difference the re-introduction of “humor” and “passion” might make into the recent constellation of theoretical writings on feeling, emotion, and affect. How might these philosophical and physiological categories from the intellectual history of early modernity complicate, estrange, or re-organize recent critical accounts of embodiment and psychic life? Tracing a historical transformation from sixteenth century “humors” to seventeenth century “passions”, we will consider a range of early modern texts including Shakespeare’s Love’s Labour’s Lost, Jonson’s Every Man in His Humour, Burton’s preface to The Anatomy of Melancholy, Milton’s “L’Allegro and II Penseroso”, Descartes’ The Passions of the Soul (1649), and Spinoza’s Ethics (1677) in conjunction with a select group of critical texts on feeling, emotion and affect from Sartre, Paster, Sedgwick, Ngai, Massumi, and Terada.

AS.060.660. Liberalism and Aesthetics.
This seminar will examine the relation between liberalism as a political philosophy and liberalismo in its aesthetic dimensions—the latter will include not only traditional understandings of the liberal temperament and the liberal imagination but also the key formal and conceptual elements characterizing a range of literary engagements with liberal thought, focusing in particular on the realist novel and the debate over realism/modernism (with some brief discussion of modern drama as well). The first half of the course will focus on philosophical and theoretical texts; the second half of the course will consider literary texts from the nineteenth and twentieth centuries. Critics and theorists will include: Lionel Trilling, John Dewey, Irving Howe, George Kateb, Georg Lukâcs, Theodor Adorno, Stefan Collini, Francis Mulhern, Richard Rorty, Toril Moi. Literary authors likely to include Elizabeth Gaskell, Anthony Trollope, E.M. Forster, Lionel Trilling, and Doris Lessing.
Instructor(s): A. Anderson
Area: Humanities.

AS.060.661. Naturalism and Modernism.
Instructor(s): D. Mao
Area: Humanities.

AS.060.662. Edwards, Emerson, Thoreau.
We shall examine what “divinity,” “nature,” “Being in general” and “personal identity” differently mean in the writings of Jonathan Edwards, Ralph Waldo Emerson and Henry Thoreau (the emphasis will be on the two nineteenth-century American writers); how “the intuitively beheld and immediately felt” (what Edwards called “experiential religion”) are contrastively understood in the writings of the three; and to what end these literary and philosophical writings marginalize persons-- and even evacuate them--from their scrutiny. We shall also examine features of the prose (Edwards’s “rhetoric of sensation”; Emerson’s contradictions; Thoreau’s infatuation with particulars), and the genres in which the three authors write: the sermon, the treatise, the journal entry, the lecture, and the essay. Finally, we shall consider Adorno’s proposition in “The Essay as Form” that discontinuity is essential to the essay, that “the essay rebels against the doctrine, deeply rooted since Plato, that what is transient and ephemeral is unworthy of philosophy.”
Instructor(s): J. Dollimore
Area: Humanities.

AS.060.666. 20th C American Poetry.
An examination of 20th century American poetry: Frost, Eliot, Crane, Stevens
Instructor(s): S. Cameron
Area: Humanities.

Instructor(s): J. Hickman
Area: Humanities.

AS.060.668. The Slavery Debate in the Atlantic World.
This graduate seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban antislavery novels, slave narratives, and “classics” of “American” literature like Melville’s Benito Cereno. Our historical investigations into the rhetorical field of anti- and proslavery will be framed by a theoretical interest in political theology. How might critical reflection on sovereignty, recent and not so recent—from Derrida back to Bodin (widely acknowledged as having provided one of the first philosophical defenses of antislavery)—help us recast the intellectual history of the slavery debate and Atlantic radicalism, more generally?
Instructor(s): J. Hickman
Area: Humanities.
A reading of the major novels.
Instructor(s): S. Cameron
Area: Humanities.

AS.060.671. Tragedy and the Philosophy of Action.
Taking seriously Aristotle’s definition of tragedy as the imitation of an action, this course will explore the relations between stage tragedy and philosophies of action from the ancient Greeks through the twentieth century. Plays by Aeschylus, Marlowe, Shakespeare, Milton, Beckett; readings in Aristotle, Luther, Hegel, Marx, Schmitt, Benjamin, Kantorowicz, Arendt, Bataille and others.

AS.060.672. James Joyce.
A seminar covering the oeuvre of James Joyce, including but not limited to Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and parts of Finnegans Wake. Substantial readings in other writers and in relevant historiography; substantial attention to the history of Joyce criticism and Joyce’s literary legacies.

AS.060.673. Migrant Modernism.
Responding to literary scholarship’s continuing concern with the exile, the refugee, the cosmopolitan, and the networks and flows of modernity, this seminar examines the migrant origins and later migrations of English-language modernism. Readings in Ezra Pound, T. S. Eliot, Gertrude Stein, Mike Gold, Claude McKay, Jean Rhys, George Lamming and other writers will be complemented by relevant critical and theoretical texts.
Instructor(s): D. Mao
Area: Humanities.

AS.060.674. John Ashbery Now.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.675. The Political Topography of the Nineteenth-Century Novel.
This course will examine forms of political life in the nineteenth-century novel in Britain. Authors will include Bronte, Eliot, Gaskell, Trollope, Oliphant, James, and Kipling.

AS.060.676. The Philosophy of African-American Literature.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.677. Poetry as Genre, Poetry as Text.
This course examines twentieth-century literary theory’s understanding of poetry. We will focus on genre and textuality as key features of this understanding, and explore the histories behind those two features of thinking about what poetry is.

AS.060.678. Realism: Theory and Practice.
This seminar will offer an in-depth examination of the theory and practice of the nineteenth-century realist novel in three traditions: American, British, and French. Our aim will be to understand the central theories and controversies surrounding realism, as well as to interrogate the centrality of realism to novel theory and narrative theory. Authors will likely include Jane Austen, Charles Dickens, George Eliot, Honoré de Balzac, Gustave Flaubert, Frank Norris, and William Dean Howells. Theorists and critics will likely include Erich Auerbach, M. M. Bakhtin, Roland Barthes, Leo Bersani, Bertolt Brecht, Richard Chase, René Girard, Howells, Roman Jakobson, Henry James, Fredric Jameson, Harry Levin, G. H. Lewes, Georg Lukács, Boris Tomashevsky, Ian Watt, and Émile Zola.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.681. Literary Theory.
This course will provide a survey of many of the major theoretical positions that have been directly or indirectly influential for literary studies. We will read selections from the following: Russian Formalism (Propp, Shklovsky, Bakhtin), structuralism (Levi-Strauss, Barthes), American New Criticism (Wimsatt & Beardsley, Brooks) deconstruction (Derrida, de Man), speech act theory (Austin, Butler), Marxism (Jameson), queer theory (Sedgwick, Miller), and distant reading (Luhmann, Moretti).
Instructor(s): F. Ferguson
Writing Intensive.

AS.060.682. Conservatism and British Literary Modernity.
This course combines political theory (Burke to Badiou) and literary texts, focusing on two moments: the onset of democracy (1900) and post WW2.

Primo Levi’s well-known essay “The Gray Zone” describes complex states of complicity and moral erosion between the categories of “victims,” “perpetrators,” and “bystanders” during and after the Holocaust. Literature written at the time or in the immediate aftermath, whether memoir, commentary, or fiction, contains many illustrative examples, but even more have arisen at one or another remove from the events, as later generations have confronted an atrocity frequently taken to be historically and morally unique. How did the Holocaust become a touchstone for both extremities of human behavior and problems of representation? When did the Holocaust become available to literature or to the once unthinkable strategies of satire, post-modernism, and even pornography, and can these strategies be considered examples of “the gray zone”? The course will deal with the testimonies of perpetrators such as Rudolf Höss (commandant of Auschwitz) and historical documents setting forth plans for genocide; with memoirs of prisoners such as Filip Müller forced into participation in the Holocaust; and more particularly with literary depictions of life in “the gray zone.” The sequence of readings will be organized mainly around literary texts, but these will be paired, sometimes in two-week sequences, with historical and critical materials that take up the problem of complicity through various perspectives: the role of Jewish leaders during the Holocaust; attempts to fictionalize extremities of evil (e.g., Hitler); the aestheticizing of atrocity; the moral responsibility of bystanders; and the extension of genocidal paradigms to other dimensions of life such as animal rights. Texts to be studied (mostly, though not exclusively, written in English) will likely include: Primo Levi, The Drowned and the Saved; Tadeusz Borowski, This Way to the Gas, Ladies and Gentlemen; George Steiner, The Portage to San Cristobal of A. H.; Leslie Epstein King of the Jews; Sylvia Plath, selected poems; Philip Roth, The Plot against America; D. M. Thomas, The White Hotel; and J. M. Coetzee Elizabeth Costello.
AS.060.692. Race and Enlightenment.  
This course examines the philosophical interplay between Enlightenment aesthetics and the construction of the concept of race. We will read texts in aesthetics and on human difference by Rousseau, Voltaire, Condorcet, Kant, Herder, Jefferson, Burke, Hume and others, in an attempt to see the points at which reflections on art and notions of human biological hierarchy intersect. Particular attention will be paid to the idea of the sublime as it pertains to early anthropological thought.

Cross Listed Courses

German Romance Languages Literatures

AS.211.201. Case Studies: Law in Literature. 3 Credits.  
In law and literature, words and stories play a crucial role. Indeed, the courtroom is often inherently theatrical. What happens when legal trials and questions of law and justice are transformed into literature? What are the possibilities—and risks—of following the long tradition that combines the fields of law and literature as social and cultural forces? Why has this dynamic connection intrigued many writers of modern literature and how do they represent legal issues? This course explores the representation of law and trials in 19th and 20th century German-language literature as well as larger ethical concerns around justice and revenge. Following a theoretical overview, we will discuss drama and prose by, among others, Heinrich von Kleist, Franz Kafka Bertolt Brecht and Peter Weiss—as well as selected stage and filmic adaptations of their works—as “case studies.” (Taught in English)  
Area: Humanities.

AS.212.478. Guillaume de Machaut: exploring medieval authorship in the digital age. 3 Credits.  
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. Students will learn to use digital tools to view and analyze original illustrated musical manuscripts of Machaut’s work.  
Instructor(s): T. Rose-Steel  
Area: Humanities Writing Intensive.

AS.212.601. Word and Image: An Introduction to the Languages of Literature and Cinema.  
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language’s exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin’s take of New Realism, Christian Metz’s structuralist approach to cinema and psychoanalysis, Gilles Deleuze’s theory of the moving-image and the time-image, a feminist approach to cinema by E. Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English (This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.)  
Instructor(s): B. Wegenstein; P. Forni.

AS.212.603. Senses of the Imagination in Medieval Thought and Lyric.  
AS.212.789. Literature & Identity in the Age of Globalization.  
In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.  
Instructor(s): E. Gonzalez; W. Egginton  
Area: Humanities.

AS.213.233. Freshman Seminar - A History of Reading: from Gutenberg to Kindle. 3 Credits.  
Freshmen only. This course investigates the 18th-century revolution in reading – the pedagogical and aesthetic debates about the virtues and dangers of reading, idealizations and critiques of print culture, books as material objects, and the shifting concepts of both author and reader, and to what extent this historical period anticipates our own present day revolution in reading technologies.  
Area: Humanities.
AS.213.317. Berlin at the Crossroads of the 20th Century. 3 Credits.
This course will examine the location of Berlin at the heart of European and global culture over the course of the 20th century. In addition to its centrality to German national identity and political culture, Berlin between the World Wars was a weigh station and meeting ground for a variety of languages, cultures, and artistic trends—whether expatriates, refugees, nomads, touring companies, or vagabonds. In what ways did these travelers to Berlin change German popular or intellectual culture? In what ways did Berlin function as a center for avant-garde culture, and in what sense did it remain a peripheral space, in the shadow of grander culture centers such as Moscow, Paris, New York, or Hollywood? What lessons might be taken from the supposed glamour of Berlin between the World Wars and the continued attraction of that period for post-Holocaust adaptation and contemplation? These questions, among others, will be considered with reference to a variety of narratives, dramas, and films taken from German, English, Hebrew, Russian, and Yiddish sources.
Authors to be considered will include Walter Benjamin, Joseph Roth, Irmgard Keun, Erich Kästner, Bertolt Brecht, Christopher Isherwood, Sh. Y. Agnon, Vladimir Nabokov, Viktor Shklovsky, and Dovid Bergelson. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.318. The Making of Modern Gender. 3 Credits.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.321. Bodies and Pleasures. 3 Credits.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women’s writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Arnim, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.322. Zionism in Modern Literature: Jewish or Israeli?. 3 Credits.
This course will be an examination of the themes of nationalism, Zionism, and the problems of the nation-state in modern Jewish literature of the past hundred years. Among the topics we will consider are the unique challenges of a diasporic culture relocating its national aspirations to an unfamiliar and often hostile environment, the controversies surrounding political nationalism within modern Jewish culture, the competition between languages in the formation of Israeli society, the character of Israeli national culture, the relationship of Israel’s Jewish majority with its minority population, and the relationship of Israeli culture to the Jewish culture of the diaspora. To what extent does Israeli literature constitute a continuation of themes and techniques found in previous Jewish writing, and to what extent does it represent a new beginning? To what extent can Israeli literature be compared with other varieties of Jewish writing and to what extent is this writing a unique cultural phenomenon? Although the majority of works discussed will be translated from Hebrew—including such leading figures of Israeli literature as S. Y. Agnon, S. Yizhar, Amos Oz, and Orly Castel-Bloom—we will also be considering works translated from Yiddish (Mendele Moykher-Sforim), German (Theodor Herzl), and Arabic (Emile Habiby), as well as contemporary American writers such as Philip Roth and Michael Chabon. All readings and discussions conducted in English. Cross-listed with Jewish Studies, English, and the Humanities Center
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.380. Ghost Stories, Haunted House and Other Occult Phenomena. 3 Credits.
Although the eighteenth century is often associated with the Enlightenment, the period also gave birth to the gothic novel with its lurid description of haunted houses, ghosts, phantoms, and diabolical forces in nature. This course will examine the modern obsession with occult phenomena from Chamisso to Bram Stoker and Freud, whose 1919 essay “The Uncanny” constitutes one of the most rigorous analyses of the irrationality of psychic life. We will consider the appearance of ghosts in literature as well as explore the status of literature as a play of appearances, of light and shadow. Why have ghost stories been so prevalent in the modern era, when science and reason are said to dominate our understanding of the world? Is the occult the dark side of science? What kind of knowledge does literature yield? And what can literature tell us about random, obscure, or inexplicable events? Readings in English and German; discussion in English. Additional hour for German discussion through AS.213.381. Cross-listed with English
Instructor(s): R. Tobias
Area: Humanities.
AS.213.601. Word and Image: An Introduction to the Languages of Literature and Cinema.
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language’s exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin’s take of New Realism, Christian Metz’s structuralist approach to cinema and psychoanalysis, Gilles Deleuze’s theory of the moving-image and the time-image, a feminist approach to cinema by E. Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion, music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English. This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.
Instructor(s): B. Wegenstein; P. Forni.

AS.213.609. Anti-Novels: Narrative Failure and the Poetics of the Periphery.
Insofar as the novel as a form can be taken as the representative narrative mode of the modern era, this graduate seminar will identify an inverted literary tradition of digression, fragmentation, stasis, and proliferation in the assemblage of narratives that either structurally or thematically violate conventions of novelistic mimesis and verisimilitude. Paramount among the themes to be considered in this survey will be whether such an inverted or counter-tradition is possible at all, given the plasticity of the novel form. To the extent that such a tradition constitutes itself, however, to what extent does it attract for peripheral writers —defined linguistically, culturally, and politically—offer a critique of the homogenizing and hegemonic aspects of modernity? Does the persistence of pre-modern narrative conventions serve to anticipate subsequent innovations attributed specifically to the modernist novel? Do the cues such anti-novelistic narratives take from non-belletristic modes of writing as well as visual or musical arts signify a violation of literary decorum or an integration of the arts, and of art with life, that actually valorizes the modernizing processes these writers would critique? What is the difference, both figuratively and critically, between a literature of failure and a failed literature? In what sense can these modes of failure be considered productive? Authors to be considered will include Laurence Sterne, Jan Potocki, Ivan Turgenev, Sholem Aleichem, Gertrude Stein, Robert Walser, Der Nister, Yosef Haim Brenner, Moya’s Kulbak, André Breton, Thomas Bernhard, and Georges Perec. All readings and discussions conducted in English. (Undergraduates Accepted, with Permission of the Instructor).

AS.213.660. Discourses of Dislocation.
Dislocation—travel, migration, exile, diaspora, immigration—is a preeminent symptom of the modern condition; as Jacques Derrida has suggested, it is one way of characterizing how language itself comes into being. To what extent does the relationship of various modes of mobility serve as a prerequisite for understanding modernity and literary modernism, and to what extent can one understand commonalities among these itinerant discourses? This seminar will consider several varieties of dislocated discourse (the picaresque, the pseudo-autobiography, the travelogue, as well as narratives of immigration, displacement, war and demobilization, and exile) in search of a means to discuss or consider all of them critically. Writers to be considered will include Sigmund Freud, Robert Walser, Yosef Haim Brenner, Walter Benjamin, Theodor Adorno, Jacques Derrida, Irmgard Keun, Israel Rabon, Joseph Roth, Flannery O’Connor, Yoel Hoffman, Anton Shammas, and Salman Rushdie. All readings and discussions available in English. Undergraduates may register with instructor approval.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.725. Proto-, Modern, and Post-: Locating the –ism in Modernism.
All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “post-modernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is post-modernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-Bloom, Henry Dumas, Moya’s Kulbak, Machado de Assis, Mendelev Moyalker Storim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.
Instructor(s): M. Caplan.

Taught in German. The course analyzes the performative on the basis of the very field that John L. Austin’s speech act theory excludes: literature. What challenges Austin’s speech act theory indeed opens up the question of the performative towards iterability and theatricality and thus calls for the performative as a methodological category of literary criticism. According to Shoshana Felman’s readings of Austin, the performative act can be accentuated as an act of the “speaking body” in which the body is conceived of not as a means of linguistic expression but rather as a spillover of the act of utterance into the statement. How then is the corporeality or materiality of writing asserted in acts of narrating and reading? The course will examine theories of the performative from the perspective of literature and literary criticism as well as analyze literary speech acts (promises, pacts, etc.) in detail. Readings will include: Austin, Derrida, Felman, Freud, Nietzsche, de Man, Hamacher, Goethe, Büchner, Kafka, Henry James, Thomas Mann etc.
Instructor(s): E. Strowick
Area: Humanities.
In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. AS.214.251. Survey of Italian Lit. 3 Credits.
An overview of the key texts, authors, and movements in the Italian literary tradition, from the Middle Ages to the present. Recommended for all Italian majors and minors, and for Romance Languages majors who include Italian. Taught entirely in Italian. Completion of Italian 210.252 Intermediate recommended; the Survey of Italian Literature may be taken concurrently with Advanced Italian 210.352.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive

This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Instructor(s): T. Tower
Area: Humanities
Writing Intensive

AS.214.352. Writing and Wonder: Books, Libraries, and Discovery 1250-1550. 3 Credits.
The invention of printing occurred amid two centuries of intense development in the conduct and material means of European scholarship. The transition from writing by hand to movable type was accompanied by a revolution in scholarship that involved a new attitude to Classical and Biblical antiquity, the recovery of neglected and "lost" works, the formation of secular libraries, and the development of tools for the study of ancient handwriting, writing materials, and the history of language and of history itself. The revolution in attitudes to and uses of the book eventually transformed every discipline related to reading, writing, and the organization of knowledge. Topics to be covered include writing as an object of wonder, the transformation of a mythology of writing into a true history of books, writing, and libraries, the scientific study of writing and of language, and the representation of writing and books in the art and literature of the Middle Ages and Renaissance. Extensive use will be made of Johns Hopkins' large collection of books published before 1600, and student projects will be oriented toward relying on the experiences of scholars in this period, including via computer-assisted means. Open to all undergraduates. Knowledge of a foreign language helpful but not required.
Instructor(s): C. Celenza; W. Stephens
Area: Humanities

AS.214.479. Dante's Journey through the Afterlife: The Divine Comedy. 3 Credits.
Dante's Divina commedia is universally recognized as the greatest long poem of the Middle Ages; many consider it the greatest poem of all time. We will study the entire Commedia critically in terms of broad categories: (1) What it reveals about the worldview of late-medieval Christian Europe; (2) its internal thematic cohesion and formal symmetries, or how it works as poetry; (3) its critique of the intellectual cultures of pagan antiquity and medieval Christianity; (4) its presentation of political and social issues; (5) its influence on European intellectual history; (6) the interpretive problems it presents to modern readers and translators; (7) the challenges Dante faced in understanding and summarizing the whole of cosmology, world history and culture. We will read and discuss Commedia in English, in editions containing the Italian text on facing pages: students will be expected to refer to the original Italian regularly and familiarize themselves with key terms and concepts even if they do not speak Italian. Italian majors will meet once a week for discussions in Italian and will submit all written work in Italian, for major credit.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.601. Word and Image: An Introduction to the Languages of Literature and Cinema.
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language's exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin's take of New Realism, Christian Metz's structuralist approach to cinema and psychoanalysis, Gilles Deleuze's theory of the moving-image and the time-image, a feminist approach to cinema by E. Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English (This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.)
Instructor(s): B. Wegenstein; P. Forni

AS.214.633. Poetry and Divinity in Medieval and Early-Modern Italy.
The late Middle Ages saw intense debates between humanists (like Petrarch and Mussato) who considered great poetry (even from pagan antiquity) to be replete with divine wisdom, and theologians who condemned poetry as mendacious and spiritually corrupting. These debates intensified in the 15th and 16th centuries, leading to important contributions by thinkers like Marsilio Ficino and Giordano Bruno, who re-conceptualized the nature of poetic inspiration and "divine frenzy." In this course we will consider how these developments shaped both the theory and practice of poetic composition and interpretation. Discussions will be in English. Ability to read Italian is required.
Instructor(s): J. Coleman
Area: Humanities.
AS.214.640. Film Theory.
This class deals with film theory in its history and its current trends. We will examine structuralist, feminist, Marxist, psycho-analytic, Deleuzian, and other theoretical approaches to understanding and interpreting the cinematic medium. We will will look at several different film samples from European film to Latin American Film, auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist to class during the semester.
Instructor(s): B. Wegenstein
Area: Humanities

This class examines the areas of aesthetics, technology, and society critically in regard to media theory and practice following the 2010 anthology Critical Terms in Media Studies. The class also thematically accompanies the international conference Technologies of Meaning, March 3-4, 2011 with such speakers as Avital Ronell, Tom Gunning, and Sam Weber. Cross-listed with English, Political Science, and Anthropology
Instructor(s): B. Wegenstein

In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities

AS.215.777. The Invention of Fiction.
Rather than understand fiction as a constant in human history, this course will consider it a historically specific form of cultural expression. We will examine and compare theories of the fictional from an array of historical moments in order to better understand what fiction is, how it differs from premodern notions of history and poetry, and how it both informs and depends on modern notions of knowledge and subjective agency.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

Humanities Center

AS.300.111. Shakespeare and his 'Goddess'. 3 Credits.
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’ is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. In this course we will trace that tradition from the perspective of Shakespeare and his contemporaries, finishing the semester with several plays, including ‘The Taming of the Shrew,’ that further illustrate and problematize Shakespeare’s ‘goddess’ reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scève and Les Dames des Roches; and the later English reflections on the sonnet tradition by Sir Philip Sidney, Shakespeare, and Sidney’s niece, Lady Mary Wroth. All works will be read in translation. Freshmen only.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.
AS.300.211. Great Poems of the Americas. 3 Credits.
This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot's The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire's Notebook of a Return to the Native Land, Vicente Huidobro's playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of "the Americas" as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we will examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.
Instructor(s): R. Galvin
Area: Humanities.

AS.300.225. Blogs and Spies in Shakespeare's England. 3 Credits.
This seminar celebrates the university's recent acquisition of State Papers Online (1509-1714), which contains searchable digital images of thousands of contemporary manuscripts. While we read plays, poetry, and essays by such figures as Queen Elizabeth, William Shakespeare, members of the Sydney family, Elizabeth Cary, John Donne, Aemelia Lanyer, Robert Southwell, Andrew Marvell, William Marlowe, Jane Cavendish, Elizabeth Brackley, and Katherine Philips, we will also be carrying out on-line searches of correspondences, wills, court documents, spy reports (including play-by-play accounts of houses dismantled in searches for hidden priests), and letters of condolence from Queen Elizabeth alongside decoded messages revealing plots to unseat her. In addition to searching virtual archives students will be introduced to early modern paleography, in part through visits to Johns Hopkins University's brick-and-mortar libraries to consult actual manuscripts, incunabula, and illegal imprints from the 16th and 17th centuries.
Instructor(s): E. Patton
Writing Intensive.

AS.300.305. Asian American Literature. 3 Credits.
This course examines Asian American Literature with emphasis on East Asian American culture and history. Topics of discussion will include immigration, nation, conceptions of home, loyalty, navigation, and translation of various kinds. Throughout the course, we will explore how recognizable emotions, in tension with historical events, become manifest in art.
Area: Humanities
Writing Intensive.

AS.300.309. The Sense of Loss, 1900-1927. 3 Credits.
Area: Humanities.

AS.300.315. The Sense of Loss, 1880-1930. 3 Credits.
A comparative study of the aesthetics and representation of loss (personal, political, historical, etc.) in a number of modernist texts. Authors to be studied will include J.P. Jacobsen, Ibsen, Unamuno, Kafka, Rilke, Woolf and T.S. Eliot. The class will focus on the twofold sense of "sense" (both as feeling and as meaning) in order to explore the way these texts seek to come to terms with and capture the nature of loss.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.330. Trauma in Theory, Film, and Fiction. 3 Credits.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald ("The Emigrants"), Lanzmann ("Shoah"), Spiegelman ("In the Shadow of No Towers"), McCarthy ("Remainder"), and others.
Instructor(s): R. Leys
Area: Humanities, Social and Behavioral Sciences.

AS.300.331. Modern Tragedy. 3 Credits.
Since the late 18th century, tragedy has repeatedly been declared dead on the grounds that the changed social, historical and philosophical conditions of modernity do not allow for the genre in a strict sense. This course looks at some versions of this argument in relation to modern works of drama in order to examine its validity and the extent to which the concept and experience of the tragic have changed in our time. Authors to be studied will include Schiller, Kleist, Strindberg, Maeterlinck, Lorca, Miller, Brecht and Beckett. Cross-listed with GRLL and English
Instructor(s): L. Lisi
Area: Humanities.

AS.300.353. Henry James and the Art of the Novel. 3 Credits.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.371. The Modernist Novel: James, Woolf, and Joyce. 3 Credits.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century - Henry James, Virginia Woolf, and James Joyce -- who explored and exploded narrative techniques for depicting what Woolf called the "luminous halo" of life. Selected novels include: The Portrait of a Lady, The Wings of a Dove, Jacob's Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.400. Philosophy of Tragedy. 3 Credits.
Since the late eighteenth century, philosophers have repeatedly been drawn to investigations of tragedy and the tragic. In this course we will study some of the most important thinkers in this tradition, and examine the different implications (philosophical, historical, political, existential, aesthetic, etc.) that these concepts carry in their works. Authors to be read will include Schiller, Hegel, Kierkegaard, Nietzsche, Unamuno, Benjamin and Cavell.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.408. Lyric Modernity. 3 Credits.
A comparative literature course on modern lyric and poetics. The main issue of the course is how the lyric voice is constructed and sustained under the pressures of modernization in the United States, Europe, and Korea. We will also emphasize issues of translation and the relationship of music and poetry. Readings will include texts by Adorno, Benjamin, Grossman, von Hallberg and Waters, and poems by Dickinson, Rilke, and Kim among others. All readings available in English. Cross-listing requested with East Asian Studies, GRLL, and English
Instructor(s): S. Rhee
Area: Humanities.
AS.300.415. Law of the Cannibal: Trans-American Poetics. 3 Credits.
In this seminar on 20th-c. poetry of the Americas, we will explore the relations between land, language, and identity. Our point of departure, informed by de Andrade’s “Cannibal Manifesto,” will be the idea that all literary texts form a body upon which writers may feast when they compose new works. Devouring, plundering, and appropriating will be central concepts for our seminar. We’ll debate the politics of literary transculturation (hybridity/mestizaje/métissage), and discuss diasporic and multilingual U.S. American poetry, Nuyorican Poets Café, etc.). We will also investigate issues of authorship and originality; constraint, sampling, and parody; and poetic hoaxes and frauds. Readings may include theoretical texts from Édouard Glissant, Ángel Rama, Néstor García Canclini, and Roberto Schwarz, as well as Deleuze, Foucault, Kristeva, and Barthes. Poetry may be drawn from Caribbean writers Césaire, Senghor, Walcott, Brathwaite, Martí, Palés Matos; Brazilians Haroldo and Augusto de Campos; and North Americans Langston Hughes, Claude McKay, Myung-Mi Kim, Kenneth Goldsmith, Susan Howe, and Christian Bök.
Instructor(s): R. Galvin
Area: Humanities
Writing Intensive.

AS.300.601. Philosophy of Tragedy.
Since the late eighteenth century, philosophers have repeatedly been drawn to investigations of tragedy and the tragic. In this course we will study some of the most important thinkers in this tradition, and examine the different implications (philosophical, historical, political, existential, aesthetic, etc.) that these concepts carry in their works. Authors to be read will include Schiller, Hegel, Kierkegaard, Nietzsche, Unamuno, Benjamin and Cavell. Cross-listed with: English, German & Romance Languages & Literatures, Philosophy
Instructor(s): L. Lisi

AS.300.620. Tristram and His Kin.
Area: Humanities

Interdepartmental

AS.360.133. Great Books at Hopkins. 3 Credits.
Great Books at Hopkins is designed for first-year students and explores some of the greatest works of the literary and philosophical tradition in Europe and the Americas. In lectures, panel sessions, small seminars, and multimedia presentations, professors from a variety of academic disciplines lead students in exploring authors across history. Close reading and intensive writing instruction are hallmarks of this course, as is a changing reading list that includes, for this fall, Homer, Plato, Dante, Shakespeare, Douglass, and Woolf.
Instructor(s): E. Patton; K. Boyce
Area: Humanities
Writing Intensive.

AS.360.246. Islamic Literature, Beloved of Western Thinkers. 3 Credits.
This course examines political, erotic, aesthetic, and religious aspects of attraction between Western thinkers in a Christian milieu (e.g. Gide, Emerson, Thoreau) and classical works of Islamic literature (Rumi, Hafiz, Abu Nuwas, Arabian Nights).
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Program in Latin American Studies

AS.361.316. Caribbean Writing in Shakespeare, V. S. Naipaul, and Alejo Carpentier. 3 Credits.
Readings and polemics concerned with Shakespeare’s play The Tempest (1610-1611) and its postcolonial afterlives; V. S. Naipaul’s novel A House for Mr. Biswas (1961); and Alejo Carpentier’s El siglo de las luces (1962). The socio historical and political contexts of each work and authorship will be considered in depth in terms of dominant notions of writing in current critical theory. Cross-listed with GRLL, English, and Writing Seminars.
Instructor(s): E. Gonzalez
Area: Humanities, Social and Behavioral Sciences.

Center for Africana Studies

AS.362.200. African American Poetry and Poetics. 3 Credits.
This course will explore the history and development of African American poetry from 1750 to the present (blues, rap, and hip-hop) examining the role of race, art, and cultural identity.
Instructor(s): H. Robbins
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Program in Museums and Society

AS.389.355. Reading Culture in the Nineteenth-Century Library. 3 Credits.
Students reconstruct the culture of reading in nineteenth-century America through an investigation of the Peabody Library (founded 1856) as a space and collection. Meets at Peabody. M&S practicum course. Cross-listed with English.
Area: Humanities
Writing Intensive.

AS.389.359. Literary Archive. 3 Credits.
This course invites students to grapple with the theory and practice of building literary archives in 19th- and 20th-century American culture. For the final project students will work collaboratively to build a digital archive and exhibit of selected materials from the JHU rare book and manuscript collections. Meets in Special Collections. Cross-listed with English. M&S practicum course.
Area: Humanities

AS.389.360. American Literature on Display. 3 Credits.
Focusing on late 19th and early 20th c American literature, course examines representations of “display” within different literary genres and track how display simultaneously shapes print culture and social concerns of the period. Course culminates in the creation of a student-curated digital exhibit using archival and rare book materials to contextualize the work of the journalist, poet and fiction writer Stephen Crane. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities

Film and Media Studies

Film and Media Studies is an undergraduate program incorporating courses in film history, aesthetics, and theory; theory and practice in television, popular culture, and new media; and all aspects of 16mm film and digital video production: screenwriting, animation, narrative, documentary, and experimental film. Our mission is to give our students comprehensive preparation in film and media, enabling them to realize their scholarly and professional goals by offering excellent instruction in small classes, intensive hands-on experience, and individual mentoring. In addition, we encourage students to take a broad range of courses in the arts and humanities, in the belief that their creativity will be informed
by a deep knowledge of history, the arts, and culture. Upon graduation, many of our students pursue careers in the film and media industry, or attend graduate film school before entering the profession. Others pursue careers in a wide variety of professions, including music or drama, journalism, entertainment law, or business.

Requirements for the B.A. Degree

(See also General Requirements for Departmental Majors (p. 33).)

The major in film and media studies is designed to enable students to understand the history of film and media forms, to think critically about them, and to gain hands-on experience in how they are made.

Majors often participate in the Hopkins Film Society, including the planning and organization of regular film series and the Hopkins Film Festival; Hopkins Cinematics, our student-run film blog; and Frame of Reference, our journal of film and media. Students are encouraged to pursue a variety of internship opportunities in the film and media industries.

The following courses are required for completion of the film and media studies major:

Courses in social and behavioral sciences, quantitative studies, natural science, or engineering science
AS.061.140 Introduction to Cinema, 1892-1941 3
AS.061.141 Introduction to Cinema, 1941-present 3
One (1) introductory production/visual theory course:
AS.060.100 Introduction to Expository Writing 3
AS.060.113 Expository Writing 3
AS.060.114 Expository Writing 3

Foreign language

Critical Studies Track
One (1) of the following introductory production/visual theory courses:
AS.061.145 Introduction to Visual Language 3
AS.061.150 Introduction to Film Production 3
AS.061.152 Introduction to Digital Film 3
At least two (2) of the following and one (1) additional 200-level film course
AS.061.244 Film Genres
AS.061.245 Introduction to Film Theory
Seven (7) courses at 300- or 400-level
One 500-level course, either an internship or independent study
AS.060.100 Introduction to Expository Writing 3
or AS.060.113 Expository Writing
or AS.060.114 Expository Writing

Production Track
One (1) 200-level course from the following or any 200-level course with “Special Topics” in the title
AS.061.244 Film Genres 3

Film and Media Studies Minor

Students may develop a minor from seven courses in film and media studies. These must include:

Critical Studies Track
AS.061.140 Introduction to Cinema, 1892-1941 3
or AS.061.141 Introduction to Cinema, 1941-present
AS.061.145 Introduction to Visual Language 3
One (1) 200-level course in the program
Four (4) 300-level courses. Note: Students are strongly encouraged to take one course focusing on cinema outside the United States.

Production Track
AS.061.140 Introduction to Cinema, 1892-1941 3
or AS.061.141 Introduction to Cinema, 1941-present
One (1) 200-level course in the program
Three (3) 300-level film studies courses excluding production-oriented courses
AS.061.150 Introduction to Film Production 3
or AS.061.152 Introduction to Digital Film
An intermediate film production course (061.2xx) or a screenwriting course at the 200-300 level
AS.061.301 Advanced Film Production 3
or AS.061.356 Narrative Productions

Total Credits 15

For current faculty and contact information go to http://krieger.jhu.edu/film-media/directory/

Faculty
Director
Linda DeLibero
Assistant Professor
Anne Eakin Moss
(The Humanities Center): Soviet and Russian cinema, film theory.

Professor Emeritus
Richard A. Macksey
(Humanities Center, Writing Seminars, History of Science, Medicine, and Technology): film studies, critical theory.

Lecturers
Lucy Bucknell
Senior Lecturer (Film and Media Studies): literature and film, film genres, screenwriting, American film.

Roberto Buso-Garcia
Lecturer; Screenwriting

John Mann
Senior Lecturer (Film and Media Studies): film production, documentary film theory, experimental film.

Laura Mason
Senior Lecturer (Film and Media Studies; History): history and film, cultural history and media, French film.

Matthew Porterfield
Lecturer: film production, screenwriting.

Jimmy Joe Roche
Adjunct Lecturer: digital video production.

Suzanne Roos
Lecturer (German and Romance Languages and Literatures): French cinema, cultural theory.

Meredith Ward
Lecturer: film theory, media studies, popular culture theory, film history.

Karen Yasinsky
Lecturer: stop-motion and drawing animation, experimental film and video, visual theory.

Courses

AS.061.140. Introduction to Cinema, 1892-1941. 3 Credits.
This course teaches the fundamentals of film analysis and leads them through the first half of our first century of movies. We will focus on the basic elements of film form, as well as their manipulation and use in films across the globe from the turn of the century until the start of World War II. Movements discussed include the silent comedy of Charles Chaplin and Buster Keaton, German Expressionism, Surrealism, Soviet Montage, French poetic realism, Pre-Production Code cinema, and, of course, classical Hollywood. Screenings are required for this course. Lab fee: $40
Instructor(s): M. Ward
Area: Humanities.

AS.061.141. Introduction to Cinema, 1941-present. 3 Credits.
Introduction to Cinema provides an overview of American and international cinema from the post World War II era to the present. Through lectures and discussion, weekly screenings, and intensive visual analysis of individual films, we will explore the aesthetic, cultural, political, and economic forces that have shaped the art and industry of film over the past 70 years. Regular quizzes, writing assignments, class participation required.
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.145. Introduction to Visual Language. 3 Credits.
This course is a study of the visual language used to create a moving picture. Through screenings and discussion of films and related readings, students will develop a visual critical facility and will demonstrate this facility in weekly response papers and the creation of short videos. The course will focus on image construction, editing, and sound. Students will learn to be attentive to composition, movement within the frame, and rhythm and tempo in picture editing. We will also have a few in-class video assignments that students will work on in small groups of three. Lab fee: $40
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.150. Introduction to Film Production. 3 Credits.
This course introduces students to the basic considerations of shooting 16mm film. Through lectures and practice, the course approaches the basics of light meter readings, basic camera operations and shot composition. Each week students, working in groups of three, shoot film exercises, providing a general overview of film production. For the final project, each student shoots and edits (physical edits) a short (3-5 minutes) film on 16mm black and white reversal film stock.
Instructor(s): J. Mann
Area: Humanities.

AS.061.151. Introduction to Animation. 3 Credits.
Students will produce several animations using hand-made, stop-motion techniques, including drawing animation, collage-based and puppet animation. Work will be shot digitally. Screenings and readings will provide a historical and conceptual context.
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.152. Introduction to Digital Film. 3 Credits.
This course introduces students to the world of digital filmmaking. Through screenings, production assignments, and in-class labs, students will develop proficiency in digital cameras, sound recording devices, and software. Students will work individually and in groups to produce several video projects. For their final projects students will pitch an idea and develop a more complex film. Lab fee: $100
Instructor(s): J. Roche
Area: Humanities.

AS.061.160. Lights, Camera, Action: Hollywood Film. 1 Credit.
For more information, please see the Film and Media Studies Program website.
Instructor(s): L. Bucknell
Area: Humanities.
AS.061.161. Auteur 101: Short Filmmaking Laboratory. 3 Credits.
Students direct short films, based on poems, using production equipment from the JHU Digital Media Center. We will watch films in class (animation, music videos, silent films, and more), take field trips to Artscape and Creative Alliance screenings, and meet with Baltimore filmmakers. We will study similarities between poetry and film: symbols, motifs, the line/the frame, the cut/the stanza break, narration, quotation. Course culminates in a public screening of student films at a Baltimore venue. *Note: Students will create the images; the sound for the films (recordings of Baltimore actors reading poems, with music) will be provided for them. This will permit students to focus exclusively on creating memorable visuals, as for a music video or a silent film, without having the simultaneous technical challenges of writing scripts and recording audio.
Instructor(s): D. Weinberg; J. Roche
Area: Humanities.

AS.061.162. Lights, Camera, Action: Independent Film. 1 Credit.
An introduction to the basics of film analysis, focusing on independent crime films. In-class screenings and emphasis on discussion over lecture. This one-credit course will meet on Sept. 19, Sept. 26, Oct. 3, and Oct. 10 and will be graded pass/fail.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.164. Lights, Camera, Action: Woody Allen. 1 Credit.
An introduction to the basics of film analysis, focusing on the work of the highly individual independent filmmaker Woody Allen. Short weekly written responses, in-class screenings, and emphasis on discussion over lecture. No prior experience in film studies required. This one-credit course will meet on Sept. 18, Sept. 25, Oct. 2, and Oct. 9 and will be graded pass/fail.
Instructor(s): L. Bucknell.

AS.061.202. Intermediate Film Production: Personal Essay Film. 3 Credits.
In this course students will consider variations of the personal essay film, wherein filmmakers explore their own experiences, both real and imagined. These films constitute dialogues between filmmaker and world using subjective approaches, including but not limited to first person narration. Students will make a short (4-6 minutes) 16mm film from original and possibly archival footage; their own filmic essays based upon personal experiences. We will look at the works of several essay filmmakers including Ross McElwee, Jean Luc Godard, Chris Marker, and Su Friedrich.
Prerequisites: Pre or Co-Requisite: AS.061.150
Instructor(s): J. Mann
Area: Humanities.

AS.061.203. American Contemporary Classics. 3 Credits.
An introduction to the basics of film analysis through the close examination of notable American films from 1980 to the present, including works by Woody Allen, the Coen Brothers, Courtyard Hunt, Spike Lee, and Martin Scorsese. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with an optional revision.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.204. Intermediate Digital Film Production. 3 Credits.
This course is designed to further the filmmaking skills students have begun to develop in previous production courses. Students will acquire a more robust proficiency in directing, editing, and cinematography. During the first part of the semester, students will be presented with several “challenges” designed to allow them to hone their creative vision while also solving problems behind the camera and in editing. The second half of the course will allow each student time to produce a 6 - 12min digital film project that is either narrative, documentary, or experimental.
Prerequisites: AS.061.145 OR AS.061.150 OR AS.061.152
Instructor(s): J. Roche
Area: Humanities.

AS.061.205. Introduction to Dramatic Writing: Film. 3 Credits.
We will explore the basic principles of visual storytelling in narrative film as they apply to the design and execution of a screenplay. During the course of the semester, each student will work on different writing exercises as they search for their specific story and the best way to approach it and execute it. We will study different narrative tools and methods of screenwriting by analyzing specific films to ascertain how they work or fail to do so at script level. Through in-class critiques, group discussions and one-on-one sessions, students will apply these techniques to their own work as they undergo the process of designing, breaking down, outlining and writing a screenplay for a short film. In-class analysis and debate on the strengths and challenges posed by the students’ work will help shape the thematic emphasis of the second half of the course.
Instructor(s): R. Buso-garcia
Area: Humanities
Writing Intensive.

AS.061.208. (Special Topics) Experimental Video. 3 Credits.
This course has been modified to fall under the FMS major’s “special topics” 200-level requirement. An introduction to experimental video from the 1960s to present. Understanding “experimental” as an operative to change existing forms of video using aesthetic and ideological innovation. With four video projects. Lab fee: $40
Prerequisites: AS.061.145 OR AS.061.150
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.209. Special Topics: Surrealism and Film. 3 Credits.
We will define Surrealism through readings, including those of Andre Breton and Rene Daumal and texts that influenced the movement in the early part of the 20th c. Using an understanding of the practice of surrealism found in the readings as well as surrealistic games and writing, we’ll study a diverse group of filmmakers influenced by the practice including Joseph Cornell, Rene Clair, Luis Bunuel and contemporary artists such as Jack Chambers and David Lynch. Assignments include weekly papers and one final creative project. Lab fee: $40
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.220. Special Topics: Silent Classics. 3 Credits.
A survey of silent era masterpieces. From Murnau’s horror film Nosferatu to Keaton’s slapstick comedy Sherlock Jr to Dreyer’s great tragedy The Passion of Joan of Arc, these are films of exceptional beauty and artistry. Chaplin, Eisenstein, von Sternberg, and others also considered. Recommended course background: AS.061.140 or AS.061.141 or AS.061.145.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.
AS.061.221. Special Topics–Producing the Independent Film. 3 Credits.
This course will walk students through the process of producing an independent film in the United States, from financing and development, through production, post-production, marketing, and exhibition. $40 Lab Fee
Prerequisites: AS.061.150 OR AS.061.145 OR AS.061.151 OR AS.061.152
Instructor(s): M. Porterfield.

AS.061.222. Analyzing Popular Culture. 3 Credits.
This course provides an introduction to the critical analysis of popular culture through the major theoretical paradigms of media and cultural theory. The teaching method uses a combination of media studies and sociology to explore popular culture and is designed to encourage students to become more active critics. The course presents a range of media from contemporary popular music to film and television. Smaller subjects include the teen "pop" love song, the politics of representation, and the formation of subcultures.
Instructor(s): J. Tyler
Area: Humanities.

AS.061.223. Special Topics: Performance Art and Video. 3 Credits.
This course will explore the history and current state of video and performance art, two of the most important movements in contemporary art. How have they influenced each other and how have they affected mainstream media and cultural notions of art? Students will view significant works and their presentation in galleries, museums, and public spaces, and will create individual and collaborative performance pieces of their own.
Instructor(s): S. Barber
Area: Humanities.

AS.061.224. Special Topics: The Business of Film. 3 Credits.
Law and economics shape the movie business. This course will survey the legal doctrine and financial concepts of film production and distribution, providing both an overview of one particular industry (i.e., Hollywood) as well as an introduction to fundamental principles applicable to any industry. $40 Lab fee
Instructor(s): J. Mann
Area: Humanities.

AS.061.225. Special Topics: Introduction to Animation. 3 Credits.
Students will produce several animations using hand-made, stop-motion techniques, including drawing animation, collage-based and puppet animation. Work will be shot digitally. Screenings and readings will provide a historical and conceptual context.
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.226. Special Topics: Writing About Film. 3 Credits.
A workshop focusing on the critical analysis of film, with particular attention to the writing of short analytical and critical essays on a range of movies—recent and classic—using a variety of approaches. Students are required to participate in weekly critiques and discussions of each other's writings.
Prerequisites: AS.061.140 OR AS.061.141
Area: Humanities
Writing Intensive.

AS.061.227. Going "On the Road": The Road Movie and American Cultural Identity. 3 Credits.
This course explores the road film, one of the most popular thematic constructs in American film. Although the journey narrative has its roots in literature, the road film presents a unique variation of stories of wanderlust. Perhaps this is because cinema's very nature lends itself to the form; the art form entails the creation of space and motion in time. We will follow the road movie from classical cinema to the present, concentrating on its position as a central trope in American mythology but also looking at the ways filmmakers in other cultures have made use of it. Lab fee: $40
Prerequisites: AS.061.140 OR AS.061.141
Area: Humanities.

AS.061.230. Intermediate Film Production. 3 Credits.
This course continues the work of the Introduction to Film Production course. The course also introduces the use and design of sound through the incorporation of non-sync voice(s) and effects. Each student is responsible for the complete production of a short (4-6 minutes) film, from treatment to shooting script to final edit. The films are shot on 16mm color and/or black and white negative film stock and transferred to digital video. All editing for the films is with non-linear software, generally Final Cut Pro. $100 Lab fee
Prerequisites: AS.061.150 or permission
Instructor(s): J. Mann
Area: Humanities.

AS.061.244. Film Genres. 3 Credits.
A survey of American genres: the Western, the Gangster Film, Science Fiction, Horror, Comedy, Melodrama, and others. Twice-weekly screenings. Short film responses and a final paper, 10pp.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.245. Introduction to Film Theory. 3 Credits.
This course offers an introduction to the major paradigms of film theory, with work ranging from André Bazin to Sergei Eisenstein. Frequent film screenings are designed to help illustrate film theory concepts. Designed around one operative question, "What is cinema?" the course explores the varied and divergent answers provided by the great thinkers of the cinema in the past century. Students are expected to enter the course ready to engage in discussion.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Ward
Area: Humanities.

AS.061.248. American Masterpieces. 3 Credits.
An introduction to Hollywood cinema and the basics of film analysis through the close reading of selected 20th century American classics including Citizen Kane, On the Waterfront, Annie Hall, and others. Emphasis on discussion over lecture. Several short film responses and an essay with optional revision.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.
AS.061.251. American Comedy Classics. 3 Credits.
A survey of 20th century American comedy from the films of Charlie Chaplin and the Marx Brothers to Dr. Strangelove and Annie Hall. The course will provide an introduction to the basics of film analysis. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with an optional revision.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.252. School Daze. 3 Credits.
Teen angst and togas in comedies of American youth from The Graduate to Animal House to Lost in Translation. Course will provide an introduction to the basics of film analysis with an emphasis on discussion over lecture. Several short film responses and an essay with optional revision. No prior experience in the subject required.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.254. Watching the Detectives. 3 Credits.
Films of surveillance and detection from the Humphrey Bogart/Howard Hawks classic The Big Sleep, to Polanski’s Chinatown with Jack Nicholson, and David Simon’s HBO series The Wire. The course will offer an introduction to the basics of film analysis. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with an optional revision.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.255. Special Topics: Theorizing Popular Culture. 3 Credits.
This course explores the changing role of popular culture via the major paradigms through which it has been considered. Presents a range of media from contemporary popular music to film and television. Lab fee: $40
Prerequisites: AS.061.140 or Instructor Permission
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

AS.061.257. I Want To Be Humphrey Bogart. 1 Credit.
A close look at the Hollywood titan Humphrey Bogart in classics including Casablanca, To Have and Have Not, and The Big Sleep. In-class screenings and discussions are emphasized over lecture. No prior experience in film studies required.
Area: Humanities.

AS.061.258. How the Kids Stole Hollywood: The Rise of the “Indie” Film. 3 Credits.
This course follows the rise of “indie” filmmaking (an independent film with mass distribution) as a Hollywood phenomenon. These films are labors of love, financed by friends or a series of maxed-out credit cards. Using Peter Biskind’s entertaining book Down and Dirty Pictures, we’ll trace the interpersonal struggles, political maneuverings, and aesthetic statements made by directors from Steven Soderbergh to Kevin Smith. Students will analyze films and plan and pitch their own “indie” film.
Area: Humanities.

AS.061.259. Baltimore Filmmakers. 3 Credits.
Baltimore Filmmakers seeks to explore the unique personal narrative of the Media Artist within contemporary society, fourteen Filmmakers/Video Artists from Baltimore will visit the class room to give talks.
Instructor(s): J. Roche
Area: Humanities.

AS.061.261. Moving Pictures: Looney Toons and Beyond. 3 Credits.
This course offers an overview of American and European animated films These films range from Looney Toons and early Warner Brothers films to European films including the works of the Brothers Quay and Jan Svankmayer. Along with in-class screenings, each student will create a very short animated 16mm. film. Using permanent markers, dyes, and bleach, students will work with black and clear 16mm. leader to create these films. Absolutely no drawing skills are required for this course.
Area: Humanities.

AS.061.270. Writing for the Screen. 3 Credits.
An Introduction to dramatic writing for film. Weekly film screenings. Several short, written exercises in story, scene, and character design, and a final complete script for a short film. Introduction to Fiction and Poetry recommended.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.301. Advanced Film Production. 3 Credits.
In this course each student creates a short (3-10 minutes) film using color and/or black and white negative film. The project may include synchronized as well as non-synchronized sound. The projects are not limited by genre. Any one or a combination of genres is allowed, from conventional narrative to experimental to documentary. The projects will be shot in Super 16 format.
Prerequisites: AS.061.202 OR AS.061.230
Instructor(s): J. Mann
Area: Humanities.

AS.061.307. In the City. 3 Credits.
Glittering or gritty, rich with opportunity or “pestilential to the morals, the health, and the liberties of man”: the city in popular film from the silent era to the present. Lab fee: $40
Prerequisites: AS.061.140 AND AS.061.141 or instructor permission
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.308. Experimental Video. 3 Credits.
An introduction to experimental video from the 1960s to present. Understanding “experimental” as an operative to change existing forms of video using aesthetic and ideological innovation. With four video projects. Lab fee: $40. Recommended Course Background: AS.061.145 or AS.061.150
Area: Humanities.

AS.061.312. Writing The Screenplay. 3 Credits.
Course is a rigorous introduction to writing in screenplay form, based on writing exercises, the reading of scripts, and the screening of popular films.
Area: Humanities
Writing Intensive.

AS.061.314. Screenwriting: Introduction to Scene. 3 Credits.
Departing from traditional screenwriting technique, this course will promote precise visual image as a foundation for developing scene, character, and story. Students will explore narrative from the inside out.
Area: Humanities
Writing Intensive.
AS.061.315. Screenwriting By Genre. 3 Credits.
Story design for the screenplay with special attention to the genres of
comedy, horror, melodrama, and adventure. Regular workshops, short
written exercises, and a longer final project.
Prerequisites: AS.061.313 or AS.220.342 or instructor’s permission
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.316. Characters for the Screenplay. 3 Credits.
A workshop devoted to creating complex characters for the screen.
Students will examine memorable film characters from the silent era to the
present, with attention to how these characters are revealed through both
the drama and the mise en scène. Weekly screenings. Short critical and
creative written exercises and a longer, creative final project.
Prerequisites: (AS.061.270 OR AS.220.204 OR AS.220.337) or
instructor permission.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.317. Anti-Cinema: Topics in Film Poetics and Theory. 3
Credits.
This course will focus on the aesthetic, ideological and philosophical
objections raised against the make-believe ontology of traditional
storytelling in the movies. We will discuss the visionary art of Buster
Keaton, the transcendental empiricism of auteurs like Tarkovsky and
Bresson, and will not stop at the mind boggling experiments by Lars van
Trier and Abbas Kiarostami, to name but a few. Our analysis of complex
film art will be accompanied by reading relevant cultural and film theories,
ranking from Walter Benjamin and Bertold Brecht to Roland Barthes and
Gilles Deleuze. Juniors and Seniors Only.
Prerequisites: AS.061.140 OR AS.061.141
Area: Humanities.

AS.061.318. Noir Film, Noir Culture: American Film and Its Contexts,
1946-1959. 3 Credits.
Emerging from the profound changes wrought by World War II, American
noir film in the postwar period shared a sensibility with a number of
contemporaneous aesthetic movements in art, photography, music, and
literature. This course will explore the concerns and themes common to
both film noir and the art and popular culture of its time: engagement with
extremes of subjectivity and psychological dissonance; existentialism and
the crisis of meaning; the malleability of identity; the impact of mass forms
of culture on selfhood; the use of visceral and explicit imagery. Artists
whose work will be considered include Orson Welles, Fritz Lang, Otto
Preminger, Robert Aldrich, Nicholas Ray, Robert Frank, William Klein,
Jackson Pollock, Robert Rauschenberg, Mark Rothko, Allen Ginsburg,
Norman Mailer, Art Pepper, and Miles Davis.
Prerequisites: AS.061.140 or AS.061.141 or instructor’s permission
Area: Humanities.

AS.061.319. The Uses Of Difference: Race in Hollywood. 3 Credits.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.320. Women in Hollywood Film. 3 Credits.
Female beauty, villany, and humanity in popular film from the silent era to the
present.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.321. Masculinities. 3 Credits.
Prereq: One Core Course Or Permission From tap dancer to gangster,
assassin to anguished teen, versions of the male in film from the silent
era to the present. Cross-listed with Studies of Women, Gender, and
Sexuality
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.322. Gangster Films. 3 Credits.
A study of three masters – John Ford, Sergio Leone, and Sam Peckinpah –
their impact on the genre and on each other. $40 Lab fee.
Area: Humanities.

AS.061.337. Films Of The Fifties. 3 Credits.
Cultural, social, and political concerns of the decade as reflected in the
films of Lang, Sirk, Ray, Fuller, Kazan, and others. Lab fee: $40
Prerequisites: AS.061.140 OR AS.061.145 OR AS.061.246 OR
AS.061.245 or permission
Area: Humanities.

AS.061.339. A Cinema Of Anxiety: Film Noir. 3 Credits.
Postwar film noir: Fuller, Huston, Lang, Mann, Tourneur, and others.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.341. The Wilderness Within and Without. 3 Credits.
Savage landscapes and savage states of mind in films by Ford, Herzog,
Boorman, Weir, and others.
Prerequisites: AS.061.140 or AS.061.244 or AS.061.245 or AS.061.246
(Core Courses.)
Area: Humanities.

AS.061.342. Going "On the Road": The Road Movie. 3 Credits.
This course explores the road film, one of the most popular thematic
constructs in American film. Although the journey narrative has its
roots in literature, the road film presents a unique variation of stories of
wanderlust. Perhaps this is because cinema’s very nature lends itself
to the form; the art form entails the creation of space and motion in
time. We will follow the road movie from classical cinema to the present,
concentrating on its position as a central trope in American mythology but
also looking at the ways filmmakers in other cultures have made use of it.
Lab fee: $40
Prerequisites: Prereqs: AS.061.140 OR AS.061.141
Instructor(s): L. DeLibero; M. Ward
Area: Humanities.
AS.061.343. Deadwood and American Justice. 3 Credits.
The course aims at generating well-grounded discussion on issues of justice and social fairness in the wilderness of American westward colonization and spoliation. Issues such as the rule of foul language, chattel sex work, grassroots democracy, gun justice, and other basic elements of the American ethos of conquest and populist sovereignty.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): E. Gonzalez
Area: Humanities.

AS.061.344. The Viewers in the Dark: One Hundred Years of Cinephilia, from Lumiere to Tsai Ming-Liang. 3 Credits.
The movies have attracted a devoted following in their first hundred and twenty years. Here, we discuss the act of moviegoing itself, exploring the ways that film fans have traditionally considered themselves in relation to the silver screen, the movie house, and film culture, from the silent era, with its first moments of illuminated wonder at moving pictures, through early cin-elves in the 1920s and the enthusiastic movements of film critics-turned-filmmakers with the French New Wave in the 1960s, up through the video store boom and bust. How does the way we literally engage with cinema affect the way that we love movies? With our culture now engaging with the rise of the home theater, we consider where we have come from as moviegoers as part of a genealogy of watchers in the dark, and how theorists have positioned themselves as regards the activity. This course also involves a practicum to enable students to think through questions of moviegoing in acts of moviegoing itself, and reflection on the experience. Thinking through how we have felt and thought about movies, we come to some conclusions about both the nature of film art and its most loyal spectator, the cinephile.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Ward.

AS.061.347. Writing with Light. 3 Credits.
Writing with Light explores the stylistic applications of lighting for film. The course will include readings and class projects emphasizing various lighting modes.
Instructor(s): B. Plow
Area: Humanities.

AS.061.348. Narrative Productions. 3 Credits.
Students from MICA and JHU will collaborate to produce short narrative films from their original screenplays. Production accompanied workshops with filmmakers on Production Design, Directing, Cinematography, and Art Direction.
Prerequisites: AS.061.240[C] OR AS.061.145[C] OR AS.061.150[C]
Area: Humanities.

AS.061.349. Arts, New Media, Community: Creating an Online Arts Journal for Baltimore and Beyond. 3 Credits.
Area: Humanities.

AS.061.351. Camera-less Filmmaking. 3 Credits.
Camera-less Filmmaking will use various filmmaking techniques that do not involve the camera. Using 16mm clear leader and black leader students will make films with permanent markers, bleach and other ingredients. We will also view films from this genre and discuss how this approach provides a unique opportunity to explore the filmic frame. Drawing skills are not a prerequisite for the course.
Instructor(s): J. Mann
Area: Humanities.

AS.061.352. Media Workshop. 3 Credits.
Media Workshop mixes the theory and practice of media-making in a workshop environment that allows upper-level students to hone their craft as filmmakers. Based upon the idea of a creative community, the workshop is an advanced lab designed to give students a place to share ideas, create new work, and receive intensive and supportive critique. Work produced in this class will consist of non-narrative experimental exercises, exploring issues of the image, editing, perception, and sound. Students will read filmmaker-theorists like Sergei Eisenstein, Robert Bresson, Stan Brakhage, Maya Deren and Wim Wenders and will produce creative work inspired by the texts.
Instructor(s): M. Porterfield; M. Ward
Area: Humanities.

AS.061.353. Documentary Film Production: Cities and Fields. 3 Credits.
Prerequisites: AS.061.150 and instructor permission - $100 Lab Fee
Instructor(s): J. Mann
Area: Humanities.

AS.061.354. Wien-Baltimore: Holocaust Education and Documentary Films. 3 Credits.
This documentary production class accompanies the production of the documentary Wien-Baltimore between January and April 2010. The film relives the experiences of Holocaust-survivor Leo Bretholz focusing on Leo’s efforts to tell his story to the Baltimore school community and beyond. Wednesday production meetings and Tuesday screenings. First class/meeting to be held on Tuesday, February 2nd at 7:30pm. Recommended Course Background: AS.061.145, AS.061.150, or with instructor permission.
Instructor(s): B. Wegenstein.

AS.061.355. Influence and Interpretation. 3 Credits.
Short stories, poetry, novels and films will provide a starting point for students’ original short video productions. We’ll study video artists’ and filmmakers’ work inspired by other artists, filmmakers’ and writers’ works. Texts will include Harold Bloom’s Anxiety of Influence.
Instructor(s): K. Yasinsky
Area: Humanities.
AS.061.356. Narrative Productions. 6 Credits.
This course is designed to immerse students in the creative and practical challenges of narrative production. It is our hope that you will emerge with a greater understanding of the professional structure of a film crew, as well as with an understanding of the collaborative creativity necessary to make a narrative short. We will work hard, but if you are interested in video, film and filmmaking, we guarantee you will learn a great deal. In this course students will be divided into teams, each of which will produce a short narrative film based upon a script written by a fellow student. All films will be fully student produced. From script to casting, production to direction, design, shooting and sound recording, music and editing, students will fill all principal roles. Throughout the course, instructors will expose students to relevant films and film professionals in order to illuminate the key creative roles necessary in the making of any film. Instructors will serve a guiding role in the production of student projects, offering technical information and guidance as to the creative, collaborative nature of the filmmaking process. Students will be evaluated not only on the films they produce, but also on their ability to create and contribute within a team to the collaborative art of filmmaking. Lab fee: $100
Prerequisites: AS.061.150 OR AS.061.145 OR AS.061.152
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.357. Seminar on Narrative Productions. 3 Credits.
Through a series of workshops and lectures on production design, directing, cinematography, and art direction, students will be guided through the process of making a feature film for Narrative Production (061.356). The art and craft of fiction filmmaking—how and why we tell stories through cinema—will be the underlying theme of the course. We will also discuss effective strategies for completing a successful film. Required screenings and workshops with visiting filmmakers, as well as regular readings and assignments, will augment class lectures and discussions.
Prerequisites: AS.061.145 or AS.061.150 or instructor permission
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.358. Directing Actors. 3 Credits.
This class, intended for students of film, will explore the theory, practice, and ethics of directing actors for the screen. Texts, screenings, production, and performance exercises will be combined over the course of the semester. The goal of this workshop is to inspire young directors and enhance their ability to communicate with their cast with confidence and empathy.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.359. Documentary Film. 3 Credits.
This overview of the history of the documentary film format and its attempt to tell the “truth” examines documentaries from different historical moments and cultures, and asks theoretical and philosophical questions about the construction of argument, and the use of reality, ethnography, and storytelling.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.061.360. Documentary Film Theory. 3 Credits.
Instructor(s): J. Mann
Area: Humanities.
AS.061.372. French Crime Films, Thrillers, and Noirs. 3 Credits.
An exploration of French films about crime with a particular focus on the reciprocal relations between French and American cinema: how did the French tradition of poetic realism influence the American film noir—and why is our name for the genre one invented by French critics? How did French directors respond to American genre movies, and to the films of Hitchcock? Screenings will include films by Melville, Godard, Clément, Clouzot, Audiori, and Hanek.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): S. Roos.

AS.061.373. Intermediate Dramatic Writing: Film. 3 Credits.
We will explore different approaches towards understanding the fabric of story as it pertains to film. Students will be exposed to key challenges in conceiving, designing, structuring and executing a compelling, original, memorable and vibrant feature-length screenplay. By studying key examples we will discuss possible solutions to these issues. In every class, students will share their work in progress and will help each other find approaches or solutions to their specific challenges and issues. We will analyze films with screenplays that effectively play with the form to create lasting, thought-provoking and affecting stories. Through in-class critiques, group discussions and one-on-one sessions, students will apply new tools and approaches to their own work as they undergo the process of designing, breaking down, outlining and writing a full step outline, a beat sheet and the first ten pages of a feature length screenplay. As the semester progresses, in-class analysis and debate on the strengths and challenges posed by the students’ work will shape the thematic emphasis of each class.
Prerequisites: AS.220.204
Instructor(s): R. Buso-garcia
Area: Humanities
Writing Intensive.

AS.061.381. Sound on Film. 3 Credits.
This 3-credit upper-level course, sponsored by the Film and Media Studies Program at JHU and the program in Recording Arts and Sciences at the Peabody Institute, will offer undergraduates and faculty/staff from both institutions an unprecedented opportunity to collaborate on all aspects of designing soundtracks for film. Utilizing in-progress and completed film projects, student filmmakers from the Film and Media Studies program will work with Peabody students to create soundtracks, from the initial phases of composition and scoring to the final stages of recording and sound syncing. Students will work in small teams in a lab setting to create their soundtracks, exploring a variety of scenarios, including the implications of image-driven music vs music-driven images, and the various uses of acoustic and electronic sound. The final products will be mastered for DVD and online format. Lab work will be supplemented by guest lectures and faculty presentations on various aspects—practical, theoretical, and historical—of applying sound to film. Guest lecturers will include sound designers and engineers, composers, editors, historians of film sound, and filmmakers working in both live action and animated film.
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.387. Practicum in Advanced Documentary Filmmaking. 3 Credits.
In this course, film students from JHU and MICA will research, shoot, and edit a 30-minute documentary on JHU’s Baltimore Scholars Program under the supervision of professional filmmakers. Students will learn the techniques of filmmaking and of building a narrative for documentary film. In the process of conducting interviews and research for the film, they will also explore the historical and current relationship between Johns Hopkins University and the Baltimore community.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.390. The Actor in Hollywood. 3 Credits.
This course examines the intersection of performance, stardom, and masculinity in the films of actors whose work reflects changing approaches to acting, from the studio era to the present.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.391. Love and Film. 3 Credits.
In this course, we explore different understandings of "love" and the way that film has dealt with the concept as a medium. We explore a variety of approaches to the question of "love" - from the agapic to the familial to the romantic - through a series of interdisciplinary readings ranging from philosophy to anthropology. We will also equally explore the question of how film has engaged with the question of love as a concept, and what depictions of human affection - from the general to the personal - it has offered us. Screenings are required for this course. $40 Lab fee. Cross-listed with Study of Women, Gender and Sexuality.
Prerequisites: AS.061.140 or AS.060.141
Instructor(s): M. Ward
Area: Humanities.

AS.061.392. Cinematic Truth Value: Traditions of Realism. 3 Credits.
Matthew Porterfield From the films of Robert Flaherty, Luchino Visconti and Robert Bresson, through the work of the Dardenne brothers and contemporary neo-realist, Pedro Costa, Abbas Kiarostami, Robert Gardner, and Kelly Reichardt, this course will explore the dominant techniques, the aberrations, and the virtues and limitations of cinematic realism. Lab fee: $40. Recommended Course Background: AS.061.140 or AS.061.141
Instructor(s): M. Porterfield
Area: Humanities
Writing Intensive.

AS.061.393. Violent Attractions. 3 Credits.
Violence, ritualized and anarchic, celebrated and deplored in popular film from silent era melodrama and slapstick comedy to contemporary sports, crime, and combat films. Twice-weekly screenings; oral presentation; two essays, 6 & 12 pp. Lecture Wednesday 4-30-7pm, Screenings Monday/ Tuesday 7-30-10pm. Lab fee: $40
Prerequisites: AS.061.140 OR AS.061.141 OR Instructor Permission
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.394. Renoir, Vigo, Carne: French Cinema of the 1930s. 3 Credits.
Conducted in English. An exploration of French cinema of the 1930s and the movement that produced some of the most influential masterworks of world cinema; focus on close analysis of films. Lecture Tuesday 1:30-4pm, Screening Monday 7:30-10pm. $40 Lab fee.
Instructor(s): S. Roos
Area: Humanities.
AS.061.395. Film Programming. 3 Credits.
This course is run in close conjunction with the Johns Hopkins Film Society. Half of the work you will be doing in this class will be geared toward the Film Society’s 2011 Film Festival in its programming, marketing, budgeting, organization, scheduling, and interaction with both filmmakers and the community. In this class, you will learn to program, execute, and run a film series and gain the tools to create and run a Film Festival. You will, then, learn how to do historical and aesthetic research to craft a project proposal, hone it so it is the best possible version of your idea, market it so that it succeeds, project its films on 35mm, introduce its films with short lectures to an audience, answer a Q&A about your films, interact with audiences, make connections with filmmakers and curate a film of your choice, and, essentially make the entire thing come off without a hitch. We focus, then, on a set of interlocking skill sets: film programming and projection, series organization and planning, and audience outreach as well as event management.
Instructor(s): M. Ward
Area: Humanities.

AS.061.396. Modern Paris on Film. 3 Credits.
This course uses French film to examine the history of twentieth-century Paris. We will consider how filmmakers interpreted the social, political, and technological transformations that shaped Paris in the modern era, treating movies as expressions of change and means by which filmmakers comment on it. Taught in English. Cross-listed with History.
Instructor(s): L. Mason
Area: Humanities.

AS.061.397. French Masculinities. 3 Credits.
Examines changing ideals of masculinity in France after 1960 as they found expression on film, rooting the work of iconic stars and directors in their cultural, political and historical contexts.
Prerequisites: AS.061.140 OR AS.061.141 OR INSTRUCTOR PERMISSION
Instructor(s): L. Mason
Area: Humanities Writing Intensive.

AS.061.398. Godard. 3 Credits.
An intensive study of the most important films of this seminal and influential director.
Prerequisites: AS.061.140 or AS.061.141
Area: Humanities.

AS.061.399. Stop-Motion Puppet Animation. 3 Credits.
Students will create their own stop-motion models (puppets) based on a wire armature model. In small groups, students will design and create a simple set and make a short stop-motion movie using a DSLR camera. The question of "why animate" will be explored in student projects and responses to screenings. We will study the history of stop-motion puppet animation from Starewicz to Svankmajer to Nick Park.
Prerequisites: AS.061.140 OR AS.061.141 OR AS.061.150
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.401. Dance for the Camera. 3 Credits.
Dance for the Camera is a collaborative course taught with dance majors from Towson University. Film students from Film and Media Studies will work with choreographers from Towson to produce a short 16mm dance for the camera film. Lab fee: $100
Prerequisites: AS.061.230 and Instructor permission.
Instructor(s): J. Mann
Area: Humanities.

AS.061.402. Critical Approaches to Contemporary Film. 3 Credits.
Instructor(s): L. DeLibero
Area: Humanities Writing Intensive.

AS.061.403. Lost & Found Film. 3 Credits.
Students produce weekly short films from "found footage" via archival resources. Explores the notion of "filmic" and "photogenic" through final project and readings from Epstein, Benjamin, and Barthes. Lab fee: $40. Recommended Course Background: AS.061.150, AS.061.145, or permission.
Area: Humanities.

AS.061.404. The French New Wave. 3 Credits.
Conducted in English Study of the major films of the French New Wave, their origins, context, and afterlife.
Instructor(s): S. Roos
Area: Humanities.

AS.061.410. History & Film. 3 Credits.
This course explores the intersection between historiography – that is, the theory of history – and its relationship to the moving image. How does film as a medium relate to history as a concept? How does film express its own form of an idea of history? How is film, perhaps, itself historical in the way it works? In this course, we will read the work of Walter Benjamin, Frederich Neitzsche, and Jeffrey Skoller, among others. Students are expected to enter the course ready to engage in discussion. $40 Lab fee
Area: Humanities Writing Intensive.

AS.061.420. The French New Wave. 3 Credits.
Prerequisites: AS.061.240, AS.061.301, AND AS.061.304
Instructor(s): J. Mann; M. Porterfield
Area: Humanities.

AS.061.430. Sen Proj-Film Production. 3 Credits.
Instructor(s): J. Mann
Area: Humanities.

AS.061.440. Sr Project-Film. 3 Credits.
Prerequisites: AS.061.240, AS.061.301, AND AS.061.304
Instructor(s): J. Mann; M. Porterfield
Area: Humanities.

AS.061.440. Sr Project-Film. 3 Credits.
Prerequisites: AS.061.240, AS.061.301, AND AS.061.304
Instructor(s): J. Mann; M. Porterfield
Area: Humanities.

AS.061.441. Sen Proj-Film Production. 3 Credits.
Instructor(s): J. Mann
Area: Humanities.

AS.061.442. Sen Proj-Digital Video Prod. 3 Credits.
Instructor(s): J. Mann; M. Porterfield
Area: Humanities.

AS.061.501. Independent Study - Film. 0 - 3 Credit.
Instructor(s): Staff.

AS.061.502. Independent Study:Film & Media. 3 Credits.
For students who wish to explore an aspect of film studies not covered by existing courses. The course may be used for research or directed readings/viewings and should include one lengthy essay or several short ones as well as regular meetings with the adviser. Permanently required: Lab Fee: $100 (if production related)
Instructor(s): J. Mann; L. Bucknell; L. DeLibero; L. DeLibero
Area: Humanities.

AS.061.503. Independent Study-Film/Media. 0 - 3 Credit.
Permission required
Instructor(s): J. Mann; L. DeLibero; M. Porterfield

AS.061.504. Independent Study-Film. 3 Credits.
Instructor(s): J. Mann; L. DeLibero.

AS.061.505. Internship-Film. 0 - 3 Credit.
Instructor(s): B. Wegenstein; J. Mann; L. Bucknell; L. DeLibero.

AS.061.506. Internship-Film & Media. 1 Credit.
Instructor(s): L. Bucknell; L. DeLibero; M. Ward.

AS.061.596. Ind Stdy-Film & Media. 3 Credits.
Instructor(s): J. Mann; K. Yasinsky; L. Bucknell; L. DeLibero.
AS.061.599. Internship-Film & Media. 1 Credit.  
Instructor(s): J. Mann; L. Bucknell; L. DeLibero; M. Ward.

AS.180.597. Research. 3 Credits.  
Instructor(s): N. Papageorge; Staff.

Cross Listed Courses

Classics  
AS.040.220. Representing Ancient Greece and Rome in Film and Television. 3 Credits.  
This course examines modern representations of ancient Greece and Rome in film. Students will analyze films in both ancient and modern contexts, distinguishing historical fact from artistic choice. Screenings on Monday evenings. Cross-listed with Film and Media Studies.  
Instructor(s): A. Ibarra  
Area: Humanities.

English

AS.060.118. Asian American Literature and Film. 3 Credits.  
This course offers students a survey of Asian American literature, film and cultural politics. Throughout the course we will evaluate the literary and filmic productions of Asian Americans in order to ask a series of questions: Who is American? Who is Asian American? How does “Asian American” work as a category that uncovers contestations over the meaning of ethnic, sexual, and national identity? We will look at a diverse array of Asian American groups while paying attention to the formation of Asian American subjectivities across differences and the intersections of ethnicity, sexuality, class and gender. Cross-listed with Film and Media Studies.  
Instructor(s): R. Neutill  
Area: Humanities.  
Writing Intensive.

Anthropology

AS.070.262. Cuban Intellectuals, Cinema, and the State. 3 Credits.  
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.  
Instructor(s): L. Humphreys  
Area: Humanities, Social and Behavioral Sciences.

AS.070.265. Anthropology of Media. 3 Credits.  
We will examine the mediation of contemporary cultural life through technologies such as cinema, television, radio, design, and the Internet, investigating questions of desire, power, identity, and belonging. Student coursework will center on the development of an ethnographic video project.  
Area: Humanities, Social and Behavioral Sciences.

AS.070.309. Anthropology of Media. 3 Credits.  
We will examine the profound mediation of contemporary human life through technologies like film, television, radio, mobile phones, iPods, and the Internet, investigating questions of desire, politics, production, and the virtual. SPECIAL NOTE: There will be a $30 lab fee for the course.  
Instructor(s): A. Pandian  
Area: Humanities, Social and Behavioral Sciences.

AS.070.337. Digital Media, Democracy, and Control. 3 Credits.  
This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.  
Instructor(s): L. Humphreys  
Area: Humanities, Social and Behavioral Sciences.  
Writing Intensive.

AS.070.346. Cinema and Ethnography. 3 Credits.  
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. We will investigate this parallel by examining, side-by-side, cinematic and anthropological representations of subjects like environmental conflict, urban poverty, religious pilgrimage and media culture.  
Instructor(s): A. Pandian  
Area: Humanities, Social and Behavioral Sciences.

History

AS.100.499. Film and Propaganda in Nazi Germany. 3 Credits.  
By examining a range of cinematic works—from explicitly ideological pseudo-documentaries to less overtly tendentious entertainment films—this course will explore the transmission of propaganda into the everyday culture of Nazi Germany.  
Instructor(s): H. Balz  
Area: Humanities, Social and Behavioral Sciences.  
Writing Intensive.

German Romance Languages Literatures

AS.211.174. Media of Propaganda. 3 Credits.  
Today, promoting a particular political or personal point of view is not viewed as “propaganda,” but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term “propaganda” will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.  
Instructor(s): B. Wegenstein  
Area: Humanities.

AS.211.212. Holocaust and Film. 3 Credits.  
We will examine the history of Holocaust films in regard to the possibilities of genre (documentary versus feature), the use of historical and archival materials, as well as general questions of representation and trauma. I CINEMA OF THE VICTIMS II CINEMA OF THE PERPETRATORS III CINEMA OF THE SECOND AND THIRD GENERATIONS WITNESSES Students will be writing weekly response papers to all screenings, and will choose to work with films in the original languages German, English, Italian, and French. This class will be writing-intensive. Cross-listed with Film and Media Studies, Political Science, History, and Jewish Studies.  
Area: Humanities.  
Writing Intensive.
AS.211.330. Curating Media Artists in Residence at JHU. 3 Credits.
Curating Media Artists in Residence at JHU: students will be closely involved with JHU’s Program in Museum & Society, JHU’s Center for Advanced Media Studies (CAMS), and the Baltimore Museum of Art (curator Kristen Hileman) in efforts to research and propose new media artists in residence as well as prepare the residency for 2015. This process will include examining cutting-edge media artists whose work will be discussed both in the classroom as well as on sponsored class trips to media art exhibits in DC and NYC. Students will also assist with the CAMS media art residency of acclaimed French artist Camille Henrot in March 2014.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.344. Holocaust and Film. 3 Credits.
Taught in English. This class will examine the history of Holocaust films in regard to the possibilities of genre (documentary versus feature), the use of historical and archival materials, as well as general questions of representation and trauma. I CINEMA OF THE VICTIMS II CINEMA OF THE PERPETRATORS III CINEMA OF THE SECOND AND THIRD GENERATIONS WITNESSES Students will be writing weekly response papers to all screenings, and will choose to work with films in the original languages German, English, Italian, and French. This class will be writing-intensive. Cross-listed with Film and Media Studies, Political Science, History, and Jewish Studies.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.375. Community Based Learning - Documentary Production Practicum: “The Cure:” the History and Culture of Breast Cancer. 3 Credits.
This class will accompany Bernadette Wegenstein during some months of producing her feature documentary “The Cure” on the history and culture of breast cancer. It will be a hands on experience with director/producer Bernadette Wegenstein, editor/producer Patrick Wright and cinematographer Allen Moore filming at the GBMC’s Breast Care clinic, the Halsted Medical Archives, and some other Baltimore locations. This class will meet once a week, but some weeks the class will consist in the hands-on experience on the field rather than the actual class meeting.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.416. Visual Languages in Medical Knowledge. 3 Credits.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 214.616 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.

AS.211.446. Contemporary Italy: A Visual and Literary History. 3 Credits.
Taught in English. This introductory course will explore the main features of Italian society, culture, politics from 1945 to the present. Our discussions will be based upon a critical analysis of both visual and literary sources (in translation): excerpts of movies, videos, pictures, novels, short stories, etc. By the end of this journey through the past you will have better understanding of today’s Italy. Topics include: the Cold War and the division between Catholics and Communists, the economic miracle, the ’68 student revolt, political terrorism in the 70s, the second Republic and Berlusconi. Attention will be paid to issues such as the condition of women and the youth, organized crime, political corruption, migration, the Southern question.
Instructor(s): M. Rossi; W. Stephens.

AS.212.309. Forever Godard. 3 Credits.
This course will explore the dynamic relationship between music, literature, philosophy and politics in the most provocative of Jean-Luc Godard’s films.
Instructor(s): J. Reymond
Area: Humanities.

AS.212.601. Word and Image: An Introduction to the Languages of Literature and Cinema.
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language’s exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin’s take of New Realism, Christian Metz’s structuralist approach to cinema and psychoanalysis, Gilles Deleuze’s theory of the moving image and the time-image, a feminist approach to cinema by E. Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English (This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.)
Instructor(s): B. Wegenstein; P. Forni.
AS.213.317. Berlin at the Crossroads of the 20th Century. 3 Credits.
This course will examine the location of Berlin at the heart of European
and global culture over the course of the 20th century. In addition to its
centrality to German national identity and political culture, Berlin between
the World Wars was a weigh station and meeting ground for a variety of
languages, cultures, and artistic trends—whether expatriates, refugees,
nomads, touring companies, or vagabonds. In what ways did these
tavelers to Berlin change German popular or intellectual culture? In
what ways did Berlin function as a center for avant-garde culture, and in
what sense did it remain a peripheral space, in the shadow of grander
culture centers such as Moscow, Paris, New York, or Hollywood? What
lessons might be taken from the supposed glamour of Berlin between the
World Wars and the continued attraction of that period for post-Holocaust
adaptation and contemplation? These questions, among others, will be
considered with reference to a variety of narratives, dramas, and films
taken from German, English, Hebrew, Russian, and Yiddish sources.
Authors to be considered will include Walter Benjamin, Joseph Roth,
Irmgard Keun, Erich Kästner, Bertolt Brecht, Christopher Isherwood, Sh.
Y. Agnon, Vladimir Nabokov, Viktor Shklovsky, and Dovid Bergelson. All
readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.330. "What is an Image?" - Technology, Art and Visual
Culture around 1900. 3 Credits.
Taught in English. This course is an interdisciplinary introduction to the
theory of the image with an emphasis on its material and conceptual
transformations in the modern period.
Instructor(s): J. Schade
Area: Humanities.

AS.213.344. Holocaust and Film. 3 Credits.
Taught in English. This class will examine the history of Holocaust films
in regard to the possibilities of genre (documentary versus feature), the
use of historical and archival materials, as well as general questions
of representation and trauma. I CINEMA OF THE VICTIMS II CINEMA
OF THE PERPETRATORS III CINEMA OF THE SECOND AND THIRD
GENERATIONS WITNESSES Students will be writing weekly response
papers to all screenings, and will choose to work with films in the original
languages German, English, Italian, and French. This class will be writing-intensive. Cross-listed with Film and Media Studies, Political Science,
History, and Jewish Studies.
Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.

AS.213.349. Weimar Cinema: The Golden Age of German Film. 3
Credits.
Taught in German. German cinema of the 1920s is regarded as one of the
"golden ages" of world cinema. The course centers on close readings of
works which belong to the canon of German film, including The Cabinet
of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh,
and M. Focusing on the question of cinema and modernity, we will discuss
topics like modern aesthetics and visual perception; Expressionism in film;
technology and the metropolis; the emergence of film genres (e.g. horror
film, film noir, science-fiction film, and melodrama). The film analyses will
be accompanied by a discussion of the varied scholarly approaches to
Weimar Cinema.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): E. Strowick.

AS.213.367. Contemporary German Film. 3 Credits.
After almost a quarter century of neglect, German cinema is on the map
again. The many awards German films have been granted over the
last 10 years speak to the renaissance of German Cinema since 2000.
Among these movies are Florian Henckel von Donnersmarck's "The Lives
of Others" (Academy Award for Best Foreign Language Film, 2006),
Caroline Link's "Nowhere in Africa" (Academy Award for Best Foreign
Language Film, 2002), Fatih Akin's "Head-On" (Golden Bear at the Berlin
International Film Festival, 2004; European Film Award 2004), Oliver
Hirschbiegel's "Downfall" (nominated for Academy Award for Best Foreign
Language Film, 2004) or Wolfgang Becker's "Goodbye, Lenin!" (European
Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are
prominent topics of this internationally acclaimed Contemporary German
Cinema. Parallel to these mainstream productions, an aesthetically far
more adventurous cinema has developed known as “Berlin School” or
"Nouvelle Vague Allemande". Dissecting the everyday reality of post-wall
Germany, this ‘counter-cinema’ draws on the New German Cinema of
the 1970s (among other influences) to develop radical notions of realism
and challenge narrative conventions. This course will offer a survey on
German Film since 2000 – discussing the historical and cultural context of
selected movies as well as analyzing aesthetic strategies and concepts of
realism in Contemporary German Cinema. Taught in German.
Prerequisites: AS.210.362
Instructor(s): E. Strowick
Area: Humanities.

AS.213.601. Word and Image: An Introduction to the Languages of
Literature and Cinema.
Taught in English, this course is a primer in the linguistics and the rhetoric
of literary and cinematic texts. Students will familiarize themselves with
the notion of the literary language’s exceptional by studying Aristotle,
Plato, Viktor Sklovskij and Roman Jakobson among others. They will
then compare the power of the literary with the language of cinema by
studying Andre Bazin’s take of New Realism, Christian Metz’s structuralist
approach to cinema and psychoanalysis, Gilles Deleuze’s theory of the
moving-image and the time-image, a feminist approach to cinema by
E. Ann Kaplan and others, as well as theories of digital cinema from Peter
Weibel to Lev Manovich, among others. We will place the language of
literature and film within a context that includes religion music, magic,
prophecy and medicine. Cross-listed with Film and Media Studies and
English (This course is offered as AS.212.601, 213.601, 214.601, and
215.601. Please check other course numbers for open seats.)
Instructor(s): B. Wegenstein; P. Forni.
AS.214.340. Holocaust & Film. 3 Credits.
Taught in English. This course examines the question of the Holocaust and its representation in the filmic media. We will analyze such themes as post-traumatic documentary (e.g., Night and Fog, Alain Resnais 1955), the resistance to representation (Shoah, Claude Lanzmann 1985), Holocaust drama and the ethics of entertainment (e.g., Schindler’s List, Steven Spielberg 1993), the question of filmic adaptation (e.g., The Grey Zone, Tim Blake Nelson 2002—based on Primo Levi’s The Drowned and the Saved 1986), and the new genre of confessional first person video-diary (e.g., Two or Three Things I know About him, Malte Ludin 2005). On this last theme we will also host the two-day symposium “The Holocaust: Children of the Perpetrators Confront Their Parents’ Nazi Past through Documentary Film,” in March 09. The symposium will feature three international documentary filmmakers and their recent films The End of the Neubacher Project, Marcus Carney 2007, Fatherland, Manfred Becker 2006, and Two or Three Things I know About him, Malte Ludin 2005, in which the filmmakers —children of Nazi perpetrators—are asking the question “who am I in relation to my father’s deeds?” The symposium will further include a number of experts on the topic of Holocaust, commemoration, and documentary film. Students will be involved in the preparation and, if interested, in the panel-discussions of the symposium. All films will be screened with English subtitles; this class is reading-intensive and writing-intensive; weekly response papers will be written about the films and the course topic at large. Cross-listed with Film and Media Studies, Political Science, History, and Jewish Studies Writing Intensive.

AS.214.342. Documentary Film and Ethics. 3 Credits.
This class will look at questions of how documentary filmmakers have attempted to and indeed changed the law by making such documentaries as "Capturing the Friedmans," "Super Size Me," and "The Corporation." It will look at the area of human rights films, and the ethical filmic intention of mobilizing communities, or helping people in need with films such as “The Thin Blue Line,” “Darwin’s Nightmare” and “Sand and Sorrow.” We will analyze which documentary genre can address issues of information, mobilization, truth and propaganda with which means of expression (e.g., direct cinema). Overall, the ethics of all these attempts of filmmaking will be examined cross-culturally and historically.
Area: Humanities.

AS.214.375. Documentary Production Practicum: “The Cure:” the History and Culture of Breast Cancer. 3 Credits.
This class will accompany Bernadette Wegenstein during some months of producing her feature documentary “The Cure” on the history and culture of breast cancer. It will be a hands on experience with director/producer Bernadette Wegenstein, editorproducer Patrick Wright and cinematographer Allen Moore filming at the GBMC’s Breast Care clinic, the Halsted Medical Archives, and some other Baltimore locations. This class will meet once a week, but some weeks the class will consist in the hands-on experience on the field rather than the actual class meeting.
Area: Humanities.

AS.214.601. Word and Image: An Introduction to the Languages of Literature and Cinema.
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language’s exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin’s take of New Realism, Christian Metz’s structuralist approach to cinema and psychoanalysis, Gilles Deleuze’s theory of the moving-image and the time-image, a feminist approach to cinema by E. Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English (This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.)
Instructor(s): B. Wegenstein; P. Forni.

AS.214.616. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 211.416 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.

AS.215.451. El Cine de Pedro Almodovar. 3 Credits.
El arte cinematográfico del gran cineasta español será estudiado a través de su obra, vista en partes selectas, obras enteras y dentro del marco escénico provisto por otras películas del cine español. Recommended Course Background: AS.210.326 or demonstrated proficiency in the language.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism. 3 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotrafic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study.
Instructor(s): E. Gonzalez
Area: Humanities.

Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language’s exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. Instructor(s): N. Stahl

AS.216.412. The Divine in Literature and Cinema. 3 Credits.

This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.

Instructor(s): N. Stahl

AS.216.612. The Divine in Literature and Cinema.

This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.

Instructor(s): N. Stahl

Writing Seminars

AS.220.204. Introduction to Dramatic Writing: Film. 3 Credits.

An examination of the screenplay as a literary text and blueprint for production. Professional screenplays will be critically analyzed, with focus on character, dialogue, plot development, conflict, pacing, dramatic foreshadowing, the element of surprise, text and subtext, and visual storytelling. Students write one complete script. Formerly AS.220.342.

Instructor(s): R. Buso-garcia

Area: Humanities

Writing Intensive.

AS.220.337. Intermediate Dramatic Writing: Film. 3 Credits.

An intensive workshop focusing on methodology: enhancing original characterization, plot development, conflict, story, pacing, dramatic foreshadowing, the element of surprise, text and subtext, act structure, and visual storytelling. Each student is expected to present sections of his/her “screenplay-in-progress” to the class for discussion. The screenplay Chinatown will be used as a basic text.

Instructor(s): R. Buso-garcia

Area: Humanities

Writing Intensive.

AS.220.406. Readings in Fiction: Hard-Boiled Fiction and Film Noir. 3 Credits.

Students read six novels by Hammett, Chandler, Cain, Burnett, and Woolrich and view seven films made from these novels by Huston, Hawks, Wilder, Dmytryk, Richards, Walsh, and Farrow. Cross-listed with Film and Media Studies.

Area: Humanities

Writing Intensive.

Theatre Arts Studies

AS.225.375. Critical Moments in American Radical Theatre. 3 Credits.

Area: Humanities.

Earth Planetary Sciences

AS.270.115. Environmental Photojournalism and Filmmaking in the Era of New Media. 3 Credits.

Students will review critical literature focusing on new media, visual representation theory, the relationship between images and social change, the history and typology of environmental photography and film, and an overview of modern environmental history, sustainability issues and environmental problems. Over the course of the semester, students will blend these conceptual frameworks with new media production. Based in Baltimore, students will identify an environmental narrative, document their particular story through photography or film, develop a new media platform through which to communicate that narrative effectively, and write a final paper analyzing their images, narrative and communication strategies using the theoretical frameworks covered throughout the course. The course is designed with an emphasis on independent research and practice, interdisciplinary analysis and application. One hour class time, plus two hours per week of independent field work and media production (times TBD by student groups)

Instructor(s): B. Wegenstein; P. Forni

Humanities Center

AS.300.302. New American Cinema. 3 Credits.

This course offers a historical, critical, and theoretical approach to American avant-garde and independent film from the 1940s till the present. Filmmakers include Stan Brakhage, Michael Snow, Andy Warhol, Jim Jarmusch, Quentin Tarantino, and David Lynch.

Instructor(s): J. Gerrits

Area: Humanities.

AS.300.312. Imagining Revolution and Utopia. 3 Credits.

Examines theories of revolution and utopia and responses in literature, art and film. Primary case study is Russia and the Soviet Union, with comparative look at influential European works and contemporary politics. Topics include gender and the family, terror, communism and communalism, and the avant-garde in art and film. Cross listed with Studies of Women and Gender, and Sexuality, and Film & Media Studies

Instructor(s): A. Eakin Moss

Area: Humanities

Writing Intensive.

AS.300.313. Contemporary Israeli Cinema. 3 Credits.

This course examines Israeli cinema of the last two decades. Among the films to be discussed are: Oscar nominees Adjami and Waltz with Bashir, Late Marriage, A Matter of Size, Year Zero, Lemon Tree, Sweet Mud, and Lebanon. We will study the different influences and the innovative use of style and genres in these films, as well as the new themes and agendas that they offer.

Instructor(s): N. Stahl

Area: Humanities.
AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies. 3 Credits.
Comedy and musical comedic film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare American and Soviet films of this era, examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender (including Benjamin, Kracauer, Cavell).
Instructor(s): S. Rhee
Area: Humanities
Writing Intensive.

AS.300.341. East Asian Cinema. 3 Credits.
A study of select films across East Asia in their aesthetic and institutional contexts. Highlighted directors will include Yasujirō Ozu and Akira Kurosawa, Chen Kaige, Wong Kar-wai, Im Kwon-Taek, and Gen Sekiguchi, Bong Joon-ho. Cross-listed with East Asian Studies and Film and Media Studies
Instructor(s): S. Rhee
Area: Humanities
Writing Intensive.

AS.300.349. The Cinema of Andrei Tarkovsky. 3 Credits.
Course examines the films and theoretical writing of Andrei Tarkovsky, director of Andrei Rublev, Solaris, and Stalker.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.356. From Literature to Film - the case of Israeli Cinema. 3 Credits.
This course explores the differences and similarities between two artistic mediums: literature and cinema. Our case study will be the interesting transformation of Hebrew fiction into Israeli films-- a dominant phenomenon in Israeli cinema since its very beginning. Our main framework will be narrative theories, but we will also consider the specific historical, ideological and geo-political aspects involved in this transformation. By comparing the two artistic modes and studying the transformation of 5 literary works into films, students will become familiar with the history of modern Hebrew literature, contemporary Israeli cinema, and the relationship between these two artistic mediums. Cross-listed with Jewish Studies, Film and Media Studies, and Writing Seminars
Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.300.358. Modern Korean Culture and Film. 3 Credits.
This course examines modern Korean culture through film and literature in translation. Emphasis will be on the politics of representation, especially in light of the many collective and personal traumas (caused by poverty and factionalism, colonial rule, war, and an accelerated pace of modernization) that mark twentieth century Korean history.
Instructor(s): S. Rhee
Area: Humanities.

AS.300.366. Russian Avant-Garde Cinema. 3 Credits.
Russian cinema was born out of the intense artistic experimentation of the fin-de-siècle avant-garde and developed in a climate of dramatic political and cultural change in the twenties and thirties. While subject to draconian censorship in the Soviet period, it nonetheless engaged in active dialogue with the film industries of Western Europe and America and had a lasting impact on world cinema. This course examines the extraordinary flourishing of avant-garde cinema in the Soviet Union in the 1920s and 30s including films by Eisenstein, Vertov, Pudovkin, and Dovzhenko, their theoretical writings, and their far-reaching influence on film and film theory. All readings in English, films subtitled in English.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.367. Seeing Like a Woman. 3 Credits.
This seminar examines the problems of female desire, subjectivity, spectatorship and performance in fiction, poetry, memoir and film from a variety of cultures and theoretical perspectives. Readings include: de Beauvoir, Riley, Butler, Cixous, Tolstoy's "Family Happiness," Woolf's Orlando, Larsen's Passing; Poetry by Moore, Bishop, Plath, Akhmatova, Tsvetaeva and Szymborska. Films by Deren, Ophuls, Hitchcock, Potter, Campion, Akerman, Varda, Denis.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.374. The Other in Israeli Culture. 3 Credits.
This course examines the representations of the Other in Israeli society and culture. Relying on Self-Other theories we will study the role of the Other in contemporary Israeli cinema, prose, poetry, theater and visual art, and will investigate the political, social and cultural context of its representations. Cross-listed with Jewish Studies and Film and Media Studies
Instructor(s): N. Stahl
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.300.389. Post-Soviet Cinema. 3 Credits.
After the fall of the Soviet Union, Russian filmmakers grappled with the legacy of Soviet power and the nature of the new democracy. This course examines the concept of sovereignty in philosophy and art through the lens of popular films and art cinema from this context. Cross-listed with Film and Media Studies
Area: Humanities.

AS.300.391. Home and Exile. 3 Credits.
This course explores the concept of home and the condition of exile primarily through the case of 20th century Russian literature, film, art and essay, with comparative texts from other cultures. Attention will be paid to the aesthetic, philosophical and historical implications of home and exile as well as consideration of notions of diaspora and transnational literature and film. All texts will be read in English translation.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.399. Cinema and Philosophy. 3 Credits.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.
Program in Latin American Studies
AS.362.374. Black Cinema. 3 Credits.
This course focuses on the ways in which contemporary Latin American societies are depicted and represented in international media and films. Special attention will be given to the representation of the region under the lenses of violence and poverty as presented in media reports, documentary and fiction films made by Latin American and non-Latin American directors. Cross-listed with Film and Media Studies and Anthropology.
Area: Humanities, Social and Behavioral Sciences.

Center for Africana Studies
AS.362.374. Black Cinema. 3 Credits.
Close examination of films directed by African American filmmakers as well as a focus on historical and cultural representation of African Americans in American film.
Instructor(s): H. Robbins; L. DeLibero
Area: Humanities.

German and Romance Languages and Literatures
The Department of German and Romance Languages and Literatures offers graduate and undergraduate courses in the languages, literatures, and cultures of France, Germany, Italy, Portugal, Latin America, and Spain. The language program includes a wide range of courses from introductory through conversation and composition to civilization. The literature program treats all periods of literature from both historical and critical-theoretical perspectives. These courses emphasize the close reading of texts and modern theories of literary criticism, particularly those based on contemporary philosophy, psychoanalysis, anthropology, and linguistics. In addition, an active program of visiting professors and lecturers complements the core program offered by the faculty-in-residence.

Facilities
The Milton S. Eisenhower Library has collections that provide an ample basis for advanced research in the German and Romance languages and literatures. With the Peabody Library of The Johns Hopkins University in Baltimore and the Library of Congress and other libraries in nearby Washington, a variety of excellent research resources are available to students and faculty.

A major in the department prepares students for teaching language at the elementary level or for graduate work leading to advanced degrees in French, German, Italian, Latin American, Portuguese, or Spanish studies, or in comparative literature. It also provides excellent background for work in fields such as philosophy, history, international affairs, business, law, or medicine. Opportunities are available to study abroad. Students are encouraged to take advantage of these opportunities.

Requirements for the B.A.
Currently, the B.A. is offered in French, German, Italian, Romance Languages, or Spanish. A candidate for the B.A. in the Department of German and Romance Languages and Literatures should have a good command of the spoken language of his or her specialization, and a general familiarity with the literature written in that language. The major requires a minimum of 24 hours (or eight courses) beyond the first two years of language instruction. The department also recommends that majors take courses in other literatures, history, philosophy, and anthropology. A grade of D is not acceptable in any course counted for the major.

The student who has had four years of German or a Romance language in high school or two years of German or a Romance language in college normally begins the major with Conversation and Composition (provided they have results commensurate with that level on the placement test) and (where offered) the undergraduate survey of literature. It is recommended that any student majoring in German or a Romance language spend at least one semester of junior year taking university courses in the country of study. Credit transfer is arranged by the student in consultation with the chair or Director of Undergraduate Study and/or the relevant undergraduate language coordinator, and the Office of Academic Advising. In the senior year, a major may be permitted to take courses in the department at the graduate level.

A minor in German or one of the Romance languages is available to undergraduate students in any major. Like the major, the minor allows students to develop competence in German or a Romance language while receiving grounding in the culture and literature of that language. Five or six courses in the department beyond the first two years of language study are required for the minor (see below for details).

French
The Major
Requirements consist of successful completion (a grade of C or higher) of language courses through:

- AS.210.103 Learner Managed French Elements I
- & AS.210.302 and Advanced Writing and Speaking in French II (or equivalent placement)
- AS.212.333 Introduction à la littérature française
- & AS.212.334 and Introduction à la littérature française II
- A combination of at least five courses from the AS.211.300-
- AS.211.400 and AS.212.300-AS.212.400 series in French cultural studies and literature (taught in French). *

Total Credits 28

* Of which at least three must be from the AS.212.xxx offerings:
- AS.210.417 Eloquent French and AS.212.429 Thesis Prep, which are to be taken in the fall semester of the senior year and AS.212.430 Senior Seminar to be taken in the spring of the senior year.

For the definitive description of the French Major requirements, please visit http://grll.jhu.edu/french/undergrad and click on the link to the chart of requirements referenced under French Major.

Please note that the final authority concerning the structure of the French major rests with the French section of GRLL. Besides fulfilling the generic requirements on the French major checklist from Academic Advising, students must choose their literature courses in consultation with their major advisor to ensure coherent and adequate coverage of the corpus of French cultural and literary works. The decision as to which courses may count for a particular student's major is the responsibility of the student's French major advisor or, in his or her absence, that of the DUS of French. Honors in French will be granted to students whose course work for the French major is completed at a GPA of 3.7 or higher.

Note about courses taken in study abroad programs:
Please note that as of the class of 2013, a maximum of two courses in the upper-level culture or literature fields can count toward the minimum requirements for the major. Other courses can count only as additional transfer credits or as the equivalent of either Introduction à la littérature I or II. In other words, beyond Introduction à la littérature I & II, a minimum of three more upper-level literature or culture courses must be taken in the department, at least two of which must be upper-level literature courses. Any course that a student wishes to substitute for a JHU course must be pre-approved by the student’s French advisor or the DUS of French before departure for the study abroad program and re-approved by their French advisor or the French DUS upon return to JHU and upon submission of ALL materials from the course. As courses for which students have obtained pre-approval the semester before leaving for study abroad are often not offered once the student enrolls in France, students must keep in contact with their French advisor or the DUS of French during the initial weeks of their stay to ensure pre-approval for their final program. For further information about study abroad credits, please see the study abroad page on the GRLL website (http://grll.jhu.edu/french/study-abroad).

**Minor in French Literature**

Requirements consist of seven courses beyond -AS.210.202 Intermediate French II.

**Total Credits** 29

* Student should consult with either the DUS or a student’s chosen French minor advisor.

A grade of “C” or better must be earned in required courses, which may not be taken S/U. Minor requirements can be used to meet the University distribution requirements. Please see the GRLL department website study abroad page for restrictions concerning counting study abroad courses for minor credit.

**Minor in French Cultural Studies**

Requirements consist of successful completion of seven courses beyond the Intermediate level (AS.210.201 Intermediate French I-AS.210.202 Intermediate French II), including:

<table>

**Total Credits** 29

* Eloquent French and Real French cannot both count toward the minor.

**German**

**The Major**

Students are encouraged to declare their intent to major or minor in German in their sophomore year and to make an advising appointment with the Director of Undergraduate Studies to discuss their academic plans, including options for a study abroad semester or year.

Students must complete a minimum of 27 credit hours in German beyond Elementary German (-) and Intermediate German (AS.210.261 Intermediate German I-).

Majors are required to complete the Advanced German sequence (AS.210.361 Advanced German I: Cultural Topics of the Modern German-speaking World-), which counts for 6 credits and 21 credit hours of language (210) and literature, culture and thought (213) courses. At least twelve (12) of these remaining 21 credits must be for courses in German literature, culture and thought designated as 213.xxx in the catalogue. No more than six credits for courses in translation.

The department strongly advises its majors to gain a knowledge of a second foreign language.

**Minor**

Students are encouraged to declare their intent to major or minor in German in their sophomore year and to make an advising appointment with the Director of Undergraduate Studies to discuss their academic plans, including options for a study abroad semester or year.

Students must complete a minimum of 18 credit hours in German beyond Elementary German (210.161-162) and Intermediate German (210.261-262).

Minors are required to complete the Advanced German sequence (210.361-362), which counts for 6 credits and 12 credit hours of language (210) and literature, culture and thought (213) courses. At least three (3) of these remaining 12 credits must be for courses in German literature, culture and thought designated as 213.xxx in the catalogue. No more than three (3) credits for courses in translation.

**B.A./M.A. Degree**

The department offers highly qualified students the option to complete a combined degree in five years. To receive the B.A./M.A. degree, the student must complete advanced courses in German literature and pass the departmental written and oral master’s examinations. Students interested in this option should make an appointment with the director of undergraduate studies no later than the spring of their junior year to discuss the options available to them.

**Honors Program**

The Department of German offers an Honors Program for highly qualified undergraduates. Students must have a minimum GPA of 3.5 to qualify for the program. Students will work on a project in German literature...
and thought under the guidance of a faculty advisor. The program is completed by a senior essay more comprehensive in scope than a seminar paper. Students interested in the honors program should meet with the director of undergraduate studies no later than the spring semester of their junior year to discuss the requirements and outline the research project to be conducted the following year.

**Italian**

**The Major**

A minimum of eight semester courses (210.300-400 or 214.200-400) beyond the first two years (four semesters) of language instruction (210.252) are required for graduation with a major in Italian. Two courses in Italian films or film-making, Italian history, or art history are acceptable toward the minimum eight semester courses required for the major. Two independent studies are acceptable toward the requirements and they must be taken after a literature course in Italian. At least six of the eight courses must be taught in Italian.

**The Minor**

The minor requirements consist of successful completion of language courses through 210.251-252 Intermediate Italian or equivalent placement. Six courses beyond the first two years of language instruction must include 210.351-352 (Advanced Italian Conversation and Composition I and II). At least three of these six courses must be in Italian. No more than one independent study is permitted to count for the minor. The independent study must be taken after a literature course in Italian and have the approval of the sponsor and written consent from the Director of Undergraduate Studies.

**Portuguese**

The study of Portuguese gives you access to the diverse cultural and literary worlds of Brazil, Portugal and the Portuguese-speaking African and Asian countries. In fact, Portuguese is the third most spoken European language, and the most widely spoken language in South America. Today, there are more than 200 million native Portuguese speakers throughout the world from Angola to Brazil and from Portugal to the distant island nation of East Timor in the Pacific. The Portuguese program in the Department of German and Romance Languages and Literatures offers not only the three levels of language training, but also a growing number of courses on literature as well as the culture and civilization of Brazil.

**Romance Languages Major**

Students may complete a Romance language major in one of two configurations: by specializing in two of the Romance languages offered by the department, or by majoring in two Romance languages and minoring in a third.

The options are configured as follows:

**Dual Language Options**

Satisfy two languages as described below:

</tbody>
</table>

A combination of five courses from the AS.215.200-400 series, distributed between the cultures and literatures of Latin America and Spain.

Total Credits 20

One of the five courses may be from another department such as Anthropology, History, Political Science, and so forth as long as it is on Latin America or Spain; AS.210.411 Translation for the Professions or AS.210.413 Curso de Perfeccionamiento may also count as one of these required courses. Students placing out of Advanced Spanish will take instead a 215.xxx literature or culture course. Native speakers should consult with the Spanish major advisor. It is strongly recommended that majors spend one semester abroad and/or attend summer or intersession programs. Currently, the department offers a fall program in Madrid, Spain, as well as the Argentina and Peru summer programs organized by the Program in Latin American Studies. Students are expected to consult with the Director of Undergraduate Studies, their department advisor, and the Office of Study Abroad prior to studying abroad.

**The Minors**

The minors in Spanish language and cultures will consist of six courses beyond the AS.210.212 Intermediate Spanish II level as explained below in the description of the two possible tracks a student may follow. It is also recommended that Spanish minors study abroad for a semester, a summer, or an intersession. With the approval of the Director of the Spanish Language Program, only two Spanish language courses taken abroad (in programs other than Johns Hopkins programs) or at another accredited institution may be applied toward the minor, and only one additional Spanish language course will be approved for credit (but this course will not count toward the minor). Students may choose one of these two specialized minors: Spanish for the Professions or Spanish Language and Hispanic Cultures.

**Spanish for the Professions**

Students must complete six courses beyond AS.210.212 Intermediate Spanish II that must include the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.210.311 Advanced Spanish I</td>
<td>3</td>
</tr>
<tr>
<td>AS.210.312 Advanced Spanish II</td>
<td></td>
</tr>
<tr>
<td>or AS.210.317 Adv Spanish Composition</td>
<td></td>
</tr>
</tbody>
</table>

One of the following three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.210.313 Medical Spanish</td>
<td></td>
</tr>
<tr>
<td>AS.210.314 Spanish for International Commerce</td>
<td></td>
</tr>
<tr>
<td>AS.210.315 Spanish for International Relations</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course</th>

</tr>
</thead>
<tbody>
<tr>
<td>AS.210.411 Translation for the Professions &amp; AS.210.412 and Spanish Language Practicum-Community Based Learning</td>
<td>6</td>
</tr>
</tbody>
</table>

The sixth course may be select from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.210.413 Curso de Perfeccionamiento</td>
<td></td>
</tr>
<tr>
<td>AS.211.380 Modern Latin American Culture</td>
<td></td>
</tr>
<tr>
<td>AS.211.390 Modern Spanish Culture</td>
<td></td>
</tr>
<tr>
<td>or any course from the AS.215.200-400 Spanish Literature series</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 21

* Students placing out of AS.210.311 should take instead a 215.xxx literature class.

This minor is not open to native speakers.

**Spanish Language and Hispanic Cultures**

Students must complete six courses beyond AS.210.212 Intermediate Spanish II that must include the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.210.212 Intermediate Spanish II</td>
<td>3</td>
</tr>
<tr>
<td>AS.210.311 Advanced Spanish I &amp; AS.210.312 and Advanced Spanish II</td>
<td>3-6</td>
</tr>
<tr>
<td>or AS.210.317 Adv Spanish Composition</td>
<td></td>
</tr>
</tbody>
</table>

Three additional courses to be chosen from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.215.231 Introduction to Literature in Spanish</td>
<td>3</td>
</tr>
<tr>
<td>AS.210.413 Curso de Perfeccionamiento</td>
<td></td>
</tr>
<tr>
<td>AS.211.380 Modern Latin American Culture</td>
<td></td>
</tr>
<tr>
<td>AS.211.390 Modern Spanish Culture</td>
<td></td>
</tr>
<tr>
<td>or any course from the AS.215.200-400 Spanish Literature series (at least one of them must be from the 300-400 level)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 18-21

* Students placing out of AS.210.311 Advanced Spanish I should take instead a 215.xxx literature class.

Native speakers should consult with the Spanish minor advisor.

**Study Abroad in Madrid, Spain**

The Department offers the following courses as part of the study abroad program in Madrid, Spain (Universidad Carlos 3):

**215.340 Modern Spanish Literature**

This course covers some representative Spanish literary works of the 20th century, and is divided into four sections: pre-Civil War texts (1900–1939), post-Civil War texts (1939–1975), the literature of the Transition (1975–1982), and contemporary literature (1982–2008). Ramón de Valle-Inclán, Miguel de Unamuno, Federico García Lorca, Antonio Buero Vallejo and Adelaida García Morales are some of the authors whose work will
be studied. Three exams and a short research paper in addition to class attendance and participation are required.

**215.342 Twentieth-century Latin American Literature**

The object of this course is to familiarize students with representative literary works of authors such as Horacio Quiroga, Juan Rulfo, Ernesto Sábato, Jorge Luis Borges, Pablo Neruda and Garbriel García Márques, among others. Discussions of literary historical tendencies, esthetic conceptions and narrative techniques will be based on close reading of assigned works. Two exams and two papers in addition to class attendance and participation are required.

**215.412 Spanish Theater**

This course will cover the development of the history of Spanish theater: authors, esthetic tendencies and historical and cultural contexts. From the early period, the reading of Calderón de la Barca’s *La vida es sueño* introduces the student to Golden Age Spanish Theater, which will be discussed in the context of the corales de comedias, Spanish society and culture. The emphasis of the course, however, is placed on more recent Spanish theatrical works by authors such as Ramón de Valle-Inclán, Alfonso Sastre, Sanchis Sinisterra and Alonso de Santos. A short essay is required on the Golden Age section of the course; a second (voluntary) paper will analyze Valle Inclán’s *Luces de bohemia*. There will be a final exam. Attendance and participation are required.

**215.305 Spanish Art**

Spanish Art covers architecture and art from earliest times. The course is divided into three sections: architecture and urbanism in Spain from antiquity to the 20th century, Spanish painting from Manerism to the 19th century, and contemporary painting and sculpture. Visits to various museums in Madrid—The Prado, Reina Sofía, Sorolla—are included and required. Class assignments, attendance, demonstrated interest and class participation count heavily toward the final grade. There is also a final exam.

**211.290 Modern Spanish Culture**

Spanish culture will be studied in its historical and social contexts between 1931 and 1982. Movies, textbooks, popular music, photography, posters, literary works and censorship and the Movida Madrileña will constitute the material studied before and after Franco’s dictatorship. Visits to museums (Reina Sofía) and monuments (Valle de los caídos) are an integral part of the course. A final paper and exam are required, as is class attendance and participation.

In addition to general university requirements for the Ph.D., the following regulations apply to graduate students in the Department of German and Romance Languages and Literatures.

To be accepted into the Ph.D. program, students must demonstrate by an exceptionally strong academic record that they are capable of advanced study in literature. They will choose French, German, Italian, Latin American, or Spanish literature as the major field of interest. The student will normally take three years of graduate courses and devote the fourth year to study and research in the country on which the student’s study concentrates. The well-prepared student can expect to receive the Ph.D. after five years of study. The graduate program in German and Romance Languages and Literatures emphasizes work in three complementary areas: literary history, close textual analysis (including *explication de texte*), and theory of interpretation. By way of preparing students in a variety of critical schools, the faculty and the visiting professors offer training in the different disciplines pertaining to critical theory, including philosophy, theory of language, psychoanalytic theory, intellectual history, and cultural anthropology.

In addition to the major language, the Ph.D. candidate must demonstrate proficiency in one or two other languages besides English, depending on the specialization. (See below for further information.)

A dissertation proposal, presented to the Department Seminar, is required before official admittance to candidacy for the Ph.D.

**Requirements for the M.A. degree**

*The department does not accept applications for the M.A. degree as a terminal degree.*

**French**

For students who choose to specialize in an early modern period (medieval, Renaissance, or 17th century), proficiency in Latin is required by the end of the third semester. Students may also choose a minor field: another Romance literature, modern criticism, comparative literature, medieval studies, or some other field connected with the student’s major field.

**German**

In addition to fulfilling the general university requirements for advanced degrees, candidates for the M.A. must demonstrate fluency in spoken German, be able to write German reasonably well, have a good knowledge of the history of German language and literature, be familiar with the general cultural background, and have read extensively in German literature, particularly in the periods after 1700. During their first two years at Hopkins, candidates for the M.A. degree must pass a series of three topical examinations. After the M.A., two major qualifying papers are required under the supervision of two advisors, chosen by the candidate, before work on the dissertation can be undertaken.

**Italian**

In addition to the major language, the student must demonstrate proficiency in French and in one other foreign language. The student must take a minimum of five semesters of graduate courses. After this period, normally in the third year, the student will take examinations which, if completed successfully, will lead to candidacy for the Ph.D.

**Spanish**

In addition to the major language, the student must demonstrate proficiency in French and in one other foreign language. The student must take a minimum of five semesters of graduate courses. After this period, normally in the third year, the student will take four field examinations which, if completed successfully, will lead to candidacy for the Ph.D.

**Graduate Study Abroad**

The Department encourages and expects graduates student to do research abroad during their program of study. In the French section, an exchange program with the École Normale Superieure offers the opportunity for graduate students to study in Paris, where they are encouraged to participate to research programs at ENS, EHESS, and other Universities; an exchange program with University Paris-Diderot-Paris 7 offers the opportunity for graduate or post-graduate students in French to study and teach in Paris; and the University of Geneva offers a fellowship each year for a grad student in the French section. Ph.D.
students in the French section are also encouraged to apply for the Chateaubriand scholarship offered by the Embassy of France. Exchange programs with the FU Berlin (Friedrich Schlegel Graduate School of Literary Studies), the University of Hamburg, and the Humboldt University, offer the opportunity for graduate students in the German section to study in Germany. In addition, the German section offers Max Kade travel grants for research in a German-speaking country. Italian graduate students can take advantage of a wealth of formal and informal contacts with Italian scholars, archives, and institutes. Spanish students may elect to make their fourth year a non-teaching year. After presenting a research proposal to their advisor, with the approval of that advisor and the head of section, they may elect to go abroad for a semester or the entire academic year in order to conduct research essential to their dissertation.

Financial Aid

The department has a number of fellowships for graduate students. Awards include university fellowships, which carry stipends and teaching fellowships currently set at $22,000 per academic year for teaching one section of an undergraduate language course each semester, in addition to remission of tuition fees. All graduate students are expected to do four years of apprentice teaching of elementary and intermediate level undergraduate courses as part of their professional preparation. The amount of classroom teaching required is usually three to four hours a week. Students are admitted for five years, fully funded, subject to annual review to assure satisfactory progress. In addition, stipends (equivalent to that year’s teaching fellowship) are available for study abroad during the third or fourth year.

Fourth-year graduate students may also compete for Dean’s Teaching Fellowships, which provide opportunities for the design and teaching of undergraduate courses in literature, cultural studies, or intellectual history.

Graduate students conducting research in Italian studies compete each year for two Charles S. Singleton Travel Grants for study in Italy. This program is administered by the department and is open to graduate students from other departments.

Application Procedures

Prospective graduate students may visit the departmental website at http://grll.jhu.edu for further information on programs and faculty. All questions regarding the programs offered by the department should be emailed to grll@jhu.edu. Prospective students are encouraged to apply online through the secure Graduate Admissions website (https://app.applyyourself.com/?id=jhu-grad).

For current faculty and contact information go to http://grll.jhu.edu/directory/

Faculty

Chair
Elisabeth Strowick
Professor: German

Professors
Wilda Anderson
French Enlightenment literature, science and literature.

Sara Castro-Klarén
Latin-American literature, colonial studies, contemporary novel.

Christopher Celenza
Italian literature, Director, Charles Singleton Center for the Study of Pre-Modern Europe.

William Egginton
Andrew W. Mellon Professor in the Humanities: Spanish and Latin American literatures.

Pier Massimo Forni
Italian literature and culture.

Eduardo González
Latin American literature, film and media studies.

Jacques Neefs
James M. Beall Professor: Genetic criticism, 19th- and 20th-century literature, theory of the novel.

Elena Russo
Interrelations of Enlightenment philosophy and literature.

Derek Schilling
French, 20th- and 21st-century literature and film.

Harry Sieber
Renaissance and Baroque literature of Spain.

Walter Stephens
Charles S. Singleton Professor of Italian: Medieval and Renaissance literature and its relation to philosophy and theology; Medieval and Renaissance literature and its relation to philosophy and theology.

Rochelle Tobias
German.

Associate Professor
Katrin Pahl
German.

Assistant Professors
Nadia Altschul
Assistant Professor: Spanish medieval literature.

Andrew Marc Caplan
Tandetnik Professor of Yiddish Literature, Language, and Culture.

Andrea Krauss
German.

Neta Stahl
Seminitic Languages and Literatures

Faculty Emeriti
Richard L. Kagan
Lieselotte E. Kurth
Professor Emerita.

Stephen G. Nichols
James M. Beall Professor Emeritus of French and Research Professor: medieval language, literature, and culture, interrelation of literature with history, philosophy, and art history.

Paul Olson
Professor Emeritus.
Research Professor
Bernadette Wegenstein
Media theorist; Director: Center for Advanced Media Studies.

Visiting Assistant Professor
James Coleman
Italian literature.

Language Program Directors
Mary M. Bensabat-Ott
Portuguese Language Program Director, Associate Teaching Professor: Portuguese
Kristin Cook-Gailloud
French Language Program Director, Senior Lecturer: French.
Deborah McGee Mifflin
German Language Program Director, Associate Teaching Professor: German
Loreto Sánchez-Serrano
Spanish Language Program Director, CALL Specialist, Associate Teaching Professor: Spanish
Alessandro Zannirato
Italian Language Program Director, Associate Teaching Professor: Italian

Senior lecturer
Bruce Anderson
Senior Lecturer: French language and culture.
Claude Guillemard
French.
Suzanne Roos
Intermediate French Course Coordinator, Senior Lecturer, MLN Managing Editor: French cinema and theory.
Michelle Tracy
Spanish Elements Course Coordinator
Barry Weingarten
Intermediate Spanish Course Coordinator.
Heidi Wheeler
Intermediate & Professional German Course Coordinator.
April Wuensch
French.

Lecturers
Beatrice Caplan
Yiddish Language and culture.
Paula Gefaell Borrás
Spanish Language.
Aranzazu Moreno Hubbard
Advanced Spanish Course Coordinator.
Veronika Jicinska
German language.
Naiara Martínez Vélez
Spanish language.
Maria del Rosario Ramos
Superior Spanish Course Coordinator.
Sergio Ruiz-Perez
Spanish Language.
Michelle Tracy
Spanish Elements Course Coordinator, Lecturer.
Sara Urruticoechea Romero
Spanish Language.
Sue Waterman
Research methods.

Joint Appointments
Hent de Vries
Professor of Humanities.
Eckart Förster
Professor of Philosophy.
Earle Havens
Adjunct Assistant Professor of History.
Peter Jelavich
Professor of History.
Margaret Keck
Professor of Political Science.
Gianna Pomata
Professor (School of Medicine)
Todd Shepard
Associate Professor of History.
Susan Weiss
Professor of Musicology.

Recent and Current Visiting Faculty
Alejandra Guzmán Almagro
Researcher, University of Barcelona
Leslie Arthur
Associate Professor, Baltimore Hebrew University
Leonard Barkan
Professor (Princeton University).
Maurizio Campanelli
Lecturer, Department of Greek, Latin, and Italian Studies, University of Rome La Sapienza.
Anna Celenza
Professor, Georgetown University
Roger Chartier
Juliette Cherbuliez
Professor of French (University of Minnesota).
Francesco Ciabuttoni
AS.210.101. French Elements I. 4 Credits.
Provides a multi-faceted approach to teaching language and culture to the novice French student. The emphasis of the course is an aural-oral proficiency without neglecting the other basic skills of grammar structure, phonetics, reading, and writing. May not be taken Satisfactory/Unsatisfactory. Recommended course background: AS.210.102. Instructor(s): C. Guillemard; Staff.

AS.210.102. French Elements II. 4 Credits.
Provides a multi-faceted approach to teaching language and culture to the novice French student. The emphasis of the course is an aural-oral proficiency without neglecting the other basic skills of grammar structure, phonetics, reading, and writing. May not be taken Satisfactory/Unsatisfactory. Recommended course background: AS.210.101 or AS.210.103. Instructor(s): C. Guillemard; Staff.

AS.210.103. Learner Managed French Elements I. 4 Credits.
This intensive, three-week course allows students to review the material of the first semester of French Elements (210.101) at a fast pace. Designed for students with some French background who will join the regular French Elements II course in the spring: online webcape score between 100 and 300(http://www.advising.jhu.edu/placement_french.php) Not recommended for true beginners unless fluent in another Romance language. Major online component supplements in-class instruction. Must complete the year by taking French Elements II 210.102 in order to receive credit. Please contact the course coordinator if you have any questions: cgulliel@jhu.edu.

AS.210.104. Learner Managed French Elements II. 4 Credits.
Special section for self-motivated students: Online materials are designed for 1 and 1/2 more hours a week required for the course. Year-long course; must complete both semesters successfully in order to receive credit. Recommended for those who have some knowledge of French and need a review of the language. No Satisfactory/Unsatisfactory option.

AS.210.111. Spanish Elements I. 4 Credits.
This is an introductory Spanish language course. On completion of this course, the students will have acquired the basic communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, and by completing several online assignments, in addition to three comprehensive exams which focus on the following thematic topics: Greetings, University Life, Family and Leisure. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements 1 is the foundation for all consecutive Spanish courses. There are no prerequisites for this course. A placement exam is often required to ensure the appropriate level. Instructor(s): M. Tracy; Staff.

AS.210.112. Spanish Elements II. 4 Credits.
This introductory Spanish language course is a continuation of the content covered in Spanish Elements I. On completion of this course, the students will have further developed the communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, and by completing several online assignments, in addition to three comprehensive exams which focus on the following thematic topics: Food, Sports, Shopping, Travel, and Health. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements II prepares the students for Intermediate Spanish. Prerequisites: AS.210.111 or appropriate webcape score. Instructor(s): M. Tracy; Staff.
AS.210.151. Italian Elements I. 4 Credits.
This is a three-credit course, and Italian Elements II (AS210.152) must be completed in the Spring 2014 to receive credit. No Satisfactory/ Unsatisfactory option. The aim of the course is to provide students with basic listening, reading, writing, speaking and interactional skills in the Italian language. All classes are conducted in Italian; oral participation is strongly encouraged from the beginning.
Instructor(s): A. Zannirato; Staff
Area: Humanities.

AS.210.152. Italian Elements II. 4 Credits.
Course helps students develop basic listening, reading, writing, speaking, and interactional skills in Italian. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course adopts a continuous assessment system (no midterm and no final).
Prerequisites: AS.210.151 or Placement Exam Part 1.
Instructor(s): A. Zannirato; Staff.

AS.210.161. German Elements I. 4 Credits.
Four skills introduction to German language and culture. Develops proficiency in speaking, writing, reading, and listening skills through the use of basic texts, multi-media, and communicative language activities. Online tools required. Both semesters must be completed with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. Tuesday section is a mandatory hour; choose your section based on the MWF time. Conflicts with Tuesday hour can be resolved after start of semester. Course coordinator: Deborah Mifflin
Instructor(s): D. Mifflin

AS.210.162. German Elements II. 4 Credits.
Continuation to the introduction to the German language and a development of those skills. Includes all the basic listening, reading, writing, and interactional skills in the German language. All classes are conducted in German. The focus of the course is on oral communication with extensive training in written and listening skills.
Prerequisites: AS.210.161 or appropriate score on placement exam.
Instructor(s): D. Mifflin; Staff.

AS.210.163. Elementary Yiddish I. 3 Credits.
Year-long course. Includes the four language skills—reading, writing, listening, and speaking—and introduces students to Yiddish culture through text, song, and film. Emphasis is placed on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission.
Area: Humanities.

AS.210.164. Elementary Yiddish II. 3 Credits.
Year-long course that includes the four language skills—reading, writing, listening, and speaking—and introduces students to Yiddish culture through text, song, and film. Emphasis is placed on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission.
Area: Humanities.

AS.210.177. Portuguese Elements. 4 Credits.
This one-year course introduces students to the basic skills in reading, writing, and speaking the language. Emphasis is placed on oral communication with extensive training in written and listening skills. Class participation is encouraged from the very beginning. All classes are conducted in Portuguese. Extensive language lab is required. Students must complete both semesters with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. No previous knowledge of Portuguese is required.
Instructor(s): M. Bensabat Ott.

AS.210.178. Portuguese Elements II. 4 Credits.
This course expands students knowledge of the basic language skills: reading, writing, listening, speaking. It uses a multifaceted approach to immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa. The focus of the course is on oral communication with, however, extensive training in grammar. The course is conducted entirely in Portuguese. Lab work required. Students must complete both semesters with passing grades to receive credit.

AS.210.201. Intermediate French I. 3 Credits.
A two-semester course conducted entirely in French, this course develops skills in speaking, listening comprehension, reading, and writing. Systematic review of language structures with focus on oral communication and acquisition of vocabulary; extensive practice in writing, readings and films from French-speaking countries. Course coordinator: Suzanne Roos.
Prerequisites: Students who have taken AS.210.201 or Placement Exam Part 1 are ineligible to register for AS.210.201.
Instructor(s): S. Roos
Area: Humanities.

Focus on oral communication; develops skills in oral and written expression, listening comprehension, and reading, with extensive study of films and readings from French-speaking countries. Course coordinator: Blackboard. Completion of AS.210.201. Recommended course background: AS.210.201 or AS.210.203.
Instructor(s): S. Roos; Staff
Area: Humanities.

AS.210.203. High Intermediate French I. 3 Credits.
A two-semester course offering a systematic review of language structures, conducted exclusively in French. This course is for students who can express themselves more fluently in both their written and oral work and can analyze more difficult texts than in Intermediate French. Students will study authentic texts, including film "text," and focus on their written and oral skills. Extensive reading and writing is required. Credit will not be given if previously enrolled in 210.201-202 or the equivalent. Recommended Course Background: AS.210.102 or appropriate score on Weecape exam.
Prerequisites: Students who have taken AS.210.201 [ Intermediate French I ] are ineligible to register for AS.210.203.
Instructor(s): A. Wuensch
Area: Humanities.
AS.210.204. High Intermediate French II. 3 Credits.
This course is for students who can express themselves more fluently in both their written and oral work and can analyze more difficult texts than in Intermediate French. Students will study authentic texts, including film “text”, and focus on their written and oral skills. Taught exclusively in French. Credit will not be given if previously enrolled in AS.210.201-AS.210.202 or the equivalent. Recommended Course Background: AS.210.201, AS.210.203, or Webcape score between 420 and 480.
Prerequisites: Students who have taken AS.210.202 [Intermediate French II] are ineligible to register for AS.210.204
Instructor(s): A. Wunsch
Area: Humanities.

AS.210.205. French: Introduction To Phonetics. 3 Credits.
This course is designed for intermediate – advanced students seeking to improve their pronunciation in French. The focus of the course is improvement through awareness of the sounds of standard spoken French, through extensive monitored practice, and through phonetic transcription (the International Phonetic Alphabet). The course will address the particular challenges facing adult speakers of English who are learning French for the first time and assumes no previous instruction in Phonetics. Students will explore the different accents of French through film, audiocassette, CD’s and personal recordings. The textbook for the course is Facile à dire: Les Sons du français. Recommended Course Background: AS.210.201 or equivalent.
Prerequisites: AS.210.101 OR AS.210.102 (French Elements I - II)
Area: Humanities.

AS.210.207. German Pronunciation & Diction Practice. 1 Credit.
One-credit course focusing on pronunciation and diction. Students will improve their accent, intonation, sentence melody, and will gain confidence while speaking and reading aloud. Individual feedback and strategies for improvement through regular audio recordings. May be taken Satisfactory/Unsatisfactory. Not for major/minor credit.
Prerequisites: AS.210.161 or above
Instructor(s): D. Mifflin; Staff
Area: Humanities.

AS.210.209. The Sounds of French. 3 Credits.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of "word games" (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. May be taken concurrently with AS.210.205 or AS.210.305.
Instructor(s): B. Anderson
Area: Humanities.

AS.210.211. Intermediate Spanish I. 3 Credits.
Intermediate Spanish I is a comprehensive study of Spanish designed for students who have attained an advanced elementary level in the language. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish I will prepare students for the next level of Spanish (Intermediate Spanish II).
Prerequisites: AS.210.112 or appropriate placement exam score.
Instructor(s): B. Weingarten; Staff
Area: Humanities.

AS.210.212. Intermediate Spanish II. 3 Credits.
Intermediate Spanish II is a comprehensive study of Spanish designed for students who have attained a mid-intermediate level in the language or who have completed Spanish 210 and 211. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish II will prepare students for the next level of Spanish (Advanced Spanish I).
Prerequisites: AS.210.211 or appropriate webcape score.
Instructor(s): B. Weingarten; P. Gefaell-Borras; Staff
Area: Humanities.

AS.210.251. Intermediate Italian I. 3 Credits.
Course continues building on the four essential skills for communication presented in Italian Elements courses. Improvement of reading and composition skills through the use of contemporary texts, reinforcement of the student’s knowledge of the language through weekly oral and written presentations on predetermined subjects. Class participation is essential. All classes are conducted in Italian. Course adopts a continuous assessment system (no mid-term and no final). No Satisfactory/Unsatisfactory option. Course coordinator: Alessandro Zannirato
Prerequisites: AS.210.152 or placement exam
Instructor(s): A. Zannirato; Staff
Area: Humanities.

AS.210.252. Intermediate Italian II. 3 Credits.
Taught in Italian. Course provides further development of students' language skills through intensive listening, speaking, reading, writing and interactive activities on topics of increasing complexity. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.251 or appropriate placement exam scores (Parts I II).
Instructor(s): A. Zannirato; Staff
Area: Humanities.
AS.210.261. Intermediate German I. 3 Credits.
This course continues the same four-skills approach (speaking, writing, reading, and listening) from the first-year sequence, introducing and practicing more advanced topics and structures. Expansion and extension through topical readings and discussion and multi-media materials. Online tools required. Taught in German. Course coordinator: Heidi Wheeler
Prerequisites: AS.210.162 or placement by exam
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.262. Intermediate German II. 3 Credits.
Taught in German. This course is designed to continue the four skills (reading, writing, speaking and listening) approach to learning German. Readings and discussions are topically based and include fairy tales, poems, art and film, as well as readings on contemporary themes such as Germany’s green movement. Students will also review and deepen their understanding of the grammatical concepts of German.
Prerequisites: AS.210.261 or placement exam.
Instructor(s): H. Wheeler; Staff
Area: Humanities.

AS.210.263. Intermediate Yiddish I. 3 Credits.
This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.164 or equivalent, or two years of German and permission of instructor.
Area: Humanities.

AS.210.264. Intermediate Yiddish II. 3 Credits.
Continuation to Intermediate Yiddish I. This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.263 or instructor permission.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.266. German Conversation. 1 Credit.
This course is designed for students who wish to improve their conversational language skills, achieving up to an advanced level in oral production. The syllabus aims to provide useful, relevant language and necessary discourse structures to hold conversations on varied topics. Students will practice German to build confidence, develop fluency, and improve pronunciation and accuracy. Weekly topics will be determined to some extent by the interests and ability level of the group as a whole. May be taken concurrently with other courses in German. Students currently enrolled in AS.210.262 may take concurrently, with permission. May be taken Satisfactory/Unsatisfactory. Not for major or minor credit. Recommended Course Background: AS.210.262 or two years of college German or equivalent.
Instructor(s): D. Mifflin; Staff.

AS.210.277. Intermediate/ Advanced Portuguese. 3 Credits.
More advanced training in the skills of the language with emphasis on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. All classes are conducted in Portuguese. Extensive language lab is required. May not be taken on a Satisfactory/Unsatisfactory basis.
Prerequisites: AS.210.177 AND AS.210.178 or placement test.
Instructor(s): M. Bensabat Ott
Area: Humanities.

AS.210.278. Intermed/Adv Portuguese. 3 Credits.
This course is conducted entirely in Portuguese. Emphasis is placed on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. Lab work required. Prerequisites: Prerequisite: AS.210.177 AND AS.210.178 or placement test.
Instructor(s): M. Bensabat Ott
Area: Humanities.

AS.210.301. Advanced Writing and Speaking in French. 3 Credits.
This very interactive third-year language course proposes, in the shape of animated class discussions, to 1) read fictional and non-fictional texts through the French explication de textes approach 2) review and develop grammar and conjugation skills and 3) learn an array of new vocabulary as well as idiomatic expressions used in everyday speech. Focus will be placed on improving language skills through an individualized review of grammar and vocabulary. Course Coordinator: Bruce Anderson
Instructor(s): B. Anderson; L. Leleve
Area: Humanities Writing Intensive.

AS.210.302. Advanced Writing and Speaking in French II. 3 Credits.
Taught in French. This is a third-year language course intended to bridge the intermediate level and more advanced levels in French literature and cultural studies. Students will be given the opportunity to continue strengthening their linguistic skills. Individualized review of grammar based on the students' written work. Students will be presented with a diversity of texts from current newspaper articles covering key national and international issues to a diversity of literary texts. Recommended course background: AS.210.301.
Instructor(s): B. Anderson; Staff
Area: Humanities Writing Intensive.

AS.210.303. Business French I. 3 Credits.
Prerequisites: AS.210.301 AND AS.210.302 OR Supplementary test
Area: Humanities.

AS.210.306. Medical French. 3 Credits.
Medical French is designed to provide students with specific vocabulary and conversational skills used by medical and health administration professions in the French and francophone world. This course is particularly beneficial for students engaged in a health-related major, and prepares (optional) for the renowned certificate diplôme de français médical (DFM) delivered by the Chambre de Commerce et d’Industrie de Paris. Recommended Course Background: AS.210.301-AS.210.302 or equivalent placement, or permission required (kacg@mac.com).
Instructor(s): C. Guillemard
Area: Humanities.
AS.210.307. Legal French. 3 Credits.
Prerequisites: Prereq: AS.210.302 or supplementary test.

AS.210.308. Acting French. 3 Credits.
Performing in a foreign language can not only drastically improve students’ linguistic skills, but also develop their ability to express themselves in public, acquire a well-posed body position, and even communicate more effectively in every day situations. Through examining excerpts of popular French theater plays (by Camus, Sartre, Feydeau, Ionesco, and others), this class proposes to 1) improve French language skills (pronunciation, intonation, vocabulary, syntax) 2) understand the linguistic nuances and socio-cultural practices expressed in the texts 3) learn the basic tools of acting (body language, vocal projection, physical and emotional expressivity, stage direction, improvisation, etc.). The course will include watching filmed representations of plays, as well as a performance at the end of the semester.
Area: Humanities.

AS.210.309. The Sounds of French. 3 Credits.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of "word games" (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. Recommended Course Background: AS.340.101-AS.340.102 or equivalent; AS.210.301 (may be taken concurrently).
Instructor(s): B. Anderson
Area: Humanities.

AS.210.310. Advanced Spanish I. 3 Credits.
This course is a comprehensive study of the Spanish language focused on the continuing development of students’ communicative abilities and their knowledge of Hispanic cultures. Students will expand their use of basic structures of Spanish with a special emphasis on more difficult grammatical and vocabulary aspects, and further improve both their oral and written skills. Students will sharpen their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired extended complex language tools that facilitate proficiency in Spanish and its use in various professional contexts.
Prerequisites: AS.210.212 or AS.210.213 or appropriate placement exam score.
Instructor(s): A. Hubbard; S. Urruticoechea Romero; Staff
Area: Humanities.

AS.210.311. Advanced Spanish II. 3 Credits.
This course is thorough review of the Spanish language focused on the development of students’ communicative abilities and their knowledge of Hispanic cultures. Students will both expand their knowledge of the basic structures of Spanish, with special emphasis on more difficult grammatical and vocabulary aspects, and further improve on oral and written skills. Students will increase their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired more complex language tools to become proficient in Spanish and its use in various professional contexts.
Prerequisites: AS.210.311 (Advanced Spanish) or appropriate placement exam score.
Instructor(s): N. Martinez-Velez; S. Ruiz-Perez; Staff
Area: Humanities.

AS.210.312. Legal Spanish. 3 Credits.
Medical Spanish is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in medicine and health-related fields in Spanish-speaking environments. The student will be able to participate in conversations on topics such as contrasting health systems, body structures, disorders and conditions, consulting your doctor, physical and mental health, first-aid, hospitalization and surgery on completion of this course. In completing the course’s final project students will apply, synthesize, and reflect on what has been learned in the class by creating a professional dossier individualized to their professional interests.
Prerequisites: 210.311 (Advanced Spanish I) or appropriate webcape score
Instructor(s): N. Martinez-Velez
Area: Humanities.

AS.210.313. Legal Spanish. 3 Credits.
Spanish for international business is an overview of business topics in an international Spanish-speaking context with an emphasis on deep review of grammar and vocabulary acquisition. On completion of this course the student will have developed the ability to read and critically discuss business and government relations in Latin America and will have examine entrepreneurship, finance, marketing, business ethics, human resources and commerce in the Spanish speaking world. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own professional interests. Concepts learned in this course will be directly applicable to careers linked to international relations and will apply to various careers in business.
Prerequisites: AS.210.311 or appropriate S-Cape score
Instructor(s): M. Del Rosario Ramos
Area: Humanities.
AS.210.315. Spanish for International Relations. 3 Credits.
Spanish for international relations is an advanced examination of grammar and an analysis of international relations’ topics in Spanish. By completion of this course the student will have developed the ability to read, critically discuss and demonstrate mastery of political and socio-economic issues in Spanish-speaking environments. Potential topics include a survey of the professions in international relations, NGOs in Latin America, intellectual property, cultural diplomacy, remesas, regional coalitions and treaties, and the environment. Class presentations and final projects will allow students to apply, synthesize, and reflect on what has been learned in the class by participating in a global simulation that will include a written exercise individualized to their professional interests.
Prerequisites: AS.210.311 or appropriate placement exam score.
Instructor(s): M. Del Rosario Ramos
Area: Humanities.

AS.210.316. Conversational Spanish. 3 Credits.
Conversational Spanish surveys high-interest themes, discusses short films by contemporary Hispanic filmmakers and offers a thorough review of grammar. The student will be able to participate in conversations on topics such as personality traits, social media, political power, art and lifestyles on completion of this course. Conversational skills mastered during the course apply to all careers interconnected by Spanish.
Prerequisites: AS.210.311 (Advanced Spanish I) or appropriate placement exam score.
Instructor(s): S. Ruiz-Perez
Area: Humanities.

AS.210.317. Adv Spanish Composition. 3 Credits.
This third-year course is a hands-on and process-oriented introduction to discussion and compositional analysis. On completion of this course, students will have improved their Spanish writing skills in various types of compositions they might be expected to write in academic settings and in real-life formats such as film reviews, letters to the editor, cover letters, etc. The course also focuses on refinement of grammar and vocabulary use.
Prerequisites: AS.210.312 or appropriate placement exam score.
Instructor(s): S. Urruticoechea Romero; Staff
Area: Humanities
Writing Intensive.

AS.210.327. Mise et remise en scene: Performing in the 18th Century. 3 Credits.
An introduction to texts and performance practices of the eighteenth century French theater, and an exploration of challenges and creative approaches to its restaging today. Course has a performance requirement.
Prerequisites: Advanced French (210.301 and 210.302)
Area: Humanities
Writing Intensive.

AS.210.351. Advanced Italian I. 3 Credits.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons, interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no midterm and no final).
Prerequisites: AS.210.351 or appropriate placement exam scores (Parts I, II and III).
Instructor(s): A. Zannirato; Staff
Area: Humanities
Writing Intensive.

AS.210.354. Learning to Learn a Foreign Language. 3 Credits.
Course presents an overview of contemporary foreign language (L2) learning theories and methodologies, and encourages a critical reflection on previous and current L2 learning experiences. Participants will draw from Second Language Acquisition research and learn how to be more effective L2 learners. Course taught in English with examples in English, French, Italian and Spanish.
Area: Humanities
Writing Intensive.

AS.210.356. Advanced German I: Cultural Topics of the Modern German-speaking World. 3 Credits.
This course focuses on defining moments in cultural history in German-speaking countries in the 2nd half of the 20th century. Films, texts, and other media provide a basis for discussing events in post-war Germany and Europe through reunification and beyond. A review and expansion of advanced grammatical concepts and vocabulary underlies the course. Focus on improving expression in writing and speaking. Taught in German. Course coordinator: Deborah Mifflin
Prerequisites: AS.210.262 or placement exam
Instructor(s): D. Mifflin
Area: Humanities
Writing Intensive.

AS.210.360. Advanced German II: Contemporary Issues in the German Speaking World. 3 Credits.
Taught in German. Topically, this course focuses on contemporary issues such as national identity, multiculturalism and the lingering social consequences of major 20th century historical events. Readings include literary and journalistic texts, as well as radio broadcasts, internet sites, music and film. Students read a full-length novel. Emphasis is placed on improving mastery of German grammar, development of self-editing skills and practice in spoken German for academic use. Introduction/Review of advanced grammar.
Prerequisites: AS.210.361 or equivalent score on placement test.
Instructor(s): D. Mifflin; Staff
Area: Humanities
Writing Intensive.

AS.210.363. Business German. 3 Credits.
Taught in German. Course is designed to familiarize students with the vocabulary and standards for doing business in Germany. Taking a cultural approach, students read texts and engage in discussion that elucidate the works of business, commerce & industry in Germany, the world’s third largest economy. Emphasis is placed on vocabulary expansion and writing as it relates to business.
Prerequisites: AS.210.262
Instructor(s): H. Wheeler
Area: Humanities.
AS.210.365. German for Science and Engineering. 3 Credits.
This course is designed to provide language training in German tailored to students of science & engineering. Germany has long been a world leader in engineering, most notably in chemical and mechanical engineering. Over the past decades, Germany also has taken a lead in environmental sciences and information technology. In addition, Germany is now becoming an increasingly attractive place to pursue degrees in the technical fields. This course will provide practice and expansion in all language skill areas: analysis of texts, hands-on-activities, preparation of presentations, and discussion of topics. Specific areas of interest to the course members will be taken into consideration for the selection of materials. Recommended Course Background: AS.210.261-AS.210.262 or equivalent or placement exam.
Instructor(s): D. Mifflin; Staff
Area: Humanities.

AS.210.367. Advanced Yiddish. 3 Credits.
This course will provide students who have completed at least two years of Yiddish with the opportunity to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.368. Advanced Yiddish II. 3 Credits.
Continuation of Advanced Yiddish I (AS.210.367). Students will continue to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Prerequisites: AS.210.367
Instructor(s): B. Caplan
Area: Humanities.

AS.210.391. Advanced Portuguese Language & Literature I. 3 Credits.
This third-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read one or two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. Lab work is required. All classes are conducted in Portuguese.
Prerequisites: AS.210.277 AND AS.210.278 or placement exam
Instructor(s): M. Bensabat Ott
Area: Humanities
Writing Intensive.

AS.210.392. Advanced Portuguese: Language and Literature II. 3 Credits.
This course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read several works by major Brazilian, Portuguese, and/or Afro-Portuguese writers, followed by intensive writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. Lab work required. The course is conducted entirely in Portuguese.
Prerequisites: AS.210.391 or equivalent score on placement test.
Instructor(s): M. Bensabat Ott
Area: Humanities
Writing Intensive.

AS.210.401. French Translation. 3 Credits.
Did you know that "collège" refers to a "middle school" in French culture? And that a "préservatif" is not a food preservative but is a condom? This course aims to help students acquire skills in the area of translation from English to French and, to a lesser extent, French to English. A great variety of texts - newspaper articles, literary excerpts, films, comic strips, song lyrics and more - will provide the basis for perfecting writing and grammar skills, as well as the understanding of linguistic and cultural nuances. .
Area: Humanities.

AS.210.405. Teaching French in Public School-Community Based Learning. 3 Credits.
A Community-Based Learning (CBL) language course for upperclass students that: 1) establishes a mutually beneficial relationship between JHU students, a neighboring Elementary School, and their common community; 2) combines academic components (linguistic, pedagogical and social) with the experiential work with the community partner as a way to reinforce learning. Students participate in weekly meetings in French on campus to prepare for their classes and teach twice a week to 2nd, 3rd, or 4th graders at the Elementary school. Recommended course background: AS.210.301 or AS.210.302.
Instructor(s): C. Guillemard
Area: Humanities.

AS.210.411. Translation for the Professions. 3 Credits.
Spanish Translation for the Professions surveys the field of contemporary translation theory and provides practice of translation from English to Spanish. Translation exercises may include comparing and contrasting texts of literature, medicine, health, law, technology, politics, and journalism. Students will identify and differentiate terminology specific to these various fields and will focus on practicing correct uses of the grammatical structures relevant to the translation of both English and Spanish. In the course’s final projects students will apply, synthesize, and reflect on what has been learned in the class by completing a translation exercise individualized to their professional interests. Strategies of communication mastered in this course will help students of Spanish throughout their careers, in that achievement of the course objectives will help students discern, translate, and evaluate the usefulness of translations in different professional settings.
Prerequisites: Prereqs: AS.210.313 OR AS.210.314 OR AS.210.315 - Instructor(s): M. Del Rosario Ramos
Area: Humanities
Writing Intensive.

AS.210.412. Spanish Language Practicum-Community Based Learning. 3 Credits.
This fourth-year course involves a specially designed project related to the student's minor concentration. On completion of this course, the student will be able to use the Spanish language in real world contexts. The student-designed project may be related to each student’s current employment context or developed in agencies or organizations that complement student’s research and experimental background while contributing to the improvement of his/her language proficiency.
Prerequisites: AS.210.411
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.
AS.210.413. Curso de Perfeccionamiento. 3 Credits.
This forth-year course is an in-depth examination of the Spanish grammar, including a wider range of idiomatic expressions and usages than students might have previously encountered. On completion of this course, students will be able to achieve the ACTFL Advanced-Mid to high level in oral and written expression as well as in reading and listening skills. The course will also help to prepare students for the DELE Intermediate or Superior levels, offered by the Instituto Cervantes.
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.

AS.210.417. Eloquent French. 3 Credits.
This interactive, writing intensive course places emphasis on: 1. Building linguistic tools that will help students reach the highest level of proficiency (advanced lexical, stylistic and idiomatic expressions, linking expressions used in complex sentences, stylistic and grammatical differences between French and English) 2. Enhancing analytical skills through French “Explication de textes” (close reading method) 3. Developing individual style through creative writing
Instructor(s): K. Cook-Gailloud
Area: Humanities
Writing Intensive.

AS.210.451. Corso di Perfezionamento. 0 - 3 Credit.
This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts, and recognize implicit meaning, 2) produce clear, well-constructed, detailed texts on complex subjects 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option.
Recommended Course Background: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Instructor(s): A. Zannirato
Writing Intensive.

AS.210.461. Introduction to Literary Genres & Movements: 1650-1890. 3 Credits.
Readings, discussion and written assignments in German. Students will read and discuss texts of various genres from 17th-19th century German literature (Gryphius, Claudius, Goethe, Lessing, Meyer, Storm, Hoffmann, Keller). Students will develop critical, interpretive reading skills through the analysis of genre-specific language and form, as well as improve written and spoken German.
Area: Humanities.

AS.210.462. Introduction to German Literature & Culture, 1900 - 1945. 3 Credits.
This course is designed to introduce students to the analysis literary and cultural topics. A variety of 20th century texts and visual media will form the basis for discussion of literature and cultural phenomena specific to the time period. This semester will focus on the European capitals of Zurich, Vienna, and Berlin, thereby offering a “European” perspective on literary, cultural, and political events after 1900. Continuities between and differences amongst the three German speaking countries will be investigated. Attention is given to improving student writing. Readings, discussion, and written assignments in German. Recommended Course Background: AS.210.361-AS.210.362
Area: Humanities.

AS.210.463. Reading and Translating German for Academic Purposes. 3 Credits.
Seniors & Graduate students only. This is the first semester of a year-long course designed for graduate students in other fields who wish to gain a reading knowledge of the German language. Seniors who intend to do graduate study in other disciplines are also welcome. Instruction includes an introduction to German vocabulary and grammatical structures as well as discussion of relevant translation practices. The goal of the course is for students to gain confidence in reading a variety of texts, including those in their own fields of study. No knowledge of German is assumed.
Instructor(s): V. Jicinska
Area: Humanities.

AS.210.501. French Independent Study/Language. 3 Credits.
Instructor(s): Staff.

Instructor(s): K. Cook-Gailloud; Staff
Area: Humanities.

AS.210.541. Italian Independent Study-Language. 0 - 3 Credit.
Prerequisites: AS.210.252 or higher or placement exam score Parts 1 and II.
Instructor(s): A. Zannirato
Area: Humanities.

AS.210.551. Portuguese Independent Study. 3 Credits.
Instructor(s): M. Bensabat Ott; S. Castro-Klaren
Area: Humanities.

AS.210.561. German Independent Study - Language. 0 - 3 Credit.
Instructor(s): D. Mifflin
Area: Humanities.

AS.210.601. French Reading &Translation.
Intensive study of French grammar structure plus experience in reading and translating expository prose. Students do independent work (vocabulary acquisition and translation) in their particular field of study. Designed for graduate students in other departments who need to complete a language requirement in French. Open to undergraduates only with the permission of the language coordinator.
Instructor(s): K. Cook-Gailloud.

AS.210.603. Cours de Perfectionnement.
Required for all in-coming teaching assistants in the Department of German and Romance Languages, this course involves a series of workshops which will focus on an overview of the tenets of second language acquisition (SLA) and the research which informs current teaching practice. Students will both study the current state of the L2L profession and look at different methods and techniques for effective second language teaching and learning. The focus of the course will be on the practical applications of the theoretical foundation. This is a full year course meeting 6 times per semester.
Instructor(s): A. Zannirato; D. Mifflin; L. Sanchez
Area: Humanities.

AS.210.611. Methodology and Instructional Practices in Foreign Language Teaching II.
Second half of year-long course required for all in-coming teaching assistants in the Department of German and Romance Languages, this course involves a series of workshops which will focus on an overview of the tenets of second language acquisition (SLA) and the research which informs current teaching practice. Students will both study the current state of the second language acquisition profession and look at different methods and techniques for effective second language teaching and learning. The focus of the course will be on the practical applications of the theoretical foundations of SLA. The course will encourage the students to become critical observers of their own language teaching.
Grading: course is pass/fail
Instructor(s): A. Zannirato; D. Mifflin; L. Sanchez.

The goal of this course is 1) to familiarize students with different theoretical and practical approaches of language teaching and learning and 2) to understand how these approaches can be used to create a rich learning environment. Participants are expected to engage actively in classroom discussions based on assigned readings, as well as observe classes taught by other instructors in their department. Required for all incoming teaching assistants in the French section.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.210.614. Curso de Perfeccionamiento II.
Grad students only. This course is designed for students who, having attained an advanced high level of proficiency, wish to master Spanish grammar in addition to oral and written expression. The course seeks both to acquaint the students with a wider range of idiomatic expressions and usages than they might have previously encountered and to help them achieve the ACTFL Superior level. The course also will help to prepare students for the DELE Advanced level, offered by the Instituto Cervantes.
Instructor(s): L. Sanchez.

This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts and recognize implicit meaning, 2) produce clear, well-constructed, detailed texts on complex subjects, 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option. Students should have a satisfactory GTA language diagnostic exam score
Instructor(s): A. Zannirato
Writing Intensive.

AS.210.661. Reading and Translating German for Academic Purposes.
This is the first semester of a year-long course designed for graduate students in other fields who wish to gain a reading knowledge of the German language. Seniors who intend to do graduate study in other disciplines are also welcome. Instruction includes an introduction to German vocabulary and grammatical structures as well as discussion of relevant translation practices. The goal of the course is for students to gain confidence in reading a variety of texts, including those in their own fields of study. No knowledge of German is assumed. Taught in English. Seniors & Graduate students only.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.662. Reading & Translating German for Academic Purposes II.
Taught in English. Seniors & Graduate students only. This course is designed for graduate students in other departments who wish to gain reading knowledge of the German language and translation practice from German to English. This course is a continuation of the Fall semester. Focus on advanced grammatical structures and vocabulary.
For certification or credit.
Prerequisites: AS.210.661 or permission of instructor.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.700. German Foreign Language Teaching Practicum I.
Two-semester sequence, includes orientation during the week before semester begins. Regular meeting time will be arranged at start of semester. Required for German Graduate Teaching Assistants in the first year of their teaching in the program.
Instructor(s): D. Mifflin.

AS.210.701. German Language Teaching Practicum II.
Required for German Graduate Teaching Assistants in the first year of their teaching in the program. Two-semester sequence, with AS.210.700 includes orientation during the week before semester begins. Regular meeting time will be arranged at start of semester.
Instructor(s): D. Mifflin.
AS.211.174. Media of Propaganda. 3 Credits.
Today, promoting a particular political or personal point of view is not viewed as “propaganda,” but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term “propaganda” will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current Facebook nation.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.201. Case Studies: Law in Literature. 3 Credits.
In law and literature, words and stories play a crucial role. Indeed, the courtroom is often inherently theatrical. What happens when legal trials and questions of law and justice are transformed into literature? What are the possibilities—and risks—of following the long tradition that combines the fields of law and literature as social and cultural forces? Why has this dynamic connection intrigued many writers of modern literature and how do they represent legal issues? This course explores the representation of law and trials in 19th and 20th century German-language literature as well as larger ethical concerns around justice and revenge. Following a theoretical overview, we will discuss drama and prose by, among others, Heinrich von Kleist, Franz Kafka Bertolt Brecht and Peter Weiss—as well as selected stage and filmic adaptations of their works—as “case studies.” (Taught in English)
Area: Humanities.

AS.211.202. Freshman Seminar: A Thousand Years of Jewish Culture. 3 Credits.
This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.205. Cosmic Imagination from Dante to Borges. 3 Credits.
Since time immemorial humankind has looked to the skies for clues as to our origins, our destiny, and the nature of existence itself. In some ways, one of the hallmarks of western science has been a story of viewing the cosmos in ever greater clarity and detail. Yet the very nature of the universe—its massive size, the distance and obscurity of its farthest reaches—requires the active intervention of our imaginations to picture it, no matter how powerful the technologies we use. In this course we will look at how western cultures from the middle ages to the present have deployed the imaginative tool of literature to try to grasp the ungraspable, and how those attempts in some cases helped prepare intellectuals and scientists to make very real advances in understanding the universe.
Instructor(s): W. Egginton
Area: Humanities.

AS.211.212. Holocaust and Film. 3 Credits.
Taught in English. This class will examine the history of Holocaust films in regard to the possibilities of genre (documentary versus feature), the use of historical and archival materials, as well as general questions of representation and trauma. I CINEMA OF THE VICTIMS II CINEMA OF THE PERPETRATORS III CINEMA OF THE SECOND AND THIRD GENERATIONS WITNESSES Students will be writing weekly response papers to all screenings, and will choose to work with films in the original languages German, English, Italian, and French. This class will be writing-intensive. Cross-listed with Film and Media Studies, Political Science, History, and Jewish Studies.
Area: Humanities
Writing Intensive.

AS.211.213. Breast Cancer: A Cultural-Theoretical Approach to an Illness and its Meaning. 3 Credits.
Among the organs of the human body the breast has a special place. A marker of sex, of eroticism, of life, motherhood, even the distinction of the mammalian class of vertebrates, the breast carries as much meaning for humanity as it does vital function. The breast, in other words, is a sign and site where Western culture believes life as such to be situated. Sadly, it is also vulnerable to its virulent and deadly form of what has been recently termed “the emperor of all maladies”: cancer. The loss of the breast can provoke a form of “castration anxiety.” This course will explore the history of the breast as symbol of sex and life, along with the cancer that affects it not merely as a medical condition, but as a powerful symbol in culture, art, and literature.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.221. Italian Matters Italian Manners. 3 Credits.
This is an introductory course to Italian culture relying on a tradition of books of conduct including the Middle Ages, the Renaissance, and today.
Instructor(s): P. Forni
Area: Humanities.

AS.211.233. Freshman Seminar - A History of Reading: from Gutenberg to Kindle. 3 Credits.
Taught in English. This class will investigate the 18th-century revolution in reading—the pedagogical and aesthetic debates about the virtues and dangers of reading, idealizations and critiques of print culture, books as material objects, and the shifting concepts of both author and reader, and to what extent this historical period anticipates our own present day revolution in reading technologies.
Area: Humanities.
AS.211.235. Panorama of German Thought I. 3 Credits.
Taught in English. German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition are Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed the study of cultural, historical, and social phenomena as well as of literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This two-semester survey course will highlight important topics of German Thought, e.g. the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. While the first semester (Fall) covers until 1850 (from Luther to Hegel/Kierkegaard), the second (Spring) focuses on Modern German Thought after 1850 (from Marx to Luhmann). Meets with AS.211.235.
Instructor(s): E. Strowick
Area: Humanities.

AS.211.236. Panorama of German Thought II. 3 Credits.
Panorama of German Thought from Nietzsche to Habermas. Course will examine major thinkers in nineteenth and twentieth-century German thought with emphasis on the response to Enlightenment philosophy, the critique of reason, the questions about the autonomy of the subject and the search for new individual and collective identities. Reading will include traditional philosophical texts (Nietzsche, Cassirer, Heidegger, Adorno, Habermas) as well as works in anthropology (Gehlen, Scheler), sociology (Simmel, Weber), psychology (Mach, Freud), political theory (Marx, Schmitt) and aesthetics (Benjamin, Warburg, Panofsky). This course is a continuation of Panorama of German Thought I, though the first semester is not a prerequisite for the second. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.211.237. Literature and Medicine. 3 Credits.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s “In the Cold” and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: “Philadelphia” (Jonathan Demme, 1993), “Melancholia” (Lars von Trier, 2011). 
Instructor(s): E. Strowick
Area: Humanities.

AS.211.239. Modern Latin American Culture. 3 Credits.
Taught in Spanish. This course will explore the fundamental aspects of Latin America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.311 or appropriate S-Cape score
Instructor(s): G. Vitaliti
Area: Humanities.

AS.211.253. Freshman Seminar: Why is the Fiddler on the Roof?: The Shtetl in Modern Jewish Culture. 3 Credits.
The most familiar portrayal of the shtetl for an American audience is the setting of the Broadway musical Fiddler on the Roof, where the shtetl, or market town, is a bastion of traditional Jewish life. But what exactly was a shtetl? How did traditional Jews live there, and how were their lives affected by the sweep of modernity? How was the Yiddish language, spoken by all shtetl Jews, both a repository of tradition and an agent of change? How do representations of the shtetl—from corrupt backwater to pious haven—reflect the concerns of Jews from the nineteenth century up to our own day? Through memoir, literature, film and painting, this course will examine actual lives lived in the shtetl, as well as a selection of the many artistic representations of it. All readings will be in English.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.265. Panorama of German Thought. 3 Credits.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): W. Egginton
Area: Humanities.
AS.211.291. Introduction to Literature in Spain. 3 Credits.
This course will explore the fundamental aspects of Spanish Peninsular literature in reverse chronological order from the twentieth to the tenth centuries. The course will offer a general survey of the literature of Spain. Students will be asked to read, analyze and comment on representative texts from the Spanish canon.
Area: Humanities.

AS.211.312. Acting French: learning about French language and culture through theater. 3 Credits.
Performing a play in a foreign language not only improves language skills, but develops the ability to express oneself through the body and to communicate both efficiently and elegantly. Using excerpts from popular French stage plays by Camus, Sartre, Feydeau, Ionesco, Pagnol and Rostand among others, this course aims to help students to 1) improve French pronunciation, intonation, syntax, and vocabulary; 2) appreciate and understand linguistic nuance and socio-cultural practices; 3) learn fundamentals of acting that carry over into everyday communication, from body language and vocal projection to the expression of emotion and improvisation. Students will view filmed representations of select plays as well as present an end-of-semester staging. Recommended course background: AS.210.301.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.211.329. Contemporary Society on Stage: Koltès, Lagarce, Mouawad. 3 Credits.
This course proposes to examine six plays by three leading figures in contemporary French theater to see how the social changes that occurred in the last three decades are viewed and expressed in the French-speaking world. We will closely read two plays by each author as well as excerpts by these and other major playwrights. Works by Jean-Luc Lagarce (Derniers remords avant l’oubli ) and Bernard-Marie Koltès (Combat de nègre et de chiens) will enable us to see how issues such as homosexuality, new family relationships and urban violence deeply transformed French society in the 80s and 90s, while Incendies and Forêts by Wajdi Mouawad will allow us to ask how these issues, along with immigration, decisively shape today’s global society. Using literary analysis to reflect upon the contemporary moment and its institutions, the course will incorporate to the extent possible performance recordings and films based on the plays. Course taught in French. Scenes from the plays can be performed at the end of the term.
Prerequisites: AS.210.302
Instructor(s): F. Champy
Area: Humanities
Writing Intensive.

AS.211.330. Curating Media Artists in Residence at JHU. 3 Credits.
Curating Media Artists in Residence at JHU: students will be closely involved with JHU’s Program in Museum & Society, JHU’s Center for Advanced Media Studies (CAMS), and the Baltimore Museum of Art (curator KristenHileman) in efforts to research and propose new media artists in residence as well as prepare the residency for 2015. This process will include examining cutting-edge media artists whose work will be discussed both in the classroom as well as on sponsored class trips to media art exhibits in DC and NYC. Students will also assist with the CAMS media art residency of acclaimed French artist Camille Henrot in March 2014.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.340. Topics in French Cinema: The Representations of Joan of Arc in French movies. 3 Credits.
Through the study of selected movies, this series emphasizes discussion and oral presentations. This semester the course will focus on the ever changing adaptations to the screen of the fascinating figure of Joan of Arc. Since the dawn of cinema (40-second documentary by the Lumière brothers, 10-minute color representation by Melies) to the most recent full-length features in 2012 (year of the 600th anniversary of her birth), the movie interpretations of Joan of Arc have always reflected the issues and crises of their own times. We will explore both the historical background of her life and the contemporary meanings of her representations on the big screen. Movies may give us a key to understanding why Joan of Arc is still as relevant today in French society, historically and symbolically, as she was six centuries ago.
Instructor(s): C. Guillemard
Area: Humanities.

AS.211.344. Holocaust and Film. 3 Credits.
Taught in English. This class will examine the history of Holocaust films in regard to the possibilities of genre (documentary versus feature), the use of historical and archival materials, as well as general questions of representation and trauma. I CINEMA OF THE VICTIMS II CINEMA OF THE PERPETRATORS III CINEMA OF THE SECOND AND THIRD GENERATIONS WITNESSES Students will be writing weekly response papers to all screenings, and will choose to work with films in the original languages German, English, Italian, and French. This class will be writing-intensive. Cross-listed with Film and Media Studies, Political Science, History, and Jewish Studies.
Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.

AS.211.345. The Representation of the French Countryside in Contemporary Arts and Literature. 3 Credits.
Through the analysis of literary texts (Pierre Bergounioux, Pierre Michon), graphic novels (Manu Larcenet), as well as articles and sociological essays (Jeanne Favret-Saada), through movies (Bruno Dumont) and documentaries (Raymond Depardon) and the analysis of contemporary works of art (Didier Marcel, Ticador et Poincheval), we will study how current French artists view the French countryside. We will focus on two generations. The first one, born in the 1940s, witnessed the rural exodus and attempts to retain traces of a lost world. The second one, whose members were born twenty years later, presents rurality as a field of exploration. As such, rurality is depicted either as an utopian, or a disenchanted universe. Both approaches will enable us to consider central issues in contemporary France, such as the notion of terroir and Political Ecology.
Prerequisites: AS.210.301 AND AS.210.302
Area: Humanities
Writing Intensive.

AS.211.346. The Role of Joan of Arc in Film. 3 Credits.
This course proposes to examine the role of Joan of Arc in French film, through selected movies that have been released in the last three decades.
Prerequisites: AS.210.301 AND AS.210.302
Area: Humanities
Writing Intensive.
AS.211.346. 20th Century French Theater and Performance. 3 Credits.
Taught in English. In this course, we will survey the themes and
techniques that marked the theory and practice of theater in France in
the 20th century. As we make our way from the early century avant-garde
movements such as Futurism and Surrealism to Antonin Artaud’s Theater
of Cruelty, from the Theater of the Absurd and mid-century existentialists
to the post-1968 turn to collective authorship, our goal will be twofold:
First, we will examine the prominent plays of the era as literary products,
generated from within specific socio-political contexts. Second, we will
attempt to re-construct their three-dimensional lives in performance,
how they looked, sounded and felt to those watching. In addition, we
will examine how French theater went from being a playwright-centered
institution to a director-centered one, and how acting styles transitioned
from psychological realism to a focus on the human body. Course
materials will include plays, theoretical texts on the theater, as well as
directors’ manifestos, rehearsal notes, set and costume designs and
filmed recordings of theatrical events. Cross-listed with Theatre Arts and
Studies THIS COURSE CAN COUNT EITHER AS A 212 (LITERATURE--
AS.212.346) OR AS A 211 (CULTURE) COURSE FOR THE FRENCH
MAJOR AND MINORS.
Instructor(s): E. Fisek
Area: Humanities.

AS.211.358. Bodyworks: Body, Medicine and Technology in the 21st
Century. 3 Credits.
Area: Humanities.

AS.211.371. Kafka and the Kafkaesque. 3 Credits.
Franz Kafka is regarded as one of the most influential writers of the 20th
century. To this day, his lucid and subtle prose continues to intrigue
literary critics, writers of fiction, and readers with observations that
create a fictive world at once strange and familiar, hopelessly tragic
and hilariously comical. The related term “kafkaesque” refers to the
unique character of a literary universe that is perceived as both eerie
and resistant to any classification. In this course, we will analyze texts
by Franz Kafka from a variety of perspectives: as investigations into
modern institutions and bureaucracy, law, punishment and family
structures. Special emphasis will be given to the exploration of Kafka’s
poetic practice, i.e. to the material, rhetorical and performative quality
of his writing. In addition to reading a selection of Kafka’s prose
and analyzing several film adaptations, we will also discuss some
influential commentaries on his work and discuss Kafka’s impact on
the conceptualization of modernity. Students will gain an in-depth
understanding of Kafka’s œuvre while developing skills in critical analysis
and literary close reading.
Instructor(s): A. Krauss
Area: Humanities.

AS.211.375. Community Based Learning - Documentary Production
Practicum: "The Cure:" the History and Culture of Breast Cancer. 3
Credits.
This class will accompany Bernadette Wegenstein during some months
of producing her feature documentary “The Cure” on the history and
culture of breast cancer. It will be a hands on experience with director/
producer Bernadette Wegenstein, editor/producer Patrick Wright and
cinematographer Allen Moore filming at the GBMC’s Breast Care clinic,
the Halsted Medical Archives, and some other Baltimore locations. This
class will meet once a week, but some weeks the class will consist in
the hands-on experience on the field rather than the actual class meeting.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.380. Modern Latin American Culture. 3 Credits.
Taught in Spanish. This course will explore the fundamental aspects of
Latin America culture from the formation of independent states through
the present—in light of the social, political, and economic histories of the
region. The course will offer a general survey of history of Latin America,
and will discuss texts, movies, songs, pictures, and paintings, in relation to
their social, political, and cultural contexts. May not be taken satisfactory/
unsatisfactory.
Instructor(s): S. Castro-Klaren; Staff
Area: Humanities.

AS.211.385. Documentary Production Practicum: Community Based
Learning: Raqs Media Artists in Residence. 3 Credits.
This course accompanies the New Delhi based media art collective raqs,
consisting of 3 artists, during their first residency in Baltimore during
Spring 2013. Students will be helping prepare the media artists’ solo
exhibition opening at the BMA on February 20, and be involved in a
production workshop offered through the JHU Digital Media Center.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.390. Modern Spanish Culture. 3 Credits.
This course will explore the fundamental aspects of Spanish culture from
the nineteenth to the twenty-first centuries. The course will offer a general
survey of the history of Spain and will discuss texts, movies, songs,
pictures, and paintings in relation to their social, political, and cultural
contexts. This course will be of particular interest for students planning on
spending a semester abroad in Spain—specially for those students going
to the JHU Fall Semester in Madrid, at Carlos III University. Taught in
Spanish. Recommended Course Background: AS.210.311 or appropriate
Webcape score.
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.211.394. Brazilian Cult & Civ. 3 Credits.
This course is intended as an introduction to the culture and civilization
of Brazil. It is designed to provide students with basic information about
Brazilian history, art, literature, popular culture, theater, cinema, and
music. The course will focus on how indigenous Asian, African, and
European cultural influences have interacted to create the new and
unique civilization that is Brazil today. The course is taught in English,
but ONE extra credit will be given to students who wish to do the course
work in Portuguese. Those wishing to do the course work in English for 3
credits should register for section 01. Those wishing to earn 4 credits by
doing the course work in Portuguese should register for section 02. The
sections will be taught simultaneously. Section 01: 3 credits Section 02: 4
credits (instructor’s permission required)
Instructor(s): M. Bensabat Ott
Area: Humanities
Writing Intensive.

AS.211.401. La France Contemporaine I. 3 Credits.
Students will explore contemporary French society and culture through
a wide variety of media: fiction and non-fiction readings (graphic novels,
news periodicals, popular magazines), films, music, art, websites, and
podcasts. A diverse range of hands-on activities in addition to guided
readings will help students develop cultural awareness as we discuss
topics such as education, politics, humor, sports, cuisine, immigration,
slang, and national identity, as well as the historical factors that have
influenced these facets of French and francophone culture. Course
coordinator: April Wuenisch. Recommended Course Background:
AS.210.301 or AS.210.302 or permission of instructor.
Instructor(s): M. B. Anderson
Area: Humanities.
AS.211.402. La France Contemporaine II. 3 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor. Instructor(s): A. Wuenesch; B. Anderson; Staff. Area: Humanities.

AS.211.404. Jazz in French Culture. 3 Credits.
This course will explore the dynamic relationship between French Culture and Jazz through a series of French novels, poems, music criticism and films. Works by Morand, Desnos, Echenoz and Nabe. Music by Coleman Hawkins, Charlie Parker, Miles Davis and Albert Ayler. Prerequisites: AS.210.301 AND AS.210.302 or Supplementary test. Area: Humanities.

AS.211.405. French Doctors: Insights on 19th and 20th Medicine in France. 3 Credits.
The course presents past and present interactions between society and medicine in France. From Pasteur’s discoveries to the development of humanitarian medicine, we will consider historical and political contexts of the 19th and 20th century France. We will discuss a broad range of readings, from Claude Bernard to Bruno Latour, and films, whenever appropriate. The course raises critical questions of how the evolution of medicine takes part in political issues and social change. Instructor(s): C. Bertron. Area: Humanities.

AS.211.406. The City in Early Modern French Literature. 3 Credits.
Prerequisites: AS.212.333 OR AS.212.334 or permission of instructor. Instructor(s): W. Anderson. Area: Humanities.

AS.211.410. Toward Modernity: France 1848-1885. 3 Credits.
The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré. Instructor(s): J. Neefs. Area: Humanities Writing Intensive.

AS.211.412. Temps et recit dans le cinema francais. 3 Credits.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French. Prerequisites: AS.210.301 AND AS.210.302. Instructor(s): D. Schilling. Area: Humanities.
AS.211.426. Paris 1900: the Great World Exhibition and the Beginning of Modernism. 3 Credits.
This course proposes to examine the momentous world exhibition organized in Paris in the year 1900 along with the new technologies and concepts it introduced into the modern world: the first subway line in Paris, talking films on giant screens, escalators, moving walkways, the first large-scale exhibit of the rising Art Nouveau, the first display of Picasso’s painting on French territory, and even a presentation on the idea of television at the Palais de l’électricité. Our discussions will include the social, political, cultural, and artistic events that led to this pivotal moment which constituted an emblematic stepping stone between the old world and the new.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.211.427. Libertins, Athées, Imposteurs. 3 Credits.
An exploration of the clandestine culture of free-thinkers, hedonists and rakes in France in the 17th and the 18th centuries and their strategies for undermining the theological grounding of morality, politics, sexuality and gender. Readings from Descartes, Cyrano de Bergerac, Molière, Diderot, Sade, Laclos and others. Meets with AS.212.427
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.

AS.211.428. Eloquent French. 3 Credits.
This highly interactive, writing intensive course places emphasis on: 1) providing students with linguistic tools that will help them reach a high level of written proficiency (advanced lexical, stylistic and idiomatic expressions, linking words used to develop and enrich complex sentences, stylistic and grammatical differences between French and English) 2) enhancing students’ analytical skills by introducing them to the French method of Explication de textes 3) teaching students to develop an academic style of writing by studying the different components of the dissertation française (introduction, problématique, argumentation, conclusion, utilisation de sources) 4) teaching students to develop their own style of writing. To that effect, we will study excerpts of French literary texts that deal with themes likely to enhance their own creative writing (lieux imaginaires, mémoire et autobiographie, création d’un personnage de roman, for example) THIS COURSE CAN COUNT AS A 211 (CULTURE) COURSE ONLY FOR THE STUDENTS WHO ALREADY HAVE DECLARED THEIR FRENCH MAJOR AND MINORS BEFORE FALL 2010.
Instructor(s): K. Cook-Gailloud
Area: Humanities
Writing Intensive.

AS.211.429. French in America. 3 Credits.
Did you know that Johnny Depp’s family in the United States originated with a French Huguenot immigrant who settled in Virginia around 1700? And imagine if the British had not won the French and Indian War: odds are that our country would be entirely French-speaking. This course will study the different French communities that developed in North America from their early settlement to the present day (Louisiana, New England, Missouri, Québec, Acadia). In a more global context, students will be invited to study representations of French culture in developing countries (central Africa, western Africa, the Maghreb, Southeast Asia, and Haiti), while considering the political, social, economic and cultural implications of the notion of Francophonie. Recommended Course Background: AS.210.301-AS.210.302 or supplementary test or permission of instructor.
Area: Humanities.

AS.211.430. L’Affaire Dreyfus. 3 Credits.
This course proposes to look at persuasive strategies that were engaged during the Dreyfus Affair in order to either incriminate or discriminate the Jewish captain falsely accused of having betrayed the French army. Course will focus on the socio-political events that framed the Dreyfus Affair (anti-Semitism in 19th-century France, caricatures and polemical writings in the press, the consequences of the Franco-Prussian War and of the Commune, the bipolar division that split French society into Dreyfusards and anti-Dreyfusards), as well as its long-term effects (the rise of the extreme right, the creation of the “intellectual”, the consolidation of Zionism which ultimately led to the creation of a Jewish state). Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.211.431. Desecrating the Sacred Heart: Science, Religion and Art in Fin-de-Siècle France. 3 Credits.
This interactive course traces the tension that builds up between religion and science from the moment Pius IX loses his papal states in 1870 to the official separation of Church and State in France in 1906. We will consider, through various readings and caricatures in the press, literary writings, and works of art, how the advocates of religion and science make use of specific rhetorical and artistic devices (such as the much-debated construction of the Sacré Coeur in Paris) to convince their audiences of the truth and validity of their respective faiths.
Prerequisites: Prereqs: 210.301-302 or supplementary test or permission of instructor.
Instructor(s): K. Cook-Gailloud.

AS.211.446. Contemporary Italy: A Visual and Literary History. 3 Credits.
Taught in English. This introductory course will explore the main features of Italian society, culture, politics from 1945 to the present. Our discussions will be based upon a critical analysis of both visual and literary sources (in translation): excerpts of movies, videos, pictures, novels, short stories, etc. By the end of this journey through the past you will have better understanding of today’s Italy. Topics include: the Cold War and the division between Catholics and Communists, the economic miracle, the ’68 student revolt, political terrorism in the 70’s, the second Republic and Berlusconi. Attention will be paid to issues such as the condition of women and the youth, organized crime, political corruption, migration, the Southern question.
Instructor(s): M. Rossi; W. Stephens.

AS.211.469. Limit-Experience, Limit-Texts. 3 Credits.
Among the many functions of literary narrative is that of describing and domesticating extreme experience, from the horrors of war and incarceration to religious ecstasy, madness, and acute illness. Writers have long exploited the extreme to probe the reaches of human consciousness and the social acts that differentiate transgressive from normal behaviors. Drawing on the work of 20th century French-language authors of novels, short stories, and witness accounts (Breton, Camus, Chraïbi, Delbo, Duras, Guibert, Le Clézio, Volodine), this course will explore how narrative strategies relate to extreme states, situations, and conditions. At the same time, through excerpts from experimental writers from Surrealism to l’écriture féminine, we will also consider how language itself can create a manner of limit-experience by questioning the boundaries of the readable. Course in French.
Instructor(s): D. Schilling
Area: Humanities.
AS.211.470. French Debate Series: Joan of Arc - Past & Present Interpretation. 3 Credits.
In 2012, we celebrated the 600th anniversary of the birth of French heroine Joan of Arc. Through close readings of primary sources such as the proceedings of her trial (which led to her burning at the stake at 19), as well as animated discussions around her representations in the arts (painting, sculpture, literature, music, and cinema), this course proposes to explore past and present implications of her heroic feats in the political, religious, and cultural realms of French society. We will consider in particular how Joan of Arc has been recuperated as an emblem of French nationalism since the Revolution (and for example during WWII, where both the Vichy regime and the Resistance brandished her as their national heroine), as well as in the context of the upcoming French 2012 presidential elections. This class strongly emphasizes the acquisition of oral linguistic skills and vocabulary through discussion and debate. Recommended Course Background: AS.210.301 or AS.210.302 or special permission from Kristin Cook-Gailloud (kacg@mac.com) or Claude Guillemard (claude@jhu.edu)
Instructor(s): C. Guillemard
Area: Humanities.

AS.211.471. Jules Verne. 3 Credits.
An overview of the corpus of the author of the "Voyages extraordinaires". The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in the new human sciences and their relationship to the development of cultural models. A disabused, even pessimistic thinker, he provides a unique entryway into the fin-de-siècle French mind set. Works to be read will include "Cinq semaines en ballon", "Voyage au centre de la terre", "De la terre à la lune", "20,000 lieues sous les mers" and "L’Île mystérieuse", "Le Tour du monde en quatre-vingt jours", "Robur le conquérant" and "Le Maître du monde", "le Sphinx des glaces", "Le Château des Carpathes", and "Paris au XXe siècle". Class will be taught in French. This course can be taken either as a 211 Culture course or 212 Literature course 212.
Prerequisites: AS.212.334
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.211.501. Independent Study-French Culture. 0 - 3 Credit.
Independent research in topics bearing on the cultures of France and the Francophone world. Instructor permission required before registration. E-mail Dr.Kristin Cook-Gailloud @ kacg@mac.com for permission.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.212.127. Freshman Seminar: 18th Century Theater. 3 Credits.
An introduction to 18th century theater and performance. Using philosophical and critical texts by Aristotle, Chapelain, Diderot, and others, we will examine a series of plays and other works for theatrical performance. Course has a performance requirement. Taught in English.
Dean’s Teaching Prize Fellowship Course.
Instructor(s): O. Sabee
Area: Humanities.

AS.212.201. Intro a la Lit Francais. 3 Credits.
Readings and discussion of texts of various genres from the Middle Ages to the 20th century. The two semesters may be taken in either order. This sequence is a prerequisite to all further literature courses. Students may co-register with an upper-level course during their second semester.
Prerequisites: Both semesters of AS.210.301 AND AS.210.302 or at least one semester of 210.301 and 210.302 with a grade of “A” and written permission of instructor
Instructor(s): J. Neefs; S. Roos
Area: Humanities
Writing Intensive.

AS.212.202. Introduction to French Literature. 3 Credits.
Readings and discussion of texts of various genres from the Middle Ages to the 20th century. The two semesters may be taken in either order. This sequence is a prerequisite to all further literature courses. Students may co-register with an upper-level course during their second semester.
Recommended Course Background: AS.210.301-AS.210.302, or at least one semester of AS.210.301-AS.210.302 with a grade of “A” and written permission of the instructor
Instructor(s): K. Cook-Gailloud
Area: Humanities
Writing Intensive.

AS.212.301. Evil in French Literature. 3 Credits.
In his book, Literature and Evil, Georges Bataille points out that “a rigorous morality results from the complicity in the knowledge of Evil, which is the basis of intense communication”. But what is Evil? What is the nature of this communication? What forms of knowledge does Evil elicit? How is Evil represented? Are there any changes in the representation of Evil throughout centuries? How does it pervade the structures of our daily life? How does literature encompass the idea of Evil? Through a close reading of a variety of French literary texts ranging from medieval (La Chanson de Roland, Tristan et Yseut), Renaissance (Gargantua et Pantagruel), early-modern (Médée, Candide) up to 19th century (Flaubert, Baudelaire) and 20th century (Proust, Ionesco) fiction, we will explore various facets of Evil and its emotional, ethical, cultural, religious, and political impact on the human self and body.
Instructor(s): A. Marculescu

AS.212.302. Love,Death,Supernatural. 3 Credits.
Area: Humanities
Writing Intensive.

AS.212.303. Performing Madness: from Tristan to King Lear. 3 Credits.
For minors/majors in French, advanced level of French (AS.210.302) is required. For all other students, reading knowledge of French is recommended. The class explores the facets of madness in the medieval and Renaissance imaginary. Readings will include Tristan and Yseut, Play of Madness, The Praise of Folly, King Lear. The class will be taught in English. French majors/minors will have to write all assignments in French. Cross-listed with History of Science, Medicine and Technology Dean's Teaching Fellowship
Instructor(s): A. Marculescu
Area: Humanities
Writing Intensive.
AS.212.305. Introduction to Francophone Caribbean Literature and Postcolonial Studies. 3 Credits.
This course is designed to introduce students to the history and cultural contexts of Francophone Caribbean writings. It offers a panorama of twentieth-century Francophone Caribbean Literature from the négritude movement to the contemporary period. It introduces to various texts by Aimé Césaire, Marie Chauvet, Maryse Condé, Patrick Chamoiseau, René Depestre, Frantz Fanon, Edouard Glissant, Dany Laferrière, Jean Métellus, and Jacques Roumain. We will explore these writings of various literary genres in relation with topics such as memories of slavery, re-writings of history, representations of sexuality, exile, exoticism, métissage and créolité. Great emphasis will be laid on the specific historical and cultural background of Guadeloupe, Martinique and Haiti. Another significant component of this module will be the constant oscillation between theories and fictions, contexts and contents. More generally, this course will provide students with an insight into the French-language contribution to postcolonialism, and an examination of Francophone postcolonial thought and culture. Challenges will also be made with American and British literature (with authors such as James Baldwin and Graham Greene) and with Anglophone Caribbean literature (with authors such as Edwidge Danticat). Key notions of postcolonial theory such as exoticism, hybridity and métissage will be examined and, hopefully, challenged.
Prerequisites: AS.212.201 OR AS.212.202 or permission
Area: Humanities.

AS.212.306. Gender Issues in the Maghrebian Novel. 3 Credits.
A survey of francophone Moroccan and Algerian novels produced in the wake of those countries' struggles for independence. We will investigate the intertwining of historical context, gender issues, and formal experimentation.
Area: Humanities.

AS.212.307. Tales on Trial: Storytelling in the Middle Ages. 3 Credits.
Area: Humanities.

AS.212.309. Forever Godard. 3 Credits.
This course will explore the dynamic relationship between music, literature, philosophy and politics in the most provocative of Jean-Luc Godard’s films.
Instructor(s): J. Reymond
Area: Humanities.

AS.212.311. How to Read Proust...and love it. 3 Credits.
An introduction to Proust’s masterpiece, A la recherche du temps perdu, through a close reading of A l’ombre des jeunes filles en fleurs, the “adolescent” part of the novel. This course will introduce you to Proust’s specific art of prose and to the discovery of his major themes: love, desire and gender; society, taste and morality; life, time and memory; art, creation and beauty. We will find out why Proust is a major writer (all snobbism aside...), and that he happens to be funny, subversive and thrilling! Required reading: Proust, A l’ombre des jeunes fille en fleurs, Gallimard, Folio.
Prerequisites: AS.212.201 or AS.212.202 or permission
Area: Humanities.

AS.212.314. Rivalry, Complementarity, Emulation: Writers and Artists in Contemporary French Fiction. 2 Credits.
How does modern French literature deal with its traditional rival, painting, in an age where both text and image have been wholly redefined? By what means, and to what end, do writers pay homage to specific artists (Giacometti, Gentileschi) or integrate historic masterworks in their fiction? Whether real, re-imagined, or forged, the artwork becomes an alluring and often deceitful means of questioning the powers and purposes of literature as well as of inventing new modes of reading.
Prerequisites: AS.212.333 AND AS.212.334
Instructor(s): L. Leleve; Staff
Area: Humanities.

AS.212.317. Thousand Faces: Rousseau’s Literary and Philosophical Writings. 3 Credits.
Jean-Jacques Rousseau is not only responsible for the romantic discovery of Self (Les Confessions) or one of the ideological fathers of the French Revolution (Le Contrat Social), or the author of passionate, best-selling novels (La Nouvelle Héloïse). He was also a musician, a playwright, a theorist of education and a botanist. The class will explore various tracks, using Rousseau’s works as an opportunity to understand the century to which he belongs and to explore such topics as: autobiography, Revolutionary ideology, musical forms. This course will be taught in French.
Instructor(s): A. Roge; Staff
Area: Humanities.

AS.212.318. Women in French Literature of the 17th and 18th Centuries. 3 Credits.
This course will examine the changes in the relationship of women to literature in France before the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary productions? Texts by Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Laclos, and Beaumarchais. <a href="http://www.wilda.org/Courses/CourseVault/Undergrad/ImageWomen/Syllabus.html">Course Syllabus</a>
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.320. Alexandre Dumas. 3 Credits.
Area: Humanities.

AS.212.321. Women in War. Heroines in Italian and French epic (16th-18th century) Between Fiction and Reality. 3 Credits.
Did women warriors exist or are they just a (sexual) fantasy? Did men and women writers represent female warriors differently? Can women warriors be considered as women from a philosophical and biological point of view or does warfare diminish their femininity? In this course we will analyze the representation of these heroines based on Italian and French epics, e.g. Ariosto’s “Orlando furioso” (1532), Voltaire’s “La pucelle d’Orleans” (1758), and on iconography and French and Italian opera. Philosophical and historical texts from the Antiquity (e.g.Diodorus of Sicily) and from Queer and Gender studies (e.g. J. Butler) will help us analyze the function of women warriors in these literary texts. The course is based on interactive discussions and can be held in English.
Instructor(s): V. Denzel
Area: Humanities
Writing Intensive.
AS.212.322. Laughter and Thought in Molière’s Comedies. 3 Credits.
This course will be taught in French. Laughter and thought in Molière’s comedies. Through a close reading of Molière’s most famous plays, “Le Misanthrope,” “Dom Juan,” “Le malade imaginaire” and “Tartuffe,” this course will study how laughter can make us think deeply about questions such as passion, morality, religious belief and medicine. What is the link between comedy and philosophy? And how do Molière’s plays reflect the evolution of philosophical thought in France in the seventeenth century? To answer these questions we will have a thematic reading of the plays. The themes will be reason and passion, morality, medicine and religious belief. By watching some stagings or some movies based on Molière’s plays we will study how performing can be a philosophical interpretation of the play. Recommended Course Background: AS.210.301 and AS.210.302. THIS COURSE CAN COUNT EITHER AS A 212 (LITERATURE) OR AS A 211 (CULTURE--AS.211.422) COURSE FOR THE FRENCH MAJOR AND MINORS. Instructor(s): A. De Chaisemartin.

AS.212.324. Vive la Difference!: Belonging and Difference in Contemporary France. 3 Credits.
This course studies the impact that globalization and mass migration have had on France’s cultural identity, focusing on how recent developments in the arts illuminate the multiethnic nature of French society. Although France has been a “melting pot” in historian Gérard Noiriel’s words for over a century, the official culture of the nation remains skeptical of multiculturalism, highlighting instead an abstract image of the French citizen, shorn of cultural, ethnic, racial or religious differences. In this course, we will examine novels, performance pieces, plays, films and documentaries that challenge, live with and explore this norm, allowing us to ask: What is the relationship between diversity and political community? How do different aesthetic forms imagine belonging, citizenship and diaspora? The syllabus may include work by Mehdi Charef, Yamina Benguigui, Nasser Dijemai, Leila Sebbar, Merzak Allouache, Laurent Cantet and Abdellatif Kechiche as well as theoretical readings from Pierre Nora, Dominique Schnapper and Pierre Tévanian. Recommended Course Background: AS.212.333-AS.212.334 or permission of instructor. Instructor(s): E. Fisek Area: Humanities.

AS.212.326. Paris in Literature from Surrealism to the Present. 3 Credits.
This course will investigate the representations and images of Paris in French and Francophone literature from the interwar years to the present days. Drawing from various theoretical perspectives (by Freud, Benjamin, Barthes, Lefebvre, Certeau, Augé), we will study a wide range of texts. The syllabus will comprise seminal surrealist texts (Nadja by Breton, Le Paysan de Paris by Aragon), Beauvoir’s autobiography Mémoires d’une jeune fille rangée, extracts from novels by Modiano, Simenon, Queneau, Green’s essay Paris, narratives by Perec, Rolin, Bon, Manchette, recent poetry by Rêda and Roubaud, and francophone writings (such as Boujedra, Yacine and Glissant). During our exploration of the material and imaginary geography of Paris, we will make excursions into the interstitial spaces of the city, from the hidden arcades to the ‘banlieue parisienne,’ across its ‘quarters’ and through the ‘non-lieux’ of modernity. Our ‘traversée de Paris’ will also include films and photographs. Area: Humanities Writing Intensive.

AS.212.327. Mise et remise en scene: Performing in the 18th Century. 3 Credits.
An introduction to texts and performance practices of the eighteenth century French theater, and an exploration of challenges and creative approaches to its restaging today. Course has a performance requirement. Instructor(s): O. Sabee Area: Humanities Writing Intensive.

AS.212.329. Contemporary Society on Stage: Koltès, Lagarce, Mouawad. 3 Credits.
This course proposes to examine six plays by three leading figures in contemporary French theater to see how the social changes that occurred in the last three decades are viewed and expressed in the French-speaking world. We will closely read two plays by each author as well as excerpts by these and other major playwrights. Works by Jean-Luc Lagarce (Derniers remords avant l’oubli) and Bernard-Marie Koltès (Combat de nègre et de chiens) will enable us to see how issues such as homosexuality, new family relationships and urban violence deeply transformed French society in the 80s and 90s, while Incendies and Forêts by Wajdi Mouawad will allow us to ask how these issues, along with immigration, decisively shape today’s global society. Using literary analysis to reflect upon the contemporary moment and its institutions, the course will incorporate to the extent possible performance recordings and films based on the plays. Course taught in French. Scenes from the plays can be performed at the end of the term. Prerequisites: AS.210.302 Instructor(s): F. Champy Area: Humanities Writing Intensive.

AS.212.333. Introduction à la littérature française. 3 Credits.
Reading and discussion of texts of various genres from the Middle Ages to the 20th century. The two semesters may be taken in either order. This sequence is a prerequisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Recommended Course Background: AS.210.301-AS.210.302 or at least one semester of AS.210.301-AS.210.302 with a grade of A and written permission of the instructor. Instructor(s): H. Roman Area: Humanities Writing Intensive.

AS.212.334. Introduction à la littérature française II. 3 Credits.
This second part of the introductory course will cover readings and discussion of texts of various genres from the French Revolution to the 20th century. The two semesters may be taken in either order. This sequence is a prerequisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Prerequisites: AS.210.301 OR AS.210.302 or at least one semester of AS.210.301 or AS.210.302 with a grade of A and written permission of the instructor. Instructor(s): H. Roman Area: Humanities Writing Intensive.
AS.212.335. Universal” Theater?: Staging Human Rights in France and Beyond. 3 Credits.

Although today the phrase “human rights” refers to a set of values that are universally recognized, France nevertheless occupies a significant place in the international imagination as its “homeland”, exemplified in Jacques Chirac’s statement that France has “for a very long time… been passionate about human rights”. In this course, we will examine the relationship between French identity and discourses of human rights by focusing on how they are articulated in theater practice. Drawing primarily on plays but also films, documentaries, photography and ethnographies, we will trace how human rights are “performed” in an array of French and Francophone works. We will then broaden our lens, turn our attention to similar theater practices from Latin America, Africa and the Middle East and ask: what are the different meanings that can be attached to the words “human” and “right” and what do human rights performances teach us about both international justice and theater?

Instructor(s): E. Fisek
Area: Humanities.

AS.212.343. Literature and Science in France 1750-1880. 3 Credits.

This course will investigate changes in the meaning and function of the literature of science and of the natural world during the period 1750-1850 (N.B. All course readings, assignments, and discussions will be conducted in French). Dean’s Teaching Fellowship.

Prerequisites: Advanced French I and II (AS 210.301-302), Introduction to French Literature I or II (AS 212.333 or 334)

Instructor(s): H. Roman
Area: Humanities
Writing Intensive.

AS.212.346. 20th Century French Theater and Performance. 3 Credits.

Taught in English. In this course, we will survey the themes and techniques that marked the theory and practice of theater in France in the 20th century. As we make our way from the early century avant-garde movements such as Futurism and Surrealism to Antonin Artaud’s Theater of Cruelty, from the Theater of the Absurd and mid-century existentialists to the post-1968 turn to collective authorship, our goal will be twofold: First, we will examine the prominent plays of the era as literary products, generated from within specific socio-political contexts. Second, we will attempt to re-construct their three-dimensional lives in performance, how they looked, sounded and felt to those watching. In addition, we will examine how French theater went from being a playwright-centered institution to a director-centered one, and how acting styles transitioned from psychological realism to a focus on the human body. Course materials will include plays, theoretical texts on the theater, as well as directors’ manifestos, rehearsal notes, set and costume designs and filmed recordings of theatrical events. Cross-listed with Theatre Arts and Studies. THIS COURSE CAN COUNT EITHER AS A 212 (LITERATURE--AS.212.346) OR AS A 211 (CULTURE) COURSE FOR THE FRENCH MAJOR AND MINORS.

Instructor(s): E. Fisek
Area: Humanities.

AS.212.353. Love and Learning in Medieval French Literature. 3 Credits.

The High Middle Ages in France witnessed both a re-birth of learning, with the rise of the universities, and a re-invention of love, as expressed in the courtly love lyric and the new literary genre of romance. This course will examine the relation between love and learning as it developed in the pages of the age’s literature across a variety of genres: courtly lyric; Arthurian romance; the roman antique; devotional literature; literary quarell; and autobiographical confession. Texts in modern French translation. Recommended Course Background: AS.210.302 or Webcase score and a supplementary test.

Instructor(s): B. Reilly.

AS.212.355. Literature and Opera. 3 Credits.

In this course we will look at the relation between some of the great opera’s of the 18th and 19th centuries and their literary sources. We will also discuss some recent philosophical interpretations of opera. At stake will be the question of how literature is translated into music and stagecraft, and what these translations say about the times and cultures in which they were produced. Each week we will view and listen to an opera, and read its source materials as well as critical works about both. The course will be conducted in English, and will be writing intensive. (This course is offered as AS.212.355, 213.355, 214.355, and 215.355. Please check other course numbers for open seats.)

Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.212.394. Renoir, Vigo, Carne: French Cinema of the 1930’s. 3 Credits.

Conducted in English. An exploration of French cinema of the 1930s and the movement that produced some of the most influential masterworks of world cinema; focus on close analysis of films. Lecture Tuesday 1:30-4pm, Screening Monday 7:30-10pm. $40 Lab fee

Instructor(s): S. Roos
Area: Humanities.

AS.212.400. Flaubert’s L’Éducation sentimentale, a Prose Novel for Modern Time. 3 Credits.

Undergrads need instructor permission. Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Éducation sentimentale edition required: GF Flammarion, 2003.

Instructor(s): J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.212.401. The Literature of Medieval Cathedrals. 3 Credits.

To understand medieval cathedrals we must “read” them through the literature of the age. This course will examine the medieval literature that illuminates some of the great cathedrals of twelfth- and thirteenth-century France. The texts studied will be in modern French translation and will come from a variety of genres: lyric poetry; romance; epic; devotional literature; biography and autobiographical confession. Cannot be taken Satisfactory/Unsatisfactory. Taught in French. Recommended Course Background: AS.210.302

Instructor(s): B. Reily
Area: Humanities.
AS.212.403. Flaubert’s Madame Bovary, Prose as a Modern Art. 3 Credits.
AS.212.403 for advanced undergrads. Through a close reading of Flaubert’s novel and selective consideration of the drafts, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modern art. Our central concern, in other words, is with Madame Bovary as a crucial event in aesthetic modernity, one that has had a prodigious afterlife in both literature and visual arts. Seminar will be taught in French and English. Madame Bovary edition required: Le Livre de Poche Classique, 1999. Meets with AS.212.623 Cross-listed with Humanities Center
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.404. The City in Early-Modern French Literature. 3 Credits.
The city is an integral theme, even a privileged character, in the literary and speculative texts of the 17th and 18th century. It is often understood to stand opposition to the royal court and embodies the spirit of the people in a way related to the modern notion of “solidarity”. This course will look at a number of examples of the peculiar status of the French city (especially Paris) from the late Renaissance to the First Empire. Selections from Marguerite de Valois, Mme de Sévigné, Montesquieu, Diderot, Rousseau, Turgot, Ruault, Réité de la Bretonne, Mercier, Saint-Just, Robespierre, Napoléon Bonaparte, with perhaps a coda from Balzac or Michelet. Recommended Course Background: AS.212.333-AS.212.334 or permission of instructor.
Instructor(s): W. Anderson
Area: Humanities Writing Intensive.

AS.212.406. Monsters in the 16th and 17th Centuries. 3 Credits.
Area: Humanities
Writing Intensive.

AS.212.407. Banquets Meals Table-Talk. 3 Credits.
Area: Humanities
Writing Intensive.

AS.212.410. Toward Modernity: France 1848-1885. 3 Credits.
The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré. Co-listed with AS.211.410
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.412. Temps et recit dans le cinema francais. 3 Credits.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.

AS.212.414. Body as Vehicle: The French 20th Century Approach to Theatrical Performance. 3 Credits.
From Greek tragedy to postmodern stage productions: 20th century theater practitioners revisit performance through the ritual and emotional experience of physical action on the stage. Hence, the actor’s body operates as a bridge relating traditional forms of expression to theatrical performance, as well as a creative — and sensitive — source of emotions. This vehicle becomes in the hands of some 20th century practitioners an object of experimentation, initiating the concepts and practices of an Anthropology of the Theater. A thorough study of theoretical texts, music, as well as videos showing contemporary performances in France, will explore the variety of this theatrical approach and the way some revolutionary theories influenced theater practice in France and worldwide.
Instructor(s): E. Vaou
Area: Humanities.

AS.212.415. Dumas & Verne: The Spirit of a New Age. 3 Credits.
Instructor(s): W. Anderson
Area: Humanities.

AS.212.417. Texts of/on the Terror from the French Revolution. 3 Credits.
Taught in French. During the first half of the semester we will take advantage of the renewed interest in scholarship on the Terror to deal with some of the most famous examples of Revolutionary rhetoric, focusing especially on the trial of Louis XVI and the late speeches of Robespierre. During the second half of the semester we will read literary works produced during the Terror and accounts of the Terror from authors such as Balzac, Dumas, and Michelet. We will be asking questions such as: What was the Reign of Terror and to what extent was its project dependent on public discourse? Why and how does the nature of public oratory change? What happens to definitions of “the literary” and of authorship in a terroristic context?
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.418. Medieval French Lyric Poetry. 3 Credits.
Medieval French lyric poetry contains many powerful expressions of a poet’s relationship to society. This course will study the diversity of responses to the questions confronting any medieval poet writing about the world he (or sometimes she) lived in. Our readings over four centuries of medieval French literature will reveal the many worlds in which these poets lived and wrote. Close reading of texts in modern French translation, with emphasis on their social and cultural contexts.
Instructor(s): B. Reilly.

AS.212.421. Textes et Performances: le theatre francais du 17e au 19e siecle. 3 Credits.
Area: Humanities.

AS.212.427. Libertins, Athées, Imposteurs. 3 Credits.
An exploration of the clandestine culture of free-thinkers, hedonists and rakes in France in the 17th and the 18th centuries and their strategies for undermining the theological grounding of morality, politics, sexuality and gender. Readings from Descartes, Cyrano de Bergerac, Molière, Diderot, Sade, Laclos and others. Meets with 211.427
Instructor(s): E. Russo
Area: Humanities.
AS.212.428. Reading Poetry. 3 Credits.
The course will offer a close reading and interpretation of prominent poems, from Early Modern to Contemporary, from Du Bellay and Ronsard to Ponge, Char, Roubaud and some of the most recent works. This course will present an opportunity to question the historical variations of Poetry, of it’s function and importance in Society. What mean the changes in poetic forms, how work the tensions between verse and prose in modern Poetry, what’s interesting in writing and reading Poetry will be some of the main topics of the course. The students will be asked to compose and comment their own “French Poetry Anthology.” Course held in French, but including researches on the poetical translatability. **Prerequisites:** AS.212.20 or AS.212.202 or permission

Area: Humanities.

AS.212.429. Thesis Prep. 1 Credit.
This course will meet three times during the Fall semester to enable all French majors to prepare their thesis subject, thesis bibliography, and abstract prior to the writing of the Senior Thesis (AS.212.430) in the Spring semester of their senior year. This course is required of all French majors and must be taken during the Fall semester of their senior year. Schedule TBA upon consultation with the class list, as there are only three group meetings. The rest of the meetings are in individual appointments with the DUS or another chosen French professor. **Prerequisites:** Prerequisite or Corequisite: AS.210.417

Instructor(s): Staff
Area: Humanities.

AS.212.430. Senior Seminar. 3 Credits.
An in-depth and closely supervised initiation to research and thinking, oral and written expression, which leads to the composition of a senior thesis in French. **Instructor(s):** D. Schilling
Area: Humanities
Writing Intensive.

AS.212.434. Reading Poetry. 3 Credits.
The course will offer a close reading and interpretation of prominent poems, from Early Modern to Contemporary, from Du Bellay and Ronsard to Ponge, Char, Roubaud and some of the most recent works. This course will present an opportunity to question the historical variations of Poetry, of it’s function and importance in Society. What mean the changes in poetic forms, how work the tensions between verse and prose in modern Poetry, what’s interesting in writing and reading Poetry will be some of the main topics of the course. The students will be asked to compose and comment their own “French Poetry Anthology.” Taught in French, but including researches on the poetical translatability. **Prerequisites:** AS.212.333 OR AS.212.334 OR AS.212.201 OR AS.212.202

Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.438. Dream and Imagination in XXth century literature: French Surrealism and the Hispano-American “Boom. 3 Credits.
Taught in French. This course explores different uses of dreams and the imagination in contemporary narrative, working on both fictional and critical texts from the French surrealist corpus (“Manifeste du Surréalisme”, extracts from Breton, Crevel, Aragon’s narratives) and the Latin American “boom” (preface to Carpentier’s “The Kingdom of this World”, Cortázar, Borges, García Márquez or Piñera’s short stories). A comparative approach will allow us to discuss how fantasy in literature can enlighten and widen our perception of reality. The Latin American texts will be studied in the context of their reception in the French literary scene. **Instructor(s):** Staff.

AS.212.443. Marcel Proust, Literature and Art. 3 Credits.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Meets with 212.773, 300.406 and 300.684. **Instructor(s):** J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.212.448. Baudelaire: Art, Poetry, Modernity. 3 Credits.
Seminar taught in French and English. Charles Baudelaire is widely regarded as the decisive figure in 19th Century literary and artistic Modernity. In this seminar we will read his magnificent Les Fleurs du mal and Spleen de Paris and his equally remarkable art criticism, as well as various critical discussions of his achievement. Cross-listed with Humanities Center. **Instructor(s):** J. Neefs; M. Fried
Area: Humanities.

AS.212.455. Order, Disorder, and the Passions in French Literature of the 16th and 17th Centuries. 3 Credits.
This course will examine how the passions became a defining issue in major French literary works during the sixteenth and seventeenth centuries. As a source of unpredictability and instability, the passions have always represented a potentially direct threat to the foundations of social collectivity. How and why did the passions become a central concern for literary thought during the Renaissance and Baroque periods? Under what conditions can the passions become socially and politically constructive, or destructive? How can examining passions in literature help us understand the shifting relations between the individual and society? **Recommended Course Background:** AS.210.301

Instructor(s): J. Vance
Area: Humanities.
AS.212.466. The Pleasures of Tragedy. 3 Credits.
Why do we experience pleasure in watching representations of bad things happening to people on stage? Are the emotions aroused by tragedy ethical or immoral? These are just some of tragedy’s many paradoxes, which have been explored by philosophers over time, from Plato to Augustine, to Rousseau, to Hume. This course proposes to explore some of the enigmas and conundrums raised by a genre which everybody agrees cannot be defined by common formal and thematic features, but which we all feel able to recognize when we see it. Is there an essence of tragedy that endures from 5th century Greece to today? Or are the things that make us call a play tragedy radically different according to time and place? How is tragedy related to philosophy, religion and politics? Tragedy has been declared in turn “dead” (killed by Christian notions of redemption, by political utopianism, by philosophical optimism, by the dissolution of language, etc.) and renewed, through the sense of the absurd, postmodern immanence, irredeemable violence – and indeed, there has been a flourishing of the genre in France in the late XXth century. Through readings of a selection of plays, both ancient and modern, and theoretical works, we’ll examine the metamorphosis of the tragic hero and heroine, the issues of gender, moral responsibility and the management of the spectator’s emotions. Readings from Sophocles, Aristotle, Corneille, Racine, Hegel, Kierkegaard, Anouilh, Sartre, Césaire, Koltès, Gabily. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.

AS.212.469. Limit-Experience, Limit-Texts. 3 Credits.
Among the many functions of literary narrative is that of describing and domesticating extreme experience, from the horrors of war and incarceration to religious ecstasy, madness, and acute illness. Writers have long exploited the extreme to probe the reaches of human consciousness and the social pacts that differentiate transgressive from normal behaviors. Drawing on the work of 20th century French-language authors of novels, short stories, and witness accounts (Breton, Camus, Chraïbi, Delbo, Duras, Guibert, Le Clézio, Volodine), this course will explore how narrative strategies relate to extreme states, situations, and conditions. At the same time, through excerpts from experimental writers from Surrealism to l’écriture féminine, we will also consider how language itself can create a manner of limit-experience by questioning the boundaries of the readable. Course in French.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.471. Jules Verne. 3 Credits.
An overview of the corpus of the author of the "Voyages extraordinaires". The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in the new human sciences and their relationship to the development of cultural models. A disabused, even pessimistic thinker, he provides a unique entryway into the fin-de-siècle French mind set. Works to be read will include "Cinq semaines en ballon", "Voyage au centre de la terre", "De la terre à la lune", "20,000 lieues sous les mers" and "L’Île mystérieuse", "Le Tour du monde en quatre-vingt jours", "Robur le conquérant" and "Le Maître du monde", "le Sphinx des glaces", "Le Château des Carpathes", and "Paris au XXe siècle". Class will be taught in French. This course can either be taken as a 211 Culture course or a 212 Literature course.
Prerequisites: AS.212.334
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.478. Guillaume de Machaut: exploring medieval authorship in the digital age. 3 Credits.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. Students will learn to use digital tools to view and analyze original illustrated musical manuscripts of Machaut’s work.
Instructor(s): T. Rose-Steel
Area: Humanities
Writing Intensive.

AS.212.481. The 18th-Century French Novel. 3 Credits.
Key novels will be studied from a variety of approaches. Authors to include Marivaux, Montesquieu, Prévost, Diderot, Crébillon, Rousseau, and Voltaire. Recommended Course Background: AS.212.333 and AS.212.334 or AS.212.333 and permission of the instructor.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.501. French Independent Study. 3 Credits.
Instructor(s): D. Schilling; W. Anderson.

AS.212.502. French Indep Study-Lit. 0 - 3 Credit.
Instructor(s): D. Schilling; E. Russo; J. Neefs; W. Anderson
Area: Humanities.

AS.212.596. Independent Study-Spanish. 3 Credits.
Instructor(s): E. Gonzalez.
AS.212.601. Word and Image: An Introduction to the Languages of Literature and Cinema.
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language's exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin's take of New Realism, Christian Metz's structuralist approach to cinema and psychoanalysis, Gilles Deleuze's theory of the moving-image and the time-image, a feminist approach to cinema by E.Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English (This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.)
Instructor(s): B. Wegenstein; P. Forni.

AS.212.603. Senses of the Imagination in Medieval Thought and Lyric.

AS.212.604. Around Baudelaire.
Topics in Baudelaire’s art and thought, and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mallarmé, Proust, Benjamin, Starobinski, Bonnefoy, Roubaud, Deguy). Readings and discussion will be mainly in French.
Instructor(s): J. Neefs; M. Fried; T. Rose-Steel.

AS.212.605. The Idea of Literature.
European languages document the evolution of the concept of literature from a generic term indicating the body of writings produced in a particular country or period to one that more particularly signifies works endowed with an aesthetic quality. The concept of literature thus seems to take form in connection with the emergence of a critical discourse, the search for a standard of taste. The dream of founding a “science littéraire” modeled on the principles of structural semiotics searching for an elusive “literariness”, literature as a system, a set of formal features, not a collection of discrete, ineffable individuals; it thus involved a rejection of the aesthetic, or at least a reconsideration of its assumptions. This course will pursue the question of “The Idea of Literature” simultaneously from a philosophical and a historical perspective; in moving from formalist literariness to the rediscovery of categories like the ethical, the subject, the reader, the author, and the aesthetic, we will ask such questions as: Can there be a return to an aesthetic education, as some wish, and what would that be? Would such a move resuscitate the ghost of Hume’s gentleman scholar, which the New Critics tried to do away with? Is there a way of formally distinguishing between literature and its various contexts? Authors will include Hume, Kant, Taine, Lanson, Sainte-Beuve, Brunetière, Arnold, Proust, Benjamin, Bréton, Sarthe, Bourdieu, De Man, and Eco.
Instructor(s): E. Russo; W. Egginton.

AS.212.607. Tragedy on Stage and in Theory.
Perhaps more than any other genre, tragedy tempts us to search for origins, to recover its previously pristine state, to lament its decadence, even its death. But is there an essence of tragedy? Is tragedy the product of a specific historical moment (sixth-century Greece) or is it a universal quality of human experience? Is it a philosophical notion or a strictly theatrical one? Through selected readings of plays and theories we shall explore some of the significant metamorphosis of tragedy, from Aeschylus to Corneille, Racine, Voltaire, Hegel, Nietzsche, Freud, Anouilh and others.
Instructor(s): E. Russo
Area: Humanities.

AS.212.611. Humanistes, Spirituels et Littéraires: Autour de Marguerite de Navarre.
Instructor(s): J. Vance.

AS.212.613. Marivaux and French Taste.
Pourquoi Marivaux était-il à la fois un auteur de succès et l’écrivain le plus déconsidéré de la part des philosophes? La lecture de ses œuvres théâtrales, narratives et journalistiques les plus significatives nous permettra d’explorer les controverses qui travaillent l’écriture des Lumières, la querelle des anciens et des modernes, le rapport entre goût et politique, et de mieux comprendre l’esthétique dite rococo.

AS.212.615. Encyclopedic narratives, 19th - 20th Century.
Novels use and give many kinds of knowledge. The seminar will examine how narratives consume and expose facts, notions, ideas, technical devices, highly complex learning, and present themselves as encyclopedic narratives. We’ll work on novels conceived as pedagogical instrument (Jules Verne), or allegorical epic (Viktor Hugo), or deeply ironic and skeptical prose (Flaubert, Raymond Queneau), or intimate historical vivid memory (Pierre Michon). We’ll examine how narrative prose can build strong worlds of knowledge.
Instructor(s): J. Neefs.

The development of the drame bourgeois and the theater criticism of the French Enlightenment. Authors to be studied include Racine, Le Sage, Marivaux, Voltaire, Diderot, and Beaumarchais. <a href="http://www.wilda.org/Courses/CourseVault/Grad/Theater/Syllabus.html">Course Syllabus</a>
Instructor(s): W. Anderson.

AS.212.618. Les Lumières: reseaux de communication au 18e siecle.

AS.212.620. The Encyclopedie.
In its attempt to realize fully the potential of a group description of knowledge, the Encyclopédie of Diderot and d’Alembert displays the program of the philosophies in a particularly intense and idiosyncratic form. This intellectual conversation will be studied through the investigation of several different subjects treated in the Encyclopédie; for example, the theory of the encyclopedia itself, history, natural history, literature, medicine, and theories of language.
Instructor(s): W. Anderson.

AS.212.622. The Making of the Work: Introduction to Genetic Criticism.

AS.212.623. Flaubert’s Madame Bovary, Prose as a Modern Art.
Through a close reading of Flaubert’s novel and selective consideration of the drafts, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modern art. Our central concern, in other words, is with Madame Bovary as a crucial event in aesthetic modernity, one that has had a prodigious afterlife in both literature and visual arts. Seminar will be taught in French and English. Madame Bovary edition required: Le Livre de Poche Classique, 1999.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.
AS.212.627. Littérature, Mythes, Religions au 19ème Siècle.

AS.212.632. Utopias.
Reflecting on the genre of the Utopia which from the late 17th century through the late 19th century alludes to diverse ideological constructions, such as the Golden Age, the “Pays de Cocagne”, fantastic worlds, primitive societies, the state of nature, “robinsonnades”, science fiction. Instructeur(s): W. Anderson.

Seminar taught in French and English. Charles Baudelaire is widely regarded as the decisive figure in 19th century literary and artistic Modernity. In this seminar we will read his magnificent Les Fleurs du mal and Spleen de Paris and his equally remarkable art criticism, as well as various critical discussions of his achievement. Cross-listed with Humanities Center
Instructeur(s): J. Neefs; M. Fried.

What does it mean to read? Who reads, how, and how have those practices changed from the late 17th century to the early 21st? How do the material conditions of publication and the material support of the text affect readership and interpretation? How do authors of literary works embody such issues within their texts? To be discussed within the French context from Molière through modern digital humanities research environments and to focus critically on recent work in the history of the book. (begins 2/4/09)
Area: Humanities.

AS.212.640. Mercier.
Playwright, renowned essayist, philosophe of a sort and just plain observer of the late Parisian Enlightenment, Mercier’s literary career embodied the esthetic, political and conceptual changes that occurred in the move from the Ancien Régime to the Révolution française, the Terreur, the Thermidorean period and the Napoleonic movement of Paris. This course will cover some of his plays and other writings, especially his Tableau de Paris and its post-revolutionary continuation Le Nouveau Paris.
Instructeur(s): W. Anderson.

AS.212.641. Actualités de la fiction.
Ce séminaire se voudrait à la fois traversée de la fiction française et francophone très contemporaine (années 1990-2000) et réflexion sur le contemporain en terme d’actualités. On entendrait l’actualité à la fois dans le sens courant de ce qui est actuel parce que faisant partie d’un moment présent, et dans l’acception plus conceptuelle de tout ce qui relève d’une performance directe et renouvelée, de ce qui est en acte et non en puissance mais qui est en même temps une puissance en acte. Dynamis, energeia, l’actualité de la littérature est ainsi l’actualisation de ses puissances’ (par les lectures, les traductions). On se concentrera en particulier sur les relations entre littérature et pensée dans le fiction contemporaine.

AS.212.644. Libertinage: entre révolte et fantasme.
The prerevolutionary libertine novel, starring at its center the character of the libertine, is the one most iconically associated with the French novel and with notions of transgressive “Frenchness,” intended both for national use and for export. In the wake of the pioneering work of René Pintard (Le Libertinage érudit dans la première moitié du 17e siècle, 1943) libertinage was emancipated from the fictional realm and promoted to a category of intellectual and cultural history. Yet recent critics have contested the use of this label, arguing that the historical individuals who were so called were a heterogeneous collection who had nothing in common apart from their marginality, which was in turn stigmatized or valorized. The purpose of this course is to examine critically the relationship between fictional and historical libertine, the many overlaps between the “transgressive” and the “erudite” communities, the role they played in the emergence of the “radical” Enlightenment and scientific materialism, their subversive use of language, the fluctuation between protective strategies of equivocation and the audacity of parrèsia. Readings from trial documents, pamphlets, correspondance, novels and essays, by G. C. Vanini, François Garasse, Antonio Rocco, Théophile de Viau, Descartes, Cyrano de Bergerac, Dassoucy, Bayle, Boyer d’Argens, Voltaire, Sade, Diderot, Laclau.
Instructeur(s): E. Russo.

AS.212.655. Persistence of the City.
This course will address a number of problems derived from current ecological and sustainability concerns, via readings of classic texts of the French avant-garde and modernist tradition (early to mid- twentieth century: Romans, Breton, Le Corbusier, Debord), as well as films (Godard, Resnais) and reportages of more recent date. To be taught in English, this course will be of interest not only to students of French and comparative literature, but to students in urban planning, design, sustainability studies, and architecture. Dates of classes: 2/3, 2/17, 3/2, 3/16, 4/6, 4/20.
Instructeur(s): A. Stoekl
Area: Humanities.

AS.212.661. Post-Revolutionary Passions.
Coming to terms with the Enlightenment, the French revolution and the collapse of the political and spiritual authority that grounded the old regime, post-revolutionary thinkers confronted critically the responsibility of the intellectual and the nature of ideological violence; they reinvented the sacred in an attempt to shape a new self and redraw the boundaries between reason and belief. Classes in English, readings in French (some available in translation). Works by Constant, De Staël, Chateaubriand, De Maistre, Ballanche, Tocqueville, Michelet, Taine.

AS.212.666. Writers Confront Time, Posteriority and Survival.
This course will discuss various ways by which authors see time as shaping and inflecting the reception and the value of their works. I will focus on a select group of Enlightenment philosophers with some forays into classical antiquity and the Romantic period. The purpose of the seminar is to explore the existence of a relationship between models of transmission of aesthetic value and models of cultural, theological and biological "evolution." Works by Diderot, Voltaire, Charles Bonnet, Rousseau, Ballanche and others.
Instructeur(s): E. Russo
Area: Humanities
Writing Intensive.
AS.212.671. Light and Color in Medieval French Literature.
A study of medieval representations of light and sight. The literature of medieval France entered into dialogue with the science, theology, and art of the time to both reflect and create new ways of seeing. By examining what medieval thinkers wrote about how they saw, we shall come to understand on their own terms what they saw, including: manuscript illuminations; stained glass; secular and religious clothing.
Instructor(s): B. Reilly.

Taught by Visiting Professor Lydie Moudileno: The course will examine representation of Europe, mostly but not exclusively France and Paris in the fiction produced by writers from the former French colonies, from the 1950’s to the present.
Instructor(s): L. Moudileno.

AS.212.678. The Life and Works of Chrétien de Troyes.
A close study of the extant corpus written by Chrétien de Troyes, from his lyric poems to his last unfinished Arthurian romance. Active during the so-called “Twelfth-Century Renaissance,” Chrétien remains one of the founding authors of French literature. This seminar will explore the intellectual, social, and societal influences that shaped his works. It will also look to the contemporary debates which these works continue to inspire.
Instructor(s): B. Reilly.

AS.212.698. Esthétique et politique dans la France des années 50 et 60.

AS.212.700. Flaubert’s L’Éducation sentimentale, a Prose Novel for Modern Time.
Undergrads need instructor permission. Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Éducation sentimentale edition required: GF Flammaron, 2003.
Instructor(s): J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.212.703. Literary Renaissance of the 12th Century.
The High Middle Ages in France witnessed both a re-birth of learning and a re-invention of literature. This course examines the medieval French literature that flourished during this “Twelfth-Century Renaissance.” It considers texts across of variety of genres (the roman antique; courtly lyric; autobiography; lai; chronicle) in order to interrogate literature’s engagement with the surrounding intellectual currents. In particular this seminar asks how literature’s relation to the past changed during this time and how it came to create something new.
Instructor(s): B. Reilly
Area: Humanities.
AS.212.704. Violence & Tragedy.
This seminar traces the persistence of violence in tragedy. Working though traditional periodization insisting on an evolution away from spectacular baroque violence toward disembodied neoclassical purity, we will explore how violence continually shaped theater as a multi-sensorial, multi-medial practice. While the primary source of our discussion will be seventeenth-century France (Hardy, Rotrou, Corneille, Racine, et al.), ample opportunity will be made for students to present research from the literary traditions in which they work. Contemporary theorists and critics (Bersani, Benjamin, Biet, Chartier, Elsner, Greenberg, Loraux, Heller-Roazen, et al.) will be available in English. Taught in English. Dates of classes: 2/10, 2/24, 3/9, 3/30, 4/13, 4/27.
Instructor(s): Staff
Area: Humanities.

AS.212.705. Fictions d’espace: geopoetique du roman de langue francaise.
En quoi consiste et par quels moyens se construit l’espace dans les fictions littéraires ? Quelles fonctions y jouent les toponymes, les descriptions de lieux, les trajectoires des personnages ou encore ces excroissances visuelles que sont les cartes ou les plans ? Quels contrats l’écrivain peut-il passer avec son lectorat à l’égard du statut des espaces traversés et décrits, qu’ils se fendent sur le « réel » ou qu’ils soient fabriqués de toutes pièces ? Cette introduction à la géopoétique propose d’aborder la mimésis littéraire sous sa dimension spatiale. Si d’une part notre objectif est de forger des concepts d’analyse littéraire en dialogue avec le discours sur l’architecture et la géographie, d’autre part nous chercherons à construire des lectures d’œuvres qui misent sur la puissance évocatrice des espaces et des lieux. Puisant dans la littérature d’expression française depuis 1800, de Balzac à Chamoiseau en passant par Giono, Ramuz, et Perec, nous relèverons divers “chronotopes” (Bakhtine) ayant contribué à forger l’imaginaire géographique. Course in French.
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

AS.212.708. Testimony and Literature in the Twentieth Century.
The XXth Century produced an enormous amount of testimonies. One can even say that it invented the genre of witnessing. The seminar will study testimonies in variety of languages about extreme historical situations (World Wars, totalitarianism, colonial wars, genocides, etc.). Through a close and careful reading of some of these texts, we shall try to formulate general problems pertaining at the same time to literary analysis, historical investigations, and political, ethical, juridical, anthropological issues. We’ll read works written in French — by Benjamin Fondane, Robert Antelme, Charlotte Delbo, Elie Wiesel, by Rithy Panth, or Jean Hatzfeld. But at every moment we shall compare them with texts written in other languages (using French or English translations) – by Primo Levi, Imre Kertesz, Jean Améry, Tadeusz Borowski or Aharon Appelfeld, by Ossip Mandelstam, Alexander Soljenitsyn or Varlam Chalamov, by Toge Sankichi or Ibuse Masuji, by Yi Ch’ong Jun or Hwang Ji U, by Rithy Panth, etc. (2x/week beginning 3/24)
Area: Humanities.

AS.212.710. Les religions du 19e Siècle.
Chateaubriand, Michelet, Quinet, Hugo, mais aussi bien Nerval, Baudelaire, Flaubert, Mallarmé, les œuvres du 19ème siècle se rapportent aux paradigmes religieux d’une manière particulièrement forte et problématique. De l’histoire des religions aux religions du Progrès, le fait religieux est interposé par la littérature, autant que la littérature se confronte à lui. Le séminaire s’appuiera sur la lecture précise de quelques textes déterminants en ce sens.
Instructor(s): J. Neefs.

AS.212.717. Montesquieu.
The first half of the seminar is devoted to a close reading of some of Montesquieu’s major works in law, politics, fiction, history and the natural sciences, with an emphasis on the negotiations between nature, law and society. The second half will focus on selected interpretations and appropriations of Montesquieu’s thought from the 18th to the 20th century. In English, reading knowledge of French.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

This course will focus on the idiosyncrasy of Diderot’s concept of the fictional and his complementary practices of authorship, anonymity and pseudonymity in the context of the middle years of the French Enlightenment. For more information, see http://www.wlida.org/Courses/ CourseVault/Grad/DiderotFictions/Syllabus.html
Instructor(s): W. Anderson.

AS.212.735. Narratives of Ordinary.
What we may understand by “Ordinary”? The Seminar will attempt to consider the esthetic apparition and the historical, sociological, political, and anthropological meaning of that notion: narrative prose and poetry, from Flaubert to Queneau and Perec, from Baudelaire to Ponge and Roubaud will be examine under this point of view, in relation with what we could conceive as an esthetical development of the notion, including its sociological and philosophical aspects (Lepenies, Boltanski, De Certeau, Danto, Rancière, Cavell). The course will be held in French, on French texts, but could include references to works in English or German or other languages, in English or French translation.
Area: Humanities.

One is never done with Rousseau: generations of readers and a myriad of critical schools have mapped in many, contradictory ways the vast territory he has explored: composer, musicologist, novelist, dramaturgist, botanist, political philosopher, autobiographer, pedagogue, prophet, dreamer, persecuted victim and, always, provocateur. Rousseau lived and wrote at the intersection of pathos and logos, history and myth, reason and the sacred and his method, if any, was to construct a system against all systems. We will read his major works in light of the debates they have triggered both within the Enlightenment and postmodernism.
Instructor(s): E. Russo.

AS.212.743. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Meets with 212.443, 300.406 and 300.684.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.
Within less than a century, three major thinkers appear, who could not be more different from each other. Each embodies a worldview, a method and a style that illustrate a typical trend in the intellectual history of Early Modern France. We will study passages from Montaigne’s Essais and from Pascal’s Pensées, as well as Descartes’ Discours de la méthode. The emphasis will be on the interaction between thought and style. The seminar will be held in French.

AS.212.748. French Poetry in the 16th Century.

AS.212.752. The Character Function.
What do we really mean when we talk about a "character" in a discursive work? What are the structuring, aesthetic and heuristic functions of such devices? How has the concept of the character evolved from the early modern period to the present day? A sampling of the cases to be considered: Descartes, Leibniz, Marivaux, Racine, Diderot, Rousseau, Robespierre, Napoleon, Michelet, Zola, avatars and “digital angels”.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive

AS.212.773. Marcel Proust, Literature and Art.

Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Meets with 212.443, 300.406 and 300.684.
Area: Humanities

Les ressemblances de famille, malgré leur évidence, procèdent de constructions intellectuelles et affectives. La relation qu’elles établissent entre deux éléments ne se limite pas à l’analogie, elle importe une représentation de la parenté. La ressemblance de famille est un mode d’apparentement qui, sous le couvert du naturel, procède de discours et d’imaginaire structurants : qui ressemble à qui ou à quoi? La réponse à cette question ordinaire implique non seulement une philosophie mais aussi une politique distributive du commun et du dissemblable. Le séminaire étudiera la construction de ces ressemblances et leur implications idéologiques notamment dans les sciences de la vie et les discours sur l’hérédité. Il analysera le fonctionnement logique -• métaphore ou paradigme d de la ressemblance. Il portera sur la physionomie, corps et visages, dans les imaginaires littéraires et artistiques, selon leurs enjeux sexuels et sociaux. Bibliographie : Goethe, Les Affinités électives; Darwin, L’Origine des espèces; Zola, Le Docteur Pascal; Wittgenstein, Recherches logiques 65-67; Genet, Les Bonnes.

AS.212.778. Les écritures contemporaines aux confins des genres [Contemporary French Writing Beyond the Genres.
A critical survey of hybridized or mixed literary forms that have emerged in French-language writing since the postwar revolution of the New Novel and the materialist forays of the Tel Quel group circa 1968. What attitudes might be adopted toward texts that seemingly invent their own rules, refusing generic ascription even as they borrow freely from established narrative and poetic codes? How might we resist the temptation to view works of motivic reprise, pastiche, formal constraint, and intertextual weaving as symptoms or expressions of a disenfranchised "postmodern condition," and endeavor instead to situate these texts in the contemporary moment, as elements of a vital cultural critique? Authors to be considered include Bon, Cadiot, R. Camus, Gavarry, Levé, Perec, Quintane, Redonnet, J. Rolin, Simon, and Viel. Seminar in French.
Instructor(s): D. Schilling
Area: Humanities

The course will examine the transformation of Paris in the 14th century into the cultural capital of the West: a center for politics, music, art, literature, architecture, the making of beautiful books, and the site of the first national library. Translations from Greek and Latin spurred new music, new poetry, and new genres of thought. All combined to create a new “myth of Paris” that became a cornerstone for political thought, and artistic practice. Readings include Christine de Pizan, Oresme, Machaut, Froissart.
Area: Humanities
Writing Intensive

AS.212.781. L’entre-deux-guerres en toutes lettres [French Literature Between the Wars].

This transversal approach to French literary culture between the wars (1919-1939) first asks to what extent the desire to “change life” came in response to the collective tragedy of the Great War, which left France with 1.5 million war dead. In contrast to the relative prosperity and bourgeois consensus of the Belle Epoque, the 1920s and 1930s were marked by anxiety, class conflict, xenophobia, and the quest to forge new forms of liberation both collective and individual. In addition to the profound impact of war on a generation of writers and intellectuals, we will address the relationship these women and men entertained with emergent discourses on modernity, gender roles, revolution, nationalism and internationalism. Authors to be considered include Barbusse, Breton, Céline, Cocteau, Colette, Dabit, Gide, Giono, Malraux, Morand, Némirovsky, Nizan, Prévert, Sartre, and Simenon. Course in French.
Instructor(s): D. Schilling
Area: Humanities

AS.212.782. Le Grand Siècle: Construction of a Myth.
A study in the politics of canon formation, in which categories such as “classicism,” “baroque,” “libertinage,” “préciosité” are not so much objective descriptions of the period in question as models for appropriating the past and embedding it into the dynamics and the conflicts of the present. Readings from the iconic works of this contested tradition (Perrault, Bossuet, Naudé, Racine, Corneille, Nicole, Fénelon) and from some of the historians who have appropriated and/or questioned it, from Voltaire to Alain Viala.
Instructor(s): E. Russo.
AS.212.789. Literature & Identity in the Age of Globalization.
In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.

AS.212.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism toward interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities.
The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology, and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce, and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollack, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with AS.213.790, AS.214.790, and AS.215.790
Instructor(s): E. Strowick; J. Neefs.

AS.212.791. Film Theory and Critical Methods.
This survey of critical approaches to the study of film explores theoretical problems of representation and reality, film form and signification, authorship, spectatorship, and the digital frontier. Each week we examine a different narrative historical period, or a given theoretical aspect through films that students will watch independently as well as at mandatory weekly screenings.
Instructor(s): B. Wegenstein; D. Schilling.

AS.212.801. French Independent Study.
Instructor(s): D. Schilling; E. Russo; J. Neefs; W. Anderson.

AS.212.802. French Dissertation Rsch.
Instructor(s): D. Schilling; E. Russo; J. Neefs; W. Anderson.

AS.212.803. French Proposal Prep.
Instructor(s): D. Schilling; E. Russo; J. Neefs; W. Anderson.

AS.212.229. Weimar on the Pacific: German Exile Culture in the United States. 3 Credits.
Taught in German. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film (Fritz Lang, Billy Wilder) to architecture (Richard Neutra, Rudolf M. Schindler), literature (Thomas Mann, Berthold Brecht, Lion Feuchtwanger), and philosophy (Theodor W. Adorno, Hannah Arendt). Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Prerequisites: AS.210.362
Area: Humanities.

AS.212.233. Freshman Seminar - A History of Reading: from Gutenberg to Kindle. 3 Credits.
Freshmen only. This course investigates the 18th-century revolution in reading – the pedagogical and aesthetic debates about the virtues and dangers of reading, idealizations and critiques of print culture, books as material objects, and the shifting concepts of both author and reader, and to what extent this historical period anticipates our own present day revolution in reading technologies.
Area: Humanities.

AS.213.235. Panorama of German Thought I. 3 Credits.
Taught in English. German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition are Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed the study of cultural, historical, and social phenomena as well as of literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This two-semester survey course will highlight important topics of German Thought, e.g. the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. While the first semester (Fall) covers until 1850 (from Luther to Hegel/Kierkegaard), the second (Spring) focuses on Modern German Thought after 1850 (from Marx to Luhmann).
Area: Humanities.
critic of German narrow-mindedness. defender of the experiences of the body, a tender human being, and a scintillatingly witty writer, a light-footed and poetic thinker, a bold with his idea of the eternal return of the same. But Nietzsche was lovemaking with truth. And he stunned generations of intellectuals after He embarrassed the old philosophers exposing their, as he put it, clumsy for philosophical tradition culminated in the call to "philosophize with a . Friedrich Nietzsche continues to be one of the most radical and work and a first journey into the world of German thought, culture, and . Area: Humanities. Freshman Seminar: This seminar offers an introduction to Nietzsche's . AS.213.251. Friedrich Nietzsche. 3 Credits. Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore "illness as metaphor" (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard's "In the Cold" and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: "Philadelphia" (Jonathan Demme, 1993), "Melancholia" (Lars von Trier, 2011). Instructor(s): E. Strowick Area: Humanities. AS.213.252. The Idea of the University: Modern German Thought and the Hopkins' Experiment. 3 Credits. Readings and discussion in English. Many of the issues we grapple with today regarding higher education have a long history dating back to the eighteenth and nineteenth centuries, when the first modern universities were founded in Germany. What is the relation of research to teaching? How do we define scholarship? What is the difference between professional training and academic study? How do we distinguish secondary education from higher learning? What obligations does the university have vis-à-vis the state, which often finances it in whole or in part? What protections does the state owe the university when it pursues research that runs counter to the interests of state? What purpose does the ivory tower serve in an age in which higher learning is no longer limited to the classroom but is widely available (via books, radio, television, the internet)? In this class we will explore the rich literature from the nineteenth century on the idea of the university and the value of learning. We will conclude the course with an examination of the German roots of Johns Hopkins. Cross-listed with History Instructor(s): R. Tobias Area: Humanities. AS.213.253. Freshman Seminar: Jewish Humor and the Construction of Cultural Discourse. 3 Credits. With the fall of the Berlin Wall in 1989, one of the most powerful symbols of the Cold War came down. For decades, the division between East and West Germany had been a decisive factor in German literature and film from both states in several respects. Political censorship in the GDR and West German publishing policies determined the conditions for art production. They created specific audiences and shaped the role of the public intellectual. The Berlin Wall could also be said to have contributed to certain trends like the aesthetics of coldness and the poetics of observation. The course examines the relationship between aesthetics and politics in German-German literature and film from 1961 to the present. Readings include: Christa Wolf, Uwe Johnson, Reiner Kunze, Peter Schneider, Ingo Schulze, Anna Funder. Films: Wings of Desire (Wim Wenders, 1987), The Leading Role (Harun Farocki, 1994), The Tunnel (Roland Suso Richter, 2001), Good Bye, Lenin! (Wolfgang Becker, 2003), The Lives of Others (von Donnersmarck, 2007), Yella (Christian Petzold, 2007). The course will be taught in English. Instructor(s): M. Caplan Area: Humanities. AS.213.254. Modern Jewish Literature in North America. 3 Credits. Taught in English. This course will survey the major trends in Yiddish, Hebrew, and English literature published in the United States, Canada, and Mexico since the turn of the 20th century. Our discussions will consider the connections this literature maintains with other "ethnic" schools of writing; what connections, or disruptions, it signifies with Jewish literatures in other eras or locales; to what degree Jewish writing in languages other than English participate in major trends of American literature—or whether this writing could even be considered to anticipate innovations in the American "mainstream." Topics in this literature will include the disruptions of immigrant life, the shadows of the Holocaust and anti-Semitism, aspirations for social justice, the lure and trauma of the American suburbs, the collapse of the Great Society, gender in American Jewish life, and the new Jewish immigrants of the former Soviet Union. All readings and discussions available in English. Instructor(s): M. Caplan Area: Humanities.
AS.213.265. Panorama of German Thought. 3 Credits.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Krauss, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): A. Glazova
Area: Humanities.

AS.213.301. Franz Kafka. 3 Credits.
The course is an introduction to the life, work and milieu of Franz Kafka. While reading Kafka's short stories (e.g., Das Urteil, Der Verwandlung, Ein Bericht für eine Akademie, along with diary entries and Letter to his Father (Brief an den Vater), we will pay close attention to the author's understanding of writing, his relationship to his father, Jewish tradition, history, and his fascination of the foreign and the exotic. We will also focus on Kafka's influences; critical reception; reader problems in approaching Kafka's works; Kafka's situatedness in fin-de-siècle Prague; and issues in translating Kafka into English. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Glazova
Area: Humanities.

AS.213.302. Reality Effects: 19th Century German Prose. 3 Credits.
The course will examine how mid- and late-19th-century literature creates so-called reality effects which make the text seem a representation of the social world. The term "effect" intends to mark a most decisive insight: that literature does not simply depict a pre-given outer life but produces illusionary impressions of 'authenticity' by using various aesthetic and rhetorical devices (e.g. modes of description, frames, specific narrations of time and space). In reading Gottfried Keller, Adalbert Stifter, Conrad Ferdinand Meyer, Theodor Storm and Theodor Fontane we will analyze these aesthetic strategies in relation to literary conventions and codes which readers have learned to interpret as 'realistic'. Given that these conventions change over time and are situated in specific contexts, we will also be discussing the historicity of reality effects with respect to the rise of photography and modern historiography in the 19th century. Taught in German. Recommended Course Background: AS.210.362
Prerequisites: AS.210.362
Area: Humanities.

AS.213.305. Gespenster: verschwiegen und doch weitergegeben. 3 Credits.
We will study the psychic afterlives of WWI, Nazism, and Stasi experiences and involvements. These are stories that are often not told in the family but nevertheless handed down across generations in powerful, less-than-explicit, and often distorted ways. Drawing on philosophy and psychoanalysis, we will discuss how the need for silence meets the need to talk and to hear. We will read literature and analyze films on the family lives of former political prisoners in the GDR, Stasi informants, Nazi perpetrators, victims of the Holocaust, and soldiers of the First World War. Reading and discussion in German. Recommended Course Background: AS.210.361
Prerequisites: AS.210.361
Instructor(s): K. Pahl
Area: Humanities.

AS.213.309. Walter Benjamin and His World. 3 Credits.
All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.310. Classic German Theater. 3 Credits.
Prereq: 210.362 Language of instruction: German. In this seminar we will read some of the most important plays of German literature, by Lessing, Goethe, Schiller, Kleist, and others. We will explore questions about the role of the theater in the education of mankind in the spirit of the enlightenment. We will examine how tragedy is reconfigured around the concept of the bourgeois family. And we will study historical practices of stage production.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.312. Contemporary German Literature (1970 to the present). 3 Credits.
The seminar examines the way cultural and historical topics are presented in contemporary German literature. The selected texts originate in different national contexts (Swiss, Austrian, German, German-Turkish, German-Japanese) and deal with questions concerning the representation of national, cultural, and individual identity. We will explore how the texts (de)construct these identities through narrative structures and will contextualize these structures with respect to recent theories of (trans)cultural identities. Authors include: Eugen Gomringer, Yoko Tawada, Terézia Mora, Thomas Hürli, Martin Suter, Christoph Schlingensief, Max Frisch, Günter Grass, Thomas Bernhard, Maxim Biller, and Thomas Meinecke. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.
AS.213.317. Berlin at the Crossroads of the 20th Century. 3 Credits.
This course will examine the location of Berlin at the heart of European and global culture over the course of the 20th century. In addition to its centrality to German national identity and political culture, Berlin between the World Wars was a weigh station and meeting ground for a variety of cultures, languages, and artistic trends—whether expatriates, refugees, nomads, touring companies, or vagabonds. In what ways did these travelers to Berlin change German popular or intellectual culture? In what ways did Berlin function as a center for avant-garde culture, and in what sense did it remain a peripheral space, in the shadow of grander culture centers such as Moscow, Paris, New York, or Hollywood? What lessons might be taken from the supposed glamour of Berlin between the World Wars and the continued attraction of that period for post-Holocaust adaptation and contemplation? These questions, among others, will be considered with reference to a variety of narratives, dramas, and films taken from German, English, Hebrew, Russian, and Yiddish sources. Authors to be considered will include Walter Benjamin, Joseph Roth, Irmgard Keun, Erich Kästner, Bertolt Brecht, Christopher Isherwood, Sh. Y. Agnon, Vladimir Nabokov, Viktor Shklovsky, and Dovid Bergelson. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.318. The Making of Modern Gender. 3 Credits.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.319. The Making of Modern Gender - German Section. 1 Credit.
Instructor(s): K. Pahl; M. Wessels.

AS.213.320. Anti-Cinema: Topics in film poetics and theory. 3 Credits.
While the historical success of the moving image stems largely from its ability to make things on screen look like things in „real“ life, throughout all eras, there have been filmmakers who have - consciously or not - worked against the aesthetic, ideological, and philosophical problems that lurk behind the representational promise of the medium. The seminar examines some of those problems by watching films ranging from Buster Keaton’s silent comedies to Lars van Trier’s recent experiments in film form, as well as reading the texts of authors ranging from Walter Benjamin to Jacques Rancière.
Area: Humanities.

AS.213.321. Bodies and Pleasures. 3 Credits.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women’s writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Amin, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.325. Johann Wolfgang von Goethe: Bridging Literature and Science. 3 Credits.
Open to Sophomores or higher standing. This course will examine the literary and scientific works of Goethe (1749-1832). We will explore the complex relations between literature and science at a point in history where the disciplinary boundaries were more porous than they are today. In this seminar, we will read those works, in which literature and science intersect, via style or subject matter, but most importantly, via their joint philosophical underpinnings, revealing that for Goethe science and literature are not two separate trains of thought but form a highly intricate discursive web. Goethe's oeuvre offers the unique opportunity to discuss the relations between literature and science around 1800, the formation period of “modern” natural sciences and the beginning of their domination over literature and philosophy, by analyzing one author, who straddled both realms, and who reflects on the value of scientific and literary discourses. Cross-listed with History of Science and Technology Dean's Teaching Fellowship - Taught in English
Instructor(s): C. Domenghino
Area: Humanities.

AS.213.330. “What is an Image?” - Technology, Art and Visual Culture around 1900. 3 Credits.
Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Instructor(s): J. Schade
Area: Humanities.

AS.213.331. Detective Fiction in its Nascence. 3 Credits.
Although Edgar Allen Poe is often called the father of detective fiction, this assumption is not entirely correct. Sixty years before Poe published his “Murders in the Rue Morgue,” Schiller wrote the novella “Der Verbrecher aus verlorener Ehre,” which was decisive for the development of the genre in Germany. Schiller’s novella carried the subtitle, “Eine wahre Geschichte,” which underscored the tension between “true” events and “probable” circumstances which is characteristic of detective fiction in general. In this course we will examine the competing notions of truth (Wahrheit) and probability (Wahrscheinlichkeit) at play in German detective fiction from the eighteenth to nineteenth century. We will explore why the romantics emphasized truth as a defining feature of literature and how the realists replaced this notion with verisimilitude. Authors to include: Schiller, Kleist, Tieck, Hoffmann, Drost-Hülshoff, Fontane, Storm, Paul Heyse, Richard Alewyn. Reading and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.
AS.213.332. Zionism in Modern Literature: Jewish or Israeli?. 3 Credits.
This course will be an examination of the themes of nationalism, Zionism, and the problems of the nation-state in modern Jewish literature of the past hundred years. Among the topics we will consider are the unique challenges of a diasporic culture relocating its national aspirations to an unfamiliar and often hostile environment, the controversies surrounding political nationalism within modern Jewish culture, the competition between languages in the formation of Israeli society, the character of Israeli national culture, the relationship of Israel’s Jewish majority with its minority population, and the relationship of Israeli culture to the Jewish culture of the diaspora. To what extent does Israeli literature constitute a continuation of themes and techniques found in previous Jewish writing, and to what extent does it represent a new beginning? To what extent can Israeli literature be compared with other varieties of Jewish writing and to what extent is this writing a unique cultural phenomenon? Although the majority of works discussed will be translated from Hebrew—including such leading figures of Israeli literature as S. Y. Agnon, S. Yizhar, Amos Oz, and Orly Castel-Bloom—we will also be considering works translated from Yiddish (Mendele Moykher-S Rohing), German (Theodor Herzl), and Arabic (Emile Habiby), as well as contemporary American writers such as Philip Roth and Michael Chabon. All readings and discussions conducted in English. Cross-listed with Jewish Studies, English, and the Humanities Center.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.336. Dancing About Architecture: Jewish Humor and the Construction of Cultural Discourse. 3 Credits.
Are all Jews funny, or only the ones from New York? This course will be an advanced-undergraduate examination of literary, theatrical, cinematic, and televised representations of Jewish culture focusing on the construction of cultural discourse through comedy. Taking as a point of departure Sigmund Freud’s Jokes and Their Relation to the Unconscious, we will consider the joke as a mode of narration and cultural coding with specific resonances for the Jewish encounter with modernity. Among the topics to be addressed in this course will be the origins of modern Jewish humor in traditional modes of storytelling and study; the problems of anxiety and otherness articulated and neutralized through humor; the significance of Jews in creating popular culture through mass mediums (particularly though not exclusively in the United States) as well as the role of these mediums in transmitting and translating Jewish references to the general culture; the status of the Yiddish language as a vehicle for satire and a vehicle of resistance between tradition and modernity; the uses and abuses of Jewish stereotypes and the relationship of Jewish humor and other modes of minority discourse; and the question of translation of Jewish humor both from Yiddish into other languages and from the Jewish “in-group” to a “post-ethnic” audience. Authors and performers to be examined will include Aaron Halle-Wolfssohn, Sholem Aleichem, Franz Kafka, Moshe Nadir, Dzigan and Schumacher, the Marx Brothers, Philip Roth, Woody Allen, Mel Brooks, Jerry Seinfeld, Larry David, and Sascha Baron Cohen. All readings and discussions conducted in English.
Area: Humanities.

AS.213.337. German Freshman Seminar: Jewish Humor and the Construction of Cultural Discourse. 3 Credits.
Are all Jews funny, or only the ones from New York? This course will be an advanced-undergraduate, writing-intensive examination of literary, theatrical, cinematic, and televised representations of Jewish culture focusing on the construction of cultural discourse through comedy. Taking as a point of departure Sigmund Freud’s Jokes and Their Relation to the Unconscious, we will consider the joke as a mode of narration and cultural coding with specific resonances for the Jewish encounter with modernity. Among the topics to be addressed in this course will be the origins of modern Jewish humor in traditional modes of storytelling and study; the problems of anxiety and otherness articulated and neutralized through humor; the significance of Jews in creating popular culture through mass mediums (particularly though not exclusively in the United States) as well as the role of these mediums in transmitting and translating Jewish references to the general culture; the status of the Yiddish language as a vehicle for satire and a vehicle of resistance between tradition and modernity; the uses and abuses of Jewish stereotypes and the relationship of Jewish humor and other modes of minority discourse; and the question of translation of Jewish humor both from Yiddish into other languages and from the Jewish “in-group” to a “post-ethnic” audience. Authors and performers to be examined will include Aaron Halle-Wolfssohn, Sholem Aleichem, Franz Kafka, Moshe Nadir, Dzigan and Schumacher, the Marx Brothers, Philip Roth, Woody Allen, Mel Brooks, Jerry Seinfeld, Larry David, and Sascha Baron Cohen. All readings and discussions conducted in English.
Area: Humanities.
Writing Intensive.

AS.213.341. Images of America in German Literature. 3 Credits.
Since the 18th century, European thinking and imagination has envisioned America as a complex network of both positive and negative projections: With the ‘American dream’ laid down in the Declaration of Independence, the United States has represented the great model of individual freedom, democracy and modernization. At the same time, this ‘new world’ has been depicted as the epitome of alienation, human degradation, and (decaying) capitalism. As both a euphoric and dysphoric vision, America has been reflected in German literature, particularly in narrative accounts of travelling, novels, stories, and essays ranging from Goethe’s “Wilhelm Meisters Wanderjahre” to Kafka’s “Der Verschollene,” and beyond. The seminar will analyze the images of America in German literature of the 19th and 20th century in their historical contexts. We will further investigate concepts of identity and politics, perceptions of time and space and their aesthetic representation. Authors include: Johann Gottfried Herder, Goethe, Nikolaus Lenau, Novalis, Heinrich Heine, Karl May, Franz Kafka, Peter Handke, Max Frisch, Uwe Johnson, and others.
Readings and discussions in German.
Instructor(s): A. Krauss.

AS.213.343. Holocaust in Modern Lit. 3 Credits.
Area: Humanities.
Writing Intensive.
AS.213.344. Holocaust and Film. 3 Credits.
Taught in English. This class will examine the history of Holocaust films in regard to the possibilities of genre (documentary versus feature), the use of historical and archival materials, as well as general considerations of representation and trauma. I CINEMA OF THE VICTIMS II CINEMA OF THE PERPETRATORS III CINEMA OF THE SECOND AND THIRD GENERATIONS WITNESSES Students will be writing weekly response papers to all screenings, and will choose to work with films in the original languages German, English, Italian, and French. This class will be writing-intensive. Cross-listed with Film and Media Studies, Political Science, History, and Jewish Studies.
Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.

AS.213.346. Faust Legends. 3 Credits.
The legendary figure of Faust, a man who sells his soul to the devil in exchange for knowledge, self-fulfillment, and power, has attracted continuous interest from writers, artists, composers, and thinkers over the last 400 years. This course will analyze the various transformations of the Faust legend as they emerged in German literature since the 18th century. It will focus especially on how the different treatments of the legend adapt the motif to its particular historical situation, and where exactly the elements of (dis)continuity lie. By means of close readings, the seminar will also investigate the multiple forms and genres by which the legends have been represented, as narrative texts, dramas, poems, or films. Authors include: Lessing, Klinger, Goethe, Grabbe, Heine, Hesse, Lasker-Schüler, Klaus Mann, Brecht. We will also consider F.W. Murnau’s and P. Gorski’s film versions of Faust, as well as I. Szabó’s movie Mephisto based on Klaus Mann’s novel of the same title. Readings and discussions in German.
Prerequisites: AS.210.362
Area: Humanities.

AS.213.349. Weimar Cinema: The Golden Age of German Film. 3 Credits.
Taught in German. German cinema of the 1920s is regarded as one of the “golden ages” of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception; Expressionism in film; technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): E. Strowick.

AS.213.353. Introduction to German Thought. 3 Credits.
Area: Humanities.

AS.213.354. Introduction to German Poetry. 3 Credits.
This class will introduce students to German poetry from the eighteenth to the twentieth century. We will read selected poems by Goethe, Eichendorff, Mörike, George, Hofmannsthal, Rilke, Trakl, Celan, and Bachmann. In addition we will read several theoretical essays by poets and literary critics alike which examine the lyric form and the curious world that poetry constructs. Readings and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.355. Literature and Opera. 3 Credits.
In this course we will look at the relation between some of the great opera’s of the 18th and 19th centuries and their literary sources. We will also discuss some recent philosophical interpretations of opera. At stake will be the question of how literature is translated into music and stagecraft, and what these translations say about the times and cultures in which they were produced. Each week we will view and listen to an opera, and read its source materials as well as critical works about both. The course will be conducted in English, and will be writing intensive. (This course is offered as AS.212.355, 213.355, 214.355, and 215.355. Please check other course numbers for open seats.)
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.213.356. Goethe. 3 Credits.
This seminar offers an introduction to the work of Goethe (1749-1832) who is one of the most prominent figures in the history of German literature and thought and according to T.S. Eliot ‘one of the wisest of men’. Tracing this wisdom through selected poems, prose, plays and essays, we will closely analyze the fascinating complexity of an oeuvre that reflects Goethe’s interdisciplinary interests in the aesthetic, philosophical, and scientific discourses and controversies of his time. Readings will include: Prometheus, Goetz von Berlichingen, Faust I, The Sorrows of Young Werther, Iphigenia in Tauris, Novella, Metamorphosis of Plants, Theory of Colours etc. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.359. Kleist. 3 Credits.
Heinrich von Kleist was one of the most intriguing literary figures of the early nineteenth century in Germany. Neither Classicist nor Romanticist, he developed a unique style that combines such different elements as complex rhythmicality, drastic imagery, and philosophical precision. His novellas, plays, and nonfiction prose explore questions of gender, colonialism, the tragic, and of innocence and double dealing. Among the texts we will read together are “The Betrothal in St. Domingo” (Kleist’s literary response to the Haitian revolution), “Penthesleia” (the play about lovers who can find each other only in war ends in a splatter scene), and “Marquise of O” (the story of a woman whose father rejects her because she finds herself pregnant, and yet she has no memory of the sexual intercourse that must have led to her current situation). Language of Instruction: German
Prerequisites: AS.210.362 OR AS.210.461 OR AS.210.462 OR INSTRUCTOR PERMISSION
Instructor(s): K. Pahl
Area: Humanities.
AS.213.362. Sigmund Freud. 3 Credits.
The course will examine Freud's writings from a two-fold perspective: On the one hand, we will analyze the contributions of psychoanalysis to modern thought. Lining himself up with Copernicus and Darwin, Freud considers his concept of the "unconscious" a further insult to mankind's narcissism and revolution of thought. In this respect, psychoanalysis affects a vast array of concepts of modern thought such as subject, language, sexuality, morality, culture, history, religion and art which we will discuss alongside with key terms of psychoanalysis (unconscious, repetition, transference etc.). On the other hand, the course will address the specific relation between psychoanalysis and literature. Throughout Freud's writings, literature enjoys vivid interest. Not only are psychoanalytic concepts (e.g. Oedipus complex, narcissism, the uncanny) crucially informed by literary texts, but also Freud's "Interpretation of Dreams" proves to be a theory of representation and reading. We will investigate the ways in which literature and psychoanalysis are involved with each other considering narrative forms, performative aspects and aspects of the genre (novel, novella). Readings and discussions in English.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.367. Contemporary German Film. 3 Credits.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 10 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarck's "The Lives of Others" (Academy Award for Best Foreign Language Film, 2006), Caroline Link's "Nowhere in Africa" (Academy Award for Best Foreign Language Film, 2002), Fatih Akin's "Head-On" (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel's "Downfall" (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker's "Goodbye, Lenin!" (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as "Berlin School" or "Nouvelle Vague Allemande". Dissecting the everyday reality of post-wall Germany, this 'counter-cinema' draws on the New German Cinema of the 1970s (among other influences) to develop radical notions of realism and challenge narrative conventions. This course will offer a survey on German Film since 2000 – discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Prerequisites: AS.210.362
Instructor(s): E. Strowick
Area: Humanities.

AS.213.368. German Political Thought. 3 Credits.
This course will introduce students to major figures in German political thought from Martin Luther to Karl Marx and Immanuel Kant to Carl Schmitt. The class will explore such issues as the notion of sovereignty, the relationship between church and state, the theory of parliamentary democracy, and the political and economic ramifications of liberalism. Reading and discussion in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.370. Contemporary German Literature. 3 Credits.
The seminar examines the way cultural and historical topics are presented in contemporary German prose. The selected texts originate in different national contexts (Swiss, Austrian, German, German-Turkish, German-Japanese) and deal with questions concerning the representation of national/cultural/individual identity. We will explore how the texts (de)construct these identities through narrative structures. In close readings we will analyze these structures and contextualize their literary mode of representation in connection with recent theoretical approaches to problems of national and cultural identities. Authors include Libuše Moniková, Yoko Tawada, Terézia Mora, Feridun Zaimojyu, Thomas Huerlimann, Hermann Burger, Martin Suter, Elfriede Jelinek, Thomas Bernhard. Readings and discussions in German.
Prerequisites: AS.210.362
Area: Humanities.

AS.213.371. Kafka and the Kafkaesque. 3 Credits.
Taught in English. Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term "kafkaesque" refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka's poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka's prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka's impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka's oeuvre while developing skills in critical analysis and literary close reading.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.372. Literature and Dream. 3 Credits.
Area: Humanities.

AS.213.376. Art in Literature. 3 Credits.
Discussion in German. Since the Enlightenment, works of art have played a prominent role in literary texts, providing an occasion for texts to reflect on their status as art and to explore the possibilities and challenges unique to aesthetics. In this course we will examine novellas and poems that refer to paintings or other works of art to illuminate the nature of art and to reflect on phenomena that have no place in any other discourse. Readings to include works by Lessing, Eichendorff, Storm, Mörke, Adrian, Freud, and Hofmannsthal.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): R. Tobias
Area: Humanities.
AS.213.380. Ghost Stories, Haunted House and Other Occult Phenomena. 3 Credits.
Although the eighteenth century is often associated with the Enlightenment, the period also gave birth to the gothic novel with its lurid description of haunted houses, ghosts, phantoms, and diabolical forces in nature. This course will examine the modern obsession with occult phenomena from Chamisso to Bram Stoker and Freud, whose 1919 essay “The Uncanny” constitutes one of the most rigorous analyses of the irrationality of psychic life. We will consider the appearance of ghosts in literature as well as explore the status of literature as a play of appearances, of light and shadow. Why have ghost stories been so prevalent in the modern era, when science and reason are said to dominate our understanding of the world? Is the occult the dark side of science? What kind of knowledge does literature yield? And what can literature tell us about random, obscure, or inexplicable events? Readings in English and German; discussion in English. Additional hour for German discussion through AS.213.381. Cross-listed with English
Instructor(s): R. Tobias
Area: Humanities.

AS.213.381. German Reading of Ghost Stories, Haunted House and Other Occult Phenomena. 1 Credit.
This is an additional one-hour course in reading and discussing the texts in German for AS.213.380 “Ghost Stories, Haunted Houses and Other Occult Phenomena.” Must also be registered for AS.213.380.
Corequisites: AS.213.380
Instructor(s): R. Tobias
Area: Humanities.

AS.213.382. Orphans: Literature’s Pursuit of Paternity. 3 Credits.
This course will examine how literature reflects on the source of its own images and personae through the motif of orphans. In our readings, we will see that orphans do not merely constitute a figure among many others in literary works. Instead they have special significance as an allegory of literature itself, which searches for but cannot locate its origin. Authors to include Lessing, Schiller, Goethe, Tieck, Kleist, Stifter, Hofmannsthal, and Walser. Reading and discussion in German.
Area: Humanities.

AS.213.399. Realism. 3 Credits.
Area: Humanities.

AS.213.402. Reality Effects: 19th Century German Prose. 3 Credits.
The course will examine how mid- and late-19th-century literature creates so-called reality effects which make the text seem a representation of the social world. The term "effect" intends to mark a most decisive insight: that literature does not simply depict a pre-given outer life but produces illusionary impressions of ‘authenticity’ by using various aesthetic and rhetorical devices (e.g. modes of description, frames, specific narrations of time and space). In reading Gottfried Keller, Adalbert Stifter, Conrad Ferdinand Meyer, Theodor Storm and Theodor Fontane we will analyze these aesthetic strategies in relation to literary conventions and codes which readers have learned to interpret as ‘realistic’. Given that these conventions change over time and are situated in specific contexts, we will also be discussing the historicity of reality effects with respect to the rise of photography and modern historiography in the 19th century.
Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.403. Women and Their Representation in Modern Jewish Literature. 3 Credits.
If the development of modern literary forms such as the novel, the short story, and the autobiography in Jewish languages commences at a much later date than in other European cultures, the participation of women in the cultivation of these literary forms in Yiddish or Hebrew begins even later: only at the very beginning of the 20th century. What are some of the cultural and historical factors that account for this belatedness? How were women depicted in Jewish literature prior to their entry into the literary marketplace? How does the late start of female writers in these languages affect the formal and political character of their writing? What do aesthetic differences between poetry and prose genres signify about this writing? How do cultural assumptions in Jewish languages differentiate women’s writing from similar forms and genres in other languages? These questions, among others, will be considered with reference to a variety of narratives and poems taken from Yiddish, Hebrew, German, and English sources. Authors to be considered will include Esther Singer Kreitman, Anna Margolin, Kadya Molodowsky, Chava Rosenfarb, Rachel Bluwstein, Leah Goldberg, Orly Castel-Bloom, Else Lasker-Schüler, and Gertrude Stein. All readings and discussions in English.
Area: Humanities.

AS.213.412. What is Enlightenment?. 3 Credits.
Readings and discussions in German. “Enlightenment”, a European intellectual and social reform movement of the 18th century, advocated as the primary basis of authority and the means to scrutinize previously accepted doctrines and traditions. Thinkers in England, France, and later in Germany began to question the authoritarian state, and the orthodoxy of the Church. They attacked intolerance, censorship, and social restraints and argued in favour of the emancipation of the bourgeois individual on the basis of universally valid principles. This course offers an introduction to German Enlightenment through close readings of philosophical and literary texts. The analysis will focus on concepts of freedom, humanity and education, the significance of feelings and emotions for the constitution of individuality, and the critique of reason in late Enlightenment. Authors include: Gottsched, Lessing, Herder, Goethe, Mendelssohn, Kant.
Instructor(s): A. Krauss

AS.213.426. Thomas Mann. 3 Credits.
The course will be taught in German. In this course we will explore one of the most fascinating German authors of the 20th century. Exceptional in its stylistic elegance, its irony and coldness, Mann’s prose addresses major topics of modernism such as the tension between rationality and passion, between artistic and bourgeois existence, between modernity and myth. In close readings of selected novellas and novels (excerpt), we will analyze Mann’s rhetorical style, his narrative technique of leitmotif and the intertextuality of his prose; further we will examine the substantial relationship of Mann’s writing to philosophy (Schopenhauer, Nietzsche), medicine, psychoanalysis, and music (Wagner, Schönberg).
Instructor(s): E. Strowick.
AS.213.440. Franz Kafka: The Power of Writing. 3 Credits.
The course analyzes texts by Franz Kafka from a twofold perspective. Inasmuch as his work tirelessly addresses processes of administration, law, punishment, knowledge production and family structures, it can be considered an analysis of modern institutions and forms of power by means of literature. But these forms of power also inform Kafka’s poetic practice. His literary techniques relate to modern communication systems (postal system) and media technologies used in modern bureaucracy (typewriter, phonograph/sound writer, telephone). In close readings we will examine how the specific performative, rhetorical and material character of Kafka’s texts contribute to the power of writing or what Deleuze/Guattari call a ‘minor literature.’ The course will also explore Kafka’s impact on 20th century literary theory and philosophy (Benjamin, Canetti, Deleuze/Guattari). Readings and discussions in German. Recommended Course Background: AS.210.362 Area: Humanities.

AS.213.450. Decadence. 3 Credits.
Early twentieth-century literature has been variously characterized as nihilist, fascist, revolutionary, aristocratic, and anti-bourgeois. As this brief list indicates, the characterization has been anything but consistent. In this course, we will examine the artistic and political dimensions of the decadent movement, which sought to fashion life as an aesthetic phenomenon. Our explorations will take us from the turn-of-the-century in Vienna to the roaring twenties in Berlin. We will ask how the writers on the syllabus conceive of life and art and what distinction, if any, they draw between works of art and lived experience. Reading and discussion in German. Area: Humanities.

AS.213.501. Independent Study - Literature. 3 Credits.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; M. Caplan; R. Tobias.

AS.213.502. German Independent Study - Literature. 0 - 3 Credit.
Instructor(s): E. Strowick; M. Caplan; R. Tobias.

AS.213.509. German Honors Program. 3 Credits.
Instructor(s): E. Strowick; K. Pahl; R. Tobias.

AS.213.510. German Honors Program. 0 - 3 Credit.
Instructor(s): E. Strowick; K. Pahl; R. Tobias Area: Humanities.

AS.213.597. German Lit Ind Stdy-Summer. 3 Credits.
Instructor(s): M. Caplan.

AS.213.601. Word and Image: An Introduction to the Languages of Literature and Cinema.
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language’s exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin’s take of New Realism, Christian Metz’s structuralist approach to cinema and psychoanalysis, Gilles Deleuze’s theory of the moving-image and the time-image, a feminist approach to cinema by E. Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English (This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.) Instructor(s): B. Wegenstein; P. Forni.

This graduate-level seminar will consider the theoretical problems and relationship between tragedy and comedy as modes of narration, methods of performance, and philosophical dispositions. Among the topics we will consider are the reciprocal relationship of comedy and tragedy; their respective derivation from myth, ritual, and philosophical dialogue; the relation of each to concepts of selfhood, society, the body, and the body politic. Along the way we will also examine questions such as why tragedy has attracted so much greater theoretical and philosophical interest than comedy, why comedy has been subdivided into various genres while tragedy has remained relatively indivisible, what political uses these modes of storytelling might signify, and how each serves as a mode of critique toward other narrative and dramatic conventions. Authors to be considered include Sophocles, Shakespeare, E.T.A. Hoffmann, Kafka, Brecht, Sholem Aleichem, Sh. Y. Agnon, Moyshe Kulbak, Ahmadou Kourouma, and the Coen Brothers. Theorists will include Aristotle, Hegel, Nietzsche, Freud, Lacan, and Zupancic. All readings and discussions in English. Instructor(s): M. Caplan.

The course analyzes the transformations of the relationship between form – life – aesthetics with regard to Goethe’s morphological writings as well as the complex history of the reception in the philosophy of life (Spengler, Klages), in literary Modernism (Rilke, Einstein, Benn, Kafka) and in the early cultural studies of the 20th century (Simmel, Cassirer, Blumenberg). The “doctrine of the shape of formation (Bildung) and transformation (Umbildung) of organic bodies,” Goethe’s morphology considers shape (Gestalt) not as something static but in constant change, taking particular interest in the movable (“das Bewegliche”), i.e., processes of transformation in their temporality: “Observing all shapes, particularly organic ones, nowhere do we find something established, something inactive, but rather everything oscillates in constant movement. Hence our language uses the word Bildung for both, the emerged as well as the emerging.” A nexus between life and form, Bildung raises the problem of representation: A force towards representation, it itself escapes representation. It is by way of metamorphosis and dynamization of representation that the relationship between life and form is arranged anew, again and again – imposing questions of Bildung, representability (Bildlichkeit), morphological methods and poetics on modern literature and the humanities. Taught in German. Recommended Course Background: AS.210.311-AS.210.312 or instructor permission. Instructor(s): E. Strowick Area: Humanities.
AS.213.604. Small Forms.
Small forms cover the broad field from aphorism, epigram, fable and riddle to anecdote, short story, novella, ... and treatise. In each of those ‘compositional arts’ the smallness unfolds in different and historically specific ways. Spanning a period from 1770 to 1940 and focusing (not exclusively) on aphorisms, the seminar will explore the manifold poetics of the small in literature and philosophy: What can small mean on the level of (literary) form? What (historically specific) kind of readings do small forms facilitate? What readings do they thwart? What happens to aphorisms when they become parts of a monstrously large overall composition? What distinguishes small forms from (e.g.) fragments? How do small forms relate to simple forms (Jolles) or minor literature (Deleuze)? To what extent do small forms gain epistemological impact, e.g. with respect to the critique of system and systematic philosophy since 1870? Readings include Lichtenberg, Schlegel, Novalis, Nietzsche, Kafka, Robert Walser, Benjamin, Adorno, Heidegger, Sebald, Sterne, Jan Potocki, Ivan Turgenev, Sholem Aleichem, Gertrude Stein, and Eco. Instructor(s): A. Krauss. Area: Humanities.

AS.213.605. The Idea of Literature.
European languages document the evolution of the concept of literature from a generic term indicating the body of writings produced in a particular country or period to one that more particularly signifies works endowed with an aesthetic quality. The concept of literature thus seems to take form in connection with the emergence of a critical discourse, the search for a standard of taste. The dream of founding a “science littéraire” modeled on the principles of structural semiotics searching for an elusive “literariness”, literature as a system, a set of formal features, not a collection of discrete, ineffable individuals; it thus involved a rejection of the aesthetic, or at least a reconsideration of its assumptions. This course will pursue the question of “The Idea of Literature” simultaneously from a philosophical and a historical perspective; in moving from formalist literariness to the rediscovery of categories like the ethical, the subject, the reader, the author, and the aesthetic, we will ask such questions as: Can there be a return to an aesthetic education, as some wish, and what would that be? Would such a move resuscitate the ghost of Hume’s gentleman scholar, which the New Critics tried to do away with? Is there a way of formally distinguishing between literature and its various contexts? Authors will include Hume, Kant, Taine, Lanson, Sainte-Beuve, Brunetière, Arnold, Proust, Benjamin, Bréton, Sartrre, Bourdieu, De Man, and Eco. Instructor(s): E. Russo; W. Egginton.

This course will consider the link between modern fiction and melancholia, which on the one hand seems obvious given the prevailing mood of many modern narratives by Beckett, Sebald, Bernhard, Krovow, among others and which on the other hand poses numerous interpretative challenges given the sparing nature of representation in modern fiction and the attachment to things in melancholia. What is the aesthetic sensibility associated with melancholia? Is melancholia limited to baroque representation? How can we conceive of attachment in the absence of things? Readings to include Freud, Benjamin, Adorno, Heidegger, Sebald, Beckett, Bernhard, and Hofmannsthall. Instructor(s): R. Tobias. Area: Humanities.

We will read texts by Freud, Klein, Lacan, and Laplanche that are of particular interest for literary and social theory. We will discuss recent literary theory and criticism (especially queer literary theory and criticism) that draws on psychoanalysis. In addition, we will consider psychoanalytically inflected thought on sexuality and conformism by members of the Frankfurt School. Instructor(s): K. Pahl. Area: Humanities.

AS.213.609. Anti-Novels: Narrative Failure and the Poetics of the Periphery.
Insofar as the novel as a form can be taken as the representative narrative mode of the modern era, this graduate seminar will identify an inverted literary tradition of digression, fragmentation, stasis, and proliferation in the assemblage of narratives that either structurally or thematically violate conventions of novelistic mimesis and verisimilitude. Paramount among the themes to be considered in this survey will be whether such an inverted or counter-tradition is possible at all, given the plasticity of the novel form. To the extent that such a tradition constitutes itself, however, to what extent does its attraction for peripheral writers—defined linguistically, culturally, and politically—offer a critique of the homogenizing and hegemonic aspects of modernity? Does the persistence of pre-modern narrative conventions serve to anticipate subsequent innovations attributed specifically to the modernist novel? Do the cues such anti-novelistic narratives take from non-belletristic modes of writing as well as visual or musical arts signify a violation of literary decorum or an integration of the arts, and of art with life, that actually valorizes the modernizing processes these writers would critique? What is the difference, both figuratively and critically, between a literature of failure and a failed literature? In what sense can these modes of failure be considered productive? Authors to be considered will include Laurence Sterne, Jan Potocki, Ivan Turgenev, Sholem Aleichem, Gertrude Stein, Robert Walser, Der Nister, Yosef Haim Brenner, Moshe Kulbak, André Breton, Thomas Bernhard, and Georges Perec. All readings and discussions conducted in English. (Undergraduates Accepted, with Permission of the Instructor).

AS.213.610. The Idea of a University in Classical German Philosophy.
The role and function of a university in life and in society was a topic of considerable concern for some of the most prominent German philosophers of the late 18th and early 19th century. Their published (and unpublished) contributions led to a new understanding of what a university should be that proved to be very influential for the conception of the ‘modern’ university, as realized in Germany in the 19th century. The seminar will examine the writings of Kant, Fichte, Schelling, Schleiermacher, and Humboldt on the university with attention to the relation of the authors’ thoughts on education to their more general philosophical positions. The seminar will begin on March 22 and continue to the end of the term. Instructor(s): R. Horstmann.
AS.213.611. The Baroque and Its Afterlives.
The status of the Baroque as defined and discussed by theorists such as Walter Benjamin and Gilles Deleuze, preeminently, manifests itself in a melancholic preoccupation with relics, ruins, and allegory. As such its aesthetic originates at a cosmological fault-line between life and death. Given these metaphysical characteristics, it should come as little surprise that its subsequent influence on literary modernism constitutes itself in echoes, spectrality, fragmentation, and the grotesque, all of which function as modes of critique working through and against technologies and ideologies of modernity. The fate of the Baroque, in an aptly non-Euclidean baroque figure, both parallels and intersects with the status of other proto-modern discourses such as the carnival in the articulation of the gothic, symbolism, expressionism, and several varieties of modern fantasy. This seminar will discuss one of many possible trajectories for this aesthetic in drama, narrative, and critical theory. Beginning with authors such as Shakespeare, Grimmelshausen, and Calderón de la Barca, we will consider works such as Fritz Lang's Metropolis or the recent adaptation of Coriolanus. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

This course will explore the aesthetic-political practices of literatures and manifestos grouped under the term historical avant-garde. According to the most general understanding, avant-garde is considered the critique of bourgeois culture and 'traditional' art concepts, with this critique being related to a fundamental crisis of bourgeois society. The seminar aims at developing a more specific perspective by discussing the following aspects of avant-garde poetics: the self-reflection of aesthetic discourse in regard to the definition and hierarchization of styles and genres; a theory of language that draws on rhythm and materiality; an aesthetics of production which questions the notion of authorship and 'organic work' and stresses instead the constitutive role of repetition, (inter-medial) variation, and chance; the critical intervention in the concept of production which questions the notion of authorship and 'organic work' and stresses instead the constitutive role of repetition, (inter-medial) variation, and chance; the critical intervention in the concept of aesthetic autonomy and its institutions of reception; the "aporias of the avant-garde" (Enzensberger) inherent in its concept of radical innovation and exceptionality. In order to highlight the theoretical implications of avant-garde poetics, we will analyze its literary strategies with respect to contemporary debates on modern technologies of art reproduction (Benjamin), the psychoanalytic reframing of the subject, and the advent of literary structuralism/formalism (Jakobson). In addition to that, we will discuss classics of avant-garde scholarship (e.g. Peter Bürger). Authors include: Paul Scheerbart, Hugo Ball, Tristan Tzara, Hans Arp, Carl Einstein, Else Lasker-Schüler, the 'Sturm-Kreis', and Arno Holz.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

Kleist's novella "Michael Kohlhaas" (1811) is as much a political parable as it is a meditation on the power of art. In it the Prussian partisan considers the right of resistance as expressed in the struggles of Kohlhaas, whose battle against the House of Saxony would have been recognized by contemporary readers as an allegory for the Prussian struggle against Napoleon's occupying army. Kant's short treatise "Über den Gemeinspruch: Das mag in der Theorie richtig sein, taugt aber nicht in der Praxis" (1793) had revived the debate about whether a revolt could ever be justified, given that justice depends on the existence of a state. But "Michael Kohlhaas" is also concerned with another kind of revolt that is arguably more arbitrary, in that it does not serve any end. It is the revolt of art, which overturns existing norms and conventions by establishing a new law: the law of art or what could be called poetic justice. Kleist's text makes a case for the autonomy of art in the literal sense. Art is self-legislating, a law unto itself, and this feature points as much to the potential as to the danger of art. Readings to include works by Kleist, Martin Luther, Pufendorf, Breitling, Kant, Goethe, Tieck, and Adorno.
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.213.617. Peripheral Modernisms.
This graduate-level seminar will consider the relation of centers to margins in the production of modern literature. The starting assumption of this inquiry will be the political, social, and linguistic role of literary modernism as a critique of modernity. If a centrifugal force disseminates the processes of modernization from the metropole out, can one suggest that modernism, as a critique of modernity, originates at the periphery and works its way inward? When does the critique of modernity begin, and how can one characterize such a critique if in certain cultures it precedes the advent of modernization? How does a consideration of literature from the margins of the industrial and imperial centers of the modern world cause us to rethink the phenomenology—distinct from a taxonomy—of modernism? In what ways can the belatedness of a culture's modernization lead it to anticipate subsequent crises in modernity? If modernism precedes modernization in the peripheral context, what, then, is post-modernity or post-modernism? Authors to be considered in this course include Reb Nakhman of Breslov, Machado de Assis, Mendele Moykher-Sforim, Gertrude Stein, Robert Walser, Franz Kafka, William Faulkner, Amos Tutuola, Clarice Lispector, and Yambo Ouloguem. Theoretical perspectives will include Adorno, Bakhtin, Barthes, Benjamin, Deleuze and Guattari, and Derrida. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities

AS.213.621. Theater: Drama, Performance, Theory.
We will study exemplary plays and theoretical texts about the aesthetics and poetics of drama and the function of theater in society from Lessing to Brecht and beyond— with excursions to Aristotle. We will explore the history of German thought on theater from illusion to Verfremdung to postdramatic multi-media formats, from the Bildung of the audience to the autoepoiesis of the performance, and from the Nationaltheater to various forms of less than stehende Schaubühnen. We will be concerned with theories of performativity, with the issue of emotions on stage (does theater need emotions? do emotions need theater?), as well as with the close connection of theater, philosophy, and politics (Derrida, Badiou).
AS.213.625. Life Worlds: Literature and Phenomenology.
This course will examine the notion of life-world or Lebenswelt, as it increasingly comes to define the nexus of relations that characterize not only human experience but also works of art. A particular interest of the course will be how phenomenology expands our understanding of literature and the critical methods used to approach it. While the reading for the course will be drawn primarily from philosophy, we will also consider poems by Georg Trakl and Rainer Maria Rilke with an eye toward the poetic space they open. To what degree is the space we inhabit with its network of meanings a literary space according to these poets? Readings to include excerpts from: Dilthey, Einleitung in die Geisteswissenschaften; Husserl, Ideen (1913); Krisis der europäischen Wissenschaft; Heidegger, Sein und Zeit; Merleau-Ponty, Phenomenology of Perception; The Visible and the Invisible; and Käte Hamburger, “Die phänomenologische Struktur der Dichtung Rilkes.”
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.213.627. Constellations: JMR Lenz among others.
The writing of Jakob Michael Reinhold Lenz (1751-1792) is marked by a peculiarity. His texts constitute themselves through references to other modes of speaking; they originate as it were in literary and discursive cooperation. This course will examine how Lenz’s practice of writing in relation to others is formed in individual cases. What forms of representation and poetic theories apply in these cases? What does Lenz’s relational mode of writing indicate in terms of literary theory and with respect to the notion of originality postulated in 1770? We will read Lenz’s Shakespeare translations; texts explicitly addressed to Goethe (Der Waldbruder, Pandemonium Germanicum); dramas and theoretical writings pointing to 18th-century orders of knowledge (Der Hofmeister, Philosophische Vorlesungen); and finally Buechner’s Lenz and Celan’s Meridian. The term constellation designates not only the relational order of the literary material, but also the methodological problem involved in reading such works. How are texts to be read, which produce themselves in relation to others and which cannot be referred to a single author or an individualized author function? The questions of constellations is equally a question of the constitution of objects in literary criticism. This course will reflect on the ways in which objects are constituted and represented in literary analysis. Course conducted in German.
Instructor(s): A. Krauss
Area: Humanities

AS.213.628. Literary Hermeneutics.

AS.213.629. The Art of Framing.
Frames and Framings in art and literature are aesthetic means of creating focus. They draw a distinction between interiority and exteriority, foreground and surroundings; they cut out segments from space-time continuum and thus provide basic instruments of orientation, they constitute pictorial representation as well as the compositional structure of literature. From an epistemological perspective one can say that frames create a paradoxical threshold in-between which facilitates both the differentiation and transgression of spheres. It is further remarkable that frames while spectacularly making visible something specific at the same time expose the instances of their own ‘showing’: by implementing frames representation observes itself in the very process of representing. Through constellating systematic and historical readings the seminar will analyze theoretical concepts of frame and framing (Simmel, Genette, Marin, Derrida) and at the same time explore the transformation of frame forms and functions in literature and aesthetic discourse between 1720 and 1830 (Brookes, v. Haller, Wieland, Lessing, Herder, Lichtenberg, Goethe, Moritz, Jean Paul, Schlegel, Brentano, Tieck, Hoffmann). Among the topics to be discussed will be the conceptualization of subject-object relations as an analytical tool to reconstruct how the organizing principles of framing in Enlightenment (point of view, Guckkasten, chain of pictures, landscape/camera obscura) drift into the twilight of epistemological reflection: Around 1800 frame structures (and its doublings/transgressions) present the “Produzierende mit dem Produkt” and thus articulate the insights of transcendental philosophy, they turn into a medium of romantic irony.
Instructor(s): A. Krauss
Area: Humanities.

The seminar will explore to what extent Hegel can be read as contributing to a feminist philosophy. We will focus on Hegelian openings onto the emotional in Phenomenology of Spirit. In addition, we will study feminist philosophers who have drawn on or offered critical readings of Hegel (Irigaray, Butler, Cavarero, Malabou, and others). Co-listed with AS.190.633
Instructor(s): J. Bennett; K. Pahl
Area: Humanities
Writing Intensive.

AS.213.634. Schiller’s Aesthetic Writings.
Schiller’s theoretical writings might be approached by the sentence ‘it is only through beauty that man makes his way to freedom’. Discussing the assumption that humans live in a condition of unfreedom resulting from social and economic divisions, Schiller’s notion of beauty crosses boundaries between ethics, politics and aesthetics to formulate a theory of modernity in which beauty functions as a medium to reconcile man’s sensuous nature and his capacity for reason. The course will examine Schiller’s concept of beauty in relation to the anthropological, political, ethical and aesthetic discourses of his time especially with respect to Kant’s view of aesthetic judgment which Schiller at the same time embraced and criticized. Particular attention will be paid to Schiller’s reflexions on representation as well as to the poetics of his aesthetic discourse. Readings include: Kallias-Briefe (1793), Über Anmut und Würde (1793), Vom Erhabenen (1793), Über die ästhetische Erziehung des Menschen in einer Reihe von Briefen (1793), Über naive und sentimentalische Dichtung (1795/96). Readings and discussions in German.
Instructor(s): A. Krauss.
AS.213.647. Jean Paul: Aesthetics of Finitude.
Introducing his selection from Jean Paul’s work, Stefan George characterizes Jean Paul’s (and Goethe’s) writing as follows: “Entgegen dem formend-antiken und begrifflichen der goetheschen erfüllung bietet er [J. P.] unserm schrifttum das farbige und klanglische das wir ohne ihn in der vollendung entbehren müssten.” George’s subtle chiasm has not yet accomplished a revision of literary canonization. As is generally known, it is the relation between Goethe and Schiller that forms the representative couple for the period around 1800. Jean Paul, a somehow ‘disconnected’ contemporary of Classicism and Romanticism who never belonged to either one of these artistic directions, stands alone in literary history. In this seminar we will analyze Jean Paul’s literary phenomenology of what he calls the complex relation between finitude and the infinite, between the experience of a limited object-world such as human body and death on the one hand, and the notion of infinite reason and desire for transcendence on the other. We will explore, among other aspects, the conceptual and aesthetic elaboration of humor as “the inverted sublime” and investigate to what extent this (comic) inversion of transcendence into finitude might be described (against Kant) as a (not only) epistemological mode of skepticism and thus as a specific practice of modernity. Readings and discussion in German.
Instructor(s): A. Krauss.

Reading Kleist, Hegel, Derrida, and perhaps Freud in a first (larger) section and Eva Meyer, Yoko Tawada, and perhaps Deleuze in a second (shorter) section, we will analyze different models of doubling and relating words, bodies, feelings, and thoughts.

AS.213.654. ,,Stimmung“: Mood – Attunement – Atmosphere in Literature and Literary Criticism.
Taught in German. The course title marks a problem of translation which already Leo Spitzer in his “Prolegomena to an interpretation of the word ‘Stimmung’” underscores: “It is a fact that the German word Stimmung as such is untranslatable.” Mood, attunement, atmosphere are facets of an aesthetics of Stimmung as it developed in literature and philosophy from the 18th to the 20th century. Most recently, Stimmung has had a renaissance as a methodological term in a Literary Criticism which seeks to overcome the paradigm of post-structuralism. As David Wellbery has demonstrated, the linguistic usage of the word Stimmung comprises three aspects: a subjective mode of experience/perception, an atmospheric dimension and a communicative efficacy. It is along those lines that the course analyzes the poetics and aesthetics of Stimmung in German Literature and Thought from the 18th through the 20th century. Stimmung proves to be fertile ground for contagious forms of communication, specific modes of representation (i.e. coloring, nuance), and the dissolution of subject/object boundaries. Furthermore, we will discuss Stimmung as a term of Literary Criticism from the 20th century to the present. Readings will include: Kant, Schiller, Stifter, Fontane, Hofmannsthal, Hermann Bahr, Thomas Mann, Georg Simmel, Martin Heidegger, Leo Spitzer, Erich Auerbach, Gernot Böhme, Hans-Ulrich Gumbrecht.
Instructor(s): E. Strowick
Area: Humanities

AS.213.655. Thinking Emotionality with Hegel.
Instructor(s): K. Pahl.

In the [eighteen-]forties,” Benjamin writes in “The Arcades Project,” “boredom began to felt on an epidemic scale”. It is, however, as early as in German Enlightenment that boredom (“Langeweile”) haunts aesthetics and discourses on sensitivity: The construction of the sensitive man is beleaguered by figures of insensitivity – boredom among others. In boredom, aesthetics encounters its anesthetic pendant. From the beginning of its discursive emergence, boredom combines an “existential and a temporal connotation” (Godstein): an emotional emptiness/ apathy with a particular experience of time. Against the backdrop of the discursive history of boredom from the 18th to the 20th century, the course addresses the specific connection between boredom and modern literature. How can we understand the “ecstasy glimpsed from the banks of desire”, the “warm gray muffle lined with glowing silk” in which “we wrap ourselves when we dream” – as Barthes and Benjamin describe boredom respectively – with regard to literary representation? How does modern literature transform boredom into the empty time of writing? We will analyze poetics of boredom with respect to their temporal structures, the monotony of the everyday, the loss of meaning, the differentiation of perception and the time of reading/reading time. Readings include: Kant, Herder, Tieck, Büchner, Kierkegaard, Schopenhauer, Stifter, Nietzsche, Hofmannsthal, Thomas Mann, Heidegger, Benjamin, Barthes, Max Frisch, Hans Blumenberg. Readings and discussions in German.

AS.213.660. Discourses of Dislocation.
Dislocation—travel, migration, exile, diaspora, immigration—is a preeminent symptom of the modern condition; as Jacques Derrida has suggested, it is one way of characterizing how language itself comes into being. To what extent does the relationship of various modes of mobility serve as a prerequisite for understanding modernity and literary modernism, and to what extent can one understand commonalities among these itinerant discourses? This seminar will consider several varieties of dislocated discourse (the picaresque, the pseudo-autobiography, the travelogue, as well as narratives of immigration, displacement, war and demobilization, and exile) in search of a means to discuss or consider all of them critically. Writers to be considered will include Sigmund Freud, Robert Walser, Yosef Haim Brenner, Walter Benjamin, Theodor Adorno, Jacques Derrida, Irmgard Keun, Israel Rabon, Joseph Roth, Flannery O’Connor, Yoel Hoffmann, Anton Shammas, and Salman Rushdie. All readings and discussions available in English. Undergraduates may register with instructor approval.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.
In the [eighteen-]forties,” Benjamin writes in “The Arcades Project,” "boredom began to felt on an epidemic scale”. It is, however, as early as in German Enlightenment that boredom ("Langeweile") haunts aesthetics and discourses on sensitivity: The construction of the sensitive man is beleaguered by figures of insensitivity – boredom among others.

In boredom, aesthetics encounters its anesthetic pendant. From the beginning of its discursive emergence, boredom combines an "existential and a temporal connotation" (Goodstein); an emotional emptiness/apathy with a particular experience of time. Against the backdrop of the discursive history of boredom from the 18th to the 20th century, the course addresses the specific connection between boredom and modern literature. How can we understand the "ecstasy glimpsed from the banks of desire", the "warm gray muffle lined with glowing silk" in which "we wrap ourselves when we dream" – as Barthes and Benjamin describe boredom respectively – with regard to literary representation? How does modern literature transform boredom into the empty time of writing? We will analyze poetic interpretations of boredom with respect to their temporal structures, the monotony of the everyday, the loss of meaning, the differentiation of perception and the time of reading/timeing. Readings include: Kant, Herder, Tieck, Büchner, Kierkegaard, Schopenhauer, Stifter, Nietzsche, Hofmannsthal, Thomas Mann, Heidegger, Benjamin, Barthes, Max Frisch, Hans Blumenberg. Readings and discussions in German. Cross-listed with Philosophy

Instructor(s): E. Strowick.

AS.213.665. The Subject-Object Relation in Experimental Fiction: The Poetics of the Periphery.

Can experiments in narrative form—which have constituted one of the most dynamic and productive aspects of modern aesthetics—be traced grammatically, philosophically, and theoretically to an instability in subject-object relationships? This graduate seminar will examine these potentialities through a series of paired readings of belletristic narratives with critical sources, from the beginnings of the modern novel to contemporary fiction and theory. Authors to be considered include Denis Diderot, Fyodor Dostoevsky, Sholem Aleichem, Gertrude Stein, Robert Walser, Der Nister, Moyahe Kulbak, and Thomas Bernhard. Theoretical readings will be taken from Hegel, Freud, Lacan, Deleuze, Butler, and Zupancic. All readings and discussions conducted in English.

(Undergraduates Accepted, with Permission of the Instructor)

Instructor(s): M. Caplan.

AS.213.666. Kleist.

This seminar will explore the narrative, dramatic, theoretical and quasi-journalistic work of Heinrich von Kleist along two lines of inquiry. We will read his literary experiments as reactions to the major shifts in the sex/gender system and the new deployment of sexuality in the eighteenth century. We will discuss his unique role in the representation and production of feeling across narrative and mimesis.

Instructor(s): K. Pahl.

AS.213.669. Heidegger and the Poets.

Heidegger’s interpretations of the poets Hölderlin, Trakl, Rilke, and George are more often maligned than praised. The philosopher ignored the specificity of each poet’s idiom in order to establish poetry as the consummate event in the history of being. This course will not seek to justify Heidegger’s idiosyncratic approach to individual poets and poems. Instead it will attend to the questions he raises about the relation of “Dichten” to “Denken” as well as the role that literature plays in defining the world we inhabit, the place we dwell. To what degree do Heidegger’s arguably reductive readings of lyric poems nonetheless address the essence of poetry and/or the poetic experience?

Instructor(s): R. Tobias.
AS.213.678. The Birth of Aesthetics: Alexander G. Baumgarten. The course will be taught in German. With Alexander Gottlieb Baumgarten's thesis “Philosophical meditations pertaining to some matters concerning poetry” (1735) the term “aesthetics” was introduced to philosophical discourse. The new name for the discipline did not signify a complete break with previous philosophical positions, that is, with the perfectionist aesthetics of Leibniz and Wolff. However, by conceptualizing sensible cognition as “analogue of reason” (analagon rationis) Baumgarten depicted the aesthetic sense as a locus of perfection in its own right and, thus, did transform the Wolfian model and paved the way for much more radical revisions of aesthetic experience in Germany. The course will study the emergence and specificity of Baumgarten's concept of aesthetics in relation to the Wolfian framework, Gottsched's poetics, (Georg Friedrich) Meier's adaptions of Baumgarten, and Herders response to Baumgarten. Readings include Baumgarten's early Meditations on Poetry (Meditationes philosophicae de nonnullis ad poema pertinentibus, 1735), excerpts from his Metaphysics (Metaphysica, 1739) and Aesthetics (Aesthetic, 1750-58). Cross-listed with Philosophy Instructor(s): A. Krauss.

AS.213.680. Suspicion: Signs of Modernity. Modernity gives rise to various forms of suspicion, including modern forms of resentment and practices of self-discipline (a suspicion of oneself), as well as an epistemology of suspicion as it is developed in the modern human sciences. The course starts out with an analysis of the detective genre and of the specific transformations it undergoes in modern German literature. In a next step, we will examine literary representations of suspicion within a broader cultural-historical frame: Nietzsche's analysis of resentment serves as one point of reference; another is what Carlo Ginzburg has called the paradigm of clues. The modern human sciences, since the last third of the 19th century, have relied on a method that produces knowledge by way of interpreting clues. While suspicion in the human sciences is related to the production of truth, literature uses suspicion as a way to produce aesthetic and logical undecidabilities. We will analyze literary representations of suspicion with respect to the narrative structure (unreliable narration) and the mediality of suspicion. Finally, the course emphasizes the methodological relevance of suspicion: As a practice of deciphering, interpreting, and reading traces, suspicion calls for being reformulated literary-theoretically. Readings will include: Heinrich von Kleist, E.T.A. Hoffmann, Nietzsche, Theodor Fontane, Freud, Kafka, Thomas Mann, Heimito von Doderer, Peter Handke etc. Taught in German Instructor(s): E. Strowick

Area: Humanities.

AS.213.681. In Blood and Fire: Warfare, Trauma, and Modernist Aesthetics. Though every conventional description of modernist aesthetics dates its origins to the era preceding World War I—in some versions several decades before 1914—there has always been an understanding of the War’s “catalytic” influence on the aesthetic of chaos, madness, violence, and despair that comes to characterize at least one major strain of modernistic art. Taking the after-effects of the First World War as well as the Russian Revolution(s) as its point of origin, this graduate-level seminar will consider such writers as Sigmund Freud, Walter Benjamin, Sh. Y. Agnon, Sh. Ansky, Guillaume Apollinaire, Isaac Babel, Georges Perec, Erich Maria Remarque, Joseph Roth, Virginia Woolf, and Stefan Zweig. All readings and discussions available in English. Instructor(s): M. Caplan

Area: Humanities Writing Intensive.

AS.213.682. Poetics of Possibility. “So the sense of possibility might be defined outright as the capacity to think how everything could ‘just as easily’ be, and to attach no more importance to what is than to what is not.” What Robert Musil in The Man without Qualities defines as the „sense of possibility” might be taken to characterize literature. Drawing on literary and philosophical texts, the course will analyze aspects of a poetics of possibility (forms of fictionality, „as if”, subjunctive). Inasmuch as the „sense of possibility” is linked to an order of knowledge as it emerges in modernity, a poetics of possibility raises the question of the epistemological status of literature or fiction. We will address this question by taking into account aspects of genre. The course will focus mainly on The Man without Qualities; the Musil reading, however, will be accompanied by reading texts by Leibniz, Kierkegaard, Heidegger, Mach, and Agamben. Conducted in German.

AS.213.683. Dilettantism.

AS.213.684. Aesthetics of Description. Since the enduring disavowal of description by Lessing, characteristics commonly assigned to description include structural endlessness and exorbitance; the simple succession of elements; the „breakdown of composition” (Lukács) in a proliferation of details; the parity of described details; its failed ability at illusion; also its tendency to mordify, insofar as it transforms its subject into something static, stagnant. The course will undertake a critical revision of these characteristics by analyzing aesthetic debates and literary descriptions from the 18th to the 20th centuries. Topics leading the discussion will be: text-image relations; description between literature and science; observation through description; dynamization of description; motion and motionlessness; poetics of perception; performativity of description; the boredom of reading. Readings include: Bodmer, Breitinger, von Haller, Winckelmann, Lessing, Alexander von Humboldt, Hebbel, Stifter, Darwin, Ossip Mandelstam, Aby Warburg, Lukács, Peter Weiss, Peter Handke. The course will be taught in German. Instructor(s): E. Strowick.

AS.213.686. Uncanny Realism: Theodor Storm. Readings and discussions in German. Both Fontane und Lukács point to the spatial confinement in Storm’s world, though in different ways: Fontane sneeringly speaks of Storm’s “Husumer” and “Provinzialsimpelrei” (provincial simplicity); Storm—according to Fontane—seriously believes that it needs a Husum teapot to get a “real cup of tea.” Lukács states in his essay on Storm that only a “local eye” (“einheimische Augen”) is capable of seeing colors in the “grey monotony” of Storm’s world. Attentively observing the home-boundness of Storm’s fictional world, they neglect the importance of the uncanny for Storm’s Realism. It is precisely in the home that the uncanny resides: Storm’s poetics alienates the “local eye” rather than it produces perceptual knowledge. The course will examine various aspects of the uncanny in Storm and address the relation between Realism and the uncanny more generally. A passionate collector and teller of ghost stories himself, Storm is however not interested in any supernatural quality of the uncanny but rather in how it questions everyday perception. Thus the uncanny allows for an analysis of the conditions of the perception and representation of reality in the first place. We will discuss Storm’s modernity with respect to the form of the ‘novella’ which he famously called “the sister of the drama,” the transgression of frames, image-text relations, elliptic narratives, elements of the grotesque, and the relation between literature and media technologies. Instructor(s): E. Strowick.
Readings and discussions in German. This course will be organized around a close reading of “Aus meinem Leben: Dichtung und Wahrheit,” one of the many works of Goethe that was enthroned as prototype of a genre: discourses on modern autobiography emerged in its context and have drawn on its unique performance of writing one’s own life until today. The seminar is devoted to develop a reading of the entire book emphasizing its theoretical implications (subject formation/‘Bildung,’ concepts of time/historicity, modes of representation, genre theory, theory of the ‘daemonic’) and its prolific discursive productivity. Methodically analyzing this productivity along with its epistemological implications, the seminar will explore how “Dichtung und Wahrheit” both establishes and revokes a representative model of autobiography.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.725. Proto-, Modern, and Post-: Locating the –ism in Modernism.
All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “post-modernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is post-modernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-Bloom, Henry Dumas, Moyshe Kulbak, Machado de Assis, Mendele Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.
Instructor(s): M. Caplan.

Taught in German. Modernity gives rise to various forms of suspicion, including modern forms of resentment and practices of self-discipline (a suspicion of oneself), as well as to an epistemology of suspicion as it is developed in the modern human sciences. The course starts out with an analysis of the detective genre and of the specific transformations it undergoes in modern German literature. In a next step, we will examine literary representations of suspicion within a broader cultural-historical frame: Nietzsche’s analysis of resentment serves as one point of reference; another is what Carlo Ginzburg has called the paradigm of clues. The modern human sciences, since the last third of the 19th century, have relied on a method that produces knowledge by way of interpreting clues. While suspicion in the human sciences is related to the production of truth, literature uses suspicion as a way to produce aesthetic and logical undecidabilities. We will analyze literary representations of suspicion with respect to the narrative structure (unreliable narration) and the mediality of suspicion. Readings will include: Heinrich von Kleist, E.T.A. Hoffmann, Nietzsche, Theodor Fontane, Freud, Kafka, Thomas Mann, Heimito von Doderer, Peter Handke etc.
Area: Humanities
Writing Intensive.

An introduction to modern German poetry with emphasis on the fate of the lyric subject in twentieth-century verse. Of particular interest to the course will be the tension between lyric freedom on the one hand and poetic constraint on the other. How does modern poetry come to resist the traditional definition of the lyric as an expression of subjectivity and replace it with a concept of the poem as a vehicle for the dissolution of the self or the dispossession of the speaker? Authors to include Rilke, Trakl, George, Benn, and Celan.
Instructor(s): R. Tobias
Area: Humanities.

Taught in German. The course analyzes the performative on the basis of the very field that John L. Austin’s speech act theory excludes: literature. What challenges Austin’s speech act theory indeed opens up the question of the performative towards iterability and theatricality and thus calls for the performative as a methodological category of literary criticism. According to Shoshana Felman’s readings of Austin, the performative act can be accentuated as an act of the “speaking body” in which the body is conceived of not as a means of linguistic expression but rather as a spillover of the act of utterance into the statement. How then is the corporeality or materiality of writing asserted in acts of narrating and reading? The course will examine theories of the performative from the perspective of literature and literary criticism as well as analyze literary speech acts (promises, pacts, etc.) in detail. Readings will include: Austin, Derrida, Felman, Freud, Nietzsche, de Man, Hamacher, Goethe, Büchner, Kafka, Henry James, Thomas Mann etc.
Instructor(s): E. Strowick
Area: Humanities.

In a radical departure from Enlightenment and Romantic aesthetics, Nietzsche praised the cultic origins of art and argued for the creation of a modern art form that would enable the same collective experience of transcendence as Attic tragedy did. Since Nietzsche, however, the idea that art has ritualistic significance has been treated with disdain. In this course we will read Mendelssohn’s and Lessing’s writings on compassion and catharsis, Schelling’s and Hegel’s account of tragedy, and finally the work of various members of the George-Kreis to determine where Kultus and Kultur meet and also diverge.

AS.213.748. Drifters, Footprints, Telling Time.
AS.213.760. Break and Continuity: German Thought around the French Revolution.
The turn of the eighteenth century saw the political revolution of 1789 as well as interrelated revolutions in thought, symbolic system, value system, family structure, gender relations, etc. We will explore the discourse of revolution in its oscillation between two conceptions – as breakthrough and as return (to the golden age of Greek Antiquity, to a prelapsarian state). From providence to chance event, and between break with and continuity of the old order, German thinkers considered the revolution. We will read Kant, Rousseau, Hölderlin, Hegel, Goethe, Kleist, and others.
Instructor(s): K. Pahl.
This seminar addresses German-speaking exile literature from 1933 to 1950. On the basis of historical and political contextualization, readings and discussions will focus on literary theoretical and discourse analytical questions. In contrast to Nazi ideology and its totalitarian claim to constitute “Germanness,” numerous émigrés intended to represent the “other” Germany from outside its national borders. This politicization of exile discourse which made ‘direct’ critical involvement with the regime appear imperative had a lasting effect on literature written in exile. The leitmotif of our analysis will be the question to what extent exile literature developed its critical reflection towards a specific aesthetics of exile; an aesthetics that articulates the reference to the historical-political situation, to Nazi Germany, expulsion, loss of language, dislocation and cultural transfer in form of a critique of representation. We will discuss topics such as the conceptualization of (German) tradition/transference, languages of (non-) identity, theories of (anti-)imbrication, discourse politics and aesthetics, or avant-garde and exile. Authors include: Thomas Mann, Irmgard Keun, Else Lasker-Schüler, Hannah Arendt, Adorno, Benjamin, Brecht, Lukács, Anna Seghers.
Instructor(s): A. Krauss.

In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and political politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities
Writing Intensive.

This survey of critical approaches to the study of film explores theoretical problems of representation and reality, film form and signification, authorship, spectatorship, and the digital frontier. Each week we examine a different narrative genre, historical period, or a given theoretical aspect through films that students will watch independently as well as at mandatory weekly screenings.
Instructor(s): B. Wegenstein; D. Schilling.

AS.213.800. Independent Study.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; M. Caplan; R. Tobias.

Instructor(s): A. Krauss; E. Strowick; K. Pahl; M. Caplan; R. Tobias.

AS.213.813. German Qualifying Paper Preparation.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; M. Caplan; R. Tobias.

AS.214.251. Survey of Italian Lit. 3 Credits.
An overview of the key texts, authors, and movements in the Italian literary tradition, from the Middle Ages to the present. Recommended for all Italian majors and minors, and for Romance Languages majors who include Italian. Taught entirely in Italian. Completion of Italian 210.252 Intermediate recommended; the Survey of Italian Literature may be taken concurrently with Advanced Italian 210.352.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.253. Perspectives on Islam in the Age of Dante. 3 Credits.
This course examines portrayals of Islam in European literary works of the late 13th and early 14th centuries. Authors include Ibn ‘Arabī, Marco Polo, Boccaccio, and Dante. Course taught in English with Italian section for majors/minors. Cross-listed with History and WGS Dean’s Teaching Fellowship
Area: Humanities.

AS.214.261. The World of Dante. 3 Credits.
An Introduction to the Divine Comedy
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.271. Boccaccio’s Decameron. 3 Credits.
A close reading of Giovanni Boccaccio’s masterpiece will allow the students to become acquainted with the civilization of the European Middle Ages. Among the areas of interest are: medieval Italy as a mosaic of powers, faith and religion, women in society, nobles, commoners and the rise of the middle class, the rituals of love, and the purposes of literature.
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.301. Survey of Italian Literature. 3 Credits.
Taught entirely in Italian. An overview of the key texts, authors, and movements in the Italian literary tradition, from the Middle Ages to the present. Recommended for all Italian majors and minors, and for Romance Languages majors who include Italian. Recommended course background: Italian AS.210.252; AS.214.301 may be taken concurrently with Advanced Italian AS.210.352.
Instructor(s): Staff; W. Stephens
Area: Humanities
Writing Intensive.
AS.214.317. Italian Theater from Commedia dell’arte to Dario Fo. 3 Credits.
Students must have completed Intermediate Italian II (210.252) or equivalent. Italian writers and performers have created some of the world’s greatest theatrical works, particularly in the genres of comedy and opera. We will study the evolution of Italian theater from the improvisatory humor of the Commedia dell’arte, through the invention and development of Italian opera, to the zany and politically engaged satire of Dario Fo, winner of the 1997 Nobel Prize in Literature. Other major authors we will study include Carlo Goldoni and Luigi Pirandello. We will view film versions and live performances of plays and operas in Italian. The class will be conducted in Italian.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.330. Love and War in Italian Literature. 3 Credits.
This course is based on a choice of narrative and poetic texts from several centuries of Italian narrative and poetry. We will examine the literary renditions of the personal stories of Italians caught within the tragic logic of the war. Our focus is going to be the effects of war on love relationships as they are presented by a number of authors including Dante, Tasso, Tomasi di Lampedusa, Berto, Calvino, Bassani and Morante.
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.340. Holocaust & Film. 3 Credits.
Taught in English. This course examines the question of the Holocaust and its representation in the filmic media. We will analyze such themes as post-traumatic documentary (e.g., Night and Fog, Alain Resnais 1955), the resistance to representation (Shoah, Claude Lanzmann 1985), Holocaust drama and the ethics of entertainment (e.g., Schindler’s List, Steven Spielberg 1993), the question of filmic adaptation (e.g., The Grey Zone, Tim Blake Nelson 2002—based on Primo Levi’s The Drowned and the Saved 1986), and the new genre of confessional first person video-diary (e.g., Two or Three Things I know About him, Malte Ludin 2005). On this last theme we will also host the two-day symposium “The Holocaust: Children of the Perpetrators Confront Their Parents’ Nazi Past through Documentary Film,” in March 09. The symposium will feature three international documentary filmmakers and their recent films The End of the Neubacher Project, Marcus Carney 2007, Fatherland, Manfred Becker 2006, and Two or Three Things I know About him, Malte Ludin 2005, in which the filmmakers—children of Nazi perpetrators—are asking the question “who am I in relation to my father’s deeds?” The symposium will further include a number of experts on the topic of Holocaust, commemoration, and documentary film. Students will be involved in the preparation and, if interested, in the panel-discussions of the symposium. All films will be screened with English subtitles; this class is reading-intensive and writing-intensive; weekly response papers will be written about the films and the course topic at large. Cross-listed with Film and Media Studies, Political Science, History, and Jewish Studies
Writing Intensive.

This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Instructor(s): T. Tower
Area: Humanities
Writing Intensive.

AS.214.342. Documentary Film and Ethics. 3 Credits.
This class will look at questions of how documentary filmmakers have attempted to and indeed changed the law by making such documentaries as “Capturing the Friedmans,” “Super Size Me,” and “The Corporation.” It will look at the area of human rights films, and the ethical filmic intention of mobilizing communities, or helping people in need with films such as “The Thin Blue Line,” “Darwin’s Nightmare” and “Sand and Sorrow.” We will analyze which documentary genre can address issues of information, mobilization, conviction, truth and propaganda with which means of expression (e.g., direct cinema). Overall, the ethics of all these attempts of filmmaking will be examined cross-culturally and historically.
Area: Humanities.

AS.214.344. Love of Poetry and Poetry of Love. 3 Credits.
This course examines love poems in which poetry is seen as an ally of love in the conquest of the object of desire. It is a course on the pleasure of writing and the pleasure of reading. Part of it is theoretical and part of it is an analysis of a number of outstanding poems in the Italian tradition—from the Middle Ages to the Novecento. Among the examined theorists are Aristotle, Foscolo, Freud and the Russian Formalists. Among the chosen poets are Dante, Petrarca, Cino da Pistoia, Leopardi, Pascoli, Gozzano and Saba. Class discussion is in English. Texts are read in the original and in English.
Instructor(s): P. Forni
Area: Humanities.

AS.214.345. Machiavelli’s World: Tyrants and Intellectuals in Renaissance Italy. 3 Credits.
Italy during the Renaissance was politically fragmented, a hodge-podge of small states organized under a wide variety of political systems: ostensibly democratic republics, states ruled by warrior-tyrants, the temporal authority of the papacy, and more. The struggle for dominance between these various states and systems was fought not only by armies but also by humanist intellectuals – a class that flourished during this period. We will focus on the particularly interesting career of Niccolò Machiavelli, who authored theoretical justifications both for republicanism (especially in his Discourses) and for tyranny (in his most famous and enigmatic work, The Prince). With close attention to historical context, we will read these and other works by Machiavelli. We will also study other Italian Renaissance intellectuals who responded to the political upheavals of their day in a variety of ways, including Coluccio Salutati, Leonardo Bruni, Leon Battista Alberti, and Pietro Aretino. The class will be conducted in English, and a separate section will be offered for Italian majors (and others with a strong command of the language) in which we will read and discuss texts in Italian.
Instructor(s): J. Coleman
Area: Humanities.
AS.214.346. The Short Story in Italy Across the Centuries. 3 Credits.
The genre of the short story was in many ways invented by the Italians. During the later Middle Ages, preachers adopted the short tale, cultivated by fireside storytellers for ages, to add interest to the morals of their sermons. By the late thirteenth century, Italian writers were collecting such stories for entertainment as well as edification. Boccaccio’s Decameron (1352) was the first classic collection and inspired other collections throughout the Renaissance. It and other Italian collections inspired writers in many genres and countries, including Shakespeare and other dramatists. In modern times, short stories have become one of the predominant genres of world literature. This seminar surveys Italian short fiction from the fourteenth through the twenty-first century. Emphasis is on the representation of Italian culture and history through storytelling, including in film. Course will have two full sections, one taught in Italian for majors, the other taught in English, with no prerequisites, for non-majors. Limited to fifteen students per section.
Instructor(s): P. Forni; W. Stephens
Area: Humanities
Writing Intensive.

AS.214.350. The Eternal City: Rome in Literature and Film. 3 Credits.
This class will be conducted in Italian. By studying the works of modern Italian writers and filmmakers, as well as ancient and medieval texts, we will explore the history and the enduring cultural importance of the city of Rome. We will consider the “myth of Rome” as a center of order and authority, and we will examine texts that subvert this myth by portraying the chaotic, joyous, and unseemly realities of life in Rome. Authors and filmmakers we will study include Virgil, Petrarch, Moravia, Ginzburg, Pasolini, Rossellini, and Fellini.
Instructor(s): J. Coleman
Area: Humanities

AS.214.351. The Eternal City: Rome in Literature and Film. 1 Credit.
This is the Italian section of 214.350. Students wishing to earn Italian credit for this course must register for both 214.350 and 214.351 simultaneously.
Area: Humanities
Writing Intensive.

AS.214.352. Writing and Wonder: Books, Libraries, and Discovery 1250-1550. 3 Credits.
The invention of printing occurred amid two centuries of intense development in the conduct and material means of European scholarship. The transition from writing by hand to movable type was accompanied by a revolution in scholarship that involved a new attitude to Classical and Biblical antiquity, the recovery of neglected and "lost" works, the formation of secular libraries, and the development of tools for the study of ancient handwriting, writing materials, and the history of language and of history itself. The revolution in attitudes to and uses of the book eventually transformed every discipline related to reading, writing, and the organization of knowledge. Topics to be covered include writing as an object of wonder, the transformation of a mythology of writing into a true history of books, writing, and libraries, the scientific study of writing and of language, and the representation of writing and books in the art and literature of the Middle Ages and Renaissance. Extensive use will be made of Johns Hopkins’ large collection of books published before 1600, and student projects will be oriented toward reliving the experiences of scholars in this period, including via computer-assisted means. Open to all undergraduates. Knowledge of a foreign language helpful but not required.
Instructor(s): C. Celenza; W. Stephens
Area: Humanities.

AS.214.353. Travel & Fantasy Worlds in Italian Literature. 3 Credits.
This course examines important works of Italian literature that narrate journeys to exotic or imaginary places, blurring the boundaries between reportage and fantasy. We will consider topics including utopias, new worlds and exploration, allegorical and spiritual journeys, construction of identity, and the conceptualization of the “other.” Readings will span from the Middle Ages to the present day, including Marco Polo, Giovanni Boccaccio, and Italo Calvino. The class will be conducted in Italian.
Recommended Course Background: AS.210.351 or AS.210.352 or equivalent.
Instructor(s): J. Coleman
Area: Humanities
Writing Intensive.

AS.214.355. Literature and Opera. 3 Credits.
In this course we will look at the relation between some of the great opera’s of the 18th and 19th centuries and their literary sources. We will also discuss some recent philosophical interpretations of opera. At stake will be the question of how literature is translated into music and stagecraft, and what these translations say about the times and cultures in which they were produced. Each week we will view and listen to an opera, and read its source materials as well as critical works about both. The course will be conducted in English, and will be writing intensive. (This course is offered as AS.212.355, 213.355, 214.355, and 215.355. Please check other course numbers for open seats.)
Instructor(s): W. Egginton
Writing Intensive.

AS.214.356. Science and Heresy in Galileo’s Italy. 3 Credits.
The class will be conducted in English. In the wake of Copernicus, the still dominant geocentric model of the cosmos was challenged in Italy by two equally brilliant but very different thinkers: Giordano Bruno, iconoclastic philosopher and theorist of magic, and Galileo Galilei, who has been called the “father of modern science.” Both of these revolutionary intellectuals faced strong opposition from within the Catholic Church: Bruno was executed as a heretic, while Galileo was forced to formally recant his heliocentric views. We will study the principal writings of both thinkers, focusing on both the literary qualities and the historical context of their works. We will also examine the cosmological visions of earlier writers, including Dante. Additional section will be offered for Italian majors (and others with a strong command of the language) in which we will read and discuss texts in Italian.
Instructor(s): J. Coleman.

AS.214.361. Rome as Told by its Narrators: A Journey through History, Literature, Arts and Film. 3 Credits.
This course offers an intellectual and aesthetic experience of Rome through time. We will delve into its complex history as well as its tormented and vivacious present. Dean’s Teaching Fellowship course.
Instructor(s): T. Katinis
Area: Humanities.

AS.214.364. Italian History in Italian Novel. 3 Credits.
This course examines the different ways in which Italian writers of the past two centuries have included historical events in their novels. A. Manzoni’s The Betrothed, G. Tomasi di Lampedusa’s the Leopard and E. Morante’s History: A Novel are among the examined works.
Writing Intensive.

AS.214.366. Literature & Ethics. 3 Credits.
This course focuses on the moral implications of the acts of reading and writing literature. Aristotle, Horace, Dante, Boccaccio, and Freud are among the featured authors.
Instructor(s): P. Forni
Area: Humanities.
AS.214.367. Masterpieces of Italian Poetry. 3 Credits.
The goal of this course is to acquaint the students with themes and images recurring in the Italian poetic tradition from the Middle Ages to the Novecento.
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.366. Italian Novel of the 20th Century. 3 Credits.
Area: Humanities.

AS.214.369. Food and Culture in Italy. 3 Credits.
Throughout Italy’s history, food traditions have been central to the formation of Italian identities, both national and regional. In this course we will study Italy’s food traditions and explore the ways in which food has become a major theme of Italian literature, film, and music, from the Renaissance to the present day. The class will be conducted in Italian. Students must have completed Intermediate Italian II (AS.210.252) or equivalent.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.370. Magic and Marvel of the Renaissance. 3 Credits.
Magic and Marvels or Wonders make us question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the magical and the marvelous were bound up with questions and issues very different from those of our time. With the exact sciences still to be invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance, especially the romance and the theater, provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.373. Perspectives on Islam in the Age of Dante. 3 Credits.
This course examines portrayals of Islam in European literary works of the late 13th and early 14th centuries. Authors include Ibn ‘Arabi, Marco Polo, Boccaccio, and Dante. Course taught in English with Italian section for majors/minors.
Instructor(s): B. Neyarapally
Area: Humanities.

AS.214.374. Being Italian: Autobiography and Identity in Literature and Media. 3 Credits.
What does it mean to be Italian rather than French, American, or anything else? What’s the difference between being Tuscan, Milanese, or Sicilian? Between being Christian, Jewish, Muslim, or “other”? How does the reality of Being Italian differ from the clichés that prejudice, commercialism, or mass media fads help to spread? Considering these questions can be important whether you want to use your Italian in business, in academia, or for sheer pleasure, whether you want to watch films, read books, or see the sights.
Prerequisites: AS.210.251 AND AS.210.252
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.375. Documentary Production Practicum: “The Cure:” the History and Culture of Breast Cancer. 3 Credits.
This class will accompany Bernadette Wegenstein during some months of producing her feature documentary “The Cure” on the history and culture of breast cancer. It will be a hands on experience with director/producer Bernadette Wegenstein, editor/producer Patrick Wright and cinematographer Allen Moore filming at the GBMC’s Breast Care clinic, the Halsted Medical Archives, and some other Baltimore locations. This class will meet once a week, but some weeks the class will consist in the hands-on experience on the field rather than the actual class meeting.
Area: Humanities.

AS.214.381. ‘La commedia all’italiana:’ the films of Dino Risi, Mario Monicelli and other Italian filmmakers of the 1960s. 3 Credits.
This class will be taught in English, but good knowledge of Italian will be a necessity. Films will be screened in Italian language.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.382. Dante and Aeneas in the Age of Google. 3 Credits.
This course examines Dante’s Inferno and Virgil’s Aeneid with the goal of showcasing both enduring and new reasons of relevance in the two masterpieces.
Instructor(s): P. Forni

AS.214.391. Western Intel Hist 1200-1500. 3 Credits.
Area: Humanities.

AS.214.393. Italian Opera and the Art of Adaptation. 3 Credits.
Italian opera, from its very inception, has developed in close dialogue with other art forms. The pioneering operas of Peri and Monteverdi based on the figure of Orpheus are part of a larger cultural movement that saw Renaissance philosophers (Marsilio Ficino), visual artists (Bronzino) and humanists (Angelo Poliziano) resurrect and transform the ancient Orpheus myth. The subsequent evolution of opera was influenced by (and influenced) innovations in stage comedy, the novel, and other art forms. In this course, we will explore these connections between the development of opera and other facets of Italian culture. No knowledge of Italian is required. The course will be taught in English; an additional Italian language discussion section will be offered for majors.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.420. Ital. Neorealismo & Film. 3 Credits.
Area: Humanities.
AS.214.479. Dante’s Journey through the Afterlife: The Divine Comedy. 3 Credits.
Dante’s Divina commedia is universally recognized as the greatest long poem of the Middle Ages; many consider it the greatest poem of all time. We will study the entire Commedia critically in terms of broad categories: (1) What it reveals about the worldview of late-medieval Christian Europe; (2) its internal thematic cohesion and formal symmetries, or how it works as poetry; (3) its critique of the intellectual cultures of pagan antiquity and medieval Christianity; (4) its presentation of political and social issues; (5) its influence on European intellectual history; (6) the interpretive problems it presents to modern readers and translators; (7) the challenges Dante faced in understanding and summarizing the whole of cosmology, world history and culture. We will read and discuss Commedia in English, in editions containing the Italian text on facing pages: students will be expected to refer to the original Italian regularly and familiarize themselves with key terms and concepts even if they do not speak Italian. Italian majors will meet once a week for discussions in Italian and will submit all written work in Italian, for major credit.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.561. Italian Independent Study. 3 Credits.
Instructor(s): B. Wegenstein; C. Celenza; J. Coleman; P. Forni; W. Stephens.

AS.214.562. Italian Independent Study. 0 - 3 Credit.
Instructor(s): B. Wegenstein; C. Celenza; J. Coleman; P. Forni; W. Stephens
Area: Humanities.

AS.214.597. Italian Lit Internship-Summer. 3 Credits.
Instructor(s): J. Coleman; P. Forni.

AS.214.601. Word and Image: An Introduction to the Languages of Literature and Cinema.
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language’s exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin’s take of New Realism, Christian Metz’s structuralist approach to cinema and psychoanalysis, Gilles Deleuze’s theory of the moving-image and the time-image, a feminist approach to cinema by E.Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English (This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.)
Instructor(s): B. Wegenstein; P. Forni.

A seminar that considers how the early moderns encountered the (mostly material, mostly classical) remains of earlier cultures, in both visual and verbal realms. Survival and revival; manuscripts and art works; antiquarianism and the burden of the past; ephemerality and dreams of permanence. Some attention to the methodologies of historicism in both literary and art-historical study, including Burckhardt, Warburg, Panofsky, Greene, and recent work by Nagel and Wood; then a consideration of such figures as Dante, Petrarch, Ronsard, Mantegna, Francesco Colonna, Spenser, Shakespeare, and Milton.
Instructor(s): L. Barkan.

AS.214.604. # internet.
This seminar will address the history of the internet as participatory platform from such social media as facebook and twitter to blogs and forums of political or activist nature, as well as online gaming environments; the questions raised will regard the social change these platforms produce, the legal implications of sharing information, the political and economical issues around “digital labor” (Scholz), as well as the broader ethical questions about identity and the construction of self in participatory online environments. This class will include a hands-on dimension combining media theory & practice.
Instructor(s): B. Wegenstein
Area: Humanities.

European languages document the evolution of the concept of literature from a generic term indicating the body of writings produced in a particular country or period to one that more particularly signifies works endowed with an aesthetic quality. The concept of literature thus seems to take form in connection with the emergence of a critical discourse, the search for a standard of taste. The dream of founding a “science littéraire” modeled on the principles of structural semiotics searching for an elusive “literariness”, literature as a system, a set of formal features, not a collection of discrete, ineffable individuals; it thus involved a rejection of the aesthetic, or at least a reconsideration of its assumptions. This course will pursue the question of “The Idea of Literature” simultaneously from a philosophical and a historical perspective; in moving from formalist literariness to the rediscovery of categories like the ethical, the subject, the reader, the author, and the aesthetic, we will ask such questions as: Can there be a return to an aesthetic education, as some wish, and what would that be? Would such a move resuscitate the ghost of Hume’s gentleman scholar, which the New Critics tried to do away with? Is there a way of formally distinguishing between literature and its various contexts? Authors will include Hume, Kant, Taine, Lanson, Sainte-Beuve, Brunetiére, Arnold, Proust, Benjamin, Bréton, Sartre, Bourdieu, De Man, and Eco.
Instructor(s): E. Russo; W. Egginton.

The newly acquired “Bibliotheca Fictiva” collection of rare books contains over 1200 literary forgeries and related documents, and makes Johns Hopkins the only center in Europe or the Americas equipped to investigate the deep relations between literature (in the broad sense that includes historiography), literary forgery, and literary theory. We will trace the development of the concept of literary counterfeit in humanist scholarship, with its medieval and classical antecedents, and the growth of modern literary genres, particularly the historical novel, that depended on concepts of authenticity and probability or verisimilitude. Theoretical readings, from Lorenzo Valla through postmodern literary theory, will be matched with notorious forgeries and with metatextual fiction, from Rabelais and Cervantes to Borges, Eco, and their imitators. Elementary Latin will be helpful but not required; some paleographical skills will be taught; all sessions will be held in the Bibliotheca Fictiva collection in the rare book room of the new Brody Learning Center.
Instructor(s): E. Havens; W. Stephens
Area: Humanities.
AS.214.610. Latin and Vernacular Eloquence from Dante to Bembo.
This course will examine the coexistence of Latin and the Italian vernaculars as languages of literary expression in Italy between the thirteenth and sixteenth centuries. We will study theoretical works that articulate ideals of eloquence and style for Latin and the vernacular and that conceptualize the nature and relative roles of these languages. We will also consider the social, political, and intellectual factors that influenced how literary authors and translators employed Latin and the vernacular. Reading knowledge of Italian is required. While Latin works will be read primarily in translation, we will work with selected texts in Latin with the goal of better understanding medieval and Renaissance Latin style. Some prior study of Latin is assumed; advanced Latin is not a prerequisite.
Instructor(s): J. Coleman.

AS.214.612. The dichotomy 'prodesse'-'delectare' from Horace to the Twentieth-Century.
Rooted in antiquity, a crucial notion in theory of literature is that a literary work must provide both entertainment and instruction to its readers. In the history of human reflection on artistic production this notion's importance can be compared to that of imitation. This course will examine instances of this notion's appearance across the centuries, from Horace to Boccaccio, and all the way to our times. Special attention will be given to the connection between aesthetics and ethics and to the pleasure of reading.
Area: Humanities
Writing Intensive.

AS.214.616. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process.
Co-listed with 211.416 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.

AS.214.630. Rossellini-Fellini-Pasolini: Italian Cinema and its Meaning Beyond Italy.
The great triumvirate of the Italian cinema, Rossellini, Fellini, and Pasolini can be said without exaggerations to be the fathers of modern film. Through the poetry of their moving images, they lay the groundwork in some ways for almost every kind of cinema that has been made in their wake. This course will examine the breadth of their opus and writings in an effort to understand the source of their influence. Recommended Course Background: AS.210.311-AS.210.312 or instructor permission.
Instructor(s): B. Wegenstein.

AS.214.633. Poetry and Divinity in Medieval and Early-Modern Italy.
The late Middle Ages saw intense debates between humanists (like Petrarch and Mussato) who considered great poetry (even from pagan antiquity) to be replete with divine wisdom, and theologians who condemned poetry as mendacious and spiritually corrupting. These debates intensified in the 15th and 16th centuries, leading to important contributions by thinkers like Marsilio Ficino and Giordano Bruno, who re-conceptualized the nature of poetic inspiration and "divine frenzy." In this course we will consider how these developments shaped both the theory and practice of poetic composition and interpretation. Discussions will be in English. Ability to read Italian is required.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.640. Film Theory.
This class deals with film theory in its history and its current trends. We will examine structuralist, feminist, Marxist, psycho-analytic, Deleuzian, and other theoretical approaches to understanding and interpreting the cinematic medium. We will will look at several different film samples from European film to Latin American Film, auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist to class during the semester.
Instructor(s): B. Wegenstein
Area: Humanities.

Three of the most wildly inventive works of Renaissance literature are Luigi Pulci's verse romance Morgante (1478/1483), Teofilo Folengo's macaronic Baldus (1517/1521) and François Rabelais's five prose tales known to posterity as Gargantua et Pantagruel (1532-1550's?). Beginning from a template of mock epic, these three works unleash a tornado of linguistic and narrative tours de force, burlesquing and satirizing almost every aspect of literature, politics, and religion, with such reckless gusto that their authors were often accused of irreligion and even atheism. Their frenetic attacks on every conceivable norm of language, good taste, and decorum provide a fascinating "Dionysian" counterpart to the dignified "Apollinian" works that are more easily assimilable to modern ideas about the essence of the Renaissance. A thorough familiarity with either early modern Italian or early modern French is absolutely essential for full appreciation of these works, as is a basic knowledge of Latin.
Instructor(s): W. Stephens.

AS.214.653. Pleasure and Virtue in Renaissance Literature.
This course will examine major literary and philosophical works from Renaissance Italy that thematize pleasure, questioning (explicitly or implicitly) its place in the hierarchy of human values. We will consider the role that the Renaissance rediscovery of Epicurean and Neoplatonic thought played in shaping how pleasure in its various forms was conceptualized and represented. Authors we will read include Lorenzo Valla, Marsilio Ficino, and Niccolò Machiavelli. Reading knowledge of Italian is required.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.654. Creating and Teaching the Undergraduate Survey of Italian Literature.
Materials for teaching the undergraduate survey are rarely entirely satisfactory "as is." This course will undertake the research and creation of an undergraduate Italian literature survey tailored to the needs of Johns Hopkins undergraduates, and fully integrated into the language and literature curriculum of the Italian program. Participants will observe and contribute to the instructor’s undergraduate survey, Italian 214.251, and, at the end of their own course will have produced a textbook that will serve them in good stead in their future teaching career.
Instructor(s): W. Stephens
Area: Humanities.
AS.214.656. Media and Art Theory.
This class will read basic texts in media theory, history, and philosophy — from Marshall McLuhan, and the school of French structuralists, to film semiotics and current approaches to media analysis within ubiquitous computing. We will look at some media artists from Nam June Paik to Cindy Sherman and ask the question of how their art-work incorporates a specific media-theoretical and -philosophical background. Readings from Mark Hansen, Tom Mitchell, Ulrik Ekman, Vivian Sobchack, Amelia Jones a.o.
Instructor(s): B. Wegenstein.

AS.214.658. Dante’s Inferno: A Reading for Teaching.
How to Teach the Divine Comedy to American Undergraduates.
Instructor(s): P. Forni.

In this course we will study representative works by the major figures of Italy's humanist movement, considering the significance of the movement as a whole and the many currents that scholars have identified within it. Topics and authors we will explore include early Paduan humanism (Lovato, Mussato), Florentine civic humanism (Salutati, Bruni), the birth of philology (Poliziano, Valla), vernacular humanism (Alberti, Landino), and the relationship between humanistic studies and Christian religion (Ficino, Sannazaro, Erasmus). The class will be taught in English. The ability to read Italian is required. Some knowledge of Latin is desirable but is not required.
Instructor(s): J. Coleman
Area: Humanities
Writing Intensive.

AS.214.668. Boccaccio I.
Instructor(s): P. Forni.

A reading of Boccaccio’s Decameron completes the unit of two-semester courses on the Florentine writer.
Instructor(s): P. Forni.

The course will run from October 19th through December 7th, meeting twice per week. The source of two formative traditions shaping Italian identity, Antiquity and Christianity, Rome is the most cited place in Italian literature and a key source for Italy’s ongoing dialogue with the past. Yet, every epoch of Italian literature has had its own idea of the past. How did Italian authors shape the image of Rome? Focusing on both canonical and non-canonical writers, this course will provide a unique approach to the history and vicissitudes of classicism in the history of Italian culture. We will explore the following authors and texts: Le miracole de Roma (13th-century translation into the Roman vernacular of the Latin Mirabilia Urbis Romae, 12th cent.); the Anonimo Romano’s Cronica (1350s); Petrarch (Collatio laureationis, epistles); Poggio Bracciolini’s De variate fortune (1431); Biondo Flavio’s preface to his Roma instaurata (1444-46); Raphael’s letter on Roman antiquities to Leo X, written in cooperation with Castiglione (1519); Andrea Fulvio’s preface to his Antiquitates Urbis (1527); “Pasquinades” (“Pasquinate”) from the sixteenth century; Rome in Baroque poetry (Marino and Chiabrera) and in the poetry of the early Arcadian Academy (1690s); 18th-century satires on Rome (Devoti, Contucci); Alessandro Verri’s Notti Romane (1792 and 1804), Leopardi’s letters from Rome (1822); and G. G. Belli’s Sonetti on the ruins and monuments of Rome (1830s). Consequently, this course will also provide students with an overview of the many languages of Italian literature, such as medieval Roman vernacular, medieval and humanist Latin, neo-Latin, and nineteenth-century Roman dialect.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.214.672. Tasso, the Epic & Tradition.
Students will achieve deep familiarity with Tasso’s Gerusalemme libera and Aminta; read selections from Gerusalemme conquistata, Il mondo creato, Tasso’s Dialogues, and his literary-theoretical treatises; survey important texts of Tasso criticism, and sample Tasso's legacy in poetry and figurative arts.
Instructor(s): W. Stephens.

AS.214.675. The Invention of the Secular Theatre.
Must read Italian, but not limited to Italian graduate students. Between late Antiquity and the fifteenth century, religious and cultural strictures on theatrical activity were enforced continuously, though not consistently. While spectacle (and, in the later Middle Ages, drama) remained important to medieval life, it was left to Italian humanists to reconstitute secular theater in the fullest sense, by reviving the ancient classical forms of comedy and tragedy, and by inventing new forms such as tragicomedy, commedia dell’arte, and opera. Sixteenth-century drama in Italian was the model for the development of dramatic literature in the other major Western European countries, including works of Shakespeare, Molière and other major authors. After reading several classic texts of the Italian sixteenth century in modern editions, students will produce editions and translations of other texts—both sixteenth-century imprints and the unpublished plays in a unique manuscript recently acquired by JHU—for planned publication. All sessions will be held in Special Collections in the Brody Learning Commons, and students will help prepare an exhibition of Renaissance editions.
Instructor(s): E. Havens; W. Stephens
Area: Humanities
Writing Intensive.
**AS.214.677. Umberto Eco's Post-Modern Middle Ages.**

Since the 1960's, Umberto Eco has been at the forefront of European critical theory, and since 1980, one of the best-known European novelists. "The Names" of the Rose" and "Foucault's Pendulum" revitalize "theory-rich" historical fiction in Europe and North America. Course will explore the relation of Eco's fiction to his most characteristic contributions in literary and cultural theory.

**AS.214.689. The Orpheus Myth and Orphic Poetry from Antiquity to the Italian Renaissance.**

The figure of Orpheus occupies a prominent place in the art and literature of the Italian Renaissance. In this period, Orpheus did, figuratively speaking, return to the light from an underworld of obscurity. While many of the myths associated with Orpheus had remained popular throughout the Middle Ages, it was only in the fifteenth century that Italian humanists restored to circulation the Greek texts attributed to Orpheus, which had been unknown in Europe since late antiquity. The ancients (and Renaissance humanists after them) regarded Orpheus not as an exclusively mythical figure, but as a real poet and sage, whose writings demonstrated that poetry could serve as a powerful means of revealing transcendent truths. We will study some of the repercussions that the revival of these texts and ideas had on Renaissance culture, and especially on the late fifteenth-century Florentine milieu in which Marsilio Ficino, Lorenzo de' Medici, Angelo Poliziano, and Giovanni Pico della Mirandola lived and worked. Our examination of the revival of Orpheus will lead into a broader exploration of the philosophical and literary achievements of this circle. Discussions will be in English. Ability to read Italian is required; some knowledge of Latin is desirable.

Instructor(s): J. Coleman
Writing Intensive.

**AS.214.682. Representing the Ancient Italian Past in the Early Renaissance.**

The Renaissance was, among other aspects, a nationalistic movement, aimed at recovering the prestigious culture of the Roman and Etruscan past and countering the perceived decadence of the "modern" or "middle" age. Writers in both Italian and Latin pursued the "rebirth" of ancient Italic culture through a variety of literary and political strategies. After a brief review of familiar authors and texts from Petrarch to the Cinquecento, we will examine in depth a variety of texts in Latin and Italian that defended—often politically, and at times mendaciously—the ancient Italic cultural hegemony. Responses from other European cultures will be considered.

**AS.214.684. The Orpheus Myth and Orphic Poetry from Antiquity to the Italian Renaissance.**

The figure of Orpheus occupies a prominent place in the art and literature of the Italian Renaissance. In this period, Orpheus did, figuratively speaking, return to the light from an underworld of obscurity. While many of the myths associated with Orpheus had remained popular throughout the Middle Ages, it was only in the fifteenth century that Italian humanists restored to circulation the Greek texts attributed to Orpheus, which had been unknown in Europe since late antiquity. The ancients (and Renaissance humanists after them) regarded Orpheus not as an exclusively mythical figure, but as a real poet and sage, whose writings demonstrated that poetry could serve as a powerful means of revealing transcendent truths. We will study some of the repercussions that the revival of these texts and ideas had on Renaissance culture, and especially on the late fifteenth-century Florentine milieu in which Marsilio Ficino, Lorenzo de' Medici, Angelo Poliziano, and Giovanni Pico della Mirandola lived and worked. Our examination of the revival of Orpheus will lead into a broader exploration of the philosophical and literary achievements of this circle. Discussions will be in English. Ability to read Italian is required; some knowledge of Latin is desirable.

Writing Intensive.

**AS.214.688. Critical Terms in Media Studies: an introduction.**

This class examines the areas of aesthetics, technology, and society critically in regard to media theory and practice following the 2010 anthology Critical Terms in Media Studies. The class also thematically accompanies the international conference Technologies of Meaning, March 3-4, 2011 with such speakers as Avital Ronell, Tom Gunning, and Sam Weber. Cross-listed with English, Political Science, and Anthropology.

Instructor(s): B. Wegenstein.

**AS.214.700. Lorenzo Valla.**
AS.214.729. Petrarch and His Legacy.  
In this seminar we will study Petrarch’s poetry, as well as selected prose works. We will consider the various facets of Petrarch’s profound influence on European literature and intellectual culture: his role in inaugurating humanism and the revival of classical learning; his new vision of historical change and human subjectivity; the immense impact of his Canzoniere on European lyric poetry and on the development of the Italian language itself. The conclusion of the course will be devoted to early modern authors who adapted the Petrarchan lyric mode in new ways, including Vittoria Colonna, Thomas Wyatt, and Shakespeare.  
Instructor(s): J. Coleman  
Area: Humanities  
Writing Intensive.

This seminal text of the late Middle Ages will be a point of departure for discussing the role of literature in forging the socio-political convictions of Western Civilization.  
Instructor(s): P. Forni  
Area: Humanities  
Writing Intensive.

AS.214.746. Impious Classics and their Reception in Renaissance Italy.  
Lucretius, Plautus, and Lucian were among the classical authors whose works, largely unknown in medieval Europe, were rediscovered by Italian humanists in the fifteenth century. The rediscovery of these authors generated not only excitement but also suspicion and scandal: all three were criticized as “Impious” writers capable of corrupting the moral values or even the Christian orthodoxy of readers. This was particularly true of Lucretius, whose great poem of Epicurean philosophy declares that there is no afterlife, that no God cares about or influences human affairs, and that pleasure is the proper goal of life. We will study the ways in which these controversial classics influenced Renaissance authors, including Alberti, Valla, Erasmus, and Machiavelli. Discussions will be in English. Ability to read Italian is required; some knowledge of Latin is desirable.  
Instructor(s): J. Coleman.

AS.214.761. Reading & Writing in Pre-Modern Europe.  
This course has a fourfold aim: First, it is designed to familiarize participants with the basics of Latin paleography from Roman antiquity through the age of printing with moveable type; throughout, we will practice deciphering literary and documentary sources of various types, even as we concentrate on the evolution of different writing styles. Second, we will think about paleography’s status as a “discipline.” That is, the term “paleography” dates back to 1708 and Montfaucon’s classic work, Palaeographia Graeca. However, it was only in the late nineteenth century in the world of the German research university that paleography came into the orbit of the Geisteswissenschaften as a “Hilfswissenschaft.” Both implicitly and explicitly throughout the seminar we shall be asking what consequences that move entailed. Third, we will study the manner in which printing with moveable type changed western graphic culture: was printing “revolutionary” or “evolutionary”? Did printing and its radical graphic changes introduce new forms of consciousness in readers? Fourth, we will become familiar with certain aspects of “the history of the book,” discovering as we do what sorts of questions scholars in this broad field of scholarly endeavor have been asking recently.  
Instructor(s): C. Celenza.

AS.214.763. Carlo Emilio Gadda.  
An introduction to the work of the Milanese engineer considered by many the greatest Italian fiction writer of the XXth Century.

AS.214.765. Casiglione and Della Casa.  
The students will become acquainted with two of the most influential books of conduct written in the Renaissance: the Cortegiano and the Galateo.  
Instructor(s): P. Forni.

An introduction to the Italian novel of the 20th Century  
Instructor(s): P. Forni  
Area: Humanities  
Writing Intensive.

In this seminar we will examine a selection of literary reflections on and repercussions of the rediscovery and reinterpretation of ancient Greek Orphic poetry by intellectuals and poets of Lorenzo de’ Medici’s circle, including Marsilio Ficino, Cristoforo Landino, and Giovanni Pico della Mirandola. Discussions will be conducted in English. Some knowledge of Italian is desirable, but advanced Italian is not a prerequisite.  
Instructor(s): J. Coleman.

In this seminar we will examine the role of literature in forging the socio-political convictions of Western Civilization.

In this seminar we will examine a selection of literary reflections on and repercussions of the rediscovery and reinterpretation of ancient Greek Orphic poetry by intellectuals and poets of Lorenzo de’ Medici’s circle, including Marsilio Ficino, Cristoforo Landino, and Giovanni Pico della Mirandola. Discussions will be conducted in English. Some knowledge of Italian is desirable, but advanced Italian is not a prerequisite.  
Instructor(s): J. Coleman.

AS.214.789. The Orpheus Myth and the Arts in Early Modern Italy.  
The revival of the Orpheus myth in Early Modern Italy shaped some of the period’s most important developments in literature, music, and the visual arts: as the first Italian secular play, Angelo Poliziano’s Orfeo marked a new beginning for Italian theater in the late fifteenth century. Just over a century later, the composers and librettists who created Italian opera (Peri, Rinuccini, Monteverdi, Striggio, and others) made the Orpheus myth the most characteristic theme of this new art form. In this course we will study these and other Early Modern works based on the Orpheus myth, as well as their classical antecedents (including texts by Virgil, Ovid, Boethius). We will explore the literary, musical, and artistic repercussions of the rediscovery and reinterpretation of ancient Greek Orphic poetry by intellectuals and poets of Lorenzo de’ Medici’s circle, including Marsilio Ficino, Cristoforo Landino, and Giovanni Pico della Mirandola. Discussions will be conducted in English. Some knowledge of Italian is desirable, but advanced Italian is not a prerequisite.  
Instructor(s): J. Coleman.
AS.214.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology's interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. – In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollack, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 213.790, and 215.790
Instructor(s): B. Wegenstein; D. Schilling
Area: Humanities.

This survey of critical approaches to the study of film explores theoretical problems of representation and reality, film form and signification, authorship, spectatorship, and the digital frontier. Each week we examine a different narrative genre, historical period, or a given theoretical aspect through films that students will watch independently as well as at mandatory weekly screenings.
Instructor(s): B. Wegenstein; D. Schilling.

AS.214.851. Italian Foreign Language Teaching Practicum I.
Required for first-year Italian Graduate Students. Must take Italian Foreign Language Teaching Practicum II (AS.214.852) to receive credit for this course. This course will not have a scheduled meeting time.
Instructor(s): A. Zannirato
Area: Humanities
Writing Intensive.

AS.214.852. Italian Foreign Language Teaching Practicum II.
Required for First year Italian Graduate Students. This course will not have a scheduled meeting time.
Prerequisites: AS.214.851
Instructor(s): A. Zannirato
Area: Humanities
Writing Intensive.

AS.214.861. Italian Independent Stdy.
Instructor(s): B. Wegenstein; C. Celenza; J. Coleman; P. Forni; W. Stephens.

AS.214.862. Italian Dissertation Res.
Instructor(s): B. Wegenstein; C. Celenza; J. Coleman; P. Forni; W. Stephens.

AS.214.863. Italian Proposal Prep.
Instructor(s): B. Wegenstein; C. Celenza; J. Coleman; P. Forni; W. Stephens.

AS.215.231. Introduction to Literature in Spanish. 3 Credits.
The main objective of this course is to examine and discuss specific authors and topics in literature in Spanish from the Middle Ages to the 20th century. The course is designed to cover a selection of Hispanic texts from Spain and Latin America. Literary genres to be studied will include narratives, poetry, and drama. The bulk of each class session will be dedicated to the discussion of the assigned readings. This course is taught in Spanish. This course is required for the major in Spanish.
Course coordinator: Eduardo Gonzalez
Instructor(s): S. Castro-Klaren; Staff
Area: Humanities.

AS.215.232. Spain and its Literature from Modern to Medieval Times. 3 Credits.
This course will explore the fundamental aspects of Spanish Peninsular literature in reverse chronological order from the twentieth to the tenth centuries. The course will offer a general survey of the literature of Spain. Students will be asked to read, analyze and comment on representative texts from the Spanish canon.
Instructor(s): B. Brown
Area: Humanities
Writing Intensive.

AS.215.311. Radicalism, Film & Literature in Modern Latin America-Community Based Learning. 3 Credits.
This course will explore the cultural symbiosis of radical politics, film, and literature in modern Latin America. Beginning with Cuban revolutionary Jose Marti and the definitive end of the Spanish Empire and concluding with current socialist movements in South America, we will analyze key radical texts by the likes of Friedrich Engels and Ernesto “Che” Guevara, classic films like The Battle of Chile by Patricio Guzman, and important works of literature by authors such as Pablo Neruda and Rigoberta Menchu. Note: Class will be conducted in English and all assigned texts will also be in English in order to encourage interdisciplinary enrollment and participation.
Instructor(s): M. Strayer
Area: Humanities
Writing Intensive.

AS.215.320. Introduction to Spanish Golden Age Literature. 3 Credits.
This course is designed to familiarize the student with the key aspects and the main figures of the literary developments of Spanish Golden Age (XVI-XVII century), a period of great flourishing in poetry, prose and drama in Spain. In the process, the students acquire general reading and research skills, which they apply to specific topics and issues. This course is taught in Spanish.
Area: Humanities
Writing Intensive.

AS.215.321. Trips to the Other World: Heaven and Hell in Hispanic Literature. 3 Credits.
Area: Humanities.

AS.215.325. Muslim Spain: 711-1615. 3 Credits.
Desde la conquista musulmana hasta la expulsión de los moriscos la Península Ibérica fue una sociedad caracterizada por el multilingüismo y la presencia, muchas veces conflictiva, de habitantes de las tres religiones monoteístas. Este curso presenta un panorama de las literaturas y culturas hispano-musulmanas e hispano-judías, así como hispano-cristianas y de temática morisca, desde la conquista musulmana (711) hasta la segunda parte del Quijote (1615). Recommended Course Background: AS.210.311—AS.210.312 or instructor permission.
Instructor(s): H. Sieber; N. Altschul
Area: Humanities.
AS.215.327. Modern Political Thought in Latin America. 3 Credits.
Sophomores, Juniors and Seniors only. The course is an introduction to modern political thought in Latin America. It draws on essays and novels written by major and influential political thinkers such as D.F. Sarmiento, González Prada, J.C. Mariategui, Leopoldo Zea, J. E. Rodo, Octavio Paz, Jose Revueltas, Jose Maria Arguedas, Mario Vargas Llosa, Darcy Ribeiro, Enrique Dussel and the authors of the Sumac Kawsay as well as Liberation Theology central writings. The course will be taught in English. Students wishing to do work in the original Spanish or Portuguese will be encouraged to do so.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.336. Don Quijote. 3 Credits.
A close reading and discussion primarily in Spanish of Cervantes’ masterpiece, with concentration on its major themes and contributions to the formation of the modern novel. We will use A. Murillo’s edition of the novel, Editorial Castalia.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): H. Sieber
Area: Humanities.

AS.215.337. Teatro Espanol del Siglo del Oro. 3 Credits.
Close reading of various Spanish authors, among them Lope de Vega, Calderon de la Barca, Moreto, and Zorilla. Students should have taken courses beyond intermediate level or advanced Spanish. This class will be conducted primarily in Spanish as a seminar and will require active participation and discussion. Papers will be written in Spanish.
Undergraduate Seminar.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.338. Introduction to Argentine Literature. 3 Credits.
La literatura se enmarca en la realidad social y es una ventana hacia la cultura. En esta introducción consideraremos diferentes temas de especial importancia en la cultura y literatura argentina, como la separación entre la ciudad (puerto, civilización, contacto europeo) y el campo (provincias, barbarie, tradicionalismo rural) que empieza con el texto fundacional de Domingo F. Sarmiento, Facundo. Observaremos asimismo que esta influente dicotomía que se establece con la independencia política es modificada con la llegada masiva de inmigrantes a fin de siglo y finalmente pierde su fuerza con la dictadura militar de los años ’70 y con el desencanto neoliberal que estalla con la crisis del 2001.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.340. Narrating Self and Nation in Modern Latin American Literature. 3 Credits.
The course will focus on a critical reading of major modern Latin American writers. We will read entire books as well as selections from major works from the following authors. J.F. Sarmiento, Euclides da Cunha, Machado de Assis, Gabriela Mistral, Pablo Nerua, Octavio Paz, J.M. Arguedas, Carlos Fuentes, Clarise Lispector, Diamel Eltit and Bolano. The course will view 5 Recent Latin American films also.
Area: Humanities
Writing Intensive.

AS.215.341. Perspectives on the Study of Latin America. 3 Credits.
An interdisciplinary approach to the study of Latin America since Independence. The course will reply on an historical approach to the the study of literature, art and the formation of cultural epochs and periods.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.342. Latin Am: Formative Yrs. 3 Credits.
Area: Humanities.

AS.215.343. Nación criolla: cultura y literatura en el siglo XIX. 3 Credits.
El curso examina la formación de nuevas identidades hispanoamericanas y la búsqueda de un pasado que las haga legítimas, especialmente en el Cono Sur (Chile, Argentina, Uruguay). Consideraremos en particular las relaciones con el pasado español y con el pasado amerindio en textos políticos, críticos y literarios de figuras clave del siglo diecinueve, e.g. Domingo Faustino Sarmiento, Andrés Bello, Simón Bolívar, Esteban Echeverría, y José Victorino Lastarria.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.355. Literature and Opera. 3 Credits.
In this course we will look at the relation between some of the great opera’s of the 18th and 19th centuries and their literary sources. We will also discuss some recent philosophical interpretations of opera. At stake will be the question of how literature is translated into music and stagecraft, and what these translations say about the times and cultures in which they were produced. Each week we will view and listen to an opera, and read its source materials as well as critical works about both. The course will be conducted in English, and will be writing intensive. (This course is offered as AS.212.355, 213.355, 214.355, and 215.355. Please check other course numbers for open seats.)
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.215.371. Modern Spanish Literature. 3 Credits.
Prerequisites: AS.215.231
Area: Humanities.

AS.215.375. Cinema in Spain and Latin America. 3 Credits.
We will view and examine in depth a select group of films from Spain, Argentina, México, Cuba, and Perú. Films will include Almodóvar (Todo sobre mi madre; Hable con ella; La mala educación); Iñarritu (Amores perros); Carlos Cuarón (Rudo y cursi); Tomás Gutiérrez Alea (Guantanamera); Fernando Pérez (Suite Habana); Lucrecia Martel (La ciénaga; La niña santa); Claudia Llosa (La teta asustada). This course offers advanced credit toward the Spanish majors and minors. Recommended Course Background: AS.210.362 or its equivalent.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.381. Contemporary Latin American Narrative: From Machado de Assis to García Marquez. 3 Credits.
The objective of this course is to introduce students to the idea of a Latin American narrative canon that includes both Brazil and Spanish American writers. Often, courses labeled Latin American Literature mainly focus on Spanish American writers because neither the students nor the Professors have language expertise. Course taught in English. Cross-listed with PLAS
Instructor(s): S. Castro-Klaren.
AS.215.401. Senior Seminar Mexico D.F. Its Histories, Cultures, and Politics. 3 Credits.
Through the careful study of Carlos Fuentes’ novel of Mexico City, La región más transparente, we will examine the city’s multiple and contending histories and mythographies from the Aztecs to the present as rendered in visual, textual, and performance media: murals, cinema, TV, burlesque, lucha libre, etc. Taught in Spanish; the course requires advanced reading skills in Spanish. Prior consultation with the instructor is required.
Prerequisites: AS.210.311
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.402. Senior Seminar: Literaturas y culturas del Cono Sur: Argentina, Uruguay y Chile. 3 Credits.
Advanced Spanish and reading proficiency. Estudio de las culturas literarias de Argentina, Uruguay y Chile en sus respectivos contextos sociales y políticos desde la conquista española. Las culturas indígenas, el desarrollo de la nación, las culturas populares, culturas inmigrantes, regímenes políticos, actualidad económica y social en la época de la globalización.
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive.

AS.215.422. Amor y romanticismo en una Novela y tres películas. 3 Credits.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.441. Borges, Cortazar, Biyo Casares and Their Time. 3 Credits.
The course introduces students to the study of Argentine literary culture in the first three quarters of the twentieth century. Its objective is to instruct the students in methods of close reading and develop perspectives in critical thinking. Cross-listed with History, Humanities Center and Program in Latin American Studies.
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.443. Hispanic Literatures and the Arts. 3 Credits.
Literary works from different genres (fiction, drama, poetry) by authors from Spain and Latin America are studied and illustrated in reference to the plastic and visual arts and cinema, indigenous, popular, and religious cultures. Cross-listed with PLAS
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.451. El Cine de Pedro Almodovar. 3 Credits.
El arte cinematográfico del gran cineasta español será estudiado a través de su obra, vista en partes selectas, obras enteras y dentro del marco escénico provisto por otras películas del cine español. Recommended Course Background: AS.210.326 or demonstrated proficiency in the language.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism. 3 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.453. Contemporary Latin American Narrative: From Machado de Assis to Garcia Marquez. 3 Credits.
The objective of this course is to introduce students to the idea of a Latin American narrative canon that includes both Brazil and Spanish American writers. Often, courses labeled Latin American Literature mainly focus on Spanish American writers because neither the students nor the Professors have language expertise. This course will be team-taught by Professor Mary M. Bensabat-Ott who will be in charge of the discussions and the work done in Portuguese by students enrolled in the course who wish the work done in the Portuguese original. Professor Castro-Klaren will be in charge of the lectures (in English) for the first 45 minutes, as well as the discussions and the work done by the students in Spanish. The course is organized around a 150-minute class segment. The second 45 minutes will be dedicated to the presentation of video material related to the topic. There will be a 10-minute break, and in the last 45 minutes the students will be divided into two groups. The students who desire to discuss the course material in Portuguese will join Professor Bensabat-Ott, and the students who want to discuss the material in Spanish will join Professor Castro-Klaren. Assignments as well as grades will be given by both Professors. Recommended Course Background: AS.210.277, AS.210.311
Area: Humanities.

AS.215.456. Gauchos, Negros, Gitanos. 3 Credits.
Study of the music and literature inspired by three groups of great liminal influence in the cultural and political affairs of their respective nations. Gauchos (Argentina), Afro Hispanics (Cuba, Puerto Rico, Santo Domingo), Gitanos (Spain). Attention given to popular and learned myths and stereotypes and the history of efforts to establish self-identity. Conducted in Spanish. Recommended Course Background: AS.210.326
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.458. Cuba and its Culture Since the Revolution. 3 Credits.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.459. Spain in Galician Eyes. 3 Credits.
Area: Humanities.
AS.215.480. Modern Mexico and the Culture of Death. 3 Credits.
We will examine the cultural resonance of death in Mexico’s colonial and postcolonial history and the impact of the 1910 revolution in the nation’s popular and elite self-image. Emphasis placed on the visual arts, literature, music, and the view of Mexico created by foreign writers and artists.
Area: Humanities.

AS.215.486. The Spanish Avant-garde. 3 Credits.
From the turn of the 20th century until the outbreak of Civil war in 1936, Spain witnessed the greatest flourishing in its literary and artistic scenes since its Golden Age 300 years before. In poetry, prose, painting, and film, Spanish artists and intellectuals were innovating artistic forms and participating in new kinds of cultural production and critical practice. In this course we will examine this period, paying special attention to the works of such writers and artists as Miguel de Unamuno, José Ortega y Gasset, Luis Buñuel, Salvador Dalí, Federico García Lorca, and Pablo Picasso. The course will be taught in Spanish.
Instructor(s): W. Egginton
Area: Humanities.

AS.215.474. Origins of the Spanish Novel. 3 Credits.
Readings will include selections from Medieval and Renaissance Works, such as “El Conde Lucanor”, “Amadís de Gaula”, “La carcel de amor”, “El Abencerraje”, “Lazarillo de Tormes”, “La Diana”, “El buscon”, “Novelas ejemplares” (Cervantes) and “Don Quixote”.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.484. Orientalismo al Sur. 3 Credits.
Taught in Spanish. This course examines the association of Latin America with topics like feudalism, despotism, and medieval cultural lifestyles. Literary and critical texts include Victorino Lastarria, Domingo Sarmiento, Enrique Larreta, Rómulo Gallegos and José Ingenieros, among others. Cross-listed with PLAS
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.
Area: Humanities.

AS.215.492. Latin American Premodern. 3 Credits.
Interestingly, I have decided to focus on the idea that Hispanic colonization was not modern but premodern in character, this course examines the period of Hispanic colonization as marked by cultural contact, conquest, and colonization. The course examines both postcolonial theory and its relationships with medieval Iberia through topics such as mimicry, race relations, hybridity, settlement and transculturation, feminization of enemies, nationalism, temporality and periodization. Taught in Spanish.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.494. Metaphysical Fictions in Latin American Literature. 3 Credits.
All readings and discussions will be in Spanish. Perhaps more than in the Anglophone tradition, the literatures of Latin America have exhibited a strong current of metaphysical speculation, leading to the image of the Latin American literary intellectual as a kind of philosopher poet. In this course we will read salient examples of the metaphysical fictions that have led to this reception, including books and stories by Julio Cortazar, Jorge Luis Borges, Alejo Carpentier, Adolfo Bioy Casares, Gabriel García Márquez, Augusto Roa Bastos, and others. Cross-listed with PLAS
Instructor(s): W. Egginton
Area: Humanities.

AS.215.525. Spanish Independent Study. 3 Credits.
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.
Area: Humanities.

AS.215.526. Spanish Independent Study. 0 - 3 Credit.
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton
Area: Humanities.
Taught in English, this course is a primer in the linguistics and the rhetoric of literary and cinematic texts. Students will familiarize themselves with the notion of the literary language’s exceptionality by studying Aristotle, Plato, Viktor Sklovskij and Roman Jakobson among others. They will then compare the power of the literary with the language of cinema by studying Andre Bazin’s take of New Realism, Christian Metz’s structuralist approach to cinema and psychoanalysis, Gilles Deleuze’s theory of the moving-image and the time-image, a feminist approach to cinema by E. Ann Kaplan and others, as well as theories of digital cinema from Peter Weibel to Lev Manovich, among others. We will place the language of literature and film within a context that includes religion music, magic, prophecy and medicine. Cross-listed with Film and Media Studies and English (This course is offered as AS.212.601, 213.601, 214.601, and 215.601. Please check other course numbers for open seats.)
Instructor(s): B. Wegenstein; P. Forni.

We will hone our skills in reading novels as political documents and political documents as narrative with revolution and revolt in the background and Marxism as the main informing theoretical legacy. Writings by Cortazar, Vargas Llosa, Euclides da Cunha, Carpentier, Bolaño, Marx, Gramsci, Mariategui, Fanon, Deleuze, Toscano, Badiou. Instructor(s): E. Gonzalez.

European languages document the evolution of the concept of literature from a generic term indicating the body of writings produced in a particular country or period to one that more particularly signifies works endowed with an aesthetic quality. The concept of literature thus seems to take form in connection with the emergence of a critical discourse, the search for a standard of taste. The dream of founding a "science littéraire" modeled on the principles of structural semiotics searching for an elusive "literariness", literature as a system, a set of formal features, not a collection of discrete, ineffable individuals; it thus involved a rejection of the aesthetic, or at least a reconsideration of its assumptions. This course will pursue the question of "The Idea of Literature" simultaneously from a philosophical and a historical perspective: in moving from formalist literariness to the rediscovery of categories like the ethical, the subject, the reader, the author, and the aesthetic, we will ask such questions as: Can there be a return to an aesthetic education, as much wish, and what would that be? Would such a move resuscitate the ghost of Hume’s gentleman scholar, which the New Critics tried to do away with? Is there a way of formally distinguishing between literature and its various contexts? Authors will include Hume, Kant, Taine, Lanson, Sainte-Beuve, Brunetière, Arnold, Proust, Benjamin, Bréton, Sarthe, Bourdieu, De Man, and Eco.
Instructor(s): E. Russo; W. Egginton.

Close readings in historical context of José Donoso’s El obsceno pájaro de la noche and Casa de campo, Isabel Allende’s La casa de los espiritus, and Pilar Donoso’s Correr el tupido velo, as well as selected essays from Sandra M. Gilbert’s “Rereading Women”
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive.

AS.215.623. Literary Patronage in the Age of Cervantes.
This seminar will concentrate on the roles and relationships of patrons and clients, particularly after the death of Phillip II (1598). Dedications by authors to their patrons will be discussed and each student will select a particular author as a semester-long project. Authors include Cervantes, Gongora, Quevedo, Lope de Vega, Velez de Guevara and Maria de Zayas.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.632. The New World Baroque.
This seminar will look at theories and source texts comprising the cultural production known as the New World Baroque. With its origins in the Colonial period in Latin America, the New World Baroque extends to and includes some twentieth-century and contemporary aesthetic practices. Although the focus of the seminar will be largely literary and theoretical, we will look at some examples of visual culture as well. Cross-listed with PLAS
Instructor(s): W. Egginton.

This seminar will be based on close readings of the ‘Lazarillo de Tormes’, selections from Mateo Aleman’s ‘Guzman de Alfarahe’, and three of Cervantes’ ‘Novelas ejemplares.’ These texts reflect the impact that Spanish fiction exerted on Golden Age Spanish literary history and on the European novel in general. An extensive bibliography will also be covered.
Instructor(s): H. Sieber.

AS.215.635. Spanish Golden Age Theater.
Readings in theory of the drama and various plays and their relationships to the corrales will be the primary topic covered; analysis of individual plays from the viewpoint of court theatre will also be included.
Instructor(s): H. Sieber.

AS.215.639. Don Quijote de la Mancha.
The novel will be the focus of the entire seminar. Recent trends in Cervantes criticism, textual issues related to the novel’s publication, biographical, cultural, and social history, and patronage in the Courts of Philip II and III will be topics of discussion and research. The goal is a wide-ranging appreciation and understanding of the novel’s original contexts.
Instructor(s): H. Sieber.

Taking into account the crisis in self (national) representation and the fluidity of identities, the course will delve into the work of major Latin American writers in order to study issues of self-representation across time and specific contexts. The course will begin with the work of Sarmiento and move on to Gilberto Freire, Rachel de Queiroz and Clarise Lispector. In a second stage the course will delve into Garcia Marquez’ autobiography and Mario Vargas Llosa’s “La tia Julia y el escribidor”, to end with Ernesto Cardenal’s autobiography.
Instructor(s): S. Castro-Klaren.
AS.215.643. Frontera, conquista, y revolución: España, Argentina y México.
The seminar explores frontiers and contact zones through the literatures of three crucial cases in trans-Atlantic history. It starts with an examination of the frontiers of Muslim invasions and Christian conquests in medieval Iberia. It continues with links between medieval Reconquista and American Conquista. In the case of Argentina, it considers the clash between Indigenous cultures and colonialism in the Pampas, the national wars of independence and civil strife between Buenos Aires and the provinces, and the constitution of the Gaucho national ethos. In the case of Mexico, it concentrates on the northern frontier during the colonial and postcolonial periods, the loss of territory to Texas and the United States, and the theaters of insurgency during the 1910 revolution and its aftermath.
Instructor(s): E. Gonzalez; N. Altschul.

Four authors deeply embroiled in translation and the work of Eros and Thanatos will be studied: J. L. Borges (Pierre Menard), J. Derrida (fragments from La carte postale), Javier Marías (Corazón tan blanco), and Andrés Neuman (El viajero del siglo).
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive.

AS.215.645. Frontera, conquista, y revolución: España, Argentina y México.

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.
Departing form narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.
Instructor(s): S. Castro-Klaren.

AS.215.647. Writing and Reading the Andes: An Interdisciplinary Approach to our Current Understanding of Andean Civilization.
The objective of the course is to bring together the work of the early 16th century Indian, Mestizo and Spanish cronistas that wrote the Andes for the first time in light of the most recent work on Andean pre and post conquest civilization coming from the fields of archaeology, ethno-history, cultural history and historiography. Besides reading from the work of the Inca Garcilaso and Guaman Poma, we will also read from Jose de Acosta and Bernabe Cobo. The scholarly bibliography will include the work of Tom Zuidema, Frank Solomon, Gary Urton, Bryan Bauer and Juan Ossio.

AS.215.657. Modern Mexico and the Culture of Death.
We will consider at the advanced level the cultural resonance of death in Mexico's colonial and postcolonial history and the impact of the 1910 revolution in the nation's popular and elite self-image. Emphasis placed on the visual arts, literature, music, and the view of Mexico created by foreign writers and artists.

Noir has become the default genre for sex-and-violence best-selling novels in the global market. From its putative origins in hard-boiled crime pulps, on the eve of the Great Depression, the imprint nowadays embodies the leading post-territorial fiction machine. We will zigzag the high-and-low noir belt in the company of masters sharply at odds with their respective nations and the cleansing of dark legacies: J. L. Borges, "El Zahir;" W. Faulkner, Sanctuary; Dashiell Hammett, Red Harvest; Leonardo Sciascia, The Day of the Owl (Il giorno della civetta); Ishmael Reed, Mumbo Jumbo; Carlos Fuentes, La cabeza de la hidra; Mario Vargas Llosa, Lituma en los Andes, Javier Marías, Mañana en la batalla piensa en mí; Orhan Pamuk, The Black Book Kara Kitap).
Instructor(s): E. Gonzalez.

The course will focus on the historical and discursive possibilities of the nation's narration in post-colonial Latin America. Special attention will be given to the historical record, to discursive and narrative theory, to recent critical assessment of the issue and the question of the nation in the age of globalization.

The course will focus on 7 major novels drawn from the Spanish American and the Brazilian canon in order to ascertain the canon theory that informs the interpretation that produces the force of their centrality and masterly status. The course will consider closely key texts in the theory of the novel in general and history of the Latin American novel. Key authors: Machado de Assis, Guimaraes Rosa, Jose Maria Arguedas, Julio Cortazar, Juan Rulfo, Mario Vargas Llosa, Garcia Marquez, Clarise Lispector, Diamela Eltit, Jorge Volpi.
Instructor(s): S. Castro-Klaren.

AS.215.668. Postcolonial Middle Ages.
Taught in English. Postcolonial Studies dramatically changed inquiry on the Middle Ages in the last two decades, mainly in the study of English and French materials. This seminar brings medieval Iberian subjects into the discussion and examines the new critical idioms and approaches of pan-European postcolonial medievalism.
Instructor(s): N. Altschul
Area: Humanities.

España fue una sociedad multiconfesional durante toda la edad media. Haciendo hincapié en el contexto histórico este curso ofrece un panorama de las culturas y literaturas de la Iberia musulmana desde la conquista en el siglo ocho hasta las expulsiones de judeoconversos y moriscos en los siglos quince y diecisiete.
Instructor(s): N. Altschul.
AS.215.695. New and Old Disputations of/for the New World.
This course will focus on readings of original texts—chronicles, reports, treatises, and polemics— and critical commentary on the issues central to the disputation for control and deployment of the meanings of the "new" world and its status in the realm of coloniality. Besides selections from the Inca Garcilaso de la Vega, Guaman Poma, and Ixtlilxochitl, we will read from Jose de Acosta and Bernabe Cobo. Antonello Gerbi’s Disputa Del Nuevo Mundola and Walter Mignolo’s The Darker Side of the Renaissance, along with Enrique Dussel’s El Encubrimento Del Otro and Charles Man’s 1491 will constitute the totality of readings and problematic of the seminar.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

From telegrams to tweets, the twentieth-century media revolution appears unique; but the magnitude of the revolution is not unprecedented. Another media revolution preceded ours by about 400 years, and coincided with the dawn of modern Europe. This course will examine examples of inflationary media—media whose deployment affects not just the content being transmitted, but also a culture’s entire understanding of reality—from both ages, with special attention to those deployed in the context of emergent early modern nation states like Spain, but with an eye to better understanding the effects and potentials of analogous media practices today.
Instructor(s): W. Egginton.

In this seminar we will explore the idea of the partial, not as secondary to wholeness, but as prior to and independent of any presumption of totality. From the partial drives of psychoanalysis to the Heideggerian concept of Eigentlichkeit to the deconstructive understanding of essences as being always secondary and parasitic, the concept of partiality can help us understand how human desire is as inextricably bound to temporality and wholeness and incompletion as it is to corporate fantasies of eternity and wholeness. Weaving together a series of literary and philosophical readings from sources like Borges, Kafka, Cervantes, Plato, Augustine, Maimonides, Derrida, Lacan, and Zizek, we will explore how being partial entails both the impossibility of truly impartial judgments and the inevitability of our being always partial to other people, experiences, and objects. Ultimately at stake will be the role literature and the reading of literature can have in taking stock of partiality in all its forms and effects.

AS.215.717. The Urban Experience in Spain.
This course will examine the Spanish urban experience between the 1800s and the present day. While our main focus will be on treatments of the city in novels, our literary approach will be further informed by considerations of other media as well as by theories relating to urbanism and architecture. Spain’s principal metropolises, Barcelona and Madrid, will be the primary (although not exclusive) subjects of this course. Final research paper required along with 3 response papers during semester. This course will meet for four hours on Fridays at 1pm twice a month starting Sept. 17th. However, the first meeting/session will take place on Thursday, Sept. 2nd, 1pm to 5pm.
Instructor(s): R. Davidson.

AS.215.726. Spanish & Italian Poetry From The Middle Ages to the Baroque.

AS.215.737. Don Quijote.
AS.215.777. The Invention of Fiction.
Rather than understand fiction as a constant in human history, this course will consider it a historically specific form of cultural expression. We will examine and compare theories of the fictional from an array of historical moments in order to better understand what fiction is, how it differs from premodern notions of history and poetry, and how it both informs and depends on modern notions of knowledge and subjective agency.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to pose, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.

AS.215.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. — In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollass, Nichols, Cerquiglini, and Ferra among others. The course will be taught in English. Meets with 212.790, 213.790, and 214.790
Instructor(s): E. Strowick; J. Neefs
Area: Humanities.

This survey of critical approaches to the study of film explores theoretical problems of representation and reality, film form and signification, authorship, spectatorship, and the digital frontier. Each week we examine a different narrative genre, historical period, or a given theoretical aspect through films that students will watch independently as well as at mandatory weekly screenings.
Instructor(s): B. Wegenstein; D. Schilling.

AS.215.826. Spanish Independent Study.
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

AS.216.300. Contemporary Israeli Poetry. 3 Credits.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, David Avidan, Dan Pagis, Dalia Rabikovitch, Yona Wollach, Yair Horwitz, Maya Bejerano, and Yitzhak Laor. Through close reading of the poems, the course traces the unique style and aesthetic of each poet, and aims at presenting a wide picture of contemporary Hebrew poetry.
Instructor(s): N. Stahl
Area: Humanities.

AS.216.398. Zionism, Post-Zionism and Modern Hebrew Literature. 3 Credits.
This course studies the development of modern Hebrew literature through its relation to Zionism and Post-Zionism. Based on a close reading of both literary and non-literary Zionist and Post-Zionist texts, we will explore the thematic, social, political, aesthetic and stylistic influences that these two movements have had on modern Hebrew literature. Writers to be discussed include: Herzl, Nordau, Achad ha-am, Jabotinsky, Kluasner, Brenner, Berdyczewski, Agnon, Greenberg, Kahana-Carmon, Oz, Yehoshua, Grossman, Castel-Bloom, and Laor.
Instructor(s): N. Stahl.

AS.216.412. The Divine in Literature and Cinema. 3 Credits.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.

AS.216.500. Independent Study. 0 - 3 Credit.
Instructor(s): N. Stahl.

AS.216.612. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.

AS.216.800. Independent Study.
Instructor(s): N. Stahl.
AS.300.219. Introducing Maurice Merleau-Ponty: Philosophy, Phenomenology, and Perception. 3 Credits.
This course seeks to introduce students to the philosophy of Maurice Merleau-Ponty (1908–1961), amongst the most significant French philosophers of the twentieth century. His magnum opus, Phenomenology of Perception (1945) argued, amongst other things, that we cannot begin to understand perception so long as we remain committed to the notion that it is a mere amalgamation of individual bits of sense-data: we must understand it as a total phenomenon based on our original openness to the world as a whole. Readings include key selections from his early and later work. No prior background in philosophy is necessary.

Cross Listed Courses

History of Art
AS.010.216. 20th Century Italian Art. 3 Credits.
This course will be a critical survey of the major artistic movements in Italy during the 20th century, from Futurism to Arte Povera. Often seen as a secondary location of artistic production, the class will situate the artists working in Italy within a broader historical and global context. Instructor(s): K. Johnson
Area: Humanities.
AS.010.312. Surrealism. 3 Credits.
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA. Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014. Instructor(s): M. Warnock
Area: Humanities
Writing Intensive.
AS.010.730. Sacred Images in Early Modern Spain.
This course will look at the dialogue between sacred images and art in Baroque Spain. The status of religious images, the “paragone” or competition between sculpture and painting, and the issue of cult, will all be analyzed through the work of such painters as Velazquez, Zurbaran and Ribera. Cross-listed with the Spanish section of GRLL.
Instructor(s): F. Pereda.

Film and Media Studies
AS.061.354. Wien-Baltimore: Holocaust Education and Documentary Films. 3 Credits.
This documentary production class accompanies the production of the documentary Wien-Baltimore between January and April 2010. The film relives the experiences of Holocaust-survivor Leo Bretholz focusing on Leo’s efforts to tell his story to the Baltimore school community and beyond. Wednesday production meetings and Tuesday screenings. First class/meeting to be held on Tuesday, February 2nd at 7:30pm. Recommended Course Background: AS.061.145, AS.061.150, or with instructor permission.
Instructor(s): B. Wegenstein.

Anthropology
AS.070.262. Cuban Intellectuals, Cinema, and the State. 3 Credits.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages. Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.
AS.070.408. Creative Expression. 3 Credits.
Tacking between theoretical and ethnographic texts on art and poetry, visual image and dramatic performance, living body and natural landscape, this course seeks anthropological ground for an impersonal and asubjective philosophy of creative expression. Drawing from thinkers such as Nietzsche, Bergson, Whitehead, Merleau-Ponty, and Deleuze, and studies set in China, India, Indonesia, Melanesia, and aboriginal Australia, we will confront the working intuitions of artists and “creators” of various kinds with the unpredictable life of the worlds in which they work. Area: Humanities, Social and Behavioral Sciences.

Political Science
The seminar will explore to what extent Hegel can be read as contributing to a feminist philosophy. We will focus on Hegelian openings onto the emotional in Phenomenology of Spirit. In addition, we will study feminist philosophers who have drawn on or offered critical readings of Hegel (Irigaray, Butler, Cavarero, Malabou, and others). Instructor(s): J. Bennett; K. Pahl
Area: Social and Behavioral Sciences.
AS.191.421. A Normal Country German Politics and Identity. 3 Credits.
This seminar deals with questions pertaining to the formation of modern German nationalism and national identity through the perspective of German politics and history. Dean’s Teaching Fellowship Instructor(s): F. Bauwens
Area: Social and Behavioral Sciences.

Humanities Center
AS.300.211. Great Poems of the Americas. 3 Credits.
This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot’s The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire’s Notebook of a Return to the Native Land, Vicente Huidobro’s playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of “the Americas” as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we’ll examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.
Instructor(s): R. Galvin
Area: Humanities.
AS.300.309. The Sense of Loss, 1900-1927. 3 Credits.
Area: Humanities.
AS.300.315. The Sense of Loss, 1880-1930. 3 Credits.
A comparative study of the aesthetics and representation of loss (personal, political, historical, etc.) in a number of modernist texts. Authors to be studied will include J.P. Jacobsen, Ibsen, Unamuno, Kafka, Rilke, Woolf and T.S. Eliot. The class will focus on the twofold sense of “sense” (both as feeling and as meaning) in order to explore the way these texts seek to come to terms with and capture the nature of loss.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.331. Modern Tragedy. 3 Credits.
Since the late 18th century, tragedy has repeatedly been declared dead on the grounds that the changed social, historical and philosophical conditions of modernity do not allow for the genre in a strict sense. This course looks at some versions of this argument in relation to modern works of drama in order to examine its validity and the extent to which the concept and experience of the tragic have changed in our time. Authors to be studied will include Schiller, Kleist, Strindberg, Maeterlinck, Lorca, Miller, Brecht and Beckett. Cross-listed with GRLL and English
Instructor(s): L. Lisi
Area: Humanities.

AS.300.379. Israeli Film and Literature. 3 Credits.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli cinema and literature. The course will follow both a thematic and chronological path in order to study the ways in which Israeli cinema and literature reflect political, ideological, social, and cultural aspects of contemporary Israel. In this context, we will read well-known works by several major authors and will watch major Israeli films from the 1940s to these days. We will also use a comparative approach to study the different artistic means of both mediums and to evaluate their successes in representing the various tensions of Israeli society and culture.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.300.380. Realism and Anti Realism in Modern Jewish Literature. 3 Credits.
This course seeks to trace the narrative dynamics and literary means of Modern Jewish Literature. The course will focus on the ideological, political and artistic context of the break with the conventions of realism in Jewish modernism. Reading includes: Erich Auerbach, Franz Kafka, S.Y Agnon, S.Y Abramovitch, Sholem Asch, A.B Yehoshua, Yoel Hoffmann and Orly Castel-Bloom. Cross-listed with Jewish Studies and GRLL
Instructor(s): N. Stahl
Area: Humanities.

AS.300.381. The Moses Complex. 3 Credits.
Instructor(s): R. Leys
Area: Humanities.

AS.300.400. Philosophy of Tragedy. 3 Credits.
Since the late eighteenth century, philosophers have repeatedly been drawn to investigations of tragedy and the tragic. In this course we will study some of the most important thinkers in this tradition, and examine the different implications (philosophical, historical, political, existential, aesthetic, etc.) that these concepts carry in their works. Authors to be read will include Schiller, Hegel, Kierkegaard, Nietzsche, Unamuno, Benjamin and Cavell.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.406. Marcel Proust, Literature and Art. 3 Credits.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Cross-listed GRLL-French
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.300.408. Lyric Modernity. 3 Credits.
A comparative literature course on modern lyric and poetics. The main issue of the course is how the lyric voice is constructed and sustained under the pressures of modernization in the United States, Europe, and Korea. We will also emphasize issues of translation and the relationship of music and poetry. Readings will include texts by Adorno, Benjamin, Grossman, von Hallberg and Waters, and poems by Dickinson, Rilke, and Kim among others. All readings available in English. Cross-listing requested with East Asian Studies, GRLL, and English
Instructor(s): S. Rhee
Area: Humanities.

AS.300.601. Philosophy of Tragedy.
Since the late eighteenth century, philosophers have repeatedly been drawn to investigations of tragedy and the tragic. In this course we will study some of the most important thinkers in this tradition, and examine the different implications (philosophical, historical, political, existential, aesthetic, etc.) that these concepts carry in their works. Authors to be read will include Schiller, Hegel, Kierkegaard, Nietzsche, Unamuno, Benjamin and Cavell. Cross-listed with: English, German & Romance Languages & Literatures, Philosophy
Instructor(s): L. Lisi.

AS.300.606. Realism and Anti Realism in Modern Jewish Literature.
This course seeks to trace the narrative dynamics and literary means of Modern Jewish Literature. The course will focus on the ideological, political and artistic context of the break with the conventions of realism in Jewish modernism. Reading includes: Erich Auerbach, Franz Kafka, S.Y Agnon, S.Y Abramovitch, Sholem Asch, A.B Yehoshua, Yoel Hoffmann and Orly Castel-Bloom. Cross-listed with GRLL and Jewish Studies
Instructor(s): N. Stahl.

AS.300.684. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Cross-listed with GRLL-French
Instructor(s): J. Neefs; M. Fried
Writing Intensive.
Interdepartmental

**AS.360.133. Great Books at Hopkins. 3 Credits.**
Great Books at Hopkins is designed for first-year students and explores some of the greatest works of the literary and philosophical tradition in Europe and the Americas. In lectures, panel sessions, small seminars, and multimedia presentations, professors from a variety of academic disciplines lead students in exploring authors across history. Close reading and intensive writing instruction are hallmarks of this course, as is a changing reading list that includes, for this fall, Homer, Plato, Dante, Shakespeare, Douglass, and Woolf.
Instructor(s): E. Patton; K. Boyce
Area: Humanities
Writing Intensive.

Program in Latin American Studies

**AS.361.130. Introduction to Latin American Studies. 3 Credits.**
Within a chronological frame that starts with early American-Indian civilizations and moves on to issues in contemporary culture and politics, the course introduces students to an interdisciplinary understanding of Latin American History and Culture. The course draws from historical geography, anthropology, history, politics, art, film, and literature.
Instructor(s): S. Castro-Klaren
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.361.316. Caribbean Writing in Shakespeare, V. S. Naipaul, and Alejo Carpentier. 3 Credits.**
Readings and polemics concerned with Shakespeare’s play The Tempest (1610-1611) and its postcolonial afterlives; V. S. Naipaul’s novel A House for Mr. Biswas (1961); and Alejo Carpentier’s El siglo de las luces (1962). The socio historical and political contexts of each work and authorship will be considered in depth in terms of dominant notions of writing in current critical theory. Cross-listed with GRLL, English, and Writing Seminars.
Instructor(s): E. Gonzalez
Area: Humanities, Social and Behavioral Sciences.

Music

**AS.376.340. Music and Literature: Thomas Mann’s Doctor Faustus. 3 Credits.**
Instructor(s): R. Giarusso
Area: Humanities
Writing Intensive.

Program in Museums and Society

**AS.389.356. Halls of Wonder: Art, Science, and Literature in the Age of the Marvelous, 1500-1800. 3 Credits.**
Explore the material culture of “wonder” from the Renaissance to the Enlightenment in literature, science, and art, with Hopkins’ rare book collections and the Walters Art Museum. M&S practicum course.
Instructor(s): E. Havens
Area: Humanities.

History

The Department of History offers students the opportunity to work intensively in the classroom and with individual faculty to discover the richness and complexity of history. Undergraduates begin with general courses, but progress quickly to courses that explore topics in depth and provide experience in researching, analyzing, and writing about the past. Graduate students work independently and with faculty advisors on reading and research in their fields of interest, while departmental seminars bring them together to discuss their research, forging a collegial intellectual culture. The department emphasizes European history, United States history, and the histories of Africa, Latin America, and China. Faculty and students participate in a number of cross-disciplinary programs, among them Women's Studies, the Humanities Center, Medieval Studies, Latin American Studies, the Institute for Global Studies, the Seminar in Moral and Political Thought, and two programs at Villa Spelman in Florence, Italy: the Villa Spelma Program in Social Theory and Historical Inquiry and the Seminar in Italian Studies.

Facilities

In addition to the Milton S. Eisenhower Library at the university, students in the Department of History can use the collections of the Peabody Institute Library, the Enoch Pratt Free Library, and the Maryland Historical Society in Baltimore, and of the Library of Congress, the National Archives, the Folger Shakespeare Library, and other specialized libraries in nearby Washington, D.C. There is provision for regular transportation to and from the Library of Congress. Also within easy distance are the holdings of specialized historical libraries and archives in Annapolis, Richmond, Williamsburg, Charlottesville, Wilmington, Harrisburg, Philadelphia, Trenton, Princeton, Newark, and New York.

Requirements for the B.A. Degree

(See also General Requirements for Departmental Majors (p. 33))

Programs are prepared in collaboration with the student’s advisor, who is a member of the History Department. History majors are required to take two introductory courses offered by the History Department (100.1xx). The two-semester Undergraduate Seminar (AS.100.193-AS.100.194) is also required of all history majors and is normally taken during the sophomore year. The seminar introduces students to the methodologies of history and the variety of current styles of historical writing. It also guides students in writing an original research paper on a topic of their choice.

Eight additional one-semester courses in history are required, including six at the 300-level or above. For students who concentrate in one geographical area (Europe, United States, Latin America, Africa, or Asia) two courses are required outside the area of concentration. Students with a cumulative GPA of 3.25 and a cumulative GPA in history of 3.5 or higher by the end of their junior year are strongly encouraged to undertake the research and writing of a senior thesis, a prerequisite for graduation with honors. Senior thesis work is directly supervised by a member of the department and coordinated through a required two-semester-course: Senior Thesis Seminar (AS.100.507-AS.100.508), which replaces two of the required eight courses. Normally, students select thesis topics and thesis directors during the spring semester of their junior year, in advance of the pre-registration period for the following fall.

Proficiency through the intermediate level is required in one foreign language, normally a language taught through the Krieger School. Other languages may be used only with the approval of the student’s departmental advisor and the Director of Undergraduate Studies. Proficiency may be demonstrated by taking a special examination instead of by coursework, but any language requirement waived by exam must be documented on the student’s transcript. The History Department also strongly encourages interdisciplinary work in cognate fields of learning. History majors are therefore strongly advised to take two clusters of courses outside the department—preferably one in the social sciences and one in the humanities—consonant with their interests and complementing their areas of concentration in history.
Minor in History
The minor in history offers to students majoring in other programs of study an opportunity to pursue a serious interest in history. Students wishing to minor in history should consult the History Department’s Director of Undergraduate Studies not later than their junior year.

The requirements are:

- Two introductory courses offered by the History Department (100.1xx)
- Four history courses at the 200 level or above. Three of these must be advanced courses at the 300 level or above.

The History Department encourages interdisciplinary work in cognate fields of learning. History minors are therefore strongly advised to take additional courses in any department, including the History Department, that relate to the student’s major discipline in an historical way. Students should feel free to consult with their faculty advisor about such courses.

The B.A./M.A. Program
A four-year program for B.A./M.A. degrees in history may be elected after a probationary period of one year, usually the year in which the student takes the undergraduate seminar. Interested students must apply to the program. Once admitted to the program by the sponsoring professor, the student must complete:

- 120 undergraduate credits, based on the customary requirements of the bachelor’s degree.
- One foreign language.
- One graduate seminar in the field of specialization and in which the research and writing of an M.A. thesis are supervised, to be taken in the student’s fourth year.
- One Graduate Field Examination in the field of specialization, to be taken in the fourth year.

The graduate program prepares professionally motivated students for careers as research scholars and college and university teachers. Hence it is designed for candidates who want to proceed directly to the Ph.D. degree, who have developed historical interests, and who are prepared to work independently. Within the areas of European history, American history, and the histories of Africa, Latin America, and China, the department emphasizes social/economic and intellectual/cultural history. Although diplomatic and political history are not emphasized, attention is given to the social, economic, and cultural bases of politics.

The program is organized around seminars rather than courses, credits, or grades. AS.100.781 The Seminar-AS.100.782 The Seminar and satellite seminars in European, American, and Comparative World History bring together students, faculty, and invited scholars from outside the university to discuss their research work. These departmental seminars create a lively intellectual community in which graduate students quickly become contributing members. The combination of flexibility, independence, and scholarly collegiality offered by the Hopkins program gives it a distinctive character.

Students select four fields (one major and three minor) and make their own arrangements with professors for a study program leading to comprehensive examinations at the end of the second year. Those arrangements may include taking a seminar in the field. One, and exceptionally two, minor field may be taken outside the Department of History. Students have maximum flexibility in the construction of individual plans of study, as well as the opportunity to work closely with several professors.

Admission and Financial Aid
