This course is an introduction to the history of Brazil from the 16th century to the present, from the early phases of colonization to the 2014 World Cup.
Instructor(s): G. Paquette
Area: Humanities.

**AS.100.121. History of Africa to 1880.**
A history of Africa from human evolution to the mid-nineteenth century focusing on key themes in social, economic, and political history.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

**AS.100.122. Introduction to History of Africa (since 1880).**
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

**AS.100.128. Ancient and Medieval Jewish History.**
History of the Jews under empires and monarchies, from the Persian restoration to the Spanish expulsion. Emphasis on Jews in the Middle East and how the rise of Christianity and Islam challenged, transformed and strengthened Judaism. Cross listed with Jewish Studies.
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

**AS.100.129. Introduction to Modern Jewish History.**
An examination of the history of Jews over the past three hundred years. Explores the dramatic encounter at the close of the 18th century between rapidly changing European societies caught up in intellectual, political, and economic revolution and a 2000-year old traditional civilization living in their midst; the kaleidoscopic array of Jewish political, religious, cultural and social responses to this encounter; the new forms of Jewish communal and individual life and consciousness which emerged in the course of the 19th and 20th centuries; the extension of this new modern framework to the Jews of the Middle East in the context of European imperialism and colonialism; the key roles played by the Jews as agents and symbols of political, economic, and cultural modernity; the phenomenon of anti-Semitism and whether it is a pathology or integral part of modern European civilization; the extreme shifts in Jewish life from the mid-20th century in light of the Holocaust, the creation of the state of Israel, and integration into American society.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

**AS.100.133. Food in Premodern Europe.**
Food occupies a central role in all cultures. However, what we eat, how and why we eat it and where it comes from differs remarkably. This course examines the sociohistorical context of food in European societies during the classical, medieval and renaissance periods. Lectures will address such topics as technology, trade networks, political institutions, religious observances, and medicinal/magical applications with respect to both staples, like bread and salt, and luxuries, such as spices and swans (!).
Instructor(s): H. Stein
Area: Humanities.

**AS.100.135. Freedom and Industry on the Chesapeake.**
This class will explore Baltimore as a working city. Students will gain an appreciation for how Baltimore grew beyond its initial role as a port for the trafficking of Chesapeake tobacco to support a complex urban economy with an uncertain relationship with slavery. We will explore Baltimore’s rise to national significance during the nineteenth century, especially in the maritime, transportation, and textile industries, focusing on the connection between labor and changes in the social landscape of the city.
Instructor(s): S. Cerato
Area: Humanities, Social and Behavioral Sciences.

**AS.100.136. Abraham Lincoln and His America.**
Freshmen seminar that explores the life and times of Abraham Lincoln though contemporary sources and texts by historians.
Instructor(s): M. Johnson
Area: Humanities, Social and Behavioral Sciences.

**AS.100.142. Baltimore's Beginnings.**
This course will begin by contextualizing the founding of Baltimore within the plantation dominated Chesapeake, then follow the rapid growth of Baltimore up through the American Revolution and the hosting of the Second Continental Congress. We will conclude by examining Baltimore's role as a major city in the new nation, and the city's role in the War of 1812 its enshrinement in the national anthem.
Instructor(s): S. Gamble
Area: Humanities.
AS.100.145. B'More: Blue-Collar Baltimore.
This course charts the history of Baltimore's working classes, from Fells Point shipbuilders in the 18th century to Sparrows Point steelworkers in the 20th century. Along the way, the course will consider how the politics of race, gender, and ethnicity influenced Baltimore's labor movement, how working-class neighborhoods responded to changing pressures, how popular culture has portrayed blue-collar Baltimore, and the evolving meanings of class in a post-industrial city.
Instructor(s): R. Gamble
Area: Humanities.

AS.100.146. Alcohol in America.
What explains the strange relationship of Americans to alcohol? This course will explore drinking in America from the colonial period to the 1980s. Along the way we will examine why 19th century Americans drank more than any people on earth and how, by 1919, “drys” were able to enact nationwide prohibition. We will then explore the prohibition era and its aftermath relating this history to subsequent laws and controversies concerning alcohol from Blue Laws to MADD.
Instructor(s): G. Klehr
Area: Humanities.

AS.100.148. War & Society in the New World.
This course will examine the principal wars fought in North America from the onset of European colonization to the War for American Independence. It explores not only big picture questions such as what caused the war, how was it fought and what were the results, but also how the war affected society at large, what was the experience of warfare for both combatants and noncombatants, and what were its costs and how were they measured?
Instructor(s): T. Jones
Area: Humanities.

AS.100.152. Crime and the Victorian City.
This course explores the social and cultural history of crime in Victorian London. Using digitized collections of nineteenth-century legal documents, we devote special attention to the ways that class, gender, and space shaped experiences of crime and criminal justice. Looking to cultural productions—print media, popular literature, maps, and ephemera—we ask how Victorian social mores and ideological systems influenced popular conceptions of crime.
Instructor(s): J. Clark
Area: Humanities.

AS.100.160. Consumer Culture and the Modern City.
This course explores new forms of consumer culture arising in nineteenth- and twentieth-century cities, and the public spaces department stores, theaters, exhibition halls, cinemas, shopping malls— that housed them. We read primary and secondary sources produced in imperial and post-colonial contexts in cities such as London, Paris, New York, Mumbai, and Bangkok. Course themes include the relationship between consumer culture and empire, sexual liberation and exploitation, racial and class conflict, body politics, and possibilities for or constraints on self-fashioning.
Instructor(s): L. Pepitone
Area: Humanities.

AS.100.191. Freshman Seminar: Family History in the U.S. and Europe.
Freshmen only. Discussion style. Introduces major themes since 1700: family sentiment and authority relations; gender and sexuality; family and work; dynamics of family and race. Readings emphasize interdisciplinary perspectives and interpretation of primary sources
Instructor(s): T. Ditz
Area: Humanities, Social and Behavioral Sciences.

AS.100.193. Undergraduate Seminar in History.
The first semester of the two-semester sequence required for majors, this course introduces students to the theory and practice of history. Following a survey of approaches to the study of the past and an introduction to research methods, students undertake original research and write an extended essay. Intended for history majors and prospective majors.
Instructor(s): F. Furstenberg; W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.194. Undergraduate Seminar in History.
The second semester of the two-semester sequence required for majors, this course further introduces students to the theory and practice of history. Students write an essay based on original research.
Prerequisites: AS.100.193
Instructor(s): F. Furstenberg; W. Rowe
Area: Humanities, Social and Behavioral Sciences.

This course explores the dynamic and fluid world of the early modern Mediterranean (1453-1650), where Christians, Jews, and Muslims met, fought, traded with, and enslaved each other.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.204. Freshman Seminar: Abraham Lincoln and his America.
Freshman seminar that explores the life and times of Abraham Lincoln through contemporary sources and texts by historians.
Instructor(s): M. Johnson
Area: Humanities, Social and Behavioral Sciences.

AS.100.205. Freshman Seminar: Health, Healing, and Medicine in Africa.
A freshman seminar introducing students to the history of health, healing, and forms of medical practice in Africa over the last two centuries.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

This course examines the relationship between law, governance, and social structures in America between the start of European settlement and the era of the Civil War. Topics will include Native American and European land claims, the regulation of family life, economic and commercial disputes, and the legal regimes of race and slavery. Throughout, we will consider both the aims of governing officials and how ordinary men and women maneuvered within the legal system.
Instructor(s): S. Damiano
Area: Humanities, Social and Behavioral Sciences.

AS.100.209. Freshman Seminar: Mexico and the World from Cortés to Cartels.
This introductory course examines Mexico's political, economic, and cultural role in global history from the time of Spanish conquest until the twenty-first century.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences.
This freshman seminar explores the rise of economic crimes, including piracy, smuggling, and counterfeiting, in the 17th- and 18th-century British North America and Caribbean, and their portrayal in popular culture. Freshmen Only.
Instructor(s): K. Smoak
Area: Humanities, Social and Behavioral Sciences.
Students explore politics and culture of the interactive Cold War from 1945 to the fall of Communism. Considerable assigned reading, 2 quizzes, and weekly 500 word papers on readings. Freshman Only.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences.
This freshman seminar will examine England under Tudor rule (including Henry VIII, Edward VI, Mary I, and Elizabeth I) and the intellectual and cultural movements of the Reformation and the Renaissance.
Instructor(s): J. Walker
Area: Humanities, Social and Behavioral Sciences.
AS.100.218. Freshman Seminar: Russian History from Revolution to Cold War.
Students will explore Russian politics and culture from 1905 to 1953.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences.
AS.100.219. Chinese Cultural Revolution.
The Cultural Revolution was Mao Zedong's last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revoltuion decade and since.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.
AS.100.220. Freshman Seminar: Politics, Information, and the State in Early Modern China and Japan.
This introductory seminar examines culture and politics in early modern East Asia (ca. 1500-1900) by looking at changing modes of communication and attitudes about state control of information and ideology. Freshmen Only.
Instructor(s): E. Mokros
Area: Humanities, Social and Behavioral Sciences.
Explores religious culture in medieval and early modern Europe, with an emphasis on spiritual beliefs and practices, relics, miracles, pilgrimage, and saint-making. Emphasis on reading and discussing written sources and visual culture.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.
AS.100.233. History of Modern Germany.
This course will offer a concise introduction to the political, social, and cultural history of Germany from the founding of the Empire in 1871 until the present.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences.
AS.100.234. The Making of the Muslim Middle East, 600-1100 A.D..
A survey of the major historical transformations of the region we now call the ‘Middle East’ (from late antiquity through the 11th century) in relation to the formation and development of Islam and various Muslim empires.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.
This course will focus on the long-distance trade of both foodstuffs and clothe in order to investigate urbanization and the development of national monarchies in western Europe from the outbreak of the Black Death (1347) to the eve of the Reformation (1517).
Instructor(s): H. Stein
Area: Humanities, Social and Behavioral Sciences.
AS.100.241. American Revolution.
The aim of this course is to explore the causes, character, and consequences of the American Revolution, a seminal event in world history.
Instructor(s): P. Morgan
Area: Humanities, Social and Behavioral Sciences.
AS.100.243. China: Neolithic to Song.
This class offers a broad overview of changes in China from Neolithic times through the Song Dynasty (roughly from 5000 BCE through the 13th century CE) and will include discussion of art, material culture, and literature as well as politics and society. Close readings of primary sources in discussion sections and extensive use of visual material in lectures will help students gain firsthand perspective on the materials covered. Not open to students who have previously taken AS.100.208. Cross listed with East Asian Studies
Prerequisites: If you have completed AS.100.208 you may not enroll in AS.100.243.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.
AS.100.246. Colonial Latin American History Survey.
This course offers a general survey of Colonial Latin American history, covering both Spanish and Portuguese America, from European conquest to the revolutionary wars of independence. Emphasis will be placed in exploring the nature and effects of conquest, the making of new pluri-ethnic societies, and the eventual break of these societies from Spain and Portugal.
Instructor(s): G. Garcia Montufar
Area: Humanities, Social and Behavioral Sciences.
AS.100.247. Remaking Gender in 20th Century America.
The last century saw the radical transformation of the meaning of manhood and womanhood. We will trace these changes on multiple levels in public and private life.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.
AS.100.248. Japan in the World.
This course is an introduction to Japan’s history from 1800 to the present with emphasis on the influences of an increasing global circulation of ideas and people. Topics include the emperor system, family and gender, imperialism, World War II, the postwar economy, and global J-pop.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.
AS.100.249. Baltimore as Historical Site.
The city of Baltimore will serve as a laboratory in which to study American History. We will explore the urban landscape on foot as well as through written sources.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.253. Civil Rights on the Silver Screen.
This course examines popular representations of the U.S. Civil Rights Era. By using recent Hollywood films, secondary readings and primary sources, students will explore the ways in which the era is remembered, depicted and commodified. Particular attention will be paid to the portrayals of well-known figures, representations of women, the treatment of violence and characterizations of the South.
Area: Humanities.

AS.100.255. The Haitian Revolution in World History.
This introductory seminar examines the revolution that transformed the slave colony of Saint-Domingue into the first black republic and second independent nation in the Americas, and its repercussions around the world. Non-Majors welcome.
Instructor(s): N. Marvin
Area: Humanities, Social and Behavioral Sciences.

AS.100.264. Re-Reading the Crusades: Chronicing a Century of Holy War 1096-1195.
How do we understand the Crusades? Students in this course will interrogate written sources from authors that lived during the European conquest of the Holy Land in order to understand the diverse perspectives of the conflict’s participants. Through background lectures and group discussions, students will examine how medieval writers - Jews, Christians and Muslims - conceptualized what we now call the Crusades in light of their own politics and circumstances.
Area: Humanities, Social and Behavioral Sciences.

AS.100.278. Baltimore in the Age of Revolution.
This course will use Baltimore as a case study for investigating the intellectual, political, cultural, and demographic upheavals of what historians have termed the “Age of Revolutions.” Through background lectures, group discussions, and field trips to historic sites, we will examine how the American, French, and Haitian revolutions reshaped the city and the lives of its inhabitants between 1763 and 1814. The field trip locations are both accessible, at no additional charge, by the Hopkins Shuttle and/or the Charm City Circulator.
Instructor(s): C. Consolino
Area: Humanities, Social and Behavioral Sciences.

AS.100.279. Europe since 1945.
This lecture course examines the political, social, and cultural history of postwar Europe with emphasis on the Cold War and the formation of the European Union.
Instructor(s): H. Baiz
Area: Humanities, Social and Behavioral Sciences.

AS.100.280. Music and Politics in Modern Europe.
This course explores the diverse and complicated relationship between music and politics during the twentieth century by focusing on three aspects: music that supports political systems and ideologies, music linked to political movements, and oppositional music. Concentrating on Germany, Britain, and the Soviet Union, we study how phenomena like mass culture, socialism, fascism, youth protest, and punk link music and politics by using examples from classical and popular music.
Instructor(s): L. Braun
Area: Humanities.

Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. The image of a CVS pharmacy burning following protests is perhaps one of the most visual and memorable moments of the Baltimore uprising in April 2015. This course will examine the CVS burning as a starting point for exploring the relationship between business’ broadly construed and Baltimore’s black community. In doing so, it addresses critical questions about urban development, black entrepreneurship, and corporate social responsibility in the post-war era. This course will include field trips.
Prerequisites: Students may enroll in one B'More course only.
AS.371.188 OR AS.371.189 OR AS.271.119 OR AS.140.318 OR AS.300.100 OR AS.360.108 OR AS.360.122 OR AS.360.171
Instructor(s): J. Levy
Area: Humanities, Social and Behavioral Sciences.

AS.100.286. Moving Out/Moving Up: Jewish Baltimore.
How are Baltimore’s communities formed? In this field-based course, students explore community development in action, on the ground and through the institutions that have shaped it. Moving Out/Moving Up exposes students to Baltimore’s unique and diverse Jewish community as it moves across history and across the city itself. On the way, students examine how identities are constructed through diverse media including architecture, food, and urban planning.
Instructor(s): P. Glotzer; R. Stoil
Area: Humanities, Social and Behavioral Sciences.

AS.100.290. Criminality and Incarceration in U.S. History.
This course will focus in particular on three key periods of prison development: the turn towards prison as industry during the Gilded Age; the period of “scientific treatment” in the early 20th century; and the post-World War II focus on the rehabilitative ideal. The course will then examine the failure of reform in the post-1965 period. The ways in which the American prison has contributed to regimes of racial control will be highlighted throughout.
Instructor(s): M. Shahan
Area: Humanities.

AS.100.301. America after the Civil Rights Movement.
Explores the role of the 1964 Civil Rights Act and mid-twentieth century reform movements in transforming American politics, economy, and culture since the late 1960’s.
Instructor(s): N. Connolly
Area: Humanities.

AS.100.303. Old Regime and Revolutionary France
Exercise
Examine the history of France from the reign of Louis XIV to the French Revolution, focusing on early modern society, absolutism, the Enlightenment, political culture, and the Revolution.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.

AS.100.306. America and the Great War, 1898-1920.
This small, discussion-oriented course covers the period from the Spanish-American War through the end of WWI and the Red Scare that more or less ended in 1920.
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences.
AS.100.307. Latin American Independence.
This seminar examines the breakdown of the Spanish and Portuguese empires and the emergence of new states in Latin America in the nineteenth century. Topics include: war, revolution, slavery, liberalism, and monarchism.
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences.

AS.100.309. American Social Thought since 1865.
This course explores the intellectual development of the modern United States through readings in philosophy, literature, law, economics, politics, and social theory.
Prerequisites: Cannot enroll if you have taken AS.100.400, same course.
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences.

AS.100.310. The French Revolution.
Political, social and cultural history of one of the great turning-points in European history. Previously offered as AS.100.204.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.

AS.100.311. National Pastimes: Sports, Culture, and American History.
National Pastimes examines the development of sports in the United States over the course of the 20th century with a particular interest in the relationship between sports and politics as well as issues of race, gender, sexuality and class.
Instructor(s): A. Davis
Area: Humanities, Social and Behavioral Sciences.

AS.100.314. The Enlightenment.
This course examines the Enlightenment, an intellectual movement that swept Europe in the eighteenth century to shape the modern world.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.

AS.100.315. Jewish Political Thought and Social Imagination, 1880-1940.
How a range of Jewish thinkers, activists, and creative writers grappled intellectually with the challenge of the nation-state, the rise and collapse of empires, antisemitism as a political phenomenon, the nature of politics and political action, the nature of modern societies, and the question of Jewish self-determination and sovereignty, 1880-1940. Readings by Herzl, Bernard Lazare, Freud, Kafka, Leshtshinsky, Arendt, Adorno, Michael Chabon, among others.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.318. The Age of Revolutions.
This seminar focuses on the political, social, and economic thought animating the revolutions which transformed Europe and the Americas, c. 1760 - 1850.
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences.

AS.100.319. The Tudors: Reforming England 1485-1603.
This course will examine Tudor England, including the reigns of Henry VIII, Edward VI, Mary I, and Elizabeth I, and the intellectual and cultural movements of the Reformation and the Renaissance.
Instructor(s): J. Walker
Area: Humanities, Social and Behavioral Sciences.

AS.100.320. Writing U.S. Empire.
This course will teach students how to write analytic history and how to interrogate primary documents through a focused look at American imperialism between the 1890s and 1930s.
Instructor(s): N. Connolly.

AS.100.321. Visions Of The Self.
Examines a variety of autobiographical texts – male and female, western and non-western, from the Middle Ages to the present, with an eye towards using these texts as “windows” into the society in which they were written. Course will require weekly reports, a term paper, and final exam. Organized as a seminar, student-run discussion will be integral to the course.
Instructor(s): R. Kagan
Area: Humanities, Social and Behavioral Sciences.

AS.100.322. New World Encounters: Europeans, Natives, Africans. The Makings of Creole Society in Spanish America, 15th - 18th centuries.
This course is designed to introduce students to the complex relationships that were established between the different cultures that inhabited colonial Latin America, from 1492 to the 18th century. Dean’s Teaching Fellowship course.
Instructor(s): G. Garcia Montufar
Area: Humanities, Social and Behavioral Sciences.

AS.100.324. Dostoevsky's Russia.
Dostoevsky and the culture of his era but also echoes of his ideas of Russia, religion, ethnicity, freedom, authority, and gender from 1917 until today. Short papers, quizzes.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences.

AS.100.325. Images of War in the 20th Century.
This course examines the changing face of war in photographs, propaganda posters, comics, and film from World War I to the "war on terror.
Instructor(s): H. Baiz
Area: Humanities, Social and Behavioral Sciences.

AS.100.326. Extreme America: Political Extremism, 1787-1920.
In the half century between 1870 and 1920, socialism, anarchism, and communism were real presences in American life, not just smear words. This course will examine political extremism in this extraordinary period with an eye toward understanding the causes and consequences of a political culture of extremism.
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences.

Using primary sources, including literature and film, we will explore the changing ways in which ideologues, intellectuals, and ordinary citizens defined national identity in 20th century China and Japan. Cross-listed with WGS and East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.332. Human Rights History.
Examines how the idea that people have rights transcending their particular place and time has evolved since the early modern period, with special emphasis on European experience and thought.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.
AS.100.333. Global Public Health Since World War II.
Globalization has dramatically reshaped the world economy, providing great advantages to some but leaving poor nations to struggle with hunger, disease and death on a daily basis. This course explores the impact of globalization on public health in the developed and the developing nations since 1945. Cross-listed with Public Health Studies
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences.

AS.100.334. Gender and the Economy in America, 1600-1870.
Examines white, African, and Native American women’s economic activities in early America, including as laborers, entrepreneurs, and consumers. Also considers women’s economic and political roles during the Revolution and Civil War.
Instructor(s): S. Damiano
Area: Humanities, Social and Behavioral Sciences.

AS.100.335. The American West.
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences.

AS.100.337. Historical Perspectives on Humans and Animals in the Atlantic World and the Early United States, 1500-1860.
Relationships between humans and animals offer a fascinating window into the American past. Readings, written assignments, and discussions will explore environmental, cultural, and scientific approaches to the history of hunting, the domestication of animals and animal ethics in the Atlantic world and the early United States.
Instructor(s): C. Gherini
Area: Humanities, Social and Behavioral Sciences.

AS.100.338. Contemporary African Political Economies in Historical Perspectives.
How have contemporary achievements and problems in Africa been shaped by past events? What insights may be gained into contemporary conditions by viewing them in historical perspective? Using a series of case studies, this course will examine the history of issues such as economic development, nation building, migration, poverty and social conflict that affect many African nations today. Cross listed with Africana Studies
Instructor(s): S. Berry
Area: Humanities, Social and Behavioral Sciences.

AS.100.339. Tolstoy/Chagall/Pasternak: Russia’s Age of Genius.
Topic is history, literature, and art in Russia’s age of genius, 1850s through the 1920s. Requirements are short papers and 2 quizzes. Format is short lecture plus discussion.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences.

AS.100.340. Russian Imagination.
Culture, Politics, and Society in Russia’s great age of creativity, 1850s to 1950s.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences.

AS.100.341. The Inquisition: Medieval & Modern.
Examines the history of the Inquisition - its origins, theological foundations, methods, and role as a mechanism for social control in medieval & early modern Europe.
Instructor(s): R. Kagan
Area: Humanities.

This course traces the emergence of an Atlantic world, 1600-1850, through the lens of biography. Major themes include European colonization, cross-cultural encounters, slavery and trade, imperial warfare, and political revolutions. Prior experience in an introductory history course strongly recommended.
Instructor(s): W. Brown
Area: Humanities, Social and Behavioral Sciences.

AS.100.343. Diaspora, Nation, Race, and Politics.
For millions of people across the globe, political fate in the 20th century was defined at the intersection of diaspora, race, and nation — and this may be true in the 21st century as well. This course, a collaborative effort involving a historian and a political scientist, explores the parallels and divergences in the deployment of these terms in nationalist and transnational mobilization, literature and aesthetics, and group identity formation in Eastern Europe, Africa and the New World of the Americas. Set against the backdrop of the fall of significant empires in the late 19th and early 20th centuries, we will explore themes of migration, human rights, the nation-state system, and racism through history, political sociology, and political and social theory. We will pay particular attention to the theoretically exemplary Jewish and Black experiences of diaspora, race, and nation, engaging both with how those experiences were specially shaped by the imposition of national and racial logics and with Black and Jewish politics and thought in relation to those categories. Readings include Max Weber, W. E. B. Du Bois, Booker T. Washington, Theodor Herzl, Hannah Arendt, Benedict Anderson, Rogers Brubaker, Andrew Zimmerman, Michele Mitchell, David Scott.
Instructor(s): K. Moss; M. Hanchard
Area: Humanities, Social and Behavioral Sciences.

AS.100.344. The Holocaust.
This course expands the knowledge of the Holocaust by including experiences of Eastern European Jewry and by discussing recent historiographic debates in the field such as ‘ordinary men,’ perpetrators, and collaboration. Prior experience in an introductory European history or Jewish studies course strongly recommended.
Instructor(s): L. Braun
Area: Humanities, Social and Behavioral Sciences.

AS.100.345. Religion, Secularity, and Nationhood in Modern Jewish Identity Politics.
How have ethnonational, religious, and secular forms of self-definition played out in Jewish life over the past hundred years, and what sorts of relationships are taking shape between them now? Particular foci include: religious revival in Israel and the fate of Zionism’s ostensibly secular nationalist project in comparative perspective (Ravitzky, Walzer, Friedland); the surprising flourishing of kabbalistic/mystical thought in contemporary Jewish life (Garb); varieties of secular and religious visions of Jewish collective identity (Ohana, Lustick); and new and resurgent forms of Judaism in the US; religion and gender (Fader), among other topics. Time at end of semester for independent reading and research.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.346. Soviet-American Cold War.
The focus will be on Soviet-American interactions, Cold-War Cultures, and the impact on both societies.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences.
AS.100.347. Early Modern China.
The history of China from the 16th to the late 19th centuries.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.348. 20th-Century China.
The history of China from the last years of the Qing Empire to the post-Mao reforms.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.351. God, Self, Nation and Revolution in East European Jewish Life and Thought, 1860-1939.
The divided Jewish community of modern Eastern Europe defined many of the key modern forms of Jewish identity, politics, culture, and religion and forged bewildering array of syntheses, hybrids, and even negations of Jewishness in relation to the unprecedented political, cultural, and social dilemmas of life in Eastern Europe. Focus on key texts of Jewish religious and secular thought created in Imperial Russia and interwar Poland.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.353. Youth and Youth Movements during 20th Century: Germany, Britain, and the U.S.
Through texts, music, and films, this course examines the rise of “youth” as a social and cultural category in a variety of forms, ranging from spontaneous (such as Rock’n’Roll and Techno) to state-organized (Hitler Youth).
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences.

The political, social, and culture history of the State of Israel and its inhabitants during its pivotal first two decades, as reconstructed in recent historiography.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.355. Islam between History and Anthropology.
Co-taught by an anthropologist and a historian, this course will explore recent scholarly debates about--and critiques of--the representations of Islam and Muslim societies.
Instructor(s): N. Khan; T. Shepard
Area: Humanities, Social and Behavioral Sciences.

AS.100.357. Panic and Liberation: The Politics of Sex in 20th Century Europe.
This course examines the 20th century history of sexual attitudes, desires, behaviors, identities, communities, and movements in Western Europe (most notably, Germany, France, and the United Kingdom).
Instructor(s): T. Shepard
Area: Humanities, Social and Behavioral Sciences.

AS.100.358. Americans and the Environment.
The course focuses on the ideas, and the social and political structures that have influenced Americans in their relationship with the environment. Special emphasis will be placed on the impacts of industrialization and urbanization on the environment and the political and legal responses that ensued, especially since the 1960s.
Instructor(s): A. Beveridge
Area: Humanities, Social and Behavioral Sciences.

AS.100.365. Culture & Society in the High Middle Ages.
This course will cover the history of Medieval Europe in the High Middle Ages. It will investigate growth of feudalism, the revival of commerce, the growth of national kingdoms, and the intellectual revival known as the Renaissance of the 12th century, including the birth of courtly literature and the emergence of scholasticism.
Instructor(s): G. Spiegel
Area: Humanities, Social and Behavioral Sciences.

AS.100.370. Idolatry, Faith, Violence: From the Bible to the Bamiyan Buddhas.
Why do images cause so much anxiety for Monotheistic religions? How did image-worship become the sign of the Other? This course examines the phenomenon of idolatry from the joint perspective of history and art history. We explore several paradigmatic moments in which the status of the image was contested, tracing the links between faith, materiality, and intolerance in the Abrahamic faiths. Students will be challenged to consider how ancient problems still inform modern sensibilities.
Area: Humanities, Social and Behavioral Sciences.

AS.100.372. The Victorians.
This course focuses on the politics of everyday life, consumption, intimate relations, and concepts of the self in Britain and its empire in the long nineteenth century. We devote particular attention to visual culture, entertainment, and the built environment. Course themes include popular nationalism; class differences; gender and body politics; and imperial expansion and racial thought.
Instructor(s): L. Pepitone
Area: Humanities, Social and Behavioral Sciences.

AS.100.373. Sex and Society in Early Modern Europe.
This course will examine how early modern views on the body, gender, and sexuality shaped beliefs about the abilities and rights of women and men.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.379. Age of Religious Wars: Reformation Europe, 1500-1650.
Offers an in-depth examination of a volatile time in European history, when the rupture of unity in the Christian Church led to wide scale political upheaval, violence, rioting, and persecution.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.380. In Turner's Footsteps: History and Historiography of the American Frontier.
This course explores the intellectual world of Hopkins graduate Frederick Jackson Turner, reading the scholarship of his day alongside more recent work on Native Americans, settlers, geography and politics in early America.
Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences.

AS.100.381. Religion, Medicine, and the Mind in Japan.
This seminar explores the relationship between religion and medicine in treating disorders of the mind and soul throughout Japanese history. We will consider such topics as animal spirit possession, Buddhism, family-based care, psychotherapy, gender, and social withdrawal.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.
AS.100.383. **Conversion and Apostasy in the Middle Ages.**
Compared religious transformation in medieval Europe and the Middle East (ca. 600-1500), including conquest and conversion; conversion narratives; apostasy, martyrdom and other encounters between medieval Jews, Christians, and Muslims.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.385. **Mobility and Encounter in the Medieval Indian Ocean.**
This seminar discusses forms of mobility and exchange—trade and travel, conquest and religious transformation, diasporas and migration, the spread of practices and technologies—across the Indian Ocean from the 8th to 16th centuries.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.388. **European Intellectual History from Adam Smith To Nietzsche.**
A survey of major thinkers who supported or opposed capitalism and democracy.
Instructor(s): P. Jelavich
Area: Humanities, Social and Behavioral Sciences.

AS.100.396. **Landscapes of the American South: Slavery, Law, and Culture, 1770-1900.**
Focusing on the legal and social history of the American South, this course attempts to answer how national identity was complicated by questions concerning race and slavery from the founding forward.
Dean’s Teaching Fellowship course.
Instructor(s): S. Cerato
Area: Humanities, Social and Behavioral Sciences.

AS.100.397. **U.S. Histories Male and Female.**
This seminar will be devoted to exploring gender differences as they have been expressed in a sequence of autobiographies and autobiographical fiction set in a shifting social and historical context.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.399. **Decolonization and Citizenship in Africa, 1945-2015.**
Critically explores issues of decolonization and citizenship in Africa from WWII to the present. Emphasis on political inclusion and exclusion, and violence, fostered by nationalist movements and postcolonial African governments.
Instructor(s): P. Larson
Area: Humanities.

AS.100.404. **John Locke.**
Seminar style course in which John Locke’s major works will be read intensively, together with some of his contemporaries’ works, and select scholarly interpretations.
Instructor(s): J. Marshall
Area: Humanities, Social and Behavioral Sciences.

AS.100.405. **European Socialist Thought.**
Examination of socialist, social-democratic, communist, and anarchist theorists, including Proudhon, Marx, Engels, Bakunin, Bernstein, Lenin, Luxemburg, and Sorel.
Instructor(s): P. Jelavich
Area: Humanities, Social and Behavioral Sciences.

AS.100.406. **American Business in the Age of the Modern Corporation.**
This course will focus on business organizations, their performance, and sociopolitical relations in the 20th century. Each of the students will be expected to reach conclusions about that history and will be required to sharpen those conclusions by writing three, interrelated essays.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences.

AS.100.408. **Theorizing the Age of ‘Enormity’: Social Theory and the History of the 20th Century.**
Instructor(s): K. Moss; T. Shepard
Area: Humanities, Social and Behavioral Sciences.

AS.100.409. **Fascism: History and Interpretation.**
This course investigates the history and historiography of fascism, with emphases on definitions of fascism and on fascist political culture in a comparative framework. AS.100.104 recommended but not required.
Dean’s Teaching Fellowship course.
Instructor(s): A. Bisno
Area: Humanities, Social and Behavioral Sciences.

AS.100.410. **Subversive Humor in US and Modern Europe.**
Varieties of subversive laughter in historical context: 1850s through 1970s in fiction, cartoons, comics, children’s literature, and art. Also open to graduate students.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences.

AS.100.411. **Readings in the History of Public Health in the 20th and 21st Centuries.**
The students will read major and some minor works in the history of global public health and will each develop their own concept of how and why the major institutions, professions, and practices associated with public health have evolved over the past long century. To help the students focus on their ideas, they will write three essays on particular aspects of the history.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences.

AS.100.412. **Jewish History in British Mandatory Palestine, 1917-1947.**
Recent historical writing on Jewish politics, culture, and society in British Mandatory Palestine, 1917-1947. Significant attention will also be paid to work on Palestinian Arab society and politics and to Jewish-Arab-British relations.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.413. **London 1580-1830: The History of Britain’s capital city.**
Seminar-style class analyzing the social, cultural, gender, religious, economic, and political history of London from Shakespeare’s time through revolutions, plague, fire, and commercial, colonial, and industrial expansion.
Instructor(s): J. Marshall
Area: Humanities, Social and Behavioral Sciences.
AS.100.415. Papyrus, Parchment, and Paper.
The diffusion of writing technologies before the industrial age, especially around the Mediterranean; the preservation of lightweight, portable texts; modern discoveries (Oxyrhynchus, Dead Sea Scrolls, Nag Hammadi, Cairo Geniza).
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

AS.100.416. Urban Space and City People.
Readings and research in urban history focused on the United States since the 18th century with special attention to gender and race.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.417. Capitalism, Socialism, and Democracy.
This course examines the ideas of Joseph A. Schumpeter, the father of entrepreneurial studies. Each student will develop a perspective on the history of capitalism and socialism.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences.

AS.100.420. George Washington and his World.
This research-intensive course explores eighteenth-century America through George Washington's papers. Although Washington is not the most representative person, he is an exceptionally well-documented one; we use his papers to focus on life in Virginia, North America, and the Atlantic World. Workshop-style research and writing prepare students for the craft of history.
Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences.

AS.100.422. Society & Social Change in 18th Century China.
Reading knowledge of Chinese recommended but not required. Cross listed with East Asian Studies
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.424. Women & Modern Chinese History.
This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women's experiences for their own political and social agendas. Cross listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.426. Popular Culture in Early Modern Europe.
Witchcraft, magic, carnivals, riots, folk tales, gender roles; fertility cults and violence especially in Britain, Germany, France, and Italy.
Instructor(s): J. Marshall
Area: Humanities, Social and Behavioral Sciences.

AS.100.428. London-20th Century.
This course investigates the history of London between 1900 and 1960. The following themes are explored: the built environment, the local and the global, policing and crime, sexual scandal, popular entertainments and erotic pleasure, consumer culture and the media, cultural imperialism, the experience of war, social democracy, and the emergence of a multi-racial urban society. Cross-listed with Studies of Women, Gender, and Sexuality
Instructor(s): J. Walkowitz
Area: Humanities, Social and Behavioral Sciences.

AS.100.433. Censorship in Europe and the U.S..
This undergraduate research seminar will examine censorship policies and debates from the eighteenth century to the present. In addition to discussion of common readings, each student will choose a censorship case to research and present to the class.
Instructor(s): P. Jelavich
Area: Humanities, Social and Behavioral Sciences.

AS.100.437. Late Imperial China: History and Fantasy.
Students in this seminar will look at the ways in which Chinese and Western scholars, novelists, film-makers, and artists have represented China's Late Imperial period. We will look at the way foreigners have imagined China, and the ways in which Chinese writers past and present have fancifully, nostalgically, and inventively rendered their personal and national pasts. The course will explore issues of historical, geographical, and literary imagination. Cross-listed with East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.438. Modern Mexico and the Mexican Revolution.
An examination of the political, social, and economic factors between 1810 and 2010 that produced incessant civil war in Mexico during the 19th century and a revolution in the early 20th century. Cross listed with PLAS
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.439. Cuban Revolution and the Contemporary Caribbean.
A lecture course dealing with the development of the Cuban Revolution and the tortuous history of the Caribbean during the 19th and 20th centuries.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.440. The Revolutionary Experience in Latin America.
Comparative examinations of revolutionary political changes in Haiti, Mexico, Bolivia, and Cuba. Cross-listed with Latin American Studies
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.441. Society, Politics, and Economics in Latin America.
This course traces the complex relationship between politics, economics, and social changes in Latin America and the Caribbean since World War II.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.442. The Intellectual History of Capitalism, 1900 to present.
This course examines shifting understandings of the philosophical foundations, political implications, and social effects of the market economy since the early twentieth century.
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences.

AS.100.443. Russian Critical Theory.
Juniors and Seniors only. Participants will explore the Russian critical tradition of the Soviet Era. Close reading of Bakhtin, Shklovsky, Propp, Vygotsky, Lotman, Gurevich, etc. Short essays required on aspects of the texts.
Instructor(s): J. Brooks; N. Koposov
Area: Humanities, Social and Behavioral Sciences.
AS.100.445. African Fiction as History.
An exploration of Modern African history through the African historical novel.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

AS.100.447. Christian-Jewish Polemics in the Middle Ages and the Construction of the Enemy.
The four great public Christian-Jewish disputations of the high middle ages: Paris, Barcelona, Majorca, Tortosa. Original Hebrew and Latin sources in English translation; questions of the changing motives for anti-Judaism and the formation of a persecuting society.
Instructor(s): P. Capelli
Area: Humanities, Social and Behavioral Sciences.

AS.100.448. Britain from the English Revolution to the Industrial Revolution.
Instructor(s): J. Marshall
Area: Humanities, Social and Behavioral Sciences.

AS.100.449. Film and Propaganda in Nazi Germany.
By examining a range of cinematic works—from explicitly ideological pseudo-documentaries to entertainment films—this course will explore the transmission of propaganda into the everyday culture of Nazi Germany.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences.

AS.100.450. Problems in Chinese Urban History.
Reading and discussion of works in Western languages on the role of cities in Chinese society, from the Tang dynasty (628-906 A.D.) to the present.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.468. Jim Crow in America.
Through an examination of law, culture, and politics, this course explores the history of legalized racial segregation in the United States.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences.

AS.100.470. Monuments and Memory In Asian History.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.479. The Early Caribbean and the Atlantic World Seminar.
The Caribbean was the key focal point of overseas European expansion in the early modern world. Its centrality, importance, and significance will be explored.
Instructor(s): P. Morgan
Area: Humanities, Social and Behavioral Sciences.

AS.100.482. Historiography Mod China.
A survey of assumptions and approaches in the study of modern Chinese history, as written by Chinese, Japanese, and Western historians.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.
AS.100.602. The French Revolution.
This seminar introduces graduate students to the rich historiography of the French Revolution. Topics include: revolutionary origins, political culture and radicalization, friendship and emotion, family and gender, the search for stability after the Terror, Napoleon’s Brumaire coup.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences.

AS.100.604. Readings in the Early U.S. Republic/Nineteenth Century.
Readings in the Early U.S. Republic/Nineteenth Century
Instructor(s): F. Furstenberg.

Instructor(s): B. Vinson.

AS.100.608. The Consumer Revolution in Global Perspective.
Examines the transformations in European consumption from 1650 to 1800 in a global perspective. Topics include gender, social status, credit, commerce, political economy, empire, and revolution.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.

AS.100.609. Russian Critical Theory.
Participants will explore the Russian critical tradition of the Soviet Era. Close reading of Bakhtin, Shklovsky, Propp, Vygotsky, Lotman, Gurevich, etc. Short essays required on aspects of the texts.
Instructor(s): J. Brooks; N. Koposov
Area: Humanities, Social and Behavioral Sciences.

AS.100.612. Everyday Life in Medieval Cairo.
Introduction to sources and methods available to social historians of the medieval Middle East, including close readings of documents (private letters, legal deeds, etc.) and discussing their production and survival. Grad Students only.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.614. Seminar in Modern Chinese History.
A seminar covering major milestones in research on late imperial and modern Chinese history, primarily in English. Open to undergraduates with the permission of the instructor.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.616. Proseminar on the Sociedad de Castas en la época virreinal.
This course familiarizes graduate students with questions surrounding the evolution of the sociedad de castas in the viceregal period of Latin America, with an emphasis on Mexican historiography.
Prerequisites: AS.100.672
Instructor(s): B. Vinson
Area: Humanities, Social and Behavioral Sciences.

AS.100.617. Space, Place, and History.
A workshop on the spatial dimension of modern history. Readings will include monographs, some theoretical readings, and student research, mostly focused on the Americas with some comparison with Western Europe. Open to undergraduate juniors and seniors.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.620. Early Modern France.
A readings seminar on French history from Louis XIV to the French Revolution. Topics include: absolutism, political culture, the Enlightenment, production and consumption, the French Atlantic, and the French Revolution.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.

This graduate seminar examines the Black Freedom Struggle through several of the most recent and ground-breaking biographies written about American civil rights and human rights activists.
Instructor(s): N. Connolly.

AS.100.624. How to Be a Disciple of the Sages: Norms of Behavior, Ethics and Etiquette in Early Rabbinic Literature.
Moral instruction in early rabbinic literature (Pirqe Aboth, Aboth de-Rabbi Nathan, Derekh Eretz Rabbah and Zuta, Pereq ha-Shalom) is a very revealing example of the composite character of rabbinic Judaism. Its manifold, not only Biblical roots, and its intense osmosis of neighboring traditions: Hellenistic and Roman philosophies, early Christian and Islamic doctrines, rules and handbooks of manners from medieval European monasteries and courts. This seminar will investigate the classical sources of Jewish morals in both Jewish and non-Jewish texts.
Instructor(s): P. Capelli
Area: Humanities, Social and Behavioral Sciences.

AS.100.626. Russian History Graduate Seminar.
Reading, discussion, and writing: Russian history and culture in 19th and 20th centuries.
Instructor(s): J. Brooks.

AS.100.631. Ibero-Atlantic History.
A reading seminar on the history and historiography of the Portuguese and Spanish empires c. 1600-1900.
Instructor(s): G. Paquette
Area: Humanities.

AS.100.633. Spain and its Empire.
This graduate seminar will explore the historiography of Spain and its empire, 1480-1700.
Instructor(s): E. Rowe.

AS.100.634. Spain and its Empire.
Instructor(s): R. Kagan.

AS.100.639. German History.
German history from the Restoration through World War I, with emphasis on cultural and intellectual developments.
Instructor(s): P. Jelavich.
AS.100.640. Approaches to a Visual History of War in the 20th Century.
This course will examine theoretical aspects of visual history, as well as analyze depictions of war and their propagandistic, aesthetic, and allegorical dimensions from World War I to the present.
Instructor(s): H. Baiz
Area: Humanities, Social and Behavioral Sciences.

AS.100.641. Global Catholicism in the Early Modern Period.
Explores religious culture in medieval and early modern Europe, with an emphasis on spiritual beliefs and practices, relics, miracles, pilgrimage, and saint-making. Emphasis on reading and discussing written sources and visual culture. Graduate students only.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.642. Historiography of the Jews.
Instructor(s): K. Moss; M. Rustow.

AS.100.643. Jewish Paths Through Modernity.
Intensive introduction to the key trends and trajectories in modern Jewish history and the major themes in Jewish historiography. Intended to serve both graduate students outside the Jewish history field and students beginning the graduate study of modern Jewish history. Open to undergraduate seniors with the permission of the instructor.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.644. Approaches to Brazilian History.
A reading seminar on the history and historiography of Brazil (colonial and national periods).
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences.

AS.100.647. 19th Century America.
Instructor(s): M. Johnson.

AS.100.650. The American South.
Instructor(s): M. Johnson.

AS.100.651. Readings in Urban and Suburban America: The Twentieth Century.
Introduces students to intellectual trends shaping historical treatments of urban and suburban life in twentieth-century America.
Instructor(s): N. Connolly.

AS.100.655. Jewish History and Historiography in Ottoman and British Palestine.
Recent historiography on Jewish politics, culture, and society in late Ottoman and British Mandatory Palestine, 1880s-1947. English and Hebrew. With permission of the professor.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

Graduate students only. Recent historical writing on Jewish politics, culture, and society in British Mandatory Palestine, 1917-1947. Significant attention will also be paid to work on Palestinian Arab society and politics and to Jewish-Arab-British relations.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.659. Women and Modern Chinese History.
Graduate students only. This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women’s experiences for their own political and social agendas. Cross listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.661. Racial Literacy for Historians.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences.

AS.100.664. Approaches to Brazilian History.
A reading seminar on the history and historiography of Brazil (colonial and national periods).
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences.

AS.100.667. Topics in Modern Jewish History.
Intensive readings in historiography of modern Jewry, with particular focus on Jewish life in 19th - 20th century Palestine and the State of Israel. Recommended Course Background: AS.100.668
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.670. Directed Readings in the Cultural History of British America and the Early United States.
Reading Seminar focusing on modes of interpretation associated with cultural history. Ordinarily a continuation of AS.100.669 (fall), but other interested graduate students may register with instructor’s permission.
Co-taught by Francois Furstenberg.
Instructor(s): T. Ditz.

AS.100.671. Germany Since 1918.
German history since World War I - Weimar Republic, Third Reich, German Democratic Republic, and Federal Republic of Germany - with emphasis on cultural and intellectual developments.
Instructor(s): P. Jelavich.

AS.100.672. Colonial Latin American Historical Research and Methodology Seminar.
This course is designed to introduce students to a range of colonial Latin American source documentation and to familiarize them with basic issues in conducting primary source research. Focusing on textual analysis, the use of economic and social data, and archival survey, students will write a series of papers that will build basic competency and skills in the area of Latin American colonial methodology. Advanced Spanish is required. Familiarity and some background in colonial Latin American history is strongly encouraged. The course adopts a practicum style.
Instructor(s): B. Vinson
Area: Humanities, Social and Behavioral Sciences.

AS.100.679. Colonial Latin American History and Readings.
Instructor(s): B. Vinson
Area: Humanities, Social and Behavioral Sciences.

AS.100.680. Reading Seminar in Atlantic History 1600-1800.
Instructor(s): P. Morgan.

AS.100.681. Research Seminar in Atlantic History, 1600-1800.
Continuation of AS.100.680. Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences.

AS.100.684. Research Seminar in the Atlantic World, 1500-1810.
This seminar selectively explores the emergence and subsequent growth of the Atlantic basin as a site for exchange among and within the continents of Europe, Africa, and the Americas in the early modern era.
Instructor(s): P. Morgan.
AS.100.685. Reading Seminar in Atlantic History.
Instructor(s): P. Morgan
Area: Humanities, Social and Behavioral Sciences.

AS.100.687. Amer Economic History.
Instructor(s): L. Galambos.

AS.100.690. Directed Readings in Latin America History and Historiography.
Provides a comprehensive understanding of the major trends in colonial Latin American historiography from the 1950’s until contemporary times. Cross listed with PLAS
Instructor(s): B. Vinson.

AS.100.692. Theorizing the Age of Enormity.
Instructor(s): K. Moss; T. Shepard.

AS.100.695. Problems in U.S. Social & Cultural History.
This is a seminar reading widely in U.S. social and cultural history, ranging chronologically this semester from the mid-18th century to the late 19th century.
Instructor(s): R. Walters.

AS.100.696. Problems in American Society and Culture.
An intensive graduate seminar exploring various topics of US social and cultural history, focusing on the period from the late 19th century to the late 20th century.
Instructor(s): R. Walters.

AS.100.700. American Intellectual History.
Readings on American and transaltantic intellectual history since 1865, with an emphasis on the history of the social sciences.
Instructor(s): A. Burgin.

AS.100.704. Sex and the City.
Instructor(s): J. Walkowitz; M. Ryan.

AS.100.705. Decolonization and the “Global North.
This course explores how the mid-20th century phenomenon often named “decolonization” shaped developments in Europe (including the Soviet Union), the USA, and Canada.
Instructor(s): T. Shepard.

AS.100.707. Sex and the City.
Continuation of AS.100.704. Graduate students only.
Instructor(s): J. Walkowitz; M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.709. Modern Latin America.
This course will examine selected themes in Modern Latin American history such as legacies of the colonial administrations, the plural societies, political cultures, slavery, and other forms of servitude; religious impact, independence movements, globalization and narco trafficking. Reading knowledge of Spanish required. Reading knowledge of Spanish. Graduate Students only
Instructor(s): F. Knight.

AS.100.710. Modern Latin America.
Selected themes in Modern Latin America will be discussed along with relevant bibliographies.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.713. Comparative Politics of Memory in Present-Day Europe.
This course examines the tension between the cult of national heritage and the glorification of national states as reflected in the politics of memory in various European countries. Graduate students only.
Instructor(s): N. Koposov
Area: Humanities, Social and Behavioral Sciences.

AS.100.716. Cultural Theory For Historians.
Readings include Benjamin, Horkheimer, Adorno, Barthes, Debord, Baudrillard, Foucault, Bourdieu, and de Certeau.
Instructor(s): P. Jelavich.

AS.100.717. Twentieth-Century America.
Readings in twentieth-century American history.
Instructor(s): A. Burgin.

AS.100.719. Transnational Approaches to U.S. History.
Readings on American history in a transnational context since the nineteenth century.
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences.

AS.100.720. Culture, Society, History: Theoretical Orientation.
Examination of recent cultural and social theories informing historical scholarship, including the works of Levi-Strauss, Geertz, Bourdieu, Sahlins, de Certeau, Foucault, and Koselleck.
Instructor(s): G. Spiegel; P. Jelavich.

AS.100.721. Topics In African History.
Critical readings on selected themes in African history and historiography.
Instructor(s): S. Berry.

AS.100.723. Seminar in Mediterranean History: The Fatimids as a Medieval Empire.
The Fatimids have generally been studied as a local Egyptian power or else as competitors to the Abbasids. Yet the dynasty sat astride the lucrative Mediterranean and Indian Ocean trade routes, and its court and capital cities inspired imitators in Umayyad Cordoba and Norman Sicily. This seminar will focus on primary sources from the tenth through fifteenth centuries in Arabic and other languages as well as modern scholarship.
Instructor(s): M. Rustow.

AS.100.728. Historical Writing in the Middle Ages.
This course will begin with readings of literary and critical theory, as a preparation for the study of modes of historical writing in the Middle Ages. We will then read a sampling of medieval historiographical texts, beginning with Eusebius.
Instructor(s): G. Spiegel.

AS.100.729. Reading Seminar: British America and the Early United States in Atlantic Perspective.
Readings in a wide spectrum of approaches to the history of the Atlantic World, British America, and the early United States up to the Civil War.
Instructor(s): F. Furstenberg; T. Ditz.

AS.100.730. Reading Seminar: British America and the Early United States in Atlantic Perspective.
Instructor(s): F. Furstenberg.

Reading seminar on most recent research on French colonial Africa.
Instructor(s): P. Larson.
AS.100.732. Urban Space and City People.
Readings and research in urban history focused on the United States since the 18th century with special attention to gender and race.
Instructor(s): M. Ryan.

AS.100.733. Reading Qing Documents.
Open to advanced undergraduates with at least one semester of Classical Chinese. This course has several objectives. First and foremost, it is a hands on document reading class designed to familiarize students with the skills, sources, and reference materials necessary to conduct research in Qing history. To that end, we will spend much of our time reading documents. At the same time, we will engage in problem solving exercises designed to develop and enhance basic research skills. Finally, several important archive-based secondary works in the secondary literature are available on reserve for your reference. These works demonstrate the ways in which historians have recently applied archival skills (and materials).
Instructor(s): T. Meyer-Fong.

AS.100.735. Early Modern Britain.
Instructor(s): A. Shepard; J. Marshall.

AS.100.736. Early Modern Britain.
Instructor(s): J. Marshall; Staff.

AS.100.737. Seminar in Modern Chinese History.
Instructor(s): W. Rowe.

AS.100.739. The Power of Place in U.S. History.
Through readings in urban history as well as other scholarship that is situated firmly in physical space, the seminar will explore the intricate and interactive relationship between space and power (a 2 semester sequence, the fall will focus on the long 19th century, the spring on the 20th and 21st)
Instructor(s): M. Ryan; N. Connolly
Area: Humanities, Social and Behavioral Sciences.

AS.100.740. The Power of Place in U.S.
Through readings in urban history as well as other scholarship that is situated firmly in physical space, the seminar will explore the intricate and interactive relationship between space and power (a 2 semester sequence, the fall will focus on the long 19th century, the spring on the 20th and 21st),
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.741. Recent Theoretical Issues in History.
An examination of recent theoretical issues in history, including: history as/and memory; the return of presence in history; the turn to affect and the rise of "neurohistory"; posthistoricism and the uses of literary theory in history; and the uses of photography and visual cultures in history.
Cross-listed with Humanities Center.
Instructor(s): G. Spiegel; R. Leys
Area: Humanities, Social and Behavioral Sciences.

AS.100.742. Modern France and French Imperialism.
Historiographic in focus.
Instructor(s): T. Shepard
Area: Humanities, Social and Behavioral Sciences.

AS.100.743. Topics in Post-1945 European History.
Critical readings on selected themes in recent European history and historiography.
Instructor(s): T. Shepard
Area: Humanities, Social and Behavioral Sciences.

AS.100.744. Twentieth Century France and the French Empire.
We will explore recent and classic studies of 20th century French history, with particular attention to transnational and colonial questions.
Instructor(s): T. Shepard.

AS.100.745. Africa and the World.
Instructor(s): P. Larson.

AS.100.749. Social Theory for Historians.
An examination of the works of Marx, Durkheim, and Weber, as examples of the Hegelian, positivist, and hermeneutic traditions of social theory.
Instructor(s): P. Jelavich
Area: Humanities, Social and Behavioral Sciences.

AS.100.750. Victorian Culture and Society.
This course covers major thematic and interpretive approaches to family formations, urban environment, popular nationalism, class cultures, feminism and body politics, Empire and racial thought, commercial culture, the media and concepts of the self.
Instructor(s): J. Walkowitz
Area: Humanities, Social and Behavioral Sciences.

AS.100.753. Twentieth Century Seminar.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.

AS.100.755. Twentieth Century Seminar.
Instructor(s): Staff.

AS.100.759. The Cairo Geniza (Spring).
Documentary sources from the Cairo Geniza in Judaeo-Arabic, Arabic, and Hebrew. Paleography, genre, diplomatic, corpora and editorial technique; historical context, interpretation, historiography and history of the field. Cross listed with Jewish Studies.
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

AS.100.760. The Cairo Geniza.
Documentary sources from the Cairo Geniza in Judaeo-Arabic, Arabic, and Hebrew (depending on student interest). Diplomatic, paleography, research methods, historiography, and history of the field. Arabic required, some Hebrew preferred.
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

AS.100.761. History of Capitalism.
Readings on the history of capitalism since the mid-nineteenth century, with an emphasis on the American context.
Instructor(s): A. Burgin.

AS.100.762. History and Historiography of 19th France in Europe and the World.
We will explore recent ad classic studies of 19th-century French history, with particular attention to transnational and colonial questions.
Instructor(s): T. Shepard.

AS.100.763. Comparative World Hist.
Instructor(s): Staff.

AS.100.764. Comparative World Hist.
Instructor(s): Staff.

AS.100.765. Topics in Women’s History.
An exploration of recent work in women’s and gender history, focusing on Europe, the Atlantic world, and the United States in the early modern and modern eras. Meets at the same time and place as AS.100.769
Instructor(s): T. Ditz.
AS.100.766. Problems in Women's History.
An exploration of recent work in modern European and US women's and
gender history, focusing on some of the following: sexuality, cultural
production, politics, family formation, work, religion, differences, and
civic orders. A continuation of AS.100.765.
Instructor(s): T. Ditz
Area: Humanities, Social and Behavioral Sciences.

AS.100.767. London World City, 1830-1960.
Themes include cultural Marxism and social history, Victorian visual
culture, built environment, commodity culture, philanthropy and crime,
popular nationalism, class cultures, feminism and body politics, Empire
and racial thought.
Instructor(s): J. Walkowitz
Area: Humanities.

AS.100.768. London World City.
Instructor(s): J. Walkowitz.

AS.100.769. Gender History Workshop.
Workshop for presentation of works-in-progress on the history of
women, gender, and/or sexuality, including drafts of dissertation
chapters, research papers, talks, and proposals. Students in disciplines
other than history are welcome.
Instructor(s): T. Ditz.

AS.100.770. Gender History Workshop.
Workshop for presentation of works-in-progress on the history of
women, gender, and/or sexuality, including drafts of dissertation
chapters, research papers, talks, and proposals. Students in disciplines
other than history are welcome. Graduate students only.
Instructor(s): T. Ditz
Area: Humanities, Social and Behavioral Sciences.

AS.100.772. The Indian Ocean and European Empire.
A reading seminar on the history and historiography of European Empire
in the Indian Ocean region.
Instructor(s): P. Larson.

AS.100.781. The Seminar.
Instructor(s): Staff.

AS.100.782. The Seminar.
Instructor(s): Staff.

AS.100.783. Seminar: Medieval Europe.
Instructor(s): Staff.

AS.100.784. Seminar: Medieval Europe.
Instructor(s): Staff.

AS.100.785. Seminar: Early Modern Europe.
Instructor(s): Staff.

AS.100.786. Seminar: Early Modern Europe.
Instructor(s): Staff.

AS.100.787. Seminar: Modern Europe.
Instructor(s): Staff.

AS.100.788. General Seminar: Modern Europe.
Instructor(s): Staff.

AS.100.789. Seminar: American.
Instructor(s): Staff.

AS.100.790. General Seminar: America.
Instructor(s): Staff.

AS.100.791. Seminar: Latin American.
Instructor(s): Staff.

AS.100.792. General Seminar: Latin America.
Instructor(s): Staff.

AS.100.793. Seminar: African.
Instructor(s): Staff.

AS.100.794. General Seminar: Africa.
Instructor(s): Staff.

AS.100.797. First Year Graduate Workshop.
First year graduate workshop.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.798. First Year Graduate Workshop.
First year graduate workshop.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.801. Dissertation Research.
Instructor(s): Staff.

AS.100.802. Dissertation Research.
Instructor(s): Staff.

AS.100.803. Independent Study.
Instructor(s): Staff.

AS.100.804. Independent Study.
Instructor(s): G. Paquette; W. Rowe.

AS.100.821. Fall Practicum.
Instructor(s): W. Rowe.

AS.100.822. Spring Practicum.
Instructor(s): Staff.

AS.100.890. Independent Study.
Instructor(s): F. Knight.

AS.100.891. Summer Practicum.

Cross Listed Courses

History of Art

AS.010.233. Art and Astrology in the Middle Ages.
This course explores the relationship between art and astrology from
the early Middle Ages to the early Renaissance. We look at a wide range
of media—mosaic, painting, metalwork, manuscripts, and sculpture
—that speak to the central place of astrology in medieval systems
of knowledge, and the practical uses of astrology for medicine and
politics. Readings and discussions cover a variety of themes, including
the transmission of astrological knowledge, the emergence of large-
scale astrological mural programs, the use of precious stones and
amulets, and the ways in which artworks probe the tensions between
astrology and Christian theology. A recurring topic will be principle of
“celestial influence”—the idea that the stars emit rays that affect people
and events on earth—and its implications for artistic production and
reception, as well as how art objects could even predict, or represent
predictions of, future events. Primary sources (in English translation)
include Albertus Magnus, Abu Ma’shar, al-Kindi, Roger Bacon, and
others. Secondary readings include Aby Warburg, Erwin Panofsky, Fritz
Saxl, Michael Camille, Georges Didi-Huberman, and others.
Instructor(s): M. Hauknes
Area: Humanities.
AS.010.291. Architectural History of Baltimore.
Focusing on Baltimore's built environment and drawing upon primary sources, this course will explore the major European and American design theories, values, and practices of the last several centuries with an eye towards establishing Baltimore's place within a national and global urban environmental context. Topics addressed in this course include city building, class and race, architectural revivalism, transportation, urban renewal, and post-industrialism.
Instructor(s): M. Perschler
Area: Humanities.

Film and Media Studies
AS.061.396. Modern Paris on Film.
This course uses French film to examine the history of twentieth-century Paris. We will consider how filmmakers interpreted the social, political, and technological transformations that shaped Paris in the modern era, treating movies as expressions of change and means by which filmmakers comment on it. Taught in English. Film screenings Monday 7:30-10:00 PM. $40 lab fee
Instructor(s): L. Mason
Area: Humanities.

AS.061.397. French Masculinities.
Examines changing ideals of masculinity in France after 1960 as they found expression on film, rooting the work of iconic stars and directors in their cultural, political and historical contexts.
Instructor(s): L. Mason
Area: Humanities.

AS.061.421. History and Film.
How do films inform, shape, or fundamentally alter our sense of the past? What are the strengths and limitations of cine-history? This course pairs traditional and avant-garde fiction films and documentaries with essays about history, historiography, memory and the political uses of the past to investigate fast-changing relationships between image and text, film and history. Screening T 7:30-10:00 PM. $40 Lab fee
Instructor(s): L. Mason
Area: Humanities.

Anthropology
AS.070.290. Modern South Asia: Bangladesh/Pakistan.
Bangladesh and Pakistan, two major regional players in South Asia, originate in the 1947 Partition of India and shared nationhood between 1947 and 1971, ending with the War of Independence in 1971 in which Bangladesh separated from Pakistan. Since that time the two nations have been on different paths that have sometimes mirrored each other. This course brings together contemporary works of national histories, social movements and cultural production to consider the politics of self-differentiation and the points of convergences.
Area: Humanities, Social and Behavioral Sciences.

The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orient anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others.
Co-listed with AS.070.352
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies
AS.130.328. Ancient Egypt /Africa.
Recent excavation and research have shed light on several ancient cultures of the Nile and its tributaries. We will look at the available archaeological and textual (all Egyptian) evidence for these societies and their interactions with Egypt between 3500 and 300 B.C. We will also discuss research aims and methods employed now and in the past in Egypt and the Sudan.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.352. History of Hasidism.
Although it appears to be a relic of pre-modern Judaism, Hasidism is a phenomenon of the modern era of Jewish history. This course surveys the political and social history of the Hasidic movement over the course of the last three centuries. Students will also explore basic features of Hasidic culture and thought in their historical development. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

History of Science Technology
AS.140.105. History of Medicine.
Course provides an overview of the medical traditions of six ancient cultures; the development of Greek and Islamic traditions in Europe; and the reform and displacement of the Classical traditions during the Scientific Revolution.
Instructor(s): G. Pomata; M. Hanson
Area: Humanities, Social and Behavioral Sciences.

AS.140.146. History of Public Health in East Asia.
This course examines the history of disease, epidemics, and public health responses in East Asia from the 17th-20th centuries. This public health history emphasizes the interactions, connections, and comparisons among China, Japan, Korea, and Taiwan.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences.
AS.140.304. Medicine for and by Women in Early Modern Europe.
The course will examine women’s role in early modern European medicine through the reading of early modern medical texts written for or by women. The course is meant for students interested in women’s history, the history of medicine, European history.
Instructor(s): G. Pomata
Area: Humanities, Social and Behavioral Sciences.

AS.140.425. Individualized Medicine from Antiquity to the Genome Age.
A seminar for graduate students and advanced undergraduates. We will explore the notion of the individual in medicine over 25 centuries, from the Hippocratics to the invention of the case study during the Renaissance to the genetic, biochemical, and immunological individual in recent biomedicine. Recommended Course Background: AS.140.105, AS.140.106
Instructor(s): G. Pomata; N. Comfort
Area: Humanities, Social and Behavioral Sciences.

Political Science

AS.191.421. A Normal Country German Politics and Identity.
This seminar deals with questions pertaining to the formation of modern German nationalism and national identity through the perspective of German politics and history. Dean’s Teaching Fellowship
Instructor(s): F. Bauwens
Area: Social and Behavioral Sciences.

AS.191.609. Historical Research Methods and the Study of Politics.
This course is designed for graduate students across the Social Sciences and the Humanities interested in the study of transnational politics from a historical perspective. Taught by Visiting Hinckley Professor Robert A. Hill, students will be introduced to methods of historical interpretation in the examination of archival documents and other sources of scholarly evidence. Utilizing materials and examples from Prof. Hill’s own extensive archive of Garveyism, Rastafarianism, Black Hebraism, and other transnational, millenarian political and social movements, students will become familiar with the unique research challenges posed by various forms of political and historical articulation, ranging from formal records of state governments, intelligence records, personal archives, to publications and memoirs of non-governmental actors and organizations.
Instructor(s): R. Hill.

Jewish Studies Program

The course examines the transition from medievalism to modernity among the Jews of Europe and the Mediterranean between the sixteenth and eighteenth centuries, paying attention to both material and intellectual life, and to women and children side by side with merchants and rabbis.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences.

AS.193.301. Reading the Bible and Encountering its World.
The course examines the interactions between travel and biblical interpretation between the seventeenth and twentieth centuries, paying particular attention to the ways in which travelers to the Middle East and then scholars saw its residents as relics of an unchanging biblical world, whose practices could be used to interpret scriptural texts from both the Old and New Testaments.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences.

German Romance Languages Literatures

This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.253. Freshman Seminar: Why is the Fiddler on the Roof?: The Shtetl in Modern Jewish Culture.
The most familiar portrayal of the shtetl for an American audience is the setting of the Broadway musical Fiddler on the Roof, where the shtetl, or market town, is a bastion of traditional Jewish life. But what exactly was a shtetl? How did traditional Jews live there, and how were their lives affected by the sweep of modernity? How was the Yiddish language, spoken by all shtetl Jews, both a repository of tradition and an agent of change? How do representations of the shtetl—from corrupt backwater to pious haven—reflect the concerns of Jews from the nineteenth century up to our own day? Through memoir, literature, film and painting, this course will examine actual lives lived in the shtetl, as well as a selection of the many artistic representations of it. All readings will be in English.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.341. Power and Resistance: Approaches to French Political Thought.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.
**AS.211.394. Brazilian Culture & Civilization.**
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits; Section 02: 4 credits (instructor’s permission required).
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

**AS.212.341. Power and Resistance: Approaches to French Political Thought.**
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boëtie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

**AS.213.236. Panorama of German Thought II.**
Panorama of German Thought from Nietzsche to Habermas. Course will examine major thinkers in nineteenth and twentieth-century German thought with emphasis on the response to Enlightenment philosophy, the critique of reason, the questions about the autonomy of the subject and the search for new individual and collective identities. Reading will include traditional philosophical texts (Nietzsche, Cassirer, Heidegger, Adorno, Habermas) as well as works in anthropology (Gehlen, Scheler), sociology (Simmel, Weber), psychology (Mach, Freud), political theory (Marx, Schmitt) and aesthetics (Benjamin, Warburg, Panofsky). This course is a continuation of Panorama of German Thought I, though the first semester is not a prerequisite for the second. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

**AS.213.368. German Political Thought.**
This course will introduce students to major figures in German political thought from Martin Luther to Karl Marx and Immanuel Kant to Carl Schmitt. The class will explore such issues as the notion of sovereignty, the relationship between church and state, the theory of parliamentary democracy, and the political and economic ramifications of liberalism. Reading and discussion in English.
Instructor(s): R. Tobias
Area: Humanities.

**AS.213.706. Literature, Museums, Mimesis.**
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities.

**AS.213.749. Modern Subjectivities: Legal, Economic, Political.**
The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citoyen” or “citizen,” as the political subject. The bourgeois and the citoyen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias; Staff
Area: Humanities.

**AS.214.347. Petrarch and the Beginnings of the Renaissance.**
This course will focus on the life, work, and thought of Francesco Petrarch, or “Petrarch.” Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.
Who was Niccolo Machiavelli? The author of the Italian Renaissance’s most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli’s major works and to the intellectual, social, and political contexts that shaped his thinking.
Instructor(s): C. Celenza
Area: Humanities.

This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy.
Dante’s Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) what it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante’s understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities.

3 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities.

The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncagliolo and Silva Passuni.

Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.350. Mexico: An interdisciplinary approach to the construction of our image and understanding of Mexico.

The course studies the accounts of the Mexica on the journey and foundation of Tenochtitlan. Later we move on to the clash of cultures with the Spanish conquest (1521). After studying the art of the colonial period, the course focuses of the Mexican Revolution of 1910 and ends with a consideration of the image of the nation in murals and writers such as Octavio Paz, Carlos Fuentes and Elena Garro. Taught in English.

Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism.

His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study.

Instructor(s): E. Gonzalez
Area: Humanities.

Taking into account the crisis in self (national) representation and the fluidity of identities, the course will delve into the work of major Latin American writers in order to study issues of self-representation across time and specific contexts. The course will begin with the work of Sarmiento and move on to Gilberto Freire, Rachel de Queiroz and Clarise Lispector. In a second stage the course will delve into García Márquez’ autobiography and Mario Vargas Llosa’s “La tía Julia y el escribidor”, to end with Ernesto Cardenal’s autobiography.

Instructor(s): S. Castro-Klaren.

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.

Departing from narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.

Instructor(s): S. Castro-Klaren.

AS.215.650. Mexico and the Invention of America.

Departing from O’Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagún, Clavijero, Humboldt, Dussel and Alzamora will conform part of the readings.

Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

Sociology

This interdisciplinary course applies theories of economic sociology to examine the effects of Chinese overseas migration on modern world economy from the sixteenth century to the contemporary era. It examines the contribution of overseas Chinese to the development of capitalism in the following junctures: the East-West economic integration in the pre-modern era, China's modern transformation after the Opium War (1839-1842), the making of US national economy in the early twentieth century, as well as the postwar economic miracles in the Pacific Rim, among others. Special Note: Fulfills History requirement for GSCD track students.

Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.

Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

Humanities Center

AS.300.139. Introduction to Intellectual History.

This course offers a conceptual and historical introduction to Intellectual History. What makes the “history of ideas” different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call “ideas”? In what sense do they have a history? These are examples of the kind of questions addressed in the course.

Instructor(s): P. Marrati; S. Carmel
Area: Humanities.

AS.300.228. Brain and Society.

On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.

Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.
AS.300.301. Life, Vitality, Thought. Philosophy and the Natural Sciences in Nineteenth Century Europe.
Last year neuroscientists at MIT shined an optogenetic light on brain cells in order to artificially stimulate memories. If every detail of our past has a particular location in the brain, then we could alter, and even destroy, memories. Does this mean that humans are like machines whose history can be erased as easily as we delete files on a computer? Or are memories, like consciousness, not so easily reducible to brain structures? This class will examine how these and other questions shaped the history of modern biology and experimental psychology beginning in the nineteenth century. We will read the works of prominent biologists, psychologists, and philosophers who were all involved in a rich debate over the nature of life and thought.
Instructor(s): L. McGrath
Area: Humanities.

AS.300.330. Trauma in Theory, Film, and Fiction.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (“The Emigrants”), Lanzmann (“Shoah”), Spiegelman (“In the Shadow of No Towers”), McCarthy (“Remainder”), and others.
Instructor(s): R. Leys
Area: Humanities, Social and Behavioral Sciences.

AS.300.365. Desire in the Fin de siècle.
This course examines the obsession with desire at the turn of the 20th century in literature, drama, philosophy and social thought and its implications for notions of self and community in modernity. We will read comparatively across European, Russian and American cultures, including Stoker’s Dracula, Hamsun’s Hunger, plays by Chekhov, Strindberg, Ibsen, Wilde, and stories by Tolstoy, Gorky, Chopin and Larsen.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.383. History of Madness from the Bible to DSM-V.
Madmen, lunatics or the insane, have seen an extraordinary variety of responses and attitudes across the centuries. Whether seen as a “true” phenomenon or as socially constructed “madness” was defined and treated, examined and controlled, diagnosed and “cured” according to the spirit of the time. This course will follow the varied social imageries of “madness” throughout Western history, from the Bible to the contemporary and controversial Diagnostic Statistical Manual (DSM) in its most recent 5th edition. Alongside primary texts by Hippocrates, Avicenna, Pinel, and Freud and secondary texts by Michel Foucault, Ian Hacking, Edward Shorter, and Elaine Showalter, among others, we will acquaint ourselves with first-person accounts of “madness” and its different forms of treatment, ranging from lunatic asylum, through electric-shock treatments and lobotomies to psychoanalysis. The course will explore the interaction between the historical and social, scientific and political as well as economical factors that have shaped the views of “madness” and its treatment.
Instructor(s): O. Ophir
Area: Humanities.

East Asian Studies
AS.310.103. Modern Japan - 1800 to the Present.
An introduction to the history of Japan from the 18th century to the present. In lectures and discussion we will draw upon a combination of primary source materials (political documents, memoirs, oral histories, journalism, fiction, film) and scholarly writings in order to gain insight into the complex and tumultuous process by which Japan became an industrialized society, a modern nation-state, and a world power.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences.

This course introduces students to medical history in China in relation to gender history, legal history, publishing history, and literature from the Song to the Republican period.
Instructor(s): Y. Zhang
Area: Humanities.

AS.310.108. Introduction to Chinese Fiction and Drama.
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.203. Women Writers from East Asia, 11th to 19th Centuries.
Introduction to women-authored texts in East Asia, 11th to 19th centuries. Historical and literary significance of their output in Chinese, Japanese, and Korean societies.
Instructor(s): F. Joo
Area: Humanities.

This course explores the global circulation of political ideas and the formation of transnational social, intellectual, and aesthetic movements in Japan, China, and Korea from the 1880s to the 1980s.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences.

AS.310.221. Introduction to Eastern Religious Traditions.
This course serves as an introduction to Hinduism, Jainism, Buddhism, Sikhism, Confucianism, and Daoism. Successful completion of this course will provide students with a critical understanding of these six traditions.
Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences.
AS.310.308. The Frontier in Late Imperial China. 3 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of "China". Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China’s northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

AS.310.356. The Buddhist Experience.
This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). In addition to studying the origins of Buddhism in India and its eventual spread across Asia, we will examine unique local interpretations of Buddhism. Particular focus will be on manifestations of Buddhism in art and material culture. Students will gain a critical understanding of the role of texts, art, doctrine, and practice play in the overall Buddhist experience. This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences.

Interdepartmental

AS.360.147. Freshmen Seminar: Adam Smith and Karl Marx.
This freshmen seminar examines the ideas of Smith, the greatest proponent of the free market, and Marx, his most radical critic. Freshmen only.
Instructor(s): E. Schoenberger; P. Jelavich
Area: Humanities, Social and Behavioral Sciences.

AS.360.690. Practicum in Administration and Higher Education.
This intensive practicum is intended to expose graduate students to the essential tenets of administration at the college and university levels. Upon graduation, many students find themselves contemplating careers in university administration, or find that early in their tenure as professors, they will be asked to assume a variety of administrative tasks. Focusing upon department-level, divisional-level, and interdivisional level administrative roles, this practicum aspires to better prepare students for the increasingly variegated experiences to be encountered along the continuum of moving forth through a university career.
Instructor(s): B. Vinson.

Program in Latin American Studies

AS.361.130. Introduction to Latin American Studies.
This course provides an introduction to the study of Latin American cultures and societies from the vantage point of city life and urban representation. We will engage literatures from a variety of disciplines to discuss how issues such as modernization and urbanization processes; tradition, identity and ethnicity; class, marginality and urban social movements; gender and the changing status of women; arts and literature are experienced and represented in the Latin American urban environments.
Instructor(s): E. Gonzalez; G. Paquette; V. Procupez
Area: Humanities, Social and Behavioral Sciences.

This course is designed to introduce students to the literary and artistic production originated by Peronismo and particularly by Evita. It explores the historical period that consolidated Peronismo and devotes great amount of time to the controversial figure of Evita. She has fed the popular imagination; her representations have reached far beyond the limits of Argentina. The materials will include different genres: biographical, historical, fictional, and documentary.

The intertwined histories of Colombia, Venezuela, Panama, and the Caribbean studied in two novels: Joseph Conrad’s Nostromo (1904) and Juan Javier Vázquez’s The Secret History of Costaguana (2007). Other novelists include Rómulo Gallegos (Doña Bárbara, 1929); Alejo Carpentier (The Lost Steps, 1953), and Gabriel García Márquez (The General in his Labyrinth, 1989).
Instructor(s): E. Gonzalez
Area: Humanities.

Center for Africana Studies

AS.362.104. Introduction to the African Diaspora.
This course will begin in Africa before Atlantic slave trade, move to cover that trade into Brazil, the Caribbean and South Carolina. Comparisons of slave systems with Africa, Brazil, some parts of the Caribbean and Carolina (later South Carolina).
Instructor(s): P. Romero
Area: Humanities.

Jointly offered with Moira Hinderer, based on themes developed from the archives of the Afro-American Newspaper and selected readings of African American Societies from across the hemisphere of the Americas.
Instructor(s): F. Knight; M. Hinderer
Area: Humanities, Social and Behavioral Sciences.

AS.362.122. History of Africa (since 1880).
An introduction to the African past since 1880.
Prerequisites: Students are not allow to take both 100.122 and 362.122.
Instructor(s): K. Gallon
Area: Humanities, Social and Behavioral Sciences.
AS.362.175. Freshman Seminar: Remembering the Black Power Movement.
This course explores trends, developments, contradictions, and dilemmas related to the Black Power Movement. The objective of studying this historical movement is not to engage in nostalgia, but to think through and learn the lessons of this historic social movement. An active participant in the Black Power Movement as a university undergraduate and graduate student, I do not approach this subject merely as a set of interesting intellectual issues and dynamics that can be explored with complete dispassion and objectivity. Rather, I seek to examine critically some of the contradictions and dilemmas that I, too, was caught up in, seeking to come to grips with and clarify my own participation and activities. We study these historical events with the expectation of making a positive contribution to the future.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences.

AS.362.204. Women in African History.
Selected readings written by or about notable African women from the 17th century to the present. Themes explored include slavery, power and religion, economics, health and politics.
Instructor(s): P. Romero
Area: Humanities.

AS.362.206. Research Seminar: Baltimore History from the AFRO Newspaper Archives-Community Based Learning.
This small, project-oriented class will introduce you to methods in historical research while exploring major topics in twentieth century Baltimore history. We will use the rich reporting of Baltimore’s Afro-American Newspapers, to explore Baltimore’s place in the larger history of Black urban experience. Students will analyze images and exhibits related to African-American history, as well as research and curate small online exhibits of primary source materials including photographs, newspaper clippings, correspondence, pamphlets, flyers, and maps. We will be among the first scholars to work in the Afro’s rich archival collections, which include over a million images.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences.

This course will examine the literature surrounding cross-cultural exchange, through an interrogation of key concepts in African and transnational studies namely “diaspora” “globalization,” and “transnationalism.”
Instructor(s): J. Ahlman
Area: Humanities, Social and Behavioral Sciences.

This course will explore major topics in 20th century Baltimore history, using local newspapers and the archival collections of the Baltimore Afro American Newspaper.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences.

An examination of the various ways in which an African Diaspora developed across the Americas between 1492 and the present. Attention will be paid to the period of the Transatlantic slave trade but the greater emphasis will be on the complex societies that emerged by the early twentieth century and the responses of people of African descent to these societies. Readings will range across history, demography, economics, politics and culture in order to define a Diaspora and examine the factors that encourage or inhibit its formation. Cross listed with Africana Studies
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

This course investigates the impact of white supremacy and anti-black racism, as a global system of power, on the political development of the United States of America.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences.

AS.362.401. Comparative Slavery in the Americas.
This course examines the development of slavery and racial thought in Latin America and the Atlantic World from the fifteenth century until its demise in the middle and late nineteenth century. Readings in social and cultural history are intended to focus on the life and labor of slaves, while readings from economic and legal history evaluate slavery as an institution. Intellectual histories are also assigned in an attempt to map the development of slavery as an institution typified by racial caste. The primary goal of this course is to give students a background in the major historical debates that have shaped the production of the history of slavery, including questions of identity (creolization vs. "African survivals"), slave agency and control, and economic vs. racial causes of slavery and the slave trade. All of these topics will be examined through the overarching theme of the course, which is the Tannebaum thesis: namely, to what extent slavery was experienced differently in Latin America, Anglo-America, and in Africa itself.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences.

This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes.
Study of Women, Gender, Sexuality

AS.363.201. Introduction to the Study of Women, Gender, and Sexuality.
This course offers an introduction into the fields of Women's Studies, Gender Studies, and Sexuality Studies. It explores why we need these fields of inquiry, how they have emerged historically, what some of the major and most interesting contributions are and where we might go from here. The course is meant as a preparation for the other WGS core courses.
Instructor(s): E. Ender
Area: Humanities, Social and Behavioral Sciences.

Music

What is “Jewish music,” and what roles has it played in global and Jewish cultures? This course will address these questions, considering genres and contexts of Jewish music from cantillation to klezmer and from art music to Yiddish cinema. Cross listed with Jewish Studies.
Instructor(s): J. Walden
Area: Humanities, Social and Behavioral Sciences.

Program in Museums and Society

AS.389.201. Introduction to the Museum: Past and Present.
This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

Students explore early American life related to the region and the Carroll family of Homewood. Primary research and object study culminate in student-curated thematic exhibition. Optional intersession practicum experience is also possible. For more on exhibit theme, contact instructor. M&S practicum course.
Instructor(s): C. Arthur
Area: Humanities.

Part public history, part introduction to museum practices, this hands-on course explores how heritage areas and museums serve communities through interpretation. Each year, students partner with a community to develop research-based, visitor-centered interpretive material, in the 2015 Baltimore National Heritage Area. Field trips and community meetings will be a significant part of the course. Cross-listed with History and History of Science. M&S practicum course. Class usually meets 1:30 - 3:50 except for days with field trips.
Instructor(s): E. Maloney
Area: Humanities, Social and Behavioral Sciences.

JHU pioneered the concept of the modern research university in the United States, but what does that mean for the everyday experiences of its students, faculty, staff and friends? Excavate the history of this place through the things collected, made and used here since the university’s founding in 1876. Students research the material culture of Hopkins and present their findings on an interactive website: collectionsweb.jhu.edu. Course includes digital media labs. Cross-listed with History and History of Science. M&S practicum.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.302. The Virtual Museum.
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.
Instructor(s): J. Kingsley
Area: Humanities.

The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology.
Instructor(s): S. Balachandran
Area: Humanities.

Explore the material culture of “wonder” from the Renaissance to the Enlightenment in literature, science, and art, with Hopkins’ rare book collections and the Walters Art Museum. M&S practicum course.
Instructor(s): E. Havens
Area: Humanities.

This interdisciplinary course will explore the institutional, cultural, artistic and architectural history of St. Peter’s and the Vatican Museum and Library from Antiquity through the Renaissance, up to the present day. Class meets in the Dick Macksey Seminar Room of the Brody Learning Commons. Cross-listed with History.
Instructor(s): E. Havens
Area: Humanities.

Students explore early American life relating to the region and Homewood House. Primary research, object study culminate in exhibit focused on trades and crafts, training and work practices. M&S practicum course. Meets at Homewood Museum. Cross-listed with History.
Instructor(s): C. Arthur
Area: Humanities.

AS.389.450. Readings in Material Culture.
Objects, things, “stuff” - this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

AS.389.460. Inventing the Middle Ages from the Renaissance to Today.
Investigate the history of the collection, interpretation and display of medieval art by nations, museums and private collectors. Topics range from antiquarian interest to conception of medieval sculpture as "primitive", from the use of medieval objects in nationalistic displays and from early American museums such as the Cloisters in NY to current exhibits such as the Walters. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities.
History of Art

Supporting a proud tradition of excellence in humanities scholarship and teaching, Johns Hopkins University offers students a diverse range of resources and opportunities for the study of art history. Courses are taught by an international faculty of respected research scholars, covering many aspects of the Classical and European tradition from the ancient world into the modern era, as well as selected aspects of Near Eastern, Asian, Ancient American, trans-Atlantic and contemporary arts. Participating in small classes with opportunities for informal excursions, students integrate their direct experience of works of art with the knowledge and critical perspective gained through historical research, discussion, and debate.

Programs leading to the B.A. and Ph.D. degrees emphasize the value of investigating works of art in their historical, intellectual, and social contexts, and enable students to deepen their understanding of cultural history through courses in other departments.

Facilities and Opportunities

Located in a metropolitan region of unsurpassed museum collections and research institutions, Johns Hopkins is well situated for the study of art history. The Baltimore Museum of Art, with its rich holdings in modern and contemporary art, African Art, and the history of prints (just to name a few of its strengths), is directly adjacent to the Homewood campus. Downtown, and only a short shuttle ride away, is the renowned Walters Art Museum, which preserves rare collections of ancient and medieval art, Renaissance, Baroque, and 19th-century painting.

Also easily accessible from Baltimore is the National Gallery of Art in Washington, D.C., which houses a world-class collection of European painting, sculpture, and graphic arts from the Renaissance to the present day. Modern art is presented in the permanent collections and exhibitions of the Hirshhorn Museum, the National Museum of American Art, and the Phillips Collection. Unique exhibitions of Byzantine and pre-Columbian art are maintained at Dumbarton Oaks Research Library, and collections of Asian and African art are housed in the Freer Museum and the Museum of African Art.

Meanwhile, the Sheridan Libraries of Johns Hopkins maintains its own extensive art library on the Homewood Campus, and a Special Collections department which includes, among other treasures, the Fowler Collection of treatises on architecture. Research materials in numerous regional libraries and museums, and in affiliated institutions, including the Library of Congress, are readily accessible to art history students.

(Also see Requirements for a Bachelor’s Degree (p. 20))

Because the department emphasizes the historical, cultural, and social context of art, art history is an excellent program for undergraduates interested in a broadly humanistic education as well as for those preparing for a career in the field. A departmental faculty advisor assigned to each undergraduate major helps plan individual courses of study. Undergraduates are encouraged to participate fully in all departmental activities.

Requirements for the History of Art Major

• Students must earn a “C-” or higher grade in all courses used to satisfy major requirements.
• Courses used to satisfy major requirements may not be taken satisfactory/unsatisfactory.

Three Introductory Courses, to comprise:

<table>
<thead>
<tr>
<th>Course Code</th>

Five Advanced Level Courses (010.2xx-4xx) 1

One course in ancient art history 3
One course in medieval art history 3
One course in renaissance/baroque art history 3
One course in modern art history 3
One course in non-western art history 3

Two 400-Level Courses, to comprise: 1

One 400-level course exploring art history’s historical and conceptual bases and approaches 2
One additional 400-level course 3

Three Additional Courses

Only one of these elective courses may be at the 100-level. Elective courses must be in the department or cross-listed with History of Art.

Intermediate Knowledge of a Modern Foreign Language 3

Proficiency is verified by completion of courses through the second semester of the intermediate level or higher.

Total Credits 44-55

1 These courses are in addition to the five advanced subfield courses; they may not count toward fulfilling one of the subfields above.
2 Course should be taken within one year of declaring, ideally before senior year.
3 Those planning to continue to graduate school in the History of Art should discuss which language(s) to pursue with their adviser and/or the director of undergraduate studies.

Honors Program in History of Art

For graduation with honors, students must have a cumulative GPA of 3.7 or higher in History of Art and successfully complete an honors thesis.

Honors Thesis

• The honors thesis comprises a significant expansion and deepening of a paper in a 400-level seminar into a 20-25 page paper, with figures, bibliography, and any appendices constituting additional pages.
• Students pursuing honors must make a formal request to do so in conjunction with a proposed mentor via the Honors Thesis Form.
• While writing the thesis, students enroll in Honors Thesis credits (AS 010.521, 3 credits). These credits are in addition to the 13 courses
of the normal major requirements and do not count as an elective or advanced course.

Requirements for the History of Art Minor

- Students must earn a “C-” or higher grade in all courses used to satisfy minor requirements.
- Courses used to satisfy minor requirements may not be taken satisfactory/unsatisfactory.

Five Advanced Level Courses (010.2xx-4xx) 15

Total Credits 21-23

The graduate program is designed to give students working toward the Ph.D. degree an encompassing knowledge of the history of art and a deep understanding of the theories and methodologies pertaining to art historical research. The program emphasizes collaborative working relationships among students and faculty in seminars. Each advanced doctoral candidate benefits from supervision by two faculty members in his or her field.

The program also fosters a close familiarity with the outstanding art treasures in the Baltimore-Washington area relevant to the student’s area of study. In addition to the rich holdings of the Sheridan Libraries of Johns Hopkins University (which include collections of rare books at Garrett Library, Special Collections at Eisenhower Library, and the George Peabody Library downtown) graduate students have access to such research facilities as the Center for Advanced Study in the Visual Arts (National Gallery) and the Dumbarton Oaks Research Library and Collection, both in Washington, D.C.

Admission and Financial Aid

Applicants to the Ph.D. program in History of Art should upload and submit all required application materials and supporting documents through the online application. For information about applying to the Ph.D. program in History of Art, please see the department’s website (http://arthist.jhu.edu/graduate). Applications must be completed by January 16.

To foster close student-faculty relationships and provide for the greatest flexibility in developing each graduate student’s individual curriculum, the department strictly limits the number of students it admits each year.

Financial support for admitted students is provided in the form of tuition grants, a multi-year fellowship stipend (contingent on continued progress), and health insurance coverage, with further opportunities for advanced research and travel funding available. Students in the program may also apply for grants from the Charles Singleton Center for the Study of Pre-Modern Europe, which supports travel, conference participation, and dissertation research in Europe.

Requirements for the Ph.D. Degree

Students may apply for admission to the Ph.D. program with either a B.A. or M.A. degree from another institution in hand. Acceptance requires the approval of the instructors in the areas chosen by the student as major and minor fields; in the case of transfer students, acceptance may be provisional. Unless they can present acceptable language certificates, all students entering the Ph.D. program will be required to pass reading competency examinations in both German and French before the conclusion of the second year of coursework. Italian or Spanish may be substituted for French when a student’s area of study suggests it; a petition must be submitted and approved by the faculty.

Students entering the program with an M.A. degree must complete four full semesters of coursework before being approved to take their qualifying exams; students entering with a B.A. degree may, at the discretion of the faculty, require up to five terms before moving on to exams. The art history faculty encourages students to take full advantage of offerings in other departments, and students may, if they choose, develop a minor field in another discipline. In consultation with their advisers, students who have completed their coursework prepare for the qualifying exams, which is comprised overall of two written exams (one major field and one minor field), followed by an oral defense.

Upon successful completion of course work and qualifying exams, students must submit a dissertation proposal. Once approved by the department, the student is admitted to candidacy and commence work on the dissertation. When a student has completed the dissertation, he or she is examined by a Graduate Board committee assembled by the department chair in consultation with the principal faculty advisor. Successful defense of the dissertation and electronic submission of work, complete in all its components, marks the fulfillment of the program’s degree requirements.

In addition to their own studies and research, every student in the Ph.D. program gains valuable pedagogical experience by serving as a teaching assistant, under different faculty mentors, for at least six terms (over the course of a five-year fellowship), and as a faculty research assistant for at least one term.

Requirements for the in-process M.A. Degree

Students entering the Ph.D. program with a Bachelor’s degree may qualify for the M.A. degree upon completion of two semesters of coursework (six graduate-level courses) and completion of the department’s language requirements, but the department does not accept students for the terminal M.A. degree as such.

Art History Fields

Ancient Art

Long associated with the study of classical archaeology, the department affords students of ancient art the opportunity work with a faculty that includes experts in Roman Art and Architecture and Ancient Near Eastern Art. Students also benefit from the close and long-standing relationship with the Department of Classics. Facilities of special relevance to students of Greek and Roman art include the Johns Hopkins Archaeological Museum, located on campus inside Gilman Hall, and the extraordinary holdings of the Walters Art Museum.

Medieval

Ever since its founding in 1947, the department has given special emphasis to the study of medieval art, and that tradition continues...
with a new generation of medievalists bringing expertise in Early Christian, Islamic, Byzantine, Mediterranean, and Italian Romanesque art and architecture to the program. Students avail themselves of local expertise through the departments of History, English, and German and Romance Languages and Literatures, and frequently consult with curators at the Walters Art Museum, several of whom participate as adjunct faculty. Hopkins students may take the seminars in Byzantine art offered each year at Dumbarton Oaks, and take advantage of the extensive research library there as well. The extraordinary collections at the Walters Art Museum and at Dumbarton Oaks are especially valuable for students interested in manuscript illumination and the minor arts.

Renaissance / Early Modern

Another signature strength of the History of Art Department is its program in Renaissance and Early Modern Europe, where a broad faculty expertise encompasses the art and culture of Italy, Spain, and the countries of northern Europe from the fourteenth to the seventeenth centuries. Graduate students in these areas participate in the programs of the Charles Singleton Center for the Study of Pre-Modern Europe, which sponsors collaborative research abroad and brings a steady stream of world-class lecturers to Baltimore. Students also benefit from the excellent collections of Italian and northern Renaissance art at the Walters Art Museum, the National Gallery, and the Philadelphia Museum of Art.

Modern

At Hopkins a diverse and challenging curriculum in modern art and criticism is offered by a research faculty of international prominence, supplemented by occasional visiting scholars and museum curators. European art from the 18th to the 21st century, American modernism, and modern art in Asia are all among the department’s distinctive strengths. Students oriented toward the study of criticism and aesthetic theory can also broaden their perspective and develop their critical skills by taking courses offered through the Humanities Center and the Department of Philosophy. Distinctive collections at the Baltimore Museum of Art and at multiple places in Washington, D.C. (the Hirshhorn Museum, the National Museum of American Art, the Freer/ Sackler of the Smithsonian, the Phillips Collection, and others) provide unparalleled resources for students of modern art at all levels.

For current faculty and contact information go to http://arthist.jhu.edu/directory/index.html

Faculty

Chair
Mitchell Merback
Professor: Northern Renaissance art.

Professors
Stephen J. Campbell
Henry and Elizabeth Wiesenfeld Professor: Italian Renaissance art.

Marian Feldman
Professor of History of Art and Near Eastern Studies: Ancient Near Eastern art.

Michael Fried
Herbert Boone Chair in the Humanities (The Humanities Center): Modern art.

Felipe Pereda
Nancy H. and Robert E. Hall Professor: Late Medieval and Early Modern Spanish art.

Associate Professor
Rebecca M. Brown
Associate Professor: South Asian art

Assistant Professors
Christopher Lakey
Assistant Professor: Medieval art.

Pier Luigi Tucci
Assistant Professor: Roman art and architecture.

Molly Warnock
Assistant Professor: Modern art.

Nino Zchomelidse
Assistant Professor: Medieval art.

Faculty Emeriti
Charles Dempsey
Professor Emeritus: Renaissance and Baroque art.

Herbert L. Kessler
Professor Emeritus: Early Christian and Medieval art.

Henry Maguire
Professor Emeritus: Byzantine and Medieval art.

Teaching Faculty
Elizabeth Rodini
Teaching Professor: Italian Renaissance art; and Director of the Program in Museums and Society.

Joint Appointments
Emily S.K. Anderson
Senior Lecturer (Classics): Ancient Aegean art.

Betsy M. Bryan
Professor (Near Eastern Studies): Egyptian art and archaeology, Egyptology.

H. Alan Shapiro
Professor (Classics): Greek and Roman art.

Adjunct, Associate, and Visiting Faculty
Martina Bagnoli
Adjunct Associate Professor (and Curator, Walters Art Museum): Medieval art.

Doreen Bolger
Adjunct Professor (and Director of The Baltimore Museum of Art): Modern art.

Lisa DeLeonards
Senior Lecturer and Austen-Stokes Visiting Associate Professor in the Art of the Ancient Americas.

James Meyer
Adjunct Professor; Modern art.

Carl Strehlke
Adjunct Professor (and Adjunct Curator, Philadelphia Museum of Art): Italian Renaissance art.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.010.101. Introduction to History of Western Art I.
A survey of painting, sculpture, and architecture from the Renaissance to the present. 
Instructor(s): C. Lakey
Area: Humanities.

AS.010.102. The History of Western Art II.
A survey of painting, sculpture, and architecture from the Renaissance to the present. Recommended Course Background: AS.010.101 or instructor permission.
Instructor(s): K. Markoski
Area: Humanities.

AS.010.105. Art of the Ancient Americas.
Surveys the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.110. Art of the Islamic World.
This course is an introduction to the art of the Islamic world from the 7th century to the present, to include architecture, painting, mosaic, ceramics, textiles, metalwork, and contemporary media such as video and installation art. In addition to engaging with the region where Islam emerged—the eastern Mediterranean and the Arabian Peninsula—the course examines North Africa, Spain, Iran and Central Asia, and South Asia.
Instructor(s): R. Brown
Area: Humanities.

AS.010.147. South Asian Art, Culture and Politics: Empire, Colony, Nation.
This course explores the visual culture and politics of South Asia from early archaeological settlements to contemporary installation art. Themes will include: the role of the patron, the relation of text and image, architecture and ritual/political space, colonialism, nationalism, modernity, and postcoloniality. Cross-listed with Political Science.
Instructor(s): R. Brown
Area: Humanities.

AS.010.192. Move over Michelangelo: Renaissance Sculpture in Northern Italy.
Michelangelo’s heroic figure has dominated our conception of Renaissance sculpture, but outside of Florence & Rome, a princely aesthetic for small, intimate, tactile works dominated. We will explore the alternate paradigms for the figure and sculpture in the North, centering around Padua, Mantua, and Venice. The course is built around the collection at the Walters Art Museum, from which students will choose an object as the subject of a semester-long research project. We also take advantage of MICA to visit a bronze workshop, and will visit the Antico exhibition in NY at the Frick. Dean’s Teaching Fellowship.
Instructor(s): L. Blom
Area: Humanities.

AS.010.196. Destroying Art: Iconoclasm through History.
This course explores the deliberate destruction of art by political regimes, religious groups, and individuals, primarily in Europe and the Middle East, from antiquity to the present. Dean’s Teaching Fellowship.
Instructor(s): B. Shilling
Area: Humanities.

Through the examination of painterly practice in Japan, Italy, France, Germany, and the United States, this class will explore the radically new approaches to artistic production that occurred between 1947 and 1977.
Instructor(s): K. Johnson
Area: Humanities.

In houses and palaces from Greece to Egypt, Minoans in the 2nd millennium BCE used colorful and vivid wall paintings to decorate their environment. This course will explore Minoan frescoes from around the Mediterranean with the goal of learning more about day to day life in the Late Aegean Bronze Age. We will also visit the Walters Art Museum to view their collection of Minoan and related Bronze Age objects.
Area: Humanities.

AS.010.203. Abstraction.
Introduction to major works and discourses of, and key debates surrounding, abstraction in the visual arts of Europe and the United States throughout the twentieth century. Visits to the BMA.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.204. Italian Art in the Middle Ages.
This course explores key monuments of medieval art and architecture in Italy from c. 400 until 1350. We will concentrate on historical, functional, and aesthetical aspects that lead to the creation of single monuments and art works. Emphasis is given to the analysis of “sacred space” by means of architecture, painted, and sculptural decoration, as well as ritual performances. Another focus is laid on the emergence on the political dimension of art for the creation of civic identity as well as in the context of the late medieval courts. We raise questions about the importance of materiality and science for the creation of medieval art works.
Instructor(s): N. Zchomelidse
Area: Humanities.
AS.010.205. The Painted Worlds of Early Greece: Fantasy, Form and Action.
This course explores the creation and role of early Aegean wall painting. Found primarily in palaces, villas and ritual spaces, these paintings interacted with architecture to create micro-worlds for social activities taking place in their midst. Their subjects range—from mythological to documentary, from ornamental to instructive. They depict dance and battle, fantastical beasts and daily life. We examine their complex relationship to lived reality as well as the activities that surrounded them, from their crafting, to performance of rituals, to their role in “international” relations.
Instructor(s): E. Anderson
Area: Humanities.

This course explores the role of the image in the so-called “spiritual colonization” of the Americas. Drawing on art historical and anthropological perspectives, we will consider a wide range of artistic practices from the viceregalities of New Spain and Peru. Special emphasis will be placed on questions of cross-cultural exchange and (mis)understanding. Topics include idolatry, demonic visions, relics, wonder-working images, and sacred matter.
Instructor(s): M. Lumbreras Corujo
Area: Humanities.

AS.010.208. The Disappearing Wall: Roman Frescoes in Context.
The course introduces ancient Roman wall painting from Pompeii and Rome as images painted on “disappearing walls.” We will analyze these and other murals in historical, archaeological and museum contexts.
Instructor(s): S. O’Connell
Area: Humanities.

Critical survey of artworks, texts, and debates primarily in Europe and the Americas since World War II. Visits to Special Collections, the BMA, and art on Homewood Campus.
Instructor(s): M. Warnock
Area: Humanities.

This course offers an introduction to one of the major movements in modern painting. We will explore the developments of a new aesthetic and subject matter during a period of vast cultural change in Paris and its environs, from the mid-19th century to the turn of the 20th century. Visits to the Baltimore Museum of Art and the National Gallery of Art will supplement our study of artists including Manet, Monet, Degas, Pissarro, Seurat, and more.
Instructor(s): J. Watson
Area: Humanities.

AS.010.211. Monuments of Asia.
An examination of selected architectural monuments from across Asia, including the Indian subcontinent, Southeast Asia, China, Japan, and Korea. Ancient to contemporary.
Instructor(s): R. Brown
Area: Humanities.

AS.010.212. Mirror Mirror: Reflections in Art from Van Eyck to Velázquez.
Explores the different ways Early Modern painters incorporated mirrors and reflective surfaces into their works for the sake of illusion and metaphor, deception and desire, reflexivity and truth-telling. By transgressing the boundaries of human vision and experience, embedded mirror images often made claims about the powers of art, and the superiority of painting in particular.
Instructor(s): M. Merback
Area: Humanities.

AS.010.213. Medieval Renaissances.
A course on the appropriation, citation, and imitation of classical antiquity in the art and architecture of the Middle Ages (ca. 300-1300), emphasizing the active transformation of earlier models rather than passive copying.
Instructor(s): R. Danford
Area: Humanities.

AS.010.214. Ancient Americas in Motion.
This course critically examines the visual arts and their makers as portrayed in documentary, historical, and Hollywood films.
Instructor(s): L. DeLeonardis
Area: Humanities.

This course investigates the impact of political, religious, and social change for the making of art and architecture in the city of Rome from Constantine the Great (ca. 274-337 CE) until 1308, when the papal court moved to Avignon. From being a thriving metropolis and the political center of an empire in a pagan, multi-ethnic society, Rome became a small town of a few thousand inhabitants dwelling in the ancient ruins under the spiritual leadership of a powerless Christian bishop and unprotected from the invasions of the migrating peoples from Eastern Europe and Central Asia. Later transformations concern the rise to political power of the popes, achieved by the military alliance with the Frankish dynasty of Charlemagne around 800, and the controversy over the superiority of power between the German emperors and the Roman popes. How did the transformation from worldly to religious power affect the architecture of public buildings in the city? What strategies were developed to visually promote the new religious leaders of the city, the popes, and the new Christian God? How did the new status of Rome as one of the most important Christian pilgrimage sites with its countless bodies of Early Christian martyrs in the catacombs outside the city influence urban development? And finally, what impact did the economical ups and downs in these periods of transition have for the arts? As we try to reconstruct the “image” and the appearance of medieval Rome, this course discusses ideas and concepts behind different forms of leadership, both political and religious, as they intersect with the power of the arts and the self-referential character of a city that is obsessed with its own past.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.216. 20th Century Italian Art.
This course will be a critical survey of the major artistic movements in Italy during the 20th century, from Futurism to Arte Povera. Often seen as a secondary location of artistic production, the class will situate the artists working in Italy within a broader historical and global context.
Instructor(s): K. Johnson
Area: Humanities.
**AS.010.219. Constantinople from Founding to Fall: Art of the Byzantine Empire.**
The course examines Byzantine art - from the founding to fall of Constantinople, both in Byzantium and beyond its borders - through its religious, political and aesthetic power.
Instructor(s): M. Raucher
Area: Humanities.

**AS.010.220. Theft, Theory, and Telescopes: Rome and Naples in the Age of Caravaggio.**
This course will offer an overview of painting in Rome and Naples in both Caravaggio’s generation and the one that followed it, exploring broad shifts in artistic theory and practice from the 1590s to the late 1630s.
Instructor(s): H. Friedman.

**AS.010.224. The Art of Bollywood.**
This course examines Hindi cinema produced in Mumbai since the 1950s, focusing on key examples from each decade, from early narratives of navigating the big city to song-and-dance extravaganzas incorporating Indian-Americans. We will look at art represented in film, from modernist sculpture to ancient architecture. The course will also explore the billboards, cinema cards, and other ephemera associated with Bollywood, alongside contemporary artists’ appropriations of Hindi cinema. No knowledge of Hindi is required.
Instructor(s): R. Brown
Area: Humanities.

**AS.010.226. Art, Medicine, and the Body: From Leonardo to Body Worlds.**
This course explores five centuries of fruitful collaboration between physicians and artists -- those who observe the body in order to heal it, and those who do the same in order to picture it. From medieval medical manuscripts, where the body is portrayed as a microcosm of the created world, to the anatomical forays of Renaissance artists such as Leonardo da Vinci and Albrecht Dürer; from gruesome depictions of bodily pain, disease, and corruption in the art of Matthias Grünewald to the eloquent exposure of the body’s interior by anatomists such as Andreas Vesalius; from the spectacularization of the body in Enlightenment science to the rubberized cadavers of Gunther von Hagen’s Body Worlds project -- these and other topics will bring into focus the complex intersections between the history of medicine and the history of art.
Area: Humanities.

**AS.010.230. Impressionism, Painting of Modern Life.**
This course offers an introduction to one of the major movements in modern painting. We will explore the developments of a new aesthetic and subject matter during a period of vast cultural change in Paris and its environs, from the mid-19th century to the turn of the 20th century. Visits to the Baltimore Museum of Art and the National Gallery of Art will supplement our study of artists including Courbet, Manet, Monet, Degas, Cézanne, Pissarro, Seurat, and more.
Instructor(s): J. Watson
Area: Humanities.

**AS.010.232. Art and Architecture of the Medieval Mediterranean World.**
This course explores the development of medieval painting, sculpture, and architecture in the Mediterranean region from ca. 250 to 1400. The class will focus especially on moments and sites of contact between Western European, Byzantine, and Islamic cultures and will examine the impact of cross-cultural exchange on artistic and architectural production.
Instructor(s): M. Hauknes
Area: Humanities.

**AS.010.233. Art and Astrology in the Middle Ages.**
This course explores the relationship between art and astrology from the early Middle Ages to the early Renaissance. We look at a wide range of media—mosaic, painting, metalwork, manuscripts, and sculpture—that speak to the central place of astrology in medieval systems of knowledge, and the practical uses of astrology for medicine and politics. Readings and discussions cover a variety of themes, including the transmission of astrological knowledge, the emergence of large-scale astrological mural programs, the use of precious stones and amulets, and the ways in which artworks probe the tensions between astrology and Christian theology. A recurring topic will be principle of “celestial influence”—the idea that the stars emit rays that affect people and events on earth—and its implications for artistic production and reception, as well as how art objects could even predict, or represent predictions of, future events. Primary sources (in English translation) include Albertus Magnus, Abu Ma’shar, al-Kindi, Roger Bacon, and others. Secondary readings include Aby Warburg, Erwin Panofsky, Fritz Saxl, Michael Camille, Georges Didi-Huberman, and others.
Instructor(s): M. Hauknes
Area: Humanities.

**AS.010.236. Palaces, Temples and Tombs in Mesopotamia.**
Mesopotamia, the “land between the rivers,” is considered the cradle of civilization. Its earliest urban centers appeared by 3500 BCE in the region of modern-day Iraq, Iran, and Syria. Along with urbanism came the emergence of temples and palaces as large-scale elite institutions (replete with written records). Their arts manifest some of the earliest complex representations. This course explores the art and architecture within the social, political and cultural context of ancient Sumer, Babylonia and Assyria. It provides an integrated picture of the arts of Mesopotamia from 3500 to 330 BCE with an emphasis on the development of visual narrative and the use of art in the expression of authority and legitimacy.
Instructor(s): M. Feldman
Area: Humanities.

**AS.010.242. African American Art.**
This is an introduction to the history of African American art. While organized chronologically, the course will emphasize a series of case studies of artists and movements in order to understand African American art and the complexities of its study. The course will explore how black artists in the United States have engaged with key issues such as race, gender, class and ethnicity as well as debates about representation and the role of the artist. Cross-list with Africana Studies
Instructor(s): T. Wofford
Area: Humanities.
**AS.010.251. Medieval Spaces: Site, Image, and Viewer in the Middle.**
This course serves as an introduction to medieval art by analyzing the relationships between architecture and images at holy sites from the 4th century CE through the 14th. The course will focus primarily on how those relationships structured viewers’ experiences of the divine by understanding how works functioned for specific audiences in a particular spatial context. In reviewing the origins and transformations of Christian visual culture we will investigate how site-specific image production in Western Europe and Byzantium informed social and political relations; how theological problems related to image worship affected the form and content of the visual arts; and how developments in public and private devotion altered the spaces for imagistic display.
Instructor(s): C. Lakey
Area: Humanities.

Survey of Early Christian and medieval art and architecture in North Africa, with an emphasis on indigenous developments and cultural exchange in the Mediterranean world, 4th to 13th century. Dean’s Teaching Fellowship course.
Instructor(s): N. Dennis
Area: Humanities.

**AS.010.256. Nineteenth-Century European Art.**
A selective survey of European painting and sculpture from the French Revolution to the start of the First World War. The nineteenth century ushered in an era which saw political instability, industrialization, imperialism, and the growth of popular culture come to bear on the very conditions of art-making. Focusing on key moments in this history, the course aims to recover the real intensity and strangeness of art’s involvement with modernity. Topics include neo-classicism; art and revolution; the rise of landscape; the triumph of the bourgeoisie; the gendering of art; and the birth of the avant-garde.
Instructor(s): J. Melius
Area: Humanities.

**AS.010.263. Paris / New York After the War.**
This course introduces the developments in art after World War II, in both Paris and New York, and studies how certain sensibilities overlapped and intersected as the two cities vied to be the international center of modern art. Recommended Course Background: AS.010.102
Prerequisites: AS.010.102
Instructor(s): J. Watson
Area: Humanities.

**AS.010.264. Twentieth-Century Art in Europe and the United States.**
A critical survey of the major artistic movements, paradigms, and documents of twentieth-century art in Europe and the United States. Topics will include: abstraction, collage and assemblage, art and politics, traditional and new media. Among the artists: Picasso, Matisse, Malevich, Pollock, Judd, and Hesse. Writing assignments will include a close analysis of a work in a local collection such as the Baltimore Museum of Art, the Hirshhorn Museum and Sculpture Garden, or the National Gallery of Art.
Instructor(s): M. Warnock
Area: Humanities.

**AS.010.275. Impressionism: Cone Collection.**
Cross-listed with History of Art. This course offers an introduction to the Cone Collection, a world-class selection of Impressionist and Post-Impressionist paintings acquired by two sisters. We will explore the development of radical new painting styles in tandem with the evolution of collecting and display practices that emerged in Baltimore and in Paris at the turn of the century. Visits to the Walters, the BMA, and the Sheridan Rare Book Collection will supplement our study of Monet, Cezanne, Matisse, and more.
Instructor(s): K. Johnson
Area: Humanities.

**AS.010.291. Architectural History of Baltimore.**
Focusing on Baltimore’s built environment and drawing upon primary sources, this course will explore the major European and American design theories, values, and practices of the last several centuries with an eye towards establishing Baltimore’s place within a national and global urban environmental context. Topics addressed in this course include city building, class and race, architectural revivalism, transportation, urban renewal, and post-industrialism.
Instructor(s): M. Perschler
Area: Humanities.

**AS.010.300. Michelangelo and His Contemporaries: Liscense, Controversy, and Reform in 16th Century Italian Art.**
An approach to the later work of Michelangelo (ie. 1520-64) and the response to his art by writers and artists in Rome, Florence and the Veneto before and after the call for a “reform of art” by the Council of Trent.
Instructor(s): S. Campbell
Area: Humanities.

**AS.010.301. Art and Interactions in the Eastern Mediterranean from 2000-500 BCE.**
The Mediterranean Sea has always acted as a connector for the many great civilizations that flourished around its shores. From 2000 to 500 BCE, these interactions were particularly dynamic, resulting in a diversity of arts including painting wall frescoes, precious jewelry, and elaborate furnishings and weaponry. This course examines the arts of the interactions among the Egyptians, Near Easterners, and Greeks, considering the role of artistic products in intercultural relations.
Instructor(s): M. Feldman
Area: Humanities.

**AS.010.302. The World as Image: Art and Knowledge in the Middle Ages.**
This class will explore the relationship between art and knowledge in the Middle Ages (600-1400 CE). In particular, we will examine the ways in which medieval painters, sculptors, and architects engaged with the cultural phenomenon of “encyclopedism” by creating artworks that sought to capture all the world’s knowledge in a single visual program. In our exploration of this topic we will consider a wide range of works, from medieval maps and scientific manuscripts to large-scale tapestries and the architectural programs of the great Gothic cathedrals. Central themes include text-image relationships and the role of pictorial techniques, such as allegory, personification, and analogy for visualizing complex ideas. We will also examine the representation of knowledge in medieval poetry and see how medieval authors employed ekphrasis to create visual artworks within their texts to serve as placeholders for encyclopedic learning.
Instructor(s): M. Hauknes
Area: Humanities.
AS.010.303. Flavian Art, AD 69-96.
This course investigates Roman art and architecture during the Flavian age, in Rome and in the provinces of the empire. With the Flavians, the capital of the empire enjoyed a period of intense building activity; the great projects of Vespasian and Domitian radically transformed its image. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting, epigraphy and literary sources) to reconstruct the built environment of Rome and other towns (Pompeii, Herculaneum, etc).
Instructor(s): P. Tucci
Area: Humanities.

AS.010.304. Pictures on Walls: Murals and Mosaics in the Byzantine and Medieval Worlds.
This course examines the development monumental mosaic and fresco in the medieval Mediterranean (ca. 250-1300), through key monuments in places like Constantinople, Thessaloniki, Cyprus, Palermo, Rome, and Venice.
Instructor(s): M. Hauknes
Area: Humanities.

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the “global South.” This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of “global modernism.”
Instructor(s): R. Brown
Area: Humanities.

AS.010.306. Program Abroad: Renaissance Art in Florence.
Intersession Abroad Program. The course examines Renaissance art in Italy from the 13th through 16th centuries.
Instructor(s): A. Letvin
Area: Humanities.

The development of archaeology in the Middle East – its history of explorers, diplomats, missionaries and gentlemen-scholars – profoundly shaped the modern world, from the creation of new museums and the antiquities market to international relations and terrorism.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.308. Art and Architecture in Republican Rome.
The course investigates the influence of the Hellenistic world on Roman artists, architects and patrons during the Republican age (509-31 BC).
Instructor(s): P. Tucci
Area: Humanities.

AS.010.309. Gifts and Thefts in the Middle Ages.
Why were some medieval objects valued as gifts, others appropriated as spolia, and still others taken by force? How does transferring objects from one cultural context into another change their meaning? Western, Byzantine, and Islamic art, 6th-13th centuries.
Instructor(s): R. Danford
Area: Humanities.

AS.010.310. The 'Long Sixties' in Europe.
Emphasis will be on advanced artistic practice primarily in France, Italy, the Benelux, and German-speaking countries; students will curate an exhibition of avant-garde journals from the Sheridan Libraries.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.311. Japanese Print Culture and Western Collecting.
The first half of this seminar will examine issues in Japanese print culture, especially the development and circulation of ukiyo-e prints, during the Edo and Meiji periods (1615-1912). Topics will include technological innovations, the role of publishers, censorship, and prints as didactic objects. The second half of the course will explore the popularity of Japanese prints in the West, including their impact on Japonisme and incorporation into Western collections Cross-list with East Asian Studies
Instructor(s): H. Snow
Area: Humanities.

AS.010.312. Surrealism.
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA.
Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.314. The Great Debate on Images: from Zurich to Guadalupe.
Images became a central topic of debate at the time of the Protestant Reformation. Images were not only a topic of doctrinal discussion, but also a target for desecration and destruction. The response to Iconoclasm on the Catholic side of this divide was also intense before, during and after the Council of Trent (1547-63), leading to a reconsideration of images’ role in an economy of the sacred. But the geography of this debate was not limited to Europe: the evangelization of the New World constituted a new scenario in which previous arguments and doctrinal positions were challenged under completely different circumstances. The Great Image Debate is not only a crucial episode of history, but it is also an argument reflecting on the nature of images and their paradoxical contribution to the Early “modern” world. This course is geared towards students with interests in History, Art History and Anthropology.
Instructor(s): F. Pereda
Area: Humanities.

AS.010.315. Art of the Assyrian Empire, 1000-600 BCE.
The Assyrian Empire dominated the ancient world from 1000-612 BCE, stretching from Iran to Egypt and laying the foundation for the later Persian and Macedonian empires. With imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This course provides an integrated picture of the imperial arts of this first great empire, situating it within the broader social and political contexts of the first millennium BCE.
Instructor(s): M. Feldman
Area: Humanities.
This course is an investigation into the fashioning of Venetian identity in architecture and the visual arts, with a particular address to the encounter with Byzantine and Islamic traditions and exchanges with other centers of the Italian peninsula.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.318. Art in Italy, 1200 - 1500.
This course will offer a selective, chronological exploration of the art of the Italian peninsula from the late Middle Ages through the first century of the Renaissance. Our primary concern will be to examine stylistic developments in architecture, painting, and sculpture during a profound period of political, economic, and social changes. Select topics will include: the role of the Communes as patrons of art; the rise of Humanism and its influences on the arts; the development of perspective theory; the lure of classicism in both the Middle Ages and the early Renaissance; the rise of the artist. Readings will include both primary and secondary sources.
Instructor(s): C. Lakey
Area: Humanities.

Discusses political and religious contexts in the Middle East, where specific territories (Jerusalem) were claimed by all three monotheistic religions for cult practices. Resulting conflicts influenced Jewish, Medieval, and Islamic art and architecture in the region.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.320. Art of Colonial Peru.
The visual arts of viceregal Peru (16th-18th c) are considered in historical context. Religious orders, art schools, artisan guilds and cofradia are examined as are the social and political implications of art patronage.
Instructor(s): L. Deleonardis
Area: Humanities.

Pompeii, buried by the eruption of Mons Vesuvius in AD 79, offers the best evidence of everyday life in the Roman world. The course examines its public buildings and houses, as well as the main villas outside the city walls. A final paper will be required.
Instructor(s): P. Tucci
Area: Humanities.

The book was the primary source for the collection of knowledge in the Middle Ages. It was also the medium for the preservation and proliferation of the texts that underlay the three monotheistic religions (Judaism, Christianity, Islam). Finally, the book served as a source for elite entertainment, perhaps most importantly in Late Antiquity and the later Middle Ages. This course investigates the role of the illustrated book within the political, religious, and artistic developments that took place after the rise of Christianity from the end of the Roman Empire until the early modern period in the medieval West and in Byzantium, permeating Jewish and Islamic traditions. We will examine how the different types of books, such as horizontal and vertical scrolls, large and miniature size codices influenced the placement, conception, and style of the illustrations. The course also addresses processes of manufacture, issues of materiality (i.e. precious multimedia book covers, papyrus, parchment, paper), and the relationship between text and image. A major aspect of the seminar focuses on the performative aspect of the book in its wide range of functions: secular and liturgical, public and private. Students will be able to work first hand with manuscripts and facsimiles from the rare book collection of Eisenhower Library and the Walters Art Museum.
Instructor(s): N. Zchomelidse.

AS.010.324. Art and Architecture in the Augustan Age.
Investigates Roman art and architecture during the Augustan age (31 BC – AD 14). Augustus’ cultural program influenced many aspects of Roman life, leading to the creation of a new visual language that transformed Roman society. Methodologically, the focus will be on the integration of diverse sources to reconstruct and discuss the images and the built environment of the Augustan age.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.325. Performance Art in America and Europe: 1909 to Present.
This course surveys the development of performance art in the twentieth- and twenty-first centuries. We will explore the evolution of performance as a medium: the ways performance artists have engaged questions of race, gender, and sexuality; shifting relationships between performance and work in other media; and theories of performance. We will also examine the special challenges that attend the study of ephemeral and time-based art. There will be a final paper.
Instructor(s): K. Markoski
Area: Humanities.

With over 1,800 works attributed to him, Francisco de Goya (1746-1828) was constantly inventing, experimenting, and pushing the limits of the representable. This course will begin by examining Goya’s printed oeuvre as one possible itinerary for studying his life and work. The second half of the course will consider alternative narratives for Goya’s career based on genre and theme. Topics will include portraiture, madness, religious painting, and the discovery of Goya by later generations of artists, authors, and filmmakers. The course includes several visits to the print room at the Baltimore Museum of Art. There will be a final paper.
Instructor(s): A. Letvin
Area: Humanities.
AS.010.327. The Harem and the Veil: Space and Gender in the Islamic World.
This course explores the constructed imagery of the harem and the veil in relation to politics and visual culture in the Middle East, North Africa, India, and Euro-America. Topics will include: Ottoman palace architecture, Orientalist painting, mandating/banning the veil, Islamic feminisms. We will address visual culture broadly, including advertising, architecture, contemporary art, film, news media.
Instructor(s): R. Brown
Area: Humanities.

AS.010.328. The Holy Undead: Relics, Reliquaries, and the Cult of Saints in Medieval and Early Modern Europe.
According to medieval Christian theology, the saints resided in both the earthly and heavenly spheres and would often bridge this gap in order to interact with the living. Their bodily remains and possessions were powerful sites of potential contact between the sacred and profane. Through their relics, saints could straddle the two realms in order to heal, intercede, perform miracles, or even exact punishment. Images of relics, reliquaries, miraculous images, and the like helped to narrate, authenticate, or negotiate transactions between the devotee and the divine. This course will provide students with a historical overview of the medieval cult of saints and relics, focusing primarily on the ways in which images could invest these sacred objects and bodily remains with power and meaning.
Instructor(s): T. Golan
Area: Humanities.

AS.010.331. Art, Knowledge and Power in Global Perspective, 1500-1700.
This course reexamines renaissance and baroque art in a global perspective, emphasizing race, gender, and international exchange in the sixteenth and seventeenth centuries and drawing extensively on the Walters’ collection.
Instructor(s): H. Friedman
Area: Humanities.

AS.010.333. The Making of Renaissance Rome 1300-1600.
The multiple identities of the ancient city as these are understood and represented through the work of artists such as Giotto, Filarete, Raphael, Bramante, and Caravaggio; the writings of Petrarch, Pius II, Alberti, and Montaigne; the statecraft and patronage of the Renaissance popes
Instructor(s): S. Campbell
Area: Humanities.

AS.010.334. Problems in Ancient American Art.
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS and Program in Museum and Society
Instructor(s): L. Deleonardis
Area: Humanities.

Explores the major painters working in the Low Countries during the fifteenth century: Melchior Broederlam, the Master of Flémalle, Jan van Eyck, Rogier van der Weyden; Hans Memling, Hugo van der Goes, Hieronymus Bosch, and others.
Instructor(s): M. Merback
Area: Humanities.

A close look at how the ancient Greek, Roman and Jewish worlds were imagined and reconstructed by early Renaissance scholars, poets, warlords and artists.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.348. Art and Faith in Golden Age Spain.
Introduction to Spanish painting and sculpture of the XVth and XVIth centuries, with special focus on religious art.
Instructor(s): F. Pereda
Area: Humanities.

This course examines the art and architecture of East, South, and Southeast Asia produced since the mid-twentieth century. We will engage with theoretical, visual, and political developments in the recent art of this region, reading statements by artists and architects, discussing the rising commercial and international profile of contemporary Asian art, and exploring established and emerging art histories of this period. Cross-list with East Asian Studies
Instructor(s): R. Brown
Area: Humanities.

AS.010.353. Key Moments in East Asian Politics & Visual Culture.
Examines key political moments in China, Japan, and Korea from 1850 to the present, focusing on the way visual imagery shapes these events. Includes: Japanese occupation of Korea, Hiroshima and Nagasaki bombings, 1989 Tiananmen square protests, North Korean propaganda.
Instructor(s): R. Brown
Area: Humanities.

This course investigates the Romans’ reception of Greek and Hellenistic art and architecture, as well as Rome’s original contribution during the republican and imperial age. Its goal is to examine the effects of Hellenization on Roman society and the creation of a completely new visual language.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.360. Medieval Art in Europe: Methodology, Historiography, Theory.
The course explores the conceptual character of medieval European art from Late Antiquity to the end of the Middle Ages with an emphasis on methodological, historiographical, and theoretical issues. Using selected monuments and objects from a wide geographical range and dating from the 4th to the 14th centuries as case studies, students will also familiarize with the methodological developments of art historical research. The course will focus in particular on the “anthropological turn” of medieval art history and medieval image theory.
Instructor(s): N. Zchomelidse
Area: Humanities.

“Babylon - the name resonates, from the Biblical whore of Revelations to sci-fi. But what do we really know about the ancient city and its civilization?”
Instructor(s): M. Feldman
Area: Humanities.
AS.010.365. Art of the Ancient Andes.
The visual arts of Andean South America and their respective cultural contexts form the basis of this seminar. Collections study in museums.
Instructor(s): L. Deleonardis
Area: Humanities.

The works of Native American artists are examined and discussed in their respective social and historical contexts. Such works include Hopewell stone sculpture, Mimbres pictorial painting, and Tlingit guardian figures. We examine the concept of sacred landscape through analysis of monumental earthworks and effigy mounds, Anasazi architecture, and rock art. In conjunction with the Baltimore Museum of Art (BMA), and Johns Hopkins Special Collections, students will have access to collections for study.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.370. History of Art: Histories, Methods, Theories.
This course will be a short introduction to the construction of the discipline and to the different methodologies developed in the analysis of works of art, as a way to understand the basic challenges faced today by Art History.
Instructor(s): F. Pereda
Area: Humanities.

This course addresses what is arguably the most significant moment in the history of American art: Abstract Expressionism. By looking closely at the careers of four painters from this period – Willem de Kooning, Mark Rothko, Barnett Newman and Jackson Pollock – we will explore both larger issues relevant to this crucial and controversial moment in art history and topics specific to the work of each of these pillars of American abstract art.
Instructor(s): K. Tuma
Area: Humanities.

AS.010.389. The Stone and the Thread.
This course examines the built environment of the Inka and considers architecture in its social, historical, and cultural contexts. Shared forms and ideas implicit in the fiber arts offer comparative points for analysis and discussion.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.398. Tombs for the Living.
Centering on the tomb as the unit of analysis, this course examines the cultural and material aspects of death and funerary ritual. Draws on case studies from North America, Mesoamerica, and the Andes. Collections study in museums.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.400. Looking at Language: Vision and Textuality from Surrealism to the Present.
Considers the emergence of the “written painting” and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Liglon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.401. Early Modern Vision and Artistic Practice.
This seminar examines shifting theories of vision in making and perceiving art from species and the Eucharist to Vermeer and the camera obscura.
Instructor(s): C. Fowler
Area: Humanities.

AS.010.402. Ancient Art in Fascist Italy.
The course examines the role played by Roman art and architecture during the twenty years of the Fascist regime (1922-1943). There will be a final paper.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.403. Art and Science in the Middle Ages.
This course investigates the intersections of art and science from the Carolingian period through the fourteenth century and the historical role images played in the pursuit of epistemic truths. Science – from the Latin scientia, or knowledge – in the Middle Ages included a broad range of intellectual pursuits into both the supernatural and natural worlds, and scholars have classified these pursuits in various ways (i.e. experimental or theoretical science, practical science, magic, and natural philosophy). A particular focus of this seminar will be placed on the assimilation of Greek and Islamic scientific advances in cartography, cosmology, and optical theory into the Latin theological tradition.
Instructor(s): C. Lakey
Area: Humanities.

AS.010.404. The Cult Image in the Renaissance.
This course discusses the role of cult images in the Renaissance period. While art historical scholarship has regarded images of cult as a medieval phenomenon, more recent studies (Holmes, Pon) address precisely the fact that image cults multiplied in line with the development of new aesthetic principles and theories of art in the context of the humanist circles in early modern Italy. The class challenges the idea of a division between the era of images and that of art as proposed by Hans Belting some 25 years ago. We investigate the emergence of a variety of new types of images made for public cults, such as wall paintings, prints, wooden sculpture, feathers, and their architectural and urban settings. How did the medieval tradition of the icon merge with the scientific and humanistic achievements of the early modern period? Moreover, we will examine the proliferation of cult images from Italy to other parts of Europe and beyond, such as the Americas and Asia, where the conception of new such images drew heavily on indigenous artistic and religious practices. There will be a final paper. Course is co-listed with AS.010.616.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.405. Depicting the Invisible God in the Middle Ages.
Discusses conditions of medieval image making and theory. Each meeting focuses on how to represent God in the visual arts and introduces iconographic concepts and their reception.
Instructor(s): N. Zchomelidse
Area: Humanities.
Centering on a series of case studies, this course addresses the technology, aesthetics, and social significance of metals. We trace the development of metals from 1500 BCE in Chile and Peru, to the 16th century in Colombia and central Mexico, pausing to examine its forms and meanings in various cultural contexts, and the ideas that inform its value. In conjunction with the Baltimore Museum of Art (BMA), the Walters Art Museum (WAM), and the Johns Hopkins Archaeology Museum (JHUAM), students will have access to ancient metal works for study.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.408. Venetian Art and the Mediterranean 1440-1560.
How Venetian art 1450-1580 was informed by the city’s unique ecological environment and its status as a nexus of cultural interaction in the Mediterranean. Emphasis on recent scholarship.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.410. The Epistemology of Photography.
This seminar will ask how photography produces ways of knowing: how does photography’s reality-effect shape its dissemination and absorption? Is photography’s emergence during the colonial era coincidental or catalytic? How is memory (re)constituted in a photography-saturated world? What kinds of histories does photography encourage and discourage? Is a photograph an object? We will read across disciplines (literature, anthropology, history, history of art, political science, theory) to investigate the epistemology of photography and the photograph.
Instructor(s): R. Brown.

This course examines Chinese painting between 1400 and 1800, a time when this art emerged as both a practice and a means of cultural analysis within Chinese society. Changes in both representational modes and the forms of art-historical consciousness, as reflected in the art criticism of Chinese literati, will be emphasized. Other topics include the shaping of lived environments through interior display, garden-building, and new visions of urban space.
Instructor(s): L. Liu.

AS.010.412. The Art of Describing.
Limited to Seniors only (Juniors with permission). This writing-intensive course explores the complex role of description in the analysis and interpretation of works of art. This course explores the role of description in the analysis and interpretation of works of art. Emphasis will be placed on texts by twentieth-century authors, though not exclusively on twentieth-century subject matter. Our primary focus will be the use of different rhetorical strategies to meet the formidable challenge of “translating” visual phenomena into language.
Instructor(s): K. Tuma
Area: Humanities.

Form forever follows function,” “the house is a machine for living in,” “less is more,” “less is a bore”—when and where on earth did these architectural catch phrases originate, and what did they mean to the people who coined them and attempted to express them in their designs for buildings? In this course we will study the major architectural theories and design trends of the late 19th and 20th centuries in Europe and the United States—a turbulent and complicated period in the history of architecture commonly known as Modernism and Postmodernism. Topics and personalities addressed in this course will include Expressionism, the Bauhaus, Le Corbusier, urbanism, functionalism, and Frank Lloyd Wright.
Instructor(s): M. Perschler
Area: Humanities.

AS.010.415. Passion Cult, Passion Image, Passion Drama.
A set of interdisciplinary explorations of the Passion of Christ theme, viewed as a mythic paradigm within European visual culture, religious consciousness and cultic practice since the High Middle Ages.
Instructor(s): M. Merback
Area: Humanities.

AS.010.422. Early Modern Dutch and Flemish Painting.
Explores the major painters and printmakers working in the Netherlands during the sixteenth and early seventeenth centuries: Pieter Brueghel, Jan Gossaert, Pieter Aertsen, Peter Paul Rubens, Jan Steen, Jan Vermeer, and many others.
Instructor(s): M. Merback
Area: Humanities.

AS.010.423. Roman Sculpture.
The course examines all the major public and private monuments, in Rome and in the provinces, from the Republican age to the end of the Roman empire. It considers their cultural, political, and social contexts, and of course the original architectural setting. New light is shed on the reception of statuary and reliefs by the Roman viewer, using primary texts as well as the sculptures themselves. The course illustrates the different types of sculpture that an ancient Roman would have encountered, explaining the nuances of meaning in the different words used by Roman and Greek authors in their descriptions. Sculpture was an integral part of Roman life: indeed the Romans placed statues and reliefs in their houses, villas, gardens, and tombs, as well as in their temples and public buildings. While Rome remains a focus for the course, western and eastern provincial examples are also offered to help further understand the role of Roman sculpture. May also be used as credit toward the Archaeology major. Cross-listed with Classics.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.424. Collecting Roman Art: From Antiquity to Present.
A survey of the most important collections of Greek and Roman sculpture, from the late-Republican age through the Middle Ages and the Renaissance, until the creation of the main museums in Europe and in the United States.
Instructor(s): P. Tucci
Area: Humanities.
AS.010.430. History of Roman Art and Architecture.
This course explores the principal forms and contexts in which art and architecture developed in the Roman world. It surveys Roman art and architecture from the foundation of the city of Rome - against the background of the Etruscan tradition - to the divergent trends of late antiquity, including the intersection between Rome and the provinces of the empire. Overall the course encourages critical thinking about the purpose of studying art and architecture as a tool for understanding the Roman world, and provides an introduction into how to use visual and material evidence as a historical source. On completion of this course students will be able to describe and evaluate the architectural style and decorative of key Roman monuments, as well as their function in ancient society. Cross-list with Classics
Instructor(s): P. Tucci
Area: Humanities.

AS.010.431. History of Art: Histories, Methods, Theories.
This course will be a short introduction to the construction of the discipline and to the different methodologies developed in the analysis of works of art, as a way to understand the basic challenges faced today by Art History.
Instructor(s): F. Pereda
Area: Humanities.

AS.010.433. Sculpture and the Embodied Viewer.
This seminar serves as an introduction to reading and writing about visual experience. Our primary focus will be on the relationship between embodied viewers and the art of sculpture broadly defined. By exploring the art of sculpture in all of its historical forms, from the ancient to the contemporary we will investigate the experiential and spatial challenges sculpture poses in order to develop the necessary analytic skills for understanding and interpreting the visual arts. We will combine on-site studies of sculptures in local collections (including the Walters Art Museum, the Baltimore Museum of Art, and public works in Baltimore and on campus) with the development of a critical vocabulary with which to write about sculptural objects, one that draws on the critical histories of sculpture from the birth of art history to the present day.
Instructor(s): C. Lakey
Area: Humanities.

AS.010.440. Velázquez and 17th Century Spanish Naturalism.
An introduction to Spanish Baroque painting, with specific attention to the emergence of naturalism in the work of Diego Velázquez, Francisco de Zurbarán, Murillo and Ribera. This course is open to graduate students.
Instructor(s): F. Pereda
Area: Humanities.

AS.010.445. Topics in Postwar European Art.
This seminar examines aspects of artistic production in Western Europe primarily in the period 1950-1972, with an emphasis on the art of France, Italy, the Benelux, and German-speaking countries. How was the work of art reimagined and repositioned in the wake of World War II and the horrors of the Holocaust, in the context of reconstruction and an emerging consumer society, and in light of the Cold War? How did postwar artists conceive the claims of artistic tradition and painting in particular in a rapidly expanding field of aesthetic practices and possibilities? Is there such a thing as “European art,” and if so, how does it relate to or mediate among various national identities? These and related questions will be at the heart of our discussions.
Instructor(s): M. Warnock
Area: Humanities.
AS.010.470. Power and Politics in Assyrian Art.
Assyria, centered in northern Iraq, created one of the world’s first great empires that dominated the ancient Near Eastern world from around 900 to 612 BCE. In concert with imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This seminar examines the close relationship between the arts and politics in the Assyrian empire. Some themes that will be explored are: historical narrative, text and image, portable luxury arts and gender, politics and religion. The course will engage in close visual analysis of the ancient materials and readings of critical scholarship.
Instructor(s): M. Merback
Area: Humanities.

AS.010.481. Classics of Art Criticism.
Readings by Diderot, Baudelaire, Fry, Greenberg.
Instructor(s): M. Fried
Area: Humanities.

AS.010.501. Independent Study.
Instructor(s): Staff.

AS.010.502. Independent Study.
Instructor(s): Staff.

AS.010.503. Reading Course in History of Art.
Open to students by arrangement with a faculty advisor in the History of Art Department.
Instructor(s): M. Merback
Area: Humanities.

Open to students by arrangement with a faculty advisor in the History of Art Department. Interested students should review the program description available in the department office.
Instructor(s): Staff.

Instructor(s): Staff.

AS.010.570. Independent Study - Intersession.

AS.010.575. Internship-Intersession.

AS.010.596. Internship-Summer.
Instructor(s): E. Rodini; K. Tuma; M. Koortbojian; P. Tucci; R. Brown.

AS.010.597. Independent Study-Summer.
Instructor(s): L. DeLeonardis; M. Koortbojian; S. Campbell.

AS.010.600. Looking at Language: Vision and Textuality from Surrealism to the Present.
Considers the emergence of the “written painting” and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Ligon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.

This seminar examines shifting theories of vision in making and perceiving art from species and the Eucharist to Vermeer and the camera obscura.
Instructor(s): C. Fowler
Area: Humanities.

The course explores the significance of the Severan marble plan of Rome and its potential to shed new light on the building program of Septimius Severus and Caracalla.
Instructor(s): P. Tucci.

AS.010.603. The Active Body: On Display and in Performance.
An examination of two recent developments in art history and museum studies: the recognition of the object as active and agentic and a growing critical engagement with the body of the artist and performance art. The seminar will unsettle these two themes with the history of living humans on display, from nineteenth-century exhibitions to present-day craftspeople, thinking through bodies, objects, and performance through disciplinary engagements from anthropology, political theory, art history, and museum studies. Open to motivated undergraduates.
Instructor(s): R. Brown
Area: Humanities.

AS.010.604. The Five Senses and Art in Pre-Modern Europe (1100-1500).
The course investigates the importance of sensation in the creation and perception of Medieval and Renaissance art. Starting from the premise that sensation is a cultural phenomenon, this seminar invites students to rethink the relationship of the visual and the textual to the nonvisual and the non-textual. Open to advanced majors in History of Art by permission.
Instructor(s): M. Bagnoli; N. Zchomelidse.

This course examines Chinese painting between 1400 and 1800, a time when this art emerged as both a practice and a means of cultural analysis within Chinese society. Changes in both representational modes and the forms of art-historical consciousness, as reflected in the art criticism of Chinese literati, will be emphasized. Other topics include the shaping of lived environments through interior display, garden-building, and new visions of urban space.
Instructor(s): L. Liu.

AS.010.606. Sculpture After Sculpture.
A survey of major theories of sculpture from the mid-Twentieth Century to the present day. Through close readings of critical texts, we will consider the following nexes of debate: late modernism; minimalism; land art and the alleged dispersion of sculpture as an autonomous medium; site-specific and mobile site sculpture; giganticist sculpture; and the resurgence of a conventional sculpture of bodily proportion during the last fifteen years after sculpture as a medium was declared obsolete: a sculpture “after” sculpture. Readings: Writings by Henry Moore, Herbert Read, Clement Greenberg, Michael Fried, Donald Judd, Robert Morris, Robert Smithson, Rosalind Krauss, Yve-Alain Bois, Douglas Crimp, Hal Foster, Alex Potts, Miwon Kwon, and George Baker.
Instructor(s): J. Meyer.
AS.010.607. The Epistemology of Photography.
This seminar will ask how photography produces ways of knowing: how does photography’s reality-effect shape its dissemination and absorption? Is photography’s emergence during the colonial era coincidental or catalytic? How is memory (re)constituted in a photography-saturated world? What kinds of histories does photography encourage and discourage? Is a photograph an object? We will read across disciplines (literature, anthropology, history, history of art, political science, theory) to investigate the epistemology of photography and the photograph.
Instructor(s): R. Brown.

AS.010.608. The Picture as Object.
This seminar will explore cases of Italian pre-modern picture-making in various media (painting, metal, stone, textile, etc) that solicit tactile as well as sensory engagement, and that call into question the "Albertian" metaphor of pictura as window. Case studies will include mosaics, reliefs, pastiglia, medals, portable paintings, and works by Giotto, Carlo Crivelli, and Sebastiano del Piombo, among others.
Instructor(s): C. Lakey; S. Campbell.

AS.010.609. Art and Science in the Middle Ages.
This course investigates the intersections of art and science from the Carolingian period through the fourteenth century and the historical role images played in the pursuit of epistemic truths. Science – from the Latin scientia, or knowledge – in the Middle Ages included a broad range of intellectual pursuits into both the supernatural and natural worlds, and scholars have classified these pursuits in various ways (i.e. experimental or theoretical science, practical science, magic, and natural philosophy). A particular focus of this seminar will be placed on the assimilation of Greek and Islamic scientific advances in cartography, cosmology, and optical theory into the Latin theological tradition.
Instructor(s): C. Lakey
Area: Humanities.

AS.010.610. Image, Theory, Matter in Medieval Visual Culture.
This seminar considers the relationship between foundational approaches to medieval art history and recent methodologies that focus on ‘thing-signification.’ Primary materials in local collections will be closely analyzed.
Instructor(s): C. Lakey

AS.010.611. Selected Topics in Near Eastern Art.
Topics to be determined.
Instructor(s): M. Feldman.

AS.010.612. Medieval Image.
From a careful reading of significant works of art, contemporary texts bearing on images, and modern theoretic writings, the seminar investigates the function of narratives, icons, physical matter, and accompanying texts in the production of meaning.
Instructor(s): H. Kessler.

AS.010.613. Questions of Artistic Geography in Italy, 1400-1600.
A consideration of the role of place in the art of Lorenzo Lotto, Gaudenzio Ferrari, Cesare da Sesto, Romanino, Moretto, Pordenone, Titian, and other artists active before the canon-formation enterprise of Giorgio Vasari definitively altered the map of Italian art after 1550. Also open to advanced undergrads.
Instructor(s): S. Campbell.

Critical exploration of the major models developed by art historians to describe the forms of attention mobilized by visual imagery, the role of the beholder in realizing meaning, the dynamics of response, and the reflexivity of works of art. Intersections with literary history and theory, phenomenology, and reception-aesthetics will be examined in tandem with art-historical case studies. Authors include Riegl, Benjamin, Gombrich, Baxandall, Kemp, Fried, Crary, Husserl, Iser, Jauss, Merleau-Ponty, Foucault, Barthes, Deleuze and Guattari.
Instructor(s): M. Merback.

AS.010.615. The Reform of the Image in Catholic Europe 1500-1600.
Aspects of the reform of art in Italy and Spain, as manifested in official attempts to discipline artistic practice and through artistic initiatives; emphasis on primary sources and recent scholarly debates.
Instructor(s): F. Pereda; S. Campbell.

AS.010.616. The Cult Image in the Renaissance.
This course discusses the role of cult images in the Renaissance period. While art historical scholarship has regarded images of cult as a medieval phenomenon, more recent studies (Holmes, Pon) address precisely the fact that image cults multiplied in line with the development of new aesthetic principles and theories of art in the context of the humanist circles in early modern Italy. The class challenges the idea of a division between the era of images and that of art as proposed by Hans Belting some 25 years ago. We investigate the emergence of a variety of new types of images made for public cults, such as wall paintings, prints, wooden sculpture, feathers, and their architectural and urban settings. How did the medieval tradition of the icon merge with the scientific and humanistic achievements of the early modern period? Moreover, we will examine the proliferation of cult images from Italy to other parts of Europe and beyond, such as the Americas and Asia, where the conception of new such images drew heavily on indigenous artistic and religious practices. There will be a final paper. Co-listed with AS.010.404
Instructor(s): N. Zchomelidse
Area: Humanities.

Beginning with the anti-colonial and popular art of the turn of the nineteenth century, the seminar will address the subcontinent’s participation in modernism, interrelations between “high” and “vernacular” art, appropriations of spirituality, critical engagements with sexuality and feminism, and experimentations with film, performance, and new media into the 21st century. Questions related to nationalism, modernity, postcoloniality, religio-political conflict, commercialization, international biennials, and globalization. Note: Course will engage with Raqs Media Collective’s spring campus residency. Seminar is open to motivated undergraduates.
Instructor(s): R. Brown.

AS.010.631. Art, Science and Representation in the Middle Ages.
This seminar investigates the relationship between art, science, and theories of representation from the late antique period through the fourteenth century. Select topics include illuminated cosmological and astronomical manuscripts; Islamic cartographers and astronomers at the court of Roger II in Palermo; the rise of optical theory and scientific representation; and the intersection of diagrammatic and mimetic theories of images.
Instructor(s): C. Lakey.
AS.010.635. Art and Representation in Nineteenth Century Peru.
Permit required Graduate, nineteenth-century Peru, nationalism, visual sources and interpretation
Instructor(s): L. Deleonardis.

AS.010.641. Return of the Sixties.
The period of the Sixties and early Seventies has emerged as a central preoccupation of art and art history in recent years. The Sixties witnessed the conclusion of modernism and utopic aspirations, of radical politics and the counterculture. It also ushers in contemporary forms of mediation, consumption, and mobility. This course will examine the art of Sixties return, and narratives of art since the Sixties. Topics will include the Sixties as history, memory, and nostalgia; the monumentalization of entropy (the “return” of Robert Smithson); the artist-traveler from Ed Ruscha to Francis Alys; and the reappearance of sculpture as medium after its alleged dispersion. We will consider works by Francis Alys, Matthew Buckingham, Gerard Byrne, Tom Burr, Tacita Dean, Sam Durant, Olafur Eliasson, Felix Gmelin, Renée Green, Mary Kelly, Kerry James Marshall, Mike Nelson, Philippe Parreno, Charles Ray, Mark Tribe, and Kelley Walker, among others. This class is led by James Meyer, Associate Curator of Modern and Contemporary Art, National Gallery of Art. Will meet with 010.469.
Instructor(s): J. Meyer.

Area: Humanities
Writing Intensive.

This seminar examines the notion of the authentic in conjunction with medieval images. It investigates the construction, reception, and theoretical grounding of authenticity in regard to reliquaries, icons, and imprints on cloth or seals. These objects elucidate the shift from mimetic towards other artistic strategies (stylization, abstraction, bricolage) in the medieval period. Rather than studying different modes of representation, we will focus on the very validity of representation in the Middle Ages.
Instructor(s): N. Zchomelidse.

When (and where) was modernism? Acknowledging the central role art from around the globe played in the production of the modern, this seminar will engage with the emergent art historical, methodological, and theoretical literature shaping the history of modern art after its alleged dispersion. We will consider works by Francis Alys, Matthew Buckingham, Gerard Byrne, Tom Burr, Tacita Dean, Sam Durant, Olafur Eliasson, Felix Gmelin, Renée Green, Mary Kelly, Kerry James Marshall, Mike Nelson, Philippe Parreno, Charles Ray, Mark Tribe, and Kelley Walker, among others. This class is led by James Meyer, Associate Curator of Modern and Contemporary Art, National Gallery of Art. Will meet with 010.469.
Instructor(s): R. Brown.

AS.010.647. Velázquez: Painting and the Paradoxes of Representation.
This seminar will focus on the work of Diego Velázquez (1599-1660). Following a chronological order, it will explore his work as a continuous testing of the limits of truth in painting, beginning in Seville in the 1620’s and concluding with Las Meninas. The seminar will look into the practice and theory of Naturalism in Spain in relation to artistic, religious and scientific discussions of representation in Baroque Europe.
Instructor(s): F. Pereda.

AS.010.649. Mantegna and Bellini: painting and art theory 1450-1500.
Mantegna’s and Bellini’s work will be considered in the context of humanist and antiquarian culture of Padua, Venice and Mantua.
Instructor(s): S. Campbell.

AS.010.651. The Reception of Roman Art in the Middle Ages and in the Renaissance.
The course investigates the survival of Greek and Roman antiquities in the Middle Ages and in the Renaissance.
Instructor(s): P. Tucci
Area: Humanities.

The depiction of visionary experiences is an important and frequent topic in medieval art. This course discusses iconographical and theoretical preconditions for the development of a particularly challenging body of medieval images that range from the visions of Old Testament prophets, to John’s Apocalypse, dreams, and visionary experiences in the context of female monasticism (Hildegard von Bingen, Gertrud von Helfta). Issues covered in this course are: patristic and medieval theories of vision, devotional practices, and the scientific approach towards vision in the later Middle Ages.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.654. Topics in Postwar Abstraction.
Emphasis on European and American case studies from Pollock to the present; figures may include: Newman, Still, Frankenthaler, Louis, Noland, Olitski, Stella, Ryman, Marden, Hantaï, Bishop, Jorn, Uecker, and Klein.
Instructor(s): M. Fried; M. Warnock.

AS.010.655. Religion in Roman Art.
This course explores the relationships between Roman art and religion through a survey of key topics and issues, from the archaic period to late antiquity, providing an introduction into how to use both textual and material evidence as sources for understanding Roman art and society.
Instructor(s): P. Tucci.

AS.010.656. Depicting the Invisible God in the Middle Ages.
Discusses conditions of medieval image making and theory. Each meeting focuses on how to represent God in the visual arts and introduces iconographic concepts and their reception.
Instructor(s): N. Zchomelidse.

How Venetian art 1450-1580 was informed by the city’s unique ecological environment and its status as a nexus of cultural interaction in the Mediterranean. Emphasis on recent scholarship.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.659. Passion Cult, Passion Image, Passion Drama.
A set of interdisciplinary explorations of the Passion of Christ theme, viewed as a mythic paradigm within European visual culture, religious consciousness and cultic practice since the High Middle Ages.
Instructor(s): M. Merback.
AS.010.666. Exhibiting the Other.
Despite challenges to museum practices in the 1970s and 1980s, the approach to displaying the art and visual culture of regions and periods outside of the European and North American mainstream remains caught between scholarly theorizing and demands for the commodification of the exotic. The ongoing exclusionary logic of collecting and display practices and the shrinking budgets for museums undermine efforts to rethink and challenge longstanding institutionalized patterns. In this seminar we will assess the politics, theory, and practice of displaying what still operates as the "other", reading across art history, museum studies, politics, and anthropology. Open to senior undergraduates with permission of instructor. Cross-listed with Political Science and Programs in Museums and Society.
Instructor(s): R. Brown.
Area: Humanities.

An introduction to the rival cities, Venice and Constantinople, studied through their medieval art and architecture. Meets with 010.460
Instructor(s): H. Maguire
Area: Humanities.

AS.010.684. Topics in Recent Art: Jeff Wall, Joseph Marioni, Anri Sala.
A consideration of the work of at least three contemporary artists in different media: the photographer Jeff Wall, the painter Joseph Marioni, and the video artist Anri Sala. Open to advanced undergrads with permission of the instructor.
Instructor(s): M. Fried.
Area: Humanities.

AS.010.687. Topics in Postwar European Art.
This seminar examines aspects of artistic production in Western Europe primarily in the period 1950-1972, with an emphasis on the art of France, Italy, the Benelux, and German-speaking countries. How was the work of art reimagined and repositioned in the wake of World War II and the horrors of the Holocaust, in the context of reconstruction and an emerging consumer society, and in light of the Cold War? How did postwar artists conceive the claims of artistic tradition and painting in particular in a rapidly expanding field of aesthetic practices and possibilities? Is there such a thing as "European art," and if so, how does it relate to or mediate among various national identities? These and related questions will be at the heart of our discussions.
Instructor(s): M. Warnock.

AS.010.689. Seeing Sculpture.
This course explores the art of sculpture in all of its historical forms, from the ancient to the contemporary, and investigates the experiential and spatial challenges that sculpture as a medium poses. Our focus will combine on-site studies of artifacts in local collections with the development of a critical vocabulary with which to write about sculptural objects, one that draws on the rich history of responses to sculpture from the birth of art history to the present.
Instructor(s): C. Lakey; J. Melius
Area: Humanities.

AS.010.700. Subversive Mirrors of Medieval and Renaissance Art and Literature.
This seminar explores the various strategies of subversion employed by European painters, printmakers, and sculptors from c. 1300 to c. 1600: irony and satire, comic inversion and "serious play" (serio ludere), the grotesque and anti-classical formlessness, carnivalesque folly, inverted worlds, and impossible utopias will all be examined as phenomena of culture and in relation to their parallels and sources in literature. The seminar will culminate in a collaborative workshop with German counterparts from the Technische Universität Dresden, to take place on the Homewood Campus in early May.
Instructor(s): M. Merback
Area: Humanities.

AS.010.703. Art History's Interdisciplinary Turn.
Examines the ways Art History has opened itself to paradigms in other disciplines since the 1970s. What has been gained and lost? What does it mean to be "interdisciplinary" today?
Instructor(s): M. Merback.

AS.010.704. Altarpiece and Altar-image.
This seminar investigates, historically and anthropologically, the origins, development and articulation of the Christian altarpiece as a functional genre within European art, on both sides of the Alps, with emphasis on the later Middle Ages and early Renaissance.
Instructor(s): M. Merback.

AS.010.705. Dürer & Grünewald.
Recent perspectives on the two most celebrated artists of the German Renaissance, their lives and intersecting careers, their major works, and the shifting tides of reception that ultimately made them representatives of "zweierlei deutsche Kunst" -- opposed models of German art's epochal achievement.
Instructor(s): M. Merback.

AS.010.706. Pilgrimage: Art and Anthropology.
Research paradigms and problems in the study of Christian pilgrimage, ca. 500-1500, and its relation to prevailing forms of visual culture, popular and elite. Topics include: the historical development of European cult forms and shifting conceptions of sanctity; articulations in the environmental poetics of pilgrimage shrines; case studies of miracle-cycles and votives, portable objects and pilgrimage devotionalia, and works of art thematizing the penitential, experiential, and therapeutic dynamisms of homo viator.
Instructor(s): M. Merback.

AS.010.707. Therapies of Art and Literature in Early Modern Europe.
This seminar examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch’s neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian “wisdom” genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, innovating therapies that were at once sacramental and philosophical, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.
Instructor(s): M. Merback.
The course investigates the earliest influence from Greece on Roman artists, architects, and patrons during the Late Republic. Even before the conquest of mainland Greece, Roman society was transformed by a dramatic process of acculturation. Hellenistic art, quickly adapted by the Romans, played an important part in the development of late-republican Rome: the contrast between the old mos maiorum and what would soon be condemned as luxuria was striking. Archaeological material and literary sources prove that the new taste pervaded not only the Roman way of life but also art and architecture. The course examines in detail the inspiring struggle between Etrusco-Italic traditions and the overwhelming riches from the Hellenistic world. Cross-listed with Classics
Instructor(s): P. Tucci.

AS.010.719. Art and Architecture under the Flavian Dynasty.
This seminar investigates Roman art and architecture during the Flavian age (AD 69-96) in Rome and in the provinces. With the Flavian dynasty the empire enjoyed a period of renewed political and economic stability: and this was the result of the principate of Vespasian. The 200-year celebration of the bimillenary of Vespasian’s birth gave the opportunity to reassess the figure of this emperor and the role of his dynasty in the development of Rome. With the Flavians, the capital of the empire enjoyed a period of intense building activity (e.g. the Colosseum). The great projects of Vespasian and Domitian radically transformed its image. The embellishment of the city and the global re-planning of the urban spaces were the visible signs of the political revival of the empire. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting, epigraphy and literary sources) to reconstruct the built environment of Rome during the last three decades of the 1st century AD. Cross-list with Classics
Instructor(s): P. Tucci.

AS.010.720. Roman Art and Archaeology: The Capitoline Hill.
An interdisciplinary seminar on the Capitoline Hill in Rome, with its focus on archaeological and architectural issues, as well as on the legacy of the classical world (from an ideal point of view, but also for what concerns the physical reuse of the memories of the past).
Instructor(s): P. Tucci.

AS.010.730. Sacred Images in Early Modern Spain.
This course will look at the dialogue between sacred images and art in Baroque Spain. The status of religious images, the "paragone" or competition between sculpture and painting, and the issue of cult, will all be analyzed through the work of such painters as Velazquez, Zurbaran and Ribera. Cross-listed with the Spanish section of GRLL.
Instructor(s): F. Pereda.

AS.010.731. Art & Reform in Renaissance Spain.
The seminar will explore main ideas of Spiritual and Ecclesiastical Reform in relation to the arts. The seminar will consider different chronological and geographical areas, such as Renaissance Seville, Counter-Reformation Valencia or the decoration of the Escorial Basilica.
Instructor(s): F. Pereda.

This seminar will concentrate in the artistic production in the time of the Catholic Monarchs (1472-1516). The immigration of Flemish artists, the mechanics of patronage, and the interreligious uses of images will be addressed with a historical perspective.
Instructor(s): F. Pereda.

AS.010.733. Evidence in Early Modern Art: Italy and Spain.
This course will analyze the uses of evidence in Early Baroque art at the crossroads of History of Art, Science and Religion. How do images/paintings produce evidence? How does evidence relate to belief? And to skepticism? And how does it affect shifting conceptions of Naturalism? Case studies will include paintings by such artists as Caravaggio, Velázquez, Ribera or Zurbarán.
Instructor(s): F. Pereda
Area: Humanities.

AS.010.751. Writing the Italian Renaissance, Burckhardt to Panofsky.
A close reading of key thinkers, reconsidering their relevance to contemporary critical and art-historical practice. This course is being co-taught with Jeremy Melius.
Instructor(s): J. Melius; S. Campbell.

AS.010.760. Agency and Other Topics in Contemporary Theory of Art History.
A critical reading of texts by various thinkers including Alfred Gell, Horst Bredekamp, David Freedberg, Whitney Davis, and David Summers. Open to qualified undergraduates with the permission of the instructor.
Instructor(s): M. Fried; R. Leys.

AS.010.761. Art and Reformation in Germany and Switzerland.
Research paradigms and new developments in evaluating the impact of church reform, evangelical theology, confessional conflict, iconoclasm, and revolution on the arts, visual culture, and the social place of the artist in German and Swiss society between 1500 and 1575.
Instructor(s): M. Merback
Area: Humanities.

AS.010.801. Special Research & Problems.
Instructor(s): Staff.

AS.010.802. Special Research/Problems.
Instructor(s): Staff.

AS.010.803. Individual Work.
Instructor(s): Staff.

AS.010.804. Individual Work.
Instructor(s): Staff.

AS.010.821. History of Art Practicum.
Instructor(s): M. Merback.

AS.010.890. Summer Practicum-History of Art.
Instructor(s): S. Campbell.

Cross Listed Courses

Classics

AS.040.119. The World of Pompeii.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.
This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.150. Island Archeology: Land and Sea in Ancient Crete, Cyprus and the Cyclades.
Islands present highly distinctive contexts for social life. We examine three island worlds of the ancient eastern Mediterranean. These are places where water had a unique and powerful meaning and boat travel was part of daily life, where palaces flourished and contact with other societies implied voyages of great distance. Class combines close study of material and visual culture with consideration of island-specific interpretive paradigms; trips to Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.201. Digging Up the Gods: The Archaeology of Roman Sanctuaries.
This course will explore the major sites of Ancient Italy, such as Rome, Ostia, and Pompeii, from temples to dedications, and their role in religion and society. Cross-listed with History of Art.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.213. Introduction to Ancient Egyptian Art.
This class is a combination of illustrated lecture and discussion, punctuated with visits to museums with Egyptian collections. Participants must be able to join at least one overnight trip to New York and/or Boston (weekend) and be available for two half day visits to Philadelphia and Washington, D.C., or elsewhere (TBA as best for participants), in addition to visiting Baltimore institutions with the class as part of the course. Discussion of sculpture will take place in front of the objects, so attendance is important for the visits.
Instructor(s): B. Bryan
Area: Humanities.

AS.040.218. Celebration and Performance in Early Greece.
Surviving imagery suggests that persons in Minoan and Mycenaean societies engaged in various celebratory performances, including processions, feasts, and ecstatic dance. This course explores archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities.

Aegean, then explores the creation, diffusion, and reception of Homeric epic from the Iron Age to the end of the Archaic Period.
Instructor(s): A. Shapiro; E. Anderson
Area: Humanities.

AS.040.320. Myth In Classical Art.
This course traces the representation of the principal gods and heroes of Greek myth in the visual arts (sculpture and vase-painting), as well as later reflections in Roman painting.
Instructor(s): A. Shapiro
Area: Humanities.

This seminar will combine the evidence of literary and epigraphical sources with archaeological material (votive reliefs, vase iconography) to explore the central role of hero cult in the religious life of ancient Athens. Cross-listed with History of Art.
Instructor(s): A. Shapiro
Area: Humanities.

This course explores the dynamic work and social roles of craftpersons in early Greece, the eastern Mediterranean and Near East. Readings and discussion will query the identities and contributions of these people—travelers, captives, lauded masters, and even children—through topics including gender, class, and ethnicity. Special focus on late third-early first millennia BCE; local field trips.
Instructor(s): E. Anderson
Area: Humanities.

This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.648. Homeric Archaeology.
This seminar surveys the archaeology of the Late Bronze Age in the Aegean, then explores the creation, diffusion, and reception of Homeric epic from the Iron Age to the end of the Archaic Period.
Instructor(s): A. Shapiro; E. Anderson
Area: Humanities.

AS.040.651. Greek Art: Archaic into Classical.
An intensive exploration, based on current scholarship, of Greek sculpture and painting ca. 500-460 BCE and the origins of the Classical style. Cross-list with History of Art.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.655. Attic Hero Cults.
This seminar will combine the evidence of literary and epigraphical sources with archaeological material (votive reliefs, vase iconography) to explore the central role of hero cult in the religious life of ancient Athens. Cross-listed with History of Art.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.671. Greek Portrait Art and Society.
This seminar will explore the development of Greek portrait sculpture from the Early Classical through the Hellenistic periods and the contexts of its display in Greek cities.
Instructor(s): A. Shapiro.
AS.130.329. Ancient Egyptian Art and Archaeology.
A survey of Egyptian art as seen in the temples, tombs, funerary, and minor arts of Egypt between 3000 and 100 B.C. Slide lectures will provide a survey of art from the Pyramids to Augustus Caesar and will focus on such topics as the principles of Egyptian art; can the term art apply to early Egypt? How were artisans trained and what techniques and materials were utilized in their work? Co-listed (meets with) AS.133.750.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.377. Creating an Egyptian Temple.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art -- particularly wall reliefs -- in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities.

This writing intensive seminar examines how textual and artistic production were used separately and together to engender and communicate social, cultural, and political meaning in ancient Mesopotamia and the rest of the Near East from the 4th millennium to the Hellenistic period. Using a variety of case studies, students will develop skills in specific research skills such as critical reading, analysis, and interpretation. AS.130.420 is required of NES Majors, but is also open to non-majors who have taken at least one 100-level and one 300-level Near Eastern Civilization course, or with the consent of the instructor. Cross-listed with History of Art.
Instructor(s): M. Feldman; P. Delnero
Area: Humanities.

AS.133.657. Creating an Egyptian Temple.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art -- particularly wall reliefs -- in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities.

AS.145.101. Death and Dying in Art, Literature, and Philosophy: Introduction to Medical Humanities. 3 Credits.
This team-taught course offers an introduction to the new concentration in medicine, science, and humanities by approaching the topic of death and dying from historical, anthropological, philosophical, theological, literary and art historical perspectives. Open to freshmen, and sophomores who have already taken either Great Books II or History of Medicine.
Prerequisites: AS.360.134 OR AS.140.106
Instructor(s): C. Wiener; E. Strowick; L. Lisi; M. Merback
Area: Humanities
Writing Intensive.

German Romance Languages Literatures

AS.213.369. Dada's Ideologies: Literature, Art, & Politics. 3 Credits.
This course will examine the literary and political theories implied in, and encountered by, Dadaist works and praxes. Particular attention will be paid to Dadaist confrontations with the growth of modern mass media, the politics of World War I, and consumerist capitalism in the wake of Taylorism and Fordism. Readings include major Dadaists as well as Althusser, Benjamin, Debord, Gramsci, Irigaray, Lukács, Marx, Saussure, among others.
Instructor(s): J. Pelcher
Area: Humanities.

AS.214.171. Freshman Seminar: Witchcraft and Demonology in Renaissance Europe.
Who were the witches? Why were they persecuted for hundreds of years? Why were women identified as the witches par excellence? How many witches were put to death? (Answer: 30-40,000, between about 1400 and 1800.) What traits did European witchcraft share with witch-mythologies in other societies? After the witch-hunts ended, how did “The Witch” go from being “monstrous” to being “admirable” and even “sexy”? Answers are found in history and anthropology, but also in literature, folklore, music, and the visual arts. After an introduction to ancient and medieval witchcraft, we will study European witch-persecution between 1400 and 1800. The second half of the course will concentrate on artistic representations of witches in media ranging from manuscripts to movies, concentrating on Italy, France, Spain, and Germany.
Instructor(s): W. Stephens
Area: Humanities.

AS.214.672. Tasso, the Epic & Tradition.
Students will achieve deep familiarity with Tasso’s Gerusalemme liberata and Aminta; read selections from Gerusalemme conquistata, Il mondo creato, Tasso’s Dialogues, and his literary-theoretical treatises; survey important texts of Tasso criticism, and sample Tasso’s legacy in poetry and figurative arts.
Instructor(s): W. Stephens

Humanities Center

AS.300.215. Monsters, Miracles, and Men from Mars.
From medieval mystical visions of the Godhead to modern accounts of alien abductions, encounters with the supernatural and paranormal have long been sources of terror and amazement. This course explores visual and narrative representations of these encounters. It is a media-intensive course that juxtaposes a variety of sources from the medieval period, the space age, and contemporary film and television.
Instructor(s): K. Boyce-Jacino; T. Golan
Area: Humanities.
AS.300.602. Theory, Painting, Vision.
Reading in philosophy, theory, criticism. Texts by Merleau-Ponty, Heidegger, Foucault, Derrida, Cavell, and Pippin, among others. Instructor(s): M. Fried.

AS.300.644. Theory, Painting, Vision.
Theory, Painting, Vision: Readings to be selected but they will definitely include texts by Barthes, Cavell, Wall, and Michaels. Instructor(s): M. Fried.

Center for Africana Studies

AS.362.103. Introduction to African Arts.
This course provides an overview of principal visual arts of Africa, pre-historic to contemporary.
Instructor(s): N. Bridges
Area: Humanities, Social and Behavioral Sciences.

AS.362.208. From Nok to Nsukka: Approaches to the Art of Nigeria.
This course provides an introduction to art traditions within Nigeria’s borders; it also explores historiography and the impact of modern nation-building on art history and the development of museum exhibitions.
Instructor(s): K. Gunsch
Area: Humanities.

Program in Museums and Society

AS.389.105. Freshman Seminar: Art in the Museum. 3 Credits.
Go behind the scenes of local art museums to explore fundamental concepts and social issues particular to the collection and display of art in the past and today.
Instructor(s): J. Kingsley
Area: Humanities
Writing Intensive.

AS.389.130. Mini Course: Conservation, An Introduction to Technical Art History.
Look through the eyes of a conservator and learn how to answer historical questions by analyzing the physical nature of works of art. Objects examined will include paintings, sculpture and works on paper from the collection of the Baltimore Museum of Art. Class meets 4 times, on February 7, 14, 21 and 28, by the BMA. Syllabus and organizational meeting at JHU on Thursday, January 31, 3:30pm.
Instructor(s): T. Primeau
Area: Humanities.

AS.389.201. Introduction to the Museum: Past and Present.
This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.205. Examining Archaeological Objects.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.320. Photographs on the Edge: Ara Güler in Archives of the Smithsonian’s Freer and Sackler Galleries.
Work as a curator alongside Smithsonian staff, researching the work of Turkish photographer Ara Güler to develop an exhibit that considers relationships between the history of photography, archives and the museum. Class will travel several times to the Freer and Sackler Galleries in Washington D.C. M&S practicum course.
Instructor(s): N. Micklewright
Area: Humanities, Social and Behavioral Sciences.

Students work with BMA collection and staff to develop and organize an exhibition of artists’ books. Various aspects of museum work are explored, including research, interpretation, presentation, programming, and marketing. M&S practicum course.
Instructor(s): R. Hoisington
Area: Humanities.

Explore the material culture of “wonder” from the Renaissance to the Enlightenment in literature, science, and art, with Hopkins’ rare book collections and the Walters Art Museum. M&S practicum course.
Instructor(s): E. Havens
Area: Humanities.

AS.389.373. Encountering the Art of South Asia: Museum Display, Theory and Practice.
Students reconsider the exhibition and interpretation of South Asian Art at the Walters Art Museum to suggest a new permanent display. Class meets at the Walters Art Museum. M&S practicum course.
Instructor(s): R. Brown, R. Mintz
Area: Humanities.

AS.389.400. Who Owns Culture?.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.450. Readings in Material Culture.
Objects, things, “stuff”- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini, R. Brown
Area: Humanities.

AS.389.460. Inventing the Middle Ages from the Renaissance to Today.
Investigate the history of the collection, interpretation and display of medieval art by nations, museums and private collectors. Topics range from antiquarian interest to conception of medieval sculpture as “primitive”, from the use of medieval objects in nationalistic displays and from early American museums such as the Cloisters in NY to current exhibits such as the Walters. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities.
**AS.389.650. Readings in Material Culture.**
Objects, things, "stuff"- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

**History of Science and Technology**
The Department of the History of Science and Technology offers an undergraduate program leading to the degree of Bachelor of Arts with a major in science, medicine, and technology, and a graduate program leading to the degree of Doctor of Philosophy.

The department offers a variety of courses that deal with the history of the conceptual and technical development of the sciences, as well as the cultural and social impact of science and technology on civilization. These courses are open to all undergraduates in the Schools of Arts and Sciences and Engineering. A few of the courses require some background in an appropriate science, but most are accessible to those with no specialized knowledge who want to understand the part science has played in shaping modern culture. Students who have concerns about their technical competence for a given course should consult the professor involved.

**Major in History of Science, Medicine, and Technology**
Offered in cooperation with the Institute of the History of Medicine, this major allows students to combine substantive work in science with study of the social and historical context of modern science, medicine, and technology. The aim of the program is to produce graduates who are scientifically literate and technically competent, and who at the same time understand science and medicine not as static, autonomous enterprises but rather as modes of thought that have developed in specific social contexts.

The major is appropriate for any student planning a career in medicine or other areas of the health care industry. It is also flexible enough to serve as a basis for a variety of careers where an informed knowledge of science and technology and their impact on society is important. Such careers include broad areas of business and industry, journalism, teaching, museum work, and specialized areas of law and public policy.

**Requirements for the B.A. Degree**
Also see Requirements for a Bachelor's Degree. (https://e-nextcatalog.jhu.edu/undergrad-students/academic-policies/requirements-for-a-bachelors-degree)

- Students in their senior year may take graduate courses with permission.
- A minimum grade of C- is necessary in all courses applied toward the requirements of the major and requirements may not be taken satisfactory/unsatisfactory. Each course must be at least 3 credits.

**Two Survey Courses (select from the following):**
- AS.140.105 History of Medicine
- AS.140.106 History of Modern Medicine
- AS.140.301 History of Science: Antiquity To Renaissance
- AS.140.302 Rise of Modern Science
- AS.140.321 Scientific Revolution

**Additional History of Science, Medicine & Technology Courses**

**Honors in the Major**
Students who demonstrate excellence in course work are eligible to write an honors thesis (AS.140.411 Senior Research Seminar and AS.140.412 Research Seminar) in their final year for additional credits. Students must have outstanding recommendations from two department members to be eligible for the thesis. Departmental honors are conferred if a student has a GPA of 3.5 or better in major requirements and receives a grade of A- or better on the thesis.

**Minor in the History of Science, Medicine and Technology**
The department offers a minor which may be combined with other science, social science, or humanities majors. To complete the requirements for the minor, students must have a total of 18 credits in the history of science, medicine, or technology, including at least one survey course. A minimum grade of C- is necessary in all courses applied toward the requirements of the major and requirements may not be taken satisfactory/unsatisfactory. Each course must be at least 3 credits.

**One Survey Course (select from the following):**
- AS.140.105 History of Medicine
- AS.140.106 History of Modern Medicine
- AS.140.301 History of Science: Antiquity To Renaissance
- AS.140.302 Rise of Modern Science
- AS.140.321 Scientific Revolution

**Additional History of Science, Medicine & Technology Courses**
and students are encouraged to undertake study in related areas such as history, philosophy, and the natural and medical sciences.

Ph.D. in the History of Science and Technology

The graduate program in the history of science and technology leads to the Ph.D. degree. Although an M.A. degree is granted, candidates who seek only that degree are not ordinarily admitted. The object of the Ph.D. program is to provide the rigorous training necessary for a scholarly career in teaching and research; consequently, the focus of the student's activity will be the research seminars of the department. Faculty from the Institute of the History of Medicine in the School of Medicine also participate in the program.

Admission

Application deadline is January 15. All supplemental materials (official transcripts, three letters of recommendation, official GRE scores, and, when applicable, official TOEFL scores) should be sent directly to the Graduate Admissions Office at:

Johns Hopkins University
Full-time Graduate Studies in Arts, Sciences, and Engineering
Graduate Admissions Office
Shriver Hall 28
3400 North Charles Street
Baltimore, Maryland 21218

For further information on our faculty and programs, please visit our website at: http://host.jhu.edu.

Requirements for the Ph.D. Degree

Before candidates begin full-time research on their dissertations, they must prepare themselves adequately in the appropriate fields of knowledge, become skilled in the techniques of historical research, and be able to carry out a sustained piece of historical analysis and writing.

In the first year of the program students are introduced to the methods and techniques of research and complete a year-long survey course in the history of science or the history of medicine. Students in their second year of study present a research paper to the department. In the second and third years of study, students prepare a field in history and two specialized fields in the history of science, medicine, or technology. The fields are individually arranged and satisfied. The fields entail broad and intensive reading and the passing of a comprehensive examination and/or presentation of a major research paper. Before being admitted for formal candidacy for the degree, the student must also demonstrate a reading knowledge of two foreign languages. The final requirement for the Ph.D. degree is the completion of a dissertation that is an original contribution to historical knowledge and of a standard suitable for publication.

The History of Science and Technology is by its nature interdisciplinary, and students are encouraged to undertake study in related areas such as history, philosophy, and the natural and medical sciences.

Facilities

The Eisenhower Library and the Welch Medical Library contain about two million volumes, including the special collections of the Institute of the History of Medicine in Baltimore. These research facilities are supplemented by the rare book holdings at Evergreen House, the Pratt Library, and the Peabody Library.

Other important research collections are available to students. In Philadelphia, collections include the Chemical Heritage Foundation, the American Philosophical Society, and the Academy of Natural Sciences. The Hagley Museum and Library's collections in the history of American science and technology are within easy distance of campus, as are the incomparable holdings of the Library of Congress, the National Library of Medicine, and other governmental agencies in Washington, D.C.

Financial Aid

The department has several graduate fellowships and teaching assistantships. Students may also be eligible for federal financial support through the National Science Foundation. Information on these and other fellowships can be obtained through the fellowship advisor at the student's college, or from the Fellowship Office of the National Academy of Sciences, National Research Council, Washington, D.C. 20025. In the recent past, doctoral candidates have also won support for their research in the United States and abroad through such sources as the Smithsonian Fellowships, the Fulbright-Hays grants, the Spencer Foundation, and the Deutscher Akademischer Austauschdienst (DAAD) Fellowship.

For current faculty and contact information go to http://host.jhu.edu/people/

Faculty

Chair
Maria Portuondo
Associate Professor: History of science, science and exploration, science and technology in Latin America, early modern Spanish and Latin American Cosmography and geography.

Professors
Robert H. Kargon
Willis K. Shepard Professor of the History of Science: history of physics; science and social change; science in America.

Sharon Kingsland
History of biology, especially ecology, genetics and behavioral biology; science in America.

Stuart W. Leslie
History of technology, history of science-based industry.

Lawrence M. Principe
Drew Professor of the Humanities, history of chemistry and alchemy, early modern science, science and religion.

Assistant Professors
Yulia Frumer
History of science, Japanese history.

Joris Mercelis

* Another course might serve to fulfill the survey course requirement with permission of the director of undergraduate studies.
History of modern technology, especially technology related to chemical industries.

**Affiliated Faculty School of Medicine**

Nathaniel C. Comfort  
Professor: history of biology, especially genetics, molecular biology, and biomedicine; history of recent science, oral-history and interviewing.  
Current project: History of human and medical genetics in America.

Mary E. Fissell  
Professor: European health care and popular medicine, 17th and 18th centuries; early modern gender and the body.

Jeremy Greene  
Elizabeth Treide and A. McGehee Harvey Chair in History of Medicine, Associate Professor: 20th century clinical medicine, therapeutics, pharmaceuticals, global health, history of disease.

Marta Hanson  
Associate Professor: history of East Asian Medicine; History of Chinese science and medicine; history of epidemics and disease in China.

Graham Mooney  
Assistant Professor: history of public health, 19th and 20th centuries; historical epidemiology; historical demography; disease surveillance and risk.

Randall M. Packard  
William H. Welch Professor of History of Medicine: history of disease; public health; and medicine, health, and disease in Africa.

Gianna Pomata  
Professor: medieval and Renaissance European medicine; natural history; Italy; history of history and of scholarship.

Daniel P. Todes  
Professor: history of Russian medicine and science, social relations of scientific thought, history of biomedical sciences.

For current course information and registration go to https://isis.jhu.edu/classes/

**Courses**

**AS.140.105. History of Medicine.**
Course provides an overview of the medical traditions of six ancient cultures; the development of Greek and Islamic traditions in Europe; and the reform and displacement of the Classical traditions during the Scientific Revolution.  
Instructor(s): G. Pomata; M. Hanson  
Area: Humanities, Social and Behavioral Sciences.

**AS.140.106. History of Modern Medicine.**
The history of Western medicine from the Enlightenment to the present, with emphasis on ideas, science, practices, practitioners, and institutions, and the relationship of these to the broad social context.  
Instructor(s): J. Greene  
Area: Humanities, Social and Behavioral Sciences.

**AS.140.111. Freshman Seminar.**
This Freshman Seminar explores instances of first contact between different world cultures and western science (16th-20th c.). Some cases considered include Jesuits in the Chinese imperial court, Spanish missionaries and the Maya, etc.  
Instructor(s): M. Portuondo  
Area: Humanities, Social and Behavioral Sciences.

**AS.140.113. Freshman Seminar: Darwin, Freud, Pavlov: Perspectives on Human Nature.**
Instructor(s): D. Todes  
Area: Humanities, Social and Behavioral Sciences.

**AS.140.115. Freshman Seminar: Artificial Humans.**
Looking at the history of attempts to augment or construct human beings, the course will explore the role of technology in molding human existence and shaping the definition of humanity.  
Instructor(s): Y. Frumer  
Area: Humanities, Social and Behavioral Sciences.

**AS.140.117. Freshman Seminar: Writing about Science and Medicine.**
Scientific literature is not an oxymoron. Doctors and scientists write, sometimes beautifully. How? Why? We will both dissect and emulate classics of this genre and discuss how literary skill can inform both patient care and laboratory practice, and how it can shape the role of science in society. Freshmen Only.  
Instructor(s): N. Comfort  
Area: Humanities, Social and Behavioral Sciences.

**AS.140.123. Johns Hopkins: The Idea of a University.**
Who was Ira Remsen and why is he interred in the building bearing his name? Was the School of Medicine’s best surgeon really a life-long drug addict? This freshman seminar will explore the history of our university since its founding in 1876, including its schools of medicine, public health, nursing, the Applied Physics Laboratory and SAIS. We’ll look carefully at the archives and develop a thematic class exhibit. Research and writing intensive.  
Instructor(s): S. Leslie  
Area: Humanities, Social and Behavioral Sciences.

**AS.140.129. Freshman Seminar: Johns Hopkins Medicine.**
Johns Hopkins medicine has set the standards since the late 19th c. Learn how Hopkins reinvented medical education, public health, and hospital care and meet the people behind the famous names.  
Instructor(s): S. Leslie  
Area: Humanities, Social and Behavioral Sciences.

**AS.140.143. Genetics in Medicine & Society.**
If you ever become seriously ill, have children, or read the newspaper, you cannot afford to be ignorant of the science of heredity. In this class, we will explore some of the principle concepts of genetics and their social impact, from Gregor Mendel to the Human Genome Project. We will read some original papers as well as review articles and historical analyses. Topics covered will include: the rediscovery of Mendel’s principles; eugenics; the introduction of genetics into medicine; concepts of genetic disease; genetic and biochemical individuality; genetics, race, and gender; and genetic screening and testing. This course will be discussion-heavy and include a term paper.  
Instructor(s): N. Comfort  
Area: Humanities, Social and Behavioral Sciences.
AS.140.144. Freshmen Seminar: Culture, Communication and Technology.
This seminar traces the evolution and impact of oral transmission, writing, print, photography, film, and electric and electronic media. Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.146. History of Public Health in East Asia.
This course examines the history of disease, epidemics, and public health responses in East Asia from the 17th-20th centuries. This public health history emphasizes the interactions, connections, and comparisons among China, Japan, Korea, and Taiwan.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences.

AS.140.154. Freshman Seminar; Picture This: A Photographic History of Johns Hopkins University.
Every picture tells a story, if you know how to read it. This freshman seminar will explore the history of Hopkins through images, creating interactive timelines of important themes in the university’s history.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences.

AS.140.163. Jungle Doctors: Medical Missions in Africa from David Livingstone to Paul Farmer.
Freshman seminar using a variety of primary and secondary sources, students will explore the motivations and activities of expatriates practicing medicine in Africa from the 19th century to the present.
Instructor(s): J. Cummiskey
Area: Humanities, Social and Behavioral Sciences.

Course explores the brilliant scientific and philosophic achievements of the 18th-century intellectual movement known as the Enlightenment through the reading of a selection of key authors (Voltaire, Franklin, the great Encyclopedists...). Includes introduction to research method and writing in the humanities.
Instructor(s): J. Richard
Area: Humanities, Social and Behavioral Sciences.

AS.140.226. Aviation in America.
This course surveys manned flight in America, with particular emphasis on how technological changes and sociocultural events have influenced one another in the development of aircraft.
Instructor(s): L. Karafantis
Area: Humanities, Social and Behavioral Sciences.

AS.140.301. History of Science: Antiquity To Renaissance.
The first part of a three-part survey of the history of science. This course deals with the concepts, practice, and the cultural roles of scientific thought from classical antiquity to the time of Copernicus. Topics include the pre-Socratics, the systems of Plato and Aristotle and their continuing influence, Islamic science, Latin medieval scholasticism and the universities, and Renaissance hermeticism/natural magic. Interactions across science, art, technology, and theology are highlighted.
Instructor(s): L. Principe
Area: Humanities, Social and Behavioral Sciences.

Survey of major scientific advances from 18th to 20th century, from Newtonian science to the age of Big Science.

AS.140.304. Medicine for and by Women in Early Modern Europe.
This course will examine women’s role in early modern European medicine through the reading of early modern medical texts written for or by women. The course is meant for students interested in women’s history, the history of medicine, European history.
Instructor(s): G. Pomata
Area: Humanities, Social and Behavioral Sciences.

AS.140.305. From the Compass to Androids: History of Science, Technology, and Medicine in Asia.
The course explores the history and cultural context of science, medicine, and technology in East Asia, from the ancient Chinese science to the latest scientific and technological developments in Japan.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences.

AS.140.306. Science And Religion.
Science and religion are crucial influences on Western culture. This course examines their interrelations during the past 2000 years, including the Athens-Jerusalem debate, medieval theology, the Galileo affair, evolution, and current issues.
Instructor(s): L. Principe
Area: Humanities, Social and Behavioral Sciences.

Explores historical and current problems relating to the environment and human health, with emphasis on the Chesapeake region and Baltimore. Students write research papers.
Instructor(s): S. Kingsland
Area: Humanities, Social and Behavioral Sciences.

AS.140.315. Spaceflight and Society: Exploring the History of the Final Frontier.
This course explores the history of spaceflight, emphasizing its civil component, but also including national security and commercial activities, and the interactions among all components of spaceflight around the world.
Instructor(s): R. Launius
Area: Humanities, Social and Behavioral Sciences.

Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. You know he spelled his name with an S, but what else do you know about our university’s namesake, Johns Hopkins? In this B’More course, you’ll explore the life and legacy of Quaker, businessman, and philanthropist Johns Hopkins. Field trips will take us to local historic sites and cultural institutions around the city, and our service project will take place at Hopkins’ former home, Clifton.
Prerequisites: Students may enroll in one B’More course only.
Area: Humanities.

AS.140.320. Modernity on Display: Technology and Ideology in the Era of World War II.
Seminar focuses on ideological at World’s Fairs over technological modernity with special emphasis upon World War II and the Cold War.
Instructor(s): A. Molella; R. Kargon
Area: Humanities, Social and Behavioral Sciences.
AS.140.321. Scientific Revolution.
Explore how the Western understanding of nature changed between 1500 and 1720 through the works of astronomers and astrologers, naturalists and magi, natural philosophers and experimentalists, doctors and alchemists & others.
Instructor(s): M. Portuondo
Area: Humanities, Social and Behavioral Sciences.

AS.140.324. Commercializing Science: Academic Entrepreneurs from Kelvin to Venter.
From the nineteenth-century physicist William Thomson (Lord Kelvin) to contemporary geneticists such as Walter Gilbert and Craig Venter, academic scientists and engineers across a broad range of disciplines have created their own companies. This course examines the motives behind these entrepreneurial ventures, the strategies employed, and the factors influencing their success.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.325. Cult/Commmunica/Technol.
After examining oral communication, emergence of writing, printing, perspective, and extensions of senses (telescope, camera, radio, telephone, internet), seminar focuses on the emergence of visual culture in the 20th century.
Instructor(s): J. Mercelis
Area: Humanities, Social and Behavioral Sciences.

AS.140.327. Science and Utopia.
Seminar examines the changing role of science in planning the ideal community from the 17th century to the present. Readings include works by Campanella, Bellamy, H.G. Wells, Orwell, B.F. Skinner and Walt Disney.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.331. Mind, Body and Society: The History of Psychology.
We will explore various modern approaches to the relationship of mind, body and society; to the nature of scientific psychology and its relationship to human values.
Instructor(s): D. Todes
Area: Humanities, Social and Behavioral Sciences.

AS.140.333. The Idea of the Artificial Human in History.
Course examines the concept of the artificial human as a mirror of changing world-views from late middle ages through the twentieth century. Readings include Mary Shelley, Wells, Capek, Piercy.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.334. Science in the Atomic Age.
Transformation of science after WWII, including rise of interdisciplinary fields, Big Science, atomic science, molecular biology, and environmentalism. Research paper required.
Instructor(s): S. Kingsland
Area: Humanities, Social and Behavioral Sciences.

AS.140.337. Science, Fiction, and the Brain.
Contemporary neuroscience claims to be closer than ever to figuring out what makes a person tick, but there's still a long way to go from the mapping of neuronal connections to an empirical account of consciousness, memory, and emotion. This course leaps into the ring where materialism and idealism, the mechanistic and the vitalistic, have wrangled for the past two hundred years. We will trace the history of attempts to explain and control human consciousness, both in reality and in fiction. Through philosophy, ethics, neuroscience, and literature, students will explore what is at stake in efforts to reduce the mind to a series of electrical impulses in the brain.
Instructor(s): A. Puglionesi
Area: Humanities, Social and Behavioral Sciences.

This course explores the changing scientific, social, and cultural ideas that shaped how anthropologists and other scholars approached the study of human beings from the mid-nineteenth through the twentieth centuries.
Instructor(s): A. Link
Area: Humanities, Social and Behavioral Sciences.

This course surveys the rise and fall of alchemy and astrology in early modern Europe. Topics include chemical and astrological medicine, prognostication, and the quest for the Philosopher's Stone.
Instructor(s): J. Rivest
Area: Humanities, Social and Behavioral Sciences.

AS.140.345. Animal Minds: Beyond the Black Box.
How do migratory birds and fish find their way home? Do honeybees communicate using a “dance language”? Do chimpanzees have mental lives akin to those of human beings? How do scientists attempt to answer such questions, and why was the “animal mind” a taboo for over 50 years in American science? Focusing on ethology and psychology from Darwin to the present, this course examines the history of the study of animal cognition and behavior. A major emphasis throughout the course will be on the question of animal consciousness from the late-19th through the 20th century.
Instructor(s): R. Nash
Area: Humanities, Social and Behavioral Sciences.

Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences.

AS.140.347. History Of Genetics.
Intellectual and social history of the gene concept, including Mendelism, eugenics, medical genetics, DNA, genomics, and personalized medicine.
Instructor(s): N. Comfort
Area: Humanities, Social and Behavioral Sciences.
Hopkins undergrads haven’t always spent their time on E-Level. In the 1960s many of them took to the streets, and to the Beach, to support civil rights and to protest the Vietnam War. Working with a curator at the Newseum, the class will research and mount an exhibit about student activism at Hopkins.
Area: Humanities.

Is disability a biological fact or determined by culture? This class discusses different ideas of difference in the context of disability rights, professional power, reproductive technology and bioethics. Cross-listed with Studies of Women, Gender, and Sexuality
Instructor(s): M. Schmidt
Area: Humanities, Social and Behavioral Sciences.

AS.140.352. Who Wants to be a Billionaire?: High Tech & the American University.
Long before Facebook, faculty and students were creating startups on campus. This course examines college entrepreneurship from its 19th-century origins to today: the potential perils, profits, and promise for entrepreneurs and universities alike.
Instructor(s): S. Morris
Area: Humanities, Social and Behavioral Sciences.

AS.140.353. Women, Health, and Medicine in Modern America.
This course explores women's interactions with science, medicine, and health in the late-19th and 20th century United States. It is framed by an interest in medicalization, sex/gender, and feminism. Cross-listed with Studies of Women, Gender, and Sexuality
Instructor(s): D. Stillwell
Area: Humanities, Social and Behavioral Sciences.

AS.140.354. Science, Technology and Society in Modern East Asia.
The course aims to survey the history of science and technology in East Asian countries—China, Japan and Korea—since the late 19th century. Since Japan was the only nation in East Asia that succeeded in modernizing itself by adopting western science, technology and politics, it will be studied first. The Chinese and Korean cases then will be reviewed from different angles. The course will emphasize the mutual influence between science & technology and society to answer how they became major industrial powers in the 21st century. Cross-listed with East Asian Studies.
Instructor(s): D. Kim; Y. Li
Area: Humanities, Social and Behavioral Sciences.

Astronomy today, in its tools, techniques, practices and tempers, bears little resemblance to astronomy in 1900. This course will cover how scientists expanded the universe in the past century and how the universe of astronomical practice expanded as well: as a profession, as an avocation, and as a cultural resource.
Instructor(s): D. DeVorkin
Area: Humanities, Social and Behavioral Sciences.

AS.140.357. Science Fiction Movies in the East and West.
What is a science fiction (SF) movie? How did SF movies and developments in science and technology influence each other during the twentieth century? What is the use of SF movies for societies? And why are SF movies much more popular in some countries than in others? By watching and analyzing classic and contemporary SF movies from the US, the Soviet Union, Japan, China, and other countries, we will search for answers to these questions. Special emphasis will be given to analyzing how historical, political, and cultural environments in different countries have influenced the production and acceptance of SF movies.
Instructor(s): D. Kim
Area: Humanities, Social and Behavioral Sciences.

AS.140.359. Museums and Globalization.
Examines how museums are linked to wider national, cultural, communities, and mobilize resources to address political, economic and social concerns and questions of heritage. Jointly with Case Western Reserve University. Cross-listed with Program in Museums & Society.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.362. The Communications Revolution.
Investigates the nature and impact of phenomenal changes in transportation and communication since the 19th-century, including iconic developments such as the Panama Canal, Brooklyn Bridge, airplanes, automobiles, television, wireless communication and the internet.
Instructor(s): S. Morris
Area: Humanities, Social and Behavioral Sciences.

This course traces the impact of European expansion on health, medicine and disease control from the Age of Exploration to the emergence of international and global health in the early twentieth century. Dean's Teaching Fellowship course.
Instructor(s): K. Arner
Area: Humanities, Social and Behavioral Sciences.

AS.140.368. Technological Transformations.
Course explores the historical development of revolutionary technologies and their transformations of the individual and society. Focus on computing, biotech, consumer goods, warfare, manufacturing, agriculture, imaging, energy, transportation, and sustainability.
Instructor(s): M. Portuondo
Area: Humanities, Social and Behavioral Sciences.

AS.140.370. History of Mental Illness and Psychiatry in Modern West.
This course will be an introduction to the history of "madness" in modern Europe and America. In particular, it will examine the ideas that have shaped perceptions of madness, insanity, and mental illness; the changing experiences of those afflicted; the development of those professions designed to look after those deemed mad, insane, and mentally ill; and the social and cultural assumptions behind treatments, policies, and public opinions.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.
This course explores the history of forensic medicine from some of its earliest roots to the present day, investigating everything from witchcraft trials to DNA profiling.
Instructor(s): S. Lejaq
Area: Humanities, Social and Behavioral Sciences.

AS.140.372. Science on Display.
History of collecting, exhibiting and interpreting science and technology, from Renaissance cabinets of curiosity to modern world’s fairs, zoos, aquariums, films and science centers. Students will present their own exhibits as dioramas, web sites, documentaries or other formats. Cross-listed with Program in Museums and Society.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences.

This course traces the development of the science of geography from antiquity through the mid-nineteenth century. Readings explore the legal, political, cultural and theological resonances of geography during this period.
Instructor(s): M. Franco
Area: Humanities, Social and Behavioral Sciences.

AS.140.379. Health and the City: Urban Public Health In Historical Perspective.
This course examines the history of cities as spaces of public health concern since the nineteenth century, and seeks to understand how social, political, and economic contexts have shaped urban public health interventions.
Instructor(s): E. Anders
Area: Humanities, Social and Behavioral Sciences.

AS.140.382. Plagues and Societies in World History.
This course examines some of the most notable epidemics in world history from the Black Death to Ebola in 2014. Topics include the origins of epidemic diseases; the relations between epidemics and warfare, empires, and trade; and the sociocultural underpinnings of disease response.
Instructor(s): K. Arner
Area: Humanities, Social and Behavioral Sciences.

AS.140.390. Science and Technology in Latin America.
The course surveys the development of western science and technology in Hispanic America (1492 to the present). We begin studying the hybridization of scientific practices between European and Native American cultures during the early colonial era and end with the transfer of technologies and industrialization of the 20th century. We emphasize the role on science and technology in state formation, the acculturation of foreign ideas in colonial and postcolonial societies, and the role of intellectual elites in modernization programs.
Instructor(s): M. Portuondo
Area: Humanities, Social and Behavioral Sciences.

Juxtaposing Japanese environmental history and its reflection in popular media, the course will explore the intersection between technology, environment, and culture. The course will be accompanied by relevant movie screenings.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences.
An introductory course at the graduate level to the interpretation of historical evidence; to the social, intellectual, and political analysis of historical data; and to contemporary methods in the history of science, medicine, and technology.
Instructor(s): M. Hanson.

AS.140.618. Seminar in the History of Life Sciences.
For graduate students preparing fields in history of science.
Instructor(s): S. Leslie.

AS.140.626. Advanced Seminar.
Seminar designed for Ph.D. students currently working on their dissertation thesis.
Instructor(s): R. Kargon; Y. Frumer.

AS.140.635. The Postwar Reconstruction of Science.
Examines transformation of science after World War II in comparative perspective. Students will do a research project.
Instructor(s): R. Kargon; S. Kingsland.

AS.140.641. Departmental Colloquium.
Reports by staff members, students, and invited speakers.
Instructor(s): Y. Frumer.

AS.140.642. Colloquium.
Reports by faculty, students, and invited speakers.
Instructor(s): Y. Frumer.

AS.140.647. Science and the State, 1500-1900.
Comparative analysis of rise of modern state and rise of modern science from early modern period through 19th century. Students will write research papers.
Instructor(s): R. Kargon; S. Kingsland.

The course explores how early modern natural philosophers engaged with ancient philosophies to fashion the approaches to the study of nature associated with the Scientific Revolution. Topics discussed include Neoplatonism, Hermetism, Skepticism, Atomism and various other conceptions of nature and knowledge.
Instructor(s): M. Portuondo.

AS.140.652. Seminar in the History of Technology.
Reading seminar and general introduction to key historiographical, topical and methodological issues of the field. Readings include contributions to technological history from the perspectives of economics, cultural studies, sociology and archeology.
Instructor(s): M. Portuondo.

AS.140.655. Early Modern Science in France.
This seminar examines 17th- and 18th-century French science and medicine and their social, political, and institutional contexts. Participants will write a paper or dissertation chapters for discussion. Reading knowledge of French required.
Instructor(s): L. Principe.

AS.140.657. Science on Display.
History of collecting, exhibiting and interpreting science and technology, from Renaissance cabinets of curiosity to modern world's fairs, zoos, aquariums, films and science centers. Students will present their own exhibits as dioramas, web sites, documentaries or other formats. Cross-listed with Program in Museums and Society.
Instructor(s): S. Leslie.

AS.140.658. Main Currents in American Science and Technology.
A graduate seminar focusing on major periods and selected themes from the colonial era to the present.
Instructor(s): R. Kargon; S. Leslie.

AS.140.659. Looking Back at Science of Tomorrow.
The course will look at the history of science through the lens of science fiction, and explore the role of scientific imagination in the development of sciences.
Instructor(s): Y. Frumer.

AS.140.662. Research Seminar in the History of Science: The Laboratory in Theory and Practice since the 17th century.
This seminar traces the evolution and impact of the laboratory in the natural and social science 1600-2000.
Instructor(s): L. Principe; R. Kargon.

AS.140.667. Special Topics in the History of Physics.
This seminar will focus upon the history of electromagnetism, heat and energy, mechanics and the transition to modern physics, 1800-1920.
Readings, discussion, papers.
Instructor(s): R. Kargon.

AS.140.668. Technology in Context.
The course will explore topics in the history of technology focusing on a variety of methodologies pertinent to the subject.
Instructor(s): J. Greene; Y. Frumer.

AS.140.705. History of Science: Antiquity To Renaissance.
The first part of a three-part survey of the history of science. This course deals with the concepts, practice, and the cultural roles of scientific thought from classical antiquity to the time of Copernicus. Topics include the pre-Socratics, the systems of Plato and Aristotle and their continuing influence, Islamic science, Latin medieval scholasticism and the universities, and Renaissance hermeticism/natural magic. Interactions across science, art, technology, and theology are highlighted. Lecture meets with AS.140.301.
Instructor(s): L. Principe.

Seminar on major scientific developments from 18th-20th century. Weekly readings, discussion and class presentations. Students may attend lectures for 140.302.
Instructor(s): J. Mercelis; R. Kargon.

AS.140.710. Scientific Revolution.
Reading intensive seminar that studies the events and ideas that transformed western science from Medieval natural philosophy to the experimental sciences (1500-1720s). Lecture meets with AS.140.321.
Instructor(s): M. Portuondo.

AS.140.722. Wretched Subjects.
While earlier generations of historians often considered the topics of alchemy, astrology, magic, etc. as "pseudosciences," current scholarship shows them to be crucial parts of the history of science. This graduate research seminar explores the content, contributions, context, exile, and revival of these "wretched subjects." Students will write a substantial paper based on their original research.
Instructor(s): L. Principe.

Instructor(s): R. Kargon.

AS.140.802. Directed Readings & Diss.
Instructor(s): R. Kargon.

AS.140.803. Independent Study-Summer.
Instructor(s): S. Kingsland.
Instructor(s): S. Kingsland.

AS.140.812. Directed Readings & Diss.
Instructor(s): S. Kingsland.

Instructor(s): S. Leslie.

AS.140.832. Directed Readings & Diss.
Instructor(s): S. Leslie.

Instructor(s): L. Principe.

AS.140.836. Directed Readings & Diss.
Instructor(s): L. Principe.

Instructor(s): M. Portuondo.

AS.140.842. Directed Readings & Diss.
Instructor(s): M. Portuondo.

AS.140.843. Directed Reading & Dissertation.
Instructor(s): Y. Frumer.

AS.140.844. Directed Reading & Dissertation.
Instructor(s): Y. Frumer.

Instructor(s): J. Mercelis.

Instructor(s): R. Packard.

AS.140.854. Directed Readings & Diss.
Instructor(s): R. Packard.

AS.140.863. Directed Reading and Dissertation.
Instructor(s): G. Pomata.

AS.140.864. Directed Readings and Dissertation.
Instructor(s): G. Pomata.

Instructor(s): N. Comfort.

AS.140.874. Directed Readings & Diss.
Instructor(s): N. Comfort.

Instructor(s): M. Hanson.

AS.140.876. Directed Reading & Dissertation.
Instructor(s): M. Hanson.

AS.140.877. Directed Reading & Dissertation.
Instructor(s): J. Greene.

AS.140.878. Directed Readings and Dissertation.
Instructor(s): J. Greene.

Instructor(s): D. Todes.

AS.140.892. Dir Rdg & Dissertation.
Instructor(s): D. Todes.

Instructor(s): M. Fissell.

AS.140.894. Directed Readings & Diss.
Instructor(s): M. Fissell.

Instructor(s): G. Mooney.

AS.140.896. Directed Readings & Diss.
Instructor(s): G. Mooney.

Cross Listed Courses

History of Art

AS.010.233. Art and Astrology in the Middle Ages.
This course explores the relationship between art and astrology from the early Middle Ages to the early Renaissance. We look at a wide range of media—mosaic, painting, metalwork, manuscripts, and sculpture—that speak to the central place of astrology in medieval systems of knowledge, and the practical uses of astrology for medicine and politics. Readings and discussions cover a variety of themes, including the transmission of astrological knowledge, the emergence of largescale astrological mural programs, the use of precious stones and amulets, and the ways in which artworks probe the tensions between astrology and Christian theology. A recurring topic will be principle of “celestial influence”—the idea that the stars emit rays that affect people and events on earth—and its implications for artistic production and reception, as well as how art objects could even predict, or represent predictions of, future events. Primary sources (in English translation) include Albertus Magnus, Abu Ma’shar, al-Kindi, Roger Bacon, and others. Secondary readings include Aby Warburg, Erwin Panofsky, Fritz Saxl, Michael Camille, Georges Didi-Huberman, and others.
Instructor(s): M. Hauknes
Area: Humanities.

AS.010.302. The World as Image: Art and Knowledge in the Middle Ages.
This class will explore the relationship between art and knowledge in the Middle Ages (600-1400 CE). In particular, we will examine the ways in which medieval painters, sculptors, and architects engaged with the cultural phenomenon of “encyclopedism” by creating artworks that sought to capture all the world’s knowledge in a single visual program. In our exploration of this topic we will consider a wide range of works, from medieval maps and scientific manuscripts to large-scale tapestries and the architectural programs of the great Gothic cathedrals. Central themes include text-image relationships and the role of pictorial techniques, such as allegory, personification, and analogy for visualizing complex ideas. We will also examine the representation of knowledge in medieval poetry and see how medieval authors employed ekphrasis to create visual artworks within their texts to serve as placeholders for encyclopedic learning.
Instructor(s): M. Hauknes
Area: Humanities.

AS.010.707. Therapies of Art and Literature in Early Modern Europe.
This seminar examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch’s neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian “wisdom” genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, innovating therapies that were at once sacramental and philosophical, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.
Instructor(s): M. Merback.
Anthropology

**AS.070.352. Evolution, Ecology, Becoming.**
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.610
Area: Humanities, Social and Behavioral Sciences.

**AS.070.610. Evolution, Ecology, Becoming.**

Co-listed with AS.070.352
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies

**AS.130.259. Ancient Science and Technology.**
A survey of scientific practices and technological innovations in the ancient world, including astronomy, medicine, law, and divination. Special attention will be devoted to the relationship between magic and science during the periods covered.
Instructor(s): P. Delnero
Area: Humanities, Social and Behavioral Sciences.

Political Science

**AS.190.471. The University and Society.**
In the 20th century, American universities became the envy of the world, leading in most categories of scholarly productivity and attracting students from every nation. In recent years, though, American higher education has come to face a number of challenges including rapidly rising costs, administrative bloat, corporatization and moocification. We will examine the problems and promises of American higher education, the political struggles within the university and the place of the university in the larger society. Upper classes and Grad Students only.
Instructor(s): B. Ginsberg; R. Kargon
Area: Social and Behavioral Sciences.

German Romance Languages Literatures

**AS.211.237. Literature and Medicine.**
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s “In the Cold” and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: “Philadelphia” (Jonathan Demme, 1993), “Melancholia” (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.

**AS.213.237. Literature and Medicine.**

Instructor(s): E. Strowick
Area: Humanities.

Humanities Center

**AS.300.228. Brain and Society.**
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites luminosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.
East Asian Studies

**AS.310.303. A World Upturned: Cultures of Catastrophe in Japan.**
Focusing on earthquake science and earthquake lore, radioactive mutation and nuclear decimation, this course will consider the relationship between technological culture and large-scale cataclysm. In addition to treating a broad array of written, graphic, and filmic representations of Japan’s past and potential catastrophes, we will also be keeping a close and careful eye on present developments in Japan’s 2011 earthquake/tsunami/nuclear disaster.

Instructor(s): R. Sayre
Area: Humanities, Social and Behavioral Sciences.

**Program in Museums and Society**

**AS.389.275. Interpreting Sites & Collections: An Introduction to Museum Education.**
Part public history, part introduction to museum practices, this hands-on course explores how heritage areas and museums serve communities through interpretation. Each year, students partner with a community to develop research-based, visitor-centered interpretive material, in the 2015 Baltimore National Heritage Area. Field trips and community meetings will be a significant part of the course. Cross-listed with History and History of Science. M&S practicum course. Class usually meets 1:30 - 3:50 except for days with field trips.

Instructor(s): E. Maloney
Area: Humanities, Social and Behavioral Sciences.

**AS.389.301. Curating Material Culture for the Digital Age.**
JHU pioneered the concept of the modern research university in the United States, but what does that mean for the everyday experiences of its students, faculty, staff and friends? Excavate the history of this place through the things collected, made and used here since the university’s founding in 1876. Students research the material culture of Hopkins and present their findings on an interactive website: collectionsweb.jhu.edu. Course includes digital media labs. Cross-listed with History and History of Science. M&S practicum.

Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

**AS.389.450. Readings in Material Culture.**
Objects, things, “stuff”- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.

Instructor(s): E. Rodini; R. Brown
Area: Humanities.

**AS.389.650. Readings in Material Culture.**
Objects, things, “stuff”- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.

Instructor(s): E. Rodini; R. Brown
Area: Humanities.

Humanities Center

The Humanities Center reflects a characteristic quality of Johns Hopkins University as an intellectual community. The coordinated study of Western civilization through its literature, art, philosophy, and history has been one of the oldest continuing concerns at Hopkins. Because it has remained by design and tradition the smallest of the major American universities and because of the interdisciplinary interests of some of its most distinguished faculty, Hopkins has fostered to a remarkable degree the free exchange between scholars and students across departmental boundaries. In addition to its programmatic concern with comparative literature, intellectual history, and feminist theory, the Humanities Center does much to coordinate such exchange, which it encourages among students and scholars at all levels of their careers.

Supplementing its regular course offerings, the Humanities Center from time to time sponsors conferences, colloquia, and short-term seminars on topics of special interest to its graduate students and to the intellectual community at large. The center is also responsible for publishing annually the Comparative Literature issue of MLN; graduate students may apply to work as editorial assistants in its production and are invited to contribute to its reviews of current publications.

A recent development has been the appointment of several distinguished scholars as associates of the Humanities Center for terms of variable length. Each associate visits the campus once a year to teach an intensive seminar open to graduate students (and in certain cases to advanced undergraduates) in the Humanities Center as well as in other departments. The associates also meet informally with interested students and faculty and in general play an active role in the intellectual life of the university.

The Humanities Center’s activities for undergraduates address two different needs. For students interested in a general liberal arts preparation or one of the university’s preprofessional programs, the Center provides a broad introduction to the documents and thought of Western culture. For freshmen the Center offers the Great Books at Hopkins course, as well as a variable array of courses taught by the Center’s faculty. For students interested in preparing for graduate school, the Center also offers a fundamental preparation geared to the individual’s specific talents that can be the basis for more specialized humanistic study at the graduate level. Qualified juniors and seniors, as well as sophomores planning to study abroad in their junior year, are provided the opportunity to pursue an independent and often interdisciplinary research project through the Honors Program. In either case, the Center stresses skill in critical reading and writing, sophistication in the use of research tools, and supervised independent study. The coherence of each individual’s program depends upon careful consultation with the faculty advisor.

The Humanities Center does not offer a departmental major.

**Honors Program in the Humanities**

The Humanities Center Honors Program was initiated in 1976, the centennial of the founding of Johns Hopkins University. The program offers all qualified undergraduates the possibility of pursuing an independent and often interdisciplinary research project in the junior and senior year. Students can propose a topic in any humanistic discipline, including intellectual or cultural history, English and comparative literature, women and gender studies, minority literature and culture, film studies, anthropology, philosophy, and others. Past topics have also examined points of intersection between the arts and the sciences, so that the Honors Program in the Humanities also give majors outside the humanities a chance to broaden and combine their studies.
Requirements

To be eligible, a student's performance in courses taken in the humanities, and particularly in the chosen field(s) of study, should be distinctly above average, and the proposed topic should show coherence, focus, and seriousness of purpose. Each project must be sponsored by two faculty members, one of whom will be the primary advisor. In appropriate cases, one of these sponsors may be external to the university. Successful completion of the Honors Program is conditional on completion of the student's research thesis and participation in the Honors Seminar for two years, the second of which must be the student's senior year.

Application process

This is a two-year program normally beginning in the junior year, with applications accepted in the spring semester of the sophomore year. Second-semester freshmen who plan to study abroad in their junior year or who already possess the necessary qualifications are also encouraged to apply. Applications can either be submitted by email to yi.ping.ong@gmail.com or submitted in hard copy to Yi-Ping Ong in Gilman Hall 213. All applications should include:

1. A completed application form, including the name of at least one faculty member the student plans to work with
2. Brief statement of purpose outlining the proposed thesis topic, with initial bibliography
3. Unofficial transcript of undergraduate course work

Required Course Work

Sophomore year (optional)

It is recommended that sophomores who plan to study abroad in their junior year, as well as those who are ready to begin their honors research, should consider participating in the Honors Seminar during their sophomore year. In general, such students should follow the course work as described below for the junior year.

Junior year

1. Two courses chosen from relevant offerings in the Humanities Center curriculum. Students' work will be based on undergraduate courses offered by the core faculty of the Humanities Center and the course offerings of faculty with joint appointments in the Humanities Center.
2. A year-long Honors Seminar for all students in the program, in which the general progress of the students' writing and research will be discussed and senior students will present work-in-progress reports. The seminar meets once every two weeks and participation is mandatory for all students enrolled in the Honors Program.
3. Optional independent study course on thesis project with one or both sponsors.

Junior agenda

• September-October: Students should identify and meet with a prospective faculty advisor. Two faculty advisors are required for the final thesis; at least one of these advisors must be a Humanities Center faculty member or affiliate. Once students have received a commitment from two advisors to supervise the thesis, they should begin to compose a comprehensive reading list in consultation with their advisor.

• November-January: Using the reading list as a guide, students will conduct exploratory research in the field of their proposed project.
• February-March: Students will present a 3-5 page prospectus, formulating the central questions of the thesis, in the Honors Seminar.

Senior year

1. Independent study course in the spring semester toward completion of the thesis.
2. Two courses, as above, with Humanities Center faculty and affiliates.
3. Continued participation in the two-semester Honors Seminar (see above under "junior year" for description), with periodic "work-in-progress" reports and oral presentation of the thesis research in the spring semester.

Senior agenda

• Students will complete theses in consultation with their advisor and continue to attend the Honors Seminar. In April and May, students will present their final theses in the Honors Seminar.

Great Books at Hopkins

This course introduces students to the humanities at Johns Hopkins through exploration of some of the Western world's most important literary works of art. Great Books at Hopkins is a course designed for first-year undergraduates that examines some of the greatest works of the literary and philosophical tradition in Europe and the Americas. With lectures, panel discussions, multimedia presentations, and small seminars, professors from a variety of academic disciplines lead students in exploring authors from Homer to the present. Close reading and intensive writing instruction are hallmarks of the course, as is a varied reading list which has included Dante's Inferno, Cervante's Don Quixote, and Woolf's A Room of One's Own.

The Center sponsors programs of study leading to the Ph.D. degree in two general fields: comparative literature and intellectual history. These programs are designed with the cooperation of the faculty in the adjacent literary and historical departments. Only a few highly qualified applicants can be admitted; the center gives priority to candidates whose proposed course of study is congruent with faculty interests and strengths. Click here for degree requirements.

Building on its successful doctoral and undergraduate honors programs, the Humanities Center has recently introduced a one-year Master of Arts program in Humanistic Studies.

Requirements for the Ph.D. Degree

Each student works with an ad hoc committee of three faculty members who help to design a coherent, individual program of studies. During the first two years the candidate works closely with each of his or her advisors. The course of studies, seminars, and tutorials leads to three area examinations administered by the advisory committee. During the second year, qualified students are invited to teach under faculty supervision, and on occasion advanced students have been allowed to offer undergraduate seminars of their own design.

Program in Comparative Literature

Normally, candidates for the Ph.D. in comparative literature should be competent in three national literatures and have a general familiarity...
with critical theory. Students in this program are encouraged to spend at least one year of study abroad, usually as members of groups working in Paris, Florence, Hamburg, Geneva, or Madrid in programs sponsored by the modern language departments and the Center. The University maintains the Villa Spelman in Florence as a study center, and the departments of German and Romance Languages and Literatures have regular programs of faculty exchange.

Students in the comparative literature program can apply for a joint major with the Department of German and Romance Languages and Literatures. They become supervised teaching assistants in that department and receive a master’s degree in German upon completion of the field examinations, before the doctoral degree in comparative literature. On a more ad hoc basis, similar arrangements for well-qualified candidates can generally be made with the departments of Classics and German and Romance Languages and Literatures.

**Program in Intellectual History**

The Center’s doctoral program also allows flexibility in the construction of a course of study in intellectual history involving comparatist and interdisciplinary approaches. Candidates should also note related special programs at Hopkins, such as the program in political theory and the research facilities of the Institute of the History of Medicine.

**Advisor**

Upon their arrival, entering students should select, in consultation with the Director, a member of the Center’s faculty to serve as their academic advisor, pro tem. As time goes on and their interests further define themselves, they may wish to change advisors and may very well wind up working most closely with faculty in another department; should this become the case, they should nevertheless meet regularly—that is, each semester—to discuss their progress with whomever in the Center is serving as Director of Graduate Studies.

**Course Work**

During their first two years, students are expected to take two seminars for credit each semester, in addition to whatever language courses they may enroll in and whatever courses they choose to audit. They should select seminars—which need not be restricted to Humanities Center offerings—in consultation with their advisors. Students arriving after having taken graduate courses elsewhere should discuss with the director of graduate studies the possibility of having that work counted toward satisfying the Center’s course requirements.

**Third-Year Review**

At some point during their third year of residence-after completing all outstanding seminar papers, and preferably by mid-year-students will have their work reviewed by a faculty committee composed of three teachers from among the Humanities Center faculty and from among the faculty from the other departments with whom the student plans to conduct field exams. The purpose of the review is to allow the faculty to assess the student’s progress, to clarify her/his status as regards remaining course work, and to define future fields. In preparation for this review, the student will circulate, in advance of the meeting, materials that the student judges to be work that will best serve the purpose of the review.

**Field Examinations**

Students are expected, in their third and fourth years, to complete three field exams. The purpose of requirement is two-fold: the exams may serve to help a student refine her/his thinking about a dissertation topic, or they may be a means of extending and deepening a student’s knowledge of an area of studies in which s/he proposes to teach and conduct research. The examinations themselves may take a variety of forms: one could work further on a project begun in a seminar and produce a longer paper that would become part of a dissertation; one could read one’s way into and across a particular field, writing a series of short papers on one’s reading, or else sitting for a written or oral examination on the material studied; one could design and teach an undergraduate course in one’s area of interest; one could complete the requirements for a M.A. degree in another department, as a way of strengthening one’s claim to teach in that field. These are choices to be discussed with one’s committee at the third-year review.

**Undergraduate Teaching**

During one’s years at the Center one will have a number of opportunities to develop one’s skills and confidence as a teacher. In the second year and thereafter, students will ordinarily serve as assistants in courses taught by the Center’s faculty or, if appropriate, in courses in other departments: in the past, our students have taught in the French and German language programs, in English composition and literature courses, as well as assisting in history, philosophy and political science courses. More experienced students are encouraged to teach courses of their own invention as a way of completing a field exam, or in competition for one of the Dean’s Teaching Fellowships, or simply to add to the Center’s array of offerings.

**Dissertation Review**

A second formal review of a student’s work will take place after the completion of field exams, either in the fourth or in the fall semester of a student’s fifth year. The aim of this review is to bring the student together with the faculty with whom s/he will write a dissertation. This review will not take place until the student believes that s/he has a substantial piece of work associated with the dissertation, e.g., the draft of a chapter. This work will be circulated before the review, along with a prospectus of 10-40 pages, to the faculty the student wishes to have as dissertation advisors. (If all of these advisors are from outside the Humanities Center, one of the Center’s faculty, selected by the student, will also sit in on the review.) This discussion is not intended to replace the Graduate Board Oral, which will take place after the dissertation has been completed, but will serve to mark the transition from work on the field exams to the preparation and writing of a thesis.

**Departmental Presentations**

Late in a student’s work on a dissertation—preferably in the fifth year or the beginning of the sixth—s/he will be asked to give a talk on material from her/his dissertation to the assembled students and faculty of the Center and invited guests. The aim of this requirement is to give students experience in the more formal presentation of their work, to make possible a wider range of response to that work than a dissertation committee can provide, and to allow all students of the Center—whose research interests vary widely—to become better acquainted with each other’s projects.
Requirements for the MA in Humanistic Studies

The MA in Humanistic Studies is aimed both at seniors from across the University who seek to deepen their education by way of interdisciplinary study in literature, philosophy, and religion during an added fifth year of study as well as at students who graduated elsewhere and who consider pursuing graduate studies in intellectual history or comparative literature here or at other universities.

This terminal MA consists of eight courses over two semesters and a MA thesis with directed study during the summer months. The program places an emphasis on elaborating an individualized curriculum and on close collaboration with Humanities Center faculty in the writing of the thesis. Students accepted into the program from within Johns Hopkins benefit from a tuition reduction.

The coursework will follow the following template:

**Fall Semester**
- Graduate Seminar

**Spring Semester**
- Graduate Seminar

**Graduate Seminar**
- Graduate Seminar
- Graduate Seminar
- Graduate Seminar

**Master's Colloquium**
- Humanities Thesis Seminar

**Summer Semester**
- Directed Thesis Study
- Thesis Writing

To apply, please submit the following to [http://grad.jhu.edu/apply/apply-now/](http://grad.jhu.edu/apply/apply-now/):

- Official Application
- Statement of purpose
- Three letters of recommendation
- Transcripts
- Sample of work
- Supplementary Application Form (Language Form)
- GRE scores and subject (optional)
- TOEFL/IELTS scores (if applicable)

**Financial Aid**

Tuition grants, stipends, and teaching fellowships are available to doctoral candidates.

For current faculty and contact information go to [http://humctr.jhu.edu/people/](http://humctr.jhu.edu/people/)

**Faculty**

**Professors Emeriti**
- Neil Hertz
- Ruth Leys
- Richard A. Macksey
- Stephen G. Nichols

**Professors**
- Michael Fried
  J. R. Herbert Boone Chair in the Humanities (secondary appointment: Department of the History of Art); Job Placement Officer. Modern art and literature, critical theory, modern poetry
- Paola Marrati
  Director of Graduate Studies Modern and contemporary French Philosophy, American Pragmatism and Skepticism, Phenomenology, Philosophy and Cinema, Feminist and Queer Theory; (secondary appointment: Department of Philosophy)

**Associate Professor**
- Leonardo Lisi
  Director of Undergraduate Studies European literature of the long nineteenth century; European modernism; Kierkegaard and German idealism; tragedy and the tragic; philosophical aesthetics and literary forms

**Assistant Professors**
- Anne Eakin Moss
  Russian literature and cinema
- Yi-Ping Ong
  19th- and 20th-century literature and philosophy, the novel, modernism, existentialism, ethics, and justice in contemporary Anglophone literature

**Adjunct Associate Professor**
- Orna Ophir
  History and theory of psychoanalysis, psychology, and psychiatry; medical humanities and the sociology of knowledge; psychoanalytic aesthetics, Melanie Klein

**Senior Lecturer**
- Elizabeth Patton
  Director, Great Books at Hopkins Women Writers of the Renaissance and Reformation, with a research emphasis on post-Reformation English Catholicism

**Joint Appointments**
- Sharon Achinstein
  Sir William Osler Professor of English (English): Early modern literature, poetry and poetics, gender
- Christopher Celenza
  Charles Homer Haskins Professor, Classics and German and Romance Languages and Literatures
- Veena Das

**Director**
- Hent de Vries
  Russ Family Chair in the Humanities; Director, Humanities Center (secondary appointment: Department of Philosophy) Modern European thought, history and critique of metaphysics, philosophies of religion, political theologies, concepts of violence, literature and temporality
Throughout, we will visit museums of Baltimore history and consider how Baltimore history is enshrined in what became America's national anthem, highlighting Baltimore's role in the War of 1812 and the way Baltimore and Norfolk supported the British. This course will explore the founding and early history of Baltimore, including the history of African Americans. 

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

**AS.100.287. B'More: Baltimore's Beginnings.**
This course will explore the founding and early history of Baltimore, highlighting Baltimore's role in the War of 1812 and the way Baltimore history was enshrined in what became America's national anthem. Throughout, we will visit museums of Baltimore history and consider how Baltimore history is conveyed to the public.
Instructor(s): S. Gamble
Area: Humanities.

**AS.300.100. B'More: Homelessness.**
Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. In Baltimore, as in any major city, many urban poor find themselves without a home and without shelter. For these individuals, life on the streets is desperate and dangerous. Students will read, discuss, and debate about the causes and implications of homelessness in Baltimore, and explore present policies and potential solutions. Guest speakers include homeless rights advocates from both local government and community groups. Students will also participate in service directly affecting homeless persons.
Prerequisites: Students may enroll in one B'More course only.
AS.371.188 OR AS.371.189 OR AS.271.119 OR AS.100.285 OR AS.140.318 OR AS.360.108 OR AS.360.122 OR AS.360.171
Instructor(s): T. Gottbreh
Area: Humanities, Social and Behavioral Sciences.

**AS.300.102. Great Minds.**
Introductory survey of foundational texts of modern Western literature, thought and cinema. This semester will include works by Descartes, Marx, Dostoevsky, Tolstoy, Woolf, Wittgenstein, Heidegger, Arendt, and Pierre Hadot, and films by Deiga Vertov and Carl Theodor Dreyer. The course is taught in lectures and seminar discussions led by the course faculty.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati
Area: Humanities.

**AS.300.108. The Uncanny.**
Freud describes the uncanny as a strange familiarity. Disturbing for the subject which discovers its own ignorance, it is a way to reconsider what one takes for granted as "home". We'll analyze this experience through philosophy and psychology, literature and film.
Area: Humanities.

**AS.300.111. Shakespeare and his 'Goddess'.**
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’ is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. In this course we will trace that tradition from the perspective of Shakespeare and his contemporaries, finishing the semester with several plays, including 'The Taming of the Shrew,' that further illustrate and problematize Shakespeare’s ‘goddess’ reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scève and Les Dames des Roches; and the later English reflections on the sonnet tradition by Sir Philip Sidney, Shakespeare, and Sidney’s niece, Lady Mary Wroth. All works will be read in translation. Freshmen only.
Instructor(s): E. Patton
Area: Humanities.

**AS.300.113. Freshmen Seminar: Drama and Gender in Shakespeare's England.**
In this seminar we will read male and female authored plays and discuss how they reflect contemporary social expectations in Tudor and Stuart England. Authors include William Shakespeare; Mary Sidney, Countess of Pembroke; Christopher Marlowe; Elizabeth Cary; Ben Jonson; and Mary Sidney, Lady Wroth.
Instructor(s): E. Patton
Area: Humanities.
**AS.300.115. Introduction to Romantic Poetry.**

This course offers an introduction to romantic poetry through a comparative approach to three of the movement’s key authors: Friedrich Hölderlin, John Keats, and Giacomo Leopardi. We will work through their main writings in detail along with considerations of their cultural contexts and theoretical and critical approaches to romanticism more broadly.

Instructor(s): L. Lisi

Area: Humanities.

**AS.300.119. Grammar of Loss: Iranian Cinema since 1979 Revolution.**

This course is an interpretive and critical engagement with a number of social, political, and ethical issues that are raised in five Iranian movies made during decades since the 1979 Iranian Revolution until present. We will deal with immanent problems in the form and structure of the movies in their relation to the actual and open problems in social and political structures in Iran. We will watch works by Abbas Kiarostami, Asghar Farhadi and others.

Instructor(s): O. Mehrgan

Area: Humanities, Social and Behavioral Sciences.

**AS.300.133. Freshmen Seminar: Women of Epic Fame in Literature and Drama, 800 BCE-1650 CE.**

From Homer’s Odyssey to Shakespeare’s Antony and Cleopatra, powerful women who achieve their ends by working from within the system are often overlooked or not fully explored. Our readings and discussions will foreground these women of fiction, while we also consider the social conditions of their living contemporaries. Readings will include: Homer’s Odyssey (Penelope); Virgil’s Aenead (Dido); Dante’s Inferno (Beatrice); Milton’s Paradise Lost (Eve), and several accounts of Cleopatra in plays by Shakespeare and his contemporary women writers. Cross listed with Theater Arts, Writing Seminars, and WGS.

Instructor(s): E. Patton

Area: Humanities.

**AS.300.139. Introduction to Intellectual History.**

This course offers a conceptual and historical introduction to Intellectual History. What makes the “history of ideas” different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call “ideas”? In what sense do they have a history? These are examples of the kind of questions addressed in the course.

Instructor(s): P. Marratí; S. Carmel

Area: Humanities.

**AS.300.143. Introduction to Comparative Literature.**

This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.

Instructor(s): L. Lisi

Area: Humanities.

**AS.300.200. Idealist Aesthetics: Kant to Adorno.**

This course deals with major aesthetic categories in (German) idealist aesthetics. Starting with Kant’s analytic of the beautiful, we examine the idealist concepts of the artwork (Goethe, Schiller, Hegel), and its relation to history, society, and truth (Adorno). To do so, we engage with artworks, also trying to show why and where these categories are set aside in the avant-garde and contemporary aesthetic culture.

Area: Humanities.

**AS.300.201. Film and Philosophy.**

Philosophers have thought about the nature of freedom, beauty, and time for millennia. But what can film teach us about these ideas? This course will stage a dialogue between philosophers like Friedrich Nietzsche and William James and films by directors such as Woody Allen, Wes Anderson, and Stanley Kubrick. Our goal is not only to use philosophy in order to better appreciate films, but also to use films in order to resolve some of the most persistent questions posed in the history of philosophy.

Area: Humanities.

**AS.300.202. Life and Form in Modern Thought.**

The idea of form-giving and law-giving is essential to modern thought, so is the conflict between forms and individual and collective lives. The course is a philosophical treatment of the concept of form in four spheres: aesthetics, morality, politics, history. We will read and discuss texts by, among others, Kant, Nietzsche, Lukacs, Benjamin, Schmitt, Adorno and interpret certain art- and literary works by Balzac, Malevich, Stevens, Kafka.

Instructor(s): O. Mehrgan

Area: Humanities.

**AS.300.207. A Mix of Voices: Chinese Literatures from Late Imperial through Modern.**

This course examines the arts and culture of China from 1368-2000, with major focus on writers. We will begin with artists of the Ming (1368-1644) and Qing (1644-1911), focusing first on canonical voices: court poets, authors of classical fiction, literati essayists, calligraphers and painters. Outside of the court urban artists observed a dramatically changing world around them. Fiction, drama, memoir and mass-produced arts explored new social alignments and freedoms. The twentieth century brought revolution and party governance, along with arts born of mass media: periodicals, film and wood block print. Finally, post-Mao avant-garde artists both retrieved traditional aesthetics and explored new venues and visions. This look at the literature of China will require both close reading of texts as well as an interdisciplinary examination of the cultural factors that shape literatures

Instructor(s): V. Cass

Area: Humanities.
AS.300.211. Great Poems of the Americas.
This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot’s The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire’s Notebook of a Return to the Native Land, Vicente Huidobro’s playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of “the Americas” as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we’ll examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.
Instructor(s): R. Galvin
Area: Humanities.

AS.300.213. Homelessness in America.
This course examines homelessness in the United States from multiple perspectives. Students will hear first-hand from individuals who have experienced homelessness as well as experts in the field.
Instructor(s): T. Gottbreht
Area: Humanities.

AS.300.215. Monsters, Miracles, and Men from Mars.
From medieval mystical visions of the Godhead to modern accounts of alien abductions, encounters with the supernatural and paranormal have long been sources of terror and amazement. This course explores visual and narrative representations of these encounters. It is a media-intensive course that juxtaposes a variety of sources from the medieval period, the space age, and contemporary film and television.
Instructor(s): K. Boyce-Jacino; T. Golan
Area: Humanities.

AS.300.220. Astrofuturism at the Final Frontier.
From Sputnik to Sun Ra to Star Wars, the middle of the twentieth century was consumed by an enthusiasm for all things outer space. This course will examine Space Age popular culture - primarily from the astroturfuturism movement, which believed in the endless utopian possibilities of space. We will work with a diverse constellation of materials, from 2001: A Space Odyssey to Star Trek, and beyond.
Instructor(s): K. Boyce-Jacino
Area: Humanities.

This seminar celebrates the university’s recent acquisition of State Papers Online (1509-1714), which contains searchable digital images of thousands of contemporary manuscripts. While we read plays, poetry, and essays by such figures as Queen Elizabeth, William Shakespeare, members of the Sydney family, Elizabeth Cary, John Donne, Aemelia Lanyer, Robert Southwell, Andrew Marvell, William Marlowe, Jane Cavendish, Elizabeth Brackley, and Katherine Philips, we will also be carrying out on-line searches of correspondences, wills, court documents, spy reports (including play-by-play accounts of houses dismantled in searches for hidden priests), and letters of condolence from Queen Elizabeth alongside decoded messages revealing plots to unseat her. In addition to searching virtual archives students will be introduced to early modern paleography, in part through visits to Johns Hopkins University’s brick-and-mortar libraries to consult actual manuscripts, incunabula, and illegal imprints from the 16th and 17th centuries.
Instructor(s): E. Patton

AS.300.228. Brain and Society.
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroeconomics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.

AS.300.229. Film and Philosophy.
This course offers an introduction to basic concepts in the theory of film and classic problems in the history of philosophy. Our goal is to stage a dialogue between philosophy and the history of modern film in order to see the unique ways that cinema expresses ideas like the nature of beauty and human freedom. The course is organized chronologically as we watch films, both foreign and American, ranging from the 1940s to 2010s.
Instructor(s): L. McGrath
Area: Humanities.

AS.300.230. The Mystical Tradition.
Is the mystic a thinker, a poet, a heretic, or a saint? Is mysticism a branch of speculative philosophy? A secret teaching for reaching oneness with God? A mode of saying the utterly unsayable? These questions we will address by traversing the realms of Sufism, Kabbalah and negative theology, reading dialogues, poems, commentaries and sermons, written by men and women, Greeks and Jews, Muslims and Christians, from Antiquity to Early Modern times.
Instructor(s): M. Buijs
Area: Humanities.
AS.300.231. Introduction to Comparative Literature.
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.233. Politics of Intellectual Life in Iran.
This course has set itself a double goal: reviewing the major intellectual traditions in the volatile political context of modern Iran, and reflecting on the concrete experience of intellectual life in contemporary Iran. We will examine the form and the specific contents of this experience, how it is historically informed by politics and how it relates to history. Wrestling with the West is at the heart of this experience.
Instructor(s): O. Mehrghan
Area: Humanities.

AS.300.235. Freud’s Concept of Anxiety.
We will examine the evolution of Freud’s concept of anxiety, explore its origins, and consider its impact on post-Freudian psychology.
Instructor(s): A. Rot
Area: Humanities.

AS.300.239. Philosophy and the Emotions.
We will read some of the most important texts in the history of the philosophy of the emotions, including works by Plato, Descartes, Spinoza, Schopenhauer, Heidegger, and Freud. We will discuss themes such as love, shame, apathy, anxiety, the mind-body problem, the notion of spirit, the notion of mood, and the overall problem of the distinction between emotion and reason.
Instructor(s): A. Rot
Area: Humanities.

AS.300.241. The Literature of the Everyday.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read closely a set of novels by Flaubert, Mann, Dickens, Zola, Tolstoy, and Woolf from the period between 1850 and 1950 in which the development of realism reaches its climax. These novels explore the nature of work, family, the body, consciousness, and the changing relation between individual and tradition in modernity. We will situate these novels in their social, historical, and literary contexts, and establish a set of terms for the formal study of the novel as a genre (plot, character, setting, narrative, etc.). (Students of all levels who are interested in literature are encouraged to take this course.)
Instructor(s): Y. Ong
Area: Humanities.

This course explores the history of the bicycle from its invention in the early nineteenth century to the early twentieth century, when it was easily accessible and widely used by people living in cities and towns. During this period, the bicycle became a focal point of cultural anxieties about gender, class, and the city itself. Using mostly 19th-century sources, we will study the history of the bicycles construction and production as well as its reception in Victorian cities.
Instructor(s): K. Boyce-Jacino
Area: Humanities.

AS.300.281. Sovereignty and Modern Drama.
This course is interested in the relationship between sovereignty and drama. By placing the common individual center stage, twentieth-century modern drama achieved a theatrical revolution. And yet the modern theater has not completely shed itself of its former preoccupation with kings and their undoing, as evidenced by the royal figures who show up in plays by influential playwrights as various in their political and artistic commitments as Strindberg, Ibsen, Jarry, Yeats, Shaw, Pirandello, O’Neill, Anouilh, Brecht, Sartre, Ionesco, and others. This course seeks to examine how, when, and why royal personages are employed in modern drama. What does the theater have to say about sovereignty and authority? About humanism and anti-humanism? Is theater linked to sovereignty? If so, how? This course will consider the political, philosophical, and theological critiques implicit in the plays where sovereigns are found, paying close attention as well to the problem of theatricality.
Dean’s Teaching Prize Fellowship Course.
Instructor(s): N. Jerr
Area: Humanities.

“In America the natural man has triumphed over the imported book,” announced José Martí. The call to cast off the literary forms of Old Europe echoed throughout the hemisphere during the 20th century, as poets sought to write a new kind of “American” poetry. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems, such that it has become the “post-epic.” We will investigate the long poem in 20th-century North and Latin America, from the encyclopedic Cantos of Ezra Pound and the sweeping Canto General of Pablo Neruda to briefer works by Derek Walcott and Gwendolyn Brooks, and fragmented series by Gertrude Stein and César Vallejo. We will read texts including Charles Olson’s sprawling history of America, The Maximus Poems, and William Carlos William’s Paterson; Aimé Césaire’s Notebook of a Return to My Native Land and Kamau Brathwaite’s The Arrivants; Elizabeth Bishop’s cartographic North & South; Octavio Paz’s single, 584-line, cyclical sentence, Sunstone; and Vicente Huidobro’s careening, linguistically playful Altazor. As we test our definition of “post-epic” against these texts, we will consider whether the term may be applied equally to the heroic tale and the “open field” poem. To situate the long poem in history, we will examine changes in poetic form alongside questions of modernization and globalization, technology and development, and socio-political transformation.
Area: Humanities.
This course will introduce students to some of the key texts of science fiction as the genre emerged during the nineteenth century. We will consider the intellectual contexts for the form's development in Britain, France, and the United States, as well as its emerging narrative conventions. In particular, we will consider how early sci-fi writers used non-realistic modes to dramatize problems and discoveries were at once real and yet hard to fathom within the parameters of everyday cognition: deep geological time, alternative social arrangements, post-human landscapes. Texts may include H.G. Wells' The Time Machine, Charlotte Perkins Gilman's Herland, Samuel Butler's Erewhon, Edward Bulwer Lytton's The Coming Race, William Morris' News from Nowhere, and Jules Verne's 20,000 Leagues Under the Sea.
Instructor(s): S. Lecoutre
Area: Humanities.

AS.300.290. Freshman Seminar: Shakespeare and his "Goddess": real and imaginary lovers in the poetry and drama of early modern Europe.
Shakespeare's description of his lover's eyes as 'nothing like the sun' is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. Incorporating music and drama, we will examine that sonnet tradition from the perspective of Shakespeare and his contemporaries, tracing both the historical roots of the Shakespearian sonnet form its influence on the music of the present day, and finishing the semester with Shakespeare's The Taming of the Shrew, a play that further illustrates and problematizes Shakespeare's 'goddess' reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scève, Louis Labé, Joachim du Bellay and Perenette du Guillet; and later reflections on the sonnet by Shakespeare and his English contemporaries: Sir Philip Sidney; Sidney's niece, Mary Herbert, Lady Wroth; John Donne; Robert Southwell; and Katherine Phillips. All continental works will be read in translation.
Instructor(s): E. Patton
Area: Humanities.

This interdisciplinary seminar examines the concept of home and the condition of exile in 20th century Russian and Soviet culture from a variety of theoretical and methodological perspectives. Students will be introduced to classics of Soviet dissident, exilic, and official literature (Akhmatova, Brodsky, Nabokov, Bulgakov, Zamyatin), Soviet films (including Tarkovsky's Solaris), as well as key theoretical texts about what it means to be "at home." Open to freshmen and sophomores with approval of professor.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.301. Life, Vitality, Thought. Philosophy and the Natural Sciences in Nineteenth Century Europe.
Last year neuroscientists at MIT shined an optogenetic light on brain cells in order to artificially stimulate memories. If every detail of our past has a particular location in the brain, then we could alter, and even destroy, memories. Does this mean that humans are like machines whose history can be erased as easily as we delete files on a computer? Or are memories, like consciousness, not so easily reducible to brain structures? This class will examine how these and other questions shaped the history of modern biology and experimental psychology beginning in the nineteenth century. We will read the works of prominent biologists, psychologists, and philosophers who were all involved in a rich debate over the nature of life and thought.
Instructor(s): L. McGrath
Area: Humanities.

AS.300.304. Philosophy of Religion.
This course explores the rationality of religious beliefs and the rules that govern their context in religious life. Topics explored include faith and reason, religious experience, religious language and proofs for God's existence.
Instructor(s): D. Dubois
Area: Humanities.

AS.300.305. Islamic Philosophy.
This course is an introduction to key concepts and seminal texts of Islamic Philosophy in the classical period, running from the 7th to the 13th century. Although instrumental to the transmission of Greek philosophy and to the rise of modern philosophy in the western world, Islamic philosophy is not merely a conduit of transmission. Philosophers on Islamic lands, offered original philosophical solution to both old problems, and new problems that arose with monotheism. We will begin our examination of the specificity of Islamic Philosophy by situating it in its historical and political context. We will have to tackle fundamental questions: How did philosophers who wrote in Arabic translate and transmit Greek philosophical texts? What does it mean to do philosophy within an Islamic context? Is it not an oxymoron to talk about philosophy within a religious context? The course is divided into three sections that treat of three general fields: politics, metaphysics and psychology and discusses the major Philosophers of the classical period, with particular attention paid to the work of Alfarabi, Avicenna and Averroes.
Instructor(s): L. Ferhat
Area: Humanities.

AS.300.310. Introduction to Psychoanalysis.
One of the most controversial intellectual endeavors of the 20th century, psychoanalysis is a theory about human nature, motivation, behavior, development and experience, as well as a clinical method of treatment for psychological disorders. We will read texts by Freud, Jung, Ferenczi, Rank, Horney, Klein, Anna Freud, Lacan, and others.
Instructor(s): O. Ophir
Area: Humanities.
AS.300.311. Sovereignty and Modern Drama.
What does the modern theater have to say about sovereignty and authority? Does this align with or challenge the political discourse? How is theater linked to sovereignty? Considering a wide range of plays, this course explores the ways the notion of sovereignty persists as a theme in modern drama despite its commitments to the common, everyday hero. We will focus on the political, philosophical, and theological critiques implicit in the plays where sovereigns are found. From the short chamber plays of Yeats based on Noh drama, to the epic theatre of Brecht, from the Abstract drama of Jarry and the Absurd theatre of Ionesco, to the Naturalism of Strindberg and the Realism of O’Neill, from the meta-theatricity of Pirandello to the Minimalism of Beckett, students will encounter a variety of artistic styles and commitments, giving them an overview of many of the major movements that mark modern drama. Dean’s Teaching Fellowship
Instructor(s): N. Jerr
Area: Humanities.

AS.300.312. Imagining Revolution and Utopia.
Examines theories of revolution and utopia and responses in literature, art and film. Primary case study is Russia and the Soviet Union, with comparative look at influential European works and contemporary politics. Topics include gender and the family, terror, communism and communalism, and the avant-garde in art and film. Cross listed with Studies of Women and Gender, and Sexuality, and Film & Media Studies
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.317. Russian Novel.
Russian authors began writing novels in the shadow of counterparts in Western Europe, and thus had the chance to experiment with the form and scope of genres and themes they found in European literature: Alexander Pushkin's novel in verse Eugene Onegin pays homage to Byron’s Don Juan and satirizes Richardson’s Pamela; Mikhail Lermontov's nested stories A Hero of Our Time owes a debt to Romantic and gothic fiction, and Nikolai Gogol’s Dead Souls brings Dante’s Inferno to the Russian provinces. From these literary forefathers emerged the likes of Feodor Dostoevsky and Leo Tolstoy, who made a lasting impact on world literature with their psychological and philosophical novels. This course examines the Russian novel in its historical and cultural context alongside contributions of Russian literary criticism in defining novel form and genre.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.318. The Modernist Novel: Mann, Woolf, and Joyce.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century - Thomas Mann, Virginia Woolf, and James Joyce – who explored and exploded narrative techniques for depicting what Woolf called the “luminous halo” of life. Selected novels include: Death in Venice, Buddenbrooks, Jacob’s Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.319. Skepticism and Theology.
This course examines the relation between the history of philosophical theology and the foundations of modern skepticism by focusing on their mutual point of departure: the concept of the human being as an essentially "finite" being "limited" in its capacity to know others, the world, and God.
Instructor(s): T. Dika
Area: Humanities.

AS.300.322. Reason, Religion, and Modernism in Europe.
Amidst the rise in psychological research in France and the secular reforms of the Third Republic, French philosophical and religious thinkers upended their Catholic tradition in the late nineteenth century. This seminar explores the Modernist turn in Catholicism, which drew on scientific advancements in order to challenge Church hierarchies and fundamentally transform Catholics’ personal relationship to God. Our objective is to examine the intersection of science, faith, and society in historical and philosophical perspective.
Instructor(s): L. McGrath
Area: Humanities.

AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies.
Comedy and musical comedy film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare films of the era in a variety of genres (musical, epic, Western, drama), examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.326. Comparative Modernisms.
Dynamic, unprecedented literary innovation marks the first part of the 20th century. This course moves from Dadaism, Surrealism, and the Harlem Renaissance, through Anglo-American, Caribbean, and Brazilian modernisms, and the Latin American vanguard. We’ll investigate literary experimentation in connection with the visual arts, modernization, colonialism, race, gender, and war. We will read novels, poetry, and essays from major writers who may include Apollinaire, André Breton, Marcel Proust; Gertrude Stein, HD, Djuna Barnes, Elsa von Freytag-Loringhoven, Mina Loy, T.S. Eliot; James Joyce, W.B. Yeats; Langston Hughes, Zora Neale Hurston, Jean Toomer; Claude McKay, Aimé Césaire, Louise Bennett, Jean Rhys, Nicolás Guillén; Oswald de Andrade, Julio Cortázar, Oliverio Girondo, Jorge Luis Borges.
Instructor(s): R. Galvin
Area: Humanities.

AS.300.327. Antigone: All the World’s a Stage.
Best known from Sophocles’ plays, Antigone - with her fierce familial loyalty and religious piety, her opposition to the law, and her willingness to sacrifice herself and her future marriage - has held a special fascination for modern and contemporary thinkers, showing up not only in theatrical (re)productions, but also as an exemplary figure for philosophers, political and psychoanalytic theorists, feminist thinkers, and novelists. What is more, her influence has not been limited to the Western tradition, for she has been reconceived on stages all over the world: Europe, the Americas, Asia, and Africa. Tracing key moments of the reception of Antigone from the nineteenth-century to the present, this course will explore what it is about Antigone that has proven so irresistible to playwrights and thinkers with a wide variety of political and aesthetic commitments. Giving particular attention to performances of Antigone around the globe, we will address how these versions negotiate the stakes of adaptation.
Instructor(s): N. Jerr
Area: Humanities.
AS.300.330. Trauma in Theory, Film, and Fiction.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald ("The Emigrants"), Lanzmann ("Shoah"), Spiegelman ("In the Shadow of No Towers"), McCarthy ("Remainder"), and others.
Instructor(s): R. Leys
Area: Humanities, Social and Behavioral Sciences.

AS.300.333. Melancholy in Science, Literature, and Film.
This course explores the manifold nature of melancholy from an interdisciplinary perspective that combines sciences, history of medicine, and the arts. Defined by Greek medicine as the excess of black bile, melancholy, in its long history, has been seen as disease of the soul, state of intellectual grace, or psychological condition. The course will examine chronologically the development and variety of the meanings of melancholy between medical texts, visual representations, poetry, psychoanalytic theory, and films. The works analyzed will include, among others, those by Galen, Robert Burton, Albrecht Dürer, Shakespeare, Cervantes, Baudelaire, Freud, Lars von Trier.
Instructor(s): E. Fabietti
Area: Humanities.

AS.300.334. Comic Evolution: Stages in Comedy.
An eclectic tour of comic forms and theories from classical antiquity to contemporary practice. Although the textual focus will be on stage comedy, we'll also consider the comic in other forms & media—film [Keaton], comic strip [Herriman], and parodic satire. Some of the familiar questions on the agenda: topical vs. ‘perennial’ material, the social functions of comedy, the ‘shelf life’ of humor, butts & scapegoats, symmetries & asymmetries between comedy and tragedy, verbal & non-verbal comic devices, the general rhetoric of comedy, & the possibility of a GUT.
Instructor(s): R. Macksey
Area: Humanities.

AS.300.335. Victorian Literature as World Literature.
What does it mean to read literature in a global context? How are literary texts that we think of as products of distinct national cultures plugged into larger global systems – even if they seem unaware of it? In this course we’ll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker’s Dracula (1897) and Charles Dickens’s Great Expectations (1861). We will retrace how these books exercised cultural influence beyond the borders of Great Britain; how networks of trade, tourism, and imperial power brought authors from different cultures into contact with one another; and how Victorian texts have become a part of our culture in unexpected ways. Other primary texts may include Arthur Conan Doyle’s The Sign of Four (1890), the poetry of Romesh Chunder Dutt, and first-hand accounts of Oscar Wilde’s 1882 American lecture tour; critical readings will cover postcolonial theory, media theory, and histories of colonialism and urbanization.
Instructor(s): S. Lecourt
Area: Humanities.

AS.300.337. The Rise of the Modern Short Story.
Instructor(s): R. Macksey
Area: Humanities.

AS.300.338. Comic Evolution: Stages in Development of Comedy.
An eclectic tour of comic forms and theories from classical antiquity to contemporary practice. Although the textual focus will be on stage comedy, we'll also consider the comic in other forms and media—film [Keaton], comic strip [Herriman], and contemporary satire. Some of the familiar questions on the agenda: topical vs. ‘perennial’ material, the social functions of comedy, the ‘shelf life’ of humor, butts & scapegoats, symmetries & asymmetries between comedy and tragedy, verbal and non-verbal comic devices, the general rhetoric of comedy, and the possibility of a Grand Unified Theory. (Final paper.)
Instructor(s): R. Macksey
Area: Humanities.

AS.300.340. Thinking the Body/The Body Thinking: Introduction to Aesthetics from the Perspective of Dance.
In the nineteenth and twentieth centuries, dance has developed into a serious art form. However, philosophers of art have paid little attention to dance. Why is this the case? Is dance perhaps too corporeal or too unreflective or in some other way too marginal to be a fruitful topic for philosophical reflection? Or does the failure of mainstream philosophical aesthetics to take dance seriously perhaps signal unacknowledged biases in such approaches? Might dance, the art form whose medium is the human body, have something to contribute to current philosophical interest in rethinking the human body and, particularly, the relation between mind and body? Seeking responses to questions such as these, this course provides an introduction to the place of dance in the philosophy of art. The first half of the course examines portions of seven foundational texts in the philosophy of art and culture as well as philosophical accounts of dance that draw on these foundational texts in a range of ways. The aim is not only to explore dance from the perspective of traditional aesthetic theories, but also to explore such traditional theories from the perspective of arguably the art form which they have been most resistant to treating seriously. This oblique angle of entry into mainstream approaches to general aesthetic topics will bring into focus important questions that might be easily overlooked if one examines such theories only in light of their preferred examples of art. The second part of the course explores dance as its own mode of philosophical reflection, examining how the work of choreographers such as George Balanchine, Jerome Bel, William Forsythe, Crystal Pite and Yvonne Rainer explore the possibilities and limits of their medium: the human body. One proposal will be of particular concern: Might such instances of the body thinking bring into focus more adequate ways of thinking about the body?
Instructor(s): K. Boyce
Area: Humanities.
AS.300.343. Philosophy and Literary Form.
This course examines the difference literary form can make to the shaping of philosophical content. Philosophers have tended to treat literary form as merely ornamental. For this reason, they have often underestimated the philosophical significance not only of certain works of literature but also the literary form of even those works uncontroversially considered to be philosophical. This course explores the philosophical significance of literary forms in both kinds of works. The first half examines how and why Anglo-American philosophers have incorporated the interpretation of individual literary works into their philosophical writing. We will concentrate on three works of literature—Ibsen's A Doll's House, James's The Golden Bowl and Wordsworth's Prelude—each of which has attracted significant philosophical attention. The second half of the course examines how philosophers have brought literary analysis to bear in order to illuminate the philosophical achievement of certain canonical philosophical texts. We will concentrate on three literary forms—dialogue, meditation and confession—as these forms are instantiated by three works of philosophy: Plato's Republic, Descartes's Meditations and Wittgenstein's Philosophical Investigations.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.345. Madness Interpreted - The Schreber Case and its Many Readings.
Daniel Paul Schreber, the fin-de-siècle Senatspräsident of the Saxon Supreme Court, became the most famous psychiatric patient in the world. His 1903 Memoir of My Nervous Illness is known for being the most widely read account of madness in Western history. His rich psychotic, delusional world, as expressed in the bizarre, at times comic, at times painful, Memoir, with its unique cosmology, private theology, extraordinary creatures, transgressed sexuality, and cataclysmic vision of the universe, was first analyzed by Freud in 1911, but later inspired voluminous commentary by psychoanalysts, historians, philosophers, theologians, literary critics, essayists, scholars in political science and in queer studies. Whether he was paranoid schizophrenic, a victim of traumatic abuse, a solipsistic philosopher, a proto-fascist, or a cultural hero, his memoir lends itself to all these interpretations. Readings will include: Schreber, Freud, Klein, Lacan, Deleuze and Guattari, Canetti, de Certeau, Lingis, Lyotard, Santner, among others. Cross listed with GRLL, History.
Instructor(s): O. Ophir
Area: Humanities.

Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, Beauvoir and Barthes on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it mean to acknowledge another person's humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community? Cross listed with English.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change.
In contemporary discussions of climate change it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the current prospects of our ecological future. Authors to be studied will include: Lillo, Büchner, Balzac, Dickens, Marx and Engels, Ibsen, Weber, Conrad, Brecht, Miller, Steinbeck, as well as contemporary fiction, politics, and philosophy on climate change. Cross listed with English.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.350. Skepticism on Stage and Page.
This course explores influential interpretations of and responses to skepticism in literature, philosophy and theater. Case Studies will include: Descartes, Ibsen, James, Kafka, Kierkegaard, Poe, Shakespeare, and Wittgenstein.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.351. The Phenomenon of Boredom from an Interdisciplinary Perspective.
We will examine the history, philosophy, sociology, and psychology of boredom and consider the characteristics, concerns, and methods of the different fields and disciplinary frameworks in which this phenomenon has been studied.
Instructor(s): A. Rot
Area: Humanities.

AS.300.352. Fictions of Autobiography.
A comparative survey of autobiographical writing as a creative process. Beginning with a few classic examples (Augustine, Petrarch, Montaigne, Rousseau), the seminar will proceed to more recent adventures in the first-person singular. Modern instances will include self-creation in several genres and media, including narrative, dramatic, and cinematic forms. Seminar meets at 107 St. Martin's Road.
Instructor(s): R. Macksey
Area: Humanities.

AS.300.353. Present Mirth: Stages of Comedy.
A comparative survey of presentational comedies from Aristophanes to Beckett on stage and screen, with some attention to to the vexed question of theories of comedy [no laughing matter].
Instructor(s): O. Mehrghan; R. Macksey
Area: Humanities.
AS.300.356. From Literature to Film - the case of Israeli Cinema.
This course explores the differences and similarities between two artistic mediums: literature and cinema. Our case study will be the interesting transformation of Hebrew fiction into Israeli films—a dominant phenomenon in Israeli cinema since its very beginning. Our main framework will be narrative theories, but we will also consider the specific historical, ideological and geo-political aspects involved in this transformation. By comparing the two artistic modes and studying the transformation of 5 literary works into films, students will become familiar with the history of modern Hebrew literature, contemporary Israeli cinema, and the relationship between these two artistic mediums. Cross-listed with Jewish Studies, Film and Media Studies, and Writing Seminars
Instructor(s): N. Stahl
Area: Humanities.

AS.300.357. Forms of Modern Fiction.
A comparative tour of modern narrative forms from 3 continents. The emphasis is on the development of shorter fictional models, though some of the founders and innovators are better known for their novels. The emphasis will be on the emergence new structural, rhetorical, and thematic concerns, including adaptation to other media. There will be an optional hour for queries and discussion TBA.
Instructor(s): O. Mehran; R. Macksey
Area: Humanities.

This course examines innovative research, writings, and other media concerning homelessness in the United States, with special emphasis on critical/philosophical and interdisciplinary approaches that shed new light on the issue.
Instructor(s): T. Gottbreht
Area: Humanities.

AS.300.360. Critical Thinking and its History.
This course aims at discussing different conceptions of “critique” and “critical thinking” in modern and contemporary philosophy. Readings include: Descartes, Kant, Adorno, Foucault, Arendt, Said, Butler.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.361. Fiction & Case History: Constructive Reading.
A comparative seminar in the attentive reading of short fictions and other narratives. Attention to the reader’s share as well as that of the author in the construction of stories; consideration of the diagnostic and therapeutic uses of the imagination.
Instructor(s): R. Macksey
Area: Humanities.

AS.300.362. Beauty and the Predicate Calculus.
Fregg’s development of a predicate calculus made possible the evolution of a distinctively “analytic” tradition in philosophy. But arguably that tradition has failed to fully appreciate the implications of this important development. The course will begin by examining how Fregg himself understood the importance of his advance. It will then consider arguments to the effect that some of the most influential accounts of mind and action—namely those shaped by Donald Davidson—fail by failing to take this advance adequately into account. In light of these arguments in philosophy of mind and action, we will consider the implications of Fregg’s advance for aesthetics. The principle aim of the course will be to construct an account of art and criticism that takes those implications fully into account. Efforts to construct alternatives that overcome this purported failing will be examined.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.363. Reading Judith Shakespeare: poetry and drama by women writers in Elizabethan England (ca 1558-1650).
Virginia Woolf’s account of the thwarted career of Shakespeare’s hypothetical sister, Judith (in A Room of One’s Own) frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lanyer, Mary Wroth, and others. Students will create fictional biographies of “Judith Shakespeare” and her literary accomplishments. Cross listed with English, Theater Arts, Writing Seminars, and WGS.
Instructor(s): E. Patton
Area: Humanities.

AS.300.365. Desire in the Fin de siècle.
This course examines the obsession with desire at the turn of the 20th century in literature, drama, philosophy and social thought and its implications for notions of self and community in modernity. We will read comparatively across European, Russian and American cultures, including Stoker’s Dracula, Hamsun’s Hunger, plays by Chekhov, Strindberg, Ibsen, Wilde, and stories by Tolstoy, Gorky, Chopin and Larsen.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.366. Russian Avant-Garde Cinema.
Russian cinema was born out of the intense artistic experimentation of the fin-de-siècle avant-garde and developed in a climate of dramatic political and cultural change in the twenties and thirties. While subject to draconian censorship in the Soviet period, it nonetheless engaged in active dialogue with the film industries of Western Europe and America and had a lasting impact on world cinema. This course examines the extraordinary flourishing of avant-garde cinema in the Soviet Union in the 1920s and 30s including films by Eisenstein, Vertov, Pudovkin, and Dovzhenko, their theoretical writings, and their far-reaching influence on film and film theory. All readings in English, films subtitled in English.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.367. Seeing Like a Woman.
This seminar examines the problems of female desire, subjectivity, spectatorship and performance in fiction, poetry, memoir and film from a variety of cultures and theoretical perspectives. Readings include: de Beauvoir, Riley, Butler, Cixous, Tolstoy’s “Family Happiness,” Woolf’s Orlando, Larsen’s Passing; Poetry by Moore, Bishop, Plath, Akhamtova, Tsveetaeva and Szymborska. Films by Deren, Ophuls, Hitchcock, Potter, Campion, Akerman, Varda, Denis.
Instructor(s): A. Eakin Moss
Area: Humanities.
AS.300.369. The Bible and Philosophy (Introduction to Intellectual History).
This course will examine several attempts by ancient, modern, and contemporary thinkers to come to terms with the Biblical concept of creation and providence, revelation and prophecy, law and election, apocalypse and eschatology, with a special emphasis on the first articulation of the idea of Christian universalism, faith and justification, time and eternity, sacrifice and the body. Readings will include the entire corpus of St. Paul’s authentic letters, the major Scriptural passages on which he draws, but also selections from Philo of Alexandria, St. Augustine, Spinoza, Nietzsche, Karl Barth, Jakob Taubes, Alain Badiou, Giorgio Agamben, and others.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.370. What Computers Can’t Do and other Controversies.
A critical examination of recent debates over the interface between the humanities and the natural sciences. Topics include: computer models of the mind; consciousness and the brain; affect theory and the neurosciences; mirror neuron theory; literature and the natural sciences; the new trauma theory.
Instructor(s): R. Leys
Area: Humanities.

AS.300.371. The Modernist Novel: James, Woolf, and Joyce.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century - Henry James, Virginia Woolf, and James Joyce -- who explored and exploded narrative techniques for depicting what Woolf called the “luminous halo” of life. Selected works include: “The Beast in the Jungle,” The Portrait of a Lady, Jacob’s Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.377. Cinema and Philosophy.
Why is contemporary philosophy so interested in cinema? Do movies have anything to say about philosophical problems? What are the most productive ways of bringing films and philosophy into conversation?
Instructor(s): M. Shuster
Area: Humanities.

AS.300.379. Israeli Film and Literature.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli cinema and literature. The course will follow both a thematic and chronological path in order to study the ways in which Israeli cinema and literature reflect political, ideological, social, and cultural aspects of contemporary Israel. In this context, we will read well-known works by several major authors and will watch major Israeli films from the 1940s to these days. We will also use a comparative approach to study the different artistic means of both mediums and to evaluate their successes in representing the various tensions of Israeli society and culture.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.300.383. History of Madness from the Bible to DSM-V.
Madmen, lunatics or the insane, have seen an extraordinary variety of responses and attitudes across the centuries. Whether seen as a “true” phenomenon or as socially constructed “madness” was defined and treated, examined and controlled, diagnosed and “cured” according to the spirit of the time. This course will follow the varied social imageries of “madness” throughout Western history, from the Bible to the contemporary and controversial Diagnostic Statistical Manual (DSM) in its most recent 5th edition. Alongside primary texts by Hippocrates, Avicenna, Pinel, and Freud and secondary texts by Michel Foucault, Ian Hacking, Edward Shorter, and Elaine Showalter, among others, we will acquaint ourselves with first-person accounts of “madness” and its different forms of treatment, ranging from lunatic asylum, through electric-shock treatments and lobotomies to psychoanalysis. The course will explore the interaction between the historical and social, scientific and political as well as economical factors that have shaped the views of “madness” and its treatment.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.384. Modern Korean Literature and Film.
We will examine twentieth century Korean culture through short stories that are canonical in modern Korean literature and through a series of films associated with New Korean Cinema. One aim of the course is to gain a sense of the history against which the literary and cinematic artifacts obtain their representative artistic status. A second aim is to inquire into the relationship between written and filmic texts in order to see the limits and advantages of one medium over another for representing national culture. No prior familiarity with Korean language is required.
Instructor(s): S. Rhee
Area: Humanities.

AS.300.388. Introduction to the Philosophy of Time.
This course explores answers to the question “What is time?” that take account of time as something both inside and outside of us. Readings include, among others, Aristotle, Augustine, Kant, Bergson, Heidegger, and Einstein. Cross-listed with Philosophy
Instructor(s): N. Schott
Area: Humanities.

AS.300.390. Obama and Philosophy.
The course will investigate the theological and philosophical as well as rhetorical and literary backgrounds and guiding principles that have informed Barack Obama’s writings, speeches, and political strategies so far. While paying minute attention to a few pivotal controversial recent debates, both in domestic policy and international relations, our central focus will be on understanding the curious blend of Obama’s version of so-called Christian realism, influenced by Reinhold Niebuhr, among others, and of what we will call his deep pragmatism. Special attention will be paid to his early appeal to “simple ideas” and “small miracles,” each of them yielding the Biblical and sobered injunction of a “hope against hope. Cross-listed with Philosophy
Instructor(s): H. de Vries
Area: Humanities.
**AS.300.392. Forms of Moral Community: The Contemporary World Novel.**

Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, and Beauvoir on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it mean to acknowledge another person's humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community?

Instructor(s): Y. Ong
Area: Humanities.

**AS.300.393. The Literature of the Everyday: Realism in the 19th- and 20th-Century Novel.**

The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read works by Flaubert, Dickens, Zola, Eliot, Mann, Tolstoy, and Woolf in the context of critical theories of realism.

Instructor(s): Y. Ong
Area: Humanities.

**AS.300.395. Stages of Comedy: Theory & Practice.**

A comparative survey of dramatic and cinematic events, with some attention to the various attempts to present a theory of comedy. Seminar will include some food and drinks to support the discussions.

Instructor(s): R. Macksey
Area: Humanities.

**AS.300.397. How Freud Changed the Way We Think.**

An examination of aspects of the history and theory of psychoanalysis, focusing on the question of origins in Freud's work. Texts by Freud, Laplanche, Lacan, Derrida, and others.

Instructor(s): R. Leys
Area: Humanities.

**AS.300.398. Zionism, Post-Zionism and Modern Hebrew Literature.**

This course studies the development of modern Hebrew literature through its relation to Zionism and Post-Zionism. Based on a close reading of both literary and non-literary Zionist and Post-Zionist texts, we will explore the thematic, social, political, aesthetic and stylistic influences that these two movements have had on modern Hebrew literature. Writers to be discussed include: Hertzel, Nordau, Achad ha'am, Jabotinsky, Kluasner, Brenner, Berdycewski, Agnon, Greenberg, Kahana-Carmon, Oz, Yehoshua, Grossman, Castel-Bloom, and Laor. Students may receive credit for AS.216.398 or AS.300.398, but not both.

Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.

Instructor(s): N. Stahl
Area: Humanities.

**AS.300.399. Cinema and Philosophy.**

Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?

Instructor(s): P. Marrati
Area: Humanities.

**AS.300.403. Honors Seminar.**

The Honors Program in the Humanities offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. After one year qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider attending this seminar. Please keep the Special Note: Limited to Juniors and Seniors and Sophomores admitted to the Honors Program in the Humanities. Permission of instructor required.

Instructor(s): L. Lisi
Area: Humanities.

**AS.300.406. Marcel Proust, Literature and Art.**

Proust's great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust's Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Cross-listed GRLL-French

Instructor(s): J. Neefs; M. Fried
Area: Humanities.

**AS.300.408. Lyric Modernity.**

A comparative literature course on modern lyric and poetics. The main issue of the course is how the lyric voice is constructed and sustained under the pressures of modernization in the United States, Europe, and Korea. We will also emphasize issues of translation and the relationship of music and poetry. Readings will include texts by Adorno, Benjamin, Grossman, von Hallberg and Waters, and poems by Dickinson, Rilke, and Kim among others. All readings available in English. Cross-listing requested with East Asian Studies, GRLL, and English

Instructor(s): S. Rhee
Area: Humanities.

**AS.300.411. Animal Minds.**

An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-list with AS.150.490

Instructor(s): M. Williams; R. Leys
Area: Humanities.
AS.300.412. Flaubert.
Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Education sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Education sentimentale edition required: GF Flammarion, 2003. Co-listed with 300.604
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.300.413. Israeli poetry.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, David Avidan, Dalia Rabikovitch, Yona Wollach, Maya Bejerano, and Yitzhak Laor. These works will be read against the background of the poetry of previous literary generations of writers such as H.N Bialik, Avraham Shlonsky, Natan Alterman and Lea Goldberg in an attempt to uncover changes in style, themes and aesthetic. Through close reading of the poems, the course traces the unique style and aesthetic of each poet, and aims at presenting a wide picture of contemporary Hebrew poetry. Class will be conducted in English and texts will be read in both English translation and the Hebrew original. Open for both Hebrew and non-Hebrew speakers. Students may receive credit for AS.216.300 or AS.300.413, but not both.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl.

In this seminar on 20th-c. poetry of the Americas, we will explore the relations between land, language, and identity. Our point of departure, informed by de Andrade’s “Cannibal Manifesto,” will be the idea that all literary texts form a body upon which writers may feast when they compose new works. Devouring, plundering, and appropriating will be central concepts for our seminar. We’ll debate the politics of literary transculturation (hybridity/mestizaje/métissage), and discuss diasporic and multilingual U.S. American poetry (Louisiana Creole poetry, Nuyorican Poets Café, etc.). We will also investigate issues of authorship and originality; constraint, sampling, and parody; and poetic hoaxes and frauds. Readings may include theoretical texts from Édouard Glissant, Angel Rama, Néstor García Canclini, and Roberto Schwarz, as well as Deleuze, Foucault, Kristeva, and Barthes. Poetry may be drawn from Caribbean writers Césaire, Senghor, Walcott, Brathwaite, Marti, Palés Matos; Brazilians Haroldo and Augusto de Campos; and North Americans Langston Hughes, Claude McKay, Myung-Mi Kim, Kenneth Goldsmith, Susan Howe, and Christian Bök.
Instructor(s): R. Galvin
Area: Humanities.

AS.300.416. Wittgenstein, Religion, and Ethics.
Starting out from the Lecture on Ethics, this course will investigate Wittgenstein’s approaches to religion and ethics, mysticism and the spiritual, and contrast these with those of his contemporaries and later interpreters. Readings will include Ludwig Wittgenstein, Martin Heidegger, Elizabeth Anscombe, C.S. Lewis, Hilary Putnam, Richard Rorty, Stanley Cavell, Martin Stokhof, and others.
Instructor(s): H. de Vries
Area: Humanities.

With its forced dissemination after the Anschluss in 1938, psychoanalysis shifted its center of gravity from Vienna to London creating “a new kind of diaspora.” After Freud’s death, the efforts to protect his legacy while incorporating new findings and novel theories to the main body of his work prompted a series of “scientific meetings” known also as the “unusual business meetings” or as the “controversial discussions” within the British Psychoanalytic Society. Reading the minutes, reports, and papers presented during the four years of these discussions (1941-1945), students will be exposed to the important intellectual contributions that led not only to a thorough exploration of major psychoanalytic theories and concepts such as unconscious phantasy, regression, the death instinct, and the infant’s emotional life, but also to the ways these controversial innovations shaped methods and preoccupations of post-war psychoanalysis. Readings will include: Anna Freud, Klein, Winnicott, Isaccs, Strachey, Glover among others.
Cross listed with History.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.419. 1966 before and after: French theory.
The “Languages of Criticism” conference held at Hopkins marked a watershed moment in the history of literary studies and redefined, for many scholars and intellectuals, the nature of humanistic inquiries. This course involves the close study of key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities.

AS.300.420. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis.
Freud’s idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be “un-American.” In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.610
Instructor(s): O. Ophir
Area: Humanities.

This course will introduce the concepts, practices, and history of spiritual exercises and its modern transformations. Readings include Marcus Aurelius, Philo of Alexandria, St. Augustine, St. Ignatius of Loyola, Henri Bergson, Ludwig Wittgenstein, Stanley Cavell, and Pierre Hadot.
Instructor(s): H. de Vries
Area: Humanities.
AS.300.423. Contemporary Theory: New Materialisms, New Vitalisms, and the Post- Traumatic Subject.
A discussion of: recent versions of materialism and realism, including materialisms informed by neuroscience; vital materialism; the latest developments in trauma and affect theory; and related trends. Texts by Zizek, Malabou, Damasio, Pippin, McDowell, Johnston, Brassier, Churchland, LeDoux, and others.
Instructor(s): R. Leys
Area: Humanities.

AS.300.427. Reading Freud.
Sigmund Freud was one of the most influential thinkers of the 20th century. Psychoanalysis, which was his theory of mind, a research method, and a therapeutic technique, offered concepts that pervade Western culture and the humanities. In this seminar which is designed for students from all fields of knowledge, we will closely and chronologically read Freud’s major works, follow his developing theories, and become familiar with psychoanalytic concepts such as the unconscious, the uncanny, instincts, sexuality and aggression, which illuminated mysteries in other fields, from literature to anthropology, from political science to religious studies, and from philosophy to the arts.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.431. Russian Literary Modernisms.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.641
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.433. Cavell: Skepticism and the Ordinary.
This seminar studies the main works and concepts of Stanley Cavell, one of the most original and influential philosophers of the 20th century. It will address in particular his analyses of skepticism, the ordinary, and moral perfectionism as they are expressed in philosophy, but also in literature and films.
Instructor(s): P. Marrati
Area: Humanities.

This seminar will address the major writings and guiding concepts of Emmanuel Levinas and investigate his increasing critical role as a touchstone and dividing line in the formation of twentieth century and contemporary schools of thought (phenomenology, pragmatism, post-analytic philosophy, literary, feminist, and political theory, anthropology). Additional readings will include Stanley Cavell, Jacques Derrida, Vasily Grossman, Jean-François Lyotard, and Hilary Putnam.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.507. Honors Seminar.
The Honors Seminar is a mandatory component of the Honors Program in Humanities, which offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. After one year qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider applying to the Program. In the 2014-2015 academic year, the Seminar will focus on a close reading of Coetzee’s Elizabeth Costello and associated texts, which will serve as a point of departure for discussion on the relation between different intellectual disciplines and pursuits.
Instructor(s): A. Eakin Moss; M. Shuster
Area: Humanities.

AS.300.508. Honors Seminar.
The Honors Seminar is a mandatory component of the Honors Program in Humanities, which offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. After one year qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider applying to the Program. In the 2015-2016 academic year, the Seminar will focus on a close reading of Coetzee’s Elizabeth Costello and associated texts, which will serve as a point of departure for discussion on the relation between different intellectual disciplines and the idea of the humanities.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.509. Independent Research.
Instructor(s): E. Patton.

AS.300.599. Independent Study.
Instructor(s): L. Lisi; R. Macksey.

AS.300.602. Theory, Painting, Vision.
Reading in philosophy, theory, criticism. Texts by Merleau-Ponty, Heidegger, Foucault, Derrida, Cavell, and Pippin, among others.
Instructor(s): M. Fried.

AS.300.603. Readings in Russian Poetry, Prose and Theory.
Readings to be selected by mutual agreement among the students and instructor. Reading knowledge of Russian required.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.604. Flaubert.
Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Education sentimentale as a second crucial event in aesthetic modernity, twenty years after Madame Bovary. Seminar will be taught in French and English. L’Education sentimentale edition required: GF Flammarión, 2003. Co-listed with 300.412
Instructor(s): J. Neefs; M. Fried.
AS.300.607. Topics in the History and Theory of Psychoanalysis: The Problem of Origns.
An examination of aspects of the history and theory of psychoanalysis, focusing on the question of origins in Freud's work. Texts by Freud, Laplanche, Lacan, Derrida, and others.
Instructor(s): R. Leys.

AS.300.610. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis.
Freud's idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be "un-American." In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.420
Instructor(s): O. Ophir
Area: Humanities.

AS.300.611. The Good Life.
What is a good life? Philosophical and literary texts on the nature of virtue, autonomy, beauty, friendship, and integrity as necessary achievements for a good life. Plato, Aristotle, Montaigne, Shakespeare, Rousseau, Kant, Emerson, Pater, Murdoch, Tolstoy, Chekhov, James, Woolf, Naipaul, Coetzee, Ishiguro, Kundera. Please note: this is an graduate seminar, open to interested and qualified undergraduates.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.612. Topics in Kierkegaard's Philosophy: Repetition, Revelation, Anxiety, and Fear.
Close study of the rhetoric and arguments of four of Kierkegaard’s most important works from 1843-44: Repetition, Philosophical Fragments, The Concept of Anxiety, and Fear and Trembling. Contextualizing readings by Kant, Schelling, Hegel, and J.L. Heiberg.
Instructor(s): L. Lisi.

AS.300.613. The Ancient Quarrel: Literature and Philosophy.
Key turning points in the debate over which kind of knowledge, philosophical or literary, most benefits the soul and society. We will investigate the various ways in which literature has been construed as moral or immoral, and the use of literary modes of persuasion and argument in philosophical texts. Possible authors include: Homer, Plato, Aristotle, Sidney, Shakespeare, Rousseau, Kierkegaard, Tolstoy, Heidegger, Sartre, Beauvoir, Nussbaum, Cavell, Diamond, James, Coetzee, and Mulhall.
Instructor(s): Y. Ong.

AS.300.615. Classics of Literary Criticism.
Readings will include key texts by Eric Auerbach, several Russian Formalists, Northrop Frye, Roland Barthes, Stanley Cavell, Eve Sedgwick Kosofsky, Friedrich Kittler, and Stephen Greenblatt.
Instructor(s): L. Lisi; M. Fried
Area: Humanities.

AS.300.616. Thinking the Body/The Body Thinking: Introduction to Aesthetics from the Perspective of Dance.
In the nineteenth and twentieth centuries, dance has developed into a serious art form. However, philosophers of art have paid little attention to dance. Why is this the case? Is dance perhaps too corporeal or too unrefractive or in some other way too marginal to be a fruitful topic for philosophical reflection? Or does the failure of mainstream philosophical aesthetics to take dance seriously perhaps signal unacknowledged biases in such approaches? Might dance, the art form whose medium is the human body, have something to contribute to current philosophical interest in rethinking the human body and, particularly, the relation between mind and body? Seeking responses to questions such as these, this course provides an introduction to the place of dance in the philosophy of art. The first half of the course examines portions of seven foundational texts in the philosophy of art and culture as well as philosophical accounts of dance that draw on these foundational texts in a range of ways. The aim is not only to explore dance from the perspective of traditional aesthetic theories, but also to explore such traditional theories from the perspective of arguably the art form which they have been most resistant to treating seriously. This oblique angle of entry into mainstream approaches to general aesthetic topics will bring into focus important questions that might be easily overlooked if one examines such theories only in light of their preferred examples of art. The second part of the course explores dance as itself a mode of philosophical reflection, examining how the work of choreographers such as George Balanchine, Jerome Bel, William Forsythe, Crystal Pite and Yvonne Rainer explore the possibilities and limits of their medium: the human body. One proposal will be of particular concern: Might such instances of the body thinking bring into focus more adequate ways of thinking about the body?
Instructor(s): K. Boyce
Area: Humanities.

AS.300.617. Philosophy and Literature in Either/Or.
Celebrated and reviled alike, Kierkegaard’s 1843 Either/Or has been viewed as both the culmination of the Enlightenment project and the birth of existentialism, a playful work of romantic literature and a piece of late-Hegelian philosophy, a vindication of the secular everyday and the articulation of a modern faith in a transcendent God. In this course we read the work closely and in its entirety and pay particular attention to the relation between its philosophical arguments and literary forms of presentation.
Instructor(s): L. Lisi.

AS.300.621. Heidegger’s Being and Time I.
This seminar consists of an integral reading of Martin Heidegger’s 1927 magnum opus Being and Time (Sein und Zeit) in light of its historical and philosophical context as well as its contemporary reception in both the phenomenological, existentialist, hermeneutic, and analytic traditions. We will start out, this semester, from the First Division. Readings will include the commentaries by Ryle, Gadamer, Levinas, Derrida, Marion, Dreyfus, Brandom, and others.
Instructor(s): H. de Vries; P. Marrati.

AS.300.625. Russian Literary and Critical Theory.
Close reading of major authors from the Russian literary theoretical and critical tradition including Bakhtin, Elkinbaum, Jakobson, Lotman, Shklovsky and Tynianov. Student will present primary sources or case studies from their own fields and research.
Instructor(s): A. Eakin Moss.
AS.300.626. Philosophy of and the Novel.
The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhtin, Hamburger, Sartr, Beauvoir, Ricoeur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaubert. Instructor(s): R. Tobias; Y. Ong.

AS.300.627. Graduate Proseminar: Introduction to Literary Theory.
Instructor(s): Y. Ong 
Area: Humanities.

AS.300.628. Contemporary Theory: New Materialisms, New Vitalisms, and the Post-Traumatic Subject.
A discussion of: recent versions of materialism and realism, including materialisms informed by neuroscience; vital materialism; the latest developments in trauma and affect theory; and related trends. Texts by Zizek, Malabou, Damasio, Pippin, McDowell, Johnston, Brassier, Churchland, LeDoux, and others. Instructor(s): R. Leys 
Area: Humanities.

This seminar examines what in Bergson’s philosophy remains, or becomes, challenging for contemporary debates. Particular emphasis is given to his concepts of life and time, but also to his philosophical anthropology and his reflections on the ambiguous interplay between war, technology, and religion. Instructor(s): P. Marrati.

AS.300.631. Russian Literary Modernisms.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shiklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.431 Instructor(s): A. Eakin Moss 
Area: Humanities.

AS.300.637. Faust and Philosophy.
This course combines the close reading of Goethe’s epic Faust with the study of a number of philosophical texts that either influenced Goethe’s work or were influenced by it. Particular attention will be paid to the relation between literary form and philosophical argument. Authors besides Goethe will include Fichte, Schelling, Schiller, Friedrich and August Wilhelm Schlegel, Hegel, Kierkegaard, Karl Rosenkranz and Theodor Vischer. Discussion in English; reading knowledge of German required 
Instructor(s): L. Lisi 
Area: Humanities.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewpoints of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well. Course taught in French. Recommended Course Background: AS.212.333 and 212.334 
Instructor(s): J. Neefs; M. Fried 
Area: Humanities 
Writing Intensive.

AS.300.644. Theory, Painting, Vision.
Theory, Painting, Vision: Readings to be selected but they will definitely include texts by Barthes, Cavell, Wall, and Michaels. 
Instructor(s): M. Fried.

AS.300.649. The Fate of Nothing from Goethe to Heidegger.
Nothing and negativity play a central role in the literature and philosophy of the long nineteenth-century. In this course, we look closely at a number of approaches to these problematic concepts in Goethe, Hölderlin, Hegel, Schopenhauer, Leopardi, Kierkegaard, Nietzsche and Heidegger. Instructor(s): L. Lisi.

AS.300.651. What Remains of the Human?.
This seminar discusses modern and contemporary philosophical and anthropological conceptions of the human and its uncertain boundaries: between the cultural and natural, the human and the inhuman, the animal and the spiritual, the living and the dead and so forth. Particular attention will be devoted to the ethical and political implications any definition of the human inevitably invites. 
Instructor(s): P. Marrati.

AS.300.653. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic. 
Instructor(s): H. de Vries; M. Williams.

AS.300.658. Must We Mean What We Say?.
Starting out from Stanley Cavell’s programmatic book and title, this seminar will revisit his discussion of J.L. Austin, John Searle, Jacques Derrida, and Shoshana Felman, with special emphasis on these authors’ theories of intentionality, seriousness, and sincerity, and with reference to the ancient and modern concepts of tragedy on which they partly rely. In addition to the aforementioned thinkers’ relevant works, reading will include selections from Euripides, Henrik Ibsen, Isaiah Berlin, Emmanuel Levinas, and Jean-Luc Marion. 
Instructor(s): H. de Vries.
AS.300.674. Literature and/as Ethics.
Arguments for the immorality of literature, the morality of literature, and the amorality of literature. Can a literary text be evaluated on ethical grounds, and how? How do literary texts make ethical arguments? What does it mean to read literary texts or do literary criticism in an ethical mode? We will be concerned throughout with the philosophical uses, and abuses, of literary forms. Possible authors and texts: Plato, Chaucer, Shakespeare, Flaubert, Zola, Dostoevsky, Lawrence, Hardy, Woolf, Forster, Beauvoir, Coetzee, Oe, Cavell, The Wire, and Mad Men. Primary texts will be accompanied by a selection of essays from moral philosophy and ethical criticism.
Instructor(s): Y. Ong.

AS.300.676. Heidegger’s Being and Time II.
This seminar consist of an integral reading and discussion of Martin Heidegger's 1927 magnum opus Being and Time (Sein und Zeit) in light of its historical and philosophical context as well as its contemporary reception in both the phenomenological, existentialist, hermeneutic, and analytic traditions. We will focus primarily on the Second Division but also revisit central questions from Division One. However, it will not be necessary for students to have attended the previous seminar on this earlier part of Heidegger’s major work. Recommended readings will include the commentaries by Emmanuel Levinas, Jacques Derrida, Jean-Greisch, Jean-Luc Marion, Hubert Dreyfus, Robert Brandom, and others.
Cross-listed with Philosophy
Instructor(s): H. de Vries.

AS.300.684. Marcel Proust, Literature and Art.
Proust's great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l’ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, À l’ombre des jeunes filles en fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Undergraduate are Seniors permitted to take this course.
Recommended course background: At least 2 212.3xx courses
Instructor(s): J. Neefs; M. Fried.

AS.300.686. Mysticism and Mechanism.
This seminar will investigate the historical, conceptual, and practical intertwining of spirit and automatism, mind and machine, global religion and technological media. We will start out from the spiritual automaton motif as it appears in Spinoza and Leibniz and follow its echoes in more recent debates (concerning the ghost the machine, the idea of artificial intelligence, and all those realities often called virtual). Readings will include Henri Bergson, Ludwig Wittgenstein, Gilbert Ryle, Walter Benjamin, Henri Atlan, Lambert Wiesing, and others.
Instructor(s): H. de Vries.

AS.300.688. Autour de Baudelaire (Around Baudelaire).
Topics in Baudelaire’s art and thought and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Malarmé, Proust, Benjamin, Starobinski, Bonnefoy). Readings and discussion will be mainly in French. Co-listed with AS.212.604
Instructor(s): J. Neefs; M. Fried.

AS.300.689. Deleuze and Philosophy: Time, Life, Becoming.
This seminar aims at analyzing the major concepts of Deleuze’s philosophy and their ethical and political implications for contemporary debates.
Instructor(s): P. Marrati.

Instructor(s): P. Marrati.

AS.300.800. Independent Study.
Instructor(s): H. de Vries.

AS.300.801. Ind Stdy-Field Exams.
Instructor(s): H. de Vries.

AS.300.802. Independent Study Field Exam.
Instructor(s): E. Forster; H. de Vries; M. Fried; P. Marrati.

Instructor(s): H. de Vries.

AS.300.804. Dissertation Research.
Instructor(s): H. de Vries.

AS.300.805. Literary Pedagogy.
Instructor(s): H. de Vries.

AS.300.806. Literary Pedagogics.
Instructor(s): H. de Vries.

AS.300.808. In Study Field Exam.
Instructor(s): E. Forster.

AS.300.890. Research Practicum.
Instructor(s): M. Fried.

Cross Listed Courses

History of Art

AS.010.310. The ‘Long Sixties’ in Europe.
Emphasis will be on advanced artistic practice primarily in France, Italy, the Benelux, and German-speaking countries; students will curate an exhibition of avant-garde journals from the Sheridan Libraries.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.400. Looking at Language: Vision and Textuality from surrealism to the Present.
Considers the emergence of the “written painting” and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Ligon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.654. Topics in Postwar Abstraction.
Emphasis on European and American case studies from Pollock to the present; figures may include: Newman, Still, Frankenthaler, Louis, Noland, Olitski, Stella, Ryman, Marden, Hantaï, Bishop, Jorn, Uecker, and Klein.
Instructor(s): M. Fried; M. Warnock.

AS.010.760. Agency and Other Topics in Contemporary Theory of Art History.
A critical reading of texts by various thinkers including Alfred Gell, Horst Bredekamp, David Freedberg, Whitney Davis, and David Summers. Open to qualified undergraduates with the permission of the instructor. This course is being co-taught with Prof. Ruth Leys.
Instructor(s): M. Fried; R. Leys.
Classics

AS.040.121. Ancient Greek Mythology: Art, Narratives, and Modern Mythmaking. 3 Credits.
Focuses on major and often intricate myths and mythical patterns of thought as they are reflected in compelling ancient visual and textual narratives. Being one of the greatest treasure troves of the ancient world, these myths will further be considered in light of their rich reception in the medieval and modern world (including their reception in the modern fields of anthropology and philosophy).
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.148. Ancient Israel and Ancient Greece in Opera and on Film. 3 Credits.
Some of the most breathtaking (early and later) operas and films have been in intense dialogue with ancient societies, narratives, and cultural concepts. Contemporary hit movies center on diverse aspects of ancient narratives: the beginning of the world, violent wars, politics, erotic themes, and intricate existential questions. The course will introduce students to a comparative examination of the variety of approaches to ancient Israel and ancient Greece in the spectacular worlds of opera and cinema. The course will focus on major texts and archaeological material related to antiquity; works of world cinema will be analyzed.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.693. The Pre-Socratics and Early Plato. 3 Credits.
This seminar will focus on the earliest phases of European philosophy. Topics that will be examined include: scholarly approaches to the fragments of major thinkers such as Herakleitos and Empedokles; the concept of “fragment;” the transition from the pre-Socratics to early Plato; the later reception of Herakleitos and Pythagoras in European thought.
Instructor(s): D. Yatromanolakis
Area: Humanities.

History

AS.100.741. Recent Theoretical Issues in History. 3 Credits.
An examination of recent theoretical issues in history, including: history as/and memory; the return of presence in history; the turn to affect and the rise of “neurohistory;” posthistoricism and the uses of literary theory in history; and the uses of photography and visual cultures in history.
Cross-listed with Humanities Center.
Instructor(s): G. Spiegel; R. Leys
Area: Humanities; Social and Behavioral Sciences.

German Romance Languages Literatures

AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century. 3 Credits.
2016 marks the bicentennial of Rossini’s irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart’s The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais’ controversial “Figaro trilogy,” stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretentions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano’s The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick’s Barry Lyndon (1975) and Milos Forman’s Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.
Instructor(s): E. Refini
Area: Humanities.

Interdepartmental

AS.360.133. Freshman Seminar: Great Books at Hopkins. 3 Credits.
Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University’s rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2015 include Homer, Thucydides, Dante, Milton, Diderot, Shelley, Nietzsche, Nabokov, and Douglass.
Instructor(s): E. Patton; E. Russo; R. Bett; S. Achinstein; W. Stephens
Area: Humanities.

AS.360.134. Great Books at Hopkins II: The Sciences. 3 Credits.
Great Books at Hopkins II: The Sciences will combine readings from philosophy and literature with foundational texts from several scientific disciplines. Readings for this spring will explore links between traditional theories of economics and genetics in the context of literary developments, and will include: Xenophon’s Oeconomicus, Mendel’s “Experiments on Plant Hybridization,” Marx’s Communist Manifesto, Darwin’s Voyage of the Beagle, Swift’s A Modest Proposal, Wharton’s House of Mirth, and Joyce’s Finnegan’s Wake.
Instructor(s): E. Patton; M. Roller
Area: Humanities.

Medicine, Science and the Humanities

AS.145.101. Death and Dying in Art, Literature, and Philosophy: Introduction to Medical Humanities. 3 Credits.
This team-taught course offers an introduction to the new concentration in medicine, science, and humanities by approaching the topic of death and dying from historical, anthropological, philosophical, theological, literary and art historical perspectives. Open to freshmen, and sophomores who have already taken either Great Books II or History of Medicine.
Prerequisites: AS.360.134 OR AS.140.106
Instructor(s): C. Wiener; E. Strowick; L. Lisi; M. Merback
Area: Humanities
Writing Intensive.
Art

AS.371.140. Cartooning.
Not open to Freshmen. A history-and-practice overview for students of the liberal arts. The conceptual basis and historical development of cartooning is examined in both artistic and social contexts. Class sessions consist of lecture (slides/handouts), exercises, and ongoing assignments. Topics include visual/narrative analysis, symbol & satire, editorial/political cartoons, character development, animation. Basic drawing skills are preferred but not required.
Instructor(s): T. Chalkley
Area: Humanities.

AS.371.146. Basic Black/White Photo.
Students must have a 35mm camera with manual aperture and shutter speed ATTENDANCE AT 1ST CLASS IS MANDATORY An introduction to the technical and creative process of producing black & white photographs. Working in the darkroom, students learn the fundamentals of film processing and print development. In-class critiques, discussion, and analysis of historic images develop critical vision. With the instructor’s guidance, students work on a project of their choice and produce a portfolio of ten mounted prints.
Area: Humanities.

AS.371.149. Visual Reality.
In art, “Realism” is a simulation of visual reality. But art can also simulate alternative realities, those realities or truths which exist only in daydreams or nightmares. In this class, we will learn to explore and create representations of these additional moments of existence. This will require thinking creatively or “outside the box,” a useful skill in any field. Using a variety of media, students are asked to solve problems to which there is no one correct answer.
Instructor(s): D. Bakker
Area: Humanities.

Photoshop is not only the digital darkroom for processing images created with digital cameras; it is also a creative application for making original artwork. In this course, students use Photoshop software as a tool to produce images from a fine art perspective, working on projects that demand creative thinking while gaining technical expertise. Students will make archival prints, have regular critiques, and attend lectures on the history of the manipulated image and its place in culture. We will look at art movements which inspire digital artists, including 19th-century collage, dada, surrealism, and the zeitgeist of Hollywood films. Students must have a digital camera. Prior knowledge of Photoshop is not required. Approval at first class is mandatory. Approval for this course will be considered after enrollment on ISIS.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.152. Introduction to Digital Photography.
Introduction to Digital Photography students learn to use their digital cameras through a variety of projects, which will help them develop technical and creative skills. Students explore documentary, landscape and portrait photography. Critiques and slide lectures of historic photographs, which range from postmortem daguerreotypes to postmodern digital imagery, help students develop a personal vision. Students gain camera proficiency with one-on-one instruction in the field. Basics for print adjustment and output will be covered. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on ISIS.
Instructor(s): H. Ehrenfeld
Area: Humanities.

In this digital course, students explore the black-and-white aesthetic. They develop camera skills on numerous field trips including Ladew Topiary Gardens, the Maryland Zoo & Botanical Gardens, and an optional weekend trip to Cape Henlopen State Park in Delaware. Students meet frequently for critiques and discussions based on historic and contemporary imagery. They will learn to use Photoshop for image adjustment. Techniques such as high dynamic range, duotone, panorama and infrared will be covered. Students work on a project of their choice and produce a portfolio of ten prints. Digital SLRs are provided. Attendance at 1st class is mandatory. No need to email for approval.
Instructor(s): P. Berger
Area: Humanities.

In this course, we will explore different genres of documentary photography, including the fine art document, photojournalism, social documentary photography, the photo essay and photography of propaganda. Students will work on a semester-long photo-documentary project on a subject of their choice. Digital SLRs will be provided. Attendance at first class is mandatory. No need to email for approval.
Instructor(s): P. Berger
Area: Humanities.

AS.371.304. Photo Seminar: Wet Darkroom.
In this film based course, students develop a project of their choice over the semester working independently in the darkroom and meeting for weekly critiques and discussions. Using the zone system (a method of pre-visualization developed by Ansel Adams) students will experiment with different film, paper and developer combinations specific to their projects. Writing in the form of a journal as well as critical analysis of images are integral parts of the seminar experience.
Prerequisites: AS.371.146 or Permission Required
Area: Humanities.

Interdisciplinary Studies
The undergraduate major in interdisciplinary studies allows students to combine disciplines in Krieger School of Arts and Sciences to develop a major focused on a particular topic or intellectual theme. Therefore, courses proposed for this interdisciplinary major must have coherence and build toward a rich exploration of a clear set of principles or questions.

Requirements for a B.A. Degree with a Major in Interdisciplinary Studies
Also see Requirements for a Bachelor’s Degree (p. 20).

Students in the humanities and social sciences who wish to design their own major, or who wish to divide their studies between departments, may create their own program in Interdisciplinary Studies. This interdisciplinary major may straddle several traditional disciplines but must maintain a substantive theme or focus. For example, a student interested in the American Revolutionary period may construct a curriculum including courses from History, English, History of Art, and Sociology. Another may wish to focus on children in poverty, drawing from Anthropology and Economics. Proposals for the interdisciplinary major should be submitted at the end of the sophomore year.
This major requires the support of a faculty advisor and the approval of the Arts and Sciences Curriculum Committee. A student wishing to complete this major must work with a full-time faculty member from the Homewood campus to construct a curricular plan that includes courses representing 45 to 60 credits. These courses can include all related prerequisites and related courses, such as language study. Independent study, research, and internships may be included. Twenty-one credits must be earned at the 300-level or higher. Courses from the School of Engineering are not permitted, except by petition.

The proposal should explain how each of these courses provides insight on the given topic, concept, issue, time period, etc. There is no need to defend the principle of interdisciplinary study, as that is a given, but the student must explain how the courses from two or more departments represent a conceptual whole.

After receiving approval from a sponsoring faculty advisor, the student then works with the Office of Academic Advising to finalize the proposal and to present it to the Curriculum Committee, consisting of faculty and undergraduates, who must approve the proposal by majority vote. After approval, the student continues to work with the faculty advisor and Academic Advising to oversee completion of requirements.

Rules:
• Students pursuing this major must still meet all other requirements for a bachelor's degree (p. 20) in the Krieger School of Arts and Sciences.
• All courses for the major must be taken for a letter grade and students must earn a C- or better in courses completing major requirements.
• Students must earn 45-60 credits in the completion of the major.
• At least 21 credits must be completed at the 300-level or higher and may not be counted toward another major or minor.
• Courses offered by the School of Engineering may not be included in major requirements. (Some minor exceptions may be permissible.)

International Studies
The International Studies major is an interdisciplinary program drawn from the departments of political science, history, economics, languages, sociology, and anthropology. There are three programs in International Studies: a regular undergraduate major leading to the B.A. degree in four years, and two accelerated programs leading to a B.A. and M.A. degree in five years. One of the accelerated programs is in partnership with the Johns Hopkins School of Advanced International Studies in Washington, D.C. and the other is with political science institute Sciences Po in Paris. The three programs, and all other aspects of the International Studies Program, are described on the International Studies website at http://krieger.jhu.edu/internationalstudies

Requirements for the B.A. Degree
Also see Requirements for a Bachelor’s Degree. (p. 20)

Students considering a major in International should begin introductory courses required of the major early in their college careers. Choices may include an introductory history course at the 100-level, AS.180.101 Elements of Macroeconomics-AS.180.102 Elements of Microeconomics, and one of the following gateway courses: AS.190.209 Contemporary International Politics, AS.190.213 International Politics, or AS.190.104 International Politics.

Major Requirements
The international studies major is comprised of three main components:
• Foreign language study
• Core courses in history, political science, and economics
• Focus area of the student’s choosing

In addition, students must earn a grade of C- or better in all course applied towards major requirements and courses may not be taken satisfactory/unsatisfactory.

Foreign Language
Proficiency in one major foreign language is required. This requirement may be met either by taking two courses beyond the intermediate level or by special examination. If the student can demonstrate proficiency through examination, s/he must take an additional two semesters of either a new language or upper-level literature and culture courses taught in the language of proficiency.

Core Courses
Courses fulfilling the specific requirements below are listed on the International Studies website (http://krieger.jhu.edu/internationalstudies/courses).

• Five courses in history, including one introductory course at the 100-level from the History Department at Johns Hopkins University. Three out of the five courses must be non-Western history (some introductory courses may count toward the non-Western history requirements). Two out of the five courses must be taken at the 300-level.
• One course in international politics
• One course in American politics
• Two courses in comparative politics
• One course in political theory
• Four courses in economics. One must be an internationally-oriented course listed on the International Studies website. Two courses must be AS.180.101 Elements of Macroeconomics and AS.180.102 Elements of Microeconomics. The final course may be of the students' choosing from courses offered in the Economics Department.

Focus Area Specialization
Every major in International Studies selects a specialization area, which consists of four semester courses within a coherent field of interest. Specialization fields may be organized in terms of area (Latin America, East Asia), theme (security studies, international economics), or language (e.g., Mandarin, Arabic). Two courses should be at the 300-level or higher.

Major Requirements:

Foreign Language Study
Two courses beyond the intermediate level or if proficient based on 6-9 exam, two additional language courses

One Core Political Science Course
AS.190.102 Introduction To Comparative Politics 3
or AS.190.104 International Politics
or AS.190.209  Contemporary International Politics
or AS.190.213  International Politics

**Political Science Courses**
One international relations course 3
One American politics course 3
Two comparative politics courses 6
One political theory course 3

**Economics Courses**
AS.180.101  Elements of Macroeconomics 3
AS.180.102  Elements of Microeconomics 3
One AS.180.xxx course 3
One approved internationally-focused economics course * 3

**Five History Courses**
One AS.100.1xx history course 3
Three approved non-Western history courses 9
One history course selected by student 3

*** Focus Area ***
Four courses with a coherent field of interest 0-12

Total Credits 51-66

* Approved internationally-focused economics courses are identified each semester on the International Studies website and can be identified by a POS-Tag of INST-ECON in their course description in the schedule of classes.

** Two history courses must be completed at the 300- or 400-level. It is possible that the introductory course required in the History Department (AS.100.1xx) may be a non-Western history course. If so, then the student will select another history course to complete five total history courses.

*** Courses fulfilling the focus area may overlap with other courses used to fulfill specific major requirements.

**Double-Major and Major-Minor Programs**
In lieu of a focus area of their own choosing, students may pursue one of International Studies’ unique double-major or major-minor programs. These are offered in conjunction with affiliated departments and allow students to concentrate their course of study within a specific department or program while simultaneously benefiting from the interdisciplinary training offered by the International Studies major.

Students pursuing a double-major program will receive a major in International Studies as well as a major in the affiliated department or program. For example, students pursuing the Global Social Change and Development track will receive a double major in International Studies and Sociology. The student’s faculty adviser will be a faculty member from the affiliated department or program.

Students pursuing a major-minor program will receive a major in International Studies and a minor in the affiliated department or program (e.g., students pursuing the Global Modernity and the Jewish Experience minor will receive a minor in Jewish Studies) and benefit from a faculty adviser in the affiliated department or program.

Successful completion of a double-major or major-minor program will satisfy the International Studies major’s focus area requirement.

**Senior Thesis and Honors in the Major**
International studies majors also have the opportunity to write a senior research thesis. To be eligible to write a thesis, seniors must identify a faculty sponsor who will supervise the project. Once a faculty sponsor has approved a topic, students must enroll in a three-credit independent study during the fall semester. Students will work out a specific work plan with their faculty sponsor suitable for their project. At the end of the fall semester the faculty sponsor will assess whether adequate progress has been made and the project warrants further work as an undergraduate thesis. If so, then the faculty sponsor will grant the student permission to enroll in the senior thesis course worth six credits. In addition to completion of a senior thesis, students who wish to receive honors in the major will also need a GPA of 3.7 or better in all major requirements.

**Study Abroad**
Studying abroad is especially valuable for International Studies majors. JHU encourages all IS majors to spend one or both semesters of their junior year abroad. International Studies sponsors a number of study abroad programs designed for IS majors and administers them in collaboration with the Office of Study Abroad.

The Junior Year Abroad at SAIS Bologna, offered through the Bologna campus of the Paul H. Nitze School of Advanced International Studies (SAIS), allows motivated International Studies majors to spend their junior year taking graduate level classes at the SAIS Bologna campus. Students who spend their junior year in Bologna and subsequently apply for graduate studies at SAIS will receive one semester of credit at SAIS for their work in Bologna.

A similar exchange program with the French political science institute Sciences Po allows students to spend a semester or a year studying at one of Sciences Po’s seven regional campuses: Paris, Menton, Reims, Poitiers, Le Havre, Nancy, or Dijon. Courses are offered in English as well as French and thus are open to students regardless of their knowledge of French. One of Europe’s most prestigious universities, Sciences Po has a strong international focus and allows students to develop a cross-cultural and transatlantic perspective, while simultaneously offering unique access to the field of international affairs.

Sciences Po’s School of Journalism also offers a competitive spring semester English language program in Journalism. This selective program is designed for students who are interested in pursuing a career in journalism or who have had some journalism experience. The program curriculum consists of a combination of lectures, workshops and reporting projects, in addition to mandatory French language classes for students who are not proficient in French.

Additionally, the Office of Study Abroad also offers a wide range of study abroad opportunities across the globe tailored to specific interests.

**Five-Year Accelerated B.A./M.A. Program with the Paul H. Nitze School of Advanced International Studies (SAIS)**
For students wishing to pursue a master’s degree after graduation from Hopkins, the university offers an accelerated and competitive International Studies B.A./M.A. Program drawing upon its resources at SAIS, located in Washington, D.C. Combining a liberal arts curriculum with a strong specialization in international studies, the program allows
those enrolled to receive the B.A. and M.A. degrees in five years instead of the usual six.

Approximately eight sophomores are selected for the program each year. Admission is limited to those who are highly motivated toward careers for which a background in international studies is essential: research, teaching, or practice in international affairs. Financial assistance is available to those admitted based on need and on academic achievement.

**Five-Year Accelerated B.A./M.A. Program with Sciences Po**

Students may also apply to participate in a five-year accelerated B.A./M.A. program with Sciences Po, one of Europe's finest schools of political science. The B.A./M.A. Program is aimed principally at students who are interested in international affairs and who would like to develop their intellectual and professional capabilities from an international and multidisciplinary perspective. After the junior year, students spend two years at Sciences Po's Paris campus completing graduate-level coursework at the Paris School of International Affairs (PSIA), which houses the majority of Sciences Po's internationally-oriented master's programs. PSIA is a bilingual institution, thus students may choose to pursue either an English or French track. Students may also elect to pursue a master's degree at the School of Journalism, School of Communication, or School of Law. Students interested in an academic career may also choose to pursue a research master's with the Doctoral Program at Sciences Po. Students who are not proficient in French will also pursue French language training during their course of study at Sciences Po. Students will earn a B.A. from Hopkins after their first year in Paris and a master's from Sciences Po after their second year.

Applicants follow an application and review process similar to the one for the SAIS program. Approximately three to four sophomores are selected each year for the Sciences Po program. Students pay tuition to Johns Hopkins for the first year in Paris and to Sciences Po for the second. Financial aid from Johns Hopkins continues only through the end of a student's fourth year.

**Progress toward the B.A./M.A. Degrees**

Students in both programs described above spend their first three years at the Homewood campus and the last two at either SAIS or Sciences Po. Students receive the B.A. degree at the end of their first year at either SAIS or Sciences Po and the M.A. at the end of their second year.

Students selected for either of the accelerated programs may not study abroad during their Homewood years, with the exception of summer or intersession programs.

Sydney V. Morgan

**The Leonard and Helen R. Stulman Jewish Studies Program**

The Leonard and Helen R. Stulman Jewish Studies Program was founded in 2002 to coordinate the many academic activities at Johns Hopkins dedicated to the study of Jewish history, literature, language, philosophy, politics, and religion. The program gives students the opportunity to explore over three millennia of Jewish culture, ranging from ancient Israel to the present. The Stulman Program sponsors visiting professors and course offerings in a wide variety of disciplines, awards undergraduate travel funds and graduate fellowships, and provides many opportunities for students, faculty, and the general public to participate in a wide range of lectures, conferences, and other special events.

The program offers a minor to students interested in the many dimensions of Jewish life, religion, and culture, from ancient times to the present. It will also interest students who wish to study cultures and civilizations in which thinking about Jews and Judaism played an important role, that is, students interested in Christianity, Islam, or the culture of global modernity. Because of its interdisciplinary nature, the Jewish studies minor offers students access to a broad array of humanities and social sciences disciplines. It therefore serves as a good complement to many majors, as well as providing indispensable intellectual training to anyone interested in Jewish professional life.

**Minor in the Leonard and Helen R. Stulman Jewish Studies Program**

The Jewish Studies minor requires a minimum of six courses (amounting to at least 18 credits) selected from those approved by the Advisory Committee of the Jewish Studies Program. The courses must be from at least two departments, and at least three must be upper-level courses (300-level or above). All courses applied towards the minor must be taken for a letter grade and a grade of C- or better must be earned. In addition, only two courses with any single professor can be counted towards the minor.

The requirements for a minor in Jewish studies are as follows:

**Six Jewish Studies Courses**

| Three courses at any level | 9 |
| Three 300-level or higher courses | 9 |
| **Total Credits** | 18 |

Students may take up to two courses in Hebrew or Yiddish language study to apply towards the minor requirements.

For current faculty and contact information go to http://krieger.jhu.edu/jewishstudies/faculty_directory/index.html

**Faculty**

**Professors**

Steven R. David  
(Political Science): Vice Dean for Centers and Programs: international relations, security studies, comparative politics.

Hent DeVries  
Professor Russ Family Chair in the Humanities, (Humanities): modern European thought, history and critique of metaphysics, philosophies of religion, political theologies, concepts of violence, literature and temporality.

Benjamin Ginsberg
David Bernstein Professor (Political Science): Director, Washington Center for the Study of American Government: American government and politics, political development.

Herbert L. Kessler (History of Art): Early Christian and medieval art.

Ruth Leys (Humanities): history and theory of psychoanalysis, history of psychiatry and psychology, 19th- and 20th-century intellectual history, feminist theory.

Yitzhak Melamed (Philosophy): Jewish Philosophy, (esp. Maimonides and Crescas), Rabbinics, Kabbalah and Hasidism.

Rochelle Tobias (German): modern literature.

Eric Sundquist Andrew W. Mellon Professor of the Humanities: American Literature and Culture, including African American and Jewish American, Literature of the Holocaust.

**Associate Professors**

Kenneth B. Moss Felix Posen Associate Professor (History) and Director, Jewish Studies Program: modern Jewish history, Russia and Eastern Europe, Yishuv/ Palestine and Israel, Jewish political thought, nationalism, theory and practice of cultural history.

Marina Rustow Charlotte Bloomberg Chair in the Humanities; Associate Professor History: Medieval and early modern Jewish history; medieval Arab polities and political cultures; rabbinic and karaitic Judaism; religion and society in Fatimid Egypt.

**Assistant Professor**

Neta Stahl (Department of German and Romance Languages and Literatures): Comparative and Modern Hebrew literature, religion and literature.

**Lecturers**

Beatrice Caplan (Department of German and Romance Languages and Literatures): Zelda and Myer Tandetnik Lecturer in Yiddish.

**Language Instruction**

Zvi Cohen

**Courses**

**AS.193.100. Yiddish Bibliography: a seminar for intermediate and advanced Yiddish students.**

Yiddish Bibliography: a seminar for intermediate and advanced Yiddish students. The seminar’s aim is to introduce the students to a large set of Yiddish resources, along various topics and research areas, while improving their Yiddish reading and expression skills. Instructor(s): E. Niborski.

Introduces the two earliest forms of Holocaust literature: literary writing by Jews under Nazi rule and literary writing by Jewish survivors of the Holocaust produced in its immediate wake (between liberation in 1945 and the decisive moment of the foundation of the State of Israel in 1948). Treats questions of literature as a form of immediate reaction to persecution and annihilation, literature as testimony, the relationship of poetics and early Holocaust memory and consciousness. Reference will be made mainly to professional writers in Yiddish and Polish. All readings in English translation.

Area: Social and Behavioral Sciences.

**AS.193.201. Early Modern Jewry in Europe and the Mediterranean.**

The course examines the transition from medievalism to modernity among the Jews of Europe and the Mediterranean between the sixteenth and eighteenth centuries, paying attention to both material and intellectual life, and to women and children side by side with merchants and rabbis.

Instructor(s): E. Horowitz

Area: Social and Behavioral Sciences.

The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of mostly unpublished, multilingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multicultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed - also with emphasis on the differences and similarities between East and West European Jewry.

Instructor(s): M. Trinh.

**AS.193.300. Readings in Yiddish.**

Area: Social and Behavioral Sciences.
AS.193.301. Reading the Bible and Encountering its World.
The course examines the interactions between travel and biblical interpretation between the seventeenth and twentieth centuries, paying particular attention to the ways in which travelers to the Middle East and then scholars saw its residents as relics of an unchanging biblical world, whose practices could be used to interpret scriptural texts from both the Old and New Testaments.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences.

The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of multi-lingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multi-cultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed. Emphasis will be put on the differences and similarities between Eastern and Western European Jewry.
Instructor(s): M. Trinh
Area: Social and Behavioral Sciences.

AS.193.305. The Emergence of Israel.
Is there a single unified story of the emergence of the State of Israel? In this seminar we will trace the origins of contemporary Israel’s diverse society, discover the plurality and diversity of that society’s stories about itself, and discover some of the roots of its conflicted multiculturalism through a critical reading of texts ranging from works of utopian social and political radicalism to expressions of national-religious messianism. All texts in English translation.
Instructor(s): Staff.

Cross Listed Courses

English

AS.060.332. Jewish American Fiction.
This course will consider the development of Jewish American fiction over the past century through an examination of major authors and topics, with particular attention to novels whose historical trajectories reach geographical back and forth from America to Europe, and temporally back and forth across the Holocaust, the century’s defining event. These novels thus frequently have multiple settings and treat familial, communal, and intellectual life, along with topics such as emigration, anti-Semitism, and religious belief, over a span of several generations. The list includes authors whose works first appeared in Yiddish (Lamed Shapiro and Isaac Bashevis Singer) and authors whose sensibilities are decidedly American, but all write with attention to the tenuous assimilation, dislocation, trauma, and linguistic complexity that often marked twentieth-century Jewish life, no less in the United States at times than in Europe. Works studied will include: Dara Horn, In the Image; Rebecca Goldstein, Mazel; Bernard Malamud, The Fixer; Lamed Shapiro, The Cross and Other Jewish Stories; Isaac Bashevis Singer, Shosha; Cynthia Ozick, The Shawl; Nicole Krauss, A History of Love; Jerzy Kosinski, Steps; Philip Roth, Nemesis; Shalom Auslander, Hope: A Tragedy: A Novel.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.371. Major American Authors: Philip Roth.
Over the course of his long career Philip Roth has struck a precarious balance between identification as a Jewish American novelist and insistence that his art escapes such ethnic enclosures. This tension lies at the heart of his work, as indeed some would argue it lies at the heart of the American Jewish experience of the twentieth century. Having emerged as a decidedly rebellious figure who shocked the Jewish community and the nation at large in the 1950s and 60s, Roth has written more than twenty-five novels exploring issues that range from conflicts over assimilation to the roles of the Holocaust and Israel in American Jewish life to the countercultural turbulence of the 1960s to the identity politics of the 1990s. Roth has revealed in forms of fictive autobiography—“counter-lives,” “counter-plots,” and counterfactual histories—that have enlarged the scope of fiction while still grappling with the tensions and dangers of modern life. Works to be read include: Goodbye, Columbus; Portnoy’s Complaint; Operation Shylock; American Pastoral; The Ghost Writer; The Anatomy Lesson; The Plot Against America; The Human Stain; The Facts; The Counterlife; Sabbath’s Theater; and Nemesis. Requirements: two 8-10 page papers, a class presentation, and participation in discussion.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.375. Literature of the Holocaust.
The course will focus on reactions to, and representations of, the Holocaust in European, Israeli, and American literature. In moving from the initial response of eyewitness testimony, through the emergence of fiction as one means to test the adequacy of historical accounts and memoirs, and on to more recent reflections on the problem of adequately “remembering” the event, we will consider how the Nazi genocide has entered into world consciousness. What does it mean to have an artistic or aesthetic response to such an event? Why has the Holocaust assumed so a significant role in contemporary life that there are entire genres of literature and film devoted to it? We will also look at some more contemporary writers whose work deals indirectly with the after-effects of the Holocaust. Readings may include: Levi, Survival in Auschwitz; Borowski, This Way for the Gas, Ladies and Gentlemen; Delbo, Auschwitz and After; Kosinski, The Painted Bird; Grossman, See Under: Love; Ozick, The Shawl; Epstein, King of the Jews; Roth, The Plot against America; Appelfeld, Baddenheim 1939; Coetzee, Elizabeth Costello; Phillips, The Nature of Blood. Cross-listed with Jewish Studies.
Instructor(s): E. Sundquist
Area: Humanities.
AS.060.628. Literature of the Holocaust.
The seminar will focus on reactions to, and representations of, the Holocaust in literature. In moving from eyewitness testimony and survivor memoir, through the emergence of fiction as one means to test the adequacy of such accounts or extend them into a new register, and on to more recent reflections on the problem of adequately “remembering” the event in which memory is constantly at issue, we will consider how the Nazi genie has entered into world consciousness. Although the focus of the course will be on literature, primary readings will be studied with close attention to historical contexts as they bear on questions of authorship, representation, and reception, and to the theoretical vocabularies that have emerged from successive stages of post-Holocaust inquiry. American works will be emphasized but not the sole concern. Primary readings (all in English) will include some of the following: Elie Wiesel, *Night*; Primo Levi, *Survival in Auschwitz*; Charlotte Delbo, *Auschwitz and After*; Tadeusz Borowski, *This Way for the Gas, Ladies and Gentlemen*; John Hersey, *The Wall*; Leon Uris, *Exodus*; Jerzy Kosinski, *The Painted Bird*; Jorge Semprun, *The Long Voyage*; Imre Kertesz, *Fatelessness*; David Grossman, *See: Under Love*; Leslie Epstein, *King of the Jews*; Cynthia Ozick, *The Shawl*; Philip Roth, *The Plot against America*; and William Gass, *The Tunnel*, with various historical and theoretical works in accompaniment. Requirements: a circulated discussion paper; reports on critical/theoretical works; participation in discussion; a research paper.

Instructor(s): E. Sundquist
Area: Humanities.

History

AS.100.128. Ancient and Medieval Jewish History.
History of the Jews under empires and monarchies, from the Persian restoration to the Spanish expulsion. Emphasis on Jews in the Middle East and how the rise of Christianity and Islam challenged, transformed and strengthened Judaism. Cross listed with Jewish Studies.

Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

AS.100.129. Introduction to Modern Jewish History.
An examination of the history of Jews over the past three hundred years. Explores the dramatic encounter at the close of the 18th century between rapidly changing European societies caught up in intellectual, political, and economic revolution and a 2000-year old traditional civilization living in their midst; the kaleidoscopic array of Jewish political, religious, cultural and social responses to this encounter; the new forms of Jewish communal and individual life and consciousness which emerged in the course of the 19th and 20th centuries; the extension of this new modern framework to the Jews of the Middle East in the context of European imperialism and colonialism; the key roles played by the Jews as agents and symbols of political, economic, and cultural modernity; the phenomenon of anti-Semitism and whether it is a pathology or integral part of modern European civilization; the extreme shifts in Jewish life from the mid-20th century in light of the Holocaust, the creation of the state of Israel, and integration into American society.

Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.315. Jewish Political Thought and Social Imagination, 1880-1940.
How a range of Jewish thinkers, activists, and creative writers grappled intellectually with the challenge of the nation-state, the rise and collapse of empires, antisemitism as a political phenomenon, the nature of politics and political action, the nature of modern societies, and the question of Jewish self-determination and sovereignty, 1880-1940. Readings by Herzl, Bernard Lazare, Freud, Kafka, Leshntinsky, Arendt, Adorno, Michael Chabon, among others.

Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.344. The Holocaust.
This course expands the knowledge of the Holocaust by including experiences of Eastern European Jewry and by discussing recent historiographic debates in the field such as 'ordinary men,' perpetrators, and collaboration. Prior experience in an introductory European history or Jewish studies course strongly recommended.

Instructor(s): L. Braun
Area: Humanities, Social and Behavioral Sciences.

AS.100.345. Religion, Secularity, and Nationhood in Modern Jewish Identity Politics.
How have ethnonational, religious, and secular forms of self-definition played out in Jewish life over the past hundred years, and what sorts of relationships are taking shape between them now? Particular foci include: religious revival in Israel and the fate of Zionism's ostensibly secular nationalist project in comparative perspective (Ravitzy, Walzer, Friedland); the surprising flourishing of kabbalistic/mythical thought in contemporary Jewish life (Garb); varieties of secular and religious visions of Jewish collective identity (Ohana, Lustick); new and resurgent forms of Judaism in the US; religion and gender (Fader), among other topics. Time at end of semester for independent reading and research.

Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.
AS.100.351. God, Self, Nation and Revolution in East European Jewish Life and Thought, 1860-1939.
The divided Jewish community of modern Eastern Europe defined many of the key modern forms of Jewish identity, politics, culture, and religion and forged bewildering array of syntheses, hybrids, and even negations of Jewishness in relation to the unprecedented political, cultural, and social dilemmas of life in Eastern Europe. Focus on key texts of Jewish religious and secular thought created in Imperial Russia and interwar Poland.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

The political, social, and cultural history of the State of Israel and its inhabitants during its pivotal first two decades, as reconstructed in recent historiography.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

Recent historical writing on Jewish politics, culture, and society in British Mandatory Palestine, 1917-1947. Significant attention will also be paid to work on Palestinian Arab society and politics and to Jewish-Arab-British relations.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.415. Papyrus, Parchment, and Paper.
The diffusion of writing technologies before the industrial age, especially around the Mediterranean; the preservation of lightweight, portable texts; modern discoveries (Oxyrhynchus, Dead Sea Scrolls, Nag Hammadi, Cairo Geniza).
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

AS.100.447. Christian-Jewish Polemics in the Middle Ages and the Construction of the Enemy.
The four great public Christian-Jewish disputations of the high middle ages: Paris, Barcelona, Majorca, Tortosa. Original Hebrew and Latin sources in English translation; questions of the changing motives for anti-Judaism and the formation of a persecuting society.
Instructor(s): P. Capelli
Area: Humanities, Social and Behavioral Sciences.

AS.100.624. How to Be a Disciple of the Sages: Norms of Behavior, Ethics and Etiquette in Early Rabbinic Literature.
Moral instruction in early rabbinic literature (Pirqe Aboth, Aboth de-Rabbi Nathan, Derekh Eretz Rabbah and Zuta, Perek ha-Shalom) is a very revealing example of the composite character of rabbinic Judaism, its manifold, not only Biblical roots, and its intense osmosis of neighboring traditions: Hellenistic and Roman philosophies, early Christian and Islamic doctrines, rules and handbooks of manners from medieval European monasteries and courts. This seminar will investigate the classical sources of Jewish morals in both Jewish and non-Jewish texts.
Instructor(s): P. Capelli
Area: Humanities, Social and Behavioral Sciences.

AS.100.642. Historiography of the Jews.
Instructor(s): K. Moss; M. Rustow.

AS.100.643. Jewish Paths Through Modernity.
Intensive introduction to the key trends and trajectories in modern Jewish history and the major themes in Jewish historiography. Intended to serve both graduate students outside the Jewish history field and students beginning the graduate study of modern Jewish history. Open to undergraduate seniors with the permission of the instructor.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.655. Jewish History and Historiography in Ottoman and British Palestine.
Recent historiography on Jewish politics, culture, and society in late Ottoman and British Mandatory Palestine, 1880s-1947, English and Hebrew. With permission of the professor.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.667. Topics in Modern Jewish History.
Intensive readings in historiography of modern Jewry, with particular focus on Jewish life in 19th - 20th century Palestine and the State of Israel. Recommended Course Background: AS.100.668
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.759. The Cairo Geniza (Spring).
Documentary sources from the Cairo Geniza in Judaeo-Arabic, Arabic, and Hebrew. Paleography, genre, diplomatic, corpora and editorial technique; historical context, interpretation, historiography and history of the field. Cross listed with Jewish Studies.
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies

AS.130.114. The Archaeology of Ancient Israel.
This course will explore the intersection of sexuality and power relationships in the forging of ethnic, political, and religious identities as presented in the Bible and ancient Near Eastern literature. Cross-listed with Jewish Studies.
Instructor(s): L. Wright
Area: Humanities.

AS.130.118. Ancient Israel: In Their Own Words.
This course will focus on the inscriptions of ancient Israel and its neighbors from the first millennium BCE. Texts speak to us directly in ways that other nonverbal archaeological remains – such as architecture or pottery – cannot. Also, secondary sources written by later historians and commentators are similarly limited, as they are separated from original events by space, time, and cultural situation. Considering how individuals from an ancient culture articulate thoughts “in their own words” is invaluable to any meaningful reconstruction of history. Participants will learn to glean information from inscriptions, including those that are fragmentary or seemingly mundane. They will experience hands-on history writing, using primary sources in translation, though those with any knowledge of ancient languages, especially Classical Hebrew, will be able and encouraged to engage with the texts in their original vernacular. Basic knowledge of world history will be helpful though not prerequisite.
Prerequisites: AS.130.134
Instructor(s): H. Parker
Area: Humanities.
The Bible is arguably the most read and yet most misinterpreted book of all time, one of the most influential and yet most misapplied work of literature. The Hebrew Bible (Old Testament) is Scripture to Jews and Christians yet also a rich collection of literature with numerous literary genres that have been highly influential on secular Western culture. At its core, it is one of the most important literary sources that, when wed with archaeology, helps us to understand the people and culture of Iron Age Israel and Judah. This is an introductory course surveying the books of the Hebrew Bible (Old Testament) giving primary attention to the religious ideas they contain and the ancient contexts in which they were composed. Topics include: The Academic Study of Religion, Ancient Creation Accounts, Ancestral Religion, The Exodus and Moses, Covenant, Tribalism and Monarchy, The Ideology of Kingship, Prophecy, Priestly Sources, Psalms, Wisdom Literature, and Apocalyptic Thought. Instructor(s): T. Lewis
Area: Humanities.

AS.130.172. Introduction to Aramaic.
Cross-listed with Jewish Studies. Aramaic, a Semitic language attested from 1100 BCE and spoken to this day, is central to some of the core texts of Western culture such as the Hebrew Bible, the Talmuds and the New Testament. This course will focus on Babylonian Aramaic, as preserved in the Babylonian Talmud and parallel sources. After studying the basic forms and grammar we will read various texts from the Babylonian Talmud as well as karaites and geonic literature and magical bowls. We will survey some of the main corpora written in Babylonian Aramaic, our gateway to deeper understanding of this heritage. Instructor(s): Y. Monnickendam
Area: Humanities.

This course explores the mythology of the ancient Near East from the invention of writing in Sumer in 3000 BCE until the conquest of Alexander the Great near the end of the first millennium BCE. Mythological texts from Mesopotamia, Egypt, Anatolia, the Levant, and the Bible will be read from a comparative perspective. Special attention is paid to the origin and development of the epic, culminating in the great Epic of Gilgamesh, but considerable time is also given to the vast mythological and historical literature, and such diverse genres as love poetry, proverbs, humorous dialogues, Omens, and legal and medical texts. All readings are in English translation. Instructor(s): P. Delnero
Area: Humanities.

AS.130.301. History of Ancient Syria-Palestine.
A survey of the history of Ancient Syria and Cannan, including Ancient Israel. Instructor(s): P. McCarter
Area: Humanities.

AS.130.302. History: Ancient Syria-Palestine II.
A survey of the history of Ancient Syria and Cannan, including ancient Israel. Taught with AS.134.661. Cross-listed with Jewish Studies. Instructor(s): P. McCarter
Area: Humanities.

The story of the Garden of Eden remains an archetype in popular culture. Find out about the real biblical story and how it developed into the one we think we know. The only requirements are an open mind and a strong desire to learn. Instructor(s): E. Robbins
Area: Humanities.

AS.130.338. The Talmud as Read in the Middle Ages: The Sugya of Kavod HaBrion (Human Dignity).
In the early Middle Ages the Talmud emerged as the defining document of official Jewish religion and culture, and remained so until the dawn of the Modern Era. Jewish scholars in many different countries, and in a wide variety of cultural contexts, developed certain ways of reading, interpreting, and applying the Talmud. In the process, they produced an immense corpus of commentary and law. This course will examine how and why the Talmud was studied in these centuries by Jews who mined it, subject by subject, for emotional, philosophical, and legal meaning. Instructor(s): D. Katz
Area: Humanities.

AS.130.341. Traditionalism vs. Orthodoxy in the Modern Era: The Case of Judaism.
During the Modern Era in European history, the Traditionalist Jewish civilization of Europe that had evolved over many centuries went into deep crisis. The new political, social, and intellectual realities which characterized Modernity seriously challenged, overwhelmed, and indeed threatened to destroy the Jewish Traditionalist culture and society. In response, different Traditionalist thinkers and communities evolved a number of strategies for surviving in a modern environment, strategies that unexpectedly transformed Traditionalism into something different, which came to be called Orthodoxy Judaism. This course explores this process of transformation, which has had an important impact on Jewish life in the modern and post-modern eras. Cross-listed with Jewish Studies. Instructor(s): D. Katz
Area: Humanities.

AS.130.343. Dead Sea Scrolls-English.
A survey of the manuscripts found at Qumran and other sites near the Dead Sea. Instructor(s): P. McCarter
Area: Humanities.

AS.130.346. Introduction to the History of Rabbinic Literature.
Broadly surveying classic rabbinic literature, including the Talmud and its commentaries, the legal codes and the response, this seminar explores the immanent as well as the external factors that shaped the development of this literature, the seminal role of this literature in Jewish self-definition and self-perception, and the role of this literature in pre-modern and modern Jewish culture. Instructor(s): D. Katz
Area: Humanities.

Description: “How does a religious system which defines its ancient laws as God-given and unchangeable apply them to radically different and changing social, political and intellectual situations? This course explores the literature of ‘Questions and Answers’ (She’elot u-Teshuvot), the Jewish legal responsa which have struggled to match Jewish religious law to modern life for fifteen centuries. A sweeping survey of Jewish history as revealed by one of its most impenetrable yet fascinating sources. Cross-listed with Jewish Studies. Instructor(s): D. Katz
Area: Humanities.
AS.130.352. History of Hasidism.
Although it appears to be a relic of pre-modern Judaism, Hasidism is a phenomenon of the modern era of Jewish history. This course surveys the political and social history of the Hasidic movement over the course of the last three centuries. Students will also explore basic features of Hasidic culture and thought in their historical development. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.359. Reading the Talmud in the Post-Talmudic Era.
Life and Death, Survival and Martyrdom, in the Literature of Post-Talmudic Rabbinic Judaism. Readings in the Original Sources (Knowledge of Hebrew Required). Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.361. The Politics of Sexuality in the Bible and the Ancient Near East.
This course will explore the intersection of sexuality and power relationships in the forging of ethnic, political, and religious identities as presented in the Bible and ancient Near Eastern literature. Cross-listed with Jewish Studies and Women, Gender, and Sexuality.
Instructor(s): E. Fleming
Area: Humanities.

AS.130.366. Reading the Talmud in Pre-modern Jewish Culture. Attempting to Cope With Abusive Husbands: Annullment of Marriage in the Literature of Post Talmudic Rabbinic Judaism.
The evolution of Talmudic thinking resulted in laws which made marriage too easy, divorce too difficult. This generated centuries of attempts to grapple with the consequences of this conundrum in real-life situations. This course analyzes the literature produced by these attempts. Students will read texts in original Hebrew.
Instructor(s): D. Katz
Area: Humanities.

AS.130.367. Jerusalem: The Holy City in History and Archaeology.
Jerusalem has a global significance utterly disproportionate to its size or wealth, and it has been this way since the days when the city was first settled. On the one hand, this is due to Jerusalem’s role as a sacred space for all three of the world’s largest monotheistic religions: Christianity, Islam, and Judaism. On the other, Jerusalem has long been the fulcrum of geopolitical struggles in the Middle East and beyond. This lecture course explores Jerusalem’s political, cultural, and religious trajectory over the past three millennia through the lens of the city’s amazingly rich historical and archaeological records. In so doing, we unravel the mythical and historical threads that combine to create the powerful symbolic resonance of Jerusalem today, discovering en route that, when it comes to Jerusalem, identifying what is “myth” and what is “history” is a complex and contested undertaking.
Instructor(s): J. Osborne
Area: Humanities.

AS.130.373. Prophets and Prophecy in the Bible.
From thundering voices of social justice to apocalyptic visionaries, biblical prophets have been revered by Jews, Christians and Muslims for thousands of years. They have inspired civic leaders such as Martin Luther King Jr. yet also provided fodder for modern charlatans promising a utopian future. Yet who were these individuals (orators? politicians? diviners? poets?) and what was the full range of their message as set against the Realpolitik world of ancient Israel, Iraq, Egypt, Syria and Jordan?
Instructor(s): T. Lewis
Area: Humanities.

AS.130.376. Ancient Ritual.
This course will introduce students to the vast body of rituals that were practiced and performed in antiquity, with a particular emphasis on rituals from ancient Mesopotamia, Egypt, and the Hebrew Bible. In addition to examining rituals from a comparative perspective, anthropological and sociological studies of ritual will be read and discussed to shed light on the social, cultural, and political significance of ritual in the ancient world and beyond.
Instructor(s): P. Delnero
Area: Humanities.

Survey of grammar and reading of simple texts. (Credit given only on completion of AS.130.440 and AS.130.441). May not be taken on a satisfactory/unsatisfactory basis.
Instructor(s): R. Liebermann
Area: Humanities.

AS.130.442. Readings - Hebrew Prose.
Reading of biblical Hebrew prose, especially from the Pentateuch, Joshua, Judges, Samuel, and Kings. Cross-listed with Jewish Studies.
Instructor(s): E. Guinn-Villareal
Area: Humanities.

AS.130.443. Reading Of Hebrew Prose.
Reading of Biblical Hebrew prose, especially from the Pentateuch, Joshua, Judges, Samuel, and Kings.
Instructor(s): E. Guinn-Villareal
Area: Humanities.

AS.134.604. The Book Of Job.
Reading the Hebrew text of the book of Job with attention to philology, textual criticism, and various aspects of interpretation.
Instructor(s): T. Lewis
Area: Humanities.

A rapid reading course aimed at increasing proficiency in reading the Hebrew text of the book of Ezekiel. Various aspects of translation and interpretation will be studied (e.g., grammar, textual criticism, Philology) including literary, historical, and theological questions. Cross-listed with Jewish Studies.
Instructor(s): T. Lewis.

AS.134.652. Seminar in Ancient Israelite Religion.
Topics include history of scholarship, methodology, representations of deity, the aniconic tradition, solar Yahwism, sacred space, blood rituals, passover, royal cult, family religion, divination, prophecy, incantations, etc.
Instructor(s): T. Lewis.
Philosophy

AS.150.428. Spinoza's Political Theology.
“Political Theology” is a term that acquired significant resonance in recent years. The current class will study closely two texts by Spinoza, the founder of this discipline: the Theological-Political Treatise and the (incomplete) Political Treatise. Instructor(s): Y. Melamed.

AS.150.435. The Philosophy and Theology of Maimonides.
This course will examine the philosophic and theological thought of Judaism’s most renowned philosopher, Moses Maimonides (1138-1204). After a brief overview of Maimonides’ multifaceted life as philosopher, scientist, physician, Talmudic scholar, rabbi, and communal leader; we will consider Maimonides’ philosophic and religious background and, in particular, the ancient Greek and medieval Islamic philosophic works that influenced him. The course will delve into his views on topics such as the relation between faith and reason, the existence of God, creation/eternity of the world, free will/determinism, the nature of prophecy, the purpose of law, human happiness, ultimate perfection, and the Afterlife. Special attention will be given to Maimonides’ method of philosophic writing and the tension in his life between the vita activa and the vita contemplativa. The course will also trace the impact of Maimonides’ Guide of the Perplexed upon later Jewish thought and upon Western philosophy and theology from Thomas Aquinas to Leibniz. Instructor(s): S. Harvey
Area: Humanities.

AS.150.483. Topics in Jewish Philosophy: Hassidism.
Hassidism is the ecstatic religious movement that emerged in East European Jewry in the mid eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of Dov Ber of Mezrich between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon’s report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset. Instructor(s): Y. Melamed.

Political Science

AS.190.344. Seminar In Anti-Semitism.
Jews exercise a good deal of power in contemporary America. They are prominent in a number of key industries, play important roles in the political process, and hold many major national offices. For example, though Jews constitute barely two percent of America’s citizens, about one-third of the nation’s wealthiest 400 individuals are Jewish and more than ten percent of the seats in the U.S. Congress are held by Jews. One recent book declared that, “From the Vatican to the Kremlin, from the White House to Capitol Hill, the world’s movers and shakers view American Jewry as a force to be reckoned with.” Of course, Jews have risen to power in many times and places ranging from the medieval Muslim world and early modern Spain through Germany and the Soviet Union in the 20th century. In nearly every prior instance, though, Jewish power proved to be evanescent. No sooner had the Jews become “a force to be reckoned with” than they found themselves banished to the political margins, forced into exile or worse. Though it may rise to a great height, the power of the Jews seems ultimately to rest on a rather insecure foundation. Cross-listed with Jewish Studies. Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

AS.191.335. Arab-Israeli Conflict (IR).
The course will focus on the origin and development of the Arab-Israeli conflict from its beginnings when Palestine was controlled by the Ottoman Empire, through World War I, The British Mandate over Palestine, and the first Arab-Israeli war (1947-1949). It will then examine the period of the Arab-Israeli wars of 1956, 1967, 1973, and 1982, the Palestinian Intifadas (1987-1993 and 2000-2005); and the development of the Arab-Israeli peace process from its beginnings with the Egyptian-Israeli treaty of 1979, the Oslo I and Oslo II agreements of 1993 and 1995, Israel’s peace treaty with Jordan of 1994, the Road Map of 2003; and the periodic peace talks between Israel and Syria. The conflict will be analyzed against the background of great power intervention in the Middle East, the rise of political Islam and the dynamics of Intra-Arab politics, and will consider the impact of the Arab Spring. Instructor(s): R. Freedman
Area: Social and Behavioral Sciences.

AS.191.398. The International Politics of Genocide.
This course examines the creation of the concept of genocide and explores its controversial evolution in international law, humanitarian efforts, and global politics. Dean’s Teaching Fellowship course. Instructor(s): B. Meiches
Area: Social and Behavioral Sciences.

German Romance Languages Literatures

AS.210.163. Elementary Yiddish I.
Year-long course. Includes the four language skills, reading, writing, listening, and speaking, and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Students wishing to retain credits for Yiddish Elements I must complete Yiddish Elements II with a passing grade. Instructor(s): B. Caplan.

AS.210.164. Elementary Yiddish II.
Year-long course that includes the four language skills—reading, writing, listening, and speaking—and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission. Instructor(s): B. Caplan
Area: Humanities.

AS.210.263. Intermediate Yiddish I.
This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.164 or equivalent, or two years of German and permission of instructor. Area: Humanities.
AS.210.264. Intermediate Yiddish II.
Continuation to Intermediate Yiddish I. This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.263 or instructor permission.
Instructor(s): B. Caplan
Area: Humanities.

This course will provide students who have completed at least two years of Yiddish with the opportunity to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.368. Advanced Yiddish II.
Continuation of Advanced Yiddish I (AS.210.367). Students will continue to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Prerequisites: AS.210.367
Area: Humanities.

AS.210.369. Yiddish Texts I.
This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing).
Prerequisites: AS.210.368 or permission of instructor.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.370. Yiddish Texts II.
Continuation of Yiddish Texts I. This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing).
Prerequisites: AS.210.367
Area: Humanities.

This course will allow students with advanced Yiddish language skills to design their own reading list, in consultation with the instructor, in order to deepen their understanding of an area of Yiddish culture of special interest while at the same time continuing to improve their language skills. Texts may include literary works, scholarship, the press, and archival materials. All discussion and written responses will be in Yiddish.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.174. Media of Propaganda.
Today, promoting a particular political or personal point of view is not viewed as "propaganda," but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term "propaganda" will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl's Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.
Area: Humanities.

This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.253. Freshman Seminar: Why is the Fiddler on the Roof?: The Shtetl in Modern Jewish Culture.
The most familiar portrayal of the shtetl for an American audience is the setting of the Broadway musical Fiddler on the Roof, where the shtetl, or market town, is a bastion of traditional Jewish life. But what exactly was a shtetl? How did traditional Jews live there, and how were their lives affected by the sweep of modernity? How was the Yiddish language, spoken by all shtetl Jews, both a repository of tradition and an agent of change? How do representations of the shtetl—from corrupt backwater to pious haven—reflect the concerns of Jews from the nineteenth century up to our own day? Through memoir, literature, film and painting, this course will examine actual lives lived in the shtetl, as well as a selection of the many artistic representations of it. All readings will be in English.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.430. L'Affaire Dreyfus.
This course proposes to look at persuasive strategies that were engaged during the Dreyfus Affair in order to either incriminate or discriminate the Jewish captain falsely accused of having betrayed the French army. Course will focus on the socio-political events that framed the Dreyfus Affair (anti-Semitism in 19th-century France, caricatures and polemical writings in the press, the consequences of the Franco-Prussian War and of the Commune, the bipolar division that split French society into Dreyfusards and anti-Dreyfusards), as well as its long-term effects (the rise of the extreme right, the creation of the "intellectual", the consolidation of Zionism which ultimately led to the creation of a Jewish state). Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor.
Instructor(s): K. Cook-Gaillard
Area: Humanities.
AS.213.309. Walter Benjamin and His World.
All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.
Area: Humanities.

This course will examine the location of Berlin at the heart of European and global culture over the course of the 20th century. In addition to its centrality to German national identity and political culture, Berlin between the World Wars was a weigh station and meeting ground for a variety of languages, cultures, and artistic trends—whether expatriates, refugees, nomads, touring companies, or vagabonds. In what ways did these travelers to Berlin change German popular or intellectual culture? In what ways did Berlin function as a center for avant-garde culture, and in what sense did it remain a peripheral space, in the shadow of grander culture centers such as Moscow, Paris, New York, or Hollywood? What lessons might be taken from the supposed glamour of Berlin between the World Wars and the continued attraction of that period for post-Holocaust adaptation and contemplation? These questions, among others, will be considered with reference to a variety of narratives, dramas, and films taken from German, English, Hebrew, Russian, and Yiddish sources. Authors to be considered will include Walter Benjamin, Joseph Roth, Irmgard Keun, Erich Kästner, Bertolt Brecht, Christopher Isherwood, Sh. Y. Agnon, Vladimir Nabokov, Viktor Shklovsky, and David Bergelson. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

Tought in English. This course will survey the major trends in Yiddish, Hebrew, and English literature published in the United States, Canada, and Mexico since the turn of the 20th century. Our discussions will consider the connections this literature maintains with other "ethnic" schools of writing; what connections, or disruptions, it signifies with Jewish literatures in other eras or locales; to what degree Jewish writing in languages other than English participate in major trends of American literature—or whether this writing could even be considered to anticipate innovations in the American "mainstream." Topics in this literature will include the disruptions of immigrant life, the shadows of the Holocaust and anti-Semitism, aspirations for social justice, the lure and trauma of the American suburbs, the collapse of the Great Society, gender in American Jewish life, and the new Jewish immigrants of the former Soviet Union. All readings and discussions available in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.322. Museums and Jews, Jews in Museums.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.332. Zionism in Modern Literature: Jewish or Israeli?.
This course will be an examination of the themes of nationalism, Zionism, and the problems of the nation-state in modern Jewish literature of the past hundred years. Among the topics we will consider are the unique challenges of a diasporic culture relocating its national aspirations to an unfamiliar and often hostile environment, the controversies surrounding political nationalism within modern Jewish culture, the competition between languages in the formation of Israeli society, the character of Israeli national culture, the relationship of Israel's Jewish majority with its minority population, and the relationship of Israeli culture to the Jewish culture of the diaspora. To what extent does Israeli literature constitute a continuation of themes and techniques found in previous Jewish writing, and to what extent does it represent a new beginning? To what extent can Israeli literature be compared with other varieties of Jewish writing and to what extent is this writing a unique cultural phenomenon? Although the majority of works discussed will be translated from Hebrew—including such leading figures of Israeli literature as S. Y. Agnon, S. Yizhar, Amos Oz, and Orly Castel-Bloom—we will also be considering works translated from Yiddish (Mendele Moykher-Sforim), German (Theodor Herzl), and Arabic (Emile Habiby), as well as contemporary American writers such as Philip Roth and Michael Chabon. All readings and discussions conducted in English.
Cross-listed with Jewish Studies, English, and the Humanities Center
Instructor(s): M. Caplan
Area: Humanities.
Are all Jews funny, or only the ones from New York? This course will be an advanced-undergraduate examination of literary, theatrical, cinematic, and televised representations of Jewish culture focusing on the construction of cultural discourse through comedy. Taking as a point of departure Sigmund Freud's Jokes and Their Relation to the Unconscious, we will consider the joke as a mode of narration and cultural coding with specific resonances for the Jewish encounter with modernity. Among the topics to be addressed in this course will be the origins of modern Jewish humor in traditional modes of storytelling and study; the problems of anxiety and otherness articulated and neutralized through humor; the significance of Jews in creating popular culture through the mass media (particularly though not exclusively in the United States) as well as the role of these mediums in transmitting and translating Jewish references to the general culture; the status of the Yiddish language as a vehicle for satire and a vehicle of resistance between tradition and modernity; the uses and abuses of Jewish stereotypes and the relationship of Jewish humor to anti-Semitism; the connections between Jewish humor and other modes of minority discourse; and the question of translation of Jewish humor both from Yiddish into other languages and from the Jewish "in-group" to a "post-ethnic" audience. Authors and performers to be examined will include Avrom Goldfaden, Sholem Aleichem, Dzigan and Szumacher, Lenny Bruce, the Marx Brothers, Mel Brooks, Phillip Roth, Woody Allen, Larry David, Sarah Silverman, and the Coen Brothers. All readings and discussions conducted in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.348. Picturing Jews: Representing Jewish Identity in Modern Art, Film & Literature.
This course will consider the different ways Jewish identity has been represented in the 19th and 20th centuries, focusing primarily on Central and Eastern Europe. Race, nationalism, religion, language, geography, politics—all helped shape different ways of understanding just what it meant to be a Jew, and all found expression in art and literature by both Jews and non-Jews. Looking at texts originally written in German, Yiddish, and Hebrew, including prose, poetry, journalism and drama, as well as painting, photography, graphic design, architecture, and film we will gain an understanding of the range of ways that Jewish identity could be understood and expressed as well as of the ideological stakes and historical contexts of such representations. Writers and artists examined will include Chagall, Kafka, Sholem Aleichem, and Bialik. All readings will be in translation.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.361. The Holocaust in Film and Literature.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.387. Major City, Minor Literature? Berlin in German-Jewish and Yiddish Literature. 3 Credits.
Between the two World Wars, a period of intense artistic and intellectual vitality, Berlin was an international center for theater, visual arts, and literature. Many important Yiddish-language writers were drawn to Berlin and, together with their German-language counterparts, produced a body of literature that explores issues of modernity and identity. By comparing works in Yiddish and German, we will learn about inter-War Berlin's cultural diversity and richness, while also gaining insight into the particular issues of writing about Jewish identity in the 1920s, and the implications of writing in a minor language (Yiddish).
We will read works by authors including Joseph Roth and Alfred Döblin in German, and Moyalsh Kulbak and Dovid Bergelson in Yiddish. All texts will be in translation. Some questions we will explore include: • What is a minority/minor language or literature? • How did German and Yiddish interact in cultural and social spheres? • Can texts in different languages comprise a single body of literature? • What did it mean to be German and what did it mean to be Jewish? • Are assimilation and hybridity useful concepts? • Is there such a thing as Jewish modernism? • How did literature of the period respond to the rise of the Nazi party and the intensification of antisemitism?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.635. Anthropology and Modernism.
This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of “culture.”
Instructor(s): S. Spinner
Area: Humanities.

Though every conventional description of modernist aesthetics dates its origins to the era preceding World War I—in some versions several decades before 1914—there has always been an understanding of the War’s “catalytic” influence on the aesthetic of chaos, madness, violence, and despair that comes to characterize at least one major strain of modernistic art. Taking the after-effects of the First World War as well as the Russian Revolution(s) as its point of origin, this graduate-level seminar will consider such writers as Sigmund Freud, Walter Benjamin, Sh. Y. Agnon, Sh. Ansky, Guillaume Apollinaire, Isaac Babel, Georges Perec, Erich Maria Remarque, Joseph Roth, Virginia Woolf, and Stefan Zweig. All readings and discussions available in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.706. Literature, Museums, Mimesis.

Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomenons: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.725. Proto-, Modern, and Post-: Locating the -ism in Modernism.

All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “post-modernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is post-modernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-Bloom, Henry Dumas, Moyshe Kulbak, Machado de Assis, Mendele Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.
Instructor(s): M. Caplan.

This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, Dalia Rabikovitch, Erez Biton, Roni Somek, Dan Pagis, Yona Wollach, Yair Horwitz, Maya Bejerano, and Yitzhak Laor. Against the background of the poetry of these famous poets we will study recent developments and trends in Israeli poetry, including less known figures such as Mois Benaroch, Shva Salhoov and Almog Behar. Through close reading of the poems, the course will trace the unique style and aesthetic of each poet, and will aim at presenting a wide picture of contemporary Hebrew poetry.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl
Area: Humanities.

Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.342. The Holocaust in Israeli Society and Culture.

This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.
Instructor(s): N. Stahl
Area: Humanities.

AS.216.370. Israel Through Prose.

This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled.-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.373. War in Israeli Arts and Culture. 3 Credits.

In this course we will study the various representations of what functions as one of Israel’s most unifying and yet dividing forces: war. By analyzing literary and cinematic works as well as visual art and popular culture we will attempt to understand the role of war in shaping Israeli society, culture and politics. Topics such as commemoration and mourning, dissent and protest, trauma and memory and the changing image of the soldier will stand at the center of the course. Students with a knowledge of Hebrew wishing to do extra work in Hebrew should enroll in section 2 and the fourth hour will be scheduled at a time convenient to the enrollees and instructor.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.
AS.216.398. Zionism: Literature, Film, Thought.
This course studies the relation between Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the history of Zionism and its influence on Israeli culture. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films. Students wishing to do additional work in Hebrew should enroll in section 2 where students will meet for an additional hour at a time TBD and will earn 4 credits for the course.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.412. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.

This course studies literary and cinematic representations of the apocalypse. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and seek to trace the narrative dynamics as well as literary and cinematic means of apocalyptic representations. We will discuss works from various periods, languages, cultures and religions. Among the issues to be discussed are, the apocalypse, war and the apocalypse, the Holocaust as apocalypse, Biblical apocalypse, post-apocalyptic works, the apocalypse in popular culture, realism, anti-realism and the apocalypse.
Instructor(s): N. Stahl
Area: Humanities.

AS.216.500. Independent Study.
Instructor(s): N. Stahl

Humanities Center

AS.300.330. Trauma in Theory, Film, and Fiction.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald ("The Emigrants"), Lanzmann ("Shoah"), Spiegelman ("In the Shadow of No Towers"), McCarthy ("Remainder"), and others.
Instructor(s): R. Leys
Area: Humanities, Social and Behavioral Sciences.

AS.300.356. From Literature to Film - the case of Israeli Cinema.
This course explores the differences and similarities between two artistic mediums: literature and cinema. Our case study will be the interesting transformation of Hebrew fiction into Israeli films— a dominant phenomenon in Israeli cinema since its very beginning. Our main framework will be narrative theories, but we will also consider the specific historical, ideological and geo-political aspects involved in this transformation. By comparing the two artistic modes and studying the transformation of 5 literary works into films, students will become familiar with the history of modern Hebrew literature, contemporary Israeli cinema, and the relationship between these two artistic mediums. Cross-listed with Jewish Studies, Film and Media Studies, and Writing Seminars
Instructor(s): N. Stahl
Area: Humanities.

AS.300.379. Israeli Film and Literature.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli cinema and literature. The course will follow both a thematic and chronological path in order to study the ways in which Israeli cinema and literature reflect political, ideological, social, and cultural aspects of contemporary Israel. In this context, we will read well-known works by several major authors and will watch major Israeli films from the 1940s to these days. We will also use a comparative approach to study the different artistic means of both mediums and to evaluate their successes in representing the various tensions of Israeli society and culture.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

This course studies the development of modern Hebrew literature through its relation to Zionism and Post-Zionism. Based on a close reading of both literary and non-literary Zionist and Post-Zionist texts, we will explore the thematic, social, political, aesthetic and stylistic influences that these two movements have had on modern Hebrew literature. Writers to be discussed include: Hertzl, Nordau, Achad ha-am, Jabotinsky, Kluasner, Brenner, Berdycewski, Agnon, Greenberg, Kahana-Carmen, Oz, Yehoshua, Grossman, Castel-Bloom, and Laor.
Students may receive credit for AS.216.398 or AS.300.398, but not both.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl
Area: Humanities.
AS.300.413. Israeli poetry.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, David Avidan, Dalia Rabkowitz, Yona Wollach, Maya Bejerano, and Yitzhak Laor. These works will be read against the background of the poetry of previous literary generations of writers such as H.N Blaik, Avraham Shlonsky, Natan Alterman and Lea Goldberg in an attempt to uncover changes in style, themes and aesthetic. Through close reading of the poems, the course traces the unique style and aesthetic of each poet, and aims at presenting a wide picture of contemporary Hebrew poetry. Class will be conducted in English and texts will be read in both English translation and the Hebrew original. Open for both Hebrew and non-Hebrew speakers. Students may receive credit for AS.216.300 or AS.300.413, but not both.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl.

Music
What is “Jewish music,” and what roles has it played in global and Jewish cultures? This course will address these questions, considering genres and contexts of Jewish music from cantillation to klezmer and from art music to Yiddish cinema. Cross listed with Jewish Studies
Instructor(s): J. Walden
Area: Humanities, Social and Behavioral Sciences.

Center for Language Education
AS.384.115. First Year Hebrew.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students' schedules.
Instructor(s): Z. Cohen.

AS.384.116. First Year Modern Hebrew II.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies.
Prerequisites: AS.384.115
Instructor(s): Z. Cohen.

AS.384.215. Second Year Hebrew.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students' schedules.
Prerequisites: AS.384.116 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.216. Second Year Modern Hebrew II.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.315. Third Year Hebrew.
Designed to maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students' schedules.
Prerequisites: AS.384.216 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.316. Third Year Modern Hebrew II.
Designed to: maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Recommended Course Background: AS.384.315 or permission required. Cross-listed with Jewish Studies.
Prerequisites: AS.384.315
Instructor(s): Z. Cohen

The Goucher-Hopkins Cooperative Program in Russian
The Goucher College-Johns Hopkins University Cooperative Program in Russian Language, Literature, and Culture offers a full range of courses to be drawn from for JHU students to complete either a second major or minor in Russian.

Second Major in Russian
The Russian double-major, designed to give students a working command of both the written and spoken language and a deeper understanding of the cultural and literary development of the Russian people from the advent of Christianity to the present day, consists of 30 credits beyond, but not including, the course AS.377.208 Intensive Intermediate Russian. At least 3 courses (9 credits) must be at the 300-level or higher. Russian may only be completed as an additional major; students must have a different primary major. A grade of C- or better
must be earned in all courses applied towards the major and courses may not be taken satisfactory/unsatisfactory.

Russian majors are strongly encouraged to enroll in a summer immersion or spend a semester abroad in Moscow, St. Petersburg, or Vladimir through the Bard-Smolny, ACTR, or CIEE programs. A three-week summer immersion to Odessa, Ukraine is offered some years as part of the language study. Completion of AS.377.209 Advanced Russian Grammar is typically a prerequisite to study abroad. All credits earned during approved study abroad summer and semester programs may be applied toward the minor or double-major.

Minor in Russian

The minor consists of 18 credits beyond, but not including, the course AS.377.208 Intensive Intermediate Russian. A grade of C- or better must be earned in all courses applied towards the minor and courses may not be taken satisfactory/unsatisfactory.

Grading and Course Progression for Languages Offered by the Center for Language Education

For beginning courses, only AS.377.131 Elements of Russian I may be taken satisfactory/unsatisfactory. Other languages may be taken satisfactory/unsatisfactory only at the intermediate level and above. A student earning a D in a course is not eligible to pass to the next higher level course. Students are granted credit for each semester course successfully completed, regardless of enrollment or performance in a subsequent course.

Courses

AS.370.010. Listening & Speaking - Advanced Beginner.
This course will be an in-depth study of higher level English grammar. Students will build on their foundational grammar skills, gain confidence in the more subtle nuances of grammar. Sentence structure will be studied at length giving the ability to more clearly express their ideas. Other focus areas will include but are not limited to, the perfect tenses, higher level punctuation, and modal verbs.
Instructor(s): Staff.

Area: Humanities.
Instructor(s): Staff.

AS.370.022. Reading & Writing English - Intermediate.
Instructor(s): Staff.

Instructor(s): Staff.

AS.370.032. Reading & Writing English 3.
Instructor(s): Staff.

AS.370.034. American Culture Through Film.
Instructor(s): Staff.

Instructor(s): Staff.

AS.370.042. Reading & Writing English - Advanced Plus.
Instructor(s): Staff.
AS.370.044. Accent Reduction.
In person registration only. This course is designed to help non-native American English speakers tackle American English language skills and improve their pronunciation and manner of speaking dramatically. The course incorporates the learning of language skills such as the sounds, stress patterns, rhythm, and intonation patterns of American English. This is a separate process from learning the grammar and vocabulary of American English. The completion of this course will result in accent modification, accent improvement and easily understandable conversational speech and will help the learner to function more effectively at work and outside of work.
Instructor(s): Staff.

AS.370.050. Strengthening English for the TOEFL.
This course will be an in-depth study of higher level English grammar. Students will build on their foundational grammar skills, gaining confidence in the more subtle nuances of grammar. Sentence structure will be studied at length giving students the ability to more clearly express their ideas. Other focus areas will include but are not limited to, the perfect tenses, higher level punctuation, and modal verbs.
Instructor(s): Staff.

Permit Req’d. No Auditors/Open to Graduate students only. Oral Skills for International Teaching Assistants is intended for international TAs who are not native speakers of English. In addition to improving listening comprehension in everyday interactions, students will improve their fluency, accuracy, and intelligibility in a variety of speaking situations. The core curriculum is designed to include a wide range of performance-based communicative activities. Open to international TAs and other full-time graduate students in Arts and Sciences and Engineering.
Instructor(s): N. Gooding.

Permit Req’d. Graduate students only. Communication Strategies in the American Classroom is designed to introduce international TAs to the culture of the American classroom. Students will continue to strengthen their English speaking skills, practice basic teaching techniques, and develop strategies for clear, cross-cultural communication. The core curriculum includes many performance-based activities intended to help students interact more effectively with undergraduates in a variety of speaking situations. Open to international TAs and other full-time graduate students in Arts and Sciences and Engineering.
Instructor(s): Y. Cranmer.

AS.370.602. Accent Reduction for ITA’s.
This course is intended for international Teaching Assistants (TAs) who are not native speakers of English. It focuses on improving students’ perception and pronunciation of American English through learning articulation, phonetics, and phonology. Students learn the basics of anatomy of speech production in order to understand how difficult sounds and sound contrasts are made. Students also learn the International Phonetic Alphabet (IPA) to help them distinguish sound contrasts that are difficult depending on the individual students’ native languages. Moving beyond individual sounds, students learn how sounds change depending on what word or phrase they appear in and when they appear in fast or colloquial speech. Finally, students learn and practice intonation appropriate for various types of statements and questions.
Instructor(s): J. Yarmolinskaya.

This course is intended for international Teaching Assistants (TAs) who are not well acquainted with the culture of American universities. It focuses on improving students’ understanding of the culture and communication norms in American academia. Students learn the basics of conversation and e-mail etiquette in America, as well as the norms of interacting with college students they teach, professors, and colleagues in situations such as classes, office hours, lab meetings, and scientific meetings. Students practice designing and presenting lectures, supporting materials, tests, and assignments for classes they TA, as well as scholarly presentations of their research to the scientific community. This course is open only to graduate students in AS/EN.
Instructor(s): J. Yarmolinskaya.

AS.370.604. Academic Writing.
This course is intended for international teaching assistants, graduate students and postdoctoral fellows who are not native speakers of English. Students will read and analyze the content, structure, and style of a wide range of academic and professional writing in order to improve their own essays, articles, reports, theses, critiques and proposals using those features. They will learn to explain, support, compare and argue their ideas effectively through attention to organization, vocabulary, and style. Grammar will be infused into the course as it applies to revision and editing of written work and consistency within various types of writing. Students will use a variety of strategies to improve skills in idea development, organization, word choice, sentence fluency, voice, grammar and mechanics. Writing tasks will be integrated with content, vocabulary, and grammar from various texts.
Instructor(s): Y. Cranmer.
**AS.370.605. Strengthening Oral Communication Skills.**
This course is intended for international teaching assistants, graduate students and postdoctoral fellows who are not native speakers of English. This course aims to enable students to succeed in academic, professional, and social discussions and conversations. By focusing on strategies for initiating oral communication, responding to the comments and ideas of others; as well as improving listening skills, students will become better overall at speaking and listening to English. Fiction and non-fiction media from a variety of sources will be used to stimulate discussion, sharpen listening skills, and build vocabulary. Exercises and drills will target specific grammar trouble spots and explicit pronunciation errors. So as to empower students in formal speaking situations, they will be asked to deliver two short 2-4 minute presentations and one longer 5-8 minute presentation. Extensive practice and feedback from instructor and classmates encourage students’ confidence in their public speaking skills.
Instructor(s): D. McNeal.

**AS.373.111. First Year Heritage Chinese.**
This course is designed for students who were raised in an environment in which Chinese is spoken by parents or guardians at home and for those who are familiar with the language and possess native-like abilities in comprehension and speaking. The course therefore focuses on reading and writing (including the correct use of grammar). Cross-listed with East Asian Studies.
Instructor(s): J. Yin.

**AS.373.112. First Year Heritage Chinese II.**
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Lab required. Continuation of AS.373.111. Recommended Course Background: AS.373.111 or permission required.
Prerequisites: Prereq: AS.373.111 or equivalent
Instructor(s): N. Zhao.

**AS.373.115. First Year Chinese.**
This course is designed primarily for students who have no prior exposure to Chinese. The objective of the course is to help students build a solid foundation of the four basic skills—listening, speaking, reading, and writing in an interactive and communicative learning environment. The emphasis is on correct pronunciation, accurate tones and mastery of basic grammatical structures. Note: Students with existing demonstrable skills in spoken Chinese should take AS.373.111-112. No Satisfactory/ Unsatisfactory. Students may choose to attend either lecture at 9am or 3pm on TTh. Cross-listed with East Asian Studies.
Instructor(s): J. Chen; Y. Chen.

**AS.373.116. First Year Chinese II.**
Introductory course in Modern Standard Chinese. Goals: mastery of elements of pronunciation and control of basic vocabulary of 800-900 words and most basic grammatical patterns. Students work first with Pin-Yin system, then with simplified version of written Chinese characters. Continuation of AS.373.115. Note: Student with existing demonstrable skills in spoken Chinese should take AS.373.111-112. Recommended Course Background: AS.373.115 or permission required.
Prerequisites: Prereq: AS.373.115 or equivalent.
Instructor(s): J. Chen; N. Zhao.

**AS.373.211. Second Year Heritage Chinese.**
This course is designed for students who finished AS.373.112 with C+ and above (or equivalent). Students in this course possess native-like abilities in comprehension and speaking. The course focuses on reading and writing. Cross-listed with East Asian Studies.
Prerequisites: AS.373.112 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

**AS.373.212. Second Year Heritage Chinese II.**
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Continuation of AS.373.211. Recommended Course Background: AS.373.211 or permission required.
Prerequisites: Prereq: AS.373.211 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

**AS.373.215. Second Year Chinese.**
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Cross-listed with East Asian Studies.
Prerequisites: AS.373.116 or equivalent.
Instructor(s): A. Chen; Y. Chen
Area: Humanities.

**AS.373.216. Second Year Chinese II.**
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Recommended Course Background: AS.373.215 or Permission Required. Cross-listed with East Asian Studies.
Prerequisites: Prereq: AS.373.215 or equivalent.
Instructor(s): A. Chen; Y. Chen
Area: Humanities.

**AS.373.261. Intermediate Workshop & Practicum in Engineering Chinese.**
JHU China-STEM Program: Engineering: Specialized intermediate language instruction for students of Mandarin in fields of science and engineering. Courses offered at the Nanging Center in Nanjing, China. By application only. Two years of College-level Mandarin required for admission to the China-STEM Program.
Instructor(s): N. Yu
Area: Humanities.

AS.373.415. Fourth Year Chinese.
This course is designed for students who finished AS.373.316 with a C+ or above (or equivalent). Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students are supposed to be able to understand most of the readings with the aid of a dictionary, so that class discussion is not focused primarily on detailed explanation of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings' content. Cross-listed with East Asian Studies
Prerequisites: AS.373.315
Instructor(s): J. Yin
Area: Humanities.

AS.373.416. Fourth Year Chinese II.
Continuation of AS.373.415. Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students should understand most of the readings with the aid of a dictionary, so that class discussion need not focus primarily on detailed explanation of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings' content. Recommended Course Background: AS.373.415 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.415 or equivalent.
Instructor(s): N. Zhao
Area: Humanities.

The main focus of this course is to expand the student's knowledge of four essential skills in Chinese language and to deepen the student's knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students' reading comprehension, maintain conversation skills through class discussion, increase understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Recommended Course Background: Completion of four years of Chinese language or permission required.
Area: Humanities.
AS.375.452. Topics in Chinese Media II.
The main focus of this course is to expand the student's knowledge of four essential skills in Chinese language and to deepen the student's knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students' reading comprehension, maintain conversation skills through class discussion, increase understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Continuation of 373.451. Recommended Course Background: AS.375.451 or its equivalent.
Area: Humanities.

AS.375.491. 5th Year Chinese.
Fifth Year Chinese is designed for students who finished fourth year regular or third year heritage Chinese course at JHU or its equivalent and wish to achieve a higher advanced proficiency level in Chinese. The goal of the course is to help students further develop their listening, speaking, reading and writing skills cohesively and to enhance students' understanding of Chinese culture and society through language learning. Instructor: N. Zhao
Prerequisites: AS.373.416 or AS.373.314 or equivalent.
Instructor(s): J. Chen.

AS.375.492. Fifth Year Chinese.
Fifth Year Chinese is designed for students who finished fourth year regular or third year heritage Chinese course at JHU or its equivalent and wish to achieve a higher advanced proficiency level in Chinese. The goal of the course is to help students further develop their listening, speaking, reading and writing skills cohesively and to enhance students' understanding of Chinese culture and society through language learning.
Prerequisites: AS.373.491 or equivalent.
Instructor(s): N. Zhao.

AS.375.115. First Year Arabic.
Introductory course in speaking, listening, reading, and writing Modern Standard Arabic. Presents basic grammatical structures and a basic vocabulary. Through oral-aural drill in classroom, tapes in Language Laboratory, and reading/writing exercises, students attain a basic level of competence on which they can build in subsequent years of study No Satisfactory/ Unsatisfactory
Instructor(s): B. Rajab.
Prerequisites: AS.375.115 or equivalent.
Instructor(s): S. Jafire.

AS.375.116. First Year Arabic II.
Continuation of AS.375.115. Introductory course in speaking, listening, reading, and writing Modern Standard Arabic. Presents basic grammatical structures and a basic vocabulary. Through oral-aural drill in classroom, tapes in Language Laboratory, and reading/writing exercises, students attain a basic level of competence on which they can build in subsequent years of study. Accelerated students should register for Section 01. May not be taken Satisfactory/ Unsatisfactory
Prerequisites: Prereq: AS.375.115 or equivalent.
Instructor(s): S. Jafire.

AS.375.120. Beginning Arabic II.
Continuation of Beginning Arabic I. Introductory course in speaking, listening, reading, and writing Modern Standard Arabic. Presents basic grammatical structures and a basic vocabulary. Through oral-aural drill in classroom, tapes in Language Laboratory, and reading/writing exercises, students attain a basic level of competence on which they can build in subsequent years of study.

AS.375.215. Second Year Arabic.
Designed to bring students up to competency level required for third/fourth year Arabic. Students will consolidate and expand their mastery of the four basic skills acquired in AS.375.115-116. More authentic material—written, audio, and visual—will be used, and culture will be further expanded on as a fifth skill.
Prerequisites: AS.375.116 or equivalent.
Area: Humanities.

AS.375.216. Second Year Arabic II.
Continuation of AS.375.215. Designed to bring students up to competency level required for third/fourth year Arabic. Students will consolidate and expand their mastery of the four basic skills acquired in AS.375.115-116. More authentic material—written, audio, and visual—will be used, and culture will be further expanded on as a fifth skill.
Prerequisites: Prereq: AS.375.215 or equivalent.
Instructor(s): B. Rajab
Area: Humanities.

AS.375.301. Third Year Arabic.
Designed to enhance students' ability to read, discuss, and write about various topics covered in traditional and contemporary Arabic texts. Recommended Course Background: AS.375.216 or equivalent.
Prerequisites: AS.375.116
Area: Humanities.

AS.375.302. Third Year Arabic II.
Designed to enhance students' ability to read, discuss, and write about various topics covered in traditional and contemporary Arabic texts. Continuation of AS.375.301. Recommended Course Background: AS.375.301 or permission required.
Prerequisites: Prereq: AS.375.301 or equivalent.
Instructor(s): B. Rajab
Area: Humanities.

AS.375.401. Fourth Year Arabic.
This is an introductory course to different periods of the Arabic literature. Selections of famous Arabic poetry and short prose works are the substance of the course.
Prerequisites: AS.375.302 or equivalent.
Instructor(s): S. Jafire
Area: Humanities.

This is an introductory course to different periods of the Arabic literature. Selections of famous Arabic poetry and short prose works are the substance of the course. Continuation of AS.375.401. Recommended Course Background: AS.375.302 or equivalent.
Prerequisites: Prereq: AS.375.401 or equivalent.
Instructor(s): S. Jafire
Area: Humanities.

Instructor(s): K. Tahrawi.

AS.375.801. Independent Study - Arabic.  
Graduate level Independent Study course in Arabic.  
Instructor(s): B. Rajab.

AS.375.802. Independent Study -- Arabic.  
Instructor(s): B. Rajab  
Area: Humanities.

AS.377.100. Linguistic Crossroads: Where Cultures (Con)/(Di)verge.  
This course provides an investigation of the world’s language families from a linguistic perspective. Students will be introduced to the IPA transliteration system, followed by an examination of the structures that are common to several families, as well as others that are uniquely their own. Emphasis will be placed on the historic context of language apropos to a discussion of phonetics, morphology, and basic syntax of representative languages from around the world, including English, German, Japanese, Russian, and Spanish. A course project will consist of students interviewing and noting in phonetics several words and phrases from two different languages (using native speakers) with an analysis of observed similarities and differences. In English.  
Instructor(s): A. Czeczulin.

AS.377.131. Elements of Russian I.  
Designed to give student a firm foundation in the language, with special emphasis on the development of vocabulary, basic reading, and conversational skills. (Section 02 taught at Goucher College)  
Instructor(s): A. Czeczulin; O. Samilenko.

AS.377.132. Elementary Russian II.  
Designed to give students a firm foundation in the language, with special emphasis on the development of vocabulary, basic reading, and conversational skills. Continuation of AS.377.131. Section 02 taught at Goucher. May not be taken Satisfactory/Unsatisfactory. Recommended Course Background: AS.377.131.  
Instructor(s): A. Czeczulin; O. Samilenko.

Intensive oral work; continued emphasis on grammar and reading comprehension. Section 02 taught at Goucher College.  
Prerequisites: AS.377.132  
Instructor(s): A. Czeczulin  
Area: Humanities.

Continuation of AS.377.208. Intensive oral work; continued emphasis on grammar and reading comprehension.  
Instructor(s): A. Czeczulin  
Area: Humanities.

Discussions based on readings, films, and multimedia exercises. Special attention is paid to the active use of grammar structures in fourth semester Russian. Taught at Goucher. Recommended Course Background: AS.377.209 or instructor’s permission.  
Prerequisites: AS.377.135  
Instructor(s): O. Samilenko  
Area: Humanities.

AS.377.211. Introduction to Russian Literature I.  
This first intensive reading course of the literary sequence focuses on a survey of major writers, genres, and literary movements of mid-nineteenth century Russia including select works of Pushkin, Gogol, Lermontov, Turgenev, Tolstoy and Dostoevsky adapted to the intermediate level. Taught in Russian  
Prerequisites: AS.377.209 and AS.377.210 or permission of instructor.  
Instructor(s): O. Samilenko  
Area: Humanities.

AS.377.237. The Russian Press.  
Reading and discussion of topics drawn from the Russian press and contemporary literature. Designed to strengthen the student’s command of Russian vocabulary, especially in the areas of history, political science, and economics, while providing a deeper insight into the dynamics of everyday life in Russia today.  
Prerequisites: AS.377.209 or AS.377.210  
Instructor(s): A. Czeczulin  
Area: Humanities.

The evolution of Russian culture and civilization from the Mongol invasion to the present day conducted through a study of literary texts, architecture, art, music, film, and multimedia. Taught in English. Held at Goucher.  
Area: Humanities.

AS.377.254. Soul of Russia: Culture and Civilization.  
The evolution of Russian culture and civilization from the Mongol invasion to the present day conducted through a study of literary texts, architecture, art, music, film, and multimedia. Taught in English. Taught at Goucher.  
Area: Humanities.

A survey course of Russian oral and subsequent written tradition using multimedia and presented against the background of the Indo-European tradition. Taught in English at Goucher College  
Instructor(s): A. Czeczulin  
Area: Humanities.

This course will explore the role of Russian women in the world by carefully examining the significance of contributions by these women. Diverse perspectives will be explored (Russian and Russian National). Students will examine and analyze texts written by and about women struggling with questions regarding patriarchal and male-based society. The fact that these women have remained hidden from Russia and the world at large will also be addressed, using feminist methodologies. This course will provide students with the opportunity to pursue their own questions in dialogue. Rus 270 is available as a traditional or hybrid class. Offered Fall 2015 and every fall. Taught at Goucher College.  
Instructor(s): A. Czeczulin  
Area: Humanities.

AS.377.318. Chekov and the Short Story.  
Chekov’s short stories and plays studied against the social, political, and philosophic background of his time. Close readings and in-depth stylistic analysis. Designed for advanced students. Taught in Russian  
Instructor(s): O. Samilenko  
Area: Humanities.

Advanced work in translating-- Russian into English-- in the sciences and social sciences. Taught at Goucher.
Area: Humanities.

AS.377.353. The Soul of Russia: Russian Culture and Civilization and Capstone Project.
Students will learn about Russian traditions, folklore, conceptions of the world, and the search for national identity in juxtaposition with Russian history and literature. Seven topics will be covered using literature, music, cuisine and dance. At the 300-level students are required to complete a research paper and a capstone project that includes work in the Russian language done through reading and written assignments or through a documented community-based learning capstone project with the instructor’s permission. The course is taught in English. Students taking 253 receive 3 credits. Students taking 353 receive 4 credits.
Instructor(s): O. Samilenko
Area: Humanities.

AS.377.395. Senior Seminar I: Folklore in Russian Literature.
Folkloric Elements in the works of Pushkin, Gogol, Lermontov, and Leskov.
Instructor(s): O. Samilenko
Area: Humanities.

AS.377.396. Senior Seminar II.
A close study of Russian poetry from the eighteenth century to the present, including major poetic movements. Taught in Russian.
Instructor(s): O. Samilenko
Area: Humanities.

Through arrangement with the instructor.
Instructor(s): A. Czeczulin; O. Samilenko.

Instructor(s): O. Samilenko.

AS.377.570. Independent Study - Russian.
Instructor(s): O. Samilenko.

AS.377.599. Independent Study.
Instructor(s): O. Samilenko.

AS.378.115. First Year Japanese I.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/ Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the fall term, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 60 kanji in context. Knowledge of grammar will be expanded significantly in 2nd year Japanese. May not be taken Satisfactory/Unsatisfactory. Recommended Course Background: AS.378.115
Prerequisites: Prereq: AS.378.115 or equivalent.
Instructor(s): M. Johnson; S. Katagiri.

Training in spoken and written language, increasing their knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Recommended Course Background: AS.378.115 and AS.378.116 or equivalent.
Prerequisites: AS.378.116 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.216. Second Year Japanese II.
Continuation of Beginning Japanese and Intermediate Japanese I. Training in spoken and written language, increasing students’ knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Lab required. Recommended Course Background: AS.378.215 or equivalent.
Prerequisites: Prereq: AS.378.215 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.315. Third Year Japanese.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Cross-listed with East Asian Studies
Prerequisites: AS.378.215-216
Instructor(s): M. Nakao
Area: Humanities.

AS.378.316. Third Year Japanese II.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Lab required. Continuation of AS.378.315. Recommended Course Background: AS.378.315 or equivalent.
Prerequisites: Prereq: AS.378.315 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It is also appropriate for graduate students who need to be able to read materials written in Japanese. Recommended Course Background: AS.378.115-116 or equivalent.
Instructor(s): M. Johnson
Area: Humanities.
Continued from 378.396: Fundamentals of Japanese Grammar. This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It covers complex grammatical items introduced in the 2nd year level from a higher level, linguistic perspective. It is also appropriate for graduate students who need to be able to read materials written in Japanese.

Instructor(s): Y. Nagata
Area: Humanities.

AS.378.416. Fourth Year Japanese II.
By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Lab required. Recommended Course Background: AS.378.415
**Prerequisites:** Prereq: AS.378.415 or equivalent.
Instructor(s): Y. Nagata
Area: Humanities.

This course is designed for graduate students (particularly in East Asian Studies) and undergraduate students whose proficiency level is higher than 4th-year Japanese as offered at Johns Hopkins University or equivalent and those who plan to pursue studies utilizing written Japanese materials. Students will learn effective methods for reading Japanese materials, varying from works of literature to modern academic articles on topics of students' interest.
**Prerequisites:** AS.378.612. Readings in Japanese Studies II.
This course is designed for graduate students (particularly in East Asian Studies) and undergraduate students whose proficiency level is higher than 4th-year Japanese as offered at Johns Hopkins University or equivalent and those who plan to pursue studies utilizing written Japanese materials. Students will learn effective methods for reading Japanese materials, varying from works of literature to modern academic articles on topics of students' interest. Cross-listed with East Asian Studies.

AS.379.151. Beginning Kiswahili I.
This introductory course presents some of the basic grammatical, phonological, and sociological elements of the Kiswahili language. Students are exposed to different facets of the cultures of eastern Africa (especially Tanzanian and Kenyan). The focus in the course is on vocabulary, which is developed through the use of pictures, dialogues, question and answer exercises, audio and/or video tapes. Resources in the Language Lab are incorporated in the course.
**Prerequisites:** AS.379.397. Fundamentals of Japanese Grammar.
Instructor(s): J. Kamau.

AS.379.152. Beginning Kiswahili II.
Instructor(s): J. Kamau.

AS.379.501. Indep Study Kiswahili.
Instructor(s): J. Kamau.

AS.379.502. Ind Study - Kiswahili.
Instructor(s): J. Kamau.

AS.380.101. First Year Korean.
Introduces the Korean alphabet, hangeul. Covers basic elements of the Korean language, high-frequency words and phrases, including cultural aspects. Focuses on oral fluency reaching Limited Proficiency where one can handle simple daily conversations. No Satisfactory/ Unsatisfactory. Cross-listed with East Asian Studies
**Prerequisites:** AS.380.101.
Instructor(s): J. Song.

AS.380.102. First Year Korean II.
Focuses on improving speaking fluency to Limited Proficiency so that one can handle simple daily conversations with confidence. It provides basic high-frequency structures and covers Korean holidays. Continuation of AS.380.101. Recommended Course Background: AS.380.101 or permission required.
**Prerequisites:** Prereq: AS.380.101 or equivalent.
Instructor(s): J. Song.

AS.380.201. Second Year Korean.
Aims for improving oral proficiency and confident control of grammar with vocabulary building and correct spelling intended. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness. Project due on Korean cities. Existing demonstrable skills in spoken Korean preferred.
**Prerequisites:** Prereqs: AS.380.101 and AS.380.102
Instructor(s): J. Song
Area: Humanities.

AS.380.202. Second Year Korean II.
Aims for improving writing skills with correct spelling. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness, including discussion on family tree. Continuation of AS.380.201. Recommended Course Background: AS.380.201 or equivalent.
**Prerequisites:** Prereq: AS.380.201 or equivalent.
Instructor(s): J. Song
Area: Humanities.

AS.380.301. Third Year Korean.
Emphasizes reading literacy in classic and modern Korean prose, from easy essays to difficult short stories. Vocabulary refinement and native-like grasp of grammar explored. Project due on Korean culture. Cross-listed with East Asian Studies
**Prerequisites:** AS.380.202 or equivalent.
Instructor(s): J. Song
Area: Humanities.

AS.380.302. Third Year Korean II.
Emphasizes reading literacy in classic and modern Korean prose. By reading Korean newspapers and professional articles in one's major, it enables one to be well-versed and truly literate. Continuation of AS.380.301. Cross-listed with East Asian Studies Prerequisite: AS.380.301 or equivalent.
**Prerequisites:** Prereq: AS.380.301 or equivalent.
Instructor(s): J. Song
Area: Humanities.
AS.381.101. First Year Hindi I.
Course focuses on acquisition of additional vocabulary and grammatical structures in culturally authentic contexts, listening, speaking, reading, and writing comprehension. No Satisfactory/ Unsatisfactory Lab Req’d.
Instructor(s): U. Saini.

AS.381.102. First Year Hindi II.
This course prepares students to function in everyday situations in the Hindi speaking world. Focuses on the acquisition of basic vocabulary and grammatical structures in culturally authentic contexts through listening, speaking, reading, and writing comprehension. Hindi reading and writing is taught in its original Dayva-nagari script. Oral-aural drills in class and work in the Language Lab is required.

Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Instructor(s): Z. Cohen.

AS.384.116. First Year Modern Hebrew II.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies.
Prerequisites: AS.384.115
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.215. Second Year Hebrew.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.116 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.216. Second Year Modern Hebrew II.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.315. Third Year Hebrew.
Designed to maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.216 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.316. Third Year Modern Hebrew II.
Designed to: maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Recommended Course Background: AS.384.315 or permission required. Cross-listed with Jewish Studies.
Prerequisites: AS.384.315
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.503. Summer Internship-Hebrew.
Instructor(s): Z. Cohen.
Cross Listed Courses

East Asian Studies

AS.310.316. First Year Classical Chinese: Language and Literature of the Ancient Period.
Readings in prose and poetic texts of the Zhou and Han Dynasties. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in western languages that treat the culture and writers of the Ancient period. Quizzes and Tests (Midterm and Final) will cover both language and cultural data. A short paper also required.
Instructor(s): V. Cass
Area: Humanities.

This course introduces the basic syntax, grammar and vocabulary of Classical Chinese or Literary Chinese (guwen/wenyen wen), the written language from Old Chinese to the early twentieth century. Classical Chinese, which differs substantially form modern colloquial Chinese, is the language in which traditional Chinese historical, philosophical, religious and literary works are written. The structure, grammar and vocabulary of Classical Chinese still has large influence on modern Chinese formal documents and newspaper. Therefore, studying Classical Chinese is crucial not only to those who wish to understand original Chinese texts correctly but also to anyone who wants to attain a high level of reading proficiency in modern Chinese.
Prerequisites: AS.373.111 OR AS.373.112 OR AS.373.115 OR AS.373.116 AND AS.373.211 AND AS.373.212 OR AS.373.215 OR AS.373.216
Instructor(s): F. Chao
Area: Humanities.

Major/Minor in Latin American Studies

Also see Requirements for a Bachelor's Degree (p. 20).

The Program in Latin American Studies (PLAS) coordinates a major and a minor in Latin American studies. It aims to provide undergraduate students with a broad understanding of the complexity and richness of Latin American political, social, and cultural phenomena. As a result of completing the major or the minor, students will have gained a deep understanding of Latin American politics, economy, society, and culture, as well as of the intricate relationship between the region and the United States.

Learning Goals:

Students who graduate with a major or a minor in Latin American studies from Johns Hopkins will be able to:

• Demonstrate command of either Spanish or Portuguese in order to read documents, literature, or view media at an advanced level.
• Write effectively and support their arguments with appropriate evidence.
• Demonstrate an understanding of research methodologies drawn from both the humanities and social sciences appropriate to the field of Latin American studies.
• Critically evaluate the position of Latin America in an increasingly globalized world
• Demonstrate an awareness of the variety of cultures in Latin America.
• Demonstrate familiarity with the Latin American literary tradition and be able to analyze and interpret literary texts.

Students who decide to major or minor in Latin American studies are required to study Spanish or Portuguese. Language requirements can be waived for those who demonstrate suitable knowledge of either Spanish or Portuguese, or in an Amerindian language such as Quechua or Guarani. The general "Introduction to Latin American Studies" course is required for the major.

Though students may choose to emphasize a particular area of specialization within Latin American studies (e.g., politics, public health, literature), the major and minor programs require a distribution of courses across a variety of areas.

Requirements for the Major

The requirements for a major in Latin American Studies are as follows:

• Four lower-level courses (100- and 200-level courses) dealing with Latin America, one of which must be the general introductory course (AS.361.130 Introduction to Latin American Studies) to Latin America.
• Five upper-level courses (300-level courses and above) focused on Latin America.
• Two electives courses (at any level) relevant or with reference to Latin America.
• Language proficiency (i.e., reading fluidity and basic conversational skills) through the advanced level in either Spanish or Portuguese will be required. Language requirements can be waived for those who demonstrate a suitable proficiency in either Spanish or Portuguese.
• No grade below C- will be accepted for the major requirements and courses may not be taken satisfactory/unsatisfactory.

http://krieger.jhu.edu/plas/
Language proficiency in Spanish or Portuguese through the advanced level *

AS.361.130 Introduction to Latin American Studies 3
Three 100- or 200-level courses relating to Latin America 9
Five 300-level or higher courses relating to Latin America 15
Two elective courses relating to Latin America chosen with advisor's approval. 9

Total Credits 36-58

* Language proficiency can be demonstrated by the completion of AS.210.312 Advanced Spanish II or AS.210.392 Advanced Portuguese: Language and Literature II or via placement exam.

Honors in the Major
To be eligible for honors in Latin American Studies, a 3.5 GPA in the major courses as well as the completion of a senior honors thesis in Latin American Studies is required.

Requirements for the Minor
The requirements for a minor in Latin American Studies are as follows:

- Four upper-level courses (300 or above) focused on Latin America.
- Intersession courses may not be used to fulfill this requirement.
- Two additional courses at any level dealing with Latin America.
  Note: 3-credit intersession or summer session non-language courses offered by JHU may be used to fulfill this requirement.
- Language proficiency through the intermediate level in either Spanish or Portuguese.
- No grade below C- will be accepted for the minor requirement and courses may not be taken satisfactory/unsatisfactory.

Language proficiency in Spanish or Portuguese through the intermediate level *
Two courses at any level relating to Latin America 6
Four courses at the 300-level or higher relating to Latin America 12

Total Credits 18-34

* Language proficiency can be demonstrated by the completion of AS.210.212 Intermediate Spanish II or AS.210.278 Intermed/Adv Portuguese or via placement exam.

For current course information and registration go to https://isis.jhu.edu/classes/

Latin American Studies

AS.361.124. Latin American Film: Mini-Course.
This course provides a brief, four-week, one-credit introduction to the cultural, political and aesthetic domains of Latin American cinema through thematically focused discussions of four feature-length films.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

AS.361.130. Introduction to Latin American Studies.
This course provides an introduction to the study of Latin American cultures and societies from the vantage point of city life and urban representation. We will engage literatures from a variety of disciplines to discuss how issues such as modernization and urbanization processes; tradition, identity and ethnicity; class, marginality and urban social movements; gender and the changing status of women; arts and literature are experienced and represented in the Latin American urban environments.
Instructor(s): E. Gonzalez; G. Paquette; V. Procupez
Area: Humanities, Social and Behavioral Sciences.

Area: Humanities, Social and Behavioral Sciences.

Instructor(s): D. Poole; E. Gonzalez; G. Paquette; S. Castro-Klaren.

AS.361.550. Internship.
Instructor(s): D. Poole; G. Paquette
Area: Humanities, Social and Behavioral Sciences.

Cross-Listed Course Offerings

Anthropology

This course combines anthropological perspectives with the discussion and examination of technology-based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.
Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences.

Area: Humanities, Social and Behavioral Sciences.

German and Romance Languages & Literatures

AS.211.380. Modern Latin American Culture.
Taught in Spanish. This course will explore the fundamental aspects of Latin America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Instructor(s): Staff
Area: Humanities.

AS.211.380. Modern Latin American Culture.
This course will explore the fundamental aspects of Latin America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Instructor(s): Staff
Area: Humanities.
AS.211.394. Brazilian Culture & Civilization.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in Portuguese for 3 credits should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

Study of the music and literature inspired by three groups of great liminal influence in the cultural and political affairs of their respective nations. Gauchos (Argentina), Afro Hispanics (Cuba, Puerto Rico, Santo Domingo), Gitanos (Spain). Attention given to popular and learned myths and stereotypes and the history of efforts to establish self-identity. Conducted in Spanish. Recommended Course Background: AS.210.326
Instructor(s): E. Gonzalez
Area: Humanities.

We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

History

AS.100.438. Modern Mexico and the Mexican Revolution.
An examination of the political, social, and economic factors between 1810 and 2010 that produced incessant civil war in Mexico during the 19th century and a revolution in the early 20th century. Cross listed with PLAS
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.439. Cuban Revolution and the Contemporary Caribbean.
A lecture course dealing with the development of the Cuban Revolution and the tortuous history of the Caribbean during the 19th and 20th centuries.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.440. The Revolutionary Experience in Latin America.
Comparative examinations of revolutionary political changes in Haiti, Mexico, Bolivia, and Cuba. Cross-listed with Latin American Studies
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.441. Society, Politics, and Economics in Latin America.
This course traces the complex relationship between politics, economics, and social changes in Latin America and the Caribbean since World War II.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

History of Art

AS.010.105. Art of the Ancient Americas.
Surveys the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.320. Art of Colonial Peru.
The visual arts of viceregal Peru (16th-18th c) are considered in historical context. Religious orders, art schools, artisan guilds and cofradía are examined as are the social and political implications of art patronage.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.334. Problems in Ancient American Art.
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS and Program in Museum and Society
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.365. Art of the Ancient Andes.
The visual arts of Andean South America and their respective cultural contexts form the basis of this seminar. Collections study in museums.
Instructor(s): L. Deleonardis
Area: Humanities.

History of Science

AS.140.390. Science and Technology in Latin America.
The course surveys the development of western science and technology in Hispanic America (1492 to the present). We begin studying the hybridization of scientific practices between European and Native American cultures during the early colonial era and end with the transfer of technologies and industrialization of the 20th century. We emphasize the role on science and technology in state formation, the acculturation of foreign ideas in colonial and postcolonial societies, and the role of intellectual elites in modernization programs.
Instructor(s): M. Portuondo
Area: Humanities, Social and Behavioral Sciences.
Political Science

AS.190.331. Comparative Racial Politics.
Students will learn to utilize qualitative, interpretive methods of comparative politics to examine dynamics of racial and/or ethnic politics in the nation-states of Cuba, Brazil, Britain and France, Germany, and the United States. Readings will emphasize the role of the state, political economy, national culture, racist ideologies and anti-racist politics in the formation, maintenance and transformation of conditions of race-based inequalities. Students will also become familiar with theories and concepts of race and ethnicity, and the histories of social movements in the aforementioned societies founded, in part, on racial and/or ethnic identification as a response to inequality. Formerly titled: Race and Racism in Comparative Perspective.
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.

AS.190.392. Introduction to Latin American Politics.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

A research seminar examining the politics of environmental issues in developing countries, with special focus on Latin America.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

AS.190.419. Identity and Nations in Latin American Politics.
This seminar class explores formation and political mobilization of identities - group, ethnic, gendered, national, cosmopolitan - in Latin America. Although some of the reading will be broadly comparative, the spring 2013 version of the class will focus especially on Brazil. Requirements will include short response papers and a term paper. Portuguese or Spanish desirable but not required. Enrolled students must be juniors or seniors and must have taken at least one prior course in comparative politics.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

Sociology

AS.230.343. Political Sociology of Latin America.
This course provides an overview of Latin America through its historical, economic, social, and political dimensions. Emphasis will be given to the analysis of social structures: class, race and ethnicity, and the contemporary social movements. The course begins with an overview of the pre-Columbian civilizations and colonial legacies that gave rise to the multiethnic societies and the ethnic conflicts which characterize contemporary Latin America. Cross-listed with Program in Latin American Studies and International Studies (CP)
Instructor(s): M. von der Heydt-Coca
Area: Social and Behavioral Sciences.

This course will offer an overview of Latin America's economic reality as an intertwined process of economic and political domestic factors within the constraints of the world economy. Latin American development will be analyzed from a historical perspective. The first half of the semester the course will focus on the analysis of the economic developmental patterns starting in the middle of the 19th century to the populist era in the middle of the 20th century. In the second half of the semester, we will analyze in depth the contemporary neoliberal approach to development. Globalization is the force that drives economic, social and political processes in Latin America. The course will include case studies as well the social conflicts generated by the increasing polarization of the society. Students will be exposed to important sociological theories.
Instructor(s): M. von der Heydt-Coca
Area: Social and Behavioral Sciences.

For current faculty and contact information go to http://anthropology.jhu.edu/plas/people.html

Faculty

Director
Gabriel Paquette Director, Program in Latin American Studies Professor, Department of History

Professors
Sara Castro-Klarén
(German and Romance Languages and Literatures): Latin American literature, colonial studies, discourse analysis, contemporary novel.

Lisa DeLeonardis
Austen-Stokes Professor (History of Art): Art and archaeology of the ancient Americas.

William Egginton
(German and Romance Languages and Literatures): Spanish and Latin American literatures; literary theory; and the relation between literature and philosophy.

Eduardo González
Latin American Literature and Cinema. (German and Romance Languages and Literatures): Spain, Latin America and Caribbean literature and cinema.

James D. Goodyear
Associate Director of Public Health Studies Program, Professor (History of Science, Medicine and Technology): history of medicine, Latin American history, Brazil.

Michael Hanchard
(Political Science): comparative politics, Latin American politics, and comparative racial politics.

Margaret E. Keck
(Political Science): comparative politics, Latin American politics, and the environment.

Deborah Poole
(Anthropology): visuality and representation in Latin America, Peru, and Mexico; race and ethnicity; violence, liberalism, and the state; law and judicial reform.

Beverly J. Silver
(Sociology): historical sociology, labor and social movements, political sociology, international development.

Lea Ybarra
(German and Romance Languages and Literatures): Chicano and Latino studies.

**Assistant Professors**

Nadia Altschul
Assistant Professor, Department of German and Romance Languages and Literatures

Clara Han
(Anthropology): Medical Anthropology, Health and the Economy, Public Health, Social Studies of Medicine and Technology, Inequality, Latin America, Chile.

Sebastian Mazzuca
Assistant Professor, Department of Political Science

Juan Obarrio
(Anthropology): Law, temporality and the political, state and economy, memory and subjectivity, magic, value and violence, Southern Africa, Latin America.

Cindy Parker
Assistant Professor, Department of Earth and Planetary Sciences

Maria Portuondo
(History of Science): science and exploration, science and technology in Latin America, early modern Spanish and Latin American Cosmography and geography.

Erin Rowe
Assistant Professor, Department of History

**Lecturers**

Flavia De Azeredo-Cerqueira
Portuguese Language Program Director and Lecturer in Portuguese

Magda von der Heydt-Coca
(Sociology): contemporary sociology, Andean region.

**Professors Emeriti**

Mary M. Bensabat-Ott
Lecturer, German and Romance Languages and Literatures

Richard Kagan
Professor, History

Franklin Knight
Professor, History Latin American and Carribbean

Lea Ybarra
Interdepartmental, cross-listed with: Romance Languages & Literatures, Political Science, History, Sociology and Chicano Studies

**Mathematics**

Mathematics, more than the fundamental language and underlying analytical structure of science and technology, is a formal way of thinking—an art that ties together the abstract structure of reason and the formal development of the logic that defines the scientific method. From the study of just how arguments and theories are formed in language and technology to the framework of quantitative and qualitative models of the natural and social sciences, mathematics is based upon the development of precise expressions, logical arguments, and the search for and exposure of pattern and structure.

The undergraduate program in the Department of Mathematics is intended both for students interested in attaining the proper preparation for graduate study and research in pure mathematics, and for students interested in using mathematics to define, properly pose, and solve problems in the sciences, engineering, and other areas. With either purpose, the focus of the program is to help those who wish to understand further the logical content, geometric meaning, and abstract reasoning of mathematics itself. A flexible program involving a broad selection of courses is a department tradition. The program begins by introducing students to the basics of algebra and mathematical analysis and then gives them the choice of exploring topics in theoretical mathematics or studying applications to physics, economics, engineering, computer science, probability, statistics, or mechanics.

The graduate program is designed primarily to prepare students for research and teaching in mathematics. It is naturally centered around the research areas of the faculty, which include algebraic geometry, algebraic number theory, differential geometry, partial differential equations, topology, several complex variables, algebraic groups, and representation theory. The program can be supplemented in applied directions by courses in theoretical physics, computer science, mechanics, probability, and statistics offered in other departments of the Krieger School of Arts and Sciences and in the Department of Applied Mathematics in the Whiting School of Engineering.

**Facilities**

The Mathematics Department resides in Krieger Hall on the Keyser Quad of Homewood. Adjacent to Krieger Hall, The University’s Milton S. Eisenhower Library has an unusually extensive collection of mathematics literature, including all the major research journals, almost all of which are accessible electronically. The stacks are open to students. The department also has a useful reference library, the Philip Hartman Library. Graduate students share departmental offices, and study space can also be reserved in the university library. Graduate students may access the department’s Linux and Windows servers, as well as computers in graduate student offices. The department also hosts numerous research seminars, special lectures, and conferences throughout the academic year.

**Math Course Placement and Sequencing for All Students**

There are different versions of Calculus I and II offered by the Mathematics Departments and students should select their first course in math at JHU based on their major intentions and placement. Students intending to major in mathematics, the physical sciences, or engineering are encouraged to begin with the AS.110.108 Calculus I - AS.110.109 Calculus II (For Physical Sciences and Engineering) sequence or AS.110.113 Honors Single Variable Calculus. Students majoring in other subjects may wish to take the AS.110.106 Calculus I - AS.110.107 Calculus II (For Biological and Social Science) sequence which relates the methods of calculus to the biological and social sciences. A one-semester pre-calculus course (AS.110.105 Introduction to Calculus) is offered for students who could benefit from additional
preparation in the basic tools (algebra and trigonometry) used in calculus.

Entering students may receive course credit for Calculus I or Calculus I and II on the basis of the College Board Advanced Placement (AP) or International Baccalaureate (IB) exams (p. 27). All students, regardless of completion of advanced placement exams previously, must take a departmental placement exam to determine their appropriate first course in mathematics. Additional placement information can be found here (http://www.mathematics.jhu.edu/new/undergrad/advising_placement.htm).

After completing a Calculus II course, the courses AS.110.201 Linear Algebra, AS.110.202 Calculus III, or AS.110.302 Diff Equations/Applic may be taken in any order. The department offers honors courses in both AS.110.212 Honors Linear Algebra and AS.110.211 Honors Multivariable Calculus.

Requirements for the B.A. Degree

In addition to the Requirements for a Bachelor's Degree (p. 20), a candidate for the bachelor's degree in mathematics is required to have completed the major requirements listed below. All courses used to meet these requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

Honors Program in Mathematics

As a general guideline, departmental honors are awarded to recipients of the B.A. degree who have completed AS.110.311 Complex Analysis, as well as AS.110.401 Advanced Algebra I-, AS.110.415 Honors Analysis I-, AS.110.416 Honors Analysis II, and one more course at the 400-level or above with at least a 3.6 average in these six courses.

J.J. Sylvester Prize

The J.J. Sylvester Prize in Mathematics, which carries a cash award, is given each year to the one of two top-performing graduating seniors majoring in mathematics for outstanding achievement.
The B.A./M.A. Program

By applying the same courses simultaneously toward the requirements for the B.A. and M.A. degrees, an advanced student can qualify for both degrees in four years. Admission to the program is by the standard graduate application form, which should be completed in the junior year. At least a 3.0 average is required in the 400-level mathematics courses taken while resident at the university. Students may contact the graduate program assistant for further information.

Undergraduate Teaching Assistantships

The department awards many upper-level undergraduates the opportunity to act as recitation instructors to our freshman courses, enabling them to practice the art of teaching and talking mathematics and to earn a valuable credential while studying for their degree.

Admission

Admission to the Ph.D. program is based on academic records, letters of recommendation, and Graduate Record Examination scores. International applicants are required to submit a TOEFL or IELTS score if English is not their native language.

Basic Program

Graduate study is centered around three core areas:

**Analysis**
- AS.110.605 Real Variables
- AS.110.607 Complex Variables
- AS.110.608 Riemann Surfaces
- AS.110.631 Partial Differential Equations
- AS.110.632 Partial Differential Equations
- AS.110.645 Riemannian Geometry
- AS.110.646 Riemannian Geometry

**Algebra**
- AS.110.601 Algebra
- AS.110.602 Algebra
- AS.110.617 Number Theory
- AS.110.619 Lie Groups and Lie Algebras
- AS.110.643 Algebraic Geometry
- AS.110.644 Algebraic Geometry

**Topology**
- AS.110.615 Algebraic Topology
- AS.110.616 Algebraic Topology

These 600-level graduate courses are preliminary to research and are built upon the foundations constituted by the 400-level courses: AS.110.401 Advanced Algebra I, AS.110.402 Advanced Algebra II, AS.110.405 Analysis I, AS.110.406 Analysis II or AS.110.311 Complex Analysis, and AS.110.413 Introduction To Topology.

The 700-level courses are designed to bring students abreast of recent developments and to prepare them for research in the area of their choice.

Requirements for the M.A. Degree

Although the Mathematics Department does not admit students seeking a terminal M.A. degree, students in the Ph.D. program may earn an M.A. degree. Advanced undergraduate students may also apply to be admitted to the accelerated B.A./M.A. program.

M.A. candidates must complete:
- Four graduate courses given by the Johns Hopkins Mathematics Department;
- Two additional courses at the graduate or 400-level, other than AS.110.401, AS.110.405, and AS.110.415, given by the Johns Hopkins Mathematics Department, or, with the permission of the graduate program director, graduate mathematics courses given by other departments or universities.

All courses used to satisfy the requirements must be completed with a grade of B- or better. (Advanced graduate courses completed with a grade of P can also be used to satisfy the requirements.)

Requirements for the Ph.D. Degree

The departmental requirements for the Ph.D. degree are:

1. Candidates must show satisfactory work in Algebra (AS.110.601-AS.110.602), Real Variables (AS.110.605), Complex Variables (AS.110.607), Algebraic Topology (AS.110.615), and one additional mathematics graduate course in their first year. The seminars and qualifying exam preparation course cannot be used to fulfill this requirement. The algebra and analysis requirements can be satisfied by passing the corresponding written qualifying exam in September of the first year; these students must complete at least two courses each semester. Students having sufficient background in topology can substitute an advanced topology course for AS.110.615, with the permission of the instructor.

2. Candidates must pass written qualifying exams by the beginning of their second year in Analysis (Real and Complex) and in Algebra. Exams are scheduled for September and May of each academic year.

3. Candidates must show satisfactory work in at least two mathematics graduate courses each semester of their second year, and, if they have not passed their oral qualifying exam, in the first semester of their third year.

4. Candidates must pass a departmental oral qualifying examination in the student’s chosen area of research by April 8th of the third year. The topic of the exam is chosen in consultation with the faculty member who has agreed (provisionally) to be the student’s thesis advisor, who will also be involved in administering the exam.

5. There is no longer a Mathematics Department foreign language requirement. With the vast majority of articles written in English, the importance of having the capability of reading another language has diminished. However, important earlier literature in certain areas of mathematics may be written in French, German, or Russian. Moreover, some articles are still being written in French. It is now at the discretion of the student’s thesis advisor whether to impose a language requirement.

6. Candidates must produce a dissertation based upon independent and original research.

7. Candidates will gain teaching experience in mathematics as a teaching assistant for undergraduate courses. The student will be under the supervision of both the faculty member teaching the course and the director of undergraduate studies. First year
students are given a reduced TA workload in the spring semester (this is related to item #2).

8. After completion of the thesis research the student will defend their dissertation by means of the Graduate Board Oral Exam. The exam must be held at least three weeks before the Graduate Board deadline the candidate wishes to meet.

Financial Aid
Students admitted to the Ph.D. program receive teaching assistantships and full tuition fellowships. Exceptional applicants become candidates for one of the university’s George E. Owen Fellowships.

William Kelso Morrill Award
The William Kelso Morrill Award for excellence in the teaching of mathematics is awarded every spring to the graduate student who best exemplifies the traits of Kelso Morrill: a love of mathematics, a love of teaching, and a concern for students.

Excellence in Teaching Awards
Three awards are given each year to a junior faculty member and graduate student teaching assistants who have demonstrated exceptional ability and commitment to undergraduate education.

For current faculty and contact information go to http://www.mathematics.jhu.edu/new/people/people-faculty.htm

Faculty
Chair
Nitu Kitchloo
Professor; symplectic geometry, topology of Kac-Moody groups, classical algebraic topology.

Professors
Caterina Consani
Arithmetic geometry, number theory, and non-commutative geometry.

Hans Lindblad
Harmonic analysis, PDE, fluid dynamics and relativity.

Chikako Mese
Geometric analysis.

Jack Morava
Algebraic topology, mathematical physics.

Kate Okikiolu
Harmonic analysis, spectral theory, and geometry.

David Savitt
Number theory, Galois representations

Bernard Shiffman
Professor; several complex variables, complex geometry

Vyacheslav V. Shokurov
Algebraic geometry.

Yannick Sire
Harmonic analysis, real & complex geometry

Christopher Sogge

J.J. Sylvester Professor; fourier analysis, partial differential equations.

Joel Spruck
J.J. Sylvester Professor; partial differential equations, geometric analysis.

W. Stephen Wilson
Algebraic topology, and homotopy theory.

Steven Zucker
Hodge theory, algebraic geometry.

Assistant Professors
Jacob Bernstein
Minimal surface theory, mean curvature flow.

Benjamin Dodson
Partial differential equations, harmonic analysis.

Emily Riehl
Homotopy theory

Brian Smithling
Arithmetic and algebraic geometry.

Yi Wang
Geometric analysis, PDE, Harmonic Analysis, and Conformed Geometry

Associate Teaching Professor
Richard Brown
Director of Undergraduate Studies; dynamical systems, low-dimensional topology.

Emeriti
J. Michael Boardman
Differential and algebraic topology.

Philip Hartman
Differential equations and differential geometry.

Takashi Ono
Algebra, number theory, and algebraic groups.

J.J. Sylvester Assistant Professor
Giovanni DiMatteo
Number theory

Jesse Gell-Redman
PDE, microlocal analysis

Jesus Martinez Garcia
Birational geometry, algebraic surfaces.

Mona Merling
Homotopy Theory

Vamsi Pingali
Differential geometry, PDE, several complex variables.

YingYing Zhang
Geometric analysis, complex geometry

Jiuyi Zhu
PDE, harmonic analysis, geometric analysis.
Courses

AS.110.105. Introduction to Calculus.
This course starts from scratch and provides students with all the background necessary for the study of calculus. It includes a review of algebra, trigonometry, exponential and logarithmic functions, coordinates and graphs. Each of these tools will be introduced in its cultural and historical context. The concept of the rate of change of a function will be introduced. Not open to students who have studied calculus in high school.
Instructor(s): E. Wyman
Area: Quantitative and Mathematical Sciences.

AS.110.106. Calculus I.
Differential and integral calculus. Includes analytic geometry, functions, limits, integrals and derivatives, introduction to differential equations, functions of several variables, linear systems, applications for systems of linear differential equations, probability distributions. Many applications to the biological and social sciences will be discussed.
Instructor(s): J. Zhu
Area: Quantitative and Mathematical Sciences.

AS.110.107. Calculus II (For Biological and Social Science).
Differential and integral calculus. Includes analytic geometry, functions, limits, integrals and derivatives, introduction to differential equations, functions of several variables, linear systems, and applications for systems of linear differential equations, probability distributions.
Instructor(s): B. Dodson
Area: Quantitative and Mathematical Sciences.

AS.110.108. Calculus I.
Differential and integral calculus. Includes analytic geometry, functions, limits, integrals and derivatives, polar coordinates, parametric equations, Taylor's theorem and applications, infinite sequences and series.
Instructor(s): J. Bernstein
Area: Quantitative and Mathematical Sciences.

AS.110.109. Calculus II (For Physical Sciences and Engineering).
Differential and integral calculus. Includes analytic geometry, functions, limits, integrals and derivatives, polar coordinates, parametric equations, Taylor's theorem and applications, infinite sequences and series. Some applications to the physical sciences and engineering will be discussed, and the courses are designed to meet the needs of students in these disciplines.
Instructor(s): J. Gell-redman
Area: Quantitative and Mathematical Sciences.

AS.110.110. Calculus III.
Calculus of functions of more than one variable: partial derivatives, and applications; multiple integrals, line and surface integrals; Green's Theorem, Stokes' Theorem, and Gauss' Divergence Theorem.
Instructor(s): G. Di Matteo
Area: Quantitative and Mathematical Sciences.

AS.110.111. Honors Single Variable Calculus.
This is an honors alternative to the Calculus sequences AS.110.106-AS.110.107 or AS.110.108-AS.110.109 and meets the general requirement for both Calculus I and Calculus II (although the credit hours count for only one course). It is a more theoretical treatment of one variable differential and integral calculus and is based on our modern understanding of the real number system as explained by Cantor, Dedekind, and Weierstrass. Students who want to know the "why's and how's" of Calculus will find this course rewarding. Previous background in Calculus is not assumed. Students will learn differential Calculus (derivatives, differentiation, chain rule, optimization, related rates, etc), the theory of integration, the fundamental theorem(s) of Calculus, applications of integration, and Taylor series. Students should have a strong ability to learn mathematics quickly and on a higher level than that of the regular Calculus sequences.
Instructor(s): J. Paschke; N. Kitchloo
Area: Quantitative and Mathematical Sciences.

An interdisciplinary introduction to the history of infinity in mathematics, from Zeno's paradox to the development of calculus to the crisis in the foundations of mathematics in the early 20th century. We will read about history, discuss philosophy, and learn some mathematics (including a crash course in mathematical logic and proof, building up to the rigorous definition of limits). A previous course in calculus is not required, but some mathematical maturity will be necessary.
Instructor(s): V. Lorman.

Mathematics, like any field of study, was not created in a void. Understanding its history provides context and motivation for the concepts studied in other math classes. This course will present a survey of mathematical history from ancient to modern times. We will focus on major themes and problems, the role of mathematics in scientific advances, and the work of great mathematicians. The course will include lectures and discussions as well as student presentations.

AS.110.162. Notions of Proof and Godel's Incompleteness Theorem.
Using the notions of classical well formed formulas, we will investigate what exactly it means to mathematically prove something from a collection of axioms. We will closely examine the Peano Axioms and how they can be shown from the Zermelo-Franklin axioms and discuss the philosophical implications of Godel's incompleteness theorem.
Instructor(s): S. Cattell.

AS.110.201. Linear Algebra.
Prerequisites: Grade of C- or better in 110.107 or 110.109 or 110.113, or a 5 on the AP BC exam.
Instructor(s): G. Di Matteo
Area: Quantitative and Mathematical Sciences.

AS.110.202. Calculus III.
Calculus of functions of more than one variable: partial derivatives, and applications; multiple integrals, line and surface integrals; Green's Theorem, Stokes' Theorem, and Gauss' Divergence Theorem.
Prerequisites: Grade of C- or better in AS.110.107 OR AS.110.109 OR AS.110.113, or a 5 or better on the AP BC exam.
Instructor(s): V. Pingali
Area: Quantitative and Mathematical Sciences.
**AS.110.211. Honors Multivariable Calculus.**
This course includes the material in AS.110.202 with some additional applications and theory. Recommended for mathematically able students majoring in physical science, engineering, or especially mathematics. AS.110.211-AS.110.212 used to be an integrated yearlong course, but now the two are independent courses and can be taken in either order.

**Prerequisites:** Pre/Co-Requisite: 110.201 or 110.212

Instructor(s): Y. Zhang
Area: Quantitative and Mathematical Sciences.

**AS.110.212. Honors Linear Algebra.**
This course includes the material in AS.110.201 with some additional applications and theory. Recommended for mathematically able students majoring in physical science, engineering, or mathematics.

AS.110.211-AS.110.212 used to be an integrated yearlong course, but now the two are independent courses and can be taken in either order. This course satisfies a requirement for the math major that its non-honors sibling does not.

**Prerequisites:** Grade of B+ or better in 110.107 or 110.109 or 110.113, or a 5 on the AP BC exam.

Instructor(s): S. Zucker
Area: Quantitative and Mathematical Sciences.

**AS.110.260. Introduction to Lie Algebras.**
An understanding of Lie group representations is key to large areas of physics and math, and at the core of every Lie group is a Lie algebra. This course aims to equip students with the ability to understand and work with Lie algebra representations and to classify all semi-simple Lie algebras.

Instructor(s): S. Cattell
Area: Quantitative and Mathematical Sciences.

**AS.110.302. Diff Equations/Applic.**
This is an applied course in ordinary differential equations, which is primarily for students in the biological, physical and social sciences, and engineering. The purpose of the course is to familiarize the student with the techniques of solving ordinary differential equations. The specific subjects to be covered include first order differential equations, second order linear differential equations, applications to electric circuits, oscillation of solutions, power series solutions, systems of linear differential equations, autonomous systems, Laplace transforms and linear differential equations, mathematical models (e.g., in the sciences or economics).

**Prerequisites:** Grade of C- or better in 110.107 or 110.109 or 110.113, or a 5 on the AP BC exam.

Instructor(s): Y. Sire
Area: Quantitative and Mathematical Sciences.

**AS.110.304. Elementary Number Theory.**
This course is an introduction to the theory of functions of one complex variable. Its emphasis is on techniques and applications, and it serves as a basis for more advanced courses. Functions of a complex variable and their derivatives; power series and Laurent expansions; Cauchy integral theorem and formula; calculus of residues and contour integrals; harmonic functions.

**Prerequisites:** Grade of C- or better in 110.201 or 110.212

Instructor(s): W. Wilson
Area: Quantitative and Mathematical Sciences.

**AS.110.306. Honors Differential Equations.**
This course includes the material in 110.302 Differential Equations but with a strong emphasis on theory and proofs. Recommended only for mathematics majors or mathematically able students majoring in physical science or engineering.

**Prerequisites:** Grade of B+ or better in AS.110.107 or AS.110.109 or AS.110.113 or a 5 on the Advanced Placement BC exam.

Instructor(s): J. Gell-redman
Area: Quantitative and Mathematical Sciences.

**AS.110.311. Complex Analysis.**
This course is an introduction to the theory of functions of one complex variable. Its emphasis is on techniques and applications, and it serves as a basis for more advanced courses. Functions of a complex variable and their derivatives; power series and Laurent expansions; Cauchy integral theorem and formula; calculus of residues and contour integrals; harmonic functions.

**Prerequisites:** Grade of C- or better in 110.202 or 110.211

Instructor(s): J. Martinez Garcia
Area: Quantitative and Mathematical Sciences.

**AS.110.328. Non-Euclidean Geometry.**
For 2,000 years, Euclidean geometry was the geometry. In the 19th century, new, equally consistent but very different geometries were discovered. This course will delve into these geometries on an elementary but mathematically rigorous level.

Instructor(s): M. Merling
Area: Quantitative and Mathematical Sciences.

**AS.110.401. Advanced Algebra I.**
An introduction to the basic notions of modern algebra. Elements of group theory: groups, subgroups, normal subgroups, quotients, homomorphisms. Generators and relations, free groups, products, commutative (Abelian) groups, finite groups. Groups acting on sets, the Sylow theorems. Definition and examples of rings and ideals. Introduction to field theory. Linear algebra over a field. Field extensions, constructible polygons, non-trisectability.

**Prerequisites:** Grade of C- or better in 110.201 or 110.212

Instructor(s): S. Zucker
Area: Quantitative and Mathematical Sciences.

**AS.110.402. Advanced Algebra II.**
Splitting field of a polynomial, algebraic closure of a field. Galois theory: correspondence between subgroups and subfields. Solvability of polynomial equations by radicals.

Instructor(s): J. Kong
Area: Quantitative and Mathematical Sciences.

**AS.110.405. Analysis I.**
This course is designed to give a firm grounding in the basic tools of analysis. It is recommended as preparation (but may not be a prerequisite) for other advanced analysis courses. Real and complex number systems, topology of metric spaces, limits, continuity, infinite sequences and series, differentiation, Riemann-Stieltjes integration.

**Prerequisites:** Grade of C- or better in 110.201 or 110.212 and 110.202 or 110.211

Instructor(s): B. Smithling
Area: Quantitative and Mathematical Sciences.
AS.110.406. Analysis II.
This course continues AS.110.405 with an emphasis on the fundamental notions of modern analysis. Sequences and series of functions, Fourier series, equicontinuity and the Arzela-Ascoli theorem, the Stone-Weierstrass theorem, functions of several variables, the inverse and implicit function theorems, introduction to the Lebesgue integral.
Instructor(s): Y. Zhang
Area: Quantitative and Mathematical Sciences.

AS.110.413. Introduction To Topology.
Topological spaces, connectedness, compactness, quotient spaces, metric spaces, function spaces. An introduction to algebraic topology: covering spaces, the fundamental group, and other topics as time permits.
Prerequisites: Grade of C- or better in 110.202 or 110.211
Instructor(s): W. Wilson
Area: Quantitative and Mathematical Sciences.

AS.110.415. Honors Analysis I.
This highly theoretical sequence in analysis is reserved for the most able students. The sequence covers the real number system, metric spaces, basic functional analysis, the Lebesgue integral, and other topics.
Instructor(s): J. Spruck
Area: Quantitative and Mathematical Sciences.

AS.110.416. Honors Analysis II.
Prerequisites: Grade of C- or better in AS.110.415
Instructor(s): B. Shiffman
Area: Quantitative and Mathematical Sciences.

Prerequisites: Grade of C- or better in 110.202 or 110.211
Instructor(s): J. Spruck
Area: Quantitative and Mathematical Sciences.

AS.110.421. Dynamical Systems.
This is a course in the modern theory of Dynamical Systems. Topic include existence and uniqueness of general ODEs, nonlinear analysis and stability, including bifurcation theory and stable and center manifolds, smooth flows, limit sets, Hamiltonian mechanics, perturbation theory and structural stability.
Prerequisites: Grade of C- or better in 110.201 or 110.212 OR 110.202 or 110.211 and 110.302
Instructor(s): R. Brown
Area: Quantitative and Mathematical Sciences.

AS.110.422. Representation Theory.
This course will focus on the basic theory of representations of finite groups in characteristic zero: Schur's Lemma, Maschke's Theorem and complete reducibility, character tables and orthogonality, direct sums and tensor products. The main examples we will try to understand are the representation theory of the symmetric group and the general linear group over a finite field. If time permits, the theory of Brauer characters and modular representations will be introduced.
Prerequisites: Prereqs: ( AS.110.201 OR AS.110.212 ) AND AS.110.401
Instructor(s): M. Merling
Area: Quantitative and Mathematical Sciences.

AS.110.423. Lie Groups for Undergraduates.
This course is an introduction to Lie Groups and their representations at the upper undergraduate level. It will cover basic Lie Groups such as SU (2), U(n) , the Euclidean Motion Group and Lorentz Group. This course is useful for students who want a working knowledge of group representations. Some aspects of the role of symmetry groups in particle physics such as some of the formal aspects of the electroweak and the strong interactions will also be discussed. Recommended Course Background: AS.110.202; prior knowledge of group theory (AS.110.401) would be helpful.
Instructor(s): S. Zucker
Area: Quantitative and Mathematical Sciences.

The calculus of variations is concerned with finding optimal solutions (shapes, functions, etc.) where optimality is measured by minimizing a functional (usually an integral involving the unknown functions) possibly with constraints. Applications include mostly one-dimensional (often geometric) problems: brachistochrone, geodesics, minimum surface area of revolution, isoperimetric problem, curvature flows, and some differential geometry of curves and surfaces. Recommended Course Background: Calculus III
Prerequisites: Grade of B+ or better in AS.110.201 and AS.110.202.
Area: Quantitative and Mathematical Sciences.

AS.110.431. Knot Theory.
The theory of knots and links is a facet of modern topology. The course will be mostly self-contained, but a good working knowledge of groups will be helpful. Topics include braids, knots and links, the fundamental group of a knot or link complement, spanning surfaces, and low dimensional homology groups.
Instructor(s): C. McTague
Area: Quantitative and Mathematical Sciences.

Theory of curves and surfaces in Euclidean space: Frenet equations, fundamental forms, curvatures of a surface, theorems of Gauss and Mainardi-Codazzi, curves on a surface; introduction to tensor analysis and Riemannian geometry; theorema egregium; elementary global theorems.
Prerequisites: Grade of C- or better in (AS.110.201 or AS.110.212) and (AS.110.202 or AS.100.211)
Instructor(s): B. Shiffman
Area: Quantitative and Mathematical Sciences.
AS.110.443. Fourier Analysis.
Prerequisites: Grade of C- or better in (AS.110.201 OR AS.110.212) AND (AS.110.202 OR AS.110.211)
Instructor(s): Y. Wang
Area: Quantitative and Mathematical Sciences.

AS.110.503. Undergraduate Research in Mathematics.
Instructor(s): C. Sogge; S. Raymond; S. Zucker
Area: Quantitative and Mathematical Sciences.

AS.110.586. Independent Study.
Instructor(s): S. Zucker
Area: Quantitative and Mathematical Sciences.

AS.110.595. Internship.
Area: Quantitative and Mathematical Sciences.

AS.110.601. Algebra.
An introductory graduate course on fundamental topics in algebra to provide the student with the foundations for number theory, algebraic geometry, and other advanced courses. Topics include group theory, commutative algebra, Noetherian rings, local rings, modules, rudiments of category theory, homological algebra, field theory, Galois theory, and non-commutative algebras.
Instructor(s): C. Mese; V. Shokurov
Area: Quantitative and Mathematical Sciences.

AS.110.602. Algebra.
An introductory graduate course on fundamental topics in algebra to provide the student with the foundations for Number Theory, Algebraic Geometry, and other advanced courses. Topics include group theory, commutative algebra, Noetherian rings, local rings, modules, and rudiments of category theory, homological algebra, field theory, Galois theory, and non-commutative algebras. Recommended Course Background: AS.110.401-AS.110.402
Instructor(s): V. Shokurov
Area: Quantitative and Mathematical Sciences.

AS.110.605. Real Variables.
Measure and integration on abstract and locally compact spaces (extension of measures, decompositions of measures, product measures, the Lebesgue integral, differentiation, Lp-spaces); introduction to functional analysis; integration on groups; Fourier transforms.
Instructor(s): C. Mese
Area: Quantitative and Mathematical Sciences.

AS.110.607. Complex Variables.
Analytic functions of one complex variable. Topics include Mittag-Leffler Theorem, Weierstrass factorization theorem, elliptic functions, Riemann-Roch theorem, Picard theorem, and Nevanlinna theory. Recommended Course Background: AS.110.311, AS.110.405
Instructor(s): C. Mese.

AS.110.608. Riemann Surfaces.
Abstract Riemann surfaces. Examples: algebraic curves, elliptic curves and functions on them. Holomorphic and meromorphic functions and differential forms, divisors and the Mittag-Leffler problem. The analytic genus. Bezout’s theorem and applications. Introduction to sheaf theory, with applications to constructing linear series of meromorphic functions. Seprre duality, the existence of meromorphic functions on Riemann surfaces, the equality of the topological and analytic genera, the equivalence of algebraic curves and compact Riemann surfaces, the Riemann-Roch theorem. Period matrices and the Abel-Jacobi mapping, Jacobi inversion, the Torelli theorem. Uniformization (time permitting).
Instructor(s): B. Shiffman; C. Mese.

AS.110.615. Algebraic Topology.
Polyhedra, simplicial and singular homology theory, Lefschetz fixed-point theorem, cohomology and products, homological algebra, Künneth and universal coefficient theorems, Poincaré and Alexander duality theorems.
Prerequisites: AS.110.401 AND AS.110.413
Instructor(s): C. Mese; J. Morava.

AS.110.616. Algebraic Topology.
Polyhedra, simplicial and singular homology theory, Lefschetz fixed-point theorem, cohomology and products, homological algebra, Künneth and universal coefficient theorems, Poincaré&ecirc; and Alexander duality theorems.
Prerequisites: AS.110.401 AND AS.110.413
Instructor(s): E. Riehl
Area: Quantitative and Mathematical Sciences.

AS.110.617. Number Theory.
Topics in advanced algebra and number theory, including local fields and adeles, Iwasawa-Tate theory of zeta functions and connections with Hecke’s treatment, semisimple algebras over local and number fields, adeles geometry.
Instructor(s): C. Consani; C. Mese
Area: Quantitative and Mathematical Sciences.

AS.110.618. Number Theory.
Topics in advanced algebra and number theory, including local fields and adeles, Iwasawa-Tate theory of zeta-functions and connections with Hecke’s treatment, semi-simple algebras over local and number fields, adele geometry.
Instructor(s): C. Consani.

Lie groups and Lie algebras, classification of complex semi-simple Lie algebras, compact forms, representations and Weyl formulas, symmetric Riemannian spaces.
Prerequisites: AS.110.402
Instructor(s): C. Mese; J. Morava
Area: Quantitative and Mathematical Sciences.

An introductory graduate course in partial differential equations. Classical topics include first order equations and characteristics, the Cauchy-Kowalewski theorem, Laplace’s equations, heat equation, wave equation, fundamental solutions, weak solutions, Sobolev spaces, maximum principles.
Prerequisites: AS.110.605
Instructor(s): J. Spruck.
An introductory graduate course in partial differential equations. Classical topics include first order equations and characteristics, the Cauchy-Kowalevski theorem, Laplace’s equation, heat equation, wave equation, fundamental solutions, weak solutions, Sobolev spaces, maximum principles. The second term focuses on special topics such as second order elliptic theory.

AS.110.633. Harmonic Analysis.
Fourier multipliers, oscillatory integrals, restriction theorems, Fourier integral operators, pseudodifferential operators, eigenfunctions. Undergrads need instructor’s permission.
Instructor(s): C. Sogge
Area: Quantitative and Mathematical Sciences.

AS.110.635. Microlocal Analysis.
Microlocal analysis is the geometric study of singularities of solutions of partial differential equations. The course will begin by introducing the geometric theory of (Schwartz) distributions: Fourier transform and Sobolev spaces, pseudo-differential operators, wave front set of a distribution, elliptic operators, Lagrangean distributions, oscillatory integrals, method of stationary phase, Fourier integral operators. The second semester will develop the theory and apply it to special topics such as asymptotics of eigenvalues/eigenfunctions of the Laplace operator on a Riemann manifold, linear and non-linear wave equation asymptotics of quantum systems, Bochner-Riesz means, maximal theorems.
Instructor(s): C. Sogge.

AS.110.637. Functional Analysis.
Instructor(s): B. Dodson; C. Mese.

AS.110.643. Algebraic Geometry.
Affine varieties and commutative algebra. Hilbert’s theorems about polynomials in several variables with their connections to geometry. General varieties and projective geometry. Dimension theory and smooth varieties. Sheaf theory and cohomology. Applications of sheaves to geometry; e.g., the Riemann-Roch theorem. Other topics may include Jacobian varieties, resolution of singularities, geometry on surfaces, connections with complex analytic geometry and topology, schemes.
Instructor(s): C. Consani; C. Mese.

AS.110.644. Algebraic Geometry.
Affine varieties and commutative algebra. Hilbert’s theorems about polynomials in several variables with their connections to geometry. General varieties and projective geometry. Dimension theory and smooth varieties. Sheaf theory and cohomology. Applications of sheaves to geometry; e.g., the Riemann-Roch Theorem. Other topics may include Jacobian varieties, resolution of singularities, geometry on surfaces, schemes, connections with complex analytic geometry and topology.
Instructor(s): B. Smithling
Area: Quantitative and Mathematical Sciences.

AS.110.645. Riemannian Geometry.
Differential manifolds, vector fields, flows, Frobenius’ theorem. Differential forms, deRham’s theorem, vector bundles, connections, curvature, Chern classes, Cartan structure equations. Riemannian manifolds, Bianchi identities, geodesics, exponential maps. Geometry of submanifolds, hypersurfaces in Euclidean space. Other topics as time permits, e.g., harmonic forms and Hodge theorem, Jacobi equation, variation of arc length and area, Chern-Gauss-Bonnet theorems.
Instructor(s): C. Mese.

AS.110.646. Riemannian Geometry.
The goal is to give a self-contained course on mean curvature flow, starting with the basic linear heat equation in Euclidean space and – hopefully – getting to topics of current research. Mean curvature flow is a geometric heat equation that shares many properties with Ricci flow, harmonic map heat flow, Yang-Mills flow and the Navier-Stokes equations. Recommended Course Background: AS.110.605 and an undergraduate course in differential geometry; AS.110.645 and AS.110.631
Instructor(s): C. Mese.

AS.110.660. Qualifying Exam Problems.
Instructor(s): Staff.

AS.110.712. Topics in Mathematical Physics.
Instructor(s): J. Morava.

AS.110.726. Topics in Analysis.

AS.110.727. Topics/Algebraic Topology.
Instructor(s): C. Mese; E. Riehl.

AS.110.728. Topics in Algebraic Topology.
Instructor(s): N. Kitchloo.

AS.110.734. Topics in Algebraic Number Theory.
Instructor(s): T. Ono.

AS.110.735. Topics In Hodge Theory.
Instructor(s): S. Zucker.

AS.110.737. Topics Algebraic Geometry.
Instructor(s): C. Consani.

AS.110.738. Topics Algebraic Geometry.
Introduction to toric varieties. This class is a general introduction to toric varieties. Toric varieties are special kinds of algebraic varieties which can be described by lattices and convex sets. They provide a rich source of concrete examples in complex geometry or mathematical physics. If time permits, we discuss in the end the stability of toric embeddings. Students should know basic notions of algebraic geometry (schemes, sheaves, linear systems), as covered in AS.110.643.
Instructor(s): C. Mese; R. Brown; V. Shokurov
Area: Quantitative and Mathematical Sciences.

Instructor(s): H. Lindblad.

AS.110.742. Topics In Partial Differential Equations.
Instructor(s): J. Bernstein.

AS.110.744. Topics in Harmonic Maps.
Instructor(s): W. Minicozzi.

AS.110.748. Topics in Geometry.

AS.110.755. Topics in Fluid Dynamics.
Graduate students only.
Instructor(s): J. Bernstein
Area: Quantitative and Mathematical Sciences.

AS.110.758. Topics in Complex Geometry.
Instructor(s): B. Shiffman.

AS.110.761. Topics in Topology.
Instructor(s): N. Kitchloo
Area: Quantitative and Mathematical Sciences.

AS.110.762. Topics in Topology II.
Instructor(s): N. Kitchloo.
**Major Requirements**

**Introductory Level**
- Introduction to Medical Humanities (Fall 2015: Death and Dying in Art, Literature, and Philosophy)
- One course focusing on classic scientific and medical texts
  - Examples: History of Medicine, History of Modern Medicine, or Great Books at Hopkins II: The Sciences
- Other courses may apply with approval from the director of undergraduate studies

**Required Core Humanities Courses**
- At least 4 courses totaling at least 12 credits in one, pre-approved humanities department
- 6 credits must be at the 300-level or higher
- Approved humanities departments: Anthropology, Classics, English, German and Romance Languages and Literatures, History, History of Art, History of Science and Technology, Humanities Center, Near Eastern Studies, Philosophy, and the Writing Seminars

**Foreign Language**
- Through the intermediate level (second year at the college-level)

**Additional Courses in the Sciences and the Humanities**
- At least 6 courses totaling 18 credits in sciences and humanities;
  - at least 2 of these courses must be in the humanities and at least 2 must be science courses. Of the 6 courses, 4 must be at the 200-level or higher

- Anthropology, Classics, English, German and Romance Languages and Literatures, History, History of Art, History of Science and Technology, Humanities Center, Near Eastern Studies, Philosophy, and the Writing Seminar. Six credits must be at the 300-level or higher.

- Four must be at the 200-level or higher.

**Additional Course Information**

**Study Abroad**

Courses taken abroad count toward the major only if approved by the director of undergraduate studies in consultation with your adviser. This should be arranged prior to travel.

**Thinking About Pre-Med?**

Johns Hopkins offers an undergraduate pre-med program, but it is not a major. It is an advising track program through the Office of Pre-Professional Advising (http://web.jhu.edu/prepro). Any Johns Hopkins undergraduate student pursuing any major may also pursue the pre-med advising track.
The pre-professional advisers work with the students, providing them with academic advising, assistance in selecting the proper courses, and help with the medical school application process. Please note that the MSH major does not fulfill all of the requirements for a pre-med course of study. Speak with your adviser for more information.

**Faculty**

**Director**

Charles Wiener  
Professor of Medicine and Physiology  
Director, Medicine, Science, and the Humanities Major

For current course information and registration go to https://isis.jhu.edu/classes/

**AS English Courses**

**AS.060.100. Introduction to Expository Writing.**

Introduction to “Expos” is designed to introduce less experienced writers to the elements of academic argument. Students learn to recognize the paradigm of academic argument as they learn to read and summarize academic essays, and then they apply the paradigm in academic essays of their own. Classes are small, no more than 10 students, and are organized around three major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Intro” course teaches students to avoid plagiarism and document sources correctly. “Intro” courses do not specialize in a particular topic or theme and are available to freshmen only.

Instructor(s): A. Brodsky; W. Evans  
Area: Humanities.

**AS.060.102. The Novel and the American Family.**

While America and the “American Dream” promise the possibility of unlimited individual development, the American family has often resisted this promise and cramped America’s style. In this course we will explore works by Philip Roth, Eudora Welty, Alice Walker, and Jonathan Franzen that dramatize this tension in devastating and hilarious ways. Against the backdrop of post-WWII America, these writers struggle with issues of race, sex, and the erosion of tradition, shedding light on the challenging relation between the individual and the family.

Area: Humanities.

**AS.060.103. Novels After 9-11.**

This course explores various novels written in English in the wake of the tragedy of 9-11, from various perspectives around the globe. It asks how the form of the novel responded to the events of that date and its aftermath, and in doing so, considers the role of art in shaping our understanding of global events, violence, and the forces that produce them. This course offers a greater appreciation of the novel and its role in history, as well as a framework for comparing different perspectives on a major historical event. It should improve your skills as a reader of fiction and analyst and judge of what you read. In the course of the semester you will: 1) Survey how novels from a variety of positions and perspectives represent and understand the events of 9-11. 2) Learn to analyze the form of the novel, its various elements, and its role in culture and history. 3) Read and evaluate reviews of major novels, from different contexts. 4) Learn to write an intelligent and informed review of a novel.

Instructor(s): M. Favret  
Area: Humanities.

**AS.060.104. Counterfactual Literature and Film.**

This course will concern the imagination of our unled lives—the lives we might have led but have not. Robert Frost’s “The Road Not Taken” is the most familiar instance of this preoccupation, but Frost is only one of many artists for whom unled lives have been an ongoing concern—Thomas Hardy, Henry James, Virginia Woolf, Phillip Larkin, Ian McEwan, and Sharon Olds are among the many others. Why are people so interested in what has not happened to them? And why should writers and film-makers in particular be so interested in these non-events?  
Instructor(s): A. Miller  
Area: Humanities.

**AS.060.107. Introduction to Literary Study.**

This course serves as an introduction to the basic methods of and critical approaches to the study of literature.

Instructor(s): J. Rosenthal; S. Achinstein  
Area: Humanities.

**AS.060.108. Time Travel.**

Why is time travel such a consistent and perplexing them in literature and film over the last 150 years? Why is modernity so concerned with peering backwards or forwards? This course will examine the history of time-travel fiction, from its beginning in utopian fiction through its box-office dominance in the 1980s, and into today. Writers will likely include Mark Twain, Edward Bellamy, Harold Steele Mackay, Ray Bradbury, Robert Heinlein, and Philip K. Dick. Movies will include *The Terminator*, *Back to the Future*, and *Primer*.

Instructor(s): J. Rosenthal  
Area: Humanities.

**AS.060.109. Inheriting Hamlet.**

This class will explore the legacy of Hamlet from critical theory to popular film; from Sigmund Freud to Arnold Schwarzenegger’s “Last Action Hero.” More than any other play by Shakespeare, Hamlet has been the mirror through which later eras have viewed their own image. We will consider these interpretations and, along the way, work to develop some of our own.

Instructor(s): D. Hershinow  
Area: Humanities.

**AS.060.110. The African American Novel.**

This course will survey classic novels by African-American writers. From slavery to freedom, from subjection to the qualified triumph of integration, we’ll examine several examples of black writers writing about what it means to be “black” in America, and what it means to be “white” from a “black” perspective.

Instructor(s): D. Tye  
Area: Humanities.
AS.060.111. How Not to Be Afraid of Poetry.
What is poetry? And why don’t we like it? This course will explore what makes poetry turn ordinary language into something extraordinary, into shapes and sounds so that sometimes we find it difficult to understand and sometimes we find it gives us great delight. This seminar will open up a range of poetry written in English, including some of the greatest writers of the English language. This course is designed for the students without a strong background in reading poetry but who have the desire to gain it; the main emphasis is exploration of the world and words of poetry and developing an appreciation and analytical understanding of the ways poetry can express, advocate, record, and move. Assignments will include reading poems, becoming an expert about a single poet, attending public poetry readings, creating poems, and writing short weekly assignments about poems. You will be expected to be an active member in classroom discussion and activities. Pre 1800 course.
Instructor(s): S. Achinstein
Area: Humanities.

AS.060.113. Expository Writing.
“Expos” is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please note: Each course has a different topic. To check individual course descriptions, go to the EWP web site. “Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission.
Instructor(s): Staff
Area: Humanities.

AS.060.114. Expository Writing.
“Expos” is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please see the following list of individual course descriptions to decide which sections of “Expos” will most interest you. “Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission.
Instructor(s): Staff
Area: Humanities.

This course will examine how British children’s fiction represents imperialism and national identity. How do these works ask children to think about nation, empire and their roles as gendered and national subjects? We will also consider popular American adaptations of these classics. Materials include both Rudyard Kipling’s and Disney’s The Jungle Book, Frances Hodgson Burnett’s The Secret Garden, J. M. Barrie’s Peter and Wendy and Disney’s Mary Poppins. Students will write a short paper at the end of the course.
Instructor(s): J. Valdez
Area: Humanities.

AS.060.116. Reading Muslims in Global Fiction and Film.
This course will explore representations of complex, fully-developed Muslim characters in fictions detailing experiences from the Balkans, the Indian Ocean, Britain, and the United States. These may include novels by Abdulrazak Gurnah, Orhan Pamuk, and Leila Aboulela, as well as films like A Separation (2011). In studying the way each text represents Muslims and their relationships to their faith, the class will analyze themes of belonging and identity politics, imagined relationships to geographies, and representations of individuality alongside rituals of belief. It will look at how race, socio-economic status, gender, and citizenship contribute to these representations, when and how these texts are read as political acts, and what contributions such fiction has made to aesthetics.
Instructor(s): N. Hashem
Area: Humanities.

AS.060.117. J.R.R. Tolkien.
Tolkien’s The Lord of the Rings trilogy has captured the imaginations of millions of readers since its initial publication in the 1950s. And part of the reason for its power is that Tolkien created much more than a story: in creating an extensive linguistic and mythological features as a background to his narrative, he imagined a new world. In this class, we are going to study that world at some length, through a close reading of The Lord of the Rings trilogy, an examination of The Hobbit and The Silmarillion as supplementary texts, and finally by drawing on some of Tolkien’s nonfictional writings. Students will write one five to six page paper.
Instructor(s): P. Fessenbecker
Area: Humanities.

AS.060.118. Asian American Literature and Film.
This course offers students a survey of Asian American literature, film and cultural politics. Throughout the course we will evaluate the literary and filmic productions of Asian Americans in order to ask a series of questions: Who is American? Who is Asian American? How does “Asian American” work as a category that uncovers contestations over the meaning of ethnic, sexual, and national identity? We will look at a diverse array of Asian American groups while paying attention to the formation of Asian American subjectivities across differences and the intersections of ethnicity, sexuality, class and gender. Cross-listed with Film and Media Studies.
Instructor(s): R. Neutill
Area: Humanities.

AS.060.119. Oscar Wilde.
At once superficial and profound, artificial and authentic, Oscar Wilde’s life and work are provocatively paradoxical. Reading his luminous literary work, we’ll discuss such topics as the aestheticist idea of life as fine art, the powers of wit, and the unexpected consequences of getting what you wish for. Readings: a selection of Wilde’s plays, poems, essays, and fiction including a new, uncensored edition of his novel, The Picture of Dorian Gray. Requirements: rigorous in-class discussion and 5-6 pages of writing.
Instructor(s): R. Day
Area: Humanities.
AS.060.120. The Nineteenth-Century Novella.
During the nineteenth century, a frequently overlooked mode of fiction—the novella—began to flourish in new ways. In this course we will examine the distinctive features of this genre that is at once too short to be a novel and too long to be a short story. In reading famous works by English and American writers along with excerpts from key texts in narrative theory, we will consider how the peculiar length of the novella facilitates its representation of social interaction and psychic alienation in ways distinct from novel- and story-length works. Works to be studied range from Herman Melville’s Bartleby the Scrivener (1853), “a story of Wall Street” that reverberates strongly in light of today’s Occupy Movement, to Robert Louis Stevenson’s Dr. Jekyll and Mr. Hyde (1886), the classic literary evocation of split personality disorder, to Kate Chopin’s The Awakening (1899), a work condemned upon its first publication for its “sordid” and “immoral” representation of female sexuality.
Instructor(s): J. Hann
Area: Humanities.

AS.060.121. The British Empire and 20th Century Fiction.
This course explores the ways in which the British Empire—which at its peak commanded a quarter of the world’s population and landmass—affected the development of British literature in the 20th century. In studying works set in Africa, South Asia, and the Caribbean, we will discuss themes of imperialism, culture, international development, and modernization. Authors include Rudyard Kipling, E.M. Forster, Graham Greene, Jean Rhys, and Arundhati Roy.
Instructor(s): R. Day
Area: Humanities.

AS.060.122. The Ethnic Gangster in American Cinema.
In this intersession course we will consider the rise (and fall) of some of America’s most notorious and beloved gangsters: Don Corleone (“The Godfather”), Frank Lucas (“American Gangster”), and Tony Montana (“Scarface”). With the help of short readings from Zizek, Freud, Hobsbawn, and Jameson, we consider what these films have to say about the difficulties and hopes of the immigrant experience, the codes of gangster morality, and the role of organized crime in the American imagination. We will explore the complicated interplay between domestic responsibility, male brotherhood, and violence that is the hallmark of the genre. Students will be asked to write a short paper at the conclusion of the term, and are required to view the movies outside of class time.
Instructor(s): A. Sisson; A. Wexler
Area: Humanities.

This course explores the history of prophecy from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom. We will focus on the influence of prophecy on the rise of science (and vice-versa). Readings will include texts by William Shakespeare, Francis Bacon, Mary Shelley, and Philip K. Dick.
Instructor(s): W. Miller
Area: Humanities.

Emerson famously exalted the power of the individual self: “To believe your own thought, to believe what is true for you is true for all men—that is genius.” Melville regarded such hubristic intoxication with “untraditional and independent thinking” as the condition of tragedy. Emily Dickinson’s poems neither extol the “greatness” of the individual nor decry his limitations. Rather her poems invent a language for experiences so solitary and apparently incommunicable that she called them “inner than the bone.” We shall examine the representations of self in the genre-bending writing of these three nineteenth-century giants—writing that forever redefined the essay, the novel, and the poem.
Instructor(s): S. Cameron
Area: Humanities.

AS.060.127. Muslim Science Fiction.
This course will explore the wondrous and mysterious world of Islamic Sci-Fi. Writers of Muslim Sci-Fi have asserted a long tradition of speculative fiction and fantasy dating back to the 13th century. We will look into this literary history, beginning with earlier texts like The Arabian Nights, al-Qizwini’s alien story Awaj bin Anfaq and Roquia Hussain’s Sultana’s Dream all the way through to modern texts like G. Willow Wilson’s Ali the Unseen and Saladin Ahmed’s Throne of the Crescent Moon. We will ask how this genre, as opposed to realism, might enable these writers to productively tackle themes of history, science, belief, and the politics of belonging and difference. We will pair our Muslim readings with more canonical science fiction works, such as Mary Shelley’s Frankenstein, H.G. Wells’s The Time Machine, and more recently, Kazuo Ishiguro’s Never Let Me Go, to think through the relationship of the SF writer to a particular cultural moment. We will also look at writers of afrofuturism and magical realism, like Octavia Butler and Gabriel García Márquez, to think about how other writers of color have employed fantasy and the fantastical, and to what ends.
Instructor(s): N. Hashem
Area: Humanities.

AS.060.129. Writing Africa Now.
This course surveys post-2000 literary and cultural production from sub-Saharan Africa. Topics will include debates over genre and fiction’s relevance to African experience, legacies of canonical written about independence, urban Africa as violent or “tragic” landscape, and problems of scale and geographical context. Readings by authors such as Adichie, Wainaina, Duiker, and Vladišlavić, and students will be introduced to the main print and online arteries of African intellectual discussion. This class is for non-majors and does not count towards the English major or minor.
Instructor(s): A. Sisson; A. Wexler
Area: Humanities.

AS.060.131. Law and Literature.
This course queries the nature of legal authority both formally and historically. What distinguishes between law and literature? Is law more authoritative? Is it more ethical? Is it more “real”? Avenues of inquiry will include the power of language to embody, inhabit, or represent law; the relationship between law and ideas about self, liberty, and love; and conflicts and confluences between literary and legal claims to autonomy. Readings may include Sophocles’ Antigone, Andreas Capellanus’ On Love, Shakespeare’s Measure for Measure, William Godwin’s Caleb Williams, and Franz Kafka’s The Trial. This course is for non-majors.
Instructor(s): M. O’Connor
Area: Humanities.
AS.060.132. Death in Twentieth-Century Literature.
A perennial literary motif, death pervades the works of modernist novelists and poets. This course will explore how several modernist writers create a rich inner life through their unique representations of different forms of death: slaughter in the war, suicide, and slow death, as well as the issue of mortality. The readings will include James Joyce’s “The Dead,” William Faulkner’s As I Lay Dying, and poems by W. H. Auden. Students are expected to write a 5-6 page paper for this course.
Instructor(s): N. Zhang
Area: Humanities.

AS.060.133. Medicine and Literature.
This course is designed to introduce students to a range of literary representations of illness. How does literature build upon but exceed the surrounding frame of medical knowledge to explore illness as political crisis, mystical experience, divine punishment, neurotic hallucination, or opportunity? Possible texts include: "The Book of Job"; William Shakespeare, "Hamlet"; Moliere, "La Malade Imaginaire" (The Imaginary Invalid); Virginia Woolf, "On Being Ill"; Thomas Mann, "Death in Venice"; Susan Sontag, "Illness as Metaphor"; David Feldshuh, "Miss Evers' Boys"; Audre Lord, "The Cancer Journals"; Thom Gunn, "The Man with Night Sweats". This course does not count toward the English major or minor.
Instructor(s): A. Daniel
Area: Humanities.

AS.060.134. Franz Kafka.
An introduction to one of the 20th century's most eccentric and important writers. From his German-speaking Jewish background in Austrian-controlled Prague, Franz Kafka managed to overturn the conventions of modern fiction. Both bleak and zany, both logical and absurd, his writing shows the struggle of the individual against the modern institutional world. Discussion topics will include the political and religious views informing Kafka's work, the role of bureaucracies in everyday life, and the impossibility of living within the law. Reading: short stories; his famous novella, The Metamorphosis; and two novels, The Trial and Amerika—all in English translation.
Instructor(s): R. Day
Area: Humanities.

AS.060.136. Literature of the American South.
This course considers the development of southern identity in twentieth-century American fiction. Reading works from authors of different races, genders, and classes, students will explore the importance of region in determining ways of being and modes of expression.
Instructor(s): E. Steedley
Area: Humanities.

All our stories point to Heaven and to Hell: the good are rewarded, the wicked punished. Only, for the storyteller, Heaven is boring; our imaginative power better exercised in the other direction. In this course, we’ll think about what that says about us, along with other issues of justice, compassion, conflict, creativity, and moral failure raised by four major writers’ literary visions of Hell: Dante Alighieri (Catholic), John Milton (Protestant), Jean-Paul Sartre (atheist), and William Blake (entirely beyond definition).
Instructor(s): A. Sisson
Area: Humanities.

AS.060.138. No "I" in "News": The New Journalism, Hunter S. Thompson to David Foster Wallace.
In 1972, Tom Wolfe noticed a trend in magazine reporting that he called “a ‘new’ journalism, a ‘higher’ journalism.” This novel breed of reporting, he claimed, was “causing panic, dethroning the novel as the number one literary genre, starting the first new direction in American literature in half a century.” It goes without saying that Wolfe considered himself on the cutting edge of the revolution. With no pretense of objectivity, the new journalists unapologetically wrote themselves into stories, stylizing their narratives with the techniques of fiction and recasting fact to suit their intended effect. This course will survey the field of new journalism, from Hunter S. Thompson’s drug-fueled, “gonzo” exposé of Southern culture, “The Kentucky Derby is Decadent and Depraved,” to mild-mannered George Plimpton’s chronicle of his tenure as a middle-aged professional football player, Paper Lion: Confessions of a Last-String Quarterback. We’ll also consider some of the movement’s precursors and heirs, from Stephen Crane’s efforts to brave the heat of battle as a war correspondent to David Foster Wallace’s attempt to understand the mild pleasures (and existential terrors) of a cruise ship vacation, “A Supposedly Fun Thing I’ll Never Do Again.”
Instructor(s): D. Tye
Area: Humanities.

Telling stories is one of the first and most important ways that human beings try to make sense of the world and their experience of it. The narrative art informs fiction and nonfiction alike, is central to the writing of history, anthropology, crime reports and laboratory reports, sports stories and political documentaries. What happened? The answer may be imagined or factual, but it will almost certainly be narrative. This course focuses on the narrative essay, a nonfiction prose form that answers the question of “what happened” in a variety of contexts and aims to make sense not only of what happened but how and why. We will begin by summarizing narrative essays, will move to analyzing them, and in the second half of the course you will write two narrative essays of your own, the first based on a choice of topics and sources, the second of your own design. Authors may include James Baldwin, Annie Dillard, Chang Rae Lee, Danielle Ofri, George Orwell, Richard Rodriguez, Richard Selzer, and Abraham Verghese. You will learn the power of narrative to inform and persuade as you test that power in your own writing.
Instructor(s): P. Kain
Area: Humanities.

AS.060.140. The Ethnic Gangster in the American Cinema.
In this intersession course we will consider the rise (and fall) of some of America’s most notorious and beloved gangsters: Don Corleone (The Godfather), Henry Hill (GoodFellas), and Tony Montana (Scarface). With the help of short readings from Freud, Warshow, and Jameson, we consider what these films have to say about the difficulties and hopes of the immigrant experience, the codes of gangster morality, and the role of organized crime in the American imagination. And we will explore the interplay between domestic responsibility, male brotherhood, and violence that is the hallmark of the genre. Students will be asked to write a short paper at the conclusion of the term, and are required to view the movies outside of class time.
Instructor(s): A. Wexler
Area: Humanities.
AS.060.142. Censorship and Modern Literature.
Whether because of its religious or political dissent, sexual deviance, or corrupting effects on readers, literature has often been perceived as threatening the social order. In this course, we will read a variety of famous literary works, which have each been censored, banned, or subject to public outrage. Alongside each work, we will also read documents related to that work’s suppression, such as reviews, court proceedings, and statements by the authors themselves. We will consider the ways in which literature is both the result of individual artistic achievement, and shaped by its social context. Possible authors include Oscar Wilde, Djuna Barnes, D.H. Lawrence, Vladimir Nabokov, Allen Ginsberg, Salman Rushdie, and Brett Easton Ellis. (This course is for non-majors)
Instructor(s): R. Day
Area: Humanities.

AS.060.145. Literature, Science, and Technology.
This class will consider a range of reactions to scientific discoveries in literature, from electricity in the nineteenth century to bioengineering today. We’ll pay special attention to the utopian hope, doomsaying despair, and radical reconceptions of reality technological breakthroughs seemed and seem to provide. Authors will include Mary Shelley, Wells, LeGuin, Ishiguro.
Instructor(s): E. Tempesta
Area: Humanities.

AS.060.146. Detective Fiction.
This course will look at the history of English-language detective fiction through the nineteenth and twentieth centuries. We will pay special attention to the way clues and suspense operate, the role of the reader in figuring out the mystery, and the complicated relationship of the detective with official authority. Authors will likely include some selection of Wilkie Collins, Edgar Allan Poe, Arthur Conan Doyle, Agatha Christie, Dashiell Hammet, and Raymond Chandler. This class is for non-majors.
Instructor(s): J. Rosenthal
Area: Humanities.

“No man needs sympathy because he has to work, because he has a burden to carry,” Theodore Roosevelt proclaimed in his “Square Deal” speech of 1903. “Far and away the best prize that life offers is the burden to carry,” Theodore Roosevelt proclaimed in his “Square Deal” speech of 1903. “Far and away the best prize that life offers is the chance to work hard at work worth doing.” Hard work is at the heart of the American dream, but with unemployment rates at historic highs and the global economy proceeding at a rapid clip, Roosevelt’s words resurrect old questions in a new world: What work is worth doing? Who gets the chance to do it? And what happens when people find themselves doing work that isn’t worth doing? In this course we will consider the meaning and consequences of work, from the heroic to the tragic, through a selection of American literature from the last days of slavery to the present. This course will consider work in all its forms, from the plantation to the boardroom, to help us develop the tools to interpret the varieties and values of labor in modern society.
Instructor(s): E. Tempesta
Area: Humanities.

AS.060.150. Freshman Seminar: Milton’s Paradise Lost: Contexts and Conversations.
This course undertakes an in-depth study of what is arguably the greatest long poem in the English tradition, John Milton’s Paradise Lost. The poem, first published in 1667, is Milton’s take on the Judeo-Christian story of the Fall found in the Bible. Paradise Lost does not merely retell the biblical account, however. By expanding three chapters of Genesis into a twelve-book epic meant to rival its classical forbears—most importantly Virgil’s Aeneid—Milton’s poem makes room for new readings of an old story. This course encourages students to find their own new readings of the Genesis story by considering the historical contexts of the poem’s production as well as the conversations Paradise Lost continues to provoke to this day. In addition to reading and discussing the poem, students will become familiar with ongoing sites of critical debate, such as the representations of Satan and of Eve. To help negotiate these conversations, students will complete a guided research project that makes use of the materials available through the library’s Department of Special Collections, housed in Brody Learning Commons. In addition to early editions of Paradise Lost, this treasure trove of rare books offers a wide variety of materials which may deepen an encounter with Milton’s poem, from biblical illustrations to gardening manuals to marriage advice. Students will use the collection to ask questions such as: “How does Milton’s representation of Satan differ from earlier traditions of imagining the devil?” and “Does Milton’s approach to Eve reinforce or revise conventional ideas about women?” Sufficient class time will be dedicated to introducing students to Special Collections so as to facilitate their individual work over the course of the semester.
Instructor(s): R. Buckham
Area: Humanities.

AS.060.151. American Literature, Race, and Civil Rights.
The course will explore the role played by literature in advancing and reflecting upon the African American pursuit of freedom and civil rights over the course of the twentieth century, from the era of harsh segregation through the post-Civil Rights era. Although we will focus primarily on fiction, we will also consider essays, autobiography, and poetry. Writers to be considered, mostly black but some white, may include James Weldon Johnson, Ralph Ellison, Richard Wright, Ann Petry, James Baldwin, William Faulkner, Harper Lee, William Melvin Kelley, Malcolm X, Amiri Baraka, Toni Morrison, and Paule Marshall. This class is for non-majors.
Instructor(s): E. Sundquist
Area: Humanities.

As the moniker "The city that reads" might indicate, Baltimore has a long and distinguished tradition of literary production. In this course, we will focus on two of Baltimore’s most famous writers: Edgar Poe and H.L. Mencken, both of whom were widely read and fiercely discussed in their day. We will read a variety of works from both, including a number of Poe’s short stories and Mencken’s coverage of the Scopes trial, and visit some of the Baltimore institutions dedicated to them. These include Poe’s grave and possibly his house, and the Mencken collection at the Enoch Pratt Free Library.
Prerequisites: Students may enroll in one B'More course only.
AS.371.189 AND AS.270.119 AND AS.270.118 AND AS.060.126 AND AS.100.197 AND AS.300.100 AND AS.360.176 AND AS.220.116 AND AS.280.205 AND AS.230.116 AND AS.220.190 AND AS.220.194
Instructor(s): P. Fessenbecker
Area: Humanities.
AS.060.154. Zombies.
Why does the zombie figure so prominently in modern literary and cinematic texts? What particular anxieties does this figure of mindless violence disclose? Why does the zombie genre so often lend itself to political allegory? How do we make historical sense of this figure’s original association with Afro-Atlantic religions like Haitian voodoo? This course is designed for non-majors interested in developing critical reading and writing skills by investigating this surprisingly rich topic. Texts, literary and cinematic, may include: first-hand accounts of the Atlantic slave trade, Mary Shelley’s “Frankenstein”, Edgar Allan Poe’s short stories, Rudolph Fisher’s “The Conjure-Man Dies”, “The Invasion of the Body Snatchers” (dir. Don Siegel), “The Serpent and the Rainbow” (dir. Wes Craven), “Pontypool” (dir. Bruce McDonald), and “Zombieland” (dir. Ruben Fleischer).
Instructor(s): J. Hickman
Area: Humanities.

The “Research Paper” is designed to introduce experienced student writers to the fundamental skills of the research process. These include asking research questions, evaluating the usefulness of sources to answer them, synthesizing sources, reading sources critically, and developing arguments that deliver an original thesis. Students will work with a research librarian at the Eisenhower Library, with whom they will learn to navigate traditional databases as well as new media sources. “The Research Paper” is topic-based and divided into three linked units of instruction. The course culminates with a paper of 12-15 pages that draws upon the cumulative skills of the semester. Each course is capped at ten students and available only to those who have taken “Expository Writing.”
Prerequisites: AS.060.113 OR AS.060.114
Instructor(s): A. Watters
Area: Humanities.

AS.060.156. Introduction to Poetry.
This is a beginner’s guide to the varieties of poetry in English from the Anglo-Saxons to today, with a few detours, here and there, into poetry from other languages in translation. We will study how patterns of sound, image, rhythm, and ideas allow us to become better tuned-in to poetry. You should leave the class with a better appreciation of poetry, some improvement in your writing skills, and a new favorite poem. This course does not count toward the English major or minor.
Instructor(s): E. Tempesta
Area: Humanities.

J.R.R. Tolkien’s “The Lord of The Rings” trilogy can honestly be said to have initiated a new genre: a novel-based epic narrative set in a fantasy world. Since Tolkien’s works were first published in the 1940’s, there has been a massive flowering in similar works, as later authors expanded and developed the notion of the multi-volume fantasy narrative. However, these later texts are also, importantly, creative responses to the models Tolkien developed. In this course, we are going to study this genre, identify its history and formal features, and consider the nature of fantasy fiction more generally. What do authors hope to achieve by setting plots and characters in a completely imagined world? What narrative possibilities does such a decision enable, and what possibilities does it foreclose? Does the fantasy genre mask certain ideologies, and how can we uncover them? Authors will include Tolkien, Robert Jordan, George R.R. Martin, and Steven King, and may also include selections from Brandon Sanderson, David Eddings, Patrick Rothfuss, Ursula K. LeGuin, and Elizabeth Moon. This course is for non-majors. (Limit 18)
Instructor(s): P. Fessenbecker
Area: Humanities.

AS.060.158. Advertising and Literary Modernism.
To say that certain modernist authors were skeptical about the growing power of advertising would be an understatement. H.G. Wells described it as a form of “legalized lying,” while F. Scott Fitzgerald quipped that “its constructive contribution to humanity is exactly minus zero.” Such views on marketing were hardly uncommon, as many modernist authors saw advertising as an enemy to true artistic creation. The modernist response to this form of popular culture, however, was not uniformly hostile. Avant-garde artists, who rejected mainstream commercial values, often turned to newspaper ads and posters for the material that they would repurpose for their own work. In the stream of consciousness epic Ulysses, the protagonist works in advertising and his eye is often drawn to the notices and promotions that cover the streets of Dublin. Virginia Woolf even pauses her narrative to depict a fictional crowd of Londoners contemplating an airplane writing an ad in smoke letters. This course will explore the variety of stances toward advertising in the modernist period, as well as provide historical context. Novels include: “Sister Carrie”, “The Ambassadors”, “Mrs. Dalloway”, “Turnabout”, as well as selections from Ulysses. Critical sources include: Benjamin, Adorno, Williams, Moretti, Brown, and Butler. This course is for non-majors.
Instructor(s): K. Wedekind
Area: Humanities.

AS.060.159. James Joyce’s Ulysses.
Ulysses is often described as impossible to read (it isn’t) and as the greatest novel in the English language (it just might be). A monumental book set in a single day, Ulysses seems to have it all: a panoply of literary styles, religions, philosophies, histories, emotions, and even a wide variety of bodily functions. In addition to offering an up-close look at the novel itself, this course examines the novel’s use of mythology, meditations on Irishness, reflections on capitalism, and its place in “modernism.” By the end of the course, not only will you have read the famously difficult and important Ulysses; you will have understood it, too.
Instructor(s): R. Day
Area: Humanities.
**AS.060.168. Literature and the Civil Rights Movement.**
The course will examine the role of literature in the American civil rights movement. Both non-fiction and fiction played an essential role in motivating protest and shaping public views. Our focus will be on works that entered into the debates over race, rights, and freedom, and introduced a new vocabulary of cultural pride into African American discourse. Works to be studied will include Martin Luther King, Jr., selected speeches and Why We Can’t Wait (including “Letter from Birmingham Jail”); Malcolm X, selected essays and Autobiography of Malcolm X; James Baldwin, Notes of a Native Son; William Melvin Kelley, A Different Drummer; Ralph Ellison, selected short fiction and essays; William Faulkner, Intruder in the Dust; Amiri Baraka (LeRoi Jones), selected poetry and Dutchman; John Howard Griffin, Black Like Me; Paule Marshall, Praisesong for the Widow. This course does not count toward the English major or minor.
Instructor(s): E. Sundquist
Area: Humanities.

**AS.060.171. Russian Classics & Their Afterlives.**
The idea of the “Russian Soul” has long been a source of captivation to English-language writers. How has their imagination of the dense nineteenth-century works for which Russian literature is best known evolved in the era of globalization? This course reads three major Russian novels in tandem with recent works that invoke them: Tolstoy’s Anna Karenina with Nilo Cruz’s 2003 Pulitzer Prize-winning play Anna in the Tropics; Dostoevsky’s Demons with J.M. Coetzee’s 1994 novel Master of Petersburg; and Turgenev’s Fathers and Sons with Tom Stoppard’s 2002 Coast of Utopia trilogy. We will attend both to the aspects of Russian writing that find perennial appeal, and to the nuances of Russian intellectual history that get lost in the clamor to claim it as universal.
Instructor(s): J. Jackson
Area: Humanities.

**AS.060.176. The Russian Novel: Tolstoy and Dostoyevsky.**
If there is no God, how can I be a captain?" We’ll examine this and other religious, philosophical, and historical questions in Tolstoy’s and Dostoevsky’s titanic novels. Readings (in translation) include War and Peace and The Brothers Karamazov. No prerequisites. Substantial reading; 6-8 page paper; 10 page paper; weekly exercises and quizzes.
Freshman/sophomore seminar. This class is for non-majors.
Instructor(s): S. Cameron
Area: Humanities.

**AS.060.180. Introduction to the Gothic.**
Intended as a survey of American and British Gothic fiction (with some excursions into poetry, film, and television), this course will introduce students to the genre of the Gothic and some of its key terms via a selection of major works of Gothic literature from the 19th and 20th Centuries, as well as some of its more popular incarnations (True Blood, the Twilight series). By the end of the course students should have a better understanding of why the Gothic mode continues to play such an important role in our cultural imagination and be better equipped to think and write critically about any manifestation of Gothic terror, from In Cold Blood to True Blood. Students will write short (1-2 page) weekly response papers along with one longer 5-7 page paper.
Instructor(s): A. Zecca; E. Steedley
Area: Humanities.

**AS.060.201. The Nineteenth Century British Novel.**
Reading major novelists from the nineteenth century including Austen, C. Brontë, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities.

**AS.060.202. What is Tragedy?.**
This course is an introduction to tragedy. What is a tragedy? How has the genre been defined and redefined over its long and varied existence? And why do authors and audiences keep returning to these spectacles of pity and fear? To consider these questions, we’ll examine plays including Sophocles’ Oedipus Rex, Shakespeare’s Hamlet, Racine’s Phèdre and Beckett’s Endgame, ending with the Coen Brothers’ film No Country for Old Men.
Instructor(s): W. Miller
Area: Humanities.

**AS.060.204. Satan in Literature.**
What is it about Satan that has captured the literary imagination? From moral opposition to God in the Book of Job, to divine punishment in Dante’s Inferno, from political revolution in Milton’s Paradise Lost to irreverence of tradition in Salman Rushdie’s The Satanic Verses, this class will examine the ways in which Satan has been used in literature to represent a variety of moral, political and social forces, from Ancient, Medieval, Renaissance and Modern eras.
Area: Humanities.

**AS.060.206. Friends and Enemies in Jane Austen.**
Jane Austen’s novels are often treated as forms of escape from our complicated world to a simpler, more rational time. Arguably, however, her novels originally helped readers navigate profound social problems, particularly the difficulty of knowing friends from enemies. In this course, we will consider depictions of friendship and enmity in four of Austen’s major novels. We will compare these novels to four recent films inspired by her works.
Instructor(s): W. Miller
Area: Humanities.

**AS.060.207. Shakespeare.**
Reading the major comedies, histories and tragedies alongside the narrative poem “Venus and Adonis” and the sonnets, this survey course considers Shakespeare’s hybrid career as poet and playwright. Pre 1800 course.
Instructor(s): A. Daniel; J. Hickman
Area: Humanities.

**AS.060.208. Brit Lit I.**
This lecture course tracks the development of vernacular literature in English from the medieval period to the close of the early modern period. Texts include Chaucer’s Canterbury Tales, Spenser’s The Faerie Queene, Milton’s Paradise Lost and Alexander Pope’s “The Rape of the Lock.
Instructor(s): A. Daniel; C. Scozzaro; J. Childers; R. Best
Area: Humanities.
AS.060.209. The American Novel since World War II.
This course surveys the formal and thematic developments of the American novel from 1945 to the present. Against the backdrop of American post-war triumphalism, we consider how contemporary writers, struggling with issues of identity, race and authenticity, express different and deeply troubled accounts of the American dream. We will pay particular attention to the relationship between fiction and history; the tension between individual and collective identity; the changing role of literature in American culture, and the gradual emergence of postmodernism as a significant force in American literary life. Possible authors include: Richard Wright, Flannery O’Connor, Jack Kerouac, J.D. Salinger, Thomas Pynchon, Philip Roth, Cormac McCarthy, Toni Morrison, John Barth, Saul Bellow, Maxine Hong Kingston.
Instructor(s): A. Wexler
Area: Humanities.

AS.060.211. British Literature I.
What is British Literature? Beginning in the fourteenth century and concluding in the eighteenth century, this survey course examines the time period in which the notion of vernacular English literature, the corporate body of “Great Britain” as a national framework, and, with it, “British-ness” as an imaginary, synthetic identity, were all created. Participants will read a representative group of Geoffrey Chaucer’s “The Canterbury Tales”, Book I of Edmund Spenser’s “The Faerie Queene”, the entirety of John Milton’s “Paradise Lost”, and Alexander Pope’s “The Rape of the Lock.” The course is designed as an introductory level lecture course and is open to all students curious about the beginnings of the English literary canon. It is recommended that students follow this course with its sequel, Professor Mao’s “British Literature II,” which will be offered the following semester. Pre-1800 course
Instructor(s): A. Daniel
Area: Humanities.

AS.060.212. British Literature II: 18th Century to the Present.
A survey of major authors such as Wordsworth, Keats, Austen, Tennyson, Dickens, Wilde, Woolf, Joyce, and Rushdie. Substantial attention to formal conventions as well as stylistic innovation, to aesthetic value as well as social meaning.
Instructor(s): D. Mao
Area: Humanities.

AS.060.213. The Novel and Globalization.
Novels have long been classified by the national origin of their author, and, for the most part, the great works of the nineteenth and twentieth centuries take place primarily in one country. In the postcolonial era of the 1980s and 90s, many prominent writers explored the process of diasporic movement from one country to another. Recently, though, there has been a lot of talk about a new kind of “rootless” novel that jumps between many locales around the globe. This course reads some of the prime examples of this genre in relation to its immigrant predecessors, identifying its key formal and thematic attributes (such as perspectival and geographical range, multi-stranded plots, and an acute consciousness of linguistic and generic hybridization). We will discuss the trade-offs inherent in developing many places rather than one in terms of style and character development, as well as the political and even ethical implications of abandoning the concept of “home.” Primary works by Abdurrazak Gurnah, Caryll Phillips, David Mitchell, Taiye Selasi, Chimamanda Adichie, and Imraan Coovadia.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.216. Wilde to Eminem: A Literary History of the Obscene.
What is obscene? What is indecency? Where is the line between public and private? How have the answers to these questions changed over the past century? This course will examine artworks and performances from a variety of media which have been publicly accused of indecency or obscenity. Wilde, Joyce, Nabokov, Ginsberg, Bruce, Carlin, Kubrick, Serrano, Lynne, Prince, and Eminem among others will provide the materials for our inquiry.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

AS.060.217. American Literature Since World War II.
This is a survey lecture covering American literature since about 1945, focusing on fiction from Saul Bellow, and James Baldwin to Toni Morrison and Don DeLillo, poetry from Robert Lowell, Sylvia Plath, Adrienne Rich, John Ashbery, and an array of and political journalism from the 1960s to today.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.219. American Literature to 1865.
A survey course of American literature from contact to the Civil War.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.220. What is the Great American Novel?.
This course will investigate the curiously persistent idea of the “Great American Novel” (GAN) through a close engagement with three exemplary candidates for the title that span American literary history (Moby-Dick, Song of Solomon, and Freedom). Students will also read several critical essays to provide both a history of the concept as well as criteria for what might make an American novel “great.” Through analyses of the individual novels, students will be encouraged to reflect on the persistence, efficacy, and validity of the GAN.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.221. Coming of Age Novels.
In this course, we will consider how “coming of age” is depicted in the novels of British and American modernism. We will discuss questions of family, sexual love, education, work, and religion contribute to an individual’s personal development in the novels of Virginia Woolf, James Joyce, F. Scott Fitzgerald, Virginia Woolf, and James Baldwin. We will also reflect on how the form of the coming of the age novel in the early to mid twentieth century engages with important social and historical developments that protected adolescence as a stage of life, such as labor and education reform. Writing requirements include two 4-5 page papers.
Instructor(s): C. Gannon
Area: Humanities.

AS.060.222. American Literature, 1865 to today.
This course is a survey of major developments in American poetry and narrative fiction from the end of the Civil War to the present day. Authors to be covered may include Mark Twain, Willa Cather, Henry James, James Baldwin, Toni Morrison, Emily Dickinson, Walt Whitman, Wallace Stevens, and John Ashbery.
Instructor(s): C. Nealon
Area: Humanities.
This course covers the British novel from the late nineteenth century to the present, with a particular focus on the decades around World War I. We'll balance attention to formal innovations and experiments with consideration of social and historical context, exploring issues such as gender, empire, psychology, the city, and war. Our goal will be to understand what makes these novels “modern” and sets them apart from their predecessors; to this end, we'll examine how many important authors also wrote extensively on the craft and aims of fiction. Readings will include representative selections by authors such as Henry James, James Joyce, Ford Madox Ford, E.M. Forster, Virginia Woolf, Jean Rhys, and Ian McEwan.
Instructor(s): A. Grener
Area: Humanities.

AS.060.228. Occupy Street Walls: Street Art, Public Space, and Law.
Is the unauthorized placement of artworks in public space vandalism or an aesthetic reclamation of public space? Does street art thrive on illegality? What is the relationship between the law, public space, and street art? This course will situate these questions in the contexts of cultural geography, public space theory, and the long history of art as protest and dissent. Artworks by Banksy, Shepard Fairey, Invader, Murad Sobay, and other artists will be considered.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

Although it's common to think of literature a source of ethical wisdom, literary history is actually full of proud, often cynical, figures who lack respect for conventional norms and compel attention by their sheer force of will. This course constructs an abbreviated history of the anti-hero by exploring works of art that both privilege and criticize anti-heroic villains—including Heathcliff (from Wuthering Heights), Mr. Hyde (from Dr. Jekyll and Mr. Hyde), and Walter White (from Breaking Bad).
Instructor(s): M. Flaherty
Area: Humanities.

AS.060.231. Novels Into Film.
What does it take to turn a novel into film? How different are the demands and possibilities of these two forms? Why do some novels repeatedly attract filmmakers? And how should we evaluate films that adapt novels? Beginning with the novel Frankenstein and its various film progeny, we will look at a series of pairings between novels and films. These may include Austen’s Pride and Prejudice, Dickens’ Great Expectations, Tarkington’s The Magnificent Ambersons, Stoker’s Dracula and McEwan’s Atonement along with various critical readings about the genre of the novel and the medium of film.
Instructor(s): M. Favret
Area: Humanities.

Although it’s common to think of literature a source of ethical wisdom, literary history is actually full of proud, often cynical, figures who lack respect for conventional norms and compel attention by their sheer force of will. This course constructs an abbreviated history of the anti-hero by exploring works of art that both privilege and criticize anti-heroic villains including Heathcliff (from Wuthering Heights), Mr. Hyde (from Dr. Jekyll and Mr. Hyde), and Walter White (from Breaking Bad).
Instructor(s): M. Flaherty
Area: Humanities.

AS.060.253. The Real Jungle-Book: Imperial Kipling.
The Real Jungle-Book: Rudyard Kipling and the British Empire. Rudyard Kipling’s children’s stories of Mowgli and Shere Khan, of Rikki-Tikki-Tavi, and so forth have passed in many ways into the common English literary culture, as the film versions of his works indicate. Yet they represent a particular time and place: the British Empire at the end of the nineteenth century, when its imperial power was both nearing its height and showing its cracks. They arguably serve, moreover, an imperial purpose, validating English assumptions about the legitimacy of its political control over the countries in the empire. In this class, we’ll read a selection of Kipling’s works against a background of knowledge of the British Empire.
Instructor(s): P. Fessenbecker
Area: Humanities, Social and Behavioral Sciences.

AS.060.255. The Bible as Literature.
This course looks at the Bible’s influence on literature by examining the use and impact of the most common biblical stories on canonical literary works. Pre 1800 Course
Instructor(s): M. Thompson
Area: Humanities.

AS.060.260. Ethnic American Literature.
This class is an introductory course in ethnic American literature. We will read Native American, Chicano, Latino, Asian American, and African American literatures. The class will pose questions such as: Why ethnic American literature? Why not simply American? What are the dissonances and similarities between these literary voices? We will explore themes such as identity, otherness, and the construction of race and Americaness. Readings in post 1945-course will include works by authors such as James Baldwin, David Henry Hwang, Toni Morrison, Sherman Alexie, Junot Diaz, Sandra Cisneros, Maxine Hong Kingston, and Jhumpa Lahiri.
Instructor(s): R. Neutill
Area: Humanities.

AS.060.262. Literature and Knowledge.
Can poems, plays, and imaginary narratives teach us something about the real world? Or does their fictional status make them unreliable as sources of knowledge? This course explores these questions by examining classical and contemporary discussions of the topic in conjunction with major works of literature. Primary sources include works by Shakespeare, Jane Austen, and William Golding, while the criticism will be represented among others by Aristotle, Dr. Johnson, and Martha Nussbaum.
Instructor(s): R. Maioli dos Santos
Area: Humanities.

Reading major novelists from the nineteenth century including Austen, C. Brontë, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities.
AS.060.276. Modern Drama.
An introduction to drama of the late-19th and 20th centuries, with an emphasis on its ideological and political contexts. In modern drama, we find vivid accounts of key aspects of modernity: urbanization, industrialization, migration, war, democracy, capitalism, fascism, communism, and nationalism, to name a few. We will read a selection of plays that ask timely questions about the limits of human subjectivity and integrity in a modern, often dehumanizing world. Modern drama is shaped by, and responds to, social and political changes, such as the demise of the aristocracy, the ambitions of the middle class, totalitarian conquest of Europe, apartheid in South Africa, and the AIDS epidemic in the United States. This course also charts how major debates, movements, and theories in the arts have motivated drama's diverse forms and themes. Playwrights may include Henrik Ibsen, Oscar Wilde, Anton Chekhov, Bertolt Brecht, Eugene O'Neill, Tennessee Williams, Samuel Beckett, Athol Fugard, Edward Albee, Caryl Churchill, and Tony Kushner. Secondary readings by the playwrights themselves, in addition to Georg Lukacs, T.S. Eliot, Raymond Williams, Eric Bentley, and more recent scholars and critics.
Instructor(s): R. Day
Area: Humanities.

AS.060.278. Social Climbers and Charlatans in American Literature.
"It's good to be shifty in a new country," declares Johnson Hooper's swindling vagabond Simon Suggs. The ability to speak in many voices—to play many roles—is one key facet of the rags-to-riches American ideal of not only making something of one's self, but of making one's self. But how much social mobility or personal fluidity is too much? In this course, we'll consider the problem of fashioning a self that is both flexible and authentic, both capacious and individual, as it is represented in a broad swath of American literature. We'll begin with Benjamin Franklin's Autobiography, in which Franklin reimagines his life into an intricate web of fact and fabrication. From there, we'll explore the Transcendentalist ideal of the "Moral Sense," in the form of Emersonian self-reliance and Thoreau's revolutionary militancy, and its dark side in Poe's "Imp of the Perverse." After this, we'll account for the great showman P.T. Barnum, who splits the difference between legitimate businessman and devious swindler. We'll see what happens when, in order to make yourself, you first have to steal yourself in "The Narrative of the Life of Frederick Douglass, American Slave". In Mark Twain's "Pudd'nhead Wilson" and Nella Larsen's "Passing", we'll investigate how, why, and with what consequences black Americans might try to pass for white. As the semester winds down, we'll reconsider the rise and fall of Fitzgerald's Jay Gatsby, the mobster made good (if only for a while), before ending with Nathanael West's "A Cool Million", a dark comedy about a man who writes an advice column as a woman. The course will explore some of the fine lines—between honest art and heinous hoaxing, belief and delusion, entrepreneurship and charlatanry—relentlessly worked over in American literature since the nation's inception. Throughout, we'll take stock of the possibilities and pitfalls lurking in the seemingly incompatible goals of novelty and authenticity, fluidity and authority. Dean's Teaching Fellowship course.
Instructor(s): D. Tye
Area: Humanities.

AS.060.279. Law and Literature.
This course queries the nature of legal authority both formally and historically. What distinguishes between law and literature? Is law more authoritative? Is it more ethical? Is it more "real"? Avenues of inquiry will include the power of language to embody, inhabit, or represent law; the relationship between law and ideas about self, liberty, and love; and conflicts and confluences between literary and legal claims to autonomy. Readings may include Sophocles' "Antigone", Andreas Capellanus' "On Love", Shakespeare's "Measure for Measure", William Godwin's "Caleb Williams", and Franz Kafka's "The Trial".
Pre-1800 Course
Instructor(s): M. O'Connor
Area: Humanities.

AS.060.280. The Modernist Novel and the Question of Culture.
"The man ain't got no culture!" declare Simon & Garfunkel, of someone who is so unhip as to confuse Bob Dylan with Dylan Thomas. How is such a statement possible, and what does "culture" mean? In some contexts, culture is something you can get by learning about art, music, and literature. But in other contexts, culture is something that everyone already has; we all live in the "culture" of our everyday habits and customs. Out of the tangle of these two meanings, we get concepts like "cultural districts" in cities, "cultural relativism" about moral issues, and even "multiculturalism." In this course, we'll read a selection of novels related to modernism, a literary and artistic movement preoccupied with the difference between the two forms of life that "culture" can name—a life of intellectual refinement, and a life of organic connection to one's community. Along the way, we'll discuss notions of prestige, sophistication, the relation of religion to the arts, the cultural life of imperialism, and the role of education in forming and reflecting students' cultural aspirations. Background readings from Matthew Arnold, Walter Pater, Raymond Williams, Pierre Bourdieu, and Francis Mulhem; novels by Oscar Wilde, E.M. Forster, James Joyce, Virginia Woolf, Evelyn Waugh, and V.S. Naipaul.
Dean's Teaching Fellowship course.
Instructor(s): R. Day
Area: Humanities.

Thieves, prostitutes, and murderers populate the early English novel. This course will examine the rise of the novel alongside the emergence of law enforcement and the legal profession in the eighteenth century. We will examine how the novel as a genre coalesces around characters that are placed in risky situations and the legal fictions that develop around them (forms such as testimony, confession, and the arguing of a case). This will require a focus on individual laws (such as the 1662 Poor Relief Act and the 1753 Hardwicke Marriage Act), on the psychologies of guilt and innocence, and on the formal literary challenges of representing transgression and justice. We will also examine critical interpretations of several of the major works, paying special attention to the way they address the primary text's engagement with law and the legal system. Readings from Defoe, Fielding, Goldsmith, and Austen.
Dean's Teaching Fellowship course. Pre 1800 course
Instructor(s): S. Hershinow
Area: Humanities.
Can novels ask philosophical questions? What do literary narratives and moral arguments have to do with each other? Everyone who has read a novel recognizes that it is in part an expression of ideas: characters, narrators, authors, and so forth say and do things that express a way of thinking. In this course we’ll examine the connections between moral philosophy and literature in nineteenth-century England in a series of four units, each of which pairs a novelist and a philosopher. The novelists will be Jane Austen, Charles Dickens, George Eliot, and E.M. Forster; the major philosophers will include Edmund Burke, John Stuart Mill, Immanuel Kant, and G.E. Moore, and we’ll read excerpts from Jeremy Bentham, Ludwig Feuerbach, F.H. Bradley, and Henry Sigwick. Assignments will include reading quizzes, response papers, and a final essay with a research component. Dean’s Teaching Fellowship course. Pre 1800 course.
Instructor(s): P. Fessenbecker
Area: Humanities.

AS.060.290. Literary Theory.
This course will provide a survey of many of the major theoretical positions that have been directly or indirectly influential for literary studies. We will read selections from the following: Russian Formalism (Propp, Shklovsky, Bakhtin), structuralism (Levi-Strauss, Barthes), deconstruction (Derrida, de Man), speech act theory (Austin, Butler), Marxism (Jameson), queer theory (Sedgwick, Miller), and distant reading (Moretti). Recommended Course Background: three courses in the English Department.
Instructor(s): F. Ferguson
Area: Humanities.

AS.060.302. Theology of the Narrative.
Everything happens for a reason." "I guess it wasn’t meant to be." People often impose a narrative logic on life events by reference—however attenuated—to a transcendent order of meaning. This course asks two basic questions: How do theological concepts such as God’s omniscience, Providence, predestination, and prophecy get translated into particular narrative structures? How does narrative experimentation function as a critique of traditional theological viewpoints, particularly around the question of how divine agency is related to the existence of evil? Course texts may include: The Book of Job, Denis Diderot, Jacques the Fatalist; Olaudah Equiano, Interesting Narrative; Herman Melville, Moby-Dick; James Agee and Walker Evans, Let Us Now Praise Famous Men; James Baldwin, Go Tell It on the Mountain; Marilynne Robinson, Gilead and Home; Scarlett Thomas, Our Tragic Universe; Terrence Malick, dir., The Tree of Life.
Prerequisites: AS.060.107 Intro to Literary Study, English Lecture Course, or Instructor approval.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.303. Literature of London.
Ian Watt famously linked the rise of the novel with the rise of the city in his seminal work, The Rise of the Novel. This course will survey British literature from the late eighteenth through the early twentieth century that features the the city of London. Students will consider how the city and urban life change over the course of the nineteenth century and how they transform literary depictions and understandings of selfhood and the social imagination. They will examine how nineteenth-century literature represents the space of the city and how these efforts to depict the city cause formal and stylistic innovations. How does the compressed space of the city and its intense stimuli affect characters’ sense of identity? Students will also consider the ways in which the city affects understandings of gender, class and race in these texts. The course will focus on the novel, but it will also include excerpts from newspapers, poetry and essays. Students will read Our Mutual Friend over the course of the semester in order to mimic the experience of nineteenth-century serial reading. Other readings will include Evelina, The Secret Agent, and A Study in Scarlet.
Instructor(s): J. Valdez
Area: Humanities.

AS.060.304. Large Novels.
This course will look at novels that are not only large in size, but which also think about the meaning and methods of trying to capture huge segments of the world into a piece of art. How much can be fit into a novel? What is gained and what is lost? How large is too large? We will read Charles Dickens’s “Bleak House”, Lev Tolstoy’s “War and Peace”, and Thomas Pynchon’s “Gravity’s Rainbow”.
Instructor(s): J. Rosenthal
Area: Humanities.

This course will look at the development of the novel form, from its earliest incarnations. We will pay special attention to questions of how changes in social, cultural, and economic context played a part in the growing popularity and relevance of the novel form. Authors will likely include Miguel de Cervantes, Daniel Defoe, Samuel Richardson, Henry Fielding, Jane Austen, and Henry James. [This course satisfies the pre-1800 requirement]
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.307. Training/Writing/Consulting.
A one credit course for those undergrads who have been nominated as Writing Center tutors. Permission required.
Instructor(s): E. Steedley; R. Day
Area: Humanities.
**AS.060.308. The Novelty of the Novel.**
The English novel has been traditionally regarded as having originated in the eighteenth century, with the works of Defoe, Richardson, and Fielding. This view of the novel's origins owes much to the influence of Ian Watt's *The Rise of the Novel* (1957). Watt claims that the prose fiction written by these three authors is defined and distinguished from other varieties by its "formal realism" – a set of procedures that made the novel much more lifelike than picaresque tales, courtly novellas, or the romance. Watt's view of the canon is now taken to be too restrictive, but his thesis concerning what was novel about the novel remains influential. In this course students will engage with two aspects of Watt's argument that have been criticized by later critics but still retain some of their original force: the idea that eighteenth-century prose fiction marks a break with the past and that the tradition emerging at that point has English origins. We will be testing these two theses by reading and contrasting older and newer forms of prose fiction from England, France, and Spain, comparing their formal procedures, and discussing how satisfactorily Watt accounts for them. We will also be reading critiques and defenses of Watt by critics including Michael McKeon, J. Paul Hunter, Margaret Anne Doody, and Nicholas Seager. Primary sources will include excerpts from Roger Boyle's romance *Parthenissa* (1651) alongside Defoe's *Moll Flanders* (1722); the picaresque tale *Lazarillo de Tormes* (1554) together with Fielding's road epic *Joseph Andrews* (1742); and the conjugal drama of Madame de Lafayette’s *La Princesse de Clèves* (1678) together with Richardson’s treatment of a similar topic in *Pamela* (1740). As we read the primary sources we will be also reading the relevant chapters of The Rise of the Novel. By gaining a first-hand view of the actual changes in prose fiction students will be able to appreciate the force of Watt’s thesis as well as its limitations. Toward the end of the course they will also engage with the provocative final chapter of Watt’s book, which claims that the problems raised by formal realism as practiced by Richardson and Fielding are finally resolved in the work of Jane Austen. Sense and Sensibility should provide the testing ground for this thesis.

Pre 1800 course.
Instructor(s): R. Maioli dos Santos
Area: Humanities.

**AS.060.309. Home and Wanderlust in Modernist Literature.**
This course will examine forms of wanderlust and tensions between rootedness in one’s own culture and a cosmopolitan orientation in Henry James, Joyce, Tagore, Hemingway, Isak Dinesen, and Hualing Nieh.
Dean’s Teaching Fellowship course.
Instructor(s): N. Zhang
Area: Humanities.

**AS.060.310. Work and Worth in American Literature.**
This course will engage contemporary discussions of economics, labor, and vocation with representations of people at work in the writings of Douglass, Melville, Hurston, Steinbeck, Frost, Yates, Springsteen, and others. Dean’s Teaching Fellowship Course
Instructor(s): E. Tempesta
Area: Humanities.

**AS.060.311. On "Moral Insanity": Self-Control in Victorian Philosophy, Psychology, and Fiction.**
Standard utilitarianism, the dominant philosophical account of moral agency in the Victorian period, has a surprisingly unsophisticated account of self-control: both Jeremy Bentham and John Stuart Mill thought it was relatively straightforward, insofar as agents reliably pursued whatever end appeared to promise the greatest gain in happiness with little psychic effort. But other forms of intellectual life in the period—the now-forgotten "Intuitionist" school, the pre-Freudian psychologists, and perhaps most importantly, an important series of Victorian novelists—recognized that agency was much more complex, and tried to work through the problem that J.C. Prichard called "moral insanity." Conceiving it as a situation where agents cannot for some reason pursue their own reflectively endorsed goals, these authors developed a variety of richly complex accounts of and treatments for the loss of self-control. In this class, we are going to explore those accounts at some length. To start with the utilitarian model as a backdrop to the more complex accounts, we will read selections from Jeremy Bentham and John Stuart Mill in which they lay out their pleasure/pain account of agency, and then work through a set of theoretical materials for use throughout the course. First, we'll examine the intuitionist views of agency from William Whewell and John Grote, who held that moral action essentially required mastering oneself in such a way as to perceive and act upon moral intuitions; then, we'll turn to analyses from Prichard, Forbes Winslow, Henry Mausley, and other early forerunners in the developing field of psychology, and situate these arguments within the philosophical context. With this theoretical frame in place, we will spend the bulk of the course reading a series of novels that address the question of self-control. Beginning with Jane Austen and Charlotte Bronté, we’ll consider the ways in which these novels represent the relationship between desire, reflection, and gender. Turning to George Eliot’s *Romola* and Anthony Trollope’s *Can You Forgive Her?*, we’ll consider the way Eliot and Trollope analyze the nature of practical rationality. Finally, we’ll conclude with two important challenges to the belief in the moral value of self-control, in Thomas Hardy’s *Tess of the d’Urbervilles* and Oscar Wilde’s *The Picture of Dorian Gray.*

Instructor(s): P. Fessenbecker
Area: Humanities.
Primo Levi's well-known essay "The Gray Zone" describes complex states of complicity and moral erosion between the categories of "victims," "perpetrators," and "bystanders" during and after the Holocaust. Literature written at the time or in the immediate aftermath, whether memoir, commentary, or fiction, contains many illustrative examples, but even more have arisen at one or another remove from the events, as later generations have confronted an atrocity frequently taken to be historically and morally unique. How did the Holocaust become a touchstone for both extremities of human behavior and problems of representation? When did the Holocaust become available to literature or to the once unthinkable strategies of satire, post-modernism, and even pornography, and can these strategies be considered examples of "the gray zone"? The course will deal with the testimonies of perpetrators such as Rudolf Höss (commandant of Auschwitz) and historical documents setting forth plans for genocide; with memoirs of prisoners such as Filip Müller forced into participation in the Holocaust; and more particularly with literary depictions of life in "the gray zone." The sequence of readings will be organized mainly around literary texts, but these will be paired, sometimes in two-week sequences, with historical and critical materials that take up the problem of complicity through various perspectives: the role of Jewish leaders during the Holocaust; attempts to fictionalize extremities of evil (e.g., Hitler); the aestheticizing of atrocity; the moral responsibility of bystanders; and the extension of genocidal paradigms to other dimensions such as slavery and animal rights. Texts to be studied (mostly, though not exclusively, written first in English) may include: Primo Levi, The Drowned and the Saved; Rudolph Hoess, Commandant of Auschwitz; Tadeusz Borowski, This Way to the Gas, Ladies and Gentlemen; George Steiner, The Portage to San Cristobal of A. H.; Leslie Epstein King of the Jews; Sylvia Plath, selected poems; Philip Roth, The Plot against America; D. M. Thomas, The White Hotel or Pictures An at Exhibition; Caryl Phillips, The Nature of Blood; and J. M. Coetzee Elizabeth Costello.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.313. Edmund Spenser.
After a diagnostic introduction to his early poetry, this reading intensive seminar will concentrate upon Edmund Spenser’s masterwork, The Faerie Queene (1590/1596), which we will read in its entirety. Over the course of its sprawling Six Books and its concluding Mutability Cantos, The Faerie Queene marshals an enormous cast of characters (knights, ladies, magicians, giants, monsters) in order to allegorically represent the virtues of Holiness, Temperance, Chastity, Friendship, Justice and Courtesy. Through this framework, his text models the ethical regulation of the body, the aesthetic construction of gender, the politics of national myth-making, and the ongoing processes of colonial violence in which Spenser was himself complicit. But across its vast yet incomplete expanse, Spenser’s text is always centrally concerned with the task of reading. Accordingly, students should emerge from their encounter with this demanding but rewarding poem with a deeper understanding of the task of interpretation itself. As a group we will collectively traverse the surface of the text, and work together to construct a functional account of allegory’s effects. You will be asked to respond to the challenge of Spenser’s work in class discussion, weekly short responses, and three analytic papers.
Instructor(s): A. Daniel
Area: Humanities.

AS.060.314. Social Media Fictions.
Writers around the world are now searching for ways to incorporate new modes of social interaction - e.g. Facebook, Twitter, text messaging, and Skype - into their print work. This course explores the various techniques they have adopted for this purpose, with an eye to critically evaluating their implications for narrative structure and its "reality effect." From Teju Cole's very public experiments with the Twitter novel to a Zimbabwean writer's attempt to capture plot turns through SMS, we will discuss the ways in which narrative is helped or hindered by the ubiquity of social media. Writers studied will include Tendai Huchu, Zadie Smith, Jonathan Franzen, and Eben Venter.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.315. Poetry by Other Means.
In this course, we explore the makings of a new genre: the poet’s novel. Reaching back to the modernist works of Gertrude Stein and Djuna Barnes to look for its resources and its models, searching for antecedents in the queer avant-gardes of the 1970s, and finally delving into the key poets’ novels of just the last five or ten years—including works written by Eileen Myles, Juliana Spahr, Ben Lerner, and Bhanu Kapil—we will collectively develop an account of its yet-uncharted territory and some of its attractions. Our work will open onto a series of questions about both the category of poetry and the significance of narrative, while following thematic threads of friendship, gender and sexuality, self-reflection, feeling, crisis, and utopia.
Instructor(s): C. Westcott
Area: Humanities.

AS.060.316. Mapping the Global Metropolis.
Cities have long taken on a central role in literature, but much of our reading about urban space is confined to a few Western hubs. And while the city has traditionally been a space for fictional characters to develop into national subjects, much of the most innovative contemporary writing sees the city as a character of its own. This course will address the representational challenges of globalization through fiction and genre-bending memoir about contemporary metropolises that act as its microcosm: Johannesburg, Lagos, Delhi, London, and New York. We will read primary works by Ivan Vladislavic, Chris Abani, Aravind Adiga, Zadie Smith, and Teju Cole, as well as supplementary excerpts from books including Capital, by Rana Dasgupta, Mike Davis’ Planet of Slums, Ata Quayson’s Oxford Street, Accra, and Loren Kruger’s Imagining the Edgy City. Finally, the course will include theoretical readings about globalization and representation, such as Fredric Jameson’s essay on “Cognitive Mapping” and Arjun Appadurai’s seminal book Modernity at Large.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.317. Time Well Wasted: Reading Fiction in the 18th Century.
Is reading fiction just escapism? Or can novels speak to us about real life? We will discuss this question by reading classic works by Defoe, Swift, Fielding, and Sterne. Dean’s Teaching Fellowship Course. Pre 1800 course
Instructor(s): R. Maioli dos Santos
Area: Humanities.
AS.060.318. The Theology of Narrative.
Everything happens for a reason." "I guess it wasn't meant to be." People often impose a narrative logic on life events by reference—however attenuated—to a transcendent order of meaning. This course asks two basic questions: How do theological concepts such as God's omniscience, Providence, predestination, and prophecy get translated into particular narrative structures? How does narrative experimentation function as a critique of traditional theological viewpoints, particularly around the question of how divine agency is related to the existence of evil? Texts may include: "The Book of Job" (4th century B.C.E), Voltaire's "Candide" (1759), Olaudah Equiano's "Slave Narrative" (1789), Herman Melville's "Moby-Dick" (1851), Rebecca Harding Davis's "Life in the Iron-Mills" (1861), James Agee's "Let Us Now Praise Famous Men" (1941), and Scarlett Thomas's "Our Tragic Universe" (2010). Recommended Course Background: AS.060.107, a lecture course (200-level) in the English department, or instructor approval.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.319. Values and Gender in Nineteenth-Century British Literature.
The course considers how nineteenth-century British authors—including Ruskin, Gaskell, Eliot, and Wilde—engage and oppose various sets of values in their representations of gender.
Instructor(s): M. Flaherty
Area: Humanities.

AS.060.320. Icons of Feminism.
This course looks at four crucial figures who have haunted feminist thought and responses to feminism over the centuries. Sappho, known as the first female poet, remains an enigmatic icon of feminine desire and creativity; Antigone, the daughter of Oedipus and the heroine of Sophocles's play Antigone, still inspires feminist analyses of women's relationship to law, the state and civil society; and Joan of Arc, the militant maid of Orleans, troubles thinking about women and violence as well as women, religion and spirituality. The last figure is Mary Wollstonecraft, often cited as the first modern feminist. The course will examine literary works written about these iconic figures, as well as contemporary feminist writing about their influence and viability as models for the future of feminism.
Instructor(s): M. Favret
Area: Humanities.

In this class, we’re going to briefly survey the major poets of the Victorian era: Alfred, Lord Tennyson, Robert and Elizabeth Barrett Browning, Dante Gabriel Rossetti and his sister Christina, Matthew Arnold, George Meredith, and others. Moreover, we’ll try to situate them in the social, political, and intellectual contexts that gave rise to their works, and investigate the questions that stimulated them and which their works address: we will, for instance, follow Arnold in thinking about the place of religion in the modern world, Meredith in thinking about the nature of moral egoism, and Elizabeth Barrett Browning in recovering the voices of oppressed classes. We’ll also try to address the various formal innovations of poetry in the Victorian era, attending to—for example—Tennyson’s complex re-imaginations of the verse of the Arthurian legends and Robert Browning’s development of sophisticated forms of irony. Specific poems to be studied include Tennyson’s “Ulysses” and “The Lady of Shalott,” George Meredith’s “Modern Love,” and Christina Rossetti’s “Goblin Market.”
Instructor(s): P. Fessenbecker
Area: Humanities.

AS.060.322. Indian Ocean.
This course will explore the development of a cosmopolitan ethos in postwar fiction from the Indian Ocean region, with particular focus on South Africa, South Asia, and the Malay Archipelago. Authors will include Aravind Adiga, Pramoedya Ananta Toer, Lloyd Fernandez, Tan Twan Eng, and J.M. Coetzee.
Instructor(s): J. Haley
Area: Humanities.

In this course, students will consider the emergence and development of modern British poetry. Beginning with Hopkins and Hardy, two of the forebears of modernist literature, students will read and discuss the war poems of Owen and Sassoon before turning to major modernist poets like Eliot, Pound, and Auden. By reading pertinent critical pieces by and biographical information about these poets, students will acquire an understanding of modernism’s concern with form, its interest in experimentation, and its navigation of both tradition and modernity. Over the course of the semester, students will be asked to write three five-to-seven-page essays on the works previously covered in class.
Instructor(s): E. Steedley
Area: Humanities.

AS.060.326. Spectral Evidence.
Rising to its greatest prominence during the 1692 Salem Witch Trials, “spectral evidence” refers to a category of evidence that involves supernatural claims—dreams, visions, etc. Even in 1692 within the largely homogeneous Euro-American Puritan community, the category raised profound questions about what should count as evidence in legal settings, and, more broadly, about the ontological status of the supernatural—to what extent are certain experiences of the supernatural mediated by private subjectivity and thus difficult to transmit or even illegible in the public sphere? These questions only intensify in cross-cultural contexts like the colonial Americas and postcolonial Australia and South Africa and often get reconfigured into debates about the limits of cultural relativism. This course will examine historical, literary, and filmic sites at which the question of “spectral evidence” comes into play. Texts may include: documents pertaining to the Salem Witch trials; Inquisition records; the novels of Charles Brockden Brown; Nathaniel Hawthorne, “The Scarlet Letter” and other fiction; Edgar Allan Poe, “The Tell-Tale Heart,” “The Pit and the Pendulum,” and other fiction; the spiritualist medium Fox sisters’ confessions; Mark Twain, “Personal Recollections of Joan of Arc”; Arthur Miller, “The Crucible”; Peter Weir, dir., The Last Wave; Gavin Hood, dir., A Reasonable Man; Scott Derrickson, dir., The Exorcism of Emily Rose. Recommended Course Background: AS.060.107, 200-level English course, or instructor approval.
Instructor(s): J. Hickman
Area: Humanities.
AS.060.327. **Best Sellers in the Early Nineteenth Century: Sir Walter Scott, Lord Byron, and Jane Austen.**
Sir Walter Scott and Lord Byron were the best-selling authors of their day by a significant margin. In this course, we’ll attempt to come to terms with their unprecedented success, which was felt within the business of the publishing industry as much as it was in the minds of their fellow writers. Readings include Scott’s poems set in Scotland’s legendary past, Byron’s scandalous and heroic poems (including his masterpiece, Don Juan), as well as a novel by their less-popular contemporary, Jane Austen, whose formally elegant novels must be understood as drawing on and competing with the works of her age’s most dominant literary figures. Additionally, we’ll place a strong emphasis on understanding how the workings of the publishing industry affected not only the habits of reading, but also of writing, during this crucial period in literary history. Secondary readings will help to situate the authors and primary texts in their historical and literary context, and provide practical tools for literary analysis. Assignments will include reading quizzes, response papers, and three longer papers. Required Texts: Walter Scott, The Poetical Works of Walter Scott (Wildside Press) Walter Scott, Waverley (Broadview) Lord Byron, The Major Works (Oxford) Jane Austen, Persuasion (Oxford)
Instructor(s): N. Bujak
Area: Humanities.

AS.060.328. **Restoration and 18th Century Literature.**
This course is a survey of the major authors and genres in English from 1660-1800. Topics include the rise of the novel, politics and satire, gender and women writers, landscape and ecological consciousness, philosophy, science and literature.
Prerequisites: AS.060.107
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.329. **Prophecy after Science.**
Prophets and their prophecies are everywhere: whether preached by evangelical visionaries of Rapture, opined by primetime sports forecasters, or sold at hourly rates by countless fortunetellers and astrologers. Our dizzying era, predicated economically, technologically, and politically on objective methods of prediction, comfortably accommodates and even welcomes pre-scientific, prophetic modes of futurity. We look up our horoscopes on our smartphones. How did we come to balance these futures so blithely? Do we – and should we – think of these modes as continuous or separate, complementary or conflicting? This course explores the history of prophecy, from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom, with a focus on the effect of the rise of science in shaping the course of prophetic writings. The majority of texts in this course come from the literature of 1600-1800 – centuries that witnessed the emergence of our modern scientific disciplines, and the recasting of prophecy in terms of the human imagination.
Instructor(s): W. Miller
Area: Humanities.

AS.060.330. **The Contemporary Novel.**
This course will survey a variety of novels written since 2000, from literary novels to best-sellers, both in English and in translation (into English). We’ll pay attention to formal and aesthetic questions -- what counts as a good story, at this point in history? -- and we’ll hone our skills in recognizing narrative patterns and motifs across different fictional styles. Authors likely to be considered include Arundhati Roy, Junot Diaz, Roberto Bolano, Muriel Barbery, Marlene van Niekerke, David Mitchell, and Amitav Ghosh.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.331. **Poetry and Perfect Worlds.**
A seminar exploring poetic representations of ideal realms. Beginning with classical pastorals, we will move on to medieval and Renaissance arcadias, Romantic geographies, modernist utopias, and the ecopoetics and necropastoral of the twenty-first century. We will consider in detail what makes a place Edenic or utopian and how the fabrication of an imaginary world relates to the construction of a poetic text. Writers studied may include Theocritus, Virgil, Chaucer, Spenser, Milton, Shelley, Tennyson, T. S. Eliot, W. H. Auden, Lisa Robertson, and Juliana Spahr.
Instructor(s): D. Mao
Area: Humanities.

AS.060.332. **Jewish American Fiction.**
This course will consider the development of Jewish American fiction over the past century through an examination of major authors and topics, with particular attention to novels whose historical trajectories reach geographically back and forth from America to Europe, and temporally back and forth across the Holocaust, the century’s defining event. These novels thus frequently have multiple settings and treat familial, communal, and intellectual life, along with topics such as emigration, anti-Semitism, and religious belief, over a span of several generations. The list includes authors whose works first appeared in Yiddish (Lamed Shapiro and Isaac Bashevis Singer) and authors whose sensibilities are decidedly American, but all write with attention to the tenuous assimilation, dislocation, trauma, and linguistic complexity that often marked twentieth-century Jewish life, no less in the United States at times than in Europe. Works studied will include: Dara Horn, In the Image; Rebecca Goldstein, Mazel; Bernard Malamud, The Fixer; Lamed Shapiro, The Cross and Other Jewish Stories; Isaac Bashevis Singer, Shosha; Cynthia Ozick, The Shawl; Nicole Krauss, A History of Love; Jerzy Kosinski, Steps; Philip Roth, Nemesis; Shalom Auslander, Hope: A Tragedy: A Novel
Instructor(s): E. Sundquist
Area: Humanities.
Through readings of Scripture, medieval and early modern drama and prose fiction, and modern political theory and environmental writing, this course explores the complex and overlapping status of oaths, pledges, promises, pacts, and contracts. Starting with an examination of speech act theory, this upper division seminar will consider a range of literary "scenes of obligation" in which verbal promises or written contracts bind persons together. We will look at how promises and contracts mediate relationships between humanity and inhuman forces (pledges to God, pacts with the Devil), how they consolidate bonds between human beings (business contracts, marriage contracts), and how they are fulfilled, broken, or re-negotiated. Possible texts include: J. L. Austin, "How to Do Things with Words"; John Searle, "Speech Acts"; Anon., "The Building of the Ark"; "The Flood" (York Corpus Christi Plays); Anon., "Arden of Feversham"; Christopher Marlowe, "Doctor Faustus"; William Shakespeare, "The Merchant of Venice"; Margaret Cavendish, "The Contract"; and chapters from Jean Jacques Rousseau, "The Social Contract"; Carole Pateman, "The Sexual Contract"; and Michel Serres, "The Natural Contract". Pre 1800 course.
Instructor(s): A. Daniel
Area: Humanities.

This course will study the idea of modernity, a term that has been of continuing use in trying to understand ourselves and our society. We will focus on the major works of prose and poetry that attempted to come to terms with modernity in Victorian Britain. Texts are likely to include non-fiction prose by Mill, Arnold, Darwin, Nightingale, and Pater; Eliot's novel Middlemarch; and poetry by Elizabeth Barrett and Robert Browning, Tennyson, Emily Bronte, Christina Rosetti, Hopkins, and Hardy.
Instructor(s): A. Miller
Area: Humanities.

AS.060.337. James Joyce.
A seminar covering the oeuvre of James Joyce, including but not limited to Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and parts of Finnegans Wake. Selected readings in other writers and in relevant historiography; some attention to Joyce criticism.
Instructor(s): D. Mao
Area: Humanities.

AS.060.338. Literary Scenes.
From Paris in the 1920s to San Francisco in the 1960s and beyond, this course will cover literature produced within major and minor literary "scenes" of the 20th Century. Authors include Hemingway, Stein, Woolf, Ginsberg, Kerouac, and others. Dean's Teaching Fellowship course.
Instructor(s): A. Zecca
Area: Humanities.

Focusing on the long nineteenth century, we will examine how major Anglo-American poets treat the complex relationship between madness, passion, and genius. Additional readings in philosophy and psychoanalysis. Dean's Teaching Fellowship course.
Instructor(s): J. Hann
Area: Humanities.

This seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban antislavery novels, slave narratives, and "classics" of American literature like Melville's Benito Cereno. We will consider how the institution of Atlantic slavery was variously represented, justified, and criticized, discovering in the process the deep structures of modern slavery discourse. Texts may include: Aphra Behn, "Oroonoko"; John Woolman's "Journal"; Robert Wedderburn, "The Horrors of Slavery and Other Writings"; Gertrudis Gomez de Avellaneda, "Sab"; Frederick Douglass, "My Bondage and My Freedom"; Herman Melville, "Benito Cereno"; Harriet Beecher Stowe, "Dred"; Antonio Castro Alves, "The Slaves".
Instructor(s): J. Jackson
Area: Humanities.

AS.060.341. Milton.
This class will study Milton's poetry and prose across the whole of his writing career, with special attention to Paradise Lost, the great epic poem retelling the story of the fall of humankind. We will consider Milton's literary background, his contemporary political and social milieu, as well as critical debates that surrounding the poet, who was accused of being 'of the devil's party.' Pre-1800 course.
Instructor(s): S. Achinstein
Area: Humanities.

The novel of ideas is often traced to 18th century French or 19th century Russian writing, but it has come broadly to signify works of robust philosophical contemplation. The inherently slippery term seems to indicate a work in which "form" is subsidiary to "content," or at least, in which narrative structures adapt to prioritize thought rather than style, image, or even character. But how, exactly, and about what, do novels "think?" In large part, the novel of ideas is now conflated with a rote and recognizable brand of social realism. This course asks what might qualify as a novel of ideas today, both in terms of the novel's changing relation to geographical space (and thereby the formal spaces in which philosophy might lurk), and of the particular "ideas" it critiques or puts forth. We will read novelists including J.M. Coetzee, Marlene van Niekerk, Jonathan Franzen, Teju Cole, and Ronan Bennett within a longer literary-philosophical tradition, with reference to works such as Candide, War and Peace, Thus Spoke Zarathustra, and Kierkegaard's Diary of a Seducer.
Instructor(s): J. Jackson
Area: Humanities.

This course examines John Milton's commitment to liberty in its many varieties, both public and private, as articulated in his early prose writings and as imagined in his poetic works. Dean's Teaching Fellowship Course. Pre 1800 course.
Instructor(s): R. Buckham
Area: Humanities.
**AS.060.344. The American Renaissance in Technicolor.**
The American Renaissance refers to the boom in U.S. literary production between the 1830s and the 1860s that gave us the American writers who have achieved the greatest stature in the popular mind—Emerson, Thoreau, Hawthorne, Melville, Whitman. This work was in large part animated by literary nationalism—by the self-conscious effort to produce a distinctively “American” literature that could take its rightful place on the world stage. As such, questions about the meaning of American history and the nature of American identity were central to this work both as implicit impetus and explicit theme. Importantly, these questions were being asked during the heyday of “Manifest Destiny”—of Euro-American westward expansion, which displaced Native peoples and Hispanic settlers and perpetuated the enslavement of African Americans. The goal of this course is to read some of the major works of the period’s canonical Euro-American male writers in conjunction with works by African, Native, Latino, and female American writers in order to gain a fuller picture of literary and cultural history during this formative moment. Texts may include: Ralph Waldo Emerson’s essays and antislavery lectures; the anonymous historical romance of the Aztec conquest, Xicotencatl; William Apsell, A Son of the Forest; "Eulogy on King Philip"; Frederick Douglass, My Bondage and My Freedom; Henry David Thoreau, Walden; "Slavery in Massachusetts," "Plea for Captain John Brown"; Harriet Beecher Stowe, Uncle Tom’s Cabin; Herman Melville, "Hawthorne and His Mosses," Benito Cereno, Moby-Dick; Nathaniel Hawthorne, tales and sketches, The Blithedale Romance; Walt Whitman, Leaves of Grass (1855 edition). 
**Prerequisites:** AS.060.107 or English department lecture, or instructor permission. 
Instructor(s): J. Hickman 
Area: Humanities.

**AS.060.345. Mapping Victorian England.**
The landscape of England changed dramatically during the course of the nineteenth-century, from the unprecedented expansion of the British Empire and the rapid growth of cities and urban environments, to the increasing psychological investment in more confined spaces like the home. In this course, we’ll explore how Victorian literature “maps” these various spaces and, perhaps more importantly, the connections between them. The bulk of our reading will be novels by authors such as Charles Dickens, Elizabeth Gaskell, George Eliot, Anthony Trollope, Thomas Hardy, and Rudyard Kipling, though we’ll also turn to poems, non-fiction prose, and short theoretical readings to enrich our understanding of how Victorian writers attempted to represent the spatial, social, and economic geography of their nation. In addition to examining the “horizontal” connections drawn by these novels—between, for example, the country and the city, the colonies and the capital, the home and the nation as a whole—we’ll also explore how these novelists draw on intellectual developments like the emerging Darwinian worldview and incorporate what we might call “vertical” mapping to understand how the past shapes the present. Throughout, we’ll pay careful attention to how these writers represent the specificity of place and investigate the influence of environment on character and personal development. 
Instructor(s): A. Grener 
Area: Humanities.

**AS.060.346. Major British Authors: George Eliot.**
In this course we will read the major novels of George Eliot, one of the most significant writers in the history of British fiction. Her novels addressed a number of compelling moral and social issues through powerful narratives about fallen women, disappointed love, tense family dramas, and individual struggles to find meaningful vocation. We will read the works carefully, examining their formal features in relation to philosophical, social, and historical context. To read Eliot is necessarily to enter into a rich engagement with nineteenth-century culture and thought, and in order to further our understanding of her oeuvre, we will read a number of key critical appraisals of individual novels, as well as some of Eliot’s own essays on various topics. Novels will include “Adam Bede”, “The Mill on the Floss”, “Felix Holt”, “Middlemarch”, and “Daniel Deronda”. 
Instructor(s): A. Anderson 
Area: Humanities.

**AS.060.347. American Bibles.**
This course will examine texts drawn from across the Americas—from Mather’s Magnalia Christi Americana to Melville’s Moby-Dick to Euclides da Cunha’s Os Sertões (Rebellion in the Backlands) to Kushner’s Angels in America—that are fundamentally biblical in their inspirations, aspirations, proportions, and allusions. We will consider these texts’ attempts, in the face of globalizing and secularizing forces like Atlantic slavery and German higher criticism, to affirm, undermine, appropriate, and redirect the authority of the ur-canonical text. Recommended Course Background: AS.060.107 or lecture course in English department. 
**Prerequisites:** AS.060.107 or a lecture course in the English department. 
Instructor(s): J. Hickman 
Area: Humanities.

**AS.060.348. Virginia Woolf and Bloomsbury.**
An exploration of the achievements and investments of one of the most influential coteries in the history of Britain. In addition to delving into key fictions by Virginia Woolf, we will examine novels by Leonard Woolf and E. M. Forster, art criticism by Roger Fry and Clive Bell, biographical essays by Lytton Strachey, economic writings by John Maynard Keynes, and poetry by T. S. Eliot. 
Instructor(s): D. Mao 
Area: Humanities.
This course will introduce students to experimental, conceptual, and constraint-generated literature. In some cases, the texts we will read were created through the application of some particular premise, constraint, or rule-governed system. In other cases, practices of appropriation, creative re-use, or sampling were involved in the generation of textual material (sometimes subjected to editing and transformation, sometimes presented “as is”). What happens to literary meaning, genre identification, and the author/reader contract under these conditions? Can an experiment be evaluated as a success or failure as literature? What’s so “conceptual” about this practice, anyway? And why are the results—often typcast as difficult or resistant to understanding—frequently so funny? In search of answers, we will read widely in experimental and conceptual literature and in the manifestos and critical analyses that surround this work, and we will look at the overlap between experimental and avant-garde literary movements and concurrent processes of “dematerialization” in print within the related domain of the visual arts. Finally, we will consider the importance of digital tools, search engines, and databases in the construction of experimental literature at the present time. Possible authors/texts include Raymond Queneau “Exercises in Style”, Raymond Roussel “How I Wrote Certain of My Books”, Georges Perec “A Void”, Harry Matthews “Oulipo Compendium”, Walter Abish “Alphabetical Africa”, Marjorie Perloff “Unoriginal Genius”, William S. Burroughs “The Cut-Up Method”, Charles Bernstein, “The L=A=N=G=U= A=G=E Book”, Vanessa Place “Notes on Conceptualisms”, Kenneth Goldsmith “The Weather”, Gary Sullivan “The Flarf Files”, Aaron Kunin “The Sore Throat”, Christian Bok “Eunoia”, and David Trinidad and D. A. Powell’s “By Myself, An Autobiography”. 
Instructor(s): A. Daniel
Area: Humanities.

AS.060.351. Theory of the Novel.
We all know a novel when we see one, but it’s surprisingly hard to say just what one is. This seminar will introduce the theory of the novel by reading a number of novels along with the works of central thinkers about the novel. We will look at the connection of the rise of the novel form with historical and cultural changes and investigate key stylistic elements. Novelists will likely include Miguel de Cervantes, Johann Wolfgang von Goethe, Jane Austen, Gustave Flaubert, and Virginia Woolf.
Instructor(s): J. Rosenthal
Area: Humanities.

This course takes stock of how the current hot topic of “world literature” has evolved from Immanuel Wallerstein’s work on world-systems theory over the course of the last three decades. We will read work by a wide range of literary critics engaged with the topic of world literature, including Franco Moretti, Pascale Casanova, David Damrosch, Emily Apter, and Alex Beecroft, as well as major “world” novels by Herman Melville, Amitav Ghosh, and Chimamanda Adichie. Students will also be introduced to critical approaches that offer a conceptual alternative to the world literature framework, for example, Edward Said’s ideas on worldliness and contrapuntalism, Gaston Bachelard’s phenomenology of the home, Fredric Jameson’s concept of cognitive mapping, and Eric Hayot’s work on literary “world-creation.” We will ask just how broadly the field can be defined before it loses its critical cohesion. In other words, does world literature exist?
Instructor(s): J. Jackson
Area: Humanities.

AS.060.354. Marlowe and Shakespeare’s History Plays.
The first folio of Shakespeare’s works groups his plays into three categories: “Comedies,” “Tragedies,” and “Histories.” This course will consider what a Renaissance history play was. What are the consequences of basing literature on real historical events? How do the ways in history has been dramatized on stage relate to renaissance understandings of history and to how we understand history today? We will read all ten of the plays classed as Histories in the Folio, along with two other Shakespeare plays based on British historical chronicles (King Lear and Cymbeline) and Christopher Marlowe’s Edward II. We will also look at the chronicles and histories that served as sources for the playwrights, and theoretical discussions of the purpose and nature of history and literature from the early modern period. Pre 1800 course
Instructor(s): M. Vinter
Area: Humanities.

This course surveys major authors, genres, and literary movements from 1690-1800. Topics to be discussed include the gendered division of labor, ecological consciousness, British imperialism, the rise of capitalism, and the relation between literary and material labor. We will be reading a variety of texts in poetry, prose, drama, and the novel from authors including Alexander Pope, Daniel Defoe, Jonathan Swift, Eliza Haywood, Stephen Duck, Mary Collier, Mary Leaper, Samuel Richardson, Thomas Gray, Oliver Goldsmith, William Wordsworth, Anna Laetitia Barbauld, and William Blake. Texts will be supplemented with historical, philosophical, and theoretical materials where appropriate. A pre-1800 course.
Instructor(s): K. O’Brien
Area: Humanities.

A comparative study of major works by the South African Nobel Laureates Nadine Gordimer and J.M. Coetzee. Special attention to critical essays by both writers about each other, as well as about issues of shared historical and literary concern. Topics will include the role of the public intellectual in apartheid-era South Africa, competing scales of literary reception and evaluation (e.g. national, international, and universal), and the relationship between politics, form, and genre.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.357. The Novels of Jane Austen.
An intensive study of Austen’s six major novels, read in their literary and historical context.
Instructor(s): J. Kramnick
Area: Humanities.
AS.060.358. Prophecy and Enlightenment.
This class considers the relationship between prophecy and enlightenment. These two knowledge regimes, the revelatory and the rational, are often assumed to be opposed, with rationality triumphing over revelation in the seventeenth and eighteenth centuries. In recent years, notably post-9/11, we have seen a resurgence of this view from a variety of perspectives, whether that of the new atheism or that of historians of enlightenment. We will turn to a number of important primary texts associated with major enlightenment thinkers in order to interrogate more closely the opposition of prophecy and enlightenment at the point of its supposed origin. Doing so should help at once to clarify and complicate the important contemporary narrative pitting science against religion and vice versa. Later in the semester, we will turn to a number of twentieth-century thinkers who bring quite different perspectives to the role of revelation in the history of reason. Pre-1800s course.
Instructor(s): W. Miller
Area: Humanities.

AS.060.359. Posthumanist Literature.
Much of the attention surrounding posthumanism has centered upon a late twentieth-century archive of speculative fiction. This 300-level course would take a longer view, tracing a prehistory of literary and critical discourses that challenge the distinction between humanity and its nonhuman others from the late enlightenment to the present day. Students will begin with sections from Jonathan Swift’s Gulliver’s Travels and A Modest Proposal, then progress through texts that link the humanist themes of exploration and conquest to problems of consumption and divergent forms of life, including Herman Melville’s Typee and Thomas M. Disch’s The Genocides. Next they will turn to the link between the bildungsroman, human enhancement, and the concept of “bare life.” Readings in this section include Neal Stephenson’s The Diamond Age, Philip K. Dick’s Do Androids Dream of Electric Sheep, Franz Kafka’s “The Hunger Artist,” and Primo Levi’s If This Is a Man. We will then consider the link between “monstrosity,” hetero-normativity, and sexual abjection. Readings include Mary Shelley’s Frankenstein, James Baldwin’s Another Country, and Margaret Atwood’s Handmaiden’s Tale. The course will conclude with two units on posthuman ethics. The first of these, on the concept of “singularity,” will include J.G. Ballard’s The Drowned World and William Gibson’s Neuromancer. Finally, students will consider what Donna Harraway has termed “companion species,” with readings to include Franz Kafka’s The Metamorphosis and J.M. Coetzee’s Elizabeth Costello. Critical readings will include selections from Katherine Hayles, How We Became Posthuman; Donna Harraway, “A Cyborg Manifesto”; Friedrich Nietzsche, Human, All Too Human; Michel Foucault, The History of Sexuality, vol. I; Giorgio Agamben, The Coming Community and Homo Sacer; Jean Jacques Rousseau, Emile; H.G. Wells, Anticipations and Mankind in the Making; Nick Bostrom, Human Enhancement and Global Catastrophic Risks; Alan Weisman, The World Without Us; Peter Singer, Animal Liberation; J.M. Coetzee, The Lives of Animals; and introductory essays by Andy Miah and Neil Badmington.
Instructor(s): J. Haley
Area: Humanities.

All of Austen’s completed novels, as well as a selection of her letters. We will examine both her influence on the novel form, and her work’s relation with her social context. We will also consider why Austen has such unprecedented cultural authority today.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.361. Literature, War, Trauma.
With a focus on the post-World War II period, a world redefined by the cataclysmic events of the Holocaust and the atomic bombing of Hiroshima and Nagasaki (as well as the more widespread strategic aerial bombing of civilian targets in Europe and Japan), the course will consider the nexus of literature, war, and trauma across a range of modern works in English, supplemented by some works in translation. What does it mean to live in the shadow of the Holocaust and the ever-present threat of nuclear war? How can annihilation on such a scale be accommodated to historical, theological, and ethical understanding? What is the role of the imagination in addressing such questions? What if the war had had a different outcome? We will investigate the consequences for literature as it attempted to address such questions in fiction, memoir, and commentary. In addition to a range of historical and theoretical readings, we will concentrate on literary works of several kinds: as a point of departure a few primary works by figures such as Primo Levi “The Drowned and the Saved” and John Hersey “Hiroshima”; fictional and non-fictional ruminations on the war’s legacy by figures such as Kurt Vonnegut “Slaughterhouse Five”, D. M. Thomas “The White Hotel”, Msuji Iibus “Black Rain”, and W. G. Sebald “On the Natural History of Destruction”; counterfactual narratives about the world that might have been, had the Axis powers prevailed, by figures such as Philip K. Dick “The Man in the High Castle”, Ira Levin “The Boys from Brazil”, Philip Roth “The Plot against America”, and Michael Chabon “The Yiddish Policeman’s Union”; and works in which the impact of catastrophic destruction is absorbed into other cultural arenas by figures such as Toni Morrison “Beloved”, Don DeLillo “White Noise”, and J. M. Coetzee “Elizabeth Costello”. Readings are tentative and may be modified. Requirements: class participation, short writing exercises, and two longer papers.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.362. Art and the Arab Spring.
Much has been made of the political ramifications of the Arab Spring: the potential move towards democratic representation, the realization of minority and gender rights, the economic liberalization of markets, the jockeying by world powers to assert influence in the region, and the revitalization of dissident movements. This course will turn its attention to the role of artistic representation in the Arab Spring in order to complicate these political discussions. We will explore widely, considering works of prose, poetry, film, music, performance art, and visual art, from photography to graffiti. We will think through how these mediums are used and to what end, whether as evidence of atrocities, as inspiration and mobilization of dissent, as satirical commentary, or to revitalize appreciation for artistic expression. We will also think about the impact of social media on distribution possibilities and implied audience and track how certain art forms invoke and are invoked by liberal or conservative discourses in complex ways.
Instructor(s): N. Hashem
Area: Humanities.

A reading of the major novels. Recommended Course Background: AS.060.107 or two lower level literature courses.
Instructor(s): S. Cameron
Area: Humanities.
**AS.060.364. Utopias.**

This course examines how writers have imagined perfect, or at least vastly improved, human societies from antiquity through our own day. Topics of particular interest will be the relation between individual liberty and social cohesion in utopian schemes, views on the nature of happiness and justice, and speculations about the ease or arduousness with which utopia might be created or maintained. Authors to be studied may include Plato, Thomas More, Edward Bellamy, William Morris, Charlotte Perkins Gilman, H. G. Wells, E. M. Forster, and Ursula K. LeGuin.

Instructor(s): D. Mao
Area: Humanities.

**AS.060.365. Literature and Modern Philosophy.**

Does literature have moral value? How might we begin to answer such a question? This course will survey major attempts by both writers and philosophers to understand the relation between morality and literature, especially fiction. Course will be taught by incoming professor Andrew Miller.

Instructor(s): A. Miller
Area: Humanities.

**AS.060.366. Ellison.**

After his landmark novel "Invisible Man" appeared in 1952 and won the National Book Award, Ralph Ellison was one of the most highly regarded and influential American writers. Although his writing—beginning with the powerful short stories and criticism that he published in the 1930s and 40s—was steeped in African American history, literature, music, and folklore, he also thought of himself as part of the great tradition of American, European, and classical literature, from Homer through Joyce. He quickly set to work on a second novel dealing with the assassination of a racist senator during the height of the Civil Rights movement, but he came to the end of his life in 1994 without having completed the novel to his own satisfaction. This massive book, which appeared posthumously in a very abbreviated form as Juneteenth and more recently in the much longer Three Days before the Shooting, reveals the work of a master while at the same time it leaves critics and readers with an exceptional puzzle: What would his final intention have been? Why was he unable to complete the novel? How does it speak to the key issues of African American identity, freedom, and the American ideal that Ellison grappled with all his life? At the same time that he worked on his second novel, Ellison became one of the most prolific and important essayists of the twentieth century, and wrote brilliantly about American race relations from the era of segregation through the twentieth century. Even as he was celebrated by the literary establishment, however, Ellison at times found himself as odds with younger black writers and thinkers who felt that public activism, not just artistic greatness, was required of the African American writer. Using Ellison as a lens through which to see the course of American race relations from slavery to the present, the course will include study of all of Ellison's major work: the short stories collected in "Flying Home"; "Invisible Man"; the essays collected in "Shadow and Act" and "Going to the Territory", as well as others; and "Three Days before the Shooting".

Instructor(s): E. Sundquist
Area: Humanities.

**AS.060.367. Emerson, Thoreau, Poe.**

We shall examine what "divinity," "nature," "Being in general" and "personal identity" differently mean in the writings of Ralph Waldo Emerson, Henry Thoreau, and Edgar Allan Poe, and consider the genres (essay, excursion, homocosmography, tale, and treatise) in which these authors write. Finally, taking seriously Thoreau's question --"Why do precisely these objects we behold make a world?"—we'll ask how these nineteenth-century American authors construct worlds out of their sustained visions of the intuitive (Emerson), the natural (Thoreau), and the perilous (Poe). Junior/Senior seminar. Recommended Course Background: AS.060.107 or two lower level literature courses.

Instructor(s): S. Cameron
Area: Humanities.

**AS.060.368. Aesthetic Play in the Contemporary Global Novel.**

This seminar will explore the role of aesthetic play within contemporary world literature in order to ask the question: what challenges to global issues such as imperialism, racial and identity politics, gender parity and socioeconomic disparities are being made not only through subject matter, but through novel approaches to form? We will read short stories, novels, graphic novels, and watch films which subvert expectations about the structure of storytelling: these may include works by Mohsin Hamid, Margaret Atwood, China Miéville, Haruki Murakami, J. M. Coetzee, and Marjane Satrapi. We will also read critical scholarship on the subject of world literature like Pascale Casanova's World Republic of Letters and Aamir R. Mufti's "Orientalism and the Institution of World Literatures."

Instructor(s): N. Hashem
Area: Humanities.

**AS.060.371. Major American Authors: Philip Roth.**

Over the course of his long career Philip Roth has struck a precarious balance between identification as a Jewish American novelist and insistence that his art escapes such ethnic enclosures. This tension lies at the heart of his work, as indeed some would argue it lies at the heart of the American Jewish experience of the twentieth century. Having emerged as a decidedly rebellious figure who shocked the Jewish community and the nation at large in the 1950s and 60s, Roth has written more than twenty-five novels exploring issues that range from conflicts over assimilation to the roles of the Holocaust and Israel in American Jewish life to the countercultural turbulence of the 1960s to the identity politics of the 1990s. Roth has revelled in forms of fictive autobiography—"counter-lives," "counter-plots," and counterfactual histories—that have enlarged the scope of fiction while still grappling with the tensions and dangers of modern life. Works to be read include: "Goodbye, Columbus"; "Portnoy's Complaint"; "Operation Shylock"; "American Pastoral"; "The Ghost Writer"; "The Anatomy Lesson"; "The Plot Against America"; "The Human Stain"; "The Facts"; "The Counterlife"; "Sabbath's Theater"; and "Nemesis". Requirements: two 8-10 page papers, a class presentation, and participation in discussion.

Instructor(s): E. Sundquist
Area: Humanities.
We will read major fiction by Poe, Melville, and Hawthorne, and consider how conceptions of identity are treated as psychological, philosophical, and historical problems in the writings of these authors. We will also be concerned with the formal inventions that accompany these mid-nineteenth century American investigations of personal identity, and with topics such as gothic horror; divinity; and the status of explanation. 
Prerequisites: Prereq: AS.060.107 OR one lower level English course.
Instructor(s): S. Cameron
Area: Humanities.

AS.060.373. Literary Theory.
Two great arguments structure literary criticism and theory: what makes something literature, and what makes something good literature? These arguments will surely never end; but to participate in them can be a great pleasure, and it can sharpen your appreciation of literary writing across the ages. This course will introduce you to the long conversation that has come to be called “literary theory,” with the aim of helping you learn to love not only reading literature, but describing it. Our readings will range from Plato and Aristotle to Kant, Hegel, and Schleiermacher, on to Marx, Freud, and Nietzsche, and finally to a range of recent thinkers.
Instructor(s): C. Nealon
Area: Humanities.

The rise of “creative nonfiction”, in tandem with the acceleration of “reality hunger” in recent years, has shifted scholarly attention (and book sales) in the direction of that which is perceived to be real or true rather than merely imagined or fabricated. But how fictional is “faction”, and through what narrative means is the “real” produced? If nonfiction is a journey that involves the simultaneous opening and occulting of the real, then how does travel writing stitch together its quilts of place and emplacement? These are the kinds of questions we will be asking in this course, based on readings of celebrated contemporary nonfiction writers from across the globe: Haruki Murakami (Underground: The Tokyo Gas Attack and the Japanese Psyche), Katherine Boo (Behind the Beautiful Forevers: Life, Death, and Hope in a Mumbai Undercity), Bruce Chatwin (The Songlines), Jonny Steinberg (A Man of Good Hope), Paul Theroux (The Great Railway Bazaar), and V.S. Naipaul (The Enigma of Arrival). Only open to English Major/minors and Writing Seminars Majors
Instructor(s): L. de Kock
Area: Humanities.

AS.060.375. Literature of the Holocaust.
The course will focus on reactions to, and representations of, the Holocaust in European, Israeli, and American literature. In moving from the initial response of eyewitness testimony, through the emergence of fiction as one means to test the adequacy of historical accounts and memoirs, and on to more recent reflections on the problem of adequately “remembering” the event, we will consider how the Nazi genocide has entered into world consciousness. What does it mean to have an artistic or aesthetic response to such an event? Why has the Holocaust assumed so a significant role in contemporary life that there are entire genres of literature and film devoted to it? We will also look at some more contemporary writers whose work deals indirectly with the after-effects of the Holocaust. Readings may include: Levi, Survival in Auschwitz; Borowski, This Way for the Gas, Ladies and Gentlemen; Delbo, Auschwitz and After; Kosinski, The Painted Bird; Grossman, See Under: Love; Ozick, The Shawl; Epstein, King of the Jews; Roth, The Plot against America; Appelfeld, Baddenheim 1939; Coetzee, Elizabeth Costello; Phillips, The Nature of Blood. Cross-listed with Jewish Studies.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.381. 2500 Years of Tragicomedy.
Spanning an arc from ancient Greek drama to the bleeding edge of contemporary literature, this course gathers together representative examples of a hybrid dramatic mode which has been derided by philosophers and dramatic theorists but beloved by audiences for millennia: tragicomedy. Various understood as a comic play with dark elements or a dark play with a happy outcome, tragicomedies raise challenging questions about the nature of genre taxonomy, and the slippery relationship between authorial “tone,” artistic intention, and emotional temperaments. As such, tragicomedies offer a particularly revealing insight into both the history of drama and philosophical questions about the nature of spectatorial pleasure. Grounding ourselves with a reading of Aristotle’s Poetics and a consideration of Plautus’ Amphitryon”, we will read a broad swathe of plays divided evenly between a first half which focuses upon the ancient and early modern period and a second half focusing on the last century, possibly including: Euripides “Alcestis”, Christopher Marlowe “The Jew of Malta”, Anonymous, “Arden of Faversham”, William Shakespeare “Hamlet” and “All’s Well That Ends Well”, John Fletcher “The Faithful Shepherdess”, John Dryden “The Maiden Queen”, Samuel Beckett “Endgame”, Tom Stoppard “Rosencrantz and Guildenstern Are Dead”, Harold Pinter “The Caretaker”, Joe Orton, “The Eppingham Camp”, Young Jean Lee “The Shipment.” Pre-1800 course.
Instructor(s): A. Daniel
Area: Humanities.

Although the robust presence of Jane Austen in popular culture attests to the broad historical appeal of her work, her novels are nevertheless deeply concerned with political, philosophical, and aesthetic questions of her own historical moment. In this course, we’ll read Austen in the context of the late eighteenth-century novel in order to understand how she engages with her literary predecessors. We’ll focus in particular on Austen’s innovations in narrative form and technique, innovations that led one of her early critics to claim that she constituted a “new school of fiction.” Readings by Austen will include “Northanger Abbey”, “Sense and Sensibility”, and “Pride and Prejudice” (all of which Austen conceived and began drafting in the 1790s), along with her “juvenilia.” Other readings will include works by Ann Radcliffe, Mary Wollstonecraft, Frances Burney, Charlotte Smith, and Edmund Burke. Pre 1800 course
Instructor(s): A. Grener
Area: Humanities.
AS.060.386. Narrative, the Mind, and Human Experience.
This course will explore how narratives operate as vehicles for organizing and communicating human experience. We’ll begin by examining the basic mechanics of narratives -- What makes a story a story? How do stories organize experience into meaningful sequences? -- before considering how narratives reflect patterns of human evolution and the development of consciousness. Indeed, our primary interest will be these cognitive elements of narrative; we will consider how narratives relate to the structure of the human brain, as well as their capacity to immerse us in the minds of other individuals, both fictional and real. By the end of the semester, then, you’ll not only have a better understanding of how narratives create meaning (and a robust set of terms and concepts with which to approach them), but also a heightened appreciation for how narratives relate to the architecture of your mind and your daily life. Primary texts include novels by Jane Austen, Raymond Chandler, Ford Madox Ford, Kazuo Ishiguro, and Virginia Woolf.
Instructor(s): A. Greener
Area: Humanities.

AS.060.388. Old World/New World Women.
This course considers women’s experiences in British North America during the period 1620-1773 as a three-way encounter between Europeans, Africans, and First-nations peoples of America. We will focus on three great women writers, Anne Bradstreet, Aphra Behn, and Phyllis Wheatley, supplementing their contribution to literary tradition with many sources. Pre-1800 course
Instructor(s): S. Achinstein
Area: Humanities.

AS.060.391. Early American Literature.
This course is an introduction to literatures drawn from across the Americas, although primarily the British North America colonies that would eventually become the United States, from first contact in 1492 up through the American wars of independence. Our readings are roughly organized according to chronology and genre. We will think about the adapted and emergent generic forms through which “the New World” was ongoingly invented, including genres like the Indian captivity narrative and the slave narrative that arguably make their debut in world literary history in the Americas during this time frame. We will conclude by attending to the rather late emergence of the novel in American literary history, reading four novels that appeared in the early US national period. The objective of the course is simply to contextualize and analyze a wide array of texts, each of which richly rewards the engaged reader, in order to trace the origins of American literatures. Course texts may include contact narratives (Columbus, Caminha, Smith, Hennepin); conquest narratives (Mather, Las Casas, Poma de Ayala); Indian captivity narratives (Cabeza de Vaca, Rowlandson, Staden); slave narratives (Gronniosaw, Jea, Cugoano); revolutionary polemics (Paine, Bolivar); and the earliest American novels: William Hill Brown, The Power of Sympathy; Hannah Webster Foster, The Coquette; Leonora Sansay, Secret History or, the Horrors of Santo Domingo; Charles Brockden Brown, Arthur Mervyn. Fulfills the pre-1800 requirement.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.394. Class Fictions.
This seminar investigates one of the central concerns of nineteenth-century fiction: social and economic class. Why did raising oneself from humble beginnings and falling into poverty, become such familiar stories? And why are they still so familiar today? We will look at how a number of writers approached the topic of class mobility, each with a unique blend of excitement and anxiety. Authors will likely include Jane Austen, Honoré de Balzac (in translation), Charles Dickens, and William Dean Howells. In order to understand our topic better, we will also look at a selection of theoretical work on the nature of class.
Instructor(s): J. Rosenthal
Area: Humanities.

A traveling salesman turns into a giant cockroach, an American adman switches bodies with his wife, a Brazilian philosopher may or may not be reincarnated as his beloved dog, and a British scientist creates half-animal humanoids on a secluded island. These are just a few examples of the fantastical, allegorical, comical, dreamlike, grotesque, and bizarre stories that were produced throughout the world during the modernist period. Modernism has often been associated with social and political change; colonial rule was waning, cosmopolitanism emerging, and new modes of production were affecting social organization. In literature, modernist authors broke from the realist style and turned instead to myths, folktales, and new forms of expression. In this class, we will consider a range of cultural and historical conditions that inform these stories of transformation. Do these stories reveal anxieties about dehumanization in an increasingly high-pressure workplace or do they reveal fantasies about idleness? Are they nostalgic for a local folkloric tradition in an age of cosmpolitanism or are they creating a kind of mythic universalism? How do these character transformations allow for reassessments of identity in terms of gender construction, sexuality, or in terms of human and animal relations? Authors include: Edgar Allan Poe, Nickolai Gogol, Franz Kafka, H. G. Wells, Virginia Woolf, Rebecca West, Machado de Assis, T. S. Eliot, Charlotte Gilman Perkins, Thorne Smith, and James Joyce. Throughout the semester, the primary texts will be supplemented with secondary reading and critical interpretations. Primary Texts: Machado de Assis, “Philosopher or Dog” T. S. Eliot, “The Wasteland” Charlotte Gilman Perkins, “Herland” Nikolai Gogol, “The Nose Franz Kafka, “The Metamorphosis” Ovid, selections from “Metamorphoses” Edgar Allan Poe, selections Thorne Smith, “Turnabout” H. G. Wells, “Island of Dr. Moreau” Rebecca West, “The Return of the Soldier” Virginia Woolf, “Orlando”
Instructor(s): K. Wedekind
Area: Humanities.

AS.060.397. Thomas Pynchon.
This course is a study of the fiction of Thomas Pynchon. We will likely focus on two novels, Gravity’s Rainbow (1973) and Against The Day (2009). Along the way, we will discuss Pynchon’s particular interpretation of what character should look like, what the novel’s relationship to history might be, and whether and how his writing examples something called “postmodernism.
Instructor(s): C. Nealon
Area: Humanities.
In order to log on to JHU’s GuestNet you must “agree that your activities on the Guest Network shall not...[among other things] be obscene.” But what is obscene? What does the law determine as obscene today, and how has that determination changed over the past century? These questions will lead us to considerations of publicity and privacy, morality and standards of decency. This course will examine artworks and performances in a variety of media that have been publicly accused of indecency or obscenity. We will consider legal judgments of obscenity and discuss their implications for figures such as Wilde, Joyce, Miller, Ginsberg, Bruce, Carlin, Prince, 2 Live Crew, and others.
Instructor(s): J. Chilton
Area: Humanities.

AS.060.402. The Literature of Atlantic Revolution.
This course will consider how political revolutions in the Atlantic World, from the English Civil War of the 1640s to the European revolutions of 1848, were represented and theorized in contemporary literary texts and how those revolutions in turn affected literary history. We will consider questions like: What is revolution? Can revolution be represented? How do literature and history inform each other? Texts may include: John Milton’s tracts; Thomas Paine’s writings; US and Haitian founding documents; Edmund Burke’s “Reflections on the Revolution in France”; Leonora Sansay’s novel, “Secret History, or the Horrors of Santo Domingo”; selected Hawthorne and Melville short stories; Martin Delany’s “Blake, or the Huts of America”. Pre 1800 course
Instructor(s): J. Hickman
Area: Humanities.

AS.060.408. Rising and Falling in Marlowe and Jonson.
This course considers the problem of negativity within two of the great “success stories” of English Renaissance literature: Christopher Marlowe and Ben Jonson. In praising “the sweet fruition of an earthly crown” or humbly recommending that one “keep thy shop, and thy shop will keep thee”, these authors both seem to extol tangible visions of worldly advancement. Yet each author’s work can also be read as a savage moral critique of those very ambitions and energies. What can the fierce competitions staged within the urban, masculine world of their plays and poems teach us about the lures and limits of success? Tracking their movements in and out of prison, in and out of royal favor, and in and out of critical fashion, we will read either one play or a substantial group of poems per week. Students will be asked to craft two short papers and an extended final essay. Possible texts include: “Tamburlaine”, “The Jew of Malta”, “Edward II”, “The Tragical History of Doctor Faustus”, “Sejanus His Fall”, “Volpone”, “The Alchemist”, “Catiline His Conspiracy”, “The Masque of Blackness”, and “Bartholomew Fair”. Pre 1800 course

AS.060.509. Senior Essay.
The English Department offers qualified majors the option of writing a senior essay. This is to be a one-semester project undertaken in the fall of the senior year, resulting in an essay of 30-35 pages. The senior essay counts as a three-credit course which can be applied toward the requirements for the major. Each project will be assigned both an advisor and a second reader. In addition, students writing essays will meet as a group with the Director of Undergraduate Study once or twice in the course of the project. The senior essay option is open to all students with a cumulative GPA of 3.6 or higher in English Department courses at the end of the fall term of their junior year. Project descriptions (generally of one to two pages) and a preliminary bibliography should be submitted to a prospective advisor selected by the student from the core faculty. All proposals must be received at least two weeks prior to the beginning of registration period during the spring term of the junior year. Students should meet with the prospective advisor to discuss the project in general terms before submitting a formal proposal. The advisor will determine whether the proposed project is feasible and worthwhile. Individual faculty need not direct more than one approved senior essay per academic year. Acceptance of a proposal will therefore depend on faculty availability as well as on the strength of the proposal itself. When completed, the senior essay will be judged and graded by the advisor in consultation with the second reader. The senior essay will not be part of the Department’s honors program, which will continue to be based solely on a cumulative GPA of 3.6 in English Department courses.

AS.060.606. Renaissance Comedy.
Why is comedy so easy to enjoy and so hard to think about? Is “the comic” a genre, a mode, an affective state, a social practice, or none/ all of the above? What does comedy have to do with the body? What does it have to do with social location? What historical accidents, psychological barriers and cultural taboos must be re-considered in order to address these questions? Starting from classic texts in genre theory and psychoanalysis, this course tries to put Aristotle and Freud into dialogue with recent early modern critical scholarship on affect, drama and the body. Possible texts/authors include: Aristotle’s Poetics; Sigmund Freud, Jokes and Their relation to the Unconscious; Rosalie Colie The Resources of Kind; Gail Kern Paster, The Body Embarrassed: Drama and the Disciplines of Shame in Early Modern England; Will Stockton, Playing Dirty: Sexuality and Waste in Early Modern Comedy; Julia Kristeva, Powers of Horror: An Essay on Abjection; Alenka Zupancic, The Odd One In: On Comedy, and others. The historical spine of the course will be a weekly sequence of classical and early modern comic plays by Plautus, Terence, Aristophanes, Peele, Lyly, Shakespeare, Jonson, Beaumont, Wycherley, Etheredge, and Behn.
Instructor(s): A. Daniel
Area: Humanities.
AS.060.607. Lives and Afterlives of Anti-Humanism.
This seminar will offer a preliminary history of the 20th-century critique of “humanism” -- a critique that has continued to take new forms, long after we might imagine humanism to have been laid to rest. Beginning with Heidegger and Carl Schmitt, we will spend time with Sartre, Althusser, the phenomenologists, and key post-structuralists, before moving on to the current variety of post- and anti-humanisms in philosophy (object-oriented ontology, speculative realism), and cultural and critical theory (eco-criticism and queer theory). Why has it been important to critique “humanism”? What is the ongoing appeal of making that critique?
Instructor(s): C. Nealon
Area: Humanities.

AS.060.610. What is Reading?.
What is reading? The question is not meant metaphorically. “We take for granted,” Mark Taylor writes, “our capacities to invent and interpret, and devote ourselves to exercising those capacities and publishing the results.” Yet, he continues, “It is the capacities themselves that need explaining. Reading is not giving a reading... Giving readings is important and could be done better if we understood reading.... The most amazing phenomenon our profession confronts, and the one for which we have the least explanation, is that a reader can make sense of a text, and that there are certain regularities across the individual senses made of a given text” (Taylor 19). This seminar aims to bring us close to understanding the “most amazing phenomenon our profession confronts,” drawing on recent work in cognitive psychology, history of the book, disability studies, and theories of media new and old. We will consider debates about modes of reading as different as paleography, Braille, and scanlation, and reckon with the possibility of non-human reading. I hope to invite in faculty from Cognitive Science and Informatics, Disabilities Studies, Classics and Library Science to explain what they mean when they talk about reading. But the final goal of the seminar is to help us identify the importance of literary studies in that conversation. To what extent does the literary object teach us about reading?
Instructor(s): M. Favret
Area: Humanities.

AS.060.611. Early/Modern/Violence.
This course looks at the intertwining of the categories of secular and religious in the English literature of violence in the early modern period. Literary representations of, and meditations upon, violence will be considered in Spenser, Nashe, Marlowe, Milton and Behn. Early modern thinkers will include humanists, theologians and philosophers (Augustine, Ficino, Calvin, Hobbes, Spinoza, Locke). We will consider such topics as: How religion is (or is not) a ‘transhistorical’ category; how the Enlightenment’s critique of religion was founded on the experience of the ‘wars of religion’; the creation of religious Others; the connection between religion and the rise of the modern state; the war-peace distinction; the friend-enemy distinction; how the sacredness of human life is understood; the links between violence and humanitarianism (indeed, what is the human?); torture; ‘violence’ as a transhistorical category; the pairing of violence to justice. There will be engagement with contemporary thought of Arendt, Derrida, Benjamin, Zizek, Anidjar, Asad, Tilly, Virilio, Schmidtt, Girard, Scarry, Taylor and others.
Instructor(s): S. Achinstein
Area: Humanities.

AS.060.615. The Literary and the Secular.
Embedded in many theses of secularization is an implicit process of tropologization—the sign that secularization is underway is precisely when sacred forms and contents begin to circulate as figures unmoored from their original devotional contexts and thereby become subject to everything from blasphemous parody to heterodox elaboration to blasé immanentization, in a word, to the whims of the literary imagination. This seminar will examine theories of secularization that reflect and reflect upon this tacit linkage of the secular and the literary and also trace crucial developments in the literary and intellectual history of Atlantic Romanticism (with a special focus on the distinctive genre of the American romance) that might offer alternative views of undeniable transformations perhaps ineffectively referred to the rubric of “secularization.” Secondary texts may include T.E. Hulme, “Romanticism and Classicism”; Carl Schmitt, Political Theology; Hans Blumenberg, The Legitimacy of the Modern Age; M.H. Abrams, Natural Supernaturalism; Charles Taylor, A Secular Age; Roberto Calasso, Literature and the Gods; Michael Kaufmann, “The Religious, the Secular, and Literary Studies”; Colin Jager, Unquiet Things: Secularism in the Romantic Age. Primary texts may include selected poetry of William Blake, Percy Shelley, Friedrich Hölderlin, and others; canonical theoretical definitions of the “romantic” from the Schlegels, Coleridge, etc.; Joseph Smith, The Book of Mormon; Edgar Allan Poe, Arthur Gordon Pym; Nathaniel Hawthorne, prefaces, selected tales, The House of Seven Gables, The Marble Faun; Herman Melville, Mardi; Harriet Beecher Stowe, Dred; Martin Delany, Blake or, the Huts of America.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.616. Milton.
A seminar covering the career of John Milton, including all his major poetry and much of his prose. There will be attention to the history of printing, publication and concepts of reading and writing, as well as to current issues and topics within early modern studies that bear on Milton (e.g. materialism, secularization, ‘surface’ reading, political theology, quantitative vs hermeneutic methods, actor-network theory). As such, the course will also be an introduction to various methods in early modern studies.
Instructor(s): M. Thompson; S. Achinstein
Area: Humanities.

AS.060.617. Poetry and Social Organization.
This course will consider how poets writing in English have described, imagined, and critiqued orderings of persons and institutions since the eighteenth century: texts examined will include poems, critical essays, and manifestos as well as writings in several non-literary disciplines. One matter of continuing interest will be the relationship between poems’ internal organization and the organization of societies; another will be the implications of thinking of societies as ordered or subject to ordering. Poets to be studied may include Pope, Wordsworth, Shelley, Eliot, Zukofsky, Oppen, Niedecker, Walcott, and Ronald Johnson.
Instructor(s): D. Mao
Area: Humanities.
AS.060.618. Modernism and Authenticity.
Could modernism as we know it have emerged absent anxiety about what it means really to live, really to feel, really to think? We will explore this question through a range of texts—long and short, fictional and non-fictional, poetic and in prose—by authors such as Friedrich Nietzsche, Oscar Wilde, Gabriele D’Annunzio, W. B. Yeats, T. E. Hulme, E. M. Forster, Mina Loy, T. S. Eliot, F. T. Marinetti, Gertrude Stein, Virginia Woolf, William Carlos Williams, Nella Larsen, Wallace Thurman, Walter Benjamin, Theodor Adorno, and Lionel Trilling. Topics to be considered will include decadent imposture, the attenuation of experience, enchanted and disenchanted violence, and technology-driven alienation.
Instructor(s): D. Mao
Area: Humanities.

AS.060.619. The Time is Out of Joint: Shakespearean Temporalities.
This course is designed to serve a double purpose: first, we shall read and analyze a substantial body of Shakespearean drama and poetry for its resources as a means for thinking about time, temporality, and historical change. Concurrently, we shall read and respond to debates in recent early modern literary scholarship about secularity, modernity and the problem of “presentism” as a critical orientation towards the past. If a previous critical generation enlisted Shakespeare into service as an exemplar of an incipient modernity based upon a tacit assumption of a secular bias, has that assumption been complicated by recent evidence and fresh readings? How might we rethink the relationship between religious discourse and academic periodization?
In the process of answering these questions, it is hoped that a plurality of other Shakespeares—whether medieval, untimely, recusant Catholic, crypto-atheist, queer, anachronistic, or “presentist”- might emerge. In addition to Shakespeare, possible critical and secondary authors include Augustine, Henri Bergson, Johannes Fabian, Jan Kott, Madhavi Menon, Elizabeth Freeman, Kathleen Davis, Agnes Heller, Paul Kottman, Eric Mallin, Hugh Grady and Stanley Cavell.
Instructor(s): A. Daniel
Area: Humanities.

This course offers a critical and historical introduction to the Frankfurt School.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.621. Perspectiv
Perspective, or point of view, is a seemingly inescapable term in critical work on fiction. In this course we will study this concept as it has been developed in literary studies and, contrastively, in art history and film studies. We’ll enter two overlapping areas of study, one theoretical, one critical. The first concerns the concept of perspective as developed in literary theory, art theory, and film theory; the second concerns a set of fictions, paintings, and films. Our aims will be to develop a more adequate understanding of the concept and to assess the implications of our current usage of it.
Instructor(s): A. Miller
Area: Humanities.

This seminar will be an experiment in training graduate students to develop an awareness of scholarship outside their own historical period, so as to re-think contemporary questions of periodization and modernity, as well as genre and form. The course will be organized around literary-critical readings from recent scholarship from the classical period to the 21st century, and around visits from scholars, especially junior scholars, working in those periods.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.623. Modernism and Sacrifice.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.624. Literature of the Holocaust.
The seminar will focus on reactions to, and representations of, the Holocaust in literature. In moving from eyewitness testimony and survivor memoir, through the emergence of fiction as one means to test the adequacy of such accounts or extend them into a new register, and on to more recent reflections on the problem of adequately “remembering” the event in which memory is constantly at issue, we will consider how the Nazi genocide has entered into world consciousness. Although the focus of the course will be on literature, primary readings will be studied with close attention to historical contexts as they bear on questions of authorship, representation, and reception, and to the theoretical vocabularies that have emerged from successive stages of post-Holocaust inquiry. American works will be emphasized but not the sole concern. Primary readings (all in English) will include some of the following: Elie Wiesel, “Night”; Primo Levi, “Survival in Auschwitz”; Charlotte Delbo, “Auschwitz and After”; Tadeusz Borowski, “This Way for the Gas, Ladies and Gentlemen”; John Hersey, “The Wall”; Leon Uris, “Exodus”; Jerzy Kosinski, “The Painted Bird”; Jorge Semprun, “The Long Voyage”; Imre Kertesz, “Fatelessness”; David Grossman, “See: Under Love”; Leslie Epstein, “King of the Jews”; Cynthia Ozick, “The Shawl”; Philip Roth, “The Plot against America”; and William Gass, “The Tunnel”, with various historical and theoretical works in accompaniment. Requirements: a circulated discussion paper; reports on critical/theoretical works; participation in discussion; a research paper.
Instructor(s): E. Sundquist
Area: Humanities.
AS.060.629. Poetry and Poetics after The 'Linguistic Turn'.
This seminar will canvas a few of the many developments in English-language poetry, and in poetic theory, that have emerged since the heyday of post-structuralism, on the one hand, and "language"-driven poetry, on the other. The readings will include recent critical work by Joel Nickels, Ruth Jennison, Oren Izenberg, Maria Damon, and others; the poetry will be a combination of recent volumes by contemporary writers, and individual poems.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.632. Sovereignty, Community, and 17th Century Literature.
Can we think sovereignty and community together? How might the vertical axis of sovereignty and the horizontal axis of community complicate or multiply each other? What conversations are possible when we attempt to reconcile these two contrary formations, and how does the early modern theory and practice of absolutism infect contemporary theory? In this course we will read texts from across the seventeenth century (from Shakespeare and Ford to Milton, Dryden and Behn) in which the person of the monarch, sovereign, leader or judge and the larger structural institution of sovereignty slip out of alignment with each other. We will then read early modern political texts about sovereign power and the constitution of state power and monarchical authority from Jean Bodin, James I, and Thomas Hobbes. This early modern sequence will be placed in dialogue with contemporary theorists of sovereignty and/or community: potential authors include Schmitt, Nancy, Agamben, Esposito, Derrida, Blanchot, and De Landa.
Instructor(s): A. Daniel
Area: Humanities.

This course is about the poetics of the lens and the mirror. From Wordsworth to Hardy, from Anna Barbauld to ‘Michael Field’ (the pseudonym of two women), poetry is haunted by the virtual image. Lens-made technologies, developed in the late Enlightenment, from the ‘high’ science of the telescope and microscope to the popular culture of the magic lantern and optical toys, created for a mass public for the first time a newly mobile screened image that could be thrown from one surface to another. This was a non-mimetic image made with the aid of the glass lens by light out of light. From this arose the screen practices of the phantasmagoria, diorama, panorama, kaleidoscope, and a host of optical toys exploiting visual ambiguities. The course explores the immanent presence of these in Romantic and Victorian poetry, studying poems and concurrently the documents of visual and optical theory generated by the new technologies. It includes work by male and female poets. We will consider how poets explored the philosophical implications of the poetics of the lens and a new epistemology. Technologies of the lens and mirror had repercussions across aesthetics and politics.
Instructor(s): I. Armstrong
Area: Humanities.

AS.060.642. Readings in Aesthetics.
This course offers a general survey of twentieth-century aesthetics, with particular emphasis on (but not limited to) the Interbellum (1919-1939) and its immediate aftermath. Some of the authors under consideration are: Heidegger; Levinas; Sartre; Blanchot; Bataille; Merleau-Ponty; Benjamin; Adorno; and Gadamer.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.644. The Trouble with 'Modernity.'
This course will offer some genealogies and critiques of the various modernity-theses that provide us ready-to-hand (and perhaps too easy) periodizations in the humanities. Readings will include Hans Blumenberg, Martin Heidegger, Marshall Berman, Perry Anderson, Hans-Robert Jauss, Larry Norman, Charles Taylor, and Ellen Meiksins Wood.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.646. Transnational American Studies.
This seminar will consider the "transnational turn" in American studies in particular and the humanities more generally. What, if anything, is at stake in this turn? What sort of a corrective does it mean to offer? What political fantasies drive it? Half of the course will be dedicated to reconstructing the genealogy of the turn and will involve reading primarily theoretical and critical texts. Texts may include: Wai-Chee Dimock, "Through Other Continents"; Laura Doyle, "Towards a Philosophy of Transnationalism," Eric Lott, "Anti-American Studies"; Donald Pease, The New American Exceptionalism". The other half will be dedicated to reading American literary texts that have invited or might invite transnationalist readings. Texts may include: Joel Barlow, "The Vision of Columbus"; Herman Melville, "Moby-Dick"; Martin Delany, "Blake, or the Huts of America"; Leslie Marmon Silko, "Almanac of the Dead"; Karen Tei Yamashita, "Tropic of Orange". We will ask to what extent these texts are already doing something like "transnational American studies" and how the longstanding figuration of American nationality (not just the US but other American nations) as a species of transnationality ("a nation of nations") might cause us to reconsider the cultural work of recent transnational American studies.
Instructor(s): J. Hickman
Area: Humanities.

This seminar will explore George Eliot’s major novels alongside selections from the considerable body of criticism that has grown up around her oeuvre. Topics of discussion will be determined in part by seminar participants, but we will certainly address the following: the nature of her idealism (and its relation to her realism), her long argument with religion, the tension between her larger theories of the moral life and her treatment of embedded, struggling individuals, and the larger relations among her sociological, philosophical, and existential perspectives. Eliot was a polymath, and we will need to situate her thinking and her art in relation to a wide range of continental and English sources. We will also pay special attention to the formal features of her novelistic project: the function of her narrators, the character system considered within and across the novels, the role of argument and philosophy within the works, and the particular forms of plotting and mode she employs. Novels will include "Adam Bede", "The Mill on the Floss", "Romola", "Felix Holt", "Middlemarch", and "Daniel Deronda".
Instructor(s): A. Anderson.

This course serves as an advanced introduction to the texts, issues and criticism surrounding African-American literature. In it, we will read works from the field’s major genres: the slave narrative; the novel; poetry; autobiography; the essay; and literary criticism. Authors under consideration will include: Wheatley; Du Bois; Douglass; Jacobs; Hurston; Hughes; Wright; Baldwin; Morrison.
Instructor(s): M. Thompson
Area: Humanities.
AS.060.651. Form and Matter.
This course takes a look at revived interest in formalism and materialism in critical theory as it bears on the literature of the long eighteenth century: topics include formalism and close reading from the new criticism to the present, object oriented ontologies and eighteenth-century materialisms, cognitive criticism and phenomenology.
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.652. Narrative and the Unconscious before Freud.
TBD
Instructor(s): J. Rosenthal.

AS.060.656. Literature and Philosophy, Locke to Wordsworth.
This is a class on epistemology, aesthetics, and literary form in eighteenth-century British writing. We will focus particularly on perception and look at how poetry, fiction, and the visual arts recruit and account for phenomenal experience or consider material and natural objects. We’ll ask (for example) what happens when the empirical psychology of consciousness or the categories of the sublime, beautiful, and picturesque take narrative or poetic form. Authors include Locke, Addison, Thomson, Hume, Burke, Sterne, Smith, Gilpin, Cowper, and Wordsworth, read alongside recent criticism and theory, including new work in phenomenology and the philosophy of mind.
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.662. Edwards, Emerson, Thoreau.
We shall examine what “divinity,” “nature,” “Being in general” and “personal identity” differently mean in the writings of Jonathan Edwards, Ralph Waldo Emerson and Henry Thoreau (the emphasis will be on the two nineteenth-century American writers); how “the intuitively beheld and immediately felt” (what Edwards called “experiential religion”) are contrastively understood in the writings of the three; and to what end these literary and philosophical writings marginalize persons-- and even evacuate them-- from their scrutiny. We shall also examine features of the prose (Edwards’s “rhetoric of sensation”; Emerson’s contradictions; Thoreau’s infatuation with particulars), and the genres in which the three authors write: the sermon, the treatise, the journal entry, the lecture, and the essay. Finally, we shall consider Adorno’s proposition in “The Essay as Form” that discontinuity is essential to the essay, that “the essay rebels against the doctrine, deeply rooted since Plato, that what is transient and ephemeral is unworthy of philosophy.”
Instructor(s): S. Cameron
Area: Humanities.

AS.060.663. Sacred Spaces and the Novel, 1853-1926.
This course offers both a survey of late nineteenth- and early twentieth-century prose fiction of Britain and its empire and an examination of recent scholarship on literature’s relation to religion and the geographies of modernity. We’ll begin with three Victorian novels inhabiting the convergence between historical imagination and religious inquiry (Charles Kingsley, George Eliot, Walter Pater), move on to three turn-of-the-century narratives in which the momentum of the quest confronts sacred implacability (Olive Schreiner, Joseph Conrad, Rudyard Kipling), and conclude with three novels of the 1920s propelled by pagan ecstasy (E. M. Forster, D. H. Lawrence, Sylvia Townsend Warner). Primary readings will be accompanied by critical and theoretical texts from György Lukács, René Girard, Fredric Jameson, David Harvey, Leela Gandhi, and others.
Instructor(s): D. Mao
Area: Humanities.

AS.060.665. Whitman and Dickinson.
An examination of the formal, conceptual, and philosophical innovations in the work of the two major nineteenth-century American poets. We’ll consider the premises behind Whitman’s poetry of wholes (nothing left out) and Dickinson’s poetry of fragments. How does Whitman reconcile the need for formal universals with the emotional attachment to substantive particulars? How does Dickinson find a language for the off-the-map quality of private experience?
Instructor(s): S. Cameron.

A reading of the major novels.
Instructor(s): S. Cameron
Area: Humanities.

This course takes its cue from a basic etymological kinship between “discovery” and apocalypse (ἀποκάλυψις, literally “un-covering”). How are world-building and world-ending related? What pathways join the literary and philosophical construction of new worlds with theological and theoretical scenarios of revelation, extinction, and doom? In search of answers, this course reads Renaissance narratives of cosmogony, proto-science fiction and utopian discovery alongside contemporary theories of “worlding”, environmental futurity, climate change, and planetary precarity. After commencing with Lucian and Plutarch, we will read a comprehensive sequence of early modern fictions in which utopias, new worlds and/or new planets are visited or “discovered”: Thomas More, Utopia; Robert Greene, Planetomachia; Tommaso Campanella, The City of the Sun; Johannes Kepler, Somnium (The Dream); Francis Bacon, New Atlantis; Margaret Cavendish, The Description of a New World, Called the Blazing World; Apha Behn’s translation of Fontenelle’s Conversations on the Plurality of Worlds. These early modern texts will be read alongside works in primary philosophy and contemporary eco-theory that constellate key concepts: earth, planet, and world. Texts include Martin Heidegger, Being and Time; Jacques Derrida, “Of An Apocalyptic Tone Recently Adopted In Philosophy”; Timothy Morton, Hyperobjects: Philosophy and Ecology After the End of the World; Jeffrey Cohen, Prismatic Ecology: Ecotheory Beyond Green; Ray Brassier, “The Truth of Extinction” (from Nihil Unbound); Gayatri Chakrvorty Spivak, “Planetarity” (from Death of A Discipline).
Instructor(s): A. Daniel
Area: Humanities.

AS.060.673. Migrant Modernism.
Responding to literary scholarship’s continuing concern with the exile, the refugee, the cosmopolitan, and the networks and flows of modernity, this seminar examines the migrant origins and later migrations of English-language modernism. Readings in Ezra Pound, T. S. Eliot, Gertrude Stein, Mike Gold, Claude McKay, Jean Rhys, George Lamming and other writers will be complemented by relevant critical and theoretical texts.
Instructor(s): D. Mao
Area: Humanities.
AS.060.676. Facts and Fiction.
We will examine the vexed place of facts in literature and literary criticism. What are the historical and ideological preconditions for focusing on the study of people that never existed, and events that never occurred? And how did literary criticism privilege an analysis of meaning of works or literary moments, as opposed to verifiable, and reproducible facts? What does all of this tell us about the recent rise of quantitative literary analysis, and the strong resistance it has encountered? This discussion will include an examination of how different disciplines define notions like “fact,” “argument,” and “evidence”—in order to better understand our own discipline’s principles. In addition to a selection of eighteenth- and nineteenth-century novels yet to be determined, readings will include Émile Zola, Martin Heidegger, Wolfgang Iser, Hans-Robert Jauß, Hans-Georg Gadamer, Bertolt Brecht, Georg Lukács, Fredric Jameson, Theodor Adorno, Karl Popper, Mary Poovey and Franco Moretti.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.678. Melville, Poe, Hawthorne.
A reading of the major fiction of Poe, Melville, and Hawthorne with an emphasis on Melville.
Instructor(s): S. Cameron.

This seminar will offer an in-depth examination of the theory and practice of the nineteenth-century realist novel in three traditions: American, British, and French. Our aim will be to understand the central theories and controversies surrounding realism, as well as to interrogate the centrality of realism to novel theory and narrative theory. Authors will likely include Jane Austen, Charles Dickens, George Eliot, Honoré de Balzac, Gustave Flaubert, Frank Norris, and William Dean Howells. Theorists and critics will likely include Erich Auerbach, M. M. Bakhtin, Roland Barthes, Leo Bersani, Bertolt Brecht, Richard Chase, René Girard, Howells, Roman Jakobson, Henry James, Fredric Jameson, Harry Levin, G. H. Lewes, Georg Lukács, Boris Tomaszhevsky, Ian Watt, and Émile Zola.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.681. Literary Theory.
This course will provide a survey of many of the major theoretical positions that have been directly or indirectly influential for literary studies. We will read selections from the following: Russian Formalism (Propp, Shklovsky, Bakhtin), structuralism (Levi-Strauss, Barthes), American New Criticism (Wimsatt & Beardsley, Brooks) deconstruction (Derrida, de Man), speech act theory (Austin, Butler), Marxism (Jameson), queer theory (Sedgwick, Miller), and distant reading (Luhmann, Moretti).
Instructor(s): F. Ferguson.

AS.060.682. The 21st Century University.
This seminar will focus on the changing contours of the American university in an era of economic instability and crisis. With a look back at the formative relationship between monopoly capitalism and the university in the 19th century, we will investigate the effect on the university of the unraveling of American economic power, with attention to the rise of administrative power and the loss of faculty governance, to the pressures of financialization, and to the contradictory situation into which the university is placed by student activism that calls its founding premises into question. We will also ask what intellectual life looks like under conditions of adjunctification and de-politicization. Reading will include selections from Gerald Graff, Professing English, Christopher Newfield’s Ivy and Industry and Unmaking The Public University, Benjamin Ginger’s The Fall of The Faculty, Stefano Harney’s and Fred Moten’s Undercommons, and [the x’s] The University Against Itself, as well as material produced by student and faculty activists in the university struggles of the last 5 to 10 years.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.692. Race and Enlightenment.
This course examines the philosophical interplay between Enlightenment aesthetics and the construction of the concept of race. We will read texts in aesthetics and on human difference by Rousseau, Voltaire, Condorcet, Kant, Herder, Jefferson, Burke, Hume and others, in an attempt to see the points at which reflections on art and notions of human biological hierarchy intersect. Particular attention will be paid to the idea of the sublime as it pertains to early anthropological thought.

Cross Listed Courses

**Jewish Studies Program**

**AS.193.304. Everyday Voices of the Holocaust: Popular Jewish Poetic Expression in the Ghettos and Camps.**

The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of multi-lingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multi-cultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed. Emphasis will be put on the differences and similarities between Eastern and Western European Jewry.

**German Romance Languages Literatures**

**AS.211.475. Inside the Writer’s Laboratory.**

How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the “laboratory” of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.

Instructor(s): S. Miglietti
Area: Humanities.

**AS.212.205. Winter Is Coming: Writing and Rewriting French Dark Ages.**

This course will not aim at drawing the exhaustive literary landscape of French Middle Ages, neither will it be a Comparative Literature or History class. It may be considered a gateway to French Medieval literature, given that the Modern Fantasy has obviously improved the last decades, the latter being built as a rewriting of Medieval themes and Western European folklore. Looking at texts originally written in Old French, including prose and poetry, but also at the French Medieval iconography, we will try to understand the old roots of the Modern and so popular (but sacrificing) Fantasy Literature. Basic French will be required.

Instructor(s): M. Alhinho
Area: Humanities.

**AS.212.478. Guillaume de Machaut: exploring medieval authorship in the digital age.**

Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. The course aims to give students a thorough grounding in Machaut’s literary and musical works, while also introducing them to digital tools to view and analyze original illustrated musical manuscripts of his work. Critical analysis of Machaut’s work will be assessed not only through more traditional essay writing, but also through the creation of a multimedia digital edition of a section of his oeuvre using Omeka exhibition software. The course is designed so that prior knowledge of musical notation or medieval French is necessary.

Instructor(s): T. Rose-Steel
Area: Humanities.

**AS.212.789. Literature & Identity in the Age of Globalization.**

In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.

**AS.213.317. Berlin at the Crossroads of the 20th Century.**

This course will examine the location of Berlin at the heart of European and global culture over the course of the 20th century. In addition to its centrality to German national identity and political culture, Berlin between the World Wars was a weigh station and meeting ground for a variety of languages, cultures, and artistic trends—whether expatriates, refugees, nomads, touring companies, or vagabonds. In what ways did these travelers to Berlin change German popular or intellectual culture? In what ways did Berlin function as a center for avant-garde culture, and in what sense did it remain a peripheral space, in the shadow of grander culture centers such as Moscow, Paris, New York, or Hollywood? What lessons might be taken from the supposed glamour of Berlin between the World Wars and the continued attraction of that period for post-Holocaust adaptation and contemplation? These questions, among others, will be considered with reference to a variety of narratives, dramas, and films taken from German, English, Hebrew, Russian, and Yiddish sources. Authors to be considered will include Walter Benjamin, Joseph Roth, Irmgard Keun, Erich Kästner, Bertolt Brecht, Christopher Isherwood, Sh. Y. Agnon, Vladimir Nabokov, Viktor Shklovsky, and Dovid Bergelson. All readings and discussions in English.

Instructor(s): M. Caplan
Area: Humanities.

**AS.213.318. The Making of Modern Gender.**

Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.

Area: Humanities.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women's writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Céline, Rousseau, Schlegel, Kleist, Hoffmann, Novelis, Arnim, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.332. Zionism in Modern Literature: Jewish or Israeli?.
This course will be an examination of the themes of nationalism, Zionism, and the problems of the nation-state in modern Jewish literature of the past hundred years. Among the topics we will consider are the unique challenges of a diasporic culture relocating its national aspirations to an unfamiliar and often hostile environment, the controversies surrounding political nationalism within modern Jewish culture, the competition between languages in the formation of Israeli society, the character of Israeli national culture, the relationship of Israel's Jewish majority with its minority population, and the relationship of Israeli culture to the Jewish culture of the diaspora. To what extent does Israeli literature constitute a continuum of themes and techniques found in previous Jewish writing, and to what extent does it represent a new beginning? To what extent can Israeli literature be compared with other varieties of Jewish writing and to what extent is this writing a unique cultural phenomenon? Although the majority of works discussed will be translated from Hebrew—including such leading figures of Israeli literature as S. Y. Agnon, S. Yizhar, Amos Oz, and Orly Castel-Bloom—we will also be considering works translated from Yiddish (Mendele Moykher-Sforim), German (Theodor Herzl), and Arabic (Emile Habiby), as well as contemporary American writers such as Philip Roth and Michael Chabon. All readings and discussions conducted in English.
Cross-listed with Jewish Studies, English, and the Humanities Center
Instructor(s): M. Caplan
Area: Humanities.

AS.213.660. Discourses of Dislocation.
Dislocation—travel, migration, exile, diaspora, immigration—is a preeminent symptom of the modern condition; as Jacques Derrida has suggested, it is one way of characterizing how language itself comes into being. To what extent does the relationship of various modes of mobility serve as a prerequisite for understanding modernity and literary modernism, and to what extent can one understand commonalities among these itinerant discourses? This seminar will consider various varieties of dislocated discourse (the picaresque, the pseudo-autobiography, the travelogue, as well as narratives of immigration, displacement, war and demobilization, and exile) in search of a means to discuss or consider all of them critically. Writers to be considered will include Sigmund Freud, Robert Walser, Yosef Haim Brenner, Walter Benjamin, Theodor Adorno, Jacques Derrida, Irmgard Keun, Israel Rabon, Joseph Roth, Flannery O'Connor, Yoel Hoffmann, Anton Shammas, and Salman Rushdie. All readings and discussions available in English. Undergraduates may register with instructor approval.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.666. “To be continued”*- Seriality in Literature and Other Media.
Taught in German. By ending with the words “(To be continued)” “[Ist fortzusetzen]”, Goethe’s Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. - although invented earlier - becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine “Die Gartenlaube”, Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, “The Perils of Pauline” (serial, 1914), “Copycat” (Jon Amiel, 1995), “Twin Peaks” and current US-American TV series.
Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

AS.213.725. Proto-, Modern, and Post-: Locating the –ism in Modernism.
All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “post-modernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is post-modernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhardt, André Breton, Orly Castel-Bloom, Henry Dumas, Moste Keulbak, Machado de Assis, Mendele Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.
Instructor(s): M. Caplan.

Taught in German. The course analyzes the performative on the basis of the very field that John L. Austin’s speech act theory excludes: literature. What challenges Austin’s speech act theory indeed opens up the question of the performative towards iterability and theatricality and thus calls for the performative as a methodological category of literary criticism. According to Shoshana Felman’s readings of Austin, the performative act can be accentuated as an act of the “speaking body” in which the body is conceived of not as a means of linguistic expression but rather as a spillover of the act of utterance into the statement. How then is the corporeality or materiality of writing asserted in acts of narrating and reading? The course will examine theories of the performative from the perspective of literature and literary criticism as well as analyze literary speech acts (promises, acts, etc.) in detail. Readings will include: Austin, Derrida, Felman, Freud, Nietzsche, de Man, Hamacher, Goethe, Büchner, Kafka, Henry James, Thomas Mann etc.
Instructor(s): E. Strowick
Area: Humanities.
**AS.213.789. Literature & Identity in the Age of Globalization.**
In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Area: Humanities.

**AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music Through the Ages. 3 Credits.**
The seminar explores challenging questions with which men have been dealing for centuries: how do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? By addressing literary and philosophical writings, as well as musical examples from different periods and contexts, students will be led through a critical reconsideration of the topic. A variety of materials will be discussed, including genres as different as medieval songs, early modern madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities.

**AS.214.333. Shakespeare on the Opera Stage.**
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities.

This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Area: Humanities.

**AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3 Credits.**
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

**AS.214.479. Dante Visits the Afterlife: The Divine Comedy.**
Dante’s Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante’s understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities.

**AS.214.633. Poetry and Divinity in Medieval and Early-Modern Italy.**
The late Middle Ages saw intense debates between humanists (like Petrarch and Mussato) who considered great poetry (even from pagan antiquity) to be replete with divine wisdom, and theologians who condemned poetry as mendacious and spiritually corrupting. These debates intensified in the 15th and 16th centuries, leading to important contributions by thinkers like Marsilio Ficino and Giordano Bruno, who re-conceptualized the nature of poetic inspiration and “divine frenzy.” In this course we will consider how these developments shaped both the theory and practice of poetic composition and interpretation. Discussions will be in English. Ability to read Italian is required.
Instructor(s): J. Coleman
Area: Humanities.
Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.640. Film Theory.
This class deals with film theory in its history and its current trends. We will examine structuralist, feminist, Marxist, psycho-analytic, Deleuzian, and other theoretical approaches to understanding and interpreting the cinematic medium. We will look at several different film samples from European film to Latin American Film, auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist to class during the semester.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.653. Pleasure and Virtue in Renaissance Literature.
This course will examine major literary and philosophical works from Renaissance Italy that thematize pleasure, questioning (explicitly or implicitly) its place in the hierarchy of human values. We will consider the role that the Renaissance rediscovery of Epicurean and Neoplatonic thought played in shaping how pleasure in its various forms was conceptualized and represented. Authors we will read include Lorenzo Valla, Marsilio Ficino, and Niccolò Machiavelli. Reading knowledge of Italian is required.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities.

Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non-Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study.
Taught in Spanish
Instructor(s): E. Gonzalez
Area: Humanities.
AS.215.650. Mexico and the Invention of America.
Departing from O’Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero, Humboldt, Dussel and Alzandua will conform part of the readings.
Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

This course will focus on the art of writing poetry, the art of reading poetry and the poetics of each of the poets whose work is the textual matter of the course.
Instructor(s): S. Castro-Klaren
Area: Humanities.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

The course engages close readings of Borges critical essays and some of his fiction in order to establish the points of interpellation that Postmodern theory takes from or shares with Borges’s meditation on the problem of writing.
Instructor(s): S. Castro-Klaren.

AS.215.777. The Invention of Fiction.
Rather than understand fiction as a constant in human history, this course will consider it a historically specific form of cultural expression. We will examine and compare theories of the fictional from an array of historical moments in order to better understand what fiction is, how it differs from premodern notions of history and poetry, and how it both informs and depends on modern notions of knowledge and subjective agency.
Instructor(s): W. Egginton
Area: Humanities.

In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton

Humanities Center
AS.300.111. Shakespeare and his ‘Goddess’.
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’ is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. In this course we will trace that tradition from the perspective of Shakespeare and his contemporaries, finishing the semester with several plays, including ‘The Taming of the Shrew,’ that further illustrate and problematize Shakespeare’s ‘goddess’ reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scève and Les Dames des Roches; and the later English reflections on the sonnet tradition by Sir Philip Sidney, Shakespeare, and Sidney’s niece, Lady Mary Wroth. All works will be read in translation. Freshmen only.
Instructor(s): E. Patton
Area: Humanities.

AS.300.113. Freshmen Seminar: Drama and Gender in Shakespeare’s England.
In this seminar we will read male and female authored plays and discuss how they reflect contemporary social expectations in Tudor and Stuart England. Authors include William Shakespeare; Mary Sidney, Countess of Pembroke; Christopher Marlowe; Elizabeth Cary; Ben Jonson; and Mary Sidney, Lady Wroth.
Instructor(s): E. Patton
Area: Humanities.

AS.300.211. Great Poems of the Americas.
This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot’s The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire’s Notebook of a Return to the Native Land, Vicente Huidobro’s playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of “the Americas” as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we’ll examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.
Instructor(s): R. Galvin
Area: Humanities.
This seminar celebrates the university's recent acquisition of State Papers Online (1509-1714), which contains searchable digital images of thousands of contemporary manuscripts. While we read plays, poetry, and essays by such figures as Queen Elizabeth, William Shakespeare, members of the Sydney family, Elizabeth Cary, John Donne, Aemelia Lanyer, Robert Southwell, Andrew Marvell, William Marlowe, Jane Cavendish, Elizabeth Brackley, and Katherine Philips, we will also be carrying out on-line searches of correspondences, wills, court documents, spy reports (including play-by-play accounts of houses dismantled in searches for hidden priests), and letters of condoleance from Queen Elizabeth alongside decoded messages revealing plots to unseat her. In addition to searching virtual archives students will be introduced to early modern paleography, in part through visits to Johns Hopkins University's brick-and-mortar libraries to consult actual manuscripts, incunabula, and illegal imprints from the 16th and 17th centuries.
Instructor(s): E. Patton
Area: Humanities.

This course will introduce students to some of the key texts of science fiction as the genre emerged during the nineteenth century. We will consider the intellectual contexts for the form's development in Britain, France, and the United States, as well as its emerging narrative conventions. In particular, we will consider how early sci-fi writers used non-realistic modes to dramatize problems and discoveries were at once real and yet hard to fathom within the parameters of everyday cognition: deep geological time, alternative social arrangements, post-human landscapes. Texts may include H.G. Wells' The Time Machine, Charlotte Perkins Gilman's Herland, Samuel Butler's Erewhon, Edward Bulwer Lytton's The Coming Race, William Morris' News from Nowhere, and Jules Verne's 20,000 Leagues Under the Sea.
Instructor(s): S. Lecourt
Area: Humanities.

AS.300.300. Trauma in Theory, Film, and Fiction.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald ("The Emigrants"), Lanzmann ("Shoa"), Spiegelman ("In the Shadow of No Towers"), McCarthy ("Remainder"), and others.
Instructor(s): R. Leys
Area: Humanities, Social and Behavioral Sciences.

AS.300.335. Victorian Literature as World Literature.
What does it mean to read literature in a global context? How are literary texts that we think of as products of distinct national cultures plugged into larger global systems - even if they seem unaware of it? In this course we'll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker's Dracula (1897) and Charles Dickens's Great Expectations (1861). We will retrace how literary texts that we think of as products of distinct national cultures plugged into larger global systems - even if they seem unaware of it? In this course we'll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker’s Dracula (1897) and Charles Dickens’s Great Expectations (1861). We will retrace how these books exercised cultural influence beyond the borders of Great Britain; how networks of trade, tourism, and imperial power brought authors from different cultures into contact with one another; and how Victorian texts have become a part of our culture in unexpected ways. Other primary texts may include Arthur Conan Doyle’s The Sign of Four (1890), the poetry of Romesh Chunder Dutt, and first-hand accounts of Oscar Wilde’s 1882 American lecture tour; critical readings will cover postcolonial theory, media theory, and histories of colonialism and urbanization.
Instructor(s): S. Lecourt
Area: Humanities.

Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, Beauvoir and Barthes on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it mean to acknowledge another person’s humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community? Cross listed with English.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.363. Reading Judith Shakespeare: poetry and drama by women writers in Elizabethan England (ca 1558-1650).
Virginia Woolf’s account of the thwarted career of Shakespeare’s hypothetical sister, Judith (in A Room of One’s Own) frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lanyer, Mary Wroth, and others. Students will create fictional biographies of “Judith Shakespeare” and her literary accomplishments. Cross listed with English, Theater Arts, Writing Seminars, and WGS.
Instructor(s): E. Patton
Area: Humanities.

AS.300.371. The Modernist Novel: James, Woolf, and Joyce.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century - Henry James, Virginia Woolf, and James Joyce -- who explored and exploded narrative techniques for depicting what Woolf called the “luminous halo” of life. Selected works include: “The Beast in the Jungle,” The Portrait of a Lady, Jacob's Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.408. Lyric Modernity.
A comparative literature course on modern lyric and poetics. The main issue of the course is how the lyric voice is constructed and sustained under the pressures of modernization in the United States, Europe, and Korea. We will also emphasize issues of translation and the relationship of music and poetry. Readings will include texts by Adorno, Benjamin, Grossman, von Hallberg and Waters, and poems by Dickinson, Rilke, and Kim among others. All readings available in English. Cross-listing requested with East Asian Studies, GRLL, and English.
Instructor(s): S. Rhee
Area: Humanities.
In this seminar on 20th-c. poetry of the Americas, we will explore the relations between land, language, and identity. Our point of departure, informed by de Andrade’s “Cannibal Manifesto,” will be the idea that all literary texts form a body upon which writers may feast when they compose new works. Devouring, plundering, and appropriating will be central concepts for our seminar. We’ll debate the politics of literary transculturation (hybridity/mestizaje/métissage), and discuss diasporic and multilingual U.S. American poetry (Louisiana Creole poetry, Nuyorican Poets Café, etc.). We will also investigate issues of authorship and originality; constraint, sampling, and parody; and poetic hoaxes and frauds. Readings may include theoretical texts from Édouard Glissant, Ángel Rama, Néstor García Canclini, and Roberto Schwarz, as well as Deleuze, Foucault, Kristeva, and Barthes. Poetry may be drawn from Caribbean writers Césaire, Senghor, Walcott, Brathwaite, Martí, Palés Matos; Brazilians Haroldo and Augusto de Campos; and North Americans Langston Hughes, Claude McKay, Myung-Mi Kim, Kenneth Goldsmith, Susan Howe, and Christian Bök.
Instructor(s): R. Galvin
Area: Humanities.

Interdepartmental
AS.360.133. Freshman Seminar: Great Books at Hopkins.
Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University’s rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2015 include Homer, Thucydides, Dante, Milton, Diderot, Shelley, Nietzsche, Nabokov, and Douglass.
Instructor(s): E. Patton; E. Russo; R. Bett; S. Achinstein; W. Stephens
Area: Humanities.

AS.360.246. Islamic Literature, Beloved of Western Thinkers.
This course examines political, erotic, aesthetic, and religious aspects of attraction between Western thinkers in a Christian milieu (e.g. Gide, Emerson, Thoreau) and classical works of Islamic literature (Rumi, Hafiz, Abu Nuwas, Arabian Nights).
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences.

Program in Latin American Studies
AS.361.316. Caribbean Writing in Shakespeare, V. S. Naipaul, and Alejo Carpentier.
Readings and polemics concerned with Shakespeare’s play The Tempest (1610-1611) and its postcolonial afterlives; V. S. Naipaul’s novel A House for Mr. Biswas (1961); and Alejo Carpentier’s El siglo de las luces (1962). The socio historical and political contexts of each work and authorship will be considered in depth in terms of dominant notions of writing in current critical theory. Cross-listed with GRLL, English, and Writing Seminars.
Instructor(s): E. Gonzalez
Area: Humanities, Social and Behavioral Sciences.

Center for Africana Studies
This course will explore the history and development of African American poetry from 1750 to the present (blues, rap, and hip-hop) examining the role of race, art, and cultural identity.
Instructor(s): H. Robbins
Area: Humanities, Social and Behavioral Sciences.

Study of Women, Gender, Sexuality
AS.363.302. Queer Identity?
What does “queer” mean? And who gets to say? This course examines tensions, ambiguities, and contradictions that have emerged in popular, political, and theoretical discourses over the past 25 years.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

AS.363.326. Capitalism and Gender.
This course explores a range of critical work relating capitalism to gender, sex, and sexuality: from theoretical accounts of witchcraft, marriage, and prostitution at the birth of capitalist social relations, to classic feminist debates around housework and reproduction, to contemporary thought on affect, finance, and the global dimensions of women’s labor. As a centerpiece to the course we will read sections from Capital, interrogating the place of gender in Marx’s text while developing a grasp of its arguments and influence.
Instructor(s): C. Westcott
Area: Humanities.

Program in Museums and Society
AS.389.355. Literary Culture in the Nineteenth-Century Library.
What did people actually read in the nineteenth century? What can we learn from their books and magazines? In this class, we read nineteenth-century English and American literary works and examine nineteenth-century literary objects from the collection of the George Peabody Library, to better understand the cultural and material environments within which literary works circulated. Featured writers likely to include Edgar Allan Poe, Charles Dickens, Harriet Beecher Stowe, Emily Dickinson, Mark Twain, Stephen Crane. Several field trips to the Peabody Library throughout the semester.
Instructor(s): G. Dean
Area: Humanities.

AS.389.359. Literary Archive.
This course invites students to grapple with the theory and practice of building literary archives in 19th- and 20th-century American culture. For the final project students will work collaboratively to build a digital archive and exhibit of selected materials from the JHU rare book and manuscript collections. Meets in Special Collections. Cross-listed with English. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.

AS.389.360. American Literature on Display.
Focusing on late 19th and early 20th c American literature, course examines representations of “display” within different literary genres and track how display simultaneously shapes print culture and social concerns of the period. Course culminates in the creation of a student-curated digital exhibit using archival and rare book materials to contextualize the work of the journalist, poet and fiction writer Stephen Crane. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.

AS German Romance Languages Literatures Courses

AS.210.101. French Elements I.
Provides a multi-faceted approach to teaching language and culture to the novice French student. The first semester emphasizes listening and speaking, while laying the foundation in grammar structures, reading, and writing. This course is designed for true beginners: Students with any previous background must take the placement test (http://www.advising.jhu.edu/placement_french.php) and receive below 30 (or below 200 on Webcape). Must complete both semesters successfully in order to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. Instructor(s): C. Guillemand; Staff.

AS.210.102. French Elements II.
Provides a multi-faceted approach to teaching language and culture to the novice French student. The emphasis of the course is an aural-oral proficiency without neglecting the other basic skills of grammar structure, phonetics, reading, and writing. May not be taken Satisfactory/Unsatisfactory. Recommended course background: AS.210.101 or AS.210.103. Instructor(s): C. Guillemand; Staff.

AS.210.103. Learner Managed French Elements I.
This beginner course is specifically designed for students who have had some exposure to French. They must take the mandatory placement test: http://www.advising.jhu.edu/placement_french.php, and receive between 30 and 49. They will cover the first semester of French Elements at a pace suited for "false beginners" with major online components to supplement class instruction. Must complete the year with 210.102 or 210.104 to obtain credit. May not be taken on a Satisfactory/Unsatisfactory basis.

AS.210.104. Learner Managed French Elements II.
Continuation of the refresher course AS.210.103, offered for three credits and letter grade. Recommended for self-motivated students who have some knowledge of French and wish to continue their review of the language intensively. Major online component supplements in-class instruction. Prerequisites: AS.210.101 OR AS.210.103 or appropriate test score.
Instructor(s): B. Anderson.

AS.210.111. Spanish Elements I.
This is an introductory Spanish language course. On completion of this course, the students will have acquired the basic communicative and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Greetings, University Life, Family and Leisure. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements I is the foundation for all consecutive Spanish courses. There are no prerequisites for this course. A placement exam is often required to ensure the appropriate level. Students wishing to retain credits for Spanish Elements I must complete Spanish Elements II with a passing grade. Your enrollment in Spanish Elements I will not be considered for approval until you have emailed the Spanish Language Director. Instructor(s): M. Tracy; Staff.

AS.210.112. Spanish Elements II.
This introductory Spanish language course is a continuation of the content covered in Spanish Elements I. On completion of this course, the students will have further developed the communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Food, Sports, Shopping, Travel, and Health. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements II prepares the students for Intermediate Spanish. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after 4th class session Prerequisite: AS.210.111 or appropriate webcase score. Prerequisites: AS.210.111 or appropriate webcase score. Instructor(s): M. Tracy; Staff.

Summer Abroad Program. First semester college-level Portuguese. Students will develop basic listening, speaking, reading and writing skills. Some cultural readings are included. This course is intended for program participants with little or no prior Portuguese language instruction. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.151. Italian Elements I.
This is a four-credit course, and Italian Elements II (AS.210.152) must be completed in the Spring 2014 to receive credit. The aim of the course is to provide students with basic listening, reading, writing, speaking and interactional skills in the language. All classes are conducted in Italian; oral participation is strongly encouraged from the beginning. Students wishing to retain credits for Italian Elements I must complete Italian Elements II with a passing grade. No Satisfactory/Unsatisfactory option.
Instructor(s): A. Zannirato; Staff.

AS.210.152. Italian Elements II.
Course helps students develop basic listening, reading, writing, speaking, and interactional skills in Italian. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.151 or Placement Exam Part 1.
Instructor(s): A. Zannirato; Staff.

AS.210.161. German Elements I.
Four skills introduction to German language and culture. Develops proficiency in speaking, writing, reading, and listening skills through the use of basic texts, multi-media, and communicative language activities. Online tools required. Both semesters must be completed with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. Tuesday section is a mandatory hour; choose your section based on the MWF time. Conflicts with Tuesday hour can be resolved after start of semester. Language Program Director: Deborah Mifflin. Students wishing to retain credits for German Elements I must complete German Elements II with a passing grade.
**AS.210.162. German Elements II.**
Continuation to the introduction to the German language and a development of reading, speaking, writing & listening through the use of basic texts and communicative activities. The culture of the German-language countries is also incorporated into the curriculum. May not be taken on a Satisfactory/Unsatisfactory basis. Choose your section based on MWF schedule. Tuesday hour is mandatory but flexible and conflicts with Tuesday hour can be resolved after the start of the semester.

**Prerequisites:** AS.210.161 or appropriate score on placement exam.

Instructor(s): D. Mifflin; Staff.

**AS.210.163. Elementary Yiddish I.**
Year-long course. Includes the four language skills: reading, writing, listening, and speaking, and is designed to introduce students to Yiddish culture through text, song, and film. Emphasis is placed on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Students wishing to retain credits for Yiddish Elements I must complete Yiddish Elements II with a passing grade.

Instructor(s): B. Caplan.

**Area:** Humanities.

**AS.210.164. Elementary Yiddish II.**
Year-long course that includes the four language skills--reading, writing, listening, and speaking--and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission.

Instructor(s): B. Caplan

**Area:** Humanities.

**AS.210.171. Italian Elements I for Advanced Spanish Speakers.**
Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students completing both semesters with a grade of A- or higher will be able to place into Advanced Italian I (AS.210.351)

**Instructor(s): A. Zannirato**

**Area:** Humanities.

**AS.210.172. Italian Elements II for Advanced Spanish Speakers.**
Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students successfully completing the course with a grade of A- or higher will be allowed to place into Advanced Italian I (AS.210.351)

**Prerequisites:** AS.210.171 with a grade of A- or higher.

Instructor(s): A. Zannirato

**Area:** Humanities.

**AS.210.177. Portuguese Elements.**
This one-year course introduces students to the basic skills in reading, writing, and speaking the language. Emphasis is placed on oral communication with extensive training in written and listening skills. Class participation is encouraged from the very beginning. All classes are conducted in Portuguese. Extensive language lab is required. Students must complete both semesters with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. No previous knowledge of Portuguese is required. Students wishing to retain credits for Portuguese Elements I must complete Portuguese Elements II with a passing grade.

Instructor(s): F. De Azeredo Cerqueira.

**AS.210.201. Intermediate French I.**
This course develops skills in speaking, listening comprehension, reading, and writing. Systematic review of language structures with strong focus on oral communication and acquisition of vocabulary; extensive practice in writing and speaking; readings and films from French-speaking countries. Recommended Course Background: AS.210.102 or AS.210.104 or score between 65 and 89 on Placement test I.

**Prerequisites:** Students who have taken AS.210.201 [ High Intermediate French ] are ineligible to register for AS.210.201

Instructor(s): S. Roos; Staff

**Area:** Humanities.

Focus on oral communication; develops skills in oral and written expression, listening comprehension, and reading, with extensive study of films and readings from French-speaking countries. Online component via Blackboard. Continuation of AS.210.201. Recommended course background: AS.210.201 or AS.210.203.

Instructor(s): S. Roos; Staff

**Area:** Humanities.

**AS.210.203. High Intermediate French I.**
A two-semester course offering a systematic review of language structures, conducted exclusively in French. This course is for students who can express themselves more fluently in both their written and oral work and can analyze more difficult texts than in Intermediate French. Students will study authentic texts, including film "text," and focus on their written and oral skills. Extensive reading and writing is required. Credit will not be given if previously enrolled in 210.201-202 or the equivalent. Recommended Course Background: AS.210.102 or appropriate score on Webcape exam.

**Prerequisites:** Students who have taken AS.210.201 [ Intermediate French I ] are ineligible to take AS.210.203

Instructor(s): A. Wuensch

**Area:** Humanities.
AS.210.204. High Intermediate French II.
This course is for students who can express themselves more fluently in both their written and oral work and can analyze more difficult texts than in Intermediate French. Students will study authentic texts, including film "texts", and focus on their written and oral skills. Taught exclusively in French. Credit will not be given if previously enrolled in AS.210.201-AS.210.202 or the equivalent. Recommended Course Background: AS.210.201, AS.210.203, or Webcape score between 420 and 480.
Prerequisites: Students who have taken AS.210.202 [Intermediate French II] are ineligible to register for AS.210.204
Instructor(s): A. Wuensch
Area: Humanities.

AS.210.207. German Pronunciation & Diction Practice.
One-credit course focusing on pronunciation and diction. Students will improve their accent, intonation, sentence melody, and will gain confidence while speaking and reading aloud. Individual feedback and strategies for improvement through regular audio recordings. May be taken Satisfactory/Unsatisfactory. Not for major/minor credit.
Prerequisites: AS.210.161 or above
Instructor(s): D. Mifflin; Staff
Area: Humanities.

This 5-week intensive course will cover the material of Intermediate French II. Through examining excerpts of popular French theater plays (by Camus, Sartre, Feydeau, Ionesco, and others), this class proposes to 1) improve French speaking and writing skills (pronunciation, intonation, vocabulary, syntax, argumentative reasoning, creative writing) 2) understand the linguistic nuances and socio-cultural practices expressed in the texts 3) learn the basic tools of acting (body language, vocal projection, physical expressivity, emotional expression, stage direction, improvisation, etc.). The course will include watching filmed representations of plays, as well as a performance at the end of the term. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based exercises.
Prerequisites: AS.210.201 or AS.210.205 or appropriate placement.
Instructor(s): K. Haklin
Area: Humanities.

This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of "word games" (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. May be taken concurrently with AS.210.205 or AS.210.305.
Instructor(s): B. Anderson; Staff
Area: Humanities.

This 5-week intensive course will cover the material of Intermediate French I with an emphasis on listening comprehension and speaking: an attractive selection of classic and contemporary French movies (Les Intouchables, Manon des Sources, La Vie en rose, Sugar Cane Alley, among others) will enhance students' acquisition of the language and will deepen their understanding of French and francophone cultures. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based grammar followed by group discussion on the movies. Creative role-play activities will develop students' fluency.
Prerequisites: AS.210.102 or appropriate placement; placement exam link available at grll.jhu.edu
Instructor(s): C. Guillemand
Area: Humanities.

AS.210.211. Intermediate Spanish I.
Intermediate Spanish I is a comprehensive study of Spanish designed for students who have attained an advanced elementary level in the language. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish I will prepare students for the next level of Spanish (Intermediate Spanish II). May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.
Prerequisites: AS.210.112 or appropriate placement exam score.
Instructor(s): B. Weingarten; Staff
Area: Humanities.

AS.210.212. Intermediate Spanish II.
Intermediate Spanish II is a comprehensive study of Spanish designed for students who have attained a mid-intermediate level in the language or who have completed Spanish 212. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish II will prepare students for the next level of Spanish (Advanced Spanish I). May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.
Prerequisites: AS.210.211 or appropriate webcape score.
Instructor(s): B. Weingarten; Staff
Area: Humanities.

AS.210.250. Program Abroad: Objective Portuguese - Level II.
Summer Abroad Program. Third semester college-level Portuguese. Students develop basic listening, speaking, reading and writing skills. Cultural readings included. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.177 & 210.178. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira.
AS.210.251. Intermediate Italian I.
Taught in Italian. Course continues building on the four essential skills for communication presented in Italian Elements courses (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken Satisfactory/ Unsatisfactory.
Prerequisites: AS.210.152 or placement exam
Instructor(s): A. Zannirato; L. Proietti; Staff
Area: Humanities.

AS.210.252. Intermediate Italian II.
Taught in Italian. Course continues building on the four essential skills for communication presented in Intermediate Italian I (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken Satisfactory/ Unsatisfactory.
Prerequisites: AS.210.251 or appropriate placement exam scores (Parts I/II).
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.261. Intermediate German I.
Taught in German. This course continues the same four-skills approach (speaking, writing, reading, and listening) from the first-year sequence, introducing and practicing more advanced topics and structures. Expansion and extension through topical readings and discussion and multi-media materials. Online tools required. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.162 or placement by exam.
Instructor(s): H. Wheeler; Staff
Area: Humanities.

AS.210.262. Intermediate German II.
Taught in German. This course is designed to continue the four skills (reading, writing, speaking and listening) approach to learning German. Readings and discussions are topically based and include fairy tales, poems, art and film, as well as readings on contemporary themes such as Germany’s green movement. Students will also review and deepen their understanding of the grammatical concepts of German.
Prerequisites: AS.210.261 or placement exam.
Instructor(s): H. Wheeler; Staff
Area: Humanities.

AS.210.263. Intermediate Yiddish I.
This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.164 or equivalent, or two years of German and permission of instructor.
Area: Humanities.

AS.210.264. Intermediate Yiddish II.
Continuation to Intermediate Yiddish I. This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.263 or instructor permission.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.266. German Conversation.
This course is designed for intermediate and above students who wish to improve their conversational and oral presentational language skills. The syllabus aims to provide useful, relevant language and necessary discourse structures to hold conversations and presentations on varied topics of an everyday, as well as academic nature. Students will practice German to build confidence, develop fluency, and improve pronunciation and accuracy. Short texts, audio and films will provide the basis for discussion. Students’ fields of study and interests will be incorporated into the syllabus and tasks will be matched to the ability level of the students enrolled. Recommended Course Background: AS.210.262 or two years of college German or equivalent. May be taken concurrently with other courses in German. May be taken Pass/Fail. Not for major or minor credit.
Instructor(s): D. Mifflin.

More advanced training in the skills of the language with emphasis on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. All classes are conducted in Portuguese. Extensive language lab is required. May not be taken on a Satisfactory/Unsatisfactory basis.
Prerequisites: AS.210.178 or instructor approval.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

This course is conducted entirely in Portuguese. Emphasis is placed on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. Lab work required.
Prerequisites: Prerequisite: AS.210.177 AND AS.210.178 or placement test.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

This course is designed for highly motivated undergraduate and graduate students who want to SPEAK Portuguese. Conversation sessions provide intensive work on communication skills through discussion on issues raised in films, news media & music. Grammar will be reviewed as needed outside of class with tutors or TA, freeing class time for more communicative activities. May not be taken on a Satisfactory / Unsatisfactory basis. Recommended Course Background: one semester of Portuguese (AS.210.177), or Placement test.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.301. Advanced Writing and Speaking in French.
This very interactive third-year language course proposes, in the shape of animated class discussions, to 1) read fictional and non fictional texts through the French explication de textes approach 2) review and develop grammar and conjugation skills and 3) learn an array of new vocabulary as well as idiomatic expressions used in everyday speech. Focus will be placed on improving language skills through an individualized review of grammar and vocabulary. Language Program Director: Kristin Cook-Gailloud
Instructor(s): A. Labat; K. Cook-Gailloud; L. Carliou; Staff
Area: Humanities.
AS.210.302. Advanced Writing and Speaking in French II.
Designed to further reveal the most fascinating and fearsome features of both written and spoken French, this unconventional course takes into account the unique profile of Johns Hopkins’ undergraduates by addressing their ability to generate powerful and new ideas. To that effect, this course proposes to involve students directly in the process of learning and assessing by raising participatory questions such as “What is the best way to learn this grammar point? What type of test will actually allow me to learn the material so I don’t forget it the next day? How can I move towards fluency without feeling discouraged?” In full knowledge of our students’ ability to analyze and explore these questions, but also of the exceptionally high challenges they face today, this experimental, self-reflective course endeavors to get rid of needless (and unproductive) stress, and invite them to take pleasure in discovering how to better learn and master the French language.
Instructor(s): A. Wunsch; B. Anderson; Staff
Area: Humanities.

AS.210.306. Medical French.
This interactive course is designed to provide students with specific linguistic tools used in medical and public health fields, as well as a comprehensive understanding of health care systems in the French and francophone world. Through a wide range of media (newspaper articles, scenes from TV series, excerpts of historical and literary texts) and group discussions, we will focus on topics such as physical and mental health, consultation and diagnosis, hospitalization, specialized fields (epidemiology, neurology, psychiatry, etc.) and deontology.
Prerequisites: Prereq: AS.210.201 OR AS.210.202 or equivalent or permission (kacg@jhu.edu)
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.210.309. The Sounds of French.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of "word games" (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. Recommended Course Background: AS.340.101-AS.340.102 or equivalent; AS.210.301 (may be taken concurrently).
Instructor(s): B. Anderson; Staff
Area: Humanities.

AS.210.311. Advanced Spanish I.
This course is a comprehensive study of the Spanish language focused on the continuing development of students’ communicative abilities and their knowledge of Hispanic cultures. Students will expand their use of basic structures of Spanish with a special emphasis on more difficult grammatical and vocabulary aspects, and further improve both their oral and written skills. Students will sharpen their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component with class participation and three exams. Upon successful completion of this course, students will have acquired extended complex language tools that facilitate proficiency in Spanish and its use in various professional contexts. May not be taken satisfactory/unsatisfactory. New enrollments permitted after September 13th.
Prerequisites: AS.210.212 or AS.210.213 or appropriate placement exam score.
Instructor(s): A. Hubbard; Staff
Area: Humanities.

AS.210.312. Advanced Spanish II.
This course is thorough review of the Spanish language focused on the development of students’ communicative abilities and their knowledge of Hispanic cultures. Students will both expand their knowledge of the basic structures of Spanish, with special emphasis on more difficult grammatical and vocabulary aspects, and further improve on oral and written skills. Students will increase their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired more complex language tools to become proficient in Spanish and its use in various professional contexts. May not be taken satisfactory/unsatisfactory. New enrollments permitted after September 13th.
Prerequisites: AS.210.311 (Advanced Spanish) or appropriate placement exam score.
Instructor(s): A. Hubbard; Staff
Area: Humanities.

AS.210.313. Medical Spanish.
Medical Spanish is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in medicine and health-related fields in Spanish-speaking environments. The student will be able to participate in conversations on topics such as contrasting health systems, body structures, disorders and conditions, consulting your doctor, physical and mental health, first-aid, hospitalization and surgery on completion of this course. In completing the course’s final project students will apply, synthesize, and reflect on what has been learned in the class by creating a professional dossier individualized to their professional interests. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.
Prerequisites: 210.311 (Advanced Spanish I) or appropriate webcape score
Instructor(s): M. Ramos; Staff
Area: Humanities.
Students will increase their vocabulary and practice grammar structures closely related to trade and business practices in the public and private sectors. All language skills are equally emphasized. Highly recommended to students majoring in Business and International Relations. There will be an intensive online component. No Satisfactory/Unsatisfactory option. Students will increase their vocabulary and practice grammar structures closely related to trade and business practices in the public and private sectors. All language skills are equally emphasized. Highly recommended to students majoring in Business and International Relations. There will be an intensive online component. No Satisfactory/Unsatisfactory option. Language Program Director: Loreto Sanchez-Serrano
Prerequisites: AS.210.311 or appropriate S-Cape score
Instructor(s): M. Ramos; Staff
Area: Humanities.

AS.210.315. Spanish for International Relations.
Spanish for international relations is an advanced examination of grammar and an analysis of international relations' topics in Spanish. By completion of this course the student will have developed the ability to read, critically discuss and demonstrate mastery of political and socio-economic issues in Spanish-speaking environments. Potential topics include a survey of the professions in international relations, NGOs in Latin America, intellectual property, cultural diplomacy, remesas, regional coalitions and treaties, and the environment. Class presentations and final projects will allow students to apply, synthesize, and reflect on what has been learned in the class by participating in a global simulation that will include a written exercise individualized to their own personal musical interests. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session. Co-listed with AS.211.319
Prerequisites: AS.210.311 or appropriate placement exam score.
Instructor(s): M. Ramos; Staff
Area: Humanities.

AS.210.316. Conversational Spanish.
Conversational Spanish surveys high-interest themes, discusses short films by contemporary Hispanic filmmakers and offers a thorough review of grammar. The student will be able to participate in conversations on topics such as personality traits, social media, political power, art and lifestyles on completion of this course. Conversational skills mastered during the course apply to all careers interconnected by Spanish. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.
Prerequisites: AS.210.311 (Advanced Spanish I) or appropriate placement exam score.
Instructor(s): M. Ramos; Staff
Area: Humanities.

This third-year course is a hands-on and process-oriented introduction to discussion and compositional analysis. On completion of this course, students will have improved their Spanish writing skills in various types of compositions they might be expected to write in academic settings and in real-life formats such as film reviews, letters to the editor, cover letters, etc. The course also focuses on refinement of grammar and vocabulary use. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.
Prerequisites: AS.210.312 or appropriate placement exam score.
Area: Humanities.

¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instills vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. In completing the course's final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session. Co-listed with AS.211.319
Prerequisites: AS.210.311 or appropriate placement exam score.
Instructor(s): M. Ramos
Area: Humanities.

AS.210.350. Program Abroad: Objective Portuguese - Level III.
Summer Abroad Program. Fifth semester college-level Portuguese. Students further improve conversation and comprehension proficiency. Develop reading and writing skills through literary analysis and grammar review. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.277 & 210.278. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.351. Advanced Italian I.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons and interdisciplinary, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. Year course; must complete both semesters for credit. No Satisfactory/Unsatisfactory option. Language Program Director: Alessandro Zannirato
Prerequisites: AS.210.252 or placement exam
Instructor(s): A. Zannirato; Staff
Area: Humanities.
AS.210.352. Advanced Italian II.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons, interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.351 or appropriate placement exam scores (Parts I, II and III).
Instructor(s): A. Zannirato; Staff
Area: Humanities.

AS.210.361. Advanced German I: Cultural Topics of the Modern German-speaking World.
Taught in German. Topically, this course focuses on defining moments in cultural history in German speaking countries in the 2nd half of the 20th century. Films, texts and other media provide a basis for discussing events in post-war Germany from 1945 to 1989. A review and expansion of advanced grammatical concepts and vocabulary underlies the course. Focus on improving expression in writing and speaking. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.262 or placement exam.
Instructor(s): D. Mifflin; Staff
Area: Humanities.

Taught in German. Topically, this course focuses on contemporary issues such as national identity, multiculturalism and the lingering social consequences of major 20th century historical events. Readings include literary and journalistic texts, as well as radio broadcasts, internet sites, music and film. Students read a full-length novel. Emphasis is placed on improving mastery of German grammar, development of self-editing skills and practice in spoken German for academic use. Introduction/Review of advanced grammar.
Prerequisites: AS.210.361 or equivalent score on placement test.
Instructor(s): D. Mifflin; Staff
Area: Humanities.

Taught in German. Course is designed to familiarize students with the vocabulary and standards for doing business in Germany. Taking a cultural approach, students read texts and engage in discussion that elucidate the works of business, commerce & industry in Germany, the world’s third largest economy. Emphasis is placed on vocabulary expansion and writing as it relates to business.
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362.
Instructor(s): H. Wheeler; Staff
Area: Humanities.

Taught in German. This course is designed to provide language training in German tailored to students of science & engineering. Germany has long been a world leader in engineering, most notably in chemical and mechanical engineering. Over the past decades, Germany also has taken a lead in environmental sciences and information technology. In addition, Germany is now becoming an increasingly attractive place to pursue degrees in the technical fields. This course will provide practice and expansion in all language skill areas: analysis of texts, hands-on-activities, preparation of presentations, and discussion of topics. Specific areas of interest to the course members will be taken into consideration for the selection of materials. [Does not replace 210.362 as prerequisite for upper level courses or as major requirement.]
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362 OR EQUIVALENT OR PLACEMENT EXAM
Area: Humanities.

This course will provide students who have completed at least two years of Yiddish with the opportunity to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.368. Advanced Yiddish II.
Continuation of Advanced Yiddish I (AS.210.367). Students will continue to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Prerequisites: AS.210.367
Area: Humanities.

AS.210.369. Yiddish Texts I.
This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing).
Prerequisites: AS.210.368 or permission of instructor.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.370. Yiddish Texts II.
Continuation of Yiddish Texts I. This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing). Recommended Course Background: Yiddish Texts I or permission of the instructor.
Instructor(s): B. Caplan
Area: Humanities.
AS.210.371. From the yidishe gas to the Yiddish Farm: Yiddish Identity and Yiddish Community.
In premodern Ashkenaz, the vernacular Yiddish was an important factor maintaining a distinct Jewish communal identity. With the advent of modernity, and the abandonment of Yiddish by some Jews as their daily language, the choice to speak Yiddish and to use it as a vehicle of modern cultural production became a distinct strand in the web of new Jewish identities. In this course, students will develop a sociolinguistic understanding both of the place of Yiddish in premodern Jewish society, and ways in which the language was -- and is -- seen as essential to living a Jewish life in the modern world. Since this is an advanced language course, readings, discussion and written work will be in Yiddish. Grammar will be reviewed as necessary, according to the needs of the students.
Instructor(s): B. Caplan
Area: Humanities, Social and Behavioral Sciences.

This course will allow students with advanced Yiddish language skills to design their own reading list, in consultation with the instructor, in order to deepen their understanding of an area of Yiddish culture of special interest while at the same time continuing to improve their language skills. Texts may include literary works, scholarship, the press, and archival materials. All discussion and written responses will be in Yiddish.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.391. Advanced Portuguese Language & Literature I.
This third-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read one or two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. Lab work is required. All classes are conducted in Portuguese.
Prerequisites: AS.210.278 or instructor approval.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.392. Advanced Portuguese: Language and Literature II.
This course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read several works by major Brazilian, Portuguese, and/or Afro-Portuguese writers, followed by intensive writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. The course is conducted entirely in Portuguese. No satisfactory/unsatisfactory.
Prerequisites: AS.210.391 or equivalent score on placement test.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.405. Teaching French in Public School-Community Based Learning.
A Community-Based Learning (CBL) language course for upperclass students that: 1) establishes a mutually beneficial relationship between JHU students, a neighboring Elementary School, and their common community; 2) combines academic components (linguistic, pedagogical and social) with the experiential work with the community partner as a way to reinforce learning. Students participate in weekly meetings in French on campus to prepare for their classes and teach twice a week to 2nd, 3rd, or 4th graders at the Elementary school. Recommended course background: AS.210.301 or AS.210.302.
Area: Humanities.

AS.210.411. Translation for the Professions.
Spanish Translation for the Professions surveys the field of contemporary translation theory and provides practice of translation from English to Spanish. Translation exercises may include comparing and contrasting texts of literature, medicine, health, law, technology, politics, and journalism. Students will identify and differentiate terminology specific to these various fields and will focus on practicing correct uses of the grammatical structures relevant to the translation of both English and Spanish. In the course's final projects students will apply, synthesize, and reflect on what has been learned in the class by completing a translation exercise individualized to their professional interests. Strategies of communication mastered in this course will help students of Spanish throughout their careers, in that achievement of the course objectives will help students discern, translate, and evaluate the usefulness of translations in different professional settings. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.
Prerequisites: Prereqs: AS.210.313 OR AS.210.314 OR AS.210.315 -
Instructor(s): M. Ramos; Staff
Area: Humanities.

AS.210.412. Spanish Language Practicum-Community Based Learning.
This fourth-year course involves a specially designed project related to the student’s minor concentration. On completion of this course, the student will be able to use the Spanish language in real world contexts. The student-designed project may be related to each student’s current employment context or developed in agencies or organizations that complement student’s research and experimental background while contributing to the improvement of his/her language proficiency. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.
Prerequisites: AS.210.411
Instructor(s): L. Sanchez
Area: Humanities.

AS.210.413. Curso de Perfeccionamiento.
This fourth-year course is an in-depth examination of the Spanish grammar, including a wider range of idiomatic expressions and usages than students might have previously encountered. On completion of this course, students will be able to achieve the ACTFL Advanced-Mid to high level in oral and written expression as well as in reading and listening skills. The course will also help to prepare students for the DELE Intermediate or Superior levels, offered by the Instituto Cervantes. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session.
Prerequisites: ( AS.210.311 AND (AS.210.312 OR AS.210.317)) AND ( AS.210.313 OR AS.210.314 OR AS.210.315)
Instructor(s): L. Sanchez
Area: Humanities.

This interactive, writing intensive course places emphasis on: 1. Building linguistic tools that will help students reach the highest level of proficiency (advanced lexical, stylistic and idiomatic expressions, linking expressions used in complex sentences, stylistic and grammatical differences between French and English) 2. Enhancing analytical skills through French “Explication de textes” (close reading method) 3. Developing individual style through creative writing
Instructor(s): K. Cook-Gailloud; Staff
Area: Humanities.
AS.210.450. Program Abroad: Objective Portuguese - Level IV.
Summer Abroad Program. Emphasis on the development of communication skills: the ability to comprehend both written and spoken texts, admit speak, read, and write in Portuguese with native-like proficiency. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira.

This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts, and recognize implicit meaning, 2) produce clear, well-constructed, detailed texts on complex subjects 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option. Recommended Course Background: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Prerequisites: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Instructor(s): A. Zannirato.

AS.210.462. Introduction to German Literature & Culture, 1900 - 1945.
This course is designed to introduce students to the analysis literary and cultural topics. A variety of 20th century texts and visual media will form the basis for discussion of literature and cultural phenomena specific to the time period. This semester will focus on the European capitals of Zurich, Vienna, and Berlin, thereby offering a "European" perspective on literary, cultural, and political events after 1900. Continuities between and differences amongst the three German speaking countries will be investigated. Attention is given to improving student writing. Readings, discussion, and written assignments in German. Recommended Course Background: AS.210.361-AS.210.362
Area: Humanities.

Instructor(s): K. Cook-Gailloud.

Instructor(s): K. Cook-Gailloud; Staff
Area: Humanities.

AS.210.541. Italian Independent Study-Language.
Prerequisites: AS.210.252 or higher or placement exam score Parts 1 and II.
Instructor(s): A. Zannirato
Area: Humanities.

Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

Instructor(s): D. Mifflin
Area: Humanities.

Required for all in-coming teaching assistants in the Department of German and Romance Languages, this course involves a series of workshops which will focus on an overview of the tenets of second language acquisition (SLA) and the research which informs current teaching practice. Students will both study the current state of the L2L profession and look at different methods and techniques for effective second language teaching and learning. The focus of the course will be on the practical applications of the theoretical foundation. This is a full year course meeting 6 times per semester.
Instructor(s): A. Zannirato; D. Mifflin; L. Sanchez
Area: Humanities.

The goal of this course is 1) to familiarize students with different theoretical and practical approaches of language teaching and learning and 2) to understand how these approaches can be used to create a rich learning environment. Participants are expected to engage actively in classroom discussions based on assigned readings, as well as observe classes taught by other instructors in their department. Required for all in-coming teaching assistants in the French section.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.210.615. Adquisicion del espanol como segunda lengua.
This course will aim to clarify for future teachers the important aspect of the Spanish language syntax, related to cultural aspects, second language acquisition, issues of technology and assessment to prepare them for the task they will face in their own language classes. The course will include a review of several topics of Spanish grammar, concepts of second language acquisition and applied linguistics. The course also will help to prepare students for the DELE Superior level offered by the Instituto Cervantes if they opt to take it.
Instructor(s): L. Sanchez
Area: Humanities.

This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts and recognize implicit meaning, 2) produce clear, well-constructed, detailed texts on complex subjects, 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option. Students should have a satisfactory GTA language diagnostic exam score.
Instructor(s): A. Zannirato.
AS.210.661. Reading and Translating German for Academic Purposes.
Taught in English. This is the first semester of a year-long course designed for graduate students in other fields who wish to gain a reading knowledge of the German language. Seniors who intend to do graduate study in other disciplines are also welcome. Instruction includes an introduction to German vocabulary and grammatical structures as well as discussion of relevant translation practices. The goal of the course is for students to gain confidence in reading a variety of texts, including those in their own fields of study. No knowledge of German is assumed. Seniors & Graduate students only.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.662. Reading & Translating German for Academic Purposes II.
Taught in English. Seniors & Graduate students only. This course is designed for graduate students in other departments who wish to gain reading knowledge of the German language and translation practice from German to English. This course is a continuation of the Fall semester. Focus on advanced grammatical structures and vocabulary. For certification or credit.
Prerequisites: AS.210.661 or permission of instructor.
Instructor(s): H. Wheeler; Staff
Area: Humanities.

AS.210.700. German Language Teaching Practicum I.
Provides methodological and practical support and oversight for graduate student instructors teaching Deutsch als Fremdsprache in the American university context. Two-semester sequence, includes orientation during the week before semester begins. Required for German Graduate Teaching Assistants in the first year of their teaching in the program.
Instructor(s): D. Mifflin.

AS.210.701. German Language Teaching Practicum II.
Required for German Graduate Teaching Assistants in the first year of their teaching in the program. Second semester of a two-semester sequence.

AS.211.104. Freshman Seminar: Weimar on the Pacific: German Exile Culture in the United States.
Freshmen seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.

AS.211.174. Media of Propaganda.
Today, promoting a particular political or personal point of view is not viewed as “propaganda,” but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term “propaganda” will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current Facebook nation.
Area: Humanities.

This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.205. Cosmic Imagination from Dante to Borges.
Since time immemorial humankind has looked to the skies for clues as to our origins, our destiny, and the nature of existence itself. In some ways, one of the hallmarks of western science has been a story of viewing the cosmos in ever greater clarity and detail. Yet the very nature of the universe—its massive size, the distance and obscurity of its farthest reaches—requires the active intervention of our imaginations to picture it, no matter how powerful the technologies we use. In this course we will look at how western cultures from the middle ages to the present have deployed the imaginative tool of literature to try to grasp the ungraspable, and how those attempts in some cases helped prepare intellectuals and scientists to make very real advances in understanding the universe.
Instructor(s): W. Egginton
Area: Humanities.
AS.211.207. Waves of Feminism through Film and Media.
This course will examine the movements known as second- and third-wave feminism as expressed in film and other media since the 1950s. Second-wave feminism—influenced in part by the French philosopher Simone de Beauvoir but driven by social and economic factors in the US and the post-war, industrialized west—departed from the practical exigencies of suffrage that drove the first wave before it and became concerned with defending the identity of women from being defined in terms of patriarchal norms. From popularized images of working women in US television series to the formalist experimentation of the France’s New-Wave in cinema, the media of the sixties and seventies absorbed and explored many of second-wave feminism’s central themes and critiques. Largely a critique of the perceived Euro-centrism of the second wave, third-wave feminism, coined in the early nineties, focused on the experience of women of color and those from the developing world who did not share the relatively privileged backgrounds of their predecessors. The second part of the course will examine how film and media since the nineties has incorporated and reflected this new inclusiveness, and striven to tell stories of women from a broad spectrum of backgrounds. We will take advantage of the visit to Hopkins by acclaimed media artist Sharon Hayes to examine how her own media practice has been shaped by successive waves of feminist thought and has in turn affected feminism. Other works will include the films of Agnès Varda and Shirin Neshat.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.209. DADA! Avant-Garde Exorcism.
This course surveys the Dada art and literature movement of the early 20th century in Zurich, Berlin, Paris, and New York. This course compares the visual, performative, and literary arts of Dada through both primary and secondary sources in order to further understand the political and aesthetic theories of this school of thought and their interactions with their unique historical moment, so dominated by mechanization, brutality, and war.
Instructor(s): J. Pelcher
Area: Humanities.

Among the organs of the human body the breast has a special place. A marker of sex, of eroticism, of life, motherhood, even the distinction of the mammalian class of vertebrates, the breast carries as much meaning for humanity as it does vital function. The breast, in other words, is a sign and site where Western culture believes life as such to be situated. Sadly, it is also vulnerable to its virulent and deadly form of what has been recently termed “the emperor of all maladies”: cancer. The loss of the breast can provoke a form of “castration anxiety.” This course will explore the history of the breast as symbol of sex and life, along with the cancer that affects it not merely as a medical condition, but as a powerful symbol in culture, art, and literature.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.214. Writing & Thinking About Food.
How do you write about food? Is it possible to describe taste? What role does gastronomy have in literature? Taking advantage of the popularity of “foodie” movement and recent scholarly interest in the role of food in culture, this course considers these questions by examining a wide variety of genres from a comparative perspective. Authors include Epicurus and his commentators, Proust, Brillat-Savarin, Shakespeare, Byron, Cervantes, Neruda, Ferran Adrià, Carolyn Korsmeyer and others.
Instructor(s): A. Sheeran
Area: Humanities.

AS.211.221. Italian Matters Italian Manners.
This is an introductory course to Italian culture relying on a tradition of books of conduct including the Middle Ages, the Renaissance, and today.
Instructor(s): P. Forni
Area: Humanities.

AS.211.225. Inverted Worlds: Topsy-Turvy Perspectives.
This course will examine the concept of the inverted world in art, literature and philosophy. It will focus on the aesthetic forms and ideas most closely associated with the overturning of values. Satire and parody make a mockery of existing institutions and cultural norms. At the same time they claim to provide an insight into the modern human condition. Thus, in this course, we will analyze modernity adopting the lens of the inverted world in order to see what needs to be turned upside down in order to be right side up again.
Instructor(s): E. Edelmann
Area: Humanities, Social and Behavioral Sciences.

AS.211.228. Filming Change: French Society through Documentary.
Since the 1960s France has gone through radical changes impacting all aspects of social life, such as race/class dynamics, union/workplace politics, and gender relations. Filmmakers, specifically those working in a documentary mode, have confronted contemporary events in their complexity and offered some of the most compelling accounts of them. This course will introduce students to the recent history of French documentary film, focusing on its capacity to reflect and to fuel social and historical change. Films by Rouch, Varda, Resnais, Marker, Depardon.
Instructor(s): C. Benaglia
Area: Humanities, Social and Behavioral Sciences.
AS.211.235. Panorama of German Thought I.
Taught in English. German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition are Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed the study of cultural, historical, and social phenomena as well as of literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This two-semester survey course will highlight important topics of German Thought, e.g. the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. While the first semester (Fall) covers until 1850 (from Luther to Hegel/Kierkegaard), the second (Spring) focuses on Modern German Thought after 1850 (from Marx to Luhmann). Meets with AS.213.235
Instructor(s): E. Strowick
Area: Humanities.

AS.211.236. Panorama of German Thought II.
Panorama of German Thought from Nietzsche to Habermas. Course will examine major thinkers in nineteenth and twentieth-century German thought with emphasis on the response to Enlightenment philosophy, the critique of reason, the questions about the autonomy of the subject and the search for new individual and collective identities. Reading will include traditional philosophical texts (Nietzsche, Cassirer, Heidegger, Adorno, Habermas) as well as works in anthropology (Gehlen, Scheler), sociology (Simmel, Weber), psychology (Mach, Freud), political theory (Marx, Schmitt) and aesthetics (Benjamin, Warburg, Panofsky). This course is a continuation of Panorama of German Thought I, though the first semester is not a prerequisite for the second. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.211.237. Literature and Medicine.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s “In the Cold” and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: “Philadelphia” (Jonathan Demme, 1993), “Melancholia” (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.

AS.211.253. Freshman Seminar: Why is the Fiddler on the Roof?: The Shtetl in Modern Jewish Culture.
The most familiar portrayal of the shtetl for an American audience is the setting of the Broadway musical Fiddler on the Roof, where the shtetl, or market town, is a bastion of traditional Jewish life. But what exactly was a shtetl? How did traditional Jews live there, and how were their lives affected by the sweep of modernity? How was the Yiddish language, spoken by all shtetl Jews, both a repository of tradition and an agent of change? How do representations of the shtetl—from corrupt backwater to pious haven—reflect the concerns of Jews from the nineteenth century up to our own day? Through memoir, literature, film and painting, this course will examine actual lives lived in the shtetl, as well as a selection of the many artistic representations of it. All readings will be in English.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.265. Panorama of German Thought.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): R. Tobias; Staff
Area: Humanities.

AS.211.271. Taking Risks: Literature and Film.
This course will explore concepts of risk in literary texts, philosophy, sociology, and film and discuss to what extent the effort to avoid risk generates knowledge and influences representations of the world. We will think of risk in the realm of accidents, abysses (of thought), and economy by constantly reflecting upon its use of rhetorical devices. Materials include: Henry James, Martin Heidegger, Friedrich Nietzsche, Franz Kafka, Georges Bataille, "The Wolf of Wall Street" and others.
Instructor(s): N. Tolksdorf
Area: Humanities, Social and Behavioral Sciences.
AS.211.276. The Culture of Italian Football.
This course will use football (soccer, or calcio) as a key to understanding fundamental aspects of Italian culture and society. Through football, you will become familiar with the character of Italian cities, their rivalries, and with their social and linguistic landscapes. We will explore dialects, different social classes, and immigration in Italy, all of which are reflected in the choice of supporting one football club or another. You will also study the use of football in Italian literature, cinema, and music as a metaphor for life, temporality, and for man's quest for happiness. By studying the connection between clubs/cities and the presence of football in Italian arts, you will understand the close relationship, which permeates all of Italian culture, between artistic expression and local identity. No knowledge of Italian is required, but this will be a chance to read Italian texts for those who can. However, everyone will learn some Italian words and expressions.
Instructor(s): F. Brenna
Area: Humanities, Social and Behavioral Sciences.

This course will track uses of “the underground” in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.211.402 OR HA.211.402
Instructor(s): R. Powers
Area: Humanities.

AS.211.312. Acting French: learning about French language and culture through theater.
Performing a play in a foreign language not only improves language skills, but develops the ability to express oneself through the body and to communicate both efficiently and elegantly. Using excerpts from popular French stage plays by Camus, Sartre, Feydeau, Ionesco, Pagnol and Rostand among others, this course aims to help students to 1) improve French pronunciation, intonation, syntax, and vocabulary; 2) appreciate and understand linguistic nuance and socio-cultural practices; 3) learn fundamentals of acting that carry over into everyday communication, from body language and vocal projection to the expression of emotion and improvisation. Students will view filmed representations of select plays as well as present an end-of-semester staging. Recommended course background: AS.210.301.
Instructor(s): K. Cook-Gailloud; M. Alhinho
Area: Humanities.

AS.211.318. Women in Pre-Modern French Literature.
This course will examine the changes in the relationship of women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d’Épinay and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities.

AS.211.319. ¡Salsa! The Afro-Antillean song.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instills vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. Concepts learned in this course will be directly applicable to careers linked to intercultural and international relations while also apply to multiple careers in media, music industry and dance. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Instructor(s): M. Ramos
Area: Humanities.

AS.211.329. Contemporary Society on Stage: Koltès, Lagarce, Mouawad.
This course proposes to examine six plays by three leading figures in contemporary French theater to see how the social changes that occurred in the last three decades are viewed and expressed in the French-speaking world. We will closely read two plays by each author as well as excerpts by these and other major playwrights. Works by Jean-Luc Lagarce (Derniers remords avant l’oubli) and Bernard-Marie Koltès (Combat de nègre et de chiens) will enable us to see how issues such as homosexuality, new family relationships and urban violence deeply transformed French society in the 80s and 90s, while Incendies and Forêts by Wajdi Mouawad will allow us to ask how these issues, along with immigration, decisively shape today’s global society. Using literary analysis to reflect upon the contemporary moment and its institutions, the course will incorporate to the extent possible performance recordings and films based on the plays. Course taught in French. Scenes from the plays can be performed at the end of the term.
Prerequisites: AS.210.302
Instructor(s): F. Champy
Area: Humanities.

AS.211.330. Curating Media Artists in Residence at JHU.
Curating Media Artists in Residence at JHU: students will be closely involved with JHU’s Program in Museum & Society, JHU’s Center for Advanced Media Studies (CAMS), and the Baltimore Museum of Art (curator KristenHileman) in efforts to research and propose new media artists in residence as well as prepare the residency for 2015. This process will include examining cutting-edge media artists whose work will be discussed both in the classroom as well as on sponsored class trips to media art exhibits in DC and NYC. Students will also assist with the CAMS media art residency of acclaimed French artist Camille Henrot in March 2014.
Area: Humanities.
AS.211.340. Topics in French Cinema: Amour, Sexualité, Mariage.
What is the nature of desire? Where does it come from, and what determines and conditions it? What do we fall in love with when we fall in love? An exploration of a series of films that ask essential questions about the psychological, political, and social stakes of human love, desire and sexuality, and about the institution of marriage. Focus on discussion and analyses of film sequences in class and on oral presentations. Students will have the opportunity to progress in vocabulary and oral expression. Films studied include works of Truffaut, Godard, Bunuel, Kechiche, Haneke, Breillat and Ophuls.
Instructor(s): S. Roos
Area: Humanities.

AS.211.341. Power and Resistance: Approaches to French Political Thought.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.211.346. 20th Century French Theater and Performance.
Taught in English. In this course, we will survey the themes and techniques that marked the theory and practice of theater in France in the 20th century. As we make our way from the early century avant-garde movements such as Futurism and Surrealism to Antonin Artaud’s Theater of Cruelty, from the Theater of the Absurd and mid-century existentialists to the post-1968 turn to collective authorship, our goal will be twofold: First, we will examine the prominent plays of the era as literary products, generated from within specific socio-political contexts. Second, we will attempt to re-construct their three-dimensional lives in performance, how they looked, sounded and felt to those watching. In addition, we will examine how French theater went from being a playwright-centered institution to a director-centered one, and how acting styles transitioned from psychological realism to a focus on the human body. Course materials will include plays, theoretical texts on the theater, as well as directors’ manifestos, rehearsal notes, set and costume designs and filmed recordings of theatrical events. Cross-listed with Theatre Arts and Studies THIS COURSE CAN COUNT EITHER AS A 212 (LITERATURE–AS.212.346) OR AS A 211 (CULTURE) COURSE FOR THE FRENCH MAJOR AND MINORS.
Instructor(s): E. Fisek
Area: Humanities.

AS.211.358. Writing the Great War: French Literature and World War I.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.

AS.211.367. La Nouvelle Vague.
Exploration des films les plus importants et des principaux cinéastes de la Nouvelle Vague française; introduction à l’analyse et à l’appréciation des films. Conducted in French. Recommended Course Background: AS.210.301 or permission of the instructor. Recommended screenings Tuesday 7:30pm. $40 lab fee.
Instructor(s): S. Roos
Area: Humanities.

AS.211.371. Kafka and the Kafkaesque.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term “kafkaesque” refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka’s poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka’s prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka’s impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka’s oeuvre while developing skills in critical analysis and literary close reading.
Area: Humanities.

AS.211.375. Community Based Learning - Documentary Production Practicum: “The Cure:” the History and Culture of Breast Cancer.
This class will accompany Bernadette Wegenstein during some months of producing her feature documentary “The Cure” on the history and culture of breast cancer. It will be a hands on experience with director/producer Bernadette Wegenstein, editor/producer Patrick Wright and cinematographer Allen Moore filming at the GBMC’s Breast Care clinic, the Halsted Medical Archives, and some other Baltimore locations. This class will meet once a week, but some weeks the class will consist in the hands-on experience on the field rather than the actual class meeting.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.380. Modern Latin American Culture.
Taught in Spanish. This course will explore the fundamental aspects of Latin America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Instructor(s): Staff
Area: Humanities.
AS.211.385. Documentary Production Practicum: Community Based Learning: Raqs Media Artists in Residence.
This course accompanies the New Delhi based media art collective raqs, consisting of 3 artists, during their first residency in Baltimore during Spring 2013. Students will be helping prepare the media artists’ solo exhibition opening at the BMA on February 20, and be involved in a production workshop offered through the JHU Digital Media Center. Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.390. Modern Spanish Culture.
This course will explore the fundamental aspects of Spanish culture from the nineteenth to the twenty-first centuries. The course will offer a general survey of the history of Spain and will discuss texts, movies, songs, pictures, and paintings in relation to their social, political, and cultural contexts. This course will be of particular interest for students planning on spending a semester abroad in Spain—specially for those students going to the JHU Fall Semester in Madrid, at Carlos III University. Taught in Spanish. Recommended Course Background: AS.210.311 or appropriate Webcape score. Instructor(s): L. Sanchez; N. Altschul; S. Castro-Klaren; Staff Area: Humanities.

AS.211.394. Brazilian Culture & Civilization.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required) Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.211.397. Program Abroad: Brazilian Culture & Civilization.
Summer Abroad Program. Intensive language and culture program offered in Rio de janeiro, Brazil. The Culture and Civilization course strengthens students’ language skills while deepening their understanding of Brazilian history and culture. Pre-req: 1 semester of Portuguese or 1 year of Spanish. Open to Brazil Program applications only. Course must be taken for a letter grade. Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.211.401. La France Contemporaine I.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites, and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and Francophone culture. Recommended Course Background: AS.210.301 or AS.210.302 or permission of instructor. Instructor(s): B. Anderson; Staff Area: Humanities.

AS.211.402. La France Contemporaine II.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and Francophone culture. Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor. Instructor(s): A. Wuensch; Staff Area: Humanities.

AS.211.406. The City in Early Modern French Literature.
Prerequisites: AS.212.333 OR AS.212.334 or permission Instructor(s): W. Anderson
Area: Humanities.

The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré. Area: Humanities.

AS.211.412. Temps et recit dans le cinema francais.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French. Prerequisites: AS.210.301 AND AS.210.302 Instructor(s): D. Schilling
Area: Humanities.

AS.211.416. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 214.616 and 070.416 Instructor(s): B. Wegenstein; V. Das Area: Humanities.

AS.211.420. Real French: From Slang to Sophistication.
This class will teach the realities of the French language, ranging from slang to the most sophisticated forms of expression. We will study excerpts of films, literary works, essays, political speeches, etc., in order to examine which level of speech is at work. Course also provides students with linguistic tools that will help them reach the highest level of written proficiency, as well as develop their personal stylistic voice. Instructor(s): K. Cook-Gailloud Area: Humanities.
This course proposes to examine the momentous world exhibition organized in Paris in the year 1900 along with the new technologies and concepts it introduced into the modern world: the first subway line in Paris, talking films on giant screens, escalators, moving walkways, the first large-scale exhibit of the rising Art Nouveau, the first display of Picasso’s painting on French territory, and even a presentation on the idea of television at the Palais de l’électricité. Our discussions will include the social, political, cultural, and artistic events that led to this pivotal moment which constituted an emblematic stepping stone between the old world and the new.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.211.427. Libertins, Athées, Imposteurs.
An exploration of the clandestine culture of free-thinkers, hedonists and rakes in France in the 17th and the 18th centuries and their strategies for undermining the theological grounding of morality, politics, sexuality and gender. Readings from Descartes, Cyrano de Bergerac, Molière, Diderot, Sade, Laclos and others. Meets with AS.212.427
Instructor(s): E. Russo
Area: Humanities.

AS.211.430. L’Affaire Dreyfus.
This course proposes to look at persuasive strategies that were engaged during the Dreyfus Affair in order to either incriminate or discriminate the Jewish captain falsely accused of having betrayed the French army. Course will focus on the socio-political events that framed the Dreyfus Affair (anti-Semitism in 19th-century France, caricatures and polemical writings in the press, the consequences of the Franco-Prussian War and of the Commune, the bipolar division that split French society into Dreyfusards and anti-Dreyfusards), as well as its long-term effects (the rise of the extreme right, the creation of the “intellectual”, the consolidation of Zionism which ultimately led to the creation of a Jewish state). Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.211.431. Desecrating the Sacred Heart: Science, Religion and Art in Fin-de-Siècle France.
This interactive course analyzes the stakes underlying the construction of Paris’ controversial Sacré-Coeur Basilica in Montmartre. In the light of heated 19th-century debates on moral authority that opposed religious believers and partisans of a secular state inspired by a scientific ethos, we will consider how the advocates of both sides use specific rhetorical techniques in the public domain (newspaper articles, caricatures, speeches) and artistic devices (paintings, literary writings) to convince their audience of the validity of their claims. The course will open out onto contemporary debates that show similar ethical conflicts.
Instructor(s): K. Cook-Gailloud.

AS.211.469. Limit-Experience, Limit-Texts.
Among the many functions of literary narrative is that of describing and domesticating extreme experience, from the horrors of war and incarceration to religious ecstasy, madness, and acute illness. Writers have long exploited the extreme to probe the reaches of human consciousness and the social pacts that differentiate transgressive from normal behaviors. Drawing on the work of 20th century French-language authors of novels, short stories, and witness accounts (Breton, Camus, Chraïbi, Delbo, Duras, Guibert, Le Clézio, Volodine), this course will explore how narrative strategies relate to extreme states, situations, and conditions. At the same time, through excerpts from experimental writers from Surrealism to l’écriture féminine, we will also consider how language itself can create a manner of limit-experience by questioning the boundaries of the readable. Course in French.
Instructor(s): D. Schilling
Area: Humanities.

AS.211.470. French Debate Series: Joan of Arc - Past & Present Interpretation.
In 2012, we celebrated the 600th anniversary of the birth of French heroine Joan of Arc. Through close readings of primary sources such as the proceedings of her trial (which led to her burning at the stake at 19), as well as animated discussions around her representations in the arts (painting, sculpture, literature, music, and cinema), this course proposes to explore past and present implications of her heroic feats in the political, religious, and cultural realms of French society. We will consider in particular how Joan of Arc has been recuperated as an emblem of French nationalism since the Revolution (and for example during WWII, where both the Vichy regime and the Resistance brandished her as their national heroine), as well as in the context of the upcoming French 2012 presidential elections. This class strongly emphasizes the acquisition of oral linguistic skills and vocabulary through discussion and debate. Recommended Course Background: AS.210.301or AS.210.302 or special permission from Kristin Cook-Gailloud (kacg@mac.com) or Claude Guillemand (claude@jhu.edu)
Instructor(s): C. Guillemand
Area: Humanities.

AS.211.471. Jules Verne.
An overview of the corpus of the author of the "Voyages extraordinaires". The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in the new human sciences and their relationship to the development of cultural models. A disabused, even pessimistic thinker, he provides a unique entryway into the fin-de-siècle French mind set. Works to be read will include “Cinq semaines en ballon”, “Voyage au centre de la terre”, “De la terre à la lune”, “20,000 lieues sous les mers” and “L’Île mystérieuse”, “Le Tour du monde en quatre-vingt jours”, “Robur le conquérant” and “Le Maître du monde”, “le Sphinx des glaces”, “Le Château des Carpathes”, and “Paris au Xxe siècle”. Class will be taught in French. This course can be taken either as a 211 Culture course or 212 Literature course 212.
Prerequisites: AS.212.334
Instructor(s): W. Anderson
Area: Humanities.
AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century.
2016 marks the bicentennial of Rossini's irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart's The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais' controversial "Figaro trilogy", stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretentions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano's The Ghosts of Versailles (1991), which ideologically completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick's Barry Lyndon (1975) and Milos Forman's Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors. Instructor(s): E. Refini Area: Humanities.

AS.211.501. Independent Study-French Culture.
Instructor(s): Staff Area: Humanities.

AS.211.791. Film Theory and Critical Methods.
Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas. Cannot be taken if student took any of AS.212.791, AS.213.791, AS.214.791, or AS.215.791 Prerequisites: Cannot be taken if student took any of AS.212.791, AS.213.791, AS.214.791, or AS.215.791 Instructor(s): D. Schilling Area: Humanities.

AS.211.875. GRLL CPT Research Practicum.
Instructor(s): Staff Area: Humanities.

AS.211.894. Independent Study - Portuguese Culture.
Instructor(s): F. De Azeredo Cerqueira Area: Humanities.

AS.212.115. Dead Men Talking.
How do the dead speak to the living? This question compels the texts and films that this course covers to investigate the words of the dead and the debate surrounding the death penalty, from the guillotine to lethal injection. We will examine the works of Chateaubriand, Stendhal, Balzac, Hugo, Benjamin, Camus, and Wahnich as well as the films of Kubrick and Robbins, among others. All materials will be available in English and French. Instructor(s): A. Alexander Area: Humanities.

AS.212.127. Freshman Seminar: 18th Century Theater.
An introduction to 18th century theater and performance. Using philosophical and critical texts by Aristotle, Chapelain, Diderot, and others, we will examine a series of plays and other works for theatrical performance. Course has a performance requirement. Taught in English. Dean's Prize Freshman Seminar Instructor(s): O. Sabee Area: Humanities.

AS.212.203. Presence and Absence in Modern French Poetry.
In this one-credit intersession course, we will explore the tension between silence and language, between nothingness and plenitude, bringing into question how both presence and absence are intimately related to literary creation. Although we will primarily focus on the modern poetry of Charles Baudelaire, we will also read poems written by Mallarme, Rimbaud, and Apollinaire. All materials will be provided in both English and French. Instructor(s): J. Neefs Area: Humanities.

AS.212.212. The Roaring Sixties. France's Last Revolution(s) in Moving Images.
The 1960s were a pivotal decade in France. Radical changes in race/class dynamics, union/workplace politics, and gender relations impacted everyday life and modified the structure of society. Artists were deeply affected by this climate and film-makers stood at the forefront of cultural production, offering some of the most compelling accounts of this moment. This course will introduce students to a special turning point in history via films of Truffaut, Varda, Godard, Akerman, Marker and others. Area: Humanities, Social and Behavioral Sciences.

A failed bourgeois marriage, a scandalous love affair with a Russian diplomat, a crippling state of jealousy, a clandestine abortion: are these topics worthy of literature? Are telling these stories constitutive of a feminist-informed writing? Publishing in the aftermath of the second wave of feminism, Annie Ernaux's autobiographically grounded books consistently depict experiences of wider concern for women. In this course, we will question the efficacy of four of Ernaux's testimonial works in stimulating a socially significant discussion around issues relevant to women's everyday lives, while also considering their place within the canon, whether for feminist, life-writing, or simply literary merit. Instructor(s): R. Loescher Area: Humanities.

The City of Light also has a dark side. This course will explore how Paris catacombs, sewers, and underground metro system have captured the imagination of writers and artists since the nineteenth century. Readings will include excerpts from Leroux's Le Fantôme de l'opéra and Hugo's Les Misérables, available in both English and French. Films and documentaries will be shown in French with subtitles. Students will be evaluated based on class participation and a final project. Instructor(s): R. Powers Area: Humanities.
The classic detective novel scenario: a crime is committed, a body, discovered, but... whodunit? Untangling two French Caribbean novels consecutively, we attempt to answer just that question. But, what happens if the texts provide no clear solution, point to no definitive culprit? We will consider these unsolvable detective novels as exemplary of a community-based approach to storytelling, asking how we as readers might nevertheless penetrate their mystery.
Area: Humanities.

AS.212.301. Evil in French Literature.
In his book, Literature and Evil, Georges Bataille points out that “a rigorous morality results from the complicity in the knowledge of Evil, which is the basis of intense communication”. But what is Evil? What is the nature of this communication? What forms of knowledge does Evil elicit? How is Evil represented? Are there any changes in the representation of Evil throughout centuries? How does it pervade the structures of our daily life? How does literature encompass the idea of Evil? Through a close reading of a variety of French literary texts ranging from medieval (La Chanson de Roland, Tristan et Yseut), Renaissance (Gargantua et Pantagruel), early-modern (Médée, Candide) up to 19th century (Flaubert, Baudelaire) and 20th century (Proust, Ionesco) fiction, we will explore various facets of Evil and its emotional, ethical, cultural, religious, and political impact on the human self and body.
Instructor(s): A. Marculescu.

This course will track uses of “the underground” in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.212.334 OR HA.212.334
Instructor(s): R. Powers
Area: Humanities.

AS.212.317. Thousand Faces: Rousseau's Literary and Philosophical Writings.
Jean-Jacques Rousseau is not only responsible for the romantic discovery of Self (Les Confessions) or one of the ideological fathers of the French Revolution (Le Contrat Social), or the author of passionate, best-selling novels (La Nouvelle Héloïse). He was also a musician, a playwright, a theorist of education and a botanist. The class will explore various tracks, using Rousseau’s works as an opportunity to understand the century to which he belongs and to explore such topics as: autobiography, Revolutionary ideology, musical forms. This course will be taught in French.
Instructor(s): A. Roge; Staff
Area: Humanities.

AS.212.318. Women in Pre-Modern French Literature.
This course will examine the changes in the relationship of women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d’Epinay and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities.

Did women warriors exist or are they just a (sexual) fantasy? Did men and women writers represent female warriors differently? Can women warriors be considered as women from a philosophical and biological point of view or does warfare diminish their femininity? In this course we will analyze the representation of these heroines based on Italian and French epics, e.g. Ariosto’s “Orlando furioso” (1532), Voltaire’s “La pucelle d’Orleans” (1758), and on iconography and French and Italian opera. Philosophical and historical texts from the Antiquity (e.g.Diodorus of Sicily) and from Queer and Gender studies (e.g. J. Butler) will help us analyze the function of women warriors in these literary texts. The course is based on interactive discussions and can be held in English.
Instructor(s): V. Denzel
Area: Humanities.

AS.212.324. Vive la Difference!: Belonging and Difference in Contemporary France.
This course studies the impact that globalization and mass migration have had on France’s cultural identity by focusing on how recent developments in the arts illuminate the multiethnic nature of French society. Although France has been a “melting pot” in historian Gérard Noiriel’s words for over a century, the official culture of the nation remains skeptical of multiculturalism, highlighting instead an abstract image of the French citizen, shorn of cultural, ethnic, racial or religious differences. In this course, we will examine novels, performance pieces, plays, films and documentaries that challenge, live with and explore this norm, allowing us to ask: What is the relationship between diversity and political community? How do different aesthetic forms imagine belonging, citizenship and diaspora? The syllabus may include work by Mehdi Charef, Yamina Benguigui, Nasser Djemai, Leila Sebbar, Merzak Allouache, Laurent Cantet and Abdellatif Kechiche as well as theoretical readings from Pierre Nora, Dominique Schnapper and Pierre Tévanian. Recommended Course Background: AS.212.333-AS.212.334 or permission of instructor.
Instructor(s): E. Fisek
Area: Humanities.

AS.212.327. Mise et remise en scene: Performing in the 18th Century.
An introduction to texts and performance practices of the eighteenth century French theater, and an exploration of challenges and creative approaches to its restaging today. Course has a performance requirement.
Instructor(s): O. Sabee
Area: Humanities.
AS.212.329. Contemporary Society on Stage: Koltès, Lagarce, Mouawad.

This course proposes to examine six plays by three leading figures in contemporary French theater to see how the social changes that occurred in the last three decades are viewed and expressed in the French-speaking world. We will closely read two plays by each author as well as excerpts by these and other major playwrights. Works by Jean-Luc Lagarce (Derniers remords avant l’oubli) and Bernard-Marie Koltès (Combat de nègre et de chiens) will enable us to see how issues such as homosexuality, new family relationships and urban violence deeply transformed French society in the 80s and 90s, while Incendies and Forêts by Wajdi Mouawad will allow us to ask how these issues, along with immigration, decisively shape today’s global society. Using literary analysis to reflect upon the contemporary moment and its institutions, the course will incorporate to the extent possible performance recordings and films based on the plays. Course taught in French. Scenes from the plays can be performed at the end of the term.

Prerequisites: AS.210.302
Instructor(s): F. Champy
Area: Humanities.

AS.212.333. Introduction à la littérature française.

Introduction à la Littérature française I and II propose reading and discussion of texts of various genres from the Middle Ages to the 21st century. The two semesters may be taken in either order. Introduction à la littérature française I will cover readings and discussion of texts of various genres from the 14th to the 18th century. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Recommended Course Background: AS.210.301-AS.210.302 or at least one semester of AS.210.301-AS.210.302 with a grade of A and written permission of the instructor.

Instructor(s): S. Miglietti; Staff; W. Anderson
Area: Humanities.

AS.212.334. Introduction à la littérature française II.

Readings and discussion of texts of various genres from the Middle Ages to the 20th century. The two semesters (212.333 and 212.334) may be taken in either order. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Introduction à la littérature française II covers the time period from the Revolution to the present.

Prerequisites: AS.210.301 OR AS.210.302 or at least one semester of AS.210.301 or AS.210.302 with a grade of A and written permission of the instructor.

Instructor(s): D. Schilling
Area: Humanities.

Just who was Edgar Allan Poe, and who is he today? This course explores how and why a multitude of 19th-century French writers constructed Poe as an author. Through selected works from Hugo, Baudelaire, Mallarmé, and Verne, to be read alongside Poe’s original texts, we will study the means by which these figures projected uniquely French versions of this mysterious American writer the better to stake out their own literary revolutions. By exploring versification, translation, adaptation, and the role of the proper name, we will examine the broad literary history that underlies contemporary understandings of Poe. No knowledge of French is required.

Instructor(s): A. Alexander
Area: Humanities.

AS.212.341. Power and Resistance: Approaches to French Political Thought.

Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.

Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.343. Literature and Science in France 1750-1880.

This course will investigate changes in the meaning and function of the literature of science and of the natural world during the period 1750-1850 (N.B. All course readings, assignments, and discussions will be conducted in French). Dean’s Teaching Fellowship.

Prerequisites: Advanced French I and II (AS 210.301-302), Introduction to French Literature I or II (AS 212.333 or 334)
Instructor(s): H. Roman
Area: Humanities.

AS.212.346. 20th Century French Theater and Performance.

Taught in English. In this course, we will survey the themes and techniques that marked the theory and practice of theater in France in the 20th century. As we make our way from the early century avant-garde movements such as Futurism and Surrealism to Antonin Artaud’s Theater of Cruelty, from the Theater of the Absurd and mid-century existentialists to the post-1968 turn to collective authorship, our goal will be twofold: First, we will examine the prominent plays of the era as literary products, generated from within specific socio-political contexts. Second, we will attempt to re-construct their three-dimensional lives in performance, how they looked, sounded and felt to those watching. In addition, we will examine how French theater went from being a playwright-centered institution to a director-centered one, and how acting styles transitioned from psychological realism to a focus on the human body. Course materials will include plays, theoretical texts on the theater, as well as directors’ manifestos, rehearsal notes, set and costume designs and filmed recordings of theatrical events. Cross-listed with Theatre Arts and Studies. THIS COURSE CAN COUNT EITHER AS A 212 (LITERATURE--AS.212.346) OR AS A 211 (CULTURE) COURSE FOR THE FRENCH MAJOR AND MINORS.

Instructor(s): E. Fisek
Area: Humanities.

AS.212.358. Writing the Great War: French Literature and World War I. 3 Credits.

This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.

Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.
AS.212.362. Ecrire l'héroïsme au féminin [Writing Heroism in the Feminine].
How can we define a heroine? What distinguishes heroines from mere female protagonists? Who are the main heroines to have marked the French literary tradition? This course examines how writers have transformed the notion of heroism inherited from Ancient Greece and Rome to lend it different and distinctly gendered shapes in the figure of the female hero: bravery, scandal, crime, sacrifice, nationalism. Focus will be placed on the evolution of the concept from the 17th century to the end of the 20th century in novels and plays by Racine, Madame de Lafayette, Prevost, Balzac, Maupassant, Anouilh, Wittig, and Condé. Recommended Course Background: AS.212.333 or AS.212.334.
Instructor(s): L. Cariou
Area: Humanities.

AS.212.365. Twisted Roots: Writing “Creole” in the French Caribbean. 3 Credits.
This course examines rootedness and hybridity in contemporary literary and critical works from the French Caribbean, exploring the act of writing “Creole” as illustrative of innovative thought-constructs. French students will read and write in French and should register for section 02; other students will read translations and should register for section 01. Discussions will be conducted in English.
Instructor(s): R. Loescher
Area: Humanities.

Distant places have always exerted a particular fascination on the human mind. Many classics of European literature feature journeys to foreign lands, whether real or imaginary: from More’s Utopia and Ariosto’s Moon, to Bacon’s New Atlantis and Swift’s Lilliput. Through a range of examples from early modern France, we will explore the complex relationship between travel and the literary imagination. Topics to discuss include: the style, status, and models of travel literature; cultural encounter, Otherness, and self-representation; imaginary places and social critique. Readings will include fictional texts like Cyrano’s Estats et empires de la Lune, genuine travel reports such as Champlain’s Voyage au Canada, and works that skilfully mix fiction and reality, as in Montesquieu’s Lettres persanes.
Instructor(s): S. Miglietti
Area: Humanities.

AS.212.400. Flaubert’s L’Éducation sentimentale, a Prose Novel for Modern Time.
Undergrads need instructor permission. Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Education sentimentale edition required: GF Flammarion, 2003.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.401. The Literature of Medieval Cathedrals.
To understand medieval cathedrals we must “read” them through the literature of the age. This course will examine the medieval literature that illuminates some of the great cathedrals of twelfth- and thirteenth-century France. The texts studied will be in modern French translation and will come from a variety of genres: lyric poetry; romance; epic; devotional literature; biography and autobiographical confession. Cannot be taken Satisfactory/Unsatisfactory. Taught in French. Recommended Course Background: AS.210.302
Instructor(s): B. Reilly
Area: Humanities.

AS.212.404. The City in Early-Modern French Literature.
The city is an integral theme, even a privileged character, in the literary and speculative texts of the 17th and 18th century. It is often understood to stand opposition to the royal court and embodies the spirit of the people in a way related to the modern notion of “solidarity”. This course will look at a number of examples of the peculiar status of the French city (especially Paris) from the late Renaissance to the First Empire. Selections from Marguerite de Valois, Mme de Sévigné, Montesquieu, Diderot, Rousseau, Turgot, Ruault, Réité de la Bretonne, Mercier, Saint-Just, Robespierre, Napoléon Bonaparte, with perhaps a coda from Balzac or Michelet. Recommended Course Background: AS.212.333-AS.212.334 or permission of instructor.
Instructor(s): W. Anderson
Area: Humanities.

The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré. Co-listed with AS.211.410
Area: Humanities.

AS.212.412. Temps et recit dans le cinema francais.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.

Taught in French. During the first half of the semester we will take advantage of the renewed interest in scholarship on the Terror to deal with some of the most famous examples of Revolutionary rhetoric, focusing especially on the trial of Louis XVI and the late speeches of Robespierre. During the second half of the semester we will read literary works produced during the Terror and accounts of the Terror from authors such as Balzac, Dumas, and Michelet. We will be asking questions such as: What was the Reign of Terror and to what extent was its project dependent on public discourse? Why and how does the nature of public oratory change? What happens to definitions of “the literary” and of authorship in a terroristic context?
Area: Humanities.
AS.212.421. Textes et Performances: le théâtre français du 17e au 19e siècle.
Le théâtre français, des classiques aux romantiques. There will be a performance component to this course. Recommended coregistration with 210.312. Acting French. For more information, see http://www.wilda.org/Courses/CourseVault/Undergrad/18thTheaterUG/SyllabusTheater.html
Area: Humanities.

AS.212.427. Libertins, Athées, Imposteurs.
An exploration of the clandestine culture of free-thinkers, hedonists and rakes in France in the 17th and the 18th centuries and their strategies for undermining the theological grounding of morality, politics, sexuality and gender. Readings from Descartes, Cyrano de Bergerac, Molière, Diderot, Sade, Laclos and others. Meets with 211.427
Instructor(s): E. Russo
Area: Humanities.

This course will meet three times during the Fall semester to enable all French majors to prepare their thesis subject, thesis bibliography, and abstract prior to the writing of the Senior Thesis (AS.212.430) in the Spring semester of their senior year. This course is required of all French majors and must be taken during the Fall semester of their senior year. Schedule TBA upon consultation with the class list, as there are only three group meetings. The rest of the meetings are in individual appointments with the DUS or another chosen French professor.
Prerequisites: AS.212.330 OR AS.212.334
Instructor(s): Staff
Area: Humanities.

AS.212.430. Senior Seminar.
An in-depth and closely supervised initiation to research and thinking, oral and written expression, which leads to the composition of a senior thesis in French. Recommended Course Background: AS.212.429.
Instructor(s): Staff; W. Anderson
Area: Humanities.

AS.212.434. Reading Poetry.
Reading poetry is one of the best ways to learn and practice the complex richness of a language. Through close readings and interpretation of prominent poems in French from the Early Modern to the Contemporary period, this course addresses the variations of Poetry through history and its function and importance in society. What do changes in poetic forms mean? How do tensions between verse and prose in modern Poetry work? What makes writing and reading Poetry interesting? Students will compose and present their own "French Poetry Anthology." Course taught in French, though students may also investigate the translatability of Poetry.
Instructor(s): J. Neefs
Area: Humanities.

AS.212.443. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Meets with 212.773, 300.406 and 300.684.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.466. The Pleasures of Tragedy.
Why do we experience pleasure in watching representations of bad things happening to people on stage? Are the emotions aroused by tragedy ethical or immoral? These are just some of tragedy’s many paradoxes, which have been explored by philosophers over time, from Plato to Augustine, to Rousseau, to Hume. This course proposes to explore some of the enigmas and conundrums raised by a genre which everybody agrees cannot be defined by common formal and thematic features, but which we all feel able to recognize when we see it. Is there an essence of tragedy that endures from 5th century Greece to today? Or are the things that make us call a play tragedy radically different according to time and place? How is tragedy related to philosophy, religion and politics? Tragedy has been declared in turn “dead” (killed by Christian notions of redemption, by political utopianism, by philosophical optimism, by the dissolution of language, etc.) and renewed, regenerated (through the sense of the absurd, postmodern immanence, irredeemable violence) – and indeed, there has been a flourishing of the genre in France in the late 20th century. Through readings of a selection of plays, both ancient and modern, and theoretical works, we’ll examine the metamorphosis of the tragic hero and heroine, the issues of gender, moral responsibility and the management of the spectator’s emotions. Readings from Sophocles, Aristotle, Corneille, Racine, Hegel, Kierkegaard, Anouilh, Sartre, Césaire, Koltès, Gably. Course in French.
Prerequisites: AS.210.300 AND AS.210.302
Area: Humanities.

AS.212.469. Limit-Experience, Limit-Texts.
Why tell stories? What power do writers wield against the disorder of life? How do literary narratives measure up to experiences that usher us beyond the limits of the imaginable? In this course we will examine modern and contemporary works in French that engage with such limit states and situations as combat, imprisonment, madness, terminal illness, and corporeal transformation. Authors to be considered include Carrère, Chevillard, Darrieussecq, Delbo, Duras, Guibert, and Volodine.
Instructor(s): D. Schilling
Area: Humanities.

An overview of the corpus of the author of the "Voyages extraordinaires". The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in the new human sciences and their relationship to the development of cultural models. A disabused, even pessimistic thinker, he provides a unique entryway into the fin-de-siècle French mind set. Works to be read will include “Cinq semaines en ballon”, “Voyage au centre de la terre”, “De la terre à la lune”, “20,000 lieues sous les mers” et “L’Île mystérieuse”, “Le Tour du monde en quatre-vingt jours”, “Robur le conquérant” and “Le Maître du monde”, “le Sphinx des glaces”, “Le Château des Carpathes”, and “Paris au XVe siècle”. Class will be taught in French. This course can either be taken as a 211 Culture course or a 212 Literature course.
Prerequisites: AS.212.334
Instructor(s): W. Anderson
Area: Humanities.
AS.212.481. **The 18th-Century French Novel.**
Key novels will be studied from a variety of approaches. Authors to include Marivaux, Montesquieu, Prévost, Diderot, Crébillon, Rousseau, and Voltaire. Recommended Course Background: AS.212.333 and AS.212.334 or AS.212.333 and permission of the instructor.
Instructor(s): W. Anderson
Area: Humanities.

AS.212.501. **French Independent Study.**
Instructor(s): D. Schilling; E. Russo; W. Anderson.

AS.212.502. **French Indep Study-Lit.**
Instructor(s): D. Schilling; J. Neefs; S. Miglietti; W. Anderson
Area: Humanities.

AS.212.570. **French Independent Study.**
Instructor(s): J. Neefs.

AS.212.596. **Independent Study-Spanish.**
Instructor(s): E. Gonzalez.

AS.212.604. **Around Baudelaire.**
Topics in Baudelaire’s art and thought, and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mallarmé, Proust, Benjamin, Starobinski, Bonnefoy, Roubaud, Deguy). Readings and discussion will be mainly in French.
Instructor(s): J. Neefs; M. Fried.

AS.212.617. **Eighteenth-Century French Theater.**
The development of the drame bourgeois and the theater criticism of the French Enlightenment. Authors to be studied include Racine, Le Sage, Marivaux, Voltaire, Diderot and Beaumarchais. For more information, please see http://www.wilda.org/Courses/CourseVault/Grad/Theater/Syllabus.html
Instructor(s): W. Anderson.

AS.212.620. **The Encyclopedie.**
In its attempt to realize fully the potential of a group description of knowledge, the Encyclopédie of Diderot and d’Alembert displays the program of the philosophies in a particularly intense and idiosyncratic form. This intellectual conversation will be studied through the investigation of several different subjects treated in the Encyclopédie; for example, the theory of the encyclopedia itself, history, natural history, literature, medicine, and theories of language.
Instructor(s): W. Anderson.

AS.212.632. **Utopias.**
Reflecting on the genre of the Utopia which from the late 17th century through the late 19th century alludes to diverse ideological constructions, such as the Golden Age, the “Pays de Cocagne”, fantastic worlds, primitive societies, the state of nature, “robinsonnades”, science fiction.
Instructor(s): W. Anderson.

AS.212.640. **Mercier.**
Playwright, renowned essayist, philosophe of a sort and just plain observer of the late Parisian Enlightenment, Mercier’s literary career embodied the esthetic, political and conceptual changes that occurred in the move from the Ancien Régime to the Révolution française, the Terreur, the Thermidorean period and the Napoleonic movement of Paris. This course will cover some of his plays and other writings, especially his Tableau de Paris and its post-revolutionary continuation Le Nouveau Paris.
Instructor(s): W. Anderson.

AS.212.641. **French Romanticism 1800-1850: Literature and Art.**
Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.644. **Libertinage: entre révolte et fantasme.**
The prerevolutionary libertine novel, starring at its center the character of the libertine, is the one most iconically associated with the French novel and with notions of transgressive “Frenchness,” intended both for national use and for export. In the wake of the pioneering work of René Pintard (Le Libertinage érudit dans la première moitié du 17e siècle, 1943) libertinage was emancipated from the fictional realm and promoted to a category of intellectual and cultural history. Yet recent critics have contested the use of this label, arguing that the historical individuals who were so called were a heterogeneous collection who had nothing in common apart from their marginality, which was in turn stigmatized or valorized. The purpose of this course is to examine critically the relationship between fictional and historical liberties, the many overlaps between the “transgressive” and the “erudite” communities, the role they played in the emergence of the “radical” Enlightenment and scientific materialism, their subversive use of language, the fluctuation between protective strategies of equivocation and the audacity of parrésia. Readings from trial documents, pamphlets, correspondence, novels and essays, by G. C. Vanini, François Garasse, Antonio Rocco, Théophile de Viau, Descartes, Cyrano de Bergerac, Dassoucy, Bayle, Boyer d’Argens, Voltaire, Sade, Diderot, Laclos.
Instructor(s): E. Russo.

AS.212.655. **Persistence of the City.**
This course will address a number of problems derived from current ecological and sustainability concerns, via readings of classic texts of the French avant-garde and modernist tradition (early to mid-twentieth century: Romsains, Breton, Le Corbusier, Debord), as well as films (Godard, Resnais) and reportages of more recent date. To be taught in English, this course will be of interest not only to students of French and comparative literature, but to students in urban planning, design, sustainability studies, and architecture. Dates of classes: 2/3, 2/17, 3/2, 3/16, 4/6, 4/20.
Instructor(s): A. Stoekl
Area: Humanities.

AS.212.666. **Writers Confront Time, Posterity and Survival.**
This course will discuss various ways by which authors see time as shaping and inflecting the reception and the value of their works. I will focus on a select group of Enlightenment philosophers with some forays into classical antiquity and the Romantic period. The purpose of the seminar is to explore the existence of a relationship between models of transmission of aesthetic value and models of cultural, theological and biological “evolution.” Works by Diderot, Voltaire, Charles Bonnet, Rousseau, Balanche and others.
Instructor(s): E. Russo
Area: Humanities.
AS.212.678. Guillaume de Machaut: exploring medieval authorship in the digital age.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. Students will learn to use digital tools to view and analyze original illustrated musical manuscripts of Machaut’s work.
Instructor(s): T. Rose-Steel.

AS.212.680. Flaubert's L'Éducation sentimentale, a Prose Novel for Modern Time.
Undergrads need instructor permission. Through a close reading of Flaubert's novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L'Education sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L'Education sentimentale edition required: GF Flammarion, 2003.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

What if Rousseau’s description of the sentiment de l'existence were to join to the models of consciousness Damasio develops in The Feeling of What Happens? This course explores aspects of consciousness in French literature (Rousseau, Sand, Nerval, Amiel, Flaubert, Valéry, Proust, Sartre) in a dialogue with recent texts in theory, philosophy, neuroscience (e.g. Poulet, Merleau-Ponty, Sartre, Scarry, Noë, Humphrey, Damasio, Sacks).
Instructor(s): E. Ender
Area: Humanities.

AS.212.683. Violence & Tragedy.
This seminar traces the persistence of violence in tragedy. Working though traditional periodization insisting on an evolution away from spectacular baroque violence toward disembodied neoclassical purity, we will explore how violence continually shaped theater as a multi-sensorial, multi-medial practice. While the primary source of our discussion will be seventeenth-century France (Hardy, Rotrou, Corneille, Racine, et al.), ample opportunity will be made for students to present research from the literary traditions in which they work. Contemporary theorists and critics (Bersani, Benjamin, Biet, Chartier, Elsner, Greenberg, Loraux, Heller-Roazen, et al.) will be available in English. Taught in English. Dates of classes: 2/10, 2/24, 3/9, 3/30, 4/13, 4/27.
Instructor(s): Staff
Area: Humanities.

AS.212.689. Cultures of Criticism from the Classics to the Romantics.
It is said that the French Enlightenment invented art criticism. Yet art criticism was just one of many forms of critical thought at the time, like theatrical criticism, the genre of the éloge, scientific prefaces, satires, the Querelle des Bouffons, and much more. But what work does critical thought do for the early moderns? It certainly constructs the canon, it regiments the Republic of Letters, it can be seen to create the concept of a literary field. It marks boundaries, invents new languages, even new genres (is the novel always a criticism of its own genre?). Is it only the practitioner of an art who is competent to write the criticism of that art? How does the concept of critical thought evolve over the Long Eighteenth Century, and how does it mutate in the early Romantic period? Authors to be studied include: Racine, Perreaut, Voltaire, d'Alembert, Diderot, Rousseau, the natural scientists, Beaumarchais, Mercier, Stendhal, Hugo, Baudelaire.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.690. Literary Renaissance of the 12th Century.
We shall examine the medieval French literature that flourished during this 'Twelfth-Century Renaissance.' It considers texts across a variety of genres (the roman antique; courtly lyric; autobiography; lai; chronicle) in order to interrogate literature’s engagement with the surrounding intellectual currents. In particular this seminar asks how literature's relation to the past changed during this time and how it came to create something new.
Instructor(s): B. Reilly
Area: Humanities.

AS.212.692. Research Methods.
Texts have lives. From handwritten manuscript to digital format, the various incarnations of the literary text have implications for literary scholarship. This course examines the many lives of a literary text and the issues of access, retrieval, and research. From online resources to the core printed reference works, this course acquaints graduate students with the range of scholarly apparatus in the field of literary studies.
Instructor(s): S. Waterman.

AS.212.696. Literature Confronts Science: Zola.
Zola worked with the theories of heredity of his time in the Rougon-Macquart novels. But he also attempted to use his understanding of biology and thermodynamics to reform the theory of the novel in general. This course will examine these two different effects of science on literature and try to see what leads an author to undertake such a project. For a more extended description, please see http://www.wilda.org/Courses/CourseVault/Grad/Zola/Syllabus.html. Advanced undergraduates with sufficient background may register for this course with permission of the instructor.
Instructor(s): W. Anderson.

En quoi consiste et par quels moyens se construit l'espace dans les fictions litteraires ? Quelles fonctions y jouent les toponymes, les descriptions de lieux, les trajectoires des personnages ou encore ces excroissances visuelles que sont les cartes ou les plans ? Quels contrats l'écrivain peut-il passer avec son lectorat à l'égard du statut des espaces traversés et décris, qu’ils se fondent sur le « réel » ou qu’ils soient fabriqués de toutes pièces ? Cette introduction à la géopoétique propose d’aborder la mimésis littéraire sous sa dimension spatiale. Si d’une part notre objectif est de forger des concepts d’analyse littéraire en dialogue avec le discours sur l’architecture et la géographie, d’autre part nous chercherons à construire des lectures d’œuvres qui misent sur la puissance évocatrice des espaces et des lieux. Puisant dans la littérature d’expression française depuis 1800, de Balzac à Chamoiseau en passant par Giono, Ramuz, et Perec, nous relèverons divers "chronotopes" (Bakhtine) ayant contribué à forger l’imaginaire géographique. Course in French.
Instructor(s): D. Schilling
Area: Humanities.
AS.212.710. Les religions du 19e Siècle.
Chateaubriand, Michelet, Quinet, Hugo, mais aussi bien Nerval, Baudelaire, Flaubert, Mallarmé, les œuvres du 19ème siècle se rapportent aux paradigmes religieux d’une manière particulièrement forte et problématique. De l’histoire des religions aux religions du Progrès, le fait religieux est interrogé par la littérature, autant que la littérature se confronte à lui. Le séminaire s’appuiera sur la lecture précise de quelques textes déterminants en ce sens.
Instructor(s): J. Neefs.

AS.212.717. Montesquieu.
The first half of the seminar is devoted to a close reading of some of Montesquieu’s major works in law, politics, history and the natural sciences, with an emphasis on the negotiations between nature, law and society. The second half will focus on selected interpretations and appropriations of Montesquieu’s thought from the 18th to the 20th century. In English, reading knowledge of French.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.719. Enlightenment and Revolution.
Writing Equality: the French Revolution. Enlightenment authors whose work is relevant to the Revolution (Montesquieu, Rousseau, Condorcet, etc.), Revolutionary authors and orators, and 19th-century authors like Balzac and Stendhal or historians like Tocqueville and Michelet who use literary topoi to come to terms with the Revolution.
Instructor(s): W. Anderson
Area: Humanities.

One is never done with Rousseau: generations of readers and a myriad of critical schools have mapped in many, contradictory ways the vast territory he has explored: composer, musicologist, novelist, dramaturgist, botanist, political philosopher, autobiographer, pedagogue, prophet, dreamer, persecuted victim and, always, provocateur. Rousseau lived and wrote at the intersection of pathos and logos, history and myth, reason and the sacred and his method, if any, was to construct a system against all systems. We will read his major works in light of the debates they have triggered both within the Enlightenment and postmodemism.
Instructor(s): E. Russo.

AS.212.743. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l’ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, À l’ombre des jeunes filles en fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Recommended course background: At least 2 212.3xx courses
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.750. Récits de la marge dans la littérature française depuis 1950.
Examen de romans et récits modernes et contemporains où la marge (géographique, ethno-sociale, sexuée) apparaît comme un lieu de parole spécifique. L’histoire longue de la figure du ‘zonard’ et du ‘jeune de banlieue’ permettra d’interroger les processus de légitimation littéraire et l’émergence de subcultures qui suscitent des postures esthétiques novatrices. Textes de Begag, R. Camus, Charef, Chraibi, Clébert, Collard, Djaidani, Queneau...
Instructor(s): D. Schilling
Area: Humanities.

From exoticist features of the 1920s and 1930s and political works of the 1960s, to family sagas and personal essays looking back on a conflicted past from the standpoint of the new century, Algeria has featured prominently in the French cinematographic imaginary. The independent North African nation has likewise produced compelling narratives that address the colonial legacy, the armed struggle for independence and its aftermath. Addressing from both sides of the Mediterranean an entangled political and cultural history, this course places in critical context conflicting screen representations as well as the institutions, individuals, and publics associated with them. The course will be taught in English, however most course materials will be in French. Undergraduates may take with permission of the instructor and completion of AS.212.333 and AS.212.334. Graduate students need not have completed the prerequisite courses.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.752. The Character Function.
What do we really mean when we talk about a “character” in a discursive work? What are the structuring, esthetic and heuristic functions of such devices? How has the concept of the character evolved from the early modern period to the present day? A sampling of the cases to be considered: Descartes, Leibniz, Marivaux, Racine, Diderot, Rousseau, Robespierre, Napoleon, Michelet, Zola, avatars and “digital angels”.
Instructor(s): W. Anderson
Area: Humanities.

AS.212.768. Norms and Forms of Academic Communication.
How to write a book review, an article, a conference paper; how to choose the appropriate journal for publication.
Instructor(s): W. Anderson
Area: Humanities.
AS.212.778. Les écritures contemporaines aux confins des genres [Contemporary French Writing Beyond the Genres.]
A critical survey of hybridized or mixed literary forms that have emerged in French-language writing since the postwar revolution of the New Novel and the materialist forays of the Tel Quel group circa 1968. What attitudes might be adopted toward texts that seemingly invent their own rules, refusing generic ascription even as they borrow freely from established narrative and poetic codes? How might we resist the temptation to view works of motivic reprise, pastiche, formal constraint, and intertextual weaving as symptoms or expressions of a disenfranchised “postmodern condition,” and endeavor instead to situate these texts in the contemporary moment, as elements of a vital cultural critique? Authors to be considered include Bon, Cadiot, R. Camus, Gavarry, Levé, Perec, Quintane, Redonnet, J. Rolin, Simon, and Viel. Seminar in French.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.781. L’entre-deux-guerres en toutes lettres [French Literature Between the Wars].
French literary culture between the wars (1919-1939) promoted the novel as a form for social comment and formal experimentation alike. Questioning the psychological biases of the ‘roman d’analyse’ and reacting to the collective tragedy of the Great War, interwar writers updated the French language as well as narrative ‘technique’ in light of emergent theories (psychoanalysis, Marxism, phenomenology). Readings from Aragon, Breton, Céline, Cocteau, Colette, Dabit, Mairaix, Némirovsky, Queneau, and Simenon.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.783. Diderot, Power and Representation.
A reading of some of Diderot’s major works in light of his struggle to break out of imposed and self-imposed hierarchies of style and manner, and to reframe or reform radically the relationship between ethics, politics, sexuality, gender and the arts. Special emphasis on Diderot’s self-representation as arbiter of taste, mediator and mentor.
Instructor(s): E. Russo
Area: Humanities.

AS.212.784. Founding Myths: Literature, Historicity, and the Nation.
National identities often coalesce around historical events that acquire the status of “founding myths”. In this seminar, we will draw upon French history to discuss how literature and art (including cinema) can contribute to forging and crystallizing a series of identity-making myths. Cases to consider include the burning of Joan of Arc in 1431, the massacres of St Bartholomew’s Day (1572), and the beheading of Louis XVI in 1793. By analyzing representations of these and other historical moments through a wide range of media, we will seek to penetrate the complex relationship between literature, fiction, and historicity in making national identity—a relationship that proves particularly problematic in the case of violent and divisive events such as those mentioned above. Among the authors studied will be Villon, De Thou, D’Aubigné, Marlowe, Shakespeare, Voltaire, Michelet, Dumas, Hugo, Brecht, Anouilh, Camus.
Instructor(s): S. Miglietti; Staff
Area: Humanities.

AS.212.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism toward interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology, and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce, and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollass, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with AS.213.790, AS.214.790, and AS.215.790
Prerequisites: ;
Instructor(s): E. Strowick; J. Neefs.

AS.212.791. Film Theory and Critical Methods.
Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.212.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.212.801. French Independent Study.
Instructor(s): D. Schilling; J. Neefs; S. Miglietti; W. Anderson.
AS.212.802. French Dissertation Rsch.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

AS.212.803. French Proposal Prep.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

Freshmen seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.111. Love and Death in Wagner.
This intersession course explores two interrelated themes in the works of Richard Wagner: love and death. The course will concentrate on the major works of Wagner (Der Ring des Nibelungen, Tristan und Isolde, and Parsifal) through in-class film screenings of their performances, as well as his contemporary reflections on theater and culture and his ambiguous legacy in the 20th century. To accompany Wagner’s work, secondary texts which engage with Wagner will be discussed, including Nietzsche, George Bernard Shaw, Adorno, Badiou, and Zizek.
Instructor(s): B. Klausmeyer
Area: Humanities.

AS.213.201. Chaplin in Germany: Tramp to Dictator.
Swiss writer Blaise Cendrars declared: “The Germans lost [World War I] because they didn’t get to know Chaplin in time.” We will follow Chaplin’s works from 1921’s The Kid to 1940’s Great Dictator and its reception in Germany, to better understand both those works and the history and politics of their reception. Topics include slap-stick, laughter, poverty, dignity, and class/worker struggles. Readings include Arnheim, Krakauer, Tucholsky, Arendt, Benjamin, Brecht, and Kafka.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.212. The World as Crime Scene.
This class will examine the process of inference and the conclusions that result from it, or - as we will understand it - the process of reading that results in a story. Learning from Sherlock Holmes how to read a crime-scene, we will practice reading images in the Walters Art Museum. Analyzing movies and TV-series, we will learn how a story functions, how a small detail can change it and how the same thing can end up as a different story.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.228. Freud and the Humanities.
It is hard to overestimate Sigmund Freud’s influence on virtually every branch of the Humanities. This course will investigate some of the concepts and methods that have been drawn from Freud, focusing specifically on art and literary criticism. We will consider sections from ‘The Interpretation of Dreams’ as well as a selection of Freud’s brilliant essays.
Instructor(s): J. Schade
Area: Humanities, Social and Behavioral Sciences.

Taught in German. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film (Fritz Lang, Billy Wilder) to architecture (Richard Neutra, Rudolf M. Schindler), literature (Thomas Mann, Berthold Brecht, Lion Feuchtwanger), and philosophy (Theodor W. Adorno, Hannah Arendt). Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.235. Panorama of German Thought I.
Taught in English. German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition are Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed the study of cultural, historical, and social phenomena as well as of literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This two-semester survey course will highlight important topics of German Thought, e.g. the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. While the first semester (Fall) covers until 1850 (from Luther to Hegel/Kierkegaard), the second (Spring) focuses on Modern German Thought after 1850 (from Marx to Luhmann).
Instructor(s): E. Strowick
Area: Humanities.
AS.213.236. Panorama of German Thought II.
Panorama of German Thought from Nietzsche to Habermas. Course will examine major thinkers in nineteenth and twentieth-century German thought with emphasis on the response to Enlightenment philosophy, the critique of reason, the questions about the autonomy of the subject and the search for new individual and collective identities. Reading will include traditional philosophical texts (Nietzsche, Cassirer, Heidegger, Adorno, Habermas) as well as works in anthropology (Gehlen, Scheler), sociology (Simmel, Weber), psychology (Mach, Freud), political theory (Marx, Schmitt) and aesthetics (Benjamin, Warburg, Panofsky). This course is a continuation of Panorama of German Thought I, though the first semester is not a prerequisite for the second. Taught in English. Instructor(s): E. Strowick
Area: Humanities.

AS.213.237. Literature and Medicine.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s “In the Cold” and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: “Philadelphia” (Jonathan Demme, 1993), “Melancholia” (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.

AS.213.241. Introduction to the New German Cinema.
Starting in the mid-1960s, a new generation of German filmmakers emerged who proclaimed the “old cinema dead” and sought to develop - in opposition to the commercial film industry of the time - an entirely “new” kind of German cinema. For directors such as Alexander Kluge, Margarethe von Trotta, Rainer Werner Fassbinder, Werner Herzog, and Wim Wenders, the art of filmmaking thus became inseparable from social critique. This one-credit course will explore the films of the “New German Cinema,” focusing on the tumultuous period from 1966 to 1979 in the Federal Republic of Germany, in both their relationship to other European “New Waves,” as well as to the aesthetic, political, and cultural contexts specific to post-war Germany. The course will serve to introduce students to both the history of New German Cinema, as well as to critical and theoretical discourses in contemporary film studies.
Area: Humanities.

AS.213.251. Friedrich Nietzsche.
Freshman Seminar: This seminar offers an introduction to Nietzsche’s work and a first journey into the world of German thought, culture, and literature. Friedrich Nietzsche continues to be one of the most radical and influential philosophers of the West. Famous and infamous for announcing the death of God and the advent of the superhuman, his irreverence for philosophical tradition culminated in the call to “philosophize with a hammer” (so as to demolish the constructions of Western metaphysics). He embarrassed the old philosophers exposing their, as he put it, clumsy lovemaking with truth. And he stunned generations of intellectuals after him with his idea of the eternal return of the same. But Nietzsche was also a scintillatingly witty writer, a light-footed and poetic thinker, a bold defender of the experiences of the body, a tender human being, and a sharp critic of German narrow-mindedness.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.257. Credits for Credit: The Political, Economics, and Affects of Debt.
David Graeber has argued that the ethymological prehistory of debt is based on social obligations that sustain society. These social obligations are deeply intertwined with economic structures long before the financial crisis kicked in. This seminar will give an introduction to macroeconomic theories of debt in Western capitalism and will explore the entanglement of economics and morality, by asking how our most intimate fields of subjectivities are penetrated and altered by economic forces and policies. Finally, we will analyze recent movies on indebtedness and debt and discuss current examples of a politics against or within indebtedness.
Area: Humanities.

Tought in English. This course will survey the major trends in Yiddish, Hebrew, and English literature published in the United States, Canada, and Mexico since the turn of the 20th century. Our discussions will consider the connections this literature maintains with other “ethnic” schools of writing; what connections, or disruptions, it signifies with Jewish literatures in other eras or locales; to what degree Jewish writing in languages other than English participate in major trends of American literature--or whether this writing could even be considered to anticipate innovations in the American “mainstream.” Topics in this literature will include the disruptions of immigrant life, the shadows of the Holocaust and anti-Semitism, aspirations for social justice, the lure and trauma of the American suburbs, the collapse of the Great Society, gender in American Jewish life, and the new Jewish immigrants of the former Soviet Union. All readings and discussions available in English.
Instructor(s): M. Caplan
Area: Humanities.
**AS.213.265. Panorama of German Thought.**

German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.

Instructor(s): R. Tobias; Staff
Area: Humanities.

**AS.213.301. Franz Kafka.**

The course is an introduction to the life, work and milieu of Franz Kafka. While reading Kafka’s short stories (e.g., Das Urteil, Die Verwandlung, Ein Bericht für eine Akademie), along with diary entries and Letter to his Father (Brief an den Vater), we will pay close attention to the author’s understanding of writing, his relationship to his father, Jewish tradition, history, and his fascination of the foreign and the exotic. We will also focus on Kafka’s influences; critical reception; reader problems in approaching Kafka’s works; Kafka’s situatedness in fin-de-siècle Prague; and issues in translating Kafka into English. Taught in German.

**Prerequisites: AS.210.362**

Instructor(s): A. Glazova
Area: Humanities.

**AS.213.305. Contemporary German Film.**

After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarck’s The Lives of Others (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s Head-On (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s Goodbye, Lenin! (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification of Germany are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has been developed known as “Berlin School” or “Nouvelle Vague Allemande”. Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 - discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.

Instructor(s): E. Strowick
Area: Humanities.

**AS.213.307. Art and Surveillance.**

In this class, we will analyze the relationship between surveillance and art. We will discuss in what ways surveillance has been reflected by different genres of art and to what extent surveillance can affect the production of art itself. Thus, after an introduction into the biopolitics of surveillance, we will look at examples from architecture, photography, painting, and Internet art, but with a specific focus on literature and film. Questions for discussion will address the relation of surveillance to the acts of observing, disciplining, controlling, and producing knowledge as well as their consequences for the formation and (self-)perception of the subject.

Instructor(s): E. Strowick
Area: Humanities.

**AS.213.308. Gespenster: verschwiegen und doch weitergegeben.**

We will study the psychic afterlives of WWI, Nazism, and Stasi experiences and involvements. These are stories that are often not told in the family but nevertheless handed down across generations in powerful, less-than-explicit, and often distorted ways. Drawing on philosophy and psychoanalysis, we will discuss how the need for silence meets the need to talk and to hear. We will read literature and analyze films on the family lives of former political prisoners in the GDR, Stasi informants, Nazi perpetrators, victims of the Holocaust, and soldiers of the First World War. Reading and discussion in German. Recommended Course Background: AS.210.361

**Prerequisites: AS.210.361**

Instructor(s): K. Pahl
Area: Humanities.

**AS.213.309. Walter Benjamin and His World.**

All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.

Area: Humanities.

**AS.213.310. Classic German Theater.**

Taught in German. In this seminar we will read some of the most important plays of German literature, by Lessing, Goethe, Schiller, Kleist, and Büchner. We will explore questions about the role of the theater toward the education of mankind in the spirit of the enlightenment. We will examine how tragedy is reconfigured around the context of the bourgeois family. We will study historical practices of stage production as well as modern filmic and theatrical productions. Finally, we will prepare an informal staging of a play.

**Prerequisites: AS.210.361**

Instructor(s): K. Pahl.
AS.213.312. Contemporary German Literature (1970 to the present).
The seminar examines the way cultural and historical topics are presented in contemporary German literature. The selected texts originate in different national contexts (Swiss, Austrian, German, German-Turkish, German-Japanese) and deal with questions concerning the representation of national, cultural, and individual identity. We will explore how the texts (de)construct these identities through narrative structures and will contextualize these structures with respect to recent theories of (trans)cultural identities. Authors include: Eugen Gomringer, Yoko Tawada, Terézia Mora, Thomas Hürlimann, Martin Suter, Christoph Schlingensief, Max Frisch, Günter Grass, Thomas Bernhard, Maxim Biller, and Thomas Meinecke. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.313. Heidegger's "Being and Time" and "Rectify.
This course will introduce students to Heidegger’s seminal work as seen through the lens of the TV series Rectify, which considers what it means to be “thrown” into the world and how we construct a meaningful horizon for our experiences. We will explore some of the fundamental concepts in Being and Time, including care, projection, fallenness, affect and time, and being-unto-death, and consider how these same issues are taken up in Rectify, which as a TV show has to develop its own visual vocabulary to explore the structure and nature of being in the world. Taught in English
Instructor(s): R. Tobias
Area: Humanities.

This course provides students with a foundation for as well as a brief introduction to Critical Theory. While paying close attention to the texts and the form in which they present themselves, we will explore major concepts such as dialectics, metaphysics, and freedom. Students will gain familiarity with historical works that have proven immensely influential in modern Europe and beyond, but will also be expected to consider ways in which such thinking has relevance for today’s world.
Instructor(s): J. Yonover
Area: Humanities.

AS.213.322. Museums and Jews, Jews in Museums.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiques, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.

Today’s Berlin is a nerve center with strong impulses from Russia, Ukraine, Turkey, Vietnam, India, and other Eastern countries. Through contemporary literature and film, we will explore Berlin’s role in a globalized world: how Berliners resist, embrace, or simply describe the influx of people from Eastern countries; how West-Berliners have re-oriented themselves after the fall of the wall; how the majority adapts to the minorities; and how some migrant authors rework the German language by experimenting with translilingual writing. By way of literary and filmic analysis, we will inquire if borders or limits can play a productive role; how the history of the divided city figures in the imaginary of immigrant authors; and how, for example, Turkish-German or Russian-German writers inscribe the tensions between East- and West-Berlin into a larger discourse on global East-West relations. Recommended Course Background: AS.210.362
Instructor(s): K. Pahl.

Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Area: Humanities.

AS.213.331. Detective Fiction in its Nascence.
Although Edgar Allen Poe is often called the father of detective fiction, this assumption is not entirely correct. Sixty years before Poe published his “Murders in the Rue Morgue,” Schiller wrote the novella “Der Verbrecher aus verlorenener Ehre,” which was decisive for the development of the genre in Germany. Schiller’s novella carried the subtitle, “Eine wahre Geschichte,” which underscored the tension between “true” events and “probable” circumstances which is characteristic of detective fiction in general. In this course we will examine the competing notions of truth (Wahrheit) and probability (Wahrscheinlichkeit) at play in German detective fiction from the eighteenth to nineteenth century. We will explore why the romantics emphasized truth as a defining feature of literature and how the realists replaced this notion with verisimilitude. Authors to include: Schiller, Kleist, Tieck, Hoffmann, Droste-Hülshoff, Fontane, Storm, Paul Heyse, Richard Alewyn. Reading and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.
Are all Jews funny, or only the ones from New York? This course will be an advanced-undergraduate examination of literary, theatrical, cinematic, and televised representations of Jewish culture focusing on the construction of cultural discourse through comedy. Taking as a point of departure Sigmund Freud’s Jokes and Their Relation to the Unconscious, we will consider the joke as a mode of narration and cultural coding with specific resonances for the Jewish encounter with modernity. Among the topics to be addressed in this course will be the origins of modern Jewish humor in traditional modes of storytelling and study; the problems of anxiety and otherness articulated and neutralized through humor; the significance of Jews in creating popular culture through the mass media (particularly though not exclusively in the United States) as well as the role of these mediums in transmitting and translating Jewish references to the general culture; the status of the Yiddish language as a vehicle for satire and a vehicle of resistance between tradition and modernity; the uses and abuses of Jewish stereotypes and the relationship of Jewish humor to anti-Semitism; the connections between Jewish humor and other modes of minority discourse; and the question of translation of Jewish humor both from Yiddish into other languages and from the Jewish “in-group” to a “post-ethnic” audience. Authors and performers to be examined will include Avrom Goldfaden, Sholem Aleichem, Franz Kafka, Dzigan and Szumacher, Lenny Bruce, the Marx Brothers, Mel Brooks, Phillip Roth, Woody Allen, Larry David, Sarah Silverman, and the Coen Brothers. All readings and discussions conducted in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.345. Healing and Health Beyond Theology. 3 Credits.
Nietzsche argues in The Gay Science that to bring about a new day we need a new health—“great health,” as he calls it, that enables us to surmount the sickness of our age and transcend ourselves. However much of an iconoclast Nietzsche considered himself to be, his idea of “great health” fits squarely within a theological tradition that claims that the condition for becoming a member of the ecclesia is faith, which cleanses the individual of sin and restores him to his original state. This course will examine the theological inheritance that has and continues to shape the notion of sickness and health dominant even in secular contexts, where well-being would seem to be regarded as a condition of the body rather than of the spirit. Reading to include works by Nietzsche, Kierkegaard, Augustine, Tillich, Heidegger, Scholem, Tolstoy, Büchner, Flaubert, and Kafka. Taught in English.
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.213.348. Picturing Jews: Representing Jewish Identity in Modern Art, Film & Literature.
This course will consider the different ways Jewish identity has been represented in the 19th and 20th centuries, focusing primarily on Central and Eastern Europe. Race, nationalism, religion, language, geography, politics—all helped shape different ways of understanding just what it meant to be a Jew, and all found expression in art and literature by both Jews and non-Jews. Looking at texts originally written in German, Yiddish, and Hebrew, including prose, poetry, journalism and drama, as well as painting, photography, graphic design, architecture, and film we will gain an understanding of the range of ways that Jewish identity could be understood and expressed as well as of the ideological stakes and historical contexts of such representations. Writers and artists examined will include Chagall, Kafka, Sholem Aleichem, and Bialik. All readings will be in translation.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.349. Weimar Cinema: The Golden Age of German Film.
Taught in German. German cinema of the 1920s is regarded as one of the “golden ages” of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception; Expressionism in film; technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema.

AS.213.354. Introduction to German Poetry.
This class will introduce students to German poetry from the eighteenth to the twentieth century. We will read selected poems by Goethe, Eichendorff, Mörike, George, Hofmannsthal, Rilke, Trakl, Celan, and Bachmann. In addition we will read several theoretical essays by poets and literary critics alike which examine the lyric form and the curious world that poetry constructs. Readings and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.

This seminar offers an introduction to the work of Goethe (1749-1832) who is one of the most prominent figures in the history of German literature and thought and according to T.S. Eliot ‘one of the wisest of men’. Tracing this wisdom through selected poems, prose, plays and essays, we will closely analyze the fascinating complexity of an oeuvre that reflects Goethe’s interdisciplinary interests in the aesthetic, philosophical, and scientific discourses and controversies of his time. Readings will include: Prometheus, Goetz von Berlichingen, Faust I, The Sorrows of Young Werther, Iphigenia in Tauris, Novella, Metamorphosis of Plants, Theory of Colours etc. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.
AS.213.358. German Pop Culture. 3 Credits.
Taught in German. The term “popular culture” designates cultural products and practices that are disseminated as ‘mass culture.’ Pop culture is accessible to many and deals with objects and materials that circulate in the everyday life of a society; it functions, one might say, as a cultural archive of the present. In contrast to high culture, pop culture enjoys an ambiguous reputation: it represents the cultural mainstream, functions as an easily consumable commodity and promotes the marketing of dominant ideologies, in the view of critical theory. However, more recent debates within cultural studies discuss pop culture as a site of social-symbolic conflicts and subversive forms of reception. Against this background, the seminar examines pop-culture phenomena in Germany after 1950, including the cult object: soccer, popular film and TV (“Tatort”), German pop music and hits (from “Hitparade” to “Rosenstolz” and beyond), recent pop literature after 1990 (Sibylle Berg, Rainald Götz, Thomas Meinecke). At the center of the analyses are questions related to the historical and political situation of pop culture, its specific aesthetic processes, and the (critique of) ideology performed by these processes.
Prerequisites: AS.210.361[C] AND AS.210.362[C]
Instructor(s): A. Krauss
Area: Humanities.

AS.213.361. The Holocaust in Film and Literature.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.367. Contemporary German Film.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 10 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarcks “The Lives of Others” (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s “Nowhere in Africa” (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s “Head-On” (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s “Downfall” (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s “Goodbye, Lenin!” (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or “Nouvelle Vague Allemande”. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among other influences) to develop radical notions of realism and challenge narrative conventions. This course will offer a survey on German Film since 2000 - discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Prerequisites: AS.210.362
Instructor(s): E. Strowick
Area: Humanities.

AS.213.368. German Political Thought.
This course will introduce students to major figures in German political thought from Martin Luther to Karl Marx and Immanuel Kant to Carl Schmitt. The class will explore such issues as the notion of sovereignty, the relationship between church and state, the theory of parliamentary democracy, and the political and economic ramifications of liberalism. Reading and discussion in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.369. Dada’s Ideologies: Literature, Art, & Politics. 3 Credits.
This course will examine the literary and political theories implied in, and encountered by, Dadaist works and praxes. Particular attention will be paid to Dadaist confrontations with the growth of modern mass media, the politics of World War I, and consumerist capitalism in the wake of Taylorism and Fordism. Readings include major Dadaists as well as Althusser, Benjamin, Debord, Gramsci, Irigaray, Lukács, Marx, Saussure, among others.
Instructor(s): J. Pelcher
Area: Humanities.
AS.213.371. Kafka and the Kafkaesque.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term “kafkaesque” refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka’s poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka’s prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka’s impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka’s oeuvre while developing skills in critical analysis and literary close reading.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.376. Art in Literature.
Discussion in German. Since the Enlightenment, works of art have played a prominent role in literary texts, providing an occasion for texts to reflect on their status as art and to explore the possibilities and challenges unique to aesthetics. In this course we will examine novellas and poems that refer to paintings or other works of art to illuminate the nature of art and to reflect on phenomena that have no place in any other discourse. Readings to include works by Lessing, Eichendorff, Storm, Mörke, Adrian, Freud, and Hofmannsth. Prerequisites: AS.210.361 AND AS.210.362
Area: Humanities.

AS.213.387. Major City, Minor Literature? Berlin in German-Jewish and Yiddish Literature. 3 Credits.
Between the two World Wars, a period of intense artistic and intellectual vitality, Berlin was an international center for theater, visual arts, and literature. Many important Yiddish-language writers were drawn to Berlin and, together with their German-language counterparts, produced a body of literature that explores issues of modernity and identity. By comparing works in Yiddish and German, we will learn about inter-War Berlin’s cultural diversity and richness, while also gaining insight into the particular issues of writing about Jewish identity in the 1920s, and the implications of writing in a minor language (Yiddish). We will read works by authors including Joseph Roth and Alfred Döblin in German, and Moyshe Kulbak and Dovid Bergelson in Yiddish. All texts will be in translation. Some questions we will explore include: • What is a minority/minor language or literature? • How did German and Yiddish interact in cultural and social spheres? • Can texts in different languages comprise a single body of literature? • What did it mean to be German and what did it mean to be Jewish? • Are assimilation and hybridity useful concepts? • Is there such a thing as Jewish modernism? • How did literature of the period respond to the rise of the Nazi party and the intensification of antisemitism?
Instructor(s): S. Spinner
Area: Humanities.

The course will examine how mid- and late-19th-century literature creates so-called reality effects which make the text seem a representation of the social world. The term “effect” intends to mark a most decisive insight: that literature does not simply depict a pre-given outer life but produces illusionary impressions of “authenticity” by using various aesthetic and rhetorical devices (e.g. modes of description, frames, specific narrations of time and space). In reading Gottfried Keller, Adalbert Stifter, Conrad Ferdinand Meyer, Theodor Storm and Theodor Fontane we will analyze these aesthetic strategies in relation to literary conventions and codes which readers have learned to interpret as ‘realistic’. Given that these conventions change over time and are situated in specific contexts, we will also be discussing the historicity of reality effects with respect to the rise of photography and modern historiography in the 19th century. Taught in German.
Prerequisites: AS.210.362

Area: Humanities.

AS.213.597. German Lit Ind Stdy-Summer.
Instructor(s): M. Caplan.

This graduate-level seminar will consider the theoretical problems and relationship between tragedy and comedy as modes of narration, methods of performance, and philosophical dispositions. Among the topics we will consider are the reciprocal relationship of comedy and tragedy; their respective derivation from myth, ritual, and philosophical dialogue; the relation of each to concepts of selfhood, society, the body, and the body politic. Along the way we will also examine questions such as why tragedy has attracted so much greater theoretical and philosophical interest than comedy, why comedy has been subdivided into various genres while tragedy has remained relatively indivisible, what political uses these modes of storytelling might signify, and how each serves as a mode of critique toward other narrative and dramatic conventions. Authors to be considered include Sophocles, Shakespeare, E.T.A. Hoffmann, Kafka, Brecht, Sholem Aleichem, Sh. Y. Agnon, Moyshe Kulbak, Ahmadou Kourouma, and the Coen Brothers. Theorists will include Aristotle, Hegel, Nietzsche, Freud, Lacan, and Zupancic. All readings and discussions in English.
Instructor(s): M. Caplan.
The course analyzes the transformations of the relationship between form - life - aesthetics with regard to Goethe’s morphological writings as well as the complex history of the reception in the philosophy of life (Spengler, Klages), in literary Modernism (Rilke, Einstein, Benn, Kafka) and in the early cultural studies of the 20th century (Simmel, Cassirer, Blumenberg). The “doctrine of the shape of formation (Bildung) and transformation (Umbildung) of organic bodies,” Goethe’s morphology considers shape (Gestalt) not as something static but in constant change, taking particular interest in the movable (“das Bewegliche”), i.e., processes of transformation in their temporality: “Observing all shapes, particularly organic ones, nowhere do we find something established, something inactive, but rather everything oscillates in constant movement. Hence our language uses the word Bildung for both, the emerged as well as the emerging.” A nexus between life and form, Bildung raises the problem of representation: A force towards representation, it itself escapes representation. It is by way of metamorphosis and dynamization of representation that the relationship between life and form is arranged anew, again and again - imposing questions of Bildung, representability (Bildlichkeit), morphological methods and poetics on modern literature and the humanities. Taught in German. Recommended Course Background: AS.210.311-AS.210.312 or instructor permission.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.604. Small Forms.
Small forms cover the broad field from aphorism, epigram, fable and riddle to anecdote, short story, novella, ... and treatise. In each of those ‘compositional arts’ the smallness unfolds in different and historically specific ways. Spanning a period from 1770 to 1940 and focusing (not exclusively) on aphorisms, the seminar will explore the manifold poetics of the small in literature and philosophy: What can small mean on the level of (literary) form? What (historically specific) kind of readings do small forms facilitate? What readings do they thwart? What happens to aphorisms when they become parts of a monstrously large overall composition? What distinguishes small forms from (e.g.) fragments? How do small forms relate to simple forms (Jolles) or minor literature (Deleuze)? To what extent do small forms gain epistemological impact, e.g. with respect to the critique of system and systematic philosophy since 1870? Readings include Lichtenberg, Schlegel, Novalis, Nietzsche, Kafka, Robert Walser, Benjamin, Adorno. Readings and discussions in German.
Instructor(s): A. Krauss
Area: Humanities.

This course will consider the link between modern fiction and melancholia, which on the one hand seems obvious given the overriding mood of many modern narratives by Beckett, Sebald, Bernhard, Krovow, among others and which on the other hand poses numerous interpretative challenges given the sparing nature of representation in modern fiction and the attachment to things in melancholia. What is the aesthetic sensibility associated with melancholia? Is melancholia limited to baroque representation? How can we conceive of attachment in the absence of things? Readings to include Freud, Benjamin, Adorno, Heidegger, Sebald, Beckett, Bernhard, and Hofmannsthal.
Instructor(s): R. Tobias
Area: Humanities.

We will read texts by Freud, Klein, Lacan, and Laplanche that are of particular interest for literary and social theory. We will discuss recent literary theory and criticism (especially queer literary theory and criticism) that draws on psychoanalysis. In addition, we will consider psychoanalytically inflected thought on sexuality and conformism by members of the Frankfurt School.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.611. The Baroque and Its Afterlives.
The status of the Baroque as defined and discussed by theorists such as Walter Benjamin and Gilles Deleuze, preeminently, manifests itself in a melancholic preoccupation with relics, ruins, and allegory. As such its aesthetic originates at a cosmological fault-line between life and death. Given these metaphysical characteristics, it should come as little surprise that its subsequent influence on literary modernism constitutes itself in echoes, spectrality, fragmentation, and the grotesque, all of which function as modes of critique working through and against technologies and ideologies of modernity. The fate of the Baroque, in an aptly non-Euclidean baroque figure, both parallels and intersects with the status of other proto-modern discourses such as the carnival in the articulation of the gothic, symbolism, expressionism, and several varieties of modern fantasy. This seminar will discuss one of many possible trajectories for this aesthetic in drama, narrative, and critical theory. Beginning with authors such as Shakespeare, Grimmeishausen, and Calderón de la Barca, we will consider works such as Mozart’s Don Giovanni, the tales of Reb Nakhman and E.T.A. Hoffmann, and films such as Fritz Lang’s Metropolis or the recent adaptation of Coriolanus. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

This course will explore the aesthetic-political practices of literatures and manifestos grouped under the term historical avant-garde. According to the most general understanding, avant-garde is considered the critique of bourgeois culture and ‘traditional’ art concepts, with this critique being related to a fundamental crisis of bourgeois society. The seminar aims at developing a more specific perspective by discussing the following aspects of avant-garde poetics: the self-reflection of aesthetic discourse in regard to the definition and hierarchization of styles and genres; a theory of language that draws on rhythm and materiality; an aesthetics of production which questions the notion of authorship and ‘organic work’ and stresses instead the constitutive role of repetition, (inter-medial) variation, and chance; the critical intervention in the concept of aesthetic autonomy and its institutions of reception; the “aporias of the avant-garde” (Enzensberger) inherent in its concept of radical innovation and exceptionality. In order to highlight the theoretical implications of avant-garde poetics we will analyze its literary strategies with respect to contemporary debates on modern technologies of art reproduction (Benjamin), the psychoanalytic reframing of the subject, and the advent of literary structuralism/formalism (Jakobson). In addition to that, we will discuss classics of avant-garde scholarship (e.g. Peter Bürger). Authors include: Paul Scheerbart, Hugo Ball, Tristan Tzara, Hans Arp, Carl Einstein, Else Lasker-Schüler, the ‘Sturm-Kreis’, and Arno Holz.
Instructor(s): A. Krauss
Area: Humanities.
AS.213.613. Hermeneutics around 1800 (from Hamann to Büchner).
With Schleiermacher, hermeneutics defined itself as a universal theory of understanding which no longer focuses only on biblical and juridical exegeses but on linguistic utterances in general. It thus became the matrix for subsequent Geisteswissenschaften and paved the way for various critical approaches which even today remain highly influential. The course examines the genesis of modern hermeneutics through the lens of its philological and philosophical precursors, contemporary commentators and literary authors. Key issues will be the underlying concepts of textuality and language, historicity and the subject. Authors include: Chladenius, Meier, Hamann, Herder, Kant, Schlegel, Schleiermacher, Goethe, Rahel Levin Varnhagen, Jean Paul, Büchner. Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

Kleist's novella “Michael Kohlhaas” (1811) is as much a political parable as it is a meditation on the power of art. In it the Prussian partisan considers the right of resistance as expressed in the struggles of Kohlhaas, whose battle against the House of Saxony would have been recognized by contemporary readers as an allegory for the Prussian struggle against Napoleon's occupying army. Kant’s short treatise “Uber den Gemeinspruch: Das mag in der Theorie richtig sein, taugt aber nicht in der Praxis” (1793) had revived the debate about whether a revolt could ever be justified, given that justice depends on the existence of a state. But “Michael Kohlhaas” is also concerned with another kind of revolt that is arguably more arbitrary, in that it does not serve any end. It is the revolt of art, which overturns existing norms and conventions by establishing a new law: the law of art or what could be called poetic justice. Kleist’s text makes a case for the autonomy of art in the literal sense. Art is self-legisitating, a law unto itself, and this feature points as much to the potential as to the danger of art. Readings to include works by Kleist, Martin Luther, Pufendorf, Breitinger, Kant, Goethe, Tieck, and Adorno.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.617. Peripheral Modernisms.
This graduate-level seminar will consider the relation of centers to margins in the production of modern literature. The starting assumption of this inquiry will be the political, social, and linguistic role of literary modernism as a critique of modernity. If a centrifugal force disseminates the processes of modernization from the metropolis out, can one suggest that modernism, as a critique of modernity, originates at the periphery and works its way inward? When does the critique of modernity begin, and how can one characterize such a critique if in certain cultures it precedes the advent of modernization? How does a consideration of literature from the margins of the industrial and imperial centers of the modern world cause us to rethink the phenomenology—distinct from a taxonomy—of modernism? In what ways can the belatedness of a culture’s modernization lead it to anticipate subsequent crises in modernity? If modernism precedes modernization in the peripheral context, what then, is post-modernity or post-modernism? Authors to be considered in this course include Reb Nakhman of Breslov, Machado de Assis, Mendele Moykher-Sforim, Gertrude Stein, Robert Walser, Franz Kafka, William Faulkner, Amos Tutuola, Clarice Lispector, and Yambo Ouloguem. Theoretical perspectives will include Adorno, Bakhtin, Barthes, Benjamin, Deleuze and Guattari, and Derrida. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

The seminar will investigate when and in which ways theatrical space was interpreted as a shelter for the fleeing. Starting with Greek tragedy and ending withElfriede Jelinek's postdramatical text “Die Schutzflehehende” we will discuss the relations between the institutions of theater and drama and political concepts of Asylum from a historical perspective. We will proceed on the basis of the idea that the stage offers temporary protection where refugees stop their journey, argue their case and expect a decision. Reading Aeschylus, Euripides, Goethe, Brecht and Jelinek, we will analyze different theatrical set ups and procedures in which the precarious state of the fleeing is and has been negotiated on stage. We will also deal with recent theater projects which open the stage to refugees and give them a platform outside Immigration offices. Reading Benjamin and Florens Christian Rang we will also discuss how the relationship of Asylum and theater is reflected in modern theory of tragedy.
Instructor(s): Staff
Area: Humanities.

AS.213.621. Theater: Drama, Performance, Theory.
We will study exemplary plays and theoretical texts about the aesthetics and poetics of drama and the function of theater in society from Lessing to Brecht and beyond – with excursions to Aristotle. We will explore the history of German thought on theater from illusion to Verfremdung to postdramatic multi-media formats, from the Bildung of the audience to the autoopoiesis of the performance, and from the Nationaltheater to various forms of less than stehende Schaubühnen. We will be concerned with theories of performativity, with the issue of emotions on stage (does theater need emotions? do emotions need theater?), as well as with the close connection of theater, philosophy, and politics (Derrida, Badiou).
Instructor(s): K. Pahl
Area: Humanities.

AS.213.625. Life Worlds: Literature and Phenomenology.
This course will examine the notion of life-world or Lebenswelt, as it increasingly comes to define the nexus of relations that characterize not only human experience but also works of art. A particular interest of the course will be how phenomenology expands our understanding of literature and the critical methods used to approach it. While the reading for the course will be drawn primarily from philosophy, we will also consider poems by Georg Trakl and Rainer Maria Rilke with an eye toward the poetic space they open. To what degree is the space we inhabit with its network of meanings a literary space according to these poets? Readings to include excerpts from: Dilthey, Einleitung in die Geisteswissenschaften; Husserl, Ideen (1913); Krisis der europäischen Wissenschaft; Heidegger, Sein und Zeit; Merleau-Ponty, Phenomenology of Perception; The Visible and the Invisible; and Käte Hamburger, “Die phänomenologische Struktur der Dichtung Rilkes.”
Instructor(s): R. Tobias
Area: Humanities.
AS.213.629. The Art of Framing.
Frames and Framings in art and literature are aesthetic means of creating focus. They draw a distinction between interiority and exteriority, foreground and surroundings; they cut out segments from space-time continuum and thus provide basic instruments of orientation, they constitute pictorial representation as well as the compositional structure of literature. From an epistemological perspective one can say that frames create a paradoxical threshold in-between which facilitates both the differentiation and transgression of spheres. It is further remarkable that frames while spectacularly making visible something specific at the same time expose the instances of their own ‘showing’: by implementing frames representation observes itself in the very process of representing. Through constellating systematic and historical readings the seminar will analyze theoretical concepts of frame and framing (Simmel, Genette, Marin, Derrida) and at the same time explore the transformation of frame forms and functions in literature and aesthetic discourse between 1720 and 1830 (Brockes, v. Haller, Wieland, Lessing, Herder, Lichtenberg, Goethe, Moritz, Jean Paul, Schlegel, Brentano, Tieck, Hoffmann). Among the topics to be discussed will be the conceptualization of subject-object relations as an analytical tool to reconstruct how the organizing principles of framing in Enlightenment (point of view, Guckkasten, chain of pictures, landscape/camera obscura) drift into the twilight of epistemological reflection: Around 1800 frame structures (and its doublings/transgressions) present the “Produzierende mit dem Produkt” and thus articulate the insights of transcendental philosophy, they turn into a medium of romantic irony.
Instructor(s): A. Krauss
Area: Humanities.

The seminar will explore to what extent Hegel can be read as contributing to a feminist philosophy. We will focus on Hegelian openings onto the emotional in Phenomenology of Spirit. In addition, we will study feminist philosophers who have drawn on or offered critical readings of Hegel (Irigaray, Butler, Cavarero, Malabou, and others). Co-listed with AS.190.633
Instructor(s): J. Bennett; K. Pahl
Area: Humanities.

AS.213.635. Anthropology and Modernism.
This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of “culture.”
Instructor(s): S. Spinner
Area: Humanities.

AS.213.650. Poetic Thought.
This course will examine essays and poems by Goethe, Hölderlin, and Rilke with an eye toward the ways in which their work addresses issues central to German Idealism and modern German thought. These include the relation of subject to object; the problem of the representation of the whole; the reconciliation of science and art; and the role of consciousness in the construction of the world. Readings to include texts by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer, Henrich, Husserl, Benjamin, Szondi, and Allemann.
Instructor(s): E. Forster; R. Tobias
Area: Humanities.

AS.213.654. „Stimmung“: Mood – Attunement – Atmosphere in Literature and Literary Criticism.
Taught in German. The course title marks a problem of translation which already Leo Spitzer in his “Prolegomena to an interpretation of the word “Stimmung” underscores: “It is a fact that the German word Stimmung as such is untranslatable.” Mood, attunement, atmosphere are facets of an aesthetics of Stimmung as it developed in literature and philosophy from the 18th to the 20th century. Most recently, Stimmung has had a renaissance as a methodological term in a Literary Criticism which seeks to overcome the paradigm of post-structuralism. As David Wellbery has demonstrated, the linguistic usage of the word Stimmung comprises three aspects: a subjective mode of experience/perception, an atmospheric dimension and a communicative efficacy. It is along those lines that the course analyzes the poetics and aesthetics of Stimmung in German Literature and Thought from the 18th through the 20th century. Stimmung prove to be fertile ground for contagious forms of communication, specific modes of representation (i.e. coloring, nuance), and the dissolution of subject/object boundaries. Furthermore, we will discuss Stimmung as a term of Literary Criticism from the 20th century to the present. Readings will include: Kant, Schiller, Stifter, Fontane, Hofmannsthall, Hermann Bahr, Thomas Mann, Georg Simmel, Martin Heidegger, Leo Spitzer, Erich Auerbach, Gernot Böhme, Hans-Ulrich Gumbrecht.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.656. Thinking of the Environment.
Few concepts are more anthropocentric than the environment. Although the term is usually invoked to describe what is other than the human being, it places the human at the center of the universe by defining nature as the world surrounding him. This course will examine several literary and philosophical texts from Novalis to Celan that approach nature as a sphere alien to thought, which can never be known except through the rhetorical device of prosopopoeia, which gives face to what is inhuman. Readings to include works by Novalis, Schlegel, Tieck, Stifter, Rilke, and Celan.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.668. Kleist.
This seminar will explore the narrative, dramatic, theoretical and quasi-journalistic work of Heinrich von Kleist along two lines of inquiry. We will read his literary experiments as reactions to the major shift in the sex-gender system and the new deployment of sexuality in the eighteenth century. We will discuss his unique role in the production, communication and interpretation of feeling across narrative and theater.
Instructor(s): K. Pahl.
AS.213.673. Adorno’s Aesthetic Theory.
The posthumously published Aesthetic Theory is arguably Adorno’s most important work. In it he traces the development of autonomous art and locates art’s critical potential in its freedom from all notions of utility or purpose that derive from other spheres of life that are themselves corrupted by instrumental reason. We will examine Adorno’s analysis of art’s unique capacity to challenge conventions and produce new, if ephemeral, configurations. Discussion to focus on such concepts as illusion (Schein), mimesis, non-identity, myth, and truth content. Instructor(s): R. Tobias.

AS.213.675. Paul Celan’s Poetry & Interpretation.
Paul Celan, arguably the most widely known poet writing in the German language after WWII, was once characterized by a hostile literary critic as the author of obscure, scandalously “hermetic” texts. Celan, however, insisted that his poems were open rather than hermetic. He believed his task to consist in speaking a language fit for preserving events that would acquire their shape in poems. This language, with its rigorous structure, compact imagery, and surprising inner logic, poses a challenge to understanding, as it is “open for interpretation.” Consequently, Celan’s poems motivated many prominent thinkers and critics to seek new paradigms of interpretation. In this class, we will read Celan’s poetic, prosaic, and theoretical texts in view of their literary, political, and historical significance. We will also read philosophical interpretations of Celan’s texts, such as Jacques Derrida’s “Shibboleth” and Maurice Blanchot’s “The Last to Speak.” Along with these thinkers, we will try, by way of reading Celan, to understand how we “understand” poetic texts. The language of writing and discussion in this seminar will be English but most readings will be in German. Instructor(s): A. Glazova.

Modernity gives rise to various forms of suspicion, including modern forms of resentment and practices of self-discipline (a suspicion of oneself), as well as to an epistemology of suspicion as it is developed in the modern human sciences. The course starts out with an analysis of the detective genre and of the specific transformations it undergoes in modern German literature. In a next step, we will examine literary representations of suspicion within a broader cultural-historical frame: Nietzsche’s analysis of resentment serves as one point of reference; another is what Carlo Ginzburg has called the paradigm of clues. The modern human sciences, since the last third of the 19th century, have relied on a method that produces knowledge by way of interpreting clues. While suspicion in the human sciences is related to the production of truth, literature uses suspicion as a way to produce aesthetic and logical undecidabilities. We will analyze literary representations of suspicion with respect to the narrative structure (unreliable narration) and the mediacy of suspicion. Finally, the course emphasizes the methodological relevance of suspicion: As a practice of deciphering, interpreting, and reading traces, suspicion calls for being reformulated literary-theoretically. Readings will include: Heinrich von Kleist, E.T.A. Hoffmann, Nietzsche, Theodor Fontane, Freud, Kafka, Thomas Mann, Heimito von Doderer, Peter Handke etc. Taught in German Instructor(s): E. Strowick Area: Humanities.

Though every conventional description of modernist aesthetics dates its origins to the era preceding World War I—in some versions several decades before 1914—there has always been an understanding of the War’s “catalytic” influence on the aesthetic of chaos, madness, violence, and despair that comes to characterize at least one major strain of modernistic art. Taking the after-effects of the First World War as well as the Russian Revolution(s) as its point of origin, this graduate-level seminar will consider such writers as Sigmund Freud, Walter Benjamin, Sh. Y. Agnon, Sh. Ansky, Guillaume Apollinaire, Isaac Babel, Georges Perec, Erich Maria Remarque, Joseph Roth, Virginia Woolf, and Stefan Zweig. All readings and discussions available in English. Instructor(s): M. Caplan Area: Humanities.

AS.213.685. Theories of Translation (1530/1930).
Taught in German. It is one of the topoi of literary studies that translation presupposes interpretation and is thus bound to certain discursive premises. To investigate specifically how this connection between translation and interpretation has developed historically and is embedded in concerns of philosophy of language, the seminar reconstructs concepts (politics) of translation from Luther to Benjamin and Buber-Rosenzweig. One of the focal points is the emergence of a modern theory of representation between 1730 and 1820 (Gottsched, Venzky, Hamann, Herder, Schleiermacher), the effects of which are staged with the aid of different Shakespeare translations (Wieland, Lenz, Schlegel). Finally, by including more recent theories of translation from the milieu of deconstruction/post-structuralism, the seminar seeks to reconsider interpretation from the standpoint of translation, and translation from that of interpretation. Instructor(s): A. Krauss Area: Humanities.

AS.213.689. Creativity.
Modernity requires creativity of the artist. But what does this mean? Creativity has been thought of as a gift, but also as a technique or an attitude that can be developed. It thus moves between the mysterious, the mechanical, and the relational. While creativity was of little importance for the normative poetics (Regelpoetik) of the Baroque, the Enlightenment demanded an emancipation from external rules, which led to the apotheosis of human creativity in the idea of the genius. Countering overly idealistic notions of autonomy and human artistic agency, others cultivated practices that acknowledge and even amplify the role of chance. This seminar will focus on the eighteenth and early nineteenth centuries and invite contributions on more recent poetics from its participants. Particular emphasis will be placed on interrogating the roles of the imagination, phantasy, and visualization in the creative process. Instructor(s): K. Pahl Area: Humanities.
Readings and discussions in German. This course will be organized around a close reading of “Aus meinem Leben: Dichtung und Wahrheit,” one of the many works of Goethe that was enthroned as prototype of a genre: discourses on modern autobiography emerged in its context and have drawn on its unique performance of writing one’s own life until today. The seminar is devoted to develop a reading of the entire book emphasizing its theoretical implications (subject formation/Bildung, concepts of time/historicity, modes of representation, genre theory, theory of the ‘daemonic’) and its prolific discursive productivity. Meticulously analyzing this productivity along with its epistemological implications, the seminar will explore how “Dichtung und Wahrheit” both establishes and revokes a representative model of autobiography. Instructor(s): A. Krauss
Area: Humanities.

AS.213.706. Literature, Museums, Mimesis.
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.718. Wirkliche Wirklichkeit: Eccentric Realism.
Taught in German. Categories such as the uncanny, motion, or seriality are not easily associated with German Realism. The course takes a fresh look at texts by Theodor Fontane, Adaïlbert Stifter, and Thödr Storm in order to explore the thesis of the modernity of Realism. We will analyze framing techniques, temporal structures (e.g. boredom or belatedness) as well as the interrelation between realist poetics and other discourses and media by which realist texts produce reality as perceived reality. The aesthetics and epistemology of Realism will further be discussed with respect to Erich Auerbach’s “Mimesis” and Roland Barthes’ “reality effect.”
Instructor(s): E. Strowick
Area: Humanities.

AS.213.741. Literature, Psychoanalysis, and Unassimilable Experience.
This course will consider experiences at the juncture between memory and forgetting, history and oblivion, narration and music. Such liminal experiences are frequently interpreted in psychoanalytic theory as trauma, though there is no reason that a purely negative definition should prevail. The suspension of the self and the concomitant immersion in the sensible world could just as well be regarded as an ecstatic experience. This course will examine the notions of immediacy, singularity, power, and sensuality in psychoanalytic theory (Freud, Lacan, Klein, Malabou) and beyond. Kleist’s “Die heilige Cäcilie” and Kafka’s “Josefine, die Sängerin” will serve as touchstones for our exploration of the ecstasy that literature at once produces and reproduces as a verbal representation and musical medium.
Instructor(s): K. Pahl; R. Tobias
Area: Humanities.

The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citizen” or “citoyen,” as the political subject. The bourgeois and the citoyen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias; Staff
Area: Humanities.

The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhtin, Hamburger, Sartre, Beauvoir, Ricœur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaubert.
Instructor(s): R. Tobias; Y. Ong
Area: Humanities.
AS.213.760. Break and Continuity: German Thought around the French Revolution.
The turn of the eighteenth century saw the political revolution of 1789 as well as interrelated revolutions in thought, symbolic system, value system, family structure, gender relations, etc. We will explore the discourse of revolution in its oscillation between two conceptions – as breakthrough and as return (to the golden age of Greek Antiquity, to a prelapsarian state). From providence to chance event, and between break with and continuity of the old order, German thinkers considered the revolution. We will read Kant, Rousseau, Hölderlin, Hegel, Goethe, Kleist, and others.
Instructor(s): K. Pahl.

This seminar addresses German-speaking exile literature from 1933 to 1950. On the basis of historical and political contextualization, readings and discussions will focus on literary theoretical and discourse analytical questions. In contrast to Nazi ideology and its totalitarian claim to constitute “Germanness”, numerous émigrés intended to represent the other Germany from outside its national borders. This politicization of exile discourse which made ‘direct’ critical involvement with the regime appear imperative had a lasting effect on literature written in exile. The leitmotif of our analysis will be the question to what extent exile literature developed its critical reflection towards a specific aesthetics of exile; an aesthetics that articulates the reference to the historical-political situation, to Nazi Germany, expulsion, loss of language, dislocation and cultural transfer in form of a critique of representation. We will discuss topics such as the conceptualization of (German) tradition/transfer, languages of (non-) identity, theories of (anti-)imimesis, discourse politics and aesthetics, or Avant-garde and exile. Authors include: Thomas Mann, Irmgard Keun, Else Lasker-Schüler, Hannah Arendt, Adorno, Benjamin, Brecht, Lukács, Anna Seghers.
Instructor(s): A. Krauss.

AS.213.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinarity research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. – In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollack, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 214.790, and 215.790
Prerequisites: ;;
Instructor(s): E. Strowick; J. Neefs
Area: Humanities.

Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.213.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius’ Satyricon, about the worshiping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.213.800. Independent Study.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias.

Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias.

AS.213.813. German Qualifying Paper Preparation.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias.

This is an introductory course to Dante’s Inferno where we will think about the human phenomenon of singing. We will compare songs and texts that are familiar to us today to 14th century cantos written by Dante Alighieri. Dante and our contemporary popular music have more in common than we may first think. They both convey thoughts, feelings, and a range of universal human experiences that cannot be expressed in everyday language. Although Dante’s world and our own are vastly different, there are universal human experiences that were present in his world that still remain relevant today. The phenomenon of singing and of music goes beyond textual limits and students will be placed in a position of finding what they have in common with both the contemporary artist and the medieval poet.
Instructor(s): J. Gomez.
AS.214.171. Freshman Seminar: Witchcraft and Demonology in Renaissance Europe.
Who were the witches? Why were they persecuted for hundreds of years? Why were women identified as the witches par excellence? How many witches were put to death? (Answer: 30-40,000, between about 1400 and 1800.) What traits did European witchcraft share with witch-mythologies in other societies? After the witch-hunts ended, how did “The Witch” go from being “monstrous” to being “admirable” and even “sexy”? Answers are found in history and anthropology, but also in literature, folklore, music, and the visual arts. After an introduction to ancient and medieval witchcraft, we will study European witch-persecution between 1400 and 1800. The second half of the course will concentrate on artistic representations of witches in media ranging from manuscripts to movies, concentrating on Italy, France, Spain, and Germany.
Instructor(s): W. Stephens
Area: Humanities.

AS.214.207. Italian-American Culture.
This course explores the many depictions, descriptions, and definitions of Italian-American ethnicity and identity in various media, from the narratives and poetry of the first Italian immigrants in the nineteenth century to the wildly popular, stereotype-promoting American films and television shows of today. Through literature, film, poetry, language, music, and practice of cultural traditions, we will investigate how Italian-Americans express their identity to others. Although this course features a large component on familial and religious traditions, it is open to students of all backgrounds who have an interest in this rich heritage. Italian food will also be studied (and enjoyed!). Cost of food/transportation to restaurant(s) is not included.
Instructor(s): W. Stephens
Area: Humanities.

The topic of Love will guide us across Italian Literature and Cinema. We will analyze historical Loves and Lovers from the Middle Ages up to the present. We will examine how Love was talked about and portrayed, what Love was and what it has become. Love will help us to better understand Italy and Italy will maybe help us to better understand Love.
Instructor(s): L. Bacchini
Area: Humanities.

Intersession Abroad Program. The course examines Reality and Imagination in Medieval and Early Modern Italian Literature, with an emphasis on modern Florence.
Instructor(s): W. Stephens
Area: Humanities.

AS.214.237. Madness & Trauma in Modern Italian Literature.
Illness, whether psychological or physiological, is a common trope in Italian literature. In this course, we will examine the fictional and nonfictional works of modern Italian authors who narrate emotional trauma, mental illness, and abnormal psychology. How do these authors confront illness in their protagonists and in themselves? How do external factors (such as war or wide-spread epidemic) change the way in which a narrator or character sees the world?
Instructor(s): A. Falcone
Area: Humanities.

AS.214.261. The World of Dante.
An Introduction to the Divine Comedy
Area: Humanities.

AS.214.271. Boccaccio’s Decameron.
A close reading of Giovanni Boccaccio’s masterpiece will allow the students to become acquainted with the civilization of the European Middle Ages. Among the areas of interest are: medieval Italy as a mosaic of powers, faith and religion, women in society, nobles, commoners and the rise of the middle class, the rituals of love, and the purposes of literature.
Instructor(s): P. Forni
Area: Humanities.

AS.214.278. Italian Film.
This undergraduate seminar is an overview of 100 years of Italian film history covering such pivotal moments as the early Futurist films, the creation of Cinecittà, the Italian Neorealist film movement, the legendary Commedia all’italiana films, as well as a discussion of classic Italian auteurs such as Fellini, Pasolini, Wertmüller, Bertolucci, and such contemporaries as Garrone and Sorrentino.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.301. Survey of Italian Literature.
Un viaggio dal Rinascimento alla modernità, per incontrare il genio italiano e conoscere la nostra umanità. Through readings from the most celebrated texts by Italian authors, we will travel from the early renaissance to the 20th century to encounter the struggles and triumphs of the human conscience, and the highest achievements of Italian culture. The course will explore poetry, short story, theatre, epic, and novel, with an introduction to Italian opera. Students will have the opportunity to read Dante Alighieri, Baldassarre Castiglione, Galileo Galilei, Giacomo Leopardi, Giorgio Bassani, and many others in original language, and to discover how these works are relevant in our own life and times. Taught in Italian. Recommended course background: Italian AS.210.252; may be taken concurrently with Advanced Italian II.
Prerequisites: Not open to students who have taken AS.214.302.
Instructor(s): E. Refini
Area: Humanities.

AS.214.302. The Agony and the Ecstasy from Dante to the Romantics.
By exploring texts and topics in Italian literature and culture from the Middle Ages to modernity, the course will address a variety of themes crucial to the development of the Italian literary tradition. Authors will include Dante, Petrarch, Boccaccio, Ariosto, Tasso, Leopardi, Manzoni. The course is taught in English with special sessions in Italian for Italian Majors and Minors (so as to count towards the Italian Major/Minor requirements).
Prerequisites: Not open to students who have taken AS.214.301.
Instructor(s): Staff
Area: Humanities.

AS.214.303. Rome as told by its Narrators.
The course is intended for students who would like to learn about Rome through its history, literature, and arts. We shall explore the city and its culture, analyzing the works of several authors and film directors. The main goal is to offer an experience of the Eternal City as a place where the whole of Italy is reflected in its beauty and complexity. The course will be taught in English.
Instructor(s): W. Stephens
Area: Humanities.
AS.214.317. Italian Theater from Commedia dell’arte to Dario Fo.
Students must have completed Intermediate Italian II (210.252) or equivalent. Italian writers and performers have created some of the world’s greatest theatrical works, particularly in the genres of comedy and opera. We will study the evolution of Italian theater from the improvisatory humor of the Commedia dell’arte, through the invention and development of Italian opera, to the zany and politically engaged satire of Dario Fo, winner of the 1997 Nobel Prize in Literature. Other major authors we will study include Carlo Goldoni and Luigi Pirandello. We will view film versions and live performances of plays and operas in Italian. The class will be conducted in Italian.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.330. Love and War in Italian Literature.
This course is based on a choice of narrative and poetic texts from several centuries of Italian narrative and poetry. We will examine the literary renditions of the personal stories of Italians caught within the tragic logic of the war. Our focus is going to be the effects of war on love relationships as they are presented by a number of authors including Dante, Tasso, Tomasi di Lampedusa, Berto, Calvino, Bassani and Morante.
Instructor(s): P. Forni
Area: Humanities.

AS.214.346. The Short Story in Italy Across the Centuries.
The genre of the short story was in many ways invented by the Italians. During the later Middle Ages, preachers adopted the short tale, cultivated by fireside storytellers for ages, to add interest to the morals of their sermons. By the late thirteenth century, Italian writers were collecting such stories for entertainment as well as edification. Boccaccio’s Decameron (1352) was the first classic collection and inspired other collections throughout the Renaissance. It and other Italian collections inspired writers in many genres and countries, including Shakespeare and other dramatists. In modern times, short stories have become one of the predominant genres of world literature. This seminar surveys Italian short fiction from the fourteenth through the twenty-first century. Emphasis is on the representation of Italian culture and history through storytelling, including in film. Course will have two full sections, one taught in Italian for majors, the other taught in English, with no prerequisites, for non-majors. Limited to fifteen students per section.
Instructor(s): P. Forni; W. Stephens
Area: Humanities.

This course will focus on the life, work, and thought of Francesco Petrarca, or “Petrarch.” Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.350. The Eternal City: Rome in Literature and Film.
This class will be conducted in Italian. By studying the works of modern Italian writers and filmmakers, as well as ancient and medieval texts, we will explore the history and the enduring cultural importance of the city of Rome. We will consider the “myth of Rome” as a center of order and authority, and we will examine texts that subvert this myth by portraying the chaotic, joyous, and unseemly realities of life in Rome. Authors and filmmakers we will study include Virgil, Petrarch, Moravia, Ginzburg, Pasolini, Rossellini, and Fellini.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.353. Travel & Fantasy Worlds in Italian Literature.
This course examines important works of Italian literature that narrate journeys to exotic or imaginary places, blurring the boundaries between reportage and fantasy. We will consider topics including utopias, new worlds and exploration, allegorical and spiritual journeys, construction of identity, and the conceptualization of the “other.” Readings will span from the Middle Ages to the present day, including Marco Polo, Giovanni Boccaccio, and Italo Calvino. The class will be conducted in Italian. Recommended Course Background: AS.210.351 or AS.210.352 or equivalent.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.361. Rome as Told by its Narrators: A Journey through History, Literature, Arts and Film.
The course is intended for students who would like to learn about Rome through its history, literature, arts, and film. We shall explore the city and its culture analyzing the work of several authors. The main goal of that itinerary is to offer a whole experience of Rome through time. The Eternal City is also a place where the whole of Italy is reflected in its beauty and complexity.
Instructor(s): T. Katinis
Area: Humanities.

The goal of this course is to acquaint the students with themes and images recurring in the Italian poetic tradition from the Middle Ages to the Novecento.
Instructor(s): P. Forni
Area: Humanities.

AS.214.369. Food and Culture in Italy.
Throughout Italy’s history, food traditions have been central to the formation of Italian identities, both national and regional. In this course we will study Italy’s food traditions and explore the ways in which food has become a major theme of Italian literature, film, and music, from the Renaissance to the present day. The class will be conducted in Italian. Students must have completed Intermediate Italian II (210.252) or equivalent.
Instructor(s): J. Coleman
Area: Humanities.
Magic and Marvels of Wonders make us question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the magical and the marvelous were bound up with questions and issues very different from those of our time. With the exact sciences still to be invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance, especially the romance and the theater, provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities.

What does it mean to be Italian rather than French, American, or anything else? What’s the difference between being Tuscan, Milanese, or Sicilian? Between being Christian, Jewish, Muslim, or “other”? How does the reality of Being Italian differ from the clichés that prejudice, commercialism, or mass media fads help to spread? Considering these questions can be important whether you want to use your Italian in business, in academia, or for sheer pleasure, whether you want to watch films, read books, or see the sights.
Prerequisites: AS.210.251 AND AS.210.252
Area: Humanities.

AS.214.376. Warrior Women from Ancient Times to Game of Thrones. 3 Credits.
This course will trace the origins of the warrior woman from ancient times through today’s pop culture and reflect on the multiplicity of its social, cultural, and political ramifications.
Instructor(s): J. Gomez
Area: Humanities.

The course will explore the notion of ‘voice’ in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the ‘voice’ in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa’s The Siren and Italo Calvino’s A King Listens.
Instructor(s): E. Refini
Area: Humanities.

Who was Niccolò Machiavelli? The author of the Italian Renaissance’s most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli’s major works and to the intellectual, social, and political contexts that shaped his thinking.
Instructor(s): C. Celenza
Area: Humanities.

AS.214.393. Italian Opera and the Art of Adaptation.
Italian opera, from its very inception, has developed in close dialogue with other art forms. The pioneering operas of Peri and Monteverdi based on the figure of Orpheus are part of a larger cultural movement that saw Renaissance philosophers (Marsilio Ficino), visual artists (Bronzino) and humanists (Angelo Poliziano) resurrect and transform the ancient Orpheus myth. The subsequent evolution of opera was influenced by (and influenced) innovations in stage comedy, the novel, and other art forms. In this course, we will explore these connections between the development of opera and other facets of Italian culture. No knowledge of Italian is required. The course will be taught in English; an additional Italian language discussion section will be offered for majors.
Area: Humanities.

This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin - not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspired by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their native tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities.
Boccaccio's Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio's masterpiece on its own terms and in relation to the development of story-telling, from gossipy “news” (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints' lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and filmic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian. Those students should enroll in section 2 which will be awarded 4 credits.
Instructor(s): W. Stephens

AS.214.561. Italian Independent Study.
Instructor(s): C. Celenza; E. Refini; W. Stephens.

AS.214.562. Italian Independent Study.
Instructor(s): C. Celenza; E. Refini; W. Stephens
Area: Humanities.

AS.214.597. Italian Lit Internship-Summer.
Instructor(s): J. Coleman; P. Forni.

A seminar that considers how the early moderns encountered the (mostly material, mostly classical) remains of earlier cultures, in both visual and verbal realms. Survival and revival; manuscripts and art works; antiquarianism and the burden of the past; ephemeral and dreams of permanence. Some attention to the methodologies of historicism in both literary and art-historical study, including Burckhardt, Warburg, Panofsky, Greene, and recent work by Nagel and Wood; then a consideration of such figures as Dante, Petrarch, Ronsard, Mantegna, Francesco Colonna, Spenser, Shakespeare, and Milton.
Instructor(s): L. Barkan.

The course aims to outline the musical reception of Michelangelo's poems from the 16th to the 21st century. Moving from a critical introduction to Michelangelo's Rime, the course will address Michelangelo's own ideas on music and the few musical settings of his poems by contemporary composers. The course will turn then to the Post-Romantic renaissance of Michelangelo's myth as the context within which the main bulk of musical settings of the artist's poems was produced. What did composers such as Wolf, Britten, Dallapiccola, Shostakovich and Reimann find in Michelangelo's poetry? Through a close reading of the poems chosen by the composers, the course will explore the biographical, philosophical and socio-historical implications suggested by the different musical settings. No training in music performance or theory is required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.604. # internet.
This seminar will address the history of the internet as participatory platform from such social media as facebook and twitter to blogs and forums of political or activist nature, as well as online gaming environments; the questions raised will regard the social change these platforms produce, the legal implications of sharing information, the political and economical issues around “digital labor” (Scholz), as well as the broader ethical questions about identity and the construction of self in participatory online environments. This class will include a hands-on dimension combining media theory & practice.
Instructor(s): B. Wegenstein
Area: Humanities.

The newly acquired “Bibliotheca Fictiva" collection of rare books contains over 1200 literary forgeries and related documents, and makes Johns Hopkins the only center in Europe or the Americas equipped to investigate the deep relations between literature (in the broad sense that includes historiography), literary forgery, and literary theory. We will trace the development of the concept of literary counterfeit in humanist scholarship, with its medieval and classical antecedents, and the growth of modern literary genres, particularly the historical novel, that depended on concepts of authenticity and probability or verisimilitude. Theoretical readings, from Lorenzo Valla through postmodern literary theory, will be matched with notorious forgeries and with metalianterary fiction, from Rabelais and Cervantes to Borges, Eco, and their imitators. Elementary Latin will be helpful but not required; some paleographical skills will be taught; all sessions will be held in the Bibliotheca Fictiva collection in the rare book room of the new Brody Learning Center.
Instructor(s): E. Havens; W. Stephens
Area: Humanities.

AS.214.610. Latin and Vernacular Eloquence from Dante to Bembo.
This course will examine the coexistence of Latin and the Italian vernaculars as languages of literary expression in Italy between the thirteenth and sixteenth centuries. We will study theoretical works that articulate ideals of eloquence and style for Latin and the vernacular and that conceptualize the nature and relative roles of these languages. We will also consider the social, political, and intellectual factors that influenced how literary authors and translators employed Latin and the vernacular. Reading knowledge of Italian is required. While Latin works will be read primarily in translation, we will work with selected texts in Latin with the goal of better understanding medieval and Renaissance Latin style. Some prior study of Latin is assumed; advanced Latin is not a prerequisite.
Instructor(s): J. Coleman.

AS.214.616. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 211.416 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.
AS.214.630. Rossellini-Fellini-Pasolini: Italian Cinema and its Meaning Beyond Italy.
The great triumvirate of the Italian cinema, Rossellini, Fellini, and Pasolini can be said without exaggerations to be the fathers of modern film. Through the poetry of their moving images, they lay the groundwork in some ways for almost every kind of cinema that has been made in their wake. This course will examine the breadth of their opus and writings in an effort to understand the source of their influence. Recommended Course Background: AS.210.311-AS.210.312 or instructor permission.
Instructor(s): B. Wegenstein.

AS.214.637. The Intellectual World of the Italian Renaissance.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspired by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to these questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

Three of the most wildly inventive works of Renaissance literature are Luigi Pulci’s verse romance Morgante (1478/1483), Teofilo Folengo’s macaronic Baldus (1517/1521) and François Rabelais’s five prose tales known to posterity as Gargantua et Pantagruel (1532-1550’s?). Beginning from a template of mock epic, these three works unleash a tornado of linguistic and narrative tours de force, burlesquing and satirizing almost every aspect of literature, politics, and religion, with such reckless gusto that their authors were often accused of irreligion and even atheism. Their frenetic attacks on every conceivable norm of language, good taste, and decorum provide a fascinating "Dionysian" counterpoint to the dignified "Apollinian" works that are more easily assimilable to modern ideas about the essence of the Renaissance. A thorough familiarity with either early modern Italian or early modern French is absolutely essential for full appreciation of these works, as is a basic knowledge of Latin.
Instructor(s): W. Stephens.

AS.214.655. Translating Knowledge: Brunetto’s Tresor and Dante’s Convivio.
By focusing on Brunetto Latini’s Tresor and Dante Alighieri’s Convivio, the seminar will examine the notion of “encyclopedic knowledge” in the Middle Ages. The two works – both examples of “translation” – call traditional ideas of knowledge into question. The seminar will study the Convivio as a response to the Tresor and will situate Dante’s project within a wider discussion of vernacular translation as a key tool for the dissemination of the classical tradition in the Middle Ages.
Instructor(s): E. Refini
Area: Humanities.

AS.214.658. Dante’s Inferno: A Reading for Teaching.
How to Teach the Divine Comedy to American Undergraduates.
Instructor(s): P. Forni.

In this course we will study representative works by the major figures of Italy’s humanist movement, considering the significance of the movement as a whole and the many currents that scholars have identified within it. Topics and authors we will explore include early Paduan humanism (Lovato, Mussato), Florentine civic humanism (Salutati, Bruni), the birth of philology (Poliziano, Valla), vernacular humanism (Alberti, Landino), and the relationship between humanistic studies and Christian religion (Ficino, Sannazaro, Erasmus). The class will be taught in English. The ability to read Italian is required. Some knowledge of Latin is desirable but is not required.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.668. Boccaccio I.
Instructor(s): P. Forni.

A reading of Boccaccio’s Decameron completes the unit of two-semester courses on the Florentine writer.
Instructor(s): P. Forni.
AS.214.671. Ancient and Modern in the Mirror of the City: The Image of Rome in Italian Literature from the 13th to the early 19th Century.
The course will run from October 19th through December 7th, meeting twice per week. The source of two formative traditions shaping Italian identity, Antiquity and Christianity, Rome is the most cited place in Italian literature and a key source for Italy’s ongoing dialogue with the past. Yet, every epoch of Italian literature has had its own idea of the past. How did Italian authors shape the image of Rome? Focusing on both canonical and non-canonical writers, this course will provide a unique approach to the history and vicissitudes of classicism in the history of Italian culture. We will explore the following authors and texts: Le miracole de Roma (13th-century translation into the Roman vernacular of the Latin Mirabilia Urbis Romae, 12th cent.); the Anonimo Romano’s Cronica (1350s); Petrarch (Collatio laureationis, epistles); Poggio Bracciolini’s De varietate fortunae (1431); Biondo Flavio’s preface to his Roma instaurata (1444-46); Raphael’s letter on Roman antiquities to Leo X, written in cooperation with Castiglione (1519); Andrea Fulvio’s preface to his Antiquitates Urbis (1527); “Pasquinades” (“Pasquinate”) from the sixteenth century; Rome in Baroque poetry (Marino and Chiabrera) and in the poetry of the early Arcadian Academy (1690s); 18th-century satires on Rome (Devoti, Contucci); Alessandro Verri’s Notti Romane (1792 and 1804), Leopardi’s letters from Rome (1822); and G. G. Belli’s Sonetti on the ruins and monuments of Rome (1830s). Consequently, this course will also provide students with an overview of the many languages of Italian literature, such as medieval Roman vernacular, medieval and humanist Latin, neo-Latin, and nineteenth-century Roman dialect.
Instructor(s): Staff
Area: Humanities.

AS.214.672. Tasso, the Epic & Tradition.
Students will achieve deep familiarity with Tasso’s Gerusalemme liberata and Aminta; read selections from Gerusalemme conquistata, Il mondo creato, Tasso’s Dialogues, and his literary-theoretical treatises; survey important texts of Tasso criticism, and sample Tasso’s legacy in poetry and figurative arts.
Instructor(s): W. Stephens

AS.214.673. Ariosto’s Orlando Furioso.
This course will run from October 19th through December 7th, meeting twice per week. The course aims to analyze the development of Foscolo’s poetry in the years between the eighteenth and nineteenth centuries (1798-1807), namely the development from the sonnets and the odes to the poem I Sepolcri, starting off from the most common models of the famous contemporary poets (Parini, Monti, Alffieri, Pindemonte) to arrive at a new understanding of “lyric poetry.” Furthermore, the lectures will focus on the discussions and controversy that arose with regards to the Sepolcri (with Pindemonte and others) immediately after publication, when the novelty of the poem aroused bewilderment and perplexity in many critics, readers and poets. The analysis of the anti-Foscolo writings that appeared at this time - and the replies of Foscolo himself will show how most of the readers of that time, still tied to a static view of literary genres, were negatively affected by the audacity in the mixture of the various registers that characterize the poem (epic, lyric, elegy, satire, tragedy) held responsible both for the lack of formal and stylistic unity of the poem, and its complete obscurity. The class will be taught in Italian.
Instructor(s): F. Bausi; Staff
Area: Humanities.

AS.214.675. The Invention of the Secular Theatre.
Must read Italian, but not limited to Italian graduate students. Between late Antiquity and the fifteenth century, religious and cultural strictures on theatrical activity were enforced continuously, though not consistently. While spectacle (and, in the later Middle Ages, drama) remained important to medieval life, it was left to Italian humanists to reconstitute secular theater in the fullest sense, by reviving the ancient classical forms of comedy and tragedy, and by inventing new forms such as tragicomedies, commedia dell’arte, and opera. Sixteenth-century drama in Italian was the model for the development of dramatic literature in the other major Western European countries, including works of Shakespeare, Molière and other major authors. After reading several classic texts of the Italian sixteenth century in modern editions, students will produce editions and translations of other texts—both sixteenth-century imprints and the unpublished plays in a unique manuscript recently acquired by JHU—for planned publication. All sessions will be held in Special Collections in the Brody Learning Commons, and students will help prepare an exhibition of Renaissance editions.
Instructor(s): E. Havens; W. Stephens
Area: Humanities.

AS.214.676. The Renaissance Comic Romance.
In the second half of the fifteenth century, Italian poets transformed the medieval adventure stories of Charlemagne’s and Arthur’s knights. Luigi Pulci’s earthy, bourgeois Morgante and Matteo Maria Boiardo’s romantic, courtly Orlando innamorato created two variants of a genre that led from Ariosto’s Orlando furioso through Folengo’s Baldus to inspire Rabelais’s Gargantua and Pantagruel, Cervantes’ Don Quixote, and, eventually, the European novel. The course concentrates on the works of Pulci, Boiardo, and Folengo, combining close analysis of their linguistic and narrative fabric with examples of their influence on later comic masterpieces.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.678. Ariosto’s Orlando Furioso.
Ludovico Ariosto (1474-1533) was one of the major poetic innovators of the European Renaissance. He is best known for Orlando Furioso, the long epic-romance that also bears traces of his innovations in other genres, especially theatrical comedy in the vernacular. Orlando Furioso is an encyclopedia of Renaissance genres and topics that was influential throughout European literature. Written as a continuation of Boiardo’s Orlando innamorato (left unfinished in 1494), Ariosto’s poem overshadowed his competitors, including Giangiorgio Trissino and the Tassos, father and son. From L’Italia liberata dai goti and L’Amadigi to Gerusalemme conquistata (leaving aside the many poems now forgotten), only Gerusalemme liberata achieved anything comparable to the popularity and critical acclaim won by the Furioso. Aside from three complete re-publications prints in 1516, 1521, and 1532, Ariosto left at his death five unfinished cantos that were never integrated into the poem, and that would have altered it considerably. Reading ability in Italian required.
Instructor(s): W. Stephens.
AS.214.729. Petrarch and His Legacy.
In this seminar we will study Petrarch’s poetry, as well as selected prose works. We will consider the various facets of Petrarch’s profound influence on European literature and intellectual culture: his role in inaugurating humanism and the revival of classical learning; his new vision of historical change and human subjectivity; the immense impact of his Canzoniere on European lyric poetry and on the development of the Italian language itself. The conclusion of the course will be devoted to early modern authors who adapted the Petrarchan lyric mode in new ways, including Vittoria Colonna, Thomas Wyatt, and Shakespeare. Instructor(s): J. Coleman
Area: Humanities.

An introduction to the Italian novel of the 20th Century
Instructor(s): P. Forni
Area: Humanities.

This seminal text of the late Middle Ages will be a point of departure for discussing the role of literature in forging the socio-political convictions of Western Civilization.
Instructor(s): P. Forni
Area: Humanities.

AS.214.765. Casiglione and Della Casa.
The students will become acquainted with two of the most influential books of conduct written in the Renaissance: the Cortegiano and the Galateo.
Instructor(s): P. Forni

AS.214.769. The Orpheus Myth and the Arts in Early Modern Italy.
The revival of the Orpheus myth in Early Modern Italy shaped some of the period’s most important developments in literature, music, and the visual arts: as the first Italian secular play, Angelo Poliziano’s Orfeo marked a new beginning for Italian theater in the late fifteenth century. Just over a century later, the composers and librettists who created Italian opera (Peri, Rinuccini, Monteverdi, Striggio, and others) made the Orpheus myth the most characteristic theme of this new art form. In this course we will study these and other Early Modern works based on the Orpheus myth, as well as their classical antecedents (including texts by Virgil, Ovid, Boethius). We will explore the literary, musical, and artistic repercussions of the rediscovery and reinterpretation of ancient Greek Orphic poetry by intellectuals and poets of Lorenzo de’ Medici’s circle, including Marsilio Ficino, Cristoforo Landino, and Giovanni Pico della Mirandola. Discussions will be conducted in English. Some knowledge of Italian is desirable, but advanced Italian is not a prerequisite.
Instructor(s): J. Coleman.

AS.214.790. What is Philology?
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. - In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schiegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollack, Nichols, Cerviglini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 213.790, and 215.790
Prerequisites: ;
Instructor(s): E. Strowick; J. Neefs
Area: Humanities.

Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.214.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be teaching this seminar to European directors in their cultural and historical contexts and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documentaries around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, an unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. González
Area: Humanities.
AS.214.851. Italian Foreign Language Teaching Practicum I.
Required for first-year Italian Graduate Students. Must take Italian Foreign Language Teaching Practicum II (AS.214.852) to receive credit for this course. This course will not have a scheduled meeting time.
Instructor(s): A. Zannirato
Area: Humanities.

AS.214.852. Italian Foreign Language Teaching Practicum II.
Required for First year Italian Graduate Students. This course will not have a scheduled meeting time.
Prerequisites: AS.214.851
Instructor(s): A. Zannirato
Area: Humanities.

AS.214.861. Italian Independent Stdy.
Instructor(s): C. Celenza; E. Refini; W. Stephens.

AS.214.862. Italian Dissertation Res.
Instructor(s): B. Wegenstein; C. Celenza; E. Refini; P. Forni; W. Stephens.

AS.214.863. Italian Proposal Prep.
Instructor(s): Staff.

The revolts of African slaves and Native Americans in colonial and present-day Latin America have captured the attention of some of the best Latin American and European filmmakers of the last decades. This course will explore the representation of African slaves and Indian rebels on the big screen from a revisionist historical perspective paying attention to the struggle for their liberation and resistance against the abuses of capitalism in connection with postcolonial studies and the key notion of the coloniality of power. We will focus on these issues through the critical analysis of six films: QUILOMBO (Brazil), BURN! (Italy and France), THE LAST SUPPER (Cuba), ERENDIRA IKIKUNARI (Mexico), TUPAC AMARU (Cuba and Peru) and SHIP OF FOOLS (Argentina). All films have English subtitles and all discussions will be in English.
Instructor(s): J. Baumgardt
Area: Humanities, Social and Behavioral Sciences.

AS.215.113. The Andes through Quechua.
Quechua, the lingua franca of the Inka Empire, is the first language of more than ten million people in the Andes and second language of millions more. This multi-media course prepares students for further study of Quechua and the Andes. Through film, song, short story, and communicative language instruction, students will learn basic words, phrases, and grammar for oral communication; reading and writings skills; as well as study habits and resources to continue their learning.
Instructor(s): A. Smith
Area: Humanities.

AS.215.117. Film & Feminism.
This course is an introduction to the intersections between film and feminist theory, activism and criticism. Each session will involve a screening and discussion of readings exploring topics such as the nature of the gaze, global feminism, "girl" culture, and constructions of femininity and beauty. Directors include Fellini, Almodovar, Claudia Llosa, Deepa Mehta, Ousmane Sembène and others. The course aims to prepare students for future courses in film and/or women, gender and sexuality studies.
Instructor(s): A. Sheeran
Area: Humanities.

Paul Leduc is a unique independent filmmaker from Mexico whose films explore different aspects of the history of his country. If there is something that defines Leduc’s films, this is his social compromise with the poor and the oppressed and their liberation as well as the denunciation of the abuses committed by capitalist globalization in Mexico. In this course, we will pay attention to these issues when watching Leduc’s five most important films: Reed: Insurgent Mexico (1973), Frida: Alive Nature (1986), What Do You Think? (1986), Baroque (1989) and Cobrador, in God We Trust (2006). All films have English subtitles.
Instructor(s): J. Valiente-Nunez
Area: Humanities, Social and Behavioral Sciences.

Latin/o/as form a rich and important cultural component of the American community and Latin/o/a writers comprise a dynamic demographic in the U.S. literary world. This course will examine the work of key Latino/a authors (Junot Diaz, Sandra Cisneros, Julia Alvarez), with a particular emphasis on those of Chicano and Caribbean heritage. In this survey of U.S.-Latino/a fiction, we will explore the various ways that native bi-cultural and bi-lingual individuals negotiate the challenges of identity, belonging, and self-expression through literature.
Instructor(s): J. Baumgardt
Area: Humanities.

During a 1955 gathering of filmmakers in Salamanca, several directors implored their peers and colleagues to rebel against the stringent censorship of Francisco Franco’s regime. In this course, we will examine films produced in Spain following that seminal moment and during the decline of Franco’s dictatorship. In addition to providing the films with a cultural and historical background, we will consider the variety of responses to the state censorship that abounded during Franco’s reign.
Instructor(s): C. Kozy
Area: Humanities.

AS.215.231. Introduction to Literature in Spanish.
The main objective of this course is to examine and discuss specific authors and topics in literature in Spanish from the Middle Ages to the 20th century. The course is designed to cover a selection of Hispanic texts from Spain and Latin America. Literary genres to be studied will include narratives, poetry, and drama. The bulk of each class session will be dedicated to the discussion of the assigned readings. This course is taught in Spanish. This course is required for the major in Spanish.
Instructor(s): E. Gonzalez; Staff
Area: Humanities.

AS.215.243. Freshman Seminar: The Middle Ages in Film.
The Middle Ages and medieval themes are ubiquitous in popular movies of our times. This course studies the Middle Ages as they have been portrayed in film, with a focus on Spain. Course materials include studies on the imaginative uses of the Middle Ages as well as films like The Cid, Tirante el Blanco, Ladyhawke, and Destiny, among others.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.303. Program Abroad: Cuba in Film and Literature.
Intersession Abroad Program. The course examines Cuba through contemporary film and literature.
Instructor(s): E. Gonzalez
Area: Humanities.

In this course, we will examine several films produced in Spain following that seminal moment and during the decline of Franco’s dictatorship. In addition to providing the films with a cultural and historical background, we will consider the variety of responses to the state censorship that abounded during Franco’s reign.
Instructor(s): C. Kozev
Area: Humanities.

This course explores the work of the amorous poet and the “lady of his thoughts” from Garcilaso’s sonnets (1543) to don Quijote’s infamous love for the immaterial Dulcinea (1605). A chronological selection of amorous poetry from the period, including Cervantes’ own work as a poet, will be read in conjunction with excerpts from Leon Hebreo’s, Dialogues of Love, the key philosophical text for Neo-platonic love which was in wide circulation among poets of the period.
Instructor(s): G. Ponce
Area: Humanities.

AS.215.311. Radicalism, Film & Literature in Modern Latin America-Community Based Learning.
This course will explore the cultural symbiosis of radical politics, film, and literature in modern Latin America. Beginning with Cuban revolutionary Jose Marti and the definitive end of the Spanish Empire and concluding with current socialist movements in South America, we will analyze key radical texts by the likes of Friedrich Engels and Ernesto “Che” Guevara, classic films like The Battle of Chile by Patricio Guzman, and important works of literature by authors such as Pablo Neruda and Rigoberta Menchu. Note: Class will be conducted in English and all assigned texts will also be in English in order to encourage interdisciplinary enrollment and participation.
Instructor(s): M. Strayer
Area: Humanities.

The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncagio and Silva Passuni.
Instructor(s): S. Castro-Klaren
Area: Humanities.

Desde la conquista musulmana hasta la expulsión de los moriscos la Península Ibérica fue una sociedad caracterizada por el multilingüismo y la presencia, muchas veces conflictiva, de habitantes de las tres religiones monoteístas. Este curso presenta un panorama de las literaturas y culturas hispano-musulmanas e hispano-judías, así como hispano-cristianas y de temática morisca, desde la conquista musulmana (711) hasta la segunda parte del Quijote (1615).
Recommended Course Background: AS.210.311-AS.210.312 or instructor permission.
Instructor(s): H. Sieber; N. Altschul
Area: Humanities.

AS.215.327. Modern Political Thought in Latin America.
Sophomores, Juniors and Seniors only. The course is an introduction to modern political thought in Latin America. It draws on essays and novels written by major and influential political thinkers such as D.F. Sarmiento, Gonzalez Prada, J.C. Mariategui, Leopoldo Zea, J. E. Rodo, Octavio Paz, Jose Revueltas, Jose Maria Arguedas, Mario Vargas Llosa, Darcy Ribeiro, Enrique Dussel and the authors of the Sumac Kawsay as well as Liberation Theology central writings. The course will be taught in English. Students wishing to do work in the original Spanish or Portuguese will be encouraged to do so.
Instructor(s): S. Castro-Klaren
Area: Humanities.

A close reading and discussion primarily in Spanish of Cervantes’ masterpiece, with concentration on its major themes and contributions to the formation of the modern novel. We will use A. Murillo’s edition of the novel, Editorial Castalia.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): H. Sieber
Area: Humanities.

AS.215.337. Teatro Espanol del Siglo del Oro.
Close reading of various Spanish authors, among them Lope de Vega, Calderon de la Barca, Moreto, and Zorilla. Students should have taken courses beyond intermediate level or advanced Spanish. This class will be conducted primarily in Spanish as a seminar and will require active participation and discussion. Papers will be written in Spanish.
Undergraduate Seminar.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.338. Introduccion a la literatura argentina.
La literatura se enmarca en la realidad social y es una ventana hacia la cultura. En esta introducción consideraremos diferentes temas de especial importancia en la cultura y literatura argentina, como la separación entre la ciudad (puerto, civilización, contacto europeo) y el campo (provincias, barbarea, tradicionalismo rural) que empieza con el texto fundacional de Domingo F. Sarmiento, Facundo. Observaremos asimismo que esta influente dicotomía que se establece con la independencia política es modificada con la llegada masiva de inmigrantes a fin de siglo y finalmente pierde su fuerza con la dictadura militar de los años ’70 y con el desencanto neoliberal que estalla con la crisis del 2001.
Instructor(s): N. Altschul
Area: Humanities.

An interdisciplinary approach to the study of Latin America since Independence. The course will reply on an historical approach to the the study of literature, art and the formation of cultural epochs and periods.
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.343. Nación criolla: cultura y literatura en el siglo XIX.
El curso examina la formación de nuevas identidades hispanoamericanas y la búsqueda de un pasado que las haga legítimas, especialmente en el Cono Sur (Chile, Argentina, Uruguay). Consideraremos en particular las relaciones con el pasado español y con el pasado amerindio en textos políticos, críticos y literarios de figuras clave del siglo diecINUEVE, e.g. Domingo Faustino Sarmiento, Andrés Bello, Simón Bolívar, Esteban Echeverría, y José Victorino Lastarria.
Area: Humanities.
Through the close reading of primary texts written by or about adolescents, this course examines youth participation in Latin American art and society from the mid-20th century. Students wishing to complete the writing portions of the course in Spanish or Portuguese should enroll in section 2 which will award 4 credits instead of the usual 3.
Instructor(s): L. Judy
Area: Humanities.

AS.215.350. Mexico: An interdisciplinary approach to the construction of our image and understanding of Mexico.
The course studies the accounts of the Mexica on the journey and foundation of Tenochtitlan. Later we move on to the clash of cultures with the Spanish conquest (1521). After studying the art of the colonial period, the course focuses of the Mexican Revolution of 1910 and ends with a consideration of the image of the nation in murals and writers such as Octavio Paz, Carlos Fuentes and Elena Garro. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities.

This course will examine the cinema of Spain that was produced from the onset of the Spanish Civil War in 1936 until the death of dictator Francisco Franco in 1975. The films we will analyze include partisan documentaries, government propaganda shorts, escapist musicals, wry comedies, neo-realist thrillers, iconoclastic dramas, and meditations on national and personal trauma. In addition, we will contextualize our analyses by reading seminal works of Spanish cultural history, social criticism and film theory. This course is taught in English.
Instructor(s): C. Kozev
Area: Humanities.

We will study and discuss a selection of recent films from Spain, Argentina, Peru, Mexico and Cuba. We will concentrate on hot political and social issues in these countries as reflected in each film. Issues under discussion will be: the formal study and vocabulary of film and cinema in Spanish; gender and sexuality; national memory and trauma; trends in commercial film-making at the local and global levels; the imprint of social media networks. Taught in Spanish. Advanced Spanish is a prerequisite. The course counts as credit for the Major and Minor in Spanish and may apply as the equivalent to Intro to Literature in Spanish AS. 215. 231.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.388. Narrating Mexico: Novel and History. 3 Credits.
The 200 years since the eruption of Mexican Independence present a panorama of struggle, strife, and literary creation. This course explores how Mexican literature formulates, contests and conditions portrayals of the national reality of Mexico. Taught in Spanish. Recommended Course Background: Advanced Spanish I or another Spanish survey course.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

Through the careful study of Carlos Fuentes’ novel of Mexico City, La región más transparente, we will examine the city’s multiple and contending histories and mythographies from the Aztecs to the present as rendered in visual, textual, and performance media: murals, cinema, TV, burlesque, lucha libre, etc. Taught in Spanish; the course requires advanced reading skills in Spanish. Prior consultation with the instructor is required.
Prerequisites: AS.210.311
Instructor(s): E. Gonzalez
Area: Humanities.

Advanced Spanish and reading proficiency. Estudio de las culturas literarias de Argentina, Uruguay y Chile en sus respectivos contextos sociales y políticos desde la conquista española. Las culturas indígenas, el desarrollo de la nación, las culturas populares, culturas inmigrantes, regímenes políticos, actualidad económica y social en la época de la globalización.
Instructor(s): E. Gonzalez
Area: Humanities.

What is human madness? Taking into account Foucault’s famous dictum, "There can be no madness without society," this course returns to the earliest constructions of madness in the early modern period and moves forward into modernity through a close reading of literary, philosophical and scientific texts published in Spain. Readings include: Cervantes, Leon Hebreo, Huarte de San Juan, Lope de Vega, Calderon, Galdos, Freud, and others. Earlier representations of mental disquiet will be compared with the latest advances in psychology and neuroscience published in the JHU Gazette and the HUB. Recommended Course Background: AS. 210.312
Instructor(s): G. Ponce
Area: Humanities.

While our modern conception of "horror" owes much to English literature of the 19th century, it has an under-appreciated precedent in the literature of the Spanish Golden Age. In this course we will read tales of witches, monsters, and the living dead from an age that preceded ours by 400 years, but whose darkest fears are surprisingly familiar.
Instructor(s): W. Egginton
Area: Humanities.

AS.215.422. Amor y romanticismo en una Novela y tres películas.
Prerequisites: AS.210.311 AND AS.210.312
Area: Humanities.
Close reading of the Lazarillo de Tormes, Guzman de Alfaranche, Miguel de Cervantes, and others. Taught in Spanish.
Prerequisites: AS.210.312
Instructor(s): H. Sieber
Area: Humanities.

AS.215.443. Hispanic Literatures and the Arts.
Literary works from different genres (fiction, drama, poetry) by authors from Spain and Latin America are studied and illustrated in reference to the plastic and visual arts and cinema, indigenous, popular, and religious cultures. Cross-listed with PLAS
Instructor(s): E. Gonzalez
Area: Humanities.

El arte cinematográfico del gran cineasta español será estudiado a través de su obra, vista en partes selectas, obras enteras y dentro del marco escénico provisto por otras películas del cine español. Recommended Course Background: AS.210.326 or demonstrated proficiency in the language.
Instructor(s): E. Gonzalez
Area: Humanities.

Study of the music and literature inspired by three groups of great liminal influence in the cultural and political affairs of their respective nations. Gauchos (Argentina), Afro Hispanics (Cuba, Puerto Rico, Santo Domingo), Gitanos (Spain). Attention given to popular and learned myths and stereotypes and the history of efforts to establish self-identity. Conducted in Spanish. Recommended Course Background: AS.210.326
Instructor(s): E. Gonzalez
Area: Humanities.

We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312(C)
Instructor(s): E. Gonzalez
Area: Humanities.

This course will deal with close readings of Borges ficciones and critical essays in order to determine how his thinking on the problem of writing and thinking is fictionalized in his stories.
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.466. The Spanish Avant-garde.
From the turn of the 20th century until the outbreak of Civil war in 1936, Spain witnessed the greatest flourishing in its literary and artistic scenes since its Golden Age 300 years before. In poetry, prose, painting, and film, Spanish artists and intellectuals were innovating artistic forms and participating in new kinds of cultural production and critical practice. In this course we will examine this period, paying special attention to the works of such writers and artists as Miguel de Unamuno, José Ortega y Gasset, Luis Buñuel, Salvador Dalí, Federico García Lorca, and Pablo Picasso. The course will be taught in Spanish.
Instructor(s): W. Egginton
Area: Humanities.

Readings will include selections from Medieval and Renaissance Works, such as "El Conde Lucanor", "Amadís de Gaula", "La carcel de amor", "El Abencerraje", "Lazarillo de Tormes", "La Diana", "El buscon", "Novelas ejemplares" (Cervantes) and "Don Quixote".
Instructor(s): H. Sieber
Area: Humanities.

Taught in Spanish. Este curso examina la presencia del Islam y el concepto del “oriente” en el Cono Sur, especialmente Argentina. Leeremos obras de los siglos 19 y 20 que representan al oriente, y discutiremos los significados y cambios que la llegada de inmigrantes “islámicos” produjo en la cultura literaria de esta zona de América Latina. Tendremos en cuenta de forma particular que el problema del “oriente” en España y sus colonias es un problema “interno”. Debido a que la península ibérica tuvo una importante presencia musulmana durante toda la edad media (711-1609), en el círculo europeos España fue considerada “islámica” u “oriental” también durante los tiempos modernos. Es así que el Oriente llega a América con la conquista de los españoles “islamizados.” Cross-listed with PLAS
Instructor(s): N. Altschul
Area: Humanities.

Desde el 711 hasta el 1609 de la era cristiana, la península ibérica fue una sociedad multi-lingüística con zonas y ciudades pobladas y/o administradas por miembros de las tres religiones abrahámicas monoteístas. Este curso presenta un panorama de las literaturas hispano-musulmanas, hispano-judías e hispano-cristianas haciendo especial hincapié en el contexto histórico de la península. Los textos en árabe y hebreo serán leídos en traducción inglesa o castellana, dependiendo de su accesibilidad. Taught in Spanish.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.525. Spanish Independent Study.
Instructor(s): E. Gonzalez; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren
Area: Humanities.

AS.215.527. Spanish Internship.
Instructor(s): E. Gonzalez
Area: Humanities.

We will hone our skills in reading novels as political documents and political documents as narrative with revolution and revolt in the background and Marxism as the main informing theoretical legacy. Writings by Cortázar, Vargas Llosa, Euclides da Cunha, Carpentier, Bolaño, Marx, Gramsci, Mariátegui, Fanon, Deleuze, Toscano, Badiou.
Instructor(s): E. Gonzalez.

Close readings in historical context of José Donoso’s El obsceno pájaro de la noche and Casa de campo, Isabel Allende’s La casa de los espíritus, and Pilar Donoso’s Correr el tupido velo, as well as selected essays from Sandra M. Gilbert’s “Rereading Women
Instructor(s): E. Gonzalez
Area: Humanities.
AS.215.623. Literary Patronage in the Age of Cervantes.
This seminar will concentrate on the roles and relationships of patrons and clients, particularly after the death of Philip II (1598). Dedications by authors to their patrons will be discussed and each student will select a particular author as a semester-long project. Authors include Cervantes, Gongora, Quevedo, Lope de Vega, Velez de Guevara and Maria de Zayas.
Instructor(s): H. Sieber
Area: Humanities.

This seminar will be based on close readings of the ‘Lazarillo de Tormes’, selections from Mateo Aleman’s ‘Guzman de Alfarache’, and three of Cervantes’ ‘Novelas ejemplares.’ These texts reflect the impact that Spanish fiction exerted on Golden Age Spanish literary history and on the European novel in general. An extensive bibliography will also be covered.
Instructor(s): H. Sieber

AS.215.635. Spanish Golden Age Theater.
Close reading of plays by lope de Vega, Calderon, Tirso de Molina, and others.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.639. Don Quijote de la Mancha.
The novel will be the focus of the entire seminar. Recent trends in Cervantes criticism, textual issues related to the novel’s publication, biographical, cultural, and social history, and patronage in the Courts of Philip II and III will be topics of discussion and research. The goal is a wide-ranging appreciation and understanding of the novel’s original contexts.
Instructor(s): H. Sieber.

Taking into account the crisis in self (national) representation and the fluidity of identities, the course will delve into the work of major Latin American writers in order to study issues of self-representation across time and specific contexts. The course will begin with the work of Sarmiento and move on to Gilberto Freyre, Rachel de Queiroz and Clarise Lispector. In a second stage the course will delve into Garcia Marquez’ autobiography and Mario Vargas Llosa’s “La tia Julia y el escribidor”, to end with Ernesto Cardenal’s autobiography.
Instructor(s): S. Castro-Klaren.

Four authorships deeply embroiled in translation and the work of Eros and Thanatos will be studied: J. L. Borges (Pierre Menard), J. Derrida (fragments from La carte postale), Javier Marías (Corazón tan blanco), and Andrés Neuman (El viajero del siglo).
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.
Departing from narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.
Instructor(s): S. Castro-Klaren.

From neuroscience to political theories, we will examine early modern and late modern works in literature and critical thought in which dreams and dreaming intersect with power under diverse political regimes and modalities.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.688. Postcolonial Middle Ages.
Taught in English. Postcolonial Studies dramatically changed inquiry on the Middle Ages in the last two decades, mainly in the study of English and French materials. This seminar brings medieval Iberian subjects into the discussion and examines the new critical idioms and approaches of pan-European postcolonial medievalism.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.692. Islamic Spain 711-1609.
Spain was a cultural contact zone throughout the Middle Ages. Emphasizing historical context, this seminar examines the cultures and literatures of Islamicate Iberia from the Muslim conquest to the expulsion of the moriscos. Taught in English. Some readings in Spanish. Open to seniors with permission.
Instructor(s): N. Altschul.

AS.215.695. New and Old Disputations of/for the New World.
This course will focus on readings of original texts—chronicles, reports, treatises, and polemics—and critical commentary on the issues central to the disputation for control and deployment of the meanings of the "new" world and its status in the realm of coloniality. Besides selections from the Inca Garcilaso de la Vega, Guaman Poma, and Ixtlilxochitl, we will read from Jose de Acosta and Bernabe Cobo. Antonello Gerbi’s Disputa Del Nuevo Mundola and Walter Mignolo’s The Darker Side of the Renaissance, along with Enrique Dussel’s El Encubrimento Del Otro and Charles Man’s 1491 will constitute the totality of readings and problematic of the seminar.
Instructor(s): S. Castro-Klaren
Area: Humanities.

This course examines variegated constructions and redeployments of “the middle ages” in postmedieval times. Topics include historical revivals, the national philologies, literary, and filmic reconstructions, postcolonial medievalisms, and theories of temporality, among others. Readings in English and Spanish.
Instructor(s): N. Altschul.

AS.215.710. Medievalisms.
This course examines variegated constructions and redeployments of “the middle ages” in postmedieval times. Topics include historical revivals, the national philologies, literary, and filmic reconstructions, postcolonial medievalisms, and theories of temporality, among others. Readings in English and Spanish.
Instructor(s): N. Altschul.

From telegrams to tweets, the twentieth-century media revolution appears unique; but the magnitude of the revolution is not unprecedented. Another media revolution preceded ours by about 400 years, and coincided with the dawn of modern Europe. This course will examine examples of inflationary media—media whose deployment affects not just the content being transmitted, but also a culture’s entire understanding of reality—from both ages, with special attention to those deployed in the context of emergent early modern nation states like Spain, but with an eye to better understanding the effects and potentials of analogous media practices today.
Instructor(s): W. Egginton.
AS.215.713. What Are Humanities?.
They are one of three established divisions of knowledge. Almost half the departments at our own university are categorized under that division. We all feel we know what the “humanities” are, but how? Is the best answer we have to that question a paraphrase of Justice Potter Stewart’s definition of pornography, “I know them when I see them”? In this seminar we will examine the question of what the humanities are through the close reading of a series of key texts spanning the period from the Renaissance to the twentieth century. In many ways our readings will be necessarily proleptic, since the very category we are interrogating postdates many of the sources we will be analyzing. Our guiding question, however, will be how the specific division of knowledge under which we now organize our disciplines came into being, and what presuppositions that organization implies. The course will be conducted in English but will include, to the extent possible, readings in the original language. Graduate students should be prepared to work in the original language if it is one that they already master (which may include Latin, Spanish, Italian, French, or German) and with translations when not. Readings may include selections by Desiderius Erasmus, Lorenzo Valla, Juan Luis Vives, Juan Ginés de Sepúlveda, Francisco de Vitoria, Bartolomé de las Casas, Denis Diderot, Johann Wolfgang von Goethe, Immanuel Kant, Martin Heidegger, Maurice Merleau-Ponty, and Jean-Paul Sartre.
Instructor(s): W. Egginton
Area: Humanities.

A close reading of Cervantes’ short stories, with concentration on their literary tradition and their relationship to some of his other works. We will also investigate Spanish court society, politics, and history between 1598 & 1621 and critical bibliography.
Instructor(s): H. Sieber.

Graduate students or advanced seniors. This seminar will explore the corpus of political thought in Latin America since independence (1810) to the present by focusing on the discourses that constructed and continue to construct 5 key questions in the negotiation of power in the post-colonial res politica: territory, nationhood, national subjectivation, cultural imagination, justice and regimes of inclusion and exclusion. Readings will include the work of Sarmiento, Euclides da Cunha, Gonzalez Prada, Mariategui, Marti, Revueltas, Paz, Dussel, Ribeiro, Freire, Arguedas, Liberation Theology and Sumaz Kawsay authors.
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.753. Latin American Premodern.
Focusing on the idea that Iberian colonization was premodern in character, this course examines the association of Spanish and Portuguese America with topics like feudality, the orient, despotism, and medieval cultural lifestyles. Among others, theoretical discussions include the medieval-modern divide, (neo)medievalism, settler postcolonial theory and comparative colonialisms, modernization and dependency theories; texts include, among others, Argentinians Domingo Sarmiento and José Ingenieros, Brazilians Euclides da Cunha and Gilberto Freire, Peruvian José Carlos Mariátegui, and Cuban Alejo Carpentier.
Instructor(s): N. Altschul.

AS.215.763. Vargas Llosa and Garcia Marquez: Intertextual crossing and World Literature.
The objective of the course is to read critically key works by these two writers in the context of their self stipulated intertexts--Flaubert and Faulkner, respectively-- and the place such intertextual readings in the contexts of the recent discussions on “world literature”.
Instructor(s): S. Castro-Klaren.

AS.215.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. – In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bolock, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 213.790, and 214.790
Prerequisites: ;
Instructor(s): E. Strowick; J. Neefs
Area: Humanities.

Placed at the crossroads of aethestics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.
AS.215.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshiping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.215.826. Spanish Independent Study.
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren.

Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

AS.216.300. Contemp. Israeli Poetry.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, Dalia Rabikovitch, Erez Biton, Roni Somek, Dan Pagis, Yona Wollach, Yair Horwitz, Maya Bejerano, and Yitzhak Laor. Against the background of the poetry of these famous poets we will study recent developments and trends in Israeli poetry, including less known figures such as Mois Benarroch, Shva Salhoov and Almog Behar. Through close reading of the poems, the course will trace the unique style and aesthetic of each poet, and will aim at presenting a wide picture of contemporary Hebrew poetry.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl
Area: Humanities.

Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.342. The Holocaust in Israeli Society and Culture.
This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.
Instructor(s): N. Stahl
Area: Humanities.

AS.216.370. Israel Through Prose.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled.-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.373. War in Israeli Arts and Culture. 3 Credits.
In this course we will study the various representations of what functions as one of Israel’s most unifying and yet dividing forces: war. By analyzing literary and cinematic works as well as visual art and popular culture we will attempt to understand the role of war in shaping Israeli society, culture and politics. Topics such as commemoration and mourning, dissent and protest, trauma and memory and the changing image of the soldier will stand at the center of the course. Students with a knowledge of Hebrew wishing to do extra work in Hebrew should enroll in section 2 and the fourth hour will be scheduled at a time convenient to the enrollees and instructor.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.398. Zionism: Literature, Film, Thought.
This course studies the relation between Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the history of Zionism and its influence on Israeli culture. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films.Students wishing to do additional work in Hebrew should enroll in section 2 where students will meet for an additional hour at a time TBD and will earn 4 credits for the course.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.
AS.216.412. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.

This course studies literary and cinematic representations of the apocalypse. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and seek to trace the narrative dynamics as well as literary and cinematic means of apocalyptic representations. We will discuss works from various periods, languages, cultures and religions. Among the issues to be discussed: what is the apocalypse, war and the apocalypse, the Holocaust as apocalypse, Biblical apocalypse, post-apocalyptic works, the apocalypse in popular culture, realism, anti-realism and the apocalypse.

Instructor(s): N. Stahl
Area: Humanities.

AS.216.500. Independent Study.
Instructor(s): N. Stahl
Area: Humanities.

AS.216.612. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.

Area: Humanities.

AS.216.800. Independent Study.
Instructor(s): N. Stahl

Cross Listed Courses

History of Art

AS.010.204. Italian Art in the Middle Ages.
This course explores key monuments of medieval art and architecture in Italy from c. 400 until 1350. We will concentrate on historical, functional, and aesthetical aspects that lead to the creation of single monuments and art works. Emphasis is given to the analysis of “sacred space” by means of architecture, painted, and sculptural decoration, as well as ritual performances. Another focus is laid on the emergence on the political dimension of art for the creation of civic identity as well as in the context of the late medieval courts. We raise questions about the importance of materiality and science for the creation of medieval art works.

Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.216. 20th Century Italian Art.
This course will be a critical survey of the major artistic movements in Italy during the 20th century, from Futurism to Arte Povera. Often seen as a secondary location of artistic production, the class will situate the artists working in Italy within a broader historical and global context.

Instructor(s): K. Johnson
Area: Humanities.

AS.010.312. Surrealism.
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA.

Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.

Instructor(s): M. Warnock
Area: Humanities.

With over 1,800 works attributed to him, Francisco de Goya (1746-1828) was constantly inventing, experimenting, and pushing the limits of the representable. This course will begin by examining Goya’s printed oeuvre as one possible itinerary for studying his life and work. The second half of the course will consider alternative narratives for Goya’s career based on genre and theme. Topics will include portraiture, madness, religious painting, and the discovery of Goya by later generations of artists, authors, and filmmakers. The course includes several visits to the print room at the Baltimore Museum of Art. There will be a final paper.

Instructor(s): M. Merback

MSEL Special Collections, to open in April 2014.

AS.010.312. Surrealism.
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA.

Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.

Instructor(s): M. Warnock
Area: Humanities.

AS.010.707. Therapies of Art and Literature in Early Modern Europe.

This seminar examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch’s neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian “wisdom” genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, innovating therapies that were at once sacramental and philosophical, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.

Instructor(s): M. Merback.

AS.010.730. Sacred Images in Early Modern Spain.

This course will look at the dialogue between sacred images and art in Baroque Spain. The status of religious images, the “paragone” or competition between sculpture and painting, and the issue of cult, will all be analyzed through the work of such painters as Velazquez, Zurbaran and Ribera. Cross-listed with the Spanish section of GRLL.

Instructor(s): F. Pereda.

Classics

AS.040.716. Petrarch (1304-74) and the Beginnings of Renaissance Latin.

This course will provide close readings of certain Latin texts by Petrarch, with attention to his letters and to other prose works.

Instructor(s): C. Celenza.
Film and Media Studies

This course provides students an introduction to the discipline of sound studies and its relationship to three eras of historical forms of technological media. Structured around a problematic of emitter, medium, and receiver, it explores how sound was encoded by its creators as a structure of meaning in early media cultures; how it emerged as a means of aesthetic creation with the rise and dominance of the cinematic medium; and last, how it reaches the infatuated individual listener in the new era of mobile earbud audio. Theorizing our relationship to media through the study of sound and history, we find new histories to be explored, as well as new media aesthetics to be negotiated. Through engagement with thinkers such as economist Jacques Attali, auditory and cultural historians Emily Thompson and Jonathan Sterne, film sound theorists Michel Chion and Rick Altman, and sound studies scholar Michael Bull, we construct how technologically mediated listening allows us to understand the historical and theoretical components of sound’s media aesthetics. Recommended Course Background: AS.061.245 for undergraduates or JHU graduate student status (open to all JHU graduate students).
Instructor(s): M. Ward
Area: Humanities.

Anthropology

AS.070.262. Cuban Intellectuals, Cinema, and the State.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Area: Humanities, Social and Behavioral Sciences.

History

AS.100.602. The French Revolution.
This seminar introduces graduate students to the rich historiography of the French Revolution. Topics include: revolutionary origins, political culture and radicalization, friendship and emotion, family and gender, the search for stability after the Terror, Napoleon’s Brumaire coup.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.

Medicine, Science and the Humanities

AS.145.101. Death and Dying in Art, Literature, and Philosophy: Introduction to Medical Humanities. 3 Credits.
This team-taught course offers an introduction to the new concentration in medicine, science, and humanities by approaching the topic of death and dying from historical, anthropological, philosophical, theological, literary and art historical perspectives. Open to freshmen, and sophomores who have already taken either Great Books II or History of Medicine.
Prerequisites: AS.360.134 OR AS.140.106
Instructor(s): C. Wiener; E. Strowick; L. Lisi; M. Merback
Area: Humanities
Writing Intensive.

AS.145.330. Insomnia in Modern Literature, Philosophy, and Film.
Insomnia, while being defined and treated as a sleep disorder in the field of medical discourse, has attracted other kinds of interest, too. Philosophers and writers have been intrigued by insomnia since antiquity. From their perspectives, the capability of being sleepless not only distinguishes humankind from animals but testifies to human awareness in its ceaseless striving for wisdom and truth. Insomnia appears as vigilance, an exalted state of mind well suited for philosophic reflection, intense scrutiny of the world, and sudden inspiration. Yet these moments of sustained productivity are inextricably bound to insomnia’s “dark” side, the fact that sleeplessness tortures the body and exhausts the mind, haunts the weary wakeful and makes him meditate on insomnia. Thus sleeplessness turns into an obsession with the potential to transform thinking into endless introspection, self-absorbed melancholy, if not misanthropic sarcasm. This course will examine representations of insomnia in modern philosophy, literature and film. We will analyze to what extent interpretations of sleeplessness in the humanities differ from those in medical and scientific discourse. Particular emphasis will be placed on the relationship between insomnia, subjectivity, thinking, and writing. Authors and films to be considered will include among others Emanuel Lévinas, Émil Cioran, Franz Kafka, Samuel Beckett, Ernest Hemingway, F. Scott Fitzgerald, Djuna Barnes, Gabriel García Márquez and Insomnia (2002; Christopher Nolan).
Instructor(s): A. Krauss
Area: Humanities, Social and Behavioral Sciences.

Philosophy

AS.150.483. Topics in Jewish Philosophy: Hassidism.
Hassidism is the ecstatic religious movement that emerged in East European Jewry in the mid eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of DOV BER OF MEZIRICH between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon’s report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset.
Instructor(s): Y. Melamed.

Political Science

The seminar will explore to what extent Hegel can be read as contributing to a feminist philosophy. We will focus on Hegelian openings onto the emotional in Phenomenology of Spirit. In addition, we will study feminist philosophers who have drawn on or offered critical readings of Hegel (Irigaray, Butler, Cavarero, Malabou, and others).
Instructor(s): J. Bennett; K. Pahl
Area: Social and Behavioral Sciences.

AS.191.421. A Normal Country German Politics and Identity.
This seminar deals with questions pertaining to the formation of modern German nationalism and national identity through the perspective of German politics and history. Dean’s Teaching Fellowship
Instructor(s): F. Bauwens
Area: Social and Behavioral Sciences.
Humanities Center

AS.300.115. Introduction to Romantic Poetry.
This course offers an introduction to romantic poetry through a comparative approach to three of the movement’s key authors: Friedrich Hölderlin, John Keats, and Giacomo Leopardi. We will work through their main writings in detail along with considerations of their cultural contexts and theoretical and critical approaches to romanticism more broadly.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.116. First Year Hebrew.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Instructor(s): Z. Cohen.

AS.300.215. Second Year Hebrew.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.115 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.300.216. Second Year Modern Hebrew II.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.300.304. Theories of Art and the Novel.
This course involves the close study of key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities.

AS.300.419. 1966 before and after: French theory.
The “Languages of Criticism” conference held at Hopkins marked a watershed moment in the history of literary studies and redefined, for many scholars and intellectuals, the nature of humanistic inquiries. This course involves the close study of key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities.

Interdepartmental

Program in Latin American Studies

AS.361.130. Introduction to Latin American Studies.
This course provides an introduction to the study of Latin American cultures and societies from the vantage point of city life and urban representation. We will engage literatures from a variety of disciplines to discuss how issues such as modernization and urbanization processes; tradition, identity and ethnicity; class, marginality and urban social movements; gender and the changing status of women; arts and literature are experienced and represented in the Latin American urban environments.
Instructor(s): E. Gonzalez; G. Paquette; V. Procupez
Area: Humanities, Social and Behavioral Sciences.

Center for Language Education

AS.384.115. First Year Hebrew.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Instructor(s): Z. Cohen.

AS.384.116. First Year Modern Hebrew II.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies.
Prerequisites: AS.384.115
Instructor(s): Z. Cohen.

AS.384.215. Second Year Hebrew.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.115 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.216. Second Year Modern Hebrew II.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.217. Second Year Hebrew.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.218. Second Year Modern Hebrew II.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.315. Modern Hebrew.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.
AS.384.315. Third Year Hebrew.
Designed to maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.216 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.316. Third Year Modern Hebrew II.
Designed to: maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Recommended Course Background: AS.384.315 or permission required. Cross-listed with Jewish Studies.
Prerequisites: AS.384.315
Instructor(s): Z. Cohen
Area: Humanities.

Program in Museums and Society
Explores the material culture of knowledge through transformations in the technologies and arts of communication, taught entirely from rare books, manuscripts, and artifacts in JHU libraries and museum collections.
Instructor(s): E. Havens
Area: Humanities.

Explore the material culture of "wonder" from the Renaissance to the Enlightenment in literature, science, and art, with Hopkins’ rare book collections and the Walters Art Museum. M&S practicum course.
Instructor(s): E. Havens
Area: Humanities.

For current course information and registration go to https://isis.jhu.edu/classes/

AS Humanities Center Courses
AS.100.287. B'More: Baltimore's Beginnings.
This course will explore the founding and early history of Baltimore, highlighting Baltimore’s role in the War of 1812 and the way Baltimore history was enshrined in what became America’s national anthem. Throughout, we will visit museums of Baltimore history and consider how Baltimore history is conveyed to the public.
Instructor(s): S. Gamble
Area: Humanities.

AS.300.100. B'More: Homelessness.
Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. In Baltimore, as in any major city, many urban poor find themselves without a home and without shelter. For these individuals, life on the streets is desperate and dangerous. Students will read, discuss, and debate about the causes and implications of homelessness in Baltimore, and explore present policies and potential solutions. Guest speakers include homeless rights advocates from both local government and community groups. Students will also participate in service directly affecting homeless persons.
Prerequisites: Students may enroll in one B'More course only.
AS.371.188 OR AS.371.189 OR AS.271.119 OR AS.100.285 OR AS.140.318 OR AS.360.108 OR AS.360.122 OR AS.360.171
Instructor(s): T. Gottbrett
Area: Humanities, Social and Behavioral Sciences.

AS.300.102. Great Minds.
Introductory survey of foundational texts of modern Western literature, thought and cinema. This semester will include works by Descartes, Marx, Dostoevsky, Tolstoy, Woolf, Wittgenstein, Heidegger, Arendt, and Pierre Hadot, and films by Deiza Vertov and Carl Theodor Dreyer. The course is taught in lectures and seminar discussions led by the course faculty.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati
Area: Humanities.

AS.300.108. The Uncanny.
Freud describes the uncanny as a strange familiarity. Disturbing for the subject which discovers its own ignorance, it is a way to reconsider what one takes for granted as “home”. We’ll analyze this experience through philosophy and psychology, literature and film.
Area: Humanities.

This course is an interpretive and critical engagement with a number of social, political, and ethical issues that are raised in five Iranian movies made during decades since the 1979 Iranian Revolution until present. We will deal with immanent problems in the form and structure of the movies in their relation to the actual and open problems in social and political structures in Iran. We will watch works by Abbas Kiarostami, Asghar Farhadi and others.
Instructor(s): O. Mehrgan
Area: Humanities, Social and Behavioral Sciences.

AS.300.133. Freshmen Seminar: Women of Epic Fame in Literature and Drama, 800 BCE-1650 CE.
From Homer’s Odyssey to Shakespeare’s Antony and Cleopatra, powerful women who achieve their ends by working from within the system are often overlooked or not fully explored. Our readings and discussions will foreground these women of fiction, while we also consider the social conditions of their living contemporaries. Readings will include: Homer’s Odyssey (Penelope); Virgil’s Aenead (Dido); Dante’s Inferno (Beatrice); Milton’s Paradise Lost (Eve), and several accounts of Cleopatra in plays by Shakespeare and his contemporary women writers. Cross listed with Theater Arts, Writing Seminars, and WGS.
Instructor(s): E. Patton
Area: Humanities.
AS.300.139. Introduction to Intellectual History.
This course offers a conceptual and historical introduction to Intellectual History. What makes the “history of ideas” different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call “ideas”? In what sense do they have a history? These are examples of the kind of questions addressed in the course.
Instructor(s): P. Marratí; S. Carmel
Area: Humanities.

AS.300.143. Introduction to Comparative Literature.
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.200. Idealist Aesthetics: Kant to Adorno.
This course deals with major aesthetic categories in (German) idealist aesthetics. Starting with Kant’s analytic of the beautiful, we examine the idealist concepts of the artwork (Goethe, Schiller, Hegel), and its relation to history, society, and truth (Adorno). To do so, we engage with artworks, also trying to show why and where these categories are set aside in the avant-garde and contemporary aesthetic culture.
Area: Humanities.

AS.300.201. Film and Philosophy.
Philosophers have thought about the nature of freedom, beauty, and time for millenia. But what can film teach us about these ideas? This course will stage a dialogue between philosophers like Friedrich Nietzsche and William James and films by directors such as Woody Allen, Wes Anderson, and Stanley Kubrick. Our goal is not only to use philosophy in order to better appreciate films, but also to use films in order to resolve some of the most persistent questions posed in the history of philosophy.
Area: Humanities.

AS.300.202. Life and Form in Modern Thought.
The idea of form-giving and law-giving is essential to modern thought, so is the conflict between forms and individual and collective lives. The course is a philosophical treatment of the concept of form in four spheres: aesthetics, morality, politics, history. We will read and discuss texts by, among others, Kant, Nietzsche, Lukacs, Benjamin, Schmitt, Adorno and interpret certain art- and literary works by Balzac, Malevich, Stevens, Kafka.
Instructor(s): O. Mehrgan
Area: Humanities.

AS.300.207. A Mix of Voices: Chinese Literatures from Late Imperial through Modern.
This course examines the arts and culture of China from 1368-2000, with major focus on writers. We will begin with artists of the Ming (1368-1644) and Qing (1644-1911), focusing first on canonical voices: court poets, authors of classical fiction, literati essayists, calligraphers and painters. Outside of the court urban artists observed a dramatically changing world around them. Fiction, drama, memoir and mass-produced arts explored new social alignments and freedoms. The twentieth century brought revolution and party governance, along with arts born of mass media: periodicals, film and wood block print. Finally, post-Mao avant-garde artists both retrieved traditional aesthetics and explored new venues and visions. This look at the literature of China will require both close reading of texts as well as an interdisciplinary examination of the cultural factors that shape literatures.
Instructor(s): V. Cass
Area: Humanities.

AS.300.213. Homelessness in America.
This course examines homelessness in the United States from multiple perspectives. Students will hear first-hand from individuals who have experienced homelessness as well as experts in the field.
Instructor(s): T. Gottbreht
Area: Humanities.

AS.300.215. Monsters, Miracles, and Men from Mars.
From medieval mystical visions of the Godhead to modern accounts of alien abductions, encounters with the supernatural and paranormal have long been sources of terror and amazement. This course explores visual and narrative representations of these encounters. It is a media-intensive course that juxtaposes a variety of sources from the medieval period, the space age, and contemporary film and television.
Instructor(s): K. Boyce-Jacino; T. Golan
Area: Humanities.

AS.300.220. Astrofuturism at the Final Frontier.
From Sputnik to Sun Ra to Star Wars, the middle of the twentieth century was consumed by an enthusiasm for all things outer space. This course will examine Space Age popular culture - primarily from the astrofuturism movement, which believed in the endless utopian possibilities of space. We will work with a diverse constellation of materials, from 2001: A Space Odyssey to Star Trek, and beyond.
Instructor(s): K. Boyce-Jacino
Area: Humanities.

AS.300.228. Brain and Society.
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.
AS.300.229. Film and Philosophy.
This course offers an introduction to basic concepts in the theory of film and classic problems in the history of philosophy. Our goal is to stage a dialogue between philosophy and the history of modern film in order to see the unique ways that cinema expresses ideas like the nature of beauty and human freedom. The course is organized chronologically as we watch films, both foreign and American, ranging from the 1940s to 2010s.
Instructor(s): L. McGrath
Area: Humanities.

AS.300.230. The Mystical Tradition.
Is the mystic a thinker, a poet, a heretic, or a saint? Is mysticism a branch of speculative philosophy? A secret teaching for reaching oneness with God? A mode of saying the utterly unsayable? These questions we will address by traversing the realms of Sufism, Kabbalah and negative theology, reading dialogues, poems, commentaries and sermons, written by men and women, Greeks and Jews, Muslims and Christians, from Antiquity to Early Modern times.
Instructor(s): M. Buijs
Area: Humanities.

AS.300.231. Introduction to Comparative Literature.
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities.

This course has set itself a double goal: reviewing the major intellectual traditions in the volatile political context of modern Iran, and reflecting on the concrete experience of intellectual life in contemporary Iran. We will examine the form and the specific contents of this experience, how it is historically informed by politics and how it politically relates to history. Wrestling with the West is at the heart of this experience.
Instructor(s): O. Mehrgan
Area: Humanities.

AS.300.235. Freud’s Concept of Anxiety.
We will examine the evolution of Freud’s concept of anxiety, explore its origins, and consider its impact on post-Freudian psychology.
Instructor(s): A. Rot
Area: Humanities.

AS.300.239. Philosophy and the Emotions.
We will read some of the most important texts in the history of the philosophy of the emotions, including works by Plato, Descartes, Spinoza, Schopenhauer, Heidegger, and Freud. We will discuss themes such as love, shame, apathy, anxiety, the mind-body problem, the notion of spirit, the notion of mood, and the overall problem of the distinction between emotion and reason.
Instructor(s): A. Rot
Area: Humanities.

AS.300.241. The Literature of the Everyday.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read closely a set of novels by Flaubert, Mann, Dickens, Zola, Tolstoy, and Woolf from the period between 1850 and 1950 in which the development of realism reaches climax. These novels explore the nature of work, family, the body, consciousness, and the changing relation between individual and tradition in modernity. We will situate these novels in their social, historical, and literary contexts, and establish a set of terms for the formal study of the novel as a genre (plot, character, setting, narrative, etc.). (Students of all levels who are interested in literature are encouraged to take this course.)
Instructor(s): Y. Ong
Area: Humanities.

This course explores the history of the bicycle from its invention in the early nineteenth century to the early twentieth century, when it was easily accessible and widely used by people living in cities and towns. During this period, the bicycle became a focal point of cultural anxieties about gender, class, and the city itself. Using mostly 19th-century sources, we will study the history of the bicycles construction and production as well as its reception in Victorian cities.
Instructor(s): K. Boyce-Jacino
Area: Humanities.

AS.300.281. Sovereignty and Modern Drama.
This course is interested in the relationship between sovereignty and drama. By placing the common individual center stage, twentieth-century modern drama achieved a theatrical revolution. And yet the modern theater has not completely shed itself of its former preoccupation with kings and their undoing, as evidenced by the royal figures who show up in plays by influential playwrights as various in their political and artistic commitments as Strindberg, Ibsen, Jarry, Yeats, Shaw, Pirandello, O’Neill, Anouilh, Brecht, Sartre, Ionesco, and others. This course seeks to examine how, when, and why royal personnages are employed in modern drama. What does the theater have to say about sovereignty and authority? About humanism and anti-humanism? Is theater linked to sovereignty? If so, how? This course will consider the political, philosophical, and theological critiques implicit in the plays where sovereigns are found, paying close attention as well to the problem of theatricality. Dean’s Teaching Prize Fellowship Course.
Instructor(s): N. Jerr
Area: Humanities.

"In America the natural man has triumphed over the imported book," announced José Martí. The call to cast off the literary forms of Old Europe echoed throughout the hemisphere during the 20th century, as poets sought to write a new kind of "American" poetry. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems, such that it has become the "post-epic." We will investigate the long poem in 20th-century North and Latin America, from the encyclopedic Cantos of Ezra Pound and the sweeping Canto General of Pablo Neruda to briefer works by Derek Walcott and Gwendolyn Brooks, and fragmented series by Gertrude Stein and César Vallejo. We will read texts including Charles Olson's sprawling history of America, The Maximus Poems, and William Carlos Williams's Paterson; Aimé Césaire's Notebook of a Return to My Native Land and Kamau Brathwaite's The Arrivants; Elizabeth Bishop's cartographic North & South; Octavio Paz's single, 584-line, cyclical sentence, Sunstone; and Vicente Huidobro's careening, linguistically playful Altazor. As we test our definition of "post-epic" against these texts, we will consider whether the term may be applied equally to the heroic tale and the "open field" poem. To situate the long poem in history, we will examine changes in poetic form alongside questions of modernization and globalization, technology and development, and socio-political transformation.

Area: Humanities.

AS.300.290. Freshman Seminar: Shakespeare and his "Goddess": real and imaginary lovers in the poetry and drama of early modern Europe.

Shakespeare's description of his lover's eyes as 'nothing like the sun' is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. Incorporating music and drama, we will examine that sonnet tradition from the perspective of Shakespeare and his contemporaries, tracing both the historical roots of the Shakespearian sonnet form its influence on the music of the present day, and finishing the semester with Shakespeare's The Taming of the Shrew, a play that further illustrates and problematizes Shakespeare's "goddess" reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambera, and Gaspara Stampa; their French counterparts, Maurice Scève, Louis Labé, Joachim du Bellay and Pernette du Guillet; and later reflections on the sonnet by Shakespeare and his English contemporaries: Sir Philip Sidney; Sidney's niece, Mary Herbert, Lady Wroth; John Donne; Robert Southwell; and Katherine Phillips. All continental works will be read in translation.

Instructor(s): E. Patton
Area: Humanities.

This interdisciplinary seminar examines the concept of home and the condition of exile in 20th century Russian and Soviet culture from a variety of theoretical and methodological perspectives. Students will be introduced to classics of Soviet dissident, exilic, and official literature (Akhatova, Brodsky, Nabokov, Bulgakov, Zamyatin), Soviet films (including Tarkovsky's Solaris), as well as key theoretical texts about what it means to be "at home." Open to freshmen and sophomores with approval of professor.

Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.301. Life, Vitality, Thought. Philosophy and the Natural Sciences in Nineteenth Century Europe.

Last year neuroscientists at MIT shined an optogenetic light on brain cells in order to artificially stimulate memories. If every detail of our past has a particular location in the brain, then we could alter, and even destroy, memories. Does this mean that humans are like machines whose history can be erased as easily as we delete files on a computer? Or are memories, like consciousness, not so easily reducible to brain structures? This class will examine how these and other questions shaped the history of modern biology and experimental psychology beginning in the nineteenth century. We will read the works of prominent biologists, psychologists, and philosophers who were all involved in a rich debate over the nature of life and thought.

Instructor(s): L. McGrath
Area: Humanities.

AS.300.303. Multum in Parvo: Forms of Short Fiction.

The theory and practice of reading brief narratives, from the parable to the post-modern short story. We will be attending to the rhetorical and ethical issues that are raised within the compass of such fictions, with consideration of some specific forms that have shaped the development of recent literary tales: the case history, portraits of the artist, fictions of detection, and certain enduring philosophic myths. Time permitting, we'll also examine how a few of our narratives have been translated into another medium such as film.

Instructor(s): R. Macksey
Area: Humanities.

AS.300.304. Philosophy of Religion.

This course explores the rationality of religious beliefs and the rules that govern their context in religious life. Topics explored include faith and reason, religious experience, religious language and proofs for God’s existence.

Instructor(s): D. Dubois
Area: Humanities.

AS.300.305. Islamic Philosophy.

This course is an introduction to key concepts and seminal texts of Islamic Philosophy in the classical period, running from the 7th to the 13th century. Although instrumental to the transmission of Greek philosophy and to the rise of modern philosophy in the western world. Islamic philosophy is not merely a conduit of transmission. Philosophers on Islamic lands, offered original philosophical solution to both old problems, and new problems that arose with monotheism. We will begin our examination of the specificity of Islamic Philosophy by situating it in its historical and political context. We will have to tackle fundamental questions: How did philosophers who wrote in Arabic translate and transmit Greek philosophical texts? What does it mean to do philosophy within an Islamic context? Is it not an oxymoron to talk about philosophy within a religious context? The course is divided into three sections that treat of three general fields: politics, metaphysics and psychology and discusses the major Philosophers of the classical period, with particular attention paid to the work of Alfarabi, Avicenna and Averroes.

Instructor(s): L. Ferhat
Area: Humanities.

AS.300.310. Introduction to Psychoanalysis.

One of the most controversial intellectual endeavors of the 20th century, psychoanalysis is a theory about human nature, motivation, behavior, development and experience, as well as a clinical method of treatment for psychological disorders. We will read texts by Freud, Jung, Ferenczi, Rank, Horney, Klein, Anna Freud, Lacan, and others.

Instructor(s): O. Ophir
Area: Humanities.
AS.300.311. Sovereignty and Modern Drama.
What does the modern theater have to say about sovereignty and authority? Does this align with or challenge the political discourse? How is theater linked to sovereignty? Considering a wide range of plays, this course explores the ways the notion of sovereignty persists as a theme in modern drama despite its commitments to the common, everyday hero. We will focus on the political, philosophical, and theatrical critiques implicit in the plays where sovereigns are found. From the short chamber plays of Yeats based on Noh drama, to the epic theatre of Brecht, from the Abstract drama of Jarry and the Absurd theatre of Ionesco, to the Naturalism of Strindberg and the Realism of O'Neill, from the meta-theatricity of Pirandello to the Minimalism of Beckett, students will encounter a variety of artistic styles and commitments, giving them an overview of many of the major movements that mark modern drama. Dean's Teaching Fellowship Instructor(s): N. Jerr
Area: Humanities.

AS.300.312. Imagining Revolution and Utopia.
Examines theories of revolution and utopia and responses in literature, art and film. Primary case study is Russia and the Soviet Union, with comparative look at influential European works and contemporary politics. Topics include gender and the family, terror, communism and communitarianism, and the avant-garde in art and film. Cross listed with Studies of Women and Gender, and Sexuality, and Film & Media Studies Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.317. Russian Novel.
Russian authors began writing novels in the shadow of counterparts in Western Europe, and thus had the chance to experiment with the form and scope of genres and themes they found in European literature: Alexander Pushkin's novel in verse Eugene Onegin pays homage to Byron's Don Juan and satirizes Richardson's Pamela; Mikhail Lermontov's nested stories A Hero of Our Time owes a debt to Romantic and gothic fiction, and Nikolai Gogol's Dead Souls brings Dante's Inferno to the Russian provinces. From these literary forefathers emerged the likes of Feodor Dostoevsky and Leo Tolstoy, who made a lasting impact on world literature with their psychological and philosophical novels. This course examines the Russian novel in its historical and cultural context alongside contributions of Russian literary criticism in defining novel form and genre. Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.318. The Modernist Novel: Mann, Woolf, and Joyce.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century - Thomas Mann, Virginia Woolf, and James Joyce -- who explored and exploded narrative techniques for depicting what Woolf called the "luminous halo" of life. Selected novels include: Death in Venice, Buddenbrooks, Jacob's Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses. Instructor(s): Y. Ong
Area: Humanities.

AS.300.319. Skepticism and Theology.
This course examines the relation between the history of philosophical theology and the foundations of modern skepticism by focusing on their mutual point of departure: the concept of the human being as an essentially "finite" being "limited" in its capacity to know others, the world, and God. Instructor(s): T. Dika
Area: Humanities.

AS.300.322. Reason, Religion, and Modernism in Europe.
Amidst the rise in psychological research in France and the secular reforms of the Third Republic, French philosophical and religious thinkers upended their Catholic tradition in the late nineteenth century. This seminar explores the Modernist turn in Catholicism, which drew on scientific advancements in order to challenge Church hierarchies and fundamentally transform Catholics' personal relationship to God. Our objective is to examine the intersection of science, faith, and society in historical and philosophical perspective. Instructor(s): L. McGrath
Area: Humanities.

AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies.
Comedy and musical comedy film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare films of the era in a variety of genres (musical, epic, Western, drama), examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender. Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.326. Comparative Modernisms.
Dynamic, unprecedented literary innovation marks the first part of the 20th century. This course moves from Dadaism, Surrealism, and the Harlem Renaissance, through Anglo-American, Caribbean, and Brazilian modernisms, and the Latin American vanguard. We’ll investigate literary experimentation in connection with the visual arts, modernization, colonialism, race, gender, and war. We will read novels, poetry, and essays from major writers who may include Apollinaire, André Breton, Marcel Proust; Gertrude Stein, HD, Djuna Barnes, Elsa von Freytag-Loringhoven, Mina Loy, T.S. Eliot; James Joyce, W.B. Yeats; Langston Hughes, Zora Neale Hurston, Jean Toomer; Claude McKay, Aimé Césaire, Langston Hughes, Zora Neale Hurston, Jean Toomer; Claude McKay, Aimé Césaire, Louise Bennett, Jean Rhys, Nicolás Guillén; Oswald de Andrade, Julio Cortázar, Oliverio Girondo, Jorge Luis Borges. Instructor(s): R. Galvin
Area: Humanities.

AS.300.327. Antigone: All the World's a Stage.
Best known from Sophocles' plays, Antigone - with her fierce familial loyalty and religious piety, her opposition to the law, and her willingness to sacrifice herself and her future marriage - has held a special fascination for modern and contemporary thinkers, showing up not only in theatrical (re)productions, but also as an exemplary figure for philosophers, political and psychoanalytic theorists, feminist thinkers, and novelists. What is more, her influence has not been limited to the Western tradition, for she has been reconceived on stages all over the world: Europe, the Americas, Asia, and Africa. Tracing key moments of the reception of Antigone from the nineteenth-century to the present, this course will explore what it is about Antigone that has proven so irresistible to playwrights and thinkers with a wide variety of political and aesthetic commitments. Giving particular attention to performances of Antigone around the globe, we will address how these versions negotiate the stakes of adaptation. Instructor(s): N. Jerr
Area: Humanities.
AS.300.333. Melancholy in Science, Literature, and Film.
This course explores the manifold nature of melancholy from an interdisciplinary perspective that combines sciences, history of medicine, and the arts. Defined by Greek medicine as the excess of black bile, melancholy, in its long history, has been seen as disease of the soul, state of intellectual grace, or psychological condition. The course will examine chronologically the development and variety of the meanings of melancholy between medical texts, visual representations, poetry, psychoanalytic theory, and films. The works analyzed will include, among others, those by Galen, Robert Burton, Albrecht Dürer, Shakespeare, Cervantes, Baudelaire, Freud, Lars von Trier.
Instructor(s): E. Fabietti
Area: Humanities.

AS.300.334. Comic Evolution: Stages in Comedy.
An eclectic tour of comic forms and theories from classical antiquity to contemporary practice. Although the textual focus will be on stage comedy, we’ll also consider the comic in other forms & media—film [Keaton], comic strip [Herriman], and parodic satire. Some of the familiar questions on the agenda: topical vs. ‘perennial’ material, the social functions of comedy, the shelf-life of humor, butts & scapegoats, symmetries & asymmetries between comedy and tragedy, verbal & non-verbal comic devices, the general rhetoric of comedy, & the possibility of a GUT.
Instructor(s): R. Macksey
Area: Humanities.

AS.300.337. The Rise of the Modern Short Story.
Instructor(s): R. Macksey
Area: Humanities.

AS.300.338. Comic Evolution: Stages in Development of Comedy.
An eclectic tour of comic forms and theories from classical antiquity to contemporary practice. Although the textual focus will be on stage comedy, we’ll also consider the comic in other forms and media—film [Keaton], comic strip [Herriman], and contemporary satire. Some of the familiar questions on the agenda: topical vs. ‘perennial’ material, the social functions of comedy, the ‘shelf life’ of humor, butts & scapegoats, symmetries & asymmetries between comedy and tragedy, verbal and non-verbal comic devices, the general rhetoric of comedy, and the possibility of a Grand Unified Theory. (Final paper.)
Instructor(s): R. Macksey
Area: Humanities.

AS.300.340. Thinking the Body/The Body Thinking: Introduction to Aesthetics from the Perspective of Dance.
In the nineteenth and twentieth centuries, dance has developed into a serious art form. However, philosophers of art have paid little attention to dance. Why is this the case? Is dance perhaps too corporeal or too unreflective or in some other way too marginal to be a fruitful topic for philosophical reflection? Or does the failure of mainstream philosophical aesthetics to take dance seriously perhaps signal unacknowledged biases in such approaches? Might dance, the art form whose medium is the human body, have something to contribute to current philosophical interest in rethinking the human body and, particularly, the relation between mind and body? Seeking responses to questions such as these, this course provides an introduction to the place of dance in the philosophy of art. The first half of the course examines portions of seven foundational texts in the philosophy of art and culture as well as philosophical accounts of dance that draw on these foundational texts in a range of ways. The aim is not only to explore dance from the perspective of traditional aesthetic theories, but also to explore such traditional theories from the perspective of arguably the art form which they have been most resistant to treating seriously. This oblique angle of entry into mainstream approaches to general aesthetic topics will bring into focus important questions that might be easily overlooked if one examines such theories only in light of their preferred examples of art. The second part of the course explores dance as itself a mode of philosophical reflection, examining how the work of choreographers such as George Balanchine, Jerome Bel, William Forsythe, Crystal Pite and Yvonne Rainer explore the possibilities and limits of their medium: the human body. One proposal will be of particular concern: Might such instances of the body thinking bring into focus more adequate ways of thinking about the body?
Instructor(s): K. Boyce
Area: Humanities.

AS.300.343. Philosophy and Literary Form.
This course examines the difference literary form can make to the shaping of philosophical content. Philosophers have tended to treat literary form as merely ornamental. For this reason, they have often underestimated the philosophical significance not only of certain works of literature but also the literary form of even those works uncontroversially considered to be philosophical. This course explores the philosophical significance of literary forms in both kinds of works. The first half examines how and why Anglo-American philosophers have incorporated the interpretation of individual literary works into their philosophical writing. We will concentrate on three works of literature—Ibsen’s A Doll’s House, James’s The Golden Bowl and Wordsworth’s Prelude—each of which has attracted significant philosophical attention. The second half of the course examines how philosophers have brought literary analysis to bear in order to illuminate the philosophical achievement of certain canonical philosophical texts. We will concentrate on three literary forms—dialogue, meditation and confession—as these forms are instantiated by three works of philosophy: Plato’s Republic, Descartes’s Meditations and Wittgenstein’s Philosophical Investigations.
Instructor(s): K. Boyce
Area: Humanities.
AS.300.345. Madness Interpreted - The Schreber Case and its Many Readings.
Daniel Paul Schreber, the fin-de-siècle Senatspräsident of the Saxon Supreme Court, became the most famous psychiatric patient in the world. His 1903 Memoir of My Nervous Illness is known for being the most written about account of madness in Western history. His rich psychotic, delusional world, as expressed in the bizarre, at times comic, at times painful, Memoir, with its unique cosmology, private theology, extraordinary creatures, transgressed sexuality, and cataclysmic vision of the universe, was first analyzed by Freud in 1911, but later inspired voluminous commentary by psychoanalysts, historians, philosophers, theologians, literary critics, essayists, scholars in political science and in queer studies. Whether he was paranoid schizophrenic, a victim of traumatic abuse, a solipsistic philosopher, a proto-fascist, or a cultural hero, his memoir lends itself to all these interpretations. Readings will include: Schreber, Freud, Klein, Lacan, Deleuze and Guattari, Canetti, de Certeau, Lingis, Lyotard, Santner, among others. Cross listed with GRLL, History.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.350. Skepticism on Stage and Page.
This course explores influential interpretations of and responses to skepticism in literature, philosophy and theater. Case Studies will include: Descartes, Ibsen, James, Kafka, Kierkegaard, Poe, Shakespeare, and Wittgenstein.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.351. The Phenomenon of Boredom from an Interdisciplinary Perspective.
We will examine the history, philosophy, sociology, and psychology of boredom and consider the characteristics, concerns, and methods of the different fields and disciplinary frameworks in which this phenomenon has been studied.
Instructor(s): A. Rot
Area: Humanities.

AS.300.352. Fictions of Autobiography.
A comparative survey of autobiographical writing as a creative process. Beginning with a few classic examples (Augustine, Petrarch, Montaigne, Rousseau), the seminar will proceed to more recent adventures in the first-person singular. Modern instances will include self-creation in several genres and media, including narrative, dramatic, and cinematic forms. Seminar meets at 107 St. Martin’s Road.
Instructor(s): R. Macksey
Area: Humanities.

AS.300.353. Present Mirth: Stages of Comedy.
A comparative survey of presentational comedies from Aristophanes to Beckett on stage and screen, with some attention to to the vexed question of theories of comedy [no laughing matter].
Instructor(s): O. Mehrgan; R. Macksey
Area: Humanities.

AS.300.354. From Literature to Film - the case of Israeli Cinema.
This course explores the differences and similarities between two artistic mediums: literature and cinema. Our case study will be the interesting transformation of Hebrew fiction into Israeli films-- a dominant phenomenon in Israeli cinema since its very beginning. Our main framework will be narrative theories, but we will also consider the specific historical, ideological and geo-political aspects involved in this transformation. By comparing the two artistic modes and studying the transformation of 5 literary works into films, students will become familiar with the history of modern Hebrew literature, contemporary Israeli cinema, and the relationship between these two artistic mediums. Cross-listed with Jewish Studies, Film and Media Studies, and Writing Seminars
Instructor(s): N. Stahl
Area: Humanities.

AS.300.355. Forms of Modern Fiction.
A comparative tour of modern narrative forms from 3 continents. The emphasis is on the development of shorter fictional models, though some of the founders and innovators are better known for their novels. The emphasis will be on the emergence new structural, rhetorical, and thematic concerns, including adaptation to other media. There will be an optional hour for queries and discussion TBA.
Instructor(s): O. Mehrgan; R. Macksey
Area: Humanities.

AS.300.357. Homelessness in America: Interdisciplinary and Critical Perspectives.
This course examines innovative research, writings, and other media concerning homelessness in the United States, with special emphasis on critical/philosophical and interdisciplinary approaches that shed new light on the issue.
Instructor(s): T. Gottbreht
Area: Humanities.

AS.300.359. Critical Thinking and its History.
This course aims at discussing different conceptions of “critique” and “critical thinking” in modern and contemporary philosophy. Readings include: Descartes, Kant, Adorno, Foucault, Arendt, Said, Butler.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.361. Fiction & Case History: Constructive Reading.
A comparative seminar in the attentive reading of short fictions and other narratives. Attention to the reader’s share as well as that of the author in the construction of stories; consideration of the diagnostic and therapeutic uses of the imagination.
Instructor(s): R. Macksey
Area: Humanities.
AS.300.362. Beauty and the Predicate Calculus.

Frege’s development of a predicate calculus made possible the evolution of a distinctively “analytic” tradition in philosophy. But arguably that tradition has failed to fully appreciate the implications of this important development. The course will begin by examining how Frege himself understood the importance of his advance. It will then consider arguments to the effect that some of the most influential accounts of mind and action—namely those shaped by Donald Davidson—fail by failing to take this advance adequately into account. In light of these arguments in philosophy of mind and action, we will reconsider the implications of Frege’s advance for aesthetics. The principle aim of the course will be to construct an account of art and criticism that takes those implications fully into account. Efforts to construct alternatives that overcome this purported failing will be examined.

Instructor(s): K. Boyce
Area: Humanities.

AS.300.365. Desire in the Fin de siècle.

This course examines the obsession with desire at the turn of the 20th century in literature, drama, philosophy and social thought and its implications for notions of self and community in modernity. We will read comparatively across European, Russian and American cultures, including Stoker’s Dracula, Hamsun’s Hunger, plays by Chekhov, Strindberg, Ibsen, Wilde, and stories by Tolstoy, Gorky, Chopin and Larsen.

Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.366. Russian Avant-Garde Cinema.

Russian cinema was born out of the intense artistic experimentation of the fin-de-siècle avant-garde and developed in a climate of dramatic political and cultural change in the twenties and thirties. While subject to draconian censorship in the Soviet period, it nonetheless engaged in active dialogue with the film industries of Western Europe and America and had a lasting impact on world cinema. This course examines the extraordinary flourishing of avant-garde cinema in the Soviet Union in the 1920s and 30s including films by Eisenstein, Vertov, Pudovkin, and Dovzhenko, their theoretical writings, and their far-reaching influence on film and film theory. All readings in English, films subtitled in English.

Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.367. Seeing Like a Woman.

This seminar examines the problems of female desire, subjectivity, spectatorship and performance in fiction, poetry, memoir and film from a variety of cultures and theoretical perspectives. Readings include: de Beauvoir, Riley, Butler, Cixous, Tolstoy’s “Family Happiness,” Woolf’s Orlando, Larsen’s Passing; Poetry by Moore, Bishop, Plath, Akhmatova, Tsvetaeva and Szymborska. Films by Deren, Ophuls, Hitchcock, Potter, Campion, Akerman, Varda, Denis.

Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.369. The Bible and Philosophy (Introduction to Intellectual History).

This course will examine several attempts by ancient, modern, and contemporary thinkers to come to terms with the Biblical concept of creation and providence, revelation and prophecy, law and election, apocalypse and eschatology, with a special emphasis on the first articulation of the idea of Christian universalism, faith and justification, time and eternity, sacrifice and the body. Readings will include the entire corpus of St. Paul’s authentic letters, the major Scriptural passages on which he draws, but also selections from Philo of Alexandria, St. Augustine, Spinoza, Nietzsche, Karl Barth, Jakob Taubes, Alain Badiou, Giorgio Agamben, and others.

Instructor(s): H. de Vries
Area: Humanities.

AS.300.370. What Computers Can’t Do and other Controversies.

A critical examination of recent debates over the interface between the humanities and the natural sciences. Topics include: computer models of the mind; consciousness and the brain; affect theory and the neurosciences; mirror neuron theory; literature and the natural sciences; the new trauma theory.

Instructor(s): R. Leys
Area: Humanities.

AS.300.377. Cinema and Philosophy.

Why is contemporary philosophy so interested in cinema? Do movies have anything to say about philosophical problems? What are the most productive ways of bringing films and philosophy into conversation?

Instructor(s): M. Shuster
Area: Humanities.

AS.300.383. History of Madness from the Bible to DSM-V.

Madmen, lunatics or the insane, have seen an extraordinary variety of responses and attitudes across the centuries. Whether seen as a “true” phenomenon or as socially constructed “madness” was defined and treated, examined and controlled, diagnosed and “cured” according to the spirit of the time. This course will follow the varied social imageries of “madness” throughout Western history, from the Bible to the contemporary and controversial Diagnostic Statistical Manual (DSM) in its most recent 5th edition. Alongside primary texts by Hippocrates, Avicenna, Pinel, and Freud and secondary texts by Michel Foucault, Ian Hacking, Edward Shorter, and Elaine Showalter, among others, we will acquaint ourselves with first-person accounts of “madness” and its different forms of treatment, ranging from lunatic asylum, through electric-shock treatments and lobotomies to psychoanalysis. The course will explore the interaction between the historical and social, scientific and political as well as economical factors that have shaped the views of “madness” and its treatment.

Instructor(s): O. Ophir
Area: Humanities.

AS.300.384. Modern Korean Literature and Film.

We will examine twentieth century Korean culture through short stories that are canonical in modern Korean literature and through a series of films associated with New Korean Cinema. One aim of the course is to gain a sense of the history against which the literary and cinematic artifacts obtain their representative artistic status. A second aim is to inquire into the relationship between written and filmic texts in order to see the limits and advantages of one medium over another for representing national culture. No prior familiarity with Korean language is required.

Instructor(s): S. Rhee
Area: Humanities.
AS.300.388. Introduction to the Philosophy of Time.
This course explores answers to the question "What is time?" that take account of time as something both inside and outside of us. Readings include, among others, Aristotle, Augustine, Kant, Bergson, Heidegger, and Einstein. Cross-listed with Philosophy
Instructor(s): N. Schott
Area: Humanities.

AS.300.390. Obama and Philosophy.
The course will investigate the theological and philosophical as well as rhetorical and literary backgrounds and guiding principles that have informed Barack Obama’s writings, speeches, and political strategies so far. While paying minute attention to a few pivotal controversial recent debates, both in domestic policy and international relations, our central focus will be on understanding the curious blend of Obama’s version of so-called Christian realism, influenced by Reinhold Niebuhr, among others, and of what we will call his deep pragmatism. Special attention will be paid to his early appeal to “simple ideas” and “small miracles,” each of them yielding the Biblical and sobered injunction of a “hope against hope. Cross-listed with Philosophy
Instructor(s): H. de Vries
Area: Humanities.

Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, and Beauvoir on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it means to acknowledge another person’s humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community?
Instructor(s): Y. Ong
Area: Humanities.

AS.300.393. The Literature of the Everyday: Realism in the 19th- and 20th-Century Novel.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read works by Flaubert, Dickens, Zola, Eliot, Mann, Tolstoy, and Woolf in the context of critical theories of realism.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.395. Stages of Comedy: Theory & Practice.
a comparative survey of dramatic and cinematic events, with some attention to the various attempts to present a theory of comedy. Seminar will include some food and drinks to support the discussions.
Instructor(s): R. Macksey
Area: Humanities.

AS.300.397. How Freud Changed the Way We Think.
An examination of aspects of the history and theory of psychoanalysis, focusing on the question of origins in Freud’s work. Texts by Freud, Laplanche, Lacan, Derrida, and others.
Instructor(s): R. Leys
Area: Humanities.

This course studies the development of modern Hebrew literature through its relation to Zionism and Post-Zionism. Based on a close reading of both literary and non-literary Zionist and Post-Zionist texts, we will explore the thematic, social, political, aesthetic and stylistic influences that these two movements have had on modern Hebrew literature. Writers to be discussed include: Hertzl, Nordau, Achad ha-am, Jabotinsky, Kluasner, Brenner, Berdyczewski, Agnon, Greenberg, Kahana-Carmon, Oz, Yehoshua, Grossman, Castel-Bloom, and Laor. Students may receive credit for AS.216.398 or AS.300.398, but not both.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl
Area: Humanities.

AS.300.399. Cinema and Philosophy.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.

AS.300.403. Honors Seminar.
The Honors Program in the Humanities offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. After one year qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider attending this seminar. Please keep the Special Note: Limited to Juniors and Seniors and Sophomores admitted to the Honors Program in the Humanities. Permission of instructor required.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.411. Animal Minds.
An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-list with AS.150.490
Instructor(s): M. Williams; R. Leys
Area: Humanities.

AS.300.412. Flaubert.
Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political, and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Education sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Education sentimentale edition required: GF Flammarion, 2003. Co-listed with 300.604
Instructor(s): J. Neefs; M. Fried
Area: Humanities.
AS.300.413. Israeli poetry.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, David Avidan, Dalia Rabikovitch, Yona Wollach, Maya Bejerano, and Yitzhak Laor. These works will be read against the background of the poetry of previous literary generations of writers such as H.N Bialik, Avraham Shlonsky, Natan Alterman and Lea Goldberg in an attempt to uncover changes in style, themes and aesthetic. Through close reading of the poems, the course traces the unique style and aesthetic of each poet, and aims at presenting a wide picture of contemporary Hebrew poetry. Class will be conducted in English and texts will be read in both English translation and the Hebrew original. Open for both Hebrew and non-Hebrew speakers. Students may receive credit for AS.216.300 or AS.300.413, but not both. Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl.

AS.300.416. Wittgenstein, Religion, and Ethics.
Starting out from the Lecture on Ethics, this course will investigate Wittgenstein’s approaches to religion and ethics, mysticism and the spiritual, and contrast these with those of his contemporaries and later interpreters. Readings will include Ludwig Wittgenstein, Martin Heidegger, Elizabeth Anscombe, C.S. Lewis, Hilary Putnam, Richard Rorty, Stanley Cavell, Martin Stokhof, and others.
Instructor(s): H. de Vries
Area: Humanities.

With its forced dissemination after the Anschluss in 1938, psychoanalysis shifted its center of gravity from Vienna to London creating “a new kind of diaspora.” After Freud’s death, the efforts to protect his legacy while incorporating new findings and novel theories to the main body of his work prompted a series of “scientific meetings” known also as the “unusual business meetings” or as the “controversial discussions” within the British Psychoanalytic Society. Reading the minutes, reports, and papers presented during the four years of these discussions (1941-1945), students will be exposed to the important intellectual contributions that led not only to a thorough exploration of major psychoanalytic theories and concepts such as unconscious phantasy, regression, the death instinct, and the infant’s emotional life, but also to the ways these controversial innovations shaped methods and preoccupations of post-war psychoanalysis. Readings will include: Anna Freud, Klein, Winnicott, Isaccs, Strachey, Glover among others. Cross listed with History.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.420. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis.
Freud’s idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be “un-American.” In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.610
Instructor(s): O. Ophir
Area: Humanities.

This course will introduce the concepts, practices, and history of spiritual exercises and its modern transformations. Readings include Marcus Aurelius, Philo of Alexandria, St. Augustine, St. Ignatius of Loyola, Henri Bergson, Ludwig Wittgenstein, Stanley Cavell, and Pierre Hadot.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.423. Contemporary Theory: New Materialisms, New Vitalisms, and the Post- Traumatic Subject.
A discussion of: recent versions of materialism and realism, including materialisms informed by neuroscience; vital materialism; the latest developments in trauma and affect theory; and related trends. Texts by Zizek, Malabou, Damasio, Pippin, McDowell, Johnston, Brassier, Churchland, LeDoux, and others.
Instructor(s): R. Leys
Area: Humanities.

AS.300.427. Reading Freud.
Sigmund Freud was one of the most influential thinkers of the 20th century. Psychoanalysis, which was his theory of mind, a research method, and a therapeutic technique, offered concepts that pervade Western culture and the humanities. In this seminar which is designed for students from all fields of knowledge, we will closely and chronologically read Freud’s major works, follow his developing theories, and become familiar with psychoanalytic concepts such as the unconscious, the uncanny, instincts, sexuality and aggression, which illuminated mysteries in other fields, from literature to anthropology, from political science to religious studies, and from philosophy to the arts.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.431. Russian Literary Modernisms.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.641
Instructor(s): A. Eakin Moss
Area: Humanities.
AS.300.433. Cavell: Skepticism and the Ordinary.
This seminar studies the main works and concepts of Stanley Cavell, one of the most original and influential philosophers of the 20th century. It will address in particular his analyses of skepticism, the ordinary, and moral perfectionism as they are expressed in philosophy, but also in literature and films.
Instructor(s): P. Marrati
Area: Humanities.

This seminar will address the major writings and guiding concepts of Emmanuel Levinas and investigate his increasing critical role as a touchstone and dividing line in the formation of twentieth century and contemporary schools of thought (phenomenology, pragmatism, post-analytic philosophy, literary, feminist, and political theory, anthropology). Additional readings will include Stanley Cavell, Jacques Derrida, Vasily Grossman, Jean-François Lyotard, and Hilary Putnam.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.501. Independent Study.
Instructor(s): E. Patton; H. de Vries.

AS.300.507. Honors Seminar.
The Honors Seminar is a mandatory component of the Honors Program in Humanities, which offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. After one year qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider applying to the Program. In the 2014-2015 academic year, the Seminar will focus on a close reading of Coetzee's Elizabeth Costello and associated texts, which will serve as a point of departure for discussion on the relation between different intellectual disciplines and pursuits.
Instructor(s): A. Eakin Moss; M. Shuster
Area: Humanities.

AS.300.508. Honors Seminar.
The Honors Seminar is a mandatory component of the Honors Program in Humanities, which offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. After one year qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider applying to the Program. In the 2015-2016 academic year, the Seminar will focus on a close reading of Coetzee’s Elizabeth Costello and associated texts, which will serve as a point of departure for discussion on the relation between different intellectual disciplines and the idea of the humanities.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.509. Independent Research.
Instructor(s): E. Patton.

AS.300.599. Independent Study.
Instructor(s): L. Lisi; R. Macksey.

AS.300.602. Theory, Painting, Vision.
Reading in philosophy, theory, criticism. Texts by Merleau-Ponty, Heidegger, Foucault, Derrida, Cavell, and Pippin, among others.
Instructor(s): M. Fried.

AS.300.603. Readings in Russian Poetry, Prose and Theory.
Readings to be selected by mutual agreement among the students and instructor. Reading knowledge of Russian required.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.604. Flaubert.
Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty years after Madame Bovary. Seminar will be taught in French and English. L’Éducation sentimentale edition required: GF Flammarion, 2003. Co-listed with 300.412
Instructor(s): J. Neefs; M. Fried.

An examination of aspects of the history and theory of psychoanalysis, focusing on the question of origins in Freud’s work. Texts by Freud, Laplanche, Lacan, Derrida, and others.
Instructor(s): R. Leys.

AS.300.610. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis.
Freud’s idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be “un-American.” In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.420
Instructor(s): O. Ophir
Area: Humanities.

AS.300.611. The Good Life.
What is a good life? Philosophical and literary texts on the nature of virtue, autonomy, beauty, friendship, and integrity as necessary achievements for a good life. Plato, Aristotle, Montaigne, Shakespeare, Rousseau, Kant, Emerson, Pater, Murdoch, Tolstoy, Chekhov, James, Woolf, Naipaul, Coetzee, Ishiguro, Kundera. Please note: this is an graduate seminar, open to interested and qualified undergraduates.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.612. Topics in Kierkegaard’s Philosophy: Repetition, Revelation, Anxiety, and Fear.
Close study of the rhetoric and arguments of four of Kierkegaard’s most important works from 1843-44: Repetition, Philosophical Fragments, The Concept of Anxiety, and Fear and Trembling. Contextualizing readings by Kant, Schelling, Hegel, and J.L. Heiberg.
Instructor(s): L. Lisi.
AS.300.613. The Ancient Quarrel: Literature and Philosophy.
Key turning points in the debate over which kind of knowledge, philosophical or literary, most benefits the soul and society. We will investigate the various ways in which literature has been construed as moral or immoral, and the use of literary modes of persuasion and argument in philosophical texts. Possible authors include: Homer, Plato, Aristotle, Sidney, Shakespeare, Rousseau, Kierkegaard, Tolstoy, Heidegger, Sartre, Beauvoir, Nussbaum, Cavell, Diamond, James, Coetzee, and Mulhall.
Instructor(s): Y. Ong.
Area: Humanities.

AS.300.615. Classics of Literary Criticism.
Readings will include key texts by Eric Auerbach, several Russian Formalists, Northrop Frye, Roland Barthes, Stanley Cavell, Eve Sedgwick Kosofsky, Friedrich Kittler, and Stephen Greenblatt.
Instructor(s): L. Lisi; M. Fried
Area: Humanities.

AS.300.616. Thinking the Body/The Body Thinking: Introduction to Aesthetics from the Perspective of Dance.
In the nineteenth and twentieth centuries, dance has developed into a serious art form. However, philosophers of art have paid little attention to dance. Why is this the case? Is dance perhaps too corporeal or too unreflective or in some other way too marginal to be a fruitful topic for philosophical reflection? Or does the failure of mainstream philosophical aesthetics to take dance seriously perhaps signal unacknowledged biases in such approaches? Might dance, the art form whose medium is the human body, have something to contribute to current philosophical interest in rethinking the human body and, particularly, the relation between mind and body? Seeking responses to questions such as these, this course provides an introduction to the place of dance in the philosophy of art. The first half of the course examines portions of seven foundational texts in the philosophy of art and culture as well as philosophical accounts of dance that draw on these foundational texts in a range of ways. The aim is not only to explore dance from the perspective of traditional aesthetic theories, but also to explore such traditional theories from the perspective of dance.
Instructor(s): R. Tobias; Y. Ong.
Area: Humanities.

AS.300.621. Heidegger’s Being and Time I.
This seminar consists of an integral reading of Martin Heidegger’s 1927 magnum opus Being and Time (Sein und Zeit) in light of its historical and philosophical context as well as its contemporary reception in both the phenomenological, existentialist, hermeneutic, and analytic traditions. We will start out, this semester, from the First Division. Readings will include the commentaries by Ryle, Gadamer, Levinas, Derrida, Marion, Dreyfus, Brandom, and others.
Instructor(s): H. de Vries; P. Marrati.
Area: Humanities.

AS.300.625. Russian Literary and Critical Theory.
Close reading of major authors from the Russian literary theoretical and critical tradition including Bakhtin, Eikhenbaum, Jakobson, Lotman, Shklovsky and Tynianov. Student will present primary sources or case studies from their own fields and research.
Instructor(s): A. Eakin Moss.
Area: Humanities.

AS.300.626. Philosophy of/and the Novel.
The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the irresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhtin, Hamburger, Sartre, Beauvoir, Ricoeur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaubert.
Instructor(s): R. Tobias; Y. Ong.
Area: Humanities.

AS.300.627. Graduate Proseminar: Introduction to Literary Theory.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.628. Contemporary Theory: New Materialisms, New Vitalisms, and the Post-Traumatic Subject.
A discussion of: recent versions of materialism and realism, including materialisms informed by neuroscience; vital materialism; the latest developments in trauma and affect theory; and related trends. Texts by Zizek, Malabou, Damasio, Pippin, McDowell, Johnston, Brassier, Churchland, LeDoux, and others.
Instructor(s): R. Leys
Area: Humanities.

This seminar examines what in Bergson’s philosophy remains, or becomes, challenging for contemporary debates. Particular emphasis is given to his concepts of life and time, but also to his philosophical anthropology and his reflections on the ambiguous interplay between war, technology, and religion.
Instructor(s): P. Marrati.
AS.300.631. Russian Literary Modernisms.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.431
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.637. Faust and Philosophy.
This course combines the close reading of Goethe’s epic Faust with the study of a number of philosophical texts that either influenced Goethe’s work or were influenced by it. Particular attention will be paid to the relation between literary form and philosophical argument. Authors besides Goethe will include Fichte, Schelling, Schiller, Friedrich and August Wilhelm Schlegiel, Hegel, Kierkegaard, Carl Rosenkranz and Theodor Vischer. Discussion in English; reading knowledge of German required.
Instructor(s): L. Lisi
Area: Humanities.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well. Course taught in French. Recommended Course Background: AS.212.333 and 212.334
Instructor(s): J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.300.644. Theory, Painting, Vision.
Theory, Painting, Vision: Readings to be selected but they will definitely include texts by Barthes, Cavell, Wall, and Michaels.
Instructor(s): M. Fried.

AS.300.649. The Fate of Nothing from Goethe to Heidegger.
Nothing and negativity play a central role in the literature and philosophy of the long nineteenth-century. In this course, we look closely at a number of approaches to these problematic concepts in Goethe, Hölderlin, Hegel, Schopenhauer, Leopardi, Kierkegaard, Nietzsche and Heidegger.
Instructor(s): L. Lisi.

AS.300.651. What Remains of the Human?.
This seminar discusses modern and contemporary philosophical and anthropological conceptions of the human and its uncertain boundaries: between the cultural and natural, the human and the inhuman, the animal and the spiritual, the living and the dead and so forth. Particular attention will be devoted to the ethical and political implications any definition of the human inevitably invites.
Instructor(s): P. Marrati.

AS.300.653. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.658. Must We Mean What We Say?.
Starting out from Stanley Cavell’s programmatic book and title, this seminar will revisit his discussion of J.L. Austin, John Searle, Jacques Derrida, and Shoshana Felman, with special emphasis on these authors’ theories of intentionality, seriousness, and sincerity, and with reference to the ancient and modern concepts of tragedy on which they partly rely. In addition to the aforementioned thinkers’ relevant works, reading will include selections from Euripides, Henrik Ibsen, Isaiah Berlin, Emmanuel Levinas, and Jean-Luc Marion.
Instructor(s): H. de Vries.

AS.300.674. Literature and/as Ethics.
Arguments for the immorality of literature, the morality of literature, and the amorality of literature. Can a literary text be evaluated on ethical grounds, and how? How do literary texts make ethical arguments? What does it mean to read literary texts or do literary criticism in an ethical mode? We will be concerned throughout with the philosophical uses, and abuses, of literary forms. Possible authors and texts: Plato, Chaucer, Shakespeare, Flaubert, Zola, Dostoevsky, Lawrence, Hardy, Woolf, Forster, Beauvoir, Coetzee, Oe, Cavell, The Wire, and Mad Men. Primary texts will be accompanied by a selection of essays from moral philosophy and ethical criticism.
Instructor(s): Y. Ong.

AS.300.676. Heidegger’s Being and Time II.
This seminar consist of an integral reading and discussion of Martin Heidegger’s 1927 magnum opus Being and Time (Sein und Zeit) in light of its historical and philosophical context as well as its contemporary reception in both the phenomenological, existentialist, hermeneutic, and analytic traditions. We will focus primarily on the Second Division but also revisit central questions from Division One. However, it will not be necessary for students to have attended the previous seminar on this earlier part of Heidegger’s major work. Recommended readings will include the commentaries by Emmanuel Levinas, Jacques Derrida, Jean-Greisch, Jean-Luc Marion, Hubert Dreyfus, Robert Brandom, and others.
Cross-listed with Philosophy
Instructor(s): H. de Vries.

AS.300.684. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l’ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, À l’ombre des jeunes filles en fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Undergraduate are Seniors permitted to take this course. Recommended course background: At least 2 212.3xx courses
Instructor(s): J. Neefs; M. Fried.

AS.300.686. Mysticism and Mechanism.
This seminar will investigate the historical, conceptual, and practical intertwining of spirit and automatism, mind and machine, global religion and technological media. We will start out from the spiritual automaton motif as it appears in Spinoza and Leibniz and follow its echoes in more recent debates (concerning the ghost the machine, the idea of artificial intelligence, and all those realities often called virtual). Readings will include Henri Bergson, Ludwig Wittgenstein, Gilbert Ryle, Walter Benjamin, Henri Atlan, Lambert Wiesing, and others.
Instructor(s): H. de Vries.
AS.300.688. Autour de Baudelaire (Around Baudelaire).
Topics in Baudelaire’s art and thought and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mallarmé, Proust, Benjamin, Starobinski, Bonnefoy). Readings and discussion will be mainly in French. Co-listed with AS.212.604
Instructor(s): J. Neefs; M. Fried.
AS.300.689. Deleuze and Philosophy: Time, Life, Becoming.
This seminar aims at analyzing the major concepts of Deleuze’s philosophy and their ethical and political implications for contemporary debates.
Instructor(s): P. Marrati.
Instructor(s): P. Marrati.
AS.300.800. Independent Study.
Instructor(s): H. de Vries.
AS.300.801. Ind Stdy-Field Exams.
Instructor(s): H. de Vries.
AS.300.802. Independent Study Field Exam.
Instructor(s): E. Forster; H. de Vries; M. Fried; P. Marrati.
Instructor(s): H. de Vries.
AS.300.804. Dissertation Research.
Instructor(s): H. de Vries.
AS.300.805. Literary Pedagogy.
Instructor(s): H. de Vries.
AS.300.806. Literary Pedagogics.
Instructor(s): H. de Vries.
AS.300.808. In Study Field Exam.
Instructor(s): E. Forster.
AS.300.890. Research Practicum.
Instructor(s): M. Fried.

Cross Listed Courses

History of Art
AS.010.310. The ‘Long Sixties’ in Europe.
Emphasis will be on advanced artistic practice primarily in France, Italy, the Benelux, and German-speaking countries; students will curate an exhibition of avant-garde journals from the Sheridan Libraries.
Instructor(s): M. Warnock
Area: Humanities.
AS.010.400. Looking at Language: Vision and Textuality from Surrealism to the Present.
Considers the emergence of the “written painting” and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Ligon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.
AS.010.654. Topics in Postwar Abstraction.
Emphasis on European and American case studies from Pollock to the present; figures may include: Newman, Still, Frankenthaler, Louis, Noland, Olitski, Stella, Ryman, Marden, Hantaï, Bishop, Jorn, Uecker, and Klein.
Instructor(s): M. Fried; M. Warnock.

AS.010.760. Agency and Other Topics in Contemporary Theory of Art History.
A critical reading of texts by various thinkers including Alfred Gell, Horst Bredekamp, David Freedberg, Whitney Davis, and David Summers. Open to qualified undergraduates with the permission of the instructor. This course is being co-taught with Prof. Ruth Leys.
Instructor(s): M. Fried; R. Leys.

Classics
AS.040.121. Ancient Greek Mythology: Art, Narratives, and Modern Mythmaking.
Focuses on major and often intricate myths and mythical patterns of thought as they are reflected in compelling ancient visual and textual narratives. Being one of the greatest treasure troves of the ancient world, these myths will further be considered in light of their rich reception in the medieval and modern world (including their reception in the modern fields of anthropology and philosophy).
Instructor(s): D. Yatromanolakis
Area: Humanities.
AS.040.148. Ancient Israel and Ancient Greece in Opera and on Film. 3 Credits.
Some of the most breathtaking (early and later) operas and films have been in intense dialogue with ancient societies, narratives, and cultural concepts. Contemporary hit movies center on diverse aspects of ancient narratives: the beginning of the world, violent wars, politics, erotic themes, and intricate existential questions. The course will introduce students to a comparative examination of the variety of approaches to ancient Israel and ancient Greece in the spectacular worlds of opera and cinema. The course will focus on major texts and archaeological material related to antiquity; works of world cinema will be analyzed.
Instructor(s): D. Yatromanolakis
Area: Humanities.
AS.040.693. The Pre-Socratics and Early Plato.
This seminar will focus on the earliest phases of European philosophy. Topics that will be examined include: scholarly approaches to the fragments of major thinkers such as Herakleitos and Empedokles; the concept of “fragment;” the transition from the pre-Socratics to early Plato; the later reception of Herakleitos and Pythagoras in European thought.
Instructor(s): D. Yatromanolakis
Area: Humanities.

History
AS.100.741. Recent Theoretical Issues in History.
An examination of recent theoretical issues in history, including: history as/as memory; the return of presence in history; the turn to affect and the rise of “neurohistory”; posthistoricism and the uses of literary theory in history; and the uses of photography and visual cultures in history.
Cross-listed with Humanities Center.
Instructor(s): G. Spiegel; R. Leys
Area: Humanities, Social and Behavioral Sciences.
**Medicine, Science and the Humanities**

**German Romance Languages Literatures**

**Interdepartmental**

**AS.360.134. Great Books at Hopkins II: The Sciences.**
Great Books at Hopkins II: The Sciences will combine readings from philosophy and literature with foundational texts from several scientific disciplines. Readings for this spring will explore links between traditional theories of economics and genetics in the context of literary developments, and will include: Xenophon's Oeconomicus, Mendel's "Experiments on Plant Hybridization," Marx's Communist Manifesto, Darwin's Voyage of the Beagle, Swift's A Modest Proposal, Wharton's House of Mirth, and Joyce's Finnegans Wake.

Instructor(s): E. Patton; M. Roller  
Area: Humanities.

**Art**

**AS.371.140. Cartooning.**
Not open to Freshmen. A history-and-practice overview for students of the liberal arts. The conceptual basis and historical development of cartooning is examined in both artistic and social contexts. Class sessions consist of lecture (slides/handouts), exercises, and ongoing assignments. Topics include visual/narrative analysis, symbol & satire, editorial/political cartoons, character development, animation. Basic drawing skills are preferred but not required.

Instructor(s): T. Chalkley  
Area: Humanities.

**AS.371.146. Basic Black/White Photo.**
Students must have a 35mm camera with manual aperture and shutter speed ATTENDANCE AT 1ST CLASS IS MANDATORY An introduction to the technical and creative process of producing black & white photographs. Working in the darkroom, students learn the fundamentals of film processing and print development. In-class critiques, discussion, and analysis of historic images develop critical vision. With the instructor’s guidance, students work on a project of their choice and produce a portfolio of ten mounted prints.

Instructor(s): P. Berger  
Area: Humanities.

**AS.371.149. Visual Reality.**
In art, "Realism" is a simulation of visual reality. But art can also simulate alternative realities, those realities or truths which exist only in daydreams or nightmares. In this class, we will learn to explore and create representations of these additional moments of existence. This will require thinking creatively or "outside the box," a useful skill in any field. Using a variety of media, students are asked to solve problems to which there is no one correct answer.

Instructor(s): D. Bakker  
Area: Humanities.

**AS.371.151. Photoshop/Digital Darkroom.**
Photoshop is not only the digital darkroom for processing images created with digital cameras; it is also a creative application for making original artwork. In this course, students use Photoshop software as a tool to produce images from a fine art perspective, working on projects that demand creative thinking while gaining technical expertise.

Students will make archival prints, have regular critiques, and attend lectures on the history of the manipulated image and its place in culture. We will look at art movements which inspire digital artists, including 19th-century collage, dada, surrealism, and the zeitgeist of Hollywood films. Students must have a digital camera. Prior knowledge of Photoshop is not required. Approval for this course is not required. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on ISIS.

Instructor(s): H. Ehrenfeld  
Area: Humanities.

**AS.371.152. Introduction to Digital Photography.**
Introduction to Digital Photography students learn to use their digital cameras through a variety of projects, which will help them develop technical and creative skills. Students explore documentary, landscape and portrait photography. Critiques and slide lectures of historic photographs, which range from postmortem daguerreotypes to postmodern digital imagery, help students develop a personal vision. Students gain camera proficiency with one-on-one instruction in the field. Basics for print adjustment and output will be covered. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on ISIS.

Instructor(s): H. Ehrenfeld  
Area: Humanities.

**AS.371.162. Black & White: Digital Darkroom.**
In this digital course, students explore the black-and-white aesthetic. They develop camera skills on numerous field trips including Ladew Topiary Gardens, the Maryland Zoo & Botanical Gardens, and an optional weekend trip to Cape Henlopen State Park in Delaware. Students meet frequently for critiques and discussions based on historic and contemporary imagery. They will learn to use Photoshop for image adjustment. Techniques such as high dynamic range, duotone, panorama and infrared will be covered. Students work on a project of their choice and produce a portfolio of ten prints. Digital SLRs are provided. Attendance at 1st class is mandatory. No need to email for approval.

Instructor(s): P. Berger  
Area: Humanities.

**AS.371.303. Documentary Photography.**
In this course, we will explore different genres of documentary photography, including the fine art document, photojournalism, social documentary photography, the photo essay and photography of propaganda. Students will work on a semester-long photo-documentary project on a subject of their choice. Digital SLRs will be provided. Attendance at first class is mandatory. No need to email for approval.

Instructor(s): P. Berger  
Area: Humanities.
AS.371.304. Photo Seminar: Wet Darkroom.
In this film based course, students develop a project of their choice over the semester working independently in the darkroom and meeting for weekly critiques and discussions. Using the zone system (a method of pre-visualization developed by Ansel Adams) students will experiment with different film, paper and developer combinations specific to their projects. Writing in the form of a journal as well as critical analysis of images are integral parts of the seminar experience.

Prerequisites: AS.371.146 or Permission Required
Area: Humanities.

AS Philosophy Courses

AS.150.102. What Is Art For? Topics in Aesthetics.
In this course we will consider a range of views about the purpose and functions of art held by different philosophers from antiquity to the early 20th century. We will start from Plato's criticism of art in the Republic. Against this foil we will discuss the views on the point of art Aristotle, Lessing, Kant, the early German Romantics and Viktor Shklovsky. In addition, during the course we will read a few literary works by Sophocles, Shakespeare and Tolstoy.
Instructor(s): A. Kabeshkin
Area: Humanities.

AS.150.103. Philosophy of Oppression and Resistance.
In general, human beings would rather not be oppressors, and would rather not live in oppressive social orders. Yet this does not prevent social structures from being oppressive in both explicit and covert forms, even in societies highly committed to just democratic ideals. The course will analyze what it means for an individual, practice, or institution to be oppressive, and will review concrete mechanisms which underlie racialized/gendered forms of oppression such as hate speech, pornography, propaganda, ideology, and material inequality. Finally, we will discuss how social agents can resist explicit and covert oppression in a way that is conducive to the realization of just ideals.
Instructor(s): P. O'Donnell
Area: Humanities.

AS.150.108. Introduction to Philosophy of Biology.
This course will introduce students to a range of questions debated in contemporary philosophy of biology. The course will have a character of a rather broad overview of the field with a particular attention to debates around the “received” and the gene-centric views of evolution on the one hand, and the problem of reductionism/antireductionism in biology on the other hand. Problems such as the analysis of the concept of adaptation, the status of biological species, and others will also be discussed.
Instructor(s): A. Kabeshkin
Area: Humanities.

AS.150.110. Delusions.
What is a delusion? Are delusions just irrational beliefs? Can delusions be true? Are some religious and political beliefs delusions? If so, which ones? Are overly optimistic people simply deluded? In this course we will attempt to answer some of these questions by reading and discussing contemporary work from philosophy, psychology, and the neurosciences. Part of the goal will be to get a clearer understanding of the relationship between false beliefs, irrational beliefs, and delusions.
Instructor(s): B. Miller
Area: Humanities.

AS.150.111. Philosphic Classics.
The course introduces students to philosophy by critically examining selected texts in the Western philosophical tradition. Philosophers whose ideas will be examined include Plato, Descartes, Kant and Nietzsche.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.112. Philosophical Problems.
An introduction to philosophy through several central problems. Topics vary from year to year, but might include such topics as the nature and limits of human knowledge, free will, consciousness, death, or paradoxes of truth and reasoning.
Instructor(s): S. Gross
Area: Humanities.

This course examines the notion of objectivity and challenges to it. Its topics include the status of objective facts and beliefs, the structure of social reality, and rational disagreement. Dean's Prize Freshman Seminar
Instructor(s): N. Goldberg
Area: Humanities.

From domestic debates about abortion and health care to international dialogue about women's rights, genital mutilation and genocide, human rights claims have become increasingly common, and we've come to rely on the discourse of human rights to assess the way human beings are treated by one another and by states. But what are human rights? How are human rights claims justified? Are human rights really objective and universal or are they contingent and relative to particular cultures? Where did the human rights culture begin, and how has it become so important? This course aims to explore these questions by examining foundational human rights documents, historical works on human rights and contemporary philosophical inquiry into their foundations (or lack thereof).
Area: Humanities.

AS.150.118. Introduction to Formal Logic.
An introduction to symbolic logic and probability. In the first two parts of the course we study formal ways of determining whether a conclusion follows from its premises. Included are truth-functional logic and predicate logic. In the third part we study the basic rules of probability, and learn how to make probability calculations and decisions in life. Co-listed with AS.150.632 (for graduate students) (01-F 11:00-11:50am).
Instructor(s): P. Achnstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.119. Existentialism.
Existentialism is a philosophical movement that made a dramatic entry into the 20th century intellectual scene and had a profound and long lasting influence on it. The central themes developed by existentialist thinkers transgressed the boundaries of academic philosophy and found their expression in plays, novels, cinema, poetry, political tracts, etc. Through close reading of the seminal texts by Kierkegaard, Nietzsche, Heidegger, Sartre, and Merleau-Ponty, we will explore the core tenets of the existentialist legacy. The philosophical texts will be supplemented by related works of fiction and films. Freshmen Only.
Instructor(s): G. Lebanidze
Area: Humanities.
**AS.150.120. The Philosophy of Emotions.**
Are emotions always irrational or can they also make us do the right thing? Can thoughts influence emotions? Can emotions influence our moral evaluations? In this course we will investigate a number of important philosophical questions about the nature of emotions by surveying some of the classic works in philosophy (e.g. Aristotle, Descartes and Hume). We will also read a number of contemporary papers, including works by J. Prinz and M. Nussbaum. Finally, we will look at recent work in psychology and cognitive neuroscience on the impact of emotion on reason (J. Green, A. Damasio).
Instructor(s): M. Bergamaschi Ganapini
Area: Humanities.

**AS.150.124. Myths of Quantum Physics.**
What is the fate of Schrodinger’s cat? How does EPR paradox lead to quantum teleportation? Who is Wigner’s friend? Does wave-particle duality imply that we have free will? In this course, we will explore the philosophical problems about quantum physics and attempt to dispel the myths generated by the quantum world. No prior understanding of physics or philosophy is required.
Instructor(s): G. Guralp
Area: Humanities, Natural Sciences.

**AS.150.125. Introduction to Modern Philosophy.**
The course will examine four major figures of early modern philosophy: Descartes, Leibniz, Hume, and Kant. Although the most recent of these thinkers died more than 200 years ago, we still refer to them as “modern” philosophers, revealing their great influence on the way we think about ourselves and our place in the world. The course will look at what these philosophers thought about questions such as: What kind of beings are we and how are we related to the world around us? Is knowledge of the world possible and if so what are its sources? Can we answer the question of God’s existence? Is order something we find in the world or impose on it? etc.
Instructor(s): G. Lebanidze
Area: Humanities.

**AS.150.126. Relativism.**
More than any other modern philosophical doctrine, relativism has found currency outside of the academy. Talk of “equally valid” points of view has become a commonplace, even when the matter under discussion is a straightforwardly factual. We will examine many different relativistic doctrines, including the views that people coming from very different backgrounds or with very different beliefs do not have the grounds to criticize one another, and that such individuals cannot so much as understand one another. In the first two-thirds of the course we will evaluate arguments for and against views such as these. Towards the end of the semester we will explore what the fall-out for our everyday lives would be (or should be) if some kind of relativism were true. Freshmen only.
Instructor(s): N. Tebben
Area: Humanities.

**AS.150.127. Realism and Antirealism in the Philosophy of Science.**
Are our best scientific theories approximately true, or useful but false? Does science converge on the truth over time? This course addresses such questions by surveying the scientific realism debate. Dean’s Prize Teaching Fellowship course. Freshmen Only.
Instructor(s): J. Hricko
Area: Humanities.

**AS.150.128. Cognitive Science & Political Philosophy.**
Cognitive Science & Political Philosophy: Is a person born a republican, or are they raised that way? Are democrats Democrats because they have emotional personalities? Is politics the product of evolution, or of culture? Should the brain sciences determine public policy and law? In this course we will consider these questions and many more like them by looking at recent work in philosophy and the brain sciences.
Instructor(s): J. Waterman
Area: Humanities.

**AS.150.129. The Theory of Knowledge: Classic and Contemporary Questions.**
What is knowledge and how to define it? Does knowing require an ability to produce supporting reasons or is it sufficient that our beliefs track the truth? Which general model better its structure, Foundationalism, Coherentism or Infinitism? Does knowing depend on context? Can we discover empirically what knowledge is? These are key questions we will be discussing in our seminar, inspired by reading texts ranging from classics like Plato, the Stoics, and Sextus Empiricus, to contemporary authors like Gettier, Davidson, Goldman, DeRose, and others. Dean’s Prize Freshman Seminar.
Instructor(s): P. Stojanovic
Area: Humanities.

**AS.150.131. Introduction to Social Philosophy.**
An introduction to social philosophy through critical reading of selected texts of two major figures: Adam Smith and Karl Marx. These two thinkers offered opposing theories of capitalism, which continue to shape our basic understanding of the world. We will address the method and foundations of their theories, as well as the normative concepts that inform their thought (e.g. freedom, human flourishing, alienation, exploitation, etc).
Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

**AS.150.133. Do We Know What We Think We Know?.**
This is an introductory course into Theory of Knowledge. The following questions will be discussed: What is knowledge? What is philosophical skepticism? Can Theory of Knowledge answer the skeptical challenge? Which general model of knowledge is better, Foundationalism, Coherentism or Infinitism? Is what constitutes knowledge something internal or external to the subject? We will mostly read texts written by contemporary philosophers.
Instructor(s): P. Stojanovic
Area: Humanities.

**AS.150.134. Freshman Seminar: Socrates in Context.**
A study of Socrates as portrayed by his contemporaries, and of intellectual and political trends to which he may have been reacting. Authors will include Plato, Xenophon and Aristophanes. Freshmen Only.
Instructor(s): R. Bett
Area: Humanities.

**AS.150.180. Plato on Knowledge.**
What is knowledge? What is the difference between true belief and knowledge? In this course, we will explore Plato's analysis of these questions. Our primary focus will be his dialogues "Meno", "Theaetetus", and "The Republic".
Instructor(s): P. Stojanovic
Area: Humanities.
AS.150.182. What is Science?.
A philosophical introduction to very basic questions about scientific reasoning, its scope and limits. Is there a universal scientific method? Can science really explain everything, anything? Must everything be proved in science? Is science incompatible with religion? Readings will be from scientists and philosophers who have thought about these issues from Descartes and Newton to the present. No prerequisites either in philosophy or science.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.185. Why Are You Here?.
College students, bowed under the relentless pressure to succeed and make good marks, rarely if ever stop to answer the above question. This course seeks to rectify that by providing students the opportunity to reflect upon the purpose of a university education. We will read selections from The Closing of the American Mind, Cultivating Humanity, and William Deresiewicz’s new polemic, Excellent Sheep. We will also look at some supplemental essays by Hutchins and Leo Strauss.
Area: Humanities.

AS.150.191. Freshman Seminar: Ethical Topics in Plato.
The class takes a problem-oriented approach to select dialogues in Plato. Central questions will include: the nature of motivation, and in particular, whether it is true that everyone desires the good; and the role of knowledge in leading a good life, in particular, whether it is true that that virtue is knowledge. We will focus on Ion, Apology, Euthyphro, the Meno, and the ethical books of the Republic.
Instructor(s): L. Theunissen
Area: Humanities.

Instructor(s): M. Williams
Area: Humanities.

AS.150.193. Philosophy of Language Seminar: Proper Names and Definite Descriptions.
In talking with each other, we often use proper names like ‘Juliet’ and definite descriptions like ‘The most beautiful fresco in Italy’ to pick out persons and objects in our world. But what do these expressions mean exactly? In this seminar, we’ll slowly and carefully work through some classic philosophical texts that address this issue. These texts will provide an introduction to the philosophy of language, and to analytic philosophy in general.
Instructor(s): J. Bledin
Area: Humanities.

AS.150.194. Freshman Seminar: Skepticism Ancient and Modern.
Can we gain knowledge of reality, or is everything a matter of opinion? Does it matter? Why do we want (or need) knowledge anyway? Questions like this have been the stock in trade of philosophical skeptics throughout the entire history of our Western philosophical tradition. This class will involve close readings of some classic works on the topic of skepticism with a view to understanding some of the main arguments for (and against) skepticism: how they work and how they may have changed over time. Readings include selections from Sextus Empiricus, Descartes, Hume and Wittgenstein.
Instructor(s): M. Williams
Area: Humanities.

AS.150.195. Philosophy of Language Seminar: Proper Names and Definite Descriptions.
In talking with each other, we often use proper names like ‘Juliet’ and definite descriptions like ‘The most beautiful fresco in Italy’ to pick out persons and objects in our world. But what do these expressions mean exactly? In this seminar, we’ll slowly and carefully work through some classic philosophical texts that address this issue. These texts will provide an introduction to the philosophy of language, and to analytic philosophy in general.
Instructor(s): J. Bledin
Area: Humanities.

AS.150.196. Philosophy of Language Seminar: Proper Names and Definite Descriptions.
In talking with each other, we often use proper names like ‘Juliet’ and definite descriptions like ‘The most beautiful fresco in Italy’ to pick out persons and objects in our world. But what do these expressions mean exactly? In this seminar, we’ll slowly and carefully work through some classic philosophical texts that address this issue. These texts will provide an introduction to the philosophy of language, and to analytic philosophy in general.
Instructor(s): J. Bledin
Area: Humanities.

AS.150.197. Philosophy of Language Seminar: Proper Names and Definite Descriptions.
In talking with each other, we often use proper names like ‘Juliet’ and definite descriptions like ‘The most beautiful fresco in Italy’ to pick out persons and objects in our world. But what do these expressions mean exactly? In this seminar, we’ll slowly and carefully work through some classic philosophical texts that address this issue. These texts will provide an introduction to the philosophy of language, and to analytic philosophy in general.
Instructor(s): J. Bledin
Area: Humanities.

AS.150.198. Philosophy of Language Seminar: Proper Names and Definite Descriptions.
In talking with each other, we often use proper names like ‘Juliet’ and definite descriptions like ‘The most beautiful fresco in Italy’ to pick out persons and objects in our world. But what do these expressions mean exactly? In this seminar, we’ll slowly and carefully work through some classic philosophical texts that address this issue. These texts will provide an introduction to the philosophy of language, and to analytic philosophy in general.
Instructor(s): J. Bledin
Area: Humanities.

AS.150.199. Philosophy of Language Seminar: Proper Names and Definite Descriptions.
In talking with each other, we often use proper names like ‘Juliet’ and definite descriptions like ‘The most beautiful fresco in Italy’ to pick out persons and objects in our world. But what do these expressions mean exactly? In this seminar, we’ll slowly and carefully work through some classic philosophical texts that address this issue. These texts will provide an introduction to the philosophy of language, and to analytic philosophy in general.
Instructor(s): J. Bledin
Area: Humanities.

AS.150.200. What is Happiness?.
The question of human happiness dates back to Ancient times. What is the best life a human can lead? Is it a life of pleasure, or does it include other features? Does a good life vary among people and cultures, or is it universal? Do we select the things that make our life go well, so that it allows for self-creation and personal expression of one’s values? Possible readings include selections from Plato, Aristotle, Epicurus, Nozick, Nussbaum, and Scanlon, among others.
Instructor(s): K. Powell
Area: Humanities.

AS.150.201. Introduction to Greek Philosophy.
A survey of the earlier phase of Greek philosophy. Socrates, Plato, and Aristotle will be discussed, as well as two groups of thinkers who preceded them, usually known as the pre-Socratics and the Sophists.
Instructor(s): R. Bett
Area: Humanities.

This course explores philosophical issues that are of central importance to medicine. Topics to be covered include: history of medicine, relationship between medicine and science, distinction between health and disease. Dean’s Prize Teaching Fellowship.
Instructor(s): B. Miller
Area: Humanities.

AS.150.203. Contemporary Metaphysics.
This course will provide students with a survey of major topics in contemporary metaphysics, including such issues as the identity of objects through change and the metaphysical status of persons. Dean’s Teaching Fellowship course.
Instructor(s): J. Brandau
Area: Humanities.

AS.150.204. Nietzsche and Contemporary Meta-Ethics.
Since the Scientific Revolution, philosophers have struggled to articulate a conception of moral value and agency consistent with our scientific self-understanding. Developing such a conception is a central task of meta-ethics. Friedrich Nietzsche (1844-1900) offered one of the most provocative accounts of moral value and agency, and his work has recently been appropriated by contemporary meta-ethicists. This course offers an introduction to 1) Nietzsche’s writings on value and agency, 2) contemporary meta-ethics, and 3) recent appropriations of Nietzsche for contemporary meta-ethics. No prior coursework in philosophy is required.
Instructor(s): P. Leland
Area: Humanities.

AS.150.205. Introduction to the History of Modern Philosophy.
An overview of philosophical thought in the seventeenth and eighteenth centuries. We shall focus on fundamental questions in epistemology (knowledge, how we acquire it, its scope and limits), metaphysics (the ultimate nature of reality, the relation of mind and body, free will), and theology (the existence and nature of God, God’s relation to the world, whether knowledge of such things is possible): all questions that arose in dramatic ways as a result of the rise of modern science. The principal philosophers to be discussed are Descartes, Locke, Hume and Kant, though we shall also make the acquaintance of Spinoza, Leibniz and Berkeley.
Instructor(s): Y. Melamed
Area: Humanities.
**AS.150.211. The Philosophy of Love.**
In this course, we will read and discuss various philosophical accounts of the nature of love. We will consider whether there is a deep difference between the sort of love that grounds close adult friendships and the sort of love that grounds long-term romantic relationships. We will then consider some ways that love can be a reason, or justification, for certain decisions and actions.
Area: Humanities.

**AS.150.212. Philosophy of Biology: Evolution and Ecology.**
This course will provide a selective overview of problems in philosophy of biology. We will, first, discuss the so-called received view of evolution and will consider some challenges to that view. After that we will focus on the debates about the meaning and the role of the concept of adaptation in evolutionary theory. Finally, we will briefly discuss the relation between ecology and evolution.
Area: Humanities.

**AS.150.214. Reasons, Norms, and Rationality.**
Are human beings rational? Should they be rational? The right answer to these questions may seem obvious. However, in the last few decades these questions have gained a new urgency and importance. Famously, Aristotle thought that human beings are by definition rational beings. However, a large body of empirical studies now seem to show that most people consistently and systematically reason incorrectly. At the same time, one may wonder whether being rational is really helpful to survive and reach our goals in real life. That is, one may ask whether reasoning accordingly to the canon of rationality is actually a goal that we should pursue. Recent philosophical work has put new pressure on the issue of the normativity of rationality. In this course we will explore the issue of rationality and its normative implications by reading both historical works, ranging from Plato to Hume, and contemporary philosophical texts while looking at some important psychological studies on human reasoning.
Area: Humanities.

**AS.150.215. Business Ethics.**
What is a responsible business practice? Do corporations have responsibility as “moral agents”? What is the relation between business and environment? In this course we will investigate the relationship between business practices and ethical thinking by analyzing and assessing philosophical arguments about the moral status of business. We will start by reading philosophical texts that offer an analysis of moral practices, decision-making procedures, and moral theories. In particular, we will read historical text by Aristotle, Hume, Adam Smith, Mill, Marx, and Keynes. Then we will see how these philosophical concepts and theories can be applied to the contemporary world of business. The main goal of this course is to critically evaluate the philosophical foundations and justifications for business and economic systems, and how these apply to specific issues as workplace discrimination, ethics of advertising, environmental destruction and consumer protection.
Area: Humanities.

**AS.150.216. Minds and Machines.**
The course is a philosophical introduction to the topic of artificial intelligence. We will examine such questions as whether machines can think and whether we can build robots that have emotions, personalities and a sense of self. In doing so, we will touch upon a closely connected question: is the human mind itself a machine?
Instructor(s): N. Andonovski
Area: Humanities, Natural Sciences.

**AS.150.217. Neuroethics.**
Can electroencephalography show that we lack free will? Can modern neuroimaging show that someone will commit a crime in the future? Is it ethical to use this promethean knowledge to put them in jail before they even commit a crime? In Neuroethics, we’ll consider these and other pressing questions emerging at the frontiers of neuroscience and modern moral theory.

**Prerequisites: This course is equivalent to AS.150.472**
Instructor(s): P. Stojanovic
Area: Humanities.

**AS.150.219. Introduction to Bioethics.**
Introduction to a wide range of moral issues arising in the biomedical fields, e.g. physician-assisted suicide, human cloning, abortion, surrogacy, and human subjects research. Cross-listed with Public Health Studies.
Instructor(s): H. Bok
Area: Humanities, Social and Behavioral Sciences.

**AS.150.220. Introduction to Moral Philosophy.**
An introduction to moral philosophy through in-depth and critical reading of selected texts from the history of philosophy. The philosophers whose texts will be discussed include Plato, Aristotle, Kant and Nietzsche.
Instructor(s): L. Theunissen
Area: Humanities.

**AS.150.223. Formal Methods of Philosophy.**
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with 150.423)
Instructor(s): J. Bledin; R. Rynasiewicz
Area: Humanities.

**AS.150.227. Introduction to Asian Philosophy.**
What is the nature of reality? What is the mind? What is the meaning of life? How ought we to live? In this course, we will explore how some of the better known philosophical systems of India, China and Japan have attempted to answer these most central philosophical questions. We will focus on the following systems: Nyaya, Samkhya-Yoga, Vedanta, Buddhism, Carvaka, Confucianism, Taoism, and Zen.
Instructor(s): B. Miller
Area: Humanities.

**AS.150.229. Religion and/or Science?.**
Are Religion and Science necessarily in conflict, can they coexist, or do they in fact require each other’s existence? Is scientific method so different from religious thinking? Can science discredit God? Is it possible to be rational and remain religious? In this course, we will explore these and other related questions and examine possible answers. In the process, we will read the texts of both classical and contemporary philosophers and scientists who tackled with these problems.
Instructor(s): P. Stojanovic
Area: Humanities.
What can contemporary neuroscience tell us about the traditional problems in the philosophy of mind? The course will focus on three such problems: consciousness (what is the nature of conscious states?), the self (what is the self and is there such a thing?) and imagination (what is imagination and how is it possible?).
Instructor(s): N. Andonovski
Area: Humanities, Social and Behavioral Sciences.

AS.150.235. Philosophy of Religion.
Can one prove or disprove the existence of God? What is the relation between reason and faith? Are science and religion at odds with one another? We will consider historically significant discussions of these questions as well as important contemporary writings.
Instructor(s): Y. Melamed
Area: Humanities.

In this course, we will discuss ethical controversies related to some of the issues currently debated in the public sphere: homosexuality, sexism, racism, immigration, abortion, cloning, genetic enhancement, war, terrorism, torture, and others. Our goal will be to explore how major philosophical theories in ethics approach these controversies, and how they can help us understand and resolve these controversies.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.237. Foundations of Modern Political Philosophy.
This course is an introduction to modern political philosophy through an intensive study of the classic texts. The focus will be on the nature and limits of political authority under modern social conditions. Authors included are Machiavelli, Hobbes, Locke, Rousseau and Mill.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.245. Introduction to Philosophy of Mind.
This is an introduction to the central problems of philosophy of mind: the mind-body problem and the problem of self-knowledge. Of particular interest in contemporary work is the relation of mind and brain and whether, or how, we acquire self-knowledge.
Instructor(s): M. Williams
Area: Humanities.

AS.150.248. Introduction to Metaphysics.
The class is an introduction to contemporary, analytic, metaphysics. Topics to be discussed include: what is metaphysics, the nature of existence, time and temporality, modality and possible worlds, identity and personal identity, persistence, mereology, causation, and universals and abstract entities.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.252. Kant’s Copernican Revolution.
After the publication of Kant’s Critique of Pure Reason, Philosophy would never be the same again. This monumental work revolutionizes the way we think about the relationship between the mind and the world and is still widely regarded as the most important turning point in the history of modern philosophy. The course will undertake a close reading and analysis of the two crucial sections of the Critique of Pure Reason, Transcendental Aesthetic and Transcendental Analytic and is targeted at both students new to Kant’s thought as well as those who would like to deepen their understanding of his Copernican revolution.
Instructor(s): G. Lebanidze
Area: Humanities.

AS.150.253. Introduction to Philosophy of Psychology.
Psychology is the study of mind and behavior, and philosophy of psychology is the study of the foundations of psychology. Foundational issues in psychology addressed by philosophy of psychology come in the form of the following questions. What is the nature of mental representation? What is the basic architecture of the mind, and is it innate? Can psychological theories proceed in abstraction from the environment? The purpose of this course is to introduce students to these and related questions and the various answers they’ve been given.
Instructor(s): D. Lindeman
Area: Social and Behavioral Sciences.

AS.150.259. Introduction to the Theory of Knowledge.
An introduction to the central problems, concepts and theories of philosophical epistemology (theory of knowledge). Topics to be explored will include: what is knowledge (and why do we want it)? Can we get it (skeptics answer “No!”), or is everything in the end a matter of opinion? (skeptics say “Yes!”). Theories of knowledge and justification: foundationalism versus the coherence theory; externalism versus internalism in epistemology. To what extent is knowledge an appropriate object of theory? Readings from early 20th century through contemporary sources.
Instructor(s): M. Williams
Area: Humanities.

AS.150.300. Prometheus Editorial Workshop.
Prometheus is an international undergraduate philosophy journal published by students at Johns Hopkins University. The purpose of the journal is to promote philosophic discourse of the highest standard by offering students an opportunity to engage in open discussion, participate in the production and publication of an academic journal, and establish a community of aspiring philosophers. Students enrolled in this workshop will act as the staff readers for the journal. For more information, please visit www.prometheus-journal.com. Prerequisite: MUST have taken one philosophy course.
Instructor(s): K. Powell
Area: Humanities.

AS.150.301. Undergraduate Seminar: Practical Reason.
How does reasoning that results in action differ from reasoning that results in belief? Is all practical reasoning a kind of means-end (instrumental) reasoning, or is there a form of moral reasoning that is presupposed by instrumental reasoning? These questions and more will occupy us as we work our way through the recent philosophical debates about practical reason. Restricted to philosophy majors and minors only.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.304. The Ethics of Human Experimentation.
This course will explore ethical theory, key historical events, and operational requirements of research involving human beings. Weekly discussions will focus on seminal literature and case studies that highlight conceptual and practical challenges related to informed consent; research ethics review; risk/benefit analysis; justice/fairness; globalization of research; participation of vulnerable populations; clinical equipoise; obligations to research participants and communities during studies and after research is completed; and deception in psychological and behavioral research. The course will also explore the emergence and development of the rules governing the protection of human subject research.
Instructor(s): J. Ali
Area: Humanities.
This course systematically examines the human right to health. Topics will include the theoretical foundation(s) of human rights; how human rights compare and contrast to other dominant views of global justice (including Rawlsian versions, cosmopolitanism, and capabilities, among others); and whether (or under what circumstances) health can be properly called a “right”. Special scrutiny will be given to access to essential medicines as a recent example of the invocation of a right to health.
Instructor(s): M. DeCamp
Area: Humanities.

Without the presupposition that we can act freely, we cannot make sense of our talk about responsibility and blameworthiness. But scientific investigation increasingly makes the world more predictable (or, at best, random), and our most ambitious scientific theories aspire to a generality that would leave little room for freedom. This course is about how to reconcile the need to see ourselves as free, with the (at least apparent) indications that we are not.
Instructor(s): N. Tebben
Area: Humanities.

AS.150.309. Introduction to Philosophy of Physics.
This course starts on July 7th and runs until August 1st. This course aims at introducing the student to the basic philosophical issues that lie at the heart of the modern physicist’s conception of nature. To this end, we will look carefully at the foundations of two modern theories of physics, namely, the special theory of relativity and quantum theory. Relativity revolutionized our understanding of space and time, whereas quantum physics shattered our established beliefs about causality and determinism in nature. In the special relativity section of this class, we will cover topics such as the speed of light postulate, conventionality of simultaneity thesis, and the twin paradox. In the foundations of quantum physics, we will probe the measurement problem, Schrödinger’s cat paradox and the uncertainty principle. No previous background in physics is required.
Instructor(s): G. Guralp
Area: Humanities, Natural Sciences.

AS.150.310. Marx’s Critique of Capital.
This course is devoted to exposition and examination of Marx’s mature critical theory of capitalism, as expounded in the first volume of Capital. Special attention will be given to clarification of Marx’s method as well as the basic categories of his theory. No previous course in philosophy or social sciences is required.
Instructor(s): A. Abazari; E. Connolly
Area: Humanities.

AS.150.311. Undergraduate Seminar: Philosophy of Ludwig Wittgenstein.
We will read Wittgenstein’s two great works: Tractatus Logico-Philosophicus (1921) and Philosophical Investigations (1953). If you have previously taken AS.150.442 you may not register for AS.150.311.
Prerequisites: If you have previously taken AS.150.442 you may not register for AS.150.311.
Instructor(s): M. Williams
Area: Humanities.
AS.150.317. Undergraduate Seminar for Philosophy Majors: Recent Works in Skepticism.

We all take it for granted that perceptual experience yields knowledge of the world around us. But in the first of his Meditations on First Philosophy, Descartes invents a new and puzzling thought experiment. He imagines an Evil Demon with the power to manipulate the total course of his (Descartes’s) experience, so that what he naturally takes to be experience of the world around him is really a kind of perpetual dream: a simulation or virtual reality, as we might way today. Descartes’s problem, which has made its way into popular culture through films like those in the “Matrix” series, remains a source of philosophical puzzlement. While no one believes that skeptical hypotheses like Demon or computer deception are true, it is not easy to say how we can exclude them. Given that the deception is systematic, it seems that any “evidence” I cite could itself be part of the simulation. So how do I (or could I) know (for sure) that I’m not the victim of the Deceiver or the Matrix? We shall examine some of the latest attempts to respond to Descartes’s challenge. Does the “How could I know?” question admit of a theoretical answer, or is the question itself somehow ill-posed? Can we answer it without making significant concessions to skepticism? Exploring such questions should teach us some interesting lessons about knowledge (or the concept of knowledge). Readings from Descartes, Barry Stroud, G. E. Moore, Robert Nozick, David Lewis, Keith De Rose, James Pryor, and others.

Instructor(s): M. Williams
Area: Humanities.

This course explores philosophical responses to the French Revolution. Texts are from, among others, Hegel, Fichte, Kant and Marx. No previous knowledge in philosophy or social sciences is required.

Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.319. The Mechanical Mind.

This course provides a philosophical introduction to the topics mind, machine, and mental representation -- ideas fundamental to the cognitive sciences. Specific questions addressed include, among others, the following. What is the mind-body problem, and how might it be solved? Might minds be computers? Can there be thought without language? Is thought itself a sort of language? How do minds represent the external world? Can the mind be fully explained in scientific terms? Does it help in theorizing about the mind to think of it as a sort of machine?

Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.320. Marx: Critique of Political Economy.

A close reading of Marx’s Capital: Volume One. Specific attention will be given to clarification of Marx's methodology, the foundational categories of his critique of political economy, the systematic unity of his theory, and the underlying normative concepts which inform his work. No previous course in philosophy or social sciences is required.

Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.322. Emotion, Mind & Morality.

In this course, we will investigate a number of important philosophical questions about the normative structure of emotions and their role in moral cognition by surveying some of the classic works in philosophy. We will also read a number of contemporary papers. Finally, we will look at recent work in psychology and cognitive neuroscience on the impact of emotion on reason.

Instructor(s): M. Bergamaschi Ganapini
Area: Humanities.

AS.150.323. Undergraduate Seminar: Topics in Meta-Ethics. 3 Credits.

This is a seminar on theoretical topics in ethics. We focus on debates over cognitivism and non-cognitivism; realism and anti-realism; reasons internalism and externalism; relativism and pluralism. We read contemporary classics by Sharon Street, T.M. Scanlon, Joseph Raz, Bernard Williams, Allan Gibbard, and others.

Instructor(s): L. Theunissen
Area: Humanities
Writing Intensive.

AS.150.324. The Language of Thought.

According to the Language of Thought Hypothesis, thought is couched in a mental language with a combinatorial syntax and semantics operating computationally over a system of representations physically realized in the brain. The philosopher and cognitive scientist Jerry Fodor first developed this hypothesis in his now classic 1975 work The Language of Thought. In this course, we will engage in a close reading of this text, important both for its historical and contemporary significance to cognitive scientific theorizing. Lectures will be supplemented by further historical and theoretical material. Students should come away with a deeper appreciation of some of the key concepts in cognitive science.

Instructor(s): D. Lindeman

AS.150.330. Decisions, Games & Social Choice. 3 Credits.

This course is an introduction to decision theory, game theory, and social choice theory with an emphasis on their philosophical underpinnings and philosophical applications. Topics covered include the Prisoner’s Dilemma, Newcomb’s Problem, convention and social contracts, risk, and Arrow’s Theorem.

Instructor(s): J. Bledin
Area: Humanities.

AS.150.351. The Philosophy of Race and Racism.

The twin specters of race and racism have perennially dominated nearly every aspect of American social, economic, and political life. In this course, we will try to appreciate the nature and scope of this dominance by addressing fundamental questions about the nature, functions, and manifestations of race and racism in contemporary American life. Topics include: the "metaphysics" of race, conditions of racial membership, the moral harms introduced by racism, the psychology of racial bias, and institutional forms of racism.

Area: Humanities, Social and Behavioral Sciences.

AS.150.400. Realism & Antirealism in the Philosophy of Science.

Are our best scientific theories approximately true, or useful but false? Does science converge on the truth over time? This course addresses such questions by surveying the scientific realism debate.

Instructor(s): J. Hricko
Area: Humanities, Social and Behavioral Sciences.

AS.150.401. Greek Philosophy: Plato and His Predecessors.

A study of pre-Socratic philosophers, especially those to whom Plato reacted; also an examination of major dialogues of Plato with emphasis upon his principal theses and characteristic methods.Cross-listed with Classics.

Instructor(s): R. Bett
Area: Humanities.

AS.150.402. Aristotle.

A study of major selected texts of Aristotle.

Instructor(s): R. Bett
Area: Humanities.
AS.150.403. Hellenistic Philosophy.
A study of later Greek philosophy, stretching roughly from the death of Aristotle to the Roman imperial period. Epicureans, Stoics, and Skeptics will be the main philosophical schools examined.
Instructor(s): R. Bett
Area: Humanities.

AS.150.404. Ethics and History of Body Modification.
This course examines the ethical, historical and political issues surrounding body modifications. It explores the ways in which medical technologies have intersected with cultural constructions of gender, age, sexuality and race to produce ways of altering the human corporeal form. The course looks at a myriad of difference body modifications, concentrating mostly upon the Twentieth Century, but reaching as far back as the early modern period. Topics include: cosmetic surgery, transsexuality, bodybuilding, sports doping, dieting, anorexia, piercing, tattooing, fashion, make-up, and mythic modifications, such as vampires and werewolves. The course looks at the ways in which these modifications have been used variously to conform to, subvert and expose social norms about bodily appearance, as well as interrogating the means by which medicine and science are implicit in the cultural construction of those norms.
Instructor(s): D. O'Connor
Area: Humanities.

AS.150.405. Alienation.
In this course we will study the topic of alienation both historically and systematically. We will examine the concept’s historical roots at the turn of the 19th century and engage with contemporary discussions by authors working in philosophy of mind, ethics and political philosophy.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.406. Can Science Explain Everything?.
What is scientific explanation? We will examine various theories about this in order to determine whether and how science can explain everything physical and everything mental (including consciousness, emotions, purposes, and values). In addition to science are non-scientific theories, for example, religious ones, necessary? Do they compete with or complement scientific ones?
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.409. Classics of Analytic Philosophy.
A reading of some of the classic philosophical works in 20th Century Analytic Philosophy, beginning with G. Frege and ending with V.O. Quine.
Instructor(s): M. Williams
Area: Humanities.

AS.150.411. Arabic-Islamic Philosophy.
Introduction to major philosophers of the Arabic-Islamic tradition, including Avicenna, al-Ghazali, and Averroes. Topics addressed include the existence of God, metaphysics (e.g., causality), human freedom and knowledge, revelation and reason.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.412. Kant’s Critique of Practical Reason.
A historical and systematic study of Kant’s ethics and philosophy of religion, with special attention to his Critique of Practical Reason.
Instructor(s): E. Forster
Area: Humanities.

AS.150.414. Topics in Political Philosophy: Justice and Pluralism.
This course will examine recent liberal political philosophy, with particular emphasis on the work of John Rawls and Jürgen Habermas.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.415. Schelling’s System of Transcendental Idealism.
Schelling’s System of Transcendental Idealism is one of the key texts in the transition from Kant to Hegel. It is also one of Schelling’s clearest and most successful publications, and one of the best introductions to his philosophy. This course offers a close examination of the System of Transcendental Idealism against the background of Kant and Fichte.
Instructor(s): E. Forster
Area: Humanities.

AS.150.416. Kant’s major “minor writings.
Some of Kant’s so-called “minor writings” are in fact brilliant essays that represent important stages in the formation and development of his mature, “critical” philosophy. In this course we will study ten of these essays in detail.
Instructor(s): E. Forster
Area: Humanities.

AS.150.417. Kant’s ‘Critique Of Pure Reason’.
An examination of the philosophy of Immanuel Kant, with emphasis on The Critique of Pure Reason.
Instructor(s): E. Forster
Area: Humanities.

AS.150.419. Kant’s Critique/Judgment.
This course will examine closely and in detail the aesthetic and teleological parts of Kant’s third masterpiece, The Critique of the Power of Judgment.
Instructor(s): E. Forster
Area: Humanities.

AS.150.420. Mathematical Logic I.
The development, first, of sentential logic and, then, of first-order predicate logic. Topics covered include formal languages, effective procedures, truth-functional and Tarski semantics, logical entailment, systems of derivation, deductive soundness and completeness, compactness, theories, formalization of mathematics, sizes of models, and interpretations between theories.
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.421. Mathematical Logic II.
Gödel’s two incompleteness theorems regarding, first the unaxiomatizability of arithmetic and, second, the impossibility of proving the consistency of arithmetic using arithmetic methods (unless arithmetic is inconsistent). Computability and Church’s Thesis.
Prerequisites: Prereq: AS.150.420
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.422. Axiomatic Set Theory.
Axiomatic development of set theory, including the theory of transfinite ordinals and cardinals. Relative consistency proofs. Independence of the axiom of choice, and of the continuum hypothesis. Implications for the foundations of mathematics.
Prerequisites: AS.150.421 or equivalent
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.
AS.150.423. Formal Methods of Philosophy.
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with 150.223)
Instructor(s): J. Bledin; R. Rynasiewicz
Area: Humanities.

An examination of various interpretations of probability, including classical and priori, frequency, propensity, subjective, and logical. Also, we will study views about evidence as well as paradoxes of inductive reasoning, including Hume's skepticism, and the grue and ravens paradoxes. No previous knowledge of probability is required.
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.425. Poetic Thought.
This course will examine essays and poems by Goethe, Hölderlin, and Rilke with an eye toward the ways in which their work addresses issues central to German Idealism and modern German thought. These include the relation of subject to object; the problem of the representation of the whole; the reconciliation of science and art; and the role of consciousness in the construction of the world. Readings include texts by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer, Henrich, Husserl, Benjamin, and Allemann.
Reading knowledge of German is required.
Instructor(s): E. Forster; R. Tobias
Area: Humanities, Natural Sciences.

AS.150.426. Philosophy and Disability.
In this course, we will consider various philosophical issues related to disability. What counts as a disability? What obligations do we have, both as individuals and as a society, to people with disabilities? What counts as respecting people with disabilities, and what counts as unjustifiable discrimination against them?
Prerequisites: AS.150.219 OR AS.150.220
Instructor(s): H. Bok
Area: Humanities, Social and Behavioral Sciences.

AS.150.428. Spinoza's Political Theology.
“Political Theology” is a term that acquired significant resonance in recent years. The current class will study closely two texts by Spinoza, the founder of this discipline: the Theological-Political Treatise and the (incomplete) Political Treatise.
Instructor(s): Y. Melamed.

AS.150.429. Topics in Logic: Ontology and Knowledge Representation.
Knowledge representation deals with the possible structures by which the content of what is known can be formally represented in such a way that queries can be posed and inferences drawn. Ontology concerns the hierarchical classification of entities from given domains of knowledge together with the relations between various classes, subclasses, or individuals. The main framework in which we will work is that of description logics, which are decidable fragments of varying degrees of first order predicate logic. In ontology development we will examine RDF (Resource Description Framework), its extension to RDFS, and OWL (Web Ontology Language), and use the software Protegé for specific applications. Finally, we will take a look at query languages such as SPARQL (SPARQL Protocol and RDF Query Language).
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.430. Hegel’s Phenomenology of Spirit.
An in-depth study of Hegel’s masterpiece, the Phenomenology of Spirit. We will be concentrating on the first half of the text.
Instructor(s): E. Forster.

AS.150.431. Introduction to Philosophy of Science.
This course introduces students to some major philosophical problems about science, including these three: (1) Is there a universal set of rules constituting the "scientific method" that scientists must always follow in order to be rational? (2) Can science provide knowledge of an “unobservable” world underlying our experiences, and if so how? Or is science confined to speaking about the world of observation? (3) Are there important differences between philosophy and science? We will consider disputes between rationalists (e.g., Descartes) and empiricists (e.g., Newton) on scientific method, historical and contemporary debates between scientific realists and instrumentalisitst about the reach of science, as well as different viewpoints concerning the relationship between philosophy and science. No particular science or philosophy background is presupposed.
Instructor(s): P. Achinstein; R. Bett
Area: Humanities.

This course is a continuation of Hegel’s Phenomenology of Spirit, Part One, taught last Spring. We will closely study the second half of the book, compare its methodology with that of the first half, and end with an examination of Hegel’s systematic reflections in the “Preface”.
Prerequisites: AS.150.430
Instructor(s): E. Forster
Area: Humanities.

AS.150.433. Philos/Space & Time.
Beginning with Poincaré, there has been an influential school of thought maintaining that there is no fact of the matter as to whether the geometry of space is Euclidean or, instead, some form of non-Euclidean geometry - rather, one can arbitrarily choose a metric geometry and then modify the physics in order to fit the empirical facts. This claim has been extended to affine geometry (inertial structure of spacetime) and distant simultaneity (in relative theory). We will critically examine this tradition, beginning with a careful examination of the relation of non-Euclidean to Euclidean geometry.
Instructor(s): R. Rynasiewicz
Area: Humanities, Natural Sciences.
AS.150.434. History and Philosophy of Quantum Physics I.
Planck, Einstein, Bohr model, “old quantum theory,” correspondence principle, dispersion, BKS theory, Heisenberg’s Umdeutung (1925 invention of matrix mechanics) and its development.
Instructor(s): R. Rynasiewicz
Area: Humanities, Natural Sciences.

AS.150.435. The Philosophy and Theology of Maimonides.
This course will examine the philosophic and theological thought of Judaism’s most renowned philosopher, Moses Maimonides (1138-1204). After a brief overview of Maimonides’ multifaceted life as philosopher, scientist, physician, Talmudic scholar, rabbi, and communal leader; we will consider Maimonides’ philosophic and religious background and, in particular, the ancient Greek and medieval Islamic philosophic works that influenced him. The course will delve into his views on topics such as the relation between faith and reason, the existence of God, creation/eternity of the world, free will/determinism, the nature of prophecy, the purpose of law, human happiness, ultimate perfection, and the Afterlife. Special attention will be given to Maimonides’ method of philosophic writing and the tension in his life between the vita activa and the vita contemplativa. The course will also trace the impact of Maimonides’ Guide of the Perplexed upon later Jewish thought and upon Western philosophy and theology from Thomas Aquinas to Leibniz.
Instructor(s): S. Harvey
Area: Humanities.

AS.150.438. Spinoza’s Ethics.
The seminar is an in depth study of Spinoza’s major work, The Ethics.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.439. Epistemology.
Is knowledge (or even strong evidence) required, or possible, in science and in philosophy? We will focus on whether standard forms of nondemonstrative reasoning are justified, how if at all one can gain knowledge of the observable and unobservable world, whether and how theories in philosophy can be established, an what to do in science and philosophy when you can’t prove or get strong evidence for your theory.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.442. The Philosophy of Ludwig Wittgenstein.
A close reading of Wittgenstein’s Uncertainty familiarity with the Philosophical Investigations is required.
Instructor(s): M. Williams
Area: Humanities.

AS.150.443. Wittgenstein’s Philosophy of Mind.
The seminar will begin with a careful examination of the private language argument in the Philosophical Investigations. Among the additional themes we will examine are his analogy between philosophy of mathematics and his philosophy of psychology, implicit criticisms of the representational theory of mind, the problem of other minds and the role of deception, and the “grammar” of psychological concepts. There are numerous manuscripts concerned with mental and psychological concepts. Two volumes of the Remarks on the Philosophy of Psychology will be ordered for the seminar, though we will not be “working through” them in a systematic way. The Philosophical Investigations and Zettel are essential. Recommended Course Background: Familiarity with Wittgenstein’s work.
Instructor(s): M. Williams
Area: Humanities.

AS.150.444. The Identity of Indiscernibles.
Can two things (such as bodies, events, moments, thoughts, or geometrical points) have precisely the same qualities? If so, what makes them different from each other? In this class we will explore the debate about the Principle of the Identity of Indiscernibles. Readings will include texts by: Leibniz, Clarke, Max Black, Ayer, Ian Hacking, Robert Adams, and Michael Della Rocca.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.446. Hegel’s Science of Logic.
In this course we will focus on the first two parts of Hegel’s Science of Logic, and address the following issues (among others). In what sense is Hegel’s dialectical logic continuous with the classical metaphysical tradition and in what sense is it a critique of traditional metaphysics? What motivates the project, or what questions does Hegel think his logic can answer that previous logics did not?
Instructor(s): D. Moyar; E. Forster
Area: Humanities.

AS.150.447. Law and Philosophy.
In this course we will examine major issue in the philosophy of law, including the relation of law to moral theory, the role of democratic political institutions in legal decisions, and the justification of punishment. No previous knowledge of law or philosophy is required.
Instructor(s): D. Moyar
Area: Humanities.

What are freedom of the will and moral responsibility? Are they compatible with determinism or naturalism? This course will examine various philosophers’ answers to these questions.
Instructor(s): H. Bok
Area: Humanities.
AS.150.454. The Value of Humanity.
Are human beings distinctly valuable? What makes us valuable? And how should we respond to the value of human beings? The course is divided into four parts. The first part takes up questions about the basis of human value. We consider various proposals, including Kant's, about the valuable feature or capacity of human beings. Are we valuable in virtue of having a good will, in virtue of being agents, in virtue of being valuers, or something further? The second part takes up questions about the explanation of the value of human beings. Does the proposed feature make us valuable because it instantiates a simple value property, making us valuable in ourselves, or simpliciter? We consider whether the notion of value simpliciter is a notion we fully understand, or need. Does the proposed feature make us valuable because it makes us good-for something or someone? Who or what does it make us good-for? Or again, does the proposed feature make us such that we are objects of an appropriate attitude or practical stance? If so, what is the attitude or stance? The third part of the course takes up normative questions about the appropriate mode of responding to human beings. We consider whether it makes sense to say that human beings are "ends-in-themselves," and what it would mean to treat a person as an end-in-itself. We also consider various accounts of respect. A guiding question is whether human beings are the only appropriate objects of respect, or whether we can respect other beings, and even artifacts. The fourth part of the class applies what we have learned so far to related topics: to the question of whether human life or existence is valuable, and conversely, whether death is disvaluable. We consider, albeit briefly, the value of human beings in relation to the value of animals. And we ask about the role of Kantian notions like dignity in applied contexts, so that highly philosophical considerations about value are shown to have real-world bearing.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.455. Ethics And Animals.
Instructor(s): H. Bok
Area: Humanities.

AS.150.456. Medieval Philosophy.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.459. Theory Of Knowledge.
An advanced introduction to the central problems, concepts and theories of contemporary philosophical epistemology (theory of knowledge). Topics to be explored will include: what is knowledge (and why do we want it?); theories of justification (foundationalism, the coherence theory, etc.); externalism and internalism in epistemology; skepticism, relativism and how to avoid them. Readings from contemporary sources.
Instructor(s): M. Williams
Area: Humanities.

Russel, Frege, and Wittgenstein (in Tractatus) provided much of the philosophical foundation for 20th C. analytic philosophy. Their influence continues to be felt, especially in their conception of philosophical problems and the methods by which they can be solved.
Instructor(s): M. Williams
Area: Humanities.

AS.150.463. Theories of Rationality.
Foundations of Rationality: How should we reason about reasoning? Understanding the nature of our ability to reason is among the most important parts of understanding who we are as human beings. This course will investigate the foundations of rationality through an examination of philosophical texts and contemporary empirical research.
Instructor(s): J. Waterman
Area: Humanities.

AS.150.464. Objectivity.
This course examines the notion of objectivity and challenges to it. Its topics include the status of objective facts and beliefs, the structure of social reality, and rational disagreement.
Instructor(s): N. Goldberg
Area: Humanities.

AS.150.465. Genetics, Genomics and Society.
This course will examine the ethical, legal and social implications (ELSI) of human genetics through the lens of significant and field-defining periods and events in the history of the field. We will study the ELSI issues raised by those events, and how the events have shaped and defined the current state of the science and emerging scientific, ethical, policy and public health issues. Juniors and Seniors only.
Instructor(s): D. Mathews
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

AS.150.467. Philosophic Logic.
This course is a survey of various topics in philosophical logic. We begin with a review of the model theory of classical first-order logic. In our first unit, we will then move beyond the standard existential and universal quantifiers and consider generalized quantifiers, substitutional quantifiers, and plural quantification. In our second unit, we will investigate the theory of propositional modal logic, considering its syntax, semantics, and proof theory, and some of its applications. In our third unit, we will investigate various formal approaches to defining truth. In our fourth unit, we will get more philosophical and ask: what is logical consequence? In the course of answering this question, we will consider intuitionistic, normative, and informational conceptions of logic.
Instructor(s): J. Bledin
Area: Humanities.

AS.150.468. Global Food Ethics.
This course is an introduction to ethical issues that arise within the contemporary global agrifood system. The overarching goal of the class is to give you the opportunity to think critically about a variety of conflicting views as to how we should produce, distribute, and consume food to achieve food security for over 9.6 billion people by 2050. We will borrow tools from practical ethics and theories of justice to shed light on these pressing issues that determine our common future and the way we personally relate to the food we eat.
Instructor(s): Y. Saghai
Area: Humanities.

AS.150.470. Spinoza and the Pantheism Debate.
In this course we will examine the philosophical significance of the so-called Pantheism Debate which shook Germany at the end of the 18th century after it was revealed that Lessing, the main representative of the German Enlightenment, was a Spinozist. Readings will be drawn from Spinoza, Jacobi, Mendelssohn, Herder, Goethe, and Kant.
Instructor(s): E. Forster; Y. Melamed
Area: Humanities.
AS.150.472. Neuroethics.
Neuroethics: Can electroencephalography show that we lack free will? Can modern neuroimaging show that someone will commit a crime in the future? Is it ethical to use this Prometheus knowledge to put them in jail before they even commit a crime? In Neuroethics, we'll consider these and other pressing questions emerging at the frontiers of neuroscience and modern moral theory.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.473. Classics of Analytic Philosophy.
This will be an examination of the classic articles of 20th Century Anglo-American philosophy. Included are Frege, Russell, Wittgenstein, Austin, Carnap, Quine.
Area: Humanities.

AS.150.474. Justice and Health.
Course will consider the bearing of theories of justice on health care. Topics will include national health insurance, rationing and cost containment, and what justice requires of researchers in developing countries.
Instructor(s): H. Bok
Area: Humanities.

An examination of the moral implications and effects of addiction, depression and Pharmacological treatments for depression on our conception of our own agency. Recommended Course Background: AS.150.219, AS.150.220, or permission required.
Instructor(s): H. Bok
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

This year's topic: Temporal Experience. Do we perceive time? If so, through what sense(s)? How long is the conscious "now"? Does the temporal order of our perceptions mirror the temporal order of what we perceive? Must the experience of a temporal duration itself be extended in time? What is the relation between the experience of time (for example, the experience of time's passage) and memory? Does our experience of time accurately represent temporal features of reality, or is it actually illusory? How does attending to time's passage affect its perceived rate of passage (and what is it to attend to time's passage)? We will explore these and other questions through an examination of both psychological and philosophical work. [This course meets jointly with Professor Flombaum's AS.200.316 and AS.200.616.] Permission of instructor required to enroll.
Instructor(s): J. Flombaum; S. Gross
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

AS.150.477. Existentialism.
Through a close reading of the seminal texts by Kierkegaard, Nietzsche, Heidegger, Sartre, and Merleau-Ponty the course will examine one of the most influential philosophical movements of the last century.
Instructor(s): G. Lebanidze
Area: Humanities.

AS.150.478. Program Abroad: Jerusalem: Modern Jewish Thought.
Intersession Abroad Program. The course examines the modern Jewish thought in Israel. Guest Lecturers.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.479. The Ethics of Making Babies.
In this class, we will investigate many aspects of the ethics of making babies, asking not only which children we should create and how we should create them, but whether we should make any more people at all. Investigating these questions will take us through large chunks of moral theory, bioethics, and public health ethics. For more information, or to request permission of the instructor (for those who do not meet the prerequisite requirements), email Travis Rieder at trieder@jhu.edu. Recommended Course Background: One course in ethics or bioethics, or permission of the instructor.
Instructor(s): T. Rieder
Area: Humanities.

AS.150.484. Is Knowledge Possible: Epistemic Problems, Puzzles & Paradox.
How is knowledge possible in view of various intractable problems and paradoxes, including the problem of justifying induction, the realism-anti-realism dispute, and the grue and ravens paradoxes about evidence? Are philosophical claims knowable? A study of contemporary views about evidence, probability, inference, and philosophy.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.488. Enlightenment Moral and Political Theory.
Instructor(s): H. Bok
Area: Humanities.

AS.150.489. Spinoza’s Metaphysics.
The seminar is an in depth study of Spinoza’s major work, the Ethics. We will concentrate on Parts II-IV of the Ethics, though we will try to cover the entire book. Among the topics to be discussed are: the style and structure of the book, the meaning of being and the question of ontology in Spinoza, the nature of Spinoza’s attributes, necessitarianism, teleology, the nature of ideas, parallelism, individuals and their limits, the nature of bodies, the three kinds of knowledge, the conatus and the affects, Spinoza’s view of good and evil, blessedness and divine intellectual love.
Instructor(s): Y. Melamed
Area: Humanities.

An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-listed 300.411
Instructor(s): M. Williams
Area: Humanities.

AS.150.491. Kant and Newton on the Foundations of Science.
Kant attempted to provide a philosophical foundation for Newtonian science. In this class we will read Kant’s work “Metaphysical Foundations of Natural Science,” and philosophical and foundational parts of Newton’s “Principia,” and we will critically compare and evaluate both. No particular scientific background is presupposed.
Instructor(s): E. Forster; P. Achinstein
Area: Humanities.
AS.150.493. Introduction to Scientific Methods.
We will study various methods for proving scientific claims defended by scientists and philosophers. Included will be rationalism (Descartes), various forms of empiricism (Newton, Mill, Whewell), realism vs. anti-realism, and scientific strategies to follow when you cannot prove your favorite theory. No particular scientific background required.
Instructor(s): P. Achinstein
Area: Humanities, Social and Behavioral Sciences.

AS.150.494. Descartes.
The course is an introduction to the philosophy of Rene Descartes. We will read most of his main philosophical works, and part of his correspondence. The class is open to both undergraduate and graduate students.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.495. Sex, Drugs, and Bioethics: Medicine and Morality in Modern America.
Alongside rock n’ roll, sex and drugs have classically been seen as sites of moral or ethical transgression, particularly in post-war America. Unlike rock n’ roll, however, sex and drugs have always been bound up with the practice of medicine. This course explores the interaction of medical science with the moral and ethical issues which surround i) reproduction, sexual pleasure, and gender roles and ii) the use of drugs, both therapeutic, enhancing and recreational. Bridging these two sides of the course is the question of medicalisation, and how medical science is used to construct socially normative ideals about sexuality, behavior, emotion and physical capacity, and how in turn those moral norms are used to justify or argue for the development of particular medical practices. The aim of the course is to illuminate the mutually constitutive interplay of medicine and morality in modern America. Topics covered include: abortion, contraception, IVF, sex selection, gene selection, adolescent sexualities, prostitution, STD surveillance, medicalisation of sexual dysfunction, medicalisation of emotion and behavior, ‘moral enhancement’, ADHD, Performance Enhancing Drugs, cosmetic surgery, neuroenhancement, recreational drugs, the war on drugs, the purpose of medicine.
Instructor(s): D. O’Connor
Area: Humanities, Social and Behavioral Sciences.

AS.150.496. Topics in the Theory of Value.
We ask a basic question in value theory: what is it for something to be good, or of value? Is it for something to instantiate the simple value property ‘good’? Can goodness be identified with some natural property, perhaps, the property ‘pleasant’, or some dispositional property, perhaps, ‘what we desire to desire’? Is goodness a relation between some object, state of affairs, or activity and a subject, so that the good is benefit? On the other hand, are reasons and not values primitive in value theory, so that we should theorize about the good in terms of appropriate responses to it? We will read classic works by G. E. Moore, Peter Geach, Judith Jarvis Thomson, Connie Rosati, Nicholas Sturgeon, Richard Kraut, Donald Regan, T. M. Scanlon, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.497. Kant and the Early Moderns.
A critical examination of Kant’s dialogue with his Early Modern predecessors (Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume), and of their own respective positions.
Instructor(s): E. Forster; Y. Melamed
Area: Humanities.

AS.150.498. Modal Logic and Its Applications.
In the first part of the course, we’ll investigate the theory of modal logic, considering its syntax, semantics, and proof theory. We’ll then turn to some its philosophical applications: epistemic logic, counterfactuals, deontic logic, intuitionistic logic, and the metaphysics of time.
Instructor(s): J. Bledin
Area: Humanities, Quantitative and Mathematical Sciences.

According to the Principle of Sufficient Reason every fact must have a reason, or explanation. In other words: there are no brute facts. If a certain penguin has three dots on its right wing - there must be a reason for this. If there are no penguins with precisely three dots on their right wings – there must be a reason for that as well. In the first half of the course we will read works by the two philosophers who introduced the principle: Spinoza and Leibniz. In the second part, we will read texts by Kant, Maimon, Hegel, Schopenhauer, and some contemporary analytic philosophers, and discuss the plausibility, implications, and justification of the principle.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.511. Directed Study.
Individual study of special topics, under regular supervision of a faculty member. Special permission is required.
Instructor(s): Staff.

AS.150.512. Directed Study.
Instructor(s): Staff.

AS.150.552. Honors Project.
Instructor(s): Staff.

AS.150.551. Honors Project.
See departmental major adviser.
Instructor(s): Staff.

AS.150.559. Independent Study.
Instructor(s): H. Bok.

AS.150.601. Graduate Seminar: Topics in the Theory.
Graduate students from non-Philosophy departments need instructor permission. We ask a very basic question in value theory: what is it for something to be good, or of value? Is it for something to instantiate the simple value property ‘good’? Can goodness be identified with some natural property, perhaps, the property ‘pleasant’, or some dispositional property, perhaps, ‘what we desire to desire’? Is goodness a relation between some object, state of affairs, or activity and a subject, so that the good is benefit? On the other hand, are reasons and not values primitive in value theory, so that we should theorize about the good in terms of appropriate responses to it? We will read classic works by G. E. Moore, Peter Geach, Judith Jarvis Thomson, Connie Rosati, Nicholas Sturgeon, Michael Smith, Richard Kraut, Donald Regan, T. M. Scanlon, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.604. Probability and Evidence.
Leading theories about the meaning of probability, and about the concept of evidence. No previous course in probability is necessary.
Instructor(s): P. Achinstein
Area: Humanities.
AS.150.605. Foundations of Ethics.
The seminar will serve as an advanced, topical introduction to normative theories in ethics, and will include some meta-ethics. Our central question is: what is the foundation, or motivational basis, of ethics? Is it the individual asking what she wants for her life? Is it the determination of rational requirements on action? We think about the relationship between reason, reasons, and motivation. We consider the debate over internalism and externalism about reasons. We work through the distinction between agent-neutral and agent-relative reasons and values. Among others, we will read Thomas Nagel, Philippa Foot, Shelly Kagan, Samuel Scheffler, Derek Parfit, G. E. M. Anscombe, and Bernard Williams.
Instructor(s): L. Theunissen
Area: Humanities.

Course will focus on ancient skepticism as a way of life, and on the role of epistemological argument in skepticism so conceived. The seminar will end with a brief look at early modern reactions to ancient skepticism.
Instructor(s): M. Williams; R. Bett.

AS.150.607. Graduate Seminar: Knowledge and Perception.
How does perception reveal the world, if it does? Why have philosophical reflections on perception often led to skepticism? For background, we will start with readings from Ayer and Austin (on the sense-datum theory), and Sellars (on the Myth of the Given). We will then spend time on contemporary "disjunctive" accounts of perceptual consciousness, with readings from McDowell, Travis and (possibly) others.
Instructor(s): M. Williams
Area: Humanities.

AS.150.609. Graduate Seminar - Philosophy.
An examination of Derek Parfit's "On What Matters".
Instructor(s): H. Bok
Area: Humanities.

AS.150.610. Graduate Seminar: Virtue Ethics.
A study of recent work in virtue ethics.
Instructor(s): H. Bok.

AS.150.611. Topics in Metaphysics: Mereology.
Mereology, the study of the relationship between parts and whole, has recently become a major subfield in contemporary metaphysics. In the seminar we will read classical as well as recent literature on the subject. Topics to be discussed include: the univocity of the term 'part', priority relations between parts and whole, universal composition, the nature of simples, boundaries, mereology and set theory, spatial parts, temporal parts, metaphysical monism and nihilism. For an introductory survey of the field, please see: Varzi, Achille, "Mereology", The Stanford Encyclopedia of Philosophy (Spring 2011 Edition), Edward N. Zalta (ed.), URL = <a href="http://plato.stanford.edu/archives/spr2011/entries/mereology/">http://plato.stanford.edu/archives/spr2011/entries/mereology/</a>
Instructor(s): Y. Melamed.

Schelling's Philosophical Investigations into the Nature of Human Freedom counts among his most important works – Heidegger called it "one of the deepest works of Western philosophy." It is also one of the most enigmatic ones. In this course, we will contrast it with Schelling's philosophy of nature and investigate the extent to which his theory of freedom is necessitated by problems in his philosophy of nature.
Instructor(s): E. Forster
Area: Humanities.

AS.150.614. Topics in Meta-Ethics (Graduate Seminar).
This is a seminar on theoretical topics in ethics. We focus on debates over cognitivism and non-cognitivism; realism and anti-realism; reasons internalism and externalism; relativism and skepticism. We read contemporary classics by Sharon Street, T. M. Scanlon, Joseph Raz, Bernard Williams, Allan Gibbard, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.615. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic. Co-listed with AS.300.653
Instructor(s): H. de Vries; M. Williams
Area: Humanities.

AS.150.619. Topics in Hegel's Philosophy: The Philosophy of Right.
This course will be a close reading of G.W.F. Hegel's Philosophy of Right. Some of the main topics for discussion will be the relation of law and morality, the dependence of the political philosophy on Hegel's Logic, and the relation of individual and social conceptions of freedom.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.621. Seminar in Hegel's Phenomenology of Spirit.
The course will consist of close reading of Hegel's text along with readings from the extensive secondary literature. Particular attention will be given to Hegel's methodology, his uses of recognition, and the various treatments of agency.
Instructor(s): D. Moyar.

AS.150.627. Seminar in Epistemology.
Instructor(s): M. Williams; P. Achinstein
Area: Humanities.

AS.150.630. Seminar In Metaphysics: Mind and Cosmos.
We will begin by reading Thomas Nagel's new book: Mind and Cosmos. This will be followed by other works to be selected in class.
Instructor(s): P. Achinstein.

AS.150.632. Formal Logic.
An introduction to symbolic logic and probability. In the first two parts of the course we study formal ways of determining whether a conclusion of an argument follows from its premises. Included are truth-functional logic and predicate logic. In the third part we study the basic rules of probability, and learn how to make probability calculations and decisions in life." Co-listed with AS.150.118 (for undergraduate students) (01-F 11:00-11:50am).
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.
AS.150.633. Kant’s Opus Postumum.
This research seminar examines the reasons that led Kant to revise his transcendental philosophy late in life. Special attention to problems in the Metaphysics of Nature and the Metaphysics of Morals. Students should be familiar with Kant’s theoretical and practical philosophy.
Instructor(s): E. Forster.

AS.150.634. Seminar in Philosophy of German Idealism: Explanation or Construction? The Question of Method in the Philosophy of Nature.
“We must do away with all explanation, and description alone must take its place.” This sentence, although written over a century later and in a different context, could serve as a motto for what is perhaps the most important debate about the proper method of Naturphilosophie in German Idealism. In this seminar we will examine the philosophical significance of this debate over the role of explanation in our knowledge of nature. Readings will come from Jacobi, Goethe, Schiller, Kant, Schelling, Hegel, as well as from Pascal, Spinoza, and Newton.
Instructor(s): E. Forster
Area: Humanities.

This seminar will be an examination of Wittgenstein’s On Certainty. We will be concerned with detailed readings of the passages as well as more general interpretative claims.

This seminar will focus on language acquisition as involving a special kind of learning, one that requires the active participation of an adult in what the child does. The account we will be discussing draws heavily on Wittgenstein’s philosophy of language, particular the treatment of the problem of similarity and the development of reference.
Instructor(s): M. Williams
Area: Humanities.

AS.150.649. Graduate Seminar: Kant’s Moral Theory.
A study of Kant’s major works in moral philosophy.
Instructor(s): H. Bok.

Although all three were Copernicans in the broad sense, these great mathematician-philosophers of the 17th century held subtly different positions on the question whether the sun or the earth moves, in large part because they proposed very different analyses of what it is for a body to move. These analyses emerge from quite divergent views on space, time, matter, mind, and scientific-philosophical method in relation to natural theology. The focus of the seminar is on the interaction of these views: Newton’s rejection of Descartes’ followed by the clash between Newton’s and Leibniz’s.
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.652. Seminar in the Philosophy of Science.
Philosophy of experiment, Bayesianism, severe tests. Readings from Hacking, Galison, Franklin, Mayo, and others. Applications range from physiology to cosmology.
Instructor(s): R. Rynasiewicz
Area: Humanities, Social and Behavioral Sciences.

AS.150.653. Seminar: Philosophy - Physics.
Philosophical problems in space-time physics.
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.658. Topics in the Philosophy of Language.
An examination of recent work in the philosophy of language and/or related work in the philosophy of mind.
Instructor(s): S. Gross.

AS.150.659. Topics in Formal Semantics: Counterfactuals?.
In this seminar, we will investigate the semantics and communicative function of counterfactuals. Among the questions that we will consider are these: What are the compositional semantic values of counterfactual conditionals? What is the context change potential of a counterfactual and what kind of structure must we add to the common ground of a conversation to model its communicative effect? Do counterfactuals recommend a dynamic approach to meaning? Are counterfactual conditionals truth-apt? Do they serve to describe the world? If so, which aspect of reality is a counterfactual sensitive to?
Instructor(s): J. Bledin
Area: Humanities, Social and Behavioral Sciences.

AS.150.680. Independent Study.
Please see AS.150.810 for section numbers to use when registering.

AS.150.681. Directed Study.
Please see AS.150.810 for section numbers to use when registering.

AS.150.682. Directed Study.
Please see AS.150.810 for section numbers to use when registering.

An interdisciplinary investigation into the innateness of concepts: perception, number, language, and morality, physics discussed. Evidence from animals, infants, patients, brains. Students collect data in sections investigating claims from the readings. Cross-listed with Cognitive Science and Philosophy.
Instructor(s): J. Halberda; L. Feigenson
Area: Social and Behavioral Sciences.
German Romance Languages Literatures
Theatre Arts Studies

AS.225.328. The Existential Drama: Philosophy and Theatre of the Absurd.
Existentialism, a powerful movement in modern drama and theatre, has had a profound influence on contemporary political thought, ethics, and psychology, and has transformed our very notion of how to stage a play. Selected readings and lectures on the philosophy of Kierkegaard, Nietzsche, Camus and Sartre -- and discussion of works for the stage by Sartre, Ionesco, Genet, Beckett, Albee, Pinter, Athol Fugard (with Nkani & Nshone), Heiner Müller and the late plays of Caryl Churchill. Opportunities for projects on Dürenmatt, Frisch, Havel, Witkiewicz, and Mrozek.
Instructor(s): J. Martin
Area: Humanities.

Humanities Center
Center for Africana Studies

Black existentialism is a branch of Africana philosophy—the philosophical tendencies that arose out of the experience of the African Diaspora. This course is a philosophical interrogation into the meaning of the lived experience of being black in the context of an anti-black world through addressing such existential questions as freedom, identity, anguish, dread, responsibility, embodied agency, evil, resentment, liberation, and nihilism.
Instructor(s): F. Hayes.

This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about vrious fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes.

AS Program in Museums and Society Courses

Museums are crucibles, places where public memory, identity, and cultural values are shaped and debated. We examine this premise through weekly visits to Baltimore museums of art, science, history (and many more), critical group discussion, and intensive writing assignments. Freshmen only.
Area: Humanities, Social and Behavioral Sciences.

AS.389.105. Freshman Seminar: Art in the Museum. 3 Credits.
Go behind the scenes of local art museums to explore fundamental concepts and social issues particular to the collection and display of art in the past and today.
Instructor(s): J. Kingsley
Area: Humanities
Writing Intensive.

Freshmen will learn and apply analytical methods used in the technical study of archaeological objects by examining and researching ancient objects in the Johns Hopkins Archaeological Museum. Freshman Only.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.110. Freshman Seminar: All about Things.
What can objects tell us about the world, past and present? Using theoretical, archival, technical, and visual processes and in-depth research at Evergreen Museum & Library, we explore this question. Freshman Only.
Instructor(s): E. Rodini
Area: Humanities.

AS.389.120. Discover Hopkins: Examining Archaeological Objects.
In this course, we examine artifacts from the Johns Hopkins Archaeological Museum in order to learn about the role of materials such as ceramics, metal, glass, faience and stone in the history, art and culture of the ancient world. We will visit local artists’ studios to understand how these materials are utilized today, and examine comparative examples in local art museums. Students will work hands on with artifacts each day.
Instructor(s): S. Balachandran.

AS.389.130. Mini Course: Conservation, An Introduction to Technical Art History.
Look through the eyes of a conservator and learn how to answer historical questions by analyzing the physical nature of works of art. Objects examined will include paintings, sculpture and works on paper from the collection of the Baltimore Museum of Art. Class meets 4 times, on February 7, 14, 21 and 28, at the BMA. Syllabus and organizational meeting at JHU on Thursday, January 31, 5:30pm.
Instructor(s): T. Primeau
Area: Humanities.

AS.389.171. B'More: Exhibits in Focus.
Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. Field-trip based class considers significant regional exhibits against the background of exhibitions that transformed interpretive approaches in history, art, and science museums.

Prerequisites: Students may enroll in one B'More course only.
AS.371.188 OR AS.371.189 OR AS.271.119 OR AS.100.285 OR AS.140.318 OR AS.300.100 OR AS.360.108 OR AS.360.122
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.
AS.389.172. City on Display.
Baltimore is a city full of museums, both traditional and innovative. What do these institutions have to say about the city they call home? How do their choices of exhibits, artifacts, and descriptions combine to create a unique version of history? In this course, we will visit several Baltimore museums in order to learn the ways in which museums can tell stories of a city's industries, cultures, and people.
Instructor(s): J. Kingsley
Area: Humanities.

Explore the world of books in early Baltimore through the lens of Homewood Museum and the Carroll Family. Take a closer look at books, papers, printing, bookbinding and bookplates and try your hand at papermaking and printing techniques. Discover the offerings of local printers and booksellers through primary sources, and how books were available to those who could not otherwise afford them, through the Library Company of Baltimore (1797) whose collections are now part of the holdings of JHU's George Peabody Library.
Instructor(s): C. Arthur
Area: Humanities.

A hands-on introduction to rare books and manuscripts from ancient Mesopotamia to the Industrial Era, crossing the disciplines of science and technology, art, religion, politics and literature-- using the rare books and manuscripts of the Sheridan Libraries. Special emphasis is paid to the Printing Revolution of the 15th and 16th centuries, when books first emerged as a core element of material culture.
Instructor(s): E. Havens
Area: Humanities.

AS.389.201. Introduction to the Museum: Past and Present.
This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

This course considers the practical, political, and ethical challenges facing museums today, including the impact of technology and globalization, economic pressures, and debates over the ownership and interpretation of culture.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.205. Examining Archaeological Objects.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists' studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

Intersession Abroad Program. The course examines the museums of Paris, in situ, with a special emphasis on the creation of cultural memory.
Instructor(s): E. Rodini
Area: Humanities.

AS.389.250. Conservation of Material Culture: Art, Artifacts and Heritage Sites. 3 Credits.
Alongside specialists in area museums, we explore the conservation of material culture in various media. Topics include manufacturing methods and material degradation as well as conservation treatments, science, and ethics. Cross-listed with History of Art.
Instructor(s): L. Trusheim
Area: Humanities.

Students explore early American life related to the region and the Carroll family of Homewood. Primary research and object study culminate in student-curated thematic exhibition. Optional intersession practicum experience is also possible. For more on exhibit theme, contact instructor. M&S practicum course.
Instructor(s): C. Arthur
Area: Humanities.

Part public history, part introduction to museum practices, this hands-on course explores how heritage areas and museums serve communities through interpretation. Each year, students partner with a community to develop research-based, visitor-centered interpretive material, in the 2015 Baltimore National Heritage Area. Field trips and community meetings will be a significant part of the course. Cross-listed with History and History of Science. M&S practicum course. Class usually meets 1:30 - 3:50 except for days with field trips.
Instructor(s): E. Maloney
Area: Humanities, Social and Behavioral Sciences.

JHU pioneered the concept of the modern research university in the United States, but what does that mean for the everyday experiences of its students, faculty, staff and friends? Excavate the history of this place through the things collected, made and used here since the university's founding in 1876. Students research the material culture of Hopkins and present their findings on an interactive website: collectionsweb.jhu.edu. Course includes digital media labs. Cross-listed with History and History of Science. M&S practicum.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.302. The Virtual Museum.
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.
Instructor(s): J. Kingsley
Area: Humanities.
Work as a curator alongside Smithsonian staff, researching the work of Turkish photographer Ara Güler to develop an exhibit that considers relationships between the history of photography, archives and the museum. Class will travel several times to the Freer and Sackler Galleries in Washington D.C. M&S practicum course.
Instructor(s): N. Micklewright
Area: Humanities, Social and Behavioral Sciences.

AS.389.321. GhostFood: Curatorial Practicum with the Contemporary.
Students work with Baltimore’s Contemporary and NYC artist Miriam Simun on GhostFood, a project using art to engage important questions concerning the environment, climate change, and the politics of food. Instructor Permission. Contact erodini@jhu.edu for enrollment approval. M&S practicum course.
Instructor(s): D. Haggag
Area: Humanities.

AS.389.335. Recreating Ancient Greek Ceramics. 4 Credits.
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.349. Art, Museums and the Law.
The course encourages students to consider how artistic processes and cultural institutions are shaped by legal principles and vice versa. The interplay between art, museums and the law will be explored from historical, cultural and legal perspectives using a variety of source material.
Instructor(s): W. Lehmann
Area: Humanities.

AS.389.350. Staging Suburbia with the Jewish Museum of Maryland-Community Based Learning.
Work as a public historian alongside Jewish Museum of Maryland curators and staff, researching primary documents and artifacts to develop an exhibition about Baltimore’s Jewish suburbs. The show will travel throughout Baltimore. M&S practicum course. Cross-listed with History and Jewish Studies.
Area: Humanities, Social and Behavioral Sciences.

Students work with BMA collection and staff to develop and organize an exhibition of artists’ books. Various aspects of museum work are explored, including research, interpretation, presentation, programming, and marketing. M&S practicum course.
Instructor(s): R. Hoisington
Area: Humanities.

This interdisciplinary course will explore the institutional, cultural, artistic and architectural history of St. Peter’s and the Vatican Museum and Library from Antiquity through the Renaissance, up to the present day. Class meets in the Dick Macksey Seminar Room of the Brody Learning Commons. Cross-listed with History.
Instructor(s): E. Havens
Area: Humanities.

Students explore early American life relating to the region and Homewood House. Primary research, object study culminate in exhibit focused on trades and crafts, training and work practices. M&S practicum course. Meets at Homewood Museum. Cross-listed with History.
Instructor(s): C. Arthur
Area: Humanities.

AS.389.369. Encountering the Art of East Asia: Museum Display, Theory and Practice.
Students reconsider the exhibition and interpretation of East Asian Art at the Walters Art Museum, developing a pilot installation to suggest a new permanent display. M&S Practicum Course. Class meets at the Walters Art Museum (extended time to allow for travel). Cross-listed with East Asian Studies.
Instructor(s): R. Mintz
Area: Humanities.

Hopkins curatorial staff and photography instructor introduce the concept of books as art. Students create artist’s books inspired by campus collections for inclusion in an Evergreen exhibition. FIRST CLASS IS MANDATORY. M&S practicum course. Cross-listed with Homewood Art Workshops.
Instructor(s): J. Abbott; P. Berger
Area: Humanities.

This course examines zoos and living collections from historical and contemporary perspectives, taking into account the potentially conflicting role of zoos as conservation organizations, educational institutions, and entertainment venues. The class culminates in the creation of conservation education content for Baltimore City elementary school children. M&S practicum course.
Instructor(s): L. Finkelstein
Area: Humanities.

AS.389.373. Encountering the Art of South Asia: Museum Display, Theory and Practice.
Students reconsider the exhibition and interpretation of South Asian Art at the Walters Art Museum to suggest a new permanent display. Class meets at the Walters Art Museum. M&S practicum course.
Instructor(s): R. Brown; R. Mintz
Area: Humanities.
Do museums have a social responsibility? What roles should they play in their communities? Should they be agents of social change or social justice? This course explores the ways in which museums engage with local communities. Students work in partnership with a specific museum to develop an original and fundable proposal as a response to protests in Baltimore in the wake of the death of Freddie Gray. Field trips and guest speakers will be a key feature of the course. M&S practicum course. CBL course. Cross-listed with Sociology.
Instructor(s): E. Maloney
Area: Humanities.

Course examines practices of collecting, display and preservation beyond the western museum tradition, focusing on how these practices reflect and construct political, historical, ethnic and nationalist narratives. Counts towards the international studies major. Cross-listed with Anthropology.
Instructor(s): E. Rodini; S. Balachandran
Area: Humanities, Social and Behavioral Sciences.

AS.389.390. Library / Laboratory.
This interdisciplinary and project-driven class investigates the library as a site of experimentation and an expression of different knowledge regimes. Material includes literary treatments of the library, historical and critical readings, guest lectures, rare materials from special collections and field work.
Instructor(s): G. Dean
Area: Humanities.

AS.389.440. Who Owns Culture?.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.450. Readings in Material Culture.
Objects, things, "stuff"- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

AS.389.460. Inventing the Middle Ages from the Renaissance to Today.
Investigate the history of the collection, interpretation and display of medieval art by nations, museums and private collectors. Topics range from antiquarian interest to conception of medieval sculpture as "primitive", from the use of medieval objects in nationalistic displays and from early American museums such as the Cloisters in NY to current exhibits such as the Walters. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities.

Instructor(s): E. Rodini.

Instructor(s): E. Rodini.

Instructor(s): E. Rodini.

Instructor(s): J. Kingsley.

AS.389.521. Capstone in Museums and Society.
The Capstone allows students to develop and carry out their own, hands-on research project in a museum, collection, archive, or other living resource. Final projects must involve some form of public presentation (exhibition, lecture, poster, web-based, etc.) and a work of self-reflection (journal, brief paper, blog, or other). Projects must be approved and overseen by a supervising faculty member and approved by the Program’s Director, in keeping with the University’s Independent Work Policy. Instructor permission required.
Instructor(s): E. Rodini; J. Kingsley
Area: Humanities.

The Capstone allows students to develop and carry out their own, hands-on research project in a museum, collection, archive, or other living resource. Projects must be approved and overseen by a supervising faculty member and approved by the Program’s Director, in keeping with the University’s Independent Work Policy.
Prerequisites: AS.389.201; Prereq or coreq AS.389.202
Instructor(s): E. Rodini; J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): E. Rodini.

AS.389.650. Readings in Material Culture.
Objects, things, "stuff"- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

Cross Listed Courses

History of Art
AS.010.192. Move over Michelangelo: Renaissance Sculpture in Northern Italy.
Michelangelo’s heroic figure has dominated our conception of Renaissance sculpture, but outside of Florence & Rome, a princely aesthetic for small, intimate, tactile works dominated. We will explore the alternate paradigms for the figure and sculpture in the North, centering around Padua, Mantua, and Venice. The course is built around the collection at the Walters Art Museum, from which students will choose an object as the subject of a semester-long research project. We also take advantage of MICA to visit a bronze workshop, and will visit the Antico exhibition in NY at the Frick. Dean’s Teaching Fellowship
Instructor(s): L. Blom
Area: Humanities.
AS.010.275. Impressionism: Cone Collection.
Cross-listed with History of Art. This course offers an introduction to the Cone Collection, a world-class selection of impressionist and post-impressionist paintings acquired by two sisters. We will explore the development of radical new painting styles in tandem with the evolution of collecting and display practices that emerged in Baltimore and in Paris at the turn of the century. Visits to the Walters, the BMA, and the Sheridan Rare Book Collection will supplement our study of Monet, Cezanne, Matisse, and more.
Instructor(s): K. Johnson
Area: Humanities.

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the “global South.” This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of “global modernism.”
Instructor(s): R. Brown
Area: Humanities.

The development of archaeology in the Middle East – its history of explorers, diplomats, missionaries and gentlemen-scholars – profoundly shaped the modern world, from the creation of new museums and the antiquities market to international relations and terrorism.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.311. Japanese Print Culture and Western Collecting.
The first half of this seminar will examine issues in Japanese print culture, especially the development and circulation of ukiyo-e prints, during the Edo and Meiji periods (1615-1912). Topics will include technological innovations, the role of publishers, censorship, and prints as didactic objects. The second half of the course will explore the popularity of Japanese prints in the West, including their impact on japonisme and incorporation into Western collections Cross-list with East Asian Studies
Instructor(s): H. Snow
Area: Humanities.

AS.010.334. Problems in Ancient American Art.
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS and Program in Museum and Society
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.424. Collecting Roman Art: From Antiquity to Present.
A survey of the most important collections of Greek and Roman sculpture, from the late-Republican age through the Middle Ages and the Renaissance, until the creation of the main museums in Europe and in the United States.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.666. Exhibiting the Other.
Despite challenges to museum practices in the 1970s and 1980s, the approach to displaying the art and visual culture of regions and periods outside of the European and North American mainstream remains caught between scholarly theorizing and demands for the commodification of the exotic. The ongoing exclusionary logic of collecting and display practices and the shrinking budgets for museums undermine efforts to rethink and challenge longstanding institutionalized patterns. In this seminar we will assess the politics, theory, and practice of displaying what still operates as the “other”, reading across art history, museum studies, politics, and anthropology. Open to senior undergraduates with permission of instructor. Cross-listed with Political Science and Programs in Museums and Society
Instructor(s): R. Brown

Classics
AS.040.119. The World of Pompeii.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.

This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities.

Anthropology
AS.070.103. Community Based Learning - Africa & The Museum.
An introduction to Africa, artistic creativity, collection and exhibition: as African history, as anthropology of art and objects, and as public controversy in our national institutions. Works with the Baltimore Museum of Art. Cross-listed with Africana Studies and Programs in Museums and Society.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences.
AS.070.287. Displaying Race.
Through hands-on archival and museum research, students in this class will develop a proposal for displaying a small collection of plaster busts that were cast in the late 19th century from live indigenous subjects. Readings from the class will explore the ethical, legal and political issues surrounding the public display of anthropological and historical artifacts that were collected as part of now discredited regimes of racial classification. How can displays be used to reveal the distance that separates 19th century racial thought from our modern day understandings of physical and cultural difference? How can we responsibly display likenesses that may have been collected under coercive conditions? How can such objects be used to educate people about the place of indigenous peoples in the museum? What laws and ethical conventions govern the display of such objects? In addition to regular class meetings, students will be expected to carry out archival research and interviews in local archives and museums.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

AS.133.706. Egyptian Funerary Arts in the Archaeological Museum.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum’s website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan.

History of Science Technology

Who was Ira Remsen and why is he interred in the building bearing his name? Was the School of Medicine’s best surgeon really a life-long drug addict? This freshman seminar will explore the history of our university since its founding in 1876, including its schools of medicine, public health, nursing, the Applied Physics Laboratory and SAIS. We’ll look carefully at the archives and develop a thematic class exhibit. Research and writing intensive.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences.

AS.140.320. Modernity on Display: Technology and Ideology in the Era of World War II.
Seminar focuses on ideological at World’s Fairs over technological modernity with special emphasis upon World War II and the Cold War.
Instructor(s): A. Molella; R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.359. Museums and Globalization.
Examines how museums are linked to wider national, cultural, communities, and mobilize resources to address political, economic and social concerns and questions of heritage. Jointly with Case Western Reserve University. Cross-listed with Program in Museums & Society.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.372. Science on Display.
History of collecting, exhibiting and interpreting science and technology, from Renaissance cabinets of curiosity to modern world’s fairs, zoos, aquariums, films and science centers. Students will present their own exhibits as dioramas, web sites, documentaries or other formats. Cross-listed with Program in Museums and Society.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences.

AS.140.657. Science on Display.
History of collecting, exhibiting and interpreting science and technology, from Renaissance cabinets of curiosity to modern world’s fairs, zoos, aquariums, films and science centers. Students will present their own exhibits as dioramas, web sites, documentaries or other formats. Cross-listed with Program in Museums and Society.
Instructor(s): S. Leslie.
German Romance Languages Literatures
Center for Africana Studies

This course will explore major topics in 20th century Baltimore history, using local newspapers and the archival collections of the Baltimore Afro American Newspaper.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences.

For current course information and registration go to https://isis.jhu.edu/classes/

AS Writing Seminars Courses

The course will introduce students to the role of storytelling in medicine through a variety of essays, short stories and documentaries, from Susan Sontag’s illness as Metaphor to Atul Gawande’s Complications to Terry Wrong’s Hopkins. In addition to studying these narratives, students will produce their own written works and meet guest writers from the local medical community. Throughout, the course will provide students with valuable practice in critical analysis and reasoning, skills that are tested on entrance exams such as the MCAT.
Instructor(s): E. Parker
Area: Humanities.

AS.220.105. Fiction Poetry Writing I.
A course in realist fiction and traditional verse, with readings in Eudora Welty, Vladimir Nabokov, Henry James, Robert Frost, Paul Fussell, John Gardner, Seamus Heane, and Gwendolyn Brooks. This first course for writers is a study of forms of short fiction and metered verse. Students compose short stories and poems; includes practice of critical attention to literary models and workshop of student writing. This course is a prerequisite for most upper level courses. This course is part one of the year-long Introduction to Fiction and Poetry, and must be taken before AS.220.106.
Instructor(s): Staff
Area: Humanities.

AS.220.106. Fiction Poetry Writing II.
The second half of IFP, a course in counter-traditional antirealist fiction and free verse (Emily Dickinson, Virginia Woolf, Elizabeth Bishop, Franz Kafka, Italo Calvino, and William Carlos Williams). This course is a prerequisite for most upper level courses.
Prerequisites: AS.220.105
Instructor(s): Staff
Area: Humanities.

AS.220.108. Introduction to Fiction & Nonfiction.
A course in realist fiction and nonfiction, with readings by Eudora Welty, Vladimir Nabokov, Henry James; George Orwell, Beryl Markham and Truman Capote. Students compose short stories and essays with attention to literary models. AS.220.105 can be substituted for AS.220.108.
Instructor(s): J. Cavanaugh-Simpson
Area: Humanities.

AS.220.112. The Problems with Myth: Mythology in 20th Century Literature.
This course examines how and why important 20th century writers reinterpreted ancient myths to explore modern themes of ennui, violence, and the absurd hero. We begin with classical authors then jump to those of the 20th century: for example, Louise Glück, James Joyce, Albert Camus, and Eugene O’Neill. In addition to reading literature and essays, students write original poems and sketches in order to understand how mythic narratives continue to satisfy the modern voice.
Instructor(s): R. Oh
Area: Humanities.

AS.220.118. Plagues and Pandemics in Literature.
All plagues seem to begin in mystery: What is happening? Why? Who can we blame? What needs to change? How we react to these questions in the midst of a mass disaster has fascinated writers for centuries. Looking to literature, this class will examine pandemics ranging from the Black Death to Influenza to HIV/AIDS. We will also discuss vampires, zombies, and laboratory experiments gone disastrously wrong. Students will write their own poems and short stories.
Instructor(s): P. Kirkpatrick.

AS.220.121. Writing for Children: Craft and Charm.
This course will critically examine modern and contemporary children’s literature as models from which students will produce writing for children. We will investigate why the most successful children’s books are the most difficult to restrict to that category, through a focus on literary merit and analysis, interplay of word and image, treatment of adult subjects, and author histories. Students will write creatively in response to topics including: picture books; children’s poetry; Harold Bloom on the Junior Canon; fantasy blockbusters and “high/low” literature; magic, fairytales, and Disneyfication; and gender divisions in middle grade works. Prerequisite: AS.220.105.
Instructor(s): C. Sender
Area: Humanities.

AS.220.123. B’More: Baltimore in Fiction, Film, TV.
Please note, class will meet Saturday, Jan. 24 in the event of inclement weather. This course is for freshmen ONLY. Baltimore has long inspired a diverse group of writers & filmmakers. Students will gain access to the creative soul of the city by reading works by F. Scott Fitzgerald, Russell Baker, and Anne Tyler; watching films by Barry Levinson and John Waters, and viewing episodes of The Wire. They will also take a literary walking tour of Mount Vernon, and meet with local writers and filmmakers. Finally, students will write their own Baltimore-inspired stories and scripts. "IFP1 not a prerequisite, but preferred".
Prerequisites: AS.360.108 AND AS.270.119 AND AS.371.189 AND AS.060.153 AND AS.060.126 AND AS.100.197 AND AS.300.100 AND AS.360.176 AND AS.220.116 AND AS.280.205 AND AS.230.216 AND AS.220.190 AND AS.220.194
Area: Humanities.

AS.220.125. Short Fiction of David Foster Wallace.
In this course we will explore David Foster Wallace’s shorter fiction with an eye towards the philosophical questions raised therein: How can we be authentic when the self is a social construct? How do we escape solipsism while remaining aware of our helpless subjectivity? How do we feel empathy while acknowledging irony? Is it impossible to escape the self, or is that just me? Recommended Course Background: AS.220.105
Instructor(s): E. Levitz
Area: Humanities.
This course will provide a guided tour of some of the funniest poems ever written in the English language. Genres covered will include light verse, satire, parody, absurdism (nonsense), and others. Lessons will explore the serious side of comic poetry and vice versa. Students will have the opportunity to write their own comic verse in the genres discussed. Prerequisite: AS.220.105.
Instructor(s): A. Allen
Area: Humanities.

AS.220.127. Music and Narrative.
In today’s fast-paced, literate society, it is easy to forget that storytelling began as an oral tradition—an early music. We will explore, in broad strokes, the relationship between musical compositions and written stories, the ways in which composers/songwriters and authors alike build into their creations the elements of a story—setting, voice, character, conflict. Our canon will include everything from Thriller to Beethoven’s 3rd, Gluck to Gladiator, Cather to Carver. Work load includes weekly readings, one major creative writing assignment, and the completion of a critical essay.
Instructor(s): A. Creighton
Area: Humanities.

AS.220.131. Place, Identity, & Memory in Poetry.
This course focuses on poetry that deals with the ways in which place and memory inform a poet’s identity. For centuries, poets have explored the individual’s relationship with place, linking spaces to specific memories or experiences in an attempt to articulate how our environment defines us. Students will read a wide selection of poems that deal with “place”—from WB Yeats’ exploration of Roman ruins, to Anthony Hecht’s reflections on his childhood in New York City. Students will write and workshop their own poems weekly. This course will culminate in a final portfolio of the student’s poetry.
Instructor(s): K. Parr
Area: Humanities.

This course will explore a variety of love poetry including, but not limited to, patriotic love, familial love, divine love, and of course romantic love. We will write poems weekly in both free verse and meter. Readings will include poems by Keats, Shakespeare, Dickinson, Yeats, John Berryman, Jack Gilbert, and others. We will also read prose by Plato, Erich Fromm, Emerson, and others in order to discuss the poems more deeply. Fun is mandatory! IFP 1 not a prerequisite, but preferred.
Instructor(s): S. Greer
Area: Humanities.

AS.220.133. Writing the Personal and the Political.
This class will explore selected American fiction and poetry through the lens of social consciousness specifically, race, gender, and class. How does one write socially conscious fiction and poetry without the soapbox? Starting with W.E.B. Du Bois notion that all art is propaganda, we’ll study how authors use their craft to make a statement. In addition to writing and reading assignments, class work will include discussion board posts on current events, and a final critical essay. Prerequisite: AS.220.105.
Instructor(s): J. Takacs
Area: Humanities.

Although poetry's origins are in song, we often think of the two art forms as separate--each with unique artistic strategies and historical traditions. This course explores the close relationship between poetry and music, focusing especially on: poems set to music, with examples from the Renaissance to the present; a musical and an opera libretto adapted from literary sources; and original lyrics from a range of songwriters from Bob Dylan to contemporary hip hop artists. Students will analyze their own choices of song lyrics and will try their hands at the various forms studied in class. Prerequisite: AS.220.105.
Instructor(s): R. Hofmann
Area: Humanities.

AS.220.135. Flash Fiction & Prose Poetry.
In this workshop course we will read and write the short form. As fiction writers we will learn from the poet's sensitivity to the sonic and rhythmic possibilities of language, and look to the origins of short forms at the advent of modernity. As poets we will learn from the fiction writer's cultivation of voice and dictional particularity and explore the psychodynamics of narrative. We will conclude by studying the proliferation of new forms in literature, asking what this means in the context of tradition.
Instructor(s): C. Phinney
Area: Humanities.

AS.220.136. Poems of Love and Sexuality.
How do poets represent love and sex in their work, longing and desire, fulfillment and pleasure, absence and loss? Why is other people's love interesting to us? These are questions we will address as we write our own poems and as we closely study poems of love and sex from the ancient world to the present day.
Instructor(s): R. Hofmann
Area: Humanities.

AS.220.137. You Can't Make This Stuff Up.
Topics for this course will be autobiographical in nature. We will be considering our personal experiences and striving to articulate how those experiences relate to the larger world. The work will be both creative and analytical, as we look closely at examples of the personal narrative, and carefully revise and reconsider our own methods of autobiography. The content for the course will consist of personal essays, comics, movies, and podcasts. We will consider work by Joan Didion, James Baldwin, David Foster Wallace, Allie Brosh, Jafar Panahi, and more. IFP 1 not a prerequisite, but preferred.
Instructor(s): N. McNamara
Area: Humanities.

AS.220.138. Make 'Em Laugh.
The quickest way to kill a joke is to explain it. So how do we learn to be funny? In this class, we’ll explore techniques in humor writing. Whether poking holes in accepted absurdities or helping us laugh at death, humor makes us smile and think. Each week, we’ll focus on a different type of humor—dark comedy, satire, etc.—through stories, nonfiction, criticism, and author interviews. Students will write imitations and original work.
Area: Humanities.
A study of poems that embody Wordsworth’s idea of poetry as the spontaneous overflow of powerful feelings. This course will focus on examples of formal excess that arise in poems of ecstasy and despair. Students will read selections from John Donne, Gerard Manley Hopkins, and John Berryman’s schizophrenic Dream Songs, among other poets, paying particular attention to how each writer celebrates and affirms poetic conventions precisely by excessively deviating from proper poetic norms.
Instructor(s): M. Morton
Area: Humanities.

AS.220.142. Seriously Funny: Writing Humor Poetry.
This course will examine both light verse and how humor can enrich serious subjects in poetry. We will explore many subjects, from bad love to aesthetic experiences. Principal readings will range from classic exemplars such as Shakespeare, Dryden, and Eliot to selections from American poets since 1950, as represented in the anthology “Seriously Funny: Poems about Love, Death, Religion, Art, Politics, Sex, and Everything Else.” Students will be required to write several seriously funny poems of their own. Fun is mandatory.
Instructor(s): S. Greer
Area: Humanities.

The origins of the modern short story owe much to old-fashioned ghost stories—tales of wicked, benevolent, or eerily indifferent spirits. In this course we’ll read a range of ghost stories, discuss what makes them so compelling, and then try to write some ghost stories of our own. We’ll look at classic tales as well as more recent incarnations of the genre.
Instructor(s): N. Washatka
Area: Humanities.

AS.220.144. Metamorphosed.
From ancient Greek mythology to the recent explosion in vampires and werewolves, stories of metamorphosis have not merely captured the human imagination but have also asked us to consider what, essentially, makes us human. Whether undergoing punishment or willfully bringing about their own change, the afflicted must adapt or face rejection, exile, death; thus we begin to see connections to stories of real-world displacement and psychological trauma. But don’t be fooled: in the midst of the drama, stories of metamorphosis are, ironically, often buoyed by mischievousness, humor, and cunning a playfulness that make them only more complex. Ovid, Franz Kafka, Guy Endore, Anne Sexton, and many more; novels, stories, poetry, film; and, for a limited time only, one week exclusively on werewolves. Not for the faint of heart.
Instructor(s): A. Creighton
Area: Humanities.

AS.220.145. Otherwordliness in Contemporary Lit.
In this course, students will examine invocations of fairy tales, Biblical and historical mythologies, and magical realism in modern and contemporary literature, with a focus on short fiction and reference to poetry, novels, and plays. Students will write and workshop their own short pieces in response to class discussion. Selections will be drawn from the works of Karen Russell, George Saunders, Jeanette Winterson, Gabriel García Marquez, Amy Hempel, Louise Erdrich, Nathan Englander, Carol Ann Duffy, and Tony Kushner, among others.
Instructor(s): C. Sender
Area: Humanities.

AS.220.146. Introduction to Science Writing.
Science writing is science written in plain English and told as a story. Students research, write, edit others, rewrite. They also analyze published stories for structure, substance, accessibility, and clarity.
Area: Humanities.

AS.220.147. Writing About Family.
Write what you know! This course gives students the opportunity to write and workshop a short story, a poem, and the first pages of a memoir, isolating the joyful, humorous, and painful moments that define family life. Class discussions will explore the subject and treatment of family in fiction, poetry, and memoir by writers including Junot Díaz, Alice Munro, Marilynne Robinson, Robert Lowell, Louise Gluck, Natasha Trethewey, Joan Didion, Maxine Hong Kingston, and Tobias Wolff.
Area: Humanities.

A study of confessionalism in American poetry. M. L. Rosenthal first described Robert Lowell’s poetry as “confessional” in his 1959 review of Life Studies. But what does “confessional” mean? Is intimacy related to poetic voice or subject matter? This course will ask these and other questions, focusing on the work of Sylvia Plath, Anne Sexton, John Berryman, and Lowell. The course will also include a weekly workshop of students’ poems inspired by the readings. IFP 1 recommended, but not required.
A close study of expatriate authors featured in Woody Allen’s popular film Midnight in Paris, which students will view to begin the course. Students will examine texts by Ernest Hemingway, F. Scott Fitzgerald, Zelda Fitzgerald, Gertrude Stein, and T.S. Eliot, among others. After careful reading and discussion of the assigned works, students will pen their own creative “forgeries,” mimicking the styles of studied authors. As a capstone project, students will visit the Baltimore Museum of Art’s Cone Collection to study associated works of visual art, and will ultimately write a creative response to a chosen painting.

AS.220.156. Next Week On... : The History and Evolution of Serialized Narratives.
This course will explore the development of serialized narratives across several mediums including the novel, the graphic novel, and television. Authors may include Henry James, Sherwood Anderson, Alan Moore and Art Spiegelman. Students will write in-class sketches and three stories. This course will utilized and build upon the ideas and skills presented in IFP1. Introduction to Fiction and Poetry 1
Area: Humanities.

As the saying goes, great writers steal. In this class, we will read and analyze stories and novels that seem to be “stolen” from others—for example, Lorrie Moore’s “Referential” and Nabokov’s “Signs and Symbols.” We will consider questions like: what is influence? What does a writer gain by rewriting a classic, and what do readers gain by reading it? Students will analyze “copycat” works and write their own.
Area: Humanities.

AS.220.158. Leaping Poetry: The Art of Surprise and Surrealism.
A study of poetry that leaps between the conscious and unconscious. Robert Bly’s 1972 anthology, "Leaping Poetry" sought to rejuvenate Western poetry by looking towards the energetic writing of world poets. Students will read the work of Cesar Vallejo, Pablo Neruda, Rainier Maria Rilke, and others in order to understand what makes poetry “leap”. Students will respond to the readings by writing and workshopping poetry of their own.

AS.220.159. Poetry and Imitation.
This will be an intensive course for the beginning poet. Students will write in a variety of modes, including elegy and satire, and engage with poetry from before Shakespeare to the present day. Emphasis will be placed on imitation; as T.S. Eliot put it, “immature poets imitate, mature poets steal”. Poems will be read with an eye for the metaphorical and rhetorical elements that make them work, and students will be encouraged to apply those newfound techniques in their own writing.
Area: Humanities.

AS.220.160. Story in Fiction and Film.
Examine the two primary forms of storytelling in our society: film and fiction. This course will closely examine the writing of Tom Perrotta and Cormac McCarthy, as well as film and television adaptations of their literary works. Students will adapt a film or television show into a work of fiction. Recommended Course Background: AS.220.105
Area: Humanities.

We will examine fantasy and magical realism stories, as well as works with fairy-tale and folklore influences, and stories with elements of the uncanny or supernatural. Students will read and discuss representative fiction, complete weekly creative assignments, and participate in workshop of a final, full-length piece.

AS.220.162. The Stories We Tell Kids: On Children’s Literature.
The Stories We Tell Kids: On Children’s Literature. This intersession course will consider canonical works of children’s literature - from the Brothers Grimm and Hans Christian Andersen to Laura Ingalls Wilder and Maurice Sendak - alongside contemporary examples of the young adult genre, like Suzanne Collins’s “Hunger Games” trilogy. We will discuss the impact of illustration, recent trends in children’s literature, and the publishing process.
Area: Humanities.

AS.220.165. Writing Unreality: Fantastical Fiction.
While fiction is by definition not “real,” some modes of fiction present deliberate departures from the world as we know it. This class will examine fantastical and non-realistic writing, including surrealist and magical realist stories, as well as works with fairy-tale and folklore influences, and stories with elements of the uncanny or supernatural. Students will read and discuss representative fiction, complete weekly creative assignments, and participate in workshop of a final, full-length piece.
Instructor(s): S. Robinson
Area: Humanities.

This course will provide a guided tour of some of the funniest poems ever written in English. Genres covered will include light verse, satire, parody, absurdism (“nonsense”), and others. We’ll explore the serious side of comic poetry and vice versa. Students will have the opportunity to write their own comic verse in the genres discussed.
Instructor(s): A. Allen
Area: Humanities.

Worth a (Hundred) Thousand Words: From Flash Fiction to the Novel. In this course, students will explore the tenets of flash fiction, the short story, the novella, and the novel. We will write samples (or segments) of each genre. We will compare and contrast each in terms of craft, reader expectation, and opportunity for experimentation. Readings drawn from Amy Hempel, Lydia Davis, Kurt Vonnegut, J.D. Salinger, Grace Paley, Sherman Alexie, Junot Diaz, and Ernest Hemingway, among others.
Instructor(s): C. Sender
Area: Humanities.

A study of the spontaneous and art-obsessed poetry known as The New York School. Students will read selected poems by Frank O’Hara, John Ashbery, and Kenneth Koch. A workshop will be held each week in which students will incorporate devices from the week’s reading into their own poetry. The New York School’s influence on contemporary poets will also be emphasized.
Instructor(s): C. Ernst.
AS.220.171. Humor and Poetry.
In this class we'll take humor seriously by reading (and writing) poems that aren't so serious. We'll read poems by W.H. Auden, Wendy Cope, May Swenson, Anthony Hecht, and others. We'll ask questions: how does humor work differently from direct statement? What are the different ways a writer can be ironic? Students will write poems in a variety of forms and styles, and learn to describe the specific style of a comic writer. They'll also read scholarly work on humor, including passages from Daniel Dennett's Inside Jokes and Rachel Giora's On Our Mind. We'll explore how poetry and humor allow us to say so much with so few words.
Instructor(s): J. Frantz
Area: Humanities.

We all use figurative language, such as metaphor, simile, and irony. But what does it mean for language to be figurative, and how does this affect its meaning? This course will approach these questions from the angle of poetry. We'll ask further questions like: how do some poets use metaphor differently from others? What does Shakespeare mean when he says "my love is as a fever"? We'll read passages from different critics on metaphor, including several from Lakoff and Turner's More Than Cool Reason: A Field Guide to Poetic Metaphor and Denis Donoghue's Metaphor. Students will write poems with specific metaphorical requirements; they'll learn to use conceits (metaphors that govern an entire poem); they'll learn to use conventional metaphors; most importantly, they'll learn to think critically about why certain metaphors work and certain ones don't.
Instructor(s): J. Frantz.

AS.220.183. Introduction to Dramatic Writing: Film.
An examination of the screenplays as a literary text and blue-print for production. Professional screenplays will be critically analyzed, with focus on character, dialogue, plot development, conflict, pacing, dramatic foreshadowing, the element of surprise, text and subtext, and visual storytelling. Students will learn professional screenplay format and write a short script.
Instructor(s): M. Lapadula
Area: Humanities.

AS.220.186. The American Poem.
This course will examine the broad family tree of American poetry, from Whitman and Dickinson to the present day. We will focus on several poets of the 20th century as exemplars of major trends and/or instigators of change over the last hundred years, and we will seek to chart their influences. Through our own poems and essays, we will enter into a conversation with the myriad voices that have composed the poem in America.
Instructor(s): S. Lackaye
Area: Humanities.

AS.220.188. Fitzgeralds in Baltimore.
Zelda Fitzgerald received psychiatric treatment in Baltimore from 1932-1936. As part of her therapy, she wrote a novel that analyzed the deterioration of her marriage to F. Scott Fitzgerald. We'll examine Zelda's depiction of the Fitzgeralds marriage in Save Me the Waltz and Scott's subsequent counter-depiction in Tender is the Night, both written in Baltimore. Scott felt partly responsible for Zelda's mental instability, because of his intense scrutiny of their marriage in his two previous novels. And yet, Scott did not hesitate to dissect their marriage a third time. To compensate both for his callous refusal and his helpless inability to cure Zelda, Scott depicts his fictional double (a psychiatrist/husband) curing Zelda's fictional double (a patient/wife). How does Scott explore the ethics of balancing professional and personal commitments? Why does Zelda analogize her fictional double to Oedipus in Sophocles's Theban Plays?
Prerequisite: AS.220.105.
Instructor(s): J. Rockefeller V
Area: Humanities.

AS.220.190. B'More: How to Be Scary: Ghost stories and the Art of Giving Chills.
Students explore Baltimore through a variety of media that tell stories-writing, movies, radio shows, photography, and more. The course will include short stories by Laura Lippman, Edgar Allen Poe, and Ann Tyler, David Simon's "The Wire" and films by John Waters, photography by Aubrey Bodine, class trips and guest speakers. Students will also try their hand at journalism, documentary, and other creative avenues of storytelling.
Prerequisites: Students may enroll in one B'More course only.
AS.371.189 AND AS.270.119 AND AS.270.118 AND AS.060.153 AND AS.060.126 AND AS.100.197 AND AS.300.100 AND AS.360.176 AND AS.280.205 AND AS.230.116 AND AS.220.194
Instructor(s): L. Reding
Area: Humanities.

Through readings, movies, and trips in Baltimore, we'll explore the genre of travel writing and do some of our own. We'll read and view The Motorcycle Diaries and Into the Wild, explore the Inner Harbor, among other neighborhoods, and write our own collaborative travelogue. The Water Taxi Diaries will include both our observations and our imagined experiences, from Hons to pirates.
Prerequisites: Students may enroll in one B'More course only.
Instructor(s): R. Parson
Area: Humanities.
**AS.220.195. Fitzgerald’s Short Stories.**
An examination of F. Scott Fitzgerald's major short stories in the 1920s and 1930s. We'll analyze Fitzgerald’s commitment to exploring the tension between two opposing intellectual movements: literary naturalism (which championed the primacy of environmental determinism) and literary realism (which championed the primacy of free will). We’ll trace Fitzgerald’s mercurial loyalty to each movement: his abandonment of one school of thought for the other, from one year to the next. In “May Day” he even embraced both movements equally—testimony to his belief that “the test of a first-rate intelligence is the ability to hold two opposing ideas in mind at the same time and still retain the ability to function”. Did Fitzgerald ultimately advocate one school of thought over the other? Or, did he intend simply to stage the debate between them?
Instructor(s): J. Rockefeller V
Area: Humanities.

**AS.220.199. Ekphrasis: Writing the Visual.**
This class will explore different ways of responding poetically to visual art (painting, photographs, film) and will examine ekphrastic poems alongside the artwork that inspired them. We will examine the possibilities as well as the challenges associated with this sort of writing. Coursework will include in-class writing exercises, take-home assignments, and weekly workshops. A portfolio of original poems will be due at the end of the course.
Instructor(s): C. Wahmanholm
Area: Humanities.

**AS.220.200. Introduction to Fiction.**
Study in the reading and writing of short narrative with focus on basic technique: subject, narrative voice, character, sense of an ending, etc. Students will write weekly sketches, present story analyses in class, and workshop one finished story. Selected parallel readings from such models of the form as Henry James, Anton Chekov, James Joyce, John Cheever, Alice Munro, and others. Permission Required. (Formerly AS.220.191.)
Prerequisites: AS.220.105 AND AS.220.106
Instructor(s): R. Mitchell; T. Davies
Area: Humanities.

**AS.220.201. Introduction to Poetry Writing.**
A study of the fundamentals and strategies of poetry writing. This course combines analysis and discussion of traditional models of poetry with workshop critiques of student poems and student conferences with the instructor. Permission Required. (Formerly AS.220.141)
Prerequisites: AS.220.105 AND AS.220.106
Instructor(s): A. Allen; D. Yezzi; M. Salter
Area: Humanities.

**AS.220.202. Introduction to Non-Fiction: Matters of Fact.**
A first course in nonfiction writing, emphasizing how facts can be woven into narrative forms to portray verifiable, rather than imagined, people and events. Students read and discuss model works, then write frequent papers to refine their own style. (Formerly AS.220.145.)
Instructor(s): W. Biddle
Area: Humanities.

**AS.220.204. Introduction to Dramatic Writing: Film.**
Screenwriting workshop. This course will look at the screenplay as both a literary text and blue-print for production. Several classic screenplays will be analyzed. Students will then embark on their own scripts. We will intensively focus on character development, creating “believable” cinematic dialogue, plot development, conflict, pacing, dramatic foreshadowing, the element of surprise, text and subtext, and visual story-telling. Several classic films will be analyzed and discussed (PSYCHO, CHINATOWN, BLADE RUNNER). Students will learn professional screenplay format and write an 8-12 page screenplay that will be read in class and critiqued.
Instructor(s): M. Lapadula
Area: Humanities.

**AS.220.205. Introduction to Dramatic Writing: Plays.**
Instructor(s): M. Lapadula
Area: Humanities.

**AS.220.206. Writing About Science I.**
This course is designed to teach students the skills of daily science news reporting. The focus is on turning complex scientific information into lively prose for the general public. Lectures will cover such topics as how to compose news “ledes,” how to get great quotes, how to find stories, and how best to interact with researchers and outside experts. Scientists from Johns Hopkins, University of Maryland, and other local institutions will present their latest research to the class. Students will ask questions, as journalists would, at a news conference. Students will convert these talks into news stories, which will be critiqued in class. As a final project, students will be asked to write a daily news story of their own devising. Please note that a brief writing test is required for this course. To schedule this test, please contact the instructor at dgrimmm5@jhu.edu.
Instructor(s): D. Grimm
Area: Humanities.

**AS.220.209. Poetic Symbols: Past and Future.**
Poetic Symbols: Past and Future. In this course we will trace the lineages of familiar poetic symbols, or tropes, that have occurred centrally and with regularity in literary history. We will investigate how they evolve with time and reveal changing styles and sensibilities from author to author and age to age. That’s the past. The future is the next poem you will write as the assignment for each of the symbols we read. Recommended Course background: AS.220.105
Instructor(s): G. Williamson
Area: Humanities.

**AS.220.210. Introduction to Non-Fiction: Science as a Social Activity.**
Using the political and economic milieu of science and technology as a context for our writing, we will study how social factors such as government, money, secrecy, and ethics affect the conduct and public presentation of scientific and medical research. Controversies from 20th century history as well as current events will be discussed. Writing assignments to satisfy the W requirement will consist of short papers derived from classroom topics.
Instructor(s): W. Biddle
Area: Humanities.
AS.220.211. Journalism for Writers.
Learn reporting through analysis of famous and infamous work by contemporary journalists such as Janet Malcolm, Michael Finkel, Sarah Corbett and Seymour Hersch. Students will use readings to understand concepts central to news and feature writing, including libel, fair use, balanced reporting, and appropriate sourcing. They will then head out to find and write their own stories about local issues using best practices learned in class. Sarah Harrison Smith is a former managing editor of the New York Times Magazine and the author of “The Fact Checker’s Bible.
Instructor(s): S. Smith
Area: Humanities.

Intensive workshop development of one play by each student.
Repeatable for credit with permission of instructor. Permission Required.
Prerequisites: Prerequisite AS.220.205
Instructor(s): M. Lapadula
Area: Humanities.

AS.220.309. Writing Healthy Baltimore.
Students will explore public health issues in Baltimore and then write about them first in short pieces, and then in longer, polished works. The framework will be the mayor’s Healthy Baltimore 2015 initiative - launched in 2011 to address the city’s top-10 public health problems, including obesity, smoking, drug and alcohol abuse, STDs, cancer, and environmental health hazards. Students will study the initiative and its historical context; examine data sets; explore where and how the initiative intersects with public health practitioners and advocacy groups at the neighborhood level; and write what they learn in different formats, including essays, breaking news, and substance analysis. Students will then “workshop” each other’s papers.
Instructor(s): K. Masterson
Area: Humanities.

Our central text will be Thoreau’s “Walden”. Most of our readings will be American, though we will read excerpts from Lucretius and Darwin. We will examine various ways in which the natural world has been depicted in nonfiction, fiction, and poetry. Students will write critical papers on nature writers as well as to do creative nature writing of their own. Our authors may include: Emerson, Rachel Carson, Loren Eiseley, John Updike, Robert Frost, Donald Culross Peattie.
Instructor(s): B. Leithauser
Area: Humanities.

AS.220.311. Intermediate Fiction: Point of View.
A consideration of not just the obvious point-of-view choices writers face - first person or third? one perspective or many? - but also questions of reliability and distance. Reading may include Chekhov, Faulkner, Nabokov, Munro, Diaz, and others. Students will write and workshop their own short stories.
Area: Humanities.

AS.220.312. Intermediate Fiction: Detail and Description.
An intermediate workshop focusing on the question of how to make fictional worlds feel real. We’ll read 19th, 20th, and 21st century short fiction by authors such as Anton Chekhov, Jhumpa Lahiri, Junot Diaz, and Alice Munro, focusing particularly on how authors make the lives on the page feel three-dimensional. Students will write stories and exercises, including exercises that involve exploring Baltimore in order to observe and write about the city in which we live. Recommend Course Background: Students need to have completed a 200-level Writing Seminars course.
Prerequisites: Prereqs: AS.220.105 AND AS.220.106
Instructor(s): AS.220.317. Writing about Science II.
Skills taught will include how to construct a long-form narrative, how to create profiles, and how to maintain reader interest throughout. Class speakers will include award-winning science journalists from New York to DC, who will share the secrets of their craft. The primary writing assignment will be a 3,000-word feature piece that is pitched, reported, and workshoped throughout the course of the class. "Writing About Science II" (formerly Becoming a Science Journalist) is recommended as a prerequisite for this course. Students who have not taken this course will need to complete a short writing test and obtain the permission of the instructor to enroll.
Instructor(s): D. Grimm
Area: Humanities.

This course explores the crucial role sound plays in the power of poetry, from early roots in oral traditions to contemporary contexts. Through readings, discussion, academic reflection, and creative exercises, participants will explore a range of sound techniques in their own poems and in the poems of others.
Instructor(s): K. Noel
Area: Humanities.

AS.220.316. Seminar: Opinion Writing.
The study of exposition and argument in literary prose, with exposure to journalistic practices. Instructor will assign topics on which students write essays and subsequently discuss in class and critique for style, grammar, coherence, and effectiveness. Permission required.
Instructor(s): J. Cavanaugh-Simpson
Area: Humanities.

AS.220.317. Writing about Science II.
This course will focus intensely on student writing, and on reading stories with a strong narrative voice, the kinds of stories in which the reader can hear the narrator speaking, where the voice gets stuck in the reader’s mind, where the story feels like an invasion of the narrator’s private thoughts, or is a retelling of the tale for some invisible public, or is the quiet, clear prose of a diarist, journaling into the void.
Instructor(s): M. Klam
Area: Humanities.
An intermediate fiction workshop focusing on the question of place. We'll read 19th, 20th, and 21st century short fiction (including some set in Baltimore) in which setting strongly affects plot. While we'll talk about each story holistically, we'll also spend time discussing how authors make the physical world feel three-dimensional, and how place can lean on--even change--what happens in a story. Students will write stories and exercises, including exercises that involve exploring Baltimore in order to observe and write about the city in which we live.
Instructor(s): K. Noel
Area: Humanities.

The study of plot, with questions, both practical and theoretical, inevitably raised by the short story form. Readings in Chekhov, James, O'Connor, Cheever, Joyce, and Hemingway.
Instructor(s): T. Davies
Area: Humanities.

A study of fictional persons in works by Fitzgerald, Joyce, W.C. Williams, and Rilke. Students write sketches and compose at least one complete story.
Instructor(s): A. McDermott
Area: Humanities.

Readings in the first hundred years of the short story in the Western tradition. Authors include Hoffmann, Kleist, Pushkin, Gogol, Turgenev, Maupassant, James, Chekhov, and Wharton. Numerous pastiches will be assigned.
Instructor(s): T. Davies
Area: Humanities.

A look at some non-realistic methods, in stories and novels, for dealing with the "real world." Students will write one page exercises and short stories. Recommended Course Background: Students need to have completed a 200-level Writing Seminars class.
Prerequisites: Prereqs: AS.220.105 AND AS.220.106
Instructor(s): T. Davies
Area: Humanities.

A course in fiction writing that utilizes a wiki environment. Students will write and maintain multiple fictional data sets, read and edit other students' work in the same, and coordinate and interlink their sets with the goal of creating a collaborative web-based fiction.
Prerequisites: AS.220.200
Area: Humanities.

AS.220.337. Intermediate Dramatic Writing: Film.
An intensive workshop focusing on methodology: enhancing original characterization, plot development, conflict, story, pacing, dramatic foreshadowing, the element of surprise, text and subtext, act structure, and visual storytelling. Each student is expected to present sections of his/her "screenplay-in-progress" to the class for discussion. The screenplay Chinatown will be used as a basic text.
Area: Humanities.

Science Stories is designed to teach students the skills of daily science news reporting and writing. Lectures will cover topics such as how to write news ledes, how to get great quotes, how to find stories, and how best to interact with researchers and outside experts. Every other week, scientists from local institutions will present their latest research to the class. Students ask questions and are given a week to write up a daily news story, which is workshoped during the following class. As a final project, students will be asked to find and write a daily news story on their own.
Prerequisites: AS.220.146 or 220.203 or permission of instructor
Instructor(s): D. Grimm
Area: Humanities.

A consideration of the short-short story. Students will weekly present in the short-short story form. We will read the following anthologies: Short Shorts, Flash Fiction, Micro Fiction, and Sudden Fiction.
Prerequisites: AS.220.200
Instructor(s): G. Blake
Area: Humanities.

A course which reads fiction written by leading innovators in form such as, but not limited to, Franz Kafka, Jorge Luis Borges, Angela Carter, Amos Oz, Italo Calvino, Gabriel Garcia Marquez, A.S. Byatt, Margaret Atwood, Ian McEwan. Students will write variations of the forms of fiction.
Prerequisites: AS.220.200
Area: Humanities.

This seminar will examine how three schools of American fiction address the fate of linear narrative in the late 20th century. Permission required.
Area: Humanities.

We will look at a variety of ways in which dialogue furthers artistic ends. We will ask questions like: When is dialogue best expressed directly? When is it best summarized? How does dialogue-heavy short fiction differ from a play? When can dialogue stand on its own, and when does it require an author's explanation or interpretation? Students will write both creative and expository papers. Recommend Course Background: Students need to have completed a 200-level Writing Seminars class.
Prerequisites: Prereqs: AS.220.105 AND AS.220.106
Instructor(s): B. Leithauser
Area: Humanities.

Students will write sketches and stories, in a class organized around readings in classic texts of wilderness encounter. Hawthorne, Tolstoy, Hemingway, Faulkner, Styron, Cormac McCarthy, Kate Chopin, Melville, McGuane, Conrad. Permission Required.
Instructor(s): R. Roper
Area: Humanities.
A consideration of a variety of poetic forms and conventions, analysis and discussion of characteristic approaches, with a balance of workshop of student poems. Admission requires completion of Introduction to Poetry. Permission Required. Instructor(s): G. Williamson
Area: Humanities.

AS.220.378. Intermediate Poetry: Poetic Forms II.
The course builds on the information and techniques encountered in Poetic Forms I, and uses them in reading and imitating a range of contemporary poets. Permission required. Instructor(s): G. Williamson
Area: Humanities.

This course, which begins with careful textual study, offers students the opportunity to experience Shakespeare's language as a spoken expression, marked by rhythm, sound, rhetoric, and emotion. By working with (and ultimately committing to memory) sonnets, speeches, and scenes, students will deepen their understanding of Shakespeare's art, through performance and brief critical writings. Recommended Course Background: Need to have completed a 200-level Writing Seminars’ class. Instructor(s): D. Yezzi
Area: Humanities.

Emphasis in writing scenes—the building blocks of fiction-units of action, units of dialogue. Readings will include the stories of Chekhov, Cheever, Hemingway, and Carver. Recommended Course Background: AS.220.200
Area: Humanities.

This course will explore the dramatic mode of poetry, from the plays of the Greeks and Shakespeare to the lyric poems of Hardy, Yeats, Frost, Brooks, Hecht, and others. Weekly writing assignments, suggested by the readings, will include character monologues, dialogue, conflict, and other aspects of the dramatic lyric. Student poems will be discussed in a workshop format. Instructor(s): D. Yezzi
Area: Humanities.

Before a poem is anything else, it is the hint, implication, outline, or raw matter of a story, that fundamental human-making shape of expression. Story-writing is learned behavior and its alternative approaches are the makers of form and vision, of communication that is worth re-experiencing, or not. In this course we consider how poets have written narratives and how today's poets continue to do so. We will read one book of poems by each of eight contemporary poets who will visit the class, including Pulitzer Prize winners Claudia Emerson and Stephen Dunn, and discuss narrative strategies with these poets. Students will then write a poem "imitating" each visitor and we will workshop the poems on next class meeting after the visit. There will also be short response papers and a final essay (or examination—the student's choice). Instructor(s): D. Smith
Area: Humanities.

We will look at modern American novellas. Authors will include: Henry James, Edith Wharton, Katherine Anne Porter, John Updike, Steven Milhauser, Truman Capote, Elizabeth Spencer. Frequent short writing assignments, to be discussed in workshop. Instructor(s): B. Leithauser
Area: Humanities.

The class will read and discuss classic autobiographical texts by Benjamin Franklin, Frederick Douglass, Henry Thoreau, Henry Adams, Gertrude Stein, Malcolm X, and others. Students will write and workshop their own life stories of substantial length. Instructor(s): W. Biddle
Area: Humanities.

Scientists, engineers and physicians create and define risks. The public perceives these risks and decides what is acceptable. We will study the psychology and politics of risk communication between experts and laymen. Instructor(s): W. Biddle
Area: Humanities.

A workshop course with readings and writing assignments that emphasize the artistic value of the outward gaze. Students will keep a daily journal of observations, and over the semester will develop those observations into at least 10 new poems. Course readings will include work by Rainer Maria Rilke, Elizabeth Bishop, and Theodore Roethke. Permission Required. Instructor(s): J. Arthur
Area: Humanities.

This course will explore the dramatic mode of poetry, from the plays of the Greeks and Shakespeare to the lyric poems of Hardy, Yeats, Frost, Brooks, Hecht, and others. Weekly writing assignments, suggested by the readings, will include character monologues, dialogue, conflict, and other aspects of the dramatic lyric. Student poems will be discussed in a workshop format. Instructor(s): D. Yezzi
Area: Humanities.

Performing Fiction & Poetry: An Acting Workshop for Writers. This hands-on performance workshop, combining literary and theatrical practice, will look closely at what makes a performance or reading compelling, clear, and resonant. Through textual analysis, vocal technique, and group discussion, students will create a pliant and powerful reading style to best serve their work. The course includes regular writing assignments in poetry and fiction and weekly performance and group discussion. Instructor(s): D. Yezzi.

Tall Tales and Short: On Narrative Poetry. Many of the most resonant and influential stories in history have been told in verse—The Iliad, The Aeneid, Beowulf, The Divine Comedy, The Prelude. This course will examine narrative poems—from Homer to the present, both long and short—with an eye toward how they function formally and generically. Students will adapt an array age-old storytelling techniques for their own poems. There will be weekly writing assignments in poetry and group discussion of student writing. Instructor(s): D. Yezzi
Area: Humanities.
An exploration of poetic process as ongoing discourse within and across generations. Readings, writing assignments, and in-class workshop of student poems will encourage and enable course participants to join the conversation themselves.
Instructor(s): D. Malech
Area: Humanities.

What is a lyric poem in the 21st Century? What causes such a thing? What does it sound like? What is it good for? Who writes them? We will. By reading lyric poems written over the last 500 years in English, and by writing our own original work we will find some answers to these questions. This class will have a special emphasis on Free Verse and the particular challenges and joys of such a poem. This workshop aims to generate new work and to cultivate skills necessary for a writer. Permission Required.
Area: Humanities.

Many of the finest modern and contemporary poets were also groundbreaking dramatists, including Goethe, Yeats, Eliot, Millay, Cummings, Brecht, and Walcott. Taking these writers’ poetic dramas as models, students will explore the elements of playwriting - plot, character, rhythm, etc. - in order to create original dramatic works. Speeches, scenes, and short plays will be read aloud in class and considered in a workshop setting.
Instructor(s): D. Yezzi
Area: Humanities.

AS.220.400. Advanced Poetry Workshop.
The capstone course in poetry writing. Consideration of various poetic models in discussion, some assigned writing, primarily workshop of student poems. Students will usually complete a “collection” of up to 15 poems. Permission Required. (Formerly AS.220.396.)
Instructor(s): A. Motion
Area: Humanities.

AS.220.401. Advanced Fiction Workshop.
The capstone course in writing fiction, primarily devoted to workshop of student stories. Some assignments, some discussion of literary models, two or three completed student stories with revisions. Completion of Intermediate Fiction is required for admission. Permission Required. (Formerly AS.220.355)
Instructor(s): J. McGarry; R. Puchner
Area: Humanities.

Readings in Contemporary Poetry. Confession, place, myth and image are the four compass points of American poetry best embodied in the work of James Wright. With the work of Wright at the center of the compass, we will read the Selected Poems of four major living poets and discover how these directions and forces play out over the course of a career. Permission required.
Instructor(s): S. Scafidi
Area: Humanities.

Students read six novels by Hammett, Chandler, Cain, Burnett, and Woolrich and view seven films made from these novels by Huston, Hawks, Wilder, Dmytryk, Richards, Walsh, and Farrow. Cross-listed with Film and Media Studies.
Area: Humanities.

An examination of the fiction of three American modernist masters in the context of the early 20th century movement in the verbal and visual arts. Not a workshop course.
Instructor(s): J. Irwin
Area: Humanities.

A study of technique and strategy in the poetry of Emily Dickinson, Marianne Moore, Elizabeth Bishop, and Amy Clampitt. Not a workshop course.
Instructor(s): M. Salter
Area: Humanities.

Between sex and death the body has a varied wild life in American poetry. In a survey of contemporary work this seminar will consider the life of the body, its relationship to the imagination and the kaleidoscopic world of the senses. Reading erotic poems, elegies, poems of sickness and health, and of age and youth, we will find an intimate politics of the body. Students will read and respond critically to American poems written over the last forty years.
Instructor(s): S. Scafidi
Area: Humanities.

An examination of the poetry of Eliot, Crane and Stevens in the context of the modernist movement in the verbal and visual arts. Not a workshop course. Juniors and seniors majors are given preference.
Instructor(s): J. Irwin
Area: Humanities.

AS.220.416. Readings in Fiction: Five from the Fifties.
We will examine five American writers who were emerging or thriving in the middle of the 20th century: John Cheever, Flannery O’Connor, Peter Taylor, John Updike, and Vladimir Nabokov. We will read short stories by all five, as well as the following novels: O’Connor’s Wise Blood, Updike’s Of the Farm, Nabokov’s Lolita and Pale Fire.
Instructor(s): B. Leithauser
Area: Humanities.

Classes will be devoted to writing and collective editing of factual work of significant length and ambition, including essays, journalistic reports, histories, and biographies. Instructor permission required.
Instructor(s): W. Biddle
Area: Humanities.

AS.220.418. Readings in Fiction: The Novella.
Registration Restrictions: Permission required. Twentieth-century novels, with a new author and book each week. The course asks: What can and has been accomplished by American fiction writers in fewer than 150 pages?
Area: Humanities.

The central concern of this course is to read, study, think about, and discuss several novels and short story collections, paying special attention to the voice and structural techniques these authors have invented to create compelling works.
Instructor(s): M. Klam
Area: Humanities.
**AS.220.422. Readings in Fiction: Women Behaving Badly!**
This course will focus on fiction that centers around a profoundly flawed female protagonist, an antiheroine. Why is it that we love some of these women in spite of their wrongdoings? How do we connect to a character who is acting in ways that we would never hope to act? And how is it that bad behavior is often perceived as sexy? Are evil women any less or more evil than their male counterparts? Students will read 8 books with villainesses whose crimes range from poor parenting to serial killing. One final paper (10-20 pages) will be due at the end of the semester on a topic of the student's choosing, relating to one or more of the protagonists from the reading list.

Area: Humanities.

**Instructor(s): J. McGarry**

**AS.220.423. Readings in Fiction: Castaways in Literature.**
Our primary text will be Defoe's Robinson Crusoe. We will read spin-offs of Robinson Crusoe (Muriel Spark's Robinson, J. M. Coetzee's Foe, Elizabeth Bishop's "Crusoe in England") as well as Golding's Lord of the Flies and Sylvia Townsend Warner's Mr. Fortune's Maggot. Selections from Homer, Swift, and Byron. We will conclude with Shakespeare's The Tempest.

Area: Humanities.

**Instructor(s): B. Leithauser**

**AS.220.424. Science as Narrative.**
Class reads the writings of scientists to explore what their words would have meant to them and their readers. Discussion will focus on the shifting scientific/cultural context and on the writers' influence. Authors include Aristotle, Copernicus, Galileo, Descartes, Newton, Darwin, Freud, Einstein, Heisenberg, Bohr, Crick and Watson.

Area: Humanities.

**Instructor(s): R. Panek**

**AS.220.425. Readings in Fiction: The Story Cycle.**
A study of the short story cycle as a literary form. Authors may include Joyce, Schulz, Anderson, Welty, Calvino, Munro, Erdrich, Diaz and others.

Area: Humanities.

**Instructor(s): R. Puchner**

**AS.220.426. Readings in Poetry: Early Auden and his Contemporaries.**
A close study of the writing that Auden, Isherwood, Spender, and MacNeice produced during the 1930s against the backdrop of the Great Depression, the Spanish Civil War, and the rise of Nazism. This is not a workshop course, but students will have the opportunity to respond artistically as well as analytically to the course readings.

Area: Humanities.

**Instructor(s): J. Arthur**

**AS.220.427. Readings in Fiction: The Novella.**
A study of the novella as a literary form. Authors may include Melville, Turgenev, Tolstoy, Chekhov, Kafka, James, Wharton, Baldwin, Porter, Rufo, Smiley, and others.

Area: Humanities.

**Instructor(s): B. Leithauser**

**AS.220.428. Readings in Fiction: The Stories and Letters of Anton Chekhov.**
We will read the major long and short stories of Chekhov, along with selected letters written in the full course of his lifetime. Juniors and Seniors only.

**Prerequisites: AS.220.105 AND AS.220.106 AND AS.220.200 AND 300 level Intermediate Fiction**

Area: Humanities.

**Instructor(s): J. McGarry**

**AS.220.429. Readings in Poetry: Poetry of Ireland Since 1900.**
A close study of twentieth- and twenty-first-century Irish poetry. Course readings will include work by W.B. Yeats, Austin Clarke, Michael Longley, Seamus Heaney, Eiléan Ní Chuilleanáin, Eavan Boland, Ciaran Carson, and others. This is not a workshop course, but students will have the opportunity to respond artistically as well as analytically to the course readings.

Area: Humanities.

**Instructor(s): J. Arthur**

**AS.220.430. Readings in Poetry: Lives of the Poets.**
Lives of the Poets: Hecht, Merrill, Sexton, Plath. “The intellect of man is forced to choose / perfection of the life, or of the work,” wrote Yeats. This course examines important intersections between the life and the work in the poems and memoirs of four, biographically interconnected poets. Poems treating subjects of depression and mental illness (Hecht, Sexton, Plath), the terror of war (Hecht), the depredations of disease (Merrill), and suicide (Sexton, Plath), find their sources in these poets fascinating—and, to varying degrees, troubled—lives.

Area: Humanities.

**Instructor(s): D. Yezzi**

**AS.220.431. Readings in Fiction: Origins of the Short Story.**
This course will trace the development of the short story beginning with its tentative emergence from the shadow of the novel, through the early commercial period triggered by the invention of inexpensive newsprint, and to its full maturation at the turn of the 20th century. Works by E.T.A. Hoffmann, Heinrich Von Kleist, Alexander Pushkin, Nikolai Gogol, Ivan Turgenev, Guy de Maupassant, Henry James, Anton Chekhov, and Edith Wharton.

Area: Humanities.

**Instructor(s): T. Davies**

**AS.220.432. Readings in Fiction: Innovators of the Short Story.**
In this class, we’ll look at particularly influential writers who’ve had a lasting effect on the form of the short story, reshaping it through their own idiosyncratic vision. Authors may include Hawthorne, Kafka, Chekhov, Babel, Joyce, Borges, O’Connor, Welty, Barthes and Paley, and Munro.

Area: Humanities.

**Instructor(s): R. Puchner**

**AS.220.433. Readings in Poetry: The Mind in Motion: The Rhetoric of Poetry. 3 Credits.**
This course examines how argument and formal thought shape poetry. Through class discussion about readings ranging from Donne to Dickinson to contemporary poets, and through critical and creative exercises, students will explore poems that reveal not only feeling and observation, but also the architecture of the analytical mind at work.

Area: Humanities.

**Instructor(s): D. Malech**

**AS.220.434. Readings in Poetry: The Romance Tradition. 3 Credits.**
A writer’s survey of the medieval romance and of the subsequent poetry that it inspired. Course readings will include Sir Gawain and the Green Knight, The Death of King Arthur, and romances by Chretien de Troyes, as well as poetry by Spenser, Tennyson, and Robert Browning. This is a close workshop course, but students will have the opportunity to respond artistically as well as analytically to the course readings.

Area: Humanities.

**Instructor(s): J. Arthur**
AS.220.436. Readings in Fiction: A Writer's Journal. 3 Credits.
We will study the role journals play in the work of Virginia Woolf, Franz Kafka, Rainer Maria Rilke, and Anton Chekov. Readings include novels, stories, and diaries.
Instructor(s): J. McGarry
Area: Humanities.

AS.220.437. Creating the Poetry Chapbook.
Students will build on previous work in the major by completing a project of sustained length, depth, and cohesion (25-35 pages) in their final semester. The course will include independent creative and critical work, peer review and discussion, and meetings with the instructor. Application only; Advanced Poetry prerequisite.
Prerequisites: AS.220.400
Instructor(s): D. Malech
Area: Humanities.

In this Community-Based Learning course, students will explore the role of poetry of social and political engagement in partnership with high-school age writers from Writers in Baltimore Schools. Participants will put learning into practice by organizing community conversation, reflection, and collaboration. Participation in some events outside of class time will be required.
Instructor(s): D. Malech
Area: Humanities.

Caribbean history is reflected in the literature of emigration and collapse of empire. We'll study novels by Naipaul, Rhys, and other 20th century authors.
Instructor(s): W. Biddle
Area: Humanities.

Ordinarily no more than one independent study course may be counted among the eight Writing Seminars courses presented for graduation.

Instructor(s): D. Yezzi; G. Williamson; Staff.

AS.220.505. Writing Seminars Internship.
Instructor(s): Staff.

AS.220.506. Writing Seminars Internship.
Instructor(s): Staff.

Permission Required.
Instructor(s): Staff.

Department Permission Required.

AS.220.509. Practicing Journalism Internship.
This internship is given in conjunction with local media and must be taken on a satisfactory/unsatisfactory basis. It covers many aspects of the operation of a metropolitan newspaper or magazine or TV station. Permission Required. Satisfactory/ Unsatisfactory only.
Instructor(s): M. Klam; Staff; T. Davies; W. Biddle.

AS.220.510. Practicing Journalism.
Permission Required.
Instructor(s): T. Davies
Area: Humanities.

AS.220.513. Teaching Writing.
Permission Required.
Instructor(s): Staff
Area: Humanities.

AS.220.570. Independent Study-Intersession.
Instructor(s): G. Williamson; Staff; T. Davies.

AS.220.572. Practicing Journalism Internship.
Instructor(s): T. Davies; W. Biddle.

AS.220.592. Internship-Summer.
Instructor(s): Staff.

AS.220.594. Practicing Journalism Internship.
Instructor(s): D. Basford; J. Arthur; J. McGarry; T. Davies; W. Biddle.

AS.220.596. Teach Writing-Internship.
Instructor(s): S. Dixon.

AS.220.598. Independent Study.
Instructor(s): G. Blake; G. Williamson; J. McGarry; Staff; T. Davies.

The central concern of this course is to read, study, think about, and discuss several novels and short story collections, paying special attention to the voice and structural techniques these authors have invented to create compelling works. Restricted to Graduate Students.
Instructor(s): M. Klam
Area: Humanities.

We will examine a number of classic and contemporary coming-of-age novels. Students will compose their own: an original work of fiction that may well described as such.
Area: Humanities.

AS.220.610. Readings in Fiction: Alternatives to Realism.
Instructor(s): A. McDermott.

AS.220.613. Writing about Science.
A seminar in the writing of factual prose about scientific matters, whether for the general reader or for professional scientists as audience. Weekly writing, editing, and reading assignments. Permission required.
Instructor(s): A. Finkbeiner.

AS.220.614. Graduate - Science Workshop.
Intensive seminar, at a professional level, in writing factual prose about science for the general reader. Students find, research, and structure their own stories. Weekly writing, editing. Permission required.

AS.220.619. Graduate Poetic Forms I.

AS.220.623. Fiction Workshop.
Discussion and critique of fiction manuscripts by students enrolled in the M.F.A. program. Some assignments possible.
Instructor(s): J. McGarry.

AS.220.624. Graduate Fiction Workshop.
Discussion and critique of fiction manuscripts by students enrolled in the MFA program. Some assignments possible.
Instructor(s): A. McDermott.

AS.220.625. Poetry Workshop.
Discussion and critique of poetry manuscripts by students enrolled in the M.F.A. program. Some assignments possible.
Instructor(s): M. Salter.
AS.220.626. Graduate Poetry Workshop.
Discussion and critique of poetry manuscripts by students enrolled in the MFA program. Some assignments possible.
Instructor(s): G. Williamson.
A study of American poetry written after 1945 with discussion of aesthetic movements, events, historical and contextual, and the character of evolution and practices in poetic structures. Readings vary.
Instructor(s): J. Arthur
Area: Humanities.
We will read all--or most--of Chekhov’s short stories, his “notebook,” as well as the letters that have been translated into English.
A study of three major poets (English, Irish, American) who each introduced signature tones, techniques, and themes in modern poetry. Some other figures, such as Louise Bogan and the World War I poets, may be discussed.
Instructor(s): M. Salter.
A course in the poetry of the 14th-century alliterative revival in which students will read and study Middle English works such as Patience, Cleanness, Pearl, Gawain and the Green Knight, and Piers Plowman. Graduate students only.
Instructor(s): J. Irwin
Area: Humanities.
AS.220.645. Graduate Readings in Fiction: Castaways in Literature.
Our primary text will be Defoe’s Robinson Crusoe. We will read spin-offs of Robinson Crusoe (Muriel Spark’s Robinson, J. M. Coetzee’s Foe, Elizabeth Bishop’s “Crusoe in England”) as well as Golding’s Lord of the Flies and Sylvia Townsend Warner’s Mr. Fortune’s Maggot. Selections from Homer, Swift, and Byron. We will conclude with Shakespeare’s The Tempest. Graduate students only.
Instructor(s): J. Irwin
Area: Humanities.
AS.220.646. Graduate Readings in Fiction and Poetry.
A graduate course designed to develop both close reading and genre study, and to support the teaching of Introduction to Fiction and Poetry (IFP) I and II. Readings in selected works of American, English, and European poetry and short fiction. Course required by all graduate students in fiction and poetry.
Instructor(s): D. Yezzi; M. Klam
Area: Humanities.
A practical study of prosody rooted in the formalist tradition and continuing into theories of free verse. Readings include essays by Ezra Pound, William Carlos Williams, T.S. Eliot, Charles Olson, and Denise Levertov. This is not a workshop course, but students will have the opportunity to respond artistically as well as analytically to the course readings. Graduate students only.
Instructor(s): J. Arthur
Area: Humanities.
AS.220.648. Forms: The Longer Poem as Anthology.
A study of form through three poets especially concerned with formal variety as a complement to, and manifestation of, theme and voice. Readings will include book-length works by George Herbert (The Temple); Auden (The Sea and the Mirror); Schnackenberg (The Throne of Labdacus).
Instructor(s): M. Salter
Area: Humanities.
This course focuses on three poets whose individual relationships with form, inspiration, and innovation continue to shed light on the poetic process.
Area: Humanities.
This course will look at the ways in which Romantic and port-Romantic British poetry deals with the passage of time, how it creates elegiac structures, and how it records various kinds of loss: the loss of self, the loss of traditional consolations (especially in terms of the environment), and the threatened loss of poetry itself. Students will be encouraged to respond creatively, as well as critically. Restricted to graduate students in the MFA program.
Instructor(s): A. Motion
Area: Humanities.
AS.220.651. Readings in Fiction: Five from the Fifties.
We will examine five American writers who were emerging or thriving in the middle of the 20th century: John Cheever, Bernard Malamud, Vladimir Nabokov, Jean Stafford, John Updike. We will read short stories by all five, as well as the following novels: Malamud’s The Assistant, Nabokov’s Lolita and Pale Fire. Restricted to graduate students in the MFA program.
Instructor(s): B. Leithauser
Area: Humanities.
This course will look at the way poets have responded to the environment, from the early Romantic period to the present day. In the process, it will study and show how the role of the natural world in poetry has changed from being a cause for celebration and a mirror for self-scrutiny, into a way of continuing these things while also expressing anxiety about the effects of global warming any other dangers to the health of the planet. Poets included in the discussion will include Wordsworth, Clare, Hopkins, Frost, Auden, Hughes and Heaney.
Instructor(s): A. Motion
Area: Humanities.
Which books do writers often foist on other writers, telling them “You have to read this”? In this course, we’ll look at books that have yet to find much popular appeal, but which writers often speak about in reverential tones. Authors may include James Salter, Paula Fox, Dezső Kosztolányi, J.L. Carr, Juan Rulfo, Tom Drury, Christina Stead, Evan S. Connell, Leonard Gardner, Joy Williams, and Penelope Fitzgerald.
Instructor(s): R. Puchner
Area: Humanities.
AS.220.800. Independent Study.
Instructor(s): Staff.
Instructor(s): Staff.
Cross Listed Courses

Film and Media Studies

AS.061.205. Introduction to Dramatic Writing: Film.
In this course we will explore the basic principles of visual storytelling in narrative film as they apply to the design and execution of a screenplay. During the course of the semester, each student will work on different writing exercises while they search for their specific story and the best way to approach it. We will study different narrative tools and methods of screenwriting by analyzing films to ascertain how they work or fail to do so at script level. Through in-class critiques, group discussions and one-on-one sessions, students will apply these techniques to their own work as they undergo the process of designing, breaking down, outlining and writing a screenplay for a short film. In-class analysis and debate on the strengths and challenges posed by the students’ work will help shape the thematic emphasis of the second half of the course.
Instructor(s): R. Buso-garcia
Area: Humanities.

AS.061.315. Screenwriting By Genre.
Story design for the screenplay with special attention to the genres of comedy, horror, melodrama, and adventure. Regular workshops, short written exercises, and a longer final project.
Prerequisites: AS.061.313 or AS.220.342 or instructor’s permission
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.371. Unrealities: The Fantastic in Film & Fiction.
The fantastic, the absurd, the blackly comic in films by Cocteau, Hitchcock, and others; and in the short fiction of Barthelme, Cortázar, Hrablal, and others. Several short creative exercises and a longer final project.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.373. Intermediate Dramatic Writing: Film.
This course will explore different approaches towards understanding the fabric of story as it pertains to film. Students will be exposed to key challenges in conceiving, structuring and executing a compelling, memorable and vibrant feature-length screenplay. By studying key examples, we will discuss possible solutions to these issues. In every class, students will share their work in progress and will help each other find approaches or solutions to their specific challenges and issues. We will analyze films with screenplays that effectively play with the form to create lasting, thought-provoking and affecting stories. Through in-class critiques, group discussions and one-on-one sessions, students will apply new tools and approaches to their own work as they undergo the process of designing, breaking down, outlining and writing a full step outline, a beat sheet and the first ten pages of a feature length screenplay. As the semester progresses, in-class analysis and debate on the strengths and challenges posed by the students’ work will shape the thematic emphasis of each class.
Prerequisites: AS.220.204 OR AS.061.205
Instructor(s): R. Buso-garcia
Area: Humanities.

AS.061.376. Arts and Culture Journalism: Interactive Media, Online Publishing.
Students will participate in the ongoing creation of BmoreArt.com, an online arts and culture publication that serves the Baltimore community. In conjunction with visiting professionals, students will investigate the Baltimore cultural community and create different types of editorial content using interactive media including film, video, sound, and writing. Students will produce creative content utilizing their individual areas of expertise - such as visual art, art history, music, literary arts, film, and theater - while working together as a professional organization. A strong emphasis will be placed on the student’s collaborative participation and creative experimentation. Students with differing backgrounds in media will approach this project from unique perspectives, which will be valued and cultivated. Students with previous experience in journalism are welcome. An introductory writing or film course is suggested as a prerequisite.
Instructor(s): C. Ober
Area: Humanities.

AS.061.404. Advanced Dramatic Writing: Film.
Intensive workshop course where students will write both a first draft and a full revision of a feature length screenplay. Classes will be designed and centered on the specific challenges of the students’ works-in-progress, with an emphasis on exploring and discussing different narrative approaches and solutions that will enhance their writing and revision processes. Select films will be screened and analyzed as they pertain to the students’ scripts. Students will aim to have a polished draft of their screenplay to be submitted to industry-recognized screenwriting labs at the end of the semester.
Prerequisites: AS.061.373 or AS.220.337
Instructor(s): R. Buso-garcia

Anthropology

Metaphors of health and illness; individual and social. The body in pain and the body politic. Ethnographies of historical memory vis-à-vis medicine, epidemics, sacredness, shamanism, terror, humanitarianism, truth and reconciliation.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

Area: Humanities, Social and Behavioral Sciences.

AS.070.337. Digital Media, Democracy, and Control.
This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.
Area: Humanities, Social and Behavioral Sciences.
**German Romance Languages Literatures**

**Theatre Arts Studies**

**AS.225.324. Adaptation for the Stage.**
For aspiring playwrights, dramaturgs, and literary translators, this course is a workshop opportunity in learning to adapt both dramatic and non-dramatic works into fresh versions for the stage. Students with ability in foreign languages and literatures are encouraged to explore translation of drama as well as adaptation of foreign language fiction in English. Fiction, classical dramas, folk and fairy tales, independent interviews, or versions of plays from foreign languages are covered.

Instructor(s): J. Martin

Area: Humanities.

**AS.225.330. Playwriting Strategies.**
A seminar and workshop in playwriting with Dr. Joe Martin, playwright and dramaturge. Student writers, developing their plays, will learn how to open up to the creative process, “brainstorm,” refine their work, and shape it toward an act of artistic communication. Writer’s techniques, such as attending to plot or “story,” delineation of character, creating effective “dialog,” even overcoming “writer’s block,” will be addressed.

This course is designed to be complementary to – not a replacement for – playwriting classes in the Writing Seminars.

Instructor(s): J. Martin

**Humanities Center**

**East Asian Studies**

**AS.310.116. Romantic Love in Chinese Literature.**
This course aims to introduce students to a variety of literary texts featuring romantic love from the 9th to the mid-20th centuries in China. The target materials cover a wide range of literary products from Bo Juyi’s court poem to the modern Shanghai novella by the woman writer Zhang Ailing (Eileen Chang). As we read romance in a variety of narrative forms such as fiction, drama, and poetry, we will examine changing ideas about marriage, love, sexuality, family, emotion, and morality within the literary discourse as well as in society. Thus, students are expected to connect various literary texts about romance to their socio-historical, literary, and political surroundings. At the same time, we will discuss the shifting significance of romance for writers and reading public and consider how literary texts formed ideas about romance in society. The course is organized chronologically and thematically. Reading assignments are all in English.

Instructor(s): F. Joo

Area: Humanities.

**Interdepartmental**

**Program in Latin American Studies**

**Center for Africana Studies**

**AS.362.304. Reading and Writing Black Poetry.**
This course is an exploration of twentieth and twenty-first century black poetry and poetics. Readings include Paul Laurence Dunbar, Langston Hughes, Gwendolyn Brooks, Amiri Baraka, Sonia Sanchez, Nikki Giovanni, Lucille Clifton, Rita Dove, Natasha Trethewey, Terrance Hayes, Claudia Rankine, and Danez Smith. Texts will be mined for theme as well as formal technique as a basis for poetic experimentation.

Instructor(s): A. Gunn

Area: Humanities.

**Military Science**

The JHU Army Reserve Officers’ Training Corps (ROTC) was among the first to be established by Congress in 1916 and is routinely ranked at the top of the Nation’s 273 programs. Nearly 3,000 Hopkins students have received Army officer commissions through the program, with over 40 attaining the rank of general officer. Students can enter the program with as little as two years remaining as an undergraduate or may complete the requirements while pursuing a graduate degree.

Upon graduation, Hopkins students are commissioned as a second lieutenant in the U.S. Army. Some are selected to attend a funded law school or several medical programs, while others serve in the Active Army, Reserves or National Guard. ROTC basic classes are open to all students: The Leadership and Management class specializes in leader development and is an excellent course for students aspiring to become leaders on campus and beyond. Additional information on military science or ROTC can be obtained at our building (behind the athletic center), by asking a current cadet, and by calling 1-800-JHU-ROTC or 410-516-7474. You can also email us at rotc@jhu.edu or visit the JHU ROTC website at http://jhurotc.com/page.php?page=home.

**Scholarship and Financial Assistance**

To apply for an ROTC scholarship go to http://www.goarmy.com/rotc/scholarships.html. Scholarship opportunities are regularly improved and incentives are added. Applications for scholarships by qualified students are awarded throughout the semester, and are often retroactive. A non-scholarship program is also available. For health profession and nursing students, ROTC can offer numerous opportunities to achieve specialized education, additional postgraduate scholarships and accession/graduation bonuses.

**Curriculum**

The curriculum normally consists of a two-year Basic Course (freshmen / sophomores) and a two-year Advanced Course (juniors / seniors). Some modification to this curriculum is common, as with graduate or transfer students. Completing the 30-day Leader’s Training Course (LTC) at Fort Knox, KY, is equivalent to the Basic Course. Successful graduates of LTC are normally offered ROTC scholarships and an opportunity to enroll in the Advanced Course. Junior-ROTC experience, prior military service and military academy attendance may also qualify for Basic Course completion.

All Advanced Course students are cadets and have a contractual agreement with the Army. These students attend the National Leadership Development and Assessment Course (LDAC) at Fort Lewis, WA, between the 300- and 400-level courses. This is a core requirement to commission in the Army and cannot be waived.

Army ROTC strives to develop values-based graduates who offer expert leadership to the campus, the community and the Army. As such, we offer and encourage cadets to participate in: paid leadership and technical internships; cultural and language immersion programs; a number of Army military school opportunities in: Europe, South America, the Republic of Korea, Alaska, Hawaii, and across the continental United States.

Extracurricular activities may also include: community assistance, Red Cross blood drives, tutoring for at-risk children, and volunteering at the Veterans Administration. Cadets may apply for additional military training such as skydiving, helicopter rappelling, mountaineering, and
cold weather training. New and challenging opportunities routinely become available.

**Air Force ROTC Program**

Admission to the Air Force ROTC program is available to JHU students through an agreement with the University of Maryland. AFROTC courses have been scheduled to enable students to complete all the requirements in one morning per week at the College Park campus. JHU students are eligible to compete for all AFROTC scholarships and flying programs. The two-, three-, and four-year scholarships pay tuition, books, fees, and a monthly stipend during the school year. After graduation and the successful completion of AFROTC requirements, students are commissioned second lieutenants in the Air Force.

Those interested in this program should call 301-314-3242 or write to:

AFROTC Det 330  
University of Maryland  
Cole Field House, Room 2126  
College Park, MD 20742-1021

For more information see the website at [http://www.afrotc.com/](http://www.afrotc.com/)

For current faculty and contact information go to [http://www.jhurotc.com/page.php?page=about_the_battalion](http://www.jhurotc.com/page.php?page=about_the_battalion)

**Courses**

**AS.374.101. Introduction to the Army and Critical Thinking, ROTC 101.**

Introduces you to the personal challenges and competencies that are critical for effective leadership and communication. You will learn how the personal development of life skills such as cultural understanding, goal setting, time management, stress management, and comprehensive fitness relate to leadership, officership, and the Army profession. As you become further acquainted with the course, you will learn the structure of the ROTC Basic Course program consisting of MSL 101, 102, 201, 202, Fall and Spring Leadership Labs, and Cadet Initial Entry Training (CIET). The focus is on developing basic knowledge and comprehension of Army leadership dimensions, attributes and core leader competencies while gaining an understanding of the ROTC program, its purpose in the Army, and its advantages for the student.

Instructor(s): D. Normand; R. Buckhalt; T. ONeil.

**AS.374.102. Introduction to the Profession of Arms.**

AS.374.102 introduces you to the professional challenges and competencies that are needed for effective execution of the profession of arms and Army communication. Through this course, you will learn how Army ethics and values shape the army and the specific ways that these ethics are inculcated into Army culture. This semester, you will: explore the Seven Army Values and the Warrior Ethos, investigate the Profession of Arms and Army leadership as well as an overview of the Army, and gain practical experience using critical communication skills.

Instructor(s): R. Buckhalt; R. Graves.

**AS.374.110. Basic Leadership Laboratory, ROTC 101.**

These introductory courses in a laboratory environment are designed to expose students to practical experiences, challenges and individual learning opportunities in a small group. Students learn the fundamentals of an organization and apply principles of leadership and management at the foundation level. Students develop military courtesy, organizational discipline, communication and basic leadership and management skills. Ultimately, students understand how to facilitate and lead a small group of four to five people as an integral part of a larger organization of 75-100 people through situational training opportunities in a variety of conditions. As a leadership practicum, students have the opportunity to serve in leadership positions and receive tactical and technical training. In addition to learning to lead groups of five to 100 people, students will also be exposed to training on first aid, operating Army equipment, Army activities such as rappelling and drill and ceremony. These laboratories are required for enrolled ROTC participants who desire to be considered for a commission in the Army. Corequisite: AS.374.101-AS.374.102.

Instructor(s): D. Normand; R. Buckhalt; T. Oniel.

**AS.374.120. Basic Leadership Laboratory II.**

Students learn and apply team echelon leadership at an entry level. They continue development of military courtesy, discipline, communication and basic Soldier skills. Ultimately, students understand how to operate in and lead 4-5 persons through a program of training opportunities in a variety of conditions. Freshmen only.

Instructor(s): R. Buckhalt; R. Graves.
AS.374.201. Leadership & Teamwork I.
The focus of this course is on developing leadership and communication skills. Case studies will provide a tangible context for learning and applying aspects of team building, values, the Army Warrior Ethos, and principles of war as they apply in the contemporary operating environment. The key objective of this course is to develop knowledge of the Army’s leadership philosophies and integrate this knowledge into personal skills and team development. At the end of this course, students will be able to describe and perform tasks during the four basic phases of team building; demonstrate the types and elements of interpersonal communication; illustrate, explain, and apply the Principles of War; identify and apply problem solving steps, and apply basic leadership procedures in simple and complex situations. Corequisite: AS.374.210 for ROTC students; none for non-ROTC students.
Instructor(s): B. Sime; D. Normand; D. Yi.

AS.374.202. Leadership & Teamwork II.
Class examines how to build effective teams, various methods for influencing action, effective communication in setting and achieving goals, decision-making, creativity in problem solving, and providing feedback. Recommended Course Background: AS.374.201 or permission required.
Instructor(s): R. Buckhalt; R. Graves; T. ONeil.

Students lead and assist in leading 4-5 person teams through a variety of training opportunities. They learn the troop-leading procedures, basic problem solving, and tactical skills aimed at military leadership. Students will mentor and assist members of their team with improving their own skills and leadership as well. Corequisite: AS.374.201.
Instructor(s): B. Sime; D. Normand; R. Graves; T. ONeil.

AS.374.220. Advanced Team Leadership.
Students perform duties of and develop their leadership, as team leaders during a variety of induced training opportunities. Continued emphasis is placed on troop-leading-procedures and simple problem solving. Students lead physical fitness training and mentor subordinates in military, academic and extra-curricular activities. Successful completion of advanced team leadership allows students to progress into ROTC Advanced Courses. Sophomores only.
Instructor(s): R. Buckhalt; R. Graves.

AS.374.301. Leadership and Tactical Theory I.
Students will be introduced to the tenets of Army leadership, officership, Army values, ethics and personal development. Students will learn the fundamentals of physical training, land navigation, orders production, and small unit tactics at the squad and platoon level. Each student will be given multiple opportunities to plan and lead squad level tactical missions in the classroom and during Leadership Laboratories. Corequisite: AS.374.310. Recommended Course Background: Basic Course completion.
Instructor(s): B. Sime; D. Normand; D. Yi.

AS.374.302. Leadership and Tactics.
Examines the role communications, values, and ethics play in effective leadership through application of principles in tactical scenarios. Emphasis is on improving written and oral communications skills and military tactics proficiency. ROTC cadets only. Corequisite: AS.374.320.
Prerequisites: AS.374.301 in the Fall.
Corequisites: AS.374.320
Instructor(s): B. Sime; D. Yi.

This course provides students with a historical perspective to decisions made by American military leaders: battlefield complexity, resource limitations, and teamwork deficiencies. Students cover major military engagements from the colonial period through the current operating environment. Students examine how leaders motivated their men, devised battle strategies, implemented rules of engagement, and managed supplies, transportation, and logistics for their troops. Requires permission of the Director of Military Science. Registration restricted to contracted ROTC cadets only.
Instructor(s): D. Normand; R. Buckhalt.

AS.374.310. Basic Tactical Leadership Lab.
In Leadership Laboratory, students are given the opportunity to apply what they have learned in the classroom, in a tactical or field environment. Students learn and demonstrate the fundamentals of leadership by planning, coordinating, navigating, motivating, and leading squads in the execution of both garrison and tactical missions. Students are evaluated as part of the Leadership Development Program and FM 6-22, Army Leadership. Ultimately, prepares students to excel at the four-week National Leadership Development and Assessment Course at Fort Lewis, WA. Corequisite: AS.374.301.
Instructor(s): B. Sime; D. Normand; D. Yi.

AS.374.320. Advanced Tactical Leadership.
Students further develop their leadership skills by directing and coordinating the efforts of 9-60 personnel on offensive, defensive and civil-support tactical-tasks. Develop written plans for garrison and field environments while supervising its execution. Ultimately, prepares students to excel at the four-week National Leadership Development and Assessment Course at Fort Lewis, WA. Permission required. Juniors only.
Instructor(s): B. Sime; D. Yi.

Students are assigned the duties and responsibilities of an Army battalion staff officer and must apply the fundamentals of principles of training, the training management, the Army writing style and military decision making to weekly training meetings. Students plan, execute and assess ROTC training and other Mission Essential Tasks. Students will study how Army values and leader ethics are applied in the Contemporary Operating Environment and how these values and ethics are relevant to everyday life. The student will study the Army officer’s role in developing subordinates via counseling and administrative actions, as well as managing their own career. Students will be given numerous opportunities to train, mentor and evaluate underclass students enrolled in the ROTC Basic Course while being mentored and evaluated by experienced ROTC cadre. Corequisite: AS.374.410. Recommended Course Background: AS.374.301-AS.374.302, AS.374.310-AS.374.320 and the Basic Course.
Instructor(s): D. Normand; R. Graves; Staff.

Study includes practical exercises on establishing an ethical command climate and developing values required of a professional officer. Students apply their leadership skills in the ROTC battalion and prepare for commissioning. Corequisite: AS.374.002. ROTC cadets only.
Instructor(s): M. Gorreck; W. Greenberg.
**AS.374.407. Being a Platoon Leader.**

This course prepares Cadets for actual challenges not necessarily described in text books that junior officers may face in today's Army. Topics include: serving during war, conflict management, ethical dilemmas, time-constrained planning, and change management. This course also serves as prerequisite for the Basic Officer Leadership Course “B” phase by providing students with reinforced development on: deployment preparation, the military style of writing, supply management, human resources management, family support and operations management. Students will also learn how the Army’s organizational structure and administration affects Soldiers across ranks and over time. Finally, students will learn ways to leverage automation to improve their efficiency and effectiveness of records management and developing presentations for superiors.

Instructor(s): G. Stambone; M. Gorreck.

**AS.374.410. Advanced Planning & Decision Making I.**

Students develop a semester-long progression of programmed training activates that support completion of the unit’s Mission Essential Task List. The laboratory builds from fall to spring semester as students master advanced problem solving, resource synchronization and executive decision making. Students evaluate, mentor and develop subordinate leaders as part of the Leadership Development Program and FM 6-22, Army Leadership. The course serves as the final evaluation and determination on a student’s ability to lead Soldier’s as a Second Lieutenant in the US Army. Co-requisite: AS.374.401-AS.374.402. Recommended Course Background: AS.374.301-AS.374.302, AS.374.310-AS.374.320 and Basic Course.

Instructor(s): D. Normand; R. Graves; Staff.

**AS.374.420. Advanced Organizational Planning.**

Students develop a semester-long progression of training activates that support completion of the unit’s Mission Essential Task List. The laboratory builds on the first semester’s achievements through advanced problem solving, resource synchronization and executive decision making. Students evaluate and develop subordinate leaders as part of the Leadership Development Program and FM 6-22, Army Leadership. The course serves as the final evaluation and determination on a student’s ability to lead Soldier’s as a Second Lieutenant in the US Army. Permission required. Seniors only.

Instructor(s): M. Gorreck; R. Graves.

**AS.374.456. 21st Century Intelligence Issues.**

Taught by former U.S. Intelligence Officers and members of U.S. Defense and Intelligence Community, “21st Century Intelligence Issues” introduces students to current and future intelligence issues of the 21st century, to include intelligence successes and failures; adversarial deception and deception awareness; intelligence, the law, and government oversight; covert action; and critical 21st century intelligence challenges posed by terrorism, weapons of mass destruction, cyber warfare, unconventional warfare, and non-state actor threats.

Prerequisites: AS.374.555

Instructor(s): F. Hoffman; M. Boston.

**AS.374.501. Independent Study.**

Instructor(s): J. Wood; R. Graves.

**AS.374.512. Internship-Military Science.**

Students will select a topic relevant to the study of military leadership and will complete a project based on current military doctrine and the contemporary operating environment of current military operations. Permission required.

Instructor(s): M. Gorreck.

**AS.374.556. USIC Individual Research Topics (IRT) Independent Study Seminar.**

Extension of AS.374.255, USIC Theory and Practices is an independent study course to formalize the research, analysis and production processes of United States Intelligence Cycle (USIC). The research topics will focus on collaboration of USIC thru specific topics in USIC sectors of HUMINT, SIGINT, OSINT, MASINT, Cyber-Security and Intelligence affairs.

Instructor(s): F. Hoffman; M. Boston; M. Gorreck.

**AS.374.557. US Intelligence Community: National Security Analysis Independent Study.**

Extension of AS.374.255, USIC Theory and Practices is an independent study course to formalize the research, analysis and production processes of United States Intelligence Community (USIC). The research topics will focus on US National Security issues.

Prerequisites: (AS.374.555 AND AS.374.556)

Instructor(s): F. Hoffman; M. Boston; M. Gorreck.

**AS.374.558. US Intelligence Community: Advanced Concepts Independent Study.**

Taught by former U.S. Intelligence Officers and members of U.S. Defense and Intelligence Community, “US Intelligence Community: Advanced Concepts” (USIC-AC) is an advanced independent study course designed to further familiarize the student with the function, organization, and operational elements of the U.S. Intelligence Community (IC). Gain advanced knowledge of the USIC and expand the development of raw data into intelligence products through individual coursework.

Instructor(s): F. Hoffman; M. Boston.

**AS.374.570. Independent Study.**

Instructor(s): F. Hoffman; M. Boston; M. Gorreck.

---

**Museums and Society**

The Program in Museums and Society is concerned with the institutions that shape knowledge and understanding through the collection, preservation, interpretation, and/or presentation of material culture. It focuses on the role of museums (broadly defined) and their contents in societies past and present, including their cultural, intellectual, and political significance.

A minor in Museums and Society complements study in a range of fields, including but not limited to anthropology, archaeology, history, history of art, and history of science and technology. Many courses include visits to or focused work in local and regional institutions, as well as in on-campus collections (Archaeological Museum, Homewood Museum, Evergreen Museum and Library, and the Sheridan Libraries).

Whether they are researching a historical artifact or debating the obligations of public institutions, students in the program are challenged to approach their discipline from a new angle. While some may choose to pursue a museum career, the program has the larger goal of encouraging critical, careful thinking about some of the most influential cultural institutions of our day.

**Requirements for a Minor in Museums and Society**

Course requirements for the minor in Museums and Society are designed to introduce students to a broad set of historical, theoretical, and practical museum issues and to give them the opportunity to explore museums first-hand. Prospective minors should consult with the
Director of Undergraduate Studies for guidance in designing a program of study.

- A minimum of six different courses (amounting to at least 18 credits) selected from those approved by the program.
- With the exception of up to three credits of museum internship, courses used to satisfy minor requirements must be taken for a letter grade. Students must earn a “C-” or higher grade in all other courses used to satisfy minor requirements.
- At least two different primary departments/disciplines must be represented in the students coursework beyond the introductory courses.
- Four additional courses in the program: Of these courses, at least three must be 300-level or higher and at least two different primary departments/disciplines must be represented; these four courses must also include a minimum of three credits of “practicum” [POS-Tag PMUS-PRAC] work.

**Introductory Courses**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.389.201</td>
<td>Introduction to the Museum: Past and Present</td>
<td>3</td>
</tr>
<tr>
<td>AS.389.202</td>
<td>Introduction to the Museum: Issues and Ideas</td>
<td>3</td>
</tr>
</tbody>
</table>

**Four Upper-Level Electives**

- At least three must be 300-level or higher courses
- Three credits of practicum work [POS-Tag PMUS-PRAC]
- Two courses must be from at least two different primary departments beyond Museums and Society

**Total Credits**

18

**Additional details:**

- **Introduction to the Museum sequence:** Ideally, students should take at least one of the two introductory courses before enrolling in more focused courses, but this is not required.

- **Departmental distribution:** In keeping with the interdisciplinary nature of the program, students are encouraged to explore various fields and must complete courses in at least two different primary disciplines beyond Museums and Society. Primary disciplines are defined either as the home department for the course (identified by the course’s three-digit prefix), as the first cross-listing beyond Museums and Society, or as the home discipline of the instructor. Students should seek guidance from the program to ensure they are fulfilling this requirement, and should note that Independent Study and Capstone credits cannot be applied to it.

- **Practicum Work:** Practicum credits can be earned only from courses designated as Museums and Society “practicum” in the course description [POS-Tag PMUS-PRAC].

- **Independent Study and Capstone:** Students have two options for pursuing independent work for credit in Museums and Society. The Independent Study typically takes a more traditional academic approach to research and presentation; the Capstone encourages research that is engaged with collections and results in an alternative, often public project. Students interested in these options should consult the university’s independent work policy and follow the guidelines for Museums and Society outlined under Independent Research. Approval for credit will not be given until a project has been officially approved by an appropriate mentor, in full and frequent consultation with the Program in Museums and Society. No more than 3 credits of independent work can be applied to the minor.

- **Internships:** Internships are valuable opportunities to expand horizons, learn in the field, and investigate real-world applications of academic work. The Program in Museums and Society highly encourages students to explore internship options and works with the Career Center to do so. However, the program does not award academic credit for internships. Students interested in receiving credit for independent work should consider the Independent Study and Capstone options instead.

- **Other Information:** No course other than the Independent Study or Capstone may be counted toward the minor more than once (up to a maximum of 3 credits).

For current faculty and contact information go to http://krieger.jhu.edu/museums/directory/

**Faculty**

**Director**

Elizabeth Rodini

Teaching Professor, History of Art: museum history, theory, and practice; collecting history; histories of translation and exchange; material and heritage studies.

**Assistant Director**

Jennifer P. Kingsley

Lecturer, Museums and Society: medieval art, museum history, theory and practice, medievalism, collecting history; historiography of medieval studies.

**Affiliates Board**

James Archer Abbott

Curator and Director, Evergreen Museum and Library.

Sanchita Balachandran

Curator/Conservator, Johns Hopkins Archaeological Museum and Lecturer, Near Eastern Studies.

Rebecca M. Brown

Associate Professor, History of Art.

Gabrielle Dean

Curator, Modern Literary Rare Books and Manuscripts and Lecturer, Museums and Society.

Linda DeLibero

Director, Film and Media Studies Program.

Jane Guyer

Professor Emeritus, Anthropology.

Deana Haggag

Director, The Contemporary Museum of Baltimore.

Michael Kwass

Associate Professor, History.

Stuart W. Leslie

Professor, History of Science and Technology.

Mitchell Merback

Professor, History of Art.
Jacqueline M. O’Regan

Jason Vaughan
Director of Historic Preservation and Interpretation, Baltimore National Heritage Area.

Professors
Betsy M. Bryan
Alexander Badawy Chair in Egyptian Art and Archaeology, Near Eastern Studies: Egyptian art and archaeology, Egyptology.

Stephen Campbell
Henry M. and Elizabeth P. Wiesenfeld Professor and Chair, History of Art: Italian Renaissance art, the studiolo and Renaissance collecting.

Marian Feldman
Professor, History of Art: ancient Near East and Eastern Mediterranean art.

Robert H. Kargon
Willis K. Shepard Professor of the History of Science, History of Science and Technology: history of physics, science, social change.

Stuart W. Leslie
History of Science and Technology: history of technology, science-based industry, 20th-century American science.

Tobie Meyer-Fong
History: social, cultural history of China since 1600.

Ronald G. Walters
History: social and cultural history of the United States with special interest in radicalism, reform, race, and popular culture.

Associate Professor
Rebecca M. Brown
Associate Professor, History of Art: Southeast Asian art, politics of display.

Assistant Professor
Molly Warnock
Assistant Professor, History of Art: modern art.

Teaching Faculty
Emily S.K. Anderson
Senior Lecturer, Classics and History of Art: Aegean and Eastern Mediterranean Bronze Age art and archaeology, material culture, sociocultural interaction, craft, and glyptic.

Lisa DeLeonardis
Austen Stokes Associate Professor in Art of the Ancient Americas, History of Art: ancient art of the Americas.

Affiliated Instructors and Museum Professionals
James Archer Abbott
Curator and Director, Evergreen Museum and Library: 19th- and 20th-century American decorative arts and furniture; historic houses; curatorial practice, including collections management and exhibitions.

Catherine Rogers Arthur
Curator and Director, Homewood Museum and Lecturer, History: American decorative arts, historic house museums, museum practice.

Martina Bagnoli
Associate Curator of Medieval Art, The Walters Art Museum.

Sanchita Balachandran
Curator/Conservator, Johns Hopkins Archaeological Museum and Lecturer, Near Eastern Studies: conservation history and ethics; archaeological conservation and site management; collections management and museum practice.

Doreen Bolger

Gabrielle Dean
Curator, Rare Books and Manuscripts and Lecturer, Museums and Society: history of books, libraries, reading, literary culture; books as objects.

Lori Beth Finkelstein
Vice-President of Education, Interpretation and Volunteer Programs, Maryland Zoo in Baltimore.

Deanna Haggag
Director, The Contemporary Museum of Baltimore.

Earl Havens
William Kurrelmeyer Curator of Rare Books and Manuscripts and Adjunct Assistant Professor, Department of History: early modern Europe, history of collecting, early libraries.

Rena Hoisington
Associate Curator of Prints, Drawings and Photographs, The Baltimore Museum of Art.

Elizabeth Maloney
Museum Educator and Independent Scholar.

Nancy Micklewright
Head of Scholarly Publications and Programs, The Smithsonian Institution’s Freer and Sackler Galleries of Art.

Robert Mintz
Mr. and Mrs. Thomas Quincy Curator of Asian Art and Chief Curator, The Walters Art Museum.

Arthur Molella
Director, Lemelson Center for the Study of Invention and Innovation, National Museum of American History, Smithsonian Institution.

Jacqueline M. O’Regan

Thomas Primeau
Head of Conservation and Associate Paper Conservator, The Baltimore Museum of Art.

Lorraine C. Trusheim
Independent Objects Conservator, Halcyon Objects Conservation LLC

Courses

Museums are crucibles, places where public memory, identity, and cultural values are shaped and debated. We examine this premise through weekly visits to Baltimore museums of art, science, history (and many more), critical group discussion, and intensive writing assignments. Freshmen only.
Area: Humanities, Social and Behavioral Sciences.

AS.389.105. Freshman Seminar: Art in the Museum. 3 Credits.
Go behind the scenes of local art museums to explore fundamental concepts and social issues particular to the collection and display of art in the past and today.
Instructor(s): J. Kingsley
Area: Humanities
Writing Intensive.

Freshmen will learn and apply analytical methods used in the technical study of archaeological objects by examining and researching ancient examples in the Johns Hopkins Archaeological Museum. Freshman Only.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.110. Freshman Seminar: All about Things.
What can objects tell us about the world, past and present? Using theoretical, archival, technical, and visual processes and in-depth research at Evergreen Museum & Library, we explore this question. Freshman Only.
Instructor(s): E. Rodini
Area: Humanities.

AS.389.120. Discover Hopkins: Examining Archaeological Objects.
In this course, we examine artifacts from the Johns Hopkins Archaeological Museum in order to learn about the role of materials such as ceramics, metal, glass, faience and stone in the history, art and culture of the ancient world. We will visit local artists' studios to understand how these materials are utilized today, and examine comparative examples in local art museums. Students will work hands on with artifacts each day.
Instructor(s): S. Balachandran.

AS.389.130. Mini Course: Conservation, An Introduction to Technical Art History.
Look through the eyes of a conservator and learn how to answer historical questions by analyzing the physical nature of works of art. Objects examined will include paintings, sculpture and works on paper from the collection of the Baltimore Museum of Art. Class meets 4 times, on February 7, 14, 21 and 28, at the BMA. Syllabus and organizational meeting at JHU on Thursday, January 31, 5:30pm.
Instructor(s): T. Primeau
Area: Humanities.

AS.389.171. B'More: Exhibits in Focus.
Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. Field-trip based class considers significant regional exhibits against the background of exhibitions that transformed interpretive approaches in history, art, and science museums.
Prerequisites: Students may enroll in one B'More course only.
AS.371.188 OR AS.371.189 OR AS.271.119 OR AS.100.285 OR AS.140.318 OR AS.300.100 OR AS.360.108 OR AS.360.122
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.172. City on Display.
Baltimore is a city full of museums, both traditional and innovative. What do these institutions have to say about the city they call home? How do their choices of exhibits, artifacts, and descriptions combine to create a unique version of history? In this course, we will visit several Baltimore museums in order to learn the ways in which museums can tell stories of a city's industries, cultures, and people.
Instructor(s): J. Kingsley
Area: Humanities.

Explore the world of books in early Baltimore through the lens of Homewood Museum and the Carroll Family. Take a closer look at papers, printing, bookbinding and bookplates and try your hand at papermaking and printing techniques. Discover the offerings of local printers and booksellers through primary sources, and how books were available to those who could not otherwise afford them, through the Library Company of Baltimore (1797) whose collections are now part of the holdings of JHU's George Peabody Library.
Instructor(s): C. Arthur
Area: Humanities.

A hands-on introduction to rare books and manuscripts from ancient Mesopotamia to the Industrial Era, crossing the disciplines of science and technology, art, religion, politics and literature-- using the rare books and manuscripts of the Sheridan Libraries. Special emphasis is paid to the Printing Revolution of the 15th and 16th centuries, when books first emerged as a core element of material culture.
Instructor(s): E. Havens
Area: Humanities.

AS.389.201. Introduction to the Museum: Past and Present.
This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

This course considers the practical, political, and ethical challenges facing museums today, including the impact of technology and globalization, economic pressures, and debates over the ownership and interpretation of culture.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.
AS.389.205. Examining Archaeological Objects.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

Intersession Abroad Program. The course examines the museums of Paris, in situ, with a special emphasis on the creation of cultural memory.
Instructor(s): E. Maloney
meets 1:30 - 3:50 except for days with field trips.
Area: Humanities.

AS.389.250. Conservation of Material Culture: Art, Artifacts and Heritage Sites. 3 Credits.
Alongside specialists in area museums, we explore the conservation of material culture in various media. Topics include manufacturing methods and material degradation as well as conservation treatments, science, and ethics. Cross-listed with History of Art.
Instructor(s): L. Trusheim
Area: Humanities.

Students explore early American life related to the region and the Carroll family of Homewood. Primary research and object study culminate in student-curated thematic exhibition. Optional intersession practicum experience is also possible. For more on exhibit theme, contact instructor. M&S practicum course.
Instructor(s): C. Arthur
Area: Humanities.

Part public history, part introduction to museum practices, this hands-on course explores how heritage areas and museums serve communities through interpretation. Each year, students partner with a community to develop research-based, visitor-centered interpretive material, in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.279. Examining Archaeological Objects.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

JHU pioneered the concept of the modern research university in the United States, but what does that mean for the everyday experiences of its students, faculty, staff and friends? Excavate the history of this place through the things collected, made and used here since the university’s founding in 1876. Students research the material culture of Hopkins and present their findings on an interactive website: collectionsweb.jhu.edu. Course includes digital media labs. Cross-listed with History and History of Science. M&S practicum course.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.302. The Virtual Museum.
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.
Instructor(s): J. Kingsley
Area: Humanities.

AS.389.320. Photographs on the Edge: Ara Güler in Archives of the Smithsonian’s Freer and Sackler Galleries.
Work as a curator alongside Smithsonian staff, researching the work of Turkish photographer Ara Güler to develop an exhibit that considers relationships between the history of photography, archives and the museum. Class will travel several times to the Freer and Sackler Galleries in Washington D.C. M&S practicum course.
Instructor(s): N. Micklewright
Area: Humanities, Social and Behavioral Sciences.

AS.389.321. GhostFood: Curatorial Practicum with the Contemporary.
Students work with Baltimore’s Contemporary and NYC artist Miriam Simun on GhostFood, a project using art to engage important questions concerning the environment, climate change, and the politics of food.
Instructor Permission. Contact erodini@jhu.edu for enrollment approval. M&S practicum course.
Instructor(s): D. Haggag
Area: Humanities.

AS.389.335. Recreating Ancient Greek Ceramics. 4 Credits.
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.349. Art, Museums and the Law.
The course encourages students to consider how artistic processes and cultural institutions are shaped by legal principles and vice versa. The interplay between art, museums and the law will be explored from historical, cultural and legal perspectives using a variety of source material.
Instructor(s): W. Lehmann
Area: Humanities.

AS.389.350. Staging Suburbia with the Jewish Museum of Maryland-Community Based Learning.
Work as a public historian alongside Jewish Museum of Maryland curators and staff, researching primary documents and artifacts to develop an exhibition about Baltimore’s Jewish suburbs. The show will travel throughout Baltimore. M&S practicum course. Cross-listed with History and Jewish Studies.
Area: Humanities, Social and Behavioral Sciences.
Explores the material culture of knowledge through transformations in the technologies and arts of communication, taught entirely from rare books, manuscripts, and artifacts in JHU libraries and museum collections.
Instructor(s): E. Havens
Area: Humanities.

Students work with BMA collection and staff to develop and organize an exhibition of artists' books. Various aspects of museum work are explored, including research, interpretation, presentation, programming, and marketing. M&S practicum course.
Instructor(s): R. Hoisington
Area: Humanities.

AS.389.355. Literary Culture in the Nineteenth-Century Library.
What did people actually read in the nineteenth century? What can we learn from their books and magazines? In this class, we read nineteenth-century English and American literary works and examine nineteenth-century literary objects from the collection of the George Peabody Library, to better understand the cultural and material environments within which literary works circulated. Featured writers include Edgar Allan Poe, Charles Dickens, Harriet Beecher Stowe, Emily Dickinson, Mark Twain, Stephen Crane. Several field trips to the Peabody Library throughout the semester.
Instructor(s): G. Dean
Area: Humanities.

Explore the material culture of "wonder" from the Renaissance to the Enlightenment in literature, science, and art, with Hopkins' rare book collections and the Walters Art Museum. M&S practicum course.
Instructor(s): E. Havens
Area: Humanities.

This interdisciplinary course will explore the institutional, cultural, artistic and architectural history of St. Peter's and the Vatican Museum and Library from Antiquity through the Renaissance, up to the present day. Class meets in the Dick Macksey Seminar Room of the Brody Learning Commons. Cross-listed with History.
Instructor(s): E. Havens
Area: Humanities.

AS.389.359. Literary Archive.
This course invites students to grapple with the theory and practice of building literary archives in 19th- and 20th-century American culture. For the final project students will work collaboratively to build a digital archive and exhibit of selected materials from the JHU rare book and manuscript collections. Meets in Special Collections. Cross-listed with English. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.

AS.389.360. American Literature on Display.
Focusing on late 19th and early 20th c American literature, course examines representations of "display" within different literary genres and track how display simultaneously shapes print culture and social concerns of the period. Course culminates in the creation of a student-curated digital exhibit using archival and rare book materials to contextualize the work of the journalist, poet and fiction writer Stephen Crane. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.

Students explore early American life relating to the region and Homewood House. Primary research, object study culminate in exhibit focused on trades and crafts, training and work practices. M&S practicum course. Meets at Homewood Museum. Cross-listed with History.
Instructor(s): C. Arthur
Area: Humanities.

AS.389.369. Encountering the Art of East Asia: Museum Display, Theory and Practice.
Students reconsider the exhibition and interpretation of East Asian Art at the Walters Art Museum, developing a pilot installation to suggest a new permanent display. M&S Practicum Course. Class meets at the Walters Art Museum (extended time to allow for travel). Cross-listed with East Asian Studies.
Instructor(s): R. Mintz
Area: Humanities.

Hopkins curatorial staff and photography instructor introduce the concept of books as art. Students create artist's books inspired by campus collections for inclusion in an Evergreen exhibition. FIRST CLASS IS MANDATORY. M&S practicum course. Cross-listed with Homewood Art Workshops.
Instructor(s): J. Abbott; P. Berger
Area: Humanities.

This course examines zoos and living collections from historical and contemporary perspectives, taking into account the potentially conflicting role of zoos as conservation organizations, educational institutions, and entertainment venues. The class culminates in the creation of conservation education content for Baltimore City elementary school children. M&S practicum course.
Instructor(s): L. Finkelstein
Area: Humanities.

AS.389.373. Encountering the Art of South Asia: Museum Display, Theory and Practice.
Students reconsider the exhibition and interpretation of South Asian Art at the Walters Art Museum to suggest a new permanent display. Class meets at the Walters Art Museum. M&S practicum course.
Instructor(s): R. Brown; R. Mintz
Area: Humanities.
Do museums have a social responsibility? What roles should they play in their communities? Should they be agents of social change or social justice? This course explores the ways in which museums engage with local communities. Students work in partnership with a specific museum to develop an original and fundable proposal as a response to protests in Baltimore in the wake of the death of Freddie Gray. Field trips and guest speakers will be a key feature of the course. M&S practicum course. CBL course. Cross-listed with Sociology.
Instructor(s): E. Maloney
Area: Humanities.

Course examines practices of collecting, display and preservation beyond the western museum tradition, focusing on how these practices reflect and construct political, historical, ethnic and nationalist narratives. Counts towards the international studies major. Cross-listed with Anthropology.
Instructor(s): E. Rodini; S. Balachandran
Area: Humanities, Social and Behavioral Sciences.

AS.389.390. Library / Laboratory.
This interdisciplinary and project-driven class investigates the library as a site of experimentation and an expression of different knowledge regimes. Material includes literary treatments of the library, historical and critical readings, guest lectures, rare materials from special collections and field work.
Instructor(s): G. Dean
Area: Humanities.

AS.389.440. Who Owns Culture?.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.450. Readings in Material Culture.
Objects, things, "stuff"- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

AS.389.460. Inventing the Middle Ages from the Renaissance to Today.
Investigate the history of the collection, interpretation and display of medieval art by nations, museums and private collectors. Topics range from antiquarian interest to conception of medieval sculpture as "primitive", from the use of medieval objects in nationalistic displays and from early American museums such as the Cloisters in NY to current exhibits such as the Walters. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities.

Instructor(s): E. Rodini.

Instructor(s): E. Rodini.

Instructor(s): E. Rodini.

Instructor(s): J. Kingsley.

AS.389.521. Capstone in Museums and Society.
The Capstone allows students to develop and carry out their own, hands-on research project in a museum, collection, archive, or other living resource. Final projects must involve some form of public presentation (exhibition, lecture, poster, web-based, etc.) and a work of self-reflection (journal, brief paper, blog, or other). Projects must be approved and overseen by a supervising faculty member and approved by the Program’s Director, in keeping with the University’s Independent Work Policy. Instructor permission required.
Instructor(s): E. Rodini; J. Kingsley
Area: Humanities.

Cross Listed Courses

History of Art
AS.010.192. Move over Michelangelo: Renaissance Sculpture in Northern Italy.
Michelangelo’s heroic figure has dominated our conception of Renaissance sculpture, but outside of Florence & Rome, a princely aesthetic for small, intimate, tactile works dominated. We will explore the alternate paradigms for the figure and sculpture in the North, centering around Padua, Mantua, and Venice. The course is built around the collection at the Walters Art Museum, from which students will choose an object as the subject of a semester-long research project. We also take advantage of MICA to visit a bronze workshop, and will visit the Antico exhibition in NY at the Frick. Dean’s Teaching Fellowship.
Instructor(s): L. Blom
Area: Humanities.

AS.010.275. Impressionism: Cone Collection.
Cross-listed with History of Art. This course offers an introduction to the Cone Collection, a world-class selection of impressionist and post-impressionist paintings acquired by two sisters. We will explore the development of radical new painting styles in tandem with the evolution of collecting and display practices that emerged in Baltimore and in Paris at the turn of the century. Visits to the Walters, the BMA, and the Sheridan Rare Book Collection will supplement our study of Monet, Cezanne, Matisse, and more.
Instructor(s): K. Johnson
Area: Humanities.

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the "global South." This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of "global modernism."
Instructor(s): R. Brown
Area: Humanities.

The development of archaeology in the Middle East - its history of explorers, diplomats, missionaries and gentlemen-scholars - profoundly shaped the modern world, from the creation of new museums and the antiquities market to international relations and terrorism.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.310. The ‘Long Sixties’ in Europe.
Emphasis will be on advanced artistic practice primarily in France, Italy, the Benelux, and German-speaking countries; students will curate an exhibition of avant-garde journals from the Sheridan Libraries.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.311. Japanese Print Culture and Western Collecting.
The first half of this seminar will examine issues in Japanese print culture, especially the development and circulation of ukiyo-e prints, during the Edo and Meiji periods (1615-1912). Topics will include technological innovations, the role of publishers, censorship, and prints as didactic objects. The second half of the course will explore the popularity of Japanese prints in the West, including their impact on japonisme and incorporation into Western collections Cross-list with East Asian Studies
Instructor(s): H. Snow
Area: Humanities.

AS.010.312. Surrealism.
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA. Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.334. Problems in Ancient American Art.
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS
Program in Museums and Society
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.424. Collecting Roman Art: From Antiquity to Present.
A survey of the most important collections of Greek and Roman sculpture, from the late-Republican age through the Middle Ages and the Renaissance, until the creation of the main museums in Europe and in the United States.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.666. Exhibiting the Other.
Despite challenges to museum practices in the 1970s and 1980s, the approach to displaying the art and visual culture of regions and periods outside of the European and North American mainstream remains caught between scholarly theorizing and demands for the commodification of the exotic. The ongoing exclusionary logic of collecting and display practices and the shrinking budgets for museums undermine efforts to rethink and challenge longstanding institutionalized patterns. In this seminar we will assess the politics, theory, and practice of displaying what still operates as the "other", reading across art history, museum studies, politics, and anthropology.
Open to senior undergraduates with permission of instructor. Cross-listed with Political Science and Programs in Museums and Society
Instructor(s): R. Brown.

Classics

AS.040.119. The World of Pompeii.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.

This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities.
Anthropology

AS.130.334. Egyptian Funerary Arts in the Archaeological Museum.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum’s website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan; S. Balachandran
Area: Humanities.

History

AS.140.320. Modernity on Display: Technology and Ideology in the Era of World War II.
Seminar focuses on ideological at World’s Fairs over technological modernity with special emphasis upon World War II and the Cold War.
Instructor(s): A. Molella; R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.359. Museums and Globalization.
Examines how museums are linked to wider national, cultural, communities, and mobilize resources to address political, economic and social concerns and questions of heritage. Jointly with Case Western Reserve University. Cross-listed with Program in Museums & Society.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.372. Science on Display.
History of collecting, exhibiting and interpreting science and technology, from Renaissance cabinets of curiosity to modern world’s fairs, zoos, aquariums, films and science centers. Students will present their own exhibits as dioramas, web sites, documentaries or other formats. Cross-listed with Program in Museums and Society
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies

This course investigates Egyptian votive objects made as gifts to the Gods. Students will learn about Egyptian religious practices and study groups of objects in the Archaeological Museum to learn to identify how they were produced, when, and for what functions. Physical analyses of the objects will be part of the class and facilitated by museum staff.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.334. Egyptian Funerary Arts in the Archaeological Museum.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum’s website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan; S. Balachandran
Area: Humanities.

History

Who was Ira Remsen and why is he interred in the building bearing his name? Was the School of Medicine’s best surgeon really a life-long drug addict? This freshman seminar will explore the history of our university since its founding in 1876, including its schools of medicine, public health, nursing, the Applied Physics Laboratory and SAIS. We’ll look carefully at the archives and develop a thematic class exhibit. Research and writing intensive.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences.

AS.140.300. Science on Display.
History of collecting, exhibiting and interpreting science and technology, from Renaissance cabinets of curiosity to modern world’s fairs, zoos, aquariums, films and science centers. Students will present their own exhibits as dioramas, web sites, documentaries or other formats. Cross-listed with Program in Museums and Society
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences.

AS.140.359. Museums and Globalization.
Examines how museums are linked to wider national, cultural, communities, and mobilize resources to address political, economic and social concerns and questions of heritage. Jointly with Case Western Reserve University. Cross-listed with Program in Museums & Society.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.372. Science on Display.
History of collecting, exhibiting and interpreting science and technology, from Renaissance cabinets of curiosity to modern world’s fairs, zoos, aquariums, films and science centers. Students will present their own exhibits as dioramas, web sites, documentaries or other formats. Cross-listed with Program in Museums and Society
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences.
Center for Africana Studies

This course will explore major topics in 20th century Baltimore history, using local newspapers and the archival collections of the Baltimore Afro American Newspaper.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences.

Music

The Peabody Institute of The Johns Hopkins University is an internationally acclaimed music conservatory. The Peabody campus, located at historic Mount Vernon Place, is on the university shuttle bus route between Homewood campus and the medical institutions in East Baltimore. Faculty of the Peabody Institute offer some classes on the Homewood campus that are open to all undergraduates.

Qualified Hopkins undergraduates may, for no extra charge, register for classes in music history, music theory, music education, recording techniques, and computer music offered on the Peabody campus. There are also limited opportunities to take private lessons and participate in ensembles.

Concerts

Homewood students are welcome to attend Peabody’s many concerts and are entitled to student prices for most concerts, provided they present their Hopkins ID and pick up the ticket during daytime Box Office hours, Monday through Friday, 10 a.m. to 4 p.m. Declared music minors can receive complimentary tickets to select concerts. The Box Office is in the lower level of the Grand Arcade in the Conservatory building; call 410-234-4800.

Private Lessons

Private lessons are available to students at varying levels of accomplishment on a musical instrument.

• Half-hour or hour lessons are offered for credit in the Peabody Conservatory for the intermediate to advanced musician.

• Non-credit lessons are available in the Peabody Preparatory, space permitting.

The annual registration fee will be waived for all JHU students. School of Arts and Sciences and Engineering students are eligible to receive a cross-registration discount of 25 percent for Preparatory lessons by obtaining a cross-registration form from their division each semester.

Students wishing to take advantage of this opportunity should consult the Peabody Conservatory and/or Preparatory catalogs for more information.

Auditions for lesson assignments at the intermediate or advanced level take place at the beginning of each term. Students wishing to audition should contact the Peabody Registrar’s Office, 410-234-4578, for information. Hopkins students may arrange for instrumental practice facilities through the Homewood Office of Student Activities, 410-516-8209.

Ensemble Membership

Membership in the Hopkins Symphony Orchestra, the Johns Hopkins University Band, and the Hopkins Glee Club, all of which rehearse and perform on the Homewood campus, is open to all university students.
Membership in the Hopkins Symphony Orchestra is by audition on a space-available basis. Seating is limited, especially in the winds. Contact the HSO Office in Shriver Hall at 410-516-6542 for audition information, which can also be found online at http://www.jhu.edu/jhso/about/audition_info.html.

Participation in the Peabody-Hopkins Chorus and Peabody Singers is open to all university students upon completion of a satisfactory audition. Please contact Senior Ensemble Coordinator Paul Faatz at pfaatz1@peabody.jhu.edu if you wish to schedule an audition or would like additional information.

Advanced instrumentalists who wish to be considered for membership in Peabody’s large instrumental ensembles—the Peabody Symphony Orchestra, Peabody Concert Orchestra, Peabody Wind Ensemble, Peabody Camerata (contemporary music), Peabody Improvisation and Multimedia Ensemble, and Peabody Jazz Orchestra—are welcome to take part in the placement audition process which takes place each fall during the week prior to Peabody’s registration process. In order to be given an audition slot, instrumentalists must be taking private minor lessons with a Peabody instructor, and that instructor must inform the Peabody Ensemble Office that they’ve evaluated the player’s ability to be on par with that of the student’s peers at Peabody. Occasional exceptions to this policy have been made for players of instruments which are uncommon or currently under-represented at Peabody. Due to the fact that each of the instrumental ensembles can accommodate only a certain number of players of each instrument, placement into these ensembles is made on a space-available basis, with priority given to Peabody instrumental majors for whom participation in large ensembles is a degree requirement.

Please direct any questions regarding participation in Peabody’s large ensemble program to Senior Ensemble Coordinator Paul Faatz at pfaatz1@peabody.jhu.edu.

http://www.peabody.jhu.edu/conservatory/homewood/

**Minor in Music**

The School of Arts and Sciences offers a music minor to students majoring in other fields. The minor is intended for students who have some training and background in music and wish to pursue their interest in a systematic way without getting their degree in the field. It consists of a selection of music courses, including music history, music theory, ensembles, and/or lessons at Peabody. Students must earn a grade of C- or better in all courses applied towards the minor and courses can not be taken satisfactory/unsatisfactory.

**Requirements for the Music Minor**

* Two semesters of lessons or ensembles with the approval of minor advisor.

**Applied Music Experience**

Since the study of music should always take place in the context of practical music making, students completing the minor in music must participate in an applied music experience for at least two semesters. Students must select an applied music experience in consultation with their advisor, who will approve the applied music experience. These experiences are not required to be for academic credit. Most students will select either private instrument lessons at Peabody or participation in an ensemble at Peabody or on the Homewood campus.

For current faculty and contact information go to http://www.peabody.jhu.edu/about/people/

**Faculty**

**Peabody Faculty on Homewood Campus**

Richard Giarusso  
Department of Musicology: 19th- and 20th-century music, German song, Wagner, Mahler, English music, music appreciation.

Sharon Gail Levy  
Department of Music Theory: Piano literature 1750–1950, music analysis, baroque counterpoint, music appreciation.

David Smooke  
Department of Music Theory: Song Analysis, Theories of Rhythm, Popular Music.

Stephen Stone  
Department of Music Theory: music theory courses. Advisor for the minor in music theory.

Andrew Talle  
Department of Musicology: J.S. Bach, German music, 18th- and 19th-century music, music appreciation.

Elizabeth D. Tolbert  
Department of Musicology: expressive culture and intercultural aesthetics, performance, gender, ritual, ethnomusicology, music and language.

Susan Forscher Weiss  
Department of Musicology (joint appointment in Romance Languages and Literatures): medieval and Renaissance music, social history, performance practice, history of instruments.

Courses

**AS.376.111. Rudiments of Music Theory and Musicianship.**
This course introduces written and aural music fundamentals including notation, scales, intervals, chords, rhythm, meter and sight-singing. Students will compose melodies and short pieces and complete listening projects. Course does not count towards the completion of the minor.
Instructor(s): L. Perry; M. Janello; Staff.

**AS.376.137. Music and Nazi Germany.**
This course will explore the ways in which music, as a major pillar of German culture, was used as a tool by the Nazi regime to legitimize and maintain their power. Furthermore, the class will cover the ways in which music was used by persecuted peoples as resistance in Germany, abroad, and within Nazi concentration camps.
Area: Humanities.

**AS.376.140. Digital Sound Art.**
Users of personal computers may have overlooked the potential of these machines as unique, non-imitative musical instruments. This course combines a historical overview of electronic music with a workshop environment for creative exploration. Participants will study the history of electronic music, then use freeware for recording, editing, altering, and layering sounds to create personal, idiomatic (non-pop) works of sound art. Computers are available; participants are welcome to bring a laptop computer if they prefer.
Instructor(s): M. Lackey
Area: Humanities.

**AS.376.142. Dylan, Motown and the Beatles.**
Marked by social and political unrest, the 1960s was one of the most dramatic decades in American history. Popular music became a significant vehicle for social and political commentary, and played an important role in shaping the legacy of this controversial decade. In this course we will explore 1960s popular music through structured listening, critical readings and guided discussion, with the aim of gaining a better understanding of 1960s popular music and its connections to the complexities of this pivotal decade.
Instructor(s): M. Rickelton
Area: Humanities.

**AS.376.155. Tunes for Toons.**
For many people, a first introduction to “classical” music came from watching cartoons. This course seeks to re-trace this influence by exploring the use of musical works in classic cartoons by Warner Brothers and Disney. The course is intended to introduce, (and ideally foster an appreciation for) some of the great pieces within the classical Western musical canon. We will take a more in-depth look at musical works to see how they are used (or spoofed!) in classic cartoons.
Instructor(s): F. Chiao
Area: Humanities.

**AS.376.162. American Music Since 1950.**
American music in the latter half of the twentieth century splintered into a collection of forms as diverse as the people making them. This course will explore jazz, folk, rock, hip-hop, film and art music through structured listenings, critical readings and guided discussion, with the aim of finding a common thread.
Instructor(s): M. Rickelton
Area: Humanities.

**AS.376.171. Introduction to Music Cognition.**
This course will be an introductory course to the interdisciplinary field of music cognition. We will discuss music perception and aesthetics from psychological, analytical, social, and biological perspectives. Topics to be covered include the evolutionary basis of music, understanding parameters of music such as rhythm, pitch, and form, music and emotion, music and the body, musical ability and cognitive processes, and finally music and the brain.
Instructor(s): K. Barrett
Area: Humanities, Social and Behavioral Sciences.

**AS.376.211. Music Theory I.**
Introduction to basic principles of tonal music through listening, analysis and music making. Students study melody, harmony, voice leading, figured bass and dissonance treatment, and will also undertake short composition projects. Must have taken the qualifying examination or AS.376.111. Recommended to be taken concurrently with AS.376.221.
Instructor(s): M. Janello; N. Draper.

**AS.376.212. Music Theory II.**
This course continues the written and aural work of the previous course but focuses on chromatic harmony while continuing the study of melody, counterpoint and figured bass. Prerequisite: Music Theory and Musicianship I (AS.376.211). Recommended to be taken with AS.376.222, Musicianship II.
Instructor(s): S. Stone.

**AS.376.214. Music Theory III - Formal Analysis.**
An examination of the musical forms of the Common Practice Period and the logic of their structures. Forms studied will include variation, binary, rounded binary, ternary, rondo, sonata-allegro, and sonata-rondo. Recommended Course Background: AS.376.212
Instructor(s): S. Stone.

**AS.376.215. Music Theory III - Twentieth Century Music.**
An exploration of the music and analytical tools of the twentieth century. Topics will include set analysis, serial techniques, exotic and synthetic scales, neo-tonality, and geometric proportions.
Recommended Course Background: AS.376.212
Instructor(s): S. Stone.

**AS.376.216. Theory III - Counterpoint.**
A study of contrapuntal music, emphasizing composition in both the sixteenth- and eighteenth-century styles as epitomized by Palestrina and Bach.
Instructor(s): S. Stone.
An examination of text-setting and song-writing in a variety of eras and styles. Topics will include art song, lieder, jazz standards, and pop tunes.
Instructor(s): M. Rickelton.

AS.376.221. Musicianship I.
Study in the basic skills of reading and hearing music. Recommended to be taken concurrently with AS.376.211, Music Theory I.
Instructor(s): K. Wile.

AS.376.222. Musicianship II.
Further studies in the basic skills of reading and hearing music. Recommended to be taken concurrently with AS.376.212, Music Theory II.
Instructor(s): K. Wile.

AS.376.231. Western Classical Music.
This course is an introduction to the rich tradition of Western "Classical" music. We will examine this music from a variety of perspectives, including: 1) its historical, intellectual, and cultural background; 2) the biographical background of its composers; 3) its stylistic context; and 4) analysis of the music itself. We will approach these perspectives through a variety of activities, such as lectures, readings, writing, exams and in-class discussion.
Instructor(s): R. Giarusso
Area: Humanities.

A survey of the stylistic features and social contexts of American popular music since the 1950s.
Instructor(s): D. Smooke; M. Rickelton
Area: Humanities.

AS.376.245. Introduction to Sound, Audio, and Recording Arts. 3 Credits.
In this course we will undertake a comprehensive survey of sound, audio and the related technology. While covering sound recording from an historical perspective, we'll touch on related material in physics, music, psychology and acoustics. In lab exercises and assignments, students will have the opportunity to learn in a hands-on environment as practical applications of the lecture material are explored. Assignments will include critical listening, in addition to basic recording, editing and mixing of audio. The course will culminate in a comprehensive final project.
Instructor(s): A. Stella
Area: Humanities.

AS.376.250. Introduction to Computer Music.
Introduction to Computer Music is an opportunity for people with no specialized training in music to explore electronic art music as a long-standing, if obscure, body of art, then to participate in creative work in the style. Participants will gain a heuristic understanding of forms of musical composition that operate outside the conventions of regular rhythm and harmony as they record and manipulate sound to sculpt it into original musical works. The lecture portion combines an historical overview of electronic music, rudiments of acoustics and musical perception, and instruction in compositional techniques and in using computers as creative musical tools. The laboratory portion, given at the Digital Media Center, serves as a workshop for creative exploration and for the completion of assigned creative projects including original works of digital sound art.
Instructor(s): S. Burt
Area: Humanities.

AS.376.252. Jazz History.
Survey, investigation, and study of jazz music and how it shaped American history from its origins to current times.
Instructor(s): I. Sims
Area: Humanities.

AS.376.258. Jazz Improvisation and Theory.
Study of the theory and practice of Jazz Improvisation. Must have taken the qualifying examination or AS.376.111.
Instructor(s): I. Sims.

A musical performance class and workshop in which we will explore many different aspects of and approaches to creative musical improvisation through readings, lectures, recordings, videos, and personal experience. The emphasis will be placed on free improvisation, without pre-set song forms, chord progressions or other pre-determined structures. Most improvising will be done in small sub-groupings of anywhere from 2 to 5 students who will take turns performing short improvised pieces for the rest of the class and will be followed up with open discussions about the effectiveness of musical choices made by the participants. Ear training exercises and game pieces, such as John Zorn's Cobra will be used to help students gain experience and build confidence improvising in this way. This course is open to any University student who plays an instrument or sings, and is interested in gaining experience with and knowledge about free improvisation.
Instructor(s): M. Formanek
Area: Humanities.

AS.376.303. Musical Theater from Aristophanes to Leonard Bernstein.
This course examines the birth of musical theatre from Greek tragedy through the liturgical and secular plays of the middle ages and Renaissance, to the classical and romantic sängspeli, operettas, and zarzuelas of the modern era, by such figures as Aristophanes, Adam de la Halle, Hildegard of Bingen, Angelo Poliziano, Juan del Encina, Wolfgang Amadeus Mozart, Gilbert and Sullivan, Ernesto Lecuona, Igor Stravinsky, and Kurt Weill. These will serve as a backdrop for a closer examination of the musicals of Jerome Kern, Cole Porter, George Gershwin, Irving Berlin, Richard Rodgers, Harold Arlen, Frank Loesser, Leonard Bernstein and others. In addition to studying and placing the works of these Broadway giants into a social, political, and economic context, we will study and perform from representative musicals and attend a performance at the Lyric Theatre. Student will be expected to write a capstone project.
Instructor(s): S. Weiss
Area: Humanities.

AS.376.308. Meet the Musician: Today's Classical Musician. 3 Credits.
Classical music in America is dead," Slate Magazine declared online in January 2014. In this seminar, students will learn that this art form is indeed alive and well. Peabody graduate students will perform solo and small ensemble works, present original research, and participate in open discussions about musical research, performance, professional challenges, and more. Homewood students will read articles on a weekly basis prior to the lecture-recitals. In response to each lecture-recital, students will write weekly reaction papers and prepare questions for the group discussion.
Instructor(s): M. Wertheimer
Area: Humanities
Writing Intensive.
This course explores the richness of our American musical heritage through a cultural lens. A wide breadth of musical genres will be discussed such as jazz, r&b, rock, rap, pop, country, spirituals, gospel, polka, folk, and classical, as well as the role of music in mass socio-political movements. A spotlight will be given to artists who have successfully crossed genres in their careers such as Winton Marsalis, Louis Moreau Gottschalk, William Grant Still, Scott Joplin, and Gunther Schuller, among others.
Instructor(s): L. Kafka
Area: Humanities.

What is “Jewish music,” and what roles has it played in global and Jewish cultures? This course will address these questions, considering genres and contexts of Jewish music from cantillation to klezmer and from art music to Yiddish cinema. Cross listed with Jewish Studies
Instructor(s): J. Walden
Area: Humanities, Social and Behavioral Sciences.

The varied repertoire of 20th-century opera offers a rewarding context for the study of the rich and complex relationship between music and text. In this course, we will study a select group of 20th-century operas and the source texts (plays, short stories, and poems) upon which they are based. We will consider the changes that occur in translating the texts from one genre to the other, along with ways in which each opera influences our understanding of the source, and vice versa. As part of this focused study, we will also gain a broader familiarity with the styles of some of the most important composers of the last century. Major works to be studied include Pelléas et Mélisande (Maeterlinck & Debussy), Wozzeck (Büchner & Berg), Peter Grimes (Crabbe & Britten), Death in Venice (Mann & Britten), and The Tempest (Shakespeare & Adès).
Instructor(s): R. Giarusso
Area: Humanities.

This course will explore some of the highlights of the 19th-century piano repertoire with a focus both on the composers’ specific musical choices and the expressive effects of those choices. Works will be drawn from such diverse possibilities as the sonatas of Beethoven and Schubert, the titled and character pieces of Schumann and Liszt, and the masterworks of Chopin and Brahms. Live demonstration as well as recorded performances will be used. We will also read and consider the views of other scholars and musicians on this repertoire, all in an attempt to answer, at least in part, the question of why this music is so beloved and thought so great by so many.
Instructor(s): S. Levy
Area: Humanities.

AS.376.351. Music and Literacy in Western Culture Before 1800.
This seminar examines the history of written music in the larger context of western textual culture before the modern era, applying ideas from the fields of book history and history of literacy to the study of music. We will examine the history of notation and consider issues of orality, literacy, and education as they relate to the composition, copying, circulation, and use of written music. Issues include: the role of written music in religious and political contexts, the distinction between “popular” and “learned” culture, and the effects of textual technologies (especially printing) on the circulation of music. Students will work with rare books and manuscripts in the University’s collections to examine these issues.
Instructor(s): E. Archibald
Area: Humanities.

AS.376.371. Topics in Music Cognition I.
What underlies our aesthetic response to music? How and why are we able to identify certain sounds as music? To what extent are music and natural language similar? What is it about music that evokes such powerful emotions such as happiness and sadness? What is unique to musical creativity? Examining such questions from cognitive science, neuroscience, psychology, and philosophical perspectives, this course explores relevant research and theory in the emerging domain of music perception and cognition. Students will complete a final research paper on the topic of their choice that integrates the course material.
Instructor(s): M. Lopez-Gonzalez
Area: Natural Sciences, Social and Behavioral Sciences.

AS.376.372. Introduction to Music Cognition II.
Continuing from Topics in Music Cognition I, this course explores further the similarities and differences between music and language, the effects of musical training on cognitive development, and the expressive power of music, with an introduction to music and its role in film. We will read relevant research and theory on these topics from cognitive science, neuroscience, psychology, musicology, and philosophical perspectives.
Instructor(s): M. Lopez-Gonzalez
Area: Natural Sciences, Social and Behavioral Sciences.

AS.376.404. History of Musical Instruments.
The history, technology, and performance of Western European musical instruments, their precursors, and their non-western counterparts, addressed by experts and explored on visits to historic collections.
Instructor(s): S. Weiss
Area: Humanities.

This course will examine the bi-cultural evolution of music in light of recent interdisciplinary research on the social bases of human cognitive evolution, and explore its implications for current debates in musicology, ethnomusicology, psychology of music, and human cognitive evolution.
Instructor(s): E. Tolbert
Area: Humanities.
**AS.376.415. Transnationalism and Globalization in World Music.**
How has the increase in the speed and spread of people, information, symbols, capital and commodities affected the kinds of music that are created and consumed both locally and globally? How does music contribute to discourses of authenticity, difference, and global homogeneity? How do we understand the meanings of music when local, culture-bound explanations are insufficient? How has the historical development of Western ideologies of music and art contributed to current forms of hegemonic control over music such as copyright law and the transnational music business? What have been the political, musical, ideological, and financial consequences of the development of “world music”? In this course we will address issues such as the above, with emphasis on an ethnomusicological approach to music in its transnational and global contexts.
Instructor(s): E. Refini
Area: Humanities.

**AS.376.428. 6 Mozart Operas. 3 Credits.**
Lotharios and lovers, Turkish pashas and harem girls, churlish masters and wily servants, enraged women, bird-catchers, Italian soldiers disguised as Albanians, a Cretan King, and the Queen of the Night. These characters and many others occupy the worlds created in the operas of Wolfgang Amadeus Mozart. This course focuses on six of Mozart’s most enduring operatic works: Idomeneo, The Abduction from the Seraglio, The Magic Flute, The Marriage of Figaro, Don Giovanni, and Così fan tutte. It explores the origins of the stories and characters of these operas, and the musical structures Mozart developed to convey these narratives in music, in the genres of opera seria, Singspiel, and opera buffa. In examining these operas, students will investigate Mozart’s collaborations with librettists, the singers and theatrical venues for which he composed, and the patrons and audiences he hoped to appeal to with these works. Discussions of each opera will also turn to their performance, considering documentation of their premieres and nineteenth-century revivals, and more recent stage and cinematic productions available on DVD and online by directors including Joseph Losey, Ingmar Bergman, Peter Sellars, Jonathan Miller, Robert Wilson, and Julie Taymor, as well as in the movie Amadeus, to compare how interpretations of the opera have differed over time and between directors.
Instructor(s): J. Walden
Area: Humanities
Writing Intensive.

**AS.376.502. Independent Study.**
Instructor(s): S. Stone.

**AS.376.505. Music Internship.**
Instructor(s): S. Stone.

**Cross Listed Courses**

**German Romance Languages Literatures**

**AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century.**
2016 marks the bicentennial of Rossini’s irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart’s The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais’ controversial “Figaro trilogy”, stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretentions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano’s The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick’s Barry Lyndon (1975) and Milos Forman’s Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.
Instructor(s): E. Refini
Area: Humanities.

**AS.212.678. Guillaume de Machaut: exploring medieval authorship in the digital age.**
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. Students will learn to use digital tools to view and analyze original illustrated musical manuscripts of Machaut’s work.
Instructor(s): T. Rose-Steel.

**AS.214.125. Freshman Seminar: Dangerous Liasons: Words and Music Through the Ages. 3 Credits.**
The seminar explores challenging questions with which men have been dealing for centuries: how do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? By addressing literary and philosophical writings, as well as musical examples from different periods and contexts, students will be led through a critical reconsideration of the topic. A variety of materials will be discussed, including genres as different as medieval songs, early modern madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities.
AS.214.333. Shakespeare on the Opera Stage.
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities.

The course will explore the notion of ‘voice’ in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the ‘voice’ in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa’s The Siren and Italo Calvino’s A King Listens.
Instructor(s): E. Refini
Area: Humanities.

The course aims to outline the musical reception of Michelangelo’s poems from the 16th to the 21st century. Moving from a critical introduction to Michelangelo’s Rime, the course will address Michelangelo’s own ideas on music and the few musical settings of his poems by contemporary composers. The course will turn then to the Post-Romantic renaissance of Michelangelo’s myth as the context within which the main bulk of musical settings of the artist’s poems was produced. What did composers such as Wolf, Britten, Dallapiccola, Shostakovich and Reimann find in Michelangelo’s poetry? Through a close reading of the poems chosen by the composers, the course will explore the biographical, philosophical and socio-historical implications suggested by the different musical settings. No training in music performance or theory is required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

Sociology

AS.230.371. Sociology of Rock. 3 Credits.
This course examines the history and dynamics of rock music using key concepts and perspectives from sociology. The course is divided into four sections, each of which examines the phenomenon of rock music from a different analytical perspective. The first section on the origins of rock looks at the confluence of developments in post-war America, especially in terms of race, class and generational change, which produced this new musical form. The second section, “Rock as Cultural Production,” looks at all aspects of the rock “field,” not just artists and audiences but record labels, stores, DJ’s and radio stations, the music press and journalists, performance venues. The third section examines rock as a force for social change and protest from the 1960s until present, and the final section examines the performative aspects of rock as a kind of “interaction ritual” with its own microsociological dynamics.
Instructor(s): T. Nelson
Area: Social and Behavioral Sciences
Writing Intensive.

Natural Sciences Area Major
The natural sciences area major offers students an opportunity to fashion a major according to their needs from appropriate upper-level courses in two different areas of natural science. Students may elect to construct a program bridging biology and chemistry, chemistry and physics, or some other combination as long as the program forms a sensible, coherent whole.

Requirements for a B.A. Degree
Also see Requirements of a Bachelor’s Degree (p. 20).

Requirements of the natural sciences area major are:
Near Eastern Studies

The Department of Near Eastern Studies offers programs in four main areas: Egyptology, Assyriology, Northwest Semitic languages and literatures (including the Hebrew Bible), and Near Eastern Archaeology. The department approaches Near Eastern civilizations primarily through their own records, and language study is therefore an important part of the curriculum. However, many undergraduate courses require no knowledge of foreign languages and any interested student may take them.

Facilities

The university’s Milton S. Eisenhower Library contains an outstanding collection of books and journals in the branches of Near Eastern studies pursued by the department. The Johns Hopkins Archaeological Museum has a collection of Near Eastern antiquities, including excellent study collections of Egyptian artifacts and Palestinian pottery. The Baltimore-Washington area is especially rich in library and museum facilities. Of special interest to students of the Near East are the Walters Art Museum, the Smithsonian Institution, and the Library of Congress.

The ancient Near East is where history begins. It is where the first crops were sown, the first towns built, and where writing was first invented. The origins of Western culture are to be found in its great civilizations, from the three great monotheistic religions—Christianity, Islam, and Judaism—to everyday aspects of our life that we take for granted, such as the alphabet and marking time by hours and minutes. The Near Eastern studies major can be the focal point of a broad liberal arts education, as well as a basis for graduate study. An undergraduate major can specialize in one of the four main areas of specialization of the department - Egyptology, Assyriology, Northwest Semitic languages and literatures (including the Hebrew Bible), and Near Eastern Archaeology - or in the civilizations of the ancient Near East in general.

Near Eastern Studies Major Requirements

Also see Requirements for a Bachelor’s Degree (https://e-nextcatalog.jhu.edu/undergrad-students/academic-policies/requirements-for-a-bachelors-degree).

Students must earn a “C-” or higher grade in all courses used to satisfy major requirements and courses may not be taken satisfactory/unsatisfactory.

Science Electives

Natural science or quantitative credits at any level * 20

At least five courses of upper level natural science electives at the 300- or 400-level in at most 2 departments ** 15

Humanities and Social Science Electives ***

Humanities or social science credits at any level **** 12

At least four courses of humanities or social science electives at the 300- or 400-level in at most 2 departments ***** 12

* While students typically take these credits at the 100- or 200-level, 300- or 400-level N or Q credits not used to fulfill the upper level science elective credits may be used.

** Laboratory, research, internship, independent study, and summer courses outside JHU may not be used. Permission to count courses from more than two departments is often granted if the material involved constitutes a coherent program (for example, biochemistry courses from Biology, Biophysics and Chemistry). No more than two (2) courses and no more than six (6) credits may be taken in appropriate areas of engineering, mathematics, applied math and statistics, or (N)-coded psychology.

*** At least 9 credits must be in the humanities and at least 9 credits must be in the social sciences.

**** While students typically take these credits at the 100- or 200-level, 300- or 400-level H or S credits not used to fulfill the upper level humanities or social science electives may be used.

***** These courses must be JHU courses. Summer courses outside JHU, intersession, research, internship, independent study, Bloomberg School of Public Health, Carey Business School, and the School of Education courses are not allowed.

Minimum GPA Standards

Students must maintain an overall grade point average of 2.0 in their major. Satisfactory/unsatisfactory graded courses may not count towards major requirements.

Total  36

* Students pursuing the language focus area need to select four courses from the following languages: Akkadian, Arabic, Ancient Egyptian, Biblical Hebrew, Modern Hebrew or Sumerian. These may not be 300-level.

Honors
Those seniors wishing to be considered for departmental honors may choose to write a senior thesis. A student must maintain a 3.5 GPA in the major (through the junior year) to be eligible for departmental honors. It is advisable for such students to contact a faculty member to supervise the thesis during the spring semester of their junior year. The student should then register for two semesters of independent study in the senior year.

The graduate program, the oldest of its kind in the nation, is designed to train professional scholars and teachers in the above-mentioned areas. The courses listed below may be modified in particular years to suit the needs of students currently in residence. Reading and private study under the direction of the faculty are considered as important as work in class. The seminars allow small groups of students and faculty to engage in close study of special problems. As the program is intended to lead to the Ph.D., students are admitted as candidates for the M.A. only in unusual cases.

Requirements for the Ph.D. Degree
Students working full time toward the Ph.D. may expect to do three to four years of course work, after which comprehensive examinations must be written before work on the dissertation begins. The examinations cover a student’s major and minor fields of concentration. After passing these examinations, the student, in consultation with the faculty, prepares a dissertation proposal for faculty consideration and then proceeds to write the dissertation.

An ability to read scholarly French and German is necessary, and an examination in one of these must be passed within the first semester of residence at Hopkins. The examination in the other may be delayed not more than one year. Some command of Greek and Latin is necessary to pursue biblical studies.

Financial Aid
The department awards most students admitted to the Ph.D. program who are in need of financial aid a basic annual fellowship covering full tuition and a full stipend for living expenses for up to five years. For some of this period, the department’s support may take the form of a teaching assistantship. In addition, the period of support may be extended by the various competitive awards available to advanced students within the university. When appropriate, the department will award travel stipends for graduate students to participate in archaeological excavations in the Near East or visit collections in this country and abroad.

For further information on graduate study in Near Eastern Studies, visit the departmental website at http://neareast.jhu.edu/.
Courses

Review of important issues in ancient Near Eastern history and culture from the Neolithic era to the Persian period. Included will be an examination of the Neolithic agricultural revolution, the emergence of cities, states and writing, and formation of empires. Cultures such as Sumer and Akkad, Egypt, the Hittites, Israelites, Assyrians, Babylonians, and Persians will be discussed.  
Instructor(s): G. Schwartz  
Area: Humanities.

AS.130.102. From the Neanderthals to the Neolithic.  
Emphasizing theories about human biological and cultural development, this course consists of an in-depth survey of Neanderthal morphology and culture, a brief discussion of evolutionary theory and our fossil ancestors, and concludes with an exploration of the mechanisms and results of the shift from hunting and gathering to farming. (Course formerly known as Introduction: Human Prehistory.) Cross-listed with Anthropology.  
Instructor(s): S. McCarter  
Area: Humanities.

AS.130.106. Freshman Seminar: Ancient Empires.  
Freshman Only A case-study approach to the political, social, and cultural history of one of the ancient Near Eastern states commonly described as an “empire,” such as the Akkadian Empire, the Neo-Assyrian Empire, the Neo-Babylonian Empire, or the Achaemenid (Persian) Empire. Individual classes mix a discussion of theoretical issues relevant to the study of ancient empires with close attention to primary sources.  
Instructor(s): J. Lauinger  
Area: Humanities.

The building of sculpted monuments and monumental architecture seems to be a universal human trait in all parts of the world, from the pyramids of ancient Egypt to the inuksuit cairns of the Inuit. What explains our urge to create monumental things? Why are monuments built, and how do we experience them? This course explores various answers to these questions through the disciplines that most frequently address monuments: archaeology, architecture, and art history. We will examine the archaeological record through a series of famous case studies from around the world to investigate the social significance of monuments in their original ancient contexts. We will also determine whether lessons learned from the past can be applied to the study of monuments today, and whether studying modern monuments—including those from our immediate surroundings in Baltimore—can help us understand those of the past. As a writing intensive seminar, students will also be taught techniques in academic essay writing, culminating in a final paper analyzing the social significance of a monument from the past or present.  
Instructor(s): J. Osborne  
Area: Humanities.

This course will provide an introduction to the magical and medical arts of ancient Mesopotamia and Syria-Palestine by engaging with ritual texts dealing with disease, exorcisms, sorcery, and harmful ghosts.  
Instructor(s): E. Guinn-Villareal  
Area: Humanities.

What will your bedroom tell future archaeologists? What can ancient houses tell archaeologists of past societies? This course explores methods/theories of Household Archaeology in the Near East and beyond.  
Instructor(s): J. Swerida  
Area: Humanities.

AS.130.110. Introduction To Archaeology.  
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.  
Instructor(s): G. Schwartz  
Area: Humanities, Social and Behavioral Sciences.

AS.130.111. Freshman Seminar: Cleopatra’s Egypt.  
Egypt in the time of Cleopatra was a fascinating mix of peoples and cultures. Jews, Greeks, and other ethnic groups lived in this unique landscape along with the native Egyptians. In this class we will consider the rich civilization and complex history of Egypt during the reign of this legendary Queen.  
Instructor(s): R. Jasnow  
Area: Humanities.

AS.130.112. Excavating the Gods.  
How was a God’s body constructed with clay and wood? We will examine critically cult statues and other images of the gods of ancient Israel and the Near East from excavations. Through critical examination of the archaeological contexts and related texts, we will establish a methodological framework for identifying objects as representations of deities.  
Instructor(s): L. Wright.

AS.130.114. The Archaeology of Ancient Israel.  
This course will explore the intersection of sexuality and power relationships in the forging of ethnic, political, and religious identities as presented in the Bible and ancient Near Eastern literature. Cross-listed with Jewish Studies.  
Instructor(s): L. Wright  
Area: Humanities.

This course will serve to introduce students to the study of religion, ritual and magic through the lens of a specific culture: ancient Egypt. Throughout the course students will be introduced to ancient Egyptian culture and will interact with Egyptian texts and artifacts, including those found in the collections of the Johns Hopkins Archaeological Museum, in order to illustrate key concepts.  
Instructor(s): M. Fraser  
Area: Humanities.
AS.130.118. Ancient Israel: In Their Own Words.
This course will focus on the inscriptions of ancient Israel and its neighbors from the first millennium BCE. Texts speak to us directly in ways that other nonverbal archaeological remains - such as architecture or pottery - cannot. Also, secondary sources written by later historians and commentators are similarly limited, as they are separated from original events by space, time, and cultural situation. Considering how individuals from an ancient culture articulate thoughts “in their own words” is invaluable to any meaningful reconstruction of history. Participants will learn to glean information from inscriptions, including those that are fragmentary or seemingly mundane. They will experience hands-on history writing, using primary sources in translation, though those with any knowledge of ancient languages, especially Classical Hebrew, will be able and encouraged to engage with the texts in their original vernacular. Basic knowledge of world history will be helpful though not prerequisite.
Prerequisites: AS.130.134
Instructor(s): H. Parker
Area: Humanities.

This course will introduce students to the archaeological investigation of past human populations through their mortuary and physical human remains. To this end, major theories and methodologies will be introduced, along with pertinent case studies for discussion.
Instructor(s): C. Brinker
Area: Humanities.

AS.130.126. Gods and Monsters in Ancient Egypt.
To provide a basic introduction to Egyptian Religion, with a special focus on the nature of the gods and how humans interact with them. We will devote particular time to the Book of the Dead and to the "magical" aspects of religion designed for protective purposes.
Instructor(s): R. Jasnow
Area: Humanities.

AS.130.135. Pyramids, Temples and Tombs.
Introduction to the monuments and culture of Egypt from 3500 B.C. to 100 A.D. From the pyramids at Giza to Hellenistic Alexandria, this course surveys in slide illustrated lectures the remains of one of the world’s greatest early cultures.
Instructor(s): B. Bryan
Area: Humanities.

The Bible is arguably the most read and yet most misinterpreted book of all time, one of the most influential and yet most misapplied work of literature. The Hebrew Bible (Old Testament) is Scripture to Jews and Christians yet also a rich collection of literature w/ numerous literary genres that has been highly influential on secular Western culture. At its core, it is our most important literary source that (when wed with archaeology) helps us to understand the people and culture of Iron Age Israel and Judah. This is an introductory course surveying of the books of the Hebrew Bible (Old Testament) giving primary attention to the religious ideas they contain and the ancient contexts in which they were composed. Topics include: The Academic Study of Religion, Ancient Creation Accounts, Ancestral Religion, The Exodus and Moses, Covenant, Tribalism and Monarchy, The Ideology of Kingship, Prophecy, Priestly Sources, Psalms, Wisdom Literature, and Apocalyptic Thought.
Instructor(s): T. Lewis
Area: Humanities.

AS.130.170. Diplomacy and Conflict in the Ancient Middle East.
The Middle East is home to the invention of agriculture, cities, and writing. It is also in the Middle East that we find evidence of humanity’s earliest diplomatic activity in, for instance, the actual letters sent by ancient kings to one another, the treaties drawn up after their conflicts, and the inscriptions that commemorate their conquests. In this course, we examine texts such as these to explore questions such as: How do we characterize the international system of the ancient Middle East? Does this system change over the approximately two millennia for which we have documentation? Is it better to approach ancient diplomacy through present-day eyes or in the context of ancient worldviews? Is an understanding of diplomacy in the ancient Middle East relevant to our understanding of modern international relations? All texts read in translation.
Instructor(s): J. Lauinger
Area: Humanities.

AS.130.172. Introduction to Aramaic.
Cross-listed with Jewish Studies Aramaic, a Semitic language attested from 1100 BCE and spoken to this day, is central to some of the core texts of Western culture such as the Hebrew Bible, the Talmuds and the New Testament. This course will focus on Babylonian Aramaic, as preserved in the Babylonian Talmud and parallel sources. After studying the basic forms and grammar we will read various texts from the Babylonian Talmud as well as karaitic and geonic literature and magical bowls. We will survey some of the main corpora written in Babylonian Aramaic and open a gateway to deeper understanding of this heritage.
Instructor(s): Y. Monnickendam
Area: Humanities.

AS.130.177. World Prehistory: An Anthropological Perspective.
How and why did our nomadic hunting and gathering ancestors become farmers? What led agricultural societies to build cities, develop writing, religious institutions, wage war, and trade for exotic goods? This course surveys prehistory and ancient history from the origins of human culture to the emergence civilization. Although prehistory and ancient history yield evidence of tremendous cultural diversity this course emphasizes common elements of past human experience, culture, and culture change. These include the origins of modern humans and their adjustment to a variety of post-ice age environments, shifts from hunting and gathering to agricultural lifeways, and the initial development of the world’s earliest cities and civilizations.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

AS.130.201. Cleopatra.
Few individuals in history have left as lasting an impression as that of Cleopatra. In this seminar-style class we will examine both the “fact” and “fiction” associated with her eventful life (and death). All readings in translation.
Instructor(s): R. Jasnow
Area: Humanities.
This course explores the mythology of the ancient Near East from the invention of writing in Sumer in 3000 B.C. until the conquest of Alexander the Great near the end of the first millennium B.C. Mythological texts from Mesopotamia, Egypt, Anatolia, the Levant, and the Bible will be read from a comparative perspective. Special attention is paid to the origin and development of the epic, culminating in the great Epic of Gilgamesh, but considerable time is also given to the vast mythological and historical literature, and such diverse genres as love poetry, proverbs, humorous dialogues, Omens, and legal and medical texts. All readings are in English translation.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.203. Archaeology of Africa: From Human Origins to the Emergence of Civilizations.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrower
Area: Humanities.

Since the first known empire more than 4,000 years ago, expansionist states have been a hallmark of the political landscape. In this class we will examine various empires throughout history from an archaeological perspective. This class will cover several major empires from various periods and regions. In discussing these empires we will focus on questions that will allow us to better understand the role of the both conqueror and the conquered.
Instructor(s): A. Maskevich
Area: Humanities, Social and Behavioral Sciences.

AS.130.211. The Archaeology of Beer.
Having its origins in human prehistory, beer constitutes one of humanity’s oldest inventions. Since that time, it grew to be a nearly ubiquitous feature of human civilization throughout the world. This course will explore the roles played by beer in ancient human societies through a consideration of brewing science, anthropological and social theory, and archaeological methods aimed at identifying the remains of ancient beer, its brewing and consumption.
Instructor(s): C. Brinker
Area: Humanities, Social and Behavioral Sciences.

AS.130.212. The Archaeology of Death, Burial and The Human Skeleton.
This course will introduce students to the archaeological investigation of past human populations through their mortuary and physical human remains. To this end, major theories and methodologies will be introduced, along with pertinent case studies for discussion. Dean’s Teaching Prize Fellowship Course.
Instructor(s): C. Brinker
Area: Humanities.

AS.130.213. Introduction to Ancient Egyptian Art.
This class is a combination of illustrated lecture and discussion, punctuated with visits to museums with Egyptian collections. Participants must be able to join at least one overnight trip to New York and/or Boston (weekend) and be available for two half day visits to Philadelphia and Washington, D.C. or elsewhere (TBA as best for participants), in addition to visiting Baltimore institutions with the class as part of the course. Discussion of sculpture will take place in front of the objects, so attendance is important for the visits.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.215. David and Solomon in History and Legend.
TBD
Area: Humanities.

AS.130.249. Sorcerers, Warriors and Femmes Fatales: Intro to Ancient Egyptian Literature.
This course explores the ancient Egyptian literature of the first millennium BCE and the Roman Era: stories of magic, epic battles, animal fables, and even cultic sex hymns.
Instructor(s): M. Escolano Poveda
Area: Humanities.

This course investigates Egyptian votive objects made as gifts to the Gods. Students will learn about Egyptian religious practices and study groups of objects in the Archaeological Museum to learn to identify how they were produced, when, and for what functions. Physical analyses of the objects will be part of the class and facilitated by museum staff.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.252. New Kingdom Egypt: Empire and Cosmopolitanism.
This class surveys the history and art of Egypt empire period when pharaoh ruled over an area reaching from the Sudan to the north of Syria. Tutankhamun, Akhenaten, and Ramesses the Great represent the period, and the class will study how Egypt’s interaction outside its borders affected the political, social, and artistic environment at home and abroad.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.253. Ghosts and Demons in Ancient Egypt.
The ancient Egyptians believed that various otherworldly beings - what we might call ghosts and demons - could play a role in the lives of living men and women. How did they conceive of these beings, and what kinds of power did they attribute to them? This course will consider what the ancient Egyptians thought about interactions between this world and the next, and how their views compare to our own ideas of the “supernatural.” Students who have taken Dr. Richard Jasnow’s recent “Gods and Monsters in Ancient Egypt” may find that some similar material is covered in this course.
Instructor(s): K. Bryson
Area: Humanities.
**AS.130.255. From Feast to Famine in the Ancient World.**
Biological life, on its most basic level, is the quest for sustenance. However, in human societies, food transcends mere sustenance to become a major actor in each society’s structure and beliefs. This dual nature of food as basic necessity and cultural touchstone makes its study of great importance to our understanding of civilization, both past and present. This class will explore the role food has played in Mesopotamian, Egyptian, Mesoamerican, and Andean cultures as evidenced in the archaeological record. Dean’s Teaching Prize Fellowship Course.
Instructor(s): A. Maskevich
Area: Humanities, Social and Behavioral Sciences.

**AS.130.258. Ceramic Analysis in Archaeology.**
At archaeological sites following the invention of pottery roughly 10,000 BCE, ceramics are the single most frequent and ubiquitous class of artefact that archaeologists uncover. This class, which will be conducted in the Hopkins Archaeological Museum as a combination of lectures, discussions, and hands-on interactions with ancient and modern ceramics, surveys the methods and interpretive techniques that archaeologists use when studying this important category of material culture. Specific topics include manufacturing techniques, craft specialization, typology and chronology, production and exchange, scientific analyses, stylistic and functional analysis, and socio-political organization.
Instructor(s): J. Osborne
Area: Humanities.

**AS.130.259. Ancient Science and Technology.**
A survey of scientific practices and technological innovations in the ancient world, including astronomy, medicine, law, and divination. Special attention will be devoted to the relationship between magic and science during the periods covered.
Instructor(s): P. Delnero
Area: Humanities, Social and Behavioral Sciences.

**AS.130.260. Program Abroad: Egypt Archaeology Practicum.**
Archaeology field practicum in Egypt. Permission of instructor required for enrollment. Field experience takes place in Egypt. Readings and paper assigned upon return. Permission Required
Instructor(s): B. Bryan.

**AS.130.270. Ancient Demonology.**
After identifying the character of demons, ghosts, and zombies in modern literature and popular culture, this class will investigate similar disruptive and threatening creatures in the literature of Ancient Egypt, Mesopotamia, Israel, and Greece, as well as early Christian traditions. By the end of the term, students will be able to address the question, “What makes an evil spirit ‘evil?’”
Instructor(s): M. Simone
Area: Humanities.

**AS.130.301. History of Ancient Syria-Palestine.**
A survey of the history of Ancient Syria and Cannan, including ancient Israel.
Instructor(s): P. McCarter
Area: Humanities.

**AS.130.302. History: Ancient Syria-Palestine II.**
A survey of the history of Ancient Syria and Cannan, including ancient Israel. Taught with AS.134.661. Cross-listed with Jewish Studies.
Instructor(s): P. McCarter
Area: Humanities.

**AS.130.303. Seminar Near Eastern History: Egypt.**
This class is one of the upper level choices for majors in Near Eastern Studies. Taught jointly with AS.131.600
Instructor(s): B. Bryan
Area: Humanities.

**AS.130.304. Ancient Cities.**
This course is a survey of cities in the ancient world from Uruk, around 3000 BC until the conquest of Babylon in 539 BC. The most important cities from this period will be studied and discussed from a historical, literary, and anthropological perspective. The topics covered include (1) the archaeological and textual evidence for these cities, (2) the depiction of these cities in literary and mythological works, and (3) contemporary theoretical approaches to understanding ancient urbanism.
Instructor(s): P. Delnero
Area: Humanities.

**AS.130.310. Mythology of the Ancient World.**
This course explores the mythology of the ancient Near East from the invention of writing in Sumer in 3000 B.C. until the conquest of Alexander the Great near the end of the first millennium B.C. Mythological texts from Mesopotamia, Egypt, Anatolia, the Levant, and the Bible will be read from a comparative perspective. Special attention is paid to the origin and development of the epic, culminating in the great Epic of Gilgamesh, but considerable time is also given to the vast mythological and historical literature, and such diverse genres as love poetry, proverbs, humorous dialogues, Omens, and legal and medical texts. All readings are in English translation.
Instructor(s): P. Delnero
Area: Humanities.

**AS.130.312. Ancient Medicine.**
A study of medicine in the ancient Near Eastern and Aegean worlds, including an examination of the practices of medicine in these ancient societies but with primary emphasis given to ideas about health and disease. Readings are selected from primary sources in the writings of ancient Egypt, Mesopotamia, Israel, Greece, and Rome. Topics treated include the sources of our knowledge; the nature of medical practitioners, medical treatment, and surgery; beliefs about disease and the etiology of illness; concepts of contagion and ritual purity. Special attention is given to Hippocratic medicine, the synthesis of Galen, and the rise of humoralism.
Instructor(s): P. McCarter
Area: Humanities.

**AS.130.313. History of Egypt from ca. 1200-30 BCE.**
In this class we will study selected historical topics from the end of the New Kingdom (ca. 1200 BCE) to the death of Cleopatra VII (30 BCE).
Instructor(s): R. Jasnow
Area: Humanities.

**AS.130.323. Cleopatra’s Egypt: Ptolemaic-Roman Egypt.**
This lecture course is a survey of the history, society, and culture of Graeco-Roman Egypt. We will concentrate on Ptolemaic Egypt (ca. 332-30 B.C.), but will also devote some time to Roman Egypt, especially to the subjects of the decline of paganism and spread of Christianity in Egypt.
Instructor(s): R. Jasnow
Area: Humanities.
AS.130.328. Ancient Egypt /Africa.
Recent excavation and research have shed light on several ancient cultures of the Nile and its tributaries. We will look at the available archaeological and textual (all Egyptian) evidence for these societies and their interactions with Egypt between 3500 and 300 B.C. We will also discuss research aims and methods employed now and in the past in Egypt and the Sudan.
Instructor(s): B. Bryan
Area: Humanities.
AS.130.329. Ancient Egyptian Art and Archaeology.
A survey of Egyptian art as seen in the temples, tombs, funerary, and minor arts of Egypt between 3000 and 100 B.C. Slide lectures will provide a survey of art from the Pyramids to Augustus Caesar and will focus on such topics as the principles of Egyptian art; can the term art apply to early Egypt? How were artisans trained and what techniques and materials were utilized in their work? Co-listed (meets with) AS.133.750.
Instructor(s): B. Bryan
Area: Humanities.
The story of the Garden of Eden remains an archetype in popular culture. Find out about the real biblical story and how it developed into the one we think we know. The only requirements are an open mind and a strong desire to learn.
Instructor(s): E. Robbins
Area: Humanities.
AS.130.331. Sex, Drugs, and Rock & Roll in Ancient Egypt.
This seminar explores the social roles of sexuality, alcohol, other drugs, music, fragrance, and sensuality in secular and religious areas of Egyptian life, largely but not exclusively during the New Kingdom, ca. 1500 to 1000 B.C. The ancient attitudes towards these elements will be explored through the ancient textual sources in translation and the artistic representations.
Instructor(s): B. Bryan
Area: Humanities.
AS.130.332. Ancient Egypt and Her Neighbors.
An introduction to ancient Egypt’s portrayals of and interactions with foreign lands and peoples, including Syria-Palestine to the east and Nubia to the south. Topics include trade, travel, warfare and diplomacy. Textual, iconographical and archaeological sources will be considered.
Instructor(s): A. Arico
Area: Humanities.
AS.130.333. Egyptian Funerary Arts in the Archaeological Museum.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum’s website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan; S. Balachandran
Area: Humanities.
AS.130.335. The Pharaohs: Power and Authority in Ancient Egypt.
This course will introduce students to the triumphs and struggles of the men (and women) who ruled ancient Egypt, comparing Egyptian kingship to other ancient and modern systems of political power and authority.
Instructor(s): K. Bryson
Area: Humanities.
AS.130.336. Human Sacrifice in the Ancient Near East and Beyond.
A survey of the phenomenon of human sacrifice, primarily focusing on the practice in the ancient Near East but also covering examples from other societies, both ancient and modern.
Instructor(s): H. Dewrell
Area: Humanities, Social and Behavioral Sciences.
AS.130.338. The Talmud as Read in the Middle Ages: The Sugya of Kavod HaBriot (Human Dignity).
In the early Middle Ages the Talmud emerged as the defining document of official Jewish religion and culture, and remained so until the dawn of the Modern Era. Jewish scholars in many different countries, and in a wide variety of cultural contexts, developed certain ways of reading, interpreting, and applying the Talmud. In the process, they produced an immense corpus of commentary and law. This course will examine how and why the Talmud was studied in these centuries by Jews who mined it, subject by subject, for emotional, philosophical, and legal meaning.
Instructor(s): D. Katz
Area: Humanities.
AS.130.341. Traditionalism vs. Orthodoxy in the Modern Era: The Case of Judaism.
During the Modern Era in European history, the Traditionalist Jewish civilization of Europe that had evolved over many centuries went into deep crisis. The new political, social, and intellectual realities which characterized Modernity seriously challenged, overwhelmed, and indeed threatened to destroy the Jewish Traditionalist culture and society. In response, different Traditionalist thinkers and communities evolved a number of strategies for surviving in a modern environment, strategies that unexpectedly transformed Traditionalism into something different, which came to be called Orthodox Judaism. This course explores this process of transformation, which has had an important impact on Jewish life in the modern and post-modern eras. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.
AS.130.343. Dead Sea Scrolls-English.
A survey of the manuscripts found at Qumran and other sites near the Dead Sea.
Instructor(s): P. McCarter
Area: Humanities.
AS.130.346. Introduction to the History of Rabbinic Literature.
Broadly surveying classic rabbinic literature, including the Talmud and its commentaries, the legal codes and the response, this seminar explores the immanent as well as the external factors that shaped the development of this literature, the seminal role of this literature in Jewish self-definition and self-perception, and the role of this literature in pre-modern and modern Jewish culture.
Instructor(s): D. Katz
Area: Humanities.
Description: "How does a religious system which defines its ancient laws as God-given and unchangeable apply them to radically different and changing social, political and intellectual situations? This course explores the literature of "Questions and Answers"(She'elot u-Teshuvot), the Jewish legal responsa which have struggled to match Jewish religious law to modern life for fifteen centuries. A sweeping survey of Jewish history as revealed by one of its most impenetrable yet fascinating sources. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.352. History of Hasidism.
Although it appears to be a relic of pre-modern Judaism, Hasidism is a phenomenon of the modern era of Jewish history. This course surveys the political and social history of the Hasidic movement over the course of the last three centuries. Students will also explore basic features of Hasidic culture and thought in their historical development. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.353. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS.
This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.131.653.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

AS.130.354. Archaeological Method and Theory.
What questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review approaches to method and theory including evolutionary archaeology, culture-historical archaeology, processualism and post-processual archaeologies, and explores the future of archaeology as a scientific and humanistic discipline. Previous coursework in archaeology or Permission of instructor required. Meets with AS.131.654.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

AS.130.357. Geographic Information Systems in Archaeology.
Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheets, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI’s ArcGIS software. Taught with AS.131.657.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.130.359. Reading the Talmud in the Post-Talmudic Era.
Life and Death, Survival and Martyrdom, in the Literature of Post-Talmudic Rabbinic Judaism. Readings in the Original Sources (Knowledge of Hebrew Required). Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.361. The Politics of Sexuality in the Bible and the Ancient Near East.
This course will explore the intersection of sexuality and power relationships in the forging of ethnic, political, and religious identities as presented in the Bible and ancient Near Eastern literature. Cross-listed with Jewish Studies and Women, Gender, and Sexuality.
Instructor(s): E. Fleming
Area: Humanities.

AS.130.364. Archaeology of Arabia.
This course examines the archaeology of the Arabian Peninsula from the earliest Paleolithic in the region (c. 1.5 million years ago) through the first few centuries of the Islamic era (c. 1000 AD). We will review basic geology and environmental conditions, examine the development of animal herding and crop cultivating lifeways, and scrutinize the rise of ancient South Arabian complex societies and civilizations. Co-listed with AS.131.664.
Instructor(s): M. Harrower
Area: Humanities.

AS.130.366. Reading the Talmud in Pre-modern Jewish Culture. Attempting to Cope With Abusive Husbands: Annullment of Marriage in the Literature of Post Talmudic Rabbinic Judaism.
The evolution of Talmudic thinking resulted in laws which made marriage too easy, divorce too difficult. This generated centuries of attempts to grapple with the consequences of this conundrum in real-life situations. This course analyzes the literature produced by these attempts. Students will read texts in original Hebrew.
Instructor(s): D. Katz
Area: Humanities.

AS.130.367. Jerusalem: The Holy City in History and Archaeology.
Jerusalem has a global significance utterly disproportionate to its size or wealth, and it has been this way since the days when the city was first settled. On the one hand, this is due to Jerusalem’s role as a sacred space for all three of the world’s largest monotheistic religions: Christianity, Islam, and Judaism. On the other, Jerusalem has long been the fulcrum of geopolitical struggles in the Middle East and beyond. This lecture course explores Jerusalem’s political, cultural, and religious trajectory over the past three millennia through the lens of the city’s amazingly rich historical and archaeological records. In so doing, we unravel the mythical and historical threads that combine to create the powerful symbolic resonance of Jerusalem today, discovering en route that, when it comes to Jerusalem, identifying what is “myth” and what is “history” is a complex and contested undertaking.
Instructor(s): J. Osborne
Area: Humanities.

This course explores economic and social histories of water in the ancient Near East. It examines water’s diverse roles in ancient Mesopotamian, Egyptian, Levantine and South Arabian agriculture, politics, ritual and religion, including water’s interconnected significance in Judaism, Christianity, and Islam. Taught jointly with AS.131.615.
Instructor(s): M. Harrower
Area: Humanities.
AS.130.369. Law in the Ancient Middle East.
The Middle East offers the earliest and most abundant source material for reconstructing ancient legal systems. From stone monuments like the Code of Hammurabi to clay tablets the size of postage stamps, the cuneiform record provides a window into not just legal thought but actual legal practice in the ancient Middle East. Surveying a span of more than two thousand years, we will explore the law in both its deep structure and its regional and temporal diversity. Specific topics will include homicide and personal injury law, family law, the legal status of women, codes and codification, and ancient Israelite law in its Middle Eastern context. No background is required and all texts are read in translation, but every enrolled student is expected to actively participate in this seminar-style course.
Instructor(s): J. Lauinger
Area: Humanities.

AS.130.371. Ritual and Magic in Ancient Egypt.
This course will serve to introduce students to the study of religion, ritual, and magic through the lens of a specific culture: ancient Egypt. Throughout the course students will be introduced to ancient Egyptian culture and will interact with Egyptian texts and artifacts, including those found in the collections of The Johns Hopkins Archaeological Museum, in order to illustrate key concepts. Dean’s Teaching Fellowship course.
Instructor(s): M. Fraser
Area: Humanities.

AS.130.373. Prophets and Prophecy in the Bible.
From thundering voices of social justice to apocalyptic visionaries, biblical prophets have been revered by Jews, Christians and Muslims for thousands of years. They have inspired civic leaders such as Martin Luther King Jr. yet also provided fodder for modern charlatans promising a utopian future. Yet who were these individuals (orators? politicians? diviners? poets?) and what was the full range of their message as set against the Realpolitik world of ancient Israel, Iraq, Egypt, Syria and Jordan?
Instructor(s): T. Lewis
Area: Humanities.

AS.130.374. The Archaeology of Imaginary, Entangled, Hybrid Globalizations.
In this course students will read and examine two recent books, Michael Shanks’ (2012) “The Archaeological Imagination”, Ian Hodder’s (2012) “Entangled: An Archaeology of the Relationships between Humans and Things” and critically compare them with readings on archaeologies of world systems, colonialism, hybridity, and globalization. In particular, we will examine how post-colonial social theory can inform and enhance understandings of ancient past and how it might interface with scientific, empirically oriented archaeological field research and history building. Course requirements will include a short weekly written response to the readings - no exams or term paper will be required.
(Taught jointly with AS.131.674)
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

AS.130.376. Ancient Ritual.
This course will introduce students to the vast body of rituals that were practiced and performed in antiquity, with a particular emphasis on rituals from ancient Mesopotamia, Egypt, and the Hebrew Bible. In addition to examining rituals from a comparative perspective, anthropological and sociological studies of ritual will be read and discussed to shed light on the social, cultural, and political significance of ritual in the ancient world and beyond.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.377. Creating an Egyptian Temple.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art -- particularly wall reliefs -- in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.400. Introduction to Middle Egyptian.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). In the second semester, literary texts and royal inscriptions will be read. Course meets with AS.133.600.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.130.401. Introduction To Middle Egyptian.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). Co-listed with AS.133.601.
Prerequisites: Preqreq: AS.130.400 or equivalent.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.130.402. Intermediate Middle Egyptian.
Second year reading course in Middle Egyptian. In this course we will read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian required.
Instructor(s): A. Arico; M. Fraser.

This writing intensive seminar examines how textual and artistic production were used separately and together to engender and communicate social, cultural, and political meaning in ancient Mesopotamia and the rest of the Near East from the 4th millennium to the Hellenistic period. Using a variety of case studies, students will develop skills in specific research skills such as critical reading, analysis, and interpretation. AS.130.420 is required of NES Majors, but is also open to non-majors who have taken at least one 100-level and one 300-level Near Eastern Civilization course, or with the consent of the instructor. Cross-listed with History of Art.
Instructor(s): M. Feldman; P. Delnero
Area: Humanities.
AS.130.436. Seminar on Amarna Art and History.
This course will tackle several topics relating to the reigns of Akhenaten through Tutankhamun, combining historical and art/archaeological methodologies. The seminar will be taught at a graduate level but will accept undergraduate majors with the instructor’s permission. Background knowledge of ancient Egypt is required. A separate section will meet in addition to read primary sources in original language. Topics will include the nature of the Aten and Amarna monotheism; foreign policy in the period; extent of Akhenaten’s control and his administration, etc.; the DNA evidence and its evaluation.
Prerequisites: EN.600.107
Instructor(s): B. Bryan.

Introduction to the grammar, vocabulary, and writing system of biblical Hebrew.
Instructor(s): R. Liebermann
Area: Humanities.

AS.130.441. Elementary Biblical Hebrew.
Survey of grammar and reading of simple texts. (Credit given only on completion of AS.130.440 and AS.130.441). May not be taken on a satisfactory/unsatisfactory basis.
Instructor(s): R. Liebermann
Area: Humanities.

AS.130.442. Readings - Hebrew Prose.
Reading of biblical Hebrew prose, especially from the Pentateuch, Joshua, Judges, Samuel, and Kings. Cross-listed with Jewish Studies.
Instructor(s): E. Guinn-Villareal
Area: Humanities.

AS.130.443. Reading Of Hebrew Prose.
Reading of Biblical Hebrew prose, especially from the Pentateuch, Joshua, Judges, Samuel, and Kings.
Instructor(s): E. Guinn-Villareal
Area: Humanities.

AS.130.501. Readings & Research.

AS.130.502. Readings & Research.

AS.130.504. Independent Study.
Instructor(s): B. Bryan; G. Schwartz; P. Delnero; P. McCarter; R. Jasnow.

AS.130.505. Independent Study-Archaeology Fieldwork.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.130.506. Independent Study-Archaeology Fieldwork.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.130.510. Archaeology Major Honors Thesis I.
Instructor(s): E. Anderson; G. Schwartz; M. Harrower
Area: Humanities.

AS.130.511. Archaeology Major Honors Thesis II.
Prerequisites: AS.130.510
Instructor(s): E. Anderson; G. Schwartz; L. Deleonardis; M. Roller
Area: Humanities.

AS.130.590. Independent Study.
Instructor(s): M. Harrower.

AS.131.600. Seminar Near Eastern History: Egypt.
Seminar in Near Eastern History: Egypt. Taught jointly with AS.130.303
Instructor(s): B. Bryan.

A three-year history cycle required of all graduate students and forming the core of our graduate program. One year each will be devoted to Egyptian history, Mesopotamian history, and Syro-Palestinian history.
Instructor(s): R. Jasnow.

AS.131.613. Archaeology of Africa: From Human Origins to the Emergence of Civilizations.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrower
Area: Humanities.

This course explores economic and social histories of water in the ancient Near East. It examines water’s diverse roles in ancient Mesopotamian, Egyptian, Levantine and South Arabian agriculture, politics, ritual and religion, including water’s interconnected significance in Judaism, Christianity, and Islam. Taught jointly with AS.130.368
Instructor(s): M. Harrower
Area: Humanities.

Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz.

AS.131.635. Seminar: Near East Archaeology.
Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz
Area: Humanities.

AS.131.653. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS.
This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.130.353.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

What questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review approaches to method and theory including evolutionary archaeology, culture-historical archaeology, processualist and post-processualist archaeologies, and explores the future of archaeology as a scientific and humanistic discipline. Previous coursework in archaeology or Permission of instructor required. Meets with AS.130.354.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.
Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI's ArcGIS software. Taught with AS.130.357.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.131.664. Archaeology of Arabia.
This course examines the archaeology of the Arabian Peninsula from the earliest Paleolithic in the region (c. 1.5 million years ago) through the first few centuries of the Islamic era (c. 1000 AD). We will review basic geology and environmental conditions, examine the development of animal herding and crop cultivating lifeways, and scrutinize the rise of ancient South Arabian complex societies and civilizations. Co-listed with AS.130.364.
Instructor(s): M. Harrower.

AS.131.674. The Archaeology of Imaginary, Entangled, Hybrid Globalizations.
In this course students will read and examine two recent books, Michael Shanks' (2012) “The Archaeological Imagination”, Ian Hodder’s (2012) “Entangled: An Archaeology of the Relationships between Humans and Things” and critically compare them with readings on archaeologies of world systems, colonialism, hybridity, and globalization. In particular, we will examine how post-colonial social theory can inform and enhance understandings of ancient past and how it might interface with scientific, empirically oriented archaeological field research and history building. Course requirements will include a short weekly written response to the readings - no exams or term paper will be required. (Taught jointly with AS.130.374)
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

AS.131.800. Readings & Research.
Instructor(s): Staff.

AS.131.801. Readings and Research.
Instructor(s): Staff
Area: Humanities.

AS.131.848. Dissertation Research.
Instructor(s): Staff.

Instructor(s): Staff.

AS.132.600. Elementary Akkadian.
An introduction to the paleography, grammar and lexicon of the Akkadian language, and the reading of simpler texts in that language. Undergraduates admitted to this course earn 4.5 credits per semester.
Instructor(s): J. Howard.

AS.132.601. Elementary Akkadian.
An introduction to the paleography, grammar and lexicon of the Akkadian language, and the reading of simpler texts in that language. Undergraduates admitted to this course earn 4.5 credits per semester.
Area: Humanities.

In this course a selection of intermediate level Akkadian texts from different genres and period will be read, analyzed and discussed. To build on skills learned in Introduction to Akkadian, specific emphasis will be placed on understanding more advanced grammatical forms and learning how to critically use research tools like the Chicago Assyrian Dictionary and von Soden's Akkadisches Handwörterbuch.
Instructor(s): J. Bowen.

This course introduces students to letters written in the Akkadian language from a variety of historical periods. Recommended course background: AS.132.600 and AS.132.601.
Instructor(s): J. Lauinger
Area: Humanities.

This writing intensive seminar examines how textual and artistic production were used separately and together to engender and communicate social, cultural, and political meaning in ancient Mesopotamia and the rest of the Near East from the 4th millennium to the Hellenistic period. Using a variety of case studies, students will develop skills in specific research skills such as critical reading, analysis, and interpretation. AS.130.420 is required of NES Majors, but is also open to non-majors who have taken at least one 100-level and one 300-level Near Eastern Civilization course, or with the consent of the instructor. Cross-listed with History of Art.
Instructor(s): M. Feldman; P. Delnero
Area: Humanities.

Instructor(s): P. Delnero.

AS.132.640. Historical Texts.
This course has two primary objectives: To introduce students to texts commonly described as “historical” (e.g., royal inscriptions, chronicles); and to further expose students to the Old Babylonian dialect of the Akkadian language. A secondary objective is to begin to develop familiarity with critical research tools such as the Chicago Assyrian Dictionary and the Akkadisches Handwörterbuch.
Instructor(s): J. Lauinger.

Students read the diplomatic correspondence from Tell el-Amarna in the original cuneiform. Focus is on language and history: the dialect(s) of Akkadian in which the letters are written and the diplomatic history of the Late Bronze Age.
Prerequisites: Prereqs: AS.132.600 or instructor's consent.
Instructor(s): J. Lauinger
Area: Humanities.

AS.132.644. Treaties And Diplomacy.
Reading treaties and related materials in Akkadian.
Instructor(s): J. Lauinger.

AS.132.650. Peripheral Akkadian.
Includes texts from Amarna, Emar, Ugarit, Boghazkoi, Nuzi, Alalakh, and Elam.
Instructor(s): J. Lauinger.
AS.132.658. Akkadian Wisdom Literature.
This course introduces students to the group of Akkadian compositions typically described as ‘Wisdom Literature,’ such as The Babylonian Theodicy, the Poem of the Righteous Sufferer, fables, proverbs, instructions, and disputes.
Instructor(s): J. Lauinger.

Instructor(s): J. Lauinger.

AS.132.700. Elementary Sumerian.
TBD
Instructor(s): A. Glenn
Area: Humanities.

AS.132.701. Elementary Sumerian.
Instructor(s): P. Delnero
Area: Humanities.

AS.132.710. Advanced Sumerian.
We will read Letter Collection B and related materials in the original cuneiform.
Instructor(s): P. Delnero.

AS.132.711. Advanced Sumerian.
In this course a selection of Sumerian texts from different periods and genres will be read and discussed from a linguistic, philological, historical, and literary perspective.
Instructor(s): P. Delnero.

AS.132.800. Mesopotamian Seminar.
Research and discussion on topics of current interest.
Instructor(s): G. Schwartz; J. Lauinger; M. Harrower; P. Delnero.

AS.132.801. Mesopotamian Seminar.
Research and discussion on topics of current interest.
Instructor(s): G. Schwartz; J. Lauinger; M. Harrower; P. Delnero
Area: Humanities.

AS.133.600. Introduction to Middle Egyptian.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2135-2000 B.C.). In the second semester, literary texts and royal inscriptions will be read.
Instructor(s): M. Escolano Poveda.

AS.133.601. Introduction To Middle Egyptian (Hieroglyphs).
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2011-1700 B.C.). Co-listed with AS.130.401
Prerequisites: Prereq: AS.133.600 or equivalent.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.133.610. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required.
Instructor(s): B. Bryan; R. Jasnow.

AS.133.611. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.614. Funerary Texts.
Advanced Middle Egyptian texts course covering Coffin Texts and the Book of the Dead, and other afterlife ritual texts.
Instructor(s): B. Bryan; R. Jasnow
Area: Humanities.

AS.133.620. Hieratic.
Instructor(s): R. Jasnow.

AS.133.621. Hieratic.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.630. Old Egyptian.
Instructor(s): B. Bryan.

AS.133.631. Old Egyptian.
Instructor(s): B. Bryan.

AS.133.640. Late Egyptian.
Instructor(s): R. Jasnow.

AS.133.641. Late Egyptian Texts.
An introduction to the grammar and texts of Late Egyptian.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.646. Demotic Texts.
Instructor(s): R. Jasnow.

AS.133.647. Demotic Texts.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.649. Advanced Coptic.
In this class we will read Coptic texts of various genres.
Instructor(s): R. Jasnow.

AS.133.653. Introduction to Ptolemaic Hieroglyphs.
An introduction to the grammar and hieroglyphic writing system employed in Graeco-Roman Period Egyptian temple texts.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.656. Advanced Demotic Texts.
Reading of texts of varying content in Demotic Egyptian.
Instructor(s): R. Jasnow.

AS.133.657. Creating an Egyptian Temple.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art -- particularly wall reliefs -- in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities.

AS.133.706. Egyptian Funerary Arts in the Archaeological Museum.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum’s website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan.
AS.133.736. Seminar on Amarna Art and History.
This course will tackle several topics relating to the reigns of Akhenaten through Tutankhamun, combining historical and art/archaeological methodologies. The seminar will be taught at a graduate level but will accept undergraduate majors with the instructor’s permission. Background knowledge of ancient Egypt is required. A separate section will meet in addition to read primary sources in original language. Topics will include the nature of the Aten and Amarna monotheism; foreign policy in the period; extent of Akhenaten’s control and his administration, etc.; the DNA evidence and its evaluation.
Instructor(s): B. Bryan.

AS.133.750. Seminar in Egyptian Art and Archaeology.
The theme for this course will be archaeology of the Mut precinct in Luxor where Johns Hopkins is excavating. Study of the comparative materials from other sites will be central with the publication of the work approaching.
Instructor(s): B. Bryan.

AS.133.751. Seminar in Egyptian Art and Archaeology: Analysis of Mut Temple’s Archaeology.
Instructor(s): B. Bryan.

AS.134.603. Graduate Seminar in Rabbinic Text.
Readings from the Talmud, the Sugya, and the Codes, in the original Hebrew and Aramaic: Emphasis on skills in reading, interpreting, and historical and cultural contextualization.
Instructor(s): D. Katz
Area: Humanities.

AS.134.604. The Book Of Job.
Reading the Hebrew text of the book of Job with attention to philology, textual criticism, and various aspects of interpretation.
Instructor(s): T. Lewis
Area: Humanities.

A rapid reading course aimed at increasing proficiency in reading the Hebrew text of the book of Ezekiel. Various aspects of translation and interpretation will be studied (e.g., grammar, textual criticism, Philology) including literary, historical, and theological questions. Cross-listed with Jewish Studies.
Instructor(s): T. Lewis

AS.134.610. Historic Hebrew Grammar.
Phonology and morphology of Biblical Hebrew.
Instructor(s): P. McCarter.

AS.134.621. Textual Criticism.
An introduction to the ancient witnesses of the biblical text and the principles of textual criticism.
Instructor(s): P. McCarter.

AS.134.630. Qumran (Dead Sea) Texts.
Instructor(s): P. McCarter.

Translation and analysis of selected texts in Biblical Hebrew giving attention to advanced features of grammar and syntax. Topic: “The Book of Judges”
Instructor(s): P. McCarter.

AS.134.652. Seminar in Ancient Israelite Religion.
Topics include history of scholarship, methodology, representations of deity, the aniconic tradition, solar Yahwism, sacred space, blood rituals, passover, royal cult, family religion, divination, prophecy, incantations, etc.
Instructor(s): T. Lewis.

AS.134.656. Comparative Semitics.
Comparative and historical analysis of the Semitic languages in their Afro-Asiatic context.
Instructor(s): P. McCarter.

AS.134.660. History of Ancient Syria/Palestine.
A survey of the history of Ancient Syria and Cannan, including Ancient Israel. In addition to attending the lectures at the scheduled times, graduate students will also meet one hour per week (time TBA) for a discussion session with the instructor.
Instructor(s): P. McCarter.

AS.134.661. History: Ancient Syria-Palestine II.
A survey of the history of Ancient Syria and Cannan, including Ancient Israel.
Instructor(s): P. McCarter
Area: Humanities.

Instructor(s): P. McCarter.

Instructor(s): P. McCarter
Area: Humanities.

AS.134.711. Alphabetic Cuneiform.
Study of alphabetic writing in cuneiform script during the second half of the second millennium B.C.E.
Instructor(s): P. McCarter.

AS.134.720. Ugaritic I.
A year-long course studying Ugaritic language and literature. The first semester will focus on grammar and translating a representative selection of mythological texts. The second semester will concentrate on ritual texts. The course will also be epigraphic in nature using both conventional and digital techniques.
Instructor(s): T. Lewis

AS.134.721. Ugaritic II.
A continuation of AS.134.720 with emphasis on the mythological and ritual texts from Ugarit. A digital epigraphy lab will also form part of the course.
Instructor(s): T. Lewis
Area: Humanities.

Instructor(s): Y. Monnickendam.

AS.134.744. Survey Of Aramaic Texts.
Instructor(s): T. Lewis
Area: Humanities.

An advanced course in Aramaic devoted to the study of Old Aramaic inscriptions. We will be translating and analyzing a selection of texts from Northern Syria (e.g. Bar-Rakib; Hadad; Kuttamuwa, Nerab, Panamuwa, Sefire, Zakkur), Southern Syria (e.g. Bar-Hadad/ Melqart Stela, Hazael, Tel Dan) and Northern Mesopotamia (e.g. Tell Fakhariyah). Students will be expected to vocalize such texts as a study in historical and comparative linguistics and to clarify their understanding of the morphology and syntax.
Instructor(s): T. Lewis
Area: Humanities.
Cross Listed Courses

History of Art

**AS.010.105. Art of the Ancient Americas.**
Surveys the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. Deleonardis
Area: Humanities.

**AS.010.236. Palaces, Temples and Tombs in Mesopotamia.**
Mesopotamia, the “land between the rivers,” is considered the cradle of civilization. Its earliest urban centers appeared by 3500 BCE in the region of modern-day Iraq, Iran, and Syria. Along with urbanism came the emergence of temples and palaces as large-scale elite institutions (replete with written records). Their arts manifest some of the earliest complex representations. This course explores the art and architecture within the social, political and cultural context of ancient Sumer, Babylonia and Assyria. It provides an integrated picture of the arts of Mesopotamia from 3500 to 330 BCE with an emphasis on the development of visual narrative and the use of art in the expression of authority and legitimacy.
Instructor(s): M. Feldman
Area: Humanities.

**AS.010.301. Art and Interactions in the Eastern Mediterranean from 2000-500 BCE.**
The Mediterranean Sea has always acted as a connector for the many great civilizations that flourished around its shores. From 2000 to 500 BCE, these interactions were particularly dynamic, resulting in a diversity of arts including painting wall frescoes, precious jewelry, and elaborate furnishings and weaponry. This course examines the arts of the interactions among the Egyptians, Near Easterners, and Greeks, considering the role of artistic products in intercultural relations.
Instructor(s): M. Feldman
Area: Humanities.

**AS.010.307. Diplomats, Dealers, and Diggers: The Birth of Archaeology and the Rise of Collecting from the 19th c. to Today.**
The development of archaeology in the Middle East – its history of explorers, diplomats, missionaries and gentlemen-scholars – profoundly shaped the modern world, from the creation of new museums and the antiquities market to international relations and terrorism.
Instructor(s): M. Feldman
Area: Humanities.

**AS.010.314. The Great Debate on Images: from Zurich to Guadalupe.**
Images became a central topic of debate at the time of the Protestant Reformation. Images were not only a topic of doctrinal discussion, but also a target for desecration and destruction. The response to Iconoclasm on the Catholic side of this divide was also intense before, during and after the Council of Trent (1547-63), leading to a reconsideration of images’ role in an economy of the sacred. But the geography of this debate was not limited to Europe: the evangelization of the New World constituted a new scenario in which previous arguments and doctrinal positions were challenged under completely different circumstances. The Great Image Debate is not only a crucial episode of history, but it is also an argument reflecting on the nature of images and their paradoxical contribution to the Early “modern” world. This course is geared towards students with interests in History, Art History and Anthropology.
Instructor(s): F. Pereda
Area: Humanities.

**AS.010.315. Art of the Assyrian Empire, 1000-600 BCE.**
The Assyrian Empire dominated the ancient world from 1000-612 BCE, stretching from Iran to Egypt and laying the foundation for the later Persian and Macedonian empires. With imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This course provides an integrated picture of the imperial arts of this first great empire, situating it within the broader social and political contexts of the first millennium BCE.
Instructor(s): M. Feldman
Area: Humanities.

**AS.010.364. Babylon: Myth and Reality.**
“Babylon - the name resonates, from the Biblical whore of Revelations to sci-fi. But what do we really know about the ancient city and its civilization?”
Instructor(s): M. Feldman
Area: Humanities.

**AS.010.389. The Stone and the Thread.**
This course explores the built environment of the Inka and considers architecture in its social, historical, and cultural contexts. Shared forms and ideas implicit in the fiber arts offer comparative points for analysis and discussion.
Instructor(s): L. Deleonardis
Area: Humanities.

**AS.010.398. Tombs for the Living.**
Centering on the tomb as the unit of analysis, this course examines the cultural and material aspects of death and funerary ritual. Draws on case studies from North America, Mesoamerica, and the Andes. Collections study in museums.
Instructor(s): L. Deleonardis
Area: Humanities.

**AS.010.470. Power and Politics in Assyrian Art.**
Assyria, centered in northern Iraq, created one of the world’s first great empires that dominated the ancient Near Eastern world from around 900 to 612 BCE. In concert with imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This seminar examines the close relationship between the arts and politics in the Assyrian empire. Some themes that will be explored are: historical narrative, text and image, portable luxury arts and gender, politics and religion. The course will engage in close visual analysis of the ancient materials and readings of critical scholarship.
Instructor(s): M. Feldman
Area: Humanities.

**AS.010.611. Selected Topics in Near Eastern Art.**
Topics to be determined.
Instructor(s): M. Feldman.

Classics

**AS.040.137. Freshman Seminar: Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum.**
This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities.
This course explores the dynamic work and social roles of craftpersons in early Greece, the eastern Mediterranean and Near East. Readings and discussion will query the identities and contributions of these people—travelers, captives, lauded masters, and even children—through topics including gender, class, and ethnicity. Special focus on late-third-early first millennia BCE; local field trips.
Instructor(s): E. Anderson
Area: Humanities.

This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

History
AS.100.234. The Making of the Muslim Middle East, 600-1100 A.D.
A survey of the major historical transformations of the region we now call the 'Middle East' (from late antiquity through the 11th century) in relation to the formation and development of Islam and various Muslim empires.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.383. Conversion and Apostasy in the Middle Ages.
Compares religious transformation in medieval Europe and the Middle East (ca. 600-1500), including conquest and conversion; conversion narratives; apostasy, martyrdom and other encounters between medieval Jews, Christians, and Muslims.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

Jewish Studies Program
AS.193.301. Reading the Bible and Encountering its World.
The course examines the interactions between travel and biblical interpretation between the seventeenth and twentieth centuries, paying particular attention to the ways in which travelers to the Middle East and then scholars saw its residents as relics of an unchanging biblical world, whose practices could be used to interpret scriptural texts from both the Old and New Testaments.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences.

The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of multi-lingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multi-cultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed. Emphasis will be put on the differences and similarities between Eastern and Western European Jewry.
Instructor(s): M. Trinh
Area: Social and Behavioral Sciences.

Earth Planetary Sciences
AS.270.205. Introduction to Geographic Information Systems and Geospatial Analysis.
The course provides a broad introduction to the principles and practice of Geographic Information Systems (GIS) and related tools of Geospatial Analysis. Topics will include history of GIS, GIS data structures, data acquisition and merging, database management, spatial analysis, and GIS applications. In addition, students will get hands-on experience working with GIS software.
Instructor(s): X. Chen
Area: Engineering, Natural Sciences.

Program in Museums and Society
AS.389.205. Examining Archaeological Objects.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

Neuroscience
Neuroscience is the study of the nervous system and how it functions. Neuroscientists study the nervous system from all levels, ranging from molecules interacting with cell membranes to brain systems subserving cognitive functions such as language. Dramatic progress has been made at all levels, and the field continues to grow. On the Homewood campus, researchers studying the nervous system are in the departments of Biology, Biomedical Engineering, Biophysics, Cognitive Science, and Psychological and Brain Sciences and in the Krieger Mind/Brain Institute. Their presence provides the opportunity for an innovative, interdepartmental program which offers a broad overview of the neuroscience field, as well as more advanced training in one of three focus areas.

Cellular and Molecular Neuroscience (CM) focuses on the mechanisms by which information flows within and between cells in the nervous system, and the mechanisms through which the cellular structure of the nervous system develops and is maintained. Topics include the molecular basis of membrane permeability, action potentials, sensory transduction, synaptic transmission, neuronal modulation, mechanisms of drug action, and the molecular basis of genetic disorders of the nervous system.

Systems Neuroscience (ST) seeks to relate brain structure and functioning to behaviors and related physiological processes. Research in this area explores the description and analysis of neural circuits. This includes identifying the brain nuclei and interconnections making up a circuit, identifying and investigating the implicated neurotransmitters, and characterizing the intrinsic and extrinsic factors that modulate the development and adult functioning of the circuit. Topics as diverse as learning and memory, communication, sensory systems, and motivated behaviors (e.g., reproduction, feeding, and aggression) are explored from this perspective.

Cognitive Neuroscience (CG) focuses on how cognitive functions, such as vision or language, are implemented by the brain. Drawing upon a variety of techniques for probing the working brain at cognitive and
neural levels, including functional neuroimaging, analysis of cognitive impairments in brain-damaged patients, and electrophysiological techniques, research in cognitive neuroscience seeks to relate mental representations and computations to brain mechanisms and processes.

**Neuroscience Program Committee**

The Neuroscience Program Committee coordinates course offerings, oversees the program’s interdepartmental courses, reviews and updates the administration of the program, makes decisions about admission to the B.S./M.S. program, approves proposed research programs and mentors for students in the B.S./M.S. mentored research program, and evaluates the final reports and presentations from the research year.

The neuroscience major consists of two degree programs: a four-year B.S. based primarily on course work and 6 credits of research; and a five-year concurrent B.S./M.S. involving additional course work and a yearlong intensive laboratory experience. (Under special circumstances, a student may be able to complete the B.S./M.S. program in less than five years.) Both programs are designed to provide rigorous preparation for advanced study in either a Ph.D., M.D. or Ph.D./M.D. programs. The concurrent B.S./M.S. program accepts students every spring semester.

Additional information regarding the undergraduate degree and the B.S./M.S. programs is available through our website at http://krieger.jhu.edu/neuroscience. You may also contact our Program Administrator, Ms. Hope Fisher, hope.stein@jhu.edu or 410-516-6196.

*This curriculum is being reviewed on a regular basis. Please consult our website for the most recent updates, http://krieger.jhu.edu/neuroscience/courses/index.html.*

**Requirements for the B.S. Degree**

Also see Requirements for a Bachelor’s Degree (p. 20).

### General Information

- Students are encouraged to complete an optional introductory course in their freshman year, such as AS.080.105 An Introduction to Neuroscience, AS.050.105 Intro to Cognitive Neuropsychology, or AS.200.141 Foundations of Brain, Behavior and Cognition.
- Students interested in attending medical school will need to take a second semester of organic chemistry and its corresponding laboratory to meet medical school admission requirements; however, these courses are not major requirements.
- Students are required to select their advanced neuroscience elective courses from one of three approved focus areas: systems neuroscience, cognitive neuroscience, or cellular and molecular neuroscience. Approved courses fulfilling this requirement are found on the neuroscience website (http://krieger.jhu.edu/neuroscience/courses/index.html) or in the schedule of classes.
- To apply towards the major, all courses must be taken for a letter grade and a grade of C- or better is required.

#### Advanced Neuroscience Elective Courses and Focus Area

Nine credits of 300-level or higher approved courses from one of three focus areas: systems neuroscience, cognitive neuroscience, or cellular and molecular neuroscience

Three credits of 300-level or higher approved course outside of focus area selected above

#### Research**

Six credits of neuroscience research

* These courses are normally completed during the sophomore and junior years. We recommend that students complete these courses in the sequence listed.
Research must be conducted in one of the neuroscience laboratories participating in the program. Students must register for AS.080.500 Scientific Communication: Neuroscience concurrently with neuroscience research each time they register for research.

Honors in the Major

To receive honors in Neuroscience, students must meet the following criteria:

- Earn a GPA of 3.5 or better in major requirements
- Conduct research and give a research presentation
- Receive a recommendation from research mentor

Requirements for the M.S. Degree

Current JHU undergraduate students who wish to apply for the B.S./M.S. Program in their junior or senior year must meet the following minimum requirements (prior to applying):

- A minimum 3.5 GPA in all required courses for the undergraduate major and cumulative GPA of 3.5,
- Completion of no fewer than three credits of undergraduate research, and
- Completion of all courses required for the JHU B.S. degree in Neuroscience.

Advanced Seminars in Neuroscience (6 credits)

The Advanced Seminar in Neuroscience is offered in the fall and spring terms.

Final Spring Courses (12 credits)

Degree requirements include 12 credits of additional advanced course work (300-level or above). At least three credits must be at 400-level or above. Courses must be related to the study of neuroscience and ideally focused on the student’s concentration of study and area of research. Students may choose courses from the approved list of undergraduate advanced courses. (In addition, up to six additional credits of the Advanced Seminar in Neuroscience, and/or statistics courses, graduate courses and seminars may be taken with the approval of the program director.)

Mentored Research (24 credits)

During the research year, students will complete a total of 24 credits of mentored research. Students must complete nine credits of research in a spring academic term, six in the summer and an additional nine in the fall.

B.S./M.S. Commencement Project (1 credit)

After completing the research year, students must register for a one-credit independent study course intended to track the progress and defense of the student’s final research project.

Note: This masters degree is only open to current Johns Hopkins University undergraduate students pursuing a major in neuroscience.

Courses

AS.080.105. An Introduction to Neuroscience.
Our knowledge of brain function from the level of single molecules to human behavior continues to expand at something approaching light speed. That knowledge invades our lives every day. And decisions are made based on that knowledge from every corner of life...from physician to politician and every stop in between. This course is meant to provide a fundamental understanding of how the cells and molecules as well as the regions and systems of the brain work to have you see and hear and move and remember. The course is divided into four sections that progress from the cells of the brain and spinal cord to circuits then systems and finally behaviors. Introduction to Neuroscience is designed for any college student who has an interest in the range of disciplines we call neuroscience.
Instructor(s): S. Hendry
Area: Natural Sciences.

As new knowledge about the brain reaches the masses, neuroscience research and its applications have featured more prominently in film and TV. How far are these stories from the reality of what is happening at the bench? In this course, students will survey some of the latest research in cellular and systems neuroscience, then view and evaluate related media with discussions and presentations. Issues to be discussed include artificial intelligence, brain-machine interfaces, expertise, and memory.
Instructor(s): B. Rapp; S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

This course surveys theory and research concerning how the human brain carries out mental processes. The sections of this course correspond with the sections listed for AS.020.203. All sections will meet together on exams day and guest lecture days. Co-listed as AS.050.203 in Cognitive Science.
Instructor(s): B. Rapp; S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.208. Ions in Flux: From DNA to Disease.
This course will look at an important type of protein, the ion channel. Ion channels can be studied from many angles, but we will focus on how mutations in ion channels produce disease in human beings. We will do this in a discussion format designed to keep everyone engaged regardless of background.
Instructor(s): P. Scherer
Area: Natural Sciences, Social and Behavioral Sciences.

How Did They Do That? A Survey In Neuroscience Methodology. A survey course designed to familiarize students with commonly used, modern neuroscience techniques. The sessions will cover principles of experimental design, in silico resources, biochemical methods, microscopy, genetic techniques, electrophysiology, and behavioral analysis. Each session will include lecture and discussion as well as group-based exercises for experimental design. The discussions will utilize examples from primary papers to illustrate experimental pitfalls and proper interpretation. In group exercises, students will design their own experiments with constructive critiques from the instructors and classmates. Students will be evaluated on participation in class assignments and discussions.
Instructor(s): A. Amen; C. Cave
Area: Natural Sciences.

AS.080.250. Neuroscience Laboratory.
This course will give students the “hands-on” experience of the interdisciplinary nature of neuroscience. Students will use anatomical and neuro-physiological techniques to understand the basic underlying principles of neuroscience.
Prerequisites: (AS.080.305 AND AS.080.306) OR AS.200.141 or instructor's permission.
Instructor(s): J. Trageser; L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.301. Stress and the Brain.
The purpose of this course is to explore the phenomenon of stress by investigating the neural, endocrine and molecular mechanisms involved. By reviewing both animal and human research, this course will consider disorders of the stress control system and the adverse impact of stress on human physical and mental health. Topics in this class will include, but are not limited to I) disorders such as PTSD, anxiety, major depression; II) interactions between stress and neurodegenerative disorders; III) stress-immune-inflammatory interactions; IV) the role of stress in obesity, hypertension, and other metabolic syndromes; V) stress effects on reproduction. Students will finish this course with a greater understanding for the fundamental neuroendocrine responses to stress and its consequent and/or associated adverse effects on human health.
Prerequisites: AS.050.203 AND AS.080.305 AND AS.080.306
Instructor(s): F. Madison
Area: Natural Sciences.

Seminar course in which applications of neuroscience and neurotechnologies are explored. The class meets once a week for an hour. Each week, an application of neuroscience or a neurotechnology will be discussed. Readings will be assigned in preparation for each class. At each meeting of the class, the readings will be discussed, and if possible there will be a demonstration of the technology or application. Each student will choose one neurotechnology or application of neuroscience and prepare a short presentation, which will be given towards the end of the semester. Topics to be covered include but are not limited to: brain recording technologies, neuroimaging, deep brain stimulation, transcranial magnetic stimulation, optogenetics, brain-computer interfaces, neuroprosthetics, neuroeconomics, neurolaw, and neuromorphic engineering. Grading is pass/fail.
Prerequisites: AS.080.305 OR AS.080.306 OR AS.200.141 OR AS.020.306
Area: Natural Sciences.

AS.080.303. Structure of the Nervous System.
This course takes a structural biological approach to studying the nervous system. In using a systems approach it provides students of cellular-molecular and computational neuroscience with a thorough introduction to functional, microscopic and submicroscopic organization of the brain, spinal cord and peripheral nervous system.
Prerequisites: AS.080.305 AND AS.080.306
Instructor(s): S. Hendry
Area: Natural Sciences.
**AS.080.304. Neuroscience Learning and Memory.**

This course is an advanced survey of the scientific study of learning and memory. Different perspectives will be used to review the science of learning and memory including the cellular-molecular basis of synaptic plasticity, the functional circuitry involved in learning and memory and memory systems in the brain. The course is designed to provide a deep understanding of the issues and current debates in learning and memory research and focuses specifically on animal models of memory and memory impairment. This is an interactive lecture course with a strong emphasis on student participation. Recommended Course Background: AS.200.141 OR AS.020.312 OR AS.080.203 OR AS.050.203 OR AS.080.305 AND AS.080.306

**Prerequisites:** AS.200.141(C) OR (AS.080.305[C] AND AS.080.306[C]) OR (AS.020.312[C] AND AS.020.306[C])

Instructor(s): A. Bakker.

**AS.080.305. The Nervous System I.**

The Nervous System is a fully integrated, two-semester course that surveys the cellular and molecular biology of neurons as well as the structure and function of the nervous system. Students must register for Nervous System II offered in the second term.

**Prerequisites:** AS.080.203 OR AS.050.203 OR AS.200.141 or 080.105 or Permission

Instructor(s): H. Zhao; S. Hendry

Area: Natural Sciences.

**AS.080.306. The Nervous System II.**

The course uses the functional organization of the somatosensory system as a means to examine mechanisms of neutral development. Generation and maturation of neurons, guidance of axons, formation of synapses and the regressive events that shape the adult nervous system will be examined. At the same time we will explore the structure and function of brain regions that allow us to feel pain and temperature, detect vibration, recognize shape and perceive where we are in space. Finally, the single-neuron events that lead to adaptive changes in function will be explored in the context of central nervous system control of movement and of higher order functions of speech and memory. Students who do not register for Nervous System I offered during the first term should not register for this class.

**Prerequisites:** Prereq: AS.080.305

Instructor(s): H. Zhao; S. Hendry

Area: Natural Sciences.

**AS.080.307. Neurobiology of Addiction.**

Broadly defined, addiction is a chronic, relapsing brain disease. It is a compulsive, uncontrollable behavior to seek and use a substance, even in the face of negative social consequences or health consequences. But, addiction is also a condition in which an individual overindulges in just about anything that is reinforcing...from physical exercise, to video games, to food, and to sex. In this course, we will use current literature to try and understand what is currently known about the underlying neural mechanisms of this very real disorder. Recommended Course Background: AS.080.305 and AS.080.306 or AS.020.312 or AS.020.306 or AS.200.141 and AS.020.306 or permission.

Instructor(s): L. Gorman.

**AS.080.308. Neuroeconomics.**

Every day decisions often require us to weigh the costs and benefits of engaging in a particular course of action in order to obtain some expected outcome. Unfortunately, we often lack the information necessary to obtain our desired goal with complete certainty. Economists have long been interested in understanding human decision-making under these circumstances. In parallel, neuroscientists have made great strides at describing the underlying neural basis of simple decision-making. However, despite much progress in both fields, our understanding of how the brain makes decisions is incomplete. In order to strengthen and further research in both fields, the interdisciplinary field of Neuroeconomics arose. This course will survey the field of Neuroeconomics focusing on theoretical concepts developed by economists and the role these theories are playing in guiding current experimental neuroscience. Recommended Course Background: AS.080.305 and AS.080.306 or AS.020.312 and AS.020.306 or AS.200.141 and AS.020.306 or permission.

Instructor(s): J. Trageser

Area: Natural Sciences.

**AS.080.309. Frontiers in Neuroscience.**

Modern neuroscience has advanced enough for us to contemplate some issues we could not address before. In this course, we will examine the recent advances in neuroscience research such as neuropsychotrics, deep brain stimulation (DBS), brain computer interface (BCI), and optogenetics. We will focus on understanding the new technology and its limits, and learn how it may shape the future of science, medicine, and society. We will also explore issues related to carbon-nanotube molecular computing and the latest neuro-imaging techniques in lectures and reading original articles. Recommended Course Background: AS.080.305, AS.080.306 or AS.080.203 or permission of instructor.

**AS.080.310. Synaptic Function and Plasticity.**

The function of the nervous system is based on synaptic transmission between neurons. Synapses are not static structures, but dynamically change with experience. Experience-dependent synaptic plasticity not only allows proper development of the nervous system in tune with the environment, but also is the basis for learning and memory. This course will cover the structure and function of synapses, and how they are altered by experience to encode information.

**Prerequisites:** (AS.020.305 OR AS.020.306) OR (AS.080.305 OR AS.080.306)

Instructor(s): A. Kirkwood; H. Lee

Area: Natural Sciences.

**AS.080.313. The Biology of Neural Development.**

Discoveries of the molecular and cellular mechanisms of nervous system development have come at a rapid pace over the past two decades. We will explore those discoveries with the use of the primary scientific literature and scientific reviews. Topics will include proliferation, migration, specification, differentiation, axon pathway finding, synapse formation and regressive events. Lectures by faculty will alternate with student presentations. This course requires students to write extensively about one of the above topics and present their understanding of the material twice during the semester.

**Prerequisites:** 080.305 (Nervous System I) 080.306 (Nervous System II) 020.305 (Biochemistry) 020.306 (Cell Biology)

Instructor(s): S. Hendry

Area: Natural Sciences, Social and Behavioral Sciences.
AS.080.317. Developmental Neurobiology: Signaling in Development and Disease.
An advanced undergraduate level seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease. Recommended Course Background: AS.020.305, AS.020.306, and AS.080.306.

AS.080.318. Practicum in Language Disorders.
Please see additional instructions on http://krieger.jhu.edu/neuroscience/courses/index.html This course provides the opportunity to learn about adult aphasias; language disorders which are one of the most common consequences of stroke. You will receive training in Supportive Communication Techniques and work as a communication partner with an individual with aphasia for two hours per week. Three class meetings for orientation and reading assignments will be held on campus; training and practicum will be conducted at a local aphasia support center. Transportation required.
Prerequisites: Juniors and Seniors Only Prerequisite: An A - or above in one of the following courses: AS.080.203[C] OR AS.050.203[C] OR AS.050.105[C] OR AS.050.311[C]
Instructor(s): B. Rapp.

AS.080.320. The Auditory System.
This course will cover the neuroanatomy and neurophysiology of the human auditory system from the ear to the brain. Behavioral, electrophysiological, and neuroimaging methods for assessing peripheral and central auditory function will be discussed. Acquired and developmental disorders of auditory function will be reviewed using clinical case studies.
Prerequisites: AS.080.305 OR AS.080.203 OR AS.050.203 OR AS.020.141 OR AS.020.302 or permission of the instructor.
Instructor(s): D. Boatman
Area: Natural Sciences.

AS.080.322. Cellular and Molecular Biology of Sensation.
Leading scientists in sensory biology from the Johns Hopkins community will present the most current knowledge in the cellular and molecular biology of sensation. A lecture and a student presentation of an exemplar manuscript will be presented each week on a different topic of sensory systems.
Prerequisites: AS.080.304 OR AS.080.305 OR AS.080.306 OR AS.020.306 OR AS.020.305.
Instructor(s): P. Fuchs
Area: Natural Sciences.

Classic Journal Club course where the students will read and discuss and review articles on differing topics depending on student interests. Open to Neuroscience and Behavioral Biology sophomores, juniors and seniors.

Open to Neuroscience and Behavioral Biology Sophomores, Juniors and Seniors. Classic Journal Club course where the students will read and discuss and review articles on differing topics depending on student interests.

Being able to meet with a small group and discuss some key journal articles in a particular area of Neuroscience is one of the experiences that we hope to fulfill with this course. Topics will be chosen every semester. Classes will consist of reading an assortment of journal articles; both review and primary literature. Students will take turn leading the discussions of the theoretical and practical implications of the papers.
Prerequisites: AS.080.203 AND AS.080.305 AND AS.080.306.

This course investigates numerous types of brain injuries and explores the responses of the nervous system to these injuries. The course’s primary focus is the cellular and molecular mechanisms of brain injury and the recovery of function. Discussions of traumatic brain injury, stroke, spinal cord, and tumors, using historical and recent journal articles, will facilitate students’ understanding of the current state of the brain injury field. Cross-listed with Psychological and Brain Sciences and Behavioral Biology.
Prerequisites: (AS.080.305 AND AS.080.306) OR (AS.020.312 OR AS.020.306) OR (200.141 and 020.306) OR Permission of Instructor
Instructor(s): L. Gorman
Area: Natural Sciences.

AS.080.333. Writing About the Nervous System.
To write clearly and cogently about the nervous system demands two things in equal measure. One is serious understanding and the other is skill. Neither is a gift since both must be acquired. We will strive to do both in this course by taking an extant document – either a slim text on a restricted subject in neuroscience or a set of class notes - and, through revision and addition of recently published findings, substantially improve that document. Students will be required to read, write and revise extensively – at least two assignments each week.
Instructor(s): S. Hendry
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.345. Great Discoveries in Neuroscience.
This course examines the historical and intellectual context of selected, key advances in neuroscience, how they were made and the impact they had on an understanding of the nervous system. Particular attention will be paid to advances in cellular and molecular neuroscience. Among the topics covered will be the discovery of monoamine neurotransmitters and of endocannabinoids, the role of neurotrophins in neural development, and prion-based diseases of the brain.
Prerequisites: (AS.080.305 AND AS.080.306) OR AS.020.306 OR AS.020.312 OR Permission of Instructor
Instructor(s): J. Baraban
Area: Natural Sciences.

AS.080.346. Sensorimotor Processing.
Our brains evolved the capacity to sort this madness into reliable and coherent perceptual representations of not only our environment, but also our corporeal selves. Through lectures and reading discussions, this course explores how our sensory modalities work together with our movements, enabling us to perceive and interact with our environment. Topics include object and body perception, motor adaptation, and the biological bases of sensorimotor integration. This course summarizes the current understanding of these topics, synthesizing recent findings from behavioral, neurophysiological, and neuroimaging studies.
Prerequisites: AS.080.305 AND AS.080.306 or permission of instructor.
Area: Natural Sciences.
Neuroscience is approaching the time when it can offer a compelling explanation for how the brain works. This course takes advantage of work done in humans and non-human primates to survey concepts in sensory perception, motor command, and memory mechanisms. Lectures are given by faculty whose research explores these issues. Each subject is explored as a three-lecture sequence: 1) a background lecture that lays out the general principles and over-riding questions of the field; 2) an in-depth lecture that covers the most recent scientific literature; and 3) a summary lecture that brings together the major questions and their Resolution. Recommended Course Background: AS.080.305
Instructor(s): S. Hendry
Area: Natural Sciences.

From outer segments of photoreceptors to the Fusiform Face Area of the cerebral cortex we have come to understand how the visual system works at each of many fundamental levels. This course examines the basis for perception of visible objects at each of these levels. We will use the secondary literature (scientific reviews) to accent the hard-won truths about visual system functional organization and to highlight ongoing controversies. Students will be lead through carefully chosen reviews in a series of lectures and written summaries prepared by faculty. Three exams and a final exam will test students not on their memorization of minutiae but on their understanding of fundamental principles.
Prerequisites: AS.080.306 OR AS.020.306 OR Permission
Instructor(s): S. Hendry
Area: Natural Sciences.

AS.080.357. Developmental Neuroscience. 3 Credits.
The developmental neuroscience course will cover principles of neural development. The course will focus on major events in neural development: patterning and growth of the nervous system, neuronal determination, axonal navigation and targeting, neuron survival and death, synapse function, developmental plasticity, and behavioral and cognitive development.
Prerequisites: AS.080.305 AND AS.080.306
Instructor(s): M. Farah
Area: Natural Sciences.

AS.080.360. Diseases & Disorders of the Nervous System.
Prerequisites: ( EN.580.421 AND EN.580.422 ) OR ( AS.020.305 AND AS.020.306 ) OR ( AS.080.305 AND AS.080.306 ) OR By Permission
Instructor(s): G. Mckhann; S. Hendry
Area: Natural Sciences.

The course focuses on sound processing, including current research topics in Auditory Neuroscience, including synaptic physiology, neural circuitry, acoustics, physiology, and behavior. Course taught in Salamanca. This course fulfills upper-level Neuroscience electives. Course must be taken for a grade.
Instructor(s): L. Gorman
Area: Natural Sciences.

AS.080.364. Methods in Neuroscience and Orgo?.
Who would have thought that organic chemistry would be playing a role in our understanding of the anatomy of the nervous system!!! In this course, you will work in both the Organic Chemistry and Neuroscience labs to compare the new CLARITY technique, introduced by Karl Deisseroth, with another technique known as SeeDB, introduced by Takeshi Imai. Both techniques are used to make the brain “invisible” and allow subsequent staining to visually examine neuronal circuits. Students will work independently in teams to determine which technique is more amenable to use by students in the Neuroscience Lab course. Permission Required from Instructor to register.
Instructor(s): C. Falzone; E. Hill; L. D’Souza; L. Gorman
Area: Natural Sciences.

This course is a systems-oriented course focusing on the basic neural processing of pain signals in both the spinal cord and the brain. Class lectures will cover the anatomical and molecular basis for the transmission and perception of pain signals, basic concepts such as allostynia, hyperalgesia, peripheral and central sensitization, remodeling, the pathophysiology of chronic pain disorders and the cognitive and emotional aspects of pain. We will also discuss the regulation of pain signals by descending systems, and current practices and new advances in the treatment of pain.
Prerequisites: ( AS.080.305 AND AS.080.306 ) OR AS.020.312 OR AS.020.316 OR AS.200.141 OR INSTRUCTOR’S PERMISSION
Instructor(s): H. Adwanikar
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.370. The Cerebellum: Is it just for motor control?.
The cerebellum is traditionally thought to be involved in movement and motor control, and observations of patients with cerebellar damage do in fact show motor deficits. However, since the proliferation of functional MRI, cerebellar activations have been observed in a surprising number of brain activation studies that were designed to investigate the neural correlates of cognitive function. Over the past 2 decades, an increasing number of investigators have tried to characterize the role of the cerebellum in cognitive function. Through lectures and reading discussions this course will survey cerebellar circuitry, neuroimaging and neuromodulatory methods for investigating the cerebellum, and traditional and non-traditional functions of the cerebellum, including cerebellar involvement in cognitive functions such as language, working memory, and executive control.
Prerequisites: Prereqs: AS.080.305 AND AS.080.306 AND AS.080.203 OR AS.050.203
Instructor(s): J. Desmond
Area: Natural Sciences, Social and Behavioral Sciences.
AS.080.375. The Neural Control of Movement.
Every day, our brains produce adaptable and complex movements in a constantly changing environment. These motoric abilities are so complex that they are still largely unmatched by current technology. The goal of this course is to provide an understanding of the neural mechanisms underlying movement planning and execution. We will cover the structures and systems that are responsible for feedback and motor control. These include sensory perception, reflex arcs, spinal cord organization, pattern generators, muscle function, locomotion, eye movement, and cognitive aspects of motor control. The roles of cortical motor structures and their interaction with the cerebellum, thalamus, and basal ganglia will be examined in the normally functioning brain as well as in individuals with motor disorders. In addition, we will discuss various theories of motor control using both classical and recent experimental data in order to develop your abilities to review, critique, and report on the scientific motor control literature. By the end of this course you will (1) have an understanding of how muscles and the brain work, how movements are planned and performed, and the computations required to carry out movements and (2) summarize major themes in the motor control literature and assess how new papers contribute to the larger body of work in this field.
Prerequisites: AS.080.305 AND AS.080.306
Area: Social and Behavioral Sciences.

AS.080.400. Research Practicum: Language Disorders-Community Based Learning.
This course provides the opportunity to learn about adult aphasias; language disorders which are one of the most common consequence of stroke. You will receive training in Supportive Communication Techniques and work as a communication partner with an individual with aphasia for two hours per week. Three class meetings for orientation and reading assignments will be held on campus; training and practicum will be conducted at a local aphasia support center. Transportation required. A valid driver’s license for zip car use. This is a two (2) credit practicum.
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.401. Research Practicum: KEEN (Kids Enjoying Exercise Now)-Community Based Learning.
VAN CERTIFICATION SUGGESTED; KEEN (Kids Enjoying Exercise Now). This course provides the opportunity to learn and interact with children who have neurological disabilities, including autism, cerebral palsy and Down syndrome in weekend exercise and recreational activities. You will receive a profile for the KEEN athlete that you will be paired with during a session. You will receive initial training prior to participating and will be responsible for attending a mandatory orientation and exit session that will be held on the Homewood Campus. The actual practicum will take place at KEEN center in Baltimore, MD. Transportation will be either a zip car (you will need a driver’s license), OR JHU van. This is a one (1) - two (2) credit S/U course, organized by the Undergraduate Neuroscience Program. This course has an option for variable credits by which 1 credit equals 3 visits and 2 credits equals 6. Neuroscience and Behavioral Biology Majors ONLY.
Instructor(s): L. Gorman.

AS.080.402. Teaching Practicum: Making Neuroscience Fun (MNF).
ZIP CAR CERTIFICATION SUGGESTED; All visits are Monday - Friday either 7am-11am OR 11am-3pm. Making Neuroscience Fun (MNF) is a community outreach program which brings age-appropriate interactive presentations about the brain and nervous system to Baltimore City and County elementary school students. MNF is an effort aimed at fostering appreciation for science in general, emphasizing the importance of the brain and the nervous system in everyday life, and enhancing the science curriculum in Baltimore’s City and County schools. You will receive initial training prior to participating and will be responsible for attending a mandatory orientation and exit session that will be held on the Homewood Campus. The practicum will take place at Baltimore City and County Schools. Students willing to drive are encouraged to register. Zip Cars will be provided. This is a one (1) - two (2) credit S/U course, organized by the Undergraduate Neuroscience Program. This course has an option for variable credits by which 1 credit equals 3 visits and 2 credits equals 6.
Instructor(s): L. Gorman.

This practicum provides students the opportunity to learn, play, and interact with children receiving treatment in over 20 different specialties including dermatology, endocrine, GI, immunology, urology, plastics, hematology among others. Students will travel to an outpatient building at the John's Hopkins Children’s center where they will participate in a variety of therapeutic activities including doing art projects and making the children feel comfortable. Students will gain valuable clinical experience and be exposed to a wide range of children with a variety of diseases/illnesses. You will receive initial training prior to participating and will be responsible for attending a mandatory orientation and exit session that will be held on the Homewood Campus. This is a one (1) - three (3) credit S/U course, organized by the Undergraduate Neuroscience Program. This course has an option for variable credits by which 1 credit equals 3 visits, 2 credits equals 6 and 3 credits equals 9 visits. The visits for this practicum are 10-12 on Tuesdays or 10-12 on Thursdays of each month. Transportation is provided by the JHU shuttle.
Instructor(s): L. Gorman.

AS.080.411. Advanced Seminar: Neuroscience I.
For students in the first semester of the BA/MS Program. Instructor permission required.
Instructor(s): J. Baraban
Area: Natural Sciences.

AS.080.412. Advanced Seminar: Neuroscience II.
For students in the 2nd semester of the BA/MS Program. Permission Required.
Instructor(s): J. Baraban
Area: Natural Sciences.

AS.080.413. Advanced Seminar: Neuroscience III.
For students in the 3rd semester of the BA/MS Program. Permission Required.
Instructor(s): J. Baraban; L. Gorman
Area: Natural Sciences.

For students in 4th year of the Neuroscience BA/MS Program only. Permission Required.
Instructor(s): J. Baraban
Area: Natural Sciences.
Scientific communication is crucial to advancing science. The Scientific Communication section is taken concurrently with Neuroscience Research and consists of a two hour research orientation session held at the beginning of the semester and a two hour exit session held at the end of the semester. The student is also expected to meet with their lab supervisor or attend a lab meeting once a week to understand the research lab is currently working on and receive feedback on the work they are doing. See special notes section for specific meeting day/time.
Instructor(s): H. Adwanikar; J. Trageser; L. Gorman.

AS.080.511. Independent Study.
Corequisites: AS.080.500 (Scientific Communication).

AS.080.512. Independent Study.
Instructor(s): L. Gorman; Staff.

AS.080.521. Research Neuroscience-Freshmen.
Instructor(s): Staff.

AS.080.531. Research Neuroscience-Freshmen.
Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): Staff.

AS.080.534. Neuroscience Research- Freshmen.
Corequisites: AS.080.500[C]
Instructor(s): Staff.

AS.080.541. Research Neuroscience - Sophomores.
Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): Staff.

AS.080.544. Neuroscience Research-Sophomores.
Corequisites: AS.080.500
Instructor(s): Staff.

Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): Staff.

Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.561. Research Neuroscience - Seniors.
Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): Staff.

AS.080.564. Neuroscience Research - Seniors.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.570. Research-Intersession.
Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): A. Kirkwood; B. Landau; E. Niebur; R. Kuruvilla.

AS.080.572. Direct Readings/Independent Study.
Instructor(s): J. Baraban; L. Gorman.

AS.080.576. Research-Seniors-Intersession.
Corequisites: AS.080.500.

AS.080.582. Neuroscience: Internship.
Instructor(s): L. Gorman.

AS.080.590. Independent Study.
Corequisites: AS.080.500
Instructor(s): L. Gorman.

AS.080.592. Research-Freshmen.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.594. Research-Sophomores.
Corequisites: AS.080.500
Instructor(s): Staff.

Instructor(s): L. Gorman; Staff.

AS.080.596. Research-Juniors-Summer.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.597. Internship: Neuroscience.
Instructor(s): L. Gorman.

AS.080.598. Research-Seniors-Summer.
Corequisites: AS.080.500
Instructor(s): Staff
Area: Natural Sciences.

AS.080.600. Neuroscience Research: BA/MS Undergraduate.
This course is ONLY for Neuroscience BA/MS students that are in the program during their undergraduate senior year. This course is similar to the course that the BA/MS graduate students take but is for BA/MS Seniors in their 7th semester summer period.
Instructor(s): J. Baraban.

AS.080.601. Neuroeconomics -Graduate Level.
Every day decisions often require us to weigh the costs and benefits of engaging in a particular course of action in order to obtain some expected outcome. Unfortunately, we often lack the information necessary to obtain our desired goal with complete certainty. Economists have long been interested in understanding human decision-making under these circumstances. In parallel, neuroscientists have made great strides at describing the underlying neural basis of simple decision-making. However, despite much progress in both fields, our understanding of how the brain makes decisions is incomplete. In order to strengthen and further research in both fields, the interdisciplinary field of Neuroeconomics arose. This course will survey the field of Neuroeconomics focusing on theoretical concepts developed by economists and the role these theories are playing in guiding current experimental neuroscience. Only graduate students can register for this course. Instructor signature is required.
Prerequisites: (AS.080.305 AND AS.080.306) OR (AS.020.312 AND AS.020.306) OR (AS.200.141 AND AS.020.306) OR Permission.

This practicum works with the Kennedy Krieger Institute and provides students with the opportunity to participate in a variety of therapeutic activities including playing with the children and helping them achieve goals. Students will gain valuable clinical experience while learning patient empathy. You must attend (3) three sessions per semester either from 2-4 on Fridays, or 2-4 on the first Saturday of each month. No credits or grade are awarded. Transportation is provided by the JHU shuttle.
Instructor(s): L. Gorman.
AS.080.620. **Theoretical Neuroscience.**
Topics of theoretical neuroscience and computational neuroscience will be discussed based on the original literature. Students are expected to actively participate in the discussion and also to present selected material to the class.
Instructor(s): E. Niebur.

AS.080.630. **Bodian Seminar Series.**
The Bodian Seminar is an interdisciplinary colloquium for discussion of current research into the neural basis of mental processes. Leading researchers, generally from outside the University, are invited to give lectures, which will be announced per e-mail. Undergraduate students who register for this course are asked to study a publication by the speaker, as provided with the announcement, and to prepare a question for each speaker together with a brief discussion of the possible answers. Permission required for undergraduate students.
Instructor(s): V. Stuphorn.

AS.080.631. **Bodian Seminar Series.**
Graduate students and Seniors with instructor permission. The Bodian Seminar is an interdisciplinary colloquium for discussion of current research into the neural basis of mental processes. Leading researchers, generally from outside the University, are invited to give lectures. About 12 lectures are scheduled per semester (see http://www.mb.jhu.edu/seminars.asp). Speakers, titles of lectures, and dates are announced to participants per e-mail (contact Debby Kelly, 410 516-8640). The announcements also include links to one or two recent publications of the speaker. Undergraduate students who register for this course are asked to study these papers and to prepare a question for each speaker together with a brief discussion of the possible answers. Question and discussion have to be in written and turned in the day before the lecture. Undergraduates must e-mail the instructor for permission (von.der.heydt@jhu.edu) prior to registering for the course.
Instructor(s): J. Von Der Heydt.

AS.080.660. **Commencement Project.**
This course is for BA/MS students that have completed their year of research and are now working on their final thesis. In this course, students devote their semester to preparing their final thesis documentation and move forward with their Master’s Thesis Defense which is the last piece to the program. This course is for BA/MS student only and students should only register for this course in their last semester in the program. Signature required.
Instructor(s): J. Baraban.

AS.080.810. **Readings/Systems Neuro I.**
This is a graduate-level seminar series on current literature in systems neuroscience. It also serves as a discussion group/journal club for students and faculty at the Krieger Mind/Brain Institute, and is open to the wider systems/cognitive neuroscience community at Homewood and other Hopkins campuses. Each week, a student or faculty member will present a recent article selected in consultation with the course directors. The selected readings will focus on the neural mechanisms of perception, attention, motor behavior, learning and memory. Pass/Fail only. Permission required for undergraduate students.
Instructor(s): E. Niebur; V. Stuphorn.

AS.080.850. **Mentored Research: Neuroscience I.**
For students in the BA/MS Program first semester. Permission required.
Instructor(s): J. Baraban.

AS.080.851. **Mentored Research: Neuroscience.**

AS.080.852. **Mentored Research: Neuroscience II.**
Permission Required. For students in the BA/MS Program.
Instructor(s): J. Baraban.

AS.080.854. **Mentored Research: Neuroscience III.**
For students in the BA/MS Program Permission required.
Instructor(s): J. Baraban.

AS.200.351. **Neuroscience of Economic Decisions.**
Economic theories often assume that people make rational choices. However, the current understanding of decision-making in neuroscience and psychology demonstrates that this is often not the case. We will first establish how decisions are studied, both behaviorally and in the brain. As a class, we will then bridge the gap between neuropsychological rationality and rationality in economic choice to account for real-world events, from which restaurant to dine at to the mortgage crisis. Sophomore Classification.
Instructor(s): J. Mayse
Area: Natural Sciences, Social and Behavioral Sciences.

**Cross Listed Courses**

**Biology**

AS.020.317. **Signaling in Development and Disease.**
An advanced undergraduate level seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease. Recommended Course Background: AS.020.305, AS.020.306, and AS.080.306
Instructor(s): R. Kuruvilla
Area: Natural Sciences.

AS.020.370. **Emerging Strategies and Applications in Biomedical Research.**
Up-to-date primary literature manuscripts related to new discoveries and new strategies that are allowing scientists to make amazing progress in biomedical research will be presented. Examples include: labeling neurons with up to 90 different colors to trace their circuitry, evolution studies in glowing bacteria, detecting several viruses on a single chip and using fiber optics and channel rhodopsin to induce sleep. Students should be interested in reading primary literature research papers and discussing them in class. Recommended Course Background: AS.020.305 or AS.020.306 or AS.080.305 or AS.080.306.
Juniors and Seniors only.
Instructor(s): S. Hattar
Area: Natural Sciences.

AS.020.371. **Emerging Strategies in Understanding Innate Behaviors.**
The hypothalamus is the central regulator of a broad range of homeostatic behaviors essential to survival, and plays a key role in controlling emotional and appetitive behaviors. This course offers an overview of both historical and recent work on this vital brain region. Topics covered will include the evolution and development of the hypothalamus, control of circadian rhythms and sleep, regulation of hunger and body temperature, as well as hypothalamic regulation of sexual, defensive, and affiliative behavior.
**Prerequisites:** AS.020.305 OR AS.020.306 OR AS.080.301 OR AS.080.302
Instructor(s): S. Blackshaw; S. Hattar
Area: Natural Sciences.
Cognitive Science

AS.050.102. Language and Mind. 3 Credits.
Introductory course dealing with theory, methods, and current research topics in the study of language as a component of the mind. What it is to “know” a language: components of linguistic knowledge (phonetics, phonology, morphology, syntax, semantics) and the course of language acquisition. How linguistic knowledge is put to use: language and the brain and linguistic processing in various domains. This course is restricted to freshmen and sophomores. Juniors and seniors must seek instructor approval to enroll. Cross-listed with Neuroscience and Psychology.
Instructor(s): A. Omaki
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.105. Intro to Cognitive Neuropsychology. 3 Credits.
When the brain is damaged or fails to develop normally, the most basic cognitive abilities (such as the ability to understand words, or perceive objects) may be disrupted, often in remarkable ways. This course explores a wide range of cognitive deficits, focusing on what these deficits tell us about how the normal brain works. Topics include brain anatomy and causes of brain damage, reading and spelling deficits, unilateral spatial neglect, hemispheric disconnection, cortical plasticity, and visual perception of location and orientation. Students read primary sources: journal articles that report deficits and discuss their implications. Cross-listed with Neuroscience.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.311. The Literate Mind and Brain.
This course surveys both the historical development of written language as well as current cognitive theories that account for the manner in which the written language is represented and processed by “readers/writers” of a language. Issues regarding the relationship between the written and spoken language, the acquisition of written language skills, as well as developmental and acquired disorders of reading and writing will be examined.
Prerequisites: AS.050.101 or AS.050.102 or AS.050.105 or Instructor’s Permission
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences.

This course is an advanced seminar and research practicum course. It will provide the opportunity to learn about fmri methods used in the field of vision science and for students to have hands-on experience to develop, design and analyze a research study on topics in the cognitive neuroscience field of high-level vision. In the first part of the course students will read recent fMRI journal papers and learn about common fMRI designs and analysis methods; in the second part of the course students will conduct a research study as a group to address a research question developed from readings. Students are expected to write a paper in a journal article format at the end of the course and to present their results in front of the class. Research topics will vary but with special focus on topics in object, scene and space recognition. Cross-listed with Neuroscience and Psychology. instructor’s permission required.
Prerequisites: AS.050.240(C) OR AS.050.319(C) OR AS.050.105(C) OR AS.200.312(C) OR AS.200.110(C) OR AS.050.203(C) OR AS.080.203(C)
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

When we think about our ability to see, we tend to think about our eyes, but in fact vision happens mostly in the brain. This course explores the remarkable perceptual deficits that occur when the visual regions of the brain are damaged or fail to develop normally, focusing on what these perceptual malfunctions tell us about normal visual perception. Topics include visual system anatomy and physiology; functional specialization in the lower visual system as revealed by cerebral achromatopsia (color blindness resulting from brain damage) and akinetopsia (impaired motion perception); cortical plasticity in the visual system; spatial deficits in perception and action; and the implications of high-level visual deficits, including prosopagnosia (impaired face recognition), Charles Bonnet syndrome (complex visual hallucinations in blind areas of the visual field), blindsight (accurate responding to visual stimuli despite apparent inability to see them), and Anton’s syndrome (denial of blindness).
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology. Co-listed with AS.050.626.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.332. Developmental Cognitive Neuroscience. 3 Credits.
Prerequisites: AS.050.101 (Cognition) or AS.050.339/639 (Intro to Cog. Development) or AS.200.132 (Introductory Developmental Psychology) or instructors permission required. In-depth examination of the current literature on cognitive development in the context of development cognitive neuroscience. Same as 050.632.
Prerequisites: AS.050.101 OR AS.050.339 OR AS.200.132 OR AS.050.105 OR Instructor’s Permission.
Instructor(s): B. Landau
Area: Natural Sciences, Social and Behavioral Sciences.

This is a survey course in developmental psychology, designed for individuals with some basic background in psychology or cognitive science, but little or none in development. The course is strongly theoretically oriented, with emphasis on issues of nature, nurture, and development. We will consider theoretical issues in developmental psychology as well as relevant empirical evidence. The principle focus will be early development, i.e., from conception through middle childhood. The course is organized topically, covering biological and prenatal development, perceptual and cognitive development, the nature and development of intelligence, and language learning. Also listed as AS.050.639. Cross-listed with Neuroscience. Instructor’s approval required.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.
Instructor’s permission required. (Also offered as AS.050.312.)
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. (Same as AS.050.326) Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology.
Instructor(s): P. Smolensky.

Also offered as AS.050.339. Instructor approval required.
Instructor(s): J. Yarmolinskaya.

Psychological Brain Sciences

Formerly listed as Introduction to Physiopsychology. A survey of neuropsychology relating the organization of behavior to the integrative action of the nervous system. Cross-listed with Behavioral Biology and Neuroscience.
Instructor(s): L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

This course will survey the neural mechanisms of decision-making. Current experimental research and theory concerning selection, control, and evaluation of actions are examined in humans and animals. Topics will range from simple perceptual judgements to complex social behavior. The course involves a weekly lecture about a specific topic followed by a student presentation of a current research paper. Cross-listed with Neuroscience.
Prerequisites: AS.080.305 OR AS.080.205 OR AS.200.141
Instructor(s): V. Stuphorn
Area: Natural Sciences.

AS.200.308. Neurobiology of Learning and Memory.
This course is an advanced survey of the scientific study of learning and memory. An interdisciplinary approach is used to integrate the state of the field across levels from the cellular-molecular basis of synaptic plasticity to functional circuitry implicated in learning to memory systems in the brain. The course is designed to provide a deep understanding of the outstanding issues and current debates in learning and memory research with a specific emphasis on animal models. This is an interactive lecture/seminar course with active student participation. Recommended Course Background: AS.200.370 or AS.200.141 or AS.080.305/AS.080.306 or AS.020.306.
Instructor(s): M. Yassa
Area: Natural Sciences, Social and Behavioral Sciences.

An examination of the effects of hormones on behavior in non-human and human animals. Topics will include the effects of hormones on sexual differentiation, reproductive behavior, parental behavior, homeostasis and biological rhythms, regulation of body weight, learning and memory. Cross-listed with Behavioral Biology and Neuroscience.
Prerequisites: Prereqs: ( AS.200.141 OR AS.080.305 ) OR (AS.020.151 AND AS.020.152) OR ( AS.020.305 AND AS.020.306 ) or instructor’s permission
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.368. Sleep, Dreams, and Altered States of Consciousness.
Sleep, dreaming, resting and arousal to waking represent very different states of consciousness which differ dramatically both psychologically and physiologically. This course focuses on cognitive, psychological, physiological, biological and genetic aspects characterizing each of these states with some reference to other altered states. The course includes a focus on the major pathologies affecting sleep-wake states. Clinical cases will be considered. These inform about both psychological and biological aspects of these states. The relative biological functions of each state will be evaluated with particular attention to the mystery of why we have and apparently need REM and NREM sleep. Actual physiological recordings of sleep states will be reviewed and the student will learn how these are obtained and how to evaluate these. The circadian rhythms, ontogeny and evolution of these sleep-wake states will also be covered. This will include a review of information learned from non-human animal sleep. The change from sleep to full awakening reflects change toward increasing brain organization supporting consciousness. Understanding of the neurobiology of these states will be used to explore some of the more modern and scientific concepts of human self-awareness or consciousness.
Prerequisites: AS.080.203 OR AS.050.203 OR AS.200.101 or permission required.
Instructor(s): R. Allen
Area: Natural Sciences, Social and Behavioral Sciences.

This course examines the general organizing principles of the anatomy of the human central nervous system and how this anatomical organization relates to function, from the level of neural circuits, to systems, to behavior. Students will learn to identify neuroanatomical structures and pathways in dissections and MRI images through computerized exercises. Readings and lectures will emphasize general structure-function relationships and an understanding of the functional roles of particular structures in sensory, motor, and cognitive systems.
Prerequisites: AS.080.250 OR AS.080.305
Instructor(s): S. Courtney-Faruque
Area: Natural Sciences, Social and Behavioral Sciences.
AS.200.376. Psychopharmacology.
Designed to provide information about how drugs affect the brain and behavior. The course focuses on biological concepts underlying structures and functions of the brain that relate to mental disorders. An introduction to neurobiology and brain function is presented as it applies to the interaction of various classes of drugs with the individual neurotransmitter systems in the brain. A brief historic review is followed by a discussion of clinical relevance. Cross-listed with Behavioral Biology and Neuroscience.

Prerequisites: AS.200.141 OR (AS.020.312 AND AS.020.306) OR (AS.080.305 AND AS.080.306) or permission required.
Instructor(s): H. Adwanikar; L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.801. Research Seminar: Learning and Memory.
This laboratory meeting is for graduate students studying learning and memory mechanisms, alterations with age or neurologic disease, and advanced neuroimaging methods. Meetings will focus on experimental design, presentation of data, analytical techniques. Undergraduates allowed to add the course with permission as Satisfactory/Unsatisfactory only. Recommended Course Background: AS.200.370 or AS.200.141 or AS.080.305/AS.080.306 or AS.020.306.
Instructor(s): M. Yassa.

Biomedical Engineering
EN.580.694. Statistical Connectomics.
This course will cover the basics of an exciting emerging field of statistical connectomics (aka, brain-graphs). It is so new, that we are going to make some of it up in this class! The first week will be introductory lectures that I give. The rest of the semester will be run like a seminar; each week will focus on a different topic. On Tuesdays we will hear about a statistical method that operates on graphs, and on Thursdays we will read about some neuroscience data upon which one could apply these techniques. The final project will consist of implementing a statistical method devised for graphs on a brain-graph problem. Recommended background: coursework in probability, linear algebra, and numerical programming (eg, R, Python, Matlab).
Instructor(s): J. Vogelstein
Area: Engineering.

Philosophy

The Department of Philosophy offers programs and courses at the undergraduate and graduate levels. The courses cover major periods in the history of Western philosophy and many of the main topics of systematic investigation: epistemology, metaphysics, ethics, aesthetics, philosophy of language, mathematical logic, and philosophy of science.

The undergraduate courses are designed to introduce students to the history of philosophy and its place in Western civilization, to teach them how to read philosophical texts, and to help them think about philosophical problems, including those that arise in other disciplines. Students may major in philosophy or use it as a concentration for an area major in Humanistic Studies. They may also study philosophy along with another subject, either by constructing a double major or by taking courses designed to help them develop philosophical perspectives on their own fields of interest.

The graduate program is intended primarily for those planning to teach philosophy and make their own contributions to it. While the acquisition of a broad background in the history and different systematic fields of philosophy is required, students will have ample opportunity to develop their own special interests.

The Department of Philosophy encourages its students to take advantage of the rich resources of other departments at Johns Hopkins University. As a look at their offerings will show, numerous philosophically important courses are offered by such departments as Political Science (political philosophy), History of Science and Technology (philosophy of science), the Humanities Center (hermeneutic, interpretive, and literary theory), and Cognitive Science.

Philosophy is a discipline of the mind as well as a cluster of closely related subjects. It is an excellent preparation for professional studies such as law and medicine; it provides perspective on other disciplines such as psychology, mathematics, literature, political science, and physics; and it centers on a set of questions that thinking people cannot avoid. At Hopkins it can be studied in a variety of ways.

A number of our courses are designed to provide broad introductions to the subject. Both AS.150.111 Philosphic Classics and AS.150.112 Philosophical Problems cover a wide range of topics, the former through the study of some of the major texts of Western thought, the latter by more systematic examination of representative issues. Either one will show a student a variety of approaches to philosophical problems. The courses AS.150.201 and AS.150.205 offer historically oriented introductions to the subject, giving the student a basic grasp of the development of philosophy in two of its major periods. Other courses, such as AS.150.118 Introduction to Formal Logic, and AS.150.220 Introduction to Moral Philosophy, are designed for students with an interest in the particular areas they cover. All of these courses are readily available without prior study of philosophy.

The 400-level courses are open to graduate students as well as to undergraduates. Some require no previous course work in philosophy. Others presuppose some familiarity with philosophy, such as would be provided by one of the introductory courses. Still others require more specific preparation. A student with questions about whether he/she has the background for a particular 400-level course should consult either the instructor or the departmental undergraduate advisor.

A student who wants to study an area of philosophy not provided for in the regular curriculum or to undertake a special project of writing and research should consult with a faculty member about taking AS.150.511 Directed Study-AS.150.512 Directed Study. An undergraduate who has the proper background may enroll in a graduate seminar if the instructor approves.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor’s Degree (p. 20).)

Philosophy majors must take 11 departmental courses.

Majors must take at least one course in each of the five following categories:

- Two History of Philosophy:
  - Ancient philosophy
  - Modern philosophy
- Three Focal Areas:
• Logic, philosophy of science, or philosophy of mathematics
• Philosophy of mind, theory of knowledge, philosophy of language, or metaphysics
• Ethics, aesthetics, or political philosophy

The history of philosophy categories are commonly satisfied by taking AS.150.201 Introduction to Greek Philosophy and AS.150.205 Introduction to the History of Modern Philosophy. In addition, majors are required to take an "undergraduate seminar", preferably in the junior year. The other remaining courses required to reach 11 courses total may be distributed based on a student’s interest, but at least 6 must be at the 300-level or higher.

Additional Rules for the Major
• Of the two general introductory courses, AS.150.111 Philosophic Classics and AS.150.112 Philosophical Problems, only one may count toward the major (neither is required), and only two 100-level courses may count toward the major.
• A minimum of six courses must be at the 300-level or higher.
• Courses may not be taken satisfactory/unsatisfactory and students must receive a C- or better grade for the course to apply towards the major.
• Well-qualified majors may be admitted to a graduate seminar during the senior year. They should consult their major advisor.

Major Requirements
One course in ancient philosophy 3
One course in modern philosophy 3
One course in logic, philosophy of science, or philosophy of mathematics 3
One course in philosophy of mind, theory of knowledge, philosophy of language, or metaphysics 3
One course in ethics, aesthetics, or political philosophy 3
One undergraduate seminar (300-level; ideally in junior year) 3
Five additional courses 15
Total Credits 33

Examples of Courses in Each Required Area

Ancient Philosophy
AS.150.201 Introduction to Greek Philosophy 3
AS.150.401 Greek Philosophy: Plato and His Predecessors 3
AS.150.402 Aristotle 3
AS.150.403 Hellenistic Philosophy 3

Modern Philosophy
AS.150.205 Introduction to the History of Modern Philosophy 3
AS.150.412 Kant’s Critique of Practical Reason 3
AS.150.417 Kant’s ‘Critique Of Pure Reason’ 3

Logic, Philosophy of Science, or Philosophy of Mathematics
AS.150.419 Kant’s Critique/Judgment 3
AS.150.118 Introduction to Formal Logic 3
AS.150.420 Mathematical Logic I 3
AS.150.421 Mathematical Logic II 3
AS.150.422 Axiomatic Set Theory 3
AS.150.424 Foundations of Probability & Induction 3
AS.150.429 Topics in Logic: Ontology and Knowledge Representation 3

AS.150.433 Philos/Space & Time 3
AS.150.434 History and Philosophy of Quantum Physics I 3
AS.150.435 The Philosophy and Theology of Maimonides 3

Philosophy of Mind, Theory of Knowledge, Philosophy of Language, or Metaphysics
AS.150.245 Introduction to Philosophy of Mind 3
AS.150.459 Theory Of Knowledge 3
AS.150.476 Philosophy and Cognitive Science 3

Ethics, Aesthetics, or Political Philosophy
AS.150.219 Introduction to Bioethics 3
AS.150.220 Introduction to Moral Philosophy 3
AS.150.452 Freedom of Will & Moral Responsibility 3
AS.150.454 The Value of Humanity 3
AS.150.455 Ethics And Animals 3

Double Majors
The department encourages linking the study of philosophy with the study of other disciplines. For example, the subject matter and course requirements of the Philosophy and Psychological and Brain Sciences departments are such as to make a double major both practical and intriguing. Similarly, knowledge of literature or the history of art is pertinent to the study of aesthetics; a solid understanding of science is valuable for those interested in the philosophy of science; and students of ethics benefit considerably by combining their work with study of political theory and of the political realities amidst which morality must function. Members of the department will be happy to assist students in planning double majors particularly suited to their interests.

Honors Program in Philosophy
Students with an overall GPA of 3.0 and a Philosophy GPA of 3.5 or higher (or outstanding recommendations from three department members) are eligible for the Senior Honors Thesis Program. In addition to the 11 courses required for the major, successful applicants take AS.150.551 Honors Project, to write a thesis of about 50 pages under the supervision of a faculty member. The thesis must be completed prior to spring vacation of senior year. If the student withdraws prior to completion of a thesis, a satisfactory/unsatisfactory grade will be awarded.

The grade for the thesis will depend on the thesis itself and an oral examination about it, conducted by the thesis advisor and two other faculty members. Graduation Honors will be awarded to those whose work receives an A- or better. For more information about the Honors Program, consult the departmental major advisor.

Honors Thesis Program
AS.150.551 Honors Project 3

Minor in Philosophy
Philosophy minors must take seven departmental courses, which should include the following:
• At least one course in the history of philosophy, either ancient or modern.
• At least one course in two of the following areas:
• Logic, philosophy of science, or philosophy of mathematics
• Ethics, aesthetics, or political philosophy
• Philosophy of mind, theory of knowledge, philosophy of language, or metaphysics

Minor Restrictions
• Either AS.150.111 Philosophic Classics or AS.150.112 Philosophical Problems, but not both, may count as one of the seven courses. Neither is a required course.
• Courses may not be taken satisfactory/unsatisfactory and students must receive a C- or better grade for the course to apply towards the major.

Minor Requirements
One course in history of philosophy (ancient or modern) 3
Two courses, each from a different focal area 6
Four additional courses 12
Total Credits 21

The Bioethics Program offers an interdisciplinary minor in which philosophy plays a large role. See Bioethics Program (p. 117) for more details.

When The Johns Hopkins University was founded in 1876, it was the first university in the United States designed as a center for research and doctoral education. Among its earliest graduate students were Josiah Royce and John Dewey; C. S. Peirce was an early faculty member. The department today continues this tradition, devoting a major part of its effort to preparing graduate students to make original contributions to the field and to pursue careers in college and university teaching.

The department’s purpose is to provide opportunities for students to develop special interests within a program that also ensures breadth of knowledge. We offer classes, seminars, and directed study in the history of ancient, modern, and contemporary Western philosophy, and in the systematic areas of epistemology, metaphysics, ethics, philosophy of science, philosophy of physics, philosophy of biology, philosophy of language, philosophy of mind, philosophy of mathematics, mathematical logic, and aesthetics. Philosophy courses are frequently offered in other departments, such as Political Science, German and Romance Languages and Literatures, and Classics, and students are encouraged to take advantage of these opportunities.

The department offers the M.A. and the Ph.D. degrees. The graduate program is designed primarily for those seeking the Ph.D., but under exceptional circumstances students aiming at the M.A. may be admitted.

For full details on the requirements for the Ph.D. program, see the department website at philosophy.jhu.edu.

Program in the History and Philosophy of Science

Graduate students with an interest in the history and philosophy of science receive their Ph.D. from either the Department of Philosophy or the Department of the History of Science and Technology, in accordance with each department’s requirements. Students in both departments, however, may apply to enroll in a special program of studies in history and philosophy of science coordinated by the Johns Hopkins Center for the History and Philosophy of Science. Students who fulfill the requirements will be certified by the center as having completed this special program. Further information can be obtained by writing to Professor Peter Achinstein, of the Department of Philosophy.

Program in Political and Moral Thought

Currently inactive except for year-long colloquia series.

Admission

In addition to submitting an application, applicants are asked to submit a sample of written work. While an undergraduate major in philosophy is good preparation for graduate study in the department, applications are welcomed from students with other majors whose interests are now turning toward philosophy.

The deadline for those applying both for admission and financial aid is January 15. Awards will be announced by April 1. Inquiries should be addressed to Admissions Chair, Department of Philosophy, The Johns Hopkins University, Baltimore, Maryland, 21218. Graduate applications can also be downloaded from the admissions office website.

Financial Aid

All students admitted to the program receive financial assistance. Support is guaranteed for five years provided that a student continues to make satisfactory progress toward completion of the Ph.D. degree. Department fellowships cover tuition and pay a stipend. Outstanding applicants may be nominated for a George Owen Fellowship, which also covers tuition and for which the stipend is higher. All students receive fellowship support for the first two years; no teaching is required. Third- and fourth-year students are supported by teaching assistantships, which carry full tuition and a stipend. Fifth-year students are generally supported through teaching assistantships, though fellowship support may also be available. In practice, the department is often able to offer teaching assistantships to students beyond their fifth year, though this support is not guaranteed. In addition, a generous bequest by a former member of the department, David Sachs, has established the Sachs Fellowship Fund. Sachs Fellowships are dissertation-year fellowships awarded on a competitive basis to outstanding students who are making substantial progress toward completing their dissertations.

Leon Gilbert Barnhart Memorial Fellowship

A fellowship in memory of Leon Gilbert Barnhart, B.A. ’67, currently set at $3,000, may be awarded annually to support a student working on a dissertation on one of the topics which most interested Leon Barnhart himself: German philosophy, up to and including current German philosophy, and the history of philosophy more generally.

William Miller Essay Prize

The William Miller Essay Prize is awarded annually for a self-contained essay of outstanding quality in any field of philosophy. The monetary award is open to students in philosophy at the pre-dissertation stage of their graduate work. Submissions should be no longer than 10,000 words. Students may submit only one essay per year. Details are available from the Philosophy Department office.

For current faculty and contact information go to http://philosophy.jhu.edu/people/
Faculty
Chair
Richard Bett
Professor (Chair): ancient Greek philosophy, ethics.

Professors
Peter Achinstein
philosophy of science, analytic philosophy.

Eckart Förster
metaphysics, history of philosophy, Kant and German idealism.

Robert Rynasiewicz
logic, philosophy of science, history and philosophy of physics.

Meredith Williams
philosophy of mind, philosophy of psychology, Wittgenstein.

Michael Williams
Krieger-Eisenhower Professor: theory of knowledge, philosophy of language, history of modern philosophy, epistemology.

Associate Professors
Hilary Bok
Henry R. Luce Professor in Bioethics and Moral and Political Theory: moral philosophy, bioethics, freedom of the will Kant.

Steven Gross
philosophy of language, philosophy of mind, metaphysics.

Yitzhak Melamed
Early Modern Philosophy, German idealism, metaphysics.

Dean Moyar
German idealism, social and political philosophy, ethics.

Assistant Professors
Justin Bledin
logic, epistemology, philosophy of language.

L. Nandi Theunissen
Peterson Assistant Professor in: ethics.

Emeriti
Stephen Barker
Jerome B. Schneewind

Joint/Adjunct Appointments
Jeffrey Bub
Professor (Philosophy, University of Maryland, College Park): philosophy of quantum mechanics.

Paola Marrati
Professor (Humanities Center): contemporary French thought.

Maria Merritt
Assistant Professor (Bloomberg School of Public Health): bioethics.

Lawrence Principe
Professor (History of Science and Technology): history and philosophy of science.

Andrew Siegel
Core Faculty (Berman Institute of Bioethics).

Hent de Vries
Professor (Humanities Center): modern European thought.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.150.102. What Is Art For? Topics in Aesthetics.
In this course we will consider a range of views about the purpose and functions of art held by different philosophers from antiquity to the early 20th century. We will start from Plato’s criticism of art in the Republic. Against this foil we will discuss the views on the point of art of Aristotle, Lessing, Kant, the early German Romantics and Viktor Shklovsky. In addition, during the course we will read a few literary works by Sophocles, Shakespeare and Tolstoy.
Instructor(s): A. Kabeshkin
Area: Humanities.

AS.150.103. Philosophy of Oppression and Resistance.
In general, human beings would rather not be oppressors, and would rather not live in oppressive social orders. Yet this does not prevent social structures from being oppressive in both explicit and covert forms, even in societies highly committed to just democratic ideals. The course will analyze what it means for an individual, practice, or institution to be oppressive, and will review concrete mechanisms which underlie racialized/gendered forms of oppression such as hate speech, pornography, propaganda, ideology, and material inequality. Finally, we will discuss how social agents can resist explicit and covert oppression in a way that is conducive to the realization of just ideals.
Instructor(s): P. O’Donnell
Area: Humanities.

AS.150.108. Introduction to Philosophy of Biology.
This course will introduce students to a range of questions debated in contemporary philosophy of biology. The course will have a character of a rather broad overview of the field with a particular attention to debates around the “received” and the gene-centric views of evolution on the one hand, and the problem of reductionism/antireductionism in biology on the other hand. Problems such as the analysis of the concept of adaptation, the status of biological species, and others will also be discussed.
Instructor(s): A. Kabeshkin
Area: Humanities.

AS.150.110. Delusions.
What is a delusion? Are delusions just irrational beliefs? Can delusions be true? Are some religious and political beliefs delusions? If so, which ones? Are overly optimistic people simply deluded? In this course we will attempt to answer some of these questions by reading and discussing contemporary work from philosophy, psychology, and the neurosciences. Part of the goal will be to get a clearer understanding of the relationship between false beliefs, irrational beliefs, and delusions.
Instructor(s): B. Miller
Area: Humanities.
AS.150.111. Philosophic Classics.
The course introduces students to philosophy by critically examining selected texts in the Western philosophical tradition. Philosophers whose ideas will be examined include Plato, Descartes, Kant and Nietzsche.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.112. Philosophical Problems.
An introduction to philosophy through several central problems. Topics vary from year to year, but might include such topics as the nature and limits of human knowledge, free will, consciousness, death, or paradoxes of truth and reasoning.
Instructor(s): S. Gross
Area: Humanities.

This course examines the notion of objectivity and challenges to it. Its topics include the status of objective facts and beliefs, the structure of social reality, and rational disagreement. Dean’s Prize Freshman Seminar
Instructor(s): N. Goldberg
Area: Humanities.

From domestic debates about abortion and health care to international dialogue about women’s rights, genital mutilation and genocide, human rights claims have become increasingly common, and we’ve come to rely on the discourse of human rights to assess the way human beings are treated by one another and by states. But what are human rights? How are human rights claims justified? Are human rights really objective and universal or are they contingent and relative to particular cultures? Where did the human rights culture begin, and how has it become so important? This course aims to explore these questions by examining foundational human rights documents, historical works on human rights and contemporary philosophical inquiry into their foundations (or lack thereof).
Area: Humanities.

AS.150.118. Introduction to Formal Logic.
An introduction to symbolic logic and probability. In the first two parts of the course we study formal ways of determining whether a conclusion of an argument follows from its premises. Included are truth-functional logic and predicate logic. In the third part we study the basic rules of probability, and learn how to make probability calculations and decisions in life.
Co-listed with AS.150.632 (for graduate students) (01-F 11:00-11:50am).
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.119. Existentialism.
Existentialism is a philosophical movement that made a dramatic entry into the 20th century intellectual scene and had a profound and long lasting influence on it. The central themes developed by existentialist thinkers transgressed the boundaries of academic philosophy and found their expression in plays, novels, cinema, poetry, political tracts, etc. Through close reading of the seminal texts by Kierkegaard, Nietzsche, Heidegger, Sartre, and Merleau-Ponty, we will explore the core tenets of the existentialist legacy. The philosophical texts will be supplemented by related works of fiction and films. Freshmen Only.
Instructor(s): G. Lebanidze
Area: Humanities.

AS.150.120. The Philosophy of Emotions.
Are emotions always irrational or can they also make us do the right thing? Can thoughts influence emotions? Can emotions influence our moral evaluations? In this course we will investigate a number of important philosophical questions about the nature of emotions by surveying some of the classic works in philosophy (e.g. Aristotle, Descartes and Hume). We will also read a number of contemporary papers, including works by J. Prinz and M. Nussbaum. Finally, we will look at recent work in psychology and cognitive neuroscience on the impact of emotion on reason (J. Green, A. Damasio).
Instructor(s): M. Bergamaschi Ganapini
Area: Humanities.

AS.150.124. Myths of Quantum Physics.
What is the fate of Schrodinger’s cat? How does EPR paradox lead to quantum teleportation? Who is Wigner’s friend? Does wave-particle duality imply that we have free will? In this course, we will explore the philosophical problems about quantum physics and attempt to dispel the myths generated by the quantum world. No prior understanding of physics or philosophy is required.
Instructor(s): G. Guralp
Area: Humanities, Natural Sciences.

AS.150.125. Introduction to Modern Philosophy.
The course will examine four major figures of early modern philosophy: Descartes, Leibniz, Hume, and Kant. Although the most recent of these thinkers died more than 200 years ago, we still refer to them as “modern” philosophers, revealing their great influence on the way we think about ourselves and our place in the world. The course will look at what these philosophers thought about questions such as: What kind of beings are we and how are we related to the world around us? Is knowledge of the world possible and if so what are its sources? Can we answer the question of God’s existence? Is order something we find in the world or impose on it? etc.
Instructor(s): G. Lebanidze
Area: Humanities.

AS.150.126. Relativism.
More than any other modern philosophical doctrine, relativism has found currency outside of the academy. Talk of “equally valid” points of view has become a commonplace, even when the matter under discussion is a straightforwardly factual. We will examine many different relativistic doctrines, including the views that people coming from very different backgrounds or with very different beliefs do not have the grounds to criticize one another, and that such individuals cannot so much as understand one another. In the first two-thirds of the course we will evaluate arguments for and against views such as these. Towards the end of the semester we will explore what the fall-out for our everyday lives would be (or should be) if some kind of relativism were true. Freshmen only.
Instructor(s): N. Tebben
Area: Humanities.

AS.150.127. Realism and Antirealism in the Philosophy of Science.
Are our best scientific theories approximately true, or useful but false? Does science converge on the truth over time? This course addresses such questions by surveying the scientific realism debate. Dean’s Prize Teaching Fellowship course. Freshmen Only.
Instructor(s): J. Hricko
Area: Humanities.
Cognitive Science & Political Philosophy: Is a person born a republican, or are they raised that way? Are democrats Democrats because they have emotional personalities? Is politics the product of evolution, or of culture? Should the brain sciences determine public policy and law? In this course we will consider these questions and many more like them by looking at recent work in philosophy and the brain sciences.
Instructor(s): J. Waterman
Area: Humanities.

AS.150.129. The Theory of Knowledge: Classic and Contemporary Questions.
What is knowledge and how to define it? Does knowing require an ability to produce supporting reasons or is it sufficient that our beliefs track the truth? Which general model better its structure, Foundationalism, Coherentism or Infinitism? Does knowing depend on context? Can we discover empirically what knowledge is? These are key questions we will be discussing in our seminar, inspired by reading texts ranging from classics like Plato, the Stoics, and Sextus Empiricus, to contemporary authors like Gettier, Davidson, Goldman, DeRose, and others. Dean’s Prize Freshman Seminar.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.131. Introduction to Social Philosophy.
An introduction to social philosophy through critical reading of selected texts of two major figures: Adam Smith and Karl Marx. These two thinkers offered opposing theories of capitalism, which continue to shape our basic understanding of the world. We will address the method and foundations of their theories, as well as the normative concepts that inform their thought (e.g. freedom, human flourishing, alienation, exploitation, etc.).
Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.133. Do We Know What We Think We Know?.
This is an introductory course into Theory of Knowledge. The following questions will be discussed: What is knowledge? What is philosophical skepticism? Can Theory of Knowledge answer the skeptical challenge? Which general model of knowledge is better, Foundationalism, Coherentism or Infinitism? Is what constitutes knowledge something internal or external to the subject? We will mostly read texts written by contemporary philosophers.
Instructor(s): P. Stojanovic
Area: Humanities.

A study of Socrates as portrayed by his contemporaries, and of intellectual and political trends to which he may have reacting. Authors will include Plato, Xenophon and Aristophanes. Freshmen Only.
Instructor(s): R. Bett
Area: Humanities.

AS.150.180. Plato on Knowledge.
What is knowledge? What is the difference between true belief and knowledge? In this course, we will explore Plato’s analysis of these questions. Our primary focus will be his dialogues "Meno", "Theaetetus", and "The Republic".
Instructor(s): P. Stojanovic
Area: Humanities.
AS.150.200. What is Happiness?
The question of human happiness dates back to Ancient times. What is the best life a human can lead? Is it a life of pleasure, or does it include other features? Does a good life vary among people and cultures, or is it universal? Do we select the things that make our life go well, so that it allows for self-creation and personal expression of one’s values?
Possible readings include selections from Plato, Aristotle, Epicurus, Nozick, Nussbaum, and Scanlon, among others.
Instructor(s): K. Powell
Area: Humanities.

AS.150.201. Introduction to Greek Philosophy.
A survey of the earlier phase of Greek philosophy. Socrates, Plato, and Aristotle will be discussed, as well as two groups of thinkers who preceded them, usually known as the pre-Socratics and the Sophists.
Instructor(s): R. Bett
Area: Humanities.

This course explores philosophical issues that are of central importance to medicine. Topics to be covered include: history of medicine, relationship between medicine and science, distinction between health and disease. Dean’s Prize Teaching Fellowship.
Instructor(s): B. Miller
Area: Humanities.

AS.150.203. Contemporary Metaphysics.
This course will provide students with a survey of major topics in contemporary metaphysics, including such issues as the identity of objects through change and the metaphysical status of persons. Dean’s Teaching Fellowship course.
Instructor(s): J. Brandau
Area: Humanities.

AS.150.204. Nietzsche and Contemporary Meta-Ethics.
Since the Scientific Revolution, philosophers have struggled to articulate a conception of moral value and agency consistent with our scientific self-understanding. Developing such a conception is a central task of meta-ethics. Friedrich Nietzsche (1844-1900) offered one of the most provocative accounts of moral value and agency, and his work has recently been appropriated by contemporary meta-ethicists. This course offers an introduction to 1) Nietzsche’s writings on value and agency, 2) contemporary meta-ethics, and 3) recent appropriations of Nietzsche for contemporary meta-ethics. No prior coursework in philosophy is required.
Instructor(s): P. Leland
Area: Humanities.

AS.150.205. Introduction to the History of Modern Philosophy.
An overview of philosophical thought in the seventeenth and eighteenth centuries. We shall focus on fundamental questions in epistemology (knowledge, how we acquire it, its scope and limits), metaphysics (the ultimate nature of reality, the relation of mind and body, free will), and theology (the existence and nature of God, God’s relation to the world, whether knowledge of such things is possible): all questions that arose in dramatic ways as a result of the rise of modern science. The principal philosophers to be discussed are Descartes, Locke, Hume and Kant, though we shall also make the acquaintance of Spinoza, Leibniz and Berkeley.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.211. The Philosophy of Love.
In this course, we will read and discuss various philosophical accounts of the nature of love. We will consider whether there is a deep difference between the sort of love that grounds close adult friendships and the sort of love that grounds long-term romantic relationships. We will then consider some ways that love can be a reason, or justification, for certain decisions and actions.
Area: Humanities.

This course will provide a selective overview of problems in philosophy of biology. We will, first, discuss the so-called received view of evolution and will consider some challenges to that view. After that we will focus on the debates about the meaning and the role of the concept of adaptation in evolutionary theory. Finally, we will briefly discuss the relation between ecology and evolution.
Area: Humanities.

AS.150.214. Reasons, Norms, and Rationality.
Are human beings rational? Should they be rational? The right answer to these questions may seem obvious. However, in the last few decades these questions have gained a new urgency and importance. Famously, Aristotle thought that human beings are by definition rational beings. However, a large body of empirical studies now seem to show that most people consistently and systematically reason incorrectly. At the same time, one may wonder whether being rational is really helpful to survive and reach our goals in real life. That is, one may ask whether reasoning accordingly to the canon of rationality is actually a goal that we should pursue. Recent philosophical work has put new pressure on the issue of the normativity of rationality. In this course we will explore the issue of rationality and its normative implications by reading both historical works, ranging from Plato to Hume, and contemporary philosophical texts while looking at some important psychological studies on human reasoning.
Area: Humanities.

What is a responsible business practice? Do corporations have responsibility as “moral agents”? What is the relation between business and environment? In this course we will investigate the relationship between business practices and ethical thinking by analyzing and assessing philosophical arguments about the moral status of business. We will start by reading philosophical texts that offer an analysis of moral practices, decision-making procedures, and moral theories. In particular, we will read historical text by Aristotle, Hume, Adam Smith, Mill, Marx, and Keynes. Then we will see how these philosophical concepts and theories can be applied to the contemporary world of business. The main goal of this course is to critically evaluate the philosophical foundations and justifications for business and economic systems, and how these applies to specific issues as workplace discrimination, ethics of advertising, environmental destruction and consumer protection.
Area: Humanities.

AS.150.216. Minds and Machines.
The course is a philosophical introduction to the topic of artificial intelligence. We will examine such questions as whether machines can think and whether we can build robots that have emotions, personalities and a sense of self. In doing so, we will touch upon a closely connected question: is the human mind itself a machine?
Instructor(s): N. Andonovski
Area: Humanities, Natural Sciences.
AS.150.217. Neuroethics.
Can electroencephalography show that we lack free will? Can modern neuroimaging show that someone will commit a crime in the future? Is it ethical to use this promethean knowledge to put them in jail before they even commit a crime? In Neuroethics, we’ll consider these and other pressing questions emerging at the frontiers of neuroscience and modern moral theory.
Prerequisites: This course is equivalent to AS.150.472
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.219. Introduction to Bioethics.
Introduction to a wide range of moral issues arising in the biomedical fields, e.g. physician-assisted suicide, human cloning, abortion, surrogacy, and human subjects research. Cross-listed with Public Health Studies.
Instructor(s): H. Bok
Area: Humanities, Social and Behavioral Sciences.

AS.150.220. Introduction to Moral Philosophy.
An introduction to moral philosophy through in-depth and critical reading of selected texts from the history of philosophy. The philosophers whose texts will be discussed include Plato, Aristotle, Kant and Nietzsche.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.223. Formal Methods of Philosophy.
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with 150.423)
Instructor(s): J. Bledin; R. Rynasiewicz
Area: Humanities.

AS.150.227. Introduction to Asian Philosophy.
What is the nature of reality? What is the mind? What is the meaning of life? How ought we to live? In this course, we will explore how some of the better known philosophical systems of India, China and Japan have attempted to answer these most central philosophical questions. We will focus on the following systems: Nyaya, Samkhya-Yoga, Vedanta, Buddhism, Carvaka, Confucianism, Taoism, and Zen.
Instructor(s): B. Miller
Area: Humanities.

AS.150.229. Religion and/or Science?.
Are Religion and Science necessarily in conflict, can they coexist, or do they in fact require each other’s existence? Is scientific method so different from religious thinking? Can science discredit God? Is it possible to be rational and remain religious? In this course, we will explore these and other related questions and examine possible answers. In the process, we will read the texts of both classical and contemporary philosophers and scientists who tackled with these problems.
Instructor(s): P. Stojanovic
Area: Humanities.

What can contemporary neuroscience tell us about the traditional problems in the philosophy of mind? The course will focus on three such problems: consciousness (what is the nature of conscious states?), the self (what is the self and is there such a thing?) and imagination (what is imagination and how is it possible?).
Instructor(s): N. Andonovski
Area: Humanities, Social and Behavioral Sciences.

AS.150.235. Philosophy of Religion.
Can one prove or disprove the existence of God? What is the relation between reason and faith? Are science and religion at odds with one another? We will consider historically significant discussions of these questions as well as important contemporary writings.
Instructor(s): S. Gross
Area: Humanities.

In this course, we will discuss ethical controversies related to some of the issues currently debated in the public sphere: homosexuality, sexism, racism, immigration, abortion, cloning, genetic enhancement, war, terrorism, torture, and others. Our goal will be to explore how major philosophical theories in ethics approach these controversies, and how they can help us understand and resolve these controversies.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.237. Foundations of Modern Political Philosophy.
This course is an introduction to modern political philosophy through an intensive study of the classic texts. The focus will be on the nature and limits of political authority under modern social conditions. Authors included are Machiavelli, Hobbes, Locke, Rousseau and Mill.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.245. Introduction to Philosophy of Mind.
This is an introduction to the central problems of philosophy of mind: the mind-body problem and the problem of self-knowledge. Of particular interest in contemporary work is the relation of mind and brain and whether, or how, we acquire self-knowledge.
Instructor(s): M. Williams
Area: Humanities.

AS.150.248. Introduction to Metaphysics.
The class is an introduction to contemporary, analytic, metaphysics. Topics to be discussed include: what is metaphysics, the nature of existence, time and temporality, modality and possible worlds, identity and personal identity, persistence, mereology, causation, and universals and abstract entities.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.252. Kant’s Copernican Revolution.
After the publication of Kant’s Critique of Pure Reason, Philosophy would never be the same again. This monumental work revolutionizes the way we think about the relationship between the mind and the world and is still widely regarded as the most important turning point in the history of modern philosophy. The course will undertake a close reading and analysis of the two crucial sections of the Critique of Pure Reason, Transcendental Aesthetic and Transcendental Analytic and is targeted at both students new to Kant’s thought as well as those who would like to deepen their understanding of his Copernican revolution.
Instructor(s): G. Lebanidze
Area: Humanities.
AS.150.253. Introduction to Philosophy of Psychology.
Psychology is the study of mind and behavior, and philosophy of psychology is the study of the foundations of psychology. Foundational issues in psychology addressed by philosophy of psychology come in the form of the following questions. What is the nature of mental representation? What is the basic architecture of the mind, and is it innate? Can psychological theories proceed in abstraction from the environment? The purpose of this course is to introduce students to these and related questions and the various answers they've been given.
Instructor(s): D. Lindeman
Area: Social and Behavioral Sciences.

AS.150.259. Introduction to the Theory of Knowledge.
An introduction to the central problems, concepts and theories of philosophical epistemology (theory of knowledge). Topics to be explored will include: what is knowledge (and why do we want it)? Can we get it (skeptics answer “No!”), or is everything in the end a matter of opinion? (skeptics say “Yes!”)? Theories of knowledge and justification: foundationalism versus the coherence theory; externalism versus internalism in epistemology. To what extent is knowledge an appropriate object of theory? Readings from early 20th century through contemporary sources.
Instructor(s): M. Williams
Area: Humanities.

AS.150.300. Prometheus Editorial Workshop.
Prometheus is an international undergraduate philosophy journal published by students at Johns Hopkins University. The purpose of the journal is to promote philosophic discourse of the highest standard by offering students an opportunity to engage in open discussion, participate in the production and publication of an academic journal, and establish a community of aspiring philosophers. Students enrolled in this workshop will act as the staff readers for the journal. For more information, please visit www.prometheus-journal.com. Prerequisite: MUST have taken one philosophy course.
Instructor(s): K. Powell
Area: Humanities.

AS.150.301. Undergraduate Seminar: Practical Reason.
How does reasoning that results in action differ from reasoning that results in belief? Is all practical reasoning a kind of means-end (instrumental) reasoning, or is there a form of moral reasoning that is presupposed by instrumental reasoning? These questions and more will occupy us as we work our way through the recent philosophical debates about practical reason. Restricted to philosophy majors and minors only.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.304. The Ethics of Human Experimentation.
This course will explore ethical theory, key historical events, and operational requirements of research involving human beings. Weekly discussions will focus on seminal literature and case studies that highlight conceptual and practical challenges related to informed consent; research ethics review; risk/benefit analysis; justice/fairness; globalization of research; participation of vulnerable populations; clinical equipoise; obligations to research participants and communities during studies and after research is completed; and deception in psychological and behavioral research. The course will also explore the emergence and development of the rules governing the protection of human subject research.
Instructor(s): J. Ali
Area: Humanities.

This course systematically examines the human right to health. Topics will include the theoretical foundation(s) of human rights; how human rights compare and contrast to other dominant views of global justice (including Rawlsian versions, cosmopolitanism, and capabilities, among others); and whether (or under what circumstances) health can be properly called a “right”. Special scrutiny will be given to access to essential medicines as a recent example of the invocation of a right to health.
Instructor(s): M. DeCamp
Area: Humanities.

Without the presupposition that we can act freely, we cannot make sense of our talk about responsibility and blameworthiness. But scientific investigation increasingly makes the world more predictable (or, at best, random), and our most ambitious scientific theories aspire to a generality that would leave little room for freedom. This course is about how to reconcile the need to see ourselves as free, with the (at least apparent) indications that we are not.
Instructor(s): N. Tebben
Area: Humanities.

AS.150.309. Introduction to Philosophy of Physics.
This course starts on July 7th and runs until August 1st. This course aims at introducing the student to the basic philosophical issues that lie at the heart of the modern physicist’s conception of nature. To this end, we will look carefully at the foundations of two modern theories of physics, namely, the special theory of relativity and quantum theory. Relativity revolutionized our understanding of space and time, whereas quantum physics shattered our established beliefs about causality and determinism in nature. In the special relativity section of this class, we will cover topics such as the speed of light postulate, conventionality of simultaneity thesis, and the twin paradox. In the foundations of quantum physics, we will probe the measurement problem, Schrodinger’s cat paradox and the uncertainty principle. No previous background in physics is required.
Instructor(s): G. Guralp
Area: Humanities, Natural Sciences.

AS.150.310. Marx’s Critique of Capital.
This course is devoted to exposition and examination of Marx’s mature critical theory of capitalism, as expounded in the first volume of Capital. Special attention will be given to clarification of Marx’s method as well as the basic categories of his theory. No previous course in philosophy or social sciences is required.
Instructor(s): A. Abazari; E. Connolly
Area: Humanities.

AS.150.311. Undergraduate Seminar: Philosophy of Ludwig Wittgenstein.
We will read Wittgenstein’s two great works: Tractatus Logico-Philosophicus (1921) and Philosophical Investigations (1953). If you have previously taken AS.150.442 you may not register for AS.150.311. Prerequisites: If you have previously taken AS.150.442 you may not register for AS.150.311.
Instructor(s): M. Williams
Area: Humanities.
AS.150.312. Philosophy and Complexity.
This course aims to engage with philosophical problems that stem from sciences of complexity in an interdisciplinary way. We will pose questions concerning how disciplines such as biology, economics, neuroscience, astrophysics etc. deal with the problem of complexity, and we will look at the basic problems philosophers of science single out in this context. After introducing the general problematic of the course, we will have two main parts under which we examine the philosophy of complex systems. The first part will be devoted to the epistemological aspects of the problem such as models, laws, explanation and evidence, and the second part will examine the metaphysical aspects of emergence and reduction.
Instructor(s): G. Guralp
Area: Humanities.

AS.150.313. Philosophy of Race and Gender.
TBA
Instructor(s): L. Papish
Area: Humanities.

AS.150.315. Philosophy of Human Rights.
From domestic debates about abortion and health care to international dialogue about women's rights, genital mutilation and genocide human rights claims have become increasingly common, and we've come to rely on the discourse of human rights to assess the way human beings are treated by one another and by states. But what are human rights? How are human rights claims justified? Are human rights really objective and universal or are they contingent and relative to particular cultures? Where did the human rights culture begin, and how has it become so important? This course aims to explore these questions by examining foundational human rights documents, historical works on human rights and contemporary philosophical inquiry into their foundations (or lack thereof).
Instructor(s): T. Wilk
Area: Humanities.

AS.150.316. Puzzles and Paradoxes.
The course is a survey of puzzles and paradoxes of truth, belief, knowledge, meaning, confirmation, rational action, and vagueness. Specific puzzles and paradoxes include, among others: Russell’s paradox, the Liar paradox, Moore’s paradox, the Skeptical paradox, Newcomb’s paradox, and the Sorites paradox. Besides being fun to think about, these puzzles and paradoxes touch on many areas of philosophy, including philosophy of language, logic, metaphysics, and epistemology. When introducing each puzzle or paradox, attention will be paid to its history and significance. In addition to this exposure to some of the many domains of philosophy, students will gain analytical skills applicable well beyond philosophy.
Area: Humanities.

AS.150.317. Undergraduate Seminar for Philosophy Majors: Recent Works in Skepticism.
We all take it for granted that perceptual experience yields knowledge of the world around us. But in the first of his Meditations on First Philosophy, Descartes invents a new and puzzling thought experiment. He imagines an Evil Demon with the power to manipulate the total course of his (Descartes’s) experience, so that what he naturally takes to be experience of the world around him is really a kind of perpetual dream: a simulation or virtual reality, as we might way today. Descartes’s problem, which has made its way into popular culture through films like those in the “Matrix” series, remains a source of philosophical puzzlement. While no one believes that skeptical hypotheses like Demon or computer deception are true, it is not easy to say how we can exclude them. Given that the deception is systematic, it seems that any “evidence” I cite could itself be part of the simulation. So how do I (or could I) know (for sure) that I’m not the victim of the Deceiver or the Matrix? We shall examine some of the latest attempts to respond to Descartes’s challenge. Does the “How could I know?” question admit of a theoretical answer, or is the question itself somehow ill-posed? Can we answer it without making significant concessions to skepticism? Exploring such questions should teach us some interesting lessons about knowledge (or the concept of knowledge). Readings from Descartes, Barry Stroud, G. E. Moore, Robert Nozick, David Lewis, Keith De Rose, James Pryor, and others.
Instructor(s): M. Williams
Area: Humanities.

This course explores philosophical responses to the French Revolution. Texts are from, among others, Hegel, Fichte, Kant and Marx. No previous knowledge in philosophy or social sciences is required.
Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.319. The Mechanical Mind.
This course provides a philosophical introduction to the topics mind, machine, and mental representation -- ideas fundamental to the cognitive sciences. Specific questions addressed include, among others, the following. What is the mind-body problem, and how might it be solved? Might minds be computers? Can there be thought without language? Is thought itself a sort of language? How do minds represent the external world? Can the mind be fully explained in scientific terms? Does it help in theorizing about the mind to think of it as a sort of machine?.

AS.150.320. Marx: Critique of Political Economy.
A close reading of Marx’s Capital: Volume One. Specific attention will be given to clarification of Marx’s methodology, the foundational categories of his critique of political economy, the systematic unity of his theory, and the underlying normative concepts which inform his work. No previous course in philosophy or social sciences is required.
Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.322. Emotion, Mind & Morality.
In this course, we will investigate a number of important philosophical questions about the normative structure of emotions and their role in moral cognition by surveying some of the classic works in philosophy. We will also read a number of contemporary papers. Finally, we will look at recent work in psychology and cognitive neuroscience on the impact of emotion on reason.
Instructor(s): M. Bergamaschi Ganapini
Area: Humanities.
AS.150.323. Undergraduate Seminar: Topics in Meta-Ethics. 3 Credits.
This is a seminar on theoretical topics in ethics. We focus on debates over cognitivism and non-cognitivism; realism and anti-realism: reasons internalism and externalism; relativism and pluralism. We read contemporary classics by Sharon Street, T.M. Scanlon, Joseph Raz, Bernard Williams, Allan Gibbard, and others.
Instructor(s): L. Theunissen
Area: Humanities
Writing Intensive.

AS.150.334. The Language of Thought.
According to the Language of Thought Hypothesis, thought is couched in a mental language with a combinatorial syntax and semantics operating computationally over a system of representations physically realized in the brain. The philosopher and cognitive scientist Jerry Fodor first developed this hypothesis in his now classic 1975 work The Language of Thought. In this course, we will engage in a close reading of this text, important both for its historical and contemporary significance to cognitive scientific theorizing. Lectures will be supplemented by further historical and theoretical material. Students should come away with a deeper appreciation of some of the key concepts in cognitive science.
Instructor(s): D. Lindeman.

AS.150.330. Decisions, Games & Social Choice. 3 Credits.
This course is an introduction to decision theory, game theory, and social choice theory with an emphasis on their philosophical underpinnings and philosophical applications. Topics covered include the Prisoner’s Dilemma, Newcomb’s Problem, convention and social contracts, risk, and Arrow’s Theorem.
Instructor(s): J. Bledin.
Area: Humanities.

AS.150.351. The Philosophy of Race and Racism.
The twin specters of race and racism have perennially dominated nearly every aspect of American social, economic, and political life. In this course, we will try to appreciate the nature and scope of this dominance by addressing fundamental questions about the nature, functions, and manifestations of race and racism in contemporary American life. Topics include: the “metaphysics” of race, conditions of racial membership, the moral harms introduced by racism, the psychology of racial bias, and institutional forms of racism.
Area: Humanities, Social and Behavioral Sciences.

AS.150.400. Realism & Antirealism in the Philosophy of Science.
Are our best scientific theories approximately true, or useful but false? Does science converge on the truth over time? This course addresses such questions by surveying the scientific realism debate.
Instructor(s): J. Hr Hicko
Area: Humanities, Social and Behavioral Sciences.

AS.150.401. Greek Philosophy: Plato and His Predecessors.
A study of pre-Socratic philosophers, especially those to whom Plato reacted; also an examination of major dialogues of Plato with emphasis upon his principal theses and characteristic methods. Cross-listed with Classics.
Instructor(s): R. Bett
Area: Humanities.

AS.150.402. Aristotole.
A study of major selected texts of Aristotle.
Instructor(s): R. Bett
Area: Humanities.

AS.150.403. Hellenistic Philosophy.
A study of later Greek philosophy, stretching roughly from the death of Aristotle to the Roman imperial period. Epicureans, Stoics, and Skeptics will be the main philosophical schools examined.
Instructor(s): R. Bett
Area: Humanities.

AS.150.404. Ethics and History of Body Modification.
This course examines the ethical, historical and political issues surrounding body modifications. It explores the ways in which medical technologies have intersected with cultural constructions of gender, sexuality and race to produce ways of altering the human corporeal form. The course looks at a myriad of difference body modifications, concentrating mostly upon the Twentieth Century, but reaching as far back as the early modern period. Topics include: cosmetic surgery, transsexuality, bodybuilding, sports doping, dieting, anorexia, piercing, tattooing, fashion, make-up, and mythic modifications, such as vampires and werewolves. The course looks at the ways in which these modifications have been used variously to conform to, subvert and expose social norms about bodily appearance, as well as interrogating the means by which medicine and science are implicit in the cultural construction of those norms.
Instructor(s): D. O’Connor
Area: Humanities.

AS.150.405. Alienation.
In this course we will study the topic of alienation both historically and systematically. We will examine the concept’s historical roots at the turn of the 19th century and engage with contemporary discussions by authors working in philosophy of mind, ethics and political philosophy.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.406. Can Science Explain Everything?.
What is scientific explanation? We will examine various theories about this in order to determine whether and how science can explain everything physical and everything mental (including consciousness, emotions, purposes, and values). In addition to science are non-scientific theories, for example, religious ones, necessary? Do they compete with or complement scientific ones?
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.409. Classics of Analytic Philosophy.
A reading of some of the classic philosophical works in 20th Century Analytic Philosophy, beginning with G. Frege and ending with V.O. Quine.
Instructor(s): M. Williams
Area: Humanities.

AS.150.411. Arabic-Islamic Philosophy.
Introduction to major philosophers of the Arabic-Islamic tradition, including Avicenna, al-Ghazali, and Averroes. Topics addressed include the existence of God, metaphysics (e.g., causality), human freedom and knowledge, revelation and reason.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.412. Kant’s Critique of Practical Reason.
A historical and systematic study of Kant’s ethics and philosophy of religion, with special attention to his Critique of Practical Reason.
Instructor(s): E. Forster
Area: Humanities.
AS.150.414. Topics in Political Philosophy: Justice and Pluralism.  
This course will examine recent liberal political philosophy, with particular emphasis on the work of John Rawls and Jürgen Habermas.  
Instructor(s): D. Moyar  
Area: Humanities.

AS.150.415. Schelling’s System of Transcendental Idealism.  
Schelling’s System of Transcendental Idealism is one of the key texts in the transition from Kant to Hegel. It is also one of Schelling’s clearest and most successful publications, and one of the best introductions to his philosophy. This course offers a close examination of the System of Transcendental Idealism against the background of Kant and Fichte.  
Instructor(s): E. Forster  
Area: Humanities.

AS.150.416. Kant’s major "minor writings."  
Some of Kant’s so-called "minor writings" are in fact brilliant essays that represent important stages in the formation and development of his mature, "critical" philosophy. In this course we will study ten of these essays in detail.  
Instructor(s): E. Forster  
Area: Humanities.

AS.150.417. Kant’s ‘Critique Of Pure Reason’.  
An examination of the philosophy of Immanuel Kant, with emphasis on The Critique of Pure Reason.  
Instructor(s): E. Forster  
Area: Humanities.

AS.150.419. Kant’s Critique/Judgment.  
This course will examine closely and in detail the aesthetic and teleological parts of Kant’s third masterpiece, The Critique of the Power of Judgment.  
Instructor(s): E. Forster  
Area: Humanities.

AS.150.420. Mathematical Logic I.  
The development, first, of sentential logic and, then, of first-order predicate logic. Topics covered include formal languages, effective procedures, truth-functional and Tarski semantics, logical entailment, systems of derivation, deductive soundness and completeness, compactness, theories, formalization of mathematics, sizes of models, and interpretations between theories.  
Instructor(s): R. Rynasiewicz  
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.421. Mathematical Logic II.  
Gödel’s two incompleteness theorems regarding, first the unaxiomatizability of arithmetic and, second, the impossibility of proving the consistency of arithmetic using arithmetic methods (unless arithmetic is inconsistent). Computability and Church’s Thesis.  
Prerequisites: Prereq: AS.150.420  
Instructor(s): R. Rynasiewicz  
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.422. Axiomatic Set Theory.  
Axiomatic development of set theory, including the theory of transfinite ordinals and cardinals. Relative consistency proofs. Independence of the axiom of choice, and of the continuum hypothesis. Implications for the foundations of mathematics.  
Prerequisites: AS.150.421 or equivalent  
Instructor(s): R. Rynasiewicz  
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.423. Formal Methods of Philosophy.  
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with 150.223)  
Instructor(s): J. Bledin; R. Rynasiewicz  
Area: Humanities.

An examination of various interpretations of probability, including classical and priori, frequency, propensity, subjective, and logical. Also, we will study views about evidence as well as paradoxes of inductive reasoning, including Hume’s skepticism, and the grue and ravens paradoxes. No previous knowledge of probability is required.  
Instructor(s): P. Achinstein  
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.425. Poetic Thought.  
This course will examine essays and poems by Goethe, Hölderlin, and Rilke with an eye toward the ways in which their work addresses issues central to German Idealism and modern German thought. These include the relation of subject to object; the problem of the representation of the whole; the reconciliation of science and art; and the role of consciousness in the construction of the world. Readings to include texts by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer, Henrich, Husserl, Benjamin, and Allemann. Reading knowledge of German is required.  
Instructor(s): E. Forster; R. Tobias  
Area: Humanities, Natural Sciences.

AS.150.426. Philosophy and Disability.  
In this course, we will consider various philosophical issues related to disability. What counts as a disability? What obligations do we have, both as individuals and as a society, to people with disabilities? What counts as respecting people with disabilities, and what counts as unjustifiable discrimination against them?  
Prerequisites: AS.150.219 OR AS.150.220  
Instructor(s): H. Bok  
Area: Humanities, Social and Behavioral Sciences.

AS.150.428. Spinoza’s Political Theology.  
“Political Theology” is a term that acquired significant resonance in recent years. The current class will study closely two texts by Spinoza, the founder of this discipline: the Theological-Political Treatise and the (incomplete) Political Treatise.  
Instructor(s): Y. Melamed.
AS.150.429. Topics in Logic: Ontology and Knowledge Representation.
Knowledge representation deals with the possible structures by which the content of what is known can be formally represented in such a way that queries can be posed and inferences drawn. Ontology concerns the hierarchical classification of entities from given domains of knowledge together with the relations between various classes, subclasses, or individuals. The main framework in which we will work is that of description logics, which are decidable fragments of varying degrees of first order predicate logic. In ontology development we will examine RDF (Resource Description Framework), its extension to RDFS, and OWL (Web Ontology Language), and use the software Protégé for specific applications. Finally, we will take a look at query languages such as SPARQL (SPARQL Protocol and RDF Query Language).
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.430. Hegel’s Phenomenology of Spirit.
An in-depth study of Hegel’s masterpiece, the Phenomenology of Spirit. We will be concentrating on the first half of the text.
Instructor(s): E. Forster.

AS.150.431. Introduction to Philosophy of Science.
This course introduces students to some major philosophical problems about science, including these three: (1) Is there a universal set of rules constituting the “scientific method” that scientists must always follow in order to be rational? (2) Can science provide knowledge of an “unobservable” world underlying our experiences, and if so how? Or is science confined to speaking about the world of observation? (3) Are there important differences between philosophy and science? We will consider disputes between rationalists (e.g., Descartes) and empiricists (e.g., Newton) on scientific method, historical and contemporary debates between scientific realists and instrumentalists about the reach of science, as well as different viewpoints concerning the relationship between philosophy and science. No particular science or philosophy background is presupposed.
Instructor(s): P. Achinstein; R. Bett
Area: Humanities.

This course is a continuation of Hegel’s Phenomenology of Spirit, Part One, taught last Spring. We will closely study the second half of the book, compare its methodology with that of the first half, and end with an examination of Hegel’s systematic reflections in the “Preface”.
Prerequisites: AS.150.430
Instructor(s): E. Forster
Area: Humanities.

AS.150.433. Philos/Space & Time.
Beginning with Poincaré, there has been an influential school of thought maintaining that there is no fact of the matter as to whether the geometry of space is Euclidean or, instead, some form of non-Euclidean geometry – rather, one can arbitrarily choose a metric geometry and then modify the physics in order to fit the empirical facts. This claim has been extended to affine geometry (inertial structure of spacetime) and distant simultaneity (in relative theory). We will critically examine this tradition, beginning with a careful examination of the relation of non-Euclidean to Euclidean geometry.
Instructor(s): R. Rynasiewicz
Area: Humanities, Natural Sciences.

AS.150.434. History and Philosophy of Quantum Physics I.
Planck, Einstein, Bohr model, “old quantum theory,” correspondence principle, dispersion, BKS theory, Heisenberg’s Umdeutung (1925 invention of matrix mechanics) and its development.
Instructor(s): R. Rynasiewicz
Area: Humanities, Natural Sciences.

AS.150.435. The Philosophy and Theology of Maimonides.
This course will examine the philosophic and theological thought of Judaism’s most renowned philosopher, Moses Maimonides (1138-1204). After a brief overview of Maimonides’ multifaceted life as philosopher, scientist, physician, Talmudic scholar, rabbi, and communal leader; we will consider Maimonides’ philosophic and religious background and, in particular, the ancient Greek and medieval Islamic philosophic works that influenced him. The course will delve into his views on topics such as the relation between faith and reason, the existence of God, creation/eternity of the world, free will/determinism, the nature of prophecy, the purpose of law, human happiness, ultimate perfection, and the Afterlife. Special attention will be given to Maimonides’ method of philosophic writing and the tension in his life between the vita activa and the vita contemplativa. The course will also trace the impact of Maimonides’ Guide of the Perplexed upon later Jewish thought and upon Western philosophy and theology from Thomas Aquinas to Leibniz.
Instructor(s): S. Harvey
Area: Humanities.

AS.150.438. Spinoza’s Ethics.
The seminar is an in depth study of Spinoza’s major work, The Ethics.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.439. Epistemology.
Is knowledge (or even strong evidence) required, or possible, in science and in philosophy? We will focus on whether standard forms of nondemonstrative reasoning are justified, how if at all one can gain knowledge of the observable and unobservable world, whether and how theories in philosophy can be established, an what to do in science and philosophy when you can’t prove or get strong evidence for your theory.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.442. The Philosophy of Ludwig Wittgenstein.
A close reading of Wittgenstein’s Uncertainty familiarity with the Philosophical Investigations is required.
Instructor(s): M. Williams
Area: Humanities.

AS.150.443. Wittgenstein’s Philosophy of Mind.
The seminar will begin with a careful examination of the private language argument in the Philosophical Investigations. Among the additional themes we will examine are his analogy between philosophy of mathematics and his philosophy of psychology, implicit criticisms of the representational theory of mind, the problem of other minds and the role of deception, and the “grammar” of psychological concepts. There are numerous manuscripts concerned with mental and psychological concepts. Two volumes of the Remarks on the Philosophy of Psychology will be ordered for the seminar, though we will not be “working through” them in a systematic way. The Philosophical Investigations and Zettel are essential. Recommended Course Background: Familiarity with Wittgenstein’s work.
Instructor(s): M. Williams
Area: Humanities.
AS.150.444. The Identity of Indiscernibles.
Can two things (such as bodies, events, moments, thoughts, or geometric points) have precisely the same qualities? If so, what makes them different from each other? In this class we will explore the debate about the Principle of the Identity of Indiscernibles. Readings will include texts by: Leibniz, Clarke, Max Black, Ayer, Ian Hacking, Robert Adams, and Michael Della Rocca.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.446. Hegel’s Science of Logic.
In this course we will focus on the first two parts of Hegel’s Science of Logic, and address the following issues (among others). In what sense is Hegel’s dialectical logic continuous with the classical metaphysical tradition and in what sense is it a critique of traditional metaphysics? What motivates the project, or what questions does Hegel think his logic can answer that previous logics did not?
Instructor(s): D. Moyar; E. Forster
Area: Humanities.

AS.150.447. Law and Philosophy.
In this course we will examine major issues in the philosophy of law, including the relation of law to moral theory, the role of democratic political institutions in legal decisions, and the justification of punishment. No previous knowledge of law or philosophy is required.
Instructor(s): D. Moyar
Area: Humanities.

What are freedom of the will and moral responsibility? Are they compatible with determinism or naturalism? This course will examine various philosophers’ answers to these questions.
Instructor(s): H. Bok
Area: Humanities.

AS.150.454. The Value of Humanity.
Are human beings distinctively valuable? What makes us valuable? And how should we respond to the value of human beings? The course is divided into four parts. The first part takes up questions about the basis of human value. We consider various proposals, including Kant’s, about the valuable feature or capacity of human beings. Are we valuable in virtue of having a good will, in virtue of being agents, in virtue of being valuers, or something further? The second part takes up questions about the explanation of the value of human beings. Does the proposed feature make us valuable because it instantiates a simple value property, making us valuable in ourselves, or simpliciter? We consider whether the notion of value simpliciter is a notion we fully understand, or need. Does the proposed feature make us valuable because it makes us good-for something or someone? Who or what does it make us good-for? Or again, does the proposed feature make us such that we are objects of an appropriate attitude or practical stance? If so, what is the attitude or stance? The third part of the course takes up normative questions about the appropriate mode of responding to human beings. We consider whether it makes sense to say that human beings are “ends-in-themselves,” and what it would mean to treat a person as an end-in-itself. We also consider various accounts of respect. A guiding question is whether human beings are the only appropriate objects of respect, or whether we can respect other beings, and even artifacts. The fourth part of the class applies what we have learned so far to related topics: to the question of whether human life or existence is valuable, and conversely, whether death is disvaluable. We consider, albeit briefly, the value of human beings in relation to the value of animals. And we ask about the role of Kantian notions like dignity in applied contexts, so that highly philosophical considerations about value are shown to have real-world bearing.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.455. Ethics And Animals.
Instructor(s): H. Bok
Area: Humanities.

AS.150.456. Medieval Philosophy.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.459. Theory Of Knowledge.
An advanced introduction to the central problems, concepts and theories of contemporary philosophical epistemology (theory of knowledge). Topics to be explored include: what is knowledge (and why do we want it)?; theories of justification (foundationalism, the coherence theory, etc.); externalism and internalism in epistemology; skepticism, relativism and how to avoid them. Readings from contemporary sources.
Instructor(s): M. Williams
Area: Humanities.

Russel, Frege, and Wittgenstein (in Tractus) provided much of the philosophical foundation for 20th C.analytic philosophy. Their influence continues to be felt, especially in their conception of philosophical problems and the methods by which they can be solved.
Instructor(s): M. Williams
Area: Humanities.
**AS.150.463. Theories of Rationality.**
Foundations of Rationality: How should we reason about reasoning? Understanding the nature of our ability to reason is among the most important parts of understanding who we are as human beings. This course will investigate the foundations of rationality through an examination of philosophical texts and contemporary empirical research.
Instructor(s): J. Waterman
Area: Humanities.

**AS.150.464. Objectivity.**
This course examines the notion of objectivity and challenges to it. Its topics include the status of objective facts and beliefs, the structure of social reality, and rational disagreement.
Instructor(s): N. Goldberg
Area: Humanities.

**AS.150.465. Genetics, Genomics and Society.**
This course will examine the ethical, legal and social implications (ELSI) of human genetics through the lens of significant and field-defining periods and events in the history of the field. We will study the ELSI issues raised by those events, and how the events have shaped and defined the current state of the science and emerging scientific, ethical, policy, and public health issues. Juniors and Seniors only.
Instructor(s): D. Mathews
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

**AS.150.467. Philosophic Logic.**
This course is a survey of various topics in philosophical logic. We begin with a review of the model theory of classical first-order logic. In our first unit, we will then move beyond the standard existential and universal quantifiers and consider generalized quantifiers, substitutional quantifiers, and plural quantification. In our second unit, we will investigate the theory of propositional modal logic, considering its syntax, semantics, and proof theory, and some of its applications. In our third unit, we will investigate various formal approaches to defining truth. In our fourth unit, we will get more philosophical and ask: what is logical consequence? In the course of answering this question, we will consider intuitionistic, normative, and informational conceptions of logic.
Instructor(s): J. Bledin
Area: Humanities.

**AS.150.468. Global Food Ethics.**
This course is an introduction to ethical issues that arise within the contemporary global agrifood system. The overarching goal of the class is to give you the opportunity to think critically about a variety of conflicting views as to how we should produce, distribute, and consume food to achieve food security for over 9.6 billion people by 2050. We will borrow tools from practical ethics and theories of justice to shed light on these pressing issues that determine our common future and the way we personally relate to the food we eat.
Instructor(s): Y. Saghai
Area: Humanities.

**AS.150.470. Spinoza and the Pantheism Debate.**
In this course we will examine the philosophical significance of the so-called Pantheism Debate which shook Germany at the end of the 18th century after it was revealed that Lessing, the main representative of the German Enlightenment, was a Spinozist. Readings will be drawn from Spinoza, Jacobi, Mendelssohn, Herder, Goethe, and Kant.
Instructor(s): E. Forster; Y. Melamed
Area: Humanities.

**AS.150.472. Neuroethics.**
Neuroethics: Can electroencephalography show that we lack free will? Can modern neuroimaging show that someone will commit a crime in the future? Is it ethical to use this Promethean knowledge to put them in jail before they even commit a crime? In Neuroethics, we’ll consider these and other pressing questions emerging at the frontiers of neuroscience and modern moral theory.
Instructor(s): P. Stojanovic
Area: Humanities.

**AS.150.473. Classics of Analytic Philosophy.**
This will be an examination of the classic articles of 20th Century Anglo-American philosophy. Included are Frege, Russell, Wittgenstein, Austen, Carnap, Quine.
Area: Humanities.

**AS.150.474. Justice and Health.**
Course will consider the bearing of theories of justice on health care. Topics will include national health insurance, rationing and cost containment, and what justice requires of researchers in developing countries.
Instructor(s): H. Bok
Area: Humanities.

**AS.150.475. Addiction, Depression, and the Self.**
An examination of the moral implications and effects of addiction, depression and Pharmacological treatments for depression on our conception of our own agency. Recommended Course Background: AS.150.219, AS.150.220, or permission required.
Instructor(s): H. Bok
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

**AS.150.476. Philosophy and Cognitive Science.**
This year’s topic: Temporal Experience. Do we perceive time? If so, through what sense(s)? How long is the conscious “now”? Does the temporal order of our perceptions mirror the temporal order of what we perceive? Must the experience of a temporal duration itself be extended in time? What is the relation between the experience of time (for example, the experience of time’s passage) and memory? Does our experience of time accurately represent temporal features of reality, or is it actually illusory? How does attending to time’s passage affect its perceived rate of passage (and what is it to attend to time’s passage)?
We will explore these and other questions through an examination of both psychological and philosophical work. [This course meets jointly with Professor Flombaum’s AS.200.316 and AS.200.616.]. Permission of instructor required to enroll.
Instructor(s): J. Flombaum; S. Gross
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

**AS.150.477. Existentialism.**
Through a close reading of the seminal texts by Kierkegaard, Nietzsche, Heidegger, Sartre, and Merleau-Ponty the course will examine one of the most influential philosophical movements of the last century.
Instructor(s): G. Lebanidze
Area: Humanities.

**AS.150.478. Program Abroad: Jerusalem: Modern Jewish Thought.**
Intersession Abroad Program. The course examines the modern Jewish thought in Israel. Guest Lecturers.
Instructor(s): Y. Melamed
Area: Humanities.
AS.150.479. The Ethics of Making Babies.
In this class, we will investigate many aspects of the ethics of making babies, asking not only which children we should create and how we should create them, but whether we should make any more people at all. Investigating these questions will take us through large chunks of moral theory, bioethics, and public health ethics. For more information, or to request permission of the instructor (for those who do not meet the prerequisite requirements), email Travis Rieder at trieder@jhu.edu. Recommended Course Background: One course in ethics or bioethics, or permission of the instructor.
Instructor(s): T. Rieder
Area: Humanities.

AS.150.483. Topics in Jewish Philosophy: Hassidism.
Hasidism is the ecstatic religious movement that emerged in East European Jewry in the mid eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of Dov Ber of Mezrich between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon’s report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.484. Is Knowledge Possible: Epistemic Problems, Puzzles & Paradox.
How is knowledge possible in view of various intractable problems and paradoxes, including the problem of justifying induction, the realism-anti-realism dispute, and the grue and ravens paradoxes about evidence? Are philosophical claims knowable? A study of contemporary views about evidence, probability, inference, and philosophy.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.488. Enlightenment Moral and Political Theory.
Instructor(s): H. Bok
Area: Humanities.

AS.150.489. Spinoza’s Metaphysics.
The seminar is an in depth study of Spinoza’s major work, the Ethics. We will concentrate on Parts II-IV of the Ethics, though we will try to cover the entire book. Among the topics to be discussed are: the style and structure of the book, the meaning of being and the question of ontology in Spinoza, the nature of Spinoza’s attributes, necessitarianism, teleology, the nature of ideas, parallelism, individuals and their limits, the nature of bodies, the three kinds of knowledge, the conatus and the affects, Spinoza’s view of good and evil, blessedness and divine intellectual love.
Instructor(s): Y. Melamed
Area: Humanities.

An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-listed 300.411
Instructor(s): M. Williams
Area: Humanities.

AS.150.491. Kant and Newton on the Foundations of Science.
Kant attempted to provide a philosophical foundation for Newtonian science. In this class we will read Kant’s work “Metaphysical Foundations of Natural Science,” and philosophical and foundational parts of Newton’s “Principia,” and we will critically compare and evaluate both. No particular scientific background is presupposed.
Instructor(s): E. Forster; P. Achinstein
Area: Humanities.

AS.150.493. Introduction to Scientific Methods.
We will study various methods for proving scientific claims defended by scientists and philosophers. Included will be rationalism (Descartes), various forms of empiricism (Newton, Mill, Whewell), realism vs. anti-realism, and scientific strategies to follow when you cannot prove your favorite theory. No particular scientific background required.
Instructor(s): P. Achinstein
Area: Humanities, Social and Behavioral Sciences.

AS.150.494. Descartes.
The course is an introduction to the philosophy of Rene Descartes. We will read most of his main philosophical works, and part of his correspondence. The class is open to both undergraduate and graduate students.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.495. Sex, Drugs, and Bioethics: Medicine and Morality in Modern America.
Alongside rock n’ roll, sex and drugs have classically been seen as sites of moral or ethical transgression, particularly in post-war America. Unlike rock n’ roll, however, sex and drugs have always been bound up with the practice of medicine. This course explores the interaction of medical science with the moral and ethical issues which surround i) reproduction, sexual pleasure, and gender roles and ii) the use of drugs, both therapeutic, enhancing and recreational. Bridging these two sides of the course is the question of medicalisation, and how medical science is used to construct socially normative ideals about sexuality, behavior, emotion and physical capacity, and how in turn those moral norms are used to justify or argue for the development of particular medical practices. The aim of the course is to illuminate the mutually constitutive interplay of medicine and morality in modern America.
Topics covered include: abortion, contraception, IVF, sex-selection, gene selection, adolescent sexualities, prostitution, STD surveillance, medicalisation of sexual dysfunction, medicalisation of emotion and behavior, ‘moral enhancement’, ADHD, Performance Enhancing Drugs, cosmetic surgery, neuroenhancement, recreational drugs, the war on drugs, the purpose of medicine.
Instructor(s): D. O’Connor
Area: Humanities, Social and Behavioral Sciences.

AS.150.496. Topics in the Theory of Value.
We ask a basic question in value theory: what is it for something to be good, or of value? Is it for something to instantiate the simple value property ‘good’? Can goodness be identified with some natural property, perhaps, the property ‘pleasant’, or some dispositional property, perhaps, ‘what we desire to desire’? Is goodness a relation between some object, state of affairs, or activity and a subject, so that the good is benefit? On the other hand, are reasons and not values primitive in value theory, so that we should theorize about the good in terms of appropriate responses to it? We will read classic works by G. E. Moore, Peter Geach, Judith Jarvis Thomson, Connie Rosati, Nicholas Sturgeon, Richard Kraut, Donald Regan, T. M. Scanlon, and others.
Instructor(s): L. Theunissen
Area: Humanities.
AS.150.497. Kant and the Early Moderns.
A critical examination of Kant’s dialogue with his Early Modern predecessors (Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume), and of their own respective positions.
Instructor(s): E. Forster; Y. Melamed
Area: Humanities.

AS.150.498. Modal Logic and Its Applications.
In the first part of the course, we’ll investigate the theory of modal logic, considering its syntax, semantics, and proof theory. We’ll then turn to some of its philosophical applications: epistemic logic, counterfactuals, deontic logic, intuitionistic logic, and the metaphysics of time.
Instructor(s): J. Bledin
Area: Humanities, Quantitative and Mathematical Sciences.

According to the Principle of Sufficient Reason every fact must have a reason, or explanation. In other words: there are no brute facts. If a certain penguin has three dots on its right wing - there must be a reason for this. If there are no penguins with precisely three dots on their right wings - there must be a reason for that as well. In the first half of the course we will read works by the two philosophers who introduced the principle: Spinoza and Leibniz. In the second part, we will read texts by Kant, Maimon, Hegel, Schopenhauer, and some contemporary analytic philosophers, and discuss the plausibility, implications, and justification of the principle.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.511. Directed Study.
Individual study of special topics, under regular supervision of a faculty member. Special permission is required.
Instructor(s): Staff.

AS.150.512. Directed Study.
Instructor(s): Staff.

AS.150.551. Honors Project.
See departmental major adviser.
Instructor(s): Staff.

AS.150.552. Honors Project.
Instructor(s): Staff.

AS.150.598. Internship.
Instructor(s): D. Moyar; M. Tumulty.

AS.150.599. Independent Study.
Instructor(s): H. Bok.

AS.150.601. Graduate Seminar: Topics in the Theory.
Graduate students from non-Philosophy departments need instructor permission. We ask a very basic question in value theory: what is it for something to be good, or of value? Is it for something to instantiate the simple value property ‘good’? Can goodness be identified with some natural property, perhaps, the property ‘pleasant’, or some dispositional property, perhaps, ‘what we desire to desire’? Is goodness a relation between some object, state of affairs, or activity and a subject, so that the good is benefit? On the other hand, are reasons and not values primitive in value theory, so that we should theorize about the good in terms of appropriate responses to it? We will read classic works by G. E. Moore, Peter Geach, Judith Jarvis Thomson, Connie Rosati, Nicholas Sturgeon, Michael Smith, Richard Kraut, Donald Regan, T. M. Scanlon, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.604. Probability and Evidence.
Leading theories about the meaning of probability, and about the concept of evidence. No previous course in probability is necessary.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.605. Foundations of Ethics.
The seminar will serve as an advanced, topical introduction to normative theories in ethics, and will include some meta-ethics. Our central question is: what is the foundation, or motivational basis, of ethics? Is it the individual asking what she wants for her life? Is it the determination of rational requirements on action? We think about the relationship between reason, reasons, and motivation. We consider the debate over internalism and externalism about reasons. We work through the distinction between agent-neutral and agent-relative reasons and values. Among others, we will read Thomas Nagel, Phillipa Foot, Shelly Kagan, Samuel Scheffler, Derek Parfit, G. E. M. Anscombe, and Bernard Williams.
Instructor(s): L. Theunissen
Area: Humanities.

Course will focus on ancient skepticism as a way of life, and on the role of epistemological argument in skepticism so conceived. The seminar will end with a brief look at early modern reactions to ancient skepticism.
Instructor(s): M. Williams; R. Bett.

AS.150.607. Graduate Seminar: Knowledge and Perception.
How does perception reveal the world, if it does? Why have philosophical reflections on perception often led to skepticism? For background, we will start with readings from Ayer and Austin (on the sense-datum theory), and Sellars (on the Myth of the Given). We will then spend time on contemporary “disjunctive” accounts of perceptual consciousness, with readings from McDowell, Travis and (possibly) others.
Instructor(s): M. Williams
Area: Humanities.

AS.150.609. Graduate Seminar - Philosophy.
An examination of Derek Parfit’s “On What Matters”.
Instructor(s): H. Bok
Area: Humanities.

AS.150.610. Graduate Seminar: Virtue Ethics.
A study of recent work in virtue ethics.
Instructor(s): H. Bok.

AS.150.611. Topics in Metaphysics: Mereology.
Mereology, the study of the relationship between parts and whole, has recently become a major subfield in contemporary metaphysics. In the seminar we will read classical as well as recent literature on the subject. Topics to be discussed include: the univocity of the term ‘part’, priority relations between parts and whole, universal composition, the nature of simples, boundaries, mereology and set theory, spatial parts, temporal parts, metaphysical monism and nihilism. For an introductory survey of the field, please see: Varzi, Achille, “Mereology”, The Stanford Encyclopedia of Philosophy (Spring 2011 Edition), Edward N. Zalta (ed.). URL = <a href="http://plato.stanford.edu/archives/spr2011/entries/mereology/">http://plato.stanford.edu/archives/spr2011/entries/mereology/</a>
Instructor(s): Y. Melamed.
Schelling's Philosophical Investigations into the Nature of Human Freedom counts among his most important works – Heidegger called it "one of the deepest works of Western philosophy." It is also one of the most enigmatic ones. In this course, we will contrast it with Schelling's philosophy of nature and investigate the extent to which his theory of freedom is necessitated by problems in his philosophy of nature.
Instructor(s): E. Forster
Area: Humanities.

AS.150.614. Topics in Meta-Ethics (Graduate Seminar).
This is a seminar on theoretical topics in ethics. We focus on debates over cognitivism and non-cognitivism; realism and anti-realism; reasons internalism and externalism; relativism and skepticism. We read contemporary classics by Sharon Street, T. M. Scanlon, Joseph Raz, Bernard Williams, Allan Gibbard, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.615. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic. Co-listed with AS.300.653
Instructor(s): H. de Vries; M. Williams
Area: Humanities.

AS.150.619. Topics in Hegel's Philosophy: The Philosophy of Right.
This course will be a close reading of G.W.F. Hegel's Philosophy of Right. Some of the main topics for discussion will be the relation of law and morality, the dependence of the political philosophy on Hegel's Logic, and the relation of individual and social conceptions of freedom.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.621. Seminar in Hegel's Phenomenology of Spirit.
The course will consist of close reading of Hegel's text along with readings from the extensive secondary literature. Particular attention will be given to Hegel's methodology, his uses of recognition, and the various treatments of agency.
Instructor(s): D. Moyar.

AS.150.627. Seminar in Epistemology.
Instructor(s): M. Williams; P. Achinstein
Area: Humanities.

AS.150.630. Seminar In Metaphysics: Mind and Cosmos.
We will begin by reading Thomas Nagel's new book: Mind and Cosmos. This will be followed by other works to be selected in class.
Instructor(s): P. Achinstein.

AS.150.632. Formal Logic.
An introduction to symbolic logic and probability. In the first two parts of the course we study formal ways of determining whether a conclusion of an argument follows from its premises. Included are truth-functional logic and predicate logic. In the third part we study the basic rules of probability, and learn how to make probability calculations and decisions in life." Co-listed with AS.150.118 (for undergraduate students) (01-F 11:00-11:50am).
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.633. Kant's Opus Postumum.
This research seminar examines the reasons that led Kant to revise his transcendental philosophy late in life. Special attention to problems in the Metaphysics of Nature and the Metaphysics of Morals. Students should be familiar with Kant’s theoretical and practical philosophy.
Instructor(s): E. Forster

AS.150.634. Seminar in Philosophy of German Idealism:
Explanation or Construction? The Question of Method in the Philosophy of Nature.
“We must do away with all explanation, and description alone must take its place." This sentence, although written over a century later and in a different context, could serve as a motto for what is perhaps the most important debate about the proper method of Naturphilosophie in German Idealism. In this seminar we will examine the philosophical significance of this debate over the role of explanation in our knowledge of nature. Readings will come from Jacobi, Goethe, Schiller, Kant, Schelling, Hegel, as well as from Pascal, Spinoza, and Newton.
Instructor(s): E. Forster
Area: Humanities.

This seminar will be an examination of Wittgenstein's On Certainty. We will be concerned with detailed readings of the passages as well as more general interpretative claims.

This seminar will focus on language acquisition as involving a special kind of learning, one that requires the active participation of an adult in what the child does. The account we will be discussing draws heavily on Wittgenstein's philosophy of language, particular the treatment of the problem of similarity and the development of reference.
Instructor(s): M. Williams
Area: Humanities.

A study of Kant's major works in moral philosophy.
Instructor(s): H. Bok.

Although all three were Copernicans in the broad sense, these great mathematician-philosophers of the 17th century held subtly different positions on the question whether the sun or the earth moves, in large part because they proposed very different analyses of what it is for a body to move. These analyses emerge from quite divergent views on space, time, matter, mind, and scientific-philosophical method in relation to natural theology. The focus of the seminar is on the interaction of these views: Newton’s rejection of Descartes’ Followed by the clash between Newton’s and Leibniz’s.
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.652. Seminar in the Philosophy of Science.
Philosophy of experiment, Bayesianism, severe tests. Readings from Hacking, Galison, Franklin, Mayo, and others. Applications range from physiology to cosmology.
Instructor(s): R. Rynasiewicz
Area: Humanities, Social and Behavioral Sciences.

AS.150.653. Seminar: Philosophy - Physics.
Philosophical problems in space-time physics.
Instructor(s): R. Rynasiewicz
Area: Humanities.
AS.150.658. Topics in the Philosophy of Language.
An examination of recent work in the philosophy of language and/or related work in the philosophy of mind.
Instructor(s): S. Gross.

AS.150.659. Topics in Formal Semantics: Counterfactuals?
In this seminar, we will investigate the semantics and communicative function of counterfactuals. Among the questions that we will consider are these: What are the compositional semantic values of counterfactual conditionals? What is the context change potential of a counterfactual and what kind of structure must we add to the common ground of a conversation to model its communicative effect? Do counterfactuals recommend a dynamic approach to meaning? Are counterfactual conditionals truth-apt? Do they serve to describe the world? If so, which aspect of reality is a counterfactual sensitive to?
Instructor(s): J. Bledin
Area: Humanities, Social and Behavioral Sciences.

AS.150.810. Independent Study.
Sec. 01 Theunissen Sec. 02 Förster Sec. 03 Gross Sec. 04 Moyar Sec. 05 Rynasiewicz Sec. 06 Williams (Meredith) Sec. 07 Bok Sec. 08 Bett Sec. 09 Williams (Michael) Sec. 10 Bledin Sec. 11 Achinstein Sec. 12 Melamed

Instructor(s): Staff.

Preparing philosophy graduate students for the impending job market by discussions of, and practicing for, constructing and submitting dossiers, interviews and giving talks both in and outside one’s particular field. Open to all philosophy graduate students, regardless of year and field. No degree credits. Offered sporadically.
Instructor(s): P. Achinstein.

AS.150.821. Research Seminar in Language and Mind.
A workshop for current departmental research in language and mind. Permission required.
Instructor(s): S. Gross
Area: Humanities.

Cross Listed Courses

English
Can novels ask philosophical questions? What do literary narratives and moral arguments have to do with each other? Everyone who has read a novel recognizes that it is in part an expression of ideas: characters, narrators, authors, and so forth say and do things that express a way of thinking. In this course we will examine the connections between moral philosophy and literature in nineteenth-century England in a series of four units, each of which pairs a novelist and a philosopher. The novelists will be Jane Austen, Charles Dickens, George Eliot, and E.M. Forster; the major philosophers will include Edmund Burke, John Stuart Mill, Immanuel Kant, and G.E. Moore, and we’ll read excerpts from Jeremy Bentham, Ludwig Feuerbach, F.H. Bradley, and Henry Sigwick. Assignments will include reading quizzes, response papers, and a final essay with a research component. Dean’s Teaching Fellowship course. Pre 1800 course.
Instructor(s): P. Fessenbecker
Area: Humanities.

Psychological Brain Sciences
An interdisciplinary investigation into the innateness of concepts: perception, number, language, and morality, physics discussed. Evidence from animals, infants, patients, brains. Students collect data in sections investigating claims from the readings. Cross-listed with Cognitive Science and Philosophy.
Instructor(s): J. Halberda; L. Feigenson
Area: Social and Behavioral Sciences.

German Romance Languages Literatures
AS.211.235. Panorama of German Thought I.
Taught in English. German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition are Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kraeauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed the study of cultural, historical, and social phenomena as well as of literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This two-semester survey course will highlight important topics of German Thought, e.g. the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. While the first semester (Fall) covers until 1850 (from Luther to Hegel/Kierkegaard), the second (Spring) focuses on Modern German Thought after 1850 (from Marx to Luhmann). Meets with AS.213.235
Instructor(s): E. Strowick
Area: Humanities.
AS.211.265. Panorama of German Thought.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): R. Tobias; Staff
Area: Humanities.

What if Rousseau’s description of the sentiment de l’existence were to join to the models of consciousness Damasio develops in The Feeling of What Happens? This course explores aspects of consciousness in French literature (Rousseau, Sand, Nerval, Amiel, Flaubert, Valéry, Proust, Sartre) in a dialogue with recent texts in theory, philosophy, neuroscience (e.g. Poulet, Merleau-Ponty, Sartre, Scarry, Noë, Humphrey, Damasio, Sacks).
Instructor(s): E. Ender
Area: Humanities.

AS.213.235. Panorama of German Thought I.
Taught in English. German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition are Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Instructor(s): E. Strowick
Area: Humanities.

AS.213.236. Panorama of German Thought II.
Panorama of German Thought from Nietzsche to Habermas. Course will examine major thinkers in nineteenth and twentieth-century German thought with emphasis on the response to Enlightenment philosophy, the critique of reason, the questions about the autonomy of the subject and the search for new individual and collective identities. Reading will include traditional philosophical texts (Nietzsche, Cassirer, Heidegger, Adorno, Habermas) as well as works in anthropology (Gehlen, Scheler), sociology (Simmel, Weber), psychology (Mach, Freud), political theory (Marx, Schmitt) and aesthetics (Benjamin, Warburg, Panofsky). This course is a continuation of Panorama of German Thought I, though the first semester is not a prerequisite for the second. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.309. Walter Benjamin and His World.
All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.
Area: Humanities.

AS.213.313. Heidegger’s “Being and Time” and “Rectify.
This course will introduce students to Heidegger’s seminal work as seen through the lens of the TV series Rectify, which considers what it means to be “thrown” into the world and how we construct a meaningful horizon for our experiences. We will explore some of the fundamental concepts in Being and Time, including care, projection, fallenness, affect and time, and being-onto-death, and consider how these same issues are taken up in Rectify, which as a TV show has to develop its own visual vocabulary to explore the structure and nature of being in the world. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.368. German Political Thought.
This course will introduce students to major figures in German political thought from Martin Luther to Karl Marx and Immanuel Kant to Carl Schmitt. The class will explore such issues as the notion of sovereignty, the relationship between church and state, the theory of parliamentary democracy, and the political and economic ramifications of liberalism. Reading and discussion in English.
Instructor(s): R. Tobias
Area: Humanities.

The course analyzes the transformations of the relationship between form - life - aesthetics with regard to Goethe's morphological writings as well as the complex history of the reception in the philosophy of life (Spengler, Klages), in literary Modernism (Rilke, Einstein, Benn, Kafka) and in the early cultural studies of the 20th century (Simmel, Cassirer, Blumenberg). The “doctrine of the shape of formation (Bildung) and transformation (Umbildung) of organic bodies,” Goethe's morphology considers shape (Gestalt) not as something static but in constant change, taking particular interest in the movable (“das Bewegliche”), i.e., processes of transformation in their temporality: “Observing all shapes, particularly organic ones, nowhere do we find something established, something inactive, but rather everything oscillates in constant movement. Hence our language uses the word Bildung for both, the emerged as well as the emerging.” A nexus between life and form, Bildung raises the problem of representation: A force towards representation, it itself escapes representation. It is by way of metamorphosis and dynamization of representation that the relationship between life and form is arranged anew, again and again – imposing questions of Bildung, representability (Bildlichkeit), morphological methods and poetics on modern literature and the humanities. Taught in German. Recommended Course Background: AS.210.311-AS.210.312 or instructor permission.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.604. Small Forms.

Small forms cover the broad field from aphorism, epigram, fable and riddle to anecdote, short story, novella, ... and treatise. In each of those 'compressional arts' the smallness unfolds in different and historically specific ways. Spanning a period from 1770 to 1940 and focusing (not exclusively) on aphorisms, the seminar will explore the manifold poetics of the small in literature and philosophy: What can small mean on the level of (literary) form? What (historically specific) kind of readings do small forms facilitate? What readings do they thwart? What happens to aphorisms when they become parts of a monstrously large overall composition? What distinguishes small forms from (e.g.) fragments? How do small forms relate to simple forms (Jolles) or minor literature (Deleuze)? To what extent do small forms gain epistemological impact, e.g. with respect to the critique of system and systematic philosophy since 1870? Readings include Lichtenberg, Schlegel, Novalis, Nietzsche, Kafka, Robert Walser, Benjamin, Adorno. Readings and discussions in German.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.629. The Art of Framing.

Frames and Framings in art and literature are aesthetic means of creating focus. They draw a distinction between interiority and exteriority, foreground and surroundings; they cut out segments from space-time continuum and thus provide basic instruments of orientation, they constitute pictorial representation as well as the compositional structure of literature. From an epistemological perspective one can say that frames create a paradoxical threshold in-between which facilitates both the differentiation and transgression of spheres. It is further remarkable that frames while spectacularly making visible something specific at the same time expose the instances of their own 'showing': by implementing frames representation observes itself in the very process of representing. Through constellating systematic and historical readings the seminar will analyze theoretical concepts of frame and framing (Simmel, Genette, Marin, Derrida) and at the same time explore the transformation of frame forms and functions in literature and aesthetic discourse between 1720 and 1830 (Brockes, v. Haller, Wieland, Lessing, Herder, Lichtenberg, Goethe, Moritz, Jean Paul, Schlegel, Brentano, Tieck, Hoffmann). Among the topics to be discussed will be the conceptualization of subject-object relations as an analytical tool to reconstruct how the organizing principles of framing in Enlightenment (point of view, Guckkasten, chain of pictures, landscape/camera obscura) drift into the twilight of epistemological reflection: Around 1800 frame structures (and its doublings/transgressions) present the "Produzierende mit dem Produkt" and thus articulate the insights of transcendental philosophy, they turn into a medium of romantic irony.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.654. „Stimmung“: Mood – Attunement – Atmosphere in Literature and Literary Criticism.

Taught in German. The course title marks a problem of translation which already Leo Spitzer in his “Prolegomena to an interpretation of the word ‘Stimmung’” underscores: “It is a fact that the German word Stimmung as such is untranslatable.” Mood, attunement, atmosphere are facets of an aesthetics of Stimmung as it developed in literature and philosophy from the 18th to the 20th century. Most recently, Stimmung has had a renaissance as a methodological term in a Literary Criticism which seeks to overcome the paradigm of post-structuralism. As David Wellbery has demonstrated, the linguistic usage of the word Stimmung comprises three aspects: a subjective mode of experience/perception, an atmospheric dimension and a communicative efficacy. It is along those lines that the course analyzes the poetics and aesthetics of Stimmung in German Literature and Thought from the 18th through the 20th century. Stimmung proves to be fertile ground for contagious forms of communication, specific modes of representation (i.e. coloring, nuance), and the dissolution of subject/object boundaries. Furthermore, we will discuss Stimmung as a term of Literary Criticism from the 20th century to the present. Readings will include: Kant, Schiller, Stifter, Fontane, Hofmannsthal, Hermann Bahr, Thomas Mann, Georg Simmel, Martin Heidegger, Leo Spitzer, Erich Auerbach, Gernot Böhme, Hans-Ulrich Gumbrecht.
Instructor(s): E. Strowick
Area: Humanities.
AS.213.666. “To be continued”- Seriality in Literature and Other Media.
Taught in German. By ending with the words “(To be continued)” [“ist fortzusetzen”], Goethe’s Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. – although invented earlier – becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine “Die Gartenlaube”, Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, “The Perils of Pauline” (serial, 1914), “Copycat” (Jon Amiel, 1995), “Twin Peaks” and current US-American TV series.
Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

Taught in German. The course analyzes the performative on the basis of the very field that John L. Austin’s speech act theory excludes: literature. What challenges Austin’s speech act theory indeed opens up the question of the performative towards iterability and theatricality and thus calls for the performative as a methodological category of literary criticism. According to Shoshana Felman’s readings of Austin, the performative act can be accentuated as an act of the “speaking body” in which the body is conceived of not as a means of linguistic expression but rather as a spillover of the act of utterance into the statement. How then is the corporeality or materiality of writing asserted in acts of narrating and reading? The course will examine theories of the performative from the perspective of literature and literary criticism as well as analyze literary speech acts (promises, acts, etc.) in detail. Readings will include: Austin, Derrida, Felman, Freud, Nietzsche, de Man, Hamacher, Goethe, Büchner, Kafka, Henry James, Thomas Mann etc.
Instructor(s): E. Strowick
Area: Humanities.

The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citoyen” or “citizen,” as the political subject. The bourgeois and the citoyen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias; Staff
Area: Humanities.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy.
Dante’s Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante’s understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities.

Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities.
Theatre Arts Studies

AS.225.328. The Existential Drama: Philosophy and Theatre of the Absurd.
Existentialism, a powerful movement in modern drama and theatre, has had a profound influence on contemporary political thought, ethics, and psychology, and has transformed our very notion of how to stage a play. Selected readings and lectures on the philosophy of Kierkegaard, Nietzsche, Camus and Sartre -- and discussion of works for the stage by Sartre, Ionesco, Genet, Beckett, Albee, Pinter, Athol Fugard (with Nkani & Nshone), Heiner Müller and the late plays of Caryl Churchill. Opportunities for projects on Dürrenmatt, Frisch, Havel, Witkiewicz, and Mrozek.
Instructor(s): J. Martin
Area: Humanities.

Humanities Center

AS.300.228. Brain and Society.
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields' resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.

This course examines the relation between the history of philosophical theology and the foundations of modern skepticism by focusing on their mutual point of departure: the concept of the human being as an essentially "finite" being "limited" in its capacity to know others, the world, and God.
Instructor(s): T. Dika
Area: Humanities.

AS.300.343. Philosophy and Literary Form.
This course examines the difference literary form can make to the shaping of philosophical content. Philosophers have tended to treat literary form as merely ornamental. For this reason, they have often underestimated the philosophical significance not only of certain works of literature but also the literary form of even those works uncontroversially considered to be philosophical. This course explores the philosophical significance of literary forms in both kinds of works. The first half examines how and why Anglo-American philosophers have incorporated the interpretation of individual literary works into their philosophical writing. We will concentrate on three works of literature— Ibsen's A Doll's House, James's The Golden Bowl and Wordsworth's Prelude—each of which has attracted significant philosophical attention. The second half of the course examines how philosophers have brought literary analysis to bear in order to illuminate the philosophical achievement of certain canonical philosophical texts. We will concentrate on three literary forms—dialogue, meditation and confession—as these forms are instantiated by three works of philosophy: Plato's Republic, Descartes's Meditations and Wittgenstein's Philosophical Investigations.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.388. Introduction to the Philosophy of Time.
This course explores answers to the question "What is time?" that take account of time as something both inside and outside of us. Readings include, among others, Aristotle, Augustine, Kant, Bergson, Heidegger, and Einstein. Cross-listed with Philosophy
Instructor(s): N. Schott
Area: Humanities.

AS.300.390. Obama and Philosophy.
The course will investigate the theological and philosophical as well as rhetorical and literary backgrounds and guiding principles that have informed Barack Obama's writings, speeches, and political strategies so far. While paying minute attention to a few pivotal controversial recent debates, both in domestic policy and international relations, our central focus will be on understanding the curious blend of Obama's version of so-called Christian realism, influenced by Reinhold Niebuhr, among others, and of what we will call his deep pragmatism. Special attention will be paid to his early appeal to "simple ideas" and "small miracles," each of them yielding the Biblical and sobered injunction of a "hope against hope. Cross-listed with Philosophy
Instructor(s): H. de Vries
Area: Humanities.

AS.300.399. Cinema and Philosophy.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.

AS.300.411. Animal Minds.
An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-list with AS.150.490
Instructor(s): M. Williams; R. Leys
Area: Humanities.
This seminar will address the major writings and guiding concepts of Emmanuel Levinas and investigate his increasing critical role as a touchstone and dividing line in the formation of twentieth century and contemporary schools of thought (phenomenology, pragmatism, post-analytic philosophy, literary, feminist, and political theory, anthropology). Additional readings will include Stanley Cavell, Jacques Derrida, Vasily Grossman, Jean-François Lyotard, and Hilary Putnam.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.653. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.658. Must We Mean What We Say?.
Starting out from Stanley Cavell’s programmatic book and title, this seminar will revisit his discussion of J.L. Austin, John Searle, Jacques Derrida, and Shoshana Felman, with special emphasis on these authors’ theories of intentionality, seriousness, and sincerity, and with reference to the ancient and modern concepts of tragedy on which they partly rely. In addition to the aforementioned thinkers’ relevant works, reading will include selections from Euripides, Henrik Ibsen, Isaiah Berlin, Emmanuel Levinas, and Jean-Luc Marion.
Instructor(s): H. de Vries.

AS.300.676. Heidegger’s Being and Time II.
This seminar consist of an integral reading and discussion of Martin Heidegger’s 1927 magnum opus Being and Time (Sein und Zeit) in light of its historical and philosophical context as well as its contemporary reception in both the phenomenological, existentialist, hermeneutic, and analytic traditions. We will focus primarily on the Second Division but also revisit central questions from Division One. However, it will not be necessary for students to have attended the previous seminar on this earlier part of Heidegger’s major work. Recommended readings will include the commentaries by Emmanuel Levinas, Jacques Derrida, Jean-Greisch, Jean-Luc Marion, Hubert Dreyfus, Robert Brandom, and others.
Cross-listed with Philosophy
Instructor(s): H. de Vries.

Center for Africana Studies
Black existentialism is a branch of Africana philosophy—the philosophical tendencies that arose out of the experience of the African Diaspora. This course is a philosophical interrogation into the meaning of the lived experience of being black in the context of an anti-black world through addressing such existential questions as freedom, identity, anguish, dread, responsibility, embodied agency, evil, resentment, liberation, and nihilism.
Instructor(s): F. Hayes.

This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes.

Henry A. Rowland Department of Physics and Astronomy
Johns Hopkins is the nation’s first research university. That emphasis on research continues to this day and forms the backbone of the undergraduate and graduate programs in the Department of Physics and Astronomy. The department’s research program is focused into four areas of excellence: Astrophysics, Condensed Matter Physics, Elementary Particle Physics, and Plasma Physics. For graduate students interested in these fields, the department offers world-class research opportunities in a friendly and supportive setting. For undergraduates, JHU offers exposure to cutting-edge research combined with a level of personal attention that is typically found only in liberal arts colleges. Nearly all physics majors at JHU work on research projects and many begin as freshmen or sophomores.

All research builds upon an established body of knowledge. To be effective researchers, teachers, or professionals, both undergraduate and graduate students must acquire a core knowledge of physics. Our undergraduate and graduate courses are designed to cover the core subjects at the appropriate levels, leading to advanced courses on a variety of specialized topics. As a consequence, students having different backgrounds or different ultimate objectives can select those parts that are most appropriate for them. The selections are made under the guidance of a faculty advisor. The advisor aids the student in making the most efficient use of his or her time and ensures that his or her program contains a reasonable balance among classroom and laboratory, mathematics, seminars, and introduction to research.

http://physics-astronomy.jhu.edu/

Requirements for the B.A. and B.S. Degrees
(See also Requirements for a Bachelor’s Degree (p. 20).)
The major program is structured so that nearly all students take the same classes during the first two years and must complete the same list of core upper-level courses during their second two years, but permits a variety of choices in upper-level electives. The total number of credits required for the B.A. degree is 120 and the B.S. is 126. By the end of the four years our students share an understanding of classical mechanics, electromagnetism, and quantum mechanics, and have acquired physics lab skills that will support them in graduate school or in a host of other pursuits.
Core Courses

Mathematics

The standard mathematics requirements for all physics majors consist of:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.110.108</td>
<td>Calculus I</td>
<td>4</td>

<td>3</td>
</tr>
</tbody>
</table>

*Note: AS.171.101-102 or AS.171.103-104 with their labs is acceptable in place of AS.171.105-106, 115-116

B.A. Degree

Two (2) additional courses (at least 3 credits each) at the 300-600 level in the Department of Physics and Astronomy or approved physics-related courses in other departments. Students who intend to continue Physics in graduate school are strongly encouraged to take these electives in Physics and Astronomy, and take both AS.171.301 Electromagnetic Theory II and AS.171.312 Statistical Physics/Thermodynamics.

B.S. in Physics Degree

Five (5) additional courses (at least 3 credits each) at the 200-600 level in the following departments: Physics and Astronomy, Biology, Biophysics, Chemistry, Cognitive Science, Earth and Planetary Sciences, Mathematics, and/or the School of Engineering (excluding courses listed as 500.xxx, 660.xxx, 551.xxx and 661.xxx). These courses must constitute a coherent and rigorous program of study approved by the Departmental Advisor and Director of Undergraduate Studies no later than the registration period for the fall semester of the senior year. At least four (4) of these courses must be taken in a single department in the Krieger School of Arts and Sciences or within a single department or program in the Whiting School of Engineering. One (1) semester of research may be used as one elective. None of the electives may be used simultaneously to satisfy either the university distribution requirements or the standard mathematics requirements.

Recommendations

An additional two semesters of mathematics are recommended, either AS.110.405 Analysis I or AS.110.311 Complex Analysis and one other. It is recommended that Physics majors become proficient in a computer programming language, either independently or through course work. Students are encouraged to broaden their background by taking introductory courses in other natural science or engineering disciplines, such as AS.030.101 Introductory Chemistry I.

Other Departmental Requirements:

A grade of C- or higher is required for a course to be counted towards major requirements. This includes required math courses. An exception for a single course taken in the year before graduation may be granted by the Director of Undergraduate Studies when there are extenuating circumstances.

Honors in the Major:

To receive Honors in Physics, you must have a GPA in your major requirements of a 3.5 or higher.

Senior Thesis

Any student majoring in the department may write a senior thesis, based on original research conducted under the supervision of a member of the faculty. Arrangements for this research will be made on an individual basis. The department views the writing of a senior thesis as an excellent capstone experience to an undergraduate education in physics, and encourages all students to consider it.

Minor in Physics

To earn a minor in Physics, a student must complete four (4) courses (at least 3 credits each) at the 200-level or above, plus AS.172.203 Contemporary Phys Sem

Restrictions: A grade of "C-" or better must be earned in required courses, which may not be taken S/U. Minor requirements can be used to meet the University distribution requirements.

Donald E. Kerr Memorial Prize

In recognition of Dr. Kerr’s work in microwave physics, the department awards the Donald E. Kerr Memorial Prize each year to the most outstanding undergraduate major graduating in physics.

Graduate Programs

Graduate study in physics and astronomy at Hopkins is intended primarily to prepare Ph.D. graduates for careers in teaching and research in physics and astronomy, or in applications such as biophysics, space physics, and industrial research. Entering students may elect to work toward a Ph.D. in physics or a Ph.D. in astronomy and astrophysics. The two programs are similar in structure but have
somewhat different course requirements (see below). A wide range of research projects—both theoretical and experimental—are available for graduate students in Astrophysics, Condensed Matter Physics, Particle Physics, and Plasma Spectroscopy.

Admission

To obtain admission, a student is expected to submit evidence that he or she has a good chance to succeed. Such evidence will ordinarily consist of transcripts of previous academic work, Graduate Record Examination scores (including advanced physics), letters of recommendation, and, for international students, a Test of English as a Foreign Language (TOEFL) score.

Requirements for the Ph.D. Degree

The Ph.D. program has strong emphasis on early and active involvement in graduate research. Thus, students are required to have a research advisor and file a research summary every semester they are enrolled in the program, starting with the first one. Furthermore, students must complete the required courses with a grade of B- or better; the coursework is typically done over the first two years. In the beginning of the second year, students complete the research examination, and in the beginning of the third year – the University’s Graduate Board Oral examination, both of which are based on completed or proposed research. During the first two years, students are typically involved in introductory research projects, which may or may not be related to their thesis work, and sometimes work with several different advisors, but they must identify (and have an agreement with) a thesis advisor no later than the beginning of their third year in the program, after which point students focus on their thesis research. The thesis is to be completed by no later than the end of the 6th year, ending with an oral presentation of the thesis to a faculty committee.

Course Requirements

Ph.D. in Physics

Students must complete the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.171.603</td>
<td>Electromagnetic Theory</td>
<td></td>
</tr>
<tr>
<td>AS.171.605</td>
<td>Quantum Mechanics</td>
<td>0</td>
</tr>
<tr>
<td>&amp; AS.171.606</td>
<td>and Quantum Mechanics</td>
<td></td>
</tr>
<tr>
<td>AS.171.703</td>
<td>Advanced Statistical Mechanics</td>
<td></td>
</tr>
<tr>
<td>AS.172.632</td>
<td>Physics Seminar</td>
<td></td>
</tr>
</tbody>
</table>

Ph.D. in Astronomy and Astrophysics

Students must complete the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.171.611</td>
<td>Stellar Structure &amp; Evolution</td>
<td></td>
</tr>
<tr>
<td>AS.171.612</td>
<td>Interstellar Medium and Astrophysical Fluid</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Dynamics</td>
<td></td>
</tr>
<tr>
<td>AS.171.613</td>
<td>Radiative Astrophysics</td>
<td></td>
</tr>
<tr>
<td>AS.171.627</td>
<td>Astrophysical Dynamics</td>
<td></td>
</tr>
<tr>
<td>AS.172.633</td>
<td>Language Of Astrophysics</td>
<td></td>
</tr>
</tbody>
</table>

The department offers a wide range of graduate physics, astrophysics, mathematical methods and statistics classes, and while only five are required, the students are encouraged to use the flexibility of the graduate program and the available classes to design programs of study that best prepare them for their chosen area of research. In addition to the required courses listed above, below is the list of the graduate courses that have been taught in recent years:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.171.602</td>
<td>Order of Magnitude Physics</td>
<td></td>
</tr>

<td>Planetary Fluid Dynamics</td>
<td></td>
</tr>
</tbody>
</table>

Students in both programs must receive at least a B- in each required course, or they will be required to retake the specific course once more and pass it.

Advising

All entering students are assigned to a first-year advisor who works closely with the student through the first two years of graduate study, or until a thesis advisor is found. The first-year advisor advises the student on courses of study, helps familiarize them with the department and provides guidance in finding research opportunities. In the beginning of each fall semester, the department holds a “research jamboree” where incoming students are introduced to the research in the department through a series of brief talks, lab tours, and research group open houses. Thus, the students are familiar, immediately upon their arrival, with the scope of research in the department and can identify prospective research advisors they may wish to work with.

First and Second-Year Research Requirement

First-year students must find, by the end of the third week of class in the fall semester, and by the end of the first week of class the second semester, as well as before the summer term begins, a member of the professoral faculty to advise them in some type of research project. The students are required to submit a short written summary of that research experience at the end of the semester. Students may continue
with one advisor through all three semesters, or they may choose to
cycle through several different research advisors. In some cases, one
of these first-year research advisors may become a thesis advisor, but
in others, the thesis advisor may change. This research requirement
continues until the end of the second year, or until the student finds a
thesis advisor.

The nature of these first-year research projects may vary from student
to student, from one advisor to another, and from one sub-field of
physics to another. In some cases they lead to published research. In
other cases, they may be first steps in a longer-term research project.
And in some cases, they may comprise reading or independent-study
projects to develop background for subsequent research. It is left to
the individual advisor to determine what the written summary should
tell. These research projects are not research assistantships and are
performed in addition to other graduate student responsibilities
(teaching and graduate classwork), although they are typically merged
with RA-supported research for those students supported by RAs.

Thesis Research and Defense

Students are required to find a thesis advisor no later than the
beginning of the third year. After the student chooses a thesis advisor,
the student forms their Thesis Committee consisting of the advisor and
two other faculty members (all Thesis Committees contain at least two
full-time faculty from the department). These committees function as
extended advisory bodies; students have the opportunity to discuss
their progress and problems with several faculty. They also conduct
one formal annual review of each student’s progress. Research leading
to the dissertation can be carried out only within the Department
of Physics and Astronomy, but with appropriate arrangements, either
partly or entirely at other locations if necessitated by the project goals.
At the conclusion of thesis research, the student presents the written
dissertation to the faculty committee and defends the thesis in an oral
examination.

Requirements for the M.A. Degree

Although the department does not admit students who intend to pursue
the master’s degree exclusively, students in the department’s Ph.D.
program and students in other Ph.D. programs at Johns Hopkins may
apply to fulfill the requirements for the M.A. degree in the Department
of Physics and Astronomy. Students from other JHU departments must
seek approval from their home department and from the Department
of Physics and Astronomy before beginning their M.A. studies.

Course Requirements for the M.A.

Students must master the basic undergraduate material covered by the
following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.171.204</td>
<td>Classical Mechanics II</td>
</tr>
<tr>
<td>AS.171.301</td>
<td>Electromagnetic Theory II</td>
</tr>
<tr>
<td>AS.171.303</td>
<td>Quantum Mechanics I</td>
</tr>
<tr>
<td>AS.171.304</td>
<td>and Quantum Mechanics II</td>
</tr>
<tr>
<td>AS.171.312</td>
<td>Statistical Physics/Thermodynamics</td>
</tr>
</tbody>
</table>

Courses taken elsewhere may qualify at the discretion of the Graduate
Program Committee.

Students must also complete six one-semester graduate-level (at
least three hours/week) courses offered by the Department of
Physics and Astronomy. For this purpose, each semester of AS.171.609
Mathematical Methods for Physicists-AS.171.610 Numerical Methods-
Physics counts as a graduate-level course. In addition, AS.171.801
Independent Research- Graduates-AS.171.802 Independent Research-
Graduate may be substituted for any of the above-mentioned graduate
or undergraduate courses. The research course must include an essay
supervised and approved by a faculty member of the Department of
Physics and Astronomy.

The student must receive a grade of B- or above in each of the courses.
The graduate-level courses may be retaken once; the undergraduate
courses cannot be repeated.

Furthermore, the student must complete at least two semesters of
research projects, as described in the requirements for the Ph.D., and
complete the departmental research exam. The deadline to fulfill all
requirements is the date of the Ph.D. thesis defense.

Facilities

The Department of Physics and Astronomy’s first facility was Rowland’s
measuring engine for determining the solar spectrum in the 1880s. Ever
since that time the Department has maintained a long and continuous
history in instrumentation. In recent decades this has extended to
instrumentation for space missions. The Department maintains a
Class-1000 clean room for microfabrication and nanofabrication, a
high bay lab, professional and student machine shops, and supports a
world-renowned Instrument Development Group (IDG) with six full-time
engineers and three full-time machinists.

Among the diverse techniques used for studying condensed matter
physics are magnetometry/susceptometry, specific heat and transport
measurements, atomic force and magnetic force microscopy, X-ray and
electron diffraction, terahertz spectroscopy, and neutron scattering
at the nearby NIST Center for Neutron Research and at the Spallation
Neutron Source, ORNL. A variety of cryostats, He3 refrigerators, and
He3-He4 dilution refrigerators together with high temperature ovens,
electromagnets, and superconducting magnets allow measurements to
be made from 0.05 K to 1100 K and in magnetic fields up to 14 Tesla.
Apparatus for the preparation of samples includes two image furnaces
for floating zone growth, single-crystal growth vacuum furnaces, box
and tube furnaces, arc furnaces, several high vacuum and ultra-high
vacuum chambers for thin film fabrication using evaporation, MBE,
pulsed laser deposition, sputtering, and focused ion beam (FIB) milling.
Also available on campus are cutting-edge transmission electron
microscopes and scanning electron microscopes.

In astrophysics, research groups have state-of-the-art laboratories
for testing cryogenic transition-edge bolometer detectors with SQUID
read-out electronics, and closed-cycle helium cryocogens. Recent
instrumentation advances include the design and manufacture of large
free-standing polarization grids and novel high-bandwidth smooth-wall
feed horns. Current activities include development of microwave and
millimeter-wave instruments for far-infrared and microwave astronomy
and cosmology.

The research groups in the department have a wide range of state-of
the-art computer facilities including high performance clusters with over
a thousand processors and the largest database at a university—over a
petabyte. All undergraduate majors and graduate students have access
to high performance workstations.

Financial Aid

Students in good standing are normally supported by a combination of
fellowships, research assistantships and teaching assistantships. The
financial package covers full tuition, individual health insurance, and an academic year salary commensurate with that of other leading research institutions. Teaching assistantship is a common mode of financial support; experience in teaching is a valuable part of the Ph.D. program. A teaching assistantship supports the student during the academic year and is supplemented by a research assistantship during the summer. The assistant is expected to help in the teaching of the general physics course and other introductory and major courses. The typical teaching duties include leading a problem-solving section or laboratory exercises and homework grading. Research assistantships are based on the availability of funding to the research advisor and are arranged directly with him/her. Research assistantships provide an opportunity for deep engagement in ongoing experimental or theoretical research. In addition, the department and the University offer several fellowships on a competitive basis, some covering travel, supplies or research expenses and some covering a semester’s or a year’s worth of the entire financial package. Some students are supported by external fellowships, such as the pre-doctoral fellowship of the National Science Foundation.

All fellows and teaching and research assistants in the Department of Physics and Astronomy register as full-time students and thus fulfill their residence requirements while holding appointments. Loans and work-study arrangements are available from the Office of Financial Aid.

For current faculty and contact information go to http://physics-astronomy.jhu.edu/people/

**Faculty**

**Chair**

Timothy Heckman
Chair and A. Hermann Pfund Professor

**Professors**

Charles L. Bennett
Alumni Centennial Professor: experimental astrophysics; cosmology; radio/submillimeter/infrared astronomy; astronomical instrumentation.

Barry J. Blumenfeld
experimental high-energy physics; neutrino physics, hadron colliders.

Collin Broholm
Gerhard H. Dieke Professor (Director, Institute for Quantum Matter): experimental condensed matter physics, using neutron scattering.

Chia-Ling Chien
Jacob L. Hain Professor: experimental condensed matter physics, nanostructured solids.

Marc Kamionkowski
theoretical physics specializing in cosmology and particle physics.

David Kaplan
theoretical particle physics and cosmology.

Julian H. Krolik
theoretical astrophysics, particularly high-energy and relativistic astrophysics.

Robert Leheny
experimental condensed matter physics; disordered materials, soft matter.

Petar Maksimovic
experimental high-energy physics; hadron colliders.

David A. Neufeld
theoretical astrophysics, interstellar medium, astrophysical masers.

Colin A. Norman
theoretical and observational astrophysics.

Daniel H. Reich
experimental condensed matter physics; biological physics.

Adam Riess
Krieger Eisenhower Professor and Nobel Laureate: observations of physical cosmology, primarily through the use of distance indicators like supernovae; measurements of dark energy and the expansion history of the universe using optical and near-infrared instruments from space and the ground.

Mark O. Robbins
theoretical condensed matter physics; non-equilibrium processes, atomic origins of macroscopic phenomena.

Morris Swartz
experimental high-energy physics; precision tests of and searches for physics beyond the Standard Model.

Alexander Szalay
Bloomberg Distinguished Professor (Director, IDIES): theoretical astrophysics, galaxy formation.

Oleg Tchernyshyov
theoretical condensed matter physics.

Rosemary F. G. Wyse
astrophysics, galaxy formation and evolution (Director, Theoretical Interdisciplinary Physics and Astrophysics Center).

**Associate Professors**

N. Peter Armitage
experimental condensed matter physics.

Andrei V. Gritsan
experimental high-energy physics; colliders.

**Assistant Professors**

Jared Kaplan
effective field theory, particle physics, and cosmology.

Tobias Marriage
cosmology and astrophysics.

Brice Menard
extragalactic astrophysics, cosmology, large surveys.

Ari Turner
theoretical condensed matter physics.

Nadia Zakamska
observational and theoretical astrophysics.

**Research Professor**

Jonathan A. Bagger
Krieger-Eisenhower Professor: particle theory; theory and phenomenology of supersymmetry, supergravity, and superstrings.

Luciana Bianchi
observational astrophysics, nearby galaxies, stellar populations, hot stars, UV instrumentation.

William P. Blair
experimental astrophysics, supernova remnants; cataclysmic variable stars.

Paul D. Feldman
experimental astrophysics, spectroscopy, space physics, planetary and cometary atmospheres.

Michael Finkenthal
experimental plasma and atomic physics.

Holland Ford
experimental astrophysics; stellar dynamics, evolution of galaxies, active galactic nuclei, astronomical instrumentation.

Riccardo Giacconi
University Professor and Nobel Laureate: experimental astrophysics, extragalactic astronomy, the early universe.

Richard Conn Henry
Academy Professor (Director, Maryland Space Grant Consortium): astronomy and astrophysics.

Stephan McCandliss
experimental astrophysics; sounding rocket space astronomy in the far UV (Director, Center for Astrophysical Sciences).

H. Warren Moos
the interstellar medium; stellar processes; the solar system; space instrumentation.

Joseph Silk
Homewood Professor: cosmology.

Ethan Vishniac
theoretical astrophysics.

Harold Weaver
ultraviolet, optical, infrared, X-ray, and radio spectroscopy and imaging of comets, planets, and satellites.

Associate Research Professor
Tamas Budavari
observational cosmology, large-scale structure, galaxy clustering; data-intensive parallel computing.

Professors Emeriti
Bruce Barnet
experimental high energy physics; hadron colliders.

Chih-Yung Chien
experimental high-energy physics; hadron colliders.

Gabor Domokos
theoretical elementary particle physics, astroparticle physics.

Brian R. Judd
Gerhard H. Dieke Professor Emeritus: theoretical atomic and molecular physics, group theory, solid state theory.

Chung W. Kim
theory of elementary particles, nuclear theory, cosmology.

Susan Kovési-Domokos
theoretical elementary particle physics, astroparticle physics.

Yung Keun Lee
experimental nuclear physics.

Aihud Pevsner
Jacob L. Hain Professor Emeritus: experimental elementary particle physics.

J. C. Walker
experimental condensed matter physics, thin films and surfaces, nuclear physics.

Adjunct and Visiting Appointments
Ronald J. Allen
Adjunct Professor (Space Telescope Science Institute): observational astronomy; spiral structure of galaxies, interstellar medium, radio and optical imaging.

Michael Fall
Adjunct Professor (Space Telescope Science Institute): astrophysics.

Henry Ferguson
Adjunct Professor (Space Telescope Science Institute): observational cosmology, galaxy evolution, dwarf galaxies, space astronomy instrumentation, and calibration.

Michael G. Hauser
Adjunct Professor (Space Telescope Science Institute): infrared and submillimeter astronomy; interplanetary and interstellar medium; cosmology.

Ann E. Hornschemeier
Adjunct Assistant Professor (NASA Goddard Space Flight Center): studies of x-ray emission from star formation in galaxies at cosmologically interesting distances.

Roeland van der Marel
Adjunct Professor (Space Telescope Science Institute): extragalactic observational and theoretical astronomy; galaxy structure, dynamics, and formation; black holes.

Peter McCullough
Adjunct Associate Professor (Space Telescope Science Institute): astronomy.

Predrag Nikolic
Adjunct Assistant Professor (George Mason University): theoretical condensed matter physics.

Cedomir Petrovic
Adjunct Professor (Brookhaven National Laboratory): experimental condensed matter physics.

Ethan Schreier
Adjunct Professor (Associated Universities, Inc): astronomy.

Mark Stiles
Adjunct Professor (NIST): theoretical condensed matter physics.

Kimberly Weaver
Adjunct Professor (NASA Goddard Space Flight Center): experimental astrophysics.

Robert Williams
Adjunct Professor (Space Telescope Science Institute): observational astronomy; novae, emission nebulae.

**Joint Appointments**

Shiyi Chen
Professor (Department of Mechanical Engineering): statistical theory and computation of fluid turbulence; mesoscopic physics and lattice Boltzmann computational methods.

Gregory Eyink
Professor (Applied Mathematics and Statistics): mathematical physics, fluid mechanics, turbulence, dynamical systems.

Michael Falk
Associate Professor (Materials Science and Engineering): theoretical and computational research.

Tyrel McQueen
Associate Professor (Chemistry): solid state and inorganic chemistry/condensed matter physics.

Jack Morava
Professor (Mathematics): algebraic topology, mathematical physics.

Peter C. Searson
Professor (Materials Science and Engineering): electronic, nanophase, and semiconductor materials.

Darrell F. Strobel
Professor (Earth and Planetary Sciences): planetary atmospheres and astrophysics.

For current course information and registration go to https://isis.jhu.edu/classes/

**Courses**

**AS.171.101. General Physics: Physical Science Major I.**
First semester of two-semester sequence. In this term, the topics covered include the basic principles of classical mechanics and fluids as well as an introduction to wave motion. Recommended Corequisites: (AS.173.111) AND (AS.110.106 or AS.110.108 or AS.110.113). Midterm exams are given at 8am Fridays, so students must leave their schedules open at this time in order to be able to take these exams
Instructor(s): A. Gritsan
Area: Engineering, Natural Sciences.

**AS.171.102. General Physics: Physical Science Majors II.**
Second semester of two-semester sequence. In this term, the topics covered include wave motion, electricity and magnetism, optics, and modern physics. Recommended Corequisites: (AS.173.112) AND Calculus (AS.110.107 or AS.110.109 or AS.110.113). Midterm exams are given at 8am Thursdays, so students must leave their schedules open at this time in order to be able to take these exams
Prerequisites: A grade of C- or better in either Physics 1 or the two-semester sequence of Engineering Mechanics: AS.171.101 OR AS.171.103 OR AS.171.105 OR AS.171.107 OR EN.530.103
Instructor(s): M. Robbins
Area: Engineering, Natural Sciences.

**AS.171.103. General Physics I for Biological Science Majors.**
First-semester of two-semester sequence in calculus-based general physics, tailored to students majoring in one of the biological sciences. In this term, the topics covered include the basic principles of classical mechanics and fluids as well as an introduction to wave motion. Recommended Corequisites: (AS.173.111) AND (AS.110.106 or AS.110.108 or AS.110.113). Midterm exams are given at 8am Tuesdays, so students must leave their schedules open at this time in order to be able to take these exams
Instructor(s): C. Broholm
Area: Engineering, Natural Sciences.

**AS.171.104. General Physics/Biology Majors II.**
This two-semester sequence is designed to present a standard calculus-based physics preparation tailored to students majoring in one of the biological sciences. Topics in electricity & magnetism, optics, and modern physics will be covered in this semester. Midterm exams for every section are given during the 8 AM section time! Accordingly, students registering for sections at times other than 8 AM must retain availability for 8 AM sections as needed. Recommended Corequisite Background: C- or better in AS.171.101 or AS.171.103; Corequisite: AS.110.109, AS 173.112.
Instructor(s): N. Armitage
Area: Engineering, Natural Sciences.

**AS.171.105. Classical Mechanics I.**
An in-depth introduction to classical mechanics intended for physics majors/minors and other students with a strong interest in physics. This course treats fewer topics than AS.171.101 and AS.171.103 but with greater mathematical sophistication. It is particularly recommended for students who intend to take AS.171.201-AS.171.202. Recommended Corequisites: AS.173.115 and AS.110.108
Instructor(s): D. Reich
Area: Engineering, Natural Sciences.

**AS.171.106. Electricity and Magnetism I.**
Classical electricity and magnetism with fewer topics than 171.101-103, but with greater mathematical sophistication. Particularly recommended for students who plan to take AS.171.201-AS.171.202. Recommended Course Background: C- or better in AS.171.105; Corequisite: AS.173.116, AS.110.109
Instructor(s): C. Bennett
Area: Engineering, Natural Sciences.
AS.171.107. General Physics for Physical Sciences Majors (AL).

This two-semester sequence in general physics is identical in subject matter to AS.171.101-AS.171.102, covering mechanics, heat, sound, electricity and magnetism, optics, and modern physics, but differs in instructional format. Rather than being presented via lectures and discussion sections, it is instead taught in an "active learning" style with most class time given to small group problem-solving guided by instructors. Midterm exams for every section are given during the 8 AM section time! Accordingly, students registering for sections at times other than 8 AM must retain availability for 8 AM sections as needed. Recommended Corequisites: (AS.173.111) AND (AS.110.106 or AS.110.108 or AS.110.113) Priority given to Freshman
Instructor(s): R. Leheny
Area: Engineering, Natural Sciences.

AS.171.108. General Physics for Physical Science Majors (AL).

This two-semester sequence in general physics is identical in subject matter to AS.171.101-AS.171.102, covering mechanics, heat, sound, electricity and magnetism, optics, and modern physics, but differs in instructional format. Rather than being presented via lectures and discussion sections, it is instead taught in an "active learning" style with most class time given to small group problem-solving guided by instructors. Priority in registration will be given to freshmen.
Recommended Course Background: A grade of C- or better in either Physics I or the first semester of Engineering Mechanics (AS.171.101 OR AS.171.103 OR AS.171.105 OR AS.171.107 OR EN.530.103)
Prerequisites: Corequisite: (AS.110.107 OR AS.110.109 OR AS.110.211 OR AS.110.113)
Instructor(s): P. Maksimovic
Area: Engineering, Natural Sciences.

AS.171.111. Exploring the Building Blocks of the Universe.

Ever wonder what everything is made of at the smallest level? What is dark matter? What is causing the universe to accelerate? These are some of the questions that physicists at the Large Hadron Collider at CERN are trying to answer. In this course, you'll get hands on experience looking at real LHC data while learning about the current theory of particle physics and the inner workings of the LHC.
Instructor(s): A. Cocosor
Area: Natural Sciences.

AS.171.113. Subatomic World.

Introduction to concepts of physics of the subatomic world: Symmetries, relativity, quanta, neutrinos, particles, and fields. Emphasis on ideas of modern physics, not on the mathematics. Intended for nonscience majors.
Instructor(s): B. Blumenfeld
Area: Natural Sciences.

AS.171.118. Stars and the Universe: Cosmic Evolution.

This course looks at the evolution of the universe from its origin in a cosmic explosion to emergence of life on Earth and possibly other planets throughout the universe. Topics include big-bang cosmology; origin and evolution of galaxies, stars, planets, life, and intelligence; black holes; quasars; and relativity theory. The material is largely descriptive, based on insights from physics, astronomy, geology, chemistry, biology, and anthropology. Course website: http://henry.pha.jhu.edu/stars.html. Recommended Course Background: High school, algebra, geometry, trigonometry.
Instructor(s): A. Riess
Area: Natural Sciences.

AS.171.120. Physics of Modern Technologies.

This course for non-scientists offers accessible non-mathematical explanations of modern technologies: electric power generation and distribution (AC versus DC), florescent lighting, lasers, computers, the internet, GPS, and student suggested topics.
Area: Natural Sciences.

AS.171.123. How to build an iPhone: physics in modern life.

As the famous author Arthur C. Clarke posited, “Any sufficiently advanced technology is indistinguishable from magic.” The goal of this course is to understand the workings of and the science behind modern technologies such as the iPhone, internet, GPS, and others. We will discuss the technology itself, as well as the story of how it came to be and the people involved. Emphasis will be on the ideas behind these technologies, not the mathematics. Intended for both nonscience and science majors, every attempt will be made to keep any math at the level of simple algebra.
Instructor(s): C. Morris; L. Pan
Area: Natural Sciences.

From an ancient Chinese musician and mathematician accused of “doing violence to numbers” to a composer who teaches computers to write like Bach, follow the struggle to use scientific tools to understand and enhance the beauty in music and art. Learn how sounds and images can manipulate your brain to inform, entertain, or deceive. Create your own aural and optical illusions. Study the workings of autotune, perfect pitch, MP3s, and art created by genetic algorithms.
Instructor(s): D. Allan
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.171.125. It's not magic, it's physics: Extraordinary Experiments.

Students will learn key concepts of everyday physics through experimentation. They will design, build, and run experiments themselves. The course will be graded on participation and a graded final presentation.
Instructor(s): M. Valdivia Leiva
Area: Natural Sciences.

AS.171.126. Introduction to Cosmology.

How did the universe begin? When will it end? How big is the universe? What is dark matter and dark energy? This course provides an introduction to the field of cosmology: the study of the origin and evolution of the universe. We will discuss the big bang, cosmic inflation, dark matter and dark energy, the formation of galaxies, and other cosmological topics. This course is for anyone who has looked up at the night sky and wondered where we came from.
Instructor(s): B. Bozek
Area: Natural Sciences.

AS.171.128. Introduction to Cosmology.

How did the universe begin? When will it end? How big is the universe? What are dark matter and dark energy? This course will introduce the field of cosmology: the study of the origin and evolution of the universe. Topics will include the big bang, cosmic inflation, dark matter and dark energy, and the growth of structure (galaxies, galaxy clusters, etc.). This course is open to all.
Instructor(s): M. Gralla
Area: Natural Sciences.
AS.171.130. The Radio Sky.
Modern astronomy relies on observations of the sky across the full electromagnetic spectrum. This course will explore the sky at radio wavelengths much longer than those we see with our naked eye. Topics will include pulsars, super-massive black holes and active galactic nuclei, the birth of the universe, and dark matter. As an integral part of the course, students will use the JHU Small Radio Telescope in the Bloomberg Center to make observations of our galaxy. This course is open to all, but a familiarity with algebra and geometry is assumed. Instructor(s): T. Essinger-Hileman Area: Natural Sciences.

AS.171.131. Physics and Technology in Society.
This course presents technology and science issues and how they shape public policy. Students will learn how industries carry out scientific research while exploring the interactions between the scientific community and policy makers. Instructor(s): M. Valdivia Leiva Area: Natural Sciences.

Could you explain why rainbows form an arc or how it is possible to bend light to make an object invisible? This course aims to clearly explain some of the most beautiful optical phenomena encountered in nature or in a lab by teaching simple physics principles and using in-class demonstrations. The course is not math intensive and, rather, seeks to help the student gain an appreciation for the basic principles behind these optical effects without becoming lost in complex mathematics. An emphasis will be placed on current research that directly makes use of the physics underlying the phenomena. The ultimate goal of this course is to show students that physics is powerfully beautiful and to build their appreciation for it. Area: Natural Sciences.

AS.171.200. Magnetoehronic Materials and Devices.
Area: Engineering, Natural Sciences.

AS.171.201. Special Relativity/Waves.
Course continues introductory physics sequence (begins with AS.171.105-AS.171.106). Special theory of relativity, forced and damped oscillators, Fourier analysis, wave equation, reflection and transmission, diffraction and interference, dispersion. Meets with AS.171.207. Prerequisites: Corequisite: AS.110.202 OR AS.110.211; (AS.171.106 OR AS.171.108 OR AS.171.102 OR AS.171.104) AND Calculus II (AS.171.107 OR AS.171.109 OR AS.171.113) Instructor(s): N. Zakamska Area: Engineering, Natural Sciences.

Course completes four-semester introductory sequence that includes AS.171.105-AS.171.106 and AS.171.201. Planck’s hypothesis, de Broglie waves, Bohr atom, Schrodinger equation in one dimension, hydrogen atom, Pauli exclusion principle, conductors and semiconductors, nuclear physics, particle physics. Instructor(s): A. Turner Area: Natural Sciences.

AS.171.204. Classical Mechanics II.

AS.171.205. Introduction to Practical Data Science: Beautiful Data.
The class will provide an overview of data science, with an introduction to basic statistical principles, databases, fundamentals of algorithms and data structures, followed by practical problems in data analytics. Recommend Course Background: Familiarity with principles of computing. Instructor(s): S. Szalay Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.171.207. Special Relativity.
Three-week introduction to special relativity for students who elect to take AS.171.209 in place of AS.171.201. Prerequisites: Corequisite: AS.110.202 OR AS.110.211; Prerequisite: (AS.171.106 preferred OR AS.171.108 OR AS.171.102 OR AS.171.104) AND (AS.110.107 OR AS.110.109 OR AS.110.113) Instructor(s): N. Zakamska Area: Natural Sciences.

AS.171.216. The Unsolved Mysteries of the Cosmos.
While our knowledge of the universe has expanded greatly over the past century, there are some very basic problems that stump astronomers to this very day. In this course, we will explore some of the unsolved mysteries that astronomers are actively working on, including the formation of planets to the composition of the universe. This course is directed towards non-physical science majors, but open to all. Instructor(s): M. Rahman Area: Natural Sciences.

AS.171.218. Spacetime and Black Holes.
This is an introductory course on special relativity, concluding with a brief discussion of black holes. We will learn the bizarre predictions of Einstein’s theory—time dilation, length contraction, etc.—and how they are not so bizarre when viewed as spacetime geometry. We discuss how curved geometries give rise to gravitation and black holes. This course is for students who are comfortable with mathematics, including single-variable calculus, and have had some exposure to basic mechanics, such as provided by a freshman physics course or a good high school physics course. Instructor(s): S. Gralla Area: Natural Sciences, Quantitative and Mathematical Sciences.

The ancient art of origami is now a science, with much recent mathematical development. It is related to astronomy and cosmology, as well: origami rules applied in 3D instead of 2D help to understand how matter in the universe assembles gravitationally into galaxies and patterns of galaxies. Topics include origami mathematics, cosmology, and their intersection. A firm grasp of geometry and trigonometry, and some familiarity with mathematical proofs would be helpful. Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.171.301. Electromagnetic Theory II.
Static electric and magnetic fields in free space and matter; boundary value problems; electromagnetic induction; Maxwell’s equations; and an introduction to electrodynamics. Prerequisites: Prereqs: (AS.171.102 OR AS.171.104 OR AS.171.106 OR AS.171.108 OR AS.171.211) AND Calculus III (AS.110.202 OR AS.110.211) AND Linear Algebra (AS.110.201 OR AS.110.212) Instructor(s): A. Gritsan Area: Natural Sciences.
AS.171.303. Quantum Mechanics I.
Fundamental aspects of quantum mechanics. Uncertainty relations, Schrodinger equation in one and three dimensions, tunneling, harmonic oscillator, angular momentum, hydrogen atom, spin, Pauli principle, perturbation theory (time-independent and time-dependent), transition probabilities and selection rules, atomic structure, scattering theory.
Prerequisites: (AS.171.202 AND AS.171.204) AND (AS.110.201 OR AS.110.212) AND (AS.110.202 OR AS.110.211)
Instructor(s): C. Chien
Area: Natural Sciences.

AS.171.304. Quantum Mechanics II.
Instructor(s): O. Tchernyshyov
Area: Natural Sciences.

AS.171.309. Wave Phenomena with Biophysical Application.
Introduction to wave phenomena, primarily through study of biophysical probes that depend on the interaction of electromagnetic radiation with matter. Topics include Fourier Analysis; standing waves; sound and hearing; diffraction and crystallography; geometrical and physical optics - the physics of modern light microscopy; quantum mechanics - how living things absorb light; NMR and MRI. Occasional laboratory exercises are included.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): D. Reich
Area: Natural Sciences.

AS.171.310. Biological Physics.
Introduces topics of classical statistical mechanics. Additional topics include low-Reynolds number hydrodynamics and E&M of ionic solutions, via biologically relevant examples.
Prerequisites: (AS.171.106 OR AS.171.108 OR AS.171.102 OR AS.171.104) AND (AS.110.107 OR AS.110.109 OR AS.110.113)
Instructor(s): M. Robbins
Area: Natural Sciences.

AS.171.312. Statistical Physics/Thermodynamics.
Undergraduate course that develops the laws and general theorems of thermodynamics from a statistical framework.
Prerequisites: AS.171.202 and Calculus II (AS.110.107 or AS.110.109 or AS.110.113). It is recommended that students have also taken Quantum Mechanics (AS.171.303), Linear Algebra (AS.110.201 or AS.110.212) and Calculus III (AS.110.202 or AS.110.211)
Instructor(s): N. Armitage
Area: Natural Sciences.

AS.171.313. Introduction to Stellar Physics.
Survey of stellar astrophysics. Topics include stellar atmospheres, stellar interiors, nucleosynthesis, stellar evolution, supernovae, white dwarfs, neutron stars, pulsars, black holes, binary stars, accretion disks, protostars, and extrasolar planetary systems. Recommended Course Background: AS.110.108-AS.110.109, AS.171.202
Instructor(s): R. Wyse
Area: Natural Sciences.

AS.171.314. Introduction to Galaxies and Active Galactic Nuclei.
This course will introduce student to the physics of galaxies and their constituents: stars, gas, dust, dark matter and a supermassive black hole in the central regions.
Prerequisites: AS.171.105 AND AS.171.106 AND AS.110.108 AND AS.110.109
Instructor(s): R. Wyse
Area: Natural Sciences.

AS.171.316. Data Analysis Techniques in Modern Astronomy.
To learn about the stars, galaxies and universe, astronomers are collecting more and more photons by using increasingly powerful telescopes. In light of the data deluge seen in Astronomy and many other disciplines, data analysis will be the key to answer some of the most profound questions in science. In this course, we will survey the main data analysis techniques in Astronomy from the olden days to the modern times. We will see how astronomers extract information about the universe by analyzing images and spectra, and what questions they have answered. We will learn about the current SQL database, data mining and machine learning approaches. Programming demonstrations or hands-on exercises will be provided.
Instructor(s): C. Yip.

Topics include space astronomy, remote observing of the Earth, space physics, planetary exploration, human space flight, space environment, orbits, propulsion, spacecraft design, attitude control and communication. Crosslisted by Departments of Earth and Planetary Sciences, Materials Science and Engineering and Mechanical Engineering. Recommended Course Background: AS.171.101-AS.171.102 or similar; AS.110.108-AS.110.109.
Instructor(s): J. MacKenty; S. McCandliss
Area: Engineering, Natural Sciences.

AS.171.322. Physics of Human Energy Use.
Course explores the basic nature of energy and heat, the physical principles underlying how we derive energy from various sources (fossil fuels, nuclear power, solar energy, and others), and the physics of energy production's environmental consequences.
Instructor(s): J. Krolik
Area: Natural Sciences.

AS.171.333. Planets, Life and the Universe.
This multidisciplinary course explores the origins of life, planets' formation, Earth's evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions and planetary protection. Meets with AS.171.699.
Prerequisites: Students may not register for this class if they have already received credit for AS.020.334 or AS.270.335.
Instructor(s): C. Norman
Area: Engineering, Natural Sciences.

The course is aimed on undergraduate students in Physics, Chemistry, and Material Science and Engineering. The course will give an introduction to Raman scattering vibrational spectroscopy, instrumentation, and vibrational spectroscopy analysis for characterization of materials. For practical work participants will be divided in small groups to perform Raman scattering measurements on various samples, will learn to do basic analysis of the data, and will discuss their results in the final mini-presentation. Recommended Course Background: AS.171.101 and AS.171.102, or AS.171.103 and AS.171.104, or AS.171.105. AS.171.106
Area: Engineering, Natural Sciences.
Undergraduate course covering basic concepts of condensed matter physics: crystal structure, diffraction and reciprocal lattices, electronic and optical properties, band structure, phonons, superconductivity and magnetism. Co-listed with AS.171.621 Recommended Course Background: AS.171.304, AS.110.201-AS.110.202.
Instructor(s): A. Turner
Area: Natural Sciences.

AS.171.406. Condensed Matter Physics. 3 Credits.
Instructor(s): C. Broholm
Area: Natural Sciences.

AS.171.408. Nuclear and Particle Physics.
Basic properties of nuclei, masses, spins, parity. Nuclear scattering, interaction with electromagnetic radiation, radioactivity, Pions, muons, and elementary particles, including resonances. Recommended Course Background: AS.171.303
Instructor(s): B. Blumenfeld
Area: Natural Sciences.

AS.171.410. Physical Cosmology.
This course provides an overview of modern physical cosmology. Topics covered include: the contents, shape, and history of the universe; the big bang theory; dark matter; dark energy; the cosmic microwave background; Hubble's law; the Friedmann equation; and inflation. Recommended Course Background: (AS.171.101-AS.171.102), or (AS.171.103-AS.171.104), or (AS.171.105-AS.171.106), or (AS.171.107-AS.171.108), or equivalent.
Instructor(s): C. Bennett
Area: Natural Sciences.

AS.171.411. Light and Optics.
What is light? How does it propagate and interact with matter? How do we use it to transmit information? How does technology make use of light? This course is designed for majors in physics as well as other science and engineering departments.
Prerequisites: Prereqs: AS.171.102 OR AS.171.104 OR AS.171.106
Instructor(s): B. Menard
Area: Engineering, Natural Sciences.

AS.171.413. Magnetic Materials and Spintronics.
Explore magnetic materials, the results of interactions of spin and charge of electrons, and spintronic phenomena, such as interlayer coupling, giant magnetoeresistance, spin tunneling, spin transfer torque, spin Hall effect.
Prerequisites: AS.171.202 and AS.171.301
Instructor(s): C. Chien
Area: Natural Sciences, Quantitative and Mathematical Sciences.

Instructor(s): C. Norman
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.171.420. Imaging in Astronomy.
How are astronomical images made? How do we design an imaging system? What technologies are necessary to take images across the electromagnetic spectrum? This course aims to address these questions and deliver a basic understanding of imaging in astronomy, in two parts. First we will outline the fundamental physics of imaging and how an image is formed. Then we will discuss how imaging is approached in practice.
Prerequisites: Prereq: AS.110.106
Instructor(s): A. Greenbaum
Area: Engineering, Natural Sciences.

Students will learn to work with databases, write parallel analysis code with emphasis on Graphics Processing Units (CUDA), and explore new approaches to data processing, namely streaming and robust statistics. Students should have basic knowledge of C/C++ and Introduction Numerical Methods. Co-taught with AS.171.628
Instructor(s): T. Budavari
Area: Natural Sciences, Quantitative and Mathematical Sciences.

Course will be a combination between an introduction to plasma physics and an overview of the basic atomic processes which determine the properties of hot, laboratory and astrophysical plasmas. Undergraduate students may register online for this course and will be assigned 3 credits during the add/drop period. Co-taught with AS.171.872
Instructor(s): M. Finkenthal
Area: Natural Sciences.

Students may register for independent research with a faculty member in the Department of Physics and Astronomy. A research plan should be sent to the Director of Undergraduate Study before the add/drop date that includes project details, the number of hours of effort each week and the number of credits. This course may not be used for one of the two electives required for a BA, but one semester of research may be used as one of four focused electives in a BS program.
Instructor(s): Staff.

Research done in senior year in conjunction with experimental equipment of intermediate laboratory or as special project in research group. Credit for independent study given to junior and senior students who act as tutors.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): Staff.

AS.171.503. Senior Thesis.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Physics and Astronomy. This course may only be taken for credit during one semester. However, students are expected to have engaged in their research project during previous semesters through 171.501-502, summer research, etc. This course may not be used as one of the two electives required for a BA, but can be used as one of the four focused electives in a BS program. Open to senior department majors only.
Instructor(s): R. Wyse; Staff; T. Marriage.

AS.171.504. Senior Thesis.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Physics and Astronomy.
Instructor(s): O. Tchernyshyov; R. Leheny; Staff; T. Marriage.

AS.171.570. Research - Interession.
Instructor(s): A. Riess; P. Maksimovic; T. Marriage.

AS.171.595. Internship.
Instructor(s): Staff.

AS.171.597. Independent Research.
Instructor(s): Staff.
Using basic physics—order of magnitude estimates, scaling arguments, and similar devices—to understand the gist of complicated natural systems. Examples will be selected from properties of materials, geophysics, weather, astrophysics, cosmology, biomechanics, technology of various sorts, etc. Open to upper-level undergraduates and graduates.
Instructor(s): J. Krolik.
Area: Natural Sciences.

AS.171.603. Electromagnetic Theory.
Theory of the Maxwell equations, with static and dynamic applications, boundary-value problems, guided and free waves, diffraction, scattering, special relativity, electron theory.
Instructor(s): J. Krolik.

Theory of the Maxwell equations, with static and dynamic applications, boundary-value problems, guided and free waves, diffraction, scattering, special relativity, electron theory.
Instructor(s): G. Domokos.

AS.171.605. Quantum Mechanics.
Review of wave mechanics and the Schrodinger equation, Hilbert space, harmonic oscillator, the WKB approximation, central forces and angular momentum, scattering, electron spin, density matrix, perturbation theory (time-independent and time-dependent), quantized radiation field, absorption and emission of radiation, identical particles, second quantization, Dirac equation.
Instructor(s): M. Kamionkowski.

AS.171.606. Quantum Mechanics.
Review of wave mechanics and the Schrodinger equation, Hilbert space, harmonic oscillator, the WKB approximation, central forces and angular momentum, scattering, electron spin, density matrix, perturbation theory (time-independent and time-dependent), quantized radiation field, absorption and emission of radiation, identical particles, second quantization, Dirac equation. Recommended Course Background: AS.171.303 and AS.171.304
Instructor(s): M. Kamionkowski.

Selection of topics in applied mathematics most frequently used by physicists. First term focuses on analytic methods: functions of complex variables, series and perturbation methods for solving differential equations, Sturm-Liouville theory and special functions, Fourier series and transforms. Recommended Course Background: AS.110.201-AS.110.202
Instructor(s): C. Norman.
Area: Natural Sciences.

Topics in applied mathematics used by physicists, covering numerical methods: linear problems, numerical integration, pseudo-random numbers, finding roots of nonlinear equations, function minimization, eigenvalue problems, fast Fourier transforms, solution of both ordinary and partial differential equations. Undergraduate students may register online for this course and will be assigned 3 credits during the add/drop period.
Instructor(s): C. Norman.

AS.171.611. Stellar Structure & Evolution.
Basic physics of stellar structure and evolution will be discussed with emphasis on current research.
Instructor(s): D. Neufeld.

AS.171.612. Interstellar Medium and Astrophysical Fluid Dynamics.
Instructor(s): C. Norman.

AS.171.613. Radiative Astrophysics.
A one-term survey of the processes that generate radiation of astrophysical importance. Topics include radiative transfer, the theory of radiation fields, polarization and Stokes parameters, radiation from accelerating charges, bremsstrahlung, synchrotron radiation, thermal dust emission, Compton scattering, properties of plasmas, atomic and molecular quantum transitions, and applications to astrophysical observations.
Instructor(s): D. Neufeld.

AS.171.615. Galactic Structure and Stellar Dynamics.
Potential theory; stellar orbits, equilibrium of collisionless systems; stability of collisionless systems; disk dynamics and spiral structure; galactic rotation and the galactic potential; globular cluster evolution.

AS.171.617. Extragalactic Astronomy.
Establishing the extragalactic distance scale; kinematics of an expanding universe; light element nucleosynthesis; formation of the microwave background. Clusters of galaxies. The Hubble sequence and inventory of internal galactic structures: bulges, disks, star clusters; measurements of distance within the galaxy; stellar kinematics; stellar populations; chemical evolution.

AS.171.618. Observational Astronomy.
How do we observe the Universe at each wavelength and what do we see? This course will present the knowledge required for astronomical observations across the entire spectrum. For each wavelength range (gamma rays, X-rays, UV, visible, IR, radio) we will discuss the type of detector used, the range of possible observations and current open questions. We will also discuss the dominant astronomical and terrestrial sources across the spectrum, and study the differences between ground- and space-based observations.
Instructor(s): B. Menard.

An advanced graduate level course that emphasizes the importance of molecules in astrophysical environments as diverse as interstellar clouds, circumstellar outflows, cometary comae, and active galactic nuclei. Topics will include the chemistry and photochemistry of astrophysical molecules; molecular excitation; astrophysical masers; interstellar molecular clouds; interstellar shock waves; circumstellar outflows; cometary comae; molecular accretion disks.
Instructor(s): D. Neufeld.

This sequence is intended for graduate students in physics and related fields. Topics include: metals and insulators, diffraction and crystallography, phonons, electrons in a periodic potential, transport. Co-listed with AS.171.405
Instructor(s): A. Turner.

This sequence is intended for graduate students in physics and related fields. Topics include superconductivity, magnetism, metal-insulator transitions, low dimensional materials, quantized hall effect.
Instructor(s): C. Broholm.
AS.171.625. Experimental Particle Physics.
For graduate students interested in experimental particle physics, or theory students, or students from other specialties. Subjects covered: experimental techniques, including particle beams, targets, electronics, and various particle detectors; and a broad description of high energy physics problems. Undergraduate students may register online for this course and will be assigned 3 credits during the add/drop period.
Instructor(s): T. Budavari.

AS.171.626. Data Analysis: Theory & Practice.
Half theory, half practice with real data: signal/noise estimation, object detection, match filtering, bayesian techniques, principal component analysis, dimensionality reduction, data compression, outlier detection, parameter estimation, pattern recognition, visualization, clustering, tree codes, etc.
Instructor(s): R. Wyse.

AS.171.627. Astrophysical Dynamics.
This is a graduate course that covers the fundamentals of galaxy formation, galactic structure and stellar dynamics and includes topics in current research.
Instructor(s): R. Wyse.

AS.171.628. Practical Scientific Analysis of Big Data.
Students will learn to work with databases, write parallel analysis code with emphasis on Graphics Processing Units (CUDA), and explore new approaches to data processing, namely streaming and robust statistics. Students should have basic knowledge of C/C++ and Introduction Numerical Methods. Co-taught with AS.171.426
Instructor(s): T. Budavari.

AS.171.629. First Year Research.
Instructor(s): B. Menard; P. Maksimovic.

AS.171.630. First Year Research.
Instructor(s): P. Maksimovic.

The course will cover parallel computing on modern general-purpuse graphics processors. Graduate students will learn to design and implement scientific problems in C for CUDA, the Compute Unified Device Architecture. Students should have basic knowledge of C/C++.
Co-taught with AS.171.426 and AS.171.628.
Instructor(s): T. Budavari.

Many physical phenomena are difficult to model because they involve coupled processes on a wide range of length and time scales. This course will cover recent developments in multiscale methods for such phenomena. One focus will be hierarchical methods for coarse-graining models to fewer degrees of freedom. Atomicistic simulations may be used to construct molecular models, phase-field models or continuum models. A second focus will be methods for concurrently simulating different regions of space with different levels of spatial and temporal resolution. For example, interfacial regions or regions of high strain gradient may require different physical models and resolutions. Recommended Course Background: Course in Condensed Matter Physics, Statistical Mechanics, EN.550.695, or permission of the instructor.
Instructor(s): B. Menard; P. Maksimovic.

AS.171.641. Second Year Research.
Instructor(s): P. Maksimovic.

AS.171.642. Second Year Research.
Instructor(s): P. Maksimovic.

AS.171.646. General Relativity.
An introduction to the physics of general relativity. Principal topics are: physics in curved spacetimes; the Equivalence Principle; the Einstein Field Equations; the post-Newtonian approximation and Solar System tests; the Schwarzschild and Kerr solutions of the Field Equations and properties of black holes; Friedmann solutions and cosmology; and gravitational wave propagation and generation.
Instructor(s): D. Kaplan
Area: Natural Sciences.

Course will be a combination between an introduction to plasma physics and an overview of the basic atomic processes which determine the properties of hot, laboratory and astrophysical plasmas. Undergraduate students may register online for this course and will be assigned 3 credits during the add/drop period. Co-taught with AS.171.472
Instructor(s): M. Finkenthal.

AS.171.697. Astro-Particle Physics.
Topics include: Dark matter, dark energy, ultra-high energy cosmic rays, neutrino astrophysics, black holes, WIMPS, sterile neutrinos, axions, gamma ray bursts, particle acceleration, cosmic backgrounds, dark energy equation- of- state. Senior undergraduates with permission.

This multidisciplinary course explores the origins of life, planets' formation, Earth's evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions and planetary protection. Graduate students only. Meets with AS.171.333.
Instructor(s): C. Norman.
AS.171.732. Elementary Particle Physics.
Description TBA
Instructor(s): M. Swartz.

AS.171.750. Cosmology.
Review of special relativity and an introduction to general relativity, Robertson-Walker metric, and Friedmann equation and solutions. Key transitions in the thermal evolution of the universe, including big bang nucleosynthesis, recombination, and reionization. The early universe (inflation), dark energy, dark matter, and the cosmic microwave background. Development of density perturbations, galaxy formation, and large-scale structure.
Instructor(s): Staff.

Introduction to the use of neutron scattering techniques to probe atomic scale structure and dynamics of hard condensed matter.
Subjects covered include basic theory of nuclear and magnetic neutron scattering, neutron sources and instrumentation, polarized neutrons, Larmor labeling, structural refinement methods, surfaces and interfaces, group theoretical analysis of magnetic structures, phonons, magnetic excitations, and critical phenomena.
Prerequisites: AS.171.621 OR AS.171.622
Instructor(s): C. Broholm.

AS.171.755. Fourier Optics and Interferometry in Astronomy.
A course for advanced undergraduate and beginning graduate students covering the principles of optics and image formation using Fourier Transforms, and a discussion of interferometry and other applications both in radio and optical astronomy.
Instructor(s): R. Allen.

AS.171.756. Astrophysics of Compact Objects.
A graduate-level course devoted to the physical understanding of black holes, white dwarfs, neutron stars and associated objects. Many astrophysical observations will be discussed where these objects may be relevant including galactic nuclei, quasars, compact X-ray sources and gamma-ray bursts.

This course is designed for graduate students interested in learning the language, techniques, and problematic of modern quantum many-body theory as applied to condensed matter physics.

AS.171.783. Advanced Particle Theory.
Instructor(s): J. Kaplan.

AS.171.784. Advanced Particle Theory: “What to Expect at the LHC.”
The course will focus on scenarios and principles for new particle physics that can be tested at the CERN Large Hadron Collider and other particle experiments.
Instructor(s): D. Kaplan.

AS.172.114. Introduction To Frontier Physics.
Explores modern experimental methods and theoretical ideas in physics.
Area: Natural Sciences.

This seminar exposes physics majors to a broad variety of contemporary experimental and theoretical issues in the field. Students read and discuss reviews from the current literature, and are expected to make an oral or written presentation. Recommended Course Background: AS.171.101-AS.171.102, AS.171.103-AS.171.104, or AS.171.105-AS.171.106.
Instructor(s): N. Drichko
Area: Natural Sciences.

AS.172.601. Department Colloquium.
Instructor(s): D. Reich; Staff.

First year graduate students only. Intended for beginning graduate students. Study of the methods and results of modern physics and other topics of interest. Each student will discuss some phase of the subject.
Instructor(s): D. Kaplan.

Intended for beginning graduate students. Study of the methods and results of modern physics and other topics of interest. Each student will discuss some phase of the subject. Graduate students only.
Instructor(s): Staff.

AS.172.633. Language Of Astrophysics.
Survey of the basic concepts, ideas, and areas of research in astrophysics, discussing general astrophysical topics while highlighting specialized terms often used compared to physics.
Instructor(s): D. Neufeld.

During the Spring 2015 Planets Life and the Universe Seminar, we will read and discuss classic papers and (later in the semester) frontier research on the fundamental issues concerning the origin of Life on our planet Earth and Exoplanets in general. The recent Kepler mission has now shown that are typical earth-like planets around every typical star in the Universe-- giving almost Avagadro’s number of earthlike planets in our Universe. The study of Life in the Universe consequently becomes an observational science. The intellectual framework underpinning these endeavors becomes one of the central intellectual issues of our age (possibly any age!). We will have relaxed and enjoyable discussions of these topics on Friday afternoons. At times mathematical and physics based fluency will be useful. Recommended Course Background: AS.171.333/AS.171.699 or AS.020.334/AS.020.616
Instructor(s): Staff.
Nonspecialized seminar in which second-year graduate students discuss subjects of general interest, supplementing the material of the standard courses and including recent advances in physics.
Instructor(s): M. Swartz.

Nonspecialized seminar in which second-year graduate students discuss subjects of general interest, supplementing the material of the standard courses and including recent advances in physics.

AS.172.722. Hot Topics in Astrophysics.
Instructor(s): C. Norman.

AS.172.731. CAS Research Seminar.
Instructor(s): S. McCandliss.

AS.172.732. CAS Research Seminar.
Instructor(s): S. McCandliss.

Instructor(s): Staff.

AS.172.751. Elementary Particle Physics Seminar.
Instructor(s): A. Gritsan.

AS.172.752. Elementary Particle Physics Seminar.
Instructor(s): P. Maksimovic.

AS.172.753. Advanced Particle Theory Seminar.
Instructor(s): J. Kaplan.

AS.172.754. Advanced Particle Theory Seminar.
Instructor(s): J. Kaplan.

Instructor(s): N. Armitage.

Instructor(s): N. Armitage.

AS.173.110. Introduction to Labview.
This is a first course in programming LabVIEW for students with no programming experience. LabVIEW is widely used in research and industry for interfacing computers to instrumentation for data acquisition, analysis, and control. The topics emphasized are basic programming structures and best practices for programming in the LabVIEW environment. Additional topics are the basic concepts of working with digital signals, data acquisition, and signal processing. Lectures are interspersed with activities on using programming structures and on interfacing with equipment. Students should bring a USB memory stick to class.
Instructor(s): S. Wonnell
Area: Engineering, Natural Sciences.

AS.173.111. General Physics Laboratory I.
Experiments are chosen from both physical and biological sciences and are designed to give students background in experimental techniques as well as to reinforce physical principles.
Instructor(s): C. Chien; J. Mumford
Area: Natural Sciences.

AS.173.112. General Physics Laboratory II.
Experiments are chosen from both physical and biological sciences and are designed to give students background in experimental techniques as well as to reinforce physical principles. Recommended Course Background: AS.173.111; Corequisite: AS.171.102 or AS.171.104 or AS.171.108
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Chien; J. Mumford
Area: Natural Sciences.

AS.173.115. Classical Mechanics Laboratory.
Experiments chosen to complement the lecture course Classical Mechanics I, II AS.171.105-AS.171.106 and introduce students to experimental techniques and statistical analysis. Corequisite: AS.171.105.
Instructor(s): C. Chien
Area: Natural Sciences.

AS.173.116. Electricity and Magnetism Laboratory.
Experiments chosen to complement Electricity and Magnetism AS.171.106 and introduce students to experimental techniques and statistical analysis. Corequisite: AS.171.106.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Chien; J. Mumford
Area: Natural Sciences.

Students will learn key concepts of everyday physics through experimentation. They will design, build, and run experiments themselves. The course will be graded on participation and a graded final presentation.
Instructor(s): M. Valdivia Leiva
Area: Natural Sciences.

AS.173.308. Advanced Physics Laboratory.
A broad exposure to modern laboratory procedures such as holography, chaos, and atomic, molecular, and particle physics. Corequisite: AS.171.106.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): T. Marriage
Area: Natural Sciences.

AS.173.311. Mentoring in General Physics Laboratory.
This course provides students who have taken General Physics I and II and General Physics Laboratory I and II with the opportunity to mentor new students in General Physics Laboratory I and II. Mentors collaborate with General Physics laboratory Teaching Assistants to interact with students to help them to complete laboratory assignments and to master the concepts of General Physics. Mentors must have a strong background in Physics. They are expected to interact with students during one three-hour laboratory section per week and to attend the associated TA training once per week. Permission of the instructor required. S/U only.
Prerequisites: AS.173.111 and AS.173.112
Instructor(s): C. Chien
Area: Natural Sciences.
AS.173.312. Mentoring in General Physics Laboratory.
This course provides students who have to take General Physics I and II and General Physics Laboratory I and II with the opportunity to mentor new students in General Physics Laboratory I and II. Mentors collaborate General Physics laboratory Teaching Assistants to interact with students to help them to complete laboratory assignments and to master the concepts of General Physics. Mentors must have a strong background in Physics. They are expected to interact with students during one three-hour laboratory section per week and to attend the associated TA training once per week. Permission of the instructor required. S/U only.
Prerequisites: AS.173.111 AND AS.173.112; Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Chien
Area: Natural Sciences.

AS.173.608. Advanced Laboratory.
Experiments carried out on cosmic rays, X-ray scattering Mössbauer effect, atomic beams, and optical spectroscopy.
Instructor(s): T. Marriage.

Cross Listed Courses

Chemistry
The course is designed to provide the essential principles and concepts underlying the modern study of the structure and properties of solids in bulk crystals, thin films, and nanoscale objects. Topics include basic crystallography, structure determination by x-ray, neutron, and electron diffraction, fundamental concepts of bonding in solids, lattice dynamics, electronic band structure, magnetism, and strongly correlated electron behavior. Particular emphasis is placed on the impact of the structure, dimensionality, and electron count on electrical and magnetic properties (electric conduction, superconductivity, thermoelectricity, etc.). More course info available at <a href="http://occamy.chemistry.jhu.edu">http://occamy.chemistry.jhu.edu/</a>.
Cross-listed with Physics and Astronomy
Instructor(s): T. Mcqueen.

Applied Mathematics Statistics
This course explores common issues around computational analysis of massive data. We will learn about numerical inaccuracies in calculations, work with databases, and venture out into parallel computing (multi-threading and CUDA). Students will be introduced to streaming algorithms and elements of robust statistics.
Instructor(s): T. Budavari
Area: Natural Sciences, Quantitative and Mathematical Sciences.

EN.550.693. Turbulence Theory.
An advanced introduction to turbulence theory for graduate students in the physical sciences, engineering and mathematics. Both intuitive understanding and exact analysis of the fluid equations will be stressed. Students should have previous familiarity with fluid mechanics.
Instructor(s): G. Eyink.

Political Science
The programs of the Political Science Department are designed to help students attain a deeper understanding of politics and civic life in its various dimensions. The department encourages students to become sophisticated theoretically and to study politics in global and comparative perspective. We divide the curriculum into American Politics, Comparative Politics, Political Theory, and International Relations (and Law and Politics at the graduate level). Students are encouraged to develop expertise in several of these areas.

The department has 22 faculty members. The undergraduate program offers a broad range of courses about politics and government at local, state, national, and international levels. In addition to taking courses on the Homewood campus, students can do independent research under the guidance of a faculty mentor, take courses at the Nitze School of Advanced International Studies (SAIS) in Washington, D.C., and participate in the Aitchison Public Service Undergraduate Fellowship Program at the Johns Hopkins Washington Center.

Intellectual Orientation
In addition to our work within the traditional fields of Political Science, faculty research engages four clusters of activity that cut across the various subfields while speaking to core questions of politics: power and inequality, identities and allegiances, agency and structures, and borders and flows.

Power and Inequality
In many ways, political science is the study of power. This includes the wide array of rules, authority structures, and forms of violence at the local, national, transnational and international levels, as well as how the value, distribution, and accumulation of resources create conditions of security and insecurity among nation states, regions, economic classes, or populations.

Identities and Allegiances
A second cluster of research centers on questions of identity and the various allegiances and attachments organized around them. These include how racial, ethnic, gender, and sexual identities inform citizenship and nationalism, the organization of civil society, or the formation of social movements.

Agency and Structure
A third cross-cutting area of activity in the department explores questions of agency and structures. Agency includes entrepreneurship, innovation and creative action, and the agency of material things. Structures include formal and informal institutions, particularly the rules, roles, and regulations that guide human relations in the public, private, and non-profit worlds, among states and within them, at the global level and in local communities.

Borders and Flows
A fourth cluster examines borders and flows. Research in this area examines the movement of people, ideas, material objects, and natural forces across space and over time. A focus on borders and flows informs the study of territorial regimes, sovereignty, religious intensities, immigration and diasporas, globalizing capital, information, and ecological politics.

Political Science courses can contribute to two different majors:

Major in Political Science
The major in political science described below is designed for students interested in intensive study of the institutions, theory, and problems of politics, government and modern political culture.
Major in International Studies

The department contributes to an interdisciplinary program leading to B.A. or B.A./M.A. degrees in International Studies. This program and its requirements are described under International Studies (p. 433).

Requirements for the B.A. Degree

(See also Requirements for a Bachelor’s Degree (p. 20).)

The requirements for the political science major listed below apply to those students who entered the University in Fall 2014 and later. Students who entered prior to Fall 2014 should refer to the archived catalog (http://web.jhu.edu/registrar/catalog) based on their year of entry into the institution. All courses applied towards the major must be taken for a letter grade and only one letter-graded independent study of 3 credits may apply towards the major (unless honors thesis). All students may write a thesis, regardless of GPA, provided that it receives a grade of C or higher, including courses taken in the first semester of freshman year. A maximum of four courses may come from transfer credit and only one letter-graded independent study of 3 credits may apply towards the major (unless honors thesis). The Department of Political Science does not award credit for the Advanced Placement Exam in government.

Subfield Courses

<table>
<thead>
<tr>
<th>Course Type</th>
<th>Credits</th>

<tr>
<td>Seven political science courses at the 300- or 400-level</td>
<td>21</td>
</tr>
</tbody>
</table>

Cognate Courses

Four elective courses (at any level) selected from the following areas: history, history of art, history of science & technology, philosophy, anthropology, geography, economics, sociology, or psychology | 12 |

Honors Thesis Program

Seniors also have the opportunity to write a senior research thesis. To be eligible to write this thesis, seniors must have taken at least one (1) research-focused political science course (R) in their junior year (senior year with special permission). Once the student identifies a faculty sponsor who will supervise the project the students will enroll in a three credit independent study during the fall semester of their senior year. If at the end of the fall semester adequate progress has been made and the project warrants further work, the student must enroll in a three credit senior theses colloquium course.

Students who complete a senior thesis and have a final major GPA (including final semester grades) of 3.7 will be awarded departmental honors. All students may write a thesis, regardless of GPA, provided they have a detailed proposal approved by a faculty member at the beginning of the fall semester of their senior year.

All thesis-related courses apply to the total of twelve (12) political science courses required for graduation in the major.

For thesis requirements applicable to students who entered the university prior to Fall 2014, please contact the department.

Graduate Program

The preparation of the next generation of scholars in the field of political science is a key part of the Political Science Department faculty’s commitment to research and advancing the understanding of politics. The doctoral program reflects the distinctive strengths of the department’s cross-cutting intellectual orientations (encompassing the themes of power and inequality, identities and allegiances, agency and structure, and borders and flows), realized in faculty and Ph.D student research and teaching. The Johns Hopkins University Political Science Department is known for its strength in theory and in innovative and trans-disciplinary approaches to uncovering new knowledge, and the program of doctoral study draws on these strengths to provide rigorous training. Our program is designed for highly qualified, intellectually curious and creative graduate students who can benefit from learning from and contributing to this community of scholars. Doctoral students develop in-depth knowledge of a major field and a minor field (or two major fields), chosen from American Politics, Comparative Politics, International Relations, Law and Politics, and Political Theory. In addition, doctoral students may complete a certificate in Comparative Racial Politics. Students have opportunities to work closely with faculty and to pursue independent research, and faculty and doctoral students benefit from strong connections with colleagues in other social science and humanities disciplines and opportunities to collaborate with them.

The department and Krieger School of Arts and Sciences provide opportunities for developing teaching and other career-related skills. The Johns Hopkins University Homewood campus and Baltimore provide an attractive setting and vibrant neighborhood.

Admission

The department admits approximately 9 to 11 new graduate students each year, selecting them from the approximately 200 applications that it receives annually. The deadline for application for admission to graduate study and the award of financial assistance is January 15 (most years). Decisions are made exclusively in late February or early March and announced by March 15. A B.A., B.S., or their equivalent, and results of the Graduate Record Examination are required for application. Students whose native language is not English must take the TOEFL examinations or provide other evidence of fluency in English (such as a degree from an institution in which the language of instruction is English.) A broad background in the liberal arts and sciences is preferred. Further information can be found at http://grad.jhu.edu/apply/application-process/.

Financial Aid

The department ordinarily provides financial aid to all students admitted to the graduate program unless they hold fellowships from sources outside the university. Departmental fellowships cover full tuition and an annual stipend. Assuming satisfactory progress toward the Ph.D., students can normally expect to receive funding for five years. All students receiving financial aid are expected to serve as teaching assistants for one semester of each academic year.
Requirements for the Ph.D. Degree
The requirements for the Ph.D. are divided between those that must be satisfied by all candidates for that degree and those particular to the student’s major and minor fields.

Department-wide Requirements
All candidates for the Ph.D. must satisfy the following requirements:

Course Requirements
A minimum of 12 semester courses at the 600-level with a grade of B or better. At least 10 of these must be in the Krieger School’s Department of Political Science.

Foreign Language Requirement
All students must demonstrate successful completion of four semesters of college-level foreign language instruction or its equivalent, or pass a translation test administered by an appropriate faculty member. (This requirement is waived for foreign students who are native speakers of a language other than English.

Comprehensive Examination Requirement
Students are required, at a minimum, to take comprehensive exams in one major field and one minor field. Students may also elect to take two major exams or a major exam and two minor exams (one of which may be outside the Department of Political Science). Faculty in the field write and evaluate the exams and determine the format. Major field comprehensive exams take place over two days (8 hours per day); minor field exams take place over one day. The fields within the department are: American Politics, Law and Politics, Political Theory, Comparative Politics and International Relations.

Students choosing a second minor outside the Political Science Department must devise a coherent program of study in that discipline, in consultation with their Political Science faculty advisor and with faculty from the other department. Students choosing an external minor must complete a minimum of three courses at the 600 level in the external minor’s discipline, earning a grade of B or better. They must also pass a comprehensive examination prepared and evaluated in consultation with faculty of the Department of Political Science by the instructors in those courses.

Dissertation
The dissertation is the capstone of doctoral education, and it must be a substantial work of independent scholarship that contributes to knowledge in the student’s field of study. Preparation of the dissertation will be supervised and must be approved by two members of the faculty, at least one of whom (the dissertation director) must be a member of the Department of Political Science.

Defense
The final examination of the dissertation will take the form of a defense conducted under the rules of the Graduate Board of The Johns Hopkins University.

Field-specific requirements
Field-specific basic expectations, procedures, and requirements are stated below. These are implemented, interpreted, and adjusted in the light of the intellectual orientations and objectives of individual students. It is of great importance that students work closely with their advisors and with the faculty in their major and minor fields in constructing and pursuing their programs of study.

American Politics
Students majoring and minoring in American Politics will work with at least two faculty members to develop a plan of study that includes recommended course work and other preparation needed to pass a comprehensive exam. Students completing a major are expected to demonstrate a breadth of knowledge sufficient for framing a dissertation in the relevant disciplinary literature and teaching undergraduate courses in the field; students who pursue a minor may focus more narrowly on an area of study in which they demonstrate fluency. These may include, but are not limited to, the following areas of faculty interest:

- American Political Institutions (Congress, Courts, and the Executive)
- Urban Politics
- American Political Development
- Race and Politics
- Political Behavior and Public Opinion
- Public Policy
- American Political Thought
- Political Parties and Elections

In addition, students majoring in the field are strongly encouraged to take AS.190.602 Introduction to Quantitative Political Science as part of their course of study.

Comparative Politics
All students majoring and minoring in this Comparative Politics will become conversant with major substantive and methodological debates in the field, and be able to comment on the key theoretical literature in several of those debates. They will normally also develop knowledge of at least one world region. Students majoring or minoring in Comparative Politics are required to take AS.190.625 Theories of Comparative Politics and at least one seminar in quantitative or qualitative methods. We expect all students to master the material covered in these courses, as well as others with more specialized topics.

Students will take a comprehensive exam that will test their ability to engage with several areas of theoretical debate in Comparative Politics, and their ability to use comparative examples to support their arguments. Students may focus on (but are not limited to):

- Civil Society
- Institutional Theories
- Transnational Relations, Social Movements, and Contentious Politics
- Political Parties, Interest Groups, Representation, and Political Behavior
- Comparative Political Economy
- Comparative Racial Politics, Nationalism, and Migration and Citizenship
- The Political Economy of Development
- Economic and Political Transitions
- Ideas and Politics

Within the spirit of this division of the overall field, students may propose alternative delineations of thematic subfields.
Students working in specific thematic and substantive subfields within Comparative Politics will be required to demonstrate competence in methodologies and bodies of theory judged by the faculty to be necessary for quality research and teaching in those subfields.

International Relations
All students majoring or minoring in International Relations will be required to be conversant with the major theoretical, substantive, and methodological themes and debates of the field. It is strongly recommended that students take As 190.676 Field Survey of International Relations and a methods course. Students majoring in International Relations will take an examination covering two subfields. The first subfield must be International Politics. The other subfield is to be determined in consultation with faculty teaching International Relations. Choices include but are not restricted to:

- International Law and Diplomacy
- International Relations Theory
- International Security Studies
- Global Political Economy

Students minoring in International Relations will take a comprehensive examination in International Politics.

Political Theory
Students majoring in Political Theory will take a comprehensive examination covering the following two subfields:

- Contemporary Political Theory
- History of Political Thought

Each student preparing for a major comprehensive exam will propose six or seven thinkers in the history of thought, six or seven recent or contemporary thinkers, and three or four issue areas. Examination questions are composed in light of the theorists and issues articulated in the exam prospectus.

The minor comprehensive exam in political theory asks the student to select half the number of thinkers required for the major exam and three issue areas.

Preparation for these examinations will be arranged in consultation with relevant faculty.

Students majoring in political theory will also take at least one minor field from American Politics, Law and Politics, Comparative Politics, or International Relations.

Law and Politics
Law and Politics focuses on American constitutional thought, judicial politics, law and society, and philosophy of law and jurisprudence. Students learn not only about the history and context of American constitutional developments but also about the operation of the judicial branch of government in the past and the present, how courts and judges do their work, and how that work has changed. In addition, students explore how legislation as well as course decisions reflect and influence groups, and professional networks help to shape law’s content and implementation. Students may major or minor in Law and Politics. In either case, students work closely with at least two members of the faculty to develop a plan of study regarding coursework and additional reading to prepare them for comprehensive exams. Majors are expected to demonstrate a breadth of knowledge in the field sufficient for framing a dissertation and for teaching undergraduate courses; minors may focus more narrowly on a particular area of study.

Certificate in Comparative Racial Politics
The graduate certificate program in Comparative Racial Politics is designed to help train graduate students who are developing empirically based and/or theoretically informed scholarship on citizenship, racism and immigration in contemporary societies, whether in a single national society or cross-spatially. There are two required courses: Comparative Racial Politics, and Qualitative Methods. In addition the student must take two electives from this (preliminary) list:

- Nationalism
- Comparative Citizenship and Immigration
- Politics
- Topics in Black Political Thought
- Race and Political Theory
- Civil Society
- States, Regimes and Governmentality
- American Political Development
- Political Economy of Development

Progress Toward the Ph.D.
The time necessary to obtain a Ph.D. in the department varies according to the preparation individual students bring to the program, the scope and complexity of their dissertation topics, and other factors. Students are required to make satisfactory progress, meaning that they must work toward fulfilling the requirements in a timely manner. Students are encouraged to satisfy the department’s foreign language requirement by the time of their first comprehensive exam. Most students take their comprehensive examinations in the third year in the program. Students who have completed all requirements except the dissertation must work to complete their dissertations as quickly as is reasonable given the unique circumstances of their course of study, and they must periodically demonstrate progress on the dissertation.

The Master of Arts degree is offered only to students who have been admitted into the Ph.D. program. For the M.A., the student must complete at least seven one-semester courses at the 600-level with a grade of B or better, and demonstrate an effective reading knowledge of one approved foreign language.

For current faculty and contact information go to http://politics.jhu.edu/directory/

Faculty
Chair
Adam Sheingate
American Politics, Comparative Politics

Professors
Jane Bennett
Political theory, American political thought, ecophilosophy.

William E. Connolly
Krieger-Eisenhower Professor: political theory, international relations.

Steven R. David
Professor and Vice Dean for Undergraduate Education: international relations, security studies, comparative politics.

Benjamin Ginsberg
David Bernstein Professor and Director of the Washington Center for the Study of Government: American government and politics, political development.

Michael Hanchard
SOBA Presidential Professor and co-director of the Racism, Immigration and Citizenship Program: comparative politics, political theory.

Richard Katz
Comparative Politics (parties, elections, European politics), American Politics

Margaret E. Keck
Comparative politics, international relations (Latin American politics, the environment, social movements).

Renée Marlin-Bennett
International relations, political economy of information.

Kellee S. Tsai
Professor and Vice Dean for Humanities, Social Sciences, and Graduate Programs: comparative politics, political economy of development, Chinese politics, international political economy.

Associate Professors
Samuel Chambers
Political theory, feminist and queer theory, cultural politics.

Erin Chung
Charles D. Miller Associate Professor of East Asian Politics and co-director of the Racism, Immigration and Citizenship Program: comparative politics, East Asian politics, international migration, comparative racial politics.

Jennifer L. Culbert
Political theory, jurisprudence.

Daniel H. Deudney
International relations, political theory.

Nicolas Jabko
Comparative politics, international political economy, European politics.

Adam Sheingate
American politics, comparative politics.

Lester Spence
Black politics, race and politics, urban politics, American political behavior and public opinion.

Steven Teles
Social policy, law and public policy, political analysis.

Assistant Professors
Bentley Allan
International relations, science and politics, global governance, global environmental politics.

P.J. Brendese
Political theory, comparative political thought, race and politics.

Sebastian Mazzuca
Political Economy, Comparative Politics, Latin American Politics and Economy

Daniel Schlozman
American politics, political parties, and the welfare state.

Sebastian Schmidt
International Relations, Security Studies

Emily Zackin
Constitutional law, American politics.

Professors Emeriti
Joseph Cooper
Legislative politics, executive-legislative relations, institutional theory.

Matthew A. Crenson
Urban government, American political development.

Richard E. Flathman
Professor Emeritus and George Armstrong Kelly Professor: political theory, legal philosophy.

Joel B. Grossman
Constitutional law, law and politics, American politics.

Adjunct Faculty
Robert Freedman
Arab-Israeli politics and Russian politics.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.190.101. Introduction to American Politics.
This course examines the ideals and operation of the American political system. It seeks to understand how our institutions and politics work, why they work as they do, and what the consequences are for representative government in the United States. Emphasis is placed on the federal government and its electoral, legislative, and executive structures and processes. As useful and appropriate, attention is also given to the federal courts and to the role of the states. The purpose of the course is to understand and confront the character and problems of modern government in the United States in a highly polarized and plebiscitary era.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

AS.190.102. Introduction To Comparative Politics.
To understand politics, the sound bites of the modern media take us only so far. In this course, we will take a step back and implement an intellectually rigorous method. Scholars of comparative politics use the method of comparison in order to illuminate important political phenomena of our times. Following this method, we will embark on a scholarly tour of the world and compare the politics of various countries. We will also trace these politics back to their historical sources. We will work from the assumption that there is something to be gained from such comparisons across space and time.
Instructor(s): N. Jabko
Area: Social and Behavioral Sciences.
AS.190.104. International Politics.
Intensive analysis of major approaches to international politics (realism, liberalism, Marxism). Topics include: anarchy, geopolitics, states, nations, balance of power, hegemony, empire, democratic peace, regimes, nuclear weapons, European Union.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

This seminar deals with questions pertaining to the formation of modern German nationalism and national identity through the perspective of German politics and history. This case study focused seminar will provide students with a framework to research wider questions on nationalism and political identity. Freshmen Only.
Instructor(s): F. Bauwens
Area: Humanities, Social and Behavioral Sciences.

AS.190.106. International Relations in East Asia.
International Relations Theory as a discipline emerged out of Western political and social thought on how global coexistence and governance ought to be as--thus the discipline tends to privilege the Western experience and seek to apply Western categories to non-Western regions of the world. Through examining the history of Asia’s encounter with the West in the reconfiguration of international relations in East Asia (through the influence of Western expansion into Asia as well as the impact of Japan’s Westernization effort) this course emphasizes the need for a plural, open and critical thinking of how we theorize global politics so as to cultivate an appreciation of multiplicity of experiences including that of the non-West. Freshmen Only.
Instructor(s): H. Koyama
Area: Social and Behavioral Sciences.

AS.190.107. Socrates and Political Subjectivity.
This course will analyze the political subjectivity of Socrates using three rhetorical positions: Buffoon, Judge, and Sage. Students will analyze the Socratic habitation of these roles and discern their political content by reading and analyzing Socratic dialogues, and by comparing the character of Socrates with the contemporary political figures of the Dalai Lama, Malcolm X and Stephen Colbert. Readings include Plato’s Apology, Crito, selections from Plato’s Gorgias and Xenophon’s Memorabilia, speeches given by the the Dalai Lama and Malcolm X, and interviews with Stephen Colbert.
Area: Humanities, Social and Behavioral Sciences.

AS.190.108. Freshmen Seminar: The Human Condition.
This freshman seminar will focus on reading just one book, The Human Condition, by Hannah Arendt. Such a narrow focus is justified by the breadth of topics the book itself discusses and the influence these various discussions have had on modern political thought. Among the various topics that will be studied and talked about are the meaning of the distinctions Arendt makes between “public,” “private,” and “social,” as well as between “labor,” “work,” and “action.” In the course of their studies, students will be challenged to think about the relation of philosophy to politics, the significance of the scientific revolution for public life, the character of contemporary society, and what it means to be “free.” Also, by focusing on just one book, students will have the opportunity to learn how to do the kind of close reading and textual analysis success in college requires. In addition to reading assignments, students will be required to write four short papers.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

This course examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. We analyze two enduring themes of classic and contemporary scholarship in comparative politics: development and democracy. The purpose is to introduce students to the various schools of thought within comparative politics as well as to the central debates concerning East Asian politics.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.110. American Politics in Film.
This class uses film to explore a central question in American politics: what is the relationship between the public and those who endeavor to represent them? Over the course of several weeks, we will address this question by viewing Mr. Smith Goes to Washington, A Face in the Crowd, The Candidate, Wag the Dog, and The Ides of March. We will use these films to discuss how political institutions, the media, and money shape our politics. We will also consider how the representation of politics in film has changed over time.
Instructor(s): A. Sheingate
Area: Social and Behavioral Sciences.

Exploration of how international and domestic political processes shape and are shaped by water - its availability, its trajectory, and its quality. Students will learn to use different research methods and writing strategies. Class will involve seminar discussions and fieldtrips to sites in and around the Baltimore area, some carried out jointly with Anthropology.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

When Thomas Piketty published _Capital in the Twenty-First Century_ last spring, he made the rounds on talk shows just like a movie star with a new film out, or a rock star with an album about to drop. How is such an “event” possible, and what does it tell us about the book’s subject, capital? This class explores the questions Piketty’s book raises: What is capital? How does it come about, how does it function, and what are its effects?
Instructor(s): S. Chambers
Area: Humanities, Social and Behavioral Sciences.

AS.190.206. Global Environmental Politics.
This course will combine empirical, theoretical, and moral perspectives to explain and understand global environmental problems such as climate change and worldwide biodiversity decline. In the first part of the course, we will examine the central social, economic, and political causes of ecological problems. In the second part, we will analyze proposed solutions to these problems at the local, national, and global levels.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences.

AS.190.207. Political Freedom, Race and Resistance.
This course examines core questions about the relationship between political power and political freedom. A critical investigation of how resistance to racial inequality has been expressed in political theory and political practice will illuminate and contest the limits and possibilities for political freedom today.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.
This course will provide a critical examination of the role of music in political and social change. We will be especially concerned with the correspondences between musical innovations and their capacities to inspire and shape social movements as their capacity to address to the politics of race and sexuality, radical democratic resistance, etc. We will also explore how music is utilized to advance agendas that are anti-democratic, such as the transnational spread of white supremacist groups, the glorification of violence, and exclusionary nationalism.
Instructor(s): P. Brendese
Area: Humanities, Social and Behavioral Sciences.

AS.190.209. Contemporary International Politics.
An introduction to international politics. Emphasis will be on continuity and change in international politics and the causes of war and peace. The first half of the course will focus on events prior to the end of the Cold War, including the Peloponnesian War, the European balance of power, imperialism, the origins and consequences of WWI and WWII, and the Cold War. The second half will focus on international politics since 1990, including globalization, whether democracies produce peace, the impact of weapons of mass destruction, terrorism, and the prospects for peace in the 21st century. Theories of realism and liberalism will also be considered.
Instructor(s): S. David
Area: Social and Behavioral Sciences.

An introduction to legislative politics and policymaking in the US, and their place in the political system. Special attention to issues of representation, and the consequences of institutional design.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences.

AS.190.211. Intro Political Econ I.
This historically oriented course examines the politics of “the economy” through an examination of the major contributions to the “political” study of the economy from the 17th century to the present.
Prerequisites: Students who are taking or have taken AS.190.216 are not eligible to register for AS.190.211.
Instructor(s): I. Kamola
Area: Social and Behavioral Sciences.

AS.190.213. International Politics.
Intensive analysis of major approaches to international politics (realism, liberalism, Marxism). Topics include: anarchy, geopolitics, states, nations, balance of power, hegemony, empire, democratic peace, regimes, nuclear weapons, European Union. (IR)
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.216. Global Political Economy.
This lecture course explores the governance of the global economy, focusing on rules and institutions affecting global trade and finance, development, the environment, production, and resources.
Prerequisites: Students who are taking or have taken AS.190.211 or AS.190.235 are not eligible to register for AS.190.216.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.220. Global Security Politics.
Contemporary and emerging technologies of nuclear (weapons, terrorism, energy) outer space (missiles, missile defense, asteroids), biosecurity (bioweapons, pandemics, terrorism) and cyber (war, spying, surveillance) and implications for security, international politics, arms control, and political freedom.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.225. Introduction to International Studies.
Instructor(s): S. Grovogui
Area: Social and Behavioral Sciences.

Global problems like poverty, financial instability, human rights abuses, and climate change threaten both international order and human well-being. In the absence of a world state, these problems must be addressed by an increasingly complex, transnational network of organizations and social groups. First, we will aim to understand and explain how global problems are governed through detailed case studies of International Organizations and Non-Governmental Organizations such as the United Nations, World Bank, Intergovernmental Panel on Climate Change, Amnesty International and more. Second, we will critically evaluate the successes and failures of these organizations and explore the possibilities for improving democratic governance at the global level.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences.

AS.190.227. U.S. Foreign Policy.
This course will provide analysis of US foreign policy with a focus on the interests, institutions, and ideas underpinning its development. While the course will offer a broader survey, the emphasis will be on important developments during the Cold War, such as the articulation of containment strategies and nuclear deterrence, and the analysis of contemporary foreign policy questions, including the problems of terrorism and failed states. In addition to security issues, attention will also be paid to significant developments in international trade policy.
Instructor(s): S. Schmidt
Area: Social and Behavioral Sciences.

AS.190.228. The American Presidency.
This course is an introduction to the study of the presidency. It assumes a basic understanding of the American political system as provided in a course such as Introduction to American Politics or its equivalent. We explore the evolution of the modern presidency, how contemporary presidents operate in the political system, and the sources of successful presidential leadership.
Instructor(s): A. Sheingate
Area: Social and Behavioral Sciences.

AS.190.230. Introduction to the European Union.
This lecture course introduces students to the European Union (EU) by examining the history and institutions in order to understand the EU’s policies, strengths and weaknesses. Requires extensive reading, midterm, final.
Prerequisites: Students who have taken AS.180.233 are not eligible to register.
Instructor(s): A. McCartney
Area: Social and Behavioral Sciences.
AS.190.235. Introduction to International Political Economy.
Focusing on the politics of international economic relations, this course examines how political economics differs from "regular" economics. Alternative analytical and theoretical perspectives are examined. Requires extensive reading, mid-term, final.
Prerequisites: AS.180.101 and AS.180.102; Students who have taken 190.301 (Global Political Economy) are ineligible to register for this class.
Area: Social and Behavioral Sciences.

AS.190.265. Comparative Political Behavior.
An introduction to the study of political behavior, emphasizing electoral behavior in democratic countries.
Instructor(s): R. Katz
Area: Social and Behavioral Sciences.

AS.190.266. Religion, Economics and Terror.
This course will engage a series of questions about how religion and fear are used as tools of political power that shape human values and desires in an age of neoliberal capitalism.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.280. Political Persuasion.
An introduction to Euro-American political thought, with a focus on the role of language, rhetoric, and Eros within politics. Texts by Plato, Machiavelli, Hobbes, Walt Whitman, and Emma Goldman.
Instructor(s): J. Bennett
Area: Social and Behavioral Sciences.

AS.190.281. Virtue, Labor, and Power (Classics of Political Thought II).
This is not a class in the history of political thought. Instead, it is an opportunity for a selective, circumscribed, but very focused engagement with some of the most powerful and provocative texts in that history. We will read selections from six thinkers (Socrates, Machiavelli, Locke, Marx, Nietzsche, and Foucault), focusing on three themes (Virtue, Labor, and Power). These texts have all profoundly shaped the way we think about politics, and they are texts that resonate with our own political problems today.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences.

AS.190.282. Authority and Liberty (Classics of Political Thought III).
Beginning with Plato, and using Nietzsche's history of metaphysics as a guide, this course serves as an introduction to Euro-American political thought by analyzing the philosophical foundations of political authority. In addition to works by Plato and Nietzsche, readings will include works by Kant, Mill, Hart, and Foucault.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.283. The Politics of Memory (Classics of Political Thought IV).
Was George Orwell right that those who control the past control the future—and those who control the present control the past? This is a course on the politics of memory: how political power shapes what is available to be remembered, the timing, spaces, and occasions of commemoration, and who is permitted to invoke (or disavow) the past. We will engage a range of highly contested works of ancient, modern and contemporary political theory to investigate how the past might haunt present day politics through memories that are conscious and unconscious. The themes we will take up include: the correspondence between memory and freedom; whether we ever be free given that we are creatures endowed with memory, whether it is sometimes politically necessary (or even possible) for people to forget, and what politics of memory emboldens, or threats, democracy. There are no prerequisites for this course.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.300. Class Politics.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.301. Global Political Economy.
Examines the intersection of politics and economics in global affairs. Focuses on theoretical approaches to global political economy; institutions of governance of the global political economy; flows of goods, services, capital, and information; and transborder problems.
Recommended Course Background: AS.190.209
Prerequisites: Not open if you have previously taken AS.190.216.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.302. How to be a Capitalist.
Everyone usually assumes that they know what capitalism is and how it works. Yet some of us often make very poor choices given the framework of a capitalist system, and many of us continually express shock and outrage over outcomes and results that are perfectly reasonable (and to be expected) given the operation of capitalism.
This advanced seminar will engage with readings in political theory and political economy that explore the fundamental logic of capitalism. Previous course in Political Theory or Instructor's Permission.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences.

AS.190.303. The Cultural Politics of Television.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences.

AS.190.304. Constructivism: How Ideas Shape International Relations.
In this course we will explore the power of culture, symbols, and values in global politics. We will achieve a deep understanding of constructivist theories by way of their important contributions to the study of historical change, war and peace, ethnic and religious conflict, international economics, human rights, environmental politics, and global justice movements.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences.
AS.190.306. The Political Economy of European Union.
The existence of the European Union has come to profoundly shape the governance of Europe’s national economies. In the context of a rapidly changing global economy, the EU has helped its member states to modernize their economies. At the same time, the EU has become the locus of important problems and tensions, as the eurozone crisis vividly illustrates. Going back to the foundation of the European Union, this course will survey developments in the political economy of the EU and put them in a theoretical perspective.
Instructor(s): N. Jabko
Area: Social and Behavioral Sciences.

AS.190.307. Race, Politics and Literature.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

The course will cover three topics: 1) The conceptualization of political regime, democracy and authoritarianism. We will also consider neighboring concepts of other macro-political structures—government, state, and administration—in order to be able to demarcate what is distinctive about the study of political regimes. 2) The characterization of political regimes in most Western and some non-Western countries, in history and today. We will centrally focus on the so-called “Waves of Democratization,” but we will also consider stories with less happy outcomes, that is, processes that led to the breakdown of democracies and the installation of repressive dictatorships. 3) The explanation(s) of the stability and change of political regimes around the world.
Theoretical accounts of regime change come in many flavors—emphasis on economic versus political causes, focus on agents and choices versus structures and constraints, international versus domestic factors, among others. We will consider most of them.
Instructor(s): S. Mazzuca
Area: Social and Behavioral Sciences.

AS.190.310. The Political Economy of Order and Prosperity.
The course offers an introduction to the relation between politics and economics in the long run by focusing on the interaction between order and prosperity. A central topic is the effects of macro-political institutions, like types of regime and state, on the capacity of societies to generate wealth and redistribute it. The course will also examine the political impact of economic performance across countries, for instance: how do economic booms and recessions affect democratic governance? The course provides the essential conceptual and theoretical tools for the analysis of political economy processes and outcomes.
Instructor(s): S. Mazzuca
Area: Social and Behavioral Sciences.

AS.190.311. Disposable People: Race, Immigration and Biopolitics.
This course will explore theories and practices of race and immigration in order to illuminate the proliferation of populations regarded as disposable in contemporary politics. We will pay special attention to the contestable criteria used to determine eligibility for membership in the human race. We shall also examine how political power influences the relays between citizenship status and those whose lives are worthy of protection, and those who should be allowed to die.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.313. Dreams of America.
An exploration of recurrent themes and aspirations in American political thought, focused around three (interconnected) versions of the American dream: Tabula Rasa, Upward Mobility, and Landed Independence.
Instructor(s): J. Bennett
Area: Social and Behavioral Sciences.

AS.190.315. Asian American Politics.
This course examines issues of political identity, political incorporation, and political participation of Asian Americans. Themes include Asian American panethnicity, the struggle for immigration and citizenship, Asian American electoral politics, political activism and resistance since the 1960s, and the impact of Asian Americans on the politics of race and ethnicity in the United States.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.320. Politics Of East Asia.
Examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. Topics include state-society relations, late development, nationalism, democratization, political culture, social movements, and globalization.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.323. Introduction to International Law.
A limited survey of international law, its sources, and uses in international relations. It has five basic aims: 1) to explore the place, origins and changing contexts of international law and its instrumentality in international life; 2) to examine the sources of personalities and institutions that influence its development; 3) to survey select international legal dispositions concerning the peaceful resolutions of conflict and the immunities that apply to certain legal subjects; 4) to examine the immunities that apply to certain legal subjects; 5) to examine differing views on the future of international law in light of recent events.
Instructor(s): S. Grovogui
Area: Social and Behavioral Sciences.

AS.190.326. Democracy And Elections.
An examination of most aspects of democratic elections with the exception of the behavior of voters. Topics include the impact of various electoral systems and administrative reforms on the outcome of elections, standards for evaluations of electoral systems, and the impact of the Arrow problem on normative theories of democratic elections.
Instructor(s): R. Katz
Area: Social and Behavioral Sciences.

AS.190.327. Global and Local Politics of Information.
Considers global and comparative politics of information, information technologies, and the Internet. Examines governance of information (ownership of information, rights to information, privacy) and governance of information technologies (domain names, social media websites, etc.). Students who previously took AS.190.327 Politics of Information may not take this course.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.
This course examines the impact of weapons of mass destruction on international politics with an emphasis on security issues. The first half of the course focuses on the history of nuclear weapons development during the Cold War and theories of deterrence. The second half of the class considers contemporary issues including terrorism, chemical and biological weapons, ballistic missile defense and proliferation. Requirements include a midterm, final and a ten page paper.
Instructor(s): S. David
Area: Social and Behavioral Sciences.

This course introduces students to the major debates and issues of postwar Japanese politics. Topics include nationalism, electoral politics, civil society, and immigration.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.331. Comparative Racial Politics.
Students will learn to utilize qualitative, interpretive methods of comparative politics to examine dynamics of racial and/or ethnic politics in the nation-states of Cuba, Brazil, Britain and France, Germany, and the United States. Readings will emphasize the role of the state, political economy, national culture, racist ideologies and anti-racist politics in the formation, maintenance and transformation of conditions of race-based inequalities. Students will also become familiar with theories and concepts of race and ethnicity, and the histories of social movements in the aforementioned societies founded, in part, on racial and/or ethnic identification as a response to inequality. Formerly titled: Race and Racism in Comparative Perspective.
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.

An exploration of free speech, privacy, and equality issues through readings, discussion, and student research.
Instructor(s): J. Grossman
Area: Social and Behavioral Sciences.

AS.190.333. American Constitutional Law.
This course covers enduring debates about the way the Constitution has structured the U.S. government and about which powers the Constitution assigns to the federal government and to the states. We will examine these debates in the context of American political history and thought by studying the writings of prominent participants, and landmark Supreme Court cases.
Instructor(s): E. Zackin
Area: Social and Behavioral Sciences.

AS.190.334. Constitutional Law.
The second semester of a two semester course. Topics include executive and emergency power, racial and gender equality, and selected free speech and religious freedom issues.
Prerequisites: AS.190.333
Instructor(s): E. Zackin
Area: Social and Behavioral Sciences.

AS.190.335. Imagining Borders.
What is a border and why do borders matter in global politics. What do borders mean under conditions of globalization? An examination of the politics of borders, transborder flows, and networks within and across borders. The readings which come from political science and other disciplines, will include theoretical and case-specific works.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.337. The Constitution and the Criminal Justice System.
Explores how the Constitution has shaped the theory and practice of the American criminal justice system, including arrests, searches and seizure of evidence, interrogation, prosecution, adjudication and plea bargaining, and sentencing. What is a “fair trial?” What is “due process?” What is “equality before the law?” “What are the limits of capital punishment?
Instructor(s): L. Foley
Area: Social and Behavioral Sciences.

Recommended Course Background: AS.190.214
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.340. Black Politics I.
This course is a survey of the bases and substance of politics among black Americans and the relation of black politics to the American political system up to the end of Jim Crow. The intention is both to provide a general sense of pertinent issues and relations over this period as a way of helping to make sense of the present and to develop criteria for evaluating political scientists’ and others’ claims regarding the status and characteristics of black American political activity.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.341. Korean Politics.
This course introduces students to the historical and institutional foundations of modern South Korean politics. Topics include nationalism, political economic development, civil society, globalization, and ROK-DPRK relations. (CP)
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.342. Black Politics II.
Recommended Course Background: AS.190.340.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.343. Nationalism.
Despite the clamor over globalization and regionalization in the contemporary world, nationalism remains a central preoccupation for both political actors and students of politics. Though motivated by questions resonant within the discipline of political science (and the field of comparative politics in particular), this course is designed to familiarize students with key texts and debates in the literatures on nationalism in political science, sociology, history and anthropology. The objective of this course is to provide students with a comprehensive overview of major themes, scholarly approaches and forms of nationalist mobilization in national and cross-spatial perspective. Some of the questions to be addressed in this course are a) what are the roots and routes of nationalism? b) who are nationalist political actors, and where do they come from? c) what is nationalism’s relation to race, racism and ethnicity d) what is the relationship between various forms of nationalism and contemporary considerations of regionalism and globalization?
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.
**AS.190.344. Seminar In Anti-Semitism.**

Jews exercise a good deal of power in contemporary America. They are prominent in a number of key industries, play important roles in the political process, and hold many major national offices. For example, though Jews constitute barely two percent of America's citizens, about one-third of the nation's wealthiest 400 individuals are Jewish and more than ten percent of the seats in the U.S. Congress are held by Jews. One recent book declared that, “From the Vatican to the Kremlin, from the White House to Capitol Hill, the world's movers and shakers view American Jewry as a force to be reckoned with.” Of course, Jews have risen to power in many times and places ranging from the medieval Muslim world and early modern Spain through Germany and the Soviet Union in the 20th century. In nearly every prior instance, though, Jewish power proved to be evanescent. No sooner had the Jews become “a force to be reckoned with” than they found themselves banished to the political margins, forced into exile or worse. Though it may rise to a great height, the power of the Jews seems ultimately to rest on a rather insecure foundation. Cross-listed with Jewish Studies.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

**AS.190.354. Politics of Health Policy.**

Traces the evolution of the American Health care system, emphasis on the political forces that shape public and private provision of health care in the United States.
Instructor(s): P. Longman
Area: Social and Behavioral Sciences.

**AS.190.360. Power and Democracy in the American City.**

How do race and class intersect to shape how democracy works in American cities? In this innovative course students will learn about urban citizenship, authority, and activism using Baltimore as a case. The class, co-taught with Baltimore organizers, will use a community based learning approach.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

**AS.190.361. Political Structures of Europe.**

This course offers students a theoretical framework to analyze political structures of liberal democracies, and provides an analysis of the politics and political structures of individual European states. The course will survey the most important aspects of the legislative, executive, and judicial institutions and will relate this specifically to a large number of European case-studies (including Germany, Britain, France, the Low Countries, Scandinavia, Italy, Ireland, Spain, Portugal, Greece and more.)
Instructor(s): F. Bauwens
Area: Humanities, Social and Behavioral Sciences.

**AS.190.365. Black Politics: Black Lives Matter.**

Over the past two years the #blacklivesmatter movement has transformed the discussion about policing in American cities. In this course we will examine the broad movement against police brutality through the lens of black politics.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

**AS.190.368. Pluralism.**

This seminar will explore the theory and politics of pluralism: from European debates over religious tolerance to American debates over constitutional founding; from liberal political philosophy to radical democracy. Authors may include Bentley, Dahl, Locke, Madison, Ranciere, Rawls, Young. Recommended Course Background: Previous course in political theory or permission of instructor.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences.

**AS.190.380. The American Welfare State.**

This course analyzes the distinctive US welfare state in historical and comparative perspective. We begin with a survey of the policy context, an historical overview from the poorhouses through the Great Society, and a tour of welfare states across the rich democracies. We then survey developments - and explain the actual workings of policy - across jobs, education, welfare, pensions, and health care. We explore the institutional and political factors behind their divergent trajectories through conservative revival and the age of Obama. Students will write a seminar paper exploring policy development over time in a program or area of their choosing. Enrollment restricted to Social Policy minors only.
Prerequisites: AS.360.380
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences.

**AS.190.381. Global Environmental Politics.**

Instructor(s): B. Allan
Area: Social and Behavioral Sciences.

**AS.190.383. Baltimore Food System Research.**

This course examines the political, social, and economic aspects of the Baltimore food system. Through a mixture of in-class study and hands-on research, students learn about the challenges to healthy eating in Baltimore and some recent innovations designed to improve health and nutrition in the city. Visits to a soup kitchen, an urban farm, and local farmers market will inform a collaborative project using various social science research methods learned in class.
Instructor(s): A. Sheingate
Area: Social and Behavioral Sciences.

**AS.190.384. Urban Politics & Policy.**

An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross-listed with Africana Studies
Instructor(s): L. Spence; R. Katz
Area: Social and Behavioral Sciences.

**AS.190.385. Urban Politics and Policy.**

An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross listed with Africana Studies.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

**AS.190.387. Parties and Elections in America.**

Considers how parties and elections structure political conflict, and facilitate (or not) democratic control of government. Topics include campaigns, voting behavior, election administration, money in politics, presidential nomination, and party coalitions.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences.
An examination of the development of the modern Congress and the presidency. Emphasis will be placed on the evaluation of patterns of structure, process and leadership, and their impact on the roles of Congress in the American political system. (AP)
Instructor(s): J. Cooper
Area: Social and Behavioral Sciences.

AS.190.391. Time to Kill: Race, Punishment, Death and Desire.
This course examines the role of race in determining who deserves to be punished, the timing and occasions of punitive action and how long punishment should endure. Key to our inquiry is how racialized presumptions about human desire might justify punitive logics of power. The class explores inequalities in the distribution of punishment and death in order to illuminate how race shapes questions of whose time is more valuable, who lives and who dies, and ultimately whose lives count as human.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.392. Introduction to Latin American Politics.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

AS.190.393. Theories of Constitutional Interpretation.
In this course, we will read and discuss a variety of arguments about how best to interpret constitutional texts, with particular attention to debates about the U.S. Constitution. The course will also cover debates about the role of ordinary people, legislatures, and judges in determining the content of constitutional law.
Instructor(s): E. Zackin
Area: Social and Behavioral Sciences.

Contrary to the image most Americans have of their country, the United States is a tough nation with respect to crime. The U.S. has constructed a considerably more harsh criminal justice regime than any of its advanced industrial counterparts. In recent years, America’s prisons and jails have held more than one percent of the nation’s adults--2.3 million people--with many more on parole, probation or temporarily free on bail awaiting trial. In Western Europe, by contrast, fewer than two-tenths of one percent of the adult populace is behind bars. This enormous discrepancy in incarceration rates is more a function of the relative severity of America’s criminal laws than differences between Europe and the U.S. in the actual incidence of serious crime. And, of course, while Western European nations no longer execute convicted criminals, the U.S. remains committed to the use of capital punishment. We will explore these and related issues of crime and punishment in the U.S.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

This seminar explores the bumpy relations between contemporary capitalism and the Anthropocene—the two hundred year period when modern political economies have promoted rapid climate change. We examine different readings of capitalism in relation to the self-organizing capacities of climate, ocean currents, glaciers and other force-fields. We also explore the effects on late-modern life and different strategies to respond to them. Key texts: Hayek, Law, Legislation and Liberty, Pearce, With Speed and Violence, Lazzarato, The Rise of The Indebted Man, Hirsch The Social Limits to Growth, Klein, This Changes Everything, Connolly The Fragility of Things. Two 10-12 page essays. Previous course in theory or some near equivalent suggested.
Instructor(s): W. Connolly
Area: Natural Sciences, Social and Behavioral Sciences.

AS.190.397. States and Markets.
The course offers an introduction to the relation between politics and economics by focusing on the interaction between the two most important institutions of the modern world: states and markets. Under what conditions do states and markets combine to promote or damage human welfare? Essential concepts, theories and cases of economic development will be examined.
Instructor(s): S. Mazzuca
Area: Social and Behavioral Sciences.

AS.190.398. Politics Of Good & Evil.
The politics of good and evil places a set of classic myths into conversation with recent philosophical and political work on good and evil. The classic myths include the Book of Job, Genesis (J version) two dramas by Sophocles, a reading from Augustine, and Voltaire’s Candide. Texts by Nietzsche, William James and an essay by me are then placed into conversation with both each other and those classic texts. This class is organized around “elemental theory” in which diverse existential stories jostle and disturb each other. Previous work in theory is highly recommended. A class presentation, two 12 page papers, extensive class discussion.
Instructor(s): W. Connolly
Area: Social and Behavioral Sciences.

AS.190.399. Capitalism & Christianity.
Exploring the history of imbrications between capitalim and Christianity up to the contemporary era. Texts include the gospels, Calvin, Weber, Deleuze, George Gilder and Linda Kintz. Recommended Course Background: One course in theory or permission required.
Instructor(s): W. Connolly
Area: Social and Behavioral Sciences.

AS.190.401. International Relations Theory.
This seminar covers the main theoretical perspectives employed in the analysis of international politics, covering a variety of realist, liberal, and constructivist work. The strengths and weaknesses of different approaches will be assessed and contrasted with one another, with the goal being to provide students with a broad foundation on which to develop their own understandings. The course is open to graduate students and advanced undergraduates.
Instructor(s): S. Schmidt
Area: Social and Behavioral Sciences.
AS.190.405. Food Politics.
This course examines the politics of food at the local, national, and global level. Topics include the politics of agricultural subsidies, struggles over genetically modified foods, government efforts at improving food safety, and issues surrounding obesity and nutrition policy. Juniors, seniors, and graduate students only. Cross-listed with Public Health Studies.
Instructor(s): A. Sheingate
Area: Social and Behavioral Sciences.

AS.190.406. The Executive Branch.
In the 19th Century America was noted for its courts, political parties and representative institutions. Today, America’s political parties and representative institutions have declined in importance while the institutions of the executive branch have increased in importance. This seminar will examine the nation’s key executive institutions and aspects of executive governance in the U.S. Students will alternate primary responsibility for week’s readings. Every student will prepare a 10-15 page review and critique of the books for which they are responsible in class.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

AS.190.407. Geopolitics, Nuclear Weapons and World Order.
Intensive assessment of competing theories of the nuclear revolution and its implications for world order.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.408. Sovereignty: Historical Perspectives and Contemporary Issues.
This seminar provides an in-depth exploration of the concept of sovereignty by examining its historical development, recent controversies, and its use in international relations scholarship. The course will cover both the conceptual articulation of notions of sovereignty and its practice from before the establishment of the modern European state system to the present day.
Instructor(s): S. Schmidt
Area: Social and Behavioral Sciences.

AS.190.409. Comp/Politics/Social Mov.
Course examines major approaches to social movement organizations, dynamics, and significance. Case materials come from U.S., Europe, and Third World examples.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

A research seminar examining the politics of environmental issues in developing countries, with special focus on Latin America.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

AS.190.411. Political Violence.
An examination of the ways in which violence has been used to secure political ends. Topics include terrorism, assassination, genocide, coups, rebellions and war itself. Students examine what makes types of political violence unique and what unites them. (Formerly AS.190.372)
Instructor(s): S. David
Area: Social and Behavioral Sciences.

AS.190.412. Global Security Politics.
An intensive examination of the security politics of nuclear weapons, outer space, biological weapons, and emerging information technologies.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.413. America and the World.
Intensive examination of the United States from the founding to the present in comparative and international perspective. Senior or graduate students.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.414. The Geopolitics of Outer Space.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

This seminar analyzes the distinctive US welfare state in historical and comparative perspective. Special attention to policy development over time in health care, pensions, taxes, and work and poverty.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences.

This seminar class explores formation and political mobilization of identities - group, ethnic, gendered, national, cosmopolitan - in Latin America. Although some of the reading will be broadly comparative, the spring 2013 version of the class will focus especially on Brazil. Requirements will include short response papers and a term paper. Portuguese or Spanish desirable but not required. Enrolled students must be juniors or seniors and must have taken at least one prior course in comparative politics.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

AS.190.417. Nuclear Power and World Order.
This course provides an in-depth examination of evolving debates over world political order and nuclear deterrence, war-fighting, arms control, world government, proliferation, and terrorism.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.418. Republicanism.
Readings in classical and contemporary texts (Polybius, Machiavelli, Montesquieu, Rousseau, Kant, the Federalist, Calhoun, World Federalism, and nuclear arms control). Focus on security, freedom, and geopolitics, both domestic and international.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.419. Planetary Geopolitics.
With the tools of geopolitics, course explores political debates over globalization of machine civilization and changes in scope and pace, space and place, and role of nature in human affairs.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.
AS.190.424. Policy Disasters.
Investigates the causes of large-scale policy disasters, examining the role of ideology, psychology, organization design and political incentives. Examples may be drawn from the Iraq War, Bay of Pigs, Hurricane Katrina, the U.S. Financial crisis, Shuttle Challenger disaster, economic development policy, privatization, and the Great Society. Limited to seniors or with permission of instructor. (CP / AP)
Instructor(s): S. Teles
Area: Social and Behavioral Sciences.

AS.190.425. The New Deal and American Politics.
This seminar explores how the New Deal, the fundamental moment in the post-Civil War United States, has structured politics and government across a variety of domains ever since. Topics include presidential leadership, executive power, political parties, labor, race, and the welfare state.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences.

AS.190.426. Science and Expertise in Global Politics.
An in-depth examination of complex global problems that demand the effective use of scientific and expert knowledge in global governance. We will begin with a theoretical overview covering different perspectives on the role of knowledge and technology in global politics before looking in more detail at case studies drawn from environmental politics, nuclear management, colonial history, international political economy, UN peacekeeping, and more.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences.

This upper-level seminar examines some of the major debates and issues of postwar Japanese and South Korean political economy. Topics include nationalism, gender politics, civil society, immigration, and US-Japan-South Korea trilateral relations.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.429. The Political Bases of the Market Economy.
Although “the market” is conventionally understood as separate from “politics”, the modern market economy did not arise in a political vacuum. In fact, the very separation between the economy and politics is itself the product of a politically potent set of ideas. This course is an upper-division reading seminar on the origins and evolution of the modern market economy. Readings will include Smith, Marx, Weber, Polanyi, Keynes, Hayek, Friedman, Becker, and Foucault. Recommended course background: Introduction to comparative politics OR any college-level course in social or political theory.
Instructor(s): N. Jabko
Area: Social and Behavioral Sciences.

AS.190.430. Time and Punishment.
“If you can’t do the time, don’t do the crime.” According to ask.com, this common expression was made popular in the 1970s by the theme song for the television show “Beretta.” Aside from amusing us with the irony that the star of “Beretta” was Robert Blake who was later charged with the murder of Bony Lee Bakely, the expression raises a profound issue: What is the relationship between punishment and time? This course will explore that question. Topics to be discussed include different philosophical understandings and experiences of time, views of mortality and fate, theories of punishment, specific punishments in the U.S. (including sentences of juveniles, life, death, and LWOP), as well as punishments that are not specifically meted out but are known to be the consequences of political, social, and economic circumstance. Students will read texts in criminology, political theory, philosophy, and jurisprudence, as well as a selection of Supreme Court cases, novels, and short stories. This writing intensive course is limited to undergraduates who have taken at least one “Classics of Political Thought” course (190.280, 190.281, 190.282, or 190.283).
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.433. Constructivism: How Ideas Shape International Relations.
Can not have taken AS.190.304.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences.

AS.190.434. The Future of Israel: Threats and Opportunities.
Israel is one of the only countries whose existence is openly challenged. This class will examine the future of Israel focusing on international and domestic threats to its continued existence as a Jewish democracy. Outside threats to be considered include nuclear attack and the growing international movement to delegitimize Israel. Domestic challenges include demographic changes, the role of religion in governance, and doubts as to whether one can be a Jewish state and still be a democracy. Lessons from the destruction of the ancient Israelite kingdoms and from contemporary state deaths will be included. The course will conclude by considering efforts that Israel can undertake to meet the threats it faces.
Instructor(s): S. David
Area: Social and Behavioral Sciences.

AS.190.435. Law and Literature.
This course will examine the relationship between law and literature. As many have observed, law and literature have much in common as well as much to teach each other. Topics this course will discuss include practices of interpretation, issues of authority, the rule of law, and the power of narrative. In addition to reading essays by scholars in the field, students will read a selection of judicial opinions, short stories, novels, and plays.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.436. Republican Orders and Sustainability.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.
This seminar will address the role of violence—both domestic and international—in political life. Though most claim to abhor violence, since the advent of recorded history, violence and politics have been intimately related. States practice violence against internal and external foes. Political dissidents engage in violence against states. Competing political forces inflict violence upon one another. Writing in 1924, Winston Churchill declared—and not without reason—that, “The story of the human race is war.” Indeed, violence and the threat of violence are the most potent forces in political life. It is, to be sure, often averred that problems can never truly be solved by the use of force. Violence, the saying goes, is not the answer. This adage certainly appeals to our moral sensibilities. But whether or not violence is the answer presumably depends upon the question being asked. For better or worse, it is violence that usually provides the most definitive answers to three of the major questions of political life—statehood, territority and power. Violent struggle, in the form of war, revolution, civil war, terrorism and the like, more than any other immediate factor, determines what states will exist and their relative power, what territories they will occupy, and which groups will and will not exercise power within them.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

AS.190.440. European Politics in Comparative Perspective.
Europe has been in a sense the first testing ground for theories of comparative politics, but many outsiders now see Europe as a pacified and somewhat boring place. This course will question conventional wisdom through an examination of European politics in historical and cross-national perspective. We will apply the comparative method to the study of European politics today, and conversely we will ask what Europe tells us more generally about politics. We will see that Europe is still a locus of intense conflict as well as remarkably diverse experimentation. Topics will include: political, legal, and economic governance; the evolution of democracy and fundamental rights, the welfare state, class stratification, immigration and race, the role of religion; European integration and globalization. Juniors and seniors only.
Instructor(s): N. Jabko
Area: Social and Behavioral Sciences.

AS.190.441. Comparative European Politics.
In comparison with other regions of the world, Europe can easily appear as a pacified and somewhat boring place. This course will question this stereotype through an examination of European politics in historical and cross-national perspective. From a historical perspective, Europe has been the crucible of modern politics. And to this day, Europe remains a locus of intense conflict as well as remarkably diverse experimentation. We will read seminal works as well as recent comparative politics literature on European politics. The goal is to understand and discuss central concepts that comparative politics scholars mobilize in the study of European politics across time and space. Topics will include: political, legal, and economic governance; the evolution of democracy, the welfare state, partisan politics, immigration, race, and religion; European integration and globalization.
Instructor(s): N. Jabko
Area: Social and Behavioral Sciences.

AS.190.442. Civil Society.
This course explores classic and contemporary debates on the concept of civil society and critically examines its analytical value in light of recent developments. Topics include the relationship between civil society, the state, and markets, the role of civil society in development and democratization, social capital, and global civil society. This course is open to graduate students from any discipline. Advanced undergraduate students must obtain permission from the instructor and are expected to keep up with graduate students during class discussions.
Instructor(s): E. Chung.

AS.190.450. Power.
Power is a -- if not the -- key concept of international relations, yet there is no single definition of power that is accepted by all scholars in the field. In this course we will critically examine definitions of power from classic and contemporary works of international relations, political science, and related areas of study.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.471. The University and Society.
In the 20th century, American universities became the envy of the world, leading in most categories of scholarly productivity and attracting students from every nation. In recent years, though, American higher education has come to face a number of challenges including rapidly rising costs, administrative bloat, corporatization and moocification. We will examine the problems and promises of American higher education, the political struggles within the university and the place of the university in the larger society. Upper classes and Grad Students only.
Instructor(s): B. Ginsberg; R. Kargan
Area: Social and Behavioral Sciences.

AS.190.472. The Power of Speech.
Drawing from literary theory, political philosophy, and jurisprudence, this course will explore the unique relationship between speech (broadly conceived) and politics. In addition to reviewing classic arguments about freedom of speech and the significance of this freedom in and for democratic government, the course will study debates about the need to limit this freedom, taking into consideration not only how we do things with words but how words affect us. In addition to court cases and critical legal studies, we will read texts by, among others, Aristotle, Arendt, Mill, Austin, Fish, Butler, and Fanon. Recommended Course Background: AS.190.200, AS.190.201, or AS.190.202 or permission of the professor.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.475. Courts, Politics and Public Policy.
Examines the causes of American legal change, with particular focus on the role of social movements, and whether and how legal change produces social change. Among the particular cases examined will be civil, prisoners’ and women’s rights.
Instructor(s): S. Teles
Area: Social and Behavioral Sciences.
AS.190.479. Imag(in)ing Cities.
In The City and The City, China Melvielle uses a traditional crime
procedural to tell the story of two distinct cities existing within the
same space, with the residents of each city forced to literally unsee the
residents, buildings, etc. of the other. In Imag(in)ing Cities I take this
idea literally...arguing that the cities we live, play, and work in are in
fact several cities layered on top of and through each other with the
content of these cities shaped by a combination of (political, social,
economic) theory of how cities work (and are supposed to work), a
series of practical policies and actions that dictate how cities in fact
work, and our popular imaginations. The class will place these theories,
policies, and imaginations in dialogue with each other through readings,
viewings, and “listenings”.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.490. Thoreau and Whitman.
Permission of instructor required. Upper level undergraduates and grads
only. An intensive study of the writings of Henry Thoreau and Walt
Whitman, with a focus on their conceptions of citizenship, community,
urbanization, and materiality. (PT)
Instructor(s): J. Bennett
Area: Social and Behavioral Sciences.

AS.190.491. Game Theory in the Social Sciences.
Strategic thinking is a fundamental component of many political and
economic phenomena, from international wars and national elections
to wage bargains and monopoly power. Game Theory is a set of
ideas and techniques for analyzing strategic interactions and making
predictions about its outcomes. This course provides an introduction to
Game Theory and its main applications to relevant political and social
outcomes, Juniors and Seniors Only.
Prerequisites: AS.110.106 or AS.110.108
Instructor(s): S. Mazzuca
Area: Quantitative and Mathematical Sciences, Social and Behavioral
Sciences.

AS.190.499. Senior Thesis:International Relations/Political
Science.
Seniors also have the opportunity to write a senior research thesis. To
be eligible to write this thesis, students must identify a faculty sponsor
who will supervise the project. Once a faculty sponsor has approved a
topic, students must enroll in a three credit independent study during
the fall semester of their senior year. At the end of the fall semester, if
the faculty sponsor determines that adequate progress has been made
and the project warrants further work, the student may enroll in the
senior thesis (AS.190.499) which will be worth 6 credits.

AS.190.601. Qualitative Research.
An introduction to measurement and data analysis in contemporary
American political science. Measurement topics will include the
formation of indices and cumulative scales. Analytic topics will topics
include sampling variations, statistical association and causation,
as manifested in contingency tables and correlation and regression.
Emphasis will be on fundamental concepts and assumptions, and on
comprehension and evaluation of the scholarly literature. Advanced
undergraduates by permission only.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.
AS.190.602. Introduction to Quantitative Political Science.
An introduction to measurement and data analysis in contemporary American political science. Measurement topics will include the formation of indices and cumulative scales. Analytic topics will include sampling variations, statistical association and causation, as manifested in contingency tables and correlation and regression. Emphasis will be on fundamental concepts and assumptions, and on comprehension and evaluation of the scholarly literature. Advanced undergraduates by permission only.
Instructor(s): R. Katz
Area: Social and Behavioral Sciences.

AS.190.603. Power.
Power is a -- if not the -- key concept of international relations, yet there is no single definition of power that is accepted by all scholars in the field. In this course we will critically examine definitions of power from classic and contemporary works of international relations, political science, and related areas of study.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.604. Rethinking Freedom in a Neoliberal Age.
This seminar will start with forays into the traditions of positive and Republican freedom, exploring the conceptions of agency, self, language, citizenship, state, economy and global politics associated with each. It then turns to conceptions of freedom tied more actively to the elements of creativity, self-organization, and planetary politics. How do you bring the former images of freedom into productive conversations with the latter? Texts by Machiavelli, Berlin, Skinner, Foucault, Ritzolatti, Butler, and Holland (Nomad Citizenship) will probably be consulted. Graduate students only.
Instructor(s): W. Connolly
Area: Social and Behavioral Sciences.

AS.190.605. Women in Dark Times.
A survey of contemporary female voices—feminist and nonfeminist—in political theory. Questions raised and addressed: How is power defined and distributed? What constitutes political action? What is the relationship of bodies to politics? Among others we will read Cristina Beltrán, Judith Butler, Jodi Dean, Bonnie Honig, and Melissa Lane.
Instructor(s): J. Bennett; J. Culbert.

AS.190.606. Language, Order, Action.
Graduate students only.
Instructor(s): S. Chambers.

AS.190.607. Comparative Racial Politics.
This course surveys the major trends in the comparative study of race in political science and critically examines the link between race and politics. Topics include the racial state, neo-racism, and immigration politics.
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.

AS.190.608. Critical Comparisons of Deleuze and Foucault.
A comparative exploration of the thought of Gilles Deleuze and Michel Foucault, focusing on the following topics: the nature of immanence and the virtual; sovereignty and biopolitics; neoliberal capitalism; time and the event; and political activism. Key texts will be The Order of Things, Discipline and Punish, A Thousand Plateaus, Society Must be Defended, and Cinema II, as well as biographical material on the activism of each intellectual. Graduate students only.
Instructor(s): W. Connolly
Area: Social and Behavioral Sciences.

Discussion of the formation, architecture, significance, and adjudication of the national constitutions of numerous countries, including the United States, Canada, India, South Africa, United Kingdom, Germany, France, Russia, Japan, Israel, and Australia.
Instructor(s): J. Grossman
Area: Social and Behavioral Sciences.

AS.190.610. Advanced Topics in Contemporary Chinese Politics.
This seminar is structured around key concerns in China’s domestic politics, including the politics of economic reform, central-local-relations, corruption, increasing inequality, the role of intellectuals, the rise of quasi-governmental organizations, various channels for political participation and protest, and other contemporary issues. Undergraduates who wish to be enrolled in this class must have taken AS.190.348 and by permission only.
Instructor(s): K. Tsai
Area: Social and Behavioral Sciences.

AS.190.611. Feminist and Queer Theory.
Graduate students only.
Instructor(s): S. Chambers.

AS.190.612. The Rise and Fall of the Frankfurt School.
Grad students only This graduate seminar will trace the emergence, development and decline of the so-called “Frankfurt School” of Critical Theory across the 20th century.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences.

AS.190.613. Elections.
Open to advanced undergraduates by permission only. This seminar surveys recent (and some classic) work in elections, principally in the US, but also in other democracies. Topics include nomination, polarization, voter turnout, ideology, media, the economy, and race.
Graduate students only.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences.

AS.190.614. Institutions, Ideas and Practice.
Graduate students only.
Instructor(s): N. Jabko.

AS.190.615. International Relations Theory.
This seminar covers the main theoretical perspectives employed in the analysis of international politics, covering a variety of realist, liberal, and constructivist work. The strengths and weaknesses of different approaches will be assessed and contrasted with one another, with the goal being to provide students with a broad foundation on which to develop their own understandings. Meets with AS.190.401
Instructor(s): S. Schmidt
Area: Social and Behavioral Sciences.

AS.190.616. American Political Development.
An examination of state-building and nation-building throughout American political history. (AP)
Instructor(s): A. Sheingate.
AS.190.617. Romanticism and Radicalism.
A study of a group of European and American writers, including Schiller, Shelley, Emma Goldman, Walt Whitman, Georges Sorel, Carl Schmitt, Guy Debord and other Situationists, Georges Perec, Herbert Marcuse, Theodor Adorno, and contemporary artists and theorists of the aesthetic, in order to explore connections between romantic themes and the aspiration for a significant transformation of political life. What are the complex relations between artistic and revolutionary practice? What are the standards by which to assess the viability of romantic, counter-cultural, or eccentric artworks/texts/events?
Instructor(s): J. Bennett; W. Connolly
Area: Social and Behavioral Sciences.

AS.190.618. Nationalism.
Grad students only Despite the clamor over globalization and regionalization in the contemporary world, nationalism remains a central preoccupation for both political actors and students of politics. Though motivated by questions resonant within the discipline of political science (and the field of comparative politics in particular), this course is designed to familiarize students with key texts and debates in the literatures on nationalism in political science, sociology, history and anthropology. The objective of this course is to provide students with a comprehensive overview of major themes, scholarly approaches and forms of nationalist mobilization in national and cross-spatial perspective. Some of the questions to be addressed in this course are a) what are the roots and routes of nationalism?; b) who are nationalist political actors, and where do they come from?; c) what is nationalism’s relation to race, racism and ethnicity d) what is the relationship between various forms of nationalism and contemporary considerations of regionalism and globalization?
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.

Since 1945, the great powers have enjoyed their longest period of peace in history. Interstate conflict between lesser powers is also at an all time low. What accounts for this “long peace?” This course will look at various explanations including the spread of democracy, the proliferation of nuclear weapons, globalization, American hegemony, and fundamental changes in attitudes regarding the use of force. Students will present draft versions of their research papers during the last weeks of the course.
Instructor(s): S. David

AS.190.620. Law and Literature, Language and Politics.
Drawing from scholarship identified with the Law and Literature movement, scholarship that focuses on legal themes in literary texts and literary elements in legal ones, this course will engage an ongoing conversation in contemporary political theory about the relationship of language to the human condition. Readings will include texts by Arendt, Austin, Benjamin, Blanchot, Brooks, Butler, Derrida, Goodrich, Merleau-Ponty, Nancy, Weisberg, White, and Wittgenstein, as well as stories by Borges, Kafka, and Melville. Students will be required to do an in-class presentation and a 20-30 page final paper. Graduate students only.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.621. Liberal IR Theory.
Intensive investigation of classic and major recent texts about liberal democratic constitutional states, their international relations, and their implications for world order. Graduate students only.
Instructor(s): D. Deudney.

AS.190.622. Contemporary International Relations Theory.
This course will focus on recent work (from approximately the past 10 years) in International Relations Theory. Emphasis will be placed on contending schools of thought and often divergent means of determining what counts as good theory. In Fall 2014, we will focus on critical approaches to the global and the political, with a special emphasis on theories of borders, bodies, and the global-ness of cyberspace.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.623. Capitalism, Discipline, Debt the Anthropocene.
How do we rethink Capitalism in an age of Discipline, Debt, and the Anthropocene? This seminar draws upon a series of Left Nietzscheans to pursue that agenda. It starts with Nietzsche’s examination of debt, guilt and subjectivity in The Genealogy, turns to work by Foucault, Deleuze, Esposito, and Lazzarato on capitalism, debt and molecular control, adds Klein and Connolly on capitalism and the Anthropocene, and returns to all of the above to explore the potential of critical social movements today. Graduate students only.
Instructor(s): W. Connolly.

AS.190.625. Theories-Comp Politics.
This seminar is intended for graduate students planning to take the comprehensive exam in comparative politics, either as a major or as a minor. In addition to exploring central methodological debates and analytic approaches, the seminar reviews the literature on state-society relations, political and economic development, social movements, nationalism, revolutions, formal and informal political institutions, and regime durability vs. transition. Graduate students only.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.626. Arendt and the Poets.
This course examines the role of poetry in the work of Hannah Arendt. Observing how Arendt’s writing plays not only with history (as many historians have complained) but also with the “word-thing” relationship, the course looks at how Arendt’s references to poetry as well as her own poetic practices open a space in which the spirit of a primary text may reveal itself and inspire the constitution of something new. Among others, readings will include texts by Heidegger, Benjamin, Derrida, Honig, and Villa, as well as Auden, Rilke, and Kafka. Graduate students only.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.627. Pragmatism in Politics.
After a long eclipse, the scholarly tradition of pragmatism has recently experienced a revival across the social sciences. The goal of this course is to take stock of this movement and to discuss the usefulness of pragmatism for the study of politics. The readings attempt to weave together classical and recent texts in philosophy, cultural theory, sociology, economics, science studies, as well as political science. We will begin with a survey of pragmatism’s core concepts and methods. Then we will discuss recent applications of the pragmatist approach in the social sciences. Finally, we will explore the links between pragmatism and three contemporary approaches.
Instructor(s): A. Sheingate; N. Jabko
Area: Social and Behavioral Sciences.
AS.190.628. Race and Segregated Time.
