Welcome to the 2015-2016 academic catalog for the Johns Hopkins University full-time undergraduate and graduate programs in the Zanvyl Krieger School of Arts and Sciences and the G.W.C. Whiting School of Engineering. This catalog contains information about academic and student life programs and policies. It also includes links to external websites; these are provided as a convenience to the reader and the content contained therein is not part of the catalog.

The University reserves the right to change without notice any programs, policies, requirements, or regulations published in this catalog. The catalog is not to be regarded as a contract.

About the Catalog

The Johns Hopkins University is accredited by The Middle States Association of Colleges and Schools, Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104-2680.

The following Bachelor of Science programs in the Whiting School of Engineering are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET): Biomedical Engineering, Chemical and Biomolecular Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics, Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering.

The Bachelor of Science program in Computer Science is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

For current faculty and contact information go to http://krieger.jhu.edu/publichealth/directory/

Note: The table above lists program majors along with the degrees offered at each level. The letter 'x' indicates the availability of the degree at the specified level.
Notes on the Degrees

1. Candidates for the master’s as a terminal degree are accepted, but financial aid generally is not available.
2. Candidates for the master’s as a terminal degree may be accepted in special cases, but financial aid generally is not available.
3. Candidates are admitted to the Ph.D. program only, but the M.A. is awarded to students who (a) complete one year of courses, pass an examination in one foreign language, and submit an acceptable master’s essay to a member of the faculty or (b) complete two years of courses and pass an examination in two foreign languages.
4. Candidates for the master’s as a terminal degree are not accepted. However, a student is awarded a master’s degree en route to the Ph.D. after the successful completion of the Graduate Board oral examination.
5. A master of science in engineering or a master of materials science and engineering are offered.
6. See department listing.
7. M.S. available only to Arts and Sciences baccalaureate students.
8. M.A. only.
9. B.A. only.
10. B.A. or B.S. available.
11. Candidates are admitted to the Ph.D. program only, but the M.A. is awarded to students who complete requirements set by the director of graduate studies.
12. Applicants must currently be JHU undergraduate.
13. Within the Department of Biomedical Engineering.
14. Within the Department of Applied Mathematics and Statistics.
15. Within the School of Medicine.
16. Master’s degree awarded by the School of Advanced International Studies.
17. Master’s degree awarded by the School of Public Health.
18. Qualified Undergraduates from any AS or EN program are eligible to apply.
19. Area of Concentration

Minors

Part-time Graduate Programs in Arts and Sciences and Engineering

Advanced Academic Programs

Drawing upon over a century of research and teaching expertise, the Krieger School of Arts and Sciences Advanced Academic Programs offers advanced instruction in scientific fields of current interest and innovative graduate study in the humanities and social sciences. While based on the latest scientific and scholarly knowledge, course work emphasizes the application of such knowledge to practical problems. Classes are designed to provide individual attention, relevant application, and to encourage student contribution.

Courses are offered on a part-time basis at the Homewood campus in Baltimore; the Montgomery County Campus in Rockville, MD; the Arts and Sciences Washington Center in Washington, D.C.; and online. Most degree programs in AAP may be completed partially or fully online.

The School of Arts and Sciences recognizes the intellectual strength and education requirements of working adults and offers master’s degrees through the Advanced Academic Programs. Students can earn their master’s degree in:

- Applied Economics
- Bioinformatics
- Biotechnology
- Biotechnology Enterprise and Entrepreneurship
- Communication
- Energy Policy
- Environmental Sciences and Policy
- Geographic Information Systems
- Government
- Global Security Studies
- Liberal Arts
- Museum Studies
- Public Management
- Regulatory Science
- Science Writing
- Writing

There are also a variety of certificates and concentrations from which to choose, including certificates in:

- Biotechnology Education
- Biotechnology Enterprise
- Geographic Information Systems
- National Security Studies
- Nonprofit Management
- Post-master’s Certificate in Sequence Analysis and Genomics
- Health Science Intensive Concentration

AAP also has a number of dual MBA programs with the Carey Business School.

Further information, admission details, and catalogs may be obtained by phone (202) 452-1940, Email to aapadmissions@jhu.edu, or by visiting advanced.jhu.edu.

Johns Hopkins Engineering for Professionals

Engineering began at Hopkins in 1913, when university leaders decided to establish a curriculum that focused on professional education but included significant exposure to the liberal arts and scientific inquiry. Fostering interdisciplinary creativity, this unique approach
to engineering education was in turn emulated by many engineering schools throughout the United States.

Over the intervening decades, thousands of working engineers and scientists earned engineering degrees at Hopkins through part-time study, achieving professional goals without interrupting their careers. That tradition continues today through the Whiting School’s Engineering for Professionals program, which offers part-time graduate courses in 15 disciplines that address industry trends and the latest advances in engineering and applied science. Classes are scheduled at convenient times during late afternoons and evenings and on Saturdays at campuses throughout the Baltimore-Washington region, including Aberdeen, Baltimore, Elkridge, Laurel, Rockville, Southern Maryland, Washington, D.C., and Crystal City, VA. Courses are also available online. Depending on their academic program, students earn either a master’s degree or a graduate or postgraduate certificate upon completing their studies.

Further information, applications, and catalogs may be obtained by calling 1-800-548-3647; visiting ep.jhu.edu; or writing to Johns Hopkins Engineering for Professionals, 6810 Deerpath Road, Suite 100, Elkridge, MD 21075. Email inquiries may be sent to jhep@jhu.edu.

* Open only to students with master’s degrees.
Undergraduate Students

The policies, procedures, resources, and opportunities included in this section are relevant for undergraduates enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering on the Homewood campus. Please use the links at the left to navigate to your topic of interest.

Admissions and Finances

Every year the Office of Undergraduate Admissions enrolls a freshman class of approximately 1,300 men and women from all over the United States and many countries. In addition to first-year students, each fall, transfer students are also welcomed to the Homewood campus from other colleges and universities.

The Admissions Committee looks for students who will truly thrive as Johns Hopkins undergraduates. As part of a holistic review process, intellectual interests, academic performance and character, and “fit” are important components of the application evaluation. A student’s intellectual curiosity, seriousness of purpose, and range of extracurricular activities and leadership are considered as well as scholastic record, aptitude test results, essays, and recommendations.

More information about the undergraduate admissions process can be found at apply.jhu.edu.

Johns Hopkins is dedicated to enrolling the strongest students each year, and it’s our goal to enable students to make their college decision without being limited by their family financial circumstances. The Office of Undergraduate Admissions and the Office of Student Financial Services are dedicated to meeting 100% of calculated financial need for all admitted students.

Financial aid advisers in the Office of Student Financial Services are always available to guide you through the process. Reach them at 410-516-8028 or fin_aid@jhu.edu for more information.

Tuition Refund Policy

First Six Weeks of Classes

During the first six calendar weeks of classes, a full-tuition refund will be provided to students who withdraw from the University. Leave will be retroactive to the beginning of the semester, and registration and tuition charges will be cancelled. Federal aid will be prorated per federal regulations, and Johns Hopkins University Grant will be cancelled. Room and board charges will be prorated based on the day the student leaves the University.

Week Seven Through Eleven

During the first six calendar weeks of classes, a full-tuition refund will be provided to students who withdraw from the University. Leave will be retroactive to the beginning of the semester, and registration and tuition charges will be cancelled. Federal aid will be prorated per federal regulations, and Johns Hopkins University Grant will be cancelled. Room and board charges will be prorated based on the day the student leaves the University.

Week Twelve Through the End of the Semester

From calendar week twelve through the end of the semester, no tuition refund will be provided to students who withdraw from the University. W’s or Incompletes will be recorded as grades on the student transcript. Students will be permitted to keep their financial aid awards. Room and board charges will be prorated based on the day the student leaves the University.

No refund will be granted to students suspended or dismissed for disciplinary reasons. The University reserves the right to dismiss a student whose academic standing or general conduct is considered unsatisfactory. Please use the links to the left to view detailed information about undergraduate admissions, fees and expenses, financial aid, and veterans’ educational benefits.

Veterans Educational Benefits

Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans and the widows and children of deceased veterans under the provisions of the various federal laws pertaining to veterans’ educational benefits. Information about veterans’ benefits and enrollment procedures may be obtained at web.jhu.edu/registrar/veterans.html or the Office of the Registrar, 75 Garland Hall, 410-516-7071.

Students eligible for veterans’ benefits register and pay their university bills in the same manner as nonveteran students. The Department of Veteran Affairs determines the educational benefit a veteran is eligible to receive. Veterans educational benefits payments cover only a portion of assigned course fees. To receive veterans educational benefits the student must comply with the following procedures:

Initial Enrollment

Once admitted to the university, the student must complete an Application for Program of education or Training (VA Form 22-1990) from the Department of Veteran Affairs at www.gibill.va.gov (http://www.gibill.va.gov). A copy of the completed application, along with a certified copy of the DD-214, is sent to the Veterans Desk, Office of the Registrar, 75 Garland Hall, The Johns Hopkins University, Baltimore, Maryland 21218.

The student who is transferring from another university or college will need to obtain a Request for Change of Place of Training (VA Form 22-1995) from the Department of Veteran Affairs at www.gibill.va.gov (http://www.gibill.va.gov). The completed form should be sent to the Veterans Desk at the university.

Re-enrollment

Students who received veterans’ benefits at the university the preceding semester and plan to enroll with no change of objective should inform the Registrar’s Office at the time of registration that they want to be recertified under the provisions of their original VA Form 22-1990.

Students receiving veterans’ benefits must take courses that lead toward the exact objective (usually a specific degree) on the original VA application. Otherwise, they must submit a Request for Change of Program (VA Form 22-1995). Students utilizing veterans’ benefits must let the registrar know immediately of any change in their program or status that might affect the amount of their VA payment. If they fail to
do so, the Department of Veterans Affairs will seek reimbursement from
the student for any overpayment.

Standards of Progress
Continuation of VA payments depends on the student’s meeting the
university’s academic standards for all students. The student must
also meet any standards of progress which may be established by VA
regulations.

The College Navigator Tool
Veteran students may go to the College Navigator (http://nces.ed.gov/
collegenavigator) to access a school comparision tool.

Academic Policies
The Krieger School of Arts and Sciences and the Whiting School of
Engineering offer myriad opportunities for intellectual exploration,
academic challenge, and personal growth. To satisfy your academic
goals and assure your progress toward graduation, take action and
responsibility for the following:

• Seek advice from multiple faculty and other university professionals.
• Meet with your assigned advisor at least once a semester.
• Learn the information contained within this online catalog. Failure
to do so does not excuse you from responsibility for the rules and
procedures.
• Track your completion of your degree requirements.
• Consult your advising office and your major department about any
questions concerning academic policy.

All students are expected to observe the academic policies and
practices of the university; personal difficulties, illness, and/or advice
contradicting the rules and procedures does not constitute automatic
grounds for exemption from these rules or procedures. Written requests
for exceptions must be submitted to the student’s academic advising
office. After review, a student will be notified whether the exception is
approved.

The University reserves the right to change rules, procedures and other
information within this website as appropriate. This website is not to
be regarded as a contract. If you have questions, contact your school’s
advising office.

Registration Policies
Advising and Registration Periods
All students are required to meet with an advisor for each declared
major prior to registering for the fall and spring semesters. Advisor
alert(s) for each declared major are placed on all students’ records
in ISIS well in advance of the registration period; the alert(s) must be
released by the advisor(s) to permit the student to register.

In the School of Arts and Sciences, freshman, first-semester transfer
students, and undeclared students meet with their academic advisor
beginning six weeks in advance of the registration period. Students
with declared majors should contact their faculty advisor to schedule a
meeting prior to their registration date.

In the School of Engineering, students meet with their faculty advisors
during Engineering Advising Week (early November for spring
registration and early April for fall registration).

Undergraduates register for spring semester in November, for
Intersession in December, for summer in March, and for fall semester
in April. Detailed instructions about registration will be emailed to all
students before the registration period each term. If the student has
not received this information at least two weeks before the start of
classes for a fall or spring term, perhaps because of a change of email
address or status in the university, the Office of the Registrar should be
contacted immediately.

English, Writing Seminars, and Film and Media Studies hold
preregistration hours for their majors in the weeks before online
registration begins. Contact the respective department for information
about how to preregister for a class.

Schedule Verification
Students are responsible for verifying their official schedules in ISIS.
Students are encouraged to retain a copy of their schedule for their
records. In addition, students are advised to check their schedules after
performing online registration changes (adding and dropping courses)
to ensure accuracy. It is also recommended that students review their
schedule prior to the add, drop and withdrawal deadlines. Changes
to a student’s schedule will not be approved after these deadlines
have passed. Failure to review and retain a copy of their registration
confirmation will not be considered grounds for approving exceptions to
these deadlines.

Intersession and Summer Special
Registration Information
Summer and intersession opportunities, such as JHU-sponsored study
abroad courses and career exploration courses, may have special
registration deadlines, fees, and procedures. Please see the Intersession
(http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/
summer) Programs websites for additional information.

Intersession is a three-week period in January for students and faculty
to participate in a variety of optional credit and noncredit courses and
activities that enrich the intellectual and social life of the campus.

For intersession academic exploration courses, the tuition cost of
Homewood KSAS and WSE courses is free to undergraduates who were
enrolled full-time in the previous fall semester (including approved
study abroad); part-time students must pay tuition. All students must
pay relevant fees. Students who are returning from a leave of absence
may register for intersession if they pay tuition per credit hour. Students
who register for Hopkins intersession courses outside of KSAS/WSE are
subject to tuition charges determined by the individual school.

Summer courses at JHU are primarily offered during two five-week
terms. There are some online courses and courses that run on
alternative schedules. Courses are sponsored by the same academic
departments that oversee the university’s full-time degree programs.
They are designed to reproduce, as closely as possible, similar courses
offered during the spring and fall semesters. Tuition charges are
published on the Summer Programs (http://pages.jh.edu/summer)
website.
Late Registration Fees

Registration in the School of Arts and Sciences and the School of Engineering is not permitted after the end of the second week of the semester, except in extraordinary circumstances as approved by the Assistant Dean for Academic Advising for their respective school. Students must register on time, even when they lack sufficient funds. The university provides many financing alternatives that permit students to register in most financial situations.

Students who for any reason do not complete their registration until after the prescribed registration period will be required to pay a late registration fee according to the following schedule:

- $100 - end of prescribed registration period until the day before the first day of classes of the upcoming semester
- $150 - first day of classes through the end of the first week of classes
- $200 - second week of classes
- $300 - after the second week of classes (special permission only)

For late registration fees in the summer, please see the Summer Programs (http://pages.jh.edu/summer) website.

Adding a Course

During the fall and spring semesters, students may add a course until the end of the second week of classes and pay no fees to add courses. During this time students may add courses without written approval, unless the course is filled or will cause a credit overload. If the course will cause a credit overload, AS students need a signature from the AS Advising Office, while EN students need their faculty advisor’s signature and the approval of the EN Advising Office. An instructor’s signature is required to add a course that is filled. By the end of the second week of classes, students should have the schedule they want to keep.

If the course is a four-week course offered during the fall or spring terms that begins at the beginning of the semester, the course may be added only during the first week of classes. For intersession and summer add dates, please refer to the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When adding courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the add deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Dropping a Course

Courses may be dropped from the student’s record until the end of the sixth week of the semester, provided that the student remains registered for a minimum of 12 credits. For engineering students, faculty advisor approval is required to drop a course after the second week of classes.

If the course is a four-week course, drops may be made during the first week of the course without a record on the transcript. For intersession and summer drop dates, please refer to the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When dropping courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the drop deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Withdrawing from a Course

After the end of the sixth week and until the end of the eleventh week, a student may withdraw from a course with a W on their academic record. A record of the course will remain on the academic record with a W appearing in the grade column to indicate that the student registered and then withdrew from the course. Students are not allowed to withdraw from a course after the end of the eleventh week of the semester. Course withdrawals must be conducted in person at the Office of Registrar using an add/drop form. Engineering students need the signature of their faculty advisor on the add/drop form.

If the course is a four-week course, withdrawals may be made with a W notation during the second week of classes (Engineering students require approval of their faculty advisor.) For intersession and summer withdrawal dates, please refer to the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When withdrawing from courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the withdrawal deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Full-Time Student Status

Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester. Students who have not completed degree requirements after eight full-time semesters may register for less than 12 credits and pay for courses on a per credit basis with the permission of academic advising.

Fall and Spring Semester Credit Requirements and Limits

Credit is an approximate measure of the work required in a course. For undergraduate courses, the number of credits is normally equal to the number of hours that the class meets each week. Some laboratory courses are exceptions to this rule, meeting more hours per week than the credits awarded. Graduate-level courses completed by undergraduates are generally awarded the same number of credits as an upper-level undergraduate course (3 credits).

For Arts and Sciences students, the average course load is 15 credits per semester for eight semesters. For Engineering students, the standard load is 16-18 credits. AS freshmen are limited to 17 credits, while AS upperclassmen are limited to 18.5 credits. EN freshmen are limited to 18 credits (18.5 if including a foreign language), while EN upperclassmen are limited to 19.5 credits. Students must maintain full-time status by registering for at least 12 credits.

Intersession and Summer Credit Limits

Students may take a maximum of 3 credits during intersession. During the summer, student may take a maximum of 14 credits total with a limit of 7 credits per session.
Exceptions to These Credit Limits

Arts and Sciences students who wish to take a credit overload must meet one of the following criteria:

- Double degree students who are taking courses at both Peabody and Homewood
- Students taking excess credits due to university mandate, e.g., movement to a different level of language instruction as request by faculty
- Seniors in their eighth semester
- Upperclass students with a 3.5 cumulative GPA who have requested and been granted a waiver to take an additional course for other reasons
- Students who exceed the limit because they are taking a 1 or 2 credit music lesson at the Peabody Conservatory
- Neuroscience majors registered for Research and Scientific Communication may exceed the credit limit by 0.5 credits

Exceptions for EN Students

Credit overloads for engineering students are approved on a case-by-case basis. Engineering students who wish to overload need their faculty advisor’s signature, then final approval by the Engineering Advising Office. Usually, the student’s most recent academic performance is a factor in the decision. First-semester freshman are not granted credit overloads.

Registration Alerts (p. 12)
Retaking a Course (p. 12)
Prohibition on Registering for Courses that Meet at the Same Time (p. )
Restrictions on Equivalent Courses and Courses Taken Out of Sequence
Policy on Statistics Courses Sequencing (p. 13)
Important Note About Credit and Grades for Language Courses (p. 14)
Instructor’s Permission (p. 14)

Retaking a Course

Students may retake a course to absolve a grade of C+ or lower. The grade for the second attempt and the associated credits are recorded on the transcript and are calculated into the GPA. The original grade remains along with the notation “R” to indicate the course was retaken. Such R grades do not affect grade point calculations and do not carry credit toward graduation. Only the grade in the retaken course accrues credit and applies to the GPA, even when the retaken grade is lower than the original grade. A student may retake one course without written permission. Taking the same course a third time or retaking another course requires written permission of the student’s academic advising office.

A course originally taken for a letter grade must be retaken for a letter grade. A course taken under the Satisfactory/Unsatisfactory grading option must be retaken under the Satisfactory/Unsatisfactory grading option. First semester courses whose grades are covered by S/U notation are considered to have been taken for a letter grade. If a student wants to retake a course from the first semester, the second attempt must also be for a letter grade.

To absolve a grade, the same course must be taken at Hopkins, not another college or university. In situations where the same course is no longer offered, students may be able to absolve a grade in one of two ways:

1. by repeating a course of comparable content and level, or
2. as an independent study

Both of these options require approval of the department and/or instructor responsible for the course and the student’s academic advising office.

Other Restrictions on Absolving a Grade

Grades may not be absolved by retaking a course after graduation.

Grades assigned by the Ethics Board due to an academic ethics violation may not be removed from the academic record by retaking the course. Both the new grade and the assigned grade will be shown.

Prohibition on Registering for Courses that Meet at the Same Time

Registering for two classes that meet at the same time or overlapping times is not permitted except as a temporary measure during the first weeks of the semester when students are still deciding on which classes to take. By the end of the first two weeks of classes, students must resolve time conflicts in their schedules.

Restrictions on Equivalent Courses and Courses Taken Out of Sequence

Courses that are sequential in nature, e.g., elementary, intermediate, and advanced language courses, or the Calculus sequence, must be taken in their proper order. One exception to this policy is that AS.210.301-302 may be taken in reverse order with permission of the department.

Credit will be awarded only once for equivalent courses covering the same material. Examples of equivalent courses are Intermediate French and Advanced Intermediate French, and AP Calc AB and Calculus I. This restriction does not apply to the Expository Writing course which may be taken twice. Be aware that departments may change course numbering or titles without changing the course content. Students who believe that they have registered for an equivalent course should consult with their academic advising office.
The following restrictions apply to overlapping and the sequencing of courses in the Mathematics and Applied Mathematics and Statistics Departments:

• Students who earn credit for AS.110.201 Linear Algebra cannot receive credit for the combined course EN.550.291 Linear Algebra and Differential Equations or for the course AS.110.212 Honors Linear Algebra.

• Students who earn credit for AS.110.405 Analysis I cannot receive credit for AS.110.415 Honors Analysis I

• Students who earn credit for AS.110.406 Analysis II cannot receive credit for AS.110.416 Honors Analysis II

• Students who earn credit for AS.110.302 Diff Equations/Applic cannot receive credit for EN.550.291 Linear Algebra and Differential Equations or AS.110.306 Honors Differential Equations.

• Students who earn credit for AS.110.202 Calculus III cannot receive credit for AS.110.211 Honors Multivariable Calculus.

• A student who earns credit in EN.550.291 Linear Algebra and Differential Equations may receive credit for further study of linear algebra or differential equations by enrolling for independent study while auditing the appropriate course. Normally students will earn 2 credits for such an independent study, but the number of credits may vary and is to be decided by the faculty sponsor. These students may not earn credit for AS.110.302 Diff Equations/Applic, AS.110.306 Honors Differential Equations, AS.110.201 Linear Algebra, or AS.110.212 Honors Linear Algebra.

• Students who earn credit for EN.550.426 Introduction to Stochastic Processes cannot receive credit for EN.550.427 Stochastic Processes and Applications to Finance.

Policy on Statistics Courses Sequencing

Undergraduate students at the Homewood Schools of Johns Hopkins University enjoy a wide selection of courses on statistics; however, it is not proper for a student to be awarded credit for two courses that cover essentially the same material. Likewise, it is not proper for a student to receive credit for a more basic course after having received credit for a more advance course in the same subject.

Our statistics courses fall into one of the following four categories, listed in increasing level of sophistication:

1. Non-calculus based, basic
2. Non-calculus based, intermediate
3. Calculus based, intermediate
4. Calculus based, advanced

A student may take at most one course (or course sequence) from within one of these categories. A student may not take a course in a lower numbered category after having taken a course in a higher numbered category.

Some departments may require their undergraduate majors to take specific statistics courses; that is their prerogative. This policy simply precludes students from receiving credit for two courses that have much the same content, with possibly different emphases. It does not imply that one course in a category may be substituted for another.

The list below shows how the courses (and course sequences) are allocated to these categories.

For example, a student may take EN.550.111 but then may not subsequently take AS.230.205. A student who has taken EN.550.310 may not also take EN.550.311, EN.550.435, or any of the courses in the first two categories.

**Category 1: (Non-calculus based, basic course)**

EN.550.111 Statistical Analysis I
EN.550.113 Statistics Through Case Study
AS.230.205 Introduction to Social Statistics
AP Statistics

**Category 2: (Non-calculus based, intermediate course)**

EN.550.211 Probability and Statistics for the Life Sciences
EN.550.230 Introduction to Biostatistics
AS.280.345 Public Health Biostatistics
AS.200.314 Advanced Statistical Methods
AS.200.315 Advanced Research Design and Analysis

**Category 3: (Calculus-based, intermediate course)**

EN.550.310 Probability & Statistics for the Physical and Information Sciences & Engineering
EN.550.311 Probability and Statistics for the Biological Sciences and Engineering
EN.560.348 Probability & Statistics for Engineers
EN.560.435 Probability and Statistics in Civil Engineering (discontinued, last offered Spring 2011)

**Category 4: (Calculus-based, advanced course)**

EN.550.420 Introduction to Probability
EN.550.430 Introduction to Statistics

Some courses do not fall into one of the four categories:

• AS.200.207 Research Methods in Experimental Psychology This is not a probability/statistics course and may be taken in combination with any of the other courses listed in this document in any sequence.

• EN.550.413 Applied Statistics and Data Analysis This course is mostly independent of the other probability/statistics courses, but subsumes enough of the non-calculus, basic course material that none of those courses (category 1) may be taken after EN.550.413.

• EN.550.112 Statistical Analysis II may be taken after any category 1, 2, or 3 course. However, the preferable sequence is EN.550.111 Statistical Analysis I-EN.550.112 Statistical Analysis II.

**Equivalent Statistics Courses**

The courses EN.550.310 Probability & Statistics for the Physical and Information Sciences & Engineering and EN.550.311 Probability and Statistics for the Biological Sciences and Engineering are considered equivalent to each other and can be used interchangeably. A poor grade in one may be absolved by the opposite course.

The courses EN.550.111 Statistical Analysis I and EN.550.113 Statistics Through Case Study are considered equivalent to each other and can be used interchangeably. A poor grade in one may be absolved by the opposite course.
Important Note About Credit and Grades for Language Courses

Both semesters of language elements courses in French, German, Greek, Italian, Latin, Portuguese, Spanish, and languages offered in the Near Eastern Studies Department must be completed with passing grades in order to retain credit for both courses. If study of the language is terminated after the first semester, the student will lose the credit for the course. The course and grade will remain on the academic record, but no credit will be awarded and the grade will not affect the grade point average. This change to the record is generally made in the last semester prior to graduation by the student’s academic advising office, but students can also request that the advising office make the change at an earlier point. Students do not have to take both semesters of the first year of languages taught through the Center for Language Education to retain credit from the first semester.

Students must take the language elements (or beginning) courses for a letter grade, with the exception of the Russian Elements course. The letter grade for first-semester freshmen will be covered on the transcript.

Students in the School of Arts and Sciences do not receive an area designation for these elements courses. For students in the School of Engineering, language elements (or beginning) courses can be substituted for humanities courses in meeting the distribution requirement.

Instructor’s Permission

Many graduate (600-level) courses in the School of Arts and Sciences and the School of Engineering offered in the graduate divisions of the university and some advanced undergraduate courses require the instructor’s approval signature on a registration form. Engineering students also need their faculty advisor’s approval. The Registrar’s Office will not enroll a student in such a course without the instructor’s signature. Therefore, students cannot add these courses online, but must use a paper registration or add/drop form.

Registering for Independent Academic Work

“Independent academic work” is the collective term used to encompass independent study, research, and academic internships. Independent study means a program of study and reading under the tutelage of a faculty member. Academic credit for independent study is based on work equivalent to class-based courses. Research involves planning and conducting experiments, collection and analysis of data, and the reporting of results. Academic internships are practical work experiences which have an academic component as certified by a member of the faculty.

All forms of independent academic work require early planning with a faculty sponsor. To receive academic credit, the independent academic work must include some activity, exercise or product that can be evaluated by a regular member of the AS/EN faculty whose field of expertise is closely enough related to the work for the faculty sponsor to evaluate the work competently and certify that it merits academic credit.

Academic credit for independent academic work must be sponsored by a full-time member of the Homewood faculty. This is the case whether the work is done on campus or not. The work supervisor and the faculty sponsor may be the same individual. If the faculty sponsor is not the work supervisor, the work supervisor must provide the faculty sponsor with a report on the student’s achievements while doing the independent project and the faculty member must certify how much academic credit the project merits.

Students who wish to pursue independent academic work must begin by discussing their ideas with an appropriate faculty sponsor. That discussion must focus on what type of project the student envisions and what possibilities for academic credit the faculty member envisions. If the student and faculty member agree on the type of project and its academic value, then the student should find a suitable research or work environment for the project.

No more than three credits may be earned for independent study or research in one semester or summer (sessions I and II combined); only one credit may be earned for an academic internship during one semester or summer. Additionally, no more than 6 credits of any type of “independent work” may be earned in one academic year. The academic year begins in June with the first summer session and ends in May at the conclusion of the spring semester. Independent work done for academic credit must be unpaid. Credits for research and independent study may vary from 1-3 credits and may be graded with either letters grades (A, B, etc.) or Satisfactory/Unsatisfactory. Credit for an internship is limited to 1 credit, and the grading method is Satisfactory/ Unsatisfactory only.

As with other academic courses, students must register for independent work by the end of the second week of the semester. Students must also observe the registration and add/drop deadlines in January Intersession and JHU Summer session.

Although academic credit is awarded for independent academic work, area designations are not assigned and the credit may not be used to satisfy the distribution requirement. The use of credit for independent academic work to satisfy the requirements of a major or minor is subject to prior written approval by the appropriate department or program.

Registering for Courses in Other JHU Divisions During the Fall and Spring Semesters

Qualified undergraduates may take courses at other divisions of the university by registering in person with the Homewood Registrar. In addition to the registration or add/drop form, students must submit a Supplemental Registration Form for Intervisitional Registration. Forms are available in the Homewood Registrar’s Office in 75 Garland Hall, in the Office of Academic Advising Garland Hall Suite 300, or the Office of Engineering Advising 103 Shaffer Hall. Courses taken at other JHU divisions must be taken for a letter grade, not S/U, unless the course at the host division is offered on an S/U basis only.

Peabody Institute

Performance courses at the Peabody Conservatory may either be as part of a grade and credit, or may be audited. Graded performance courses will receive 1 credit per semester unless taken for a double degree program. With the approval of a student’s teacher, performances that are audited may appear on a student’s academic record.

Homewood undergraduates who are not enrolled in a music major, minor, or degree program may take only one nonperformance course per semester at the Conservatory or Preparatory. These students may also take one performance course concurrently with the approval of
the student’s academic advising office. Students taking lessons for the first time at Peabody must also complete an Extension Application form which is available in the same locations as the Supplemental Registration Form.

Students may take private lessons at Peabody Conservatory with an instructor who is a Conservatory faculty member or a Preparatory faculty member approved by the Deans of the Preparatory and Conservatory. Acceptance is on a space available basis following an audition to demonstrate intermediate or advanced skills. Auditions for Conservatory lessons are held in September. Students will be notified of their audition time by letter from the Conservatory Registrar’s Office. Space in lessons is limited and registration is on a first-come, first-served basis. There is a $190 fee per semester for one half-hour lesson per week ($200 for voice). Students who wish to take additional lessons will be charged for them.

The Peabody schedule and deadlines can differ from those at Homewood. Students taking courses and lessons at the Conservatory must check these dates in the Peabody Master Schedule of Courses.

Students who wish to take beginning level music lessons may enroll through the Preparatory on a non-credit basis.

**The Carey Business School and The School of Education**

Students may register for approved courses in these two schools on a case-by-case basis. Student are limited to no more than 12 credits in the Carey Business School or 12 credits in the School of Education. In order to register in the Carey Business School or the School of Education, students in Arts and Sciences and Engineering programs should use the Interdivisional Registration Form, available from the Homewood Registrar's Office, which requires permission of their academic advisor and the appropriate school program director or advisor. Note that the Carey Business School and the School of Education students have priority in registering for these schools’ courses.

**School of Medicine and Bloomberg School of Public Health**

Except for Public Health Studies majors taking courses at the School of Public Health who require only the Public Health faculty advisor’s approval signature, undergraduates may register for courses in these schools with the approval of the faculty advisor, the course instructor, and the student’s academic advising office. Students must have an adequate background for the courses, and courses must be taken for a grade.

**Registering for Courses at Other JHU Divisions During the Summer**

Degree-seeking students may be permitted to enroll in other JHU divisions through the interdivisional registration process during the summer terms. Students should register and pay for the course at their home division. The course, along with credits and grade, will appear of the student’s home division transcript. Approval is required from both the home and host divisions to ensure that the interdivisional enrollment is appropriate for the student’s degree. Summer courses in other divisions must be taken for a grade.

**Registering for Courses through the Baltimore Student Exchange Program**

Undergraduates may take one course per semester at one of the several area colleges and universities that comprise the Baltimore Student Exchange Program (BSEP). This program includes the following colleges in the Baltimore area: Coppin State University, Goucher College, Loyola University Maryland, Morgan State University, Notre Dame of Maryland University, Towson University, the University of Maryland Baltimore County, and Stevenson University. Similar arrangements on a limited basis are in place with the Maryland Institute College of Art.

Students who have received Air Force ROTC scholarships will register for the required ROTC courses at the University of Maryland College Park using the cooperative institution registration process described in this section.

Courses that are equivalent to those offered at the Homewood campus may not be taken through BSEP. Students register in person with the Homewood Registrar. Students must submit a registration or add/drop form along with a supplemental registration form for the program. The form is available from the Registrar’s Office, 75 Garland or from the student’s academic advising office. The faculty advisor’s approval signature is required for all courses. An academic advisor from the student’s advising office must also sign the form. Submit completed registration materials to the Homewood Registrar's Office.

Prior to the start of classes at the host school, visiting students may report to the host school’s registrar for additional assistance (for example, campus maps or id cards) . Visiting students are not required to complete registration forms at the host school, and no academic record is established at the host institution. There is no additional fee or tuition charge for courses taken through the cooperative education program, except when the host school charges a laboratory or materials fee. In that event, the student pays the fee directly to the host institution.

Courses at these schools must be taken for letter grades. Both grades and credits appear on the Hopkins academic record along with an indication of where the courses were taken. The grades are included in calculations of the grade point average.

**Cooperative Education in Engineering**

Engineering students may participate in government or industry-based cooperative education programs. Students who have received an offer from an employer should contact the Engineering Advising Office at 410-516-7395 or wseadvising@jhu.edu.

**ROTC**

Enrollment in the Johns Hopkins University Department of Military Science ROTC Program prepares students for full- and part-time careers in the U.S. Army and its Reserve Forces, as well as providing leadership and management skills valuable in any profession. Freshmen interested in finding out about the military profession should enroll in a Military Science course. Contact the professor of military science at (410) 516-4685 for enrollment procedures and scholarship information.
Final Examination Schedule for Fall and Spring Semesters

The Registrar establishes the final examination schedule. Official university policy is that students will have no more than two final exams on the same calendar day. In rare cases, the official final exam schedule available on the Registrar’s website, may slot three final exams on one day for a student. Students should contact their advising office for assistance in these instances. Instructors may administer final examinations only at the officially scheduled time, not during class time or during the reading period. Take-home final examinations, and other final exercises (such as papers), that are expected to be prepared for and completed after classes have concluded, are due at the end of scheduled in-class final examination time for the course. All other papers can be due at any deadline during the semester set by the professor, including the reading and final examination periods. Students who are concerned that any of these policies are being violated by their instructors should notify their academic advising office.

The final exam schedule (http://web.jhu.edu/registrar/forms-pdfs/Fall%202015%20Final%20Exam%20Schedule.pdf) is posted on the Office of the Registrar’s website.

Grading Policies

Grades are submitted to the Registrar at the end of the semester. Grades can be viewed online by students using their JHED account and password. Parents may be authorized to view grades in ISIS with permission from the student.

Letter Grades and Grade Point Average

Each letter grade corresponds to a numerical grade point equivalent to allow the computation of a grade point average. The letter grades and their grade point equivalents are as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Performance</th>
<th>GPA Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>Excellent</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>Good</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>Good</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>Satisfactory</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>Satisfactory</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>Passing</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>Passing</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>0.0</td>
</tr>
</tbody>
</table>

For first semester freshmen:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Satisfactory/Unsatisfactory Grades</th>
</tr>
</thead>
<tbody>
<tr>
<td>S</td>
<td>Satisfactory: C- or above (credit earned)</td>
</tr>
<tr>
<td>UCR</td>
<td>Unsatisfactory with Credit: D or D+ (credit earned)</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory: F (no credit earned)</td>
</tr>
</tbody>
</table>

For all other undergraduates:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>

<tr>
<td>TOTAL</td>
<td>13</td>
<td>38.8</td>
<td>38.8</td>
</tr>
</tbody>
</table>

GPA = 38.8/13 = 2.98

Grade Points and Grade Point Average

To determine the grade point average, multiply the grade point equivalent by the number of credits for the course. Add the products (grade points earned), then divide the total by the number of credits in the computation.

A Sample Calculation of a Grade Point Average

Grade | Credit | Grade Point Equivalent | Grade Points Earned |

GPA = 38.8/13 = 2.98

Satisfactory/Unsatisfactory Grades

Beginning with the second semester of the first year, undergraduates may select one course each semester and summer (across all summer terms) to take for Satisfactory/Unsatisfactory credit at JHU. Students indicate their S/U choice on their add/drop form. AS students need the advising office approval for courses within their major or writing intensive courses. EN students need approval from their faculty advisor. Course instructors are unaware of which students in a class are registered for S/U credit. Instructors submit letter grades to the Registrar for all students in their course.

Students must decide whether to take a course on a Satisfactory/Unsatisfactory basis by the end of the eleventh week of the semester. This deadline applies to all courses, even those which may not have any graded work assigned or returned before the end of the eleventh week.

S/U grades have no effect on a student’s grade point average. On the academic transcript, students who earn a grade of C- or above in a S/U course receive Satisfactory credit and a mark of S is entered on the academic record. Students who earn a grade below C- in a S/U
course receive no credit and a mark of Unsatisfactory is recorded on the academic record.

Under certain conditions, graduating students in their eighth semester may exceed the normal S/U grading limit. See Graduation Policies (p. 24) for details.

**Restrictions on Satisfactory/Unsatisfactory Grading**

The S/U option applies only to courses in the fall, spring and summer terms in the School of Arts and Sciences and the School of Engineering. Only one course per semester or summer (across all summer terms) may be taken for S/U credit. However, an eligible student who registers for a course that is only offered for S/U credit may select an additional S/U course in the same semester. Language elements courses must be taken for a letter grade with the exception of Russian Elements. Courses fulfilling a requirement for a major or minor must be taken for a grade (except in the first semester of the first year). If a student has taken a course for S/U credit and then changes to a major or minor that requires the course, the grade can be changed to a letter grade before graduation with the approval of the student’s academic advising office.

**Incomplete Grades**

Students who are confronted with compelling circumstances beyond their control that interfere with the ability to complete their semester’s work during the normal course of a term may request an incomplete grade from the instructor. Approval of such a request is neither automatic nor guaranteed. Procrastination or distraction by other pursuits are not regarded as compelling circumstances, and extensions in these situations are unfair to students who have completed their course requirements within the allotted time.

If the instructor agrees to grant an incomplete grade, the instructor and student must establish a timetable for submitting the unfinished work, but no later than the end of the third week of the following semester. See below for specific information about graduating students. When entering an incomplete grade in ISIS, the instructor must also enter a reversion grade. This is the grade that the student will receive if the missing work is not completed. For example, if the student, based on the coursework completed by the end of the semester, would receive a C+ grade without the missing work, then the grade of I/C+ is entered on the transcript. If the incomplete grade is not resolved within the allowed period (the end of the third week of the subsequent semester), the incomplete grade is automatically converted to the reversion grade (a C+ in this example).

Students who are in good academic standing have until the end of the third week of the next semester to finish incomplete work. Exceptions to this deadline require a petition from the instructor and appeal to the appropriate advising office before the end of the third week of the following semester. When appealing to change the deadline, faculty members must specify a new date for completion of the work which must be before the end of the current semester. Incomplete grades cannot be held over to another semester in order to complete the missing work by repeating the course. Students and instructors do not have an option in this situation.

Incomplete grades do not affect a student’s grade point average, which is based upon the grades that are available for the term. However, students with three or more incomplete grades on their record at the start of a semester may be prevented from making changes to their registration for the semester without the approval of the student’s advising office. Students who are on academic probation are not allowed to take incomplete grades in courses without the approval of the student’s advising office. Unauthorized incomplete grades will be treated as failures when evaluating the work of students who are on academic probation. Authorized incomplete grades must be resolved no later than the deadline established by the Advising Office if the student is on academic probation.

**Special Rules for Graduating Students**

Students with incomplete grades in required courses at the date of degree conferral will not graduate. Students with incomplete grades in courses that are not required for degree completion may still graduate. However, the deadline for completion is abbreviated; students must resolve incomplete grades within approximately 30 days after degree conferral when the university closes their undergraduate record. If the work is not finished by the deadline, the reversion grade will be recorded. For the specific deadline relevant to each degree conferral, please consult with Academic Advising or the Office of the Registrar. For more details on incomplete grades and graduation, see Graduation Policies (p. 24).

**Policy on Changing a Grade**

Once an instructor has submitted a grade to the Registrar, grade changes can be made only in the case of error in grading, calculation, or transcription. If a student has questions about a grade, s/he should contact the faculty instructor, who has sole authority to assess and assign course grades. If the instructor determines a change is warranted because of error, the change must be submitted to the Registrar’s Office by the end of the following semester. Grade changes for graduating seniors must be submitted by the close of their undergraduate record. Under extenuating circumstances, the following procedure may be used to withdraw a student from a previously graded course:

- Official notification to change a grade to a withdrawal must be submitted by the Office of the Dean of Student Life to Arts and Sciences Office of Academic Advising or the Office of Engineering Advising
- All notifications must include the last date of attendance and the instructor’s approval
- The Registrar’s Office will process the withdrawal and notate the academic record
- Late withdrawals may adversely affect a student’s academic standing or financial aid satisfactory academic progress even with official approval.

**Retaking a Course**

Policies about retaking a course can be found here. (p. 12)

**First-Year Language Courses: Information about Credit and Grades**

Policies about first-year language course can be found here. (p. 12)

**Dean’s List**

Students who earn a term grade point average of 3.50 or above in a program of at least 14 credits with at least 12 graded credits will be placed on the Dean’s List for academic excellence. An appropriate notation is made on the students’ academic records. Letters are sent to parents by a student’s respective academic advising office. The
university places notification in your appropriate hometown newspaper, if you elect to follow the directions provided with the letter.

**Class Rank**
The university does not calculate class rank and therefore, cannot provide this information to students or outside parties.

**Transcripts**
Information about ordering transcripts is available here (http://web.jhu.edu/registrar/transcripts). Partial transcripts of a student’s record will not be issued.

Transcripts are normally issued only at the request of the student or with his/her written consent. The only exception to this policy is the issuance of transcripts to offices and departments within the university.

**Freshman First-Semester Grading Policy (Covered Grades)**
The letter grades earned by students in their first semester at the university are not reported on the transcript. Each course that was passed with a grade of C- or above is assigned the letter S (for Satisfactory) in place of a grade. These courses can be used to satisfy requirements for the major, for distribution, and for the writing requirement. Letter grades of D and D+ are assigned the grade UCR (for Unsatisfactory with Credit). Letter grades of F are assigned the grade of U (for Unsatisfactory, no credit earned). First semester courses that receive UCR grades and credits may be used to meet distribution requirements.

**Transcript of First Semester Grades**
All courses appear on the student’s permanent academic records. First-year students are assigned letter grades (A+, A, A-, B+, B, B-, C+, C, C-, D+, D, or F) by the professor for each course taken. The letter grades are not entered on the official transcript; rather, they are represented by the S, UCR or U values described above. The actual grades are said to be “covered” by the S/U grades.

No first-semester grades are included in a student’s cumulative grade-point average. However, an internal GPA is used by the advising offices, the Student Financial Services office, and faculty advisors to determine that a student has made satisfactory academic progress during the first semester. This internal GPA is also used to determine dean’s list eligibility.

A transcript of first semester grades is not released outside the university. Faculty members may not release a student’s first semester grades. If a first-year student applies to transfer from the university in the spring term, before spring grades have been recorded, the student’s advising office can approve release of the actual first semester grades directly to the transfer institution. Once grades from the spring term or additional semesters have been added to the record, the covered grades will not be released.

Students who are applying for or renewing a scholarship may request a letter from their academic advising office stating whether the first semester grades meet the requirements for the scholarship. Students who can demonstrate that failure to release covered grades will prevent them from applying for scholarships or verifying eligibility for scholarships may request that their advising office approve release of the grades. A letter from the scholarship granting institution must state that the application cannot be considered without the actual grades.

**Special Note for Medical or Dental School Applicants:** In the rare circumstance that a medical or dental school requests that a freshman year first semester grade (or grades) be uncovered, Johns Hopkins must receive an official letter from the school that states the student is precluded from consideration or whose candidacy is critically harmed because of the covered grade semester. Students should see the Office of Pre-Professional Programs and Advising. (http://web.jhu.edu/prepro)

Although there are no university regulations concerning attendance, students are expected to attend all courses regularly. Students should consult with their instructors and/or teaching assistants when they have missed classes to explain the reasons for their absence and to stay on track in the course. Instructors are encouraged to establish their own policies regarding attendance, and it is the student’s responsibility to know those policies.

In certain courses regular attendance is given special importance. These include foreign language courses and the introductory courses in the Writing Seminars and Expository Writing. Instructors in these courses may lower a student’s grade for unexcused absences.

If a student is absent from classes over a period of several days without explanation, instructors are encouraged to inform the advising office of his/her school. In some cases, withdrawing from a course may be considered; however, the student must withdraw from a course before the end of the eleventh week of the semester and still remain in at least 12 credits.

**Absence From Class Due to Illness**
The Health and Wellness Center does not provide documentation for students who miss individual classes. In these cases, students should communicate directly with their instructors.

If a student experiences a serious or extended illness that causes the student to miss a significant number of classes or major academic assignments, including mid-term examinations, the student can provide a physician's documentation of the illness to the Dean of Student Life who will notify the student's instructors.

Students who have significant illnesses that interfere with their ability to meet their academic obligations are encouraged to seek treatment at the Student Health Center and to confer with the appropriate academic advising office, which can assist students facing serious health problems. Students should also notify faculty when they are not able to complete work due to illness. Faculty who see a pattern of absences or late work are encouraged to confer with the student's advising office.

Falsely reporting an illness or injury is a violation of the code of student conduct and is subject to disciplinary action.

**Absence for Religious Holidays**
Religious holidays are valid reasons to be excused from class. Students who must miss a class or an examination because of a religious holiday must inform the instructor as early in the semester as possible in order to be excused from class or to make up any work that is missed.
Approved Absences
The university encourages students to participate in varsity athletics and other significant extracurricular activities. Students who must miss a class or an examination because of participation in a scheduled in-season varsity athletic event must notify the course instructor as early in the semester as possible. Approved absences are granted at the discretion of the course instructor. When students must miss a scheduled examination, several solutions have been found by instructors. Students have been permitted to take an examination before leaving for the event, or coaches have served as proctors for examinations taken during the athletic event at approximately the same time as the other students in the course. Students have also been allowed to take the examination, or an alternative examination, upon their return from the athletic event.

Student Status
Contact Information
All matriculated students are required to have on record with the university accurate local and permanent contact information at all times and may be subject to a registration hold if this information is missing. This includes local address, local telephone number, and valid JHU e-mail address. Parent or legal guardian emergency contact information also must be on record and updated as necessary. This information should be maintained with the Registrar’s Office by using ISIS for Students (https://isis.jhu.edu).

Student Classification (Year of Study)
Student classification refers to the familiar names for the four undergraduate years: freshman, sophomore, junior, and senior. A student’s classification is generally determined by the academic year in which the student’s cohort began the first year of college. In the first year, students in the cohort are designated freshmen. For students transferring into the university, an official student classification will be assigned by the respective advising office after completion of a final transfer credit evaluation. The number of credits a student has earned does not determine class standing. A student who graduates after three years would graduate as a junior.

For students who have been on leave and missed two or more semesters, classification will be determined by the student’s academic advising office when the student returns to the university. If, for example, a student was on leave of absence for an entire academic year, the advising office may assign the student to a cohort one year behind the student’s original cohort.

Students are required to register with their cohort, not on the basis of total credits or expected date of graduation. Plans to graduate early are not grounds for registering before a student’s cohort. If a student who intends to graduate early is closed out of a required course for the major, the student may petition the department offering the course for approval to add the course. The decision rests with the department.

Full-Time Student Status
Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester. Students who have not completed degree requirements after eight full-time semesters may register for fewer than 12 credits and pay for courses on a per-credit basis. Prior to a ninth semester, a student may not enroll for fewer than 12 credits. Students who have not completed degree requirements after eight full-time semesters (or four full-time semesters for transfer students) in college may register for less than 12 credits and pay for courses on a per-credit basis with approval of the student’s academic advising office.

Personal Leave of Absence
Students may be granted a term leave of absence for personal reasons with the approval of the academic advising office for the student’s school and with a letter from the student’s parent or guardian acknowledging the request for leave. Written requests for a leave of absence should be submitted to the academic advising office in the student’s school. Leaves of absence are granted for specific periods, generally up to one year, and such leaves are regarded as approved interruptions of a student’s program. No tuition or fees are charged while on leave.

Students who fail to return to the university when expected will be considered to have withdrawn from the university.

Medical Leave of Absence (Physical or Mental Health)
Students may be granted a term leave of absence for physical or mental health reasons with the approval of the Office of the Dean of Student Life. Mental health leaves of absence require consultation with the Counseling Center. Physical health leaves of absence require consultation with the Student Health and Wellness Center. No tuition or fees are charged while on leave. Further details are available from the Office of the Dean of Student Life (http://web.jhu.edu/studentlife).

Note for Peabody Double Degree Students
Peabody double degree students may request a leave of absence from the double degree program, but they cannot be granted a leave of absence from only the Homewood or Peabody portion of the program.

Withdrawal from the University
A student who wishes to withdraw from the university with no intent to return should consult with the respective academic advising office in order to submit an official notification. An official notification of withdrawal consists of the following items:

- a letter providing brief reason for withdrawal and effective date
- a letter from parent(s)/guardian(s) acknowledging the student’s withdrawal from JHU

The academic advising office will inform the Office of the Registrar, who will subsequently circulate the notification to other relevant campus offices, such as Student Accounts, Housing, Office of International Services, etc.

An enrolled student who leaves the university without notice, or who fails to register by the second week of the semester, may be considered to have withdrawn from the university.

In the rare situation where a withdrawn student wishes to return to the university, the student must submit a written request for readmission to their respective advising office for evaluation. A student must be formally readmitted before registering for courses. Readmitted students do not pay another matriculation fee.
A student who wishes to withdraw from the university on a temporary basis and intends to return in a future semester should see the information under Leave of Absence (p. 19).

Many departments, institutes, and centers offer undergraduates the opportunity to complete some of the requirements for a master’s degree while still completing the requirements for a bachelor’s degree. Some of these programs offer early admission to the graduate school and may enable a student to complete both bachelor’s and master’s degrees in four years. Other programs are considered five-year programs. For information on what offerings are available in a specific department, refer to the departmental entry.

Students in either the School of Arts and Sciences or the School of Engineering must be accepted into a combined program no later than the first semester of their senior year (some departments set an earlier application deadline).

**School of Arts and Sciences**

Students in a combined program are full-time students and are charged full tuition. This category is reserved only for current JHU full-time undergraduate students who are accepted into a combined graduate program. Such students are eligible to become full-time graduate students upon completion of their undergraduate degree requirements.

**School of Engineering**

The registration status of Whiting School of Engineering students who have been admitted into a combined bachelor’s/master’s degree program will switch from undergraduate to graduate once they obtain clearance from their respective departments and either:

1. complete the requirements for a bachelor’s degree, or
2. complete eight semesters of full-time undergraduate study, whichever comes first. As soon as this occurs, a student is guaranteed health insurance benefits and becomes eligible for a partial tuition waiver and research and teaching assistantships (the graduate program determines the student’s level of support).

**Taking a Course as an Alumnus**

JHU alumni who completed their bachelor’s degree through the Krieger School of Arts and Sciences or the Whiting School of Engineering may take additional courses in those divisions with permission of the advising office of the school from which they graduated. Students should complete a paper registration form and have it signed in their respective advising office before taking it to the Office of the Registrar for processing. Courses, grades, and credits will appear on a new academic record. Students must follow the rules for earning a second major or a minor after graduating, if applicable.

**Finishing a Second Major or a Minor after Graduating**

Students who have completed eight or more semesters in college may take an additional course or two after graduation to complete a second major or minor if they have filed an approved plan with their respective advising office before their initial graduation date. The courses, grades, and credits will appear on a new academic record. A notation indicating the additional major or minor will be added to the new academic record, but a new diploma will not be issued. Students must notify their academic advising office when additional courses taken after graduation satisfy another major or minor.

A plan consists of the following:

1. Written approval from the director of undergraduate studies for the additional major/minor.
2. Description of the remaining requirement(s) to be completed. No more than two courses may be needed and these courses must be completed within one year of a student’s initial graduation date.
3. Brief summary of why it is necessary for the student to have their degree conferred before completion of all planned majors or minors.
4. Final approval of a plan must be obtained from the student’s respective advising office.

Students who graduate in fewer than eight semesters may also take courses after graduation as a full-time or part-time student if not completing an additional major or minor. Students who graduate early lose the opportunity to complete additional majors or minors after graduation.

Students should seek assistance of their respective advising office in order to register for a course after graduation.

**Second Degrees**

Krieger School of Arts and Sciences and Whiting School of Engineering undergraduate-degree alumni who wish to earn a second bachelor’s degree at Hopkins must contact their advising office. Students who receive approval must have already completed the requirements for the first bachelor’s degree and complete an additional 60 credits at Hopkins beyond what they have done for the first degree. Alumni must request permission to pursue a second bachelor’s degree within ten years of the conferral of the first bachelor’s degree. The second bachelor’s degree must be completed within ten years from the starting date of the second bachelor’s degree.

**Requirements for a Bachelor’s Degree**

The information below describes the requirements for students entering JHU in Fall 2014 or later. Students who entered JHU prior to Fall 2014 should view the appropriate archived catalog (http://web.jhu.edu/registrar/catalog).

There are five categories of degree requirements that comprise an undergraduate degree at Hopkins:

1. Total degree credit requirement (ranges from 120-129)
2. Residency requirement (minimum 100 JHU credits for freshmen)
3. Distribution requirements
4. Writing requirement
5. Departmental major requirements (and minor requirements, if applicable)
All approved credit earned through exams or at other colleges and universities may be used to meet requirement areas 3-5 listed above: distribution requirements, the writing requirement (according to the procedures defined by the Writing Center (http://krieger.jhu.edu/ewp/writing%20requirement), departmental major and minor requirements, and to satisfy course prerequisites.

The total degree credit requirement (requirement 1) is considered a distinct degree requirement and ranges from 120-129 credits, depending on the degree. It is not merely a cumulative tally of courses used to satisfy requirement areas 3-5 listed above. Because students who entered the university directly from high school must complete 100 JHU credits (requirement 2), there is an effective limit on how many exam and transfer credits can be counted towards the total degree credit requirement (requirement 1).

For a degree requiring 120 total credits, a maximum of 20 approved credits from other sources may be counted towards the total degree credit requirement (requirement 1), even if more than 20 credits from external sources have been used to satisfy requirement areas 3-5 listed above.

For example, a student is pursuing a degree whose total degree credit requirement is 120. This student could have a total of 32 external credits posted to the transcript: 8 transfer credits from another university and 24 AP exam credits. All 32 of these credits may be applied to requirement areas 3-5. However, in order to allow room for the residency requirement (requirement 2), only 20 of those 32 credits will be tallied towards the 120 total degree credit requirement (120-100=20). If this student changes to a degree program whose total degree credit requirement is 126, 26 of those 32 credits would be tallied towards the total degree credit requirement (126-100=26).

All approved exam credits earned will be posted to the transcript. Up to 12 approved transfer credits will be posted to the transcript. See External Credits (p. 27) section for details.

"D" Grade Restriction

University policy allows no more than 18 credits from courses with grades of D or D+ to be counted toward the credits required for graduation. Departments may set a lower limit on the number of permissible D or D+ grades for a specific major. Many departments do not accept any D or D+ credits for major requirements.

Ten-Year Degree Completion Limit

A student must fulfill all degree requirements for graduation within 10 academic calendar years from the date of matriculation at the university.

Disability Support Services

JHU welcomes students with disabilities and values their diverse experiences and perspectives. The Office of Student Disability Services (SDS) coordinates appropriate and reasonable accommodations for qualified students with disabilities in accordance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990 and the ADA Amendments Act of 2008. SDS also works with various offices on campus to ensure that students with disabilities have equal access to university programs, facilities, technology, and websites.

Students who wish to request reasonable accommodations must submit documentation that establishes a disability, details the current functional impact of that disability, and confirms the need for each accommodation requested. Documentation guidelines are available on the SDS website at http://web.jhu.edu/disabilities/students/admitted/documentation/index.html.

Students seeking accommodations are encouraged to submit their specific requests at least two weeks prior to the start of the semester to ensure that accommodations are provided in a timely manner.

Full-time undergraduate and graduate students in the Krieger School of Arts and Sciences or the Whiting School of Engineering with questions and concerns regarding the registration process, implementation of accommodations and/or identification of other support services, should contact:

Dr. Brent Mosser, Director
Academic Support and Student Disability Services
bmosser1@jhu.edu
410-516-4720
web.jhu.edu/disabilities

Questions regarding JHU’s documentation guidelines or physical and programmatic access at JHU should be directed to:

Abigail Hurson, JD
Disability Services Officer
Office of Institutional Equity
ahuron1@jhu.edu
410-516-8075 (voice), 410-516-6225 (TTY)
web.jhu.edu/administration/jhuoie/disability.html

The Bachelor of Arts degree requires 120 credits. The Bachelor of Science degree, whether in Arts and Sciences or Engineering, requires from 120 to 130 credits, depending on the major. No program may require more than 130 credits.

Residency Requirement for Freshmen

Students who enter the university from high school must complete at least 100 credits at JHU. This includes courses that are taken after matriculation as a degree-seeking student:

• in fall, intersession, spring, or summer at JHU
• in other divisions of the university (including Advanced Academic Programs and Engineering for Professionals)
• through the Baltimore cooperative institutions program during the fall and spring semesters only
• through an approved study abroad program (up to 30 credits)

In addition, credits earned through JHU courses prior to matriculation as a degree-seeking student are applied to the 100-credit residency requirement.

Students who entered JHU prior to Fall 2014 should view the appropriate archived catalog (http://web.jhu.edu/registrar/catalog).

All students must complete a minimum of four semesters in residence as a full-time student. Students must be in residence for at least two of the final four semesters, including the final semester prior to graduation.
Residency Requirement for Transfer Students

Students who enter the university as transfer students must complete at least 60 credits at JHU. This includes courses that are taken after matriculation as a degree-seeking student:

- in fall, intersession, spring, or summer at JHU
- in other divisions of the university (including Advanced Academic Programs and Engineering for Professionals)
- through the Baltimore cooperative institutions program during the fall and spring semesters only

In addition, all transfer students must complete at least four full-time semesters in residence at JHU. Transfer students must be in residence for at least two of their final four semesters, including the final semester prior to graduation.

Residency Requirement for Peabody Double Degree Students

Students earning a double-degree at Peabody must complete at least 48 credits on the Homewood campus in either the Krieger School of Arts & Sciences or the Whiting School of Engineering.

To encourage excellence in writing, across disciplines, the university requires all undergraduates to take a number of writing-intensive courses. A writing-intensive (W) course is one in which students write at least 20 pages of finished writing, distributed over multiple assignments, usually 3 or 4 papers, throughout the semester. Instructors respond to students’ work in written comments or in conference, or both; and students have at least one opportunity to receive their instructor’s feedback on a draft and then revise. A writing-intensive course guides students’ practice in writing and makes writing an integral part of the course. The writing-intensive requirement is administered by Patricia Kain, Director of the Expository Writing Program (http://krieger.jhu.edu/ewp).

Writing-intensive courses are indicated by a “W” in the JHU course schedule and an asterisk (*) on a student’s transcript. Courses taken to satisfy the writing requirement must be taken for a letter grade and passed with a grade of C- or better. Writing-intensive courses taken to satisfy major, minor, or distribution requirements may also count toward the writing requirement.

All students in the School of Arts and Sciences must complete at least 12 credits in writing-intensive courses. Candidates for a B.A. degree in the School of Engineering must complete 12 credits (four courses at least 3 credits each) in writing-intensive courses, while candidates for a B.S. degree in Engineering must complete 6 credits (two courses at least 3 credits each) in writing-intensive courses.

Students who wish to receive writing-intensive credit for a course taken at another college or university must obtain written approval from Professor Kain. No more than 6 credits may be transferred to meet the writing requirement. Students must have a grade of B or higher in the course and must provide Professor Kain with the course syllabus. Please see the procedure for transferring writing credits (http://krieger.jhu.edu/ewp/writing%20requirement).

Students who enter the university with scores below 600 on the SAT writing or verbal test are advised to take AS.060.100 Introduction to Expository Writing during the fall term of their first year.

The distribution requirement stipulates that students must earn a minimum number of credits in academic areas outside of their primary major. Area designators represent an association between the course and an academic area. Courses with area designators are expected to do more than employ basic techniques, they are to advance knowledge and increase a student’s understanding of the theory. Courses that are teaching a basic skill, and therefore do not expose the student to modes of analysis and scholarship that represent the essence of a given discipline, will not be assigned an area designator. If taught within a Homewood academic department, the department is responsible for assigning area designators to their courses. Courses not offered through Homewood academic departments will be reviewed by the appropriate dean’s office to review proposed designators.

The academic areas in the Hopkins curriculum are humanities (H), natural sciences (N), social and behavioral sciences (S), quantitative and mathematical sciences (Q), and engineering (E).

The area designations of courses (H, S, N, Q, and E) are included in the course information in the departmental pages (p. 69) of the catalog and in the online schedule of classes. The area designation also appears beside the course title on a student’s academic record. When a course has more than one area designation (HS, EN, EQ, etc.), students may use only one of the designations to satisfy the distribution requirement.

Only courses or other credit-bearing opportunities with area designations may be used to satisfy the distribution requirement. Area designators are not assigned to the following:

- Independent study
- Research
- Internships
- Music performance (unless taken as part of a music minor, in which case the course will be designated H)
- Dance performance
- Foreign language elements courses (see additional foreign language rules (p. 12))
- Medical tutorials
- Area designations can be assigned to courses taken elsewhere, to courses taken in other divisions of the university, or to graduate courses taken by undergraduates. These assignments are made by the appropriate dean’s office based on the course content and the recommendations of the faculty. The most useful criteria for determining an appropriate area designator will be the course description and a similar JHU departmental offering.

The following courses at the Peabody Conservatory have H designations:

<table>

</table>
Every student who earns a bachelor’s degree must satisfy the requirements of a major. A major is a structured curriculum, usually tailored to meet the student’s interests in the field. The requirements for the major may also include courses in other disciplines that provide skills and information of importance to professionals in the major field. Courses required for the major must be taken for a letter grade and students must have a grade point average of at least 2.00 in the courses required for the major, i.e., not including elective courses or courses used only for the distribution requirement. Many majors require a grade of C- or better in required courses.

**Distribution Requirement for Arts & Sciences Students**

Students must earn:

- At least 9 credits in humanities
- At least 9 credits in social sciences
- At least 9 credits in natural sciences, quantitative, or engineering

These credits fulfilling the distribution requirement may overlap with major or minor requirements and the writing requirement.

In Arts and Sciences, courses taken for the distribution requirement may be taken for a letter grade or for Satisfactory/Unsatisfactory credit. Courses passed with a letter grade of D or better, or passed with a Satisfactory grade, will fulfill the distribution requirement. For any student whose first-semester grades are covered under the current first-semester grading policy, an earned D will satisfy the distribution requirement even though the grade will appear as Unsatisfactory (UCR) on the official record. Satisfactory grades (representing a C- or higher letter grade) earned in a student’s first semester at JHU will satisfy the distribution requirement if they have the correct area designations.

Students who entered JHU prior to Fall 2014 should view the appropriate archived catalog (http://web.jhu.edu/registrar/catalog).

**Distribution Requirement for Engineering Students**

Students earning a degree in the School of Engineering must complete the following distribution requirement:

- 18 credits (6 courses at least 3 credits each) designated H and/or S. Although language elements courses do not carry an area designator, engineering students may use these courses as substitutes for humanities courses in meeting the distribution requirement.
- At least 75 credits earned in courses coded E, Q, or N, with at least 30 credits in courses coded N or Q, with no course counted twice. At least 30 of the 75 credits must be earned outside the student’s major department.

In Engineering, each department determines whether or not the Satisfactory/Unsatisfactory grading option will be permitted for courses used to satisfy the distribution requirement. Satisfactory grades (representing a C- or higher letter grade) earned in a student’s first college semester at JHU may satisfy the distribution requirement if they have the correct area designations.

**Completing a Major and Minimum Grade Point Average**

Every student who earns a bachelor’s degree must satisfy the requirements of a major. A major is a structured curriculum, usually within the confines of a particular academic field. Generally the requirements for a major provide a student with a broad overview of the field through introductory courses, followed by more specialized courses tailored to meet the student’s interests in the field. The requirements for the major may also include courses in other disciplines that provide skills and information of importance to professionals in the major field. Courses required for the major must be taken for a letter grade and students must have a grade point average of at least 2.00 in the courses required for the major, i.e., not including elective courses or courses used only for the distribution requirement. Many majors require a grade of C- or better in required courses.

**Departmental Directors of Undergraduate Studies**

For every major and minor that is offered at Johns Hopkins, there is a faculty member or their designee who serves as the program’s Director of Undergraduate Studies (DUS). They are available to answer questions about their major(s) and/or minor(s). The directors also assign faculty advisors to students who declare a major or minor.

**Declaring a Major in Arts and Sciences**

Students who enter the Krieger School of Arts and Sciences from high school are classified as pre-majors during their freshman year. In April, freshmen in Arts and Sciences will meet with an academic advisor to declare their primary major in Arts and Sciences. To declare a major at a later time, see Changing Majors or Advisors (p. ). Students must declare a major by April 15th of their sophomore year in order to assure that they will complete requirements for graduation in four years.

**Declaring a Major in Engineering**

Students who enter the Whiting School of Engineering (WSE) declare a specific engineering major on their application for admission. A student must take direct action to change the major. To change a major, see Changing Majors or Advisors (p. ).

Students who select the Biomedical Engineering major must be accepted into the program at the time of application for admission. The student’s offer of admission to the university will indicate either:

- acceptance into the BME program
- acceptance into any Engineering or Arts & Sciences major except BME

On a space available basis, BME may accept a limited number of students into the program at the end of the freshman year based on the overall academic credentials of each applicant. However, this option is exercised very infrequently by the BME department.

Students may also select the more general “undeclared engineering” category on the admissions application to enter the WSE. It is recommended that undecided engineering students select a specific major no later than the end of freshman year.

**Special Note for Freshmen**

KSAS freshmen may declare second majors and minors offered through the School of Engineering beginning their freshman year until April 15th of their junior year. Engineering students may declare a second major or
minor offered through either the School of Engineering or the School of Arts and Sciences beginning their freshmen year until April 15th of their junior year.

Changing Majors or Advisors

Once students have declared a major, they may change their major or their faculty advisor at a later date by obtaining a Change of Major form from the Office of the Registrar or the advising offices, meeting with appropriate person in the major to be assigned a new faculty advisor, and submitting the form to the Office of the Registrar.

Note that students may declare the BME major only at the time of application for admission to the University or as one of a limited number of students accepted into the program at the end of the freshman year based on the overall academic credentials of each applicant and on space available.

Double Majors

Students who wish to complete the requirements of more than one major are expected to declare the additional major(s) by April 15th of their junior year. Students may add or drop an additional major by completing the appropriate form, available from the Office of the Registrar or from the student’s academic advising office. The form must be signed by the director of undergraduate studies for the major before it is submitted to the Office of the Registrar. The DUS will also assign a faculty advisor to the student.

A student with a double major receives the degree (B.A./B.S.) associated with the student’s primary major. Completing a second major does not entitle the student to a second degree. The completion of additional majors is recorded on the transcript and diploma. When completing a double major, students need only satisfy the distribution requirement affiliated with the school of their primary major.

Declaring a Minor (optional)

Students who wish to complete the requirements for a minor(s) are expected to declare the minor(s) by April 15th of their junior year. Students may add or drop a minor by completing the appropriate form, available from the Office of the Registrar or from the student’s academic advising office. The form must be signed by the director of undergraduate studies for the minor before it is submitted to the Office of the Registrar. The DUS will also assign a faculty advisor to the student. The completion of a minor is recorded on the transcript, but the minor does not appear on the diploma.

Official recognition with notation on the academic record is not given for completion of majors or minors at other divisions of the university or at other colleges.

Restrictions Applying to Double Majors and Minors

Within the Hopkins curriculum, requirements for the completion of undergraduate majors and minors are established by academic departments and approved by the Homewood Academic Council, acting on recommendations from the Curriculum Committees of the Krieger and Whiting Schools. Students who fulfill the necessary prerequisites and satisfy the specified course requirements for a major/minor will be certified as having completed that major/minor. While departments are free to designate the range of courses that may satisfy major/minor requirements for their own academic programs, they may not prohibit the use of course work presented for their department’s major/minor from being used to satisfy the requirements of other majors or minors. In other words, students may “double count” coursework that independently meets the requirements of more than one major/minor.

Students are encouraged to choose additional areas of study to complement their major. However, students may not choose a minor with an identical name to their major. For example, a student majoring in Africana Studies may not declare a minor in Africana Studies.

Other prohibited combinations include:

1. Students majoring in Molecular and Cellular Biology may not major in Biology.
2. Students majoring in the Natural Sciences Area may only double major or minor in a program outside of the natural sciences.
3. Students majoring in Romance Languages may not major or minor in one of the individual Romance Languages (except for the Spanish for the Professions minor).
4. Students majoring in French may not complete either French minor option.

Closely-related majors and minors that are allowed include:

1. Economics majors may complete a Financial Economics minor.
2. Spanish majors and Romance Languages Majors may complete the Spanish for the Professions minor.
3. Computer Science majors may complete a Computer Integrated Surgery minor.

The examples provided above may not be an exhaustive list and students who have questions about combinations of related programs should consult an advisor in their respective advising office.

Graduation Policies

Applying to Graduate

Students who intend to graduate in the next academic year must complete an Application for Graduation as directed by their respective academic advising office. The university confers degrees three times per year and there is one annual commencement ceremony in May.

Graduating in May

Most students who enter the university directly from high school graduate in May after eight semesters of full-time enrollment. Full-time enrollment is a minimum of 12 credits. Part-time enrollment is not permitted within a student’s first eight semesters. Because of the requirement that students have full-time status in the semester immediately prior to graduation, students must register for at least 12 credits in the final semester even if all course and credit requirements could be met with fewer than 12 credits.

Graduating in August

A small number of students complete their degree during the summer. Students who have completed eight full-time semesters may graduate in the summer if all degree requirements have been satisfied by the degree conferral date (last Friday in August preceding the start of fall semester classes). Students who have not completed eight full-time semesters should see the Graduating Early (p. 25) policies.
Graduating in December
A small number of students complete their degree at the end of the fall semester, not including intersession. Students may graduate in December if all degree requirements have been satisfied by the degree conferral date (December 30th or the preceding Friday if the 30th falls on a weekend). Students are required to maintain full-time status (at least 12 credits) in their final semester unless they are in their ninth semester or later.

Note for students who entered as transfer students
Transfer students are not subject to the eighth semester restrictions listed above. They must complete at least four full-time semesters at JHU before they are eligible to graduate.

Completing Graduation Requirements
Students are responsible for completing the requirements for a bachelor’s degree (p. 20). All grades and credits for courses that are required for graduation must be submitted in time to clear students for graduation.

Each student expecting to graduate will receive a final bill from the university. It is university policy that all outstanding accounts must be paid in full before a student’s diploma may be released.

Students who have not completed degree requirements after eight full-time semesters (or four full-time semesters for transfer students) in college may register for less than 12 credits and pay for courses on a per credit basis. With approval of the director of the student’s academic advising office and the major department (in the case of courses required for the major), these students may take courses elsewhere to meet the remaining graduation requirements, but must observe the 12 credit limit on transfer credit. These students also may have part-time status in the semester when they graduate.

Graduating students who are taking courses through the Baltimore Student Exchange Program or in other divisions of the university must make arrangements with their instructors on the first day of class to have final grades submitted to the host registrar and then to the Homewood Registrar by the deadline for submitting grades for graduating students. If such an arrangement cannot be made, students should not register for the course.

Students who graduate in December may remain in university housing and/or continue to participate in student organizations only if they enroll for a minimum of 6 credits during the following spring semester.

A student will not be graduated with unresolved outstanding charges of misconduct or academic ethics violations.

The university does not guarantee the award of a degree. The award of degrees is conditional upon a) satisfaction of all degree and instructional requirements in effect at the time of matriculation as a degree-seeking student (as published in the relevant annual catalog), b) compliance with the current university and divisional regulations, and c) performance meeting the bona fide expectations of the faculty.

No member of the faculty is obliged to provide students or graduates with an evaluation or letter of recommendation which does not accurately reflect the faculty member’s true opinion and evaluation of the student’s academic performance and conduct.

Graduating Early (less than 8 semesters)
Students are eligible to graduate early at the end of the fall or spring semester if they have completed all requirements for graduation, including the residency requirement (p. 21). Students graduating early may not use intersession as a final term to complete remaining graduation requirements. Students may not graduate early during the summer except in the circumstances described below:

• Student has at most two incomplete grades in spring semester required courses, or
• Student has one incomplete grade in a spring semester required course and needs one required course in the summer, or
• Student needs one required course in the summer.

These students must meet with their respective advising office to file an August conferral plan prior to the May commencement ceremony. This plan requires proof of summer course registration, if applicable.

Incomplete Grades and Graduation Status
Students with incomplete grades or missing grades in required courses at the date of conferral will not graduate.

Students who have completed at least 8 full-time semesters and have met the residency requirement and who receive one or more incompletes in their last semester in attendance, may complete those incomplete grades and are not required to register for additional coursework unless required for their degree.

Students who have completed less than 8 full-time semesters:

• who receive one or two incomplete grades in required courses during their intended last spring semester should review the Graduating Early (p. 25) policies.
• who receive three or more incomplete grades during their intended last spring semester are required to register for another full-time fall semester (at least 12 credits) in order to complete all degree requirements (including the residency requirement).
• who receive incomplete grades in required course(s) during their intended last fall semester must resolve these incomplete grades no later than the December degree conferral date or register for another full-time spring semester (at least 12 credits) in order to complete all degree requirements (including the residency requirement).

Last Semester Option
In their last semester before graduation, students may request that they be excused from taking the final examination in one or more courses.

This option is solely at the discretion of the course instructor. This option is not available to students who are graduating early.

S/U Option in the Last Semester
Students in their final semester, who will have completed at least eight full-time semesters in college when they graduate and who are taking more credits than are needed to complete graduation requirements, may take one or more of the extra courses for S/U credit. Engineering students must have the faculty advisor’s permission, indicated by his/her signature on an add/drop form, to request this option. The faculty advisor’s signature indicates that the student will have completed all degree requirements without this course. In addition, a signature from the Engineering advising office is needed to confirm that the senior has
applied for graduation in the spring semester. Arts & Sciences students must seek approval from the Academic Advising Office.

The extra courses may also include up to 6 credits of independent academic work, either graded or S/U. In addition, the usual limit of no more than 6 credits per year of independent academic work will be waived if the additional credits are for extra credit work done in the final semester.

**Graduation Closes the Undergraduate Record**

Upon graduation, the undergraduate record is closed. The only permitted changes are the resolution of incomplete grades, missing grades, and grade errors. These changes must be resolved by the first Monday after 30 days have lapsed since the degree conferral date. Students wishing to take additional courses at JHU after graduation should refer to Alumni Enrollment (p. 20) policies.

**General and Departmental Honors at Graduation**

Students may receive general honors, departmental honors, or both at graduation. General honors are awarded to students with cumulative grade point averages of 3.50 or better. The final determination is made after all grades have been reported. Departments set their own standards for the award of departmental honors. Students should consult with Director of Undergraduate Studies for their major about the requirements for honors.

General and departmental honors are noted on a student’s academic record following the student’s last undergraduate semester before graduation. In addition, honors are noted in the Commencement program. However, because the program is printed several weeks before the date of Commencement, not all honors are announced in time for inclusion in the program.

**Completing an Honors Thesis**

Students who are completing an honors thesis for departmental honors must complete the thesis before graduating. Students may not stay on after graduation to complete an honors thesis. Similarly, students graduating at midyear may not register part-time in the spring semester to finish an honors thesis.

The university commencement ceremony is held once each year in May. The student’s academic advising office determines whether a student has completed all requirements and clears the student for graduation and participation in Commencement. Students who graduate in August, December, and May are invited to participate in the commencement ceremony in May following their degree completion. Students who graduate in August may receive permission to walk in the May ceremony preceding degree completion if they file an August conferral plan with their respective advising office. The diploma and degree will not be awarded until all courses are completed successfully and recorded.

**Academic Standing Policies**

**Good Academic Standing**

Students who maintain a minimum of 12 credits earned and a term GPA of at least 2.0 each semester are considered in good academic standing.

**Reviewing Academic Standing**

Each academic advising office reviews student records at the end of fall and spring semesters to monitor academic standing. Based on this review, students may be placed on academic probation or academically dismissed.

**Satisfactory Academic Progress**

Satisfactory academic progress (SAP) refers to minimal standards for grades and cumulative credits required to receive financial aid. The SAP policy is described here http://www.jhu.edu/finaid/remove.html#satisfactoryacademicprogresspolicy.

**Academic Probation**

At the end of each fall and spring semester, the academic advising offices review the records of all undergraduate students to evaluate the academic standing of each student. Students who earn less than 12 credits or earn a term GPA below 2.0 are placed on academic probation. A letter informing a student of this status and the terms of academic probation are sent to the student in January (for fall performance) or June (for spring performance).

The terms of academic probation are as follows: Students must complete at least 12 credits with a minimum term GPA of 2.0 in the next enrolled fall or spring semester. Students may also be required to achieve a cumulative GPA of 2.0 or above in order to be removed from academic probation. In making the GPA calculation, incomplete grades (I) may be calculated as failures (F). In addition, any grade in a satisfactory/unsatisfactory course may be taken into consideration.

Students who do not meet the terms of academic probation will be academically dismissed (https://e-nextcatalog.jhu.edu/undergrad-students/academic-policies/academic-standing/#academicdismissalreadmission). In some circumstances, a student may be continued on academic probation instead of being dismissed. A student whose term GPA falls below 1.0 or earns less than 6 credits may be dismissed without having been on academic probation the previous semester.

The advising offices send written notification to students who are placed on academic probation. Incomplete or missing grades may prevent timely notification. Students with a term grade point average below 2.0 or who earned less than 12 credits should consult with an academic advisor about their academic standing, even if they have not received the letter from their advising office.

Students on academic probation may be restricted from registering for the maximum course load. Engineering students on academic probation are permitted a maximum of 14 credits during the probation semester.

A student’s academic performance during the summer term or intersession will not affect his/her academic standing.
**Academic Dismissal**

A student on academic probation who has not met the terms of probation will be subject to academic dismissal from the university for a minimum of one semester and a summer. A student whose term GPA falls below 1.0 or earns less than 6 credits may be dismissed without having been on academic probation the previous semester.

Students may direct inquiries about the dismissal process to the Academic Review Committee of their respective advising office.

Students who hope to return to the university in a future semester are encouraged to work with their academic advisor to develop a plan for their time away.

When a student is dismissed from the university, several university offices are notified and several important consequences follow.

- Registrar’s Office: cancels the student’s registration for the next semester and authorizes a refund of tuition paid for that semester;
- Office of Student Financial Services: suspends financial aid and work-study aid to the student;
- Housing Office: cancels the student’s housing contract if the student is in university housing;
- Office of International Services: performs duties as required by U.S. federal regulations regarding persons not eligible to study at the university.

**Readmission after Academic Dismissal**

The terms for readmitting a student who has been dismissed for academic reasons are established by the Academic Review Committee of their respective advising office.

Students are readmitted on academic probation and must meet those terms in their returning semester or face dismissal again.

Students who receive prior approval to complete courses at another college or university during the period of dismissal are subject to the university’s 12-credit limit on the number of transfer credits that can be applied toward graduation.

**Readmission Requests**

To apply for readmission, a dismissed student must submit a letter to the respective advising office. The letter should include an analysis of what went wrong during the preceding two semesters of enrollment, a description of activities while not in attendance, and an academic plan for completing all degree requirements. Supplemental materials such as transcripts of courses taken elsewhere, letters of reference from work or volunteer supervisor, or letters of support from a mental/physical health care provider may be required. Students are encouraged to contact their academic advisor prior to submitting a readmission letter.

**Readmission and Financial Aid**

Academic dismissal and financial aid suspension are two distinct actions and must be addressed separately. The Financial Aid Satisfactory Academic Progress (SAP) appeal process can be found online (http://finaid.johnshopkins.edu/return.html#satisfactoryacademicprogresspolicy). This appeal is in addition to the request for readmission to your advising office.

**Subsequent Academic Dismissals**

A student who is dismissed a second time will be required to separate from the university for a minimum of one year. A third academic dismissal is permanent.

**Eligibility for Financial Aid**

All regular degree-seeking students who are eligible to register are also eligible to apply for financial aid. Only U.S. citizens and eligible non-citizens (e.g., permanent residents) are eligible for Federal Title IV financial aid.

Students should be aware that JHU scholarship and grant funds are awarded for a maximum of eight semesters. Under some circumstances, a ninth semester may be awarded on appeal. Federal and state aid may be available for additional semesters.

Students are required to maintain full-time status by registering for at least 12 credits per semester. In rare circumstances, such as severe illness, a student may be permitted to register for less than 12 credits in a given semester. Even with this permission, less than full-time status may affect some types of financial aid.

**Satisfactory Academic Progress**

Satisfactory academic progress (SAP) refers to minimal standards for grades and cumulative credits required to receive financial aid. The SAP policy is described here http://www.jhu.edu/finaid/return.html#satisfactoryacademicprogresspolicy.

**External Credit Policies**

It is expected that the majority of credits applied towards degree requirements are earned by completion of courses taught at Johns Hopkins University by our faculty. We do recognize that some students may have other sources of college-level credit that could be applicable to some requirements. This section explains the conditions and restrictions regarding credits earned outside of JHU.

For full details about the application of external credits towards degree requirements, please see the Requirements for a Bachelor’s Degree (https://e-nextcatalog.jhu.edu/undergrad-students/academic-policies/requirements-for-a-bachelors-degree/#text) and the Residency Requirement (https://e-nextcatalog.jhu.edu/undergrad-students/academic-policies/requirements-for-a-bachelors-degree/#residencytext).

The information below describes the requirements for students entering JHU in Fall 2015. Students who entered JHU prior to Fall 2015 should view the appropriate archived catalog (http://web.jhu.edu/registrar/catalog).

**Advanced Placement Exams**

To receive credit, Advanced Placement examinations must be taken prior to admission to the university.

If a student enters the university with credit for an advanced placement course and then takes an equivalent course at the university for credit, the advanced placement credits (and lab class waiver, if applicable) will be disallowed. The credits and grade for the Hopkins course will appear on the academic record. The advanced placement exam title remains on
Undergraduate Students

the record as well, but the credit value is converted to zero. This policy also applies to IB credit, GCE credit, and other foreign exams.

* Macroeconomics: Students who score a 5 on the Macro AP exam are placed out of AS.180.101 Elements of Macroeconomics and receive University credit. However, it does not count as one of the ten courses required for the economics major.

** Microeconomics: Students who score a 5 on the Micro AP exam, AND who pass a diagnostic test administered by Professor Hamilton will place out of AS.180.102 Elements of Microeconomics and receive University credit for it. However, it does not count as one of the ten course required for the economics major. Interested students should make an appointment with Professor Hamilton.

*** Students who are awarded credit for AP Biology or AP Physics are exempt from taking the corresponding lab courses (for AS.171.101 General Physics:Physical Science Major I-AS.171.102 General Physics: Physical Science Majors II and for AS.020.153 General Biology Laboratory I-AS.020.154 General Biology Lab II). The lab courses are waived but no credit is awarded. Students who have credit for AP Biology but take General Biology Lab 1 and/or General Biology Lab 2 will lose all six credits of AP Biology credit.

**** Students who have credit for AP Chemistry but take either lab semester without the lecture course, will lose 4 of their AP credits. Students who take either lecture class without the lab will lose AP credit for the corresponding lab in addition to the lecture. Effective fall 2014, students with AP Chemistry credits for AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Lab I may not take AS.030.102 Introductory Chemistry II/AS.030.106 Introductory Chemistry Laboratory II without taking AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Lab I at JHU (forfeiting 4 AP credits).

***** Students may receive credit for Calculus I via only one test.

Foreign Certificate Exams

Credit is awarded for grades of A or B on the British and Singapore General Certificate of Education A-Level courses in many of the subject areas included on the Advanced Placement exams and International Baccalaureate courses listed above. A grade of A in Physics on the GCE is awarded 8 credits. A grade of B is awarded 4 credits. AS and O levels are not accepted. Foreign certificate programs like the French Baccalaureate and the German Abitur are considered on a case-by-case basis. No foreign language credit is available for these exams.

Exam Credits for Foreign Language

Effective Fall 2015, the German and Romance Languages Department will not award any credit for Spanish AP/IB exams. French, German, and Italian will grant six credits for AP scores of 4 or 5 (IB Exams for 6 or 7) only after a student successfully completes two courses in that same language sequence at the intermediate level or higher.
JHU Placement Exams

Some departments may offer placement exams or other evaluations that allow a student to bypass lower-level content in that department, most commonly mathematics and foreign language. No credit is awarded for these departmental exams or evaluations - they are for placement purposes only. In some cases, a waiver of the bypassed course(s) may be noted on the student's academic record. No academic credit is awarded when a course is waived.

Students who entered JHU prior to Fall 2015 should view the appropriate archived catalog (http://web.jhu.edu/registrar/catalog).

The following content is included on this page:

Transfer Credit Limits (p. )
Transfer Credit Rules (p. )
Registering for Courses at Other Colleges and Universities After Matriculation (p. )
Policies Unique to Students Admitted to JHU as Transfer Students (p. )
Description of Transferable Credit (p. )

Transfer Credit Limits

Students admitted directly from high school

Students who enter the university from high school may transfer up to 12 credits from approved courses taken at other institutions, whether taken before or after matriculation. The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.

Students admitted as transfer students

Students who enter the university as transfer students into the Krieger School of Arts and Sciences may bring in up to 60 transfer credits towards a degree requiring 120 credits. Students earning degrees requiring more than 120 credits in both KSAS and WSE may bring in more than 60 credits; however at least 60 of the total degree credits must be earned in residence as a full-time student at JHU. See here (p. 21) for additional residency requirements. All transfer students may transfer up to an additional 12 credits after matriculation. The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.

Transfer Credit Rules

The following rules apply to both online courses and courses taken in a traditional classroom setting.

To be eligible for transfer credit, an approved course must be taken for a grade at an approved college and completed with a grade of C or better. In the United States, an approved institution is a 2-year or 4-year college or university that is accredited by one of the following regional accrediting agencies:

- Middle States Commission on Higher Education
- New England Association of Schools and Colleges, Commission on Institution of Higher Education
- North Central Association of Colleges and Schools, The Higher Learning Commission
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools, Commission on Colleges
- Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges
- Western Association of Schools and Colleges, Accrediting Commission for Senior Colleges and Universities

Transfer credits from non-US academic institutions must be approved on a case-by-case basis by the academic advising offices in the respective schools. Non-US academic institutions must be degree-granting and recognized and authorized to issue academic records by the appropriate national (or regional) bodies in their home countries.

How the number of semester credits is determined

For courses offered in semester credits at the host institution, courses will be awarded the same number of semester credits at JHU. For example, if a Calculus I course is offered for 5 semester credits at another institution, it will be transferred to JHU as 5 credits, even though our parallel course is a 4-credit course. Credit for courses earned at a school using the quarter system will be converted to a comparable number of semester credits. One quarter credit is equivalent to 2/3 of a semester credit. Other unit systems will be converted to semester credits based on the transcript key provided by the host university. If a key is not available, credits are evaluated such that one year of full-time coursework at the other school is considered proportional to one year of full-time coursework at JHU.

How transfer credits are posted on a JHU transcript

The following information is included for each course transferred to JHU:

- name of college or university where course was taken
- course title
- JHU course equivalent (if any)
- credits awarded

The grades earned in these courses do not appear on the Hopkins record and therefore do not contribute to the grade point average.

Restriction on courses taken without a letter or numerical grade

Ungraded or pass/fail courses taken at another college or university prior to matriculation at JHU, if approved, may receive credit if the host school states in writing that the mark represents a grade of C or better.

Entering freshman with more than twelve transferable credits

Some students enter the university from high school with additional college course work beyond the 12 credits that may be transferred. If these additional courses are equivalent to subjects that the university accepts for credit by Advanced Placement exams, and if the courses are needed to complete requirements for a major or are prerequisites for higher level courses that the student will take at JHU, then students may request that the department waive the comparable courses at JHU. Waivers do not carry semester credits. Students must contact their
academic advising office for detailed information about how to obtain a waiver.

Credits earned at JHU prior to matriculation, including the JHU Pre-College Summer Program

A student who takes JHU courses prior to matriculation as a degree-seeking student (at JHU or elsewhere) may receive credit for those courses completed with grades of C or better, but the grades are not included in the undergraduate record. Because these courses were taken at JHU, they are not subject to the 12-credit transfer rule. Students must request that these courses be transferred to their undergraduate record by contacting their respective advising office. Credits earned through this program may be applied to the 100-credit JHU residency requirement (applicable to freshmen matriculating fall 2014 and later).

Deferred admission

Students who have been accepted to the university may defer admission for up to two years with approval from the director of undergraduate admissions. Freshmen who have deferred admission begin their studies in the fall semester. The purpose of a deferral is to allow students to take time off in order to travel, work, or experience another culture. Deferrals are not granted for the purpose of studying at another institution. Students who wish to pursue academic studies during the deferment period may do so; however, the credits earned during the deferment period will not be applied toward the university’s degree requirements.

Registering for Courses at Other Colleges and Universities After Matriculation

Students are required to seek pre-approval to transfer credits from courses completed at other institutions. A form for this purpose is available in the advising offices. Directions regarding appropriate signatures and required supplemental materials (typically a detailed course description and/or a course syllabus) are on the form. Courses must be taken for a letter grade and a grade of C or better is required.

In order to transfer credit for previously-approved summer work done elsewhere, students must arrange for an official transcript to be sent to the Office of the Registrar.

Courses at colleges and universities in the Baltimore Student Exchange Program

See Registering for Courses through BSEP (p. 14) in the Registration Policies section. BSEP does not operate during the summer session; courses taken at these institutions during the summer are considered transfer credit and are subject to the same rules and limits as courses from other colleges and universities.

Policies Unique to Students Admitted to JHU as Transfer Students

- Transfer students who completed Advanced Placement or other exams during high school are subject to the same policies as students admitted directly from high school as of the term they matriculate at JHU. We do not transfer exam credits directly from another college or university transcript.
- Students who transfer from the Peabody Conservatory will be granted full credit for performance courses in their major instrument. For performance courses in other instruments, only one credit per semester will be awarded.

Description of Transferable Credit

In order to be transferable, a course does not have to match a currently existing JHU course; however, courses should cover topics that are broadly defined as part of the curriculum at Johns Hopkins University. For example, we do not regularly teach a course about horror films. However, since this is a film studies course and we have a major in film and media studies, it’s likely that this course would be eligible for transfer. A course can be transferred as either (1) a direct equivalent to one of our courses or (2) a generic course affiliated with a field of study. A course with an identical name at another institution is not necessarily going to transfer as directly equivalent to the course with the same title at JHU.

A maximum of 6 credits may be granted for courses which are in curriculum areas not covered by the fields of study in the School of Arts and Sciences and the School of Engineering.

Additional Details About Course Eligibility for Transfer:

Section One: Common courses that will not be accepted for transfer credit:

- Physical Education or Personal Health and Wellness Courses are not accepted.
- College Orientation, Study Skills, or Career Development Courses are not accepted.
- Math Courses Below the Pre-Calculus Level are not accepted.
- Theology Courses are not accepted.
- Developmental English, English Grammar, or English as a Second Language Courses are not accepted.
- Independent Study, Research, or Internship Credits are not accepted.
- However, hybrid courses that include lectures and graded assignments along with practical experiences are reviewed individually.
Trade Skill Courses are not accepted.

- Trade skills courses are defined as being part of an educational program leading to a specific trade such as (but not limited to) automotive repair, culinary arts, day care provider, or airplane pilot.

Computer Software Courses are not accepted.

- However, courses that teach some use of software, Internet design and security, basic programming in html or Java, computer aided design or introduce field-specific software programs may be considered.

Section Two: Common courses with restrictions for transfer credit

Chemistry

General Chemistry courses intended to serve as a one year sequence for students in the sciences are transferrable. However, because of the variability of these courses, it is often not possible to transfer just one semester of two-semester sequences (or one or two quarters). Syllabi review is required to transfer these courses. Rudimentary introductory chemistry courses intended to prepare students for a year of general chemistry are not transferrable. One-semester chemistry courses intended for non-science majors designed to fulfill general education requirements for non-science student may transfer.

Organic Chemistry Lab

JHU offers a one-semester, three-credit course (AS.030.225 or AS.030.227) that is recognized by medical schools as being equivalent to other institutions’ typical year-long introductory organic lab courses that are frequently 1 credit each. To transfer these lab courses from other institutions, students must take both semesters at the other institution, as one semester alone is not transferable. If the course lecture and lab are taught as a single course unit at the other institution, students must take the full year-long sequence of the course lecture and lab in order to transfer the courses to JHU. Our course AS.030.228 is an intermediate level organic chemistry laboratory course intended for only chemistry majors and typically goes beyond other institutions’ expectations of students from introductory organic chemistry lab.

Physics

General physics courses, typically covering the topics of mechanics, heat, sound, electricity and magnetism, optics, and modern physics intended to serve as one year of physics study for students in the sciences, may be transferred if the course was taught using the principles of calculus. Those courses that do not require calculus knowledge will not transfer. Rudimentary introductory physics courses intended to prepare students for a year of general physics will not transfer. Introductory one-semester physics or astronomy courses intended for non-science majors, for example those offered to help students fulfill general education requirements, may be transferred.

Finance

We accept transfer credits for corporate finance courses that may include, but are not limited to, understanding the design and functioning of financial markets or modeling financial forecasting and decision making. We do not transfer credit for personal finance courses designed to teach the individual consumer about topics such as money management, budgeting, home mortgages, personal tax, individual insurance, or investing.

Graphic Design

In order to be considered for transfer, graphic design courses must be taught as part of the required curriculum for a major leading to a degree at the offering institution and the course content must include design theory and practices. These carry no area designation. Courses that focus solely on software usage will not transfer.

Website Design

In order to be considered for transfer, website design courses must be taught as part of the required curriculum for a major leading to a degree at the offering institution and the course content must include some programming components. Courses that solely focus on usage of productivity software such as word processing, spreadsheet, presentation, database, graphics editing, accounting, statistical processing, or webpage creation will not transfer.

Internet/Social Media

Marketing courses that discuss the effective use of social media concepts and tools, search engine optimization (SEO) or other analytical market analysis techniques, and content creation and management strategies for marketing campaigns will be considered. However, courses teaching effective use of the internet for personal research or educating the lay person about its structural design or usage of social media will not transfer.

Section Three: Non-domestic studies

For those attending programs leading to the medical profession

In several countries around the world, students enter higher education programs that lead to a medical degree without the completion of the United States equivalent to a bachelor’s degree. We do not transfer credits from these types of programs.

US citizens who studied abroad prior to acceptance as a transfer student to JHU

Like our international students who studied internationally before transferring to Johns Hopkins, courses taken abroad by US citizens either through study abroad programs or direct matriculation at international institutions will be processed as transfer credits, not as study abroad credits. A transcript from the originating institution will be required.

Composition courses not taught in English

Courses taught in a language other than English that mimic the typical “freshman composition” or “expository writing” courses found in the United States will transfer. These courses will be reviewed for transfer credit as potential courses in our English Department (home of our Expository Writing Program), not as foreign language courses. They may not be used to meet the JHU writing-intensive requirement.

Current JHU students studying internationally in their home country

Please see study abroad eligibility restrictions (p. 33) for limitations during the academic year.

During the summer, courses may be taken in a student’s home country or country of citizenship. Students follow the procedures for pre-
Courses unique to China

We do not transfer three commonly required courses: Introduction to Mao Zedong Thoughts, Ideological and Moral Cultivation and Fundamentals of Law, and Principles of Marxism.

Section Four: Details about transferring writing-intensive credit

Students who transfer to Johns Hopkins from another college or university, and Hopkins students who study abroad for a semester, may transfer up to 6 credits of writing-intensive credit for a course(s) under these conditions:

1. The course must meet University criteria for a writing intensive course.
2. Students must take the course during the regular academic year, in either fall or spring semester (there is no writing-intensive transfer credit for summer courses).
3. Students must have a grade of B or higher in the course.

Students who meet these criteria need to present an official transcript for the course to their respective advising office and present course materials to Patricia Kain, Director of the Expository Writing Program. To arrange a meeting, she may be emailed at kain@jhu.edu. Students should bring a syllabus, course description from the catalog or website, and the papers written for the course.

Study Abroad Policies

The Johns Hopkins University views international education as an integral component of its academic mission. Not only does the university actively encourage enrollment of a diverse international and multicultural student body, but it strives to provide students with educational opportunities throughout the world. More than 33% of Johns Hopkins undergraduates study abroad.

For undergraduates in the Krieger School of Arts and Sciences and the Whiting School of Engineering, Johns Hopkins offers a wide variety of international opportunities ranging from short-term, departmentally sponsored intersession and summer programs to semester and full-year programs at major universities in the United Kingdom, Australia, New Zealand, Europe, Africa, Latin America, Asia and the Middle East.

Johns Hopkins accepts credit for coursework taken abroad toward major and minor requirements as well as toward general graduation requirements. Most students who study abroad graduate on time. What is more, upon successful completion of a program abroad, students may choose to build upon their international experience in graduate or professional school. The advisors in Pre-Professional Advising and the Career Center work with Hopkins students to maximize the benefits of a program abroad.

Study Abroad Programs

Hopkins offers students three options for study abroad: departmental programs, direct enrollment programs and approved/vetted third-party provider programs. Programs managed by Hopkins or third-party providers offer the highest level of on-site support. Exchange programs and direct enrollment are well suited to more independent students who prefer greater autonomy while abroad. We encourage students to consider their personal background and comfort levels when choosing a study abroad option.

Johns Hopkins Departmental Programs

Many academic departments sponsor study abroad programs that directly support major and minor requirements. Whenever possible, qualified students in these majors are encouraged to participate in departmental programs. Credit is approved and may be applied toward major and minor requirements in the sponsoring departments. Hopkins departmental programs vary in terms of the level of support that students receive while abroad. In many cases grades (Homewood Abroad or HA courses) from these programs will post on students’ Hopkins transcript and be included in students’ Hopkins grade point average.

Johns Hopkins Departmental Programs include the following categories:

- Semester and year programs managed by Hopkins or external organizations
- Johns Hopkins exchange programs
- Johns Hopkins Summer Programs Abroad
- Johns Hopkins Intersession Programs Abroad

Direct Enrollment in a University Abroad

Students may enroll in colleges and universities abroad after consulting with a Study Abroad Advisor. Students apply as visiting, non-degree students and take regularly scheduled classes with national and international students.

Major/minor credits must be pre-approved by the Hopkins Director of Undergraduate Studies for students’ majors or minors prior to participation. In most cases grades (Transfer Courses or TR courses) from the program will not post on the Hopkins transcript or be included in the Hopkins grade point average. Transcripts with grades from a U.S.-accredited School of Record will generally be available through a sponsoring institution if the direct enrollment was facilitated by an approved third-party provider.

Approved/Vetted Third-Party Provider Programs

The Office of Study Abroad and the Faculty Advisory Committee have vetted specialized programs that offer courses in specific areas, disciplines, or locations where direct enrollment may not be feasible. Sponsored by third-party providers, these specialized programs provide study abroad opportunities for language acquisition, field experience, research opportunities, and disciplinary courses often in less common locations.

Major/minor credits must be pre-approved by the Hopkins Director of Undergraduate Studies for students’ majors or minors prior to participation. Third-party providers offer additional support services, including assistance with applications, housing, registration, visas and
ondsite support. In most cases grades (TR courses) from the program will not post on students’ Hopkins transcript or be included in Hopkins grade point averages. Transcripts with grades from a U.S.-accredited School of Record will generally be available through the third-party provider.

Non-Approved Programs
Johns Hopkins does not encourage students to participate in non-approved/vetted programs. Students with sound academic rationales for participation on a non-vetted program meet with the Director of Study Abroad to petition approval of an alternative program.

Students are required to meet with a study abroad advisor prior to applying to study abroad. All study abroad programs must be approved by the Office of Study Abroad prior to participation in order to transfer credit toward Hopkins degree requirements.

Eligibility for study abroad can vary by type of program. Students must meet the minimum eligibility requirements of both Johns Hopkins University and the program abroad.

Johns Hopkins Eligibility Requirements:
- Term GPA of 3.00 or higher the semester of application
- Students must complete at least 100 credits at the Homewood Campus
- Students must complete their last semester prior to graduation in residence at the Homewood Campus
- Students must be in good academic, disciplinary and financial standing
- Leave of Absence: Students may not apply for study abroad while on Leave of Absence. Students must be enrolled the semester of application to be eligible to study abroad.

Program Eligibility Requirements:
Many programs have additional eligibility requirements. In some cases those requirements will be more stringent than the Hopkins minimum eligibility.

The program specific eligibility requirements might include:
- Language proficiency requirements. Students must demonstrate language proficiency at the college level, either through courses taken at a U.S. college or university, AP credit or university administered placement tests.
- Cumulative GPA of 3.0 or higher (e.g. Oxford requires a GPA of 3.7 or higher)
- One year or more of college-level education
- Course prerequisites: Students must have course prerequisites as determined by the host institution in order to register for classes abroad.

Credit and Residency Requirements for Study Abroad
For the purposes of fulfilling university residency requirements, up to 30 credits from study abroad courses are considered “in-residence” and may be included in the 100-credit university residency requirement (Effective for freshmen beginning in Fall 2014.) Students may be awarded a full-year of credit from Homewood Abroad (HA) courses or up to 30 credits from study abroad courses taken through direct enrollment or vetted programs toward their undergraduate degrees.

Students on departmentally-sponsored programs with HA courses are held to the same credit limit guidelines and credit overload policies as if the student was on the Homewood campus. In addition, if these students exceed 30 credits from their abroad courses, they may apply excess study abroad credits to the general 12-credit transfer credit maximum. Total credits from study abroad courses and domestic transfer courses may not exceed 42 credits.

Students may enroll in study abroad in a combination of semester and/or summer/intersession abroad programs, but students may not enroll in three consecutive fall/spring semesters abroad.

Students may participate in summer and intersession programs abroad any term after matriculation.

Students must have completed at least three semesters of coursework on the Homewood campus prior to enrolling in a semester/academic year program abroad. This means students may study abroad for a semester or academic year beginning the second semester of their sophomore through the fall semester of their senior years. An exception to this policy is the Hopkins Oxford St. Anne’s College program which offers a full year abroad for sophomore students.

Study Abroad in Home Country/Country of Citizenship
International students are encouraged to take full advantage of study abroad opportunities by pursuing studies outside the United States and their home countries. Johns Hopkins will not approve study abroad at locations where students have completed secondary education or where they have lived and/or worked within eight years of matriculation at Johns Hopkins. Students who wish to take courses at universities in their home countries will be asked to petition the Faculty Advisory Committee for Study Abroad. Students must present a strong academic rationale for the program.

Matriculation Status
All students on study abroad programs who have completed the mandatory procedures established by Johns Hopkins prior to departure remain enrolled as full-time, matriculated students. This official status is recorded as off-campus matriculated.

Credits Required for a Semester/Academic Year Abroad
Students are required to enroll in the equivalent of 15 credits per semester while abroad. Students who wish to take fewer than 15 or more than 18 credits a semester must obtain written permission from the Director of the Office of Study Abroad.

Credit for Courses Taken Abroad
Students may earn up to 30 credits for study abroad from any combination of academic terms – semester, academic year, summer and intersession.

As part of the Hopkins application process, students are required to have pre-approval for transfer of credit for all overseas course work prior to studying abroad. Pre-approval of transfer of credits toward major and/or minor requirements is granted by the Director of Undergraduate Studies in students’ academic departments. Pre-approval of transfer of credit toward distribution requirements is granted by the Director of Study Abroad. Final approval of credit and transfer of courses occurs after students have returned to Hopkins.
Courses must be completed with a grade equivalent of C or better to be eligible for transfer of credit toward a Hopkins degree. Transcripts from the program abroad should be sent to the Director of the Office of Study Abroad for credit evaluation and transfer of credit. The Director will contact students when the official program transcript has been received.

Students should remember to save electronic copies of syllabi, course descriptions, reading lists, assignments, papers, and examinations. Students will need to submit these to the Director of Study Abroad and/or the Director of Undergraduate Studies for their major and minor in order to complete the credit evaluation and transfer of credit.

**Grades and Transcripts**

Courses taken at overseas programs are entered onto the official Hopkins transcript along with the name of the host school and location of the study abroad program.

**Grades and Transcripts: Hopkins Departmental Programs**

Grades from most Hopkins Departmental Programs (Hopkins Departmentally Sponsored Semester and Year Programs, Hopkins Summer Abroad and Hopkins Intersession Abroad) are posted on transcripts and are calculated into students’ term and cumulative GPA. These courses will appear on the Hopkins transcript as AS/EN/HA courses with Hopkins course numbers (e.g. HA.100.320 – History of China).

**Grades and Transcripts: Hopkins Approved Programs**

All students on Hopkins Approved Programs (Vetted Programs and Direct Enrollment) must take courses abroad for a grade. Students will not receive credit for pass/fail courses taken abroad. Students must receive the equivalent of a C or higher in order to receive Hopkins credit. Grades from Hopkins Approved Programs do not appear on the Hopkins transcript and will not be calculated into the GPA. These courses will appear on students’ transcripts as TR courses (e.g. TR.100.300 – History of China). Students’ transcripts reflect how credits earned abroad have been awarded toward their Hopkins degree.

**Housing Policy**

Johns Hopkins University vets and approves study abroad programs based on academic quality, cultural immersion, and health/safety practices. Housing is an integral aspect of the abroad experience in that it promotes language and communication skills and provides opportunities for personal growth. In addition, housing organized by program sponsors provides an additional layer of safety and security.

For these reasons, Johns Hopkins University requires the use of program-established housing in home stays, residences, dormitories, or program-provided apartments by all Hopkins students on approved study abroad programs. Furthermore, Johns Hopkins University strongly encourages students to participate in a home stay experience if that option is available. Students who want to make independent housing arrangements should set up an appointment to meet with the Director of Study Abroad to discuss options and petition for approval.

**Study Abroad at Locations Under Department of State/WHO/CDC Travel Warning**

Travel Warnings are issued by the United States Department of State to describe long-term, protracted conditions that make a country dangerous or unstable. A Travel Warning is also issued when the U.S. Government’s ability to assist American citizens is constrained due to the closure of an embassy or consulate or because of a drawdown of its staff. The WHO and CDC post travel warning and alerts in the event of public health crises.

The Johns Hopkins University does not permit undergraduates to study abroad in locations with travel warnings. Despite this warning, if a student believes he or she has a sound academic reason to study at a chosen site, the student may file a petition for individual exemption in order to have their course work recognized for academic credit at Johns Hopkins.

**Financial Structure of Study Abroad**

**Departmental Programs (semester/academic year)**

Students studying abroad on semester and year Johns Hopkins departmental or exchange programs are charged Hopkins tuition. In most cases, an additional fee is assessed to cover services that might include housing, international health insurance, emergency services, and logistical and academic support. Students are billed through the Hopkins Student Accounts Office.

**Departmental Programs (intersession/summer)**

Students studying abroad on a Hopkins departmental summer or intersession program are charged the program fee and billed through Hopkins. Fees vary by program with some including charges for services such as airfare and meals.

**Direct Matriculation and Vetted Programs (semester/intersession/summer)**

Students who study abroad through an external program (direct enrollment at a university abroad or approved provider) are charged the cost of their program as established by the host university or provider and a study abroad and application fee equivalent to 12% of Johns Hopkins tuition. Johns Hopkins is responsible for making direct payments to host universities and providers on behalf of students. Fees will be posted to students’ Hopkins ISIS accounts by the Student Accounts Office.

**Additional Costs Associated with Any Program Type**

Students are responsible for all additional costs that are not included in mandatory fees. Additional costs may include: housing, airfare, personal expenses, meals, visas, and other incidental expenses. Some programs may include costs for many of these services as part of their mandatory fees. In those cases Hopkins will include those fees when making direct payment to the provider on behalf of students.

**Billing**

Study Abroad fees will be billed to students ISIS accounts by the Student Accounts Office.

The Hopkins Student Accounts Office posts charges in ISIS on approximately July 1 for the fall semester, December 1 for intersession, December 1 for the spring semester, and May 1 for summer. Payment arrangements may be made through the Hopkins Student Accounts Office.

The Office of Study Abroad creates a program financial budget worksheet for each student that reflects the estimated cost of attendance for his or her program and details which fees will be posted.
on students' JHU account. The financial budget worksheet should be used to assist students and their parents in calculating expenses (the cost of attendance) associated with an academic program abroad. In addition, the Office of Study Abroad provides sample financial worksheets for programs commonly attended by Johns Hopkins students.

Financial Aid
Johns Hopkins extends portability of federal, state and institutional financial aid to Johns Hopkins Departmental Study Abroad Programs, Approved Study Abroad Provider Programs and to Direct Enrollment in a University Abroad for the fall semester, spring semester or academic year. Financial aid, including institutional aid may be applied toward the cost of these programs.

For the semester study abroad, the JHU Grant will not increase, even if the study abroad cost is greater than the cost to attend Hopkins. However, the JHU Grant for the semester study abroad may decrease if the study abroad cost is less than the cost of attendance at Hopkins. Students’ financial aid will be credited to their student accounts.

Only loan assistance can cover additional expenses. In most cases, financial aid does not apply to summer and intercession programs. Students may be eligible for external study abroad scholarships.

Refund Policy
Students with credit balances may request a refund online at http://www.jhu.edu/~studacct. Refund requests cannot be processed any earlier than 10 days prior to the JHU's first day of classes.

Students should consider study abroad options carefully prior to making a commitment. Should students withdraw from a study abroad program after having submitted their program acceptance forms or Hopkins acceptance forms, they are responsible for all non-recoverable costs associated with their program. Hopkins will refund recoverable expenses, excluding non-refundable deposits, once we receive a final billing statement from students’ programs. Recoverable expenses are determined by the program provider in consultation with Johns Hopkins. If for any reason study abroad plans change, the Office of Study Abroad should be contacted immediately so we can work out the financial impact of the voluntary withdrawal.

Students involuntarily withdrawn or dismissed from a program for cause will receive no refund, may not be eligible for credit for coursework completed on the program abroad and are responsible for any costs incurred by early dismissal.

Should Hopkins cancel or suspend a study abroad program, we will work with students to either refund recoverable costs or apply fees toward alternate academic programs.

Conduct
Students are responsible for their own actions, activities and behavior while participating on a program abroad. Serious consideration of health and personal circumstances should be taken in to account by students when applying for or accepting a place on a program abroad.

Students are obligated to be aware of and comply with local laws and customs while abroad. Respect of local customs includes the conscious awareness of cultural attitudes toward alcohol use and sexual behavior. As representatives of Johns Hopkins in other countries, we ask that students behave in a manner that is respectful of the rights and well-being of others.

Conduct considered unacceptable to Johns Hopkins University includes, but is not limited to, excessive consumption of alcohol; loud and/or abusive behavior; sexual harassment; criminal conduct of any kind, including the purchase, sale, possession or use of drugs other than prescribed medication for legal medicinal purposes. Students’ must notify Johns Hopkins University Office of Study Abroad of any disciplinary or legal issues while abroad.

Students participating in programs abroad are expected to adhere to the Johns Hopkins University Undergraduate Student Code of Conduct (p. 35), the policies of the program abroad and the terms set forth in the Study Abroad Conditions of Participation agreement.

Violations of the Code of Conduct, Conditions of Participation and Program Policies
Students who are alleged to have violated the Hopkins Undergraduate Student Conduct Code, the policies of the program, and/or standards of academic integrity while abroad will be reported to the program director and the JHU Director for Study Abroad. If a violation is determined to have occurred, the program director in collaboration with the JHU Director for Study Abroad will take appropriate disciplinary action, which may include immediate dismissal from the program.

A student dismissed from a program for cause will receive no refund, may not be eligible for credit for coursework completed on the program abroad and is responsible for any costs incurred by early dismissal.

Students must maintain both academic and disciplinary eligibility through through the designated start of their study abroad program. Students’ academic and disciplinary records may be reviewed prior to departure. If records indicate a significant decline in GPA, if a cumulative or term GPA falls below JHU or program requirements, or if academic and/or disciplinary sanctions are imposed prior to departure, a student may be involuntarily withdrawn from an approved study abroad program.

Academic Ethics
All study abroad students are bound by the Johns Hopkins University Code of Academic ethics both during the application process and while abroad. Students are obliged to refrain from acts which they know, or under circumstances have reason to know, violate the academic integrity of the University. Violations of academic ethics include, but are not limited to: cheating; plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one’s own the same or substantially similar work of another; knowingly furnishing false information to any agent of the University for inclusion in academic records; falsification, forgery, alteration, destruction or misuse of official University documents or seal. All students must sign a Conditions of Participation agreement to adhere to this policy as part of the application process.

Institutional Research Board
Students participating in or conducting research abroad must complete the Hopkins IRB process in addition to any institutional review that may be required by the host institution. Failure to comply is a serious breach of research ethics. Students who fail to receive appropriate HIRB review
of their research will not be able to use the research or data for projects, theses, courses or requirements at Johns Hopkins.

**Student Affairs Resources**

A successful college career is about making sure that what you do to get a degree is enhanced by pursuing interests that complement your studies. Student affairs is dedicated to helping you make your Hopkins experience as life-changing as it is mind-expanding. While our programs start by building community in the place where you live, the residence halls and the surrounding neighborhoods, that work goes a lot further. Whether it is helping you build career skills, work on strategies to succeed in class, embrace a physically and mentally healthy lifestyle, or connect with peers, student affairs has resources available to support you as you explore the many opportunities at JHU. Our dedicated staff members are here to answer your questions and support your journey.

To find out more about the resources available to students visit: http://studentaffairs.jhu.edu/resources/

**Undergraduate Student Life Policies**

This section contains many of the relevant rules and regulations governing undergraduate student nonacademic life on the Homewood Campus. Students are responsible for complying with these policies.

**Student Responsibility**

It is the students' responsibility to familiarize themselves with the policies of the University and those contained within these policies and procedures. Failure to become acquainted with this information will not excuse any student from responsibility for abiding by the rules and procedures described herein. Personal difficulties, illnesses, or advice contradicting the rules and procedures described herein contained do not constitute automatic grounds for exemption from these policies.

Any waivers to the policies and procedures must be reviewed and approved in advance and are effective only when accepted by the Office of the Dean of Student Life.

The University reserves the right to make changes to these policies and procedures, and other information contained herein as it deems appropriate. Students are urged to consult the Office of the Dean of Student Life and Homewood Student Affairs about any questions that they may have concerning student activities, student life, and student affairs. These standards and procedures are not to be regarded as a contract.

**Introduction to the Undergraduate Student Conduct Code**

The fundamental purpose of the University's regulation of student conduct is to promote and to protect the health, safety, welfare, property, and rights of all members of the University community as well as to promote the orderly operation of the University and to safeguard its property and facilities.

Acceptance of membership in the University community carries with it an obligation on the part of each individual to respect the rights of others, to protect the University as a forum for the free expression of ideas, and to obey the law. This Undergraduate Student Conduct Code pertains to misconduct arising from offenses against persons and/or property committed on University property; to misconduct committed off University property against members of the University community; and to misconduct occurring off campus that causes significant harm to others. Students who violate local, state, or federal laws will also be subject to discipline from the University. The University's
For example, students are expected to refrain from:

- Conduct that disrupts or interferes with the orderly operation of teaching and research, or with other lawful or authorized activities.
- Conduct that causes, or can be reasonably expected to cause, or threatens physical harm to a person.
- Physical or verbal threats against or intimidation of any person which results in limiting her/his full access to all aspects of life at the University.
- Conduct or a pattern of conduct in which a person approaches or pursues another person with intent to place the person in fear of physical harm or with intent to harass or to intimidate the person.
- Conduct that violates the University’s hazing policy, or other conduct or a pattern of conduct that harasses a person or group.
- Conduct that constitutes sexual abuse, assault, or rape of another person.
- Conduct that constitutes sexual harassment of another person.
- Theft or vandalism of University property, property of others, or knowingly possessing stolen property.
- The unauthorized use, possession, or storage of any weapons, chemicals, or explosives, including fireworks, on University property.
- The unauthorized distribution, possession, or use of any controlled substance (such as, but not limited to, illegal drugs).
- The possession or consumption of alcohol by individuals under the legal drinking age in Maryland (21 years of age), or the provision of alcohol to minors.
- The distribution or sale of alcohol to individuals under the legal drinking age.

Undergraduate Student Conduct Code

In addition to maintaining good academic standing, students are expected to refrain from conduct that injures persons or property. The University expects all students, including those living on or off campus, students studying abroad or at any off-campus university facility, or on break to be law-abiding citizens, to respect the rights of others, and to refrain from behavior that impairs the University’s purpose or its reputation in the community. Students who have committed acts which are a danger to their own personal safety or which harm or have the potential of harming others, or who destroy, damage, or wrongfully appropriate property, will be disciplined and may forfeit their right to be members of the University community.

For example, students are expected to refrain from:

1. Conduct that disrupts or interferes with the orderly operation of teaching and research, or with other lawful or authorized activities.
2. Conduct that causes, or can be reasonably expected to cause, or threatens physical harm to a person.
3. Physical or verbal threats against or intimidation of any person which results in limiting her/his full access to all aspects of life at the University.
4. Conduct or a pattern of conduct in which a person approaches or pursues another person with intent to place the person in fear of physical harm or with intent to harass or to intimidate the person.
5. Conduct that violates the University's hazing policy, or other conduct or a pattern of conduct that harasses a person or group.
6. Conduct that constitutes sexual abuse, assault, or rape of another person.
7. Conduct that constitutes sexual harassment of another person.
8. Theft or vandalism of University property, property of others, or knowingly possessing stolen property.
9. The unauthorized use, possession, or storage of any weapons, chemicals, or explosives, including fireworks, on University property.
10. The unauthorized distribution, possession, or use of any controlled substance (such as, but not limited to, illegal drugs).
11. The possession or consumption of alcohol by individuals under the legal drinking age in Maryland (21 years of age), or the provision of alcohol to minors.
12. The distribution or sale of alcohol to individuals under the legal drinking age.
13. Failure to comply with the directions of University officials, instructors, administrators, staff, or the Baltimore City Police acting in performance of their duties.
14. The unauthorized or improper use of University property, facilities, resources, or the University name or seal.
15. Failure to observe University policies, procedures, rules, or regulations.
16. Misuse or abuse of any University computer, computer system, computer or communications service, program, data, network, or resource.
17. Violation of any law of the United States, law of the State of Maryland, or municipal ordinance which occurs on or off campus which impinges on the rights of others or which impairs the University’s reputation.
18. Conduct that disturbs the peace or impinges on the rights of residents of neighborhoods where students reside, including, but not limited to: loud parties or excessive noise, shouting or talking that unreasonably disturbs other students or community members; public urination; drinking in public; littering or not disposing of trash appropriately; failure to reasonably maintain yard or premises.
19. Hosting or conducting an event in violation of university policies.
20. Conduct that hinders, obstructs, or interferes with investigations, hearings, sanctions, and other implementation processes of the Student Conduct Code.
21. Failure to appear for a University disciplinary hearing to respond to a charge or to testify as a witness when reasonably notified to do so.
22. Failure to comply with the terms of a judicial sanction. Other behavior may be equally inconsistent with the standard of conduct expected of a University student and the University's commitment to providing an environment conducive to learning and research.

Student Conduct System

Overview

The Office of the Dean of Student Life has responsibility for disciplinary matters relating to the non-academic life of undergraduates in the Homewood Schools of Arts and Sciences and Engineering. Included in this are:

- formulating and refining a student conduct code;
- formulating and refining a system for addressing and adjudicating complaints of misconduct;
- educating the undergraduate community about conduct standards and resolution mechanisms; and
- upholding the conduct code and related policies governing undergraduate life, including residential living.

When a complaint is made alleging violation of the conduct code, the matter may be resolved by:

- the Student Conduct Board,
- the Associate Dean for Student Conduct,
- a designee of the Dean of Student Life, or the administrative staff in the Office of Residential Life.

Mechanisms used to resolve incidents or misconduct include:
• administrative resolution of minor, non-disputed conduct violations,
• Student Conduct Board hearings,
• administrative hearings with the Associate Dean for Student Conduct or a designee, or
• a mediation process, with an administrative mediator, when mediation is an appropriate alternative to a disciplinary hearing process.

Authority of the Student Conduct System

Members of the University community have the responsibility to conduct themselves in a manner that upholds the law and respects the rights of others. The Student Conduct Code outlines the standards of behavior established by the University for undergraduates.

The Student Conduct Code is enforceable until the undergraduate degree is conferred on commencement day. The code governs behavior which occurs on or off University property. It is enforceable throughout the entire matriculation period, regardless of whether classes are in session or the student is enrolled in classes.

The University may institute action on a disciplinary matter when the interests of the University community are at stake. The conduct system is not intended to replace public law enforcement nor to provide non-Hopkins community members with a personal redress mechanism.

Some acts of misconduct also may constitute violations of criminal law. The University’s policy is to cooperate fully with law enforcement authorities. The University’s disciplinary proceedings are independent of any criminal proceedings arising out of the same incident.

The conduct system coordinated by the Office of the Dean of Student Life addresses alleged violations of the Student Conduct Code by individual undergraduate students. The disciplinary structures and processes of the Interfraternity Council and the Student Activities Commission address alleged violations by fraternity and student organizations of the policies of those groups. A student who commits misconduct that violates both the conduct code and student organization policies may be held accountable through both the conduct system and the disciplinary structure of their organization. Academic misconduct is addressed by the Undergraduate Academic Ethics Board.

Complaint Process

Conduct system complaints may be generated by:

• undergraduate and graduate students
• staff and faculty
• neighbors, landlords, and community groups
• law enforcement reports
• campus security reports
• individuals and entities not affiliated with the university community.

An individual who wishes to make a complaint may contact the Associate Dean for Student Conduct in the Office of the Dean of Student Life, the administrative staff of the Office of Residential Life, or the Office of Campus Safety and Security.

The Associate Dean for Student Conduct manages complaints of severe conduct code violations (e.g., physical and/or sexual assault, major destruction of property, hazing, selling or distribution of illegal substances, stalking, harassment, etc.) regardless of where they occur and of any violation that does not occur in University housing. The Director of Residential Life, or a designee, manages complaints of violations that occur in University housing (e.g., noise violations, roommate concerns, first and second violations involving alcohol and/or illegal drugs).

As a preliminary step, the conduct process is explained to the complainant, options are discussed, and the complainant decides whether to pursue the complaint. If the complainant decides to do so, and in instances in which the University is the complainant, the process continues through the following steps:

• The investigating administrator meets with the accused student and other individuals involved in the case as warranted.
• The investigating administrator determines whether there is sufficient cause for charges to be initiated against the accused student.
• If the accused student is charged, the investigating officer evaluates whether the case should be handled administratively, referred to the Student Conduct Board, or referred for mediation.
• When warranted, the investigating officer works with the complainant and respondent to identify witnesses and to assemble information relevant to the case. The complainant and the respondent are given opportunity to review this information in preparation for the hearing.

The complainant and respondent are responsible for notifying their witnesses of the hearing date and time and for bringing all relevant evidence to the hearing. Minor disciplinary cases that occur in University housing in which the accused student admits to the misconduct are likely handled administratively by Office of Residential Life staff. In most other instances, cases are referred to the Student Conduct Board. Cases of high sensitivity and complexity may be referred to an administrative hearing with the Associate Dean for Student Conduct or a designee (in coordination with the Office of Institutional Equity), including cases alleging sexual assault or sexual harassment.

The Student Conduct Board

The Student Conduct Board is part of an undergraduate student conduct process created by the Dean of Student Life to assist in resolving cases of non-academic misconduct. It is designed to give students a formal role in upholding the standards of community life at the University and to give students who are victimized by or accused of violations of these standards the opportunity to have their cases heard by their peers. The Board reports to the Associate Dean for Student Conduct. The Board is comprised of up to 20 students and 4 to 10 staff/faculty members who hear cases on a rotating basis in groups of five. These five-person hearing panels are composed of three student members and two staff/faculty members. A student member of each panel serves as the presiding official for that hearing. Membership on the Board is open to all full-time undergraduates through a selection process coordinated by the Associate Dean for Student Conduct.

Student Conduct Board Hearing Process

In hearings conducted by the Student Conduct Board and by administrative hearing officers, the panel or hearing officer:

• Reads the charge(s) to the respondent and asks the respondent to indicate whether s/he is responsible or not responsible for the misconduct in question
• Asks for a full statement from both the complainant and respondent describing the incident and providing relevant background
• Hears statements from witnesses
• Questions the complainant, respondent, and witnesses

The complainant and respondent have the opportunity to respond to all statements and information presented to the panel or hearing officer. In most cases, the respondent will be present when the complainant presents his/ her statement and is questioned by members of the panel or the hearing officer. However, the Associate Dean for Student Conduct may direct that the complainant appear outside the presence of the respondent for good cause.

The complainant and respondent are entitled to the same opportunities to bring their parents or another individual to provide personal support to a hearing. Those providing personal support do not have a speaking role in the hearing. Legal counsel representing any participant is not permitted in the hearing.

Once the hearing concludes, in private session, the hearing panel or administrative hearing officer:

• Makes a determination of the responsibility or non-responsibility of the respondent for the misconduct charged. The hearing panel members or administrative hearing officer makes their determination of responsible or not responsible based on a preponderance of evidence;
• Determines a sanction, when there has been a finding of responsibility

Students are given 5 days notice of the hearing except in the case of a graduating senior. In order to participate in graduation, a student hearing, Administrative or Conduct Board must take place before graduation.

Sanctions

The following sanctions may be imposed singly or in combination by a hearing panel or administrative hearing officer. The University, in its sole discretion, may impose any sanction or combination of sanctions, up to and including expulsion, for any violation of University policy or the Student Conduct Code. In imposing sanctions, the nature and circumstances of the offense, the student’s prior record, and other factors deemed pertinent may be considered.

1. Disciplinary Warning:
   The student receives written notice that continuation or repetition of conduct that has been judged wrongful or inappropriate, within a period of time stated in the warning, will be cause for more serious disciplinary action. A letter of warning creates a disciplinary file in the Office of the Dean of Student Life that exists until the student leaves the University by graduation or transfer.

2. Disciplinary Probation:
   The student is notified that s/he is no longer in good conduct standing with the University and that further violation of University regulations during the probation will likely result in disciplinary separation. A file is maintained in the Office of the Dean of Student Life. Students on disciplinary probation are generally ineligible to represent the University in intercollegiate activities, hold elected or appointed office or campus committee chairpersonship, or pledge a fraternity or sorority for a set period of time as set forth in the notice of the probation.

3. Disciplinary Suspension:
   A student must withdraw from the University for a specified length of time. Suspension from academic coursework includes exclusion from all academic privileges and co-curricular activities. A file is maintained in the Office of the Dean of Student Life and a copy of the notification letter is filed in the student’s academic records. A notation on the student’s permanent record may also be ordered. Parents will be notified of suspension. While serving a disciplinary suspension, academic work completed at another institution will not be recognized for credit transfer.

4. Additional Sanctions in Cases of Warning, Probation, or Suspension:
   As part of either disciplinary warning or disciplinary probation, the following conditions may be applied:
   • Restitution
   • Fines
   • Compensatory services
   • Restitution services
   • Rehabilitative and/or educational activities, such as counseling
   • Exclusion from specific aspects of community life such as participation in commencement exercises or entry into residence halls.

5. Expulsion:
   An individual’s status as a student of the university is terminated.

6. Separation from the Residence Halls:
   Students residing in University housing face an additional potential sanction of expulsion from housing. If they are found to have committed any of the following acts of misconduct:
   • Knowingly or recklessly endangering the health or safety of other residents of University housing.
   • Any activity involving firecrackers, explosives, or firearms; any act of arson within University housing.
   • Throwing or dropping items from the buildings.
   • Threatening, harassing, or abusing any member of the residential community.
   • Distribution, possession, or use of illegal drugs
   • Serious violations of the University’s alcohol policy
   • Intentionally or recklessly destroying, damaging, disabling, or stealing University property
   • Repeated violations of housing regulations

If a student is removed from housing, they will not receive a refund.

7. Off-campus and Community Violations and Sanctions:
   As set forth in the student conduct code, students residing in housing off-campus may be sanctioned for engaging in conduct that impinges on the rights of other students, neighbors, and community members. Violations of restrictions on noise, the hosting of events, trash disposal, maintaining yard and premises, underage drinking, distribution/ sale of alcohol and other offenses that impact or may impact negatively on the community will result in sanctions as follows:
   1. for a first offense, at a minimum, a written warning;
   2. for a second offense, at a minimum, university probation, a fine and parental notification;
   3. for a third offense, suspension and possible expulsion.

As is the case with any violation of the student conduct code, any violation, even a first offense, can be punished with sanctions up to and including expulsion, depending on the nature and circumstances of
the violation, the prior record of the student, and other factors deemed pertinent.

**Transcript Notations**

Hearing panels and officers may order the entry of a notation explaining disciplinary action on the transcript of a student found responsible for misconduct.

**Post-Hearing Process**

Both the complainant and respondent are informed of the outcome of the hearing. The respondent is given written notification of the decision. The requirements of confidentiality of student records are observed.

**Appeals**

An appeal process is available for findings and/or sanctions, on limited grounds, to the complainant and the respondent. Appeals may be made on the grounds of procedural error or the severity of the sanction(s). All appeals involving the Student Conduct Code should be made in writing to the Dean of Student Life no later than 10 business days after receiving the decision. The dean will review any documentation related to the case, obtain an audio copy of the hearing, and may interview panel members or administrative officers in determining the outcome of the appeal. The Dean of Student Life may uphold, overturn, or amend.

**Interim Suspension**

The Dean of Student Life or Associate Dean for Student Conduct reserves the right to suspend a student when his or her behavior indicates that his/her continued presence on campus constitutes a danger to the normal operation of the institution, or to the safety of self or others, or to the property of the University or of others. The suspension shall continue until the completion of disciplinary proceedings or until the behavior giving rise to the suspension is resolved.

**For More Information**

The Associate Dean for Student Conduct is available to provide students with more information about any aspect of the Student Conduct System.

### The Undergraduate Academic Ethics Board

**Constitution of the Krieger School of Arts and Sciences and the Whiting School of Engineering**

**Preamble**

Throughout its history, The Johns Hopkins University has enjoyed a distinguished reputation for academic excellence and integrity. Each member of the University bears a personal responsibility to uphold the ethical standards of the Institution. The Undergraduate Academic Ethics Board has adopted the following procedures for responding in a timely and impartial manner to infractions of the high ethical standards of the academic community. Faculty and undergraduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering are expected to understand their responsibilities as members of the Johns Hopkins University academic community and are bound by these procedures.

**Section A**

The Undergraduate Academic Ethics Board (hereinafter “The Ethics Board”) is a subcommittee of the Academic Council and an independent committee of the Student Council. The Ethics Board is comprised of eight full-time faculty members (four from each school) and a minimum of twelve undergraduate students, as well as a Presiding Official (up to three presiding officials may be trained to fill the role), who is an undergraduate student. The faculty members are selected by the Vice Deans of Education for KSAS and WSE, respectively, and the undergraduate members are selected by the Student Council’s Committee on Leadership Appointments. Undergraduate members shall serve terms of one academic year or more, beginning on September 1st. A board member may be removed from the Ethics Board if he or she has not met the expectation of the board.

**Section B**

The Ethics Board is responsible for the maintenance of the academic integrity of the undergraduate programs in the Krieger School of Arts and Sciences and the Whiting School of Engineering and for all matters concerning adherence to this Constitution, including but not limited to: receiving reports of suspected violations, consulting with members of the University community on ways to reduce possible violations, appointing hearing panels, maintaining confidential records, orienting new students to the ethic standards of the community.

**Section C**

The duties of the Presiding Official are:

1. to plan and oversee all general meetings of the Board
2. to assist in training of the board members selected for the subsequent year
3. to assist in the selection of new board members when requested
4. to provide assistance to the Associate Dean for Student Conduct in his or her duties when requested
5. to oversee all hearings of the Undergraduate Academic Ethics Board and to make procedural decisions

**Jurisdiction**

The Ethics Board shall have jurisdiction over all undergraduates in the Krieger School of Arts & Sciences and the Whiting School of Engineering. The Ethics Board may assume jurisdiction over a case involving a full-time undergraduate in a class in the School of Education and the Carey School of Business.

**Violations of Academic Integrity**

Undergraduate students enrolled in the Krieger School of Arts and Sciences or the Whiting School of Engineering at the Johns Hopkins University assume a duty to conduct themselves in a manner appropriate to the University’s mission as an institution of higher learning. Students are obliged to refrain from acts which they know, or under circumstances have reason to know, violate the academic integrity of the University. Violations of academic ethics include, but are not limited to:

- cheating;
- plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission;
submitting as one's own the same or substantially similar work of another;
• knowingly furnishing false information to any agent of the University for inclusion in academic records;
• falsification, forgery, alteration, destruction or misuse of official University documents or seal.

Responsibilities of Students and Faculty
Section A
Faculty members are responsible for specifying at the beginning of each semester the basic rules and procedures for any and all coursework, examinations, and other academic exercises. They are also responsible for exercising a reasonable degree of caution while writing, transporting and administering examinations and other graded work. All faculty members and teaching assistants are responsible for taking appropriate actions in accordance with the Constitution in all cases of suspected violations of academic ethics.

Section B
It is the responsibility of each student to report to the professor in charge of the course or to the Ethics Board any suspected violations of academic ethics.

Procedures for Handling Suspected Violations of Academic Integrity
Section A
If a student is suspected of a possible violation of academic ethics, the professor in charge of the course will review the evidence and the facts of the case promptly with the student. If, after speaking with the student(s), the professor believes that a violation of academic ethics has occurred, the professor may (a) settle the case directly with the student with appropriate notification to the Office of the Dean of Student Life (the Professor may also ask the Associate Dean for Student Conduct to serve as a mediator in such instances) or (b) promptly notify the Ethics Board in writing, through the Office of the Dean of Student Life, setting forth the details of the case.

Section B
1. A professor has the authority to settle a case with a student if (a) the current offense does not constitute a second or subsequent offense, and (b) the settlement does not call for a notation on the student’s transcript. It is the responsibility of the professor to check with the Office of the Dean of Student Life to determine whether the student has any prior record of misconduct. If the circumstances surrounding the case do not satisfy the above criteria, then the professor must send the case to the Ethics Board for resolution.

2. If the professor settles a case with the student(s), the penalty or penalties imposed may only be selected from items (b) through (e) listed under the Penalties (p. ) section. If the professor feels that none of these penalties is appropriate, he/ she must submit the matter to the Ethics Board for resolution.

3. If a case is settled directly between the student and the professor, then the professor must submit the name of the student and the settlement agreed upon to the Office of the Dean of Student Life.

Section C
1. If the student(s) and professor are unable to reach a settlement, then the professor must file a written charge of a violation of academic ethics to the Office of the Dean of Student Life for resolution. Professors should make every effort to take such action within one week of the alleged occurrence of academic misconduct.

2. In the event that a case arises near the end of a semester, the professor must submit a charge (as outlined above) at least one week before the official last day of classes. Any charge received after this date may be held over until the following semester. When possible, hearings could be held during Intersession and summer. For summer hearings, officers and board members may be drawn from the Board for the subsequent academic year at the discretion of the Associate Dean for Student Conduct.

Section D
Upon receipt of a charge of a violation of academic ethics (that constitutes a student’s second violation) from a professor or an egregious charge that if found responsible would require the student’s removal from the University, the Associate Dean for Student Conduct shall appoint a hearing panel to consider the charge(s). The panel shall decide the issue of responsibility and, if the student is found responsible, shall impose an appropriate penalty, as specified in the Penalties section.

Section E
When the Associate Dean for Student Conduct receives a charge of a violation of academic ethics from a professor, he/she shall:

1. file the professor’s written charge in the Ethics Board’s file in the Office of the Dean of Student Life.
2. collect all pertinent evidence.
3. set a hearing date, time, and location.
4. notify the accused student(s) of the charge and hearing date, time, and location.
5. select members of the Ethics Board to serve on the hearing panel

Hearing Panels
Section A
When the conditions warrant a hearing, the Associate Dean for Student Conduct shall appoint a hearing panel of unbiased persons to consider the case.

Section B
A hearing panel shall consist of two faculty members and three students and shall ordinarily be selected from the members of the Ethics Board. A Presiding Official shall conduct the proceedings of the hearing panel. He or she is responsible for maintaining records of all procedural decisions.

Section C
If any member of the panel feels they are unable to treat all parties fairly, they should remove themselves from the board, and the Associate Dean for Student Conduct may appoint a hearing panel of faculty or full-time undergraduate students from the Krieger School of Arts and Sciences and the Whiting School of Engineering who are not members of the Ethics Board. Such a circumstance might occur if a panel could not be appointed from among the members of the Ethics Board.
Section D
The professor shall submit all relevant documents to the Associate Dean for Student Conduct at least five business days prior to a hearing. The accused student shall submit all relevant documents to the Associate Dean for Student Conduct at least two business days prior to the hearing. If any evidence is submitted after this date, both parties will be notified of its addition.

Section E
The accused student shall be notified in writing of a charge of a violation of academic ethics at least five business days prior to a hearing. Upon receipt of notification, the accused student(s) shall have the opportunity to inspect all documents under the supervision of the Associate Dean for Student Conduct.

Section F
The hearing panel members shall not be informed of details of the charge(s) before the hearing is convened and shall keep all information confidential.

Section G
The accused student may discuss procedures with the Associate Dean for Student Conduct or a designee but may not approach members of the panel, the accuser, or the accuser’s witnesses concerning any matter directly or indirectly related to the hearing.

Section H
1. Students charged with misconduct arising from a single incident or occurrence may have their hearings joined at the discretion of the Associate Dean for Student Conduct. Charges of academic misconduct against a single student arising from several incidents or occurrences may also be heard at one hearing at the discretion of the Associate Dean for Student Conduct.
2. The accused student shall receive written notification of a joinder of charges.
3. When a hearing involves a joinder of charges, the guilt or innocence of each student shall be ruled upon separately. Similarly, joined charges against a single student shall be ruled upon individually.

Section I
1. If an accused student fails to appear for the hearing after having been duly served with notice, or withdraws from a hearing before its conclusion without the written permission of the Associate Dean for Student Conduct, immediate suspension from the University may be imposed. Such a suspension shall continue until the hearing can be concluded with the student present.
2. Students are responsible for appearing as witnesses before a hearing panel as requested by the Ethics Board, and no student may willfully interfere with the processes of the Ethics Board or its hearing panels. A student’s failure to appear and tell the truth in response to all relevant questions, or his or her interference with the processes of the Ethics Board or its hearing panels constitutes a violation of academic ethics.

Section J
Those present at a hearing of the Ethics Board are limited to the following: the Presiding Official, panel members, the member of the University bringing charges, the accused student(s), and not more than one representative of the accused student(s). Any witness called by either party may be present only when their testimony is required. The Associate Dean for Student Conduct or other administrative officer may also attend the hearing but cannot decide responsible or not responsible regarding the accused.

Section K
A full and complete record shall be made of the proceedings via digital audio recording. No record of the deliberation shall be made. The hearing panel may, however, prepare a brief written report detailing the reason(s) for the finding of guilt or innocence and any penalties imposed. The Office of the Dean of Student Life will maintain a permanent file of all such reports. If a student is found responsible, they will receive written notification of their sanction(s).

Section L
1. The Presiding Official shall conduct the hearing in an orderly fashion. He/She shall have the authority to rule on peremptory challenges, exclude testimony and evidence that is repetitious or irrelevant to the charges, and shall make final decisions of all questions of procedure. They may ask the Associate Dean for Student Conduct questions for clarification.
2. The Presiding Official may recess the hearing when it is deemed necessary. During a recess of a hearing, no discussion of the case by panel members, the accused student, the accuser, or witnesses will be permitted.

Section M
The accused student shall be presumed not responsible until found responsible. A determination should be reached during deliberations based solely upon the information presented during the hearing, and not upon any preconceived assumptions.

Section N
Upon calling the hearing to order and introducing the panel, the Presiding Official shall read the charge(s) and ask the accused student to enter a plea of responsible or not responsible.

Section O
If the accused student pleads responsible to the charge(s), the professor shall present testimony which can aid the hearing panel in determining the severity of the offense. The student shall then be given the opportunity to present information to the hearing panel which he/she wishes to be considered in determining a penalty. The hearing panel may also ask questions of both parties in order to ascertain the severity of the offense.

Section P
1. If the plea is not responsible, the professor shall present testimony and evidence in support of the charges. Evidence may include documents, the professor’s own testimony, and that of any witnesses. Before calling a witness, the professor should be prepared to establish that the witness will present evidence relevant to the case at hand. Only the panel may ask questions of the accused or the professor. The Associate Dean for Student Conduct may curtail questioning if it is determined to be irrelevant or repetitious.
2. Following the professor’s presentation, the accused student shall present testimony and evidence under the same restrictions.
3. Following the accused student’s presentation, the professor and the accused student may recall witnesses if they can establish the
need to do so. Such a recall of witnesses shall be subject to the
discretion of the Associate Dean for Student Conduct.

4. After testimony from both sides has been heard, the professor
and the accused student shall be given the opportunity to present
a closing statement and any mitigating circumstances which
they feel are appropriate. If the charge being heard constitutes
a second or subsequent offense by the student, the student
shall have the opportunity to comment on each prior offense
individually.

5. Following the closing statements, the professor, the accused
student, his/her representatives, and all witnesses are excused.
All parties shall remain available and shall inform the Presiding
Official of their whereabouts.

Section Q

1. The panel shall deliberate the charge(s) until each member
is ready to vote or the Associate Dean for Student Conduct
determines that any further deliberation will not be productive.

2. The accused student, professor, and/or any witnesses may be
recalled for further testimony at any time during the panel's
deliberation.

3. The individual decision of each hearing panelist on responsible/not
responsible shall be based upon a preponderance of the evidence.

4. Voting of the hearing panel may be by secret ballot or verbally.
Majority of votes will determine responsible or not responsible.

5. The accused student will be asked to return, and told of the results
of the panel.

Section R

Notice of the outcome of the hearing shall be sent to the student(s),
professor, and the Dean of the Krieger School of Arts and Sciences or
the Whiting School of Engineering, depending on the school in which the
student is enrolled. A copy will also be filed in the Office of the Dean of
Student Life.

Penalties

Section A

If a student is found responsible for a violation of academic ethics,
whether by direct settlement with the professor, by pleading guilty at a
hearing, or by a ruling of a hearing panel, a notification of the violation
must be made in the student’s file explaining the violation.

Section B

1. One or more of the following penalties may be imposed upon
students found responsible for violations of academic ethics:

a. A notation placed on the student’s permanent transcript
explaining the violation and punishment.

b. Retake of the examination, paper or exercise involved.

c. Score of zero on the examination, paper, or exercise
involved.

d. Lowering of the course grade.

e. Failure in the course.

f. Failure in the course with a notation on the transcript that
the grade was for a violation of academic ethics.

g. Failure in the course with suspension from the University.

h. Failure in the course with suspension from the University and
notation on the transcript that the failing grade was for a
violation of academic ethics.

i. Suspension from the University for at least one Semester.

j. Suspension from the University for at least one Semester
with a notation on the transcript that the cause was a
violation of academic ethics.

k. Expulsion from the University with a notation on the
transcript that the cause was a violation of academic ethics.

2. Hearing panels shall make every effort to select a penalty
appropriate to the severity of the offense, and may take into
consideration any mitigating circumstances brought to its
attention, as well as any record or absence of prior misconduct. A
hearing panel may also impose a penalty that is not enumerated
above if to do so would appropriately reflect the severity of the
offense.

3. In most cases, the penalty for a second or subsequent finding of
guilt must be selected from items (f) through (k) of Section B-1
above.

Section C

The penalty decided upon by the hearing panel must be agreed be
agreed upon by the majority of the panel.

Section D

A student found responsible for a violation of academic ethics in a
course forfeits the right to withdraw from the course or to change a
graded course to pass/fail, and any withdrawal from that course or
change effected prior to the finding of responsibility shall be voided.

Section E

A student who has committed a violation of academic ethics has the
option of making a timely and personal report of the offense to the
professor in charge of the course or to the Dean of the respective
school. A self-reported violation of academic ethics reported and dealt
with under this section shall not constitute a first offense. Self-reporting
is defined as reporting a violation of academic ethics without prompt by
an instructor.

Appeals

Section A

A student found responsible for a violation of academic ethics
may appeal the decision of the hearing panel to the Vice Dean of
Undergraduate Education (or his or her designee) of the Krieger School
of Arts and Sciences, the Vice Dean of Education of the Whiting School
of Engineering, whichever is applicable. The appeal must be filed
within 10 business days from the date of the decision from which the
appeal is taken. The appeal must be in the form of a written statement
setting forth the grounds for the appeal. A student may appeal due to
procedural error and/or the severity of the sanction(s). The Vice Dean
may disallow an appeal of any procedural error if that error did not
cause harm to the accused student. Upon receipt of an appeal, the Vice
Dean will review any and all documentation related to the case, obtain
and audio recording of the hearing, and may interview panel members
in determining the outcome of the appeal. The Vice Dean may uphold,
overturn, or amend any or all sanctions based on his/her findings. A
full written report of the disposition of each appeal shall be made by
the Vice Dean of the respective school and to the Associate Dean for
Student Conduct.
Suspicion of a Violation of Academic Integrity

Faculty members and teaching assistants have a responsibility to act in accordance with the ethics code in all cases of suspected violations of academic ethics. Students have a responsibility to report suspected violations of the ethics code to the professor in charge of the course or to the Ethics Board.

Records

Section A

Records of the Ethics Board are available to members of the Board, faculty, and administrative staff, including the pre-medical and pre-law advisors. Records will only be released if a written request has been made and approved by the Associate Dean for Student Conduct.

Section B

The records of the Undergraduate Academic Ethics Board shall be held in the Office of the Dean of Student Life.

Section C

1. It is strongly encouraged that if formal charges have not been brought against an accused student within three months or within the first month of the fall semester for charges carried over from the previous academic year, then any references to the accusation(s) shall be eliminated from all files into which they had been placed.

2. A case file concerning an accused student shall be retained for seven (7) years after that student graduates or otherwise leaves the University.

Summary of Procedures for Responding to Infractions of the Academic Ethics Code

Violations of Academic Integrity

Violations of academic ethics include, but are not limited to: cheating, plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one’s own the same or substantially similar work of another; knowingly furnishing false information to any agent of the University for inclusion in academic records; falsification, forgery, alteration, destruction or misuse of official University documents or seal.

Suspicion of a Violation of Academic Integrity

Faculty members and teaching assistants have a responsibility to act in accordance with the ethics code in all cases of suspected violations of academic ethics. Students have a responsibility to report suspected violations of the ethics code to the professor in charge of the course or to the Ethics Board.

The records of the Undergraduate Academic Ethics Board shall be held in the Office of the Dean of Student Life.

Direct Settlement between the Professor and Student

If this is a first offense, the professor may settle the case with the student if the student admits responsibility. Written notification of the violations and the settlement, signed by the professor and countersigned by the student, should be sent to the liaison for the Ethics Board. The penalty imposed may be selected from the following: retake the examination, paper or exercise involved; earn a lower grade in the course; or fail the course. If the professor or student feels that none of these penalties is appropriate, the case must be submitted to the Ethics Board for resolution. If this is a student’s second violation of academic ethics, the case must be submitted to the Ethics Board.

Ethics Board Hearings

When direct settlement is not possible, due to either a dispute of the charge, a second charge, or a faculty referral, the case is brought before the Ethics Board. A hearing panel of two faculty and three student members is then scheduled. The accused student will be notified of the charge(s) and hearing date, time and location. If the case is reported at the end of the semester, when students and faculty are busy with examinations or have left campus, the case may be held over until the start of the next semester.

The records of the Undergraduate Academic Ethics Board shall be held in the Office of the Dean of Student Life. Records will only be released if a written request has been made and approved by the Associate Dean for Student Conduct.

Penalties and Records

If a student is found guilty of a violation of academic ethics, either by direct settlement with the professor, or by a ruling of a hearing panel, a notation explaining the violation must be made in the student’s academic advising records. Penalties for a violation that is heard by a Hearing panel may include those available to a professor who reaches a direct settlement with the student, plus others including notations on a transcript and suspension or expulsion from the University. A student found guilty of a violation of academic ethics in a course forfeits the right to withdraw from the course, to change the graded course to satisfactory/ unsatisfactory, or to absolve the grade by repeating the course.
Self-Reports of Violations
A student who reports his/her own violation of academic ethics to the professor in charge of the course, or the Dean of the school, is subject to penalties, but the violation is not considered a first offense.

Student Life Policies
Drug, Alcohol, and Firearms Policies for Students
The University, in keeping with its basic mission, recognizes that its primary response to issues of alcohol and drug abuse must be through educational programs, as well as through intervention and treatment efforts. In addition to providing appropriate educational programs throughout the year, each division of the University will include such programs as part of its orientation for new students.

The University further recognizes that alcoholism and drug addiction are illnesses that are not easily resolvable by personal effort and may require professional assistance and/or treatment. Participation in such programs may be required of a student as a "condition of continual enrollment." The University will adhere to strict policies of confidentiality for all participants in drug/alcohol abuse rehabilitation programs as described in University and Federal regulations covering confidentiality of student health records. Maryland and District of Columbia laws prohibit the possession or consumption of alcoholic beverages by persons under the age of 21. The possession, use, or distribution of illegal drugs as defined by federal, state, and local statutes is prohibited.

Students are expected to obey the law. Individuals who violate the law, in addition to being subject to criminal penalties, may be subject to University disciplinary measures. The University will not excuse acts of misconduct committed by students whose judgment is impaired due to alcohol or drug abuse.

Amnesty Policy (Effective January 4, 2016)
Note: The Amnesty provision described in this section applies beyond the confines of the off-campus party registration policy and is intended to encourage all students to immediately seek necessary medical attention or assistance for themselves or others in need.

To encourage students to immediately seek necessary medical attention or assistance for themselves or others in need, the University will not impose disciplinary action for a violation of student alcohol or drug policies against individual students or Recognized Student Groups/Organizations when they report to or seek assistance from the University or law enforcement for a medical emergency or condition, or against the student who is subject of such medical emergency or condition, if: (1) the University determines that the violation occurred during or near the time of the alleged medical emergency or condition; (2) the student or Recognized Student Group/Organization is determined to have made the report or sought assistance in good faith; and (3) the University determines that the violation was not an act that was reasonably likely to place the health or safety of another individual at risk. However, repeated or serious medical emergencies arising from or in connection with Parties may result in disciplinary action against students and/or Recognized Student Groups/Organizations under applicable procedures.

This amnesty does not preclude disciplinary action for other violations of applicable policies including but not limited to the University Sexual Misconduct Policy and Procedures, and applicable student codes of conduct. Further, it does not preclude action by local, state and federal authorities.

In order for amnesty to apply, a student must agree to timely completion of any recommended alcohol and other drug educational requirements, assessment, treatment (depending on the level of concern for student health and safety), and/or other corrective measures. Similarly, Recognized Student Groups/Organizations must agree to implement any measures for responsible hosting of Parties in a timely manner, and to complete any recommended educational and training requirements and/or other corrective measures. Typically, the student and/or Recognized Student Group/Organization will first attend a mandatory meeting with a staff member of the Homewood Office of Student Life. This meeting is not considered a part of the disciplinary process, but rather an opportunity to discuss corrective measures around the student’s and/or Recognized Student Group’s/Organization’s decisions related to alcohol or other drugs. Repeated or serious incidents will result in additional corrective measures from the Homewood Office of Student Life. A failure to complete any corrective measures may result in disciplinary action against students and/or Recognized Student Groups/Organizations, up to and including revocation of recognition as a University recognized student group or organization.

A failure to seek assistance for a member of our community in medical need may have serious and lasting consequences for that individual. Disciplinary sanctions will be severe for any student and/or student group/organization who interfere with an individual’s attempt or ability to take responsible action.

Homewood Undergraduate Off-Campus Party Registration and Safety Policy (Effective January 4, 2016)
The Johns Hopkins University Homewood Undergraduate Off-Campus Party Registration and Safety Policy (the “Policy”) is one of a group of policies that apply to parties and student safety at the University. The primary aim of University policies in general, and this Policy specifically, is to ensure the safety and well-being of students and party attendees at off-campus residences. For information on events held at off-campus third party venues http://web.jhu.edu/studentlife/leadership_involvement/index.html

This Policy applies to Homewood undergraduate students, and University recognized student groups or organizations (“Recognized Student Groups/Organizations”). By way of example, Recognized Student Groups/Organizations include but are not limited to fraternities, sororities, athletic groups, and common interest clubs.

1. Definitions
a. House: The term “House” means an off-campus house, apartment or other residence in which four (4) or more members of a Recognized Student Group/Organization reside.

1. Definitions
a. House: The term “House” means an off-campus house, apartment or other residence in which four (4) or more members of a Recognized Student Group/Organization reside.

b. Party: The term “Party” means any party, activity, or other event at a House (as defined above) that is attended by twenty-five (25) or more individuals, whether residents or non-residents of the House, and at which alcohol is provided, served, and/or consumed. No party or other event’s attendance may exceed any fire code occupancy limit for that House.
c. **JHU Affiliate:** The term “JHU Affiliate” means a current student, a visiting student, a student who has matriculated at the University, and/or an individual who has completed all requirements needed to graduate but has not yet graduated.

d. **Policy:** The term “Policy” means this Homewood Undergraduate Off-Campus Party Registration and Safety Policy.

e. **SPM:** The term “SPM” means a Sober Party Monitor who meets the requirements described in this Policy.

f. **Recognized Student Groups/Organizations:** The term “Recognized Student Groups/Organizations” means Homewood undergraduate University recognized student groups and organizations.

2. **Party Registration Requirements**

a. Before a Party may be held at a House, the individual student(s) who reside in the House must have a check of the House performed annually by Campus Safety and Security (410-516-4671) to assess points of entry and exit, overall safety and security conditions of the facility, and provide guidance on the optimal deployment of SPMs. A Party may not be held at a House if this check has not been performed (or there is a lapse of more than twelve (12) months from the date of the prior check).

b. The individual student(s) who reside in the House must file a registration form [http://web.jhu.edu/studentlife/eventreport.html](http://web.jhu.edu/studentlife/eventreport.html) for a Party with the Homewood Office of Student Life at least seventy-two (72) hours prior to date and time of the Party. A Party registration form must be reviewed by the Homewood Office of Student Life to verify the party requirements are met and that the organization is in good disciplinary standing.

c. The individual student(s) who reside in the House will receive certain provisions (e.g., water, snacks) for an approved Party from the Homewood Office of Student Life.

d. Any other Homewood undergraduate student(s) in private off-campus residences are also encouraged to register a party, activity or other event pursuant to this Policy. Further, the Homewood Office of Student Life will upon request provide student(s) with information on hosting responsible parties and available resources, emergency contact information, and other applicable educational materials.

e. For policies pertaining to on-campus parties, activities or other events, please see [http://web.jhu.edu/studentlife/leadership_involvement/policies/Event_Planning_Guide](http://web.jhu.edu/studentlife/leadership_involvement/policies/Event_Planning_Guide).

f. Nothing in this policy restricts the Homewood Office of Student Life from limiting individual students or an organization from hosting a party for reasons of community safety and well-being.

3. **Party Requirements.** A Party must meet all of the following requirements:

a. **Points of Entry and Exit.** A Party may have only one (1) designated point of entry, which must be under active access control (see below). A Party may have more than one point of exit, but those points of exit may not serve as additional points of entry. Any points of exit or entry should not be blocked in a way that might create unsafe conditions or violate any fire codes or other local and state laws; Campus Safety and Security can provide helpful information on safe party management, as well as fire codes and other local or state laws.

b. **Access Control:** A Party must have active access control in place for the entire duration of the Party that includes the presence of at least one (1) SPM (or a qualified third party vendor) at the point of entry, measures to check identification prior to allowing individuals to enter, and measures to ensure that individuals who are visibly and severely under the influence of alcohol and/or drugs are not permitted to attend the Party. SPMs must promptly communicate with Campus Safety and Security, the Community Liaison, HERU, and/or the Baltimore Police Department, as appropriate, to obtain any assistance needed.

c. **SPMs:** A Party must have two (2) designated SPMs (including the one for access control mentioned above) and one (1) additional SPM for every twenty-five (25) attendees above the initial twenty-five (25) attendees. This means that if a party has 30 attendees, there must be at least 3 SPMs; if a party has 50 attendees, there must be at least 4 SPMs; if a party has 75 attendees, there must be at least 5 SPMs; etc. At least one (1) SPM must be a resident of the House in which the Party is held.

d. **Attendees:** Open Parties are not allowed. Only JHU Affiliates and/or invitees of JHU Affiliates may attend a Party. All attendees must be eighteen (18) years of age or older, or if younger than eighteen (18), must have a valid college identification card. The total number of attendees at a Party may not exceed the fire code capacity of the House or twenty-five (25) individuals per SPM as outlined above.

e. **Guest Lists:** Each Party must maintain and provide to the University on request a guest list of all attendees.

4. **Sober Party Monitors (SPM).** First-Year students are not permitted to serve as SPMs. In addition to the responsibilities outlined above, SPMs must meet and comply with all of the following for the duration of the Party:

a. Completed training provided by the University Center for Health Education and Wellness within the last twelve (12) months;

b. Wear a neon shirt provided by the University or another University-approved method of identification;

c. Carry a phone on their person at all times in case of emergencies, and have the phone numbers for Campus Safety and Security, the Community Liaison, HERU, and 911 programmed on their phones or immediately accessible;

b. Must not consume alcohol and/or illegal drugs and remain free of these substances for the entire duration of the Party and for eight (8) hours prior to the start of the Party;

e. **Verify that the number of attendees does not exceed the fire code capacity of the House or twenty-five (25) individuals per SPM;**

f. **Circulate throughout the Party (including points of entry and exit), be vigilant for situations that may endanger the health, safety, or welfare of individuals, promptly obtain assistance from Campus Safety and Security, the Community Liaison, HERU and/or the Baltimore Police Department, as appropriate, and communicate with other SPMs regarding the foregoing; and**
g. Speak with law enforcement and any neighbors who come to the House and ask to speak with someone regarding the Party.

5. Alcohol/Drug-Related Policies/Restriction on Use of Hard Alcohol. Consistent with current Homewood Student Life policies, only beer and/or wine may be served at Parties. http://e-catalog.jhu.edu/undergrad-students/student-life-policies/#DAF_Policies. In particular, no “hard alcohol” (i.e., alcohol that is 30 proof or higher) may be provided or served at Parties.

6. Responsibility for violations of this policy. Individuals who violate this policy will be held responsible under the student code of conduct. Additionally, Recognized Student Groups/Organizations can be held accountable when members of the student group or organization violate this or other University policies. For student groups or organizations, possible sanctions include but are not limited to: a warning, probation, suspension, or de-recognition. For more information, see the student conduct code, located at http://e-catalog.jhu.edu/undergrad-students/student-life-policies/.

Sanctions and Corrective Actions: Alcohol Policy Violations (Effective January 4, 2016)

Note: The Sanctions and Corrective Actions described in this section apply beyond the confines of this Policy to all students, whether on or off-campus when they are found in violation of Student Life alcohol policies. This section further clarifies the sanctions listed in the student conduct code http://e-catalog.jhu.edu/undergrad-students/student-life-policies/.

Individual-level Actions

1. Progressive Sanctioning

The University has adopted a progressive sanctioning process for student conduct code violations and this Policy is in accordance with that process. Depending on the nature of the alcohol policy violations, students may be required to participate in a mandatory meeting with staff member(s) from Homewood Student Life and/or Residence Life. The sanctions below apply to violations of all applicable alcohol policies, including this Policy. The University reserves the right, at its discretion, to impose more stringent or different sanctions depending on the facts and circumstances of a particular case. Further, consistent with the student conduct process, this Policy does not limit the University’s authority to impose disciplinary sanctions, up to and including expulsion, in cases where a student is charged with violating student conduct policy and/or other University policy in addition to a violation of this Policy. Violations of this Policy will be addressed through the Homewood Student Life disciplinary procedures available at http://e-catalog.jhu.edu/undergrad-students/student-life-policies/.

1st Minor Alcohol Violation

Formal Written Warning

Student is officially notified in writing that his or her actions constitute a violation of University policies.

2nd Minor or 1st Major* Alcohol Violation

Probation

Student is notified that his or her status with the University for a specified period of times is such that further violations of any applicable University policies will result in his or her being considered for a “higher level” sanction including suspension or expulsion from the University. If at the end of the specified time period no further violations have occurred, the student is removed from active probationary status.

3rd Minor or 2nd Major* Alcohol Violation

Deferred Suspension

In some cases, a sanction of suspension may be deferred for a specified period. This means that, if the student is found responsible for any violation during that period, he or she will be subject to suspension in addition to the disciplinary action appropriate to the new violation.

4th Minor or 3rd Major* Alcohol Violation

Suspension or Expulsion

Student is notified that he or she is separated from the University for a specified period of time. Students who are suspended must leave campus within the time prescribed by the University. Permission must be granted by the University before a student will be permitted to re-enroll. If the decision to suspend a student is made, imposition of the suspension may be delayed until the following semester at the discretion of the University, if the decision occurs very late in the semester.

*Major Alcohol Violations involve excessive and high-risk alcohol consumption that endangers the health, safety, or welfare of oneself or others.

2. Corrective Measures

The University reserves the right, in its discretion, to impose additional or different corrective depending on the facts and circumstances of a particular case.

Minor Violations: Corrective measures include but are not limited to one or more of the following: educational intervention programs; reflection papers; parental/family notification (see below); and/or, notification to coaches (for members of athletic teams).

Major Violations or Repeat Minor Violations: Corrective measures include but are not limited to one or more of the following: parental/family notification and consultation (see below); notification to coaches (for members of athletic teams); educational intervention programs; referral to the Homewood Counseling Center; and/or completion of a treatment program prior to return from period of suspension.

3. Parent or Family Notification for Alcohol Violations

Consistent with the Family Educational Rights and Privacy Act (FERPA), parents or legal guardians may be notified that their student was found responsible for disciplinary violation(s) of applicable law or policies governing the use or possession of alcohol or controlled substance(s) with respect to any such use or possession if the student is under the age of 21 at the time of disclosure to the parents, and/or whenever the University, in its discretion, determines such notification is necessary for the purpose of the health or safety interests, and/or as otherwise permitted by applicable law. Notification generally takes place via phone call within 48-72 hours once the determination of responsibility has been made. It is strongly recommended that students inform their parents of all incidents of conduct violations.
Student Activities Alcohol Provisions

Generally, alcohol is not served at events sponsored by University-affiliated student groups. If a student group does desire to sponsor an event at which alcohol will be served, it must receive permission of the Director of Student Activities prior to the event taking place. The conditions under which permission will be granted are as follows:

1. Only beer and/or wine may be served. Kegs and other bulk quantities are not permitted unless they are managed and served by a third-party vendor and approved by University officials.

2. The organization must agree to follow the procedures for assuring that persons attending the event who are underage will not be served (e.g., the employment of a licensed third-party security vendor). In addition, the organization and/or individuals in the organization may be subject to University disciplinary action if underage patrons are served alcoholic beverages.

3. Publicity (posters, etc.) for events at which alcoholic beverages are served must not include any mention of beer/wine. "Refreshments available" or some facsimile thereof will be acceptable. News-Letter ads may publicize beer/wine, but it cannot be the main thrust of the ads.

4. Persons who violate or attempt to violate these regulations (restrictions) will be asked to leave the event and may be subject to university disciplinary action. The Associate Dean for Student Conduct limits the number of events at which alcohol may be served. Organizations that violate the alcohol policy will lose the privilege of serving alcohol at their events and may be subject to University disciplinary action.

5. No alcoholic beverages may be purchased through student organization funds nor may the purchase of alcoholic beverages for members or guests be undertaken or coordinated by any member in the name of or on behalf of the student organization.

6. The sale of alcoholic beverages at Johns Hopkins’ student organization events must be through a State of Maryland licensed vendor and must be sold on a “per drink” basis to individuals; “open bar” events are prohibited. Beverages should be sold at reasonable market value and prices should be included in the event contract. Profit sharing is prohibited. Free drink vouchers are prohibited. The distributing of drink tickets/vouchers at student organization events is prohibited.

7. No member of Johns Hopkins’ student organizations, collectively or individually, shall purchase for, serve to, or sell alcoholic beverages to anyone under the age of 21. It is the role of the third party vendor to acquire, distribute and monitor the alcohol.

8. Alcohol events hosted on campus by Johns Hopkins’ student organizations must comply with University policies regarding the reservation of adequate security and age verification procedures.

9. All recruitment activities hosted by a Johns Hopkins’ student organization must be dry, meaning no alcoholic beverages will be served.

10. Johns Hopkins University student organizations may not collect admissions fees (cover charges) in order to defray the cost of alcohol.

Policy on Firearms

The possession, wearing, carrying, transporting, or use of a firearm or pellet weapon is strictly prohibited on University premises. This prohibition also extends to any person who may have acquired a government-issued permit or license. Violation of this regulation will result in a disciplinary action and sanctions up to and including expulsion, in the case of students, or termination of employment, in the case of faculty and staff. Disciplinary action for violations of this regulation will be the responsibility of the divisional student affairs officer, Dean or Director, or the Vice President for Human Resources, as may be appropriate, in accordance with applicable procedures. Any questions regarding this policy, including the granting of exceptions for law enforcement officers and for persons acting under the supervision of authorized University personnel, should be addressed to the appropriate chief campus security officer.

Sexual Misconduct Policy

Effective August 19, 2015, these procedures no longer apply to cases of sexual misconduct, which includes sexual harassment, sexual assault, relationship violence, and stalking. Complaints of sexual misconduct are processed pursuant to The Johns Hopkins University Sexual Misconduct Policy and Procedures (see http://sexualassault.jhu.edu/policies-laws/).

Open Space Policies

This policy governs any open space on campus, and applies to all Johns Hopkins University students, alumni, employees, and visitors.

• Alcoholic beverages are prohibited in open spaces at all times, except by written permission of the Office of the Dean of Student Life.

• Glass bottles of any kind are prohibited in open spaces after dark.

• All trash must be disposed of in trash cans or removed from open space.

• The operation of any non-University vehicle in open space is strictly prohibited.

• Disorderly conduct, disruptive or mischievous behavior, vandalism, fights, assaults, or any other violation of University policy, the Student Conduct Code, state law or city ordinance is prohibited.

• All persons on open spaces, including Johns Hopkins University students and guests, must comply promptly and completely with the requests of University staff acting in accordance with their duties, including, but not limited to, requests for identification, for noise or activity abatement, dispersal, and for the surrender of beverages for examination and/or confiscation.

• Students are responsible for informing their guests of all University policies in and out of buildings, and are accountable for the actions of their guests.

• Skateboarding is permitted on paved and bricked paths only. Skateboarding on stairs, benches, railings, and any other than paved or bricked paths is prohibited. Skateboarders are urged to use caution and yield to pedestrians.

While voluntary compliance with open space policy is expected, where violations are found, enforcement staff may, at their discretion, issue a warning, or, without warning require any person or group of people to leave open space for a policy violation and/or for exigent circumstances. Enforcement staff, at their discretion, may confiscate alcoholic beverages from persons in open spaces. Violators of state law or city ordinances may be subject to arrest by Campus Security Officers or Baltimore City Police.

Students who are found in violation of the alcoholic beverage restriction in this policy may be subject to disciplinary action, including up to a $50 fine for a first violation, and may face additional sanctions based upon
the nature and circumstances of the misconduct incident. Additional violations of the policy will bring more severe sanctions. In addition to fines, sanctions for misconduct may range from a warning through expulsion.

Students who violate other sections of this policy, or who fail to comply with Campus Security Officers and other staff acting to enforce this policy, may face disciplinary action.

Open Space Policy Enforcement Procedures
Undergraduate students suspected of violating an open space policy may be referred to the Office of the Dean of Student Life and may face disciplinary action. Graduate students may be referred to their academic dean. The Johns Hopkins Office of Campus Safety and Security is working in conjunction with the division of Homewood Student Affairs to ensure enforcement of this policy. Campus Security Officers will patrol open spaces regularly to promote adherence to the open space policy. The following guidelines will be used:

- Alcoholic beverages will be confiscated.
- Beer kegs will be confiscated.
- Glass bottles will be confiscated or their proper disposal directed.
- Individuals who possess alcoholic beverages may be asked for personal identification. Individuals found violating policy or individuals who fail to comply with request of enforcement staff acting in performance of their duties, may be asked for personal identification and/or directed to leave the area.
- Individuals who possess alcoholic beverages may be asked for personal identification. Individuals found violating policy or individuals who fail to comply with request of enforcement staff acting in performance of their duties, may be asked for personal identification and/or directed to leave the area.
- Glass bottles will be confiscated or their proper disposal directed.
- Individuals who possess alcoholic beverages may be asked for personal identification. Individuals found violating policy or individuals who fail to comply with request of enforcement staff acting in performance of their duties, may be asked for personal identification and/or directed to leave the area.

If proof of identity is not provided:

- the individual may be escorted from University property as a trespasser
- the individual may be detained at the discretion of Campus Security Officers in order to establish his or her identity.

Reports of violations of open space policies will be submitted to the Office of the Dean of Student Life and will include the identity of the person involved. Undergraduate first-time violators may be subject to disciplinary action including, but not limited, a fine of up to $50. Undergraduate violators who have committed a prior offense, or have committed misconduct in open spaces, in addition to an alcohol possession violation, may face additional disciplinary action. Individuals who violate state law or city ordinance on open space may be subject to arrest by Campus Security Officers or Baltimore City police. Trials for arrested persons are conducted in the State Courts of Maryland.

University Policy on Hazing
The Johns Hopkins University prohibits hazing. The Johns Hopkins University prohibits hazing. Hazing is defined to be:

- any action taken or any situation created intentionally that causes embarrassment, harassment or ridicule and risks emotional and/or physical harm to members of a group or team, whether new or not, regardless of the person’s willingness to participate.

If you’re not sure whether or not something happening to you or to someone else is hazing, ask yourself these questions:

- Would I feel comfortable participating in this activity if my parents were watching?
- Would I get in trouble if a school/college administrator walked by and saw us?
- Am I being asked to keep these activities a secret?

- Am I doing anything illegal?
- Does participation in this activity violate my values or those of this organization?
- Is this causing emotional or physical distress or stress to myself or to others?
- Am I going to be able to get a job if I have to put a criminal arrest on my application?

Examples of conduct that would violate this policy may include but are not limited to:

1. All forms of physical activity not part of an organized, voluntary athletic context or not specifically directed toward constructive work
2. Any activity (including voluntary athletic contests and constructive work) that might reasonably bring harm to the individual
3. Paddling, beating, or otherwise permitting undergraduate or alumni members to hit individuals
4. Depriving individuals of the opportunity for sufficient sleep, decent and edible meals, or access of means of maintaining bodily cleanliness
5. Activities that interfere with an individual’s academic efforts by causing exhaustion, loss of sleep, or loss of reasonable study time
6. Requiring individuals to consume alcohol or drugs
7. Forcing, coercing, or permitting individuals to eat or drink foreign or unusual substances
8. Any requirement which compels an individual to participate in any activity which is illegal, perversely, publicly indecent, contrary to the individual’s moral and/or religious beliefs, or contrary to the Student Code of Conduct and/or policies and regulations of the University.

Groups such as fraternities, athletic teams, and student organizations may be held accountable for misconduct by individuals committed in the context of group membership.

Student Activities Policies & Room Reservation Policy for Levering Hall, Shriver Hall and the Mattin Center Meeting Rooms 160, 161 and 162
At the conclusion of each semester, recognized student groups may reserve space for the subsequent semester during scheduling week. All groups are limited to reserving one ninety-minute weekly meeting and two special events. Two weeks after scheduling week, groups may reserve additional spaces with the approval of the Scheduling Coordinator. Each student organization will designate not more than two people per academic year who will take responsibility for reserving rooms with the Scheduling Coordinator. Please contact Pat Forster, Scheduling Coordinator, at 410-516-8018 or e-mail her at pataf@jhu.edu, with your scheduling representative’s name, telephone numbers and e-mail address.

Any group failing to use a confirmed room for 2 consecutive meetings without formally canceling the room with the Scheduling Coordinator will be notified that their remaining reservations are canceled for that semester. In addition, if your group has been suspended and appears on the FROZEN ACCOUNT list, please resolve those issues before coming to reserve rooms. If your group does not appear on the list of Recognized
Student Groups, please see the Student Activities Office staff so that your status can be verified.

**Poster Policy**

Postering is one of many ways to publicize your group’s events. There are a number of community bulletin boards in the Mattin Center Courtyard and Levering Hall. Academic and other departments may maintain their own bulletin boards. When you poster, be sure you know on whose board you are placing the flyer, and follow that group’s rules. These rules and regulations govern posters and other forms of advertising on campus in a fair manner. In addition, posters and other forms of advertising should not disrupt academic classes, programs, or activities and should not damage the property of JHU. Failure to comply with the following guidelines may result in removal of poster, fines, and/or disciplinary measures.

1. Posters and flyers may be placed on campus bulletin boards only.
2. Bulletin board flyers should be 8.5” x 11” and not fixed over another flyer. Requests for exceptions for larger flyers or posters must be forwarded to the Office of Student Activities in the Mattin Center.
3. Flyers advertising expired events or not meeting this policy’s criteria, may be removed.
4. Chalk is allowed to promote events on sidewalks only. Any group that uses chalk anywhere other than the sidewalks will receive a bill from Plant Operations charging the group for the clean up. This is not negotiable. Chalking should only be done in areas that can be rain-soaked. Check with the Office of Student Activities for allowable locations.
5. Banners may be hung on approved campus structures. Contact the Office of Student Activities in the Mattin Center for scheduling, approval, and necessary arrangements for hanging banners on campus.
6. Painted mural boards are coordinated by the Office of Student Activities in Mattin 161. Please email studentactivities@jhu.edu for reservations or more information.

Note: The University considers placing posters on glass to be a fire hazard and custodians are instructed to remove any potentially hazardous posters. These restrictions exist in order to improve the appearance of the Hopkins campus and to maximize the usefulness of the bulletin boards.

Check with Residential Life Office before posting in any residential area, designated boards excepted, and check with department offices before poster on their boards. Flyers posted in residence halls must include all necessary information; no teasers.

**Poster Locations (Subject to Change)**

- Levering Hall: Outside Levering Market (Garland and Arellano sides), lower Levering hallway, and Union Desk
- MSE Library: M-Level by pay phones, on B, C, and D levels near elevators
- Remsen: First and third floors
- Residences: A & B, each AMR house, Wolman, McCoy: one board per floor, AMR and Wolman mailrooms, McCoy lobby, and the top steps next to the Snack Bar
- Maryland Hall: First Floor
- Shaffer: Next to rooms 3 and 100
- Outside: Outside Levering, and between MSE and the Remsen - Charles Street Gate.

**Vending and Solicitation Policy**

All vendors who wish to sell their goods in the Levering Union, on the Levering Patio, or on the quadrangles during special events such as Commencement must apply to the Director of Levering Hall & the Mattin Center located in Levering 102. The Director of these facilities retains the right to determine the appropriate vending times, locations, and goods sold. Vendors are required to sign a license agreement with the Director. Vendors will refrain from selling goods displaying the name Johns Hopkins University or the Johns Hopkins University seal or logo. Vendors will be prohibited from selling compact discs, tapes and other items that directly compete with items sold in other establishments on campus. Sales of computer and telecommunications equipment must be coordinated through the Purchasing and Telecommunications departments. Credit card promotions to students are prohibited.

**Group Members and Leaders Academic Policy**

All undergraduate student organization leaders must maintain a minimum Grade Point Average of 2.0 in order to remain in or to be elected/selected to a student leader position. All undergraduate student organization members and leaders must be enrolled in at least 6 credit hours.

**Fundraising**

Any group that solicits funding from outside agencies (i.e. businesses, corporations, foundations) must submit all requests to the Office of Student Activities for review and approval.

**University Policy on Automobiles and Parking**

Undergraduate resident students are strongly discouraged from bringing cars to campus. The City will not grant residential parking permits to students residing in University housing and students who are residing in University housing are not eligible for University parking permits. Without campus or residential parking access, resident students with cars face ticketing and towing. Violators are subject to the applicable University and City penalties, which include substantial fines, "Denver boots", and towing fees, which typically amount to several hundred dollars. Students who live more than one mile from campus can purchase a parking access card to park on campus while using University facilities. Owners of two-wheeled motor vehicles must also pay for parking. The parking rules are in effect Monday through Thursday from 7a.m. to 8:30 p.m., Friday 7 a.m. to 7 p.m., and on Saturday and Sunday the campus is open. Those who are eligible for paid parking must bring with them the following to show proof of eligibility:

- A valid J-CARD
- Vehicle registration in your name, your parent’s name or your spouse’s name
- Proof of local address
- Paid registration form (permit to register receipt)

**University Policy on Pets**

No pets of any kind are permitted in university housing. The University also has the following policy on dogs:
1. While on university property, dogs must be leashed, licensed, and under the control of their owners or handlers at all times.
2. Dogs are not allowed in the common areas of any University building, including classrooms, except when being taken to and from non-public areas. (Guide dogs for the visually impaired are permitted in common areas.)
3. Dogs may not be tied up and left unattended on any campus grounds.
4. Owners or handlers are responsible for the removal of excrement deposited by their animals on University property.

If any infraction of these rules is observed, Campus Security should be notified (410-516-4600), and they will attempt to resolve the problem with the owner. If unsuccessful, or unable to locate the owner, the Municipal Animal Shelter will be notified to impound the dog in accordance with applicable animal control laws. Owners will be responsible for all impoundment fees.

The University strongly encourages students not to bring their pets to school unless they have cleared it with both their landlord and their roommates and are sure they have the means to care for their pets properly. Pets are often abandoned because there is no one to care for them over vacations, or the landlord threatens to evict the owner. If you own a pet and cannot keep it, contact Animal Rescue (410) 636-1360, the Humane Society (410) 833-8848, or Baltimore SPCA (410) 235-8826 which will do its best to find the animal a new place to live.

Information Technology Policies

Student Technology Policies

The Johns Hopkins University is committed to providing a robust information technology environment to support its students and faculty in the pursuit of their research and instructional objectives. In general, undergraduate and graduate students are afforded the same access to computing and networking resources as are faculty and staff.

Understanding that for the University to maintain an environment of open access to networked computing resources is important, those who use these facilities must comply with the written policies coercing their use as well as the “spirit and intent” of these policies. Appropriate use of the resources includes instruction, independent study, authorizes research, and the official work of the offices, departments, recognized student organizations, and the agencies of the University. Any activity that intentionally obstructs or hinders the authorized use of campus computing and networking resources is prohibited.

For the comprehensive policy go to http://it.jhu.edu/policies/tpolicies.html.

Residence Requirement

The Homewood Schools’ freshman and sophomore residence requirement applies to students engaged in their first two years of full-time undergraduate study. Transfer students entering the university with freshman or sophomore status are subject to this same requirement. Since students cannot complete their residence requirement in the middle of the academic year, transfer freshmen entering the university in January must live in the residence halls their entering semester and the following academic year. Transfer sophomores entering in January fulfill the residence requirement by living in the residence halls their entering semester. Exceptions to this policy are made for individuals living at home in the Baltimore area with parents or guardians.

The benefits of the residence requirement are many. It is designed to provide the students with a variety of services and conveniences. Living on campus supports the academic mission of the university and affords students the opportunity to interact, socialize, and unwind with their classmates.

University Policies

The following university policies are detailed in this section:

- Policy on Alcohol and Drug Abuse and Drug-free Environment (p. )
- Policy on Possession of Firearms on University Premises (p. )
- Policy on the Privacy Rights of Students (FERPA) (p. )
- Notice of Availability of Annual Security and Fire Safety Report (p. )
- Equal Opportunity/Nondiscrimination Statement (p. )
- Anti-Harassment Policy (p. )
- Sexual Misconduct Policy (p. 52)
- Photography and Film Rights Policy (p. )

University Policies for Students

Policy on Alcohol and Drug Abuse and Drug-free Environment

(hrnt.jhu.edu/pol-man/appendices/sectionE.cfm)

Policy on Possession of Firearms on University Premises

(hrnt.jhu.edu/pol-man/appendices/sectionF.cfm)

Policy on the Privacy Rights of Students

(Full policy: jhu.edu/news_info/policy/ferpa.html)

Notice of Availability of Annual Security and Fire Safety Report

The Johns Hopkins University Annual Security and Fire Safety Report is available on the University’s website at www.jhu.edu/security/annual_report.pdf.

In keeping with the mandates of the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act), the University’s Annual Report contains statistics of certain crimes that are reported and that occurred on campus, in certain off-campus buildings or property owned or controlled by the University or an officially recognized student organization, and on public property within or immediately adjacent to and accessible from the campus for the three most recent calendar years. Also included are campus security policies including those related to missing student notifications, alcohol and drug use, sexual assault, relationship violence, and stalking, crime prevention, the reporting of crimes, and fire safety policies and statistics. All Johns Hopkins faculty, staff and students are encouraged to read and print out the report at www.jhu.edu/security/annual_report.pdf, and to report all criminal incidents promptly to your respective security department.
A printed copy of the annual crime report may be obtained from the security offices of Johns Hopkins:

Homewood Campus 410-516-4631; Peabody Institute 410-234-4600; Medical Institutions 410-614-3473; Applied Physics Laboratory 443-778-7176; School of Advanced International Studies, D.C. 202-663-5808; or from the deans/directors/coordinators for our JHU Campuses and centers at: Baltimore, MD (Harbor East) 410-234-9301; Columbia, MD 410-516-9700; Bologna, Italy 202-663-5700; International +39.051.2917.811; Washington, D.C. Zanvyl Krieger School of Arts and Sciences 202-663-5808; Nanjing, China 202-663-5802; International +86.25.8359.2436; Washington, D.C.-Carey Business School 202-663-5808; Montgomery County, MD 301-294-7011.

Graduate Students

Johns Hopkins University is proud to offer a rigorous and interdisciplinary graduate education taught by faculty who are academic and research leaders in their fields. Across the nine divisions of the university there are approximately 20,000 full-time and part-time graduate students working in over 180 fields of study. Combined with exceptional university facilities and resources, the endeavors of graduate students have contributed to groundbreaking discoveries, expansive and innovative collaborations, and the advancement of knowledge throughout the university and beyond.

The policies, procedures, resources, and opportunities included in this section are relevant for graduate students enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering on the Homewood campus. Please use the links at the left to navigate to your topic of interest.

Student Right to Know Information

The Higher Education Act of 1965, as amended in 2008, includes many student disclosures and reporting requirements by universities. These requirements include statistics and/or information on the following subjects:

1. Retention and graduation rates;
2. Financial assistance available to students and requirements and restrictions imposed on Title IV aid;
3. Crime statistics on campus;
4. Athletic program participation rates and financial support; and
5. Other institutional information including: the cost of attendance, accreditation and academic program data, facilities and services available to disabled students, and withdrawal and refund policies.

For the full Student Right to Know page, please visit: http://homewoodgrad.jhu.edu/student-services/student-right-to-know/

Admissions and Finances

Admissions

Admissions for Full-time Graduate Programs

The Office of Graduate Admissions and Enrollment is available to answer questions about the Krieger and Whiting Schools’ full-time graduate program application process and respond to general admissions inquiries and requests for information. Please visit grad.jhu.edu for a complete list of graduate programs offered by the Krieger School of Arts and Sciences and the Whiting School of Engineering and for information regarding the admissions process.

Admissions/Information for Visiting Graduate Students and Volunteers

The schools of Arts and Sciences and Engineering recognize and appreciate the contributions of volunteers and visiting graduate students to its mission of education and research and has policies in place to enable both schools to retain and set forth requirements pertaining to volunteers and visiting graduate students. Interested applicants should visit: http://grad.jhu.edu/apply/visiting-students/ for more information.

Costs of Attendance and Financial Aid

Costs of Attendance

See Financial Aid Website (http://pages.jh.edu/~finaid/grads_cost.html)

Financial Aid and Student Loans

All financial aid is distributed by individual departments. Graduate students should contact their departments for information concerning aid disbursement or the availability of funds. Students are required to fill out a new FAFSA form every year if they wish to continue receiving financial aid. For more information on student loans and work-study opportunities, go to the Student Financial Services website (http://www.jhu.edu/finaid/grads.html) or visit their office in Garland Hall.

Fellowships

Diversity Fellowships

Johns Hopkins is a community committed to sharing values of diversity and inclusion in order to achieve and sustain excellence. We firmly believe that we can best promote excellence by recruiting and retaining a diverse group of students, faculty and staff and by creating a climate of respect that is supportive of their success. This climate for diversity, inclusion and excellence is critical to attaining the best research, scholarship, teaching, health care and other strategic goals of the Health System and the University. Taken together these values are recognized and supported fully by the Johns Hopkins Institutions leadership at all levels. Further, we recognize that the responsibility for excellence, diversity and inclusion lies with all of us at the Institutions: leadership, administration, faculty, staff and students.

See http://grad.jhu.edu/admissions/diversity/fellowships/.

WSE-Specific Graduate Fellowship Information

The Whiting School of Engineering offers a number of endowed fellowships that provide supplemental financial aid to incoming and current full-time engineering students. Full-time degree seeking graduate students are automatically considered for the fellowships. Visit this link for more information.

KSAS-Specific Graduate Fellowship Information

The Krieger School of Arts and Sciences offers an incredible array of opportunities for student researchers in the areas of natural science, social science, and humanities. Visit this link for more information.

Veterans Educational Benefits

Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans and the widows and children of deceased veterans under the provisions of the various federal laws pertaining to veterans’ educational benefits. Information about veterans’ benefits and enrollment procedures may be obtained at web.jhu.edu/registrar/veterans.html or the Office of the Registrar, 75 Garland Hall, 410-516-7071.
Students eligible for veterans' benefits register and pay their university bills in the same manner as nonveteran students. The Department of Veteran Affairs determines the educational benefit a veteran is eligible to receive. Veterans educational benefits payments cover only a portion of assigned course fees. To receive veterans educational benefits the student must comply with the following procedures:

Initial Enrollment
Once admitted to the university, the student must complete an Application for Program of education or Training (VA Form 22-1990) from the Department of Veteran Affairs at www.gibill.va.gov (http://www.gibill.va.gov). A copy of the completed application, along with a certified copy of the DD-214, is sent to the Veterans Desk, Office of the Registrar, 75 Garland Hall, The Johns Hopkins University, Baltimore, Maryland 21218.

The student who is transferring from another university or college will need to obtain a Request for Change of Place of Training (VA Form 22-1995) from the Department of Veteran Affairs at www.gibill.va.gov (http://www.gibill.va.gov). The completed form should be sent to the Veterans Desk at the university.

Re-enrollment
Students who received veterans' benefits at the university the preceding semester and plan to enroll with no change of objective should inform the Registrar's Office at the time of registration that they want to be recertified under the provisions of their original VA Form 22-1990.

Students receiving veterans' benefits must take courses that lead toward the exact objective (usually a specific degree) on the original VA application. Otherwise, they must submit a Request for Change of Program (VA Form 22-1995). Students utilizing veterans' benefits must let the registrar know immediately of any change in their program or status that might affect the amount of their VA payment. If they fail to do so, the Department of Veterans Affairs will seek reimbursement from the student for any overpayment.

Standards of Progress
Continuation of VA payments depends on the student's meeting the university's academic standards for all students. The student must also meet any standards of progress which may be established by VA regulations.

The College Navigator Tool
Veteran students may go to the College Navigator (http://nces.ed.gov/collegenavigator) to access a school comparison tool.

University Policies
The following university policies are detailed in this section:

• Policy on Alcohol and Drug Abuse and Drug-free Environment (p. )
• Policy on Possession of Firearms on University Premises (p.  )
• Policy on the Privacy Rights of Students (FERPA) (p.  )
• Notice of Availability of Annual Security and Fire Safety Report (p.  )
• Equal Opportunity/Nondiscrimination Statement (p.  )
• Anti-Harassment Policy (p.  )

Graduate-Specific Policies

• Statement of the Rights and Responsibilities of Ph.D. Students at Johns Hopkins University (p. 55)
• Academic and Research Misconduct Policy (p. 55)
• Assistant Leave Policy (p. 55)
• Grievance Policy (p. 55)
• Jury and Witness Duty (p. 55)
• Homewood Schools (p. 56) Policy for Graduate Student Probation, Funding Withdrawal, and Dismissal
• Information Technology Policy (p. 56)
• G.W.C. Whiting School of Engineering - Specific Policies (p. )
• Zanvyl Krieger School of Arts and Sciences - Specific Policies (p. )

Statement of the Rights and Responsibilities of Ph.D. Students at Johns Hopkins University

Ph.D. education is fundamental to the University’s teaching and research mission. For an intellectual community of scholars to flourish, it is important to acknowledge the principles that underlie the compact between Ph.D. students, the faculty, and other members of the University community.

It is in this spirit that the Doctor of Philosophy Board, in collaboration with faculty and students from across the University, has articulated a statement of rights and responsibilities for doctoral students at Johns Hopkins. (http://web.jhu.edu/administration/provost/initiatives/phd_board/rights_responsibilities) The principles described in this document are to be realized in policies established by the various Schools of the University; the Schools will also develop mechanisms to monitor and enforce such policies.

Academic and Research Misconduct Policy

The Krieger School of Arts and Sciences and the Whiting School of Engineering full-time programs and Engineering for Professionals have established the Academic and Research Misconduct Policy to address instances of misconduct by all graduate students enrolled in full-time, part-time or non-degree (special student) Krieger School of Arts and Sciences and Whiting School of Engineering graduate programs.

Procedures for handling allegations of misconduct by full-time and part-time graduate students: WSE and KSAS Graduate Student Misconduct Policy (PDF)

WSE and KSAS Procedures for Dealing with Issues of Research Misconduct (Applies to all Whiting School graduate students, both full-time and part-time)

Assistant Leave Policy

To ensure the personal well-being and productivity of our graduate students, safeguard against excessive demands on graduate students’ personal time, and introduce a minimum standard across the two Homewood schools regarding leave, the Deans of the Krieger School of Arts and Sciences (KSAS) and Whiting School of Engineering (WSE) have established guidelines for Research and Teaching Assistants to be able to take leave. A detailed description of the policy can be found here:
http://homewoodgrad.jhu.edu/academics/policies/.

Grievance Policy

The Whiting School of Engineering (WSE) and the Krieger School of Arts and Sciences (KSAS) created a Grievance Policy. Any faculty member, postdoctoral fellow or graduate student of either school may grieve an adverse action or failure to act, or for a violation of University, School or departmental policy. Typically a complaint or dispute is brought to the attention of a department chair or center director and is resolved through informal discussion. In some circumstances, the Dean is asked to help in the informal resolution of grievances. The formal procedure set forth below is not meant to supplant attempts at resolving complaints through informal means. When at all possible, complaints and disputes should be settled through informal discussion, though there are no circumstances under which a grievance must be settled informally.

Please note that nothing in our policy should be construed to impinge upon the responsibilities of any office and/or regularly constituted body of the University, and should be applied only after every effort has been made to settle disputes informally. Moreover, no action may be taken with respect to a grievance that would conflict with or modify any policy approved by the Board of Trustees of the University, any policy of the University or WSE/KSAS, any federal, state, or local law or regulation, or any contract to which the University is a party.

The policy, along with proper procedure for filing a grievance is provided online here:

Jury and Witness Duty

A Krieger School or Whiting School graduate student employed by either school (i.e., a teaching assistant, research assistant paid by the university, research assistant paid by an external grant/fellowship or hourly worker) summoned for jury duty or subpoenaed to testify, is authorized to be absent from his/her work for the actual time required by such service. A graduate student employee must present the summons or subpoena to his/her immediate supervisor before a leave can be issued.

Graduate student employees are eligible for paid leave of absence as a juror or court witness. Federal work study funds, however, cannot be used in these instances -- departments should fund this work using other resources.

Jury duty or duty as a court witness is service and time spent away from a University position as a result of a subpoena issued by a court.
Service as a volunteer expert witness or other volunteer court duty is not included in the provisions in this leave of absence.

Homewood Schools Policy for Graduate Student Probation, Funding Withdrawal, and Dismissal

This policy addresses consequences of student underperformance, including funding withdrawal. Students who might lose financial support as a result of the termination of funding from an advisor’s sponsor should be given prompt notice, whenever possible.

The full policy can be viewed here. (http://homewoodgrad.jhu.edu/wp-content/uploads/sites/35/2014/08/Graduate-Student-Probation-Funding-Withdrawal-and-Dismissal-Policy.pdf)

Information Technology Policies

All users of Johns Hopkins University computing resources must comply with the University’s information technology policies. For the comprehensive policies go to http://it.jhu.edu/policies/itpolicies.html

G.W.C. Whiting School of Engineering - Specific Policies

See http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/

Zanvyl Krieger School of Arts and Sciences - Specific Policies

See http://krieger.jhu.edu/research/policies/

Academic Policies

Much of the material contained in this section gives details pertaining to School-wide (Krieger School of Arts and Sciences and/or Whiting School of Engineering) or University-wide policies. However, there are graduate student issues and policies that are department specific. In those instances, students are referred directly to their department administrator or department handbook for further information.

Student Enrollment Statuses

Graduate students in the full-time ASEN degree programs are initially enrolled as full-time and are given a Resident status. Other registration statuses include: Graduate Study Abroad, Nonresident, Leave of Absence, Part-time and Visiting. Prior to a student changing his or her registration status, approval from the student’s degree program and appropriate office(s) must first be secured.

Degree-Seeking Graduate Students, School of Arts and Sciences

Graduate students who are full-time students are charged full tuition. The office of the deans must approve any exceptions.

Degree-Seeking Graduate Students, School of Engineering

Most graduate students enrolled in research-oriented degree programs (M.S., M.S.E., Ph.D.) in Engineering are full-time students. However, part-time study consistent with residency requirements is common in many engineering departments. Students should consult with individual departments to determine the possibilities for part-time study.

Visiting (Not Degree-Seeking) and Part-time Graduate Students

In some cases, graduate students from other institutions may participate in a visitation or residency at the Homewood Campus. These students are designated as “Visiting.” Although not candidates for a Johns Hopkins advanced degree, visiting graduate students (those not candidates for a Johns Hopkins graduate degree) may be enrolled on a full- or part-time basis with the approval of the chair of the department and the dean of their respective school. Visiting graduate students will be limited to two consecutive terms of either full- or part-time study.

There are two subdivisions of nondegree (visiting) graduate students: 1. visiting graduate student (primarily taking courses) and 2. visiting graduate scholar (primarily pursuing research). Both categories must apply through their intended program of study and through the online application: http://grad.jhu.edu/apply/visiting-students/.

Part-Time Status

Part-time graduate students may be enrolled with the written approval of the chair of a department or director of a degree program and the documented confirmation of the dean. Students will generally not be eligible if they are working primarily on the Homewood campus or working full-time on research for their degree. Part-time graduate students must meet one of the residency requirements before they receive an advanced degree. Part-time has two major components: 1. a student cannot be part-time without prior approval from OIS (when appropriate) and their departments, and 2. a part-time student cannot take more than 2 classes in a semester, or they will be automatically put back to full-time status.

Part-time tuition charges by the course. Student accounts has the most current tuition information on its site. (http://pages.jh.edu/~studacct/general/tuition.htm)

Health Insurance: part-time students are eligible to purchase the student health plan, but generally at their own cost.

International students wishing to change status to part-time must first meet with OIS to determine eligibility. There are two separate steps to switch an international to part-time status: 1. the student must secure permission from OIS to apply for part-time status (this is a USCIS form, and not an university registration/enrollment form), and then 2. the student needs to make sure their department has contacted the registrar’s office on their behalf to make the official switch to part-time status. International students cannot switch to part-time without completing both steps. Something to note: international students cannot be part-time unless they are in their final semester of their degree program.

Postdoctoral Appointments

Postdoctoral fellows are at the university to undertake a research program in cooperation with a member of the faculty. All appointments are arranged through the individual departments. Proof of successful PhD completion will be required before any appointment may begin.
Residency Requirements

Every full-time WSE Master’s student must register as a full-time Resident graduate student for at least two semesters or satisfy an equivalent requirement approved by the appropriate department. (Combined bachelor’s-master’s degree students are exempt, as are those who enter a WSE master’s degree program after two or fewer semesters following completion of a JHU undergraduate degree.)

Every full-time KSAS Master’s student must register for a minimum of two consecutive semesters as a full-time, Resident graduate student.

Every full-time PhD Student (WSE and KSAS) must register for a minimum of two consecutive semesters as a full-time, Resident graduate student.

Graduate Study Abroad (KSAS)

The status of Graduate Study Abroad is usually limited to those students in the Humanities Center and the departments of Anthropology, and German & Romance Languages and Literatures, who are required as a part of their regular degree program to complete a semester or more of full-time study at a foreign university. While in the case of the History of Art Department study abroad is not a general requirement, many of its graduate students do go abroad to conduct dissertation research. The category of Graduate Study Abroad is considered a full-time status. The use of this category for situations other than those noted above requires the approval of your department chair of the Homewood Graduate Board. A student on Graduate Study Abroad is required to pay 10% of the full-time tuition rate for each semester abroad. The KSAS Dean’s Office will pay the remaining 90% tuition balance.

Students are encouraged to contact the Student Insurance Coordinator in the Registrar’s Office prior to leaving campus to find out details regarding your health insurance coverage while abroad. Graduate Study Abroad students should discuss all plans with their department/advisor in advance. Additionally, international students should always consult with OIS before making any travel plans or status changes.

The Graduate Study Abroad Application is available here.

Graduate Study Away (WSE)

The Graduate Study Away status applies to degree-seeking WSE master’s and doctoral students engaged in graduate education at a different institution (coursework and/or research) with departmental/advisor approval. This status is considered a subcategory of the nonresident status. As such, WSE study away/abroad students will be required to pay 10 percent of the full-time tuition rate for each semester away/abroad. As this is not a full-time resident status, health insurance benefits are not guaranteed. Graduate Study Away students should discuss this with their department/advisor in advance. Additionally, international students should always consult with OIS before making any travel plans or status changes. The Graduate Study Away/Abroad Application is available here.

Nonresident Status

Nonresident status is a full-time status typically reserved for students who have completed all required course work (and exams (internal and GBO), as per degree requirements) and are working on their thesis or dissertation. The University does not cover the cost of the University issued health insurance for Nonresident students. Though nonresident students are not required to carry health insurance, they are eligible to purchase the University-sponsored plan for themselves.

Eligibility

KSAS and WSE full-time program graduate students may be eligible for Nonresident Status if they:

- Have completed all coursework and requirements for the graduate degree other than the presentation and defense of the master’s essay or doctoral dissertation
- Have reached the end of their departmental support period or have exhausted support from grants and cannot be fully supported by the department.
- Work 19.9 hours per week or fewer during the academic year if employed by Johns Hopkins University in any capacity (intersession or summer employment can be full-time, however). If working, students must be on salary (not stipend) and paid hourly. NOTE: Research or teaching assistants expected to work more than 19.9 hours per week do not qualify for Nonresident status.

WSE full-time program PhD Students are only eligible to apply for one of the three WSE PhD Nonresident Statuses if they have no outstanding coursework or exams (internal and preliminary GBOs for example) to complete:

Note that nonresident is a full-time status intended for students who are primarily not on campus.

- (1) NR WSE PhD dissertation completion: Student is very nearly finished—just has some writing up to do and defend—but needs to leave campus to start work. Expectation is one semester, but two may be allowed. Student pays NR tuition, receives no stipend or health insurance support.
- (2) NR WSE PhD study away: Student (with or without advisor) has opportunity to be actively engaged in PhD work but at a non-JHU facility. Student remains fully supported by PI/department/host facility (NR tuition, stipend, health insurance provided for student).
- (3) NR WSE PhD internship/co-op: Student voluntarily takes time to pursue other pursuits that may be only tangentially relevant to their degree. The expectation is that they will return to campus in a residential capacity to complete their degree. Student pays NR tuition, receives no stipend or health insurance support. Time in this status is typically one year, but can be renewed for a second year.

Tuition

Students on Nonresident status are charged 10% of full-time tuition per semester.

Restrictions

Nonresident students are permitted access to campus, faculty advising and JHU services, however, they are not permitted to enroll in any courses, with one exception under certain and specific circumstances, international students who file for Curricular Practical Training F1 (CPT1) through the OIS may register for a course entitled “Research and Teaching Practicum” (KSAS) or “Engineering Research Practicum” (WSE).

The maximum amount of time that a student may retain Nonresident Status is four semesters for master’s students and ten semesters for KSAS doctoral students, and 1-2 semesters for WSE doctoral students (see WSE-specific nonresident statuses for PhDs above). Upon reaching this limit, the student will be required to register for either part-time
status (WSE only, as appropriate) or full-time Resident status until degree completion.

**Application Procedures**

Students are required to complete and sign an Application for Nonresident Status indicating that they meet the requirements as stated above. The form should be signed by the department, the OIS (if applicable), and either the WSE Vice Dean for Education (or WSE designee), or the KSAS Vice Dean for Graduate Education (or KSAS designee).

Students should apply for Nonresident status well in advance of the first semester for which it is desired. When requesting a change of status for the current term, such petitions should be submitted no later than the end of the second week of the semester.

**Leave of Absence**

A Leave of Absence (LOA) is an approved absence from the University during which time students are not charged tuition nor are they required to register. Time spent on an LOA is regarded as an approved break in study and is not counted toward the total time-to-degree. If a student fails to register without obtaining an approved LOA the student will be considered withdrawn from their degree program.

Students are encouraged to contact the Student Insurance Coordinator in the Registrar’s Office prior to applying for an LOA to find out details regarding health insurance coverage while on LOA.

International students must contact OIS before filing for LOA.

**Eligibility**

All KSAS and WSE full-time and part-time program graduate students are eligible for LOA if one of the following conditions prevents them from continuing with their graduate studies:

- A documented physical or mental medical condition.
- Compulsory military service.
- Personal or immediate family hardship.
- NOTE: Financial difficulty alone is not a valid reason for requesting an LOA.

**LOA Tuition and Financial Support**

Students on LOA are not charged tuition for the semesters they are granted the leave; the period of leave is simply regarded as an approved interruption of the degree program; however, the University cannot guarantee that financial support will be available when students resume their studies. After taking an LOA, students must re-apply for tuition assistance, research assistantships, fellowships and/or teaching assistantships. Such matters are left to the discretion of the department. Before applying for a LOA, students should consult their department for information regarding funding opportunities upon return from LOA.

**LOA Restrictions**

Graduate students may apply up to four semesters of LOA (not including the summer term) when medical conditions, compulsory military service, or personal or family hardship prevents them from continuing their graduate studies.

Continued approval is based on the reason(s) for the request. Additional information may be requested by the department, or either the WSE Vice Dean for Education (or WSE designee), or the KSAS Vice Dean for Graduate Education (or KSAS designee).

Students on LOA are not to use any University student services or facilities (e.g., computing labs, library, labs, athletic facilities, etc.) and may not be enrolled at another University.

Students on LOA who wish to continue working at Johns Hopkins are not eligible to be paid through the Student Payroll Office and must therefore be hired through the appropriate divisional Human Resources Department.

No progress toward degree completion or coursework can be made while on an LOA.

**Application Procedures**

To be awarded a LOA, students are required to complete and sign an LOA Application form and to provide a letter stating the reason for their application. The form must be signed by the student’s department, the OIS (if applicable), and either the WSE Vice Dean for Education (or WSE designee), or the KSAS Vice Dean for Graduate Education (or KSAS designee).

Students wishing to return from an LOA must complete an Application to Return from LOA form.

The departure of a student from one of the Homewood Schools without prior arrangement of Nonresident status or a Leave of Absence will be deemed a permanent withdrawal from the student’s program. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the University. If readmitted, they do not pay a second application fee, but must satisfy the residency requirement for the degree following readmission (even if previously satisfied) and pay all outstanding fees.

**Satisfactory Progress**

**Homewood Schools Graduate Student Academic Review Policy**

This policy applies to all full-time WSE and KSAS doctoral students and master’s students conducting thesis research. Each graduate program is required to publish its own policies and standards with respect to academic standing. At the end of each semester, all full-time Homewood graduate programs are expected to review the academic records of their graduate students to evaluate academic progress.

Once per academic year, all full-time Homewood graduate programs are required to provide a written review to: (a) all doctoral students, and (b) all master’s students conducting thesis research.

Departments are encouraged to include mention of funding continuation, as appropriate. This review must include the opportunity for the student to offer self-evaluation.

Students who fail to attain a program’s minimum level of performance may be placed on academic probation or dismissed using the procedures outlined in the Homewood Schools Policy for Graduate Student Probation, Dismissal, and Funding Withdrawal. In making these decisions, particularly that of dismissal, the program will take into consideration extenuating circumstances beyond the student’s control.
Probation/Dismissal/Withdrawal

Academic Probation
Whenever it is determined that a graduate student has failed to meet minimum academic requirements, that student may be placed on academic probation. This change in status requires a formal letter and a meeting between the student and his/her faculty advisor or the departmental director of graduate studies. The letter should clearly outline the student's academic shortcomings, indicate the corrective measures necessary to remain in the program and state the length of the student's probationary period. Any funding ramifications for the student should be included as well. The probationary period must span at least four months and would typically end at the completion of an academic semester.

Within one month following the conclusion of the stated probationary period, the program must inform the student of his/her status based upon whether the student has met the requirements as stated in the probation letter. The options are as follows:

1. remove the student from probation
2. extend the probationary period, or
3. dismiss the student.

Academic Dismissal

Dismissal After Probation
This must be done with a formal letter citing the reason for dismissal and requires a meeting between the student and his/her faculty advisor or the departmental director of graduate studies. Academic dismissal will be noted on the student's transcript at the request of the program and with the approval of the cognizant Dean. A student may appeal this decision.

Dismissal Without Probation
A student may be dismissed without a formal probation period under three circumstances:

1. if he/she meets the conditions for dismissal based on coursework as stated by the academic program in its department handbook or on its website;
2. if he/she fails an oral or written examination for which successful completion is necessary to continue in the program (as stated in the program's degree requirements), or if he/she fails to meet any condition resulting from a qualifying or GBO exam; or
3. if he/she is found to have committed academic or research misconduct and expulsion is the outcome of the deliberations as outlined in the Homewood Procedures for Handling Allegations of Misconduct by Full-Time and Part-Time Graduate Students, the KSAS Policy on Integrity in Research or the WSE Procedures for Dealing with Issues of Research Misconduct. Under these circumstances, programs are expected to follow the same procedures for Dismissal After Probation. In addition, students are also subject to immediate dismissal on non-academic grounds in accordance with the Homewood Procedures for Handling Allegations of Misconduct by Full-Time and Part-Time Graduate Students as well as applicable policies at the university policies page (https://www.jhu.edu/university-policies).

Academic Dismissal Consequences
When a student is dismissed from the University, several consequences follow:

- The Office of the Registrar cancels the student's registration for the next semester and authorizes a refund of tuition paid for that semester.
- Notation of dismissal may be placed on the student’s transcript at the request of the program and with the approval of the cognizant Dean.
- The Office of Student Financial Services suspends financial aid to the student and work-study aid.
- The Office of International Services performs duties as required by U.S. federal regulations regarding persons not eligible to study at the University.

Readmission Following Dismissal
The terms for readmitting a student who has been dismissed for academic reasons are established by individual departments. The readmission process should be described in the dismissal letter, if deemed appropriate. Students who have been dismissed should discuss the readmission process with their advisor. Procedural instructions for this policy can be found at http://homewoodgrad.jhu.edu/academics/policies/.

Withdrawal
Students wishing to withdraw from the University must file written notice with their Department. A Termination/Withdrawal Report (http://homewoodgrad.jhu.edu/academics/graduate-board/policies-and-forms) must be generated by the departmental academic staff. Graduate students are encouraged to consult the chair of their department prior to submitting their written notice. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the university. If readmitted, they do not pay a second application fee, but must satisfy the residency requirement for the degree following readmission (even if previously satisfied) and pay all outstanding fees. Once a student withdraws from the University, their student transcript is closed – changes to their academic record will not be permitted. International students must consult with OIS to ascertain their visa obligations before withdrawing from the university.

Registration
All students must complete registration at the beginning of each term in accordance with instruction issued by the registrar before they can attend classes or use university facilities. Detailed instructions about registration will be provided to all students before the registration period each term. If the student has not been notified at least two weeks before the start of classes for any fall or spring term, the Registrar’s Office should be contacted immediately.

Students who for any reason do not complete their registration until after the prescribed registration period are required to pay a late registration service fee. The fee is $150 for registrations completed from the first day of classes through the end of the first week of classes, $200 for registration completed during the second week of classes, and $300 for registration completed after the second week. Graduate students must obtain permission from the chair of their department to register after the second week of classes.

Students will not be allowed to register if there are unpaid bills from a previous term. The student is required to pay tuition or make financial arrangements with the Student Accounts Office before registering for a given term.
Grades

Grading basis for graduate courses deliberately includes both letter grades and P/F grades. Instructors should have the widest discretion possible in grading graduate students’ work; therefore both grading bases are available in ISIS to the instructor for any course at the graduate level. While policies in most departments vary, most graduate students receive letter grades or Pass/Fail grades for their coursework. Students should consult their department chairs and instructors to determine their grading requirements.

Registrar deadlines and policies concerning grade changes are as follows:

Letter Grades (A through F)
Changing letter grades of “A” through “F” to a “Passing” grade is not permissible at any time.

All other grade change requests (e.g., “B” to “A”) are acceptable within one year only. Change requests beyond one year can only be changed as a result of clerical error, and must be accompanied by a written explanation/justification from the course instructor.

Incomplete Grades (I)
The grade of “Incomplete” (denoted by an “I” on the transcript) is reserved for instances in which it is expected that a course’s work will be completed in one semester, but for reasons beyond the student’s control, the work cannot be completed within that timeframe.

Dropping an “Incomplete” grade from the transcript is not permissible at any time.

Changing an “Incomplete” grade to a final grade (“A” through “F”, “Pass”) may be done by the instructor within one year without Dean’s Office approval. After one year, the student must submit an Incomplete Grade Extension Request form to the cognizant KSAS or WSE Vice Dean’s office for that grade to be eligible to be changed at a later date. The form must be submitted no later than the last day of the second semester following the semester the student initially enrolled in the course.

If the “Incomplete” grade remains after one year and the student does not submit an Incomplete Grade Extension Request form, the “Incomplete” grade becomes permanent and cannot be changed.

If the student successfully submits an Incomplete Grade Extension Request form but then fails to finish the course before the stated deadline, the “Incomplete” grade becomes permanent and cannot be changed. Under special circumstances, students may submit multiple Incomplete Grade Extension Request forms for the same course.

In-Progress Grades (IP)
Reserved for classes in which it is expected that the assigned work will require more that one semester to be completed, but the class itself will meet for only one semester, such as graduate seminar courses.

Dropping an “In-Progress” grade is permissible only with the approval of the instructor and the Dean’s Office.

Changing an “In-Progress” grade to a final grade (“A” through “F”, “Pass”) is acceptable at any time before the student’s departure with the instructor’s approval.

Missing Grades (MR, X)
A “Missing” grade (denoted by an “MR” or an “X” on the transcript) appears if the instructor has not submitted a grade within the defined grading period for the semester.

An instructor may submit a Grade Change form directly to the Office of the Registrar to change a “Missing” grade to a final grade.

Dropping a “Missing” grade from the transcript is not permissible, nor is changing it to an “Audit.”

Audit (AU)
When a graduate student enrolls in a course with “audit” status, he/she must reach an understanding with the instructor as to what is required to earn the “Audit.” If the student does not meet those expectations (e.g., fails to attend class), the instructor must notify the Registrar’s Office in order for the student to be retroactively dropped from the course. The course will not appear on the student’s transcript.

Changing a course registration from “Audit” (student receives no letter grade) to “Credit” (student receives letter grade), or from “Credit” to “Audit” is permissible during the Office of the Registrar’s official deadlines for each semester. Registration changes beyond this deadline are not permissible.

Changing a final grade (“A” through “F”, “Pass”), “Incomplete” grade, “In-Progress” grade or “Missing” grade to “Audit” is not permissible at any time.

The following ASEN Graduate Courses cannot be taken for AU (Audit):
- Graduate Research
- Dissertation Research
- Master’s Thesis
- Master’s Essay
- Independent Study

These courses can only be taken as P/F or a letter grade, at the instructor’s purview.

Add/Drop
Prior to the beginning of classes: Returning graduate students may make changes to their registration in-person or online through the ISIS system. The ISIS system is available for use up to ten weeks prior to the first day of classes.

First six weeks of classes: Graduate students may add or drop classes online (as long as the electronic Advisor Hold has been released) or in-person at the Office of the Registrar. All in-person adds and drops must have a signature from the faculty advisor or department chair. Any drops within the first six weeks of classes will not be noted on the transcript.

Note: the instructor’s signature must be included on any course add form submitted past the 6 week drop/add deadline. Detailed instructions for how to add or drop classes online are available on the Registrar’s website. A calendar with specific dates for adding/dropping courses is also available on their website.

After the 6th week of classes, graduate students have until the end of the 11th week of classes to withdraw from a course with the signatures
of the instructor, department chair, and the student’s respective Dean’s Office personnel (either the Director of Graduate Academic Affairs for Whiting School of Engineering or Krieger School of Arts and Sciences). All withdrawals will be noted with a “W” on the student’s transcript.

Registration Holds
A registration hold will be placed for students who have not obtained clearance from the Office of International Services (OIS), Student Accounts, Student Health Insurance or Student Health and Wellness Offices. Students should meet with the office that placed the hold so that the hold can be removed. Students who have an advisor’s hold on their registration must get their advisor’s signature on their registration form and then submit that form to the Registrar’s Office in person in order for the hold to be lifted.

Transferring Courses
Whiting School of Engineering Master’s degrees (M.A., M.S., M.S.E)
For WSE master’s students who earned an undergraduate degree outside of the Whiting School of Engineering or the Krieger School of Arts and Sciences, no coursework completed before the undergraduate degree was conferred can be applied to a WSE master’s degree, regardless of whether that course was applied to the undergraduate degree.

WSE master’s students may transfer in up to two courses from another institution which were completed after the undergraduate degree was conferred and not applied to a degree elsewhere. The student must obtain approval from the WSE master’s program to do so.

EXCEPTION: WSE master’s students in a department-approved study abroad program can transfer in additional coursework (i.e., beyond two courses), but in total, at least half of the courses/credits applied to the WSE master’s degree must be taken/earned at Johns Hopkins. Individual graduate programs reserve the right to enforce stricter policies.

Research and Scientific Writing Courses
Through the Center for Leadership Education graduate students may enroll in writing courses designed to assist with dissertation and grant writing. Students may enroll for this course at no additional charge. The course is offered in the fall and spring semesters however, space is limited. For additional information go to web.jhu.edu/Leadership.

Transcripts
Transcripts may be requested from the Registrar’s Office. A request for one copy is normally processed within two to three working days of receipt of the request. Requests for multiple transcripts require additional time. Standard delivery of transcripts is made by U.S. Mail first-class. Transcripts may also be requested online at iwantmytranscript.com. Partial transcripts of a student’s record will not be issued.

Summer and Intersession Courses
Summer Courses: While most summer courses offered at the Homewood Campus are undergraduate level courses, graduate students may enroll in these courses with permission from their department chair and the course instructor. No financial assistance is available for graduate students who wish to take summer courses. In special cases, graduate students may also take courses at the Peabody Conservatory.

In such cases, students should contact the Registrar’s Office for registration instructions.

Graduate students may register for the course Summer Independent Research (990.892) with the approval of their department chair. There is no charge for this course as independent research projects conducted during the summer are not graded and carry no academic weight. An NG (“no grade given”) will appear on the student’s transcript.

Intersession Courses: Graduate students are also eligible to enroll in Intersession. Grades are generally given on an P/F scale. Some students use this period to participate in research, independent study or internships. A list of Intersession offerings is published in late November or early December. A special form, available in the Registrar’s Office, is used for Intersession registration. Students should register before winter break. Students who register for research, independent study, or an internship during Intersession must have the approval signature of their faculty sponsor and academic advising office. This opportunity is offered tuition-free.

Course Re-Take Policy
At the discretion of the Homewood graduate program, a graduate student may retake a course, but the grade from the initial effort will remain on the transcript. This applies whether the initial effort occurred while the student was an undergraduate student or a graduate student.

Transcripts are normally issued only at the request of the student or with his/her consent. The only exception to this policy is the issuance of transcripts to offices and departments within the university.

Official transcripts of work at other institutions that the student has presented for admission or evaluation of credit become the property of the university and cannot be copied or reissued. If a transcript of this work is needed, the student must get it directly from the issuing institution.

Graduate Degree General Requirements
Doctor of Philosophy
• A minimum of two consecutive semesters as a full-time, resident graduate student.
• Completion of registration in the semester during which degree requirements are met.
• Certification by a department or program committee that all school, departmental, program, and/or committee requirements have been fulfilled.
• A dissertation approved by at least two referees appointed by the department or program committee and submitted to the Commercial Binding Office.
• Successful completion of a Graduate Board Oral examination. As determined by the department or program committee, this is classified as either a preliminary or a final examination.
• Though time-to-degree is determined by the department and may not exceed 12 years, continuation in the program will be based/contingent upon satisfactory academic progress after eight years of enrollment.
Krieger School of Arts and Sciences Master’s Degrees (M.A., M.F.A., M.S.)

- A minimum of two consecutive semesters as a full-time, resident graduate student.
- Completion of registration in the semester during which requirements are met.
- Certification by a department or program committee that all requirements have been fulfilled.
- A thesis approved by at least one referee and submitted to the Commercial Binding Office when the department requires a thesis.
- Meets the requirements of the school’s time-to-degree policy. (http://homewoodgrad.jhu.edu/academics/graduate-board/degree-requirements)

Whiting School of Engineering Master’s Degrees (M.A., M.S., M.S.E., M.S.E.M.)

- Every student must register as a full-time graduate student for at least two semesters or satisfy an equivalent requirement approved by the appropriate department. (Combined bachelor’s-master’s degree students are exempt, as are those who enter a WSE master’s degree program after two or fewer semesters following completion of a JHU undergraduate degree.)
- Every student must be registered in the semester during which degree requirements are met; this includes students who have no courses remaining in which to enroll but must resolve coursework for which an “Incomplete” grade was assigned.
- Every student must provide certification by a department or program committee that all departmental or committee requirements have been fulfilled.
- If the student is submitting a formal essay to the MSE Library to help complete master’s degree requirements, the essay must be approved by at least one reader. (See the Homewood Academic Council Faculty Status table, under “Thesis Supervision of Graduate Students,” to determine who may serve as the reader/advisor. Additional readers, if required by program, need only program approval.)
- All courses applied to the master’s degree must be at the 300-level or higher. At their discretion, individual graduate programs may institute a higher course level as the minimum for their own students.
- Every student must earn the master’s degree within five consecutive academic years (10 semesters). Only semesters during which a student has a university-approved leave of absence are exempt from the 10-semester limit; otherwise, all semesters from the beginning of the student’s graduate studies—whether the student is resident or not—count toward the 10-semester limit.
- Every student must complete training on academic ethics.
- Every student must complete training on the responsible and ethical conduct of research, if applicable. (Please see the WSE Policy on the Responsible Conduct of Research.)

Time to Degree (TTD)

The time-to-degree (TTD) limit for degree candidates is typically determined by a specific program. However, Johns Hopkins University’s general policy requires that TTD not exceed twelve years for Ph.D. candidates, and five years for Whiting School and Krieger School terminal master’s candidates. TTD count begins with the first semester of registration as a matriculated student. Time spent on an approved Leave of Absence will not be counted toward the graduate student’s TTD. Students unable to complete degree requirements within the required time limit are required to withdraw from the University. Full TTD policies for the Krieger and Whiting Schools can be found at grad.jhu.edu/student-life/policies.

Co-tutelle de Thèse

It is the University’s current policy that Johns Hopkins will recognize dissertation research and subsequent dissertation submission for the purposes of a degree from Johns Hopkins alone. It will sign no agreement that supports the concept of a student submitting the same work to different universities to receive two distinct degrees.

The University, however, wants to promote international exchange and in this spirit the Graduate Board has agreed to accommodate students with a desire to include faculty from a foreign university to participate in their research and defense process. Upon submission and review of a current curriculum vitae, the Graduate Board will allow one advisor to be a faculty member of the foreign university and in certain cases will allow the committee to be expanded to include other faculty from the foreign university as long as the majority represent Johns Hopkins. The university will provide no funds to cover expenses. Funding for travel would be up to the department or the foreign university.

All proposed co-tutelle agreements are to be submitted to the Graduate Board for review.

Commencement and Degree Conferral

The University Commencement Ceremony is held once per academic year, traditionally in May. Students who have not satisfied all graduation requirements by the deadlines determined by the Graduate Board or the WSE Office of Academic Affairs are not eligible to participate in the graduation ceremony. Students who complete the degree requirements prior to the ceremony in May can request an official statement of completion from the Office of the Registrar or the Homewood Graduate Board Office.

There are three official conferral dates for the University (December, May, August), but only one formal commencement ceremony each year.

Visit the registrar’s graduation website for deadlines and official conferral dates.

The conferral date is printed on diplomas.

Application for Graduation

All graduate students must complete an Application to Graduate in order to generate degree conferral and receive a diploma. The application is distributed by the Office of the Registrar. Students should consult with their Graduate Coordinator, the Homewood Graduate Board’s website and the WSE Office of Academic Affairs’ website respectively to find out about the current deadlines. The dates of these deadlines change each academic year.

In addition to submitting the general application to graduate, engineering students preparing to graduate from a master’s or doctoral program must complete paperwork indicating the courses they intend to apply to their degree. This paperwork is distributed by each department’s Graduate Coordinator and once completed should be returned to them.
Degree Completion Deadlines and Information

The Graduate Board and the WSE Office of Academic Affairs (for WSE master’s students) issues deadlines for submission of theses and essays in the spring semester for the following academic year. These deadlines must be met for a student to be listed as a degree candidate. Students can access the calendar of deadlines on the Homewood Graduate Board’s website (http://homewoodgrad.jhu.edu/academics/graduate-board/deadlines) (for PhDs), the website of the WSE Office of Academic Affairs (http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate) (for WSE Masters), or by contacting the department administrator.

- Students who complete their master’s essay or doctoral dissertation after the end of a semester but before the first day of class of the next semester do not have to register for that next semester. (They will have to file for graduation in that semester, however, and will not be eligible for student payroll once they are not a registered student).
- Graduate students completing a final degree during the first eight weeks of the fall semester or the first four weeks of the spring semester will generate a tuition reimbursement for that semester to whatever entity covered the cost: the student, the department, the advisor, etc. This applies only to students for whom completion of a master’s project, master’s essay, master’s journal submission or doctoral thesis is the sole remaining degree requirement at the start of the final semester.
- If a student completes a Tuition Deferral Form indicating an expectation to complete the degree within a specific grace period, no payment is required to register for that semester. If the grace period deadline is not met, however, that semester’s tuition charge will be added to the student’s account.
- Note that students who complete in the Grace Period for either the fall or spring semesters (or finish in the summer term), and are registered in the semester/term in which they completed are eligible to stay on student payroll until the degree conferment date.

Grades towards Degree Completion

Grades for courses that are required for graduation must be turned in by the grade submission deadline. Graduating students who are taking courses at cooperative schools or other divisions of the University must make arrangements with their instructors on the first day of class to have final grades submitted to the host school’s Registrar and then to the Homewood Registrar by the Homewood grade-submission deadline. If such an arrangement cannot be made, students should withdraw from the course.

Graduation Closes the Graduate Record

Upon graduation, the graduate’s record is closed. No changes thereafter can be made to the graduate’s transcript.

Completing Graduation Requirements

Departmental graduation requirements vary; therefore, students are encouraged to speak with their departmental administrator to learn details of their requirements.

Graduate Board

The Homewood Graduate Board is responsible for the administration of policies and procedures for the award Doctor of Philosophy, Ph.D. of the Schools of Arts and Sciences and Engineering, and for Masters degrees in the School of Arts and Sciences.

The Graduate Board oversees:

- Graduate Board Oral Exams for ASEN Ph.D. students: with the approval of the department chair, a Graduate Board oral examination may be scheduled at any time during the academic year. Requests for a Graduate Board oral examination must be submitted to the Graduate Board a minimum of three weeks before the examination is to take place.
- Dissertation/Thesis Instructions: The student is responsible for obtaining and observing the detailed instructions concerning submission of their dissertation/thesis from their departmental office, the Homewood Graduate Board Office (grad.jhu.edu/academics/gradboard/policies/candidacy/).
- Initial Ph.D. Degree confirmation
- Dissertation submissions
- Recommendations for conferral to the Doctor of Philosophy Board
- Dissertation and Degree Completion Deadlines for the Graduate Board can be found here.

Doctor of Philosophy Board

The Doctor of Philosophy Board advises the Provost about University-wide issues pertaining to the Ph.D. It approves new degree programs and sets guidelines and policies that affect all Ph.D. students. The Board respects the strong tradition of local autonomy of the Schools and seeks to enhance the visibility and prominence of Ph.D. education across the University.

WSE Master’s Degree Completion

All Whiting School of Engineering master’s students must complete the following steps for the degree to be conferred and to generate a diploma:

- An Application to Graduate must be submitted to the Office of the Registrar (Garland Hall) either online or on paper, depending upon status;
- Department-specific certification forms must be submitted to and approved by the department graduate coordinator, and then those forms must then be submitted to the WSE Office of Academic Affairs by the deadlines listed below;
- If a formal master’s essay is used to complete degree requirements, the student must submit a properly-formatted essay to the MSE Library Electronic Theses and Dissertations system by 4:00 p.m. on the date listed on the WSE website; the emailed submission receipt (generated by the library) must be included in paperwork forward to the WSE Office of Academic Affairs.

Visit: http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/ for deadlines and additional policies.

Dissertation and Thesis/Essay Submission

ETD (Electronic Theses and Dissertations)

An electronic thesis or dissertation (ETD) is digital version of a dissertation that is available to the public via the Internet. Universities and colleges in the United States and abroad have been moving toward
this type of publication for the past decade. In the fall 2013, Johns Hopkins launched its own ETD portal and process.

All thesis and dissertation submissions must be through the ETD process and portal. See the ETD page for more information, deadlines, and instructions.

The student is responsible for obtaining and observing the detailed instructions concerning submission of their dissertation/thesis from their departmental office, the Homewood Graduate Board Office (grad.jhu.edu/academics/gradboard/policies/candidacy/) and ETD guidelines http://guides.library.jhu.edu/etd of the Johns Hopkins Libraries and Museums. Students may also contact the ETD coordinator at dissertations@jhu.edu.

After submitting their dissertation to the ETD Submittal Tool http://etd.library.jhu.edu, the library will check the dissertation for proper formatting and either approve it or contact the student to make required changes. After the ETD is approved the student will receive an approval confirmation from the system. Students are required to forward this approval email to their departmental academic staff and cc either the Director of Graduate Academic Affairs in WSE (Christine Kavanagh) or KSAS (Renee Seitz (Eastwood)) as appropriate, with the following items:

- The title of their dissertation typed in the body of the email in title case format with correct spelling and punctuation.
- The degree type and program/department
- A single PDF of the dissertation title page and abstract

The degree requirements are not complete unless the final ETD is submitted to the library by the published deadline and the above information and attachments are provided by the student to the Graduate Board Office via the email to the department and the cognizant Director of Graduate Academic Affairs.

Student Life

Johns Hopkins is an active and supportive community, filled with students of different viewpoints, different cultures, and different backgrounds. The thing that brings them all together is their desire to be here and to celebrate everything Johns Hopkins has to offer. The following section details campus resources specifically relevant to the graduate student experience.

J-Card

The J-Card is the multi-use identification card used for Johns Hopkins students, faculty and staff. It is issued to students after registering for the first time. The Office of ID Card Services is located on the lower level of Garland Hall.

The card features typical identification information such as the person’s name, photograph, classification (student, faculty or staff) and a randomly generated ID number.

The J-Card acts as the individual’s library card for the Sheridan Library network. It allows the student to enter the MSE Library beyond Q-Level, to reserve and borrow books and to pay for photocopies or document printing on library printers.

Students must show their J-Card in order to gain access to any campus computer lab. Additionally, student employees need to present their J-Card to pick up their paychecks from the Student Payroll Office.

The J-Card is also used for identification if a student has purchased a campus dining plan. J-Cash can be used at a number of restaurants and vending machines, on and off-campus. Money can be added to any J-Card account by mail or in person at the Student Accounts Office, located at 31 Garland Hall. For a full list of locations where J-Cash can be used, visit their website: jcardonline.com.

Lost or stolen J-Cards should be reported to the Office of ID Card Services by calling (410) 516-5121 (weekdays 8:30 A.M. to 5 P.M.) or the Office of Security by calling (410) 516-4600 (all other times). The account will be temporarily suspended and a new J-Card will need to be issued for a nominal fee.

Bookstore

The University’s bookstore is located at the Barnes & Noble in Charles Commons on Saint Paul Street. Graduate students can purchase textbooks and supplies at this location. Please visit their store website for hours of operation and other pertinent information.

Computer Access

Computers available to all faculty, staff, and students are located in several public computer labs and kiosks across the Homewood Campus. Labs in Krieger Hall and the Milton S. Eisenhower Library feature extensive software allowing users to print, access email and the Internet and perform other general tasks as well as more advanced computing required for coursework and research. Computer kiosk locations in Krieger, the Mattin Center, Hodson Hall, Levering Hall and throughout the MSE library are more limited.

The largest of all the Homewood labs is the Krieger Academic Computing Lab, located in 160 Krieger Hall. To gain access to the lab, students must swipe their J-Card at the locked gate. A lab consultant can be contacted during working hours by calling (410) 516-4242 or emailing consult@jhu.edu.

Security, Shuttles and Transportation

Security

The Johns Hopkins University Campus Safety and Security Office is dedicated to establishing and maintaining a safe and secure environment in which to work and visit. The Homewood Communication Center operates 24-hours a day seven days a week at the Homewood Campus. In keeping with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, the Campus Safety and Security Office publishes crime reports and security bulletins. These may be found on their Campus Safety and Security Website.

Campus Security and local emergency services including Baltimore City Police, Fire or Ambulance can be summoned through Homewood’s Communication Center from any campus phone by dialing 6-7777. The universal 911 number may also be used to reach Homewood’s Communication Center from any on-campus phone. From off-campus, dial (410) 516-4600 to reach security. Crime and safety concerns may be reported to Campus Safety and Security by calling on-campus emergency numbers, (410) 516-7777 or 911. Additional services include the following:
An FWS award is valid for one academic year. Students must reapply each year to continue to receive the FWS award. Financial Services determines eligibility based on federal regulations. An FWS award is valid for one academic year. Students must reapply each year. The maximum FWS award is $2,000. Awards may be less, depending on the type and amount of other financial assistance a given student receives. FWS employees are limited to 20 hours of work per week.

A student job fair, hosted by Student Employment, is held annually in September. Students have the opportunity to meet and interview with a variety of on- and off-campus employers at the fair. All tax forms and any other required paperwork must be filed with the Student Employment office before students are eligible to receive their first paycheck from the University. Volunteer opportunities and community-service information can also be found at this office.

Federal Work Study: Graduate students who meet certain financial-aid requirements have the option of applying for Federal Work Study (FWS) positions. FWS is a federally funded program that allocates funds to the University to pay a portion of the student’s salary. Approximately one-third of Hopkins students receive FWS funding. Eligibility for FWS positions is based on both the Free Application for Federal Student Aid (FAFSA) and the JHU Application for Financial Aid. The Office of Student Financial Services determines eligibility based on federal regulations. An FWS award is valid for one academic year. Students must reapply each year. The maximum FWS award is $2,000. Awards may be less, depending on the type and amount of other financial assistance a given student receives. FWS employees are limited to 20 hours of work per week.

Jobs posted on the Student Employment Services website indicate whether the position is FWS or non-FWS. Job fairs and student-employment orientations also offer opportunities for students seeking FWS employment. Positions are available both on and off-campus and encompass a wide variety of skills and interests, including lab work, web design, research, and many more. Students in FWS positions are not prevented from working other paying jobs.

For more information about Student Employment or to view current job postings and policies, please visit their website.

Travel Resources
As graduate students prepare to go overseas for research or to attend a conference it is helpful to consider administrative, health, and safety issues before leaving the country. Graduate students are also urged to complete the Johns Hopkins Travel Registry. Though this service is optional, travel registration can facilitate faster support in the event of an overseas emergency.

For more information and resources, visit http://homewoodgrad.jhu.edu/student-services/travel-resources/.

Career Center
The Career Center has services ranging from resume and curriculum vitae development to on-campus recruiting. As graduate students begin thinking about professional opportunities to pursue with their degree, the Career Center can help explore how skills, values, interests, and personality fit into this decision-making process.

Disabilities
Johns Hopkins University does not discriminate on the basis of gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, veteran status or other legally protected characteristic in any student program, activity administered by the University, admission or employment.

A person with a disability is defined by the Rehabilitation Act of 1973 and by the Americans with Disabilities Act of 1990 as an individual who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.

Student Disability Services Office (SDS)
Assists the University in compliance with the provisions of the Americans with Disabilities Act of 1990 (ADA), ADA Amendments Act (2008) and Section 504 of the Rehabilitation Act of 1973 for full-time undergraduate and graduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering.

Johns Hopkins University
Student Disability Services
3400 North Charles Street
385 Garland Hall
Baltimore, MD 21218
Phone: (410) 516-4720
studentdisabilityservices@jhu.edu
http://web.jhu.edu/disabilities

Tax Information
Student earnings are NOT automatically exempt from tax withholding, including Federal Work-Study earnings. All students are encouraged to complete/submit Tax Withholding Exemption Forms. For more information, please visit: https://orchid.hosts.jhmi.edu/stujob/tax.cfm. The JHU Tax Office is available for general questions and to point students to tax resources.
Please note that the Tax Office is unable to advise specifically on or prepare tax returns for JHU affiliates.

Parking on Campus

Parking is available for graduate students on campus at the San Martin and Decker Garages at monthly rates. Graduate students receiving a paycheck from the University are eligible for payroll deduction to pay for parking. Hang tags for free evening and weekend parking along academic buildings are also available. Hang tags can be purchased for a nominal fee which are valid for a maximum of 3 years. Go to the Parking Office, with your J-Card, to pick up your hang tag.

In addition to these spaces, there are a number of metered and timed parking zones around campus. Check the ordinances governing these roadside spaces. Many have two-hour time limits.

Orientation and Welcome Events for New Graduate Students

There are many resources available to assist new students in their acclimation to the Johns Hopkins Community. Orientation and Welcome Events information can be found at http://grad.jhu.edu/student-life/orientation/, and resources on getting settled in Baltimore as a new graduate student can be found here: http://grad.jhu.edu/student-life/orientation/

Recreation Center

Membership to the O’Connor Recreation Center is open to all faculty, staff, and students of the university. This includes Johns Hopkins University-Homewood, Peabody, School of Medicine, School of Public Health, School of Nursing, School of Education, Carey Business School, Bayview Medical Center, Johns Hopkins Hospital, School of Advanced International Study (SAIS), Johns Hopkins Medical Institutions, and the Applied Physics Lab (APL).

Gym

- Fitness and weight rooms
- Climbing wall
- Fields
- Tennis courts
- Pool (indoor)
- Experiential education
- Fitness classes (yoga, yogalates, pilates, step aerobics, cardio kickboxing, muscle classes and dance-based classes)
- Website: http://web.jhu.edu/recreation/ or (410) 516-5229

Campus Ministries

Johns Hopkins University Campus Ministries promotes and supports spiritual development, theological reflections, religious tolerance and social awareness among students, faculty and staff within the university community. At its heart, Campus Ministries is a prophetic and pastoral presence which seeks to enhance the spiritual and ethical educational experience of the whole person mind, body and soul.

Website: www.jhu.edu/~chaplain or (410) 261-1880

Community Engagement

The Center for Social Concern emphasizes the value of service with others. Volunteers and community members enter into an educational process where both benefit from the interaction, and reciprocal learning is the common ground for all of our initiatives. Our programs and efforts are striving to create a strong community in and around the Johns Hopkins campus: http://www.jhu.edu/csc/

Housing

Johns Hopkins University does not offer graduate student housing. Prior to or upon arrival, graduate students should secure their own independent housing.

The Baltimore City neighborhood immediately surrounding the Homewood campus is called Charles Village. In addition, there are lots of other proximal areas in which students may consider living including Hampden, Waverly, Roland Park, Guilford, Remington, Mt. Vernon and others.

Incoming graduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering who need housing accommodations while looking for a place to live can contact the Off-Campus Housing Office for information on temporary housing: http://www.jhu.edu/hds/

Dining Services

An assortment of entrees, snacks, coffee beverages and other fare is available at a variety of on-campus locations that are open during all three meals and snack-times. Homewood’s dining services can accommodate students with dietary restrictions whether that would be kosher, vegetarian, vegan or some other requirement. All locations accept J-Cards and cash, and some take credit cards.

Off-Campus Dining: There are many restaurants surrounding the campus and in adjacent neighborhoods. For the “insider’s guide” to these venues, please contact the Graduate Representative Organization (GRO), which publishes information and student reviews on these and other Baltimore eateries.

Meal Plans: Graduate students may opt to enroll in a meal plan. Meal plans on the Homewood campus are based on a block meal system, designed for both convenience and flexibility. Each block counts as one meal. Blocks expire at the end of each semester. Added to blocks, points allow students to purchase food at the Levering Food Court, and Blue Jay Café. Points have a dollar-for-dollar value and roll over from the fall to the spring, expiring at the end of the spring semester.

Additional information on specific plans, kosher or other dining options is available through the Office of Housing and Dining Services: http://www.jhu.edu/hds/

Weather Emergencies

When there is an alteration or curtailment of the operating schedule of the University or a designated unit, an official announcement will be made on the University Emergency Telephone Hotline. As conditions may vary in the geographic areas where Johns Hopkins has campuses, there may be times when the Required Attendance Policy is invoked for some campuses and not others. In addition, conditions may be different on campus than they are in the area where a student lives. In times of bad weather, students should call the University Emergency Telephone Hotline to check on the status of the campus where they work.
Each year the University publishes a list of radio and television stations that will be requested to announce operation changes. Because there can be mistakes in the message broadcasted, students can verify the message by calling the University Emergency Telephone Hotline. Students may also check the JHU emergency resources website.

Graduate Student Organizations and Advocacy

There are a variety of graduate student organizations on campus, ranging from cultural, athletic, academic and social. For a sample of what is available to graduate students, please visit the following link (http://homewoodgrad.jhu.edu/life-at-hopkins/graduate-student-organizations) For additional academic, cultural, athletic and social groups/organizations/clubs, please visit the following link (http://webapps.jhu.edu/jhuniverse/campus_life/student_activities_organizations). Every group/organization/club is different, and some may only be open to undergraduate students or to students from a certain campus. Other may not be bound by similar parameters. Graduate students are encouraged to contact any group/organization/club in which they are interested directly for more information. There are also several offices and student groups on the Homewood Campus that advocate for graduate students on issues both academic and pertaining to student life.

Graduate Representative Organization

The Johns Hopkins University Graduate Representative Organization (GRO) works with specific divisions to represent graduate student interests (health insurance subsidies, compensation) to various levels of the JHU administration. The GRO organizes graduate student orientation, social events, sports activities, funds campus groups, and much, much more. Indeed, the GRO is proud to have earned the National Association of Graduate-Professional Students’ (NAGPS) 2000 – 2001 Outstanding Graduate Student Association award, its highest honor.

The GRO is made up of graduate student representatives from every department at Homewood. This group of representatives, the GRO General Council, elects an Executive Board for an annual term. Together, the Council and Executive Board are responsible for programming, advocating, and facilitating communication for graduate students on the Homewood Campus. The GRO also holds occasional programs with the student government on the Medical Campus.

http://www.jhu.edu/gro/

Guide to Living in Baltimore

Baltimore, the largest city in Maryland, is the center of a metropolitan area of 1.5 million people. Baltimore is a vital city long known for its ethnic neighborhoods where each wave of immigration to the United States has added to its character. People of many different backgrounds give the city a melting pot vitality that is reflected in the wide variety of restaurants, shops, and festivals.

The Office of Institutional Equality

Disability Services and Compliance

The Director of ADA Compliance and Disability Services in the Office of Institutional Equity serves as the central point of contact for information on physical and programmatic access, specific accommodations, resolution of complaints and problems, faculty and staff concerns, and identification of available services. In addition, the office can provide training, consultation, and information regarding disability issues.

Contact: Abby Hurson, Director or (410) 516-8075

Graduate students in the Krieger and Whiting Schools can also visit the Disabilities page: http://web.jhu.edu/disabilities.

Discrimination/Compliance

• Sexual Harassment
• Training
• Meditation

The Office of Equity Compliance and Education is responsible for the investigation and resolution of discrimination complaints received from faculty, staff, and students at Johns Hopkins University. OIE also provides mediation services for University related issues, as well as, education/training on sexual harassment.

Website: http://web.jhu.edu/administration/jhuoie/ or (410) 516-8075

Also: http://homewoodgrad.jhu.edu/student-services/sexual-assault-and-awareness/

Health and Wellness

Health Insurance (CHP- Cigna)

It is University policy that all full-time students in the Schools of Arts and Sciences and Engineering maintain adequate health insurance
coverage to provide protection against unexpected accidents and illnesses. As a full-time student, you must either purchase the University plan or sign a waiver indicating you have health insurance coverage comparable to the University plan (International Students are required to purchase the University plan). Details about the student health plan offered by the University can be found on the registrar’s website. (http://web.jhu.edu/registrar/students/health)

**Health and Wellness Center**

The Johns Hopkins University Student Health and Wellness Center exists to affirm the clear role of health and wellness in advancing academics. Its primary mission is to maintain and contribute to a healthy and safe learning environment for the student community in the Schools of Arts and Sciences and Engineering.

Website: http://studenthealth.johnshopkins.edu/ or (410) 516-8270

**Counseling Center**

The Johns Hopkins University Counseling Center serves full-time undergraduate and graduate students from the schools of Arts and Sciences, Engineering, Nursing, and the Peabody Institute. All of these students are encouraged to utilize the services offered by the Counseling Center. All services are confidential and free of charge.

The Counseling Center offers the following services:

- Counseling
- Groups
- Consultation
- Referral
- Career Decision- Making

Website: http://www.jhu.edu/~ccenter/ or (410) 516-8278

**International Graduate Students**

The Office of International Services (OIS) assists Hopkins’ international community with visa status and with the challenges of making a transition from one setting to another.

The OIS staff are prepared to help with daily issues students face in adapting to an academically and culturally different environment. This office should be considered by international students as their primary source for important information regarding their status in the United States.

OIS staff members can answer questions and advise students on immigration regulations, financial concerns, health matters, housing, employment possibilities and other issues relating to an international student’s period of stay in the U.S.

International Bridge Program (http://oisss.jhu.edu/current-students/GradBridge)

Studying in a foreign country can be both challenging and exciting. International students often experience a period of cultural adjustment when they first arrive to the United States and specifically Johns Hopkins University.

The International Graduate Student Bridge Program is designed to better support this transition process for new international graduate students through monthly informational seminars and presentations on practical subjects- such as adjusting to graduate school in the US,
Departments, Program Requirements, and Courses

Course Identification

Courses listed in the catalog are those the departments plan to offer, however, not every course is available during a given year. Necessarily, some courses will be canceled and other courses scheduled. The schedules of graduate and undergraduate courses for a given term are published before the end of the preceding term. In the course listings that follow, the credits shown are for one semester only. No credits are listed for graduate (600-level) courses; many departments indicate instead the hours of class time per week.

A code number, indicating the department or program; a course number, indicating level; and sometimes a code letter, indicating area, for purposes of the distribution requirements, identify courses.

Code Numbers

Department and program code numbers for the School of Arts and Sciences and Engineering are as follows:

The Zanvyl Krieger School of Arts and Sciences

The Zanvyl Krieger School of Arts and Sciences is one of the core divisions of Johns Hopkins University's Homewood campus. Our mission is the creation of new knowledge and the education of our students, undergraduate and graduate alike. Comprising 22 academic departments and more than 30 centers, programs, and institutes, the Krieger School is home to students interested in the humanities, natural sciences, social sciences, and the arts. The excellence of these programs dates back to 1876, when Daniel Coit Gilman assembled a faculty of philosophy of international distinction. Today, inquiry and discovery remain the engine and fuel that drive teaching and learning in the school. The departmental and program descriptions that follow are notable illustrations of the interdisciplinary offerings and opportunities available for a student to structure a unique field of study in the humanities, natural sciences, quantitative studies, and behavioral sciences.

Requirements for a B.A. Degree

Also see Requirements for a Bachelor's Degree (p. 20).

Students who choose to major in Africana Studies must complete at least 33 credit hours of course work in three areas of African Studies.

- African and African Diaspora Studies, African American Studies, and Urban Studies. All course must be taken for a letter grade and be completed with a grade of C- or better.

**Core Courses (Select three of the following)**

<table>
<thead>
<tr>

</tr>
<tr>
<td>Total Credits</td>
<td>33</td>
</tr>
</tbody>
</table>

**Honors**

Students who wish to do honors in Africana Studies are required to take a two-semester research seminar, in which they will prepare an honors thesis in consultation with a faculty advisor in the student's particular area of interest and the faculty coordinator of the undergraduate research seminar. The research seminar will provide guidance on research design, methodology, and analysis and presentation of findings, and give students an opportunity to discuss one another’s projects, share experiences, and receive constructive comments from their peers as well as the faculty coordinator.

In selecting research topics and collecting materials, students are encouraged to explore resources outside those immediately available on campus. With its rich collection of museums and archives, large and historic African-American communities, and growing populations of recent migrants from Africa, the Baltimore-Washington area offers many opportunities for research in Africana Studies. Students who wish to undertake research in Africa or in African American or African diasporic communities beyond the local area will be encouraged to take advantage of summer research grants and/or study abroad opportunities available at Hopkins. The center will work with other departments and programs at Hopkins on behalf of students who wish to combine their research in Africana Studies with work in another field or ongoing program, such as the joint Minority Health Program recently established by the School of Public Health and Morgan State University.

**Undergraduate Minor Requirements**

Students who wish to minor in Africana Studies must complete a minimum of 18 credits, including two core courses and electives. Three of the electives must be upper-level courses. All course must be taken for a letter grade and be completed with a grade of C- or better.

**Core Courses (Select two of the following)**

Courses

AS.362.103. Introduction to African Arts.
This course provides an overview of principal visual arts of Africa, pre-historic to contemporary.
Instructor(s): N. Bridges
Area: Humanities, Social and Behavioral Sciences.

AS.362.104. Introduction to the African Diaspora.
This course will begin in Africa before Atlantic slave trade, move to cover that trade into Brazil, the Caribbean and South Carolina. Comparisons of slave systems with Africa, Brazil, some parts of the Caribbean and Carolina (later South Carolina).
Instructor(s): P. Romero
Area: Humanities.

Jointly offered with Moira Hinderer, based on themes developed from the archives of the Afro-American Newspaper and selected readings of African American Societies from across the hemisphere of the Americas.
Instructor(s): F. Knight; M. Hinderer
Area: Humanities, Social and Behavioral Sciences.

This course will examine key moments and battles in the Civil Rights Era in America from 1954 (Brown v. Board) through the funeral of Emmet Till, the Montgomery bus boycott, the 1960 lunch counter sit-in in Greensboro, SC, the founding of SNCC, the Mississippi civil rights worker murders to the 1964 Democratic Convention to the series of Civil Rights Acts of the 1960s. The course will focus on the dual role of legal documents and media images in provoking and ratifying progress in civil rights.
Instructor(s): H. Robbins
Area: Social and Behavioral Sciences.

This course examines historical and current public health crises in Africa. Topics covered include infectious diseases and viral outbreaks, sanitation, education, behavioral health, gender equity and health care.
Area: Humanities.

Exploring the work of artists and scholars such as Octavia Butler, Samuel Delaney, Richard Iton, Alondra Nelson, Mark Dery, Janelle Monae, George Clinton, and OutKast, this course introduces students to the aesthetic of Afrofuturism, which uses elements of science fiction, fantasy and non-Western cosmologies to both critique the present-day dilemmas of Black people and re-examine historical events of the past.
Instructor(s): B. Carter
Area: Social and Behavioral Sciences.

AS.362.111. Introduction to Africana Studies.
Introduction to Africana Studies is designed to introduce you to the core concepts, theories, and thinkers of the black diaspora by means of a “keyword” approach. Each week we will focus on one keyword and the way it both shapes and is shaped by the African diaspora from the Trans-Atlantic Slave Trade to the middle of the twentieth century. I argue that much of the modern project, the assembly of institutions, ideas, interests, and identities, is a product of the brutal encounter between Europe, the Americas, and Africa. It is my hope that by the end of this course we will know more about how this encounter helped to construct modernity, and we will also know a bit more about how this encounter helped shape responses to it.
Instructor(s): L. Spence
Area: Humanities, Social and Behavioral Sciences.

For current course information and registration go to https://isis.jhu.edu/classes/
AS.362.122. History of Africa (since 1880).
An introduction to the African past since 1880.
Prerequisites: Students are not allow to take both 100.122 and 362.122.
Instructor(s): K. Gallon
Area: Humanities, Social and Behavioral Sciences.

AS.362.175. Freshman Seminar: Remembering the Black Power Movement.
This course explores trends, developments, contradictions, and dilemmas related to the Black Power Movement. The objective of studying this historical movement is not to engage in nostalgia, but to think through and learn the lessons of this historic social movement. An active participant in the Black Power Movement as a university undergraduate and graduate student, I do not approach this subject merely as a set of interesting intellectual issues and dynamics that can be explored with complete dispassion and objectivity. Rather, I seek to examine critically some of the contradictions and dilemmas that I, too, was caught up in, seeking to come to grips with and clarify my own participation and activities. We study these historical events with the expectation of making a positive contribution to the future.
Instructor(s): J. Ashton
Area: Humanities, Social and Behavioral Sciences.

This course addresses the making and historical experiences of African Americans from the emancipation of slaves in the later nineteenth century to the conclusion of the twentieth century.
Instructor(s): J. Ashton.

This course will explore the history and development of African American poetry from 1750 to the present (blues, rap, and hip-hop) examining the role of race, art, and cultural identity.
Instructor(s): H. Robbins
Area: Humanities, Social and Behavioral Sciences.

AS.362.204. Women in African History.
Selected readings written by or about notable African women from the 17th century to the present. Themes explored include slavery, power and religion, economics, health and politics.
Instructor(s): P. Romero
Area: Humanities.

AS.362.206. Research Seminar: Baltimore History from the AFRO Newspaper Archives-Community Based Learning.
This small, project-oriented class will introduce you to methods in historical research while exploring major topics in twentieth century Baltimore history. We will use the rich reporting of Baltimore’s Afro-American Newspapers, to explore Baltimore’s place in the larger history of Black urban experience. Students will analyze images and exhibits related to African-American history, as well as research and curate small online exhibits of primary source materials including photographs, newspaper clippings, correspondence, pamphlets, flyers, and maps. We will be among the first scholars to work in the Afro’s rich archival collections, which include over a million images.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences.

AS.362.208. From Nok to Nsukka: Approaches to the Art of Nigeria.
This course provides an introduction to art traditions within Nigeria’s borders; it also explores historiography and the impact of modern nation-building on art history and the development of museum exhibitions.
Instructor(s): K. Gunsch
Area: Humanities.

This course will explore the diversity of African-American women’s lives and the development of women, work, and culture from the colonial era through the late twentieth century. Using primary and secondary sources the class will explore the social, political, religious, and economic factors that produced change and transformation in the lives of African American women.
Instructor(s): A. Coleman
Area: Humanities.

This course will explore the role of the 1964 Civil Rights Act and mid-twentieth century reform movements in transforming American politics, economy, and culture since the late 1960s.
Instructor(s): N. Connolly
Area: Humanities
Writing Intensive.

AS.362.221. African American Poetry and Poetics. 3 Credits.
This seminar explores the literary and political influences of poetry written and published by African Americans from the 18th century to the present (from Phyllis Wheatley to Terrance Hayes).
Instructor(s): H. Robbins
Area: Humanities Writing Intensive.

Intersession Abroad Program. The course examines the history, politics and culture of Ghana. Permission required. Course must be taken for a letter grade. Open to program applicants only.
Instructor(s): C. Furr-Holden
Area: Humanities, Social and Behavioral Sciences.

AS.362.252. Brazil: History and Society.
Intersession Abroad Program. The course examines Brazil’s history and social/cultural diversity.
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences.

This course will examine the literature surrounding cross-cultural exchange, through an interrogation of key concepts in African and transnational studies namely “diaspora” “globalization,” and “transnationalism.”
Instructor(s): J. Ahiman
Area: Humanities, Social and Behavioral Sciences.

AS.362.304. Reading and Writing Black Poetry.
This course is an exploration of twentieth and twenty-first century black poetry and poetics. Readings include Paul Laurence Dunbar, Langston Hughes, Gwendolyn Brooks, Amiri Baraka, Sonia Sanchez, Nikki Giovanni, Lucille Clifton, Rita Dove, Natasha Trethewey, Terrance Hayes, Claudia Rankine, and Danez Smith. Texts will be mined for theme as well as formal technique as a basis for poetic experimentation.
Instructor(s): A. Gunn
Area: Humanities.
This course will explore major topics in 20th century Baltimore history, using local newspapers and the archival collections of the Baltimore Afro American Newspaper.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences.

An examination of the various ways in which an African Diaspora developed across the Americas between 1492 and the present. Attention will be paid to the period of the Transatlantic slave trade but the greater emphasis will be on the complex societies that emerged by the early twentieth century and the responses of people of African descent to these societies. Readings will range across history, demography, economics, politics and culture in order to define a Diaspora and examine the factors that encourage or inhibit its formation. Cross listed with Africana Studies
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.362.325. The Role of "Place" in Racial Ethnic Health Disparities.
This course will introduce students to racial/ethnic health disparities, the need to examine the role of "place", give different definitions of "place", how the characteristics of where people live affects individual's health, and how this leads to racial/ethnic health disparities. The course will first examine large-scale measures of place, then down to smaller scale measures. Students will discuss various theories generally associated with racial/ethnic health disparities, as well as, the extension of "place" theories to this topic. Students will apply this knowledge through various assignments and activities about racial/ethnic health disparities of interest. These activities include class discussions, group assignments and development of interventions and solution-focused policy recommendations. This course is being offered for sophomores, juniors and seniors who have completed a statistic course or who have received permission from the instructor.
Prerequisites: Students may receive credit for AS.280.411 or AS.362.325, but not both.
Instructor(s): C. Bell
Area: Humanities.

AS.362.332. #Digital Blackness.
#BlackLivesMatter, #SayHerName, #ICantBreathe #IfIDieInPoliceCustody #BlackOutDay are just some of the many hashtags that black people have recently created and used on Twitter to protest police brutality and proclaim their full humanity. Over the past two decades Black people have utilized a variety of digital spaces and media to reconfigure the terms and terrain of debates and discussions on what it means to be Black in the United States and larger world. This course is an interdisciplinary investigation into the relationship between historical and contemporary cultural, social and political expressions of Blackness and the digital. More specifically, lectures, readings and class discussions will deconstruct the cultural, political economy and social construction of Blackness in the digital in an effort to uncover the ways that meanings of race more broadly and Blackness more narrowly influences and shapes Black Americans’ present social status and struggles for social justice. This course is designed to provide a “hybrid” experience, including both face-to-face (F2F) and online class meetings.
Instructor(s): K. Gallon
Area: Humanities.

This course investigates the impact of white supremacy and anti-black racism, as a global system of power, on the political development of the United States of America.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences.

AS.362.344. Education Politics in Urban America.
This seminar analyzes trends, developments, and future challenges related to the politics of urban public schooling with a concentration on community political dynamics and the struggle for equal educational opportunity and quality education. The course emphasizes the impact of socioeconomic class inequality, racial/ethnic conflict, and gender politics on the changing character of public school reform since the 1954 Supreme Court decision of Brown v. Board of Education. Cross-listed with Africana Studies.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences.

Black existentialism is a branch of Africana philosophy—the philosophical tendencies that arose out of the experience of the African Diaspora. This course is a philosophical interrogation into the meaning of the lived experience of being black in the context of an anti-black world through addressing such existential questions as freedom, identity, anguish, dread, responsibility, embodied agency, evil, resentment, liberation, and nihilism.
Instructor(s): F. Hayes.

Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences.

AS.362.371. The Public Health Crisis in Africa. 3 Credits.
This course examines the historical and current public health crises in Africa. Topics covered include infectious diseases and viral outbreaks, water and food access, sanitation, education, behavioral health, gender equality, health care and health care access, as well as the link between culture, economics and health. Introduction to Epidemiology is recommended but not required.
Instructor(s): C. Furr-Holden
Area: Humanities, Social and Behavioral Sciences.

Close examination of films directed by African American filmmakers as well as a focus on historical and cultural representation of African Americans in American film.
Instructor(s): H. Robbins; L. Delibero
Area: Humanities.

This course explores the socio-political content, meanings, & intent of bebop, from the 1940’s-1960’s & examines the broader history of jazz & its impact on the social transformation of modern America.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences.
AS.362.401. Comparative Slavery in the Americas.
This course examines the development of slavery and racial thought in Latin America and the Atlantic World from the fifteenth century until its demise in the middle and late nineteenth century. Readings in social and cultural history are intended to focus on the life and labor of slaves, while readings from economic and legal history evaluate slavery as an institution. Intellectual histories are also assigned in an attempt to map the development of slavery as an institution typified by racial caste. The primary goal of this course is to give students a background in the major historical debates that have shaped the production of the history of slavery, including questions of identity (creolization vs. "African survivals"), slave agency and control, and economic vs. racial causes of slavery and the slave trade. All of these topics will be examined through the overarching theme of the course, which is the Tannenbaum thesis: namely, to what extent slavery was experienced differently in Latin America, Anglo-America, and in Africa itself.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences.

This course explores the cultural, economic, legal, and political factors that led to the establishment and maintenance of racial apartheid in the United States during the nineteenth and twentieth centuries.
Instructor(s): N. Connolly
Area: Humanities.

This seminar will pursue an in-depth, critical analysis of the history and philosophy of black nationalism and its relationship to other trends in black political thought. Readings from Alexander Crummell, Martin Delany, Frederick Douglass, W. E. B. DuBois, Marcus Garvey, Malcolm X, James Baldwin, and others.
Instructor(s): A. Culver
Area: Humanities, Social and Behavioral Sciences.

AS.362.440. Oppression and Revolt. 3 Credits.
This seminar examines the history, theory, and practice of oppression and rebellion in Africa, the Caribbean, and the United States of America. The seminar will focus on popular struggles for liberation against systems of slavery, colonialism, sexism, and racism.
Instructor(s): F. Hayes
Area: Humanities
Writing Intensive.

This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes.

This course is available to students who wish to pursue selected, special work that may not be included in the Center’s other courses.
Instructor(s): F. Hayes; F. Knight; M. Shell-Weiss; S. Berry.

Instructor(s): F. Hayes; P. Romero
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): F. Hayes.

Instructor(s): F. Hayes.

AS.362.595. Summer Internship.

Cross Listed Courses

History of Art
This is an introduction to the history of African American art. While organized chronologically, the course will emphasize a series of case studies of artists and movements in order to understand African American art and the complexities of its study. The course will explore how black artists in the United States have engaged with key issues such as race, gender, class and ethnicity as well as debates about representation and the role of the artist. Cross-list with Africana Studies
Instructor(s): T. Wofford
Area: Humanities.

Survey of Early Christian and medieval art and architecture in North Africa, with an emphasis on indigenous developments and cultural exchange in the Mediterranean world, 4th to 13th century. Dean’s Teaching Fellowship course.
Instructor(s): N. Dennis
Area: Humanities.

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the “global South.” This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of “global modernism.”
Instructor(s): R. Brown
Area: Humanities.

English
AS.060.129. Writing Africa Now.
This course surveys post-2000 literary and cultural production from sub-Saharan Africa. Topics will include debates over genre and fiction’s relevance to African experience, legacies of canonical writing about independence, urban Africa as violent or “tragic” landscape, and problems of scale and geographical context. Readings by authors such as Adichie, Wainaina, Duiker, and Vladislavic, and students will be introduced to the main print and online arteries of African intellectual discussion. This class is for non-majors and does not count towards the English major or minor.
Instructor(s): J. Jackson
Area: Humanities.
This seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban antislavery novels, slave narratives, and “classics” of American literature like Melville’s Benito Cereno. We will consider how the institution of Atlantic slavery was variously represented, justified, and criticized, discovering in the process the deep structures of modern slavery discourse. Texts may include: Aphra Behn, “Oroonoko”; John Woolman’s “Journal”; Robert Wedderburn, “The Horrors of Slavery and Other Writings”; Gertrudis Gomez de Avellaneda, “Sab”; Frederick Douglass, “My Bondage and My Freedom”; Herman Melville, “Benito Cereno”; Harriet Beecher Stowe, “Dred”; Antonio Castro Alves, “The Slaves".
Instructor(s): J. Hickman
Area: Humanities.

This course takes stock of how the current hot topic of “world literature” has evolved from Immanuel Wallerstein’s work on world-systems theory over the course of the last three decades. We will read work by a wide range of literary critics engaged with the topic of world literature, including Franco Moretti, Pascale Casanova, David Damrosch, Emily Apter, and Alex Beecroft, as well as major “world” novels by Herman Melville, Amitav Ghosh, and Chimamanda Adichie. Students will also be introduced to critical approaches that offer a conceptual alternative to the world literature framework, for example, Edward Said’s ideas on worldliness and contrapuntalism, Gaston Bachelard’s phenomenology of the home, Fredric Jameson’s concept of cognitive mapping, and Eric Hayot’s work on literary “world-creation.” We will ask just how broadly the field can be defined before it loses its critical cohesion. In other words, does world literature exist?
Instructor(s): J. Jackson
Area: Humanities.

A comparative study of major works by the South African Nobel Laureates Nadine Gordimer and J.M. Coetzee. Special attention to critical essays by both writers about each other, as well as about issues of shared historical and literary concern. Topics will include the role of the public intellectual in apartheid-era South Africa, competing scales of literary reception and evaluation (e.g. national, international, and universal), and the relationship between politics, form, and genre.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.366. Ellison.
After his landmark novel "Invisible Man" appeared in 1952 and won the National Book Award, Ralph Ellison was one of the most highly regarded and influential American writers. Although his writing—beginning with the powerful short stories and criticism that he published in the 1930s and 40s—was steeped in African American history, literature, music, and folklore, he also thought of himself as part of the great tradition of American, European, and classical literature, from Homer through Joyce. He quickly set to work on a second novel dealing with the assassination of a racist senator during the height of the Civil Rights movement, but he came to the end of his life in 1994 without having completed the novel to his own satisfaction. This massive book, which appeared posthumously in a very abbreviated form as Juneteenth and more recently in the much longer Three Days before the Shooting, reveals the work of a master while at the same time it leaves critics and readers with an exceptional puzzle: What would his final intention have been? Why was he unable to complete the novel? How does it speak to the key issues of African American identity, freedom, and the American ideal that Ellison grappled with all his life? At the same time that he worked on his second novel, Ellison became one of the most prolific and important essayists of the twentieth century, and wrote brilliantly about American race relations from the era of segregation through the twentieth century. Even as he was celebrated by the literary establishment, however, Ellison at times found himself as odds with younger black writers and thinkers who felt that public activism, not just artistic greatness, was required of the African American writer. Using Ellison as a lens through which to see the course of American race relations from slavery to the present, the course will include study of all of Ellison’s major work: the short stories collected in “Flying Home”; “Invisible Man”; the essays collected in “Shadow and Act” and “Going to the Territory”, as well as others; and “Three Days before the Shooting”.
Instructor(s): E. Sundquist
Area: Humanities.

Film and Media Studies

AS.061.328. Gangster Films.
The bad guy as hero from Little Caesar to Goodfellas. Film screenings Th 7:30-10:00 PM, Sun 7:00-9:30 PM. Lab fee: $40.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.369. The 1930s in Jazz, Film, and Poetry.
The 1930s in Jazz, Film, and Poetry will focus on three art forms, jazz, film, and poetry, both separately and in conversation with each other during a decade of political, economic, technological, and cultural upheaval. A decade after the invention of amplifiers and public address systems, advances in sound recording and synchronized sound revolutionized film and recording arts. Jazz musicians, filmmakers, and poets collaborated on innovative and radical projects, often funded by the New Deal Federal Writers Project. Team-taught by faculty in Film and Media Studies, the Department of Jazz (Peabody), and the Center for Africana Studies, this course will bring together students from Peabody and the Krieger School of Arts & Sciences to engage with issues of art, culture, and politics during a turbulent decade.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): H. Robbins
Area: Humanities.
Anthropology

AS.070.103. Community Based Learning - Africa & The Museum.
An introduction to Africa, artistic creativity, collection and exhibition: as African history, as anthropology of art and objects, and as public controversy in our national institutions. Works with the Baltimore Museum of Art. Cross-listed with Africana Studies and Programs in Museums and Society.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.150. The Anthropology of Africa.
This course revitalizes classic debates about the forms and dynamics of Africa self-governance, once depicted as "The African Genius". Anthropological approaches and artistic sources are brought to bear on current African politics and governance.
Area: Humanities, Social and Behavioral Sciences.

How do the abstract principles of economics play out in a diversity of times and places? This course surveys anthropological research on the social organization of labor, the political institutions that underlie wealth and property, and the cultural meanings of money and commodities. Through these topics, we will look at enduring debates about the rationality of markets and the nature of capitalism.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

Rapid urbanization has created new needs, occupations, entertainments, etc., outside the "formal sector". We use anthropological studies, African literature, film and the press on-line to understand making a living.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences.

Over the past two decades, African cities have absorbed rapid population increase without accompanying economic growth. Students will review the major challenges of this mode of urbanization and explore the vibrant ways residents have sought to meet them. Following anthropology’s commitment to lived experience, we will track these issues through the twists and turns of everyday life, and consider what they may say about urbaniy more broadly in the 21st century. Topics include livelihood, the built environment, conflict and membership, and popular culture.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

AS.070.294. Political Anthropology of Africa.
The course will explore classical and contemporary ethnographies of the political in Africa, examining how their authors address issues of power, hierarchy and symbol. We will study various articulations of state, ethnicity and community that are analyzed by observing relations between power and resistance or between law, economy and violence through war, custom and ritual. The seminar will also address the way in which Africa has been constituted as a key source of the sub-field of political anthropology through colonial trajectories, postcolonial detours and the political imagination of the past and the future.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

This seminar will address contemporary questions of state and citizenship in the light of colonial and imperial dynamics at the beginning of the twenty-first century: transnational and national sovereignty in relation to local configurations of law, capital and political violence; processes of subsumption, extraction and financialization. Authors include Negri, Arrighi, Harvey, Chakrabarty, Mbembe, Mamdani, Chatterjee, Coronil, Dussel.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

History

An examination of violence - primarily racial and political - in the decades between the American Revolution and Civil War (1789 to 1861).
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences.

AS.100.121. History of Africa to 1880.
A history of Africa from human evolution to the mid-nineteenth century focusing on key themes in social, economic, and political history.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

AS.100.122. Introduction to History of Africa (since 1880).
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

AS.100.205. Freshman Seminar: Health, Healing, and Medicine in Africa.
A freshman seminar introducing students to the history of health, healing, and forms of medical practice in Africa over the last two centuries.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

This course examines the relationship between law, governance, and social structures in America between the start of European settlement and the era of the Civil War. Topics will include Native American and European land claims, the regulation of family life, economic and commercial disputes, and the legal regimes of race and slavery. Throughout, we will consider both the aims of governing officials and how ordinary men and women maneuvered within the legal system.
Instructor(s): S. Damiano
Area: Humanities, Social and Behavioral Sciences.

AS.100.255. The Haitian Revolution in World History.
This introductory seminar examines the revolution that transformed the slave colony of Saint-Domingue into the first black republic and second independent nation in the Americas, and its repercussions around the world. Non-Majors welcome.
Instructor(s): N. Marvin
Area: Humanities, Social and Behavioral Sciences.
AS.100.311. National Pastimes: Sports, Culture, and American History.
National Pastimes examines the development of sports in the United States over the course of the 20th century with a particular interest in the relationship between sports and politics as well as issues of race, gender, sexuality and class.
Instructor(s): A. Davis
Area: Humanities, Social and Behavioral Sciences.

AS.100.320. Writing U.S. Empire.
This course will teach students how to write analytic history and how to interrogate primary documents through a focused look at American imperialism between the 1890s and 1930s.
Instructor(s): N. Connolly.

AS.100.338. Contemporary African Political Economies in Historical Perspectives.
How have contemporary achievements and problems in Africa been shaped by past events? What insights may be gained into contemporary conditions by viewing them in historical perspective? Using a series of case studies, this course will examine the history of issues such as economic development, nation building, migration, poverty and social conflict that affect many African nations today. Cross listed with Africana Studies
Instructor(s): S. Berry
Area: Humanities, Social and Behavioral Sciences.

AS.100.343. Diaspora, Nation, Race, and Politics.
For millions of people across the globe, political fate in the 20th century was defined at the intersection of diaspora, race, and nation — and this may be true in the 21st century as well. This course, a collaborative effort involving a historian and a political scientist, explores the parallels and divergences in the deployment of these terms in nationalist and transnational mobilization, literature and aesthetics, and group identity formation in Eastern Europe, Africa and the New World of the Americas.
Set against the backdrop of the fall of significant empires in the late 19th and early 20th centuries, we will explore themes of migration, human rights, the nation-state system, and racism through history, political sociology, and political and social theory. We will pay particular attention to the theoretically exemplary Jewish and Black experiences of diaspora, race, and nation, engaging both with how those experiences were specially shaped by the imposition of national and racial logics and with Black and Jewish politics and thought in relation to those categories. Readings include Max Weber, W. E. B. Du Bois, Booker T. Washington, Theodor Herzl, Hannah Arendt, Benedict Anderson, Rogers Brubaker, Andrew Zimmerman, Michele Mitchell, David Scott.
Instructor(s): K. Moss; M. Hanchard
Area: Humanities, Social and Behavioral Sciences.

AS.100.385. Mobility and Encounter in the Medieval Indian Ocean.
This seminar discusses forms of mobility and exchange- trade and travel, conquest and religious transformation, diasporas and migration, the spread of practices and technologies- across the Indian Ocean from the 8th to 16th centuries.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

Critically explores issues of decolonization and citizenship in Africa from WWI to the present. Emphasis on political inclusion and exclusion, and violence, fostered by nationalist movements and postcolonial African governments.
Instructor(s): P. Larson
Area: Humanities.

AS.100.411. Readings in the History of Public Health in the 20th and 21st Centuries.
The students will read major and some minor works in the history of global public health and will each develop their own concept of how and why the major institutions, professions, and practices associated with public health have evolved over the past long century. To help the students focus on their ideas, they will write three essays on particular aspects of the history.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences.

AS.100.439. Cuban Revolution and the Contemporary Caribbean.
A lecture course dealing with the development of the Cuban Revolution and the tortuous history of the Caribbean during the 19th and 20th centuries.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.440. The Revolutionary Experience in Latin America. Comparative examinations of revolutionary political changes in Haiti, Mexico, Bolivia, and Cuba. Cross-listed with Latin American Studies
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

AS.100.444. African Fiction as History.
An exploration of Modern African history through the African historical novel.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

AS.100.486. Jim Crow in America.
Through an examination of law, culture, and politics, this course explores the history of legalized racial segregation in the United States.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): B. Vinson.

AS.100.709. Modern Latin America.
This course will examine selected themes in Modern Latin American history such as legacies of the colonial administrations, the plural societies, political cultures, slavery, and other forms of servitude; religious impact, independence movements, globalization and narco trafficking. Reading knowledge of Spanish required.
Instructor(s): F. Knight.
Near Eastern Studies

AS.130.203. Archaeology of Africa: From Human Origins to the Emergence of Civilizations.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt. Instructor(s): M. Harrower
Area: Humanities.

AS.130.400. Introduction to Middle Egyptian.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). In the second semester, literary texts and royal inscriptions will be read. Course meets with AS.133.600.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.131.613. Archaeology of Africa: From Human Origins to the Emergence of Civilizations.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt. Instructor(s): M. Harrower
Area: Humanities.

AS.133.611. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required. Instructor(s): R. Jasnow
Area: Humanities.

History of Science Technology

AS.140.163. Jungle Doctors: Medical Missions in Africa from David Livingstone to Paul Farmer.
Freshman seminar using a variety of primary and secondary sources, students will explore the motivations and activities of expatriates practicing medicine in Africa from the 19th century to the present. Instructor(s): J. Cummiskey
Area: Humanities, Social and Behavioral Sciences.

AS.140.379. Health and the City: Urban Public Health In Historical Perspective.
This course examines the history of cities as spaces of public health concern since the nineteenth century, and seeks to understand how social, political, and economic contexts have shaped urban public health interventions. Instructor(s): E. Anders
Area: Humanities, Social and Behavioral Sciences.

Economics

AS.180.252. Economics of Discrimination.
This course examines labor market discrimination by gender, race and ethnicity in the United States. What does the empirical evidence show, and how can we explain it? How much of the difference in observed outcomes is driven by differences in productivity characteristics and how much is due to discrimination? How have economists theorized about discrimination and what methodologies can be employed to test those theories? What has been the impact of public policy in this area; how do large corporations and educational institutions respond; and what can we learn from landmark lawsuits? The course will reinforce skills relevant to all fields of applied economics, including critical evaluation of the theoretical and empirical literature, the reasoned application of statistical techniques, and analysis of current policy issues.
Prerequisites: AS.180.102
Instructor(s): B. Morgan
Area: Social and Behavioral Sciences.

AS.180.355. Economics of Poverty/Inequality.
This course focuses on the economics of poverty and inequality. It covers the measurement of poverty and inequality, facts and trends over time, the causes of poverty and inequality with a focus on those related to earnings and the labor market, and public policy toward poverty and inequality, covering both taxation and government expenditure and programs. By the nature of the material, the course is fairly statistical and quantitative. Students should have an intermediate understanding of microeconomic concepts. Basic knowledge of regression analysis is also helpful.
Prerequisites: AS.180.301
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

Political Science

AS.190.311. Disposable People: Race, Immigration and Biopolitics.
This course will explore theories and practices of race and immigration in order to illuminate the proliferation of populations regarded as disposable in contemporary politics. We will pay special attention to the contestable criteria used to determine eligibility for membership in the human race. We shall also examine how political power influences the relays between citizenship status and those whose lives are worthy of protection, and those who should be allowed to die.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

Recommended Course Background: AS.190.214
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.340. Black Politics I.
This course is a survey of the bases and substance of politics among black Americans and the relation of black politics to the American political system up to the end of Jim Crow. The intention is both to provide a general sense of pertinent issues and relations over this period as a way of helping to make sense of the present and to develop criteria for evaluating political scientists’ and others’ claims regarding the status and characteristics of black American political activity.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.
AS.190.342. Black Politics II.
Recommended Course Background: AS.190.340.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.360. Power and Democracy in the American City.
How do race and class intersect to shape how democracy works in American cities? In this innovative course students will learn about urban citizenship, authority, and activism using Baltimore as a case. The class, co-taught with Baltimore organizers, will use a community based learning approach.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

Over the past two years the #blacklivesmatter movement has transformed the discussion about policing in American cities. In this course we will examine the broad movement against police brutality through the lens of black politics.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

This course analyzes the distinctive US welfare state in historical and comparative perspective. We begin with a survey of the policy context, an historical overview from the poorhouses through the Great Society, and a tour of welfare states across the rich democracies. We then survey developments – and explain the actual workings of policy – across jobs, education, welfare, pensions, and health care. We explore the institutional and political factors behind their divergent trajectories through conservative revival and the age of Obama. Students will write a seminar paper exploring policy development over time in a program or area of their choosing. Enrollment restricted to Social Policy minors only.
Prerequisites: AS.360.380
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences.

AS.190.384. Urban Politics & Policy.
An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations.
Cross-listed with Africana Studies
Instructor(s): L. Spence; R. Katz
Area: Social and Behavioral Sciences.

AS.190.391. Time to Kill: Race, Punishment, Death and Desire.
This course examines the role of race in determining who deserves to be punished, the timing and occasions of punitive action and how long punishment should endure. Key to our inquiry is how racialized presumptions about human desire might justify punitive logics of power. The class explores inequalities in the distribution of punishment and death in order to illuminate how race shapes questions of whose time is more valuable, who lives and who dies, and ultimately whose lives count as human.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

Contrary to the image most Americans have of their country, the United States is a tough nation with respect to crime. The U.S. has constructed a considerably more harsh criminal justice regime than any of its advanced industrial counterparts. In recent years, America’s prisons and jails have held more than one percent of the nation’s adults—2.3 million people—with many more on parole, probation or temporarily free on bail awaiting trial. In Western Europe, by contrast, fewer than two-tenths of one percent of the adult populace is behind bars. This enormous discrepancy in incarceration rates is more a function of the relative severity of America’s criminal laws than differences between Europe and the U.S. in the actual incidence of serious crime. And, of course, while Western European nations no longer execute convicted criminals, the U.S. remains committed to the use of capital punishment. We will explore these and related issues of crime and punishment in the U.S.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

Grad Students only
Area: Social and Behavioral Sciences.

This course examines why the United States quintupled its incarceration rate over the last 40 years to become the world’s leading jailer and explores the consequences for American politics.
Instructor(s): D. Dagan de Picciotto
Area: Social and Behavioral Sciences.

This seminar analyzes trends, developments, and future challenges related to the politics of urban public schooling with a concentration on community political dynamics and the struggle for equal educational opportunity and quality education. The course emphasizes the impact of socioeconomic class inequality, racial/ethnic conflict, and gender politics on the changing character of public school reform since the 1954 Supreme Court decision of Brown v. Board of Education. Cross-listed with Africana Studies.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences.

The second half of the 20th century witnessed a number of anti-colonial struggles across the African continent. This course reads the work of various theorists, novelists and organic intellectuals from these struggles in order to examine a number of important theoretical questions, such as: What is ‘Africa’? How does colonial rule operate? What might political, economic and social liberation look like? These analyses will then be used to examine a number of contemporary issues facing the African continent. Cross-listed with Africana Studies
Instructor(s): I. Kamola
Area: Social and Behavioral Sciences.

Public Policy
Perm. Req’d. This course teaches students to think analytically and to apply analytic thinking to policy problems. Students work through several real-world problems primarily in social, urban, and health policy, to master the essential steps of any policy analysis: identifying the problem, assessing the available evidence, specifying goals and constraints, and examining policy alternatives. Course goals also include understanding some of the major policy debates of the day, and communicating in a simple, clear, and direct way.
AS.195.685. Adolescents, Crime, and Justice.
Instructor(s): D. Altschuler.

German Romance Languages Literatures

AS.210.391. Advanced Portuguese Language & Literature I.
This third-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read one or two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. Lab work is required. All classes are conducted in Portuguese.
Prerequisites: AS.210.278 or instructor approval.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.211.319. ¡Salsa! The Afro-Antillean song.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instills vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. Concepts learned in this course will be directly applicable to careers linked to intercultural and international relations while also apply to multiple careers in media, music industry and dance. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Instructor(s): M. Ramos
Area: Humanities.

AS.211.341. Power and Resistance: Approaches to French Political Thought.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in Portuguese should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

Writing Seminars

In this Community-Based Learning course, students will explore poetry of social and political engagement in partnership with high-school age writers from Writers in Baltimore Schools. Participants will put learning into practice by organizing community conversation, reflection, and collaboration. Participation in some events outside of class time will be required.
Instructor(s): D. Malech
Area: Humanities.

Caribbean history is reflected in the literature of emigration and collapse of empire. We’ll study novels by Naipaul, Rhys, and other 20th century authors.
Instructor(s): W. Biddle
Area: Humanities.
Sociology

AS.230.205. Introduction to Social Statistics.
This course will introduce students to the application of statistical techniques commonly used in sociological analysis. Topics include measures of central tendency and dispersion, probability theory, confidence intervals, chi-square, anova, and regression analysis. Hands-on computer experience with statistical software and analysis of data from various fields of social research. Special Note: Required for IS GSCD track students.
Prerequisites: Statistics Sequence restriction: students who have completed any of these courses may not register: EN.550.211 OR EN.550.230 OR EN.550.112 OR EN.550.310 OR EN.550.311 OR EN.550.413 OR EN.550.420 OR EN.550.420 OR EN.550.420 OR EN.550.435 OR AS.280.345 OR AS.200.314 OR AS.200.315; Statistics Sequence Restriction: Students who have completed EN.550.111 OR EN.550.113 may not enroll.
Instructor(s): D. Pasciuti
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.208. Introduction to Race and Ethnicity.
This course offers an historical overview of race and ethnicity in American society, and the processes that have led to ethnic and racial boundaries. We explore the social dynamics of racial/ethnic hostility and racial/ethnic protest movements. In addition, we examine how race and ethnicity have been used to justify segregation, domination and genocide, but also to create a sense of community, shared responsibility and belonging. Cross-listed with Africana Studies
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences.

AS.230.244. Race and Ethnicity in American Society.
Race and ethnicity have played a prominent role in American society and continue to do so, as demonstrated by interracial and interethnic gaps in economic and educational achievement, residence, political power, family structure, crime, and health. Using a sociological framework, we will explore the historical significance of race and its development as a social construction, assess the causes and consequences of intergroup inequalities and explore potential solutions.
Instructor(s): M. Greif
Area: Social and Behavioral Sciences.

This course will introduce students to a range of digital technologies that are critical for conducting social scientific research in the 21st century. Students will develop competency in the use of computer programs for statistical analysis, database management, the creation of maps and timelines, and the presentation of research reports. The research tools and technologies will be taught using examples from ongoing social science faculty research projects at Johns Hopkins on global inequality and international development. Required for GSCD track students.
Instructor(s): S. Upadhyay
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.309. Segregation & Social Inequality.
This course presents an in-depth study of racial and ethnic residential segregation and its relationship to social inequality. Through various theoretical perspectives, students will explore the history and contemporary patterns of residential segregation in the United States. In doing so, students will learn about the persons, organizations, and social phenomena that contribute to neighborhood segregation, such as homeowner associations, federal and local governments, developers, as well as differences between groups in racial preferences and socioeconomic status. Through lectures, readings, discussions, and films, students will gain insight into the causes of segregation, as well as its social, economic, and demographic consequences. Cross listed with the Center for Africana Studies.
Instructor(s): P. Bennett
Area: Social and Behavioral Sciences.

Is a neighborhood just a grouping of individuals living in the same place, or do neighborhoods have collective meanings and impacts on children and families? We will capitalize on research methodologies used to define and describe neighborhoods and their effects on economic and educational outcomes. These include case studies, census data, surveys, quasi/experimental data. Focus is on how research measures neighborhood effects and incorporates community level processes into models of social causation (e.g., social capital/control, community efficacy, civic engagement). Also examined: patterns in residential mobility, segregation, and preferences within black and white populations; development of housing policy in the U.S.; programs to determine how neighborhoods affect issues of social importance. Statistics and public policy background is helpful but not required.
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences.

AS.230.316. African American Family.
This course is an examination of sociological theories and studies of African-American families and an overview of the major issues confronting African-American family life. The contemporary conditions of black families are explored, as well as the historical events that have influenced the family patterns we currently observe. Special attention will be given to social policies that have evolved as a result of the prominence of any one perspective at a given point in time.
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences.

AS.230.332. Race, Racism & Racial Privilege.
This course will examine the concepts of race, racism, racial privilege in contemporary America, and the West in general. Examples from other countries will be integrated as well. Historical contexts such as the colonialism, the Civil War and Reconstruction, the Civil Rights movement, and the post Civil Rights era will help to provide an understanding of the social, political, economic, and cultural forces processes that have constructed and shaped the concepts of race and the racialized subject over time.
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences.
This course is a survey of contemporary social movements in sub-Saharan Africa. The course will begin with an introduction to social movement theory. Subsequent weeks will each focus on a different type of movement (e.g. independence movements, labor movements, women’s movements, environmental movements, etc.) The limited coverage of African issues in the US media tends to focus on either catastrophes or on development projects that are driven by international NGOs and the governments of northern countries. Through this course, students will gain a clear understanding of the broad range of actions that African civil society is using to address social problems throughout the continent. Materials used will include academic analysis of movements, writings by movement participants themselves, and films. The course will also introduce students to the most widely used social movement theories. Because these theories have been largely developed by social scientists in northern countries, the students will be asked to assess their applicability to African movements. Through this critical application of social theory, students will investigate the specific possibilities and constraints facing social and political actors in contemporary Africa. Cross listed with Dean's Teaching Fellowship, International Studies (CP) and Africana Studies.
Instructor(s): B. Scully
Area: Social and Behavioral Sciences.

AS.230.357. Baltimore as an Urban Laboratory.
This course uses the city of Baltimore as a lens through which to explore issues of urban inequality. We will focus on Baltimore’s history of racial segregation and concentrated poverty, and its effect on the social and economic well-being of the city and its residents, with attention to education, employment, health and crime. Students will learn how to employ Census data, GIS approaches, and sociological research to inform questions about population change, inequality and the distribution of resources across the city and metropolitan region. Students will also work on one or more policy relevant studies based in Baltimore, including: a project on abandoned and vacant housing, a desegregation intervention, and a longitudinal study of inner city youth. Finally, students will become familiar with Baltimore City’s programs and policy approaches to addressing the city’s most pressing problems, and will design innovative and effective and innovative solutions as part of their course assignments. Enrollment restricted to Social Policy minors only.
Prerequisites: Students that took AS.360.357 may not take AS.230.357
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences.

AS.230.374. Poverty and Public Policy.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Enrollment restricted to Social Policy minors only.
Prerequisites: Students that took AS.360.372 may not take AS.230.374.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences.

This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.381. Sociology of the Middle East and North Africa.
This course takes a sociological approach to the contemporary Middle East and North Africa. Topics include urbanization and demographic change; rentier welfare states and the global political economy of oil; women in higher education and the labor force; the 2011 Arab Spring; conflict in Syria, Libya, and Yemen; Amazigh (Berber) identity in northwest Africa; Israel-Palestine; “Dubai, Inc.” and the sociology of migrant labor; neoliberal Islamic politics in Turkey; cinema and everyday life in Iran; conservative monarchy in Morocco and Saudi Arabia; and the role of the United States in the MENA region. Students will give presentations, write memos, and submit two papers. One aim of the course is to turn students into clear, polished academic writers and thinkers.
Instructor(s): R. Calder
Area: Social and Behavioral Sciences.

This course will join an existing survey of the Housing Court in Baltimore City by the Public Justice Center (PJC) of Maryland to examine the role and process of evictions in the Baltimore civil litigation system. The course will examine the history of housing in Baltimore and the changing role of the courts in housing rights and law from the mid-20th century to the present. Working with the PJC’s Human Right to Housing Project, students will be expected to participate in the survey collection process by attending Rent Court and participating in the data collection process, followed by cleaning and analysis of the data. Counts as American Politics/Sociology of the United States for GSCD Track.
Prerequisites: AS.230.205 AND AS.230.265 or permission of instructor
Instructor(s): D. Pasciuti
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.385. Schooling, Racial Inequality and Public Policy in America.
After examining alternative explanations for why individuals obtain different amounts and types of educational training, the course focuses on how an individual’s family background and race affect his or her trajectory through the educational system. The course covers the specific challenges that have confronted urban schooling in America since the 1960s, including the classic literature on the effects of school and community resources on student achievement as well as the development and later evaluation of school desegregation policies. The course also considers case studies of current policy debates in the US, such as housing segregation and school resegregation, voucher programs for school choice, and the motivation for and consequences of the establishment of state-mandated testing requirements. Throughout the course, emphasis is placed upon the alternative modes of inquiry and writing which opposing scholars, policymakers, and journalists use to address these contentious topics.
Instructor(s): S. Morgan
Area: Social and Behavioral Sciences.
Public Health Studies

AS.280.120. Lectures on Public Health and Wellbeing in Baltimore.
An introduction to Urban Health with Baltimore as a case study: wellbeing, nutrition, education, violence and city-wide geographic variation. Lectures by JH Faculty, local government/service providers and advocates.
Instructor(s): P. Leaf
Area: Social and Behavioral Sciences.

East Asian Studies

AS.310.308. The Frontier in Late Imperial China. 3 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of "China". Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China’s northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

Interdepartmental

AS.360.372. Poverty and Public Policy.
This course examines the causes and consequences of U.S. urban poverty, it’s implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Permission of instructor required.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences.

Program in Latin American Studies

The course problematizes how race and mestizaje became socio-political realities and forms of lived experience in Latin America, shaping such things as governmental practices, spatial configurations, interpersonal relations, and political mobilizations. PLAS Teaching Fellowship.
Instructor(s): A. Reyes Kipp
Area: Humanities, Social and Behavioral Sciences.

Study of Women, Gender, Sexuality

This course combines a weekly seminar with 4 hours per week in a Baltimore social justice organization, coordinated by the JHU Center for Social Concern. Class discussions draw on readings in ethnography and feminist, queer and critical race studies to address topics such as; race, class and gender inequality, neoliberal development, health, institutional violence and politically engaged research.
Instructor(s): A. Krauss
Area: Humanities, Social and Behavioral Sciences.

Anthropology

The Anthropology Department specializes in socio-cultural anthropology: the study of social and cultural forms of human life using ethnographic, historical, and comparative methods. Faculty in our department are engaged in research that addresses topics considered traditional such as the study of ethnicity, language, religion, family and kinship, or medical pluralism, and also new and emergent issues such as those relating to childhood, technological imaginaries, biomedicine, ecology, state, violence, and popular economies. In all cases, the acute awareness of shifting contexts in which institutions are embedded and the impact of global, regional, and national politics on social life is built into the methodology and the theory engaged by faculty and students. Faculty in our department have research expertise in the Americas, South Asia, the Middle East, and sub-Saharan Africa. Our research is oriented toward the investigation of a number of cross-cutting themes of trans-regional concern rather than a comprehensive coverage of global cultural areas.

The department’s distinctive orientation to anthropology can be characterized in terms of its orientation to non-European anthropological and philosophical traditions, alongside the dominant anthropologies which have been seen as definitive of the discipline in the past. In terms of specific topics, faculty in our department are engaged in research on violence, social suffering and theories of everyday life; the material and moral force of the state; money and value; environments; new kinship; anthropology of religion and secularism; anthropology of medicine; media and visual anthropology; health and well-being; and anthropology of language.

The department offers a B.A. program and a Ph.D. program. The B.A. prepares students either to continue to various employment opportunities or degree in anthropology (and related fields) or to develop anthropological skills and imagination as complementary to pre-professional training, such as medicine, engineering, and international relations. Undergraduate course work offers an introduction to the basic methodologies and theories of contemporary anthropology through discussion and directed research on these and other topical issues. Student advising helps interested students to develop concentrations, through sequences of complementary courses tailored to their own interests, including electives outside the department. In addition, majors have the option to pursue an honors program.

Undergraduate majors in anthropology are required to do ten courses, four of which are required courses and an additional four must be taken at 300-level or higher, in addition to a language requirement. Students wishing to write an honors thesis are also required to do two additional courses in which they work on their dissertation topics. Minors are required to take seven courses, four of which are required courses.

The core curriculum for majors develops a step-wise sequence from the freshman seminar to the senior honors option. We offer an elective 100-level Freshman Seminar that introduces anthropological approaches to a broad range of contemporary issues. Here, we hope to develop curiosity in anthropology as a way of knowing the world, and to encourage critical reflection by students on their own life experiences. Our 100-level introductory course, Invitation to Anthropology, is geared toward freshmen and sophomores. The objective of this course is twofold: to offer anthropological knowledge and analytic skills to a broad range of students, and to prepare potential majors for further training in social theory and fieldwork methods. Following from this
Introductory course, our 200-level Ethnographies course furthers student understanding of essential themes through close attention to classic and contemporary ethnographic works in the discipline. The 300-level Methods course is an additional requirement for majors, deepening students’ capacity to link theory and method, preparing students to carry out field research, and guiding students in the writing up and presentation of original research. Building on these foundations, the 400-level Logic of Anthropological Inquiry course, also required of majors, is a thematic capstone course that demands an extended engagement with classic debates and encourages integrative thinking across the range of anthropology courses taken. Majors in anthropology may decide to pursue an honors thesis based on an extended research project. They should discuss their interest in writing a thesis with their faculty advisor in their sophomore year and before the summer of their junior year. Drawing from their previous course preparation and working closely with a faculty advisor, such students spend one summer conducting field research, one semester conducting secondary literature review, and the final semester writing their honors thesis.

Outside of the core curriculum, both majors and minors may take a wide variety of courses. Thematic courses are highly varied and reflect faculty interests, usually including (in any one year) courses in religion and philosophy; medical, legal, economic and linguistic anthropology; and study of diverse areas of the world. Courses on the state, law, and money offer a critical and comparative approach for students aiming toward political, economic, and legal careers. Courses in medical anthropology serve pre-med and public health students. Philosophical and theoretical courses are attractive to humanities students. We see teaching and research as integrally linked, and invite undergraduate students to envisage research as they take introductory and advanced courses in anthropology.

The training of graduate students focuses on providing students with a vocabulary and grammar to engage in anthropological reasoning in socio-cultural anthropology and with skills in research methods. The department emphasizes training in anthropological theory in relation to new developments in other disciplines within the social sciences; understanding of regions in terms of cross-cutting questions rather than geographical questions alone; and the capability to place a problem within a broad history of anthropology that is engaged through multiple national and regional traditions.

Our faculty brings into the classroom an extraordinary range of personal and professional experiences. We are proud to have one of the most diverse faculties in the discipline worldwide, both in terms of gender and ethnic or national origins. Their collective fieldwork experience spans the world, including the Americas, the Middle East, sub-Saharan Africa, and South Asia.

**Facilities**

In addition to the regular departmental colloquium where invited speakers from Hopkins and other campuses around the world present their ongoing research, the department holds one or two special symposia every year, including one organized by graduate students. The department also invites a distinguished scholar each year to present the Sidney W. Mintz Lecture. The purpose of the Mintz lectures is to integrate scholarly and social concerns, focusing on questions of political and economic inequality, racism, gender, and ethnic differences from an interdisciplinary perspective. Previous lectures have subsequently been published in Current Anthropology.

The Baltimore-Washington area is unusually rich in library, archival, and museum resources relating to anthropology. In addition to the excellent collection in the Milton S. Eisenhower Library, the William H. Welch Medical Library, and other libraries at Johns Hopkins, major anthropological holdings are available at the Smithsonian Institution, the Library of Congress, and the other specialized libraries and museums in nearby Washington, D.C. Students can use the Smithsonian Institution’s ethnological and library collection through a cooperative arrangement.

**Financial Aid**

Undergraduate majors and non-majors are eligible to apply for a Provost’s Undergraduate Research Award to support special research and write-up projects in their senior year.

Graduate fellowships and teaching assistantships are available, and most students admitted receive support. Stipends are currently offered at $20,000 per year plus fellowships that cover tuition. Some additional funds are usually available on a competitive basis for summer field research (including travel grants from the Institute for Global Studies, the Program for the Study of Women, Gender, and Sexuality, and the Program for Latin American Studies), for special language-learning needs, and for dissertation write-up; the award of an Owen Fellowship in Arts and Sciences provides an additional $5,000 per annum for three years on a competitive basis. Write-up students may apply for a Dean’s Teaching Fellowship.

Courses in the department are open to all students in the university, regardless of their majors. Although there are no formal prerequisites, students with no previous courses in Anthropology are encouraged to consider courses at the 100- or 200-level. Freshman seminars are designed to introduce students to different perspectives within anthropology through close examination of a contemporary issue.

**Requirements for the B.A. Degree**

(Also see Requirements for a Bachelor’s Degree (p. 20))

To fulfill B.A. degree requirements with an anthropology major, students must complete a total of 30 credits (10 courses) in Anthropology and foreign language through the intermediate level. Only with permission of the director of undergraduate studies may students use one class taken at another institution towards the major. Students must take completed course materials to the director of undergraduate studies to discuss this exception. Majors must receive a grade of C or better in all major requirements and no major requirements may be taken satisfactory/unsatisfactory. Complete major requirements are:

*AS.070.419 Logic of Anthropological Inquiry (new course name The Logic of Anthropological Inquiry)

**Facilities**

In addition to the regular departmental colloquium where invited speakers from Hopkins and other campuses around the world present their ongoing research, the department holds one or two special symposia every year, including one organized by graduate students. The department also invites a distinguished scholar each year to present the Sidney W. Mintz Lecture. The purpose of the Mintz lectures is to integrate scholarly and social concerns, focusing on questions of political and economic inequality, racism, gender, and ethnic differences from an interdisciplinary perspective. Previous lectures have subsequently been published in Current Anthropology.
Foreign Language
Foreign language through the intermediate level

* One cross-listed course taught outside the Anthropology Department may apply towards the major. With permission, one independent study may apply towards the major.
** Students pursuing honors in the major may apply the senior essay courses towards their required electives.

Honors Thesis in Anthropology
Students with at least a 3.5 GPA (major GPA) by their junior year are encouraged to write a senior thesis by registering for the two-semester Senior Essay (AS.070.561 Senior Essay-Fall and AS.070.562 Senior Essay - Spring) under the guidance of a faculty advisor.

Minor in Anthropology
A minor in anthropology is available to undergraduate students in any major. One independent study may apply towards minor requirements. Minors must receive a grade of C or better in all minor requirements and all course must be taken for a letter grade (no satisfactory/unsatisfactory grading). One cross-listed course taught outside the Anthropology Department may apply towards the minor, all other courses must be taken in the department. Only with permission of the director of undergraduate studies may students use one class taken at another institution towards the minor. Students must take completed course materials to the director of undergraduate studies to discuss this exception. If one of these is accepted, the student may not take a cross-listed course.

Requirements for the minor are:

Ph.D. in Anthropology
The graduate program in anthropology leads to the Ph.D. degree. By admitting a small cohort each year, the Department of Anthropology encourages close working relationships between students and faculty and the opportunity for students to develop their anthropological interests in ways that are uniquely suited to them to become researchers, scholars, and teachers. We also encourage and help develop students wishing to pursue non-academic research careers in keeping with the needs of the contemporary world.

Requirements for the Ph.D. Degree
Students will usually spend three years in residence, one year or more conducting field research, and a final year completing the dissertation. Requirements include:

- A total of ten courses to be completed in the first three years. The first of these courses is Proseminar and is a requirement for incoming students.
- Students will sit a three-hour exam near the end of their first year. Incoming graduate students will be provided with a reading list at the start of the summer before the academic year to initiate their self-directed growth as anthropologists and to help them prepare for the exam.
- Students are expected to conduct exploratory fieldwork during the first summer. They are to write a proposal for this fieldwork and discuss their work upon return in a departmental methodology workshop. This workshop accompanies the Methods course, which is a requirement for students in their second year.
- For the comprehensive exams, students are required to write two essays (one conceptual and one on their study area). These essays will ideally also help develop their dissertation research proposal. The essays should preferably be completed by the end of the second year. A course called Regions has been developed to assist students in writing the essays.
- Students are also encouraged to take the Proposal Writing course offered and to apply for fieldwork grants from external agencies.
- A student should be able to demonstrate a reading knowledge of at least one foreign language relevant to his/her field of study before completing the comprehensive exams.
- A Post-Field course will be offered to those returning from the field to help them begin writing their dissertation, along with relevant professionalization workshops as needed. Post-field students are required to give a seminar on their research in the departmental colloquia series.

For further information about graduate study in anthropology, contact the academic program administrator in the Department of Anthropology or visit the departmental website at [http://anthropology.jhu.edu](http://anthropology.jhu.edu).  

Interdisciplinary Ph.D. Degrees
Students may petition the department and the graduate board to create joint Ph.D. courses of study. Past cases have included Anthropology/Public Health and Anthropology/Intellectual History (in the Humanities Center).

For current faculty and contact information go to [http://anthropology.jhu.edu/faculty.html](http://anthropology.jhu.edu/faculty.html)

Faculty
Chair
Deborah Poole
Professor and Chair: visuality and representation; race and ethnicity; violence, liberalism, and the state; law and judicial reform; Latin America (Peru, Mexico).

Professors
Veena Das
Krieger-Eisenhower Professor: Feminist movements, gender studies, sectarian violence, Medical Anthropology, post-Colonial and post-Structural theory; South Asia, Europe

Niloofar Haeri
Professor: Islamic prayers and experiences of religiosity, gender, ritual and language, public appearance and notions of modesty among Jews, Christians and Muslims, social history of moral values in Iran since early
20th century; language ideology, vernacularization and modernity. Egypt, Iran and the Middle East

**Associate Professors**

Clara Han  
Associate Professor: Anthropologies of health, well-being, and care; violence; poverty; moral community; subjectivity; law, specifically in relation to incarceration; kinship; and science and technology; Latin America, specifically Chile, and the United States

Naveeda Khan  
Associate Professor and Director of Graduate Studies: Bangladesh: riparian society, engineered landscapes and the theology of ecological consciousness and climate change; Pakistan: Islam and everyday life; urban anthropology; religion and theology; law and literature; techniques and technologies of perception; US and South Asia: temporality and emergent rationalities.

Anand Pandian  
Associate Professor and Director of Undergraduate Studies: philosophical anthropology / postcolonial and posthumanist ecology / sensory ethnography / experimental writing / anthropological methods / Baltimore / India / Earth

**Assistant Professors**

Michael Degani  
Assistant Professor: Africa, Economic Anthropology, Energy, Infrastructure, Urbanism

Juan Obarrio  
Assistant Professor: political, law and temporality, theology in relation to state and the economy, memory and subjectivity, magic, violence, value, experimental writing. Southern Africa, Latin America.

**Professors Emeriti**

Jane I. Guyer  
Social and economic anthropology, money and culture, household and gender; West Africa

Sidney W. Mintz  
Research Professor: economic anthropology, peasant society, food, life history; Latin America, Caribbean.

**Joint Appointments**

Erica Schoenberger  
Professor (Geography and Environmental Engineering): Economic Geography, Regional Development

Dimitrios Yatromanolakis  
Associate Professor (Department of Classics): research centers upon both technical and more cross-disciplinary fields: archaic and classical Greek literature and performance cultures, sociocultural history, vase-painting and vase-inscriptions; Greek papyrology and epigraphy; and historical and comparative anthropology.

For current course information and registration go to https://isis.jhu.edu/classes/

**Courses**

**AS.070.103. Community Based Learning - Africa & The Museum.**
An introduction to Africa, artistic creativity, collection and exhibition: as African history, as anthropology of art and objects, and as public controversy in our national institutions. Works with the Baltimore Museum of Art. Cross-listed with Africana Studies and Programs in Museums and Society.  
Instructor(s): J. Guyer  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.104. Anthropology of Sound.**
This course explores recent discussions on the possibilities of sound to challenge and expand conventional methods used in the humanities, contemporary social research, and the natural sciences. Drawing from a range of philosophical, historical, psychoanalytic, linguistic, anthropological, artistic, and scientific sources; students will discuss the ways sound has been historically experienced, represented, produced, classified, cancelled, and circulated in different parts of the world. These topics will be examined through reading assignments, listening sessions, and weekly sound recording assignments.  
Instructor(s): G. Valdivia Corrales  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.106. Brains/Minds: An Anthropological Critique.**
Are our minds the products of our physical brains? Can biological mechanisms of the brain explain the diversity of our mental lives? This course will explore the strange ways in which contemporary neurosciences influence and change our conceptions of mind, selfhood and interpersonal relations. We will examine the psychobiological accounts of behavior and their anthropological critique thereby tracking the hopes and anxieties that accompany and surround the contemporary transformation of ideas and techniques in modern psychobiology.  
Instructor(s): B. Polat  
Area: Humanities.

**AS.070.108. Theologies of Money.**
In this course, we will closely examine the ways that various theologies--particularly Protestantism and Islam--have intersected with economic theories and practices. We will focus on how money and economic activity, including modern finance, can be understood as both embedded in and constitutive of cultural and religious forms. Students will write one 5-6 page paper, due at the end of class, and weekly short assignments.  
Instructor(s): B. Kustin  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.110. When Anthropology Looks at Sports.**
How can anthropology engage sports? With its qualitative method and distinctive approaches to social theory can anthropology expand the frame of what we think happens when sports are played? Does sports shift how we perceive the body-mind relationship? Asking these questions offers an opportunity to examine our own relation to sports as either a participant or fan. In our anthropological discussions of sports we will encounter overlapping topics that include race, nationalism, colonialism, ethics, and Christianity.  
Instructor(s): T. Thornton  
Area: Humanities, Social and Behavioral Sciences.
**AS.070.111. Writing Animals.**
How do humans and nonhuman animals relate to one another? How do we write about interspecies relations? James Clifford and George Marcus’s edited volume Writing Culture: The Poetics and Politics of Ethnography (1986) heralded a new period of critique in anthropology and engagement with questions of cultural representation and invention. In this course, we will revisit those debates with an emphasis on investigations and writings of human and nonhuman relations.
Instructor(s): M. Banahi
Area: Humanities, Social and Behavioral Sciences.

**AS.070.112. Troubling Africa: Bodies, Politics, Experience of the Well-being.**
The course seeks to engage students on the question of how well-being is construed in African contexts. By examining well-being through an ethnographic lens, we will explore the construction of “Africa” for the way it gives shape to particular ideas about the body, politics and experience. Well-being as an ethnographic object has a rich history in various African locales, and continues to be an important trope in contemporary life, whether figured as wealth, health, and stability or as loss, disease or disorder. In order to trouble both notions of well-being and the idea of “Africa”, the course will do two things: firstly, we will look for the ways in which the geo-cultural notion of an “African” experience has informed scholarly analysis, political histories, and modes of governance. Reading critically will allow us to de-stabilize the categories of life and well-being that are ascribed to, and claimed by, “Africans”. Secondly, we will examine particular forms of trouble that often attach to the imagination of Africa, with specific reference to forms of mental, physical and social disorder. Rather than arriving at a deconstruction of the idea of Africa, or suggesting a vital form that is essential to Africa, the course relies on ethnographic and historical modes of exposition to ask a series of questions about local lives. While grounded within anthropology the course will read texts that go beyond the borders of the discipline, both scholarly and popular, in order to track the development of specific ideas about well-being in Africa and to examine anthropology’s involvement in these ideas. The course is organized thematically rather than adhering to a chronological or spatial logic. The intention is to place together quite different texts that work in tension to illuminate the particular theme for each week.
Instructor(s): T. Cousins
Area: Social and Behavioral Sciences.

**AS.070.113. Freshman Seminar.**
Students will be introduced to anthropology through ethnographic films and selected readings in anthropology.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.114. Religion in the Media.**
This course examines the ways in which conventional and non-conventional media re-create religious experiences. Increasingly, religion is not only experienced in sacred spaces, and through ritual and scripture, but is also communicated through radio, TV, film, and the Internet, as well as in consumer culture and political campaigns. This course examines the significance of religion in modern life from historical and contemporary anthropological perspectives, paying attention to questions of religious and national differences, as well as material and symbolic practices.
Instructor(s): M. Wilson
Area: Humanities, Social and Behavioral Sciences.

**AS.070.115. Selling Muslim Pop Music in Pakistan.**
Pakistan is famous for its Sufi Muslim saints and their mystical poetry, rendered in folk, classical and popular genres. Recently a new wave of musicians have come to be widely distributed through new markets and media to urban audiences who seek to recover their folk heritage. The musical television program Coke Studio has been particularly influential. Reading poetry, translations, interviews of performers and scholarly literature, and listening to a wide range of Sufi music, we will examine the tensions of tradition/modernity, rural/urban, and folk/global, in the production and marketization of Pakistani popular culture.
Instructor(s): G. Asif
Area: Humanities, Social and Behavioral Sciences.

**AS.070.117. Desire and the Photographic Image.**
In this course we will explore our attraction to the photographic image. Why do we look at photographs in ways that seem beyond our control? We will investigate the power of photographs to unsettle our boundaries, affect our bodies, and reappear in our dreams and visions. The course will involve a set of readings drawn from philosophy, psychoanalysis, visual studies, and anthropology. Class assignments will consist of small write-ups and a collective curatorial project.
Instructor(s): M. Sehdev
Area: Humanities.

**AS.070.119. Studying Women, Gender and Sexuality.**
How does our gender determine our realities? How does gender become a category through which we classify and organize our world? How useful is this category in understanding our relationships with ourselves and with others. In this course we will study the works of the philosopher Judith Butler coupled with some articles that will illuminate how concepts of sex, sexuality, gender, bodies and desire inter-twine with each other to shape our existence.
Instructor(s): V. Saria
Area: Humanities, Social and Behavioral Sciences.

**AS.070.120. Reading the Middle East.**
In this course, we will think critically about what it means to take the peoples of the Middle East as objects of anthropological inquiry, as well as examine the relationship between the ethnographic and the literary. Furthermore, we will ask why an understanding of colonialism is fundamental to reading Arab literature. To aid us in these endeavors, we will explore themes such as Orientalism, exile, occupation, and resistance through ethnography, fiction, poetry and film.
Instructor(s): M. Banahi
Area: Humanities, Social and Behavioral Sciences.

**AS.070.121. Tibet in Exile: Life and Teachings of the Dalai Lama.**
This course explores the history of Tibet through the nature of political and spiritual rule that has governed it since 1642: the institution of Dalai Lama. Through films, popular press, and the philosophical and spiritual writings of the now living 14th Dalai Lama, we will understand the multiple meanings that this figure consolidates, as a teacher, a spiritual guide, and a political leader who embodies the hope for the existence of a future Tibet.
Instructor(s): A. Brandel; S. Bagaria
Area: Humanities, Social and Behavioral Sciences.
AS.070.122. Climate Change in Everyday Life.
Climate change is the average of weather over long periods of time. It is usually studied by means of global simulation models. More recently human activity affecting climate has also begun to be studied and with it the effects of climate change on the human body, activity and society. In this course we will draw upon film, scientific reportage, ethnography, literature and philosophy to explore the human embodiment of climate change within everyday life.
Instructor(s): N. Khan; R. Tobias
Area: Humanities, Social and Behavioral Sciences.

This introduction to the budding field of Anthropology of Christianity will help students learn about the diversity of Christiansities that have emerged as Christian religious ideas and practices have been promoted and propelled in various regions of the world. As students, investigators and scholars of religion, how do we make sense of, and describe, the wide array of ideas and experiences that Catholic, Protestant and Pentecostal Christians of various cultural backgrounds hold to be true?
Instructor(s): N. Mahadev
Area: Social and Behavioral Sciences.

This course will introduce students to the work of one of the most influential social scientists and thinkers of the past century, Claude Levi-Strauss. We will focus on his most widely influential text, The Savage Mind, its arguments about the nature of human thinking, its critique of the idea of "savage" peoples, and its lasting import for the human sciences and humanities.
Area: Humanities, Social and Behavioral Sciences.

AS.070.129. Introduction to the Anthropology of the Middle East.
This course introduces the students to some of the main themes and debates shaping the anthropology of the Middle East. It will begin by critically analyzing the definition of the 'Middle East' and of the 'Orient' and by presenting an overview of the 'zones of theory' which characterized the discipline at its inception. It will then explore the contemporary re-articulations of such themes and the emergence of new themes and debates, such as the secular/religious divide, the modernity debate, the anthropology of Islam and the ethical turn, gender and feminism, neoliberalism, consumerism, cosmopolitanism, migration and mediation. The objective is to convey the main lines of anthropological inquiry within each theme, and to show their relevance to the understanding of contemporary Middle Eastern societies.
Area: Humanities, Social and Behavioral Sciences.

The goal of the course will be to draw attention to the legacy of recent wars in Iraq and how it is manifested in the daily lives of Iraqi families and communities. While the rise of ISIS will not be ignored, the objective will be to understand how the myriad obstacles Iraqi civilians are facing emerge from a broader history of war and are not reducible to recent events. Readings include works from Hayder Al Mohammad, Omar Dewachi, Derek Gregory, and Ahmed Saadawi.

AS.070.132. Invitation to Anthropology.
The screen that brings you last night’s Instagrams and celebrity gossip also flashes glimpses of melting icecaps and burning rubble. These are complex times for human beings, both exhilarating and deeply unsettling. This course introduces anthropology as a way of reflecting on the challenges of contemporary life around the globe, focusing on themes such as faith, war, technology, money and ecology.
Area: Humanities, Social and Behavioral Sciences.

AS.070.133. Studying the HIV/AIDS Epidemic.
This course will introduce students to the study of the HIV/AIDS epidemic as scholars in the social science and humanities have undertaken it. The readings will include ethnographies of the disease in the non-west and short theoretical readings to complicate notions of health, pleasure, healing and cure. Furthermore, by focusing on the various regions of Africa, the course hopes to demonstrate the manner in which the social and cultural landscape change the experience of the epidemic.
Area: Humanities, Social and Behavioral Sciences.

AS.070.134. Chemical Pollution and Social Life.
The present is marked by a ubiquitous exposure to different sorts of toxic chemicals: from disasters that affect entire communities to the built environments in which we live and work, from the traces of pesticides in our food to the worldwide disrupting effects of oil production. Drawing from social theory, ethnography, environmental history, policy documents, newspaper articles, commercial ads, and documentaries, this course will introduce anthropology as a way of thinking through the interactions between processes of chemical pollution and social worlds.
Instructor(s): J. Moreno Garcia
Area: Humanities, Social and Behavioral Sciences.

AS.070.137. Gandhi: His Time and Ours.
This course is based on a close reading of some writings by one of twentieth century’s greatest political thinkers, Mahatma Gandhi. Aside from engaging long-standing questions of non-violence, renunciation, and efficacy of political thought and action in Gandhi’s philosophy, we will also make an attempt to humanize the figure of Gandhi and see his thought as that of a man who dealt with both historical and personal struggles.
Area: Humanities, Social and Behavioral Sciences.

Despite being a common experience, pain remains a mystery for both medicine and the humanities. Can it be described? Measured? Eliminated? Is it the same for everyone? This course explores some of the ways in which pain is represented, interpreted and addressed in contemporary clinical and social settings, combining ethnographic and testimonial literature with fiction and film to illuminate key ethical and political issues at stake in defining and treating pain.
Instructor(s): P. Madariaga Villegas
Area: Humanities, Social and Behavioral Sciences.

AS.070.139. Markets and Morals.
This course studies forms of exchange as they are imagined and experienced across diverse political and religious settings. The aim is to understand the cultural rationalities and moral dimensions of economic ideas and activities, such as gifts, commodities, sacrifice, investment, credit, debt and value.
Instructor(s): A. Saraf
Area: Humanities, Social and Behavioral Sciences.
**AS.070.142. Commodities and Comforts: The Anthropology of Mass and Popular Culture.**
What tools do anthropologists use to understand the contemporary? How do anthropologists understand the world in which we live and the objects that surround us in daily life. What might anthropologists have to say about Hollywood films, cyber space, shopping malls, fast food, raves, hip-hop, and the 24 hour news media? Through an investigation of anthropological engagements with mass and popular cultural forms, as they are consumed, enacted, or resisted across the globe, students will explore different methodologies and approaches to the study of contemporary cultural forms.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

**AS.070.144. Anthropology and Visual Media.**
This course examines the production of visual media within anthropology. We look at the particular ways in which visual media such as film, television, and photography shape anthropological practice.
Instructor(s): C. Venkataramani
Area: Humanities, Social and Behavioral Sciences.

**AS.070.147. Gender and Power in Transnational Perspective.**
How do gender and sexuality circulate across national, political, and technological borders in the contemporary era? How has feminism itself become part of these cultural circulations? This course seeks to reconnect the disparately gendered spheres of the intimate and the global, situating the feminized “private” domains of love, sex, and caring within fields of global political economy. We will engage anthropological studies, social-theoretical and activist texts, and film. Readings from Mohanty, Inhorn, Abu-Lughod, Ong, Ticktin, Puar, and others.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.150. The Anthropology of Africa.**
This course revitalizes classic debates about the forms and dynamics of Africa self-governance, once depicted as “The African Genius”. Anthropological approaches and artistic sources are brought to bear on current African politics and governance.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.154. Maps and Mapping. 3 Credits.**
This course explores maps as cultural documents and ethnographic sites. Students will learn how cultural understandings of space, time, and the visible world shape cartographic conventions. Through mapping exercises we will explore how ethnographer can use maps to theorize the nature of political, cultural, and economic life.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.179. Child Adoption and Family Making.**
The course takes child adoption as a starting point to critically explore how kinship and family are connected to legal practices, technological innovations, and broader historical, political, and socio-economic processes. Dean’s Prize Freshman Seminar
Instructor(s): A. Reyes Kipp
Area: Humanities, Social and Behavioral Sciences.

**AS.070.189. Islamic Critique: Ethical and Political Reasoning.**
This course investigates the concepts and practices of critique available in contemporary Muslim societies. Focusing on moral and political dimensions of critique, we examine genealogies and exchanges among Islamic traditions and those of the European Enlightenment. Dean’s Prize Freshman Seminar.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.200. On Secrets - Their concealment, Revelation & Beyond.**
We track secrecy as a social process. We examine secrets – their concealment and modes of existence (secret societies, esoteric rituals, state secrecy); the politics of their revelation (from colonial contexts to Wikileaks); and their modes of existence thereafter in the modern world (within public spheres, as intellectual property).
Instructor(s): U. Nair
Area: Humanities, Social and Behavioral Sciences.

**AS.070.202. Economic Anthropology.**
How do the abstract principles of economics play out in a diversity of times and places? This course surveys anthropological research on the social organization of labor, the political institutions that underlie wealth and property, and the cultural meanings of money and commodities. Through these topics, we will look at enduring debates about the rationality of markets and the nature of capitalism.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

**AS.070.203. Healing: Politics and Poetics.**
Metaphors of health and illness; individual and social. The body in pain and the body politic. Ethnographies of historical memory vis-à-vis medicine, epidemics, sacredness, shamanism, terror, humanitarianism, truth and reconciliation.
Instructor(s): J. Obarrío
Area: Humanities, Social and Behavioral Sciences.

**AS.070.211. The Production of European Culture.**
This course is an introduction to the anthropological study of “cultural production” in Europe, from literature and performance to museums and public art.
Instructor(s): A. Brandel
Area: Humanities, Social and Behavioral Sciences.

**AS.070.218. Politics of Space in Israel/Palestine.**
This course will explore the importance of space in Israel/Palestine. This course will not be a political or historical review of the conflict; instead, it will focus on how space is lived, occupied, fragmented, distributed and produced by urban planning, military operations and security technologies, flows of labor and capital, along with a host of other processes. Looking primarily at anthropological texts, this course will attempt to complicate the political and territorial binaries that often frame any understanding of Israel/Palestine.
Instructor(s): P. Kohlbry
Area: Humanities.

**AS.070.222. Africa in the 21st Century.**
Rapid urbanization has created new needs, occupations, entertainments, etc., outside the “formal sector”. We use anthropological studies, African literature, film and the press on-line to understand making a living.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences.

**AS.070.224. Plastic.**
Plastic is a ubiquitous substance in the contemporary world. Ideas about the plasticity or malleability of human nature are also pervasive. Drawing on anthropology, history of science, environmental studies, art, design, films and other media, this course will examine the plastic dreams and nightmares that haunt our lives today.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.
How are cultural and political lives shaped by the promise of subsoil resources? This course explore the multiple ways in which mineral extraction reshapes politics, law and ethical life.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

Over the past two decades, African cities have absorbed rapid population increase without accompanying economic growth. Students will review the major challenges of this mode of urbanization and explore the vibrant ways residents have sought to meet them. Following anthropology’s commitment to lived experience, we will track these issues through the twists and turns of everyday life, and consider what they may say about urbanity more broadly in the 21st century. Topics include livelihood, the built environment, conflict and membership, and popular culture.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

AS.070.259. Gift and Sacrifice.
How do gifts become the foundation of society? How does the fetish take control over a person? What is the meaning of the ritual sacrifice of living beings and things? The course will explore classical and contemporary anthropological explorations of circulation, exchange, of power, dread and desire.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

What makes one a relative? How do we know we are related as Kin, or as family? This course provides a survey of ethnographic material devoted to the modalities through which kin relations and family are made and come to be known. Students will engage the work of Strathern, Rapp, Das, Trawick, Carsten, Haraway, Malinowski, Morgan, Leach, and others.
Area: Humanities, Social and Behavioral Sciences.

AS.070.262. Cuban Intellectuals, Cinema, and the State.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Area: Humanities, Social and Behavioral Sciences.

AS.070.264. Discover Hopkins: What is Scientific Experimentation?.
How do scientists design and conduct experiments? In what ways experimental results advance our understanding of scientific theories? In this introductory course, we will discuss how experimentation contributes to scientific knowledge making. Reading a number of key articles, we will explore the ways in which an experimental model is developed in behavioral neuroscience. We will discuss how neurobiologists interpret psychological concepts and theories by drawing on animal experimentation.
Instructor(s): B. Polat
Area: Humanities, Natural Sciences.

AS.070.265. Anthropology of Media.
We will examine the mediation of contemporary cultural life through technologies such as cinema, television, radio, design, and the internet, investigating questions of desire, power, identity, and belonging. Student coursework will center on the development of an ethnographic video project.
Area: Humanities, Social and Behavioral Sciences.

AS.070.268. Anthropology of Health and Disease.
This course offers a wide-ranging study of the problems of disease and health, including the areas of birth and reproduction, poverty and local ecologies of care, death and dying, and sexuality. Considering these areas across world regions, this course invites students to question the lines of normal and abnormal, the margins of institutions, the measures of success in global health, and the transformation of living and dying in relation to violence, institutional failure, and new technologies.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

AS.070.270. Latin America through Film.
This two credit intersession class provides a brief introduction to the very heterogeneous cultural and social world of Latin America through cinema. Each week through screenings and discussions students will analyze how and with what aesthetics different films have engaged with social and political issues ranging from gender relations, race, history, and political violence in different countries of the region.
Area: Humanities, Social and Behavioral Sciences.

AS.070.271. Media, Culture, and Publics.
How do media shape local and global publics? This course examines methodological and theoretical accounts of media and its impact on ideologies and practices of nationalism, religion, citizenship, and socialism.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.

AS.070.272. The Savage & the Primitive.
This class will investigate the figure of the savage and the place of the primitive in anthropology, drawing on the disciplines engagement with hunting/gathering, stone age economics, head hunting, human sacrifice, and other practices considered primitive in the present and the past.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

Both a mode of research and a genre of writing, ethnography is a practice essential to anthropology. This course will examine what is at stake in this practice of taking readers and interlocutors from one world into another. We focus this spring on the theme of “Creation and Destruction,” reading a handful of contemporary ethnographic texts and trying out exercises in ethnographic writing. Required for anthropology majors.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.275. Reproduction, Kinship, and the State. 3 Credits.
What makes a relative? How are reproductive futures made and unmade? This course takes reproduction as site to examine the interplay of kinship relationships and the state. We will take topics including adoption, gay parenting, the medical and social aspects of childbirth, and reproductive technologies to explore how reproductive futures are unevenly distributed, endured, aspired to, and re-made.
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

Breaking in Baltimore is a week-long immersion experience where students explore social justice issues by engaging greater Baltimore through direct service and educational sessions. The Refugee Community program explores the challenges of refugee immigrants and the communities that support them. Students will participate in classroom sessions as well as service learning projects in greater Baltimore with local agencies. There is also a DC policy field trip to engage these issues from a national perspective. Must apply through Center For Social Concern x6-4777. Application due Early November. Fee: Approx. $125.

Instructor(s): R. Francis
Area: Humanities.

AS.070.277. Contested Indigeneity.

This course will introduce students to the diversity of indigenous peoples and their situations globally, as well as to their agency and innovation in grappling with challenges across a range of social systems, political contexts, and ecological conditions. Cross-list: PLAS Area: Humanities, Social and Behavioral Sciences.

AS.070.279. Ecological Anthropology. 3 Credits.

This course explores questions of nature, ecology, and environment from an anthropological perspective, drawing on case studies from around the globe. Topics will include human and animal relations, forest and marine livelihoods, industrial development and activist politics, as well as the urban ecology of Baltimore.

Area: Humanities, Social and Behavioral Sciences Writing Intensive.

This course combines anthropological perspectives with the discussion and examination of technology-based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.

Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences.

AS.070.286. Crafting Community Development Projects in Baltimore.

Students will craft community development project proposals in the areas of education, health, community building or economic development. This hands-on course will focus on Baltimore City as it introduces students to the theory and practice behind community development projects, and their application to the arts. Students will conduct their work in groups and elaborate their project proposal in the city of Baltimore.

Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

AS.070.287. Displaying Race.

Through hands-on archival and museum research, students in this class will develop a proposal for displaying a small collection of plaster busts that were cast in the late 19th century from live indigenous subjects. Readings from the class will explore the ethical, legal and political issues surrounding the public display of anthropological and historical artifacts that were collected as part of now discredited regimes of racial classification. How can displays be used to reveal the distance that separates 19th century racial thought from our modern day understandings of physical and cultural difference? How can we responsibly display likenesses that may have been collected under coercive conditions? How can such objects be used to educate people about the place of indigenous peoples in the museum? What laws and ethical conventions govern the display of such objects? In addition to regular class meetings, students will be expected to carry out archival research and interviews in local archives and museums.

Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

AS.070.290. Modern South Asia: Bangladesh/Pakistan.

Bangladesh and Pakistan, two major regional players in South Asia, originate in the 1947 Partition of India and shared nationhood between 1947 and 1971, ending with the War of Independence in 1971 in which Bangladesh separated from Pakistan. Since that time the two nations have been on different paths that have sometimes mirrored each other. This course brings together contemporary works of national histories, social movements and cultural production to consider the politics of self-differentiation and the points of convergences.

Area: Humanities, Social and Behavioral Sciences.

AS.070.291. Social Networks and Beyond.

What is a network? We all cultivate, take part in, think with, are frustrated by, and utilize networks of all different kinds, but what are they? Can they be located? In what ways do they (not) exist? What counts as participation? This course investigates how social scientists and other have approached networks. The goal is to discuss connections and to discover the different agents at work in their making and imagination. Students will read literatures touching on the topics of rumor, conspiracy, the internet, kinship, epidemiology, and finance so as to become aware of how anthropologists conceive of and contribute to the formation of networks.

Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

AS.070.293. Anthropology of Material Worlds.

This course explores how anthropologists study material forms and objects in relationship to social, political, and cultural life. Topics to be considered include, totemism, art, engineering, garbage, display, collection, and the fetish.

Area: Humanities, Social and Behavioral Sciences.

AS.070.294. Political Anthropology of Africa.

The course will explore classical and contemporary ethnographies of the political in Africa, examining how their authors address issues of power, hierarchy and symbol. We will study various articulations of state, ethnicity and community that are analyzed by observing relations between power and resistance or between law, economy and violence through war, custom and ritual. The seminar will also address the way in which Africa has been constituted as a key source of the sub-field of political anthropology through colonial trajectories, postcolonial detours and the political imagination of the past and the future.

Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.
Area: Humanities, Social and Behavioral Sciences.

The course critically examines the techniques, practices, and experiences of global health policies and programs worldwide, and the effects they have on individuals, families, communities, and states. Dean's Teaching Fellowship Course
Instructor(s): L. Reynolds
Area: Humanities, Social and Behavioral Sciences.

AS.070.303. The Romantic Legacy of Anthropology.
The word "romantic" has long carried negative connotations within anthropology meaning the tendency to idealize, exoticize, or seek out the irrational. Instead, through a focus on the themes of science, nature, art, intuition, systematicity and creativity, we suggest that romantic philosophy has offered and continues to offer much of interest for contemporary anthropology. Drawing on readings in philosophy, anthropology, science and literature, we explore the long suppressed romantic legacy of anthropology.
Instructor(s): A. Brandel; N. Khan
Area: Humanities, Social and Behavioral Sciences.

The course takes child adoption as a starting point to critically explore how kinship and family are connected to legal practices, technological innovations, and broader historical, political, and socio-economic processes. Cross List: WGS, PLAS. Dean's Teaching Fellowship Course.
Instructor(s): A. Reyes Kipp
Area: Humanities, Social and Behavioral Sciences.

AS.070.305. Indigenous peoples and the modern state.
Through diverse readings and films, this course will investigate the tense relationship between indigenous peoples and sovereign states, which has occupied scholars in disciplines like political science, law, anthropology, and history.
Area: Humanities, Social and Behavioral Sciences.

Area: Humanities, Social and Behavioral Sciences.

This course studies markets across diverse religious and political settings to explore the cultural rationalities and moral dimensions of economic activities such as exchange, circulation, investment, credit, debt and value.
Instructor(s): A. Saraf
Area: Humanities, Social and Behavioral Sciences.

This course will introduce students to anthropological understandings of therapeutic and scientific practices in contemporary psychiatry. Through a selection of seminal readings in anthropology and history, we will explore the integral relationship between psychiatric knowledge and social and economic contexts. The course material will expose students to diverse approaches in the scholarship, which explore the role that psychiatric knowledge plays in the administration of social life and in shaping present cultural understandings of self and interpersonal relationships.
Area: Humanities, Social and Behavioral Sciences.

AS.070.309. Anthropology of Media.
We will examine the profound mediation of contemporary human life through technologies like film, television, radio, mobile phones, iPods, and the Internet, investigating questions of desire, politics, production, and the virtual. SPECIAL NOTE: There will be a $30 lab fee for the course.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.310. Troubling Africa: Bodies, Politics, Experience of Well-Being.
Dean's Teaching Fellowship Course: Explores well-being in Africa in anthropological and popular accounts, paying special attention to the role of ritual, memory, experience, and the politics of sexuality.
Instructor(s): T. Cousins
Area: Humanities, Social and Behavioral Sciences.

AS.070.311. Martyrdom between Judaism, Christianity, and Islam.
The course proposes to follow the development, from Ancient times up to the present, of Jewish, Christian and Muslim traditions that make martyrdom a contested form of witnessing to God’s power and justice.
Area: Humanities, Social and Behavioral Sciences.

Drawing on anthropological theory the course examines cultural context and conditions that have shaped our ideas about the monstrous. We discuss the relationship between monsters and marginal forms of life, and how images and ideas about "monstrosity affect the life of human beings who happen to share the marginality of monsters.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

The aim of this course is to enable you to ask intelligent questions about the ways individuals are called upon as "religious", and more specifically, to allow to you to engage in a reflection on the publics of which they are a part, and the means by which they come to cultivate a sense of personhood. Closely reading theory, ethnography, and literature in relation to each other, we will try to develop a nuanced understanding of the many ways in which human beings have imagined and conducted themselves as religious persons. How do ideas of imagination, habit, desire, and the senses play into our understanding of cultures of faith?
Instructor(s): M. Wilson
Area: Humanities, Social and Behavioral Sciences.

Topic: The anthropological ethos. What is it to be an anthropologist? How do we pose questions? What field methods characterize our mode of inquiry? What textual sources do we turn to in support of our fieldwork or even just for inspiration? How do we glean evidence or attempt interpretation of the material we gather? How do we know if an interpretation succeeds or fails? This course will explore these questions through readings in anthropological classics and hands-on fieldwork and writing exercises. Required course background: two or more prior courses in anthropology (not cross-listed courses). This course is a requirement for anthropology majors.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.
**AS.070.319. Logic of Anthropological Inquiry.**  
Anthropology combines theory and methods from the sciences and the humanities. We take a close look at those logics, as shown in ethnography as a mode of inquiry and as a genre of writing. This will count as a required course for Anthropology majors but open to all undergraduates.  
Instructor(s): J. Obarrio  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.320. Anthropology of Time.**  
The course is a cross-cultural exploration of ideas of time and temporality found in ethnographic, philosophical and literary sources: Anthropological perspectives on relations among past, present and future; Ritual, imagination and social practice in the contexts of religion, development, finance, catastrophe, crisis, democracy, revolution; Analysis of representations of time and the Other in anthropological works and media reports; the contemporary and the untimely.  
Instructor(s): J. Obarrio  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.321. Prisons and Police.**  
How does incarceration generate sociality? How do prisons and policing figure in anthropological thought and social theory? This seminar explores both the emergence of prisons as forms of punishment and reform as well as sociality, and consider policing in relation to concepts of population as well as neighborhood. It draws from classic topics in anthropology of law, custom, and crime as well as explores contemporary engagements with topics of incarceration and security. It draws widely from ethnography, social and political theory, film, public health studies, and sociological works on incarceration.  
Instructor(s): C. Han  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.323. Money and Moral Economy.**  
What is fairness in market economies? Anthropological study of money in the mediation between “goods” (as commodities) and “the good” (as a quality of life).  
Instructor(s): J. Guyer  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.325. Anthropology Of Money.**  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.327. Poverty's Life: Anthropology of Health & Economy.**  
Medicine, economics, and ethics have profoundly shaped debates on poverty. This course analyzes these debates and tracks the relationships between body, economy, and the everyday. How can anthropological reasoning and methods inform approaches to health and economic scarcity and insecurity?  
Instructor(s): C. Han  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.329. Care and Affliction in the Everyday.**  
How are illness, suffering, and potentials for well-being shaped through our everyday relations? In this seminar, we will explore how relations of care make and unmake lives in contexts of inequality and precariousness. We examine how a multiplicity of social ties, from kinship to neighborhood networks, articulates with institutional margins, and mediates violence, scarcity, and material realities of disease and illness. Cross-listed with Public Health Studies  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.331. Anthropology of Poetry and Prayer.**  
What kind of activity is prayer? Are we talking to God(s), to our ancestors, to ourselves? What do poetry and prayer share? The course will explore these and similar questions with particular attention to questions of repetition, memory, meaning and presence.  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.335. Anthropology of Science and Medicine.**  
This course will introduce students to a number of key concepts and methods in anthropology of science and medicine. Providing a general introduction and a systematic survey of the scholarship, the course seeks to shed light on the medico-scientific problems of modern life from the viewpoint of social-scientific inquiry. Through seminal publications within the field, we will explore the effects of scientific research and science-based medicine on human life, social relations, and cultural understandings of self. We will also discuss the ways in which cultural norms and values inform and shape the recent developments in science and medicine.  
Instructor(s): B. Polat  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.337. Digital Media, Democracy, and Control.**  
This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.338. Anthropology of Prayer.**  
What kind of activity is prayer? Are we talking to God(s), to our ancestors, to ourselves? What are the differences between choosing our own words and repeating the words of an established prayer? The course will explore these and similar questions with particular attention to the language of prayers across a number of religious traditions.  
Instructor(s): N. Haeri  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.341. Senses of Community.**  
How do ideals of community, place and belonging shape our sense of history and political possibility? This class explores this question through case studies that focus on competing experiences with, and desires for, community in modern Latin America. Cross-listed with Program in Latin American Studies  
Area: Humanities, Social and Behavioral Sciences.

**AS.070.344. Muslim Societies and Modern States: Ethnographic Encounters.**  
Through a close reading of four recent ethnographies, this course explores the diverse ways Muslims encounter the power of modern states in the contemporary world. Topics include: state-led efforts to reform educational discipline and curricula in Yemen, the imaginary topos of dreams as a space of encounter in Egypt, and legal institutions in Egypt and Pakistan. Diverse ethnographic approaches to a common theme raise such questions as: how do legal reforms constrain, enable or express forms of moral striving in everyday life? what forms of knowledge are sanctioned by the state and what forms exceed its limits? what kinds of community become possible in the grip or the margins of modern governance?  
Instructor(s): J. Bush  
Area: Humanities, Social and Behavioral Sciences.
**AS.070.346. Cinema and Ethnography.**
Films, like ethnographies, stage encounters with foreign worlds. We will investigate this parallel by examining, side-by-side, cinematic and anthropological representations of subjects like environmental conflict, urban poverty, religious pilgrimage and media culture.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.347. Anthropology and Public Action.**
Anthropologists have used their expertise in public debates, legal cases, advisory roles and so on, and have studied the "public sphere". General and case studies, following of our professional association, shows how anthropological knowledge has been mobilized.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.348. Anthropology of Mental Illness.**
This course explores how the institutions of the family, state, and neighborhood respond to and shape mental illness; how the normal, abnormal, and pathology are experienced and defined; and how disease categories circulate in social worlds.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

**AS.070.349. Buddhism and Science.**
The discourse of Buddhism and Science represents these two distinct truth systems as commensurable. This course examines this discourse anthropologically, towards understanding the logics and practices whereby such commensurability comes to be claimed.
Instructor(s): U. Nair
Area: Humanities, Social and Behavioral Sciences.

**AS.070.352. Evolution, Ecology, Becoming.**
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others.
Co-listed with AS.070.610
Area: Humanities, Social and Behavioral Sciences.

**AS.070.357. An Anthropology of the City.**
Strangers, neighbors, proximities, contagion, segregation. How do these notions track with notions of the city? In this course, we will explore the city through both anthropological literature and primary materials across different world regions. We will focus specifically on themes of dying and death, proximity, and stranger sociability. Particular attention will be paid to studies of poverty.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.368. Modern South Asia.**
Area: Humanities, Social and Behavioral Sciences.

**AS.070.371. Forms of Critique in Islam.**
This course examines concepts and practices of critique brought to bear in (and upon) Muslim societies. Readings classic ethnographic monographs along with primary texts of Muslim critics, we focus on forms of reasoning, ethical practices and aesthetic expressions of political critique.
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences.

**AS.070.375. Language in Ritual.**
This course focuses on language in ritual. It examines the roles of language in prayer, liturgical and other ritual performances from diverse shamanic and religious traditions, including Buddhism, Hinduism and Islam.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.377. Ethnographic Writing.**
We will closely examine the narrative form and force of a few major works of anthropological writing, and pursue experiments of our own in ethnographic description and expression. Co-listed with AS.070.603.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.385. From Sexual Nature to Sexual Politics.**
This course traces anthropological concern with questions of sexuality. Students will explore anthropological notions of primitive promiscuity, cultural configurations of the correspondence between sex, procreation, and birth, and ideas about sexual rites of passage. The course will end with a discussion of sexual politics in Euro-America and public concern over HIV/AIDS. The course draws on the work of Freud, Malinowski, Meade, Herdt, Povinelli, Rubin, Bersani and Halperin. Cross-listed with Women Gender Studies
Area: Humanities, Social and Behavioral Sciences.

**AS.070.414. Kinship at the Core.**
It is often said that the study of kinship defines anthropology as a distinct discipline within the social sciences. This course tracks the emergence of kinship as a subject and object of anthropological inquiry, and traces some of the transformations that mark the effort to develop theories of kinship (genealogical method, social contract, structural-functionalist, structuralism, psychoanalysis, etc). A sample of authors to be read include: Morgan, Rivers, Malinowski, Radcliff-Brown, Leach, Levi-Strauss, Pateman, Schneider, Trawick, and Povinelli. Open to Graduate Students.
Area: Humanities, Social and Behavioral Sciences.

**AS.070.415. The Machine in Nature.**
The picture of nature as machine-like or systematic in its organization was once dominant in ecological anthropology and cognate disciplines but fell out of favor in the 1970s and 80s. More recently it is enjoying a revival in efforts to conceptualize anthropogenic climate change. In this course we will read classical and newer writings to understand the promise and problems with this mode of viewing nature. Readings include Pierre Hadot, Karl August Wittfogel, Roy Rappaport, Phillipe Descola, Gregory Bateson, Clifford Geertz, Stephen Lansing, Anna Tsing and Stefan Helmreich.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

**AS.070.416. Visual Languages in Medical Knowledge.**
This interdisciplinary course will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Open to Graduate Students
Co-listed with AS.211.416 and AS.214.616
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.
AS.070.418. The Comparative Tradition in Anthropology. 3 Credits.
Anthropology is often imagined as the study of a particular place and people. But comparative methods date back to the beginnings of the discipline, efforts that are echoed in recent works of global and ambitious scope. In this seminar, we examine the theory and practice of comparison in anthropology, drawing in historical as well as contemporary studies on themes such as art, economy, science, and belief.
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.419. Logic of Anthropological Inquiry.
Anthropology is an endeavor to think with the empirical richness of the world at hand, a field science with both literary and philosophical pretensions. This course grapples with the nature of anthropological inquiry, reading classic works in the discipline as well as contemporary efforts to reimagine its foundations. Required for anthropology majors.
Prerequisites: Prereqs: AS.070.273 OR AS.070.317
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.420. Anthropology of Death and Dying.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.422. Infrastructure.
This course surveys ethnographies of built networks such as roads, power grids, and water pipelines as sites of cultural meaning, political struggle, and social interaction. We will consider the kinds of collective existence they make possible today, and their relationship to anthropological thought.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

What are the conceptual challenges in thinking about violence and non-violence as categories of thought and practice? We will examine these issues through ethnographies of war, collective violence, and domestic violence.
Area: Humanities, Social and Behavioral Sciences.

AS.070.431. Senses of the State.
This course examines ethnographic approaches to the study of state power and organization. How does a “traditional” ethnographic focus on locality and place help us to theorize the scalar qualities of the “global” neoliberal state? How do anthropologists study the temporal, material and sensory domains through which people make sense of the state as a bureaucratic, governmental and sovereign presence in their lives?
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

AS.070.445. Health, Disease, Poverty: New Ethnographies from India.
We will study the multiple dimensions of health and disease in the context of poverty and vulnerability in India. The course will focus on institutions and experiences, and ask how the lives of patients and healers connect in local worlds. We will end with some recent controversies on reforming health care in India.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.
AS.070.605. Anthropology and the Everyday.
Analysis of the everyday groans under the theoretical weight of concepts such as "modernity," "governmentality," "capitalism," "globalization" and more recently "security." What might a sharper focus on the everyday yield in terms of its own analytical frameworks and empirical descriptions? We read some contemporary greats (Foucault, Derrida, Cavell, de Certeau, Lefebvre). Simultaneously we look at how each has been received within ethnography by reading anthropologists in engagement with them (Mahmood, Ivy, Das, Siegel, Harvey). We ask what critical stakes anthropology maintains in relation to the everyday.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.606. Professionalization.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.608. First Year Proposal Writing.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

What are the conceptual challenges in thinking about violence and non-violence? What do we mean when we talk about categories of thought and practice? We will examine these issues through ethnographies of war, collective violence, and domestic violence.
Area: Humanities, Social and Behavioral Sciences.

The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orient anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others.
Co-listed with AS.070.352
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

This seminar will address contemporary questions of state and citizenship in the light of colonial and imperial dynamics at the beginning of the twenty-first century: transnational and national sovereignty in relation to local configurations of law, capital and political violence; processes of subsumption, extraction and financialization. Authors include Negri, Arrighi, Harvey, Chakrabarty, Mbembe, Mamdani, Chatterjee, Corinol, Dussel.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.612. Self, Narrative, and Autobiography.
This seminar takes insight from the idea that the "I" is not simply a pronoun. We will read texts on the self, the fragment, and narrative in anthropology, along with texts that make available different pictures of the self.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

AS.070.615. The Comparative Tradition in Anthropology.
Anthropology is often imagined as the study of a particular place and people. But comparative methods date back to the beginnings of the discipline, efforts that are echoed in recent works of global and ambitious scope. In this seminar, we examine the theory and practice of comparison in anthropology, drawing on historical as well as contemporary studies on themes such as art, economy, science, and belief.
Area: Humanities, Social and Behavioral Sciences.

AS.070.616. Proseminar.
This course will consist of close reading of anthropological and philosophical texts to trace some important aspects of the underlying presuppositions of social theory. We will try to see how regions generate both data and theory; and also see how some abiding concerns around the relation between structural formations and formations of subjects are expressed in classical and current anthropological thought.
Instructor(s): M. Degani; V. Das.

This seminar will focus on learning method in anthropology. We will explore the relation of the empirical and conceptual through ethnographic materials gathered during preliminary fieldwork, and we will explore the craft of ethnographic writing. Limited to Anthropology Graduate Students
Instructor(s): C. Han.

AS.070.619. Ethnography and Literature.
We will look at ethnography as a particular genre of narration and ask how we might analyze the relation between ethnography and literature at the level of imagination, techniques of narration, and the place of the rest in wording the world.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.621. An Ontological Turn?.
Recent years have seen a number of ambitious and controversial efforts to find, in ontology, a means of surpassing the inherited humanism, culturalism, and essentialism of anthropology. This course will critically examine this proposition of a fundamental "turn" in our thinking, juxtaposing recent work on matters of perspectivism, materialism, relationality, and divinity with earlier attempts in anthropology to grasp being and becoming otherwise.
Instructor(s): A. Pandian.

AS.070.622. Infrastructure.
This course surveys ethnographies of built networks such as roads, power grids, and water pipelines as sites of cultural meaning, political struggle, and social interaction. We will consider the kinds of collective existence they make possible today, and their relationship to anthropological thought.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

AS.070.630. Senses of the State.
This course examines how anthropologists study the temporal, material and sensory domains through which people make sense of the state as a bureaucratic, governmental and sovereign presence in their lives.
Instructor(s): D. Poole.
AS.070.637. (Im)possible community.
Recent debates on community in continental thought and its relevance for historical and ethnographic studies of political communities. Emphasis is on questions of myth, futurity, labor, expenditure, sacrifice as political concepts. Bataille, Heidegger, Derrida, Nancy, Blanchot, and current political anthropology.
Instructor(s): J. Obarrio.

AS.070.650. Post-fieldwork.
Open to Anthropology graduate students only.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.655. The Place of Law.
This course explores the intimate relationship of law to place. What affective force does law gain through its appeal to origins and custom? How does law invoke belonging as place?
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

AS.070.659. Proposal Writing.
The seminar will offer a forum for students to discuss research projects, prepare grant proposals and think further about issues of ethnographic methodology and writing. Open to Anthropology graduate students only.
Instructor(s): J. Obarrio.

AS.070.667. Encountering Experience.
What do we seek in attending to experience? Reading from Hume, Emerson, Dilthey, James, Dewey, Merleau-Ponty, Deleuze, Turner, Jackson, Desjarlais and others, we will examine experience as concept, object, and mode of inquiry. Considering problems of sensation, expression, movement, time, and world, we will query identification of experience as property of the human/subject alone.
Instructor(s): A. Pandian.

AS.070.675. Before the Law.
Foundations of law and the political in classical political anthropology and postmodern philosophy. Kinship, custom, magic, sacrifice and war as prepolitical realms. State of nature, exception, and force of law; biopolitics, micropolitics and segmentarity. Readings: Africanist ethnography; Clastres, Sahlins, Deleuze, Derrida, Agamben, Benjamin, Kafka.
Area: Humanities, Social and Behavioral Sciences.

AS.070.677. Anthropology of Death and Dying.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.680. Reading Course in the History of Anthropology:
Revolutions and Recuperations.
Organized around chronological units: The Unknown in the Present; Library and Field; The Primacy of Experience; The Idea of Logic; Defying Logic; Contingency and Emergence. Requests can be entertained.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences.

AS.070.685. About Time.
This seminar will explore conceptions of temporality in ethnographic, philosophical and literary sources. It will review the status of the ‘ethnographic present’, the contemporary, the future and the untimely. Relations between temporality, economy and the political: remains of time, surplus value, antagonism. Theologies of time. Time and the Real. Time and the Other. Social processes of development, finance, democracy and revolution.
Area: Humanities, Social and Behavioral Sciences.

AS.070.692. Death & Extinction.
The classical anthropological literature on death treats the restoration of the social in the aftermath of death through, for instance, the study of funereal practices and acts of mourning and commemoration. In this course we reverse the order, considering writings in the face of death, however defined, individual or collective. Course themes emphasize theological, political and ecological perspectives on death and species extinction, although students will be asked to suggest readings in line with their own research interests and lead seminar discussions on the readings.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.696. Philosophy & Anthropology.
This seminar will read selected philosophical texts in conjunction with anthropological texts, asking what are sites of mutual attraction? In what ways do anthropological texts leave traces in philosophical texts?
Instructor(s): C. Han; V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.698. Defining Region.
This course is open to anthropology graduate students only and is to be run on a workshop model. It is to help those students writing their regional essay for the comprehensive exams to acquire expertise in regional debates and literature relevant to their field research. Our understanding of regions is one of cross-cutting concepts and questions rather than geographical framings alone. After identifying a concept or question, each student will create an annotated bibliography, trace the shape of arguments as they emerge within the readings, create an outline and work toward a draft of the final essay.
Instructor(s): D. Poole; N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.701. Colloquia Series.
In this year-long course, students will be introduced to the formative influences and major writings of visitors in advance of their coming to give talks in the Department of Anthropology’s Colloquia Series. The students will also undertake interviews of visitors to be edited and posted online at the department website to build an archive. This is required course for incoming graduate students. Open to Anthropology Graduate Students Only.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.702. Colloquia Series.
The Colloquia Series is a seminar in which graduate students engage the work of invited speakers. Graduate students learn to develop questions and craft responses in relation to work-in-progress through engagement with the author and in relation to specific debates or tensions in which the author’s work emerges. Required for first year graduate students. Open to anthropology graduate students only.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.
AS.070.710. Law and Political Theology.
The course will explore relations between law and sacredness in political theory and anthropology, regarding both Islam and Christianity. Colonial subjection and subjectivity. Benjamin, Kafka, Agamben, Nancy, Asad and recent anthropology of legal regimes and religion.
Instructor(s): J. Obarrio.

AS.070.712. Risk.
This class explores ecologies of risk as they play out in law, environmental governance, and the fiscal and regulatory regimes that govern politics and life in neoliberal societies.
Instructor(s): D. Poole.

The picture of nature as machine-like or systematic in its organization was once dominant in ecological anthropology and cognate disciplines but fell out of favor in the 1970s and 80s. More recently it is enjoying a revival in efforts to conceptualize anthropogenic climate change. In this course we will read classical and newer writings to understand the promise and problems with this mode of viewing nature. Readings include Pierre Hadot, Karl August Wittfogel, Roy Rappaport, Philippe Descola, Gregory Bateson, Clifford Geertz, Stephen Lansing, Anna Tsing and Stefan Helmreich.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.718. Suspicious Interlocutors: Psychoanalysis and Anthropology.
The conversation between anthropology and psychoanalysis is long standing and often proves to be as contentious as it is complementary. This course investigates the dialogue between the two disciplines by tackling back and forth between the ethnographic materials inspired and informed by psychoanalytic insights, and the use of ethnographic sources and anthropological materials in psychoanalytic writings. Students will engage works from such scholars as Freud, Malinowski, Lacan, Levi-Strauss, Trawick, Cohen, Bose, Sachs.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

AS.070.719. Suspicious Interlocutors Part II: Psychoanalysis and Anthropology.
This course is a continuation of Anthropology AS.070.718, offered in Spring 2013. Students will continue the previously begun investigation of the conversation between anthropology and psychoanalysis, which proves long-standing and often as contentious as it is complementary. The course will tack back and forth between ethnographic materials inspired and informed by psychoanalytic insights, and the use of ethnographic sources and anthropological materials in psychoanalytic writings. Students will engage works from such scholars as Freud, Lacan, Cavell, Klein, Derrida, Siegel, Das, Reynolds, Levi-Strauss, Seremetakis.
Area: Humanities, Social and Behavioral Sciences.

This seminar will closely engage key works in science and technology studies and the anthropology of science and medicine, focusing specifically on complexity, experiment, error, and translation. We will pay particular attention to how anthropological questions can be brought to bear on science and medicine by fostering close discussion between graduate student research and course readings.
Instructor(s): C. Han.

AS.070.801. Dissertation Research.
Instructor(s): Staff.

Instructor(s): Staff.

AS.070.808. Directed Readings on Space and Territory.
Through close readings of theoretical and ethnographic texts, this class explores the concepts of space and territory that animate anthropological understandings of context, potentiality, environment, and emergence.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

AS.070.810. Reading Course: Anthropology & Translation.
Questions of translation come up at every turn in anthropological research and writing and yet the volume of work on the subject is rather thin. In literature, translation studies comprise a vast body of work but the more sociological and anthropological questions remain unposed: What is the relationship between translation and the production of knowledge both inside and outside the Euro-American zone? Who do university students in the social sciences read and why those authors? What would be an anthropology of translation? We will explore these and similar questions in the readings.
Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences.

AS.070.815. Reading Course: Experimental Ethnography.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.851. Readings in Medical Anthropology.
Instructor(s): C. Han.

AS.070.866. Directed Readings and Research.
Instructor(s): A. Pandian.

AS.070.867. Directed Reading and Research.
Instructor(s): C. Han; N. Khan.

AS.070.869. Directed Reading and Research.
Instructor(s): A. Pandian.

AS.070.870. Directed Readings and Research.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

AS.070.871. Directed Reading and Research.
Instructor(s): V. Das.

AS.070.872. Directed Readings and Research.
Instructor(s): V. Das.

AS.070.874. Directed Readings and Research.
Instructor(s): N. Haeri.

AS.070.879. Directed Reading and Research.

AS.070.880. Directed Readings and Research.

AS.070.883. Directed Reading and Research.
Instructor(s): N. Haeri.

AS.070.884. Directed Readings and Research.
Instructor(s): J. Obarrio.

AS.070.885. Directed Reading and Research.
Instructor(s): D. Poole.

AS.070.886. Directed Readings and Research.
Instructor(s): D. Poole.
AS.070.892. Directed Readings and Research.
Instructor(s): N. Khan.

AS.070.893. Directed Reading and Research.
Instructor(s): J. Obarrio.

AS.070.897. Dir Reading & Research.
Instructor(s): S. Berry.

Cross Listed Courses

History of Art
Survey of Early Christian and medieval art and architecture in North Africa, with an emphasis on indigenous developments and cultural exchange in the Mediterranean world, 4th to 13th century. Dean’s Teaching Fellowship course.
Instructor(s): N. Dennis
Area: Humanities.

AS.010.309. Gifts and Thefts in the Middle Ages.
Why were some medieval objects valued as gifts, others appropriated as spolia, and still others taken by force? How does transferring objects from one cultural context into another change their meaning? Western, Byzantine, and Islamic art, 6th-13th centuries.
Instructor(s): R. Danford
Area: Humanities.

AS.010.327. The Harem and the Veil: Space and Gender in the Islamic World.
This course explores the constructed imagery of the harem and the veil in relation to politics and visual culture in the Middle East, North Africa, India, and Euro-America. Topics will include: Ottoman palace architecture, Orientalist painting, mandating/banning the veil, Islamic feminisms. We will address visual culture broadly, including advertising, architecture, contemporary art, film, news media.
Instructor(s): R. Brown
Area: Humanities.

AS.010.603. The Active Body: On Display and in Performance.
An examination of two recent developments in art history and museum studies: the recognition of the object as active and agentic and a growing critical engagement with the body of the artist and performance art. The seminar will unsettle these two themes with the history of living humans on display, from nineteenth-century exhibitions to present-day craftspeople, thinking through bodies, objects, and performance through disciplinary engagements from anthropology, political theory, art history, and museum studies. Open to motivated undergraduates.
Instructor(s): R. Brown
Area: Humanities.

AS.010.607. The Epistemology of Photography.
This seminar will ask how photography produces ways of knowing: how does photography’s reality-effect shape its dissemination and absorption? Is photography’s emergence during the colonial era coincidental or catalytic? How is memory (re)constituted in a photography-saturated world? What kinds of histories does photography encourage and discourage? Is a photograph an object? We will read across disciplines (literature, anthropology, history, history of art, political science, theory) to investigate the epistemology of photography and the photograph.
Instructor(s): R. Brown.

History
AS.100.355. Islam between History and Anthropology.
Co-taught by an anthropologist and a historian, this course will explore recent scholarly debates about—and critiques of—the representations of Islam and Muslim societies.
Instructor(s): N. Khan; T. Shepard
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies
AS.130.376. Ancient Ritual.
This course will introduce students to the vast body of rituals that were practiced and performed in antiquity, with a particular emphasis on rituals from ancient Mesopotamia, Egypt, and the Hebrew Bible. In addition to examining rituals from a comparative perspective, anthropological and sociological studies of ritual will be read and discussed to shed light on the social, cultural, and political significance of ritual in the ancient world and beyond.
Instructor(s): P. Delnero
Area: Humanities.

AS.131.635. Seminar: Near East Archaeology.
Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz
Area: Humanities.

History of Science Technology
Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences.

AS.140.425. Individualized Medicine from Antiquity to the Genome Age.
A seminar for graduate students and advanced undergraduates. We will explore the notion of the individual in medicine over 25 centuries, from the Hippocratics to the invention of the case study during the Renaissance to the genetic, biochemical, and immunological individual in recent biomedicine. Recommended Course Background: AS.140.105, AS.140.106
Instructor(s): G. Pomata; N. Comfort
Area: Humanities, Social and Behavioral Sciences.

Political Science
Grad Students only
Area: Social and Behavioral Sciences.
German Romance Languages Literatures

AS.211.174. Media of Propaganda.

Today, promoting a particular political or personal point of view is not viewed as "propaganda," but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term "propaganda" will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.

Area: Humanities.

AS.211.237. Literature and Medicine.

Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore "illness as metaphor" (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s "In the Cold" and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: "Philadelphia" (Jonathan Demme, 1993), "Melancholia" (Lars von Trier, 2011).

Instructor(s): E. Strowick
Area: Humanities.

AS.211.385. Documentary Production Practicum: Raqs Media Artists in Residence.

This course accompanies the New Delhi based media art collective raqs, consisting of 3 artists, during their first residency in Baltimore during Spring 2013. Students will be helping prepare the media artists’ solo exhibition opening at the BMA on February 20, and be involved in a production workshop offered through the JHU Digital Media Center.

Instructor(s): B. Wegenstein
Area: Humanities.

AS.212.237. Literature and Medicine.

Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore "illness as metaphor" (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s "In the Cold" and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: "Philadelphia" (Jonathan Demme, 1993), "Melancholia" (Lars von Trier, 2011).

Instructor(s): E. Strowick
Area: Humanities.

AS.213.635. Anthropology and Modernism.

This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of "culture."

Instructor(s): S. Spinner
Area: Humanities.

AS.215.311. Radicalism, Film & Literature in Modern Latin America-Community Based Learning.

This course will explore the cultural symbiosis of radical politics, film, and literature in modern Latin America. Beginning with Cuban revolutionary Jose Marti and the definitive end of the Spanish Empire and concluding with current socialist movements in South America, we will analyze key radical texts by the likes of Friedrich Engels and Ernesto "Che" Guevara, classic films like The Battle of Chile by Patricio Guzman, and important works of literature by authors such as Pablo Neruda and Rigoberta Menchu. Note: Class will be conducted in English and all assigned texts will also be in English in order to encourage interdisciplinary enrollment and participation.

Instructor(s): M. Strayer
Area: Humanities.

AS.215.777. The Invention of Fiction.

Rather than understand fiction as a constant in human history, this course will consider it a historically specific form of cultural expression. We will examine and compare theories of the fictional from an array of historical moments in order to better understand what fiction is, how it differs from premodern notions of history and poetry, and how it both informs and depends on modern notions of knowledge and subjective agency.

Instructor(s): W. Egginton
Area: Humanities.

Sociology

AS.230.367. Islamic Finance.

Today, Islamic finance is a global industry comprising nearly $2 trillion in assets, with hubs from Kuala Lumpur to Dubai to London. But half a century ago, nothing called “Islamic finance” existed. So where did Islamic finance come from? Why is it growing so fast? And what does it mean for finance to be Islamic? We discuss the ban on riba in the Quran and hadith, finance in early and medieval Islamic societies, petrodollars and the birth of Islamic banking in the 1970s, the rise of Islamic capital markets since 2000, contemporary shariah-compliant financial structures, and the constitution of piety through financial practice.

Instructor(s): R. Calder
Area: Social and Behavioral Sciences.
Humanities Center

**AS.300.330. Trauma in Theory, Film, and Fiction.**  
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald ("The Emigrants"), Lanzmann ("Shoah"), Spiegelman ("In the Shadow of No Towers"), McCarthy ("Remainder"), and others.  
Instructor(s): R. Leys  
Area: Humanities, Social and Behavioral Sciences.

**AS.300.399. Cinema and Philosophy.**  
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?  
Instructor(s): P. Marrati  
Area: Humanities.

East Asian Studies

**AS.310.108. Introduction to Chinese Fiction and Drama.**  
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.  
Instructor(s): F. Joo  
Area: Humanities.

**AS.310.207. Mapping Migrations in East Asia.**  
This seminar introduces students to the phenomenon of migration in Japan, South Korea, and Taiwan from theoretical, empirical, and comparative perspectives. The objectives of the course are to understand the 1) historical context behind present-day migrations in East Asia; 2) different patterns of migration flows and their consequences on receiving countries; 3) various methodological frameworks for migration. The course is divided into three parts. In the first part, the course will examine theoretical approaches to migration, structured around the question of whether East Asia as a region represents a distinct model of migration. In the second, students will explore the empirical cases in greater detail by comparing and contrasting the different types of migrations. The third part addresses the responses to migration by host governments and societies and the implications of migration on citizenship and identity. Recommended Course Background: any class related to the history or politics of Japan, Korea, Taiwan, and/or China.  
Instructor(s): D. Kim  
Area: Humanities.

**AS.310.304. The Architectonics of Tokyo: The Anthropology of City Life in Japan and Abroad.**  
In this advanced undergraduate seminar on urban life and the anthropology of aesthetics, we will develop tools with which to think and write about city life in Japan and abroad. ‘Architectonic’ is a philosophical term referring to the ability to pull otherwise autonomous ideas together into a single coherent whole. In this course we will employ methodologies culled from class readings, lectures, web-based resources, and class discussions to collectively construct a digital patchwork of writings and images that will serve as the classes’ own quasi-coherent whole, or ‘architectonic’ of city life in Tokyo.  
Instructor(s): R. Sayre  
Area: Humanities, Social and Behavioral Sciences.

AS.310.334. Southeast Asia: Contestations, Continuities, Changes.  
‘Southeast Asia’ designates a geographical region comprised of countries such as Thailand, Indonesia, Malaysia, Vietnam, the Philippines, and Singapore. These countries are often more different than alike, and their cultural, ethnic, religious and political diversity resists easy reduction. As such, this is not a survey course of the area. Rather, we will examine elements of the Southeast Asian experience that speak to contemporary debates on cultural, political, and religious diversity in globalization’s second wave, and what it can teach us about assimilation, acculturation, and acceptance. We will try to get a feel of the variegated texture of Southeast Asian societies through historically and theoretically oriented texts drawn from different disciplines. Specifically, we will concentrate on responses to European colonialism, nationalist identity formations, and the impact of these histories upon contemporary contentions over the role of religion in public life, migratory practices, and second-wave globalization.  
Instructor(s): D. Kwek.

Interdepartmental

**AS.360.206. State and Family: Revisiting the Classical Perspective.**  
Area: Humanities, Social and Behavioral Sciences.
This course will encourage encounters with a number of concepts from a critical gendered perspective, including: sameness/difference, identity politics, race/gender, loyalty, security, queer ethics, and queerness in media.  
Instructor(s): C. Phillips  
Area: Humanities.

AS.360.246. Islamic Literature, Beloved of Western Thinkers.  
This course examines political, erotic, aesthetic, and religious aspects of attraction between Western thinkers in a Christian milieu (e.g. Gide, Emerson, Thoreau) and classical works of Islamic literature (Rumi, Hafiz, Abu Nuwas, Arabian Nights).  
Instructor(s): J. Bush  
Area: Humanities, Social and Behavioral Sciences.

Program in Latin American Studies  
AS.361.130. Introduction to Latin American Studies.  
This course provides an introduction to the study of Latin American cultures and societies from the vantage point of city life and urban representation. We will engage literatures from a variety of disciplines to discuss how issues such as modernization and urbanization processes; tradition, identity and ethnicity; class, marginality and urban social movements; gender and the changing status of women; arts and literature are experienced and represented in the Latin American urban environments.  
Instructor(s): E. Gonzalez; G. Paquette; V. Procupez  
Area: Humanities, Social and Behavioral Sciences.

This course is designed to introduce students to the literary and artistic production originated by Peronismo and particularly by Evita. It explores the historical period that consolidated Peronismo and devotes great amount of time to the controversial figure of Evita. She has fed the popular imagination; her representations have reached far beyond the limits of Argentina. The materials will include different genres: biographical, historical, fictional, and documentary.  
Instructor(s): A. Reyes Kipp  
Area: Humanities, Social and Behavioral Sciences.

The course problematizes how race and mestizaje became socio-political realities and forms of lived experience in Latin America, shaping such things as governmental practices, spatial configurations, interpersonal relations, and political mobilizations. PLAS Teaching Fellowship.  
Instructor(s): J. Bush  
Instructor(s): A. Reyes Kipp  
Area: Humanities, Social and Behavioral Sciences.

Center for Africana Studies  
This course will examine the literature surrounding cross-cultural exchange, through an interrogation of key concepts in African and transnational studies namely “diaspora” “globalization,” and “transnationalism.”  
Instructor(s): J. Ahlman  
Area: Humanities, Social and Behavioral Sciences.

Study of Women, Gender, Sexuality  
AS.363.300. Thirty Years of AIDS: Fatigue, Failure and Fantasies.  
This course is designed to study the emergence of the concept of “AIDS Fatigue” that is being used to describe the current moment of this epidemic. Cross-listed with Anthropology  
Instructor(s): V. Saria.

“Muslim (In)Visibilities” focuses on gender and sexuality through Orientalism. It considers representations of Muslim bodies within popular Western discourses and what such (in)visibilities are productive of.  
Instructor(s): M. Banahin  
Area: Humanities, Social and Behavioral Sciences.

This course combines a weekly seminar with 4 hours per week in a Baltimore social justice organization, coordinated by the JHU Center for Social Concern. Class discussions draw on readings in ethnography and feminist, queer and critical race studies to address topics such as; race, class and gender inequality, neoliberal development, health, institutional violence and politically engaged research.  
Instructor(s): A. Krauss  
Area: Humanities, Social and Behavioral Sciences.

Program in Museums and Society  
AS.389.302. The Virtual Museum.  
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.  
Instructor(s): J. Kingsley  
Area: Humanities.

AS.389.335. Recreating Ancient Greek Ceramics. 4 Credits.  
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.  
Instructor(s): S. Balachandran  
Area: Humanities.

The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology  
Instructor(s): S. Balachandran  
Area: Humanities.

Course examines practices of collecting, display and preservation beyond the western museum tradition, focusing on how these practices reflect and construct political, historical, ethnic and nationalist narratives. Counts towards the international studies major. Cross-listed with Anthropology.  
Instructor(s): E. Rodini; S. Balachandran  
Area: Humanities, Social and Behavioral Sciences.

AS.389.440. Who Owns Culture?.  
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.  
Instructor(s): E. Rodini  
Area: Humanities, Social and Behavioral Sciences.
Archaeology

The major in archaeology is an interdepartmental program that introduces students to archaeological theory, the analysis of archaeological materials, and the results of archaeological research in prehistoric and early historic periods in the Old and New Worlds. Archaeology studies human societies through examination of their material culture (physical remains), considering such issues as human subsistence, interaction with climate and physical environment, patterns of settlement, political and economic organization, and religious activity and thought. The field allows for the study of the entirety of human experience from its beginnings to the present day, in every region of the world and across all social strata.

Students in the major will have the opportunity to study and conduct research on materials stored in The Johns Hopkins Archaeological Museum, which consists of a diverse and extensive assemblage of artifacts from ancient Greece, Rome, Egypt, Mesopotamia, Palestine, and Mesoamerica. Opportunities may also be available to study materials in the Classical, Egyptian, and Near Eastern collections in the Walters Art Museum.

Requirements for the B.A. Degree

Requirements for the major include 13 courses (39 credits). These can be selected from a diversity of offerings available from different departments. In addition, students must take a core of three courses consisting of Introduction to Archaeology, World Prehistory, and Archaeological Method and Theory. Except for some field experiences, majors must complete all courses required for the major for a letter grade and receive a grade of C- or higher.

Six archaeology courses, both regionally specific and/or methodologically/theoretically advanced

Three courses, to be decided in conjunction with the student’s advisor, pertinent to the archaeological issues the student has focused on.

Significant archaeological field experience (consult faculty advisor)

Total Credits 27

Honors Program

Archaeology majors have the option of writing an honors thesis under the supervision of a faculty member. The thesis is based on an original research problem developed in conjunction with that faculty member. Successful completion of the thesis (B+ or higher) will result in the conferring of a BA with honors.

Students entering Fall 2014 and later must pass 6 credits (2 semesters: 130.510 and 130.511) of honors thesis to earn honors in the Archaeology Major. These credits are in addition to and exceed the number of credits needed for the major.

Students who are interested in pursuing an honors thesis should begin to discuss possibilities with a faculty advisor as early as possible and no later than during the second semester of Junior year. A proposal for the thesis must be approved by the faculty advisor before the student registers for the courses and no later than the end of the second semester of the Junior year.

The student will work closely with the faculty advisor, setting a timeline for completing research and submitting drafts of the thesis. A full draft of the thesis is due by the end of March of the Senior year, if the student wants to be listed as receiving honors on the commencement program. The final version of the thesis must be handed in by the last day of classes.

Program Learning Goals for the Archaeology Major

1. Acquire the basic skills for understanding theory, interpretation, and methods in archaeology.
2. Develop an ability to analyze archaeological data through the reading and interpretation of archaeological publications and study of primary data.
3. Conduct analyses and interpretations of material culture in precise, well-organized, and persuasive language, both orally and in writing.
4. Acquire interdisciplinary knowledge of different past human cultures.
5. Gain significant knowledge of the material culture of at least one region or thematic issue.
6. Acquire on-site experience and expertise in archaeological method through fieldwork.

For current course information and registration go to https://isis.jhu.edu/classes/

Anthropology

**AS.070.132. Invitation to Anthropology.**
The screen that brings you last night’s Instagrams and celebrity gossip also flashes glimpses of melting icecaps and burning rubble. These are complex times for human beings, both exhilarating and deeply unsettling. This course introduces anthropology as a way of reflecting on the challenges of contemporary life around the globe, focusing on themes such as faith, war, technology, money and ecology.
Area: Humanities, Social and Behavioral Sciences.

Classics

**AS.040.111. Ancient Greek Civilization: Society, Archaeology, Literature, Philosophy.**
The course will introduce students to major aspects of the ancient Greek civilization, with special emphasis placed upon culture, society, archaeology, literature, and philosophy.
Instructor(s): J. Smith
Area: Humanities.

**AS.040.119. The World of Pompeii.**
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.

**AS.040.218. Celebration and Performance in Early Greece.**
Surviving imagery suggests that persons in Minoan and Mycenaean societies engaged in various celebratory performances, including processions, feasts, and ecstatic dance. This course explores archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities.

**AS.040.221. Art and Archaeology of Early Greece.**
This course explores the origins and rise of Greek civilization from the Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing on major archaeological sites, sanctuaries, material culture, and artistic production.
Instructor(s): E. Anderson
Area: Humanities.

**AS.040.320. Myth In Classical Art.**
This course traces the representation of the principal gods and heroes of Greek myth in the visual arts (sculpture and vase-painting), as well as later reflections in Roman painting.
Instructor(s): A. Shapiro
Area: Humanities.

Geography and Environmental Engineering

**EN.570.406. Environmental History.**
Environmental history explores the interactions between social change and environmental transformation, or the ways in which societies modify landscapes and are themselves affected by geological, climatological and changing ecological conditions. Topics include the relationship between climate change and human evolution, the environmental impacts of market-based commodity production and regional economic specialization; the relationship between urbanization and environmental change; how warfare affects and is affected by environmental conditions.
Instructor(s): E. Schoenberger
Area: Humanities, Social and Behavioral Sciences.

**EN.570.423. Principles of Geomorphology.**
Analysis of the factors responsible for the form of the landscape. The concept of the cycle of erosion is discussed primarily in terms of the principles that govern the processes of erosion. Climate, conditions of soil formation, and the distribution of vegetation are considered as they relate to the development of landforms. Recommended Course Background: AS.270.220 or permission required.
Instructor(s): P. Wilcock
Area: Natural Sciences.

History

**AS.100.470. Monuments and Memory In Asian History.**
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

History of Art

**AS.010.105. Art of the Ancient Americas.**
Surveys the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. Deleonardis
Area: Humanities.

**AS.010.334. Problems in Ancient American Art.**
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS and Program in Museum and Society
Instructor(s): L. Deleonardis
Area: Humanities.

**AS.010.365. Art of the Ancient Andes.**
The visual arts of Andean South America and their respective cultural contexts form the basis of this seminar. Collections study in museums.
Instructor(s): L. Deleonardis
Area: Humanities.

**AS.010.398. Tombs for the Living.**
Centering on the tomb as the unit of analysis, this course examines the cultural and material aspects of death and funerary ritual. Draws on case studies from North America, Mesoamerica, and the Andes. Collections study in museums.
Instructor(s): L. Deleonardis
Area: Humanities.
Centering on a series of case studies, this course addresses the technology, aesthetics, and social significance of metals. We trace the development of metals from 1500 BCE in Chile and Peru, to the 16th century in Colombia and central Mexico, pausing to examine its forms and meanings in various cultural contexts, and the ideas that inform its value. In conjunction with the Baltimore Museum of Art (BMA), the Walters Art Museum (WAM), and the Johns Hopkins Archaeology Museum (JHUAM), students will have access to ancient metal works for study.
Instructor(s): L. Deleonardis
Area: Humanities.

Near Eastern Studies

Review of important issues in ancient Near Eastern history and culture from the Neolithic era to the Persian period. Included will be an examination of the Neolithic agricultural revolution, the emergence of cities, states and writing, and formation of empires. Cultures such as Sumer and Akkad, Egypt, the Hittites, Israelites, Assyrians, Babylonians, and Persians will be discussed.
Instructor(s): G. Schwartz
Area: Humanities.

AS.130.102. From the Neanderthals to the Neolithic.
Emphasizing theories about human biological and cultural development, this course consists of an in-depth survey of Neanderthal morphology and culture, a brief discussion of evolutionary theory and our fossil ancestors, and concludes with an exploration of the mechanisms and results of the shift from hunting and gathering to farming. (Course formerly known as Introduction: Human Prehistory.) Cross-listed with Anthropology.
Instructor(s): S. McCarter
Area: Humanities.

AS.130.110. Introduction To Archaeology.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.130.135. Pyramids, Temples and Tombs.
Introduction to the monuments and culture of Egypt from 3500 B.C. to 100 A.D. From the pyramids at Giza to Hellenistic Alexandria, this course surveys in slide illustrated lectures the remains of one of the world’s greatest early cultures.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.177. World Prehistory: An Anthropological Perspective.
How and why did our nomadic hunting and gathering ancestors become farmers? What led agricultural societies to build cities, develop writing, religious institutions, wage war, and trade for exotic goods? This course surveys prehistory and ancient history from the origins of human culture to the emergence civilization. Although prehistory and ancient history yield evidence of tremendous cultural diversity this course emphasizes common elements of past human experience, culture, and culture change. These include the origins of modern humans and their adjustment to a variety of post-ice age environments, shifts from hunting and gathering to agricultural lifeways, and the initial development of the world’s earliest cities and civilizations.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

This course investigates Egyptian votive objects made as gifts to the Gods. Students will learn about Egyptian religious practices and study groups of objects in the Archaeological Museum to learn to identify how they were produced, when, and for what functions. Physical analyses of the objects will be part of the class and facilitated by museum staff.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.328. Ancient Egypt /Africa.
Recent excavation and research have shed light on several ancient cultures of the Nile and its tributaries. We will look at the available archaeological and textual (all Egyptian) evidence for these societies and their interactions with Egypt between 3500 and 300 B.C. We will also discuss research aims and methods employed now and in the past in Egypt and the Sudan.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.329. Ancient Egyptian Art and Archaeology.
A survey of Egyptian art as seen in the temples, tombs, funerary, and minor arts of Egypt between 3000 and 100 B.C. Slide lectures will provide a survey of art from the Pyramids to Augustus Caesar and will focus on such topics as the principles of Egyptian art; can the term art apply to early Egypt? How were artisans trained and what techniques and materials were utilized in their work? Co-listed (meets with) AS.133.750.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.334. Egyptian Funerary Arts in the Archaeological Museum.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum’s website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan; S. Balachandran
Area: Humanities.
AS.130.353. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS.
This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.131.653.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

AS.130.354. Archaeological Method and Theory.
What questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review approaches to method and theory including evolutionary archaeology, culture-historical archaeology, processualist and post-processualist archaeologies, and explores the future of archaeology as a scientific and humanistic discipline. Previous coursework in archaeology or Permission of instructor required. Meets with AS.131.654.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

AS.130.357. Geographic Information Systems in Archaeology.
Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI’s ArcGIS software. Taught with AS.130.357.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.131.800. Readings & Research.
Instructor(s): Staff.

AS.389.205. Examining Archaeological Objects.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology
Instructor(s): S. Balachandran
Area: Humanities.

The theme for this course will be the archaeology of the Mut precinct in Luxor where Johns Hopkins is excavating. Study of the comparative materials from other sites will be central with the publication of the work approaching.
Instructor(s): B. Bryan.

AS.133.750. Seminar in Egyptian Art and Archaeology.
The theme for this course will be archaeology of the Mut precinct in Luxor where Johns Hopkins is excavating. Study of the comparative materials from other sites will be central with the publication of the work approaching.
Instructor(s): B. Bryan.

For current faculty and contact information go to http://krieger.jhu.edu/archaeology/faculty-directory/
Faculty
Co-Director
Glenn Schwartz
Whiting Professor of Archaeology (Near Eastern Studies): Near Eastern archaeology, archaeological method and theory.
H. Alan Shapiro
W. H. Collins Vickers Professor of Archaeology (Classics): Greek and Roman art and archaeology.

Professors
Betsy Bryan
Alexander Badawy Chair in Egyptian Art and Archaeology (Near Eastern Studies): Egyptian archaeology and art.
Lisa de Leonardis
Austen-Stokes Professor (History of Art): art and archaeology of the ancient Americas.
Matthew Roller
(Classics): Roman material culture and history.

Assistant Professors
Michael Harrower
Pier-Luigi Tucci
(History of Art): Roman art and archaeology.

Visual Arts
http://krieger.jhu.edu/visualarts/

Center for Visual Arts
The Center for Visual Arts provides a studio environment in which undergraduates can pursue their creative interests and earn academic credit in a visual arts program. Courses in drawing, painting, printmaking and sculpture develop observational skills and techniques in the beginning student. Courses in photography, cartooning, and digital media balance studio work with research and critical analysis. Although there is currently no major, students can earn a minor in visual arts.

Visual Arts-Minor
Students may focus on one of two tracks: (1) traditional studio courses or (2) a digital curriculum. They have the option to combine the two tracks for a more diverse, if more general, experience.

A minimum range of 15 to 18 credits, including:

<table>
<thead>
<tr>
<th>Core Course</th>
<th></th>

<tr>
<td>or AS.371.152 Introduction to Digital Photography</td>
<td></td>
</tr>
</tbody>
</table>

Art History Course
One course at any level in history of art 3-4

Visual Arts Electives

Four additional visual arts courses 10-12
Total Credits 15-18

Additional details:
• Students may count as many as two visual arts courses taken at MICA, but not offered at Hopkins, toward the minor. These courses must be approved in advance by the advisor.
• All courses must be taken for a letter grade and students must receive a grade of C- or better to apply the course towards the minor.
• One independent study course in the visual arts may be counted toward the minor.
• One visual arts course, not offered at Hopkins, taken in a JHU-affiliated study abroad program may be counted toward the minor.
• Each student’s complete program of study must be approved by the advisor.
• Advising will be done by the Director (Studio) and the Photography Coordinator (Digital).

For current faculty and contact information go to http://www.jhu.edu/artwork/faculty.htm

Faculty
Director
Craig Hankin
Instructor: painting, portraiture, life drawing.

Instructor
D. S. Bakker
Aesthetics, visual philosophy, Surrealism.

Phyllis Berger
Photography Supervisor: photography, artists’ books, documentary photography.

Thomas Chalkley
Sequential imagery, political and social satire, popular culture.

Howard Ehrenfeld
Digital photography and imaging, location photography.

Barbara Gruber
Figure painting, plein air landscape.

Cara Ober
Watercolor, mixed media, color theory.

Larcia Premo
Sculpture, printmaking.

For current course information and registration go to https://isis.jhu.edu/classes/
Courses

AS.371.131. Studio Drawing I.
This course focuses on developing fundamental drawing skills for the student with little or no previous studio experience. Basic concepts of form and composition will be taught through exercises based on the book, Drawing On The Right Side Of The Brain, and with the aid of still-life setups and live models. Attendance at 1st class is mandatory. Instructor(s): C. Hankin.

AS.371.133. Painting Workshop I.
This course offers the fundamentals of oil painting techniques for the serious student with minimal prior studio experience. Observational skills are taught through the extensive use of still-life setups, with particular attention paid to issues of light, color, and composition. Slide lectures and a museum trip give students an art historical context in which to place their own discoveries as beginning painters. Prerequisites: Prerequisite AS.371.131 or permission of instructor.
Instructor(s): B. Gruber; C. Hankin.

AS.371.134. Painting Workshop II.
Students who have mastered basic painting skills undertake sustained projects, including portrait and plein air landscape work. Slide lectures and handouts deepen students’ appreciation of representational traditions. Advanced techniques, materials, and compositional issues are also investigated. Recommended Course Background: AS.371.133 or equivalent.
Instructor(s): B. Gruber.

AS.371.135. Studio Drawing II.
Building on basic drawing skills, this course explores various media, techniques, and compositional elements with special emphasis on still life, portrait, and life drawing. A visit to the Baltimore Museum of Art’s Print & Drawing Library supplements lectures and enriches the student’s understanding of the history of artists’ drawings. Recommended Course Background: AS.371.131 or instructor’s permission.
Instructor(s): C. Hankin.

An intensive look at the traditions and techniques of portrait drawing. Students work from live models in a variety of media and study master portraits by Holbein, Rembrandt, Ingres, Degas, etc. Trips to the Baltimore Museum of Art Print & Drawing Library supplements lectures and enriches the student’s understanding of the history of artists’ drawings. Recommended Course Background: AS.371.131 or permission required. Prerequisites: AS.371.131 permission req’d
Instructor(s): C. Hankin.

AS.371.139. Still Life/Interior/Landscape.
This intermediate drawing class will examine three grand traditions in representational art. We will explore problems in still life that have occupied artists from Chardin to Morandi; in interiors from Vermeer to Giacometti; in landscape from Corot to Diebenkorn. We will also look at where the boundaries between these genres blur and how they overlap. Prerequisites: AS.371.131 or permission required.
Instructor(s): C. Hankin.

AS.371.140. Cartooning.
Not open to Freshmen. A history-and-practice overview for students of the liberal arts. The conceptual basis and historical development of cartooning is examined in both artistic and social contexts. Class sessions consist of lecture (slides/handouts), exercises, and ongoing assignments. Topics include visual/narrative analysis, symbol & satire, editorial/political cartoons, character development, animation. Basic drawing skills are preferred but not required. Instructor(s): T. Chalkley
Area: Humanities.

AS.371.146. Basic Black/White Photo.
Students must have a 35mm camera with manual aperture and shutter speed ATTENDANCE AT 1ST CLASS IS MANDATORY An introduction to the technical and creative process of producing black & white photographs. Working in the darkroom, students learn the fundamentals of film processing and print development. In-class critiques, discussion, and analysis of historic images develop critical vision. With the instructor’s guidance, students work on a project of their choice and produce a portfolio of ten mounted prints. Area: Humanities.

In this course, students will learn to design, draw, and see like an architect. A series of progressive design exercises will teach the practical capacities and habits of mind that lead not merely to competence but success and advancement in the field. We will look at what architecture has been, discuss what it is becoming, and explore both formal and narrative methodologies for design. The class will use the built environment of the city - and the Homewood campus - as a classroom and a site for interpretive drawing and creative design work. Essential in the architect’s education is the sketchbook, which functions not merely as a place to ‘store’ what has been witnessed, but a place to interpret and explore implications of design in the world, whether close to home or traveling in exotic locales. Instructor(s): C. Phinney
Area: Humanities.

AS.371.149. Visual Reality.
In art, “Realism” is a simulation of visual reality. But art can also simulate alternative realities, those realities or truths which exist only in daydreams or nightmares. In this class, we will learn to explore and create representations of these additional moments of existence. This will require thinking creatively or “outside the box,” a useful skill in any field. Using a variety of media, students are asked to solve problems to which there is no one correct answer. Instructor(s): D. Bakker
Area: Humanities.

AS.371.150. Life Drawing.
An intermediate drawing course focusing on all aspects of the human form. Beginning with infrastructure (skeletal and muscular systems), we will work directly from the model using a variety of media and techniques to address problems in figurative art from the Renaissance to the present. Prerequisites: Prereg: AS.371.131 or instructors permission.
Instructor(s): C. Hankin.
Photoshop is not only the digital darkroom for processing images created with digital cameras; it is also a creative application for making original artwork. In this course, students use Photoshop software as a tool to produce images from a fine art perspective, working on projects that demand creative thinking while gaining technical expertise. Students will make archival prints, have regular critiques, and attend lectures on the history of the manipulated image and its place in culture. We will look at art movements which inspire digital artists, including 19th-century collage, dada, surrealism, and the zeitgeist of Hollywood films. Students must have a digital camera. Prior knowledge of Photoshop is not required. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on ISIS.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.152. Introduction to Digital Photography.
Introduction to Digital Photography students learn to use their digital cameras through a variety of projects, which will help them develop technical and creative skills. Students explore documentary, landscape and portrait photography. Critiques and slide lectures of historic photographs, which range from postmortem daguerreotypes to postmodern digital imagery, help students develop a personal vision. Students gain camera proficiency with one-on-one instruction in the field. Basics for print adjustment and output will be covered. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on ISIS.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.154. Introduction to Watercolor.
Watercolor is simultaneously the most accessible of all painting media and the most misunderstood. This course provides experience and instruction in observational and expressive watercolor techniques, materials, concepts, and vocabulary. Topics to be reviewed include line, perspective, value, texture, composition, color, and pictorial space. There will be an introduction to contemporary practices in watercolor, as well as experimental and abstract exercises, collage, and conceptual work.
Instructor(s): C. Ober.

AS.371.155. Introduction to Sculpture.
A studio course introducing students to sculptural concepts and methods. Emphasis is on the process of creating. Even the simplest materials can effectively activate space, convey meaning, and elicit emotion when used thoughtfully and imaginatively. Students will learn different methods including additive and reductive techniques, construction, modeling, and mold-making. No prerequisites except a willingness to experiment, make mistakes... and clean up when you are done. Seniors only or permission required.
Instructor(s): L. Premo.

In this digital course, students explore the black-and-white aesthetic. They develop camera skills on numerous field trips including Ladew Topiary Gardens, the Maryland Zoo & Botanical Gardens, and an optional weekend trip to Cape Henlopen State Park in Delaware. Students meet frequently for critiques and discussions based on historic and contemporary imagery. They will learn to use Photoshop for image adjustment. Techniques such as high dynamic range, duotone, panorama and infrared will be covered. Students work on a project of their choice and produce a portfolio of ten prints. Digital SLRs are provided. Attendance at first class is mandatory. No need to email for approval.
Instructor(s): P. Berger
Area: Humanities.

AS.371.164. Introduction to Printmaking.
Working with non-toxic/water based inks and both an engraving press and hand tools, students will explore several types of printmaking. Methods will include intaglio, collograph and both simple and multi-plate relief. As they develop their prints, students can then observe and exploit the strengths that each method has to offer. Drawing and Photoshop skills are helpful but not required.
Instructor(s): L. Premo.

AS.371.165. Location Photography.
Working in the studio and in various locations, students will learn the fundamentals of lighting interiors and strategies for working in almost any environment. Field trips will include the National Aquarium, Evergreen Museum & Library, a Howard County horse farm, a Tiffany-designed church and a Hampden photo studio. Students will also concentrate on the fine art of printing in our digital lab. They will develop a final portfolio of 10 photographs which express a personal vision about a location of their choice. A basic knowledge of digital photography is helpful, but not required. Approval for this course will be considered after enrollment on ISIS.
Instructor(s): H. Ehrenfeld
Area: Humanities.

In this digital course, students explore the black-and-white aesthetic. They develop camera skills on numerous field trips including Ladew Topiary Gardens, the Maryland Zoo & Botanical Gardens, and an optional weekend trip to Cape Henlopen State Park in Delaware. Students meet frequently for critiques and discussions based on historic and contemporary imagery. They will learn to use Photoshop for image adjustment. Techniques such as high dynamic range, duotone, panorama and infrared will be covered. Students work on a project of their choice and produce a portfolio of ten prints. Digital SLRs are provided. Attendance at first class is mandatory. No need to email for approval.
Instructor(s): P. Berger
Area: Humanities.

AS.371.166. Landscape Photography.
Class begins: Monday, July 6th. In this course students will experience the drama and beauty of the urban and rural landscape. On numerous field trips they will hone their camera technique as well as learn elements of composition and develop a personal style. Students will learn the fundamentals of Photoshop and they will also be introduced to the beauty of black and white in Silver Efex software.
Instructor(s): P. Berger
Area: Humanities.

In this unique course, a photographer, a museum curator, and a book artist mentor students as they create photography books on subjects of their choosing. The class will concentrate on elements of composition, narration, design, and aesthetics. Field trips to view both public and private book collections and libraries will provide historical context for the evolution of book production, while actual shared volumes may serve as inspiration or models for emulation. As final project, each student will create a hardbound book using Blurb software. Fundamentals of Photoshop will be covered. A culminating exhibition affords students the opportunity to showcase their respective volumes at JHU's elegant Evergreen Museum & Library. Attendance at first class is mandatory.
Instructor(s): P. Berger
Area: Humanities.
**AS.371.168. The Art of Architecture.**
In this course, students will learn to design, draw, and see like an architect. A series of progressive design exercises will teach the practical capacities and habits of mind that lead not merely to competence but success and advancement in the field. We will look at what architecture has been, discuss what it is becoming, and explore both formal and narrative methodologies for design. The class will use the built environment of the city and the Homewood campus as a classroom and a site for interpretive drawing and creative design work. Essential in the architect’s education is the sketchbook, which functions not merely as a place to ‘store’ what has been witnessed, but a place to interpret and explore implications of design in the world, whether close to home or traveling in exotic locales.
Instructor(s): C. Hankin; C. Phinney
Area: Humanities.

**AS.371.169. Exploring Art in a Virtual World (Online Course).**
In most virtual worlds all of the content of that world has been created by the game’s developers. But there are some exceptions. In Second Life all the content, the world you navigate, has been entirely produced by the players or users of that world. Interestingly, in this way it mirrors or Real Life, all the content of our society- our books, homes, shoes, art- has been *user* created as well. You’ve already seen the art of Real Life. Now explore, as well as learn how to begin building, art in Second Life.
Instructor(s): D. Bakker.

**AS.371.170. Works on Paper, 2 Credits.**
As the title suggests, experienced students in this course will focus on the creation of artwork on paper. We’ll use a wide variety of paper supports and mediums will include pastel, ink, watercolor, charcoal, acrylic and oil paint. Subject matter will range from figure to landscape, from color theory to differentiation. Working visits to the Baltimore Museum of Art and Johns Hopkins Archaeological Museum are planned.
Instructor(s): B. Gruber
Area: Humanities.

**AS.371.171. Color Explorations & Theory.**
Course begins on June 30th. We will explore the physical characteristics, psychological effects and basic physics of color through exercises in various applications. Primary mediums include: Paint, Color-Aid Paper & Photoshop. Emphasis is placed on the investigation of color effects used in applied and fine arts.
Instructor(s): C. Gregory
Area: Humanities.

**AS.371.172. DIY Art: You Are the Medium.**
Art is not confined to the maker’s labors with traditional art materials. Art is transactional and can be made of anything. It brings forth personal narrative – one’s internal experience in a concrete form – and seeks resonance with the viewer. Art-making is a shared place of possibility and self-revelation, available to anyone with a desire to make visible their thoughts and feelings. Students will engage with novel creative processes and materials and will be challenged to broaden their perspectives on the essential nature of art. Personal narratives will be deepened through a class visit to the American Visionary Art Museum, as well as a short-term group residency with the artists of Make Studio.
Instructor(s): C. Goucher
Area: Humanities.

**AS.371.173. The Art of the Press.**
In this class, the history and practice of letterpress printing come alive through the study of primary sources (rare materials from special collections) and hands-on experience in the printing studio (Maryland Institute College of Art). Students gain a historical perspective on the information revolution that printing inaugurated 500 years ago, as well as a meaningful appreciation for the craftsmanship, design expertise, and skill involved in letterpress printing. Printing’s relationship to digital culture also plays a role in the class as students translate their experiences with physical materials into a blog.
Area: Humanities.

**AS.371.174. Introduction to Digital Art Production.**
An introduction to digital media tools with a focus on creating art and communicating ideas. Develop your skills in audio/visual communication including graphics, web design, sound and video production. Class meets at the Digital Media Center and includes an introduction to DMC’s facilities and broad range of digital production gear, plus studio visits with digital artists working in a variety of media.
Instructor(s): K. Anchor.

**AS.371.175. The Art of Infrastructure.**
Networks of infrastructure surround us: invisible, pervasive, and essential modern life. Our project in this course will be to begin to see the arcane complexities that underlie our simplest acts (as well as the highest ambitions of architects and civil engineers). We will eat, to learn about the infrastructures of food; we will travel, to learn about routes; we will explore water and power and the myriad of dependencies that make things tick. Then we will make (beautiful) maps.
Instructor(s): C. Phinney
Area: Humanities, Engineering.

**AS.371.176. B’More: The Photographic Portfolio - City Visions, Street & People.**
In this course, we will review, discuss, and deconstruct the portrait, concept, and street images of master photographers as we wrestle with the question: what makes a great photograph? We’ll also learn to pre-visualize our photographs by looking at such camera basics as ISO, aperture, and shutter speed. Lectures will be complemented by a studio portrait session, and visits to such cultural centers of Baltimore as Fells Point (where we’ll photograph inside a boxing gym and tattoo parlor), the Baltimore Museum of Art, and the Visionary Art Museum. Students will be asked to conceive of a theme and create a cohesive body of images—a portfolio—from the opportunities presented during our trips into the city.
Instructor(s): H. Ehrenfeld; L. Lubow
Area: Humanities.
AS.371.188. B'More: Seeing Baltimore with a Camera - Beyond Tourism.
Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. This course will be an introduction to various neighborhoods of Baltimore through the eye of a camera. Students will be introduced to the concept of photography as an artistic medium for documenting a city's cultural life (e.g. architectural, musical, social, historical) through a mixture of classroom lectures and field trips to Baltimore neighborhoods: Federal Hill, Hampden, Mt. Vernon and Fells Point and visits to the Peabody Library, the Walters Art Museum, SPCA and a photo studio. Each student will create a small body of work that reflects their interests, point of view and photographic skills.Open to freshmen students participating in the B'More Program only.
Prerequisites: Students may enroll in one B'More course only.
AS.371.189 OR AS.271.119 OR AS.100.285 OR AS.140.318 OR AS.300.100 OR AS.360.108 OR AS.360.122 OR AS.389.171
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.189. B'More: Charm City through the Lens.
Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. In this course we’ll analyze and discuss the work of master photographers from Baltimore and beyond. Students will be introduced to the concept of photography as an aesthetic medium for documenting a city’s cultural life. We will also discuss the intersection between camera basics (e.g. ISO, aperture, shutter speed) and visual perception and cognition. Classroom lectures will be complemented by visits to Federal Hill, Fells Point, Bolton Hill, and Mt. Vernon. Using their own digital and cell phone cameras, students will have the opportunity to create their own photographic portfolios to present to the class. Open to freshmen students participating in the B'More Program only.
Prerequisites: Students may enroll in one B'More course only.
AS.371.188 OR AS.271.119 OR AS.100.285 OR AS.140.318 OR AS.300.100 OR AS.360.108 OR AS.360.122 OR AS.389.171
Instructor(s): M. Lopez-Gonzalez
Area: Humanities.

AS.371.190. Painting & Drawing the Local Landscape.
Clear fall weather in Baltimore and the wide variety of landscape and architecture in and around the Homewood campus provide an ideal opportunity to paint and draw outside. Working from life, masterworks and slides, we will investigate the history and practice of landscape painting, beginning with tonal wash drawings and progressing to full-color paintings. Media will include charcoal, ink, watercolor and oil paint. Slide lectures, demonstrations and museum and library visits will be featured. Portable easels provided.
Prerequisites: AS.371.131 OR AS.371.133 OR Instructor's Permission Required
Instructor(s): B. Gruber.

AS.371.191. Introduction to Video Art.
Throughout the semester, students will screen video art and respond by shooting and editing their own video works. They will think critically about the personal and societal function that video artwork serves. We’ll look at the work of artists ranging from Martha Rosler and Hennessy Youngman, to Spike Jonze and music videos. We will discuss and explore the intersections between video, poetry, painting, and music. Students will be required to learn video editing software, write short video responses, and read and discuss relevant essays. Students can expect to shoot and edit four video production assignments.
Instructor(s): J. Roche.

AS.371.200. Visualizing Music. 3 Credits.
In this course, JHU photography students will pair up with Peabody Conservatory of Music student composers to develop an interdisciplinary work that grows out of their conversations and passions. Working under the guidance of Phyllis Berger, CVA Photography Supervisor, and David Smooke, Peabody Conservatory Music Theory Chair, students will design a program of music and photography that brings together the experience of looking and listening. Their work will be exhibited and performed at Evergreen Museum and Library. Attendance at first class is mandatory.
Instructor(s): D. Smooke; P. Berger
Area: Humanities.

AS.371.201. Drawing Outside the Box.
We will explore essential principles, tools, terminology & media, while pushing the boundaries of “traditional drawing” by adopting alternatives such as drawing with wire, inking with grass, and animating gesture in Photoshop. Not only will we draw from observation, which builds the perceptual platform and skills for spatial understanding and rendering, we will draw from intuition, movement, and outdoor stimuli. Subject matter may include: still life, interiors, landscape, architecture, the human figure and personal narrative.
Instructor(s): C. Gregory
Area: Humanities.

AS.371.202. Street Photography: Ten Photos, Ten Stories. 3 Credits.
Street photography is about seeing and reacting, in order to capture small, revelatory moments in a single image. We'll cover camera operation basics, study inspiring examples by historical and contemporary photographers such as Robert Frank and Helen Levitt, and develop a more acute sense of sight on field trips to public parks and neighborhoods and through assignments and critiques. In the second half of the semester, students work on their own projects to develop 10 images that each tell a story, however slight, about the human condition.
Instructor(s): J. Bishop
Area: Humanities.

AS.371.203. Drawing in Motion.
Drawing in Motion explores the seductive and messy medium of charcoal on paper, and adds a twist: the element of time. We will begin by drawing from direct observation using additive and subtractive methods. We will continue by viewing work by stop-motion animator William Kentridge, whose art delves into our human narrative: the passion, the trauma, and the passing. The culmination of the class will result in a partnered 40second stop-motion animation project.
Area: Humanities.

AS.371.301. Landscapes: Photographing the Burren.
The Burren College of Art, located in a medieval castle on Ireland's Atlantic coast, serves as the base for this digital photography course. Fundamentals of the Digital SLR are reviewed as well as image correction and manipulation in Photoshop. Focusing on the varied landscapes of Ireland, students will assemble a portfolio of digital photographs and exhibit their work in a group show at the end of the Program. Students of all majors and levels are welcome. Course must be taken for a grade.
Instructor(s): P. Berger
Area: Humanities.
AS.371.302. Photographic Portfolio.
In this upper level course, experienced students will work on a semester-long project that reflects their artistic sensibility, interests and passion for photography. They will develop their ideas within a seminar style format that allows for conversation and debate and provides a forum for the evolution of content within their work. Through a combination of critique, lecture and lab, students will complete a portfolio of ten printed images that work together in a series. Recommended Course Background: Previous CVA photography course or instructor's permission. Instructor(s): P. Berger
Area: Humanities.

In this course, we will explore different genres of documentary photography, including the fine art document, photojournalism, social documentary photography, the photo essay and photography of propaganda. Students will work on a semester-long photo-documentary project on a subject of their choice. Digital SLRs will be provided. Attendance at first class is mandatory. No need to email for approval. Instructor(s): P. Berger
Area: Humanities.

AS.371.304. Photo Seminar: Wet Darkroom.
In this film based course, students develop a project of their choice over the semester working independently in the darkroom and meeting for weekly critiques and discussions. Using the zone system (a method of pre-visualization developed by Ansel Adams) students will experiment with different film, paper and developer combinations specific to their projects. Writing in the form of a journal as well as critical analysis of images are integral parts of the seminar experience. Prerequisites: AS.371.146 or Permission Required Area: Humanities.

The Burren College of Art, located in a medieval castle on Ireland’s Atlantic coast, serves as the base for this digital photography course. Fundamentals of the Digital SLR are covered as well as image correction and manipulation in Photoshop. Students will work one-on-one with their instructor and will exhibit their work in a group show at the end of the program. Students of all majors and levels are welcome. Course must be taken for a grade. Instructor(s): P. Berger
Area: Humanities.

Instructor(s): C. Hankin; P. Berger.

Instructor(s): B. Gruber; C. Hankin; P. Berger.

AS.371.590. Independent Study.
Instructor(s): C. Hankin.

Cross Listed Courses

Film and Media Studies

AS.061.376. Arts and Culture Journalism: Interactive Media, Online Publishing.
Students will participate in the ongoing creation of BmoreArt.com, an online arts and culture publication that serves the Baltimore community. In conjunction with visiting professionals, students will investigate the Baltimore cultural community and create different types of editorial content using interactive media including film, video, sound, and writing. Students will produce creative content utilizing their individual areas of expertise - such as visual art, art history, music, literary arts, film, and theater - while working together as a professional organization. A strong emphasis will be placed on the student’s collaborative participation and creative experimentation. Students with differing backgrounds in media will approach this project from unique perspectives, which will be valued and cultivated. Students with previous experience in journalism are welcome. An introductory writing or film course is suggested as a prerequisite. Instructor(s): C. Ober
Area: Humanities.

German Romance Languages Literatures

AS.213.348. Picturing Jews: Representing Jewish Identity in Modern Art, Film & Literature.
This course will consider the different ways Jewish identity has been represented in the 19th and 20th centuries, focusing primarily on Central and Eastern Europe. Race, nationalism, religion, language, geography, politics—all helped shape different ways of understanding just what it meant to be a Jew, and all found expression in art and literature by both Jews and non-Jews. Looking at texts originally written in German, Yiddish, and Hebrew, including prose, poetry, journalism and drama, as well as painting, photography, graphic design, architecture, and film we will gain an understanding of the range of ways that Jewish identity could be understood and expressed as well as of the ideological stakes and historical contexts of such representations. Writers and artists examined will include Chagall, Kafka, Sholem Aleichem, and Bilalik. All readings will be in translation. Instructor(s): S. Spinner
Area: Humanities.

Program in Museums and Society

AS.389.335. Recreating Ancient Greek Ceramics. 4 Credits.
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes. Instructor(s): S. Balachandran
Area: Humanities.

Hopkins curatorial staff and photography instructor introduce the concept of books as art. Students create artist’s books inspired by campus collections for inclusion in an Evergreen exhibition. FIRST CLASS IS MANDATORY. M&S practicum course. Cross-listed with Homewood Art Workshops. Instructor(s): J. Abbott; P. Berger
Area: Humanities.
Behavioral Biology Program

The David S. Olton Behavioral Biology Program seeks to establish a greater understanding of the relations of brain and behavior through an interdisciplinary program of study. Students in the Behavioral Biology Program examine the complex interplay between environment and behavior, and the processes and mechanisms that underlie behavior. One goal of the program is for students to learn how to integrate scientific discoveries from the wide array of scientific fields of inquiry that contribute to the study of behavioral biology, from molecular biology to sociology.

The interdisciplinary characteristics of the Behavioral Biology Program provide an excellent preparation for postgraduate work. For those interested in the health professions, behavioral biology can be integrated into a premedical curriculum that will provide a broad, humanistic perspective. For those who wish to pursue scientific careers in psychopharmacology, behavioral neuroscience, and physiological psychology, the program provides excellent preparation. Students interested in the fields of organismal or integrative biology should also consider this major.

Many students ask about the similarities and differences between the behavioral biology major and the neuroscience major. Both of these programs are interdepartmental, and a majority of professors teach courses that are listed for both majors. Behavioral Biology majors can explore many aspects of the biology of behavior, including the neural mechanisms of behavior (which obviously overlaps with the neuroscience major), but also biomechanical, evolutionary, ecological, and social aspects of behavior. The behavioral biology major also has fairly liberal course requirements which provide students with an opportunity to explore more choices in their liberal arts education. Students majoring in neuroscience focus directly on the brain and on neural function/mechanisms. Generally speaking, the systems Neuroscience focus area in the neuroscience major has the most overlap with behavioral biology.

The core program of the behavioral biology major provides breadth and background in five fundamental areas:

1. physics, chemistry, mathematics
2. biology
3. psychology, anthropology, sociology
4. neuroscience
5. history of science

The exact courses to be taken are determined by the student in conjunction with the faculty advisor. A grade of C- or better is required for courses fulfilling major requirements and courses may not be taken satisfactory/unsatisfactory. Hopkins undergraduates may enter the Behavioral Biology Program at any time, provided all requirements can be completed before graduation. Additional information regarding the Behavioral Biology Program is available through Hope Stein at hope.stein@jhu.edu or 410-516-6196.

Please consult our website for the most recent updates: http://krieger.jhu.edu/behavioralbiology/courses/

Requirements for the B.A. Degree

**Behavioral Biology Elective Courses**

Nine credits of advanced bio-behavioral science courses 9
Six credits of intermediate/advanced social/developmental/cognitive sciences courses 6

| Total Credits | 35 |

** Students should refer to the program website (http://krieger.jhu.edu/behavioralbiology/courses/) or the schedule of classes to identify elective choices.
Research for Undergraduates

While research is not required for behavioral biology majors, it is strongly recommended students consider participating in a research experience as an undergraduate.

Honors in the Major

To receive honors in behavioral biology, students must have met the following criteria:

1. Earn a GPA of 3.5 or better in major requirements
2. Conduct research and give a research presentation
3. Receive a recommendation from research mentor

For current faculty and contact information go to http://krieger.jhu.edu/behavioralbiology/faculty_directory/

Courses

AS.080.260. Bridging the gap between Biology and Statistics.
This course is designed to support the lectures and assignments in Probability and Statistics in Life Sciences, EN.550.211. This one-hour a week course is led by a behavioral biology professor with extensive expertise in statistics and mathematics. The primary goal of this course is to increase success and understanding of EN.550.211 by bridging the gap between theoretical statistics and biological thinking. In addition, when possible, examples and direct applications in neuroscience and behavioral biology will be presented to provide a context for EN.550.211 materials.
Instructor(s): K. Bohn.

This course examines the origins of human structure, function and behavior from an evolutionary perspective. It includes study of the evolution, behavior and behavioral ecology of nonhuman primates, hominin evolution (including the paleontological and archaeological records), and the origins of human cognition, social behavior and culture. Cross-listed with Psychological and Brain Sciences.
Instructor(s): P. Holland
Area: Natural Sciences, Social and Behavioral Sciences.

AS.290.200. Sensory Exotica.
A hidden world of sensory signals and behavior lies beyond human perceptual capabilities. Flying bats capture insects in complete darkness using self-generated sounds. Hundreds of species of fish use electricity for sensing and communicating. These animals, having evolved unique sensory and motor adaptations, often outperform both man and machine in the control of behavior. This class will explore ‘exotic’ sensory systems from the organismal to the neuronal level and discuss applications for bio-inspired technologies.
Area: Natural Sciences.

The course examines Tropical Biology and Evolution in situ in the Rain Forest and Galapagos Islands.
Instructor(s): G. Ball
Area: Natural Sciences.

AS.290.301. Stress and the Brain.
The purpose of this course is to explore the phenomenon of stress by investigating the neural, endocrine and molecular mechanisms involved. By reviewing both animal and human research, this course will consider disorders of the stress control system and the adverse impact of stress on human physical and mental health. Topics in this class will include, but are not limited to I) disorders such as PTSD, anxiety, major depression; II) interactions between stress and neurodegenerative disorders; III) stress-immune-inflammatory interactions; IV) the role of stress in obesity, hypertension, and other metabolic syndromes; V) stress effects on reproduction. Students will finish this course with a greater understanding for the fundamental neuroendocrine responses to stress and its consequent and/or associated adverse effects on human health.
Prerequisites: AS.020.306 OR (AS.050.203 OR 080.203) OR AS.200.141 OR (AS.080.305 AND AS.080.306)
Instructor(s): F. Madison
Area: Natural Sciences.
The study of animal communication involves the study of neural and hormonal mechanisms mediating the production of communication signals and the evolutionary function of the different signals animals produce to communicate with one another. In this course, information from both of these approaches to the study of behavior will be integrated to provide a comprehensive examination of the causes and functions of different animal communication systems. Topics will include both a consideration of the mechanisms of signal production and of signal perception. The course will review the basic features of communication and features of signaling systems. We will also discuss neural and endocrine functioning and the fundamentals of evolutionary theory relevant to the study of animal communication. Finally, this course will include a field component where students will quantify different aspects of communicative behaviors including song, mating, and parental behavior in several species. 
Prerequisites: AS.200.141 OR AS.200.208 OR AS.080.305
Instructor(s): F. Madison.

This course will examine the historical and current theories of sexual orientation and sexual variation development by examining the biological, psychological and social contributing factors that influence the development of sexual orientations and variations along with treatment and modification of problematic sexual behaviors. Limited to Juniors and Seniors with PBS, Neuroscience, Public Health, Behavioral Biology, and Biology majors, or Juniors and Seniors with PBS or Women’s Studies minors.
Prerequisites: Students may enroll in both AS.200.204 and AS.290.420, but cannot do so in the same semester.
Instructor(s): A. Jarema; C. Kraft
Area: Social and Behavioral Sciences.

Great ideas in Behavioral Biology. Discussion of classic and cutting edge articles in the original literature. Student presentations and reaction papers. Capstone course for senior Behavioral Biology majors.
Instructor(s): P. Holland
Area: Social and Behavioral Sciences.

AS.290.501. Research-Freshmen.
Instructor(s): Staff.

AS.290.502. Research-Freshmen.
Instructor(s): Staff.

AS.290.503. Research-Sophomores.
Instructor(s): Staff.

AS.290.504. Research-Sophomores.
Instructor(s): Staff.

AS.290.505. Research-Juniors.
Instructor(s): Staff.

AS.290.506. Research-Juniors.
Instructor(s): Staff.

AS.290.507. Research-Seniors.
Instructor(s): Staff.

AS.290.508. Research-Seniors.
Instructor(s): Staff.

AS.290.519. Independent Study.
Instructor(s): P. Holland.

AS.290.520. Independent Study.
Instructor(s): C. Moss; K. Bohn; P. Holland.

Cross Listed Courses

Biology
AS.020.151. General Biology I.
This course begins with an overview of the biosphere followed by an analysis of ecosystems and animal behavior in the context of evolution. Cellular and Molecular bases of life, modes of inheritance, and bioenergetics are presented as unifying themes. The biochemistry of organic molecules, control of gene expression, cellular metabolism, and advances in biotechnology are areas of concentration.
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.152. General Biology II.
This course builds on the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology. The workshops that were introduced in AS.020.151 General Biology I will include the use of simulation software, a critique of the primary literature, and an exploration of current trends in medicine. Recommended Course Background: AS.020.151. Section 01: Not open to Freshmen. Section 02: Open to Freshmen only.
Prerequisites: Prereq: AS.020.151
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.153. General Biology Laboratory I.
Student must have enrolled in AS.020.151 either this term or in past terms. Students who have credit for AP Biology but take General Biology Lab I will lose all eight credits of AP Biology credit. This course reinforces the topics covered in AS.020.151. Laboratory exercises explore subjects ranging from forest ecology to molecular biology to animal behavior. Students participate in a semester-long project, identifying bacteria using DNA sequencing. Cross-listed with Behavioral Biology.
Prerequisites: AS.020.151
Instructor(s): R. Pearlman
Area: Natural Sciences.
Anthropology

The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.610
Area: Humanities, Social and Behavioral Sciences.

The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.352
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

Neuroscience

This course investigates numerous types of brain injuries and explores the responses of the nervous system to these injuries. The course’s primary focus is the cellular and molecular mechanisms of brain injury and the recovery of function. Discussions of traumatic brain injury, stroke, spinal cord, and tumors, using historical and recent journal articles, will facilitate students’ understanding of the current state of the brain injury field. Cross-listed with Psychological and Brain Sciences and Behavioral Biology.
Prerequisites: (AS.080.305 AND AS.080.306) OR (AS.080.312 OR AS.020.306) OR (AS.200.141 and 020.306) OR Permission of Instructor
Instructor(s): L. Gorman
Area: Natural Sciences.

Psychological Brain Sciences

Formerly listed as Introduction to Physiopsychology. A survey of neuropsychology relating the organization of behavior to the integrative action of the nervous system. Cross-listed with Behavioral Biology and Neuroscience.
Instructor(s): L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

Examines basic principles of animal behavior (orientation, migration, communication, reproduction, parent-offspring relations, ontogeny of behavior and social organization). Evolution and adaptive significance of behavior will be emphasized.
Prerequisites: Prereqs: AS.020.151 AND (AS.110.106 OR AS.110.108)
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

A critical examination of the methods of observation, description, reasoning, inference, measurement and intervention that underlie the clinical practice of psychology and psychiatry. Crosslisted with Behavioral Biology. Open to Senior & Junior Behavioral Biology, Cognitive Science, Neuroscience, Psychology, and Public Health majors only OR with Instructor Approval.
Prerequisites: AS.200.212
Instructor(s): D. Edwin
Area: Social and Behavioral Sciences.

AS.200.343. Motivation.
Current biological, behavioral, and cognitive research and theory concerning the motivation of behavior are examined. Both human and non-human animal research is reviewed. Topics include the role of genetics, arousal, biological regulatory systems, incentives, expectancies, attributions, social processes and self-actualization in the general of behavior. Recommended Course Background: AS.200.101 and AS.200.146 or instructor permission.
Instructor(s): H. Petri
Area: Social and Behavioral Sciences.

An examination of the effects of hormones on behavior in non-human and human animals. Topics will include the effects of hormones on sexual differentiation, reproductive behavior, parental behavior, homeostasis and biological rhythms, regulation of body weight, learning and memory. Cross-listed with Behavioral Biology and Neuroscience.
Prerequisites: Prereqs: (AS.200.141 OR AS.080.305 ) OR (AS.020.151 AND AS.020.152) OR (AS.020.305 AND AS.020.306 ) or instructor’s permission
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

This course will apply insights from cognitive psychology decision-making research to the stock market. The course investigates whether investors can beat the market benchmarks by exploiting marketplace investor sentiment. Juniors and seniors only. Recommended Course Background: six credits of Psychology course work.
Area: Social and Behavioral Sciences.

This course is designed to address the growing literature on the neurobiology of motivational behaviors, integrating studies from invertebrates to birds, rodents, primates and humans. The course will begin with a century old, yet ongoing, discussion on how researchers define ‘motivation’. Following this primary introduction, we will discuss the brain circuitry that underlies emotion, reward, and motivation, so that students attain the necessary foundations for understanding the neurobiology of motivated behavior. In particular, we will proceed with an in-depth exploration of an inherently motivated and naturally rewarding social interaction, sexual behavior, which will be discussed at multiple levels. Subsequent lectures will address literature on how humans activate the same brain reward systems artificially by using drugs of abuse. Drawing on these theoretical and empirical foundations, we will then explore the possible involvement of these motivational systems on distinctly human pleasures such as religious experience, visual arts, and music.
Prerequisites: AS.200.141 OR AS.080.105 OR (AS.080.305 AND AS.080.306) OR Permission required.
Instructor(s): O. Iyilikci
Area: Natural Sciences, Social and Behavioral Sciences.
Episodic memory, or autobiographical memory, has been said to be a capacity that is uniquely human. Consisting of the what, when, and where components of our experiences, episodic memory is what makes each of us who we are. This course will explore each of these components individually—the psychology and neural underpinnings of each component—before discussing them in combination as episodic memory. Finally, we will visit one of the greatest ongoing debates in the memory literature: whether or not this ability is truly “uniquely human” or if our nonhuman animal counterparts also have this capacity. Throughout the course, we will draw on evidence from empirical articles based on studies in a variety of species including rodents, primates, and birds.
Prerequisites: AS.200.101 OR AS.200.141 OR AS.080.105 OR (AS.080.305 AND AS.080.306) OR Permission required.
Instructor(s): J. Asem
Area: Natural Sciences, Social and Behavioral Sciences.

This course examines the general organizing principles of the anatomy of the human central nervous system and how this anatomical organization relates to function, from the level of neural circuits, to systems, to behavior. Students will learn to identify neuroanatomical structures and pathways in dissections and MRI images through computerized exercises. Readings and lectures will emphasize general structure-function relationships and an understanding of the functional roles of particular structures in sensory, motor, and cognitive systems.
Prerequisites: AS.080.250 OR AS.080.305
Instructor(s): S. Courtney-Faruque
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.376. Psychopharmacology.
Designed to provide information about how drugs affect the brain and behavior. The course focuses on biological concepts underlying structures and functions of the brain that relate to mental disorders. An introduction to neurobiology and brain function is presented as it applies to the interaction of various classes of drugs with the individual neurotransmitter systems in the brain. A brief historic review is followed by a discussion of clinical relevance. Cross-listed with Behavioral Biology and Neuroscience.
Prerequisites: AS.200.141 OR (AS.020.312 AND AS.020.306) OR (AS.080.305 AND AS.080.306) OR permission required.
Instructor(s): H. Adwanikar; L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

Examine relations between brain, mind, and behavior in nonhuman animals, focusing on topics such as learning, memory, attention, decision-making, navigation, communication, and awareness. We will take a variety of approaches, including behavioral, computational, evolutionary, neurobiological, and psychological perspectives.
Prerequisites: AS.200.141 OR AS.200.208 OR AS.290.101) OR permission of instructor.
Instructor(s): P. Holland
Area: Social and Behavioral Sciences.

Bioethics Program
The practice of medicine, the development of public health policies, and advances in the biomedical sciences raise fundamental moral and philosophical issues. The bioethics program is designed to provide students with an understanding of these issues, and the background and the conceptual tools to think about them clearly. The program is a collaboration between the Johns Hopkins Berman Institute of Bioethics and the Department of Philosophy, and draws on the resources of both.

Requirements for the Minor
Eight Courses
AS.150.219 Introduction to Bioethics
AS.150.220 Introduction to Moral Philosophy
Select one of the following: 8
AS.020.151 General Biology I
& AS.020.152 and General Biology II
AS.020.305 Biochemistry
& AS.020.306 and Cell Biology
EN.580.421 Systems Bioengineering I
& EN.580.422 and Systems Bioengineering II
At least two upper-level (300- or 400-level) seminars offered by the bioethics program 6
Two additional bioethics seminars not counted in fulfillment of the previous requirement approved by the program’s advisory committee. 6
Total Credits 20

All courses must be taken for letter grades and receive a grade of C- or higher.
For more information, please contact Professor Hilary Bok.
For current faculty and contact information go to http://www.bioethicsinstitute.org/people/faculty

Biology
http://www.bio.jhu.edu

The Department of Biology offers a broad program of undergraduate, graduate, and postgraduate study in the biological sciences. Included among the areas in which instruction and research opportunities are available are biochemistry and biophysics, cell biology, molecular biology, microbiology, developmental biology, genetics, neuroscience, and immunology.

The Biology Department offers two degree options for undergraduate students, a Bachelor of Arts degree for biology majors and a Bachelor of Science degree for molecular and cellular biology majors.
Requirements for the B.A. Degree

(Also see Requirements for a Bachelor’s Degree. (p. 20))

The B.A. degree in biology is designed to provide students with a thorough grounding in modern biology, with special emphasis on the molecular aspects of the discipline.

All courses required for the biology major must be taken for a letter grade (not S/U) and be passed with a grade of C- or better with one exception. The department will accept one passing grade below C- in senior year provided that the average for all formal lecture and laboratory courses is at least 2.0.

### B.S. Degree in Molecular and Cellular Biology

The Biology Department offers a B.S. degree in molecular and cellular biology. The B.S. program is designed to provide a rigorous preparation for advanced study in the biomedical sciences. The program is tailored not only to students planning to enter Ph.D. programs or obtain employment in the biotechnology industry but also for premedical students.

All courses required for the molecular and cellular biology major must be taken for a letter grade (not S/U) and be passed with a grade of C- or better with one exception. The department will accept one passing grade below C- in senior year provided that the average for all formal lecture and laboratory courses is at least 2.0.

### Requirements

The B.S. degree in molecular and cellular biology requires, in addition to the requirements for the B.A. degree in biology, at least two additional upper level elective courses totaling five additional credits or more (for a total of at least 13 credits) from the elective list, and two of those electives must be at least 3 credit hours and have an 020 number. The B.S. degree also requires six credits of research supervised or sponsored by a faculty member in Biology. The supervised research will include participation in group meetings and writing a summary of accomplished work at the end of the year. General Biology I and II are not required for the B.S. degree.

### Honors in Biology

Students completing either a biology major or molecular and cellular biology major are eligible to receive their degree with honors.

The B.A. in biology with honors requires, in addition to the regular requirements for the B.A. in biology, a 3.5 GPA for natural sciences and quantitative studies courses, two semesters of research, a presentation of a poster describing the independent research, and a recommendation from the research sponsor.

The B.S. in molecular and cellular with honors requires, in addition to the regular requirements for the B.S. in molecular and cellular biology, a 3.5 GPA for natural sciences and quantitative studies courses, a presentation of a poster describing the independent research, and a recommendation from the research sponsor.

The research requirement must be completed under the direction of a faculty member in a department associated with the Johns Hopkins University or the Johns Hopkins Medical Institutions. If the student’s research director is not a member of the Department of Biology, a Biology faculty member must serve as a sponsor and approve the recommendation from the research director.
B.A./M.S. Degree in Molecular and Cellular Biology

The Biology Department offers a B.A./M.S. (or B.S./M.S.) if the student has completed the requirements for the B.S. degree in molecular and cellular biology. The B.A./M.S. (or B.S./M.S.) degree provides Hopkins biology majors with advanced training in preparation for careers in science and medicine. Please see the Graduate Tab for details.

Requirements for the M.S. Degree in Molecular and Cellular Biology

The Biology Department offers a B.A./M.S. (or B.S./M.S.) if the student has completed the requirements for the B.S. degree in molecular and cellular biology open only to Johns Hopkins University undergraduate majors.

Students in the program must complete all requirements for the B.A. (or B.S.) degree. In addition, students enrolled in the combined bachelor's/master's program must complete the following requirements.

Four additional advanced or specialized courses, at least two of which are at the 600-level or above. *

AS.020.401 Advanced Seminar: Molecular and Cellular Biology 3
AS.020.402 Seminar: Molecular & Cellular Biology 3
AS.020.551 Mentored Research 9
AS.020.553 Mentored Research 9
or AS.020.554 Mentored Research Program in Cellular and Molecular Biology

Final report and presentation **

Teaching ***

* Eligible courses are listed on the Biology Department website.
** The Mentored Research Program culminates in the preparation of a written report of the research project in the form of a thesis. The written report and an oral presentation of the work are evaluated by a Thesis Committee. Passing performance, as judged by the committee, is required for the M.S. degree.
*** Teaching is an integral component of the master’s degree. The teaching requirement is fulfilled as a teaching assistant for the General Biology and General Biology Laboratory courses (or other Biology lecture and lab courses) for two semesters.

Students admitted to the B.A./M.S. program will be awarded the M.S. degree if they complete the above-described requirements, receive a grade of B or better in all courses during the one year duration of the program, and achieve passing performance on the final written report and oral presentation of the research project completed during the research year as judged by the Thesis Committee.

Admission

Admission to the B.A./M.S. Molecular and Cellular Biology program is selective. Hopkins biology majors and MCB majors who have achieved a minimum overall grade point average of 3.2, as well as a minimum natural science grade-point average of 3.0, and have had at least two semesters of previous research experience may apply for admission during the junior or senior years. Students with a GPA below the minimum requirement will be considered under special circumstances if a strong commitment to research is demonstrated. Students interested in applying to the master’s program should attend an information session prior to application. Admission decisions are made by the MCB Program Committee, on the basis of:

1. the student’s academic record,
2. a written proposal for a project to be completed in the Mentored Research Program,
3. letters of support and recommendation, and
4. an interview with the student if required. The committee reserves the right to require interviews for individual students for further clarification of application materials.

Requirements for the Ph.D. Degree in Cellular, Molecular, Developmental Biology and Biophysics (CMDB Program)

A program of study leading to the Ph.D. degree is open to students who are candidates for, or who already have, the bachelor’s or master’s degree in the biological or physical sciences. To be admitted, the applicant should have had either a thorough training in the fundamentals of biology and both organic chemistry and general physics, or a broad training in the physical sciences and mathematics. Special attention is given to the applicant’s quality of scholarship and his or her promise as an investigator.

In addition to the general university requirements for an advanced degree (see Academic Information for Graduate Students (p. 61)), doctoral candidates must meet the following departmental requirements:

- Four core courses and four 600- and 700-level electives.
- At least one year of laboratory teaching during the period of graduate residence.
- A high level of achievement in a comprehensive written proposal and oral examination covering proficiency in the field of the student’s research interest and various areas of biology and related fields.
- A dissertation based on a program of independent research, a public seminar followed by an oral examination by the thesis committee.

All graduate students are required to complete the four core courses during the first year. In addition, students are required to complete four elective courses before graduation chosen from the list below of 600-level electives and 700-level seminars offered each semester. At least two out of the four courses must be 600-level.

Core Courses, Fall Semester

AS.020.601 Current Research in Bioscience
AS.020.607 Quantitative Biology Bootcamp
AS.020.686 Advanced Cell Biology
AS.020.674 Graduate Biophysical Chemistry
AS.020.699 CMDB Responsible Conduct in Research

Core Courses, Spring Semester

AS.020.668 Advanced Molecular Biology
AS.020.637 Genomes & Development

Teaching Opportunities

Since most biology Ph.D.’s will teach at some time during their careers, experience in teaching is considered an essential part of the Ph.D.
program. The minimum teaching requirement is three contact hours a week for one year in the laboratory sections of undergraduate courses. Further teaching experience is gained through the preparation and presentation of reports in seminars and journal clubs. The department stresses organization of material and clarity of presentation.

Facilities

The lecture rooms, teaching laboratories, and research facilities of the Biology Research Complex (consisting of Seeley G. Mudd Hall and Undergraduate Teaching Laboratories) offer a thoroughly modern research facility for molecular biology.

Financial Aid

The department has fellowship funds for the support of graduate students. Awards are granted for tuition and living expenses. Laboratory fees and research expenses are paid by the department.

Carnegie Institution for Science, Department of Embryology

The Carnegie Institution’s Department of Embryology is located on the Homewood campus, close to the Biology research complex. Members of this group hold part-time appointments in the Department of Biology and participate in the training of graduate students. With the approval of both the department and the Carnegie staff, a number of graduate students in biology conduct thesis research in the Carnegie laboratory. The interests of the Carnegie staff include developmental and molecular biology.

For current faculty and contact information go to http://www.bio.jhu.edu/Directory/TenuredPlusTenureTrack.aspx

Faculty

Chair

Vincent J. Hilser
Professor: thermodynamics, protein structure and dynamics, molecular recognition, protein folding.

Professors

Karen Beemon
retroviral RNA processing and transport; avian leukemia virus tumorigenesis.

Kyle W. Cunningham
calcium transport and signaling mechanisms in yeast.

Michael Edidin
membrane organization and dynamics, immunology.

Ernesto Freire

Edward M. Hedgecock
developmental genetics of the nervous system of Caenorhabditis elegans.

M. Andrew Hoyt
genetics of chromosome segregation and signal transduction in yeast.

Evangelos N. Moudrianakis
assembly and dynamics of nucleoproteins and chromosomes, bacterial, and chloroplast bioenergetics.

Joel F. Schildbach
Vice Dean for Undergraduate Studies: structural biology of bacterial conjugation.

Robert Schleif
protein-DNA interactions and regulation of gene activity.

Trina Schroer
microtubule-based motors, organelle transport.

Mark Van Doren
Director of Graduate Studies: gonad development and the formation of sexual dimorphism in the soma and germline.

Beverly R. Wendland
Dean, Arts and Sciences: molecular mechanisms of endocytosis in yeast

Haiqing Zhao
cellular and molecular mechanisms underlying the development and function of olfactory sensory neurons.

Associate Professors

Xin Chen
understanding how genes are expressed in an ordered way to regulate germ cell differentiation; epigenetic mechanisms that participate in regulation.

Samer Hattar
light reception for non-image detection: role of rods, cones, and the new photoreceptors (melanopsin-containing retinal ganglion cells).

John Kim
deciphering the epigenetic mechanisms of small RNA-mediated gene regulation and their collaboration with RNA binding proteins.

Rejji Kuruvilla
Deputy Director of Graduate Studies: local retrograde signaling by target-derived neurotrophins in neuronal development.

James Taylor
genomics of gene regulation, chromatin structure and organization, computational genomics and bioinformatics

Assistant Professors

Robert Johnston
stochastic and long-range gene regulatory mechanisms that diversify neuronal subtypes.

Christian Kaiser
single-molecule biochemistry studies of the machines and processes in protein translation, translocation, and folding.

Young-Sam Lee
regulation by small metabolites: phosphate signaling pathways.

David Zappulla
telomerase RNA-protein enzyme complex and its involvement in chromosome stability, cancer and aging.

Professors Emeriti

Maurice J. Bessman
biochemistry and enzymology, synthesis of nucleic acid derivatives, biochemical basis of spontaneous mutations.

Ludwig Brand
fluorescence studies of protein and membrane dynamics.

Douglas Fambrough
membrane proteins, targeting, structure, function, and regulation, Na, K-ATPase, Ca-ATPase.

Richard E. McCarty

Allen Shearn
developmental genetics, imaginal disk development in Drosophila studied in lethal and temperature-sensitive mutants.

Research Professor
Ru Chih Huang
William D. McElroy Research Professor: gene regulation and chromosomal structure and function, principles of cancer biology and control of cancer and viral growth.

Yuan Chuan Lee
glycoproteins, glycolipids, carbohydrate receptors, and cell-surface substances.

J. Michael McCaffery
Integrated Imaging Center Director

Peter Privalov
physics of protein structure.

Academy Professor
Ludwig Brand
fluorescence studies of protein and membrane dynamics.

Yuan Chuan Lee
glycoproteins, glycolipids, carbohydrate receptors, and cell-surface substances.

Associate Research Professor
Jocelyn DiRuggiero
genomic diversity, DNA repair mechanisms and environmental stress responses in extremophiles.

Senior Lecturer
Emily Fisher
Director of Undergraduate Studies

Robert Horner
Carolyn Norris
Rebecca Pearlman

Joint Appointments
Douglas Barrick
Professor (Biophysics).

Gregory Bowman

Associate Professor (Biophysics).

Richard Cone
Professor (Biophysics).

Patrick Cummings
Program Director (Biotechnology).

Karen Fleming
Professor (Biophysics).

Bertrand Garcia-Moreno E.
Professor (Biophysics).

Marc Greenberg
Professor (Chemistry).

Carol Greider
Bloomberg Professor (Cell Biology).

Margaret Johnson
Assistant Professor (Biophysics).

Alfredo Kirkwood
Professor (Neuroscience).

Lynn Johnson-Langer
Program Director (Biotechnology).

Juliette Lecomte
Professor (Biophysics).

Hey-Kyoung Lee
Associate Professor (Neuroscience).

Kristina Obom
Associate Program Chair (Biotechnology).

Elijah Roberts
Assistant Professor (Biophysics).

Steven Rokita
Professor (Chemistry).

Robert Siliciano
Professor (Medicine).

Craig A. Townsend
Professor (Chemistry).

Sarah Woodson
Professor (Biophysics).

Lecturers
Anna Coppola
Kathryn Tifft Oshinaiye
Christov Roberson
Richard Shingles

Adjunct
Alex Bortvin
Assistant Professor: genetic and epigenetic controls of germ cell development and function in vertebrates.
Donald D. Brown  
Professor Emeritus: gene expression in development.

Orna Cohen-Fix  
Adjunct Professor (NIH): nuclear structure and its effect on nuclear function.

Victor G. Corces  
Professor (Emory): control of gene expression, molecular mechanisms of mutagenesis by transposable elements.

Chen-Ming Fan  
Professor: molecular and cellular interactions that contribute to vertebrate embryogenesis.

Steven Farber  
Associate Professor: real-time imaging of lipid metabolism in live zebrafish; identification of genes which regulate cholesterol absorption using biochemical and genetic strategies.

Joseph G. Gall  
Professor: chromosome structure and functions, nucleic acids in development.

Marnie Halpern  
Professor: zebra fish development.

Audrey Huang  
Lecturer.

Nicholas Ingolia  
Assistant Professor: genome-wide analysis of translation in vivo.

Michael Lichten  
Adjunct Professor (NIH): genetic recombination and chromosome structural changes that occur during meiosis and DNA damage repair, using budding yeast as a model system.

George Scangos  
Professor.

Allan Spradling  
Professor, and Director of Carnegie Institution for Science: molecular genetics of Drosophila.

Yixian Zheng  
Professor: cell division, cell morphogenesis, and cell fate specification.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

**AS.020.103. Freshman Seminar: The Human Microbiome.**
We live in a world full of bacteria. Within a healthy adult, the number of microbial cells is estimated to outnumber human cells by a factor of ten to one. While this number may seem daunting, almost all of our bacterial residents do no harm, and some are beneficial and necessary to our health and development. “The Human Microbiome” will take an in depth look at how these bacterial residents interact with the human body and how those interactions play a role in human health and disease. The course will provide a complete overview of the human microbiome in all its niches. By exploring recent primary literature, students will gain knowledge of current research on the human microbiome, and an understanding of the molecular relationship between a human host and their bacterial residents. Freshmen Only. 
Instructor(s): T. Feehery
Area: Natural Sciences.

**AS.020.104. Freshman Seminar: From Genes to DNA and Back.**
A course consisting of introductory lectures followed by student presentations in the form of seminars. The issues we usually analyze are: How did we arrive at the concept of the “gene”? What are the early observations that gave substance to this concept? How did we arrive at the “one gene, one enzyme” dogma? What is the chemical nature of the gene? Is DNA enough for regulated gene expression? Is it “all in our genes”? What is genetic plasticity and epigenetics? What about genomics and proteomics? In the course of our analyses we bring together observations, and experimental results and ideas not only from biological sciences (Genetics, Cell and Developmental Biology and Genetics) but also from Physics, Sociology, Politics and Philosophy. We do all this in order to clarify how observations turn to ideas, then dogmas and even biases that distort the true meaning of objective Sciences. Freshmen Only.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

**AS.020.105. Freshman Seminar: The RNA World: from the origins of life to modern genomes.**
RNA was once considered by some to be a relatively boring messenger molecule that simply functioned to convey genetic information in DNA to protein. However, research over the last 30 years has shown that RNA is a special molecule that not only transmits genetic information (like DNA), but can also catalyze chemical reactions (like proteins). This course will cover the unique biochemical properties of RNA and delve into the many important roles that non-coding RNAs play within the central dogma of gene expression. Specific topics will include: the “RNA World” hypothesis, which proposes that self-replicating RNA molecules arose as the precursors to modern life; evolution of RNA; and roles of non-coding RNAs in genome maintenance, mRNA processing, and protein translation. We will also highlight how RNA is involved in human diseases and how RNA is being used in emerging therapeutic treatments.
Instructor(s): M. Mefford
Area: Natural Sciences.

**AS.020.106. Freshman Seminar: Tuberculosis.**
Mycobacterium tuberculosis is an extremely successful intracellular bacterial pathogen able to manipulate phagocytic cells and its own metabolism to survive within a host. The molecular mechanisms of this survival and resistance to antibiotics will be studied. Freshmen only.
Instructor(s): R. Horner
Area: Natural Sciences.
AS.020.111. Freshman Seminar: The ‘Nobels’ in Medicine and Chemistry.
Key events in our understanding of the life sciences will be traced with the aid of Nobel awards.
Instructor(s): L. Brand
Area: Natural Sciences.

AS.020.113. Freshmen Seminar: Microbes in the Media.
This seminar discusses scientific issues that are in the news today. Possible topics might include: genomics; adaptation and evolution of bacterial pathogens; emergence of antibiotic resistance; pandemic flu; microbial communities and impact on public health; food safety; bioterrorism; synthetic biology; bioremediation; microbial fuel cells; or other biotechnology topics that could emerge during the semester. Freshmen Only. Instructor's permission required for upperclassmen.
Instructor(s): T. Cebula
Area: Natural Sciences.

AS.020.115. Bioenergetics.
This course is a combination of lectures, student presentations and group discussions that address fundamental principles and also contemporary issues examining the way all forms of Life on Earth are ultimately dependent on sunlight to satisfy their food and energy requirements. We examine the steps from the capture of Physical energy (photons), to the development of electrochemical potentials and finally, to their utilization by cellular organelles towards the synthesis of the chemical "currency" that fuels all biological processes (biosynthesis, cell communication, movements, etc). Special emphasis will be on current developments in biotechnologies that utilize microbial populations to supply us with fuels and also to clean up environmental hazards. The course will also consider ways to extract lessons from Nature's successful designs and harmonious adaptations so that we, in the long run, can utilize them towards a minimization of our negative impact on the environment. Note: Freshmen and Sophomores only, with good foundations in two of the following: Physics, Chemistry, Biology, Biophysics.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.117. Molecular Biology of Aging.
In this course we will discuss molecular mechanisms and pathways involved in aging and lifespan regulation, as well as exploring the biology of aging-related diseases such as Alzheimer’s and Parkinson’s. Students will have the opportunity to share and consider current primary literature in the field. Textbook required. Freshmen Only
Instructor(s): S. Soper
Area: Natural Sciences.

The course will cover topics in the way our resident bacteria, the microbiome, affect nutrition and health. We will begin with an overview of the bacterial flora in and on our bodies, spend some time on the ways to define the bacterial population of a particular organ, and go on to considering the microbiomes of particular organs. A major emphasis will be on bacteria of the gut and the way in which they influence the immune system. Freshmen only.
Area: Natural Sciences.

AS.020.120. Introduction to Laboratory Research.
This course will take place in Rockville, MD. This is an exciting time to work in biotechnology research. The Human Genome Project is generating fundamental genetic information at a breathtaking rate. Basic research findings are being applied to medicine, agriculture, and the environment; and a variety of new biotechnology products are moving into production. Behind each of these accomplishments lies extensive laboratory research. In this class, students will explore a variety of experimental techniques and evaluate their roles in modern biotechnology research.
Instructor(s): E. Jimenez; J. Sorenson; L. Diaz; S. Primus
Area: Natural Sciences.

AS.020.121. Microbial Genomics.
This course will cover next generation (NextGen) sequencing methods, genome and metagenome analyses, and the issues associated with them. We will review studies in microbial evolution, environmental microbiology, and host-associated microbial communities using recent papers from the primary literature. Topics such as the first ancient bacterial genome from the Black Death plague, ocean and soil viromes, the human gut microbiome, and microbial communities inside Antarctica rocks will be explored. This course will also provide students with a solid basis for critically analyzing the primary literature through discussions in class and a final written project (see below). Articles from the primary literature will be provided to the students.
Instructor(s): J. Diruggiero
Area: Natural Sciences.

AS.020.122. Freshman Seminar: Cancer and Aging.
Cancer and aging are intimately intertwined with one another. For instance, older age is the number one risk factor for developing cancer, and cancer is predicted to be the number one killer in the U.S. in the next 15 years, surpassing heart disease. Interestingly, both cancer and aging result from an accumulation of genetic mutations over time with very different outcomes. In cancer, genetic mutations cause unrestricted and aberrant division of cells, while in aging mutations cause cells to cease cell division. This discussion based course will provide an overview of the hallmarks of cancer and aging, including recent research, emerging therapeutics, and bioethical considerations. Freshmen only.
Instructor(s): M. Mefford
Area: Natural Sciences.

AS.020.123. Genetics, Genomics and Evolution.
An introduction to key principles of genetics, genomics, and evolution. Lectures will alternate lab exercises and discussion of primary literature. Freshmen only. Recommended Course Background: Score of 4 or 5 on AP Biology Exam.
Instructor(s): F. Spencer
Area: Natural Sciences.

This one semester introductory class is open to freshmen who successfully completed a high school biology course. No other experience is required. Students will explore concepts and methods required to understand an environmental biome, the sum of organisms that coexist and interact in a given environmental space. The laboratory component will compare environmental samples using ribosomal DNA typing, as well as metagenomic sequence analysis. This year’s research focus will explore biological profiles surrounding penguins at the Maryland Zoo using novel metagenomic DNA sequence data.
Instructor(s): F. Spencer; J. Taylor
Area: Natural Sciences.
AS.020.126. Techniques in Molecular Biology.
This course is designed to supplement the scientific classroom experience of students by providing hands on experience with the essential core molecular biology techniques of bacterial DNA cloning, DNA analysis, and protein analysis. Students will be able to understand and explain how these methodologies work scientifically and will develop the basic laboratory skills necessary for the successful completion of the assays.
Instructor(s): J. Gordy.

This course will introduce current topics in cancer research with a focus on the state of knowledge regarding pre-diagnosis concepts in cancer research. We will provide students with the context in which to interpret the latest findings in cancer research by giving a brief overview of cancer biology and descriptive epidemiology of the most common cancers in the United States. We will then discuss the current state of knowledge regarding cancer etiology and primary prevention strategies, providing specific examples from research currently being conducted at the National Cancer Institute along with other emerging research in the field of cancer prevention. Finally, we will introduce students to concepts and research in cancer screening. We will employ multiple formats to promote student learning and to introduce different tools for research. These may include lectures, case studies, in-class discussions, online discussions, and select film and internet resources.
Instructor(s): M. Patel; S. Nash.

AS.020.128. Concepts Cancer Research II: Diagnosis through Recovery.
This course will introduce current topics in cancer research with a focus on ”life after cancer,” including research questions about medical and psychosocial issues at diagnosis, during treatment and throughout recovery for patients that have been diagnosed with cancer. Health recommendations for cancer survivors will be discussed. Throughout the course, we will hear from researchers at the National Cancer Institute (and other research entities) who represent a variety of disciplines, applied in many settings (e.g., laboratory, clinics and communities). We will also use multi-media to promote active learning and to introduce tools for research. These may include lectures, case studies, in-class discussion, online discussion, and select film (including clips from the recent PBS documentary ”Cancer: The Emperor of All Maladies”) and internet resources. Active participation and peer learning will enhance the value of this course for students.
Instructor(s): S. Bluethmann.

AS.020.135. Phage Hunting.
This is an introductory course open to all freshman regardless of intended major. No science background is required. This is the first semester of a year-long research-based project lab course in which students will participate in a nation-wide program in collaboration with undergraduates at other colleges. In the spring semester, students will participate in a nation-wide program in collaboration with undergraduates at other colleges. In the spring semester, students will be introduced to basic microbiological techniques as they isolate and characterize novel bacteriophages (viruses that infect bacteria) from the environment using modern molecular biological techniques. The course includes two lab meetings per week. Continues in the spring. Each semester provides 2 credit hours of Natural Sciences (N) distribution credits and/or counts 2 hours toward the research requirement for the Molecular and Cellular Biology degree. No textbook is required. Freshmen only.
Instructor(s): E. Fisher; M. Mefford
Area: Natural Sciences.

AS.020.136. Phage Hunting II.
This is an introductory course open to all freshman regardless of intended major. No science background is required. This is the second semester of a year-long research-based project lab course in which students will participate in a nation-wide program in collaboration with undergraduates at other colleges. In the spring semester, students will annotate the genome of a bacteriophage isolated and characterized by a student in AS.020.135, in preparation for submission to a database and eventual publication. The course includes two lab meetings per week. Provides 2 credit hours of Natural Sciences (N) distribution credits and/or counts 2 hours toward the research requirement for the Molecular and Cellular Biology degree. No textbook is required. Freshmen only. Enrollment by permission of the instructor only.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): E. Fisher; J. Schildbach
Area: Natural Sciences.

AS.020.137. Phage Research.
In this small-section introductory research lab course, students are introduced to basic microbiological techniques as they isolate and characterize a bacteriophage, a virus that infects bacteria, from an environmental sample. One meeting per week. No textbook required. Modeled after the Phage Hunting project lab course, but with a focus on benchwork. Students cannot receive credit for both AS.020.135 and AS.020.137.
Prerequisites: Students who have taken AS.020.135 may not register for AS.020.137.
Instructor(s): J. Schildbach
Area: Natural Sciences.

AS.020.141. Special Opportunities in Undergraduate Learning: Genetic Basis of Disease.
In the 19th century, Gregor Mendel became interested in how traits are passed from generation to generation of pea plants. These simple observations were the starting point for a new field of biology known as genetics, which focuses on heredity in biology. Modern researchers use genetics to help identify and characterize diseases as well as discover treatments. This seminar will cover the fundamentals of genetics, genetic basis of several diseases, and the modern techniques used to investigate these diseases. We will focus on learning general genetic principles and their use in model organisms to discover the mechanisms of disease and identification of treatment targets. In addition, students will learn how to critically read scientific literature from mainstream news articles to primary scientific research articles, and learn the impact of genetic research on society.
Instructor(s): K. Wrasman.

AS.020.151. General Biology I.
This course begins with an overview of the biosphere followed by an analysis of ecosystems and animal behavior in the context of evolution. Cellular and Molecular bases of life, modes of inheritance, and bioenergetics are presented as unifying themes. The biochemistry of organic molecules, control of gene expression, cellular metabolism, and advances in biotechnology are areas of concentration.
Instructor(s): C. Roberson; R. Pearlman; R. Shingle
Area: Natural Sciences.
**AS.020.152. General Biology II.**
This course builds on the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology. The workshops that were introduced in AS.020.151 General Biology I will include the use of simulation software, a critique of the primary literature, and an exploration of current trends in medicine. Recommended Course Background: AS.020.151. Section 01: Not open to Freshmen. Section 02: Open to Freshmen only.
**Prerequisites:**  
**Prereq:** AS.020.151  
Instructor(s): C. Roberson; R. Pearlman; R. Shingles  
Area: Natural Sciences.

**AS.020.153. General Biology Laboratory I.**
Student must have enrolled in AS.020.151 either this term or in past terms. Students who have credit for AP Biology but take General Biology Lab I will lose all eight credits of AP Biology credit. This course reinforces the topics covered in AS.020.151. Laboratory exercises explore subjects ranging from forest ecology to molecular biology to animal behavior. Students participate in a semester-long project, identifying bacteria using DNA sequencing. Cross-listed with Behavioral Biology.
**Prerequisites:** AS.020.151  
Instructor(s): R. Pearlman  
Area: Natural Sciences.

**AS.020.154. General Biology Lab II.**
This course reinforces the topics covered in AS.020.152. Laboratory exercises explore subjects ranging from evolution to anatomy and physiology. Students participate in a project using molecular biology techniques to determine whether specific foods are made from genetically engineered plants. Cross-listed with Behavioral Biology  
**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class.  
Instructor(s): R. Pearlman  
Area: Natural Sciences.

**AS.020.161. Biology Workshop I.**
Students will discuss current events and controversies in biology ranging from bioterrorism to influenza. Students do not need AP credit to take course. Recommended Course Background: Score of 4 or 5 on AP Biology exam.
**Instructor(s):** R. Pearlman  
**Area:** Natural Sciences.

**AS.020.162. Biology Workshop II.**
Students will discuss current events and controversies in biology, ranging from genetic engineering to nanotechnology in medicine.  
**Instructor(s):** C. Bodkin-Clarke; R. Pearlman  
**Area:** Natural Sciences.

**AS.020.170. Vaccines: Past, Present and Future.**
An overview of the history of vaccines, their current use, and future directions in vaccine development. Issues regarding vaccine discovery and testing, regulation, and impact on public health will be discussed. The course is intended to be accessible to non-biological science majors; humanities and engineering students are welcome and encouraged to enroll.
**Instructor(s):** L. Schrager  
**Area:** Natural Sciences.

**AS.020.172. Ethical Issues in Human Genetics.**
Is it ethical to intentionally have children who are deaf? Is it fair that genetics might play a role in the person's ability to get a job? Who owns your genes? We will discuss and debate issues surrounding hot-button topics in human genetics, such as preimplantation genetic diagnosis, newborn screening, presymptomatic testing, genetic discrimination, gene therapy, direct-to-consumer genetic testing, and gene patent. We will learn about the history and explore the ethical questions raised by each of the topics.
**Instructor(s):** J. Park  
**Area:** Natural Sciences.

**AS.020.173. Biology and Medicine in Four Dimensions.**
Biology and life occur in three-dimensions (3D), not in a two-dimensional culture dish. This course explores how the world of biology and medicine changes in 3D over time (4D). We will explore recent scientific advancements in the field of whole-organ culture, both through in vitro and in vivo imaging. It highlights groundbreaking experiments that ignited the field, recent work, and future applications. Course is highly interactive, emphasizing student involvement in understanding fundamental questions and the techniques used by scientists and physicians. Connections to human health and disease are emphasized. Course includes lectures, readings, student presentations, plus guest lectures by professors involved in the scientific advancements. Grades determined by class participation, attendance, quizzes, and oral presentation.
**Prerequisites:** AS.020.151 AND AS.030.101 AND ( AS.171.101 OR AS.171.103)  
**Instructor(s):** D. Georgess; N. Neumann  
**Area:** Natural Sciences.

**AS.020.174. High-throughput Sequencing in Biology.**
This course will introduce students to high-throughput sequencing and its impact on biological research. At the end of the course students should be familiar with the various HTS techniques and how to use them for a project of their interest. They will also gain a clear understanding of the workflow involved and be familiar with commonly used bioinformatic tools. The course will include both class room instruction and lab work (both wet lab and computer lab). The topics that will be covered include: High-throughput sequencing (HTS) technology - An introduction to the various technologies available, how they work, and the pros and cons for each of the current HTS technologies; A look at some of the most interesting/informative assays developed using HTS technology; Basics of command-line (unix) and the use of bioinformatic tools to analyze HTS data sets; An introduction to some well-established bioinformatic pipelines and; Critical evaluation and validation of results from HTS.  
**Instructor(s):** V. Balagopal  
**Area:** Natural Sciences.
Why is cancer a major cause of death worldwide? Why cancer cells spread to a distant organ ("metastasis") remains unknown. Applying established principles from other fields of biology might provide a deeper understanding of the metastatic process to solve the "cancer problem." In this course, we will explore ecological paradigms (invasive species, migration patterns, ecosystem collapse, pollution) to understand the steps of lethal metastasis and to identify possible strategies to improve patient survival. Students should have had at least one course in biology (general, cell biology, evolution, or ecology) already.
Prerequisites: Prereq: AS.020.151 OR AS.020.306 OR EN.540.307 OR AS.020.379 OR EN.570.205
Instructor(s): S. Amend
Area: Natural Sciences.

AS.020.205. Introduction to Biological Molecules.
This course presents an overview to biochemistry and molecular biology, especially focusing on biotechnology and medicine. Students will have classroom and laboratory experience and group presentations. Recommended Course Background: High school level Chemistry and Biology (both with a grade of A).
Instructor(s): A. Ketchum; C. Roberson; K. Tifft Oshinnaiye; R. Shingles
Area: Natural Sciences.

AS.020.208. Introduction to Human Anatomy & Physiology.
This class aims to provide background in anatomy and physiology to help students in their initial training in medical school. Lectures will cover the correlation between human anatomy and physiology using relevant clinical cases that exemplify the interconnections between anatomy and physiology in the physio-pathological context. The course is intended to provide students with a foundation for knowledge in the structures and processes relevant to medical science.
Prerequisites: AS.020.151 or AP Biology; Students who have taken AS.020.375 cannot take AS.020.208.
Instructor(s): D. Johng; G. Fernandez Torga
Area: Natural Sciences.

AS.020.214. Self Organizing Patterns in Nature.
The manifestations of all biological structures and related functions are the end effect of the formation and maintenance of complex molecular and cellular patterns. These patterns (macromolecules, cellular organelles, cells, and tissues) are assembled from their constituent parts under fundamental rules not too dissimilar to those that govern the formation of snowflakes or the dewdrops on a spider web. This course (lectures and student presentations) attempts to describe these common rules and to explain the formation and function of significant biological assemblies.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.215. Immunology and Cancer.
This course explores the interaction of the immune system and cancer. It will highlight how the immune system prevents and controls cancer, how dysregulation of immune cells can lead to cancer, and novel ways researchers are utilizing the immune system to treat various cancers. The course will be highly interactive, emphasizing student involvement in understanding the subject as well as learning how research in the field is performed.
Area: Natural Sciences.

AS.020.216. Introduction to Population Genetics.
Population genetics deals with the process of evolution by changes of gene frequencies in a population over several generations. This course will focus on exploring mathematical models for evolutionary forces (e.g. Wright-Fischer relative fitness model) and hypotheses based upon these models (e.g., mutation-selection balance). Students will also be introduced to nucleotide sequencing and bioinformatics, which has allowed scientists to evaluate models for evolution and has also opened new frontiers in population genetics.
Instructor(s): S. Liao
Area: Natural Sciences.

AS.020.220. Epigenetics in Development and Disease.
Your DNA is not necessarily your destiny- life experiences alter modifications to DNA, which then change gene expression (defined as "epigenetics"). For example, how does a famine experienced by one generation affect the health of future generations? One mechanism is changes in DNA methylation, an epigenetic mark. In this course, we will explore epigenetic regulation in normal development as well as diseases including diabetes and cancer, and introduce new epigenetic drugs currently in clinical trials. Recommended Course Background: 2 semesters of Biology, 1 semester Organic chemistry
Instructor(s): C. Destefano Shields; K. Chiappinelli
Area: Natural Sciences.

AS.020.227. Human Physiology.
This is an introduction to Human Physiology. It will cover an overview of the subject that is appropriate for undergraduates and will be of interest to those planning to pursue medical or health related careers. While there is no formal prerequisite, a basic understanding of chemistry and biology at the undergraduate level will be helpful.
Instructor(s): T. Woolf
Area: Natural Sciences.

AS.020.229. Introduction to Immunology.
This course is designed to introduce students to the cells, major receptors and signals critical for understanding more advanced concepts in immunology. They should leave with a basic understanding of the players and events leading to an effective immune defense against pathogens. They should also begin to recognize disease consequences of certain immune malfunctions. Recommended Course Background: Biology
Instructor(s): A. Geis
Area: Natural Sciences.

AS.020.231. Protein Misfolding Diseases - A Molecular Perspective.
This course explores the basic structural principles of protein folding, competing pathways controlling protein homeostasis and the diseases arising from improper folding of proteins. The molecular basis of prion diseases such as mad cow and Creutzfeldt-Jakob diseases, and amyloid diseases such as Alzheimer’s and Huntington’s diseases will be discussed along with advances in detection and therapeutics based on this understanding. It will also introduce emerging ideas like the role of intrinsically disordered proteins in diseases.Although helpful, no previous computational or research experience is required. All students are welcome to enroll.
Area: Natural Sciences.
AS.020.242. **Bioinformatics, Microbes, & You.**
Bioinformatics brings together biology, computer science and information technology. Current biological research involves the use of bioinformatics tools important in identifying new pathogens and genes within organisms. Learn how to use bioinformatics databases and tools for genome analysis to identify unknowns, whether they are pathogens or other organisms. Each student will do a project using database searching and genomic analysis tools to uncover genes and/or identify an unknown pathogen from its DNA sequence.

**Prerequisites:** AS.020.151 General Biology I or equivalent

Instructor(s): K. Obom; R. Lessick
Area: Natural Sciences.

AS.020.243. **Proteins, Genetics and Human Diseases. 3 Credits.**
This course will provide a theoretical and practical overview of the use of the genetic screening approaches as discovery tools relevant to human health and disease. Lecture topics will include cell biology and genetics of human diseases, gene mutation and inheritance, use of model organisms and discussion of different types of screening approaches. In addition, this course will give students hands-on exposure to scientific research in a laboratory setting. Students will undertake a research project that applies the concepts learned in lectures to aim new insights into the function of a gene involved in amyotrophic lateral sclerosis (aka Lou Gehrig’s Disease).

Instructor(s): D. Prosser
Area: Natural Sciences.

AS.020.244. **The Biology of Cancer.**
This course runs from June 30 - July 11. This course provides an overview of cancer and its diagnosis and treatment. Lectures, demonstrations, and discussions will explore the roles that genetic errors, growth factors, oncogenes, tumor suppressors, genetic caretakers, cell survival and death, angiogenesis, and metastasis play in cancer development. Covered topics also include cancer diagnosis, cancer prevention, genetic testing, treatment and patient self-advocacy. Course will include several guest experts to discuss topics of interest.

AS.020.296. **Foreign Gene Expression Laboratory.**
This laboratory will introduce molecular cloning techniques that allow bacteria to be used to produce a particular gene product. Recombinant plasmids, carrying a fusion protein gene, will be constructed and used to transform competent E. coli, and the gene products isolated. Prerequisite: permission of instructor. The lab will meet 9 am to noon and 1-2 pm, Monday-Friday for the three weeks of intersession. Freshmen preferred. Biology majors given priority.

Instructor(s): R. Horner
Area: Natural Sciences.

AS.020.299. **Retroviruses.**
Retroviruses are RNA-based viruses which must reverse transcribe their RNA into DNA in order to integrate into the host’s genome, whereby the viral genome replicates as a unit of the host’s DNA. Topics covered in the course will include the biological processes unique to retroviruses, how these viruses infect organisms and cause disease (i.e., cancer and AIDS), and how new techniques are being explored in attempts to use retroviruses to cure disease (i.e., gene therapy).

Instructor(s): S. Johnson
Area: Natural Sciences.

AS.020.303. **Genetics.**
Presentation of the principles of heredity and variation, and their application to evolution and development; physico-chemical nature of the gene; problems of recombination; gene action.

**Prerequisites:** AS.020.330: Students may receive credit for AS.020.330 or AS.020.303, but not both.
Instructor(s): E. Fisher; K. Cunningham; M. Hoyt
Area: Natural Sciences.

AS.020.305. **Biochemistry.**
The molecules responsible for the life processes of animals, plants, and microbes will be examined. The structures, biosynthesis, degradation, and interconversion of the major cellular constituents including carbohydrates, lipids, proteins, and nucleic acids will illustrate the similarity of the biomolecules and metabolic processes involved in diverse forms of life. Sophomores, Juniors, and Seniors Only.

**Prerequisites:** Prereq or Co-req: AS.030.206 OR AS.030.212 OR EN.540.202.
Instructor(s): Staff
Area: Natural Sciences.

AS.020.306. **Cell Biology.**
How the molecules of living systems are organized into organelles, cells, tissues, and organisms will be explored, as well as how the activities of all of these are orchestrated and regulated to produce “life”—a phenomenon greater than the sum of its parts. Considerable emphasis is placed on experimental approaches to answering these questions. Topics covered include biological membranes, cytoskeletal elements, cell locomotion, membrane and protein traffic, the nucleus, second messengers, signal transduction, cell growth, the cell cycle, the extracellular matrix, cell contacts and adhesion, intercellular communication, epithelial structure and function, and the cell biology of early development and organ function. Sophomores, juniors, and seniors only. Recommended Course Background: AS.020.151 or AS.020.305 or equivalent knowledge of biomolecules.

**Prerequisites:** Cell Biology restriction: students who have completed EN.540.307 may not enroll.
Instructor(s): E. Fisher; K. Tifft Oshinnaiye; M. Hoyt; R. Kuruvilla; T. Schroer
Area: Natural Sciences.

AS.020.307. **Enzymes, Metabolism and Metabolic Disorders.**
This course will cover basic and advanced concepts in enzymology and metabolic processes while focusing on how these processes contribute to human health and diseases. This course is composed of lectures, discussion sessions, and student presentations.

Instructor(s): Y. Lee
Area: Natural Sciences.

AS.020.312. **Introduction to the Human Brain.**
This course explores the outstanding problem of biology: how knowledge is represented in the brain. Relating insights from cognitive psychology and systems neuroscience with formal theories of learning and memory, topics include (1) anatomical and functional relations of cerebral cortex, basal ganglia, limbic system, thalamus, cerebellum, and spinal cord; (2) cortical anatomy and physiology including laminar/columnar organization, intrinsic cortical circuit, hierarchies of cortical areas; (3) activity-dependent synaptic mechanisms; (4) functional brain imaging; (5) logicist and connectivist theories of cognition; and (6) relation of mental representations and natural language.

Instructor(s): E. Hedgecock
Area: Natural Sciences.
AS.020.315. Biochemistry Laboratory.
The lab course reinforces topics presented in Biochemistry through experiments which quantitatively measure cellular components and processes. Topics include pH, proteins, carbohydrates, lipids, nucleic acids and enzymes.
**Prerequisites:** Pre-Co-requisite AS.020.305 OR AS.250.307 OR AS.250.315
Instructor(s): J. Schildbach; R. Horner
Area: Natural Sciences.

AS.020.316. Cell Biology Lab.
This course will reinforce the topics presented in AS.020.306 Cell Biology through laboratory exercises which use visible and fluorescence microscopy to study chromosomes, cell organelles, cell surface receptors, contractile proteins, and microfilaments.
**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class; Prerequisite or Corequisite: AS.020.306. OR (EN.540.307 AND EN.540.202). Corequisites: EN.540.202 cannot be taken concurrently with AS.020.316.
Instructor(s): R. Horner
Area: Natural Sciences.

AS.020.317. Signaling in Development and Disease.
An advanced undergraduate level seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease. Recommended Course Background: AS.020.305, AS.020.306, and AS.080.306
Instructor(s): R. Kuruvilla
Area: Natural Sciences.

AS.020.329. Microbiology.
This course explores the physiology and genetics of microorganisms within an evolutionary and ecological framework. Concepts in microbiology will be supported by molecular studies of microbial evolution and microbial communities including that of the human microbiome. Recommended Course Background: AS.020.305
Instructor(s): E. Fisher; J. Diruggiero
Area: Natural Sciences.

Will examine the growing impact of human genetics on the biological sciences, on law and medicine, and on our understanding of human origins. Topics include structure and evolution of human genome, genetic and physical mapping of human chromosomes, molecular genetics of inherited diseases and forensic genetics.
Instructor(s): E. Hedgecock
Area: Natural Sciences.

AS.020.332. Photosynthesis by Land and Aquatic Organisms.
This course analyzes the fundamental process of photosynthesis, the process on which all life on Earth depends for its existence. We begin from the level of the structural organization of the photosynthetic machinery and progress to the essentials of the photophysics of light capture by the primary pigments. Next we follow the conversion of photon flow to electron flow through the electron transport chain, and finally we study the formation of chemical gradients that serve as temporary "energy stores" utilized in the synthesis of the essential chemicals that are consumed to drive carbon dioxide and nitrogen fixation and yield biomass. Finally, we compare the specializations of land and aquatic photosynthetic systems that serve the two different ecosystems. Recommended Course Background: AS.020.305 or AS.020.306 or special permission by the instructor.
Instructor(s): E. Moudrianakis; R. Horner
Area: Natural Sciences.

AS.020.333. Adaptations Of Plants to their Environments.
This course is an introduction to the ecological physiology of higher plants. Plants grow in the tropics and the tundra, in extremely dry or wet situations, and even in salt water. The adaptations of plants to their environments will be discussed.
Instructor(s): E. Johnson
Area: Natural Sciences.

AS.020.334. Planets, Life and the Universe.
This multidisciplinary course explores the origins of life, planet formation, Earth's evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions, and planetary protection. Recommended Course Background: Three upper level (300+) courses in sciences (Biophysics, Biology, Chemistry, Physics, Astronomy, Math, or Computer Science)
**Prerequisites:** Students may not register for this class if they have already received credit for AS.171.333 or AS.270.335.
Instructor(s): C. Norman; J. Diruggiero; N. Levin
Area: Natural Sciences.

AS.020.337. Stem Cells & the Biology of Aging & Disease.
This will be a team-taught lecture course that focuses on the properties of stem cells, their possible role in cancer (breast and prostate), stem cell aging, and the potential utilization of stem cells for therapy. Topics will include: mechanisms of stem cell renewal, stem cell potency, the impact of the stem cell niche, stem cells and the hematopoietic system, stem cells and the neural system, stem cells in the male and female gonads, induced pluripotent stem cells and cellular reprogramming, stem cell changes with aging, and ethical and policy issues in stem cell research and use. Most lectures will be research-oriented. Students will be expected to read and critically analyze current literature, with an emphasis on the experimental bases from which our current understandings derive.
**Prerequisites:** AS.020.305 (Biochemistry) or AS.020.306 (Cell Biology) or permission of instructor
Instructor(s): B. Zirkin
Area: Natural Sciences.

AS.020.340. Genetics Laboratory.
This laboratory explores the genetics of living organisms, and students in each section will therefore be required to return to lab on succeeding days to observe and record the results of their experiments. Recommended Course Background: AS.020.316
Instructor(s): C. Norris
Area: Natural Sciences.
AS.020.344. Virology.
This course will cover basic principles of viral replication and pathogenesis, as well as the host response to viral infection. It will then focus on several viruses of interest, including HIV-1, Influenza, Human Papilloma Virus, Hepatitis C, and Ebola Virus.
Prerequisites: AS.020.305 Biochemistry
Instructor(s): K. Beemon
Area: Natural Sciences.

AS.020.346. Immunology.
A course for upper level undergraduates that introduces the molecules, cells, systems and biology of the immune system. A special emphasis will be placed on reading and analyzing primary literature.
Prerequisites: AS.020.305 OR AS.030.316 OR AS.250.316
Instructor(s): J. Schildbach
Area: Natural Sciences.

AS.020.347. AIDS.
AIDS is the world’s deadliest infectious disease. This course will cover the biology of human immunodeficiency virus (HIV, the infectious agent that causes AIDS), the effects of HIV on the immune system, the pharmacology of the anti-viral agents that are used to suppress HIV infection, and the ongoing quest for an HIV vaccine. Because HIV drugs cannot cure HIV-infected individuals and no HIV vaccine yet exists, we will also study the long-term consequences of HIV infection including opportunistic infections, comorbid conditions, and the HIV-related cancers Kaposi’s Sarcoma and AIDS-Related lymphoma. Recommended Course Background: AS.020.306
Area: Natural Sciences.

AS.020.350. Introduction to Clinical Medicine.
Perm. Req’d. Post-Bac Students Only
Instructor(s): B. Winters; E. Ruiz; W. Merritt; W. Ziai
Area: Natural Sciences.

AS.020.351. Cancer Biology. 3 Credits.
While the “war on cancer” has produced modest victories with respect to clinical outcomes, our knowledge of the cellular mechanisms of cancer is now vast and represents one of the most significant scientific achievements of the past 40 years. Key aspects of cancer biology will be covered with a combination of textbook and original literature readings. Topics will include cancer cell characteristics, oncogenes, tumor suppressor genes, apoptosis, metastasis and immuno-surveillance of cancer cells. Application of our knowledge to the rational treatment of cancer will also be discussed.
Prerequisites: Cell Biology 020.306 or permission of instructor
Instructor(s): M. Hoyt
Area: Natural Sciences.

This course will cover fundamental methods used in the analysis of genomic sequencing data, with a particular focus on recent developments in comparative and functional genomic assays. In particular, we will cover approaches for 1) genomic sequencing and assembly, including resequencing and “personal” genomes, 2) comparing genomes and modeling genome evolution, 3) identifying functional elements using both “functional genomics” and computational models. While the course will focus on particular problems in genomics, we will emphasize core algorithmic concepts that generalize to the analysis of other types of biological data.
Prerequisites: General Biology 020.151-152 and (Calculus I 110.106 or Calculus I 110.108)
Instructor(s): J. Taylor
Area: Natural Sciences.

AS.020.360. Gene Regulation During Development and Disease.
This course examines how regulation of gene expression impacts development and disease. The course will focus on the mechanisms controlling transcriptional, post-transcriptional, translational, and post-translational regulation. For each topic, one class will be a lecture/discussion of key concepts and experimental approaches followed by a class with student-led presentations of related publications. Recommended Course Background: AS.020.303 and AS.020.305.
Instructor(s): R. Johnston
Area: Natural Sciences.

This class will explore the development of animals from a single fertilized egg into a fully formed organism. We will emphasize experimental methods to understand the molecular mechanisms controlling development. This class is acceptable as the required core class in Developmental Biology required for Biology majors and Molecular and Cellular Biology majors.
Prerequisites: AS.020.306 AND (AS.020.330 OR AS.020.303)
Instructor(s): C. Norris; C. Roberson; M. Van Doren
Area: Natural Sciences.

AS.020.365. Intro To Human Skeleton.
This course will provide a basic understanding of human skeletal biology, including bone composition and bone growth, recognition of skeletal elements, functional anatomy of different skeletal systems, comparative anatomy, and forensic anthropology (sexing and aging, body size reconstruction, bone pathology). Lectures will be combined with hands-on experience with bone models and real bone specimens.
Instructor(s): C. Ruff
Area: Natural Sciences.

AS.020.367. Primate Adaptation and Evolution.
A close look at our closest relatives, the primates. Topics include: evolutionary theory, primate evolution, primate behavior and ecology, human evolution, and modern human variation.
Instructor(s): J. Perry
Area: Natural Sciences.

AS.020.370. Emerging Strategies and Applications in Biomedical Research.
Up-to-date primary literature manuscripts related to new discoveries and new strategies that are allowing scientists to make amazing progress in biomedical research will be presented. Examples include: labeling neurons with up to 90 different colors to trace their circuitry, evolution studies in glowing bacteria, detecting several viruses on a single chip and using fiber optics and channel rhodopsin to induce sleep. Students should be interested in reading primary literature research papers and discussing them in class. Recommended Course Background: AS.020.305 or AS.020.306 or AS.080.305 or AS.080.306.
Instructor(s): S. Hattar
Area: Natural Sciences.
The hypothalamus is the central regulator of a broad range of homeostatic behaviors essential to survival, and plays a key role in controlling emotional and appetitive behaviors. This course offers an overview of both historical and recent work on this vital brain region. Topics covered will include the evolution and development of the hypothalamus, control of circadian rhythms and sleep, regulation of hunger and body temperature, as well as hypothalamic regulation of sexual, defensive, and affiliative behavior.
Prerequisites: AS.020.305 OR AS.020.306 OR AS.080.301 OR AS.080.302
Instructor(s): S. Blackshaw; S. Hattar
Area: Natural Sciences.

AS.020.372. RNA in Disease.
This course is intended for students with a general interest in the molecular mechanisms underlying diseases. Here we will place a special emphasis on RNA-related disorders. Throughout the semester we will review cellular processes involving RNA and then examine the consequences when any defects arise. Additionally, we will cover several practical bioinformatics approaches to develop hypotheses that can explain disease phenotypes. Recommended Course Background: AS.020.151 or AS.020.305 or AS.030.315.
Area: Natural Sciences.

AS.020.373. Developmental Biology Lab.
This laboratory explores the development of live animals, and students in each section will sometimes be required to return to lab on succeeding days to observe and record the results of their experiments. Corequisite: AS.020.363
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Norris; C. Roberson.

AS.020.375. Anatomy.
This course will cover human anatomical structures, from gross system-wide organization to cellular histological details. Structure-function relationships within and between systems will be emphasized. The systems of focus will be: digestive, muscular, respiratory, circulatory, nervous, immune, and reproductive.
Prerequisites: Prereq: AS.020.306
Instructor(s): M. Mefford
Area: Natural Sciences.

AS.020.376. Molecular Evolution.
A history of life on earth has been recorded in the DNA of organisms that live today. But what language is it and how can we read that history? This course introduces basic principles of molecular evolution plus a wide array of methodologies used to interpret molecular sequence data. Many interesting studies of gene and genome evolution will be covered as examples of this burgeoning area of research. This fun and popular course now includes computer labs that will enable students to obtain first-hand experience in this exciting field of research.
Prerequisites: AS.020.330 (Genetics) or with permission of instructor
Instructor(s): K. Cunningham
Area: Natural Sciences.

AS.020.379. Evolution.
This course takes a broad look at the impact of natural selection and other evolutionary forces on evolution. Emphasis is placed on what we can learn from genome sequences about the history of life, as well as current evolutionary pressures. Recommended Course Background: AS.020.306, AS.020.330, or permission required
Instructor(s): C. Norris
Area: Natural Sciences.

The field of molecular biology is fundamental for those interested in modern biological research and medicine. In this course students examine DNA, RNA and protein synthesis (i.e., the "central dogma" of molecular biology) in molecular detail, as well as how these processes are regulated and interrelated. There is significant examination of molecular structure-function relationships, with particular emphasis on RNA synthesis and processing and chromosomal organization, nucleosome regulation and epigenetics. Modern and fundamental experimental techniques and concepts are explored in detail. Students will learn how to use some genome databases and bioinformatics tools available online to improve their molecular biology research skills and knowledge. Readings are both from scientific journals as well as a textbook that includes interactive online content.
Instructor(s): C. Greider; D. Zappulla; E. Moudrianakis; K. Beemon
Area: Natural Sciences.

This course will provide an in-depth overview of the influence of model systems on human health and their role in answering current research problems.
Prerequisites: AS.020.330
Instructor(s): C. Wall
Area: Natural Sciences.

AS.020.391. The Human Microbiome.
This course will take an in depth look at how bacteria play a role in human health and disease.
Prerequisites: 020.305, Biochemistry; 020.306, Cell Biology.
Area: Natural Sciences.

Introduction to the principles, practice, and application of light/fluorescence microscopy to biomedical research. The course will cover light optical theory; instrumentation design, use, and applications; and will afford students ‘hands-on’ experience in both specimen preparation and microscope operation (including epi-fluorescence, confocal, FCS, and deconvolution microscopes). Prerequisite: Permission of Instructor. The lecture will be held from 11:00AM to 11:50AM, Tuesday through Friday. Labs will be conducted in the Integrated Imaging Center, Room 106-107 Tuesdays and Thursdays; and Wednesdays and Fridays from 1:00PM to 3:00PM.
Instructor(s): J. McCaffery
Area: Natural Sciences.

Introduction to the principles, practice, and application of electron microscopy (EM) to biological/cell biological research. The course will cover electron optical theory; instrumentation design, use, and applications; and will afford students ‘hands-on’ experience in both specimen preparation and electron microscope operation (including both transmission and scanning electron microscopes).
Instructor(s): J. McCaffery
Area: Natural Sciences.
**AS.020.399. Biology of Neurodegenerative Diseases.**
What happens at the cellular level as a disease like Alzheimer’s develops? This course focuses attention on the mechanistic molecular causes of neurodegenerative diseases, from the misfolding of proteins to prion formation. To stimulate critical thinking, the course will be structured around student discussion of historic and current scientific literature. Students will then deepen their understanding of the issues by preparing a presentation on an outstanding question in the field of neurodegenerative disease.

**Prerequisites:** AS.020.305

**Instructor(s):** B. Pierce
**Area:** Natural Sciences.

**AS.020.401. Advanced Seminar: Molecular and Cellular Biology.**
This is a weekly seminar designed for graduate students enrolled in the B.A./M.S. and Ph.D. programs. The seminar involves student presentations of research and discussion of topics of current interest in the field. BA/MS candidates only.

**Instructor(s):** K. Tifft Oshinnaiye
**Area:** Natural Sciences.

**AS.020.402. Seminar: Molecular & Cellular Biology.**
This is a weekly seminar designed for students enrolled in the BA/MS program. The seminar involves student presentations of research and discussion of topics of current interest in the field. BA/MS students only.

**Instructor(s):** K. Tifft Oshinnaiye
**Area:** Natural Sciences.

**AS.020.420. Build-a-Genome.**
In this combination lecture/laboratory “Synthetic Biology” course students will learn how to make DNA building blocks used in an international project to build the world’s first synthetic eukaryotic genome, Saccharomyces cerevisiae v. 2.0. Please study the wiki [www.syntheticyeast.org](http://www.syntheticyeast.org) for more details about the project. Following a biotechnology boot-camp, students will have 24/7 access to computational and wet-lab resources and will be expected to spend 15-20 hours per week on this course. Advanced students will be expected to contribute to the computational and biotech infrastructure.

**Co-listed with:** EN.580.420, AS.020.451 and EN.540.420. Successful completion of this course provides 3 credit hours toward the supervised research requirement for Molecular and Cellular Biology majors, or 2 credit hours toward the upper level elective requirement for Biology or Molecular and Cellular Biology majors. Must understand fundamentals of DNA structure, DNA electrophoresis, and analysis. Polymerase Chain Reaction (PCR), and must be either a) Experienced with molecular biology lab work or b) Adept at programming with a biological twist.

**Instructor(s):** J. Bader; K. Zeller
**Area:** Natural Sciences.

**AS.020.431. JHU Oxford: Advanced Biochemistry & Molecular Biology.**
Open to JHU Oxford participants only.

**Instructor(s):** J. Schildbach; Staff
**Area:** Natural Sciences.

**AS.020.441. Mentoring in Biology.**
To become a mentor, students must have successfully completed AS.020.151/152, must apply using the form on the Biology Dept. Website, and must be accepted by the instructors. The deadline to apply is April 1st. This course provides students who have taken General Biology I & II the opportunity to mentor new students in General Biology I & II. Mentors collaborate with faculty on how to lead effective sessions, help student teams complete team assignments, and generally help students understand difficult concepts and principles in biology. Mentors must have a firm command of the topics covered in biology and must be accepted by the faculty and students through the course of the semester. S/U only. Perm. Req’d

**Instructor(s):** C. Roberson; R. Pearlman; R. Shingles
**Area:** Natural Sciences.

**AS.020.442. Mentoring In Biology.**
This course provides students who have taken General Biology I & II the opportunity to mentor new students in General Biology I & II. Mentors collaborate with faculty on how to lead effective sessions, help student teams complete team assignments, and generally help students understand difficult concepts and principles in biology. Mentors must have a firm command of the topics covered in biology and must be accepted by the faculty and students through the course of the semester. To become a mentor, students must have successfully completed AS.020.151/AS.020.152, must apply using the form on the Biology Department website, and must be accepted by the instructors. The deadline to apply is April 8th. Recommended Course Background: AS.020.151/AS.020.152

**Instructor(s):** R. Pearlman; R. Shingles
**Area:** Natural Sciences.

**AS.020.451. Build-a-Genome Mentor.**
In this combination lecture/laboratory, “Synthetic Biology” course students will learn how to make DNA building blocks used in an international project to build the world’s first synthetic eukaryotic genome, Saccharomyces cerevisiae v. 2.0. Please study the wiki [www.syntheticyeast.org](http://www.syntheticyeast.org) for more details about the project. Following a biotechnology boot-camp, students will have 24/7 access to computational and wet-lab resources and will be expected to spend 15-20 hours per week on this course. Advanced students will be expected to contribute to the computational and biotech infrastructure. Must understand fundamentals of DNA structure, DNA electrophoresis, and analysis. Polymerase Chain Reaction (PCR) and must be either a) Experienced with molecular biology lab work or b) Adept at programming with a biological twist.

**Instructor(s):** J. Bader; K. Zeller
**Area:** Natural Sciences.

**AS.020.501. Introduction Independent Study.**
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Freshmen and Sophomores only. Perm. Req’d.

**Instructor(s):** Staff.

**AS.020.502. Introduction Independent Study.**

**Instructor(s):** K. Cunningham.

**AS.020.503. Introduction To Research.**
Perm. Req’d. Freshmen and Sophomores only

**Instructor(s):** Staff.

**AS.020.504. Introduction to Research.**
Perm. Req’d. Freshmen or Sophomores only

**Instructor(s):** Staff.
**AS.020.505. Internship - Biology.**
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Consent of adviser required.
Instructor(s): H. Zhao; L. Brand; R. McCarty; Staff.

**AS.020.506. Internship - Biology.**
Instructor(s): Staff.

**AS.020.511. Independent Study.**
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Perm. Req’d.
Instructor(s): Staff.

**AS.020.512. Independent Study.**
Instructor(s): Staff.

**AS.020.513. Research Problems.**
Planning and conducting original laboratory investigations on biological problems, collection and analysis of data, reporting of results. Juniors and Seniors Only. Recommended Course Background: Permission of full-time faculty member in Biology dept.
Instructor(s): Staff.

**AS.020.514. Research Problems.**
Perm. Req’d. Juniors and Seniors only
Instructor(s): Staff.

**AS.020.551. Mentored Research.**
This courses provide BA/MS students with intensive research experience for a full academic year. Students in the program work under the direction of a research mentor on an original research project, produce a written report in the form of a thesis, and make a presentation of the work to the Biology Department. BA/MS or BS/MS candidates only.
Instructor(s): R. Horner.

**AS.020.552. Mentored Research.**
Instructor(s): J. Taylor; R. Horner.

**AS.020.553. Mentored Research.**
BA/MS candidates only.
Instructor(s): R. Horner.

**AS.020.554. Mentored Research Program in Cellular and Molecular Biology.**
BA/MS Candidates Only
Instructor(s): R. Horner.

**AS.020.570. Independent Study.**

**AS.020.572. Research - Intersession.**
Instructor(s): Staff.

**AS.020.574. Internship.**
Instructor(s): J. Diruggiero.

**AS.020.591. Summer Research Experience.**
Instructor(s): J. Schildbach.

**AS.020.594. Internship-Summer.**
Instructor(s): Staff.

**AS.020.597. Research.**
Instructor(s): Staff.

**AS.020.599. Independent Study.**
Instructor(s): C. Norris; M. Bessman; R. Horner; T. Schroer.

**AS.020.601. Current Research in Bioscience.**
First year Biology Graduate students only
Instructor(s): Staff.

**AS.020.606. Molecular Evolution.**
A history of life on earth has been recorded in the DNA of modern organisms. But what information is contained in this record and how can we understand it? This course introduces basic principles of molecular evolution and a wide array of methodologies used to infer and interpret molecular sequence data. Many interesting studies of gene and genomic evolution will be covered as examples of this burgeoning area of research. Recommended Course Background: AS.020.330
Instructor(s): K. Cunningham.

**AS.020.607. Quantitative Biology Bootcamp.**
Quantitative and computational methods have become essential to modern biological research. The goal of this course is to provide an introduction to basic skills that will enable students to employ these methods. Students will learn how to work in a command line shell and use software to perform analyses of large biological datasets. Students will learn basic programming using the Python language. Throughout the course students will apply the skills learned to practical analysis problems emphasizing parsing and working with biological data formats, exploratory data analysis and visualization, and numerical and statistical methods. This course is only open to first-year students in the CMDB program and will be held from September 2nd through September 5th, 2014.
Instructor(s): F. Tan; J. Taylor.

**AS.020.612. Introduction to the Human Brain.**
This course explores the outstanding problem of biology: how knowledge is represented in the brain. Relating insights from cognitive psychology and systems neuroscience with formal theories of learning and memory, topics include (1) anatomical and functional relations of cerebral cortex, basal ganglia, limbic system, thalamus, cerebellum, and spinal cord; (2) cortical anatomy and physiology including laminar/columnar organization, intrinsic cortical circuit, hierarchies of cortical areas; (3) activity-dependent synaptic mechanism; (4) functional brain imaging; (5) logicist and connectist theories of cognition; and (6) relation of mental representations and natural language. Co-listed with AS.020.312.
Instructor(s): E. Hedgecock.

**AS.020.613. Biology Science Writing.**
Students will learn how to write abstracts and grant proposals, organize scientific manuscripts and thesis dissertations by writing and rewriting about their own research and editing other students’ work. Focus will be on structure, substance, accessibility, and clarity of writing. Biology Graduate students only. Permission Req’d.
Instructor(s): A. Huang.

**AS.020.614. Signaling in Development and Disease.**
Perm. Req’d. A graduate level class covering current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease.
Instructor(s): R. Kuruvilla
Area: Natural Sciences.
AS.020.616. Planets, Life and the Universe.
This multidisciplinary course explores the origins of life, planets’ formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions and planetary protection. Grad Students Only.
Instructor(s): J. Diruggiero; N. Levin
Area: Natural Sciences.

AS.020.620. Stem Cells.
This course consists of introductory lectures given by faculty members, followed by student presentations in the form of seminars. The introductory part will cover the basic knowledge about stem cells, such as: What features make cells qualified as stem cells? What are the unique cellular and molecular properties of stem cells? How do stem cells maintain their identities? What are the mechanisms underlying stem cell differentiation and reprogramming? What are the therapeutic applications of stem cells? The student seminar will be based on selected literatures by the faculty. A summary mini-review paper is required for a chosen topic at the end of the semester.
Instructor(s): X. Chen.

AS.020.629. Microbiology.
This course explores the physiology and genetics of microorganisms within an evolutionary and ecological framework. Concepts will be supported by primary literature exploring microbial evolution and microbial communities including that of the human microbiome.
Instructor(s): J. Diruggiero.

AS.020.630. Human Genetics.
Will examine the growing impact of human genetics on the biological sciences, on law and medicine, and on our understanding of human origins. Topics include structure and evolution of human genome, genetic and physical mapping of human chromosomes, molecular genetics of inherited diseases and forensic genetics.
Instructor(s): E. Hedgecock
Area: Natural Sciences.

AS.020.637. Genomes & Development.
This course covers gametogenesis, embryogenesis, post-embryonic development, genetic analysis, developmental genetics, model developmental systems, and cell determination. Biology graduate students only except with written permission from the instructor.
Instructor(s): Staff.

AS.020.640. Epigenetics and Chromosome Dynamics.
It has become finally recognized that the primary structure of the DNA is not the sole and absolute determinant of the phenotype of an organism. Much depends on the modulations of the primary information by time and tissue specific enzymatic modifications of this information and the result is the epigenetic information potential within the nucleus. This potential is dynamic; it can be “written and re-written” in the life-trajectory of a cell. We will examine the various process and states of genome epigenetics, from simple genes to whole chromosomes, chromosomal subsets and even the whole nucleus. This graduate level course will consist of few special overview lectures given by the instructors and the rest will be student presentations. The topics will be selected by the faculty but we will also consider the inclusion of special and timely topics suggested by the students. The duration of each session will be 90 minutes. Upper level undergraduates may register with signature of the instructors. The evaluation of the students for grade assignment will depend on a) the quality of the student’s oral presentation; b) the students extent and depth of participation in the discussions of each and every seminar; c) the completion of papers given as homework assignments. Attention is mandatory for all sessions. No specific textbook will be assigned but the students will be sent to special Journals and books and are expected to search relevant literature and visit references beyond those provided by the instructors and share their findings with all in the class.
Instructor(s): B. Migeon; E. Moudrianakis
Area: Natural Sciences.

The hypothalamus is the central regulator of a broad range of homeostatic behaviors essential to survival, and plays a key role in controlling emotional and appetitive behaviors. This course offers an overview of both historical and recent work on this vital brain region. Topics covered will include the evolution and development of the hypothalamus, control of circadian rhythms and sleep, regulation of hunger and body temperature, as well as hypothalamic regulation of sexual, defensive, and affiliative behavior.
Instructor(s): S. Blackshaw; S. Hattar.

Instructor permission required for undergraduate students
Instructor(s): K. Beemon
Area: Natural Sciences.

AS.020.644. RNA.
A graduate seminar course that will explore RNA from its beginning in the primordial RNA world to its present-day roles in gene regulation in bacteria, mammals, and viruses. Topics will include: The early RNA world, Riboswitches, Ribozymes, evolution of protein synthesis, splicing, telomerase, RNA interference, microRNAs, long non-coding RNAs, Viral non-coding RNAs, and RNA therapeutics. Biology PHD students only. MCB MS students with instructor’s permission during ADD/DROP Period.
Instructor(s): K. Beemon
Area: Natural Sciences.
AS.020.650. Molecular Biology.
The field of molecular biology is fundamental for those interested in modern biological research and medicine. In this course students examine DNA, RNA and protein synthesis (i.e., the "central dogma" of molecular biology) in molecular detail, as well as how these processes are regulated and interrelated. There is significant examination of molecular structure-function relationships, with particular emphasis on RNA synthesis and processing and chromosomal organization, nucleosome regulation and epigenetics. Modern and fundamental experimental techniques and concepts are explored in detail. Students will learn how to use some genome databases and bioinformatics tools available online to improve their molecular biology research skills and knowledge. Readings are both from scientific journals as well as a textbook that includes interactive online content. Students enrolled in AS.020.650 will have additional assignments compared to those enrolled in AS.020.380. Instructor(s): C. Greider; D. Zappulla; E. Moudrianakis; K. Beemon
Area: Natural Sciences.

AS.020.664. Advanced Graduate Biophysical Chemistry.
This is a computer-assisted course that requires each student to bring a laptop to class and lab each day they meet. The class will be taught in the Mathematica programming language and/or UNIX, but familiarity with the programs are NOT a requirement. The course is divided into two parts. In the Class portion (Tuesdays and Thursdays) students will be given instruction in the concepts of physical and quantitative biology. Students will learn to simulate biological processes, identify the relationship between data and models, and will learn to fit biological data. In the Lab portion (Mondays) students will learn to operate in the UNIX environment using standard UNIX commands and shell scripting. Database searches applicable to research questions of interest will be performed. The data will be processed and analyzed with UNIX and Mathematica. Must be taken in the same semester as 020.607. Biology graduate students only. Instructor(s): K. Fleming; V. Hilser.

AS.020.668. Advanced Molecular Biology.
The course introduces students from a wide variety of backgrounds to the rigorous and elegant methods that have been used in modern molecular biology research, with an emphasis on analysis and reasoning. Recommended Course Background: AS.020.665
Instructor(s): R. Schleif.

AS.020.670. Emerging Strategies and Applications in Biomedical Research.
Up-to-date primary literature manuscripts related to new discoveries and new strategies that are allowing scientists to make amazing progress in biomedical research will be presented. Examples include: labeling neurons with up to 90 different colors to trace their circuitry, evolution studies in glowing bacteria, detecting several viruses on a single chip and using fiber optics and channel rhodopsin to induce sleep. Students should be interested in reading primary literature research papers and discussing them in class. Instructor(s): S. Hattar
Area: Natural Sciences.

AS.020.674. Graduate Biophysical Chemistry.
This course will provide an overview of protein and nucleic acid structure, fundamentals of thermodynamics and kinetics, ligand binding, folding and stability of macromolecules, and the principles of biophysical methods such as fluorescence spectroscopy, NMR, and X-ray crystallography. Monday Discussion Session is optional. Recommended Course Background: AS.020.305, AS.020.306
Instructor(s): E. Freire; E. Roberts.

AS.020.679. Advanced Biological Microscopy.
This course is intended to build upon the basic skills students acquired in the previous course. Students will be required to work on actual ongoing research projects. The course will emphasize the integration and use of various light and electron microscopic techniques and their application to various research related questions. The course will have primarily a practical "hands-on" component; but will also include theoretical considerations as students will read, analyze, and discuss current journal articles. Prerequisites: AS.020.395 and AS.020.397 or permission of instructor
Instructor(s): J. McCaffery.

The creation and implementation of new approaches to the drug discovery and development process is a very active area of research. Currently, only one compound out of 5,000 that enter preclinical studies becomes a drug. Moreover, the development process is time consuming, lasting more than ten years on average. The rate of failure is extremely high. It has become evident that this field is in urgent need of revolutionary changes. This course will cover drug discovery issues ranging from the identification of hits to their optimization as drug candidates. Current as well as novel and proposed approaches aimed at accelerating discovery, potency optimization, selectivity, pharmacokinetics and other drug properties will be discussed. Grad students only. Instructor(s): E. Freire
Area: Natural Sciences.

All aspects of cell biology are reviewed and updated in this intensive course through critical evaluation and discussion of the current scientific literature. Topics include protein trafficking, membrane dynamics, cytoskeleton, signal transduction, cell cycle control, cell physiology, and the integration of these processes in neurons. Recommended Course Background: AS.020.306
Instructor(s): K. Cunningham.

AS.020.699. CMDB Responsible Conduct in Research.
This course involves discussions of ethical conduct and the responsible practice of scientific research. Department signature only; restricted to graduate students in Biology PhD students only. Instructor(s): Staff.

AS.020.731. Critical Thinking in Biology.
In this course, students will critically analyze modern and seminal primary research papers in molecular, cellular and developmental biology. This analysis will emphasize the logic and experimental design of a selected set of outstanding research publications from diverse fields. Graduate students enrolled will develop the skills needed to efficiently understand and critique the rapidly expanding literature and growing diversity of biological research methods. In preparation for each class, all course participants will be expected to read and thoroughly critique the assigned paper(s). All students will submit a short, critical analysis of each paper in advance of the class session in which the paper(s) will be covered. A student will lead each discussion (once per semester, dependent upon enrollment). Recommended Course Background: AS.020.637, AS.020.668, AS.020.674, and AS.020.686
Instructor(s): D. Zappulla; R. Johnston.
AS.020.735. Seminar: Membrane Trafficking.
The Membrane Trafficking seminar course consists of several weeks of lectures and discussions led by the professors discussing key background concepts in the field of membrane trafficking. Class meetings during the final weeks of the course are seminars on current topics in membrane trafficking, led by the students. Over the course of the semester, students will learn about the methods and logic of experiment design, model building and hypothesis testing, gain exposure to and skills in reading and summarizing scientific literature, and get experience with preparing and delivering an effective oral presentation. fall/odd years.
Instructor(s): B. Wendland; J. McCaffery
Area: Natural Sciences.

AS.020.739. Topics in Biochemistry.
The course is open to graduate students and advanced undergraduates - Undergraduates with instructor’s permission - "Topics in Biochemistry" deals with minireviews taken from the Journal of Biological Chemistry. Students select a topic of their choice from the “Compendium of Minireviews” for the current year, and present it before the class for discussion.
Instructor(s): M. Bessman.

AS.020.753. Logic and Methods in Modern Biology.
The purpose of this course is to gain experience in critical thinking about the logic and methods used in modern biological research. The main approach will be the critical reading, presentation, and discussion of primary research papers, and the preparation and presentation of a research proposal. It is held once a week on the NIH Bethesda campus.
Grad students only.
Prerequisites: AS.020.637 AND AS.020.668 AND AS.020.674
Instructor(s): M. Lichten; O. Cohen-Fix
Area: Natural Sciences.

AS.020.801. Research - Biological Problems.
Independent research for the Ph.D. dissertation. Biology Ph.D. students only
Instructor(s): B. Wendland; Staff.

AS.020.802. Research-Biological Problems.
Biology Graduate students only.
Instructor(s): R. Kuruvilla; Staff.

AS.020.823. Introduction to Biology Research.
First year Biology Graduate Students only
Instructor(s): Staff.

AS.020.824. Introduction to Biology Research.
First year Biology Graduate Students only
Instructor(s): Staff.

AS.020.825. Introduction to Research.
Open to first year Biology graduate students only.
Instructor(s): Staff.

AS.020.826. Introduction to Biology Research.
Open to first year Biology graduate students only.
Instructor(s): Staff.

Cross Listed Courses

Neuroscience
AS.080.305. The Nervous System I.
The Nervous System is a fully integrated, two-semester course that surveys the cellular and molecular biology of neurons as well as the structure and function of the nervous system. Students must register for Nervous System II offered in the second term.
Prerequisites: AS.080.203 OR AS.050.203 OR AS.200.141 or 080.105 or Permission
Instructor(s): H. Zhao; S. Hendry
Area: Natural Sciences.

Biophysics
AS.250.351. Reproductive Physiology.
Focuses on reproductive physiology and biochemical and molecular regulation of the female and male reproductive tracts. Topics include the hypothalamus and pituitary, peptide and steroid hormone action, epididymis and male accessory sex organs, female reproductive tract, menstrual cycle, ovulation and gamete transport, fertilization and fertility enhancement, sexually transmitted diseases, and male and female contraceptive methods. Introductory lectures on each topic followed by research-oriented lectures and readings from current literature.
Instructor(s): B. Zirkin; R. Cone
Area: Natural Sciences.

Computer Science
EN.600.438. Computational Genomics: Data Analysis.
Genomic data has the potential to reveal causes of disease, novel drug targets, and relationships among genes and pathways in our cells. However, identifying meaningful patterns from high-dimensional genomic data has required development of new computational tools. This course will cover current approaches in computational analysis of genomic data with a focus on statistical methods and machine learning. Topics will include disease association, prediction tasks, clustering and dimensionality reduction, data integration, and network reconstruction. There will be some programming and a project component. [Applications] Recommended Course Background: EN.600.226 or other programming experience, probability and statistics, linear algebra or calculus. Students may receive credit for EN.600.438 or EN.600.638, but not both.
Prerequisites: Students may receive credit for EN.600.438 or EN.600.638, but not both.
Instructor(s): A. Battle
Area: Engineering.

EN.600.638. Computational Genomics: Data Analysis.
Graduate level version of EN.600.438. [Applications] Recommended Course Background: EN.600.226 or other programming experience, probability and statistics, linear algebra or calculus. Students may receive credit for EN.600.438 or EN.600.638 but not both.
Prerequisites: Students may receive credit for EN.600.438 or EN.600.638, but not both.
Instructor(s): A. Battle
Area: Engineering.

Biophysics

The Department of Biophysics offers programs leading to the B.A., M.A., and Ph.D. degrees. Biophysics is appropriate for students who wish
Research interests in the Department cover experimental and computational, molecular and cellular structure, function, and biology, membrane biology, and biomolecular energetics. The teaching and research activities of the faculty bring its students in contact with biophysical scientists throughout the university. Regardless of their choice of research area, students are exposed to a wide range of problems of biological interest. For more information, and for the most up-to-date list of course offerings and requirements, consult the department web page at biophysics.jhu.edu.

Research Activities of Primary Faculty

Mucosal Protection and Reproductive Health (Dr. Cone)

The Mucosal Protection Laboratory is developing methods women can use for protection against both pregnancy and sexually transmitted diseases, including AIDS. Basic research projects include investigating the ability of mucosal antibodies and vaginal acidity (lactic acid) to inactivate viral and bacterial pathogens, and how normal vaginal lactobacilli suppress the array of anaerobic bacteria that causes BV (bacterial vaginosis). BV is the most common vaginal infection (one in three women at any given time) and women with this little-recognized infection are at markedly increased risk of sexually transmitted infections, miscarriage, and premature birth. Research and development of microbicides for preventing BV and sexually transmitted diseases is being sponsored by NIH in collaboration with ReProtect, Inc., through a research agreement with Johns Hopkins University. Research on nanoparticles for enhanced delivery of drugs to mucosal surfaces is being done in collaboration with Dr. Justin Hanes, Director of Nanomedicine at the Johns Hopkins School of Medicine.

Protein Engineering and pH Sensing (Dr. Garcia-Moreno)

To understand how biological macromolecules work, or to design and engineer new ones, it is necessary to understand in detail the relationship between structure and energetics. We study in this problem in our lab by analysis of the connection between structure, thermodynamic stability, and dynamics of proteins with a combination of computational and experimental methods. The approach depends heavily on the application of NMR spectroscopy, X-ray crystallography, and equilibrium thermodynamics. The experiments contribute the physical insight needed to guide the development of computational methods for structure-based energy calculations, as well as the data required to benchmark these methods. We are focused on problems of protein electrostatics because electrostatic energy is the most useful metric for correlating structure with function in all the most important energy transduction processes in biological systems. We focus on the engineering of proteins with pH sensing

Protein Folding (Dr. Rose)

A globular protein will spontaneously self-assemble its components into a highly organized three-dimensional structure under appropriate physiological conditions in a process called protein folding. Our principal goal is to understand protein folding, using an approach involving simulation, modeling, and analysis. In the classical model of folding, an unfolded protein visits an astronomical number of possible conformations. In contrast, we recently reevaluated this popular model and found that the unfolded state is far less heterogeneous than previously thought. This realization has prompted us to pursue a novel strategy to predict folding.

Biophysics of RNA (Dr. Woodson)

The control of cell growth and type depends on the ability of RNA to fold into complex three-dimensional structures. RNA catalysts are good models for studying the physical principles of RNA folding, and the assembly of protein-RNA complexes such as the ribosome. Changes in RNA three-dimensional structure are monitored by fluorescence spectroscopy, "X-ray footprinting," and neutron scattering. Bacterial and yeast expression systems are used to study intracellular folding of RNA.

Protein Folding, Notch Signaling (Dr. Barrick)

The folding of proteins into their complex native structures is critical for proper function in biological systems. This spontaneous process of self-assembly is directed by physical chemistry, although the rules are not understood. We are using repeat-proteins, linear proteins with simple architectures, to dissect the energy distribution, sequence-stability relationship, and kinetic routes for folding. In addition, we are studying the molecular mechanisms of Notch signaling, a eukaryotic transmembrane signal transduction pathway. The transmission of information across the membranes of cells is essential for cell differentiation and homeostasis; signaling errors result in disease states including cancer. We are focusing on interactions between proteins involved in Notch signaling using modern biophysical methods. Thermodynamics of association and allosteric effects are determined by spectroscopic, ultracentrifugation, and calorimetric methods. Atomic structure information is being obtained by NMR spectroscopy. The ultimate goal is to determine the thermodynamic partition function for a signal transduction system and interpret it in terms of atomic structure.

NMR Spectroscopy (Dr. Lecomte)

Many proteins require stable association with an organic compound for proper functioning. One example of such “cofactor” is the heme group, a versatile iron-containing molecule capable of catalyzing a broad range of chemical reactions. The reactivity of the heme group is precisely controlled by interactions with contacting amino acids. Structural fluctuations within the protein are also essential to the fine-tuning of the chemistry. We are studying how the primary structure of cytochromes and hemoglobins codes for heme binding and the motions that facilitate function. The method of choice is nuclear magnetic resonance spectroscopy, which we use to obtain detailed structural and dynamic representations of proteins with and without bound heme. The ultimate goal is to understand the evolution of chemical properties in heme proteins and how to alter them.

Structural and Energetic Principles of Membrane Proteins (Dr. K. Fleming)

Membrane proteins must fold to unique native conformations and must interact in specific ways to form complexes essential for life. Currently, the chemical principles underlying these processes are poorly understood. Thermodynamic and kinetic studies on membrane proteins with diverse folds and oligomeric states are carried out with the goal of discovering the physical basis of stability and specificity for membrane proteins. Our research results in a quantitative understanding of sequence-structure-function relationships that can ultimately be used to describe membrane protein populations in both normal and disease
states, to design novel membrane proteins, and to develop therapeutics that modulate membrane protein functions in desirable ways.

**Chromatin Remodeling (Dr. Bowman)**

Chromatin, the physical packaging of eukaryotic chromosomes, plays a major role in determining the patterns of gene silencing and expression across the genome. Chromatin remodelers are multicomponent protein machines that establish and maintain various chromatin environments through the assembly, movement, and eviction of nucleosomes. At present, the molecular mechanisms by which chromatin remodelers alter chromatin structure are not understood. Our long-term goal is to gain a molecular understanding of the remodeling process and in particular how remodeling is coupled to the transcriptional machinery. Our strategy is to couple structure determination with functional studies to determine how different components of a chromatin remodeler cooperate and interact with the nucleosome substrate.

**Physical Systems Biology (Dr. Roberts)**

The laboratory is devoted to understanding and modeling the behavior of cells as complex systems. We are using tools from the general area of biological physics: potential- and probability-based computational modeling along with limited applications of single-cell, single-molecule experimental techniques (split roughly 80% theoretical/computational and 20% experimental). We term this approach “Physical Systems Biology” and it lies at the interface of biology, computer science, and physics. While this approach absolutely requires in-depth characterization of particular components, an equally critical step is then stepping back to consolidate the knowledge gained into a model of the entire cellular system. Incorporating many varied types of biological data into a genuine in silico model for the cell is the long-range goal of the laboratory.

**Theoretical Biophysics (Dr. Johnson)**

Protein interaction networks capture the cooperation required by proteins to carry out complex functions in the cell. The ability of proteins to assemble to form transient or permanent complexes and transmit signals or nutrients depends on their concentrations, their binding partners, and their spatial and temporal dynamics in the cell. Using computation and theory, we are building models to accurately simulate these multi-protein assembly processes, such as those occurring in endocytosis, that are critical to cell survival. We complement these detailed simulations with coarse-grained models to extend to larger protein interaction networks and characterize the role of network topology on protein binding specificity and dynamics.

**Single Molecule Biophysics (Dr. Ha)**

Our research is focused on pushing the limits of single-molecule detection methods to study complex biological systems. We develop state-of-the-art biophysical techniques (e.g., multicolor fluorescence, super-resolution imaging, combined force and fluorescence spectroscopy, vesicular encapsulation, single-molecule pull-down) and apply them to study diverse protein-nucleic acid and protein-protein complexes, and mechanical perturbation and response of these systems both in vitro and in vivo.

**Quantitative analysis of gene expression in single molecule and single cell (Dr. Myong)**

Our research is focused on dissecting biological pathways that control and modulate gene expression profiles that are pertinent to human diseases. We develop single molecule and single cell platforms to examine potential rate-limiting steps that contribute to modulating transcription and translation. In particular, we investigate RNA interference pathway and G-quadruplex DNA mediated promoter activity. In collaboration, we are also studying telomeric DNA processing and chromatin remodeling. Together, we seek to shed light on molecular orchestration and mechanism that govern the Central Dogma of Biology.

**Facilities**

The department shares state-of-the-art equipment for X-ray diffraction analysis, NMR spectroscopy, solution biophysical studies, and numerically intensive computer simulations with other biophysics units and departments within the University. In addition, the Department houses a full complement of equipment for molecular biological and biochemical work, and for various kinds of spectroscopy.

**Bachelor of Arts in Biophysics**

The undergraduate major in biophysics is intended for the student interested in advanced study of biophysics or the related fields of biochemistry, quantitative or computational biology, molecular biology, physiology, pharmacology, and neurobiology. The biophysics major fulfills all typical science premedical requirements with the exception of Organic Chemistry Lab (AS.030.225 Introductory Organic Chemistry Lab or AS.030.227 Chemical Chirality: An Introduction in Organic Chem. Lab. Techniques). The student majoring in biophysics, with the advice of a member of the department, chooses a program of study that will include foundation courses in biology, chemistry, and physics followed by advanced studies in modern biophysics and research. The biophysics major requires that students earn a grade of “C” or greater for all courses required in the major. A student who earns a grade of “C-” or below must repeat the course and earn a better grade.

For additional information on academic requirements and department events for majors, check the undergraduate website (http://biophysics.jhu.edu/undergraduate_program.html).

Major Electives (Four required)
Two courses from List #1 (see below)  5-8
Two courses from List #1 or #2 (see below)  6-8

List #1
AS.250.265  Introduction to Bioinformatics  3
AS.250.301  Laboratory in Molecular Evolution: Using ancestral (Lab in Molecular Evolution)  3
AS.250.313  Molecular and Cellular System Biology (Molecular and Cellular Systems Biology)  4
AS.250.353  Computational Biology  3
AS.250.401  Advanced Seminar in Structural and Physical Virology  3
AS.250.403  Bioenergetics: Origins, Evolution and Logic of Living Systems (Bioenergetics)  3
AS.250.411  Advanced Seminar in Structural Biology of Chromatin  3
AS.250.421  Advanced Seminar in Membrane Protein Structure, Function & Pharmacology  3
AS.171.202  Modern Physics  4
AS.171.309  Wave Phenomena with Biophysical Application  4
or AS.171.201  Special Relativity/Waves

List #2
AS.020.306  Cell Biology  4
AS.020.303  Genetics  3
AS.020.344  Virology  3
AS.020.346  Immunology  3
AS.020.363  Developmental Biology  3
AS.020.380  Molecular Biology  3
EN.550.211  Probability and Statistics for the Life Sciences  4
or EN.550.311  Probability and Statistics for the Biological Sciences and Engineering

Any course 300-level or higher in Biology, Biophysics, Chemistry, Mathematics, and Physics that is 3 credits or greater.  3

Scheduling conflicts occasionally arise due to schedule changes in the departments of Physics, Biology, and Chemistry. Prospective biophysics majors should consult with the departmental undergraduate advisor to determine how the conflicts can be resolved.

**Total Credits: 121**

* AS.250.265 Introduction to Bioinformatics and AS.250.353 Computational Biology are List #1 electives.

**Honors in Biophysics**

The Jenkins Biophysics department offers outstanding students the opportunity to earn departmental honors in Biophysics. This honors distinction appears on the student’s transcript upon graduation. If the honors requirements are approved prior to early April, an “Honors” distinction will additionally appear in the commencement program.

The requirements for departmental honors in biophysics are two-fold:

- The student must maintain an overall GPA of 3.5 or greater
- The student must write and receive approval of an Honors paper that is based on their 6 credits of required research.

Generally, the Honors paper must be submitted no later than March 1 of the senior year to meet the commencement deadline. Details on the format of the Honors paper can be found on the departmental website. Schedule a meeting with your Jenkins faculty adviser if you are interested in seeking departmental honors.

**Ete Z. Szüts Undergraduate Research Travel Award**

This award, named in honor of a Ph.D. graduate student from this department, will provide funds for up to 80 percent of the transportation costs of undergraduate research students in biophysics to attend a scholarly meeting. Recipients must be sponsored by a member of the departmental faculty who will be at the same meeting. Schedule a meeting with your Jenkins faculty adviser if you are interested in the Szuts Travel Award.

**H. Keffer Hartline Award for Excellence in Undergraduate Research in Biophysics**

This award honors a senior Biophysics Major for excellence in undergraduate research in Biophysics.

**Detlev W. Bronk Award for Outstanding Scholarship in Biophysics**

This award honors a senior Biophysics major for outstanding achievements in academics and research in Biophysics.

**Master’s Program**

**Fifth-Year Master’s Degree**

The T. C. Jenkins Department of Biophysics offers outstanding undergraduate biophysics majors the opportunity to advance their education through a combined, 5-year B.A., M.A. program. Candidates for this program must be current biophysics undergraduates with a departmental GPA of 3.5 or greater and a strong research history. All bachelor’s requirements must be completed before matriculating into the Master’s program.

Students in this program will be required to take courses such as:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Total Credits:** 9

**A Note on Writing Courses**

The Krieger School of Arts & Sciences requires 12 credits total of courses with a “Writing” (or “W”) designation. Although many humanities and social science courses have a writing designation, biophysics majors are also able to fulfill writing credits by taking the courses within the major, which will give them exposure to scientific writing. Current examples include:

- AS.250.383 Molecular Biophysics Laboratory
- AS.250.401 Advanced Seminar in Structural and Physical Virology
- AS.250.403 Bioenergetics: Origins, Evolution, and Logic of Living Systems (expected new course)
- AS.250.411 Advanced Seminar in Structural Biology of Chromatin
- AS.250.421 Advanced Seminar in Membrane Protein Structure, Function & Pharmacology

Fulfilling the writing credits solely with these biophysics courses requires advanced planning because not all of these courses are offered every year.
These courses account for about half of the student’s time. The remaining effort is spent on a substantial research project. A Master’s thesis describing the research being carried out is also required.

**Doctoral Programs**

The Thomas C. Jenkins Department of Biophysics offers two Ph.D. programs. The annual application deadline is January 15.

**Program in Molecular Biophysics**

The Program in Molecular and Biophysics (PMB), which began in 1990, brings together Johns Hopkins faculty at the Homewood and Medical School campuses. Its goal is to prepare students to deal with interdisciplinary problems in molecular biophysics and structural biology. For more information, see PMB Web page at pmb.jhu.edu.

**Admission**

All applicants must have a B.S. or a B.A. degree. Applications from students in any branch of science are welcome; however, we are particularly eager to attract applicants with undergraduate majors in physics, chemistry, mathematics, or relevant areas of engineering.

There are no required undergraduate courses. Instead, applications are examined for general strength of scientific background. The Graduate Record Examination, including a subject test, is required.

Please use the Johns Hopkins University online application, selecting biophysics under the School of Arts & Sciences. Supplementary materials (letters of recommendation, GRE scores, statement, etc.) should be sent directly to:

**Program in Molecular Biophysics**

Johns Hopkins University  
101 Jenkins Hall  
3400 N. Charles Street  
Baltimore, MD 21218

**Requirements for the Ph.D.**

Programs are developed individually for each student, and due account is taken of previous training.

**The following courses are required:**

<table>

At the School of Medicine: ME.100.705 Computer Modeling of Biological Macromolecules and ME.330.709 Organic Mechanisms in Biology

Students must demonstrate strength in the following four areas: biological sciences, chemistry, mathematics, and physics. Typically, incoming students already have strength in at least two of these areas from undergraduate training. Deficiencies will be remedied through additional course work or self-study. Students must pass a proficiency exam in biological sciences at the end of their first year. In the mathematics and physics areas, students will be required to have calculus through the study of several variables, and one year of calculus-based physics, respectively. In the chemistry area, students are required to have basic chemistry, organic chemistry, and physical chemistry. In biological sciences, students are required to have knowledge of biochemistry and cell and molecular biology.

Additional academic requirements include completion of three 12-week laboratory rotations, a one-hour seminar on a current topic of biophysical research, and passing the Graduate Board Oral Preliminary Examination, to be given near the end of the second year. Responsible Conduct of Research instruction is required throughout the duration of graduate studies.

Completion of an original investigation and presentation of a dissertation are required. The dissertation must be accepted by the program and be considered worthy of publication by the referees. Students must then pass an oral examination on their dissertation and related topics.

**The Program in Cell, Molecular Developmental Biology and Biophysics**

The Program in Cell, Molecular Developmental Biology and Biophysics (CMDB) gives students a strong background in modern biology and physical biochemistry. This combination prepares students to study complex biological phenomena using quantitative physical methods. The training faculty reside in the T. C. Jenkins Department of Biophysics, the Biology Department, and the Carnegie Institutions Department of Embryology, all located on the Johns Hopkins Homewood campus. Students take core graduate courses in cell, molecular, and developmental biology, and in biophysics, and complete four eight-week rotations their first year. Other requirements include the Graduate Board Oral Preliminary Examination, given before the end of the second year, and successful defense of the dissertation.

For more information about CMDB, please check its website (cmdb.jhu.edu). Interested applicants can apply online via the program website or by U. S. mail to:

Ms. Joan Miller (joan@jhu.edu)  
Graduate Admissions Coordinator  
CMDB Program  
Department of Biology  
Johns Hopkins University  
3400 N. Charles Street  
Baltimore, MD 21218  
410-516-5502

**Financial Aid**

Two National Institutes of Health training grants currently provide stipend and tuition support: one is for students who enroll in PMB and the other is for those who enter CMDB. Students supported by these training grants must be U.S. citizens or permanent residents. In addition, several research assistantships funded by grants and contracts awarded to faculty by outside agencies may be available to qualified students. University fellowships providing remission of tuition are also available. Graduate students in biophysics are eligible for and encouraged to apply for various nationally administered fellowships, such as National Science Foundation fellowships. Information on these and other support mechanisms can be obtained through the fellowship advisor at the applicant’s college or from the National Research Council:

Attn: Fellowships  
1000 Thomas Jefferson St.  
Washington, D.C., 20007.
It is anticipated that financial support covering normal living costs and tuition will be made available to accepted students. Support for foreign students is extremely limited.

For current faculty and contact information go to http://biophysics.jhu.edu/faculty_and_research.html

Faculty

Doug Barrick
Professor: energetic and structural basis of Notch signal transduction, protein energetics, repeat protein folding.

Gregory Bowman
Associate Professor: biophysical and biochemical characterization of chromatin-remodeling proteins; X-ray crystallography.

Richard Cone
Professor: mucosal protective mechanisms, contraception and prevention of sexually transmitted diseases, cellular and molecular mechanics.

Bertrand Garcia-Moreno E.
Professor (Chair): experimental and computational studies of protein energetics and electrostatics.

Karen G. Fleming
Professor: energetics and folding of membrane proteins.

Taekjip Ha
Bloomberg Professor: single molecule biophysics, Fluorescence imaging and spectroscopy, mechanobiology

Margaret Johnson
Assistant Professor: computational and theoretical studies of protein-protein interactions; protein assembly and dynamics.

Juliette T. J. Lecomte
Professor: structure and dynamics of proteins in solution; NMR spectroscopy.

Sua Myong
Associate Professor: quantitative analysis of gene expression in single molecule and single cell

Elijah Roberts
Assistant Professor: development and application of in-silico cell models.

George Rose
Krieger-Eisenhower Professor, Research Professor, Professor Emeritus: modeling and simulation of protein folding and protein structure.

Sarah A. Woodson
Thomas C. Jenkins Professor: folding and assembly of RNA and RNA-protein complexes.

Research/Teaching Faculty

Ana Damjanovic
Associate Research Scientist (part-time): computational studies of protein structure, dynamics and function.

Carolyn Fitch
Senior Lecturer: computational and experimental studies on protein structure, function, and energetics.

Patrick Fleming
Senior Lecturer: computational studies of protein folding, structure and solvation.

Secondary Appointments, Biology

Ernesto Freire
Professor: biophysical chemistry, thermodynamics of macromolecular assemblies in membranes protein-lipid interactions, microcalorimetry.

Vincent J. Hilser
Professor: conformational fluctuations in function, disease, and evolution.

Evangelos Moudrianakis
Professor: mechanisms of enzyme action, especially of chloroplast and mitochondrial coupling factors. Human chromosome structure and function, self- assembly of chromosomal components.

Robert Schleif
Professor: protein-DNA interactions and regulation of gene activity.

Beverly Wendland
Professor (Chair): molecular mechanisms of endocytosis in yeast and mammalian cells.

Secondary Appointments, Chemistry

Christopher Falzone
Teaching Professor: NMR spectroscopy of proteins.

Craig A. Townsend
Professor: organic and bioorganic chemistry, biosynthesis of natural products, stereochemical and mechanistic studies of enzyme action, application of spectroscopic techniques to the solutions of biological problems.

Joint Appointments

P. C. Huang
Professor (Biochemistry and Molecular Biology): organization and regulation of stress inducible genes and their gene products.

Affiliations with the School of Medicine

L. Mario Amzel
Professor: X-ray diffraction studies of biological macromolecules; enzymes involved in oxidate reductions and phosphorylation; experimental and modeling studies of binding proteins.

James M. Berger
Professor: structural and mechanistic biochemistry of protein/nucleic acid machines and assemblies.

Dominique Frueh
Assistant Professor: NMR studies of protein dynamic modulations and conformations in active enzymatic systems.

Albert Lau
Assistant Professor: characterization of receptor-ligand interactions and macromolecular conformational transitions using computational and crystallographic approaches.

Daniel J. Leahy
Professor: X-ray diffraction studies of cell-surface receptors and extracellular matrix components.

Jungsan Sohn
Assistant Professor: structure and function of biological stress sensors.

Herschel Wade
Assistant Professor: structural, functional, and energetic treatments of ligand-activated molecular switches.

Cynthia Wolberger
Professor: three-dimensional structure of protein-DNA complexes, X-ray crystallography.

Jie Xiao
Assistant Professor: dynamics of molecular process at single molecule and single cell level.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

**AS.250.106. Introduction to Biomedical Research and Careers I.**
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Freshmen and non-science majors Co-listed with AS50.300 and AS.250.306
Instructor(s): P. Huang
Area: Natural Sciences.

**AS.250.113. Great Experiments in Science/Medicine.**
This course explores scientific experiments of the Nobel Prize winners in Medicine, Chemistry, and Physics. It highlights ground-breaking experiments which led to the scientists obtaining the prize. Course is highly interactive, emphasizing student involvement in understanding fundamental questions and insights that led to each break-through. Connections to human health and disease are also included. Course includes lectures, readings, student presentations, plus guest lectures by professors involved in the scientific advancements. Grades determined by class participation and oral presentations. This course is strongly recommended for freshmen students.
Instructor(s): K. Krick; N. Neumann
Area: Natural Sciences.

**AS.250.131. Freshman Seminar in Biophysics.**
Introduction of contemporary biophysics research topics through presentations, discussion and hands-on exercise. Freshmen and sophomores only. S/U grading only.
Instructor(s): K. Fleming; R. Cone
Area: Natural Sciences.

**AS.250.205. Introduction to Computing.**
This course is useful for many disciplines not only the life sciences. It will introduce students to basic computing concepts and tools useful in many applications. Students learn to work in the Unix environment, to write shells scripts, and to make use of powerful Unix commands (e.g grep, awk, and sed). They will learn to program using the Python programming language, graphing software, and a package for numerical and statistical computing, such as Mathematica or MATLAB. At the end of the semester students will complete a project coupling all components of the semester together. Brief lectures followed by extensive hands-on computer laboratories with examples from many disciplines. No prerequisites .Course offered every semester.
Instructor(s): A. Damjanovic
Area: Natural Sciences.

**AS.250.253. Protein Engineering and Biochemistry Lab.**
Entry-level project laboratory. Protein engineering and biotechnology techniques used to modify proteins to give them new structural or physical properties. Students introduced to standard biochemistry laboratory practice and protein science; perform experiments in site-directed mutagenesis, protein purification and structural and physical characterization of biological macromolecules. No prerequisites. Preference given to freshmen and sophomores.
Instructor(s): C. Fitch
Area: Natural Sciences.

**AS.250.265. Introduction to Bioinformatics.**
Lectures and computer labs introduce bioinformatics concepts, algorithms and databases. Computer based exercises cover sequence comparisons, database searching, gene expression analysis, and phylogenetic relationships. Emphasis on algorithms and a critical interpretation of information obtained. Instructor permission required.
Instructor(s): P. Huang
Area: Natural Sciences.

**AS.250.300. Introduction to Biomedical Research and Careers II.**
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Sophomores, juniors and seniors. Science Majors; Co-listed with AS.250.106 and AS.250.306.
Instructor(s): P. Huang
Area: Natural Sciences.

**AS.250.301. Laboratory in Molecular Evolution: Using ancestral.**
The availability of genomic sequences from a vast number of species has enabled the reconstruction of ancestral proteins. In this course we will reconstruct the genes of ancestral proteins and study the physical properties of proteins coded for by “extinct” genes. To examine the evolutionary mechanisms whereby modern proteins obtained their remarkable physical and functional properties, we will focus on understanding how the physical properties of proteins evolved hand-in-hand with changing environmental conditions such as pH, temperature, pressure, ionic strength, oxidative stress, etc.
Instructor(s): A. Robinson.
Introduction to physical and mathematical models used to represent biophysical systems and phenomena. Students will learn algorithms for implementing models computationally and perform basic implementations. We will discuss the types of approximations made to develop useful models of complex biological systems, and the comparison of model predictions with experiment.
Instructor(s): M. Johnson
Area: Natural Sciences.

AS.250.306. Introduction to Biomedical Research and Careers III.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. For those who have already taken AS.250.106 or AS.250.300. Co-listed with AS.250.106 & AS.250.300.
Instructor(s): P. Huang
Area: Natural Sciences.

NMR is a spectroscopic technique which provides unique, atomic level insights into the inner workings of biomolecules in aqueous solution. A wide variety of biophysical properties can be studied by NMR. For example, we can use the technique to determine three-dimensional structure of biological macromolecules such as proteins and nucleic acids, probe their dynamical properties in solution, study their interaction with other molecules and understand how physico-chemical properties (such as electrostatics and redox chemistry) affects and modulates structure-function relationships. NMR exploits the exquisite sensitivity of magnetic properties of atomic nuclei to their local electronic (and therefore, chemical) environment. As a result, biophysical properties can be studied at atomic resolution. That is to say, we can deconstruct global properties of a molecule in terms of detailed, atomic level information. In addition, interactions between nuclei can be exploited to enhance the information content of NMR spectra via multi-dimensional (2D and 3D) spectroscopy. Since these properties can be studied in solution, NMR methods serve as an effective complement to X-Ray crystallography, which also provides detailed, atomic level information in the solid state. In this course, we will learn about the basics of NMR spectroscopy, acquire 1D and 2D NMR spectra and use various NMR experiments to characterize and probe biophysical properties of proteins at an atomic level. Juniors and Seniors Only.
Prerequisites: (AS.030.101 AND AS.030.105) AND (AS.030.205) AND (AS.030.370 OR AS.250.372) AND (AS.030.315 OR AS.250.315)
Instructor(s): A. Majumdar.

AS.250.313. Molecular and Cellular System Biology.
This course covers the principles of biological networks, with an emphasis on computational analysis. Networks ranging from simple biochemical pathways to genome-scale metabolic, regulatory, and signaling networks will be studied. Topics include dynamic modeling of biochemical pathways, steady-state analysis of cellular metabolic networks, inference of gene regulatory networks using -omics data, and systems biology approaches to studying signal transduction. Recommended Course Background: Calculus (AS.110.106 and AS.110.107), Biochemistry (AS.250.315 or AS.020.305 or equivalent). Computational Biology (AS.250.353) or Introduction to Bioinformatics (AS.250.265) or prior exposure to programming.
Instructor(s): E. Roberts.

AS.250.315. Biochemistry I.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Lecture and computer laboratory. This class is the first semester of a two semester course in biochemistry. Topics in Biochemistry I include chemical and physical properties of biomolecules and energetic principles of catabolic pathways. Computer labs include extensive use of molecular graphics and modelling of reaction kinetics and pathway flux. Co-listed with AS.030.315
Prerequisites: If you have completed AS.250.307 you may not register for AS.250.315.:Prerequisites: AS.030.206 OR AS.030.212
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.250.316. Biochemistry II.
Biochemical anabolism, nucleic acid structure, molecular basis of transcription, translation and regulation, signal transduction with an emphasis on physical concepts and chemical mechanisms. Format will include lectures and class discussion of readings from the literature.
Prerequisites: (AS.250.315 OR AS.030.315 OR AS.020.305) AND (AS.030.206 OR AS.030.212) or permission of the instructor.
Instructor(s): S. Rokita; S. Woodson.

AS.250.320. Macromolecular Binding.
All biological processes require the interactions of macromolecules with each other or with ligands that activate or inhibit their activities in a controlled manner. This course will discuss theoretical principles, logic, approaches and practical considerations used to study these binding processes from a quantitative perspective. Topics will include thermodynamics, single and multiple binding equilibria, linkage relationships, cooperativity, allostery, and macromolecular assembly. Some biophysical methods used in the study of binding reactions will be discussed. Computer simulation and analysis of binding curves will be used to analyze binding data, and binding schemes and examples from the scientific literature will be reviewed and discussed. Recommended Course Background: AS.250.372 Biophysical Chemistry
Prerequisites: AS.250.315 OR AS.020.305
Instructor(s): K. Fleming.

This course covers topics in probability theory and statistics frequently used in analysis and interpretation of biomedical data. Applications of these theories in biosciences are extensively discussed using primary literature to enable students to apply covered materials in their own field of research.
Prerequisites: AS.110.106
Instructor(s): R. Behrouzi
Area: Natural Sciences.
**AS.250.345. Cellular and Molecular Physiology.**
How cells and molecules function as parts of whole organisms. Topics include speeds of diffusion, motor proteins, and animal motility; bacterial size, shape, and chemotaxis; sensory and neuronal mechanisms; osmosis; mucosal protective mechanisms; cellular and organismic circulation and respiration. Discussion section to be arranged 1 hour per week.
Instructor(s): R. Cone
Area: Natural Sciences.

**AS.250.351. Reproductive Physiology.**
Focuses on reproductive physiology and biochemical and molecular regulation of the female and male reproductive tracts. Topics include the hypothalamus and pituitary, peptide and steroid hormone action, epididymis and male accessory sex organs, female reproductive tract, menstrual cycle, ovulation and gamete transport, fertilization and fertility enhancement, sexually transmitted diseases, and male and female contraceptive methods. Introductory lectures on each topic followed by research-oriented lectures and readings from current literature.
Instructor(s): B. Zirkin; R. Cone
Area: Natural Sciences.

**AS.250.353. Computational Biology.**
This course introduces several computational approaches to the study of biological macromolecules. Students will learn to use computational tools to carry out and analyze molecular simulations and how to work in a UNIX networked environment. A major goal is to understand molecular systems as ensembles. No programming experience is required. A previous biochemistry course is strongly recommended.
Prerequisites: (AS.030.101 AND AS.030.102). AS.250.345 is strongly recommended.
Instructor(s): P. Fleming
Area: Natural Sciences.

**AS.250.352. Biophysical Chemistry.**
Course provides working understanding of physical chemistry of the cell, emphasizing problem solving. Topics include classical and statistical thermodynamics, thermodynamics of proteins and nucleic acids, protein folding, calorimetry, ligand binding thermodynamics, linkage, cooperativity and anticooperativity, allosteric models, lattice statistics, helix-coil transition, and polymer theory. When appropriate, students visit the laboratory to set up data collection and learn to analyze the resulting data computationally, using nonlinear least-squares methods. Recommended Course Background: Calculus, Organic Chemistry, and Introductory Physics
Instructor(s): D. Barrick
Area: Natural Sciences.

**AS.250.381. Spectroscopy and Its Application in Biophysical Reactions.**
Continues Biophysical Chemistry (AS.250.372). Fundamentals of quantum mechanics underlying various spectroscopies (absorbance, circular dichroism, fluorescence, NMR); application to characterization of enzymes and nucleic acids.
Instructor(s): J. Lecomte
Area: Natural Sciences.

**AS.250.383. Molecular Biophysics Laboratory.**
An advanced inquiry based laboratory course covering experimental biophysical techniques to introduce fundamental physical principles governing the structure/function relationship of biological macromolecules. Students will investigate a “model protein”, staphylococcal nuclease, the “hydrogen atom” of biophysics. Using a vast library of variants, the effect of small changes in protein sequence will be explored. A variety of techniques will be used to probe the equilibrium thermodynamics and kinetics of this system; chromatography, spectroscopy (UV-Vis, fluorescence, circular dichroism, nuclear magnetic resonance), calorimetry, analytical centrifugation, X-ray crystallography and computational methods as needed for analysis. These methods coupled with perturbations to the molecular environment (ligands, co-solvents, and temperature) will help to elucidate protein function.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Prerequisite: AS.250.253 OR AS.020.315 AND (AS.250.307 OR AS.250.315 OR AS.020.305) AND AS.250.372.
Instructor(s): C. Fitch.

**AS.250.391. Proteins and Nucleic Acids.**
Basic computing for biological applications. First two weeks of class are an introduction to programming through Python. The rest of the course is on the structure of proteins, DNA and RNA, and their functions in living systems. Advanced lecture and discussion course, with discussions based on readings from the scientific literature.
Prerequisites: AS.020.305 AND AS.250.372
Instructor(s): G. Bowman; S. Woodson
Area: Natural Sciences.

**AS.250.401. Advanced Seminar in Structural and Physical Virology.**
Illustrated fundamental contributions from biophysics and quantitative and physico-chemical approaches to study of complex biological systems. Focus on the physical and structural basis of viral infectivity, emphasizing replication cycles and evolution and structural biology of human pathogens such as HIV and influenza. AS.250.372 - Introduction to Biophysical Chemistry useful. Recommended Course Background: AS.030.205 and (AS.020.305 or AS.250.307)
Instructor(s): B. Garcia-Moreno
Area: Natural Sciences.

The trait shared by all living systems is the capacity to perform energy transduction. This biophysics/biochemistry course examines the physico-chemical and structural basis of biological energy transduction. Emphasis is on understanding the molecular and cellular logic of the flow of energy in living systems. The course explores the connection between fundamental physical requirements for energy transduction and the organization, evolution and possibly even the origins of biological molecules, cells, and organisms. Implications for planet earth’s energy balance and for the design of synthetic organisms and of artificial energy transducing machines will be discussed, time permitting. Recommended Course Background: One semester of Biochemistry
Instructor(s): B. Garcia-Moreno.
AS.250.411. **Advanced Seminar in Structural Biology of Chromatin.**
Focus is on structural and physical aspects of DNA processes in cells, such as nucleosomal packaging, DNA helicases, RNA polymerase, and RNA inhibition machinery. Topics are meant to illustrate how the structural and chemical aspects of how proteins and nucleic acids are studied to understand current biological questions. Recommended Course Background: Biochemistry I (AS.250.315) and Biochemistry II (AS.250.316) or Biochemistry (AS.020.305) and Intro to Biophys Chem (AS.250.372)
Instructor(s): G. Bowman
Area: Natural Sciences.

AS.250.421. **Advanced Seminar in Membrane Protein Structure, Function & Pharmacology.**
Topics are meant to illustrate the physical basis of membranes and membrane proteins towards understanding their functions and pharmacological importance including aspects of drug design as it relates to membranes. Contemporary issues in the field will be covered using primary literature articles, structural manipulations in pymol, and computational binding simulations. Recommended Course Background: AS.030.205, AS.250.307, and AS.250.372
Instructor(s): K. Fleming.

AS.250.519. **Independent Study.**
Instructor(s): K. Fleming.

AS.250.520. **Independent Study.**
Instructor(s): B. García-Moreno; D. Barrick; R. Cone.

AS.250.521. **Research Problems.**
Instructor(s): Staff.

AS.250.522. **Research Problems.**
Instructor(s): Staff.

AS.250.531. **Laboratory - Biophysics.**
Introduction to Independent research in Biophysics emphasizing basic laboratory techniques. Individual study arranged with faculty mentor. Permission from Faculty Sponsor.
Instructor(s): Staff.

AS.250.574. **Research Problems.**
Instructor(s): K. Fleming; R. Cone.

AS.250.595. **Internship.**
Instructor(s): K. Fleming; R. Huang.

AS.250.596. **Laboratory-Biophysics.**
Instructor(s): D. Barrick; R. Cone; S. Woodson.

AS.250.597. **Research.**
Instructor(s): Staff.

AS.250.599. **Independent Study.**
Instructor(s): Staff.

AS.250.601. **Biophysics Seminar.**
Graduate students only. Students and invited speakers present current topics in the field.
Instructor(s): R. Cone.

AS.250.602. **Biophysics Seminar.**
Student and invited speakers present current biophysics topics. Permission required. Graduate student only.
Instructor(s): R. Cone.

AS.250.631. **Lab Research/Biophysics.**
Biophysics research training.
Instructor(s): R. Cone.

AS.250.641. **Seminar on Mucosal Protection.**
Graduate level seminar on physiology, immunology, and epidemiology of mucosal protection. Permission required.
Instructor(s): R. Cone.

AS.250.644. **Graduate Biophysical Chemistry.**
Review of classical & statistical thermodynamics, protein and nucleic acid structure, ligand binding, and enzyme kinetics. Biophysical methods such as fluorescence, NMR spectroscopy, and X-ray crystallography are also discussed. Recommended Course Background: AS.020.305, AS.020.306, AS.020.668, or equivalent.
Instructor(s): S. Woodson.

AS.250.649. **Introduction to Computing in Biology.**
Four week, intensive introductory course on the use of computers for applications in biology. The course will cover fundamentals of UNIX, PYTHON and Mathematica. Brief daily lectures followed by extensive hands-on experience in the computer laboratory. Examples from the world of biology are used to teach a large variety of concepts and computational techniques useful to examine a broad range of topics in biology.
Instructor(s): G. Bowman.

AS.250.673. **Semi-Annual Thesis.**
Advanced graduate students make a 10- minute presentation of their thesis work to the departmental faculty. The presentation is followed by a half-hour discussion.
Instructor(s): G. Bowman.

AS.250.674. **Semi-Annual Thesis.**
Departmental Majors Only.
Instructor(s): B. Garcia-Moreno.

AS.250.679. **Introduction to Computing.**
Course introduces students to the use of computers for applications in many areas (natural and social sciences, humanities, and engineering). Students will obtain basic computing skills and tools, including familiarity with UNIX, with the use of complex UNIX commands (e.g grep, awk, sed) and shell scripts, with the Python programming language, with graphing software and with a package for numerical and statistical computing, such as Mathematica or Matlab. Brief weekly lectures followed by extensive hands-on computer laboratories with examples from many disciplines.
Instructor(s): C. Fitch
Area: Natural Sciences.

AS.250.685. **Proteins & Nucleic Acids.**
The structure of proteins, DNA and RNA, and their functions in living systems. Students are required to participate in class discussions based on readings from the primary scientific literature. Co-requisite: AS 250.649 Introduction to Computing in Biology, or knowledge of Python programming. Instructor permission for undergraduates.
Instructor(s): G. Bowman; S. Woodson.

AS.250.689. **Physical Chemistry of Biological Macromolecules.**
Introduction to the principles of thermodynamics and kinetics as applied to the study of the relationship between structure, energy dynamics, and biological function of proteins and nucleic acids. Topics include of classical, chemical, and statistical thermodynamics, kinetics, theory of ligand binding, and conformational equilibria.
Instructor(s): B. García-Moreno.
AS.250.690. Methods in Molecular Biophysics.
Introduction to methods employed in study of energetics, structure and function of biological macromolecules. Topics include optical spectroscopy, transport methods, NMR, X-ray crystallography. Theoretical understanding and knowledge through problem solving and literature discussion emphasized.
Prerequisites: AS.250.685 AND AS.250.689
Instructor(s): G. Bowman; J. Lecomte.

AS.250.801. Dissertation Research.
Instructor(s): Staff.

Instructor(s): B. Garcia-Moreno.

Cross Listed Courses

Biology
AS.020.674. Graduate Biophysical Chemistry.
This course will provide an overview of protein and nucleic acid structure, fundamentals of thermodynamics and kinetics, ligand binding, folding and stability of macromolecules, and the principles of biophysical methods such as fluorescence spectroscopy, NMR, and X-ray crystallography. Monday Discussion Session is optional. Recommended Course Background: AS.020.305, AS.020.306
Instructor(s): E. Freire; E. Roberts.

Interdepartmental
AS.360.701. Research Laboratory Safety.
An introduction to laboratory safety including chemical, biological, radiation, and physical hazards. Includes information on hazard assessment techniques, laboratory emergencies, and general lab standards for Whiting School of Engineering. The class will feature hands-on exercises with real-life experiments. Intended for students who have not yet begun working in a research laboratory.
Instructor(s): D. Kuespert.

Chemistry

The Department of Chemistry, in conjunction with other departments of the university, offers a broad education and the opportunity to do research in chemistry and related fields. The great diversity of the field of chemistry, ranging between physics and biology, is reflected in the research interests of the faculty. Undergraduate chemistry majors usually go on to graduate study in chemistry, chemical engineering, biology, oceanography, geochemistry, biophysics, environmental sciences, or medicine, while others enter the chemical industry. The Ph.D. in chemistry leads to professional careers in colleges and universities, research institutes, industry, and government laboratories.

Facilities

The department is well-equipped with instrumentation, both shared and in individual faculty research laboratories, to perform modern chemical research. The Departmental Instrumentation Facility houses the following pieces of major instrumentation:

- Bruker Avance 400 MHz FT-NMR spectrometers (2), one located in the Instrumentation Facility in Remsen Hall and the other on the first floor of the new chemistry building.
- Bruker Avance 300 MHz FT-NMR spectrometer.
- VG70S magnetic sector mass spectrometer, with EI, and CI ionization.
- VG70SE magnetic sector mass spectrometer, with FAB ionization.
- Finnigan LCQ ion trap mass spectrometer with electrospray ionization (APCI available as an option).
- Finnigan LCQ Duo ion trap mass spectrometer with electrospray ionization (for inorganic and organometallic use).
- Finnigan LCQ Fleet ion trap Mass Spectrometer with ESI ionization and HPLC inlet.
- Bruker Autoflex III Maldi-ToF-ToF Mass spectrometer with Maldi ionization and collision cell.
- Shimaadzu GC17A/QP5050A GC-MS with EI ionization.
- Waters Acquity / Xevo G2 UPLC-Q-ToF MS with ESI and APCI ionisation.
- Bruker EMX EPR spectrometer equipped with a liquid helium cryostat and variable temperature controller.
- Bruker Vector 22 FT-IR spectrophotometer.
- Jasco P-1010 polarimeter.
- Xcalibur3 X-ray diffractometer with CCD area detector (located on the second floor of the new chemistry building).
- Protein Technologies Symphony Quartet Peptide Synthesizer.
- SuperNova X-ray diffractometer (dual hi-flux micro-focus Mo and Cu sources ) with Atlas CCD area detector.

NMR spectrometers suitable for studies of biological macromolecules are located in the Biomolecular NMR Center, located in an underground facility in front of the new chemistry building. The instruments include 500, 600, and 800 MHz FT-NMR spectrometers.

A variety of different mass spectral techniques are available in the expanding Mass Spectrometry Facility. High-resolution mass spectra of submitted samples are obtained on a service basis by a staff member using two magnetic sector instruments equipped with EI, CI, and FAB ionization methods. MALDI-TOF, GC/MS, and electrospray instruments are also available and operated by students and researchers following training by the facility staff.

The X-ray Diffractometer Facility is operated by a staff member. The instruments are suitable for detailed molecular-level structural characterization of new organic or inorganic compounds.

The department has an established in-house peptide synthesis facility. This facility is equipped with a four-channel peptide synthesizer from Protein Technologies, an Agilent HPLC equipped with both a diode array and a fluorescence detector, and a lyophilizer.

The department shares with the Physics and Astronomy Department the use of the Physical Sciences Machine Shop, located in the Bloomberg Center. Electronics construction and repair is handled by a staff member in the Departmental Instrumentation Facility.

Programs for undergraduate majors can be tailored to individual interests so that a major in chemistry is excellent preparation not only for further work in chemistry, but also for any field that rests on a chemical foundation. It is a good choice for a premedical student interested in medical research.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor’s Degree. (p. 20))
Majors must complete all courses required for the major for a letter grade and receive a grade of C- or higher. Requirements of the chemistry major are:

**Advanced Elective Courses**

Six credits of advanced chemistry courses beyond AS.030.305-AS.030.306 **
Nine credits of advanced chemistry courses, or science electives at the 300-level or higher approved by a Department of Chemistry advisor, and/or mathematics beyond Calculus II **

**Total Credits** 70

Lecture and laboratory courses should be taken in sequence. In particular, AS.030.228 Intermediate Organic Chemistry Laboratory must be taken before AS.030.356 Advanced Inorganic Lab.

To allow maximum flexibility in choosing electives, students should complete both physics and organic chemistry by the end of the sophomore year. AS.030.449 Chemistry of Inorganic Compounds or AS.030.204 Chemical Structure and Bonding w/Lab and AS.020.305 Biochemistry I or AS.030.315 Biochemistry I are required for an American Chemical Society accredited degree.

**Sample Program**

A typical program might include the following sequence of courses:

### Financial Aid and Admissions

Fellowships, research appointments, and teaching assistantships are available for graduate students. There are no fixed admission requirements. Undergraduate majors in chemistry, biology, earth sciences, mathematics, or physics may apply, as well as well-qualified individuals who will have received a B.A. degree.

For further information about graduate study in chemistry visit the Chemistry Department website at [www.chemistry.jhu.edu](http://www.chemistry.jhu.edu).

For current faculty and contact information go to [http://www.chemistry.jhu.edu/faculty.html](http://www.chemistry.jhu.edu/faculty.html)

### Senior Honors in Chemistry

To recognize exceptional performance, both in formal course work and in research, chemistry majors can receive a degree with honors.

Honors in Chemistry may be achieved by one of two paths. 1: A student with a GPA of 3.75 or higher in (N) and (Q) courses or 2: A student with a 3.5 GPA in (N) and (Q) courses and with at least 2 semesters of research with a Chemistry faculty member or an approved advisor. These students must write a summary of their research and fill out the Honors Clearance form and the GPA checksheet (see: [http://www.advising.jhu.edu/honors.php](http://www.advising.jhu.edu/honors.php)). Turn in these forms to the Director of Undergraduate Studies.

Each student’s background and interests determine the course of study. The normal program leads to the Ph.D. degree. A student is not usually accepted for a terminal M.A. degree.

### Requirements for the M.A. and Ph.D. Degrees

Normally, the minimum course requirement for both the M.A. and the Ph.D. degrees is eight one-semester graduate courses in chemistry and related sciences. Exceptionally well-prepared students may ask for a reduction of these requirements.

Requirements for the Ph.D. degree include a research dissertation worthy of publication, and a knowledge of chemistry and related material as demonstrated in an oral examination. Each student must teach for at least one year.

Requirements for the M.A. degree, in addition to completion of formal course work and research, include a satisfactory performance on an oral examination.

### Total Credits: 70

of HNO-induced protein modifications-time-resolved IR spectroscopy of organic reactive intermediates.

Craig A. Townsend
Alsoph H. Corwin Professor: organic and bioorganic chemistry—biosynthesis and chemistry of natural products, stereo-chemical and mechanistic studies of enzyme action, small molecule/DNA interactions, application of spectroscopic techniques to the solution of biological problems.

David R. Yarkony
D. Mead Johnson Professor: theoretical chemistry—electronic structure theory, multi-configuration self-consistent-field methods, excited state chemistry, electronic energy transfer in chemical reactions, spin-forbidden processes, and electronically nonadiabatic processes.

Associate Professors
Tyrel McQueen
Solid state inorganic chemistry—electronically and magnetically active materials—condensed matter physics.

Justine P. Roth
Inorganic chemistry and enzymology—rational design of redox catalysts, selective bond activation/oxidation by enzymes and transition metal complexes, synthetic systems for light to chemical energy transduction.

Joel R. Tolman
Biophysical chemistry—protein-protein interactions, protein dynamics and structure, NMR methodology.

John D. Tovar
Organic chemistry—organic electronics, conjugated and conducting polymers, electrochemistry, nanostructured materials, polymer chemistry bioinspired self—assembly, and supramolecular chemistry.

Assistant Professors
Arthur Bragg
Experimental physical chemistry—chemical dynamics and charge/energy transfer in condensed-phase systems, ultrafast spectroscopy.

Lan Cheng
Theoretical chemistry—electronic structure theory for treating relativistic and electron-correlation effects, relativistic theory for magnetic properties, computational chemistry and spectroscopy for heavy-element compounds

Thomas Kempa
Materials chemistry—solid-state materials chemistry and experimental physical chemistry.

Rebekka S. Klausen
Organic and materials chemistry—the design and synthesis of well-defined organosilicon and organic materials, electronic characterization of novel materials.

V. Sara Thoi
Inorganic chemistry—coordination chemistry, materials synthesis, electron and ion transport, photochemistry, and electrocatalysis.

Jane Greco
Associate Teaching Professor.

Louise Pasternack
Teaching Professor.

Mark Pederson
Research Professor.

Gary Posner
Research Professor.

Adjunct, Emeritus, and Joint Appointments
David E. Draper
Professor Emeritus.

David Gracias
Assistant Professor (Chemical and Biomolecular Engineering).

Howard E. Katz
Professor (Materials Science and Engineering).

Albert S. Mildvan
Professor Emeritus.

Brown L. Murr
Professor Emeritus.

Alex Nickon
Vernon Krieble Professor Emeritus.

Douglas Poland
Professor Emeritus.

Lawrence M. Principe
Professor (joint appointment in History of Science and Technology).

Dean W. Robinson
Professor Emeritus.

Lecturers
Larissa D’Souza
Senior Lecturer.

Eric Hill
Lecturer.

David Klein
Senior Lecturer (Summer Programs).

Sunita Thyagarajan
Lecturer.

Courses

**AS.030.101. Introductory Chemistry I.**
An introduction to the fundamental principles of chemistry. The main topics to be covered are atomic and molecular structure at the level of dot structures and VSEPR geometries, the periodic table, stoichiometry and the balancing of chemical equations, the gas laws, the law of mass action and chemical equilibrium, acids and bases, and elementary chemical thermodynamics. Switching sections requires instructor’s approval. Corequisite: AS.030.105
Instructor(s): D. Goldberg; S. Thyagarajan
Area: Natural Sciences.

**AS.030.102. Introductory Chemistry II.**
The fundamental principles of chemistry, including atomic and molecular structure, bonding, elementary thermodynamics, equilibrium, acids and bases, electrochemistry, kinetics, and transition metal chemistry are introduced in this course. To be taken with Introductory Chemistry Laboratory unless lab has been previously completed. Note: Students taking this course and the laboratory 030.105-106 may not take any other course in the summer sessions and should devote full time to these subjects. High school physics and calculus are strongly recommended as prerequisites. First and second terms must be taken in sequence.
**Prerequisites:** AS.030.101
Instructor(s): P. Dagdigian; S. Thyagarajan
Area: Natural Sciences.

**AS.030.103. Applied Chemical Equilibrium and Reactivity w/lab.**
This course is designed for freshmen who have previously taken AP chemistry or have similar advanced chemistry experience. This course will review an advanced introductory chemistry sequence in a single semester. Chemical equilibrium, reactivity and bonding will be covered. These topics will be explored through the use of laboratory experiments and problem solving, and the use of these principles in current research areas will be discussed. Students may receive credit for AS.030.103 or EN.510.101, but not both.
**Prerequisites:** Students may receive credit for AS.030.103 or EN.510.101, but not both.
Instructor(s): J. Greco
Area: Natural Sciences.

**AS.030.105. Introductory Chemistry Lab I.**
Laboratory work includes some quantitative analysis and the measurement of physical properties. Open only to those who are registered for or have successfully completed Introductory Chemistry 030.101.
**Prerequisites:** AS.030.101 OR EN.510.101
Instructor(s): L. Pasternack
Area: Natural Sciences.

**AS.030.106. Introductory Chemistry Laboratory II.**
Laboratory work includes some quantitative analysis and the measurement of physical properties. Open only to those who are registered for or have completed Introductory Chemistry II (AS.030.102). Permission required for pre-college students.
**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class;
**Prerequisite:** AS.030.105 AND (AS.030.101 OR EN.510.101)
Instructor(s): L. Pasternack
Area: Natural Sciences.

**AS.030.110. Mini-term: Introduction to Bioorganic Chemistry.**
Meet M-F June 22nd - July 2nd. This interdisciplinary course is an introductory-level class to relate biological phenomena with basic principles of chemistry. Organic chemistry or biochemistry in college is one of the most stressful classes to some students and sometimes they are pushed by assignments and tests during the entire semester without having a chance to enjoy fun side of chemistry. This course will introduce some basic concepts of chemistry and organic chemistry and applications of those concepts into biological systems, in more enjoyable way with a smaller group of students than regular courses. The course aims biology-majors to get a molecular view and chemistry-majors to have fun to find how their chemical knowledge can be used to explain biological process. Also other students will learn about both and have an idea what interdisciplinary science is.
Instructor(s): H. Chung
Area: Engineering, Natural Sciences.

**AS.030.111. Introductory Biological Chemistry.**
Organic chemistry or biochemistry in college is one of the most stressful classes to some students and sometimes they are pushed by assignments and tests during the semester without having a chance to enjoy fun side of chemistry. This course will introduce some basic concepts of chemistry and organic chemistry and applications of those concepts into biological systems, in more enjoyable way with a smaller group of students than regular courses. The course aims biology-majors to get a molecular view and chemistry-majors to have fun to find how their chemical knowledge can be used to explain biological process. Also other students will learn about both and have an idea what interdisciplinary science is.
Area: Natural Sciences.

**AS.030.112. Chemistry with Problem Solving I.**
This course is for students who have had moderate or limited exposure to the subject. Special emphasis is placed on scientific problem-solving skills. There are two discussion sections per week, including one devoted exclusively to interactive quantitative problem solving. A typical student may have taken a year of descriptive chemistry as a high school sophomore, but has not been exposed to the problem-solving mathematical approach used in university-level science courses. Taken concurrently with AS.030.101 and AS.030.102.
**Prerequisites:** AS.030.101 OR AS.030.102
Instructor(s): E. Hill; S. Cravens.

**AS.030.113. Chemistry with Problem Solving II.**
This course is for students who have had moderate or limited exposure to the subject. Special emphasis is placed on scientific problem-solving skills. There are two discussion sections per week, including one devoted exclusively to interactive quantitative problem solving. A typical student may have taken a year of descriptive chemistry as a high school sophomore, but has not been exposed to the problem-solving mathematical approach used in university-level science courses. Taken concurrently with AS.030.101 and AS.030.102.
Instructor(s): E. Hill; S. Thyagarajan.
One of the most important scientific challenges society faces today is supply of green and sustainable energy. This course will highlight the contributions of chemists in current and emerging technologies of alternative energy. A general overview of solar energy, biomass conversion, nuclear power and other approaches will be presented. The underlying chemical principles of these areas, such as water oxidation, carbon dioxide reduction and generation of liquid fuels will be examined. The current sources of energy used in today’s world and their impact on the environment will also be discussed. In class sessions, students will be expected to be actively involved in the discussion of lectures and assigned readings.
Prerequisites: Corequisite: AS.030.101 or AP 4 or 5.
Instructor(s): C. Rolle
Area: Natural Sciences.

AS.030.201. Introduction to Total Synthesis.
Synthetic organic chemistry is just as much an art as it is a science. Intro to Total Synthesis will add more useful, modern reactions to the toolbox of the organic chemistry student, shape the creative thought process behind designing syntheses of complex, fascinating molecules, and illustrate a couple impressive feats in the total syntheses of medicinally relevant molecules (i.e. Penicillin V). This course is recommended for students seeking practice (or stimulation) with synthesis problems.
Instructor(s): C. Pitts
Area: Natural Sciences.

This course will introduce core concepts in protein-catalyzed chemistry and is intended to provide a molecular level context for students interested in learning about biochemistry and bioengineering. Topics include protein structure, origins of enzyme catalysis, and types of enzyme reactions. These concepts will be expanded upon through a survey on the basic mechanisms of a selection of enzymes important to health, energy, and the environment. The emphasis will be on how enzymes perform chemical transformation, and their roles in medicinal and industrial applications.
Instructor(s): H. Kuo
Area: Natural Sciences.

AS.030.204. Chemical Structure and Bonding w/Lab.
An introduction to the synthesis, structure, and reactivity of inorganic compounds. Modern approaches to chemical bonding, including molecular orbital, ligand field, and crystal field theories, will be applied to understanding the physical and chemical properties of inorganic materials. Other topics to be discussed include magnetic properties, electronic spectra, magnetic resonance spectra, and reaction kinetics. The integrated laboratory will cover basic synthetic, measurement, and calculation methods of inorganic chemistry.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): T. Mcqueen
Area: Natural Sciences.

AS.030.205. Organic Chemistry I.
The fundamental chemistry of the compounds of carbon. Methods of structure determination and synthesis. The mechanisms of typical organic reactions and the relations between physical and chemical properties and structures.
Prerequisites: AS.030.102 OR AS.030.103 OR EN.510.101 OR AS.030.204
Instructor(s): C. Falzone; C. Townsend; J. Tovar
Area: Natural Sciences.

AS.030.206. Organic Chemistry II.
Continuation of AS.030.205 Organic Chemistry II with biochemistry topics. This course is a continuation of Organic Chemistry I starting with carbonyl chemistry and organometallic reactions. Synthetic strategies and retro-synthetic analysis are emphasized. The second half of the course focuses on biochemical topics including biological pericyclic reactions, carbohydrates, amino acids, proteins, nucleic acids, RNA, DNA, catalysis, and lipids. The organic chemistry of key metabolic steps will also be covered. Students may not simultaneously enroll for AS.030.212 and AS.030.206.
Prerequisites: AS.030.205
Corequisites: Students may not simultaneously enroll for AS.030.212 and AS.030.206.
Instructor(s): C. Falzone; T. Lectka
Area: Natural Sciences.

AS.030.207. Problem Solving Methodology in Organic Chemistry I.
This course will focus on the skills and strategies often utilized for solving problems in organic chemistry. In a seminar-style format, we will focus on a variety of strategies and techniques that students are otherwise expected to discover independently. This optional course is designed to help students succeed in Organic Chemistry I. The course is graded on a pass/fail basis, and is designed to be fun (believe it or not). Students work together in groups to solve challenging problems, focusing on the strategies necessary to solve each problem. This course is not required in order to succeed in Organic Chemistry I, but students in the past have found it to be helpful in guiding their study efforts for Organic Chemistry I.
Instructor(s): E. Hill
Area: Natural Sciences.

AS.030.208. Problem Solving Methodology in Organic Chemistry II.
This course will focus on the skills and strategies often utilized for solving problems in organic chemistry. In a seminar-style format, we will focus on a variety of strategies and techniques that students are otherwise expected to discover independently. This optional course is designed to help students succeed in Organic Chemistry II. The course is graded on a pass/fail basis, and is designed to be fun (believe it or not). Students work together in groups to solve challenging problems, focusing on the strategies necessary to solve each problem. This course is not required in order to succeed in Organic Chemistry II, but students in the past have found it to be helpful in guiding their study efforts for Organic Chemistry II.
Instructor(s): E. Hill
Area: Natural Sciences.
AS.030.212. Honors Organic Chemistry II with Applications in Biological and Materials Chemistry.
Second semester undergraduate organic chemistry from an advanced prospective with connections to modern biological and materials chemistry. The standard topics of second semester organic chemistry (e.g. reactivity of aromatic and carbonyl containing molecules) will be covered with an emphasis on reaction mechanism to facilitate learning about reactivity and enriched with modern examples. In addition, the important role that organic chemistry plays in modern biological (e.g. nucleic acids and proteins) and materials science (e.g. living polymerization and the use of organic chemistry to control macroscopic properties) will be covered. Students may not simultaneously enroll for AS.030.212 and AS.030.206. Prereq: Must receive a B or better in the first semester (AS.030.205).
Prerequisites: Must receive a B or better in the first semester (AS.030.205)
Instructor(s): M. Greenberg
Area: Natural Sciences.

Techniques for the organic chemistry laboratory including methods of purification, isolation, synthesis, and analysis. Chemistry majors should take this course in the fall semester. Course lecture meets at 9:00 am. Freshman are not eligible to register. Students may not simultaneously enroll in AS.030.225 and AS.030.227.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.;EN.510.101 OR ( AS.030.102 AND AS.030.106 ) OR ( AS.030.103 AND AS.030.205) Permission of instructor required for freshmen.
Corequisites : Students may not simultaneously enroll for AS.030.225 and AS.030.227
Instructor(s): L. D'Souza
Area: Natural Sciences.

Techniques for the organic chemistry laboratory including methods of purification, isolation, synthesis, and analysis will be explored through a project focused on chemical chirality. Freshmen only. Students may not simultaneously enroll for AS.030.225 and AS.030.227
Prerequisites: Corequisites: AS.030.206 OR AS.030.212;Prerequisite: AS.030.205
Corequisites : Students may not simultaneously enroll for AS.030.225 and AS.030.227.
Instructor(s): E. Hill
Area: Natural Sciences.

AS.030.228. Intermediate Organic Chemistry Laboratory.
Lab skills already acquired in AS.030.225 will be further developed for synthesis, isolation, purification, and identification of organic compounds. Spectroscopic techniques, applications will be emphasized. Recommended Course Background: AS.030.225
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): E. Hill.

This is a seminar-based course that is broken up into three modules. The beginning of the course will focus on a basic introduction to the periodic table, in particular the transition metals. After a basic knowledge is formed the first theme will focus on the use of metals in the medical field, for example as MRI imaging agents or heavy metal poisoning. The second portion of the course will move away from the body and focus on how metals have impacted society. For example, we will look at the influence of metals in cars, the production of plastics and household chemicals. The final section will focus on how metals have influenced world power such as the invention of the atomic bomb. This course is designed to provide an overall understand of how chemistry and metals influence our lives every day.
Instructor(s): E. Joslin
Area: Natural Sciences.

AS.030.300. Food Fermentation: Theory & Insight.
This course will survey the biochemical, microbiological, and practical aspects of food fermentation in regard to beer, wine, cheese/yogurt, and fermented vegetable production. Focus will be on biochemical processes converting source material to finished product, establishment and role of microbial populations, practical considerations for desired trait/flavor development, and mitigation of undesired traits. Students will gain a fundamental understanding of how food fermentation technology and technology. Basic knowledge of chemistry, biochemistry, and microbiology is advantageous.
Instructor(s): B. Crane.

AS.030.301. Physical Chemistry I.
The laws of thermodynamics, their statistical foundation, and their application to chemical phenomena. Students should have knowledge of general physics, general chemistry, and calculus (two semesters recommended). Freshmen by permission only.
Prerequisites: AS.030.305
Instructor(s): D. Draper
Area: Natural Sciences.

AS.030.302. Physical Chemistry II.
Introduction to quantum mechanics, its application to simple problems for which classical mechanics fails. Topics: Harmonic oscillator, hydrogen atom, very approximate treatments of atoms and molecules, and theoretical basis for spectroscopy. Recommended Course Background: AS.030.301
Instructor(s): D. Yarkony
Area: Natural Sciences.

This course will be an overview of the basic science behind frequently administered drugs. Medicines such as antibiotics, antivirals, cancer drugs, painkillers, and cardiovascular drugs will be covered. The course will focus on how these molecules cause a desirable effect in the body. Those with minimal background in chemistry/biology are encouraged to enroll.
Instructor(s): D. Marous
Area: Natural Sciences.
AS.030.305. Physical Chemistry Instrumentation Laboratory I.
This course is designed to illustrate the principles of physical chemistry and to introduce the student to techniques and instruments used in modern chemical research. Chemistry majors are expected to take this sequence of courses, rather than AS.030.307. Chemistry majors only.
Prerequisites: Prerequisite or Corequisite: AS.030.301 OR AS.030.370
Instructor(s): A. Bragg
Area: Natural Sciences.

AS.030.306. Physical Chemistry Instrumentation Laboratory II.
This course is designed to illustrate the principles of physical chemistry, introduce the student to spectroscopic techniques and instruments used in modern chemical research. Chemistry majors are expected to take this course rather than AS.030.307.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.;Pre or Co requisite: AS.030.301 OR AS.030.302;Prerequisite: AS.030.305
Instructor(s): J. Tolman
Area: Natural Sciences.

AS.030.307. Physical Chemistry Instrumentation Laboratory III.
This is a one-semester course which selects experiments that are most relevant to chemical engineering. Chemical Engineering majors only. Recommended Course Background: AS.030.301-AS.030.302 or equivalent.
Instructor(s): D. Fairbrother
Area: Natural Sciences.

AS.030.308. Elementary Computational Chemistry.
This course introduces the student to the use of computers to address questions in chemistry. Basic notions of self consistent field and density functional theory will be introduced. Molecular wave functions (orbitals) for molecules of increasing complexity, starting from simple diatomic molecules and increasing to molecules of biological relevance, will be determined. Visualization tools will be used to understand the nature of chemical bonding and molecular interactions. Ligand field interactions will be quantified. Chemical reactions, for example SN2 reactions, will be described using rigorously computed reaction paths. Equilibrium and transition state structures will be determined and analyzed. Molecular vibrations will be computed, analyzed and visualized. Infrared spectra will be simulated. The effects of solvents will be considered. NMR chemical shifts will be studied.
Prerequisites: AS.030.205 AND AS.030.206
Instructor(s): D. Yarkony.

AS.030.315. Biochemistry I.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Lecture and computer laboratory. This class is the first semester of a two semester course in biochemistry. Topics in Biochemistry I include chemical and physical properties of biomolecules and energetic principles of catabolic pathways. Computer labs include extensive use of molecular graphics and modelling of reaction kinetics and pathway flux. Co-listed with AS.250.315
Prerequisites: AS.030.206 OR AS.030.212
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.030.316. Biochemistry II.
Biochemical anabolism, nucleic acid structure, molecular basis of transcription, translation and regulation, signal transduction with an emphasis on physical concepts and chemical mechanisms. Format will include lectures and class discussion of readings from the literature.
Prerequisites: AS.030.315 OR AS.250.315 OR AS.020.305
Instructor(s): S. Rokita; S. Woodson.

AS.030.320. Energy and Society.
This course introduces our past, present, and future sources of energy and their advantages and limitations. Discussion of society’s non-sustainable pattern of energy use from both a supply and environmental perspective. The technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources will be investigated. A global perspective for the delicate interplay between energy and society will be gained.
Instructor(s): D. Achey
Area: Natural Sciences.

Students gain a critical understanding of societal energy sources in scientific, economic, and political contexts. Past, present, and future energy sources are discussed in terms of their scope and limitations. Emphasis on the fundamental details of each energy technology and incisive evaluation of policy regarding energy consumption and its environmental consequences. Topics include global warming and climate change, fossil fuels, alternative energies, and energy security and productivity.
Instructor(s): E. Brigham
Area: Natural Sciences.

The theory of the representations of finite and continuous groups will be applied to problems in chemistry.
Instructor(s): D. Yarkony
Area: Natural Sciences.

Laboratory designed to illustrate the principles and practice of inorganic chemistry through the synthesis and characterization of transition metal and organometallic compounds. Methods used include vacuum and inert atmosphere techniques. Instrumental approaches and modern spectroscopic techniques are applied to the characterization of compounds generated. Recommended Course Background: AS.030.204, AS.030.449, or AS.030.472.
Prerequisites: AS.030.228 required - AS.030.449 is strongly suggested as a prerequisite or corequisite.
Instructor(s): J. Greco
Area: Natural Sciences.

AS.030.370. Physical Chemistry I with Biophysical Applications.
Course provides working understanding of physical chemistry of the cell, emphasizing problem solving. Topics include classical and statistical thermodynamics, thermodynamics of proteins and nucleic acids, protein folding, calorimetry, ligand binding thermodynamics, linkage, cooperativity and anticooperativity, allosteric models, lattice statistics, helix-coil transition, and polymer theory. When appropriate, students visit the laboratory to set up data collection and learn to analyze the resulting data computationally, using nonlinear least-squares methods.
Prerequisites: AS.171.101 OR AS.171.103 AND AS.171.102 OR AS.171.104 AND AS.030.103 AND AS.110.106 OR AS.110.108 AND AS.110.107 OR AS.110.109
Instructor(s): D. Barrick
Area: Natural Sciences.
This course will survey the structural and physical properties of chemicals often considered as part of the “finer things in life” including topical discussions of the chemistries of food, drink, art, cosmetics and clothing, among others. Despite the pretentious name, the general theme of the course is to put chemical identities onto the things we interact with on a daily basis but most likely take for granted at a molecular level. Current event topics in consumer chemistry will also be covered (melamine in milk, “shoe rubber” in bread, etc.). Students will have the chance to research and present topics of interest, and there will be field trips. Open to Freshmen and Sophomores ONLY.
Prerequisites: One semester of college-level organic chemistry (AS.030.205 or equivalent).

Metallo-proteins are responsible for many physiological processes ranging from DNA biosynthesis, to detoxification, to respiration. The beginning of the course will review core concepts in protein chemistry including protein structures and dynamics, principles of catalysis and end enzyme kinetics, and tools to probe enzyme mechanisms. These concepts will be expanded upon in the second half of the course through focus on the molecular mechanisms of redox-active metallo-enzymes. A survey of the structure and function relationships within these enzymes will be offered with select examples of heme, iron, and copper-containing proteins that are important to drug development, energy production, and environmental sustainability.
Prerequisites: AS.030.206[ OR AS.030.212
Instructor(s): H. Kuo
Area: Natural Sciences.

This course introduces the student to experimental methodologies used in gas phase physical chemistry. Topics to be covered include vacuum technology, charged particle optics, lasers, mass spectrometry, data acquisition, detectors, measurement of temperature and pressure, and design and fabrication of scientific apparatus. These topics will be tied together with examples of specific experimental studies.
Instructor(s): K. Bowen.

This course provides an introduction to the vast chemistry and physics of solid-state materials. The course begins with a fundamental description of bonding in crystalline solids and calculation of electronic band structure. We then extend our discussion to methods for the synthesis of low-dimensional materials and hierarchical structures, including quantum dots (0D), nanowires (1D), graphene and graphene analogs (2D), and thin-film superlattices. An in-depth discussion of spectroscopic and characterization techniques for solid-state materials will follow and focus on some of the foundational studies of quantum devices and cooperative phenomena. At this stage we will describe recent advances in electron-microscopy (e.g. aberration-corrected and energy filtered TEM, atom-probe tomography) that are revolutionizing the structural, compositional, and electronic characterization of materials. The course will conclude with a survey of contemporary topics in solid-state and nanomaterials science, including functional devices and circuits, assembly, energy conversion and catalysis, and biological sensing. Recommended Course Background: AS.030.301 and AS.030.402 are preferred, but instructor approval may be granted in lieu of these courses.
Instructor(s): T. Kempa
Area: Natural Sciences.

This course will be focused on the fundamentals and applications of electrochemical methods in catalysis, charge transport, and energy conversion and storage. Topics that will be covered are basic electrochemical techniques, homogenous and heterogeneous (photo)electrocatalysis, fuel cells, and charge storage devices. The class will conclude with a group report and presentation on a recent development in the field of energy catalysis, conversion, and storage. Course topics include: 1) Fundamentals of electrochemistry, 2) Potential sweep methods and current-controlled techniques, 3) Impedance analysis, 4) Electrochemistry coupled with other characterization methods, 5) Electrocatalysis and photoelectrochemical catalysis, 6) Basics in fuel cells and current technologies (alkaline, polymer exchange membrane, solid oxide...), 7) Basics in batteries and current technologies (Pb acid, Li-based, other metals...)Recommended Course Background: AS.030.204 or AS.030.449 or AS.030.472, or instructor approval for undergraduate students. No pre-requisites for graduate students
Instructor(s): V. Thoi
Area: Natural Sciences.

Pharmaceutical and Material Industries have immensely benefited since the advent of metal-catalyzed cross-coupling bond forming methods. Most undergraduate organic chemistry courses do not emphasize the potential of these reactions. This course will discuss the synthesis of a variety of commercially available drugs and materials currently synthesized via transition metal-catalyzed cross-coupling methods.
Prerequisites: AS.030.205 AND AS.030.206
Instructor(s): S. Surampudi
Area: Natural Sciences.

AS.030.421. Uses of Coordination Chemistry in Medicine.
This course will introduce basic concepts of Medicinal Inorganic Chemistry and the variety of roles that metals play in contemporary medicine and their applications to both diagnosis and therapy. Students with potential future interests in chemistry, biochemistry, cell biology, pharmacology, and/or toxicology will find this course of great value. This interdisciplinary course is an excellent choice for undergraduates who aim to learn both sides of the coin, chemistry as an academic subject and medicine as an application; study of the combination, in addition to providing knowledge in new subject matter, may also equip students with insights which can aid the evaluation of their future professional career directions. This course begins with an introduction to coordination chemistry as a primary basis for the subsequent topics on diagnosis and therapy including the roles of metal-based drugs in modern medicine and the future development of clinically efficacious metal-complexes. Deans Teaching Fellowship Course.
Prerequisites: AS.030.101 AND AS.030.102 OR equivalent
Instructor(s): S. Hematian
Area: Natural Sciences.

AS.030.440. Practical NMR.
This course will cover practical aspects of data acquisition and processing for NMR experiments routinely used by the chemist. One- and two dimensional experiments, solvent suppression, and other topics will be introduced while covering acquisition parameters and commands, data processing, and spectrum plotting more in depth. The course will be a mix of class room and hands-on instrument experience.
Instructor(s): C. Moore
Area: Natural Sciences.
**AS.030.441. Spectroscopic Methods of Organic Structure Determination.**
The course provides fundamental theoretical background for and emphasizes practical application of ultraviolet/visible and infrared spectroscopy, proton and carbon-13 nuclear magnetic resonance and mass spectrometry to the structure proof of organic compounds. Instructor(s): C. Falzone
Area: Natural Sciences.

**AS.030.442. Organometallic Chemistry.**
An introduction to organometallic chemistry beginning with structure, bonding, and reactivity and continuing into applications to fine chemical synthesis and catalysis. Recommended Course Background: AS.030.449 or equivalent.
Instructor(s): J. Roth
Area: Natural Sciences.

**AS.030.443. Bioinorganic Chemistry.**
This course covers the chemistry of metal ions in biological systems. The structure and function of metalloproteins and metalloenzymes will be addressed. The principles of synthesis (organic and inorganic) for the design and characterization of small-molecule analogs of these systems will be discussed. Physical/spectroscopic methods (e.g., EPR, RR, Mossbauer, XAS) will be introduced as appropriate for understanding both the biological and synthetic inorganic systems.

**AS.030.446. Mathematica as a Tool for Chemists.**
A systematic, hands-on introduction to Mathematica. Covers Mathematica's basic "language," analytic and numerical calculations, data manipulation, graphical representation, interactivity, programming, and document production. Prerequisite: Calculus (including power series)
Instructor(s): H. Silverstone
Area: Natural Sciences.

**AS.030.449. Chemistry of Inorganic Compounds.**
Physical and chemical properties of inorganic, coordination and organometallic compounds are discussed in terms of molecular orbital, ligand field and crystal field theories. Emphasis on structure and reactivity of these inorganic compounds. Other topics: magnetic properties, electronic spectra, magnetic resonance spectra, reaction kinetics.
Instructor(s): J. Roth
Area: Natural Sciences.

**AS.030.451. Spectroscopy.**
Spectroscopy and structure of molecules starting from rotational, vibrational and electronic spectra of diatomic molecules and extending to polyatomic molecules as time permits. Recommended Course Background: AS.030.302 or permission of instructor.
Instructor(s): P. Dagdigian
Area: Natural Sciences.

**AS.030.452. Materials & Surface.**
The chemistry associated with surfaces and interfaces as well as a molecular level understanding of their essential roles in many technological fields. The first half of this course addresses various analytical techniques used to study surfaces including X-ray, photoelectron spectroscopy, and scanning tunneling microscopy. The second half of this course uses a number of case studies to illustrate the application of surface analytical techniques in contemporary research.
Instructor(s): D. Fairbrother
Area: Natural Sciences.

**AS.030.453. Intermediate Quantum Chemistry.**
The principles of quantum mechanics are developed and applied to chemical problems.
Prerequisites: AS.030.301-302
Instructor(s): H. Silverstone
Area: Natural Sciences.

**AS.030.472. Advanced Inorganic & Organometallic Reactions Mechanisms.**
The beginning of the course will focus on the basics of organometallic chemistry such as molecular orbital theory, agostic bonding, electronic structure and coordination geometries. These topics would then be followed with common reactions in organometallic chemistry such as ligand substitution, oxidation addition, and reductive elimination. The final set of topics will cover the basic "tools of the trade" which will encompass kinetics, dynamic NMR spectroscopy, kinetic isotope effects and mechanistic studies.
Prerequisites: Prerequisite: AS.030.206 OR AS.030.212
Instructor(s): E. Joslin
Area: Natural Sciences.

**AS.030.501. Independent Research in Physical Chemistry I.**
Research under the direction of members of the physical chemistry faculty.
Instructor(s): D. Fairbrother; D. Yarkony; Staff.

**AS.030.502. Independent Research in Physical Chemistry.**
Research under the direction of members of the physical chemistry faculty.
Instructor(s): D. Draper; D. Fairbrother; G. Meyer; K. Bowen.

**AS.030.503. Independent Research in Inorganic Chemistry I.**
Research under the direction of members of the inorganic chemistry faculty.
Instructor(s): D. Goldberg; J. Roth; K. Karlin; Staff; T. Lectka.

**AS.030.504. Independent Research in Inorganic Chemistry.**
Research under the direction of members of the inorganic chemistry faculty.
Instructor(s): D. Goldberg; G. Meyer; J. Roth; K. Karlin.

**AS.030.505. Independent Research in Organic Chemistry I.**
Research under the direction of members of the organic chemistry faculty.
Instructor(s): Staff.

**AS.030.506. Independent Research in Organic Chemistry I.**
Research under the direction of members of the organic chemistry faculty.
Instructor(s): Staff.

**AS.030.507. Independent Research in Biochemistry.**
Research under the direction of members of the biochemistry faculty.
Instructor(s): Staff.

**AS.030.509. Independent Research in Biochemistry II.**
Research under the direction of members of the biochemistry faculty.
Recommended Course Background: AS.030.507-AS.030.508 and permission of instructor.
Instructor(s): C. Townsend; J. Tolman.

**AS.030.510. Independent Research in Biochemistry II.**
Research under the direction of members of the biochemistry faculty.
Recommended Course Background: AS.030.507-AS.030.508 and permission of instructor.
Instructor(s): C. Falzone; C. Townsend; J. Tolman.
Instructor(s): T. Mcqueen.

AS.030.512. Independent Research in Materials Chemistry.
Research under the direction of the materials chemistry faculty.
Instructor(s): T. Mcqueen.

AS.030.521. Independent Research in Inorganic Chemistry II.
Research under the direction of the inorganic chemistry faculty.
Recommended Course Background: AS.030.503-AS.030.504 and permission of instructor.
Instructor(s): C. Falzone; D. Goldberg; J. Roth; K. Karlin; Staff.

AS.030.522. Independent Research in Inorganic Chemistry II.
Research under the direction of the inorganic chemistry faculty.
Recommended Course Background: AS.030.503-AS.030.504 and permission of instructor.
Instructor(s): D. Goldberg; G. Meyer; J. Roth; Staff.

AS.030.523. Independent Research in Physical Chemistry II.
Research under the direction of the physical chemistry faculty.
Recommended Course Background: AS.030.501-AS.030.502 and permission of instructor.
Instructor(s): D. Fairbrother; K. Bowen; Staff.

AS.030.524. Independent Research in Physical Chemistry II.
Research under the direction of the physical chemistry faculty.
Recommended Course Background: AS.030.501-AS.030.502 and permission of instructor.
Instructor(s): D. Fairbrother; D. Yarkony; G. Meyer; K. Bowen.

AS.030.525. Independent Research in Organic Chemistry II.
Research under the direction of the organic chemistry faculty.
Recommended Course Background: AS.030.505-AS.030.506 and permission of instructor.
Instructor(s): J. Toscano; M. Greenberg; T. Lectka.

AS.030.526. Independent Research in Organic Chemistry II.
Instructor(s): J. Toscano; M. Greenberg; T. Lectka.

AS.030.527. Independent Study.
Instructor(s): D. Fairbrother.

AS.030.528. Independent Study.
Instructor(s): D. Goldberg.

Research under the direction of members of the Inorganic Chemistry faculty.
Instructor(s): V. Thoi.

Research under the direction of members of the Physical Chemistry faculty.
Instructor(s): T. Kempa.

AS.030.551. Internship-Chemistry.
Instructor(s): Staff.

AS.030.552. Internship - Chemistry.
Instructor(s): Staff.

AS.030.570. Research.
Instructor(s): Staff.

AS.030.574. Chemistry Internship.

AS.030.575. Research for Physical Chemistry.
Instructor(s): D. Fairbrother.

AS.030.592. Research-Inorganic Chemistry I.
Instructor(s): G. Meyer; M. Greenberg.

AS.030.593. Research-Organic Chemistry I.
Instructor(s): M. Greenberg; T. Lectka.

AS.030.597. Research-Summer.
Instructor(s): Staff.

An introduction to statistical mechanics of cooperative phenomena using lattice gases and polymers as the main models. Covered topics: phase transitions and critical phenomena, scaling laws, and the use of statistical mechanics to describe time dependent phenomena.
Instructor(s): D. Yarkony.

AS.030.610. Chemical Kinetics.
The molecular mechanism of elementary physical and chemical rate processes will be studied. Topics such as elastic scattering, collisional vibrational and rotational energy transfer, chemically reactive collisions, and the theory of unimolecular decay will be covered.
Instructor(s): K. Bowen.

AS.030.612. Nucleic Acids Chemistry.
A survey of physical properties of DNA and RNA. Areas explored: conformations of secondary and tertiary structures, polyelectrolyte properties, folding and unfolding reactions, and recognition by small molecules and proteins.
Instructor(s): D. Draper.

AS.030.613. Chemistry-Biology Interface Program Forum I.
Chemistry-Biology Interface (CBI) program students and faculty will meet weekly in a forum that will host presentations from CBI faculty and students as well as invited guest speakers. These meetings will serve as a valuable opportunity for students to develop presentation skills and interact with CBI students and faculty. Enrollment is required for first- and second-year CBI students, and is recommended for advanced-year graduate students.
Instructor(s): S. Rokita.

AS.030.614. Chemical-Biology Program Interface Forum II.
Chemistry-Biology Interface (CBI) program students and faculty will meet weekly in a forum that will host presentations from CBI faculty and students as well as invited guest speakers. These meetings will serve as a valuable opportunity for students to develop presentation skills and interact with CBI students and faculty. Enrollment is required for first- and second-year CBI students, and is recommended for advanced-year graduate students.
Instructor(s): S. Rokita.

AS.030.615. Special Topics in BioInorganic Chemistry.
Instructor(s): D. Goldberg.

AS.030.617. Special Topics in Inorganic Chemistry.
Topics from the recent primary literature in inorganic chemistry will be discussed, via instructor lectures and presentations by the graduate-undergraduate students enrolled in the course. Topics covered may range from bioinorganic to organometallic to environmental inorganic chemistry.
Instructor(s): K. Karlin.
AS.030.619. Chemical Biology I.
Parts I and II constitute the core course of the Chemistry-Biology Interface (CBI) Program. An introduction to the structure, synthesis, reactivity, and function of biological macromolecules (proteins, nucleic acids, carbohydrates, and lipids) will be provided using the principles of organic and inorganic chemistry. Discussion will incorporate a broad survey of molecular recognition and mechanistic considerations, and introduce the tools of molecular and cellular biology that are utilized in research at the interface of chemistry with biology and medicine. Recommended Course Background: AS.030.206 or equivalent. Instructor(s): S. Rokita.

AS.030.620. Chemical Biology II.
Selected topics of current importance in chemical biology are covered. They include protein engineering and proteomics, cell signaling, protein-nucleic acid interactions (e.g. replication, transcription, DNA repair), catalytic RNA and the ribosome, biosynthesis of natural products, mechanisms of drug action, combinatorial chemistry and chemical genetics, and in vitro selection. Recommended Course Background: AS.030.619 or permission required. Instructor(s): S. Rokita.

AS.030.621. Literature-Organic Chemistry.
Instructor(s): J. Tovar.

AS.030.622. Seminar: Literature of Chemistry.
Seminars are presented by advanced graduate students on topics from current chemical journals. Most first-year graduate students are expected to attend for credit. Undergraduates may take the course on a satisfactory/unsatisfactory basis. Instructor(s): J. Tovar.

AS.030.625. Advanced Mechanistic Organic Chemistry I.
The course covers the application of techniques in physical chemistry to the study of organic reaction mechanisms. Topics include chemical bonding and structure, stereochemistry, conformational effects, molecular orbital theory, methods to determine reaction mechanisms, reactive intermediates, and photochemistry. Recommended Course Background: AS.030.205-AS.030.206 Instructor(s): M. Greenberg.

AS.030.626. Advanced Mechanistic Organic Chemistry II.
This course covers advanced organic reactions and their mechanisms. Emphasis is given both to methods of postulating mechanisms for rationalizing reaction results and to the use of mechanistic thinking for designing reactions and reagents. This course is intended to be taken in sequence with AS.030.425. Recommended Course Background: AS.030.205-AS.030.206 Instructor(s): J. Tovar.

AS.030.634. Topics in Bioorganic Chemistry II.
Selected topics in modern bioorganic chemistry will be treated in greater depth emphasizing natural products chemistry, biosynthetic reaction mechanisms and drug design. Carbohydrates, lipids, polyketides, polypeptides, terpenes and alkaloids will be discussed. Specific examples of drug design will be introduced throughout and methods of synthesis, combinatorial synthesis and genetics will be described. Instructor(s): C. Townsend.

AS.030.635. Mthds Nuc Mag/Resonance.
Instructor(s): J. Tolman.

AS.030.640. Practical NMR: Basic Techniques.
Mandatory for individuals (postdocs, graduate, and undergraduate students) intending to utilize NMR facilities in the Chemistry Department. Sessions will be held at the Bruker NMR spectrometers used most frequently for routine NMR data collection. Focus is on setting up instrument parameters, obtaining useful spectra, and data processing. Proton, C-13, F-19 and P-31 acquisition will be demonstrated along with preparation and handling of samples, troubleshooting and recognition of artifacts. Instructor(s): Staff Area: Natural Sciences.

AS.030.652. A Theoretical and Experimental Approadh to X-ray Crystallography.
The X-ray course will provide a complete approach to X-ray structure to determination (mostly concerned with small molecules) and its uses in Chemistry. The first segment of this course will cover all theoretical aspects of X-ray crystallography, i.e. crystals and crystallixtation, the nature of X-rays, the diffraction phenomenon of X-rays by crystals, symmetry and space groups, crystal structure analysis. Additionally, the course will provide laboratory experience for the students, involving hands-on instrumentation, experimental methodology to X-ray structure determination, structure solution/refinement, data analyses and publishing data. The course is aimed for graduate students with a strong interest in organic/inorganic chemistry, materials sciences, and physics. Undergraduate students with a major in chemistry are also encouraged to participate. Instructor(s): M. Siegler Area: Natural Sciences.

AS.030.677. Advanced Organic Synthesis I.
The reactions and principles involved in the synthesis of simple and complex organic compounds. Discussion of famous natural product syntheses and practice in developing rational designs for organic syntheses. Problems in the design of syntheses and in the use of chemical literature. Instructor(s): R. Klausen.

AS.030.678. Advanced Organic Synthesis II.
Advanced discussion of organic stereochemistry & its application to problems in asymmetric reactions and catalysis will be presented. Emphasis will be placed on the latest reports in the literature, especially with respect to the development of new catalytic, asymmetric processes. Instructor(s): T. Lectka.

Instructor(s): M. Greenberg.

AS.030.690. Intermediate Computational Chemistry.
Instructor(s): D. Yarkony.
The course is designed to provide the essential principles and concepts underlying the modern study of the structure and properties of solids in bulk crystals, thin films, and nanoscale objects. Topics include basic crystallography, structure determination by x-ray, neutron, and electron diffraction, fundamental concepts of bonding in solids, lattice dynamics, electronic band structure, magnetism, and strongly correlated electron behavior. Particular emphasis is placed on the impact of the structure, dimensionality, and electron count on electrical and magnetic properties (electric conduction, superconductivity, thermoelectricity, etc.). More course info available at <a href="http://occamy.chemistry.jhu.edu">http://occamy.chemistry.jhu.edu</a>. Cross-listed with Physics and Astronomy
Instructor(s): T. Mcqueen.

In this course we will survey common time-resolved spectroscopic methods used to interrogate the dynamic and static properties of chemical systems. We will explore theoretical treatments both of key molecular processes (e.g. radiative and non-radiative transitions, solvation, coherence dephasing) and the spectroscopic tools used to interrogate them. Furthermore, we will survey the technical developments that are now allowing us to capture events that occur on ever faster timescales (currently down to the attosecond regime) and across the electromagnetic spectrum (from X-rays to Terahertz). Previous or concurrent concentrated study of Quantum Mechanics (graduate level or from a physics course) would be helpful, but not strictly required. Recommended Course Background: AS.030.301-AS.030.302
Instructor(s): A. Bragg.

AS.030.801. Independent Study.
Instructor(s): Staff.

Open to AS Chemistry Graduate Students only.
Instructor(s): Staff.

Cross Listed Courses

Biophysics

NMR is a spectroscopic technique which provides unique, atomic level insights into the inner workings of biomolecules in aqueous solution. A wide variety of biophysical properties can be studied by NMR. For example, we can use the technique to determine three dimensional structure of biological macromolecules such as proteins and nucleic acids, probe their dynamical properties in solution, study their interaction with other molecules and understand how physico-chemical properties (such electrostatics and redox chemistry) affects and modulates structure-function relationships. NMR exploits the exquisite sensitivity of magnetic properties of atomic nuclei to their local electronic (and therefore, chemical) environment. As a result, biophysical properties can be studied at atomic resolution. That is to say, we can deconstruct global properties of a molecule in terms of detailed, atomic level information. In addition, interactions between nuclei can be exploited to enhance the information content of NMR spectra via multi-dimensional (2D and 3D) spectroscopy. Since these properties can be studied in solution, NMR methods serve as an effective complement to X-Ray crystallography, which also provides detailed, atomic level information in the solid state. In this course, we will learn about the basics of NMR spectroscopy, acquire 1D and 2D NMR spectra and use various NMR experiments to characterize and probe biophysical properties of proteins at an atomic level. Juniors and Seniors Only.
Prerequisites: ( AS.030.101 AND AS.030.105 ) AND ( AS.030.205 ) AND ( AS.030.370 OR AS.250.372) AND ( AS.030.315 OR AS.250.315)
Instructor(s): A. Majumdar.

Classics

http://classics.jhu.edu
The discipline of Classics has played a central role in the teaching and research missions of Johns Hopkins University from the time of its foundation. Basil Lanneau Gildersleeve, a professor of Greek, was the first professor appointed by the board of trustees, and thus became the very first faculty member (aside from the founding president, Daniel Coit Gilman) in the University. Gildersleeve and his colleagues organized the first modern departments of Greek and Latin—departments with an innovative structure based on the German seminar system, which encouraged a fusion of teaching and research. This “seminar” was in time widely adopted by other North American universities, and to this day remains at the core of the research university.

Today, the Classics Department seeks to maintain and enhance its tradition of leadership and innovation. Members of the current faculty are highly interdisciplinary, combining philological, historical, iconographical, and comparative methods in the study of the cultures, broadly conceived, of ancient Greece and Rome. The undergraduate and the graduate programs, leading to B.A., M.A., and Ph.D. degrees, reflect these emphases. Requiring rigorous study of the ancient languages and literatures, ancient history, and Greek and Roman art and archaeology, these programs aim to produce broad, versatile scholars who have a holistic view of the ancient cultures and of the evidence by which those cultures are comprehended.
Facilities
The department’s main scholarly resource is the Milton S. Eisenhower Library, which has broad and deep holdings in the various fields of classical antiquity. The department also has a significant collection of Greek, Roman, and Etruscan antiquities, housed in the Johns Hopkins Archaeological Museum (shared with Near Eastern Studies). Additionally, the department enjoys close ties with several local and regional institutions whose missions include the study of the ancient world: the Walters Art Museum, with its world-class collection of antiquities and manuscripts; the Baltimore Museum of Art, with its Roman mosaics; and the Center for Hellenic Studies in Washington, D.C. Finally, the department is a member of the American School of Classical Studies at Athens, the American Academy in Rome, and the Intercollegiate Center for Classical Studies at Rome.

The department offers undergraduate courses in Greek and Latin languages and literature, ancient history, classical art and archaeology, Greek and Roman civilizations, history of sexuality and gender, ancient philosophy, mythology, and anthropological approaches to the classics. These courses are open to all students in the university, regardless of their academic year or major field of interest.

Requirements for the B.A. Degree
(See also Requirements for a Bachelor’s Degree (p. 20).)

The B.A. program in classics is highly flexible, accommodating a variety of interests in and approaches to the ancient world. Possible areas of emphasis include language and literature, ancient philosophy, art and archaeology, and ancient history.

Classics Major
Certain courses taken in other departments may count toward the major, with the approval of the director of undergraduate studies (DUS). Advanced undergraduates may participate in graduate seminars, with the approval of the DUS and the professor. With assistance from their faculty advisors, students are required to build an intellectually substantial and coherent curriculum and must take all courses for a letter grade and earn a C or better in major requirements. Students are strongly encouraged to complete a course in ancient Greek civilization (usually AS.040.111 (p. 159)) and a course in Roman civilization (usually AS.040.112 (p. 159) or AS.040.104 (p. 159)).

Students intending to pursue graduate study in classics will need to do substantially more work in Greek and Latin than what the major minimally requires: most graduate programs expect successful applicants to have studied one language for at least three years and the other for at least two. Therefore, students interested in graduate work should be engaged in a language-intensive curriculum by the end of the sophomore year.

The Classics Department awards the Evangelia Davos Prize each year to the classics major or minor whose work in Greek studies is outstanding.

Honors Program in Classics
Under this program, senior classics majors have the opportunity to write an honors thesis in close consultation with a faculty member. This work of guided research and writing counts for three credits and is outside the requirements of the major. This program awards a B.A. with honors.

Study Abroad
The Department of Classics is a member of the Intercollegiate Center for Classical Studies in Rome and can provide information on other year-long, semester-long, or summer programs in Greece and Italy (e.g., the College Year in Athens and the summer session of the American School of Classical Studies at Athens). Interested students, especially classics majors and minors, are encouraged to consider these options for studying overseas.

Classics Minor
The requirements for the minor in classics are extremely flexible. Courses are selected, in consultation with the DUS, to meet the needs and interests of the student. Minors may wish to pursue the study of one ancient language, or create a curriculum that meshes with their other academic pursuits. All courses must be taken for letter grades and receive a grade of C or higher.

B.A./M.A. Degree
The department offers a masters degree for current Hopkins undergraduate students and details may be found on the Graduate tab.

Requirements for the B.A./M.A. Degree
Admission to the B.A./M.A. program is restricted to current Johns Hopkins University undergraduate classics majors and is based on outstanding performance in previous Classics courses.

Students considering a five-year program are expected to declare their interest during the spring semester of their junior year. Prior to application, students must consult with the Director of Undergraduate Studies, their faculty advisor, and the department administrator. A formal graduate application must be submitted no later than November 15 of the fall semester of the senior year in order to be admitted to the program in the spring of the senior year, thus meeting the requirement for concurrent status. In the students’ senior (fourth) year, they are to devise a program that would best prepare them to do advanced work in their final (fifth) year, in particular addressing any weakness in one or the other classical language. The student is to complete the requirements for the B.A. language. The student is to complete the requirements for the B.A.in their fourth year. For the M.A. the following additional work is required:
Two graduate seminars in the Classics Department
A thesis of 20,000 to 25,000 words representing original research.
The thesis will be supervised by a member of the Classics Department faculty and graded by the supervisor and a second reader from Classics or an outside department.

Exceptionally well-prepared students may apply for the B.A./M.A. program, with prior approval from the DUS and the Department Chair, in the spring of their junior year. In this case it is possible to complete the bachelor's/master's degree in four years. These students are expected to express their interest to the department by the fall term of their junior year; the application deadline is March 15 of the spring semester of the junior year.

The B.A. and M.A. degrees are conferred concurrently at the end of the M.A. year. Please note that the department does not award degrees during the summer; students are expected to complete the degree requirements in conformance with the university Graduate Board spring deadlines. Specific departmental and Graduate Board deadlines are communicated to the student in due course.

Requirements for the Ph.D. Degree
To receive a Ph.D. in classics from Johns Hopkins University, students must complete successfully a range of seminar work and examinations, and then write a substantial dissertation. The Graduate Program in Classics is designed to be completed in five years, of which the first three are dedicated to seminar work and examinations, and the last two to the dissertation. Assuming satisfactory progress toward the Ph.D., all students admitted to the program receive five years of living expenses and tuition remission, in order to make it possible to complete the program in a timely manner. This support takes the form of a fellowship for the first two years, and teaching for at least two of the remaining years. The department is also able to offer teaching opportunities in the summer, as well as funded summer travel for program-related purposes. All students, upon reaching dissertation level, are encouraged to apply for outside funding to spend a year abroad. If outside funding is obtained, the Johns Hopkins fellowship may be held in reserve for an additional year. A detailed outline of the Ph.D. program, including a prospectus of all seminars and exams, can be found on the Classics Department website (http://classics.jhu.edu).

Application information may be obtained from the chair, Department of Classics, The Johns Hopkins University, 113 Gilman Hall, 3400 North Charles Street, Baltimore, MD 21218. Telephone: 410-516-7556; Fax: 410-516-4848; email: classics@jhu.edu. The application deadline is on or about January 15. For the precise date, please refer to the Graduate Admissions website (http://grad.jhu.edu).

For current faculty and contact information go to http://classics.jhu.edu/people/

Faculty
Chair
Christopher S. Celenza
Charles Homer Haskins Professor (Classics and German and Romance Languages and Literatures): Renaissance Latin, paleography, history of classical tradition.

Professors
Shane Butler

Professor: Latin literature (Ancient, Medieval, Renaissance), media history and theory, classical reception.

Silvia Montiglio
Basil L. Gildersleeve Professor of Classics (Director of Graduate Studies): Greek literature and culture, the ancient novel and narrative, philosophy.

Matthew Roller
Professor: Latin literature, Roman social and cultural history, Roman material culture, Graeco-Roman philosophy.

Associate Professor
Dimitrios Yatromanolakis
Associate Professor (Anthropology, Humanities Center): Greek literature, Greek social and cultural history, theory and anthropology of Greek music, papyrology, epigraphy, performance cultures of Greece and Rome.

Assistant Professor
Joshua M. Smith
Assistant Professor (Director of Undergraduate Studies): Greek language and literature, ancient scholarship, history of literary criticism.

Senior Lecturer
Emily Anderson
Senior Lecturer (Classics and History of Art): Aegean Bronze Age art and archaeology, material culture, sociocultural interaction, identity, glyptic.

Professors Emeriti
Marcel Detienne
Basil L. Gildersleeve Professor of Classics Emeritus: Greek, social history, cultural history, mythology, anthropology and classics.

H. Alan Shapiro
Academy Professor and W. H. Collins Vickers Professor of Archaeology Emeritus: Greek and Roman art and archaeology, Greek mythology and religion.

Joint Appointments
Richard Bett
Professor (Philosophy): ancient philosophy, ethics.

Pier Luigi Tucci
Assistant Professor (History of Art): Roman art and architecture.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses
AS.040.103. The Roman Empire. 3 Credits.
This introductory course examines the history, society, and culture of the Roman state in the Imperial age (ca. 31 BCE-ca. 500 CE), during which it underwent a traumatic transition from an oligarchic to a monarchical form of government, attained its greatest territorial expanse, produced its most famous art, architecture, and literature, experienced vast cultural and religious changes, and finally was transformed into an entirely different ("late antique") form of society. All readings in English. Instructor(s): M. Roller
Area: Humanities.
AS.040.104. The Roman Republic: History, Culture, and Afterlife.
This introductory level course examines the history, society, and culture of the Roman state in the Republican period (509-31 BCE), during which it expanded from small city-state to a Mediterranean empire. We also consider the Republic’s importance for the later phase of Western society, notably the American and French revolutions. All readings in English.
Instructor(s): M. Roller
Area: Humanities.

AS.040.105. Elementary Ancient Greek.
This course provides a comprehensive, intensive introduction to the study of ancient Greek. During the first semester, the focus will be on morphology and vocabulary. Credit is given only upon completion of a year’s work. Cannot be taken Satisfactory/Unsatisfactory.
Instructor(s): J. Lamont.
Area: Humanities.

AS.040.106. Elementary Latin.
Course provides comprehensive, intensive introduction to the study of Latin for new students, as well as a systematic review for those students with a background in Latin. Emphasis during the first semester will be on morphology and vocabulary; the second semester’s emphasis is syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Instructor(s): D. Yatromanolakis.

This course provides a comprehensive, intensive introduction to the study of Latin for new students, as well as a systematic review for those students with a background in Latin. Emphasis during the first semester will be on morphology and vocabulary; the second semester’s emphasis is syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Instructor(s): A. Smith; J. Smith.

AS.040.108. Elementary Latin.
Course provides comprehensive, intensive introduction to the study of Latin for new students as well as systematic review for students with background in Latin. Emphasis during the first semester will be on morphology and vocabulary; the second semester’s emphasis is on syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Instructor(s): Staff
Area: Humanities.

AS.040.111. Ancient Greek Civilization: Society, Archaeology, Literature, Philosophy.
The course will introduce students to major aspects of the ancient Greek civilization, with special emphasis placed upon culture, society, archaeology, literature, and philosophy.
Instructor(s): J. Smith
Area: Humanities.

AS.040.119. The World of Pompeii.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.

AS.040.121. Ancient Greek Mythology: Art, Narratives, and Modern Mythmaking.
Focuses on major and often intricate myths and mythical patterns of thought as they are reflected in compelling ancient visual and textual narratives. Being one of the greatest treasure troves of the ancient world, these myths will further be considered in light of their rich reception in the medieval and modern world (including their reception in the modern fields of anthropology and philosophy).
Instructor(s): D. Yatromanolakis
Area: Humanities.

At the peak of its power, the Roman empire extended from Scotland to Syria, incorporating numerous cultures, attitudes, and lifestyles. This course examines Roman social practices, political institutions, and religion from the empire’s humble beginnings through its final period, using a wide variety of materials including drama, poetry, history, and oratory. This course may not be taken S/U. This course meets Hopkins’ requirements for a major in classics.
Instructor(s): M. Mueller
Area: Humanities.

AS.040.136. One Nation, Under Gods?.
The course will focus on the phenomena and institutions that emerged in Greece after the fall of the Mycenaean culture, which eliminated its political and religious systems. Eventually, powerful development began taking place. The polis - the city-state - was born, and from it emerged both a unique colonization movement that spread all over Europe, Asia and Africa; and a new religious system, in which the gods belong to the polis, not to the aristocracy.
Instructor(s): S. Stern
Area: Humanities.

AS.040.121. Ancient Greek Mythology: Art, Narratives, and Modern Mythmaking.
Focuses on major and often intricate myths and mythical patterns of thought as they are reflected in compelling ancient visual and textual narratives. Being one of the greatest treasure troves of the ancient world, these myths will further be considered in light of their rich reception in the medieval and modern world (including their reception in the modern fields of anthropology and philosophy).
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.133. Heroes: the Ancient Greek Way.
The purpose of this course is to introduce students to Ancient Greek literature by reading and discussing its most important and famous texts, from the Iliad and the Odyssey to tragedy to philosophy. Knowledge of Greek is not required.
Instructor(s): S. Montiglio
Area: Humanities.

Greek myths fascinate us as adventurous narratives, yet they always sound enigmatic and require interpretation. This course will combine the pleasure of reading stories and the concern for their understanding. Readings in ancient and modern texts. The course may not be taken S/U. This course meets Hopkins’ requirements for a major in classics.
Instructor(s): D. Piana
Area: Humanities.

At the peak of its power, the Roman empire extended from Scotland to Syria, incorporating numerous cultures, attitudes, and lifestyles. This course examines Roman social practices, political institutions, and religion from the empire’s humble beginnings through its final period, using a wide variety of materials including drama, poetry, history, and oratory. This course may not be taken S/U. This course meets Hopkins’ requirements for a major in classics.
Instructor(s): M. Mueller
Area: Humanities.

AS.040.136. One Nation, Under Gods?.
The course will focus on the phenomena and institutions that emerged in Greece after the fall of the Mycenaean culture, which eliminated its political and religious systems. Eventually, powerful development began taking place. The polis - the city-state - was born, and from it emerged both a unique colonization movement that spread all over Europe, Asia and Africa; and a new religious system, in which the gods belong to the polis, not to the aristocracy.
Instructor(s): S. Stern
Area: Humanities.

This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influence one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities.
AS.040.139. Great Greek Battles.
From the Trojan War to the conquests of Alexander the Great, ancient Greek warfare shaped our perception and understanding of antiquity. Using literary, artistic, and archaeological sources, this course will explore how these wars and battles were fought and who fought them. Additionally, we will examine the modern reception of these battles through cinematography and see how they were perceived and presented in recent years.
Instructor(s): S. Stern
Area: Humanities.

AS.040.140. Gender and Sexuality in Early Greece and the Eastern Mediterranean.
In this course we will explore evidence and interpretations of gender and sexuality in the region of the Aegean and eastern Mediterranean during the third and second millennia BCE. Material investigated will include the “snake goddess” figures from Minoan Crete, anthropomorphous figurines from the Cyclades and Cyprus, wall paintings, etc. In each case we will consider the history of interpretation as well as investigate the objects’ archaeological and sociocultural contexts. Discussion topics will include representational ambiguity, the specific materialities of objects, and their possible roles in activities construing gender. The course will incorporate material from the JHU Archaeological Museum. Cross-listed with Women, Gender, and Sexuality Program.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.141. The Art of Victory in Greece.
This course examines the importance of competition and victory to Greek society. What did victory mean? How did the Greeks remember and commemorate victories? Ancient athletics and warfare shared a lot in common given the competitive zero-sum nature of winning. We shall, therefore, consider athletics and warfare in tandem in our inquiry into victory.
Instructor(s): T. Smith
Area: Humanities, Social and Behavioral Sciences.

Since the invention of cinema, the ancient world has been an important vehicle for both lavish visual spectacles and the exploration of contemporary social issues. This course analyzes the depiction of the infamous figures of the late republic in both ancient sources and modern media, to examine how ancient Rome and contemporary America have used these characters to contemplate race, class, gender, and imperialism.
Instructor(s): G. Gessert
Area: Humanities.

From the battles of the Trojan War to the love affairs among the gods and mortals, the ancient Greeks and Romans depicted their favorite mythological episodes through visual representations. In this course, we will explore mythology through the medium of ancient art. We will use the iconography to investigate the significance of the ancient myths, which will be read in translation. Additionally, we will visit the Walters to examine the collection of mythological images in art.
Instructor(s): A. Tabeling
Area: Humanities.

AS.040.146. Classics and Comics: Ancient Writers and Modern Visual Culture, 3 Credits.
Course analyzing the adaptation of ancient Greek and Roman literature and visual culture in modern comic books, graphic novels, and manga.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.148. Ancient Israel and Ancient Greece in Opera and on Film, 3 Credits.
Some of the most breathtaking (early and later) operas and films have been in intense dialogue with ancient societies, narratives, and cultural concepts. Contemporary hit movies center on diverse aspects of ancient narratives: the beginning of the world, violent wars, politics, erotic themes, and intricate existential questions. The course will introduce students to a comparative examination of the variety of approaches to ancient Israel and ancient Greece in the spectacular worlds of opera and cinema. The course will focus on major texts and archaeological material related to antiquity; works of world cinema will be analyzed.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.149. Mystery Cults in the Graeco-Roman World.
Often characterized by secret initiation rites, ancient mystery cults shaped the religious landscape of ancient Greece and Rome. In this course, we will explore a selection of ancient mystery religions, including but not limited to the cults of Isis, Dionysus, and Demeter. Through an exploration of literary and archaeological sources crowned by a visit to the Walters Art Museum, we will try to unravel the social and cultural implications of these fascinating, yet “mysterious,” facets of ancient religion.
Instructor(s): M. Asuni
Area: Humanities, Social and Behavioral Sciences.

AS.040.150. Island Archeology: Land and Sea in Ancient Crete, Cyprus and the Cyclades.
Islands present highly distinctive contexts for social life. We examine three island worlds of the ancient eastern Mediterranean. These are places where water had a unique and powerful meaning and boat travel was part of daily life, where palaces flourished and contact with other societies implied voyages of great distance. Class combines close study of material and visual culture with consideration of island-specific interpretive paradigms; trips to Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.152. Medical Terminology.
This course investigates the Greek and Latin roots of modern medical terminology, with additional focus on the history of ancient medicine and its role in the development of that terminology.
Instructor(s): J. Smith
Area: Humanities.
AS.040.160. Special Opportunities in Undergraduate Learning: Constructing an Empire: An Introduction to the Art & Archaeology of Ancient Rome.  
Have you ever imagined what it would be like to stroll down the colonnaded streets of ancient Rome, visiting the monuments, palaces and temples of the ancient gods? Have you ever wondered what the luxurious villas looked like from within, or what it would be like to attend a play in an ancient theatre or the gladiatorial games in the Colosseum? This course is designed to introduce students to the material culture of the ancient Roman world by exploring the architecture, sculpture, painting, and mosaics of Rome and its environs. We will also take a field trip to the gallery of Roman art in the Walters Art Museum in order to better understand the Roman Empire through the visual arts.  
Instructor(s): A. Tabeling.

AS.040.201. Digging Up the Gods: The Archaeology of Roman Sanctuaries.  
This course will explore the major sites of Ancient Italy, such as Rome, Ostia, and Pompeii, from temples to dedications, and their role in religion and society. Cross-listed with History of Art.  
Instructor(s): G. Gessert  
Area: Humanities.

AS.040.205. Intermediate Ancient Greek.  
Reading ability in classical Greek is developed through a study of various authors.  
Prerequisites: AS.040.105 AND AS.040.106 OR Equivalent  
Instructor(s): D. Yatromanolakis  
Area: Humanities.

Reading ability in classical Greek is developed through a study of various authors, primarily Plato (fall) and Homer (spring).  
Recommended Course Background: AS.040.105-AS.040.106 or equivalent.  
Instructor(s): S. Montiglio  
Area: Humanities.

AS.040.207. Intermediate Latin.  
Although emphasis is still placed on development of rapid comprehension, readings and discussions introduce student to study of Latin literature, principally through texts of various authors.  
Prerequisites: AS.040.107 AND AS.040.108 OR Equivalent  
Instructor(s): D. Yatromanolakis  
Area: Humanities.

AS.040.208. Intermediate Latin.  
Reading ability in Latin is developed through the study of various authors, primarily Cicero (fall) and Vergil (spring).  
Recommended Course Background: AS.040.107-AS.040.108 or equivalent.  
Instructor(s): D. Yatromanolakis  
Area: Humanities.

AS.040.212. Mystery Religions of the Ancient World.  
This course surveys the mystery religions of the ancient Greek and Roman worlds. With a focus on literature and iconography, we will explore the impact of gods such as Dionysus and Mithras, the workings of cults such as the Eleusinian Mysteries, and the force of cross-cultural religious interactions between Greece, Rome, Egypt, and the Near East. We will also visit the Walters Art Museum to view their collection of objects related to ancient mystery cult.  
Instructor(s): J. Clements  
Area: Humanities.

AS.040.218. Celebration and Performance in Early Greece.  
Surviving imagery suggests that persons in Minoan and Mycenaean societies engaged in various celebratory performances, including processions, feasts, and ecstatic dance. This course explores archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.  
Instructor(s): E. Anderson  
Area: Humanities.

AS.040.221. Art and Archaeology of Early Greece.  
This course explores the origins and rise of Greek civilization from the Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing on major archaeological sites, sanctuaries, material culture, and artistic production.  
Instructor(s): E. Anderson  
Area: Humanities.

AS.040.224. Retelling the Ancient Story.  
This course explores the relations between ancient stories/conventions and their modern counterparts on the screen and stage. Students will examine these similarities and disparities from the perspective of the author/playwright/filmmaker. By the end of the course, they will create an original film or performance piece, to be presented to the public.  
Instructor(s): R. Powers  
Area: Humanities.

AS.040.226. Magic, Witchcraft & the Occult in Greco-Roman Antiquity.  
Have you ever wondered how to cast a love spell, rig a race, or bind your enemy’s tongue in court? This course explores the evidence for magic, witchcraft and the occult in Greco-Roman antiquity. Topics covered include theoretical approaches to magic, magical objects (like curse tablets, voodoo dolls, and amulets), practitioners of magic (witches and sorcerers), magical spells, and charms.  
Instructor(s): J. Lamont  
Area: Humanities.

AS.040.228. Ancient Epic and the American Western.  
This course explores two surprisingly similar modes of discourse: the epic poem and the American Western film. Despite the chronological distance between the two, they have much in common: both can be seen as defining (or questioning) cultural identity and addressing questions about the nature of heroism, masculinity, and violence. In this course, students will encounter several epics and Westerns, and will be asked to reflect critically on their aims and methods.  
Instructor(s): N. Kauffman  
Area: Humanities.

AS.040.229. Victory and Defeat in Ancient Rome.  
The Romans are known for their success at war which made it possible to build an empire. This course will explore two aspects of this success story: victory and defeat. Dean’s Teaching Fellowship course.  
Instructor(s): E. Campbell  
Area: Humanities.

AS.040.231. Sanctuaries & Sacred Space in Ancient Greece.  
This course surveys the origins, history, structure, and evolution of sacred spaces and sanctuaries in ancient Greece, from Mycenaean to Hellenistic times. What makes a space sacred, and how can loci of worship (caves, shrines, temples, sanctuaries) impact worshippers? In addition to sacred architecture, attention will be given to ritual, sacrifice, landscape, and larger issues such as Greek anthropomorphism and polytheism, the power of religion as collective memory, and the sociopolitical role of religion in the public and private spheres.  
Area: Humanities.
Islands present highly distinctive contexts for social life. We examine three island worlds of the third and second millennia BCE through their archaeological remains, each with its particularities. These are places where water had a unique and powerful meaning, where boat travel was part of daily life, where palaces flourished and where contact with other societies implied voyages of great distance across the sea. Class combines close study of material culture and consideration of island-specific interpretive paradigms; students work with artifacts in the JHU Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.233. The Ancient Greek and Roman Novels.
The ancient Greeks are credited with inventing democracy, philosophy, drama, and science. They also invented the novel. In this class, we will read a large sample of Greek and Roman novels: stories of love, adventures, and magic.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.236. From Apollo to Dionysus: Ritual, Performance, and the Genesis of Tragedy.
This course explores the origins and development of what is often regarded as the most exemplary form of western art—Classical Athenian Tragedy. Focusing on the ritual, performative, and civic contexts of Greek song culture, it ultimately seeks to pose the question “what makes Athens unique?”. To this end, the courses is centered on an exploration of texts in tandem with material culture (monumental architecture, temples, dedications, statuary, vase painting). Issues of identity, religion, politics, and athletics will be discussed. Dean’s Teaching Fellowship course.
Prerequisites: Prereq: AS.040.111
Instructor(s): T. Smith
Area: Humanities.

AS.040.305. Advanced Ancient Greek.
Reading of prose or verse authors, depending on the needs of students. (Same as AS.040.705) Recommended Course Background: AS.040.205-AS.040.206 or equivalent.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.306. Advanced Ancient Greek.
Reading of prose or verse authors, depending on the needs of students. Recommended Course Background: AS.040.205-AS.040.206 or equivalent. Co-listed with AS.040.702.
Instructor(s): S. Montiglio
Area: Humanities.

This course aims to increase proficiency and improve comprehension of the Latin language. Intensive reading of Latin texts, with attention to grammar, idiom, translation, etc. Specific offerings vary. Recommended Course Background: AS.040.207-AS.040.208 or equivalent. Co-listed with AS.040.707.
Instructor(s): M. Butler
Area: Humanities.

The aim of this course is to increase proficiency and improve comprehension of the Latin language. Intensive reading of Latin texts, with close attention to matters of grammar, idiom, and translation. (Same as AS.040.710)
Prerequisites: AS.040.207 AND AS.040.208 OR Equivalent
Instructor(s): M. Roller
Area: Humanities.

AS.040.320. Myth In Classical Art.
This course traces the representation of the principal gods and heroes of Greek myth in the visual arts (sculpture and vase-painting), as well as later reflections in Roman painting.
Instructor(s): A. Shapiro
Area: Humanities.

Including the vocabulary of sciences and technology, about 90 percent of all English words have Greek or Latin roots. This course will explore the linguistic and historical connections between English and its classical origins. By studying the Latin roots of English, you will consolidate and expand your vocabulary, while also learning crucial skills to tackle the verbal section of most common standardized tests.
Instructor(s): D. Piana
Area: Humanities, Natural Sciences.

AS.040.353. Classical Etymologies.
Including the vocabulary of science and technology, about 90 percent of all English words have Greek or Latin roots. This course will explore the connections between English and its classical origins. By analyzing English terms derived from Greek and Latin, you will consolidate and expand your vocabulary.
Instructor(s): D. Piana
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

AS.040.358. The Foundations of Literary Criticism.
In addition to giving us some of our earliest and greatest literary works, the ancient Greeks and Romans have done much to condition how we conceive of the very idea of literature. This course will introduce students to the critical thought of the classical world, revealing what authors such as Plato, Aristotle, and Horace had to say about the nature and purposes, as well as the delights and dangers, of what we now call literature.
Instructor(s): N. Kauffman
Area: Humanities.

This course explores the dynamic work and social roles of craftpersons in early Greece, the eastern Mediterranean and Near East. Readings and discussion will query the identities and contributions of these people—travelers, captives, lauded masters, and even children—through topics including gender, class, and ethnicity. Special focus on late third-early first millennia BCE; local field trips.
Instructor(s): E. Anderson
Area: Humanities.
AS.040.364. Sign, Image, and Art in Ancient Greece.
It is often taken for granted that much of what we consider central to Western civilization has its origins in ancient Greece. What do we owe the Greeks for concepts like art, representation, and even image? Did ancient Greeks see their own artwork the same way we see it today? In this course we will explore how the Ancient Greeks conceptualized their visual world and how it changed over time, focusing on the Archaic and Classical periods.
Instructor(s): R. Brendle
Area: Humanities.

AS.040.365. The Emperor Nero: Life and Afterlives.
From his lavish Domus Aurea and famed theatrical performances to his suicide, condemnation, and alleged fiddling while Rome burned, Nero is often remembered as a stereotype of imperial excess. Through literary, artistic, and archaeological sources, this course examines Nero's varied reputations during his historical reign, the civil wars following his death, and the next dynasty's re-workings of his image, as well as later depictions in historical and popular culture. Possible Walters Art Museum visit.
Instructor(s): L. Garofalo
Area: Humanities.

This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.367. Memory and Oblivion: Rewriting the Past in Ancient Rome.
This course examines concepts of memory and forgetting through Roman memory sanctions, which aimed to revise or even erase the past. Textual, archaeological, and iconographical sources will be considered. Dean's Teaching Fellowship course.
Instructor(s): L. Garofalo
Area: Humanities.

This course explores the achievements and conflicting interactions of Athens, Persia, and Sparta during the 5th century BC, a period whose cultural richness lies at the roots of Western Civilization.
Instructor(s): J. Lamont
Area: Humanities.

AS.040.370. Ovid and the Consequences.
Beginning with close study of the poem itself, this course will examine the unequalled influence of Ovid's Metamorphoses on subsequent literature and art, including theater and film.
Instructor(s): M. Butler
Area: Humanities.

AS.040.410. Junior-Senior Capstone: Food and Dining in the Ancient World. 3 Credits.
This junior-senior capstone course examines the culture of food and drink, and its associated social practices and values, in the ancient Greek and Roman worlds. The evidence examined will include texts, images, and archaeological remains.
Instructor(s): M. Roller
Area: Humanities.

This course offers immersion in the rapidly expanding interdisciplinary field of sense studies, with an emphasis on the questions posed thereby to classicists and the humanities generally. It should be useful both to students of antiquity with an interest in the senses and to others who want to explore the role of antiquity in shaping sensory theories.
Instructor(s): M. Butler
Area: Humanities.

Instructor(s): Staff
Area: Humanities.

Instructor(s): Staff

AS.040.519. Honors Research.
Instructor(s): Staff.

AS.040.520. Honors Research.
Instructor(s): Staff.

AS.040.579. Master's Research.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.580. Master's Research.
Instructor(s): D. Yatromanolakis.

AS.040.599. Independent Study.
Instructor(s): C. Celenza; M. Roller.

AS.040.612. Ancient Greek Prose Composition.
Translating modern English prose into ancient Greek. Emphasis on the Attic dialect.
Instructor(s): D. Yatromanolakis.

AS.040.616. Latin Literature Beyond Hermeneutics.
This seminar will examine various works from the perspective of recent efforts to move beyond language and interpretation, including histories and theories of material texts, sensation, and aesthetic pleasure.
Instructor(s): M. Butler.

AS.040.621. Proseminar to Classical Archaeology.
An introduction to research methods and current topics of discussion in the scholarship on Greek and Roman art and archaeology.
Instructor(s): A. Shapiro.

AS.040.638. Ancient Literary Criticism.
This course covers essential Greek and Latin texts (e.g. Plato, Aristotle, Horace, Plutarch) and the commentary tradition (e.g. scholia to Homer and other important authors). Focus is on poetic texts, with some prose.
Instructor(s): J. Smith.

AS.040.644. The Crisis of the Late Republic: Ancient and Modern Approaches.
This seminar focuses on the fall of the Roman Republic. We trace modern scholars’ rapidly changing understandings of the issues involved, along with influential ancient understandings, above all those of Sallust. Weekly assignments will include modern scholarship as well as substantial Latin reading: in the course of the term we will read the entire corpus of Sallust (the Bellum Jugurthinum, the Coniuratio Catilinae, and the longer fragments of the Historiae).
Instructor(s): M. Roller.
AS.040.646. Greek Palaeography.
The seminar focuses on both early and later Greek manuscripts. Special emphasis placed on technical aspects of the discipline of Greek Palaeography (dating of manuscripts, transmission of literature and of specialized treatises related to ancient Greek sciences, etc.).
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.648. Homeric Archaeology.
This seminar surveys the archaeology of the Late Bronze Age in the Aegean, then explores the creation, diffusion, and reception of Homeric epic from the Iron Age to the end of the Archaic Period.
Instructor(s): A. Shapiro; E. Anderson.

AS.040.650. Curating the Roman House.
In this seminar, students will be asked to develop an exhibition on the theme of the Roman House based on the holdings of the JHU Archaeological Museum and the Walters Art Museum. Guest lectures by Dr. Marden Nichols, Curator of Ancient Art at the Walters Art Museum.
Instructor(s): H. Valladares.

AS.040.651. Greek Art: Archaic into Classical.
An intensive exploration, based on current scholarship, of Greek sculpture and painting ca. 500-460 BCE and the origins of the Classical style. Cross-list with History of Art.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.653. Ovid, Maker of Images.
In this seminar, we will read excerpts from Ovid’s “Metamorphoses” and consider the reception of these episodes in the visual arts from antiquity to the 21st century.
Instructor(s): H. Valladares.

In this seminar the main fields of art, namely architecture, sculpture and painting (frescoes and mosaics), in the Near East will be examined as reflecting the impact Greek and Roman culture had in the region. One of the main topics is the meeting between regional traditions (Jewish, Phoenician, Syrian, Nabatean) and the imported Greek and Roman trends. These aspects will be studied both at official and popular levels. Examination of official art and architecture will focus on religious and civic domains, taking into account also the use of marble, which had to be imported to this region. As to the popular art, domestic milieu will be taken into consideration. After introductory presentations by the instructor, students will be invited to bring their own contributions.
Instructor(s): M. Fischer.

AS.040.655. Attic Hero Cults.
This seminar will combine the evidence of literary and epigraphical sources with archaeological material (votive reliefs, vase iconography) to explore the central role of hero cult in the religious life of ancient Athens. Cross-listed with History of Art
Instructor(s): A. Shapiro.

AS.040.657. Apollonius of Rhodes.
We shall read and discuss significant portions of Apollonius of Rhodes’ Argonautica in the original Greek.
Instructor(s): S. Montiglio.

We shall read Musaeus’ “Hero and Leander” and collateral texts, including Ovid’s two letters “authored” by the two protagonists and several sections from the ancient novels, which have influenced Musaeus. If students are interested and time allows, we will read some modern re-writings of this wonderful love story.
Instructor(s): S. Montiglio.

AS.040.665. Survey of Greek Literature.
An intensive survey of Greek poetic and prose texts, which emphasizes reading for comprehension and speed. Texts range from Homer to Lucian.
Instructor(s): S. Montiglio
Area: Humanities.

This seminar focuses on early Greek hexameter poetry, especially Hesiod, in the context of ancient Greek performance culture and ancient reception. Students will be introduced to current research on comparative mythology and religion.
Instructor(s): D. Yatromanolakis.

AS.040.671. Greek Portraiture and Society.
This seminar will explore the development of Greek portrait sculpture from the Early Classical through the Hellenistic periods and the contexts of its display in Greek cities.
Instructor(s): A. Shapiro.

AS.040.673. The Iliad.
Readings will consist of large portions of The Iliad, focusing especially on literary aspects of the epic.
Instructor(s): S. Montiglio.

AS.040.674. Aeschylus and Sophocles.
This Graduate Seminar will explore major social and cultural aspects of some of the most influential fifth-century Athenian plays, including important archaeological material related to ancient Greek theatre.
Instructor(s): D. Yatromanolakis.

AS.040.675. The Roman House: Image, Text, Archaeology.
Instructor(s): H. Valladares.

Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.686. The Odyssey.
Instructor(s): S. Montiglio.

AS.040.687. Proseminar in Classical Philology.
An overview of research areas in Classics, with a focus on such disciplines as epigraphy, papyrology, palaeography, as well as various forms of critical theory.
Instructor(s): D. Yatromanolakis.

AS.040.691. Roman Reciprocities.
This seminar investigates Roman reciprocity and social exchange with a focus on the early empire, in light of both classical anthropological theory and recent work on reciprocity by Classicists and others. Substantial Latin readings from Seneca’s De Beneficiis and such poetic praise texts as the Laus Pisonis and Panegyricus Mesalae.
Instructor(s): M. Roller.
AS.040.693. The Pre-Socratics and Early Plato.
This seminar will focus on the earliest phases of European philosophy. Topics that will be examined include: scholarly approaches to the fragments of major thinkers such as Herakleitos and Empedokles; the concept of “fragment;” the transition from the pre-Socratics to early Plato; the later reception of Herakleitos and Pythagoras in European thought.
Instructor(s): D. Yatromanolakis
Area: Humanities.

We shall read and discuss significant portions of Apuleius' The Golden Ass in the original Greek.
Instructor(s): S. Montiglio.

AS.040.702. Reading Ancient Greek Poetry.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.306.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.705. Reading Ancient Greek Prose.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. (Same as AS.040.305). Recommended Course Background: AS.040.105-AS.040.106
Instructor(s): S. Montiglio
Area: Humanities.

This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.307.
Instructor(s): M. Butler.

AS.040.710. Reading Latin Poetry.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. (Same as AS.040.308) Recommended Course Background: AS.040.107-AS.040.108
Instructor(s): M. Roller.

AS.040.714. Survey of Latin Literature.
This seminar surveys Latin authors and texts represented on the Ph.D. reading list. Intensive, accelerated reading aims to familiarize students with the different authors and their styles, to improve reading speed and accuracy, and prepare students to tackle the remaining works on the reading list by themselves.
Instructor(s): M. Roller.

AS.040.716. Petrarch (1304-74) and the Beginnings of Renaissance Latin.
This course will provide close readings of certain Latin texts by Petrarch, with attention to his letters and to other prose works.
Instructor(s): C. Celenza.

AS.040.721. Tibullus.
In this seminar, students will engage in close readings of Tibullus’ works. We will also consider the poems attributed to Sulpicia and other aspects of the Corpus Tibullianum.
Instructor(s): H. Valladares.

AS.040.801. Independent Study.
Instructor(s): Staff.

AS.040.802. Independent Study.
Instructor(s): Staff.

AS.040.806. Master’s Thesis Research.
Instructor(s): D. Yatromanolakis.

No Audits.
Instructor(s): Staff.

AS.040.815. Dissertation Research.
No Audits.
Instructor(s): Staff.

Cross Listed Courses
History of Art
AS.010.205. The Painted Worlds of Early Greece: Fantasy, Form and Action.
This course explores the creation and role of early Aegean wall painting. Found primarily in palaces, villas and ritual spaces, these paintings interacted with architecture to create micro-worlds for social activities taking place in their midst. Their subjects range—from mythological to documentary, from ornamental to instructive. They depict dance and battle, fantastical beasts and daily life. We examine their complex relationship to lived reality as well as the activities that surrounded them, from their crafting, to performance of rituals, to their role in “international” relations.
Instructor(s): E. Anderson
Area: Humanities.

AS.010.208. The Disappearing Wall: Roman Frescoes in Context.
The course introduces ancient Roman wall painting from Pompeii and Rome as images painted on “disappearing walls.” We will analyze these and other murals in historical, archaeological and museum contexts.
Instructor(s): S. O’Connell
Area: Humanities.

AS.010.303. Flavian Art, AD 69-96.
This course investigates Roman art and architecture during the Flavian age, in Rome and in the provinces of the empire. With the Flavians, the capital of the empire enjoyed a period of intense building activity: the great projects of Vespasian and Domitian radically transformed its image. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting, epigraphy and literary sources) to reconstruct the built environment of Rome and other towns (Pompeii, Herculaneum, etc).
Instructor(s): P. Tucci
Area: Humanities.

AS.010.308. Art and Architecture in Republican Rome.
The course investigates the influence of the Hellenistic world on Roman artists, architects and patrons during the Republican age (509-31 BC).
Instructor(s): P. Tucci
Area: Humanities.

Pompeii, buried by the eruption of Mons Vesuvius in AD 79, offers the best evidence of everyday life in the Roman world. The course examines its public buildings and houses, as well as the main villas outside the city walls. A final paper will be required.
Instructor(s): P. Tucci
Area: Humanities.
AS.010.324. Art and Architecture in the Augustan Age.
Investigates Roman art and architecture during the Augustan age (31 BC – AD 14). Augustus’ cultural program influenced many aspects of Roman life, leading to the creation of a new visual language that transformed Roman society. Methodologically, the focus will be on the integration of diverse sources to reconstruct and discuss the images and the built environment of the Augustan age.
Instructor(s): P. Tucci
Area: Humanities.

This course investigates the Romans’ reception of Greek and Hellenistic art and architecture, as well as Rome’s original contribution during the republican and imperial age. Its goal is to examine the effects of Hellenization on Roman society and the creation of a completely new visual language.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.423. Roman Sculpture.
The course examines all the major public and private monuments, in Rome and in the provinces, from the Republican age to the end of the Roman empire. It considers their cultural, political, and social contexts, and of course the original architectural setting. New light is shed on the reception of statuary and reliefs by the Roman viewer, using primary texts as well as the sculptures themselves. The course illustrates the different types of sculpture that an ancient Roman would have encountered, explaining the nuances of meaning in the different words used by Roman and Greek authors in their descriptions. Sculpture was an integral part of Roman life: indeed the Romans placed statues and reliefs in their houses, villas, gardens, and tombs, as well as in their temples and public buildings. While Rome remains a focus for the course, western and eastern provincial examples are also offered to help further understand the role of Roman sculpture. May also be used as credit toward the Archaeology major. Cross-listed with Classics.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.424. Collecting Roman Art: From Antiquity to Present.
A survey of the most important collections of Greek and Roman sculpture, from the late-Republican age through the Middle Ages and the Renaissance, until the creation of the main museums in Europe and in the United States.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.430. History of Roman Art and Architecture.
This course explores the principal forms and contexts in which art and architecture developed in the Roman world. It surveys Roman art and architecture from the foundation of the city of Rome - against the background of the Etruscan tradition - to the divergent trends of late antiquity, including the interaction between Rome and the provinces of the empire. Overall the course encourages critical thinking about the purpose of studying art and architecture as a tool for understanding the Roman world, and provides an introduction into how to use visual and material evidence as a historical source. On completion of this course students will be able to describe and evaluate the architectural style and decorative of key Roman monuments, as well as their function in ancient society. Cross-list with Classics
Instructor(s): P. Tucci
Area: Humanities.

The course explores the significance of the Severan marble plan of Rome and its potential to shed new light on the building program of Septimius Severus and Caracalla.
Instructor(s): P. Tucci.

AS.010.655. Religion in Roman Art.
This course explores the relationships between Roman art and religion through a survey of key topics and issues, from the archaic period to late antiquity, providing an introduction into how to use both textual and material evidence as sources for understanding Roman art and society.
Instructor(s): P. Tucci.

The course investigates the earliest influence from Greece on Roman artists, architects and patrons during the Late Republic. Even before the conquest of mainland Greece, Roman society was transformed by a dramatic process of acculturation. Hellenistic art, quickly adapted by the Romans, played an important part in the development of late-republican Rome: the contrast between the old mos maiorum and what would soon be condemned as luxuria was striking. Archaeological material and literary sources prove that the new taste pervaded not only the Roman way of life but also art and architecture. The course examines in detail the inspiring struggle between Etrusco-Italic traditions and the overwhelming riches from the Hellenistic world. Cross-listed with Classics
Instructor(s): P. Tucci.

AS.010.719. Art and Architecture under the Flavian Dynasty.
This seminar investigates Roman art and architecture during the Flavian age (AD 69-96) in Rome and in the provinces. With the Flavian dynasty the empire enjoyed a period of renewed political and economic stability: and this was the result of the principate of Vespasian. The 2009-celebration of the bimillenary of Vespasian’s birth gave the opportunity to reassess the figure of this emperor and the role of his dynasty in the development of Rome. With the Flavians, the capital of the empire enjoyed a period of intense building activity (e.g. the Colosseum). The great projects of Vespasian and Domitian radically transformed its image. The embellishment of the city and the global re-planning of the urban spaces were the visible signs of the political revival of the empire. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting, epigraphy and literary sources) to reconstruct the built environment of Rome during the last three decades of the 1st century AD. Cross-list with Classics
Instructor(s): P. Tucci.
Near Eastern Studies

**AS.130.258. Ceramic Analysis in Archaeology.**

At archaeological sites following the invention of pottery roughly 10,000 BCE, ceramics are the single most frequent and ubiquitous class of artefact that archaeologists uncover. This class, which will be conducted in the Hopkins Archaeological Museum as a combination of lectures, discussions, and hands-on interactions with ancient and modern ceramics, surveys the methods and interpretive techniques that archaeologists use when studying this important category of material culture. Specific topics include manufacturing techniques, craft specialization, typology and chronology, production and exchange, scientific analyses, stylistic and functional analysis, and socio-political organization.

Instructor(s): J. Osborne
Area: Humanities.

Philosophy

**AS.150.134. Freshman Seminar: Socrates in Context.**

A study of Socrates as portrayed by his contemporaries, and of intellectual and political trends to which he may have been reacting. Authors will include Plato, Xenophon and Aristophanes. Freshmen Only.

Instructor(s): R. Bett
Area: Humanities.

**AS.150.201. Introduction to Greek Philosophy.**

A survey of the earlier phase of Greek philosophy. Socrates, Plato, and Aristotle will be discussed, as well as two groups of thinkers who preceded them, usually known as the pre-Socratics and the Sophists.

Instructor(s): R. Bett
Area: Humanities.

**AS.150.401. Greek Philosophy: Plato and His Predecessors.**

A study of pre-Socratic philosophers, especially those to whom Plato reacted; also an examination of major dialogues of Plato with emphasis upon his principal theses and characteristic methods.

Instructor(s): R. Bett
Area: Humanities.

**AS.150.403. Hellenistic Philosophy.**

A study of later Greek philosophy, stretching roughly from the death of Aristotle to the Roman imperial period. Epicureans, Stoics, and Skeptics will be the main philosophical schools examined.

Instructor(s): R. Bett
Area: Humanities.

German Romance Languages Literatures

**AS.211.475. Inside the Writer’s Laboratory.**

How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the "laboratory" of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.

Instructor(s): S. Miglietti
Area: Humanities.

**AS.214.347. Petrarch and the Beginnings of the Renaissance. 3 Credits.**

This course will focus on the life, work, and thought of Francesco Petrarca, or "Petrarch." Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.

Instructor(s): C. Celenza
Area: Humanities

**AS.214.377. Gendered Voices.**

The course will explore the notion of ‘voice’ in order to show how poetry, literature, philosophy, and music have been doing it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the ‘voice’ in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa’s The Siren and Italo Calvino’s A King Listens.

Instructor(s): E. Refini
Area: Humanities.

**AS.214.390. Machiavelli: A Renaissance Master.**

Who was Niccolò Machiavelli? The author of the Italian Renaissance’s most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli’s major works and to the intellectual, social, and political contexts that shaped his thinking.

Instructor(s): C. Celenza
Area: Humanities.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin - not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.

Instructor(s): C. Celenza
Area: Humanities

Boccaccio’s Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio’s masterpiece on its own terms and in relation to the development of story-telling, from gossipy “news” (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints’ lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and filmic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian. Those students should enroll in section 2 which will be awarded 4 credits.

Instructor(s): W. Stephens
Area: Humanities

3 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.

Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.637. The Intellectual World of the Italian Renaissance.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.

Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.
Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.653. Pleasure and Virtue in Renaissance Literature.
This course will examine major literary and philosophical works from Renaissance Italy that thematize pleasure, questioning (explicitly or implicitly) its place in the hierarchy of human values. We will consider the role that the Renaissance rediscovery of Epicurean and Neoplatonic thought played in shaping how pleasure in its various forms was conceptualized and represented. Authors we will read include Lorenzo Valla, Marsilio Ficino, and Niccolò Machiavelli. Reading knowledge of Italian is required.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.655. Translating Knowledge: Brunetto’s Tresor and Dante’s Convivio.
By focusing on Brunetto Latini’s Tresor and Dante Alighieri’s Convivio, the seminar will examine the notion of “encyclopedic knowledge” in the Middle Ages. The two works—both examples of “translation”—call traditional ideas of knowledge into question. The seminar will study the Convivio as a response to the Tresor and will situate Dante’s project within a wider discussion of vernacular translation as a key tool for the dissemination of the classical tradition in the Middle Ages.
Instructor(s): E. Refini
Area: Humanities.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities.

Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities.

Interdepartmental

AS.360.133. Freshman Seminar: Great Books at Hopkins.
Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University’s rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2015 include Homer, Thucydides, Dante, Milton, Diderot, Shelley, Nietzsche, Nabokov, and Douglass.
Instructor(s): E. Patton; E. Russo; R. Bett; S. Achinstein; W. Stephens
Area: Humanities.

Great Books at Hopkins II: The Sciences will combine readings from philosophy and literature with foundational texts from several scientific disciplines. Readings for this spring will explore links between traditional theories of economics and genetics in the context of literary developments, and will include: Xenophon’s Oeconimicus, Mendel’s “Experiments on Plant Hybridization,” Marx’s Communist Manifesto, Darwin’s Voyage of the Beagle, Swift’s A Modest Proposal, Wharton’s House of Mirth, and Joyce’s Finnegans Wake.
Instructor(s): E. Patton; M. Roller
Area: Humanities.

Study of Women, Gender, Sexuality

This course examines the Greek goddesses and heroines and the ways in which women worshipped them in antiquity, using an interdisciplinary approach, incorporating literary, iconographical, and archaeological evidence.
Instructor(s): S. Stern.

Center for Language Education

AS.383.112. Beginning Sanskrit II.
This course is a continuation of 381.111. Additional emphasis will be placed on listening, reading, and writing of the language. Basic sentences will be drawn from the Sanskrit Literature. Simple Vedic Mantras from the Vedas and Ishopanishad, verses from the Ghaagavad Gita, and the soottas from the Yoga Sookavad will be read.
Prerequisites: AS.383.111.
Cognitive Science

Cognitive science is the study of the human mind and brain, focusing on how the mind represents and manipulates knowledge and how mental representations and processes are realized in the brain. Conceiving of the mind as an abstract computing device instantiated in the brain, cognitive scientists endeavor to understand the mental computations underlying cognitive functioning and how these computations are implemented by neural tissue. Cognitive science has emerged at the interface of several disciplines. Central among these are cognitive psychology, linguistics, and portions of computer science and artificial intelligence; other important components derive from work in the neurosciences, philosophy, and anthropology. This diverse ancestry has brought into cognitive science several different perspectives and methodologies. Cognitive scientists endeavor to unite such varieties of perspectives around the central goal of characterizing the structure of human intellectual functioning. It is this common object of inquiry that integrates traditionally separate disciplines into the unified field of cognitive science.

Programs in cognitive science at Johns Hopkins University reflect the interdisciplinary nature of the field, allowing students to approach the study of the mind and brain from multiple perspectives. Students gain broad knowledge of the field as a whole, plus a greater depth of the understanding in two of the sub-disciplines within the field. Training emphasizes not only learning about the principal theories and evidence, but also development of the conceptual and practical skills needed for understanding and conducting theoretical and empirical work in the field.

Our department offers a B.A. in Cognitive Science as well as a Linguistics Minor (p. ).

B.A. in Cognitive Science

Also see Requirements for a Bachelor's Degree (p. 20).

Cognitive Science Major Requirements

The required courses for cognitive science majors are divided into five general areas, as described below. The program is structured so as to ensure some exposure to each of the five areas. In addition, it provides in-depth training in two of the areas, deemed focal areas, chosen by the student. Majors in cognitive science thus acquire a broad perspective which will enable them to situate particular research disciplines within the overall study of the mind/brain.

Areas of Concentration: Students must take courses in all five areas of concentration; however, two must be chosen as focal areas in which a greater selection of courses is required. Courses offered by our department and other affiliated departments (e.g., Departments of Psychological and Brain Sciences, Philosophy, Computer Science, Neuroscience, etc.) may be used to satisfy the requirements for these areas of concentration. Examples of courses that satisfy the requirements for each area can be found on our website. (http:// cogsci.jhu.edu/undergraduate/focal-areas.html) However, please note that courses change over time, and some courses are not offered every year. The Director of Undergraduate Studies (http:// www.advising.jhu.edu/directors.php) can answer questions about which courses qualify for each focal area.

B.A. Coursework

Introductory Course

<table>
<thead>
<tr>
<th>AS.050.101</th>
<th>Cognition</th>
</tr>

</table>

Two Focal Areas, see areas above
Practicum in Language Disorders

In addition to having numerous research opportunities year-round, our department also offers AS.050.318 Practicum in Language Disorders-Community Based Learning (also listed as AS.080.400 Research Practicum: Language Disorders-Community Based Learning in the Department of Neuroscience) to its majors. Each fall and spring semester two qualified upperclassmen may enroll in this practicum and have the unique opportunity to learn about adult aphasias, be trained in supportive communication techniques, and work as a communication partner with an individual with aphasia throughout the semester at SCALE (http://www.scalebaltimore.org), a local aphasia support non-profit organization.

Departamental Honors

To receive Honors in Cognitive Science, graduating seniors must have a major GPA of 3.5 or higher and complete an Honors Clearance (http://www.advising.jhu.edu/honors.php) with the department’s Director of Undergraduate Studies (http://www.advising.jhu.edu/directors.php)’s approval. This honor will appear on students’ transcripts and will also be indicated in that year’s Commencement program.

Excellence in Cognitive Science Award

Each year at Commencement, a cognitive science graduating senior with a stellar academic and research record. The department’s faculty make nominations and the Director of Undergraduate Studies announces the winner. This honor is accompanied by a $500 award.

Minor in Linguistics

A minor in linguistics is available to undergraduates majoring in any department, except for cognitive science majors who choose linguistics as a focal area. Students intending to minor in linguistics should declare their intention, preferably by the beginning of junior year. A grade of C- or better must be earned in all minor requirements.

Linguistics Minor Requirements

Foreign Language

One foreign language through the intermediate level OR two foreign languages at the elementary level.

Linguistics Courses

Four of the required six linguistics courses must be at the 300-level or above, excluding research and readings.

Graduate Programs

(For precise and up-to-date information on these M.A. and Ph.D. graduate programs, visit www.cogsci.jhu.edu/graduate.)

Masters of Art Program

MA Requirements for Admission

This intensive, one-year M.A. program is intended to appeal to students who have undergraduate degrees in linguistics, psychology, computer science, neuroscience, and other sub-disciplines of cognitive science. Prominent in this program is the emphasis of faculty mentorship of the students during the application period and throughout the duration of the program. There are two distinct tracks in the M.A. program: Course Track and Research Track. Besides traditional required admissions materials, the Research Track is the only track that has a coursework prerequisite: three credits of undergraduate research or equivalent. Please visit the link at the beginning of this section to find more detailed information on the program and specific admissions requirements.

Additional Cognitive Science Major Information

- Departmental requirements may not be taken Satisfactory/Unsatisfactory, with the exception of research.
- A grade of C- or better must be earned in all major requirements.

Foreign Language Requirement

One foreign language through the intermediate level OR two foreign languages at the elementary level.

Math Requirement (Option A or B)

</table>

Foreign Language Requirement

One foreign language through the intermediate level OR two foreign languages at the elementary level.

* Up to three credits of research may apply to this requirement.
** If cognitive psychology/neuropsychology is a focal area, the statistics sequence is required and should be completed by the end of the sophomore year, if possible.
*** EN.550.111 Statistical Analysis I and EN.550.113 Statistics Through Case Study (if offered) are interchangeable as the first course in the statistic sequence.

Three courses in each of the two selected focal areas.

At least one course in each area must be at the 300 - 600 level, not including research, readings, or practica.

Three Non-Focal Areas

One course at any level from each of the three non-focal areas.

Additional Upper-Level Courses

Nine credits at the 300 - 600 level, chosen from any focal areas or other cognitive science offerings *

Additional Upper-Level Courses

Nine credits at the 300 - 600 level, chosen from any focal areas or other cognitive science offerings *

Departmental Honors

To receive Honors in Cognitive Science, graduating seniors must have a major GPA of 3.5 or higher and complete an Honors Clearance (http://www.advising.jhu.edu/honors.php) with the department’s Director of Undergraduate Studies (http://www.advising.jhu.edu/directors.php)’s approval. MA Degree Requirements

Completion of this M.A. program strengthens the qualifications of students who will be applying for Ph.D. programs and also provides career opportunities in areas including science writing, research coordinator, human factors IT, and community college teaching, among others.

Course Track: Students in this track must complete 12 courses with a grade of B- or better. See the course requirements below. Additionally, MA students are expected to take a research ethics course (AS.360.625 Responsible Conduct of Research). See the coursework requirements below. As the capstone event for a student’s completion of the program, he/she must produce a portfolio of accomplishments from the program (e.g., course assignments, seminar papers) overseen by the faculty adviser, prepare a reading list and set of discussion questions, and present what has been learned from the year of study at an Oral Presentation supervised by two faculty members.

MA Course Track Coursework
Courses: seven courses, 600 or above
Lab or Research Seminars: two courses, 800-level
Directed Reading or Research: three total courses, one during Intersession
AS.360.625 Responsible Conduct of Research
Capstone: Portfolio and Oral Exam

Research Track: Students in this track must complete 12 courses. Students must work on full-time research overseen by their faculty adviser and must complete maintain a B- or better in all coursework. Additionally, MA students are expected to take a research ethics course (AS.360.625 Responsible Conduct of Research). See the course requirements below. At the end of the program, a student in the research track must produce and defend research paper that is approved by the faculty adviser.

MA Research Track Coursework
Formal Methods or Statistics course (one of the following):
- AS.050.670 Mathematical Models of Language
- AS.050.671 Bayesian Inference
- AS.050.672 Foundations of Neural Network Theory
- AS.200.314 Advanced Statistical Methods (or equivalent)
Lab or Research Seminar: two courses, 800-level
Additional Courses: three courses, 600-level or above
Directed Research: six courses, one during Intersession
AS.360.625 Responsible Conduct of Research
Capstone: Research Paper and Oral Defense

Financial Support
No regular funding is provided to students in the M.A. Research and Course Tracks, though a 50% reduction in tuition is offered to students with JHU undergraduate degrees. Students will be encouraged to seek funding from both internal and external sources.

Doctoral Program

PhD Requirements for Admission
A program of study leading to the Ph.D. degree is open to students with a bachelor’s or master’s degree in cognitive science or one of the several areas that contribute to it. Prospective doctoral students would be well advised to take courses in cognitive psychology, linguistics, and computer science. Some preparation in the foundations of contemporary neuroscience is also an asset, as is training in the philosophical issues surrounding the study of mind and consciousness. However, there are no fixed prerequisites (in the form of specific required courses) for admission to the doctoral program. The Department of Cognitive Science invites inquiries from students who are prepared in any of the related fields and who are interested in extending their work to the broader study of the mind/brain.

PhD Degree Requirements
The Department of Cognitive Science’s Ph.D. requirements consist of coursework, foreign language competence, teaching experience, and research papers. The requirements are designed to meet the following goals:

- **Depth:** Students become expert in their primary area of research interest and also are prepared so that they will be competitive for academic positions in one of the traditional disciplines. Students take 8 - 10 advanced courses that the student, in conjunction with his/her advisory committee, determines to be important for achieving expertise in a chosen research area and marketplace competitiveness in one of the traditional areas: cognitive psychology/neuropsychology, computer science or linguistics.

- **Breadth:** Students develop the ability to understand, appreciate and critically evaluate work in the various sub-disciplines of cognitive science by taking a selection of courses, two each in the areas of cognitive psychology/neuropsychology, computation and linguistics and one each in philosophy and cognitive neuroscience. Students may place out of breadth courses based on undergraduate coursework and (for certain courses) based on examination. It is not uncommon for a student to place out of two breadth requirements.

- **Integration:** Students learn to integrate theory and method across sub-disciplines through specially-designed integrative courses and regular seminars involving the entire department.

### Breadth

**Cognitive Neuroscience**

- One course

**Philosophy**

- One course in philosophy of mind/language/science

**Cognitive Psychology/Neuropsychology**

- AS.200.314 Advanced Statistical Methods (To be completed early in the program, preferably the first semester)
- AS.050.639 Cognitive Development (or an approved course or seminar on a topic outside the area of language)
- or AS.050.315 Cognitive Neuropsychology of Visual Perception: The Malfunctioning Visual Brain

**Computation**

- AS.050.672 Foundations of Neural Network Theory
- AS.050.671 Bayesian Inference (OR the equivalent, e.g., computational linguistics, OR a Programming course such as C++, Java, etc.)

**Language**

- AS.050.670 Mathematical Models of Language
- AS.050.625 Phonology I
- or AS.050.620 Syntax I

### Integration
AS.050.626 Foundations In Cog Sci
AS.050.850 Department Seminar (Course topics change each time this is offered. All students and faculty in the program attend these class meetings. Only during one semester do students write a paper and direct a topic for credit.)

Depth: Area of Focus
Approximately 8 to 10 courses, selected in conjunction with the student’s advisory committee, to achieve depth in a chosen research area and marketplace competitiveness: computer science, psychology/neuropsychology, or linguistics

General
AS.360.625 Responsible Conduct of Research (encouraged to complete in the first year)

TA Assignments
AS.050.849 Teaching Practicum (7 semesters. Students register for each term they are assigned to an instructor as a TA. Each instructor has a distinct Teaching Practicum section. Students are not expected to TA in their first semester or in the last two semesters of residency (5th year).)

Research Papers & Dissertation: Emphasis is placed on producing two research papers prior to writing a dissertation. These two research papers are typically presented at conferences and often lead to separate journal publications. Students are encouraged to incorporate the two research papers into their dissertation.

Nov. 1 (2nd year) First Research Paper*, completion of which marks achievement of an M.A. within the Ph.D. program
May 1 (3rd year) Second Research Paper*, completion of which signals readiness to discuss a career path with an adviser
May 1 (4th year) Dissertation Proposal detailing a significant research project and the methods to be used
Aug. 1 (5th year) Graduate Board Oral Exam defending a Ph.D. Dissertation that presents an original contribution to some area(s) of cognitive science in a format approaching publication standards

* The two research papers must each employ a different research methodology within cognitive science, e.g., theoretical linguistics and psychology, supervised by two appropriate faculty members.

Financial Support
The department provides competitive levels of funding for Ph.D. students covering tuition and living expenses. Research expenses, including some support for travel to present papers at scholarly meetings, are also provided. If a student maintains an academic good standing, funding is extended up to five years of total support. Students are encouraged to apply for external graduate fellowship opportunities (NSF, NIH, DoD, etc.). As funded entities, our graduate students are expected to engage in full-time research during the summer months and the January intersession in addition to their regular coursework, TA responsibilities, and participation in academic departmental talks and events.

For current faculty and contact information go to http://cogsci.jhu.edu/people

Faculty
Chair
Brenda Rapp
Professor: cognitive neuropsychology, spelling, spoken language production, spatial frames of reference, reading and neural bases of recovery of function

Professors
Barbara Landau
Dick and Lydia Todd Faculty Development Professor: language acquisition, cognitive development, spatial representation, acquisition of the lexicon.

Géraldine Legendre
Professor: syntax, optimality theory, Romance and Balkan morphology and syntax, acquisition of syntax.

Michael McCloskey
Krieger-Eisenhower Professor of Cognitive Science: grammatical theory, neural networks, optimality theory.

Associate Professor
Colin Wilson
Associate Professor: theoretical phonology, experimental phonology, computational cognitive science.

Assistant Professors
Akira Omaki
Assistant Professor: psycholinguistics, first language acquisition, second language acquisition, syntax.

Soojin Park
Assistant Professor: cognitive neuroscience, vision, scene perception and memory, spatial navigation, functional neuroimaging.

Kyle Rawlins
Assistant Professor: formal semantics, pragmatics, syntax and interfaces, lexical representation, mathematical linguistics, computational models of meaning and communication.

Professor Emeritus
Luigi Burzio
Professor: theoretical phonology, morphology, and syntax, Romance linguistics.

Secondary Appointments
Marina Bedny
Assistant Professor (Psychological and Brain Sciences): brain development and plasticity, cognitive neuroscience, concepts.

Howard Egeth
Professor (Psychological and Brain Sciences): perception, attention, cognition, psychology, law.

Lisa Feigenson
Professor (Psychological and Brain Sciences): cognitive development, numerical cognition.
Jonathan Flombaum  
Assistant Professor (Psychological and Brain Sciences): Visual perception, attention, cognition.

Steven Gross  
Associate Professor (Philosophy): philosophy of language, philosophy of mind, metaphysics.

Justin Halberda  
Professor (Psychological and Brain Sciences): cognitive development, reasoning, language acquisition.

Joint Appointments

Dana Boatman  
Professor (Neurology and Otolaryngology, School of Medicine): speech perception, auditory processing disorders, auditory neurophysiology.

Mark Chevillet  

John Desmond  
Professor (Neurology, School of Medicine): neuroimaging, transcranial magnetic stimulation methods to investigate neural correlates of behavior.

Jason Eisner  
Professor (Computer Science, Whiting School of Engineering): computational linguistics (syntax and phonology), natural language processing, statistical machine learning, programming language design.

Barry Gordon  
Professor of Therapeutic Cognitive Neuroscience (Neurology, School of Medicine): cognitive neuroscience, language, aphasia, memory, amnesia and memory disorders, autism, computational models of cognition, and cognitive disorders.

Argye Hillis-Trupe  
Professor (Neurology, School of Medicine): language impairments in acute stroke, hemi-spatial neglect after stroke, relationship between cognitive impairments and regions of hypoperfused brain.

Guy McKhann  
Professor Emeritus (Neurology, School of Medicine; Founder, Mind/Brain Institute): neurological and cognitive changes after cardiac surgery.

Nazbanou "Bonnie" Nozari  
Assistant Professor (Neurology, School of Medicine): monitoring and metacognitive processes over language, selective attention in language production, computational models of language production, aphasia.

Benjamin Van Durme  
Assistant Research Professor (Computer Science, Whiting School of Engineering; Senior Research Scientist, Human Language Technology Center of Excellence): natural language processing, specifically semantics; streaming/randomized algorithms.

Other Appointments

Jennifer Culbertson  
Adjunct Assistant Professor (Chancellor’s Fellow, University of Edinburgh): language acquisition; language change; linguistic typology and universals; theoretical syntax and morphology; computational models of language learning and change; artificial language learning and grammaticality judgments.

Kelly Fisher  
Assistant Research Professor (Assistant Director, Science of Learning Institute; Assistant Professor, School of Education): early childhood learning, academic readiness, educational policy.

Kristin Gagnier  
Assistant Research Professor (Senior Research Data Analyst, Science of Learning Institute)

Michele Miozzo  
Assistant Research Professor (Adjunct Associate Professor, Columbia University): cognitive neuropsychology, psycholinguistics, spoken language production.

Maureen Stone  
Adjunct Professor (Professor, School of Dentistry, University of Maryland): phonetics, physiology, speech science, speech production, speech acoustics, vocal tract modelling, tongue modelling, speech motor control, ultrasound, electropalatography.

Anne Vainikka  
Visiting Scholar: theoretical syntax, Finnish syntax, first and second language acquisition of syntax.

Julia Yarmolinskaya  
Lecturer (Center for Language Education): perception and acquisition of second language phonology; bilingualism

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.050.101. Cognition. 3 Credits.  
Introductory course exploring the study of human mental processes within the field of cognitive science. Drawing upon cognitive psychology, cognitive neuropsychology, cognitive neuroscience, linguistics, and artificial intelligence, the course examines theory, methods, and major findings in work on vision, reasoning, and language. Instructor(s): C. Wilson  
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.102. Language and Mind. 3 Credits.  
Introductory course dealing with theory, methods, and current research topics in the study of language as a component of the mind. What it is to “know” a language: components of linguistic knowledge (phonetics, phonology, morphology, syntax, semantics) and the course of language acquisition. How linguistic knowledge is put to use: language and the brain and linguistic processing in various domains. This course is restricted to freshmen and sophomores. Juniors and seniors must seek instructor approval to enroll. Cross-listed with Neuroscience and Psychology. Instructor(s): A. Omaki  
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.105. Intro to Cognitive Neuropsychology. 3 Credits.
When the brain is damaged or fails to develop normally, even the most basic cognitive abilities (such as the ability to understand words, or perceive objects) may be disrupted, often in remarkable ways. This course explores a wide range of cognitive deficits, focusing on what these deficits can tell us about how the normal brain works. Topics include brain anatomy and causes of brain damage, reading and spelling deficits, unilateral spatial neglect, hemispheric disconnection, cortical plasticity, and visual perception of location and orientation. Students read primary sources: journal articles that report deficits and discuss their implications. Cross-listed with Neuroscience.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.106. Inventing Language.
What is language? This course explores this question by examining invented languages, from Esperanto to Klingon. In this introductory course we will learn the basics of linguistics, highlighting important commonalities and differences across languages. We will then apply our learning to several invented languages, discuss whether or not they conform to established standards for natural human language, and hypothesize about potential ramifications.
Instructor(s): K. Johannes
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.107. Language and Advertising. 3 Credits.
Advertising pervades our culture; interactions with advertising are an unavoidable fact of modern life. This class uses tools from linguistics and cognitive science to analyze these interactions, and understand the impact of advertising on its viewers. A central theme is to treat ads as communicative acts, and explore the consequences -- what can theories of communication (from linguistics, psychology, and philosophy) tell us about ads? How do ads use central features of human cognition to accomplish their aims? Do ads manipulate, and if so, how successfully? The theories of communication we explore include Gricean pragmatics, theories of speech acts, linguistic theories of presuppositions, and more. Students will collect, analyze, and discuss advertisements in all mediums.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

Mental processes such as language comprehension and visual perception involve complex computations carried out by the brain. But how do brains compute? What exactly does it mean to "compute" anyway? How do the brain and mind relate? Topics include cognition viewed as abstract computation, the brain viewed as a physical computer, and "neural network" computers viewed as models of how both the mind and the brain compute.
Instructor(s): J. Chen-Main
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.115. Neuropsychology and Games.
This course examines cognitive processes such as executive function, memory, language processing, and higher-level vision through the lens of board games. By playing and analyzing various games, students will gain a deeper understanding of the functions involved, how neuropsychologists evaluate them, and what happens when an individual has a deficit in these functions.
Instructor(s): B. Breining
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.117. Language in Advertising.
Advertising pervades our culture; interactions with advertising are unavoidable in modern life. This class uses tools from linguistics and cognitive science to analyze these interactions, and understand the impact of advertising on its viewers. What can theories of communication tell us about ads? How do ads use central features of human cognition to accomplish their aims? Do ads manipulate, and if so, how successfully? Students will collect, analyze, and discuss advertisements in all mediums.
Instructor(s): C. Beller
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.124. Using LaTeX to write academic papers.
LaTeX is a document markup language used to produce professional quality documents. It is used for producing academic papers and many journal require that you make use of their journal-specific configuration. This course covers installing and configuring a LaTeX distribution, basic macros and commands, drawing figures/graphs (mathematical formula, trees, finite automata, connectionist networks, data graphs, transcription using the International Phonetic Alphabet), basic troubleshooting, and installing new packages to expand the LaTeX's capabilities.
Instructor(s): M. Oliver
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.128. Freshmen Seminar: Born to Talk: Language in the Human Mind. 3 Credits.
Human infants learn their native language in less than 5 years with no direct teaching from adults. This mysterious fact is the basis of the modern study of language as a cognitive and computational system. In this seminar we will review major findings about how children learn the sound system, words, and grammar of their first language, focusing on how the evidence reveals the role of biological structures and environmental influences on language development. Weekly readings will include summary texts, original research articles, and coverage of language science in the popular media. Although language development is a topic of real importance to parents, educators, and policy-makers, it is often difficult to disseminate findings in a way that the public can understand. In weekly writing assignments, students will practice "translating" scientific reasoning for a general audience. Freshman Seminar
Instructor(s): S. Lewis
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.203. Cognitive Neuroscience: Exploring the Living Brain. 3 Credits.
This course surveys theory and research concerning how mental processes are carried out by the human brain. Currently a wide range of methods of probing the functioning brain are yielding insights into the nature of the relation between mental and neural events. Emphasis will be placed on developing an understanding of both the physiological bases of the techniques and the issues involved in relating measures of brain activity to cognitive functioning. Methods surveyed include electrophysiological recording techniques such as EEG, ERP, single/multiple unit recording and MEG; functional imaging techniques such as PET and fMRI; and methods that involve lesioning or disrupting neural activity such as cortical stimulation, animal lesion studies, and the study of brain-damaged individuals. (Co-listed as AS.080.203 in Neuroscience.)
Instructor(s): B. Rapp; J. Purcell; S. Park
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.204. Visual Cognition.
Vision is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd. While we take the visual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The goal of this course is to provide an introduction to visual cognition, including existing theoretical frameworks and recent research findings. We will explore questions such as: How do we see the stable world when our eyes are constantly moving? What is the relationship between seeing and knowing? Do infants see the world the same way as adults do? What are the neural mechanisms underlying visual perception?
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.206. Bilingualism. 3 Credits.
Do children get confused when they grow up exposed to more than one language? Is it possible to forget one’s native language? Are the first and second language processed in different areas of the brain? How does brain damage impact the different languages of a polyglot? Does knowing a second language affect non-linguistic cognitive processing? This course will address questions such as these through an exploration of mental and neural processes underlying bilingual and multilingual language processing.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

The course offers an overview of recent research on language and social cognition. It focuses on Theory of Mind (ToM) and the development of language. Theory of Mind is the ability to attribute mental states to oneself and others and to understand that others have beliefs, desires, and intentions that are different from one’s own. The development of human language is closely related to the development of ToM.
Instructor(s): A. Tamm
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.240. World of Language.
This hands-on course exposes students to the fascinating variety – and uniformity – to be found among the world’s 6000 languages through group lectures on a variety of topics as well as actual linguistic fieldwork conducted in small groups with a native speaker of a language unknown to the participants. This course is a good preparation for upper-division linguistics courses.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.311. The Literate Mind and Brain.
This course surveys both the historical development of written language as well as current cognitive theories that account for the manner in which the written language is represented and processed by “readers/writers” of a language. Issues regarding the relationship between the written and spoken language, the acquisition of written language skills, as well as developmental and acquired disorders of reading and writing will be examined.
Prerequisites: AS.050.101 or AS.050.102 or AS.050.105 or Instructor’s Permission
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences.

This course is an advanced seminar and research practicum course. It will provide the opportunity to learn about fMRI methods used in the field of vision science and for students to have hands-on experience to develop, design and analyze a research study on topics in the cognitive neuroscience field of high-level vision. In the first part of the course students will read recent fMRI journal papers and learn about common fMRI designs and analysis methods; in the second part of the course students will conduct a research study as a group to address a research question developed from readings. Students are expected to write a paper in a journal article format at the end of the course and to present their results in front of the class. Research topics will vary but with special focus on topics in object, scene and space recognition. Cross-listed with Neuroscience and Psychology. Instructor’s permission required.
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

When we think about our ability to see, we tend to think about our eyes, but in fact vision happens mostly in the brain. This course explores the remarkable perceptual deficits that occur when the visual regions of the brain are damaged or fail to develop normally, focusing on what these perceptual malfunctions tell us about normal visual perception. Topics include visual system anatomy and physiology; functional specialization in the lower visual system as revealed by cerebral achromatopsia (color blindness resulting from brain damage) and akinetopsia (impaired motion perception); cortical plasticity in the visual system; spatial deficits in perception and action; and the implications of high-level visual deficits, including prosopagnosia (impaired face recognition), Charles Bonnet syndrome (complex visual hallucinations in blind areas of the visual field), blindsight (accurate responding to visual stimuli despite apparent inability to see them), and Anton’s syndrome (denial of blindness).
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.317. Semantics I. 3 Credits.
This is an introduction to the study of meaning in natural language. We address the conceptual and empirical issues in semantic theory and introduce some formal machinery that has been developed to deal with such problems. After discussing foundational questions, we turn to formal semantics and pragmatics, as well as their interfaces with syntax and the lexicon. Specific topics include presupposition, type-driven composition, quantification, lexical aspect, argument structure, and lexical representations of meaning.
Prerequisites: AS.050.101 OR AS.050.107 OR AS.050.102 OR AS.050.128
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.318. Practicum in Language Disorders-Community Based Learning.
This course provides the opportunity to learn about adult aphasias, language disorders which are one of the most common consequences of stroke. You will receive training in supportive communication techniques and work as a communication partner with an individual with aphasia for two hours per week. Three class meetings for orientation and reading assignments will be held on campus; training and practicum will be conducted at a local aphasia support center. Independent mode of transportation required. Co-listed as AS.080.400 in Neuroscience. Additional information can be found on the Department of Neuroscience’s website: http://krieger.jhu.edu/neuroscience/academics/practicums/practicum-in-language-disorders/. Interested students should contact the instructor. Find out more about the practicum site at http://www.scalebaltimore.org.
Prerequisites: AS.050.105 OR AS.050.203 OR AS.080.203 OR AS.050.311 OR instructor’s permission.
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences.

Vision is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd. While we take the visual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The goal of this course is to introduce students to the field of visual cognition, including existing theoretical frameworks and recent research findings. We will explore questions such as: How do we see the visual world? Do we see and remember correctly what’s in the physical world? How many items can we keep track of and remember at a time? How is the visual system structured and what are the neural mechanisms underlying visual perception? Meets with AS.050.619.
Prerequisites: AS.200.101 OR AS.050.101 OR AS.080.203 OR AS.050.203
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.320. Syntax I.
Introduces the basic methods and means of analysis used in contemporary syntax investigations, practicing with data from different languages. Also offered as AS.050.620.
Prerequisites: Prereqs: AS.050.102 OR AS.050.240
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.321. Syntax II.
Building on AS.050.320, this course addresses and compares conceptions of syntactic theory that have emerged in the 1980s and 1990s. Discussion focuses on both the substantive and formal properties of the fundamental principles of syntactic theory, as well as the cross-linguistic evidence that has motivated them. When possible, connections will be made to other areas of linguistic inquiry such as processing, acquisition, and computation. The particular choice of topics and conceptions will vary from year to year but may include (1) the contrast between the Principles and Parameters view where syntactic theory is composed of a set of inviolable principles whose form admits a certain amount of cross-linguistic variation, and the Optimality Theory view where the principles are invariant though volatile, and cross-linguistic variation is determined by the relative importance of satisfying the various principles; (2) the role of structure building operations in grammar, and the differences between characterizations of well-formedness in terms of sequences of derivational steps and representational well-formedness requirements. Meets with AS.050.621
Prerequisites: AS.050.320(C) or instructor’s permission.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.322. Semantics II.
This course extends the material in AS.050.317 to cover advanced but central topics in semantic and pragmatic theory, focusing on intensional semantics (especially possible world semantics and situation semantics). Empirical domains of interest in this class include modality, tense, grammatical aspect, conditionals, attitude and speech reports, questions, and free choice phenomena. Three core theoretical issues addressed in this class are the nature of a compositional account of the above intensional phenomena, the representations of possibilities involved, and the role of the syntax/semantics/pragmatics interface in such an account. Meets with AS.050.622
Prerequisites: AS.050.317(C) or instructor’s permission
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.325. Phonology I. 3 Credits.
An introduction to the basic principles underlying the mental representation and manipulation of language sounds and their relation to human perception and vocal articulation: how units of sound are both decomposable into elementary features and combined to form larger structures like syllables and words. The role of rules and constraints in a formal theory of phonological competence and in accounting for the range of variation among the world’s languages. Also offered as AS.050.625.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology. Co-listed with AS.050.626.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.332. Developmental Cognitive Neuroscience. 3 Credits.
Prerequisites: AS.050.101 (Cognition) or AS.050.339/639 (Intro to Cog. Development) or AS.200.132 (Introductory Developmental Psychology) or instructors permission required. In-depth examination of the current literature on cognitive development in the context of development cognitive neuroscience. Same as 050.632.
Prerequisites: AS.050.101 OR AS.050.339 OR AS.200.132 OR AS.050.105 OR Instructor’s Permission.
Instructor(s): B. Landau
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.333. Psycholinguistics. 3 Credits.
This course provides a broad survey of current research on language processing in adult native speakers and language learners. Topics include speech perception, word recognition, and sentence production and comprehension. We will discuss the nature of representations that are being constructed in real-time language use, as well as how the mental procedures for constructing linguistic representations could be studied by various behavioral and physiological measures. Also offered as AS.050.633.
Prerequisites: AS.050.102(C) OR AS.050.128(C) OR AS.050.240(C) OR AS.050.317(C) OR AS.050.320(C) OR AS.050.325(C)
Instructor(s): A. Omaki
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

AS.050.335. Introduction to Connectionist Modeling of Cognition.
This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. (Same as AS.050.626) Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology.
Instructor(s): D. Mathis
Area: Natural Sciences, Social and Behavioral Sciences.

This is a survey course in developmental psychology, designed for individuals with some basic background in psychology or cognitive science, but little or none in development. The course is strongly theoretically oriented, with emphasis on issues of nature, nurture, and development. We will consider theoretical issues in developmental psychology as well as relevant empirical evidence. The principle focus will be early development, i.e., from conception through middle childhood. The course is organized topically, covering biological and prenatal development, perceptual and cognitive development, the nature and development of intelligence, and language learning. Also listed as AS.050.639. Cross-listed with Neuroscience. Instructor’s approval required.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.345. Cognitive and Neural Basis of Executive Control.
This course discusses the concept of executive control, a general class of functions that support more specialized cognitive operations such as language and problem solving, and their neural underpinning. Discussion will include classification of executive functions, relationship to working memory, domain-generality or specificity of executive control functions, and experimental, neural, and computational approaches to exploring components of executive control, with a special emphasis on the role of cognitive control in the processing of language. The goal of this course is two-fold: to teach students the basic knowledge regarding cognitive and neural mechanisms of executive control, and more importantly to encourage them to put that knowledge to use by asking them to think critically about the readings, to participate in interactive discussions with questions they bring in each week based on the readings assigned for that week, and finally to propose one well thought-out question at the end of the semester and to write a short proposal on how to explore that question. As such, the course puts little emphasis on memorization and a strong emphasis on analytical abilities and integration.
Prerequisites: AS.200.207(C) OR AS.050.333(C) OR EN.550.111(C)
Instructor(s): N. Nozari
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.370. Mathematical Models of Language. 3 Credits.
This course will be devoted to the study of formal systems that have proven useful in the cognitive science of language. We will discuss a wide range of mathematical structures and techniques and demonstrate their applications in theories of grammatical competence and performance. A major goal of this course is bringing students to a point where they can evaluate the strengths and weaknesses of existing formal theories of cognitive capacities, as well as profitably engage in such formalization, constructing precise and coherent definitions and rigorous proofs. Also offered as AS.050.670.
Prerequisites: AS.050.101(C) OR AS.050.102(C) OR AS.050.128(C)
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.371. Bayesian Inference.
This course introduces techniques for computational modeling of aspects of human cognition, including perception, categorization, and induction. Possible topics include maximum likelihood and Bayesian inference, structured statistical models (including hierarchical and graphical models), non-parametric models. The course emphasizes the close connections among data analysis, theory development, and modeling, with examples drawn from language and vision.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

Introduction to continuous mathematics for cognitive science, with applications to biological and cognitive network models: real and complex numbers, differential and integral multi-variable calculus, linear algebra, dynamical systems, numerical optimization. Meets with AS.050.672
Prerequisites: Calculus I Required: AS.110.106 OR AS.110.108
Instructor(s): P. Smolensky
Area: Natural Sciences, Quantitative and Mathematical Sciences.
Connectionism is an approach to Artificial Intelligence computation inspired by how the brain, a network of neurons, works. A connectionist model (or artificial neural network) is a collection of simple processing units that are massively interconnected with each other, and that represents knowledge in its connection pattern. Each processing unit has highly limited computational power but the collection of units as a whole has great computational power (as strong as the Turing machine). Connectionist models have been used to study diverse aspects of human cognition: attention, pattern recognition, memory, categorization, language processing, learning, and decision making. In this seminar, students will learn important concepts, principles, algorithms, and practical skills in connectionist modeling by actually doing connectionist modeling. Students will first play with toy problems to learn various types of connectionist modeling techniques, and will then carry out a team research project. In addition to practical skills, students will learn to be explicit about their assumptions and reasoning when making their (conceptual or implemented) models and to make new observable predictions that can be tested in experiments. Recommended Course Background: Experience with some programming language. Exceptions can be made by seeking instructor’s permission.
Instructor(s): P. Cho
Area: Natural Sciences, Quantitative and Mathematical Sciences.

Through a series of case studies, we will examine contemporary approaches to integrating the perspectives and research methods of multiple sub-disciplines of cognitive science. Also offered as AS.050.646.
Prerequisites: AS.050.326, or instructor’s permission required.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.501. Readings in Cognitive Science/Freshmen. 1 - 3 Credit.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.502. Readings in Cognitive Science-Freshmen. 1 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.503. Research in Cognitive Science/Freshmen. 1 - 3 Credit.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.504. Research Cognitive Science-Freshmen. 1 - 3 Credit.
Permission Required.
Instructor(s): Staff.

Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.506. Readings in Cognitive Science-Sophomores. 1 - 3 Credit.
Permission Required.
Instructor(s): Staff.

AS.050.572. Research-Intersession. 1 - 3 Credit.
Instructor(s): Staff.

Instructor(s): Staff.

Instructor’s permission required. (Also offered as AS.050.312.)
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.617. Semantics I.
This course is an introduction to the study of meaning in natural language. We address both the conceptual and empirical issues that a semantic theory must grapple with, as well as some of the formal machinery that has been developed to deal with such problems. After discussing foundational questions, we turn to formal semantics and pragmatics, as well as their interfaces with syntax and the lexicon. Specific topics covered include conversational implicature; presupposition, type-driven composition, quantification and scope, lexical aspect, argument structure, and the nature of lexical representations of meaning.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.
Vision is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd. While we take the visual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The goal of this course is to introduce students to the field of visual cognition, including existing theoretical frameworks and recent research findings. We will explore questions such as: How do we see the visual world? Do we see and remember correctly what's in the physical world? How many items can we keep track of and remember at a time? How is the visual system structured and what are the neural mechanisms underlying visual perception? Meets with AS.050.319. Recommended Course Background: AS.200.101, AS.050.101, or AS.080.203/AS.050.203
Instructor(s): S. Park.

AS.050.620. Syntax I.
Also offered as AS.050.320.
Instructor(s): G. Legendre.

AS.050.621. Syntax II.
Co-taught with AS.050.321. See description.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.622. Semantics II.
Co-taught with AS.050.322. See description.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.625. Phonology I.
Also offered as AS.050.325. See description.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. (Same as AS.050.326) Recommended Course Background: at least one course at the 300-level or higher in psychology.
Instructor(s): P. Smolensky.

Recommended Course Background: AS.050.101, AS.050.339/AS.050.639, AS.200.132, or instructor’s permission required.
Instructor(s): B. Landau.

Also offered as AS.050.333. See description.
Instructor(s): A. Omaki.

AS.050.635. Introduction to Connectionist Modeling of Cognition.
Connectionism is an approach to studying cognition in which cognitive processes are modeled by the behavior of interconnected networks of simple processing units. Connectionist models have shown the ability to provide a precise match to experimental data with human subjects, and have provided examples of how complex processes such as position-invariant face recognition could conceivably be implemented by networks of simple processing units. This course provides a hands-on introduction to connectionist modeling. In addition to readings, students will construct and run computer simulations of connectionist networks and study their properties, utilizing a public-domain neural network simulation package. We’ll study classic network architectures, as well as more recent developments. (Same as AS.050.335) Programming experience is helpful, but not required. Recommended Course Background: 100-level course in Cognitive Science or permission of instructor.
Instructor(s): D. Mathis.

Also offered as AS.050.339. Instructor approval required.
Instructor(s): J. Yarmolinskaya.

Also offered as AS.050.345. See description.
Instructor(s): N. Nozari.

It is recommended to have taken AS.050.626, but not required. Also offered as AS.050.446.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences.

Also offered as AS.050.370. See description.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.671. Bayesian Inference.
Also offered as AS.050.371.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.672. Foundations of Neural Network Theory.
Introduction to continuous mathematics for cognitive science, with applications to biological and cognitive network models: real and complex numbers, differential and integral multi-variable calculus, linear algebra, dynamical systems, numerical optimization. Meets with AS.050.372
Instructor(s): P. Smolensky.

Directed readings on current topics in cognitive science. Instructor approval required.
Instructor(s): Staff.

AS.050.800. Directed Readings.
Guided independent readings in special fields of cognitive science. Instructor(s): P. Smolensky.

Participants in this graduate seminar will read and discuss current research articles in cognitive neuropsychology of vision or language, and present their own research.
Instructor(s): M. McCloskey.
Permission required. Current issues and ongoing research on human cognition are discussed. 
Instructor(s): B. Rapp.

A specialized research seminar for individuals researching language acquisition, cognitive development and the interface between language and cognition. Students must actively carry out empirical or theoretical research in these areas. Permission required. 
Instructor(s): B. Landau.

Instructor(s): K. Rawlins.

Participants in this graduate seminar will read and discuss current research articles in language development and present their own research. Permission required. 
Instructor(s): G. Legendre.

Topics in phonological, morphological, syntactic, and/or semantic theory. Discussion of the current literature and specifically of the relevance of linguistic results for the study of the mind. Permission required. 
Instructor(s): A. Omaki; G. Legendre; K. Rawlins.

A critical analysis of current issues and debates in theoretical syntax. Discussion of on-going research. 
Instructor(s): G. Legendre.

AS.050.823. Research Seminar in Phonology.
Permission required. 
Instructor(s): C. Wilson.

AS.050.825. Research Seminar in Optimality Theory.
A specialized research seminar on constraint based theories of human language, including Optimality Theory, Harmonic Grammar, and Maximum Entropy models. 
Instructor(s): G. Legendre; P. Smolensky.

Readings and research presentations on varying topics in mathematics, computation, and formal linguistics with bearing on cognitive science. 
Instructor(s): C. Wilson.

AS.050.827. Research Seminar in Language Acquisition.
Focus is on current research in acquisition of syntax. 
Instructor(s): A. Omaki; G. Legendre.

This seminar will read on-going and recent papers on the cognitive neuroscience research of vision. Permission required. 
Instructor(s): S. Park.

Topics range from mathematical analysis of neural networks to computational studies of linguistic structure. Focus is ongoing research and current literature. 
Instructor(s): P. Smolensky.

AS.050.832. Research Seminar in Language Processes.
Current Topics in Human Language Processing, with discussion of recent developments in theory and experimental study. Permission required. 
Instructor(s): A. Omaki.

Current topics in any area of cognitive science, including language and vision, with discussion of recent developments in theory, experimental study, and computational modeling. 
Instructor(s): Staff.

AS.050.849. Teaching Practicum.
Permission required. Essential for Teaching Assistants. 
Instructor(s): Staff.

AS.050.850. Department Seminar.

Instructor(s): P. Smolensky.

Instructor permission required. Addresses professional issues such as research ethics, success on the job market and in an academic career, teaching and mentoring and differing professional standards in the sub-disciplines of cognitive science. 
Instructor(s): P. Smolensky.

Independent study. Intended for graduate students who have completed all degree requirements except for their dissertation but must remain or return to residency status in order to fulfill other obligations. Advisor or department approval required. 
Instructor(s): Staff.

Cross Listed Courses

Neuroscience

This course surveys theory and research concerning how the human brain carries out mental processes. The sections of this course correspond with the sections listed for AS.020.203. All sections will meet together on exams day and guest lecture days. Co-listed as AS.050.203 in Cognitive Science. 
Instructor(s): B. Rapp; S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.320. The Auditory System.
This course will cover the neuroanatomy and neurophysiology of the human auditory system from the ear to the brain. Behavioral, electrophysiological, and neuroimaging methods for assessing peripheral and central auditory function will be discussed. Acquired and developmental disorders of auditory function will be reviewed using clinical case studies. 
Prerequisites: AS.080.305 OR AS.080.203 OR AS.050.203 OR AS.200.141 OR AS.020.312 or permission of the instructor. 
Instructor(s): D. Boatman
Area: Natural Sciences.

Psychological Brain Sciences

Instructor(s): J. Halberda; L. Feigenson
Area: Social and Behavioral Sciences.
AS.200.367. Episodic Memory in Human and Nonhuman Animals. Episodic memory, or autobiographical memory, has been said to be a capacity that is uniquely human. Consisting of the what, when, and where components of our experiences, episodic memory is what makes each of us who we are. This course will explore each of these components individually—the psychology and neural underpinnings of each component—before discussing them in combination as episodic memory. Finally, we will visit one of the greatest ongoing debates in the memory literature: whether or not this ability is truly “uniquely human” or if our nonhuman animal counterparts also have this capacity. Throughout the course, we will draw on evidence from empirical articles based on studies in a variety of species including rodents, primates, and birds. **Prerequisites:** AS.200.101 OR AS.200.141 OR AS.080.105 OR (AS.080.305 AND AS.080.306) OR Permission required. **Instructor(s):** J. Asem **Area:** Natural Sciences, Social and Behavioral Sciences.

Morton K. Blaustein Department of Earth and Planetary Sciences

The Department of Earth and Planetary Sciences offers programs of study and research in a wide range of disciplines including the atmosphere, biosphere, oceans, geochemistry, geology and geophysics, and planets. The undergraduate program in Earth and Planetary Sciences is flexible and lets the student, in consultation with a faculty advisor, devise a program that is challenging, individual, and rigorous. The graduate program develops skills in research through independent investigation under the general guidance of one or more members of the faculty, backed up by relevant course work. The department gives particular emphasis to the integration of experimental investigation, theoretical calculation, and quantitative field observations.

The Department also offers an interdepartmental undergraduate program in Global Environmental Change and Sustainability. This program introduces students to the science of the Earth and its living and nonliving systems as well as how humans interact with Earth and its natural systems and how humans can use a variety of tools, such as policy, communication, individual and societal behavior change, and law to harm or help those systems. Students are exposed to theory, research, and the practical applications of both throughout their course work.

**Facilities**

The Department of Earth and Planetary Sciences is housed in Olin Hall, a modern building dedicated to the Earth sciences, nestled on a wooded knob on the western edge of campus. Its facilities include state-of-the-art instrumentation, a departmental library, and modern computer equipment. There are laboratories for crystallography, evolutionary biology/ecology, stable isotope geochemistry, materials science, and fluid and solid mechanics. Olin Hall also contains equipment for modern petrographic work (including a computer-controlled image analysis system), darkroom facilities, and a laboratory for sectioning rocks. There is also a substantial collection of rocks, minerals, and fossils. Facilities are available for a wide spectrum of fluid mechanical experiments, including thermal convection and solidification.

A JEOL 8600 electron microprobe in Olin Hall is available to all members of the department. Crystallographic facilities include a modern specimen preparation laboratory for transmission electron microscopy and single-crystal X-ray diffraction studies. The transmission electron microscopy laboratory houses state-of-the-art instruments capable of both high-resolution imaging at the atomic scale and microanalysis at the nanometer scale.

The department contains several computer laboratories containing clusters of workstations and personal computers, together with printers and scanners. These computers are used for numerical simulations, graphics applications, data manipulation, and word processing.

Field studies and excursions form an integral part of the program of instruction and research in geology and are closely integrated with the laboratory and course work. Situated at the fall line between the Coastal Plain and the Piedmont and only an hour’s ride from the Blue Ridge and Appalachians, Baltimore is an excellent location for a department with a field-oriented program in geology. The department has a permanent field station for geological research, Camp Singewald, in the Bear Pond Mountains of Washington County, Maryland, and a vehicle for field use.
## Earth and Planetary Sciences (EPS) Major

The EPS major is for undergraduates interested in the study of the physical, chemical, and biological processes that shape the Earth and the other planets. It is designed primarily for scientists who wish to have careers researching the science of the Earth and planets, although it is also suitable for students planning careers in the health professions. The GECS major is an interdepartmental program introducing students to the science of the Earth and its living and nonliving systems, as well as how humans interact with Earth and its natural systems, and how humans can use a variety of tools, such as policy, communication, individual and societal behavior change, and law to harm or help those systems.

In addition to major requirements, students are required to complete the university requirements for the B.A. degree. See Requirements for a Bachelor’s Degree (p. 20).

### Minor in EPS

The Earth and Planetary Sciences minor is for science undergraduates interested in applying their major discipline to Earth’s environment through geology, geochemistry, ecology, geobiology, oceanography, and atmospheric science. Students are expected to have at least 16 credits in Natural Sciences, Quantitative Studies, or Engineering courses. Students will take 12 credits in the department, at least six of which are at the 300-level. All courses must be taken for a letter grade and students must receive a grade of C- or better to apply the course towards the minor.

### Minor Requirements:

Three credits at any level of EPS courses

</table>
Six credits at the 300- or 400-level of EPS courses 6
Sixteen credits of natural, quantitative, or engineering courses * 16

Total Credits 28

* Preferably biology, chemistry, physics, math. Additional AS.270.xxx courses may not apply here. No AS.271.xxx courses may apply towards this minor.

Global Environmental Change and Sustainability (GECS) Major

The major in GECS is an interdepartmental program designed to provide students with a solid knowledge base of the science of the Earth and its living and nonliving systems, as well as how humans interact with Earth and its natural systems, including social science tools of change, such as policy, communication, individual and social behavior change, and law. Students will be exposed to theory, research, and the practical applications of both throughout their course work. Requirements for the major include a total of 24 courses (81 credits) if the Science concentration is chosen and 25 courses (78 credits) for the Social Science concentration.

All GECS majors must complete 13 “core” courses listed in Table 1 below. Additionally, students will choose either the Science concentration or the Social Science concentration to determine their additional course requirements. For the Science concentration, majors complete the additional science core courses and requirements listed in Table 2a. For the Social Science concentration, majors complete the additional requirements as listed in Table 2b. All courses must be taken for a letter grade and students must receive a grade of C- or better to apply the course towards the major.

The GECS Senior Capstone Experience involves the research, planning and execution of a tangible sustainability project on or off-campus. While working in groups (the size of which will depend on the nature and scale of the project), GECS Seniors will research, design and create/implement a sustainability project or initiative on campus or in Baltimore. All GECS Seniors enroll in the Capstone Seminar both in the fall and in the spring. The seminars are designed to facilitate measured progress on the capstone projects and ensure that the final product is meaningful and exceptional. All majors will make a presentation of their capstone experience to involved faculty, advisors, and fellow students at the end of their Senior year.

Table 1: Required Courses for all GECS Majors

** The lists of acceptable Earth and Environmental Science and Social Science Electives will be reviewed and updated annually by the Director, with guidance from the Advisory Committee. Courses no longer taught will be removed, although credit earned for courses that are removed will still count toward GECS major requirements as long as the course was on the list when it was taken, and new courses will be added. Relevant courses not included in the elective list may be able to be substituted for an elective with approval of the Director. Students wishing to make such a substitution should follow the procedure outlined on the major’s website.

**Honors in GECS Major**

To receive honors in GECS, you must have met the following criteria:

- Have a GPA of a 3.5 or higher in GECS courses.
- Receive an A on your capstone project.

**Minor in GECS**

The GECS minor consists of seven courses. All minors are required to take two core courses: Intro to Global Environmental Change provides the necessary content about the science of the Earth and its environments and Intro to Sustainability covers a thorough overview of the interactions between humans and the Earth’s systems and how those interactions could become sustainable. Students then have a choice of one of four other science courses that further explore a subset of interactions of humans with Earth’s living and nonliving systems, depending on the student’s area of interest. Students must choose two more courses from the list of Earth and Environmental Science Electives (Table 4) and two more courses from the list of Social Science Electives (Table 4). At least one course from each elective list must be upper level. A total of five Earth and Environmental Science courses provide the science basis of the minor, which is then rounded out with two relevant Social Science courses. Because students will be acquiring the methodological tools of their major discipline, this curriculum removes the science methodology required in the GECS major, while keeping the most important core content. All courses must be taken for a letter grade and students must receive a grade of C- or better to apply the course towards the minor.

Check the GECS major/minor web pages for latest information.

**B.A./M.S. Option for Johns Hopkins GECS Majors**

Undergraduates majoring in Global Environmental Change and Sustainability (GECS) may apply for accelerated status toward an M.S. in Environmental Science and Policy (ESP). These students should declare their intention to pursue the M.S. during their junior year or early in their senior year of undergraduate study by contacting either the undergraduate GECS Director, Cindy Parker (ciparker@jhsph.edu)
or the Director of the ESP Program, Antoinette Winklerprins (antoinette@jhu.edu). GECS students may apply up to three courses taken as undergraduates toward the M.S. in Environmental Science and Policy thereby leaving only seven more courses to complete the M.S. following receipt of their B.A.

Application

GECS students may apply for the B.A./M.S. anytime during the senior year or up to one year following the conferral of their B.A. The application procedure is the same as that of other AAP applicants and details are found online at: http://advanced.jhu.edu/admissions/index.html. Students admitted to the B.A./M.S. program will be assigned a graduate advisor, but will continue to be advised by their GECS advisor for all matters concerning the B.A. degree.

Course Requirements For B.A./M.S.

GECS students will receive two separate degrees and so the requirements of both degrees must be fulfilled. Students may not earn the M.S. degree without completion of the B.A., however, students who do not complete the M.S. retain their B.A. GECS B.A./M.S. students must complete all the requirements of the M.S. in ESP and may opt for either the general ESP degree or a concentration. Up to three courses completed while an undergraduate can count toward the ten courses required for the M.S. Specifically, up to two of the following courses can be used to satisfy the corresponding core course requirements for the M.S. in Environmental Science and Policy.

<td>3</td>
</tr>
</tbody>
</table>

(Note that the Environmental Policymaking and Policy Analysis course will be a combined GECS undergraduate and ESP masters class.)

If a student wishes to apply a third course to both their GECS B.A. and their ESP M.S., the course must be approved by the graduate advisor and must be at the 300- to 600- level with content germane to environmental science and policy.

Requirements for Admission

Applicants must submit transcripts, Graduate Record Examination scores (aptitude exam only), and supporting letters to show their ability to do advanced study. The applicant should have his/her GRE scores, verbal and quantitative aptitude, sent to the department before the January 15 deadline for filing applications for admission.

The department expects applicants for advanced degrees to have completed undergraduate training in the basic sciences and mathematics. Normally this includes mathematics through at least integral calculus and a year’s course each in physics, chemistry, and biology. Further undergraduate study in one or more of these subjects or in mathematics is highly desirable for all programs in the Earth sciences; additional mathematics is essential for geophysics, atmospheric sciences, and dynamical oceanography. Extensive undergraduate work in Earth sciences is not a requirement for admission. If students lack formal training in this area or have deficiencies in the other related sciences, they may be admitted but will have to allow additional time in the graduate program to make up for deficiencies in their preparation.

Requirements for Advanced Degrees

Candidates for the Ph.D. must take courses and meet requirements specified by their advisory committee; must pass a comprehensive examination before a departmental committee and an oral examination administered by the Graduate Board of the university; and must submit an acceptable dissertation involving significant original research. A minimum of two consecutive terms registered as a full-time student is required.

The department rarely accepts candidates for the M.A. degree alone, but Ph.D. students can, with the consent of their advisors, complete a program that will qualify them for the M.A. degree at the end of the second year. Candidates for this degree must pass a comprehensive examination before a departmental committee, and must satisfy the residency requirement specified above for the Ph.D. degree. A student’s advisor may require an essay demonstrating research capability.

For further information about graduate study in the Earth and planetary sciences contact the Chair, Department of Earth and Planetary Sciences.

Fields of Graduate Study and Research

The department offers numerous graduate fields: sedimentology, geochemistry and petrology, mineralogy and crystallography, paleobiology, solid Earth geophysics, oceanography, atmospheric sciences, and planetary astrophysics. Descriptions of these fields and their various programs are given below.

Petrology

Modern research in petrology requires a flexible approach combining thermodynamics, solution chemistry, experimental petrology, and careful field observation. The department offers a broad range of courses that provide a thorough background in these areas and a detailed review of research to date. In addition to the facilities available on campus, those at the Geophysical Laboratory and the Department of Terrestrial Magnetism of the Carnegie Institution of Washington, the Smithsonian Institution, the University of Maryland, and the U.S. Geological Survey in Reston are available to students and faculty through a cooperative arrangement.

The program in mineral igneous-petrology is concerned with the chemistry and physics of the origin and evolution of magma. All aspects of the generation, extraction, ascent, cooling, kinetics of crystallization, convection, differentiation, eruption, and flow are considered in detail. The results of high temperature melting experiments as well as detailed chemical analysis are applied to these problems. A nontraditional approach to petrological problems is emphasized through an analytical treatment of volcanological field work. Students are encouraged to take thermodynamics, fluid mechanics, and heat transfer, in addition to AS.270.395 Planetary Physics and Chemistry, AS.270.652 Physics Of Magma, and AS.270.604 Sem:Geophysical Petrology.

The program in metamorphic petrology emphasizes studies of petrogenesis involving field work, chemical, and stable isotope analysis of rocks and minerals, fluid inclusion studies, interpretation of textures and structures, laboratory phase equilibrium studies, and computer modeling of metamorphic processes. Analytical data from mineral assemblages are rigorously interpreted within the framework of chemical thermodynamics and transport theory.
Mineralogy and Crystallography

An understanding of crystal structure and the subsolidus behavior of minerals is fundamental to the interpretation of many geological phenomena. The program in mineralogy and crystallography stresses the application of crystallographic theory and experimental approaches to petrologically, environmentally, and geophysically relevant mineral systems.

Research in crystal chemistry utilizes X-ray techniques but more strongly emphasizes the application of high-resolution transmission electron microscopy, electron diffraction, and analytical transmission electron microscopy. The electron microscopy laboratory in the Department of Earth and Planetary Sciences is used to investigate the defects and mechanisms of solid-state reactions in minerals, mechanisms of crystal growth, the structures of fine-grained and disordered geological materials, the chemical and structural variations in synthetic run products and the structures of grain boundaries in rocks.

Geochemistry

The program in molecular surface geochemistry emphasizes fundamental research in how the Earth’s environment changes because of interactions between natural waters, minerals and rocks, and living organisms. It emphasizes understanding of the chemical reactions at water-electrolyte-mineral-biomolecule interfaces. Students are encouraged to undertake quantitative studies integrating field, laboratory, and theoretical methods that permit a predictive approach to a wide variety of geochemical and biogeochemical processes including weathering and soil formation, life in the oceans, the migration of toxic species in the environment, the binding of medical implants in the human body, and the role of mineral surface reactions in the origin of life. Collaborative research possibilities are available through joint projects with the geobiology program in the department, and at the Geophysical Laboratory of the Carnegie Institution of Washington.

The program in stable isotope geochemistry focuses on development and application of geochemical tools that allow for reconstruction and understanding of phenomena such as climate, ecology, biogeochemical cycling, tectonics, sedimentation, and metamorphism. Group members work on questions ranging from paleoenvironments of human evolution, history of the Tibetan Plateau and East Asian monsoons, global expansion of savanna grasslands, niche partitioning among fossil mammals, and temperatures of dolomite formation. Students may pursue their own research interests, and are encouraged to become proficient in all aspects of the science, including instrumentation and laboratory methods, fieldwork, theory, and modeling.

Sedimentology Systems

The teaching and research program in sedimentary systems is dedicated to understanding interactions between sediments, organisms, climate and tectonics in the Earth’s past. This program combines sedimentology, paleontology, geochronology, and geochemistry to study Earth history from sedimentary archives. Field and laboratory observations are equally essential to this kind of research, and students are expected to become proficient in both. Through course work and research students should develop literacy in a combination of disciplines, which may include but are not limited to stratigraphy, geochemistry, paleontology, ecology, geomorphology, geochronology, soil science, and meteorology. Interdisciplinary interactions are encouraged within the Earth and Planetary Science department and with members of other departments at Hopkins, such as the Department of Geography and Environmental Engineering in the School of Engineering and the Center for Functional Anatomy and Evolution in the Medical School.

Geobiology and Paleoclimate

Research emphases within this discipline include soil ecology, soil formation, biohydrolgy, plant-soil-animal interactions, biogeochemical cycling, paleoecology, and paleoclimateology. Methods of stable isotope geochemistry are used to investigate changes in the cycling of C, H, N, and O through Earth history. Students are invited to participate in ongoing collaborations with the Baltimore Ecosystem Study (Long-Term Ecological Research Site), Smithsonian Environmental Research Center, or to design an original research project under the advisement of our faculty. Instrumentation in the Department of Earth and Planetary Sciences includes stable isotope mass spectrometry, scanning electron microscopy, microprobe and transmission electron microscopy; fieldwork is ongoing at several international sites.

All Ph.D. students are expected to have a background of physics, chemistry, calculus, general biology, and sedimentary geology. Deficiencies can be made up in the first semesters at Hopkins. Students take a core program of statistics, Earth history, stable isotope geochemistry, and ecology. In conjunction with the Department of Geography and Environmental Engineering, Earth and Planetary Sciences offers course work opportunities in Aquatic Chemistry, Plant and Animal Ecology, Geobiology, Analytical Environmental Chemistry, and Sedimentary Geochemistry.

Oceans, Atmospheres, and Climate Dynamics

The oceans, atmospheres, and climate dynamics program focuses on the study of physical processes in the oceans and atmosphere, the interaction between the ocean, atmosphere and land surface, and their role in climate. The philosophy underlying the department’s program is a rigorous and thorough background in the physics of fluids and radiation, and their applications to climate and environmental problems, applied mathematics, laboratory experiments, and observations. Problems in radiative transfer and the dynamics of atmospheres and oceans are attacked by theory, laboratory or numerical experiments, and field observations. Johns Hopkins is a member of the University Corporation for Atmospheric Research.

The best preparation for graduate study in this program is an undergraduate degree in physics, applied mathematics, mechanical engineering, or another parent science such as chemistry or geology/geophysics. Prior course work in fluid dynamics, while highly desirable, is not mandatory to pursue graduate study in this area. It is essential to have a broad background in the parent sciences, specialization in one of them, and at least three years of undergraduate mathematics.

Research in physical oceanography focuses on the processes that maintain the global ocean circulation and the oceans’ role in climate and global biogeochemical cycling. In particular, attention is on the role of waves, eddies, and small-scale mixing in controlling the oceans’ part in Earth’s heat balance. We also study advection, stirring, and mixing processes in the interior ocean and their roles in dispersing atmospheric trace gases and nutrients.

Research in atmospheric dynamics focuses on large-scale dynamics, the transport of trace constituents, and understanding the composition of the global atmosphere (e.g., distributions of stratospheric ozone and tropospheric water vapor). Current interests include stratospheric vortex
dynamics, troposphere-stratosphere couplings, transport and mixing processes, and global modeling of chemical constituents.

Research on climate and radiation includes study of the global climate system and its response to radiative forcing due to changes in greenhouse gases and solar luminosity, the feedback effects of water vapor and clouds, and the radiative and hydrological effects of aerosols. These studies involve global and regional scale modeling, and the analysis and interpretation of satellite observations.

Research on climate also includes studies on the interplay between atmospheric variability and surface processes, including hydrological states and fluxes, human modification of the landscape, and ecosystem activities. This research employs satellite image analysis, numerical modeling, and field observation to build a process-based understanding of the ways in which climate shapes landscape and vice versa. Particular emphasis is devoted to the impact of climate variability on fresh water resources.

A new program of research, combining physical oceanography and atmospheric science, focuses on the role of ocean-atmosphere interactions in the climate of the North Atlantic region. The task is to isolate and understand the predictable mechanisms that govern mid-latitude climate oscillations lasting several years.

A new program of research in global biogeochemical cycling, focuses on applying and developing large-scale computational models that can be combined with observations remotely sensed data to characterize cycling of key elements (including carbon, nitrogen, and oxygen) in the earth system. Opportunities exist to link this work to the observational geochemistry work done in the department as well as to stimulate key periods and transitions in Earth History.

**Solid Earth Geophysics**

Solid Earth geophysics is the study of our planet’s interior. Our overarching goals are to understand the formation, structure, composition, and dynamics of the Earth as a whole, and their relationship to geological and surface environmental processes today, in the past, and in the future.

Modern geophysics requires an integrated approach that combines geology, solid and fluid mechanics, seismology, gravity, magnetism, and planetology. Students following the geophysics program are therefore encouraged to take advanced mathematics (including numerical modeling), classical physics, solid and fluid mechanics, as well as a broad range of EPS course work that includes geology, geochemistry, geophysics, and planetary science.

Some examples of broad-based geophysics research topics in EPS include study of Earth’s magnetic field, the surface expression of Earth’s “geodynamo,” which is powered by fluid flow in the Earth’s metallic core. Similarly, earthquakes arise from tectonic forces that are ultimately produced by large-scale motions of the Earth’s rocky interior, which moves at rates of a few cm per year. Much of earth’s surface topography, the presence of Earth’s ocean basins, and several physical and geochemical aspects of Earth’s surface environment, are a direct consequence of plate tectonics, which governs the internal dynamics of our planet. Volcanism and magma dynamics are other examples of fundamental processes that shape the Earth and its environment, a study that integrates geology, solid and fluid mechanics, and geochemistry.

Professors Olson and Marsh specialize in study of Earth’s interior and its influence on the surface environment, and Professor Strobel specializes in the study of the other planets, with emphasis on their atmospheres and magnetospheres.

**Planetary Atmospheres/Astrophysics**

The program in planetary astrophysics emphasizes the study of planetary atmospheres and magnetospheres. A broad range of fundamental problems in atmospheric chemistry, dynamics, physics, and radiation pertinent to the atmospheres of the giant planets and their satellites is addressed with the goal to understand the global structure of composition, pressure, temperature, and winds. The study of magnetospheric plasma interactions with extended satellite atmospheres is focused on the energy balance, ionospheric structure, and radiative output of their upper atmospheres, and the mass loading rates of the parent planets’ magnetospheres. The atmospheres and magnetospheres of the planets are investigated with the aid of theoretical models and the analysis and interpretation of data acquired by ground-based, Hubble Space Telescope, and satellite observations. Professor Strobel is an interdisciplinary scientist on the Cassini/Huygens Mission. An in-depth study of the Saturnian system is being conducted with the Cassini spacecraft and Huygens Probe. He is also a co-investigator on the New Horizons Pluto Kuiper-belt mission, which was successfully launched on January 19, 2006, and will arrive at Pluto in July 2015, after flying by Jupiter during February 2007 and performing observations of the Jovian system.

This research program is closely coordinated with the astrophysics program in the Department of Physics and Astronomy. Students are encouraged to take courses in astrophysics, chemistry, physics, and applied mathematics to gain the comprehensive background necessary for interdisciplinary research. The best undergraduate preparation is a broad background in physics, applied mathematics, and physical chemistry with a minimum of three years of course work in two of these fields. Advanced undergraduate courses in classical mechanics, fluid mechanics, electricity and magnetism, thermodynamics, and quantum mechanics are strongly recommended. The facilities of the Center for Astrophysical Sciences and the Space Telescope Science Institute are available for thesis research.

**Financial Aid**

The university makes available to the department a number of Gilman Fellowships, which provide for complete payment of tuition, together with Johns Hopkins’ fellowships and graduate assistantships that carry a nine-month stipend. Graduate assistantships cannot require more than 10 hours a week of service to the department, and all recipients of financial aid carry a full program of study. In addition, a number of special and endowed fellowships pay as much or more. In many areas of study, summer support is also available.

Applications for admission to graduate study and financial aid (including all supporting documents and GRE scores) should be submitted to the department before January 15.

For current faculty and contact information go to http://eps.jhu.edu/directory/

**Faculty**

**Chair**

Thomas W. N. Haine
physical oceanography.

**Professors**

Peter L. Olson  
geophysical fluid dynamics.

Darrell F. Strobel  
planetary atmospheres and astrophysics.

Dimitri Sverjensky  
molecular surface geochemistry and environmental geochemistry.

Darryn W. Waugh  
atmospheric dynamics.

**Associate Professor**

Anand Gnanadesikan  
biogeochemical oceanography.

**Assistant Professors**

Sarah Horst  
atmospheric chemistry, planetary atmospheres.

Naomi E. Levin  
sedimentary geology, stable isotope ecology.

Kevin Lewis  
planetary geology and geophysics.

Benjamin H. Passey  
geochronology, paleoecology, paleoclimate.

Benjamin Zaitchik  
climatology, surface hydrology.

**Professors Emeriti**

John M. Ferry  
metamorphic geology.

George W. Fisher  
global earth systems and religious ethics.

Bruce D. Marsh  
igneous petrology and geophysics.

David R. Veblen  
crystallography.

**Research/Teaching Faculty**

Albert Arking  
Principal Research Scientist: atmospheric sciences.

Linda Hinov  
Research Professor: quantitative stratigraphy and paleoclimatology.

Alexios Monopolis  
Lecturer: global change and sustainability.

Sakiko Olsen  
Senior Lecturer: metamorphic petrology.

Richard Stolarski  
Research Professor: atmospheric chemistry.

Katalin Szlavecz  
Research Professor: soil ecology.

**Joint Appointments**

Nathan Bridges  
Associate Research Professor, Applied Physics Laboratory.

Robert A. Dalrymple  
Professor, Civil Engineering.

Carlos E. Del Castillo  
Associate Research Professor, NASA Goddard Space Flight Center.

Jocelyne DiRuggiero  
Associate Research Professor, Biology.

Ciaran Harman  
Assistant Professor, Geography and Environmental Engineering.

Michael Harrower  
Assistant Professor, Near Eastern Studies.

Kevin J. Hemker  
Professor, Mechanical Engineering.

Markus Hilpert  
Associate Research Scientist, School of Public Health.

Takeru Igusa  
Professor, Civil Engineering.

Cindy L. Parker  
Assistant Professor, Environmental Health Sciences.

K.T. Ramesh  
Professor, Mechanical Engineering.

Kenneth Rose  
Professor, Functional Anatomy and Evolution.

William Swartz  
Associate Research Professor, Applied Physics Laboratory.

Peter Wilcock  
Professor, Geography and Environmental Engineering.

Courses

AS.270.102. Freshman Seminar: Conversations with the Earth.
A discussion of topics on Earth’s origin, evolution, and habitability. Students will be introduced to the role that scientific thinking and process play in research and our understanding of Earth systems. We will cover a broad foundation of knowledge of Earth sciences, including solid earth, atmospheric, and oceanic systems, as well as topics concerning the origin of life, evolution, ecosystems, and mass extinctions. And we will discuss the relation of these systems to societal concerns such as climate change, energy resources, mineral and ore needs in industry, and nuclear waste storage and risk assessment. We are returning to the original seminar format for this class, with a limit of 15 students. We are looking for students who are willing to engage in frequent class discussion with instructors and classmates to ensure they acquire a broad understanding of the subject matter. This will be a 3 credit course with homework to be completed each week and a term paper submitted at the end of the semester.
Instructor(s): A. Charrier
Area: Natural Sciences.

AS.270.103. Introduction to Global Environmental Change.
A broad survey of the Earth as a planet, with emphasis on the processes that control global changes. Topics include: the structure, formation, and evolution of the Earth, the atmosphere, oceans, continents, and biosphere. Special attention is given to present-day issues, such as global climate change, natural hazards, air pollution, resource depletion, human population growth, habitat destruction, and loss of biodiversity. Open to all undergraduates.
Instructor(s): D. Waugh; P. Olson
Area: Natural Sciences.

AS.270.107. Introduction to Sustainability.
Will introduce interactions between global environment and humans, discuss meaning of sustainability, and introduce use of tools to attain sustainability such as policy, law, communication, marketing, research, advocacy, international treaties.
Instructor(s): C. Parker
Area: Natural Sciences.

AS.270.108. Oceans + Atmospheres.
This course is a broad survey of the Earth’s atmosphere and oceans, and their role in the environment and climate. Topics include: weather systems, atmosphere and ocean circulation, hurricanes and tornadoes, and global warming.
Instructor(s): A. Gnanadesikan; T. Haine
Area: Natural Sciences.

AS.270.110. Freshman Seminar: Sustainable + Non-Sustainable Resources.
An introduction to the important resources involved in the origin and production of oil, natural gas, coal, cement, metals and geothermal fluids.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.113. Freshman Seminar: Environmental Poisons.
An exploration of the occurrence and potential effects of poisons in the environment, from naturally occurring ones such as arsenic to those that may be introduced by mankind such as nuclear waste.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

An introduction to planetary science and planetary exploration primarily for non-science majors. A survey of concepts from astronomy, chemistry, geology, and physics applied to the study of the solar system.
Instructor(s): D. Strobel; K. Lewis
Area: Natural Sciences.

AS.270.115. Environmental Photojournalism and Filmmaking in the Era of New Media.
Students will review critical literature focusing on new media, visual representation theory, the relationship between images and social change, the history and typology of environmental photography and film, and an overview of modern environmental history, sustainability issues and environmental problems. Over the course of the semester, students will blend these conceptual frameworks with new media production. Based in Baltimore, students will identify an environmental narrative, document their particular story through photography or film, develop a new media platform through which to communicate that narrative effectively, and write a final paper analyzing their images, narrative and communication strategies using the theoretical frameworks covered throughout the course. The course is designed with an emphasis on independent research and practice, interdisciplinary analysis and application. One hour class time, plus two hours per week of independent field work and media production (times TBD by student groups)
Instructor(s): A. Monopolis
Area: Natural Sciences.

AS.270.116. Freshman Seminar: An Introduction to Climate Change.
This course introduces the main physical components of the Earth’s climate systems and their documented and forecasted changes. The first part of the course presents evidences of climate change in Earth’s history, and introduces the main natural and anthropogenic drivers of climate change. The second part of the course focuses on future climates, and includes modules about climate modeling, building of emission scenarios, geoengineering, emission reductions and adaptability. The course is highly interdisciplinary, exploring the relationships among climate science, policy, ecology, economy and ethics. Freshmen Only. No prerequisites required.
Instructor(s): V. Aquila
Area: Natural Sciences.

AS.270.201. Dinosaurs.
This course covers all of the major groups of dinosaurs, from Triceratops to T. Rex and their relatives living, today birds. It will also cover the origins of the group, their near demise 65 million years ago, their behavior, growth and development, and a history of their study.
Instructor(s): D. Weishampel
Area: Natural Sciences.

AS.270.205. Introduction to Geographic Information Systems and Geospatial Analysis.
The course provides a broad introduction to the principles and practice of Geographic Information Systems (GIS) and related tools of Geospatial Analysis. Topics will include history of GIS, GIS data structures, data acquisition and merging, database management, spatial analysis, and GIS applications. In addition, students will get hands-on experience working with GIS software.
Instructor(s): X. Chen
Area: Engineering, Natural Sciences.
**AS.270.210. Environmental Field Methods.**
This course is designed to introduce students to field based environmental research with a focus on the ecology and geochemistry of the surface and sub-surface environment. Field activities will center around soils and the carbon cycle in the riparian ecosystem adjacent to the Homewood campus and on the urban ecology of the greater Baltimore region. Students will build skills in data collection, analysis and synthesis. Outdoor fieldwork is an essential part of the course.

**Prerequisites:** AS.270.103 OR AS.270.220.
Instructor(s): K. Szlavecz; N. Levin
Area: Natural Sciences.

**AS.270.220. The Dynamic Earth: An Introduction to Geology.**
Basic concepts in geology, including plate tectonics; Earth’s internal structure; geologic time; minerals; formation of igneous, sedimentary, and metamorphic rocks; development of faults, folds and earthquakes; geomagnetism. Corequisite (for EPS Majors): AS.270.221; optional for others.

**Prerequisites:** Prerequisite or Corequisite: AS.030.101 OR ( AS.171.101 AND AS.171.102 ) or equivalent. AS.270.221 is a corequisite for EPS majors.
Instructor(s): B. Passey
Area: Natural Sciences.

**AS.270.221. The Dynamic Earth Laboratory.**
This course is a hands-on learning experience for introductory geological concepts and techniques using geological tools, such as mineral/rock samples, microscopes, and maps. Field trips are its essential part.

**Prerequisites:** Corequisite: AS.270.220
Instructor(s): A. Charrier
Area: Natural Sciences.

**AS.270.222. Earth Materials.**
An introduction to the properties, occurrence, and origin of the basic constituents of the Earth, including minerals and rocks. Introductory training in the recognition of minerals and rocks in the laboratory and the field.

**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): A. Charrier
Area: Natural Sciences.

**AS.270.224. Oceans & Atmospheres.**
A broad survey of the Earth’s oceans and atmospheres, and their role in the environment and climate. Topics covered include waves, tides, ocean and atmosphere circulation, weather systems, tornadoes and hurricanes, El Niño, and climate change. For science and engineering majors

**Instructor(s):** A. Gnanesikan; D. Waugh
Area: Natural Sciences.

**AS.270.301. Geochemical Thermodynamics.**
Principles of chemical thermodynamics. Concept of and criteria for equilibrium. Properties of real fluids and solids. Applications to geologic processes. Recommended Course Background: AS.270.341

**Prerequisites:** AS.270.222 or equivalent or permission of instructor
Instructor(s): J. Ferry
Area: Natural Sciences.

**AS.270.302. Aqueous Geochemistry.**
Thermodynamic basis for calculation of equilibria involving minerals and aqueous species at both low and high temperatures and pressures. Theoretical calculation of surface geochemical processes including adsorption and dissolution kinetics.

**Instructor(s):** D. Sverjensky
Area: Natural Sciences.

**AS.270.305. Energy Resources in the Modern World.**
This in-depth survey will inform students on the non-renewable and renewable energy resources of the world and the future prospects. Topics include petroleum, natural gas, coal, nuclear, hydropower, geothermal, solar, wind, biomass, and ocean energy. Global production, distribution, usage, and impacts of these resources will be discussed.

**Instructor(s):** J. Burgess
Area: Natural Sciences.

**AS.270.307. Geoscience Modelling.**
An introduction to modern ways to interpret observations in the context of a conceptual model. Topics include model building, hypothesis testing, and inverse methods. Practical examples from geophysics, engineering, and medical physics will be featured.

**Instructor(s):** T. Haine
Area: Natural Sciences.

**AS.270.308. Population/Community Ecology.**
This course explores the distribution and abundance of organisms and their interactions. Topics include dynamics and regulation of populations, population interactions (competition, predation, mutualism, parasitism, herbivory), biodiversity, organization of equilibrium and non-equilibrium communities, energy flow, and nutrient cycles in ecosystems. Field trip included. Permission of instructor.

**Prerequisites:** AS.270.103 or permission of instructor
Instructor(s): K. Szlavecz
Area: Natural Sciences.

**AS.270.309. Designing Sustainable Wellness.**
Limited to juniors, seniors and graduate students. Otherwise permission of instructor. This project-based course will explore and re-imagine interdisciplinary conceptual frameworks aimed at promoting “sustainable wellness” (the convergence of social and ecological sustainability) within the built environment (the space, structures and systems humans generate for living, working and playing). Beginning with a conceptual overview of sustainability, the science of happiness, and design/planning principles, students will review relevant case studies and complete a final, hands-on, community-based studio project.

**Instructor(s):** A. Monopolis; C. Parker
Area: Social and Behavioral Sciences.

**AS.270.311. Geobiology.**
A survey of the interactions between geological and biological processes at and near the Earth’s surface, covering topics such as biogeochemistry and nutrient cycles, soil chemistry, biomarkers, archives of paleobiology, and the evolution of life, with an emphasis on terrestrial systems. Recommended Course Background: AS.270.220

**Instructor(s):** N. Levin
Area: Natural Sciences.
AS.270.312. Mammalian Evolution.
An introduction to the evolutionary history and diversity of mammals, with emphasis on the first half of the Cenozoic - the beginning of the Age of Mammals. The course will focus primarily on the adaptive radiation of mammals (including our own order primates) that followed the extinction of the dinosaurs, exploring the origins and relationships of the major groups of mammals as well as the anatomical and ecological reasons for their success. Lectures will be supplemented with relevant fossils and recent specimens.
Instructor(s): K. Rose
Area: Natural Sciences.

AS.270.313. Isotope Geochemistry.
Instructor(s): B. Passey
Area: Natural Sciences.

AS.270.314. Planetary Tectonics and Geodynamics.
Fundamental physical processes relevant to interiors of terrestrial planets and icy satellites. Topics include: stress and strain; elasticity and flexure; rheology; internal structure; thermal evolution; fluid mechanics; tectonics; and faulting. Recommended Course Background: AS.110.108-AS.110.109 or equivalent; AS.171.101 or AS.171.105 or equivalent; AS.110.202 or equivalent.
Instructor(s): J. Roberts; O. Barnouin
Area: Natural Sciences.

AS.270.315. Natural Catastrophes.
A survey of naturally occurring catastrophic phenomena, with emphasis on the underlying physical processes. Topics include: hurricanes, tornadoes, lightning, earthquakes, tsunamis, landslides, and volcanic eruptions and climate change. Intended for students in science and engineering.
Instructor(s): P. Olson
Area: Natural Sciences.

AS.270.316. Planets.
This course will serve as an introduction to planetary science at a more advanced level than AS.270.114. Topics covered will include formation of the solar system, planetary interiors, surfaces and atmospheres, solar system exploration, and extrasolar planets. Recommended Course Background: AS.270.220 and AS.270.224.
Instructor(s): S. Horst
Area: Natural Sciences.

In this course, students examine the meaning and implications of biodiversity with a focus on disciplines associated with conservation biology, wildlife conservation and wildlife management, including taxonomy, genetics, small population biology, chemical and restoration ecology, and marine biology. This includes exploring how conservation biology differs from other natural sciences in theory and in application. Students learn the major threats to biodiversity and what natural and social science methods and alternatives are used to mitigate, stop, or reverse these threats. The course also includes the economic and cultural tradeoffs associated with each conservation measure at the global, national, regional, and local levels. One required field trip.
Instructor(s): J. Burgess
Area: Natural Sciences.

This course is an introduction to the use of remote sensing technology to study Earth’s physical and biochemical processes. Topics covered include remote sensing of the atmosphere, land and oceans, as well as remote sensing as a tool for policy makers. Also offered as 270.618
Instructor(s): B. Zaitchik; C. Del Castillo
Area: Natural Sciences.

AS.270.323. Ocean Biogeochemical Cycles.
This course will examine the cycling of trace chemicals in the ocean, consider what we can learn from the distributions of these chemicals about the ocean circulation, and ocean ecosystems. Topics covered will include oceanic biological productivity, open water cycling of nutrients and oxygen, ocean acidification and sediment cycling.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.325. Introductory Oceanography.
This class is an introduction to a wide range of physical, chemical, and biological phenomena in the world’s oceans. Underlying basic principles are exposed wherever possible. Topics covered include: seawater, waves, tides, ocean circulation, chemical oceanography, biogeochemical ocean processes, and remote sensing of the oceans. Recommended Course Background: freshman Physics, Chemistry, Calculus through ordinary differential equations.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.330. Atmospheric Chemistry.
This course will examine the structure and composition of the atmosphere and the processes that determine how the composition has changed in the past and might change in the future. Emphasis will be on the chemistry of the stratospheric ozone layer. The chemistry of the troposphere and air pollution will also be covered. Prerequisites: AS.110.106 Calculus I and AS.110.109 Calculus II
Instructor(s): R. Stolarski
Area: Natural Sciences.

AS.270.332. Soil Ecology.
The course introduces basic aspects of cycles and flows in the soil ecosystem, and provides students with an overview of the higher groups of soil organisms. Laboratory and field surveying methods are also covered.
Instructor(s): K. Sziavecz
Area: Natural Sciences.

AS.270.335. Planets, Life and the Universe.
This multidisciplinary course explores the origins of life, planets’ formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions, and planetary protection.
Prerequisites: Students may not register for this class if they have already received credit for AS.171.333 or AS.020.334.
Instructor(s): C. Norman; J. Diruggiero
Area: Natural Sciences.
The overall origin and evolution of the terrestrial-like planets in the Solar System is discussed and analyzed. As a starting point the detailed structure and dynamics of Earth is presented from the perspectives of seismology, gravity, geomagnetism, and volcanism. Extensions are also made to the origin, structure, and present state of the moons of Jupiter and Saturn and other icy bodies. Recommended Course Background: calculus through differential equations, physics, and chemistry, some grounding in Earth and/or Planetary Sciences.
Instructor(s): B. Zaitchik
Area: Natural Sciences.

AS.270.350. Sedimentary Geology.
Introduction to sedimentary processes and sedimentary rocks. Focus is placed on linking physical observations to earth surface processes. Fundamental tools for interpreting the sedimentary rock record, such as depositional models, geochronology, and chemostratigraphy are reviewed. Weekend field trips. Graduate and advanced undergraduate level. Recommended Course Background: AS.270.220 or instructor permission.
Instructor(s): N. Levin
Area: Natural Sciences.

This course will investigate the policy and scientific debate over global warming. It will review the current state of scientific knowledge about climate change, examine the potential impacts and implications of climate change, explore our options for responding to climate change, and discuss the present political debate over global warming.
Prerequisites: AS.270.103 or permission
Instructor(s): B. Zaitchik
Area: Natural Sciences.

An introduction to all aspects of Geochemistry: theoretical, experimental, and observational, including the application of geochemistry to issues such as the migration of toxic metals and nuclear waste.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.370. Climates Of The Past.
Earth’s climate history through study of forcing mechanisms, climate proxies, and paleoclimate modeling. Presentation of climate-sensitive archives will be followed by discussion of geochemical principles, climates through time, recent advances and emerging problems. For upper-level undergraduate and graduate students in the natural sciences. Recommended Course Background: AS.270.220 or instructor permission.
Instructor(s): L. Hinnov
Area: Natural Sciences.

AS.270.378. Present & Future Climate.
Intended for majors who are interested in the science that underlies the current debate on global warming, the focus is on recent observations one can glean from model simulations. Meets with AS.270.641.
Recommended Course Background: AS.110.108-AS.110.109 and AS.171.101-AS.171.102
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.270.395. Planetary Physics and Chemistry.
The fundamental principles governing the dynamic processes within and around the planets are treated in some detail. Core equations are developed and used to analyze nebula condensation, planetary accretion, convection in mantles and atmospheres, radiative and conductive heat transport, seismic waves, hurricanes, volcanism, and meteorite impacts, among others. Emphasis is on fundamentals and problem solving.
Prerequisites: AS.030.101; AS.171.101-102 or 103-104 or 105-106.
Instructor(s): D. Strobel
Area: Natural Sciences.

AS.270.396. Special Topics in Planetary Exploration.
Topics will vary from year to year based on current missions engaged in the exploration of our Solar System with the selection based on results that break new ground and rewrite textbooks. For the spring 2016 term the New Horizons Mission’s spacecraft flyby of the Pluto system will be the focus of the course. In addition to discussing results, the planning, execution of the observations, the retrieval, analysis, and interpretation of data will be presented to understand how missions evolve from concepts to the launch pad, and finally attainment of the science objectives. The fundamental principles necessary to understand chemical, geological, and physical processes within and around the planets will be introduced as needed. Recommended Course Background: Calculus, first year physics and chemistry, and introduction to differential equations are highly desirable.
Instructor(s): D. Strobel; K. Lewis
Area: Natural Sciences.

Transitioning from graduate school to a postdoc to a “permanent” job in the natural sciences requires a set of essential skills that are not covered as a formal component of most Ph.D. programs. This seminar will be a weekly discussion of career issues relevant to new scientists. Topics will include elements of good presentations, conferences, scientific writing and peer-review, employment trends, job interviews, and grant proposals. The class will conclude with a mock grant proposal review panel, conducted by the students. This seminar is aimed at graduate and advanced undergraduate students in the natural sciences planning careers in academia or industry.
Instructor(s): J. Roberts
Area: Natural Sciences.

AS.270.405. Modeling the Hydrological Cycle.
Survey of modeling techniques for hydrological monitoring, analysis and prediction, including applied exercises with commonly used models. Topics include the terrestrial water balance, rivers and floods, groundwater, atmospheric transport, and precipitation processes. Focus is on numerical methods applicable at the large watershed to global scale.
Instructor(s): A. Dezfuli; B. Zaitchik.
**AS.270.410. Planetary Surface Processes.**
This course explores processes that influence the evolution of planetary surfaces, including impact cratering, tectonics, volcanism, weathering, and sediment transport. These processes manifest themselves as structural deformation of planetary crusts due to loading by volcanoes, formation of craters by asteroid impacts, modification of surfaces by flowing landslides, rivers and glaciers, and the accumulation and transport of sand in dune fields on various planets. Emphasis is on the relationship to similar Earth processes, and the integrated geologic histories of the terrestrial planets, satellites, and asteroids. The focus will be on developing a physical understanding of these processes to interpret the surface characteristics and evolution of planets, satellites, asteroids, and comets from both qualitative assessments and quantitative measurements obtained from spacecraft data. A key component of the class will be the interpretation of these observations from recent and current planetary missions to the Moon, Mars, and other terrestrial bodies. Recommended Course Background: A sound knowledge of Calculus and Introductory Physics, and some prior knowledge of Earth and/or Planetary Science.
Instructor(s): K. Lewis
Area: Natural Sciences.

**AS.270.423. Planetary Atmospheres.**
Instructor(s): S. Horst
Area: Natural Sciences.

**AS.270.425. Earth & Planetary Fluids.**
An introductory course on the properties, flow, and transport characteristics of fluids throughout the Earth and planets. Topics covered include: constitutive relationships, fluid rheology, hydrostatics, dimensional analysis, low Reynolds number flow, porous media, waves, stratified and rotating fluids, plus heat, mass, and tracer transport. Illustrative examples and problems are drawn from the atmosphere, ocean, crust, mantle, and core of the Earth and other Planets. Open to graduate and advanced undergraduate students. Recommended Course Background: Basic Physics, Calculus, and familiarity with ordinary differential equations.
Instructor(s): P. Olson
Area: Natural Sciences.

**AS.270.495. Senior Thesis.**
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Earth and Planetary Sciences. Open to Sr. departmental majors only. Required for department honors.
Instructor(s): A. Gnanadesikan; B. Passey; Staff
Area: Natural Sciences.

**AS.270.496. Senior Thesis.**
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Earth and Planetary Sciences. Open to Sr. departmental majors only. Required for department honors.
Instructor(s): B. Passey; T. Haine.

**AS.270.501. Independent Study.**
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses.
Instructor(s): B. Marsh; B. Zaitchik; C. Parker; K. Szlavecz; Staff.

**AS.270.502. Independent Study.**
Instructor(s): A. Monopolis; P. Olson.

**AS.270.503. Independent Research.**
Instructor(s): B. Marsh; G. Ball; Staff.

**AS.270.504. Independent Research.**
Research under the direction of members of the Earth & Planetary Sciences Faculty.
Instructor(s): B. Passey; B. Zaitchik; K. Szlavecz; N. Levin.

**AS.270.505. GECS Senior Capstone Seminar.**
The GECS Senior Capstone Seminar will provide the intellectual time and space to bring together the knowledge and tools acquired during the four years of interdisciplinary work on the GECS curriculum into a coherent framework in preparation for careers, and/or graduate work. In addition to the culmination of the capstone project, final paper, and presentations, students will look at relevant current events through the lenses of science, social science and the humanities, and engage in in-depth readings and discussion of these issues.
Instructor(s): C. Parker.

**AS.270.507. Internship.**
Instructor(s): C. Parker.

**AS.270.571. Independent Research.**
Instructor(s): D. Waugh.

**AS.270.572. Independent Research.**
Instructor(s): B. Marsh; K. Szlavecz; N. Levin
Area: Natural Sciences.

**AS.270.595. Internship.**
Instructor(s): C. Parker; D. Sverjensky.

**AS.270.599. Independent Study.**
Instructor(s): A. Monopolis; B. Marsh; D. Sverjensky; K. Szlavecz; S. Stanley.

**AS.270.603. Geochemistry Seminar.**
A variety of topics of current interest involving mineral-fluid interactions will be reviewed.
Instructor(s): D. Sverjensky.

**AS.270.604. Sem:Geophysical Petrology.**
Discussion of present research topics in geophysics and igneous petrology.
Instructor(s): B. Marsh.

**AS.270.605. EPS Colloquium.**
A weekly seminar series in which graduate students present their latest research results and attend Departmental seminars. This course is required for all graduate students in the Department of Earth and Planetary Sciences.
Instructor(s): T. Wright.

**AS.270.606. EPS Colloquium.**
A weekly seminar series in which graduate students present their latest research results and attend Departmental seminars. This course is required for all graduate students in the Department of Earth and Planetary Sciences.
Instructor(s): T. Wright.
AS.270.607. Topics in African Climate.
Advanced research seminar on atmospheric dynamics, climate processes, and hydrology of the African continent.
Instructor(s): B. Zaitchik; N. Levin.

AS.270.610. Climate Modeling and Analysis.
Instructor(s): A. Arking
Area: Natural Sciences.

AS.270.611. Global Atmospheric Dynamics.
This course will examine the fluid dynamics that determine large-scale atmospheric circulation and variability using lan James’ “Introduction to Circulating Atmospheres.” Topics covered will include the dynamics of Hadley cells, mid-latitude jets, baroclinic instability, monsoon circulations, and low-frequency variability of the circulation.
Instructor(s): A. Gnanadesikan.

Transitioning from graduate school to a postdoc to a “permanent” job in the natural sciences requires a set of essential skills that are not covered as a formal component of most Ph.D. programs. This seminar will be a weekly discussion of career issues relevant to new scientists. Topics will include elements of good presentations, conferences, scientific writing and peer-review, employment trends, job interviews, and grant proposals. The class will conclude with a mock grant proposal review panel, conducted by the students. This seminar is aimed at graduate and advanced undergraduate students in the natural sciences planning careers in academia or industry.
Instructor(s): J. Roberts.

AS.270.615. Inversion Modeling & Data Assimilation.
This graduate class will introduce modern inverse modeling and data assimilation techniques. These powerful methods are used in atmospheric science, oceanography, and geophysics and are growing more widespread. Topics will include: singular value decomposition, Green’s function inversions, Kalman filtering, and variational data assimilation. The class will include lectures on concepts and theory, and practical experience in the computer laboratory. Permission of Instructor Required
Instructor(s): J. Roberts.

AS.270.616. Geodesy, Gravity, and Tides.
Introduces physical geodesy problems, and the interpretation of geod and gravity anomalies on Earth and other planets. Covers potential theory, measurement techniques from surface and spacecraft, planetary rotation, and tides. Recommended: AS.110.301 or EN.550.291 (or equivalent)
Prerequisites: ( AS.110.202 OR AS.110.211 or equivalent) AND ( AS.171.101 OR AS.171.105 or equivalent)
Instructor(s): J. Roberts
Area: Natural Sciences.

Also offered as 270.318
Instructor(s): B. Zaitchik; C. Del Castillo
Area: Natural Sciences.

AS.270.619. Regional Climate Analysis.
This seminar style course will address advanced topics in regional climate, including dynamic mesoscale models, climate change downscaling, seasonal forecasts, and statistical methods. Students will review relevant literature and collaborate to address modeling and analysis challenges.
Instructor(s): B. Zaitchik
Area: Natural Sciences.

AS.270.620. Seminar in Geophysical Turbulence and Transport.
Turbulence plays an important role in setting the structure of both atmospheres and oceans by transporting heat and momentum. It also plays a key role in mobilizing chemical species such as nutrients and aerosols that play key roles in the Earth System. This seminar will cover how we measure and model turbulence and its effects. For the Fall of 2015 the course will center around Planetary Boundary Layers, including topics such as scaling theories, large eddies in boundary layers and their simulation, and interactions with small-scale topographic features.
Instructor(s): A. Gnanadesikan.

AS.270.621. TEM: Practice and Applications.
A lab and lecture course covering the practical aspects of transmission electron microscopy. Electron diffraction, image formation, and analytical techniques are explained, and students are given an opportunity to gain hands-on microscopy experience. The detailed theory for these experiments is developed in 270.622.
Instructor(s): D. Veblen; K. Hemker.

Discussion of the physical principles that underlie earth remote sensing. Topics to include radiative transfer in Earth’s atmosphere, operating principles of active and passive remote sensing systems, and advanced methods for image analysis.
Prerequisites: AS.270.318 OR AS.270.618 or permission of instructors.
Instructor(s): B. Zaitchik; C. Del Castillo.

AS.270.625. Seminar in Biogeochemistry.
In-depth exploration of emerging topics in biogeochemistry, including themes relevant to the evolution of Earth’s biogeochemical cycles, global change, paleoecology, and paleoclimate.
Instructor(s): B. Passey
Area: Natural Sciences.

AS.270.626. Ocean General Circulation.
The aim of this course is to achieve conceptual understanding of the large scale low frequency ocean general circulation. The role of the ocean circulation in earth’s climate is emphasized throughout.
Instructor(s): T. Haine.

Discussion of current research topics in soil ecology and biogeochemistry.
Instructor(s): K. Szlavecz.

AS.270.628. Field Seminar.
Weekend field trip to explore regional geology. Students are required to prepare short presentations on field trip stops in advance of weekend trip. Attendance at organizational meetings is required. Open to E & PS graduate students and upper level E & PS undergraduate majors and minors. 2 Organizational meetings: February 4th and 18th, 12pm-1pm. Weekend trip April 17th-19th. Consult instructors for details.
Instructor(s): K. Lewis.

AS.270.629. Tracer Transport in Geophysical Flows.
This course examines the transport of substances in geophysical flows. Topics covered include fundamental transport processes, transport in simple flows, and use of chemical tracers to infer transport properties. These concepts will be illustrated by case studies in a variety of geophysical flows, including the flow in atmospheres, oceans, lakes, and groundwater.
Instructor(s): D. Waugh.
AS.270.630. Physics and Chemistry of Aerosols.
This course will cover fundamentals of aerosol physics and chemistry. Topics covered will include aerodynamics and diffusion of aerosol particles, condensation and evaporation, particle size distributions, optics of small particles, characterization of particle composition, and the diversity of aerosols found in planetary atmospheres. Recommended Course Background: Basic Physics and Chemistry Calculus.
Instructor(s): S. Horst.

AS.270.633. Advanced Topics in Isotopic Geochemistry.
Consent of instructor required. In depth exploration of selected systems in stable isotope geochemistry, and examination of the physical basis of stable isotope fractionation. Topics vary annually.
Instructor(s): N. Levin
Area: Natural Sciences.

Instructor(s): D. Veblen.

AS.270.641. Present and Future Climate.
Meets with AS.270.378.
Prerequisites: (AS.110.108 AND AS.110.109) AND (AS.171.101 AND AS.171.102)
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.270.642. Surface Geochemistry.
Instructor(s): D. Sverjensky.

AS.270.644. Physics of Climate Variability.
This course is an advanced-level review of the ways in which climate varies on time scales of seasons to decades, including El Nino, the Pacific Decadal Oscillation, the Indian Ocean Dipole Mode, the North Atlantic Oscillation and others. Topics covered will include, depending on class's interest: 1) Methods for isolating climate modes. (2) Key dynamic and thermodynamic processes involved in causing such fluctuations, including atmospheric and oceanic wave propagation, air-sea interaction and changes in the thermohaline circulation. (3) Impacts of climate modes on biogeochemical cycling, including some that are used by paleoclimatologists to reconstruct past variability. Geophysical understanding and links to fundamental mechanisms are emphasized. Format will consist of a mix of lectures and paper discussions.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.645. Earth System Modeling.
Introduces students to using comprehensive Earth System Models. Students will learn about how such models are structured and configure experiments with such a model, based on their interests.
Instructor(s): A. Gnanadesikan.

AS.270.647. Earth's Interior.
Mechanical processes in Earth's core and mantle with applications to plate tectonics, the thermal and chemical evolution of the Earth, and generation of Earth's magnetic field.
Instructor(s): P. Olson; Staff.

AS.270.652. Physics Of Magma.
The principles of viscous fluid flow, heat conduction and convection are treated in reference to all aspects of the mechanics of magma. Emphasis is placed on understanding petrologic processes as observed in rocks and rock sequences.
Instructor(s): B. Marsh
Area: Natural Sciences.

AS.270.653. Earth and Planetary Fluids II.
A sequel to AS.270.425 concentrating on planetary-scale atmospheric and oceanic circulation. Physical understanding of the underlying fluid dynamics will be emphasized.
Instructor(s): N. Paldor.

AS.270.661. Planetary Fluid Dynamics.
Recommended Course Background: AS.270.646 or equivalent.
Instructor(s): D. Strobel
Area: Natural Sciences.

Instructor(s): S. Horst.

Instructor(s): K. Szlavecz
Area: Natural Sciences.

AS.270.696. Special Topics in Planetary Exploration.
Topics will vary from year to year based on current missions engaged in the exploration of our Solar System with the selection based on results that break new ground and rewrite textbooks. For the spring 2016 term the New Horizons Mission's spacecraft flyby of the Pluto system will be the focus of the course. In addition to discussing results, the planning, execution of the observations, the retrieval, analysis, and interpretation of data will be presented to understand how missions evolve from concepts to the launch pad, and finally attainment of the science objectives. The fundamental principles necessary to understand chemical, geological, and physical processes within and around the planets will be introduced as needed.
Instructor(s): D. Strobel; K. Lewis
Area: Natural Sciences.

AS.270.807. Research.
Instructor(s): T. Haine.

AS.270.808. Research.
Instructor(s): T. Haine.

AS.271.107. Introduction to Sustainability.
Will introduce interactions between global environment and humans, discuss meaning of sustainability, and introduce use of tools to attain sustainability such as policy, law, communication, marketing, research, advocacy, international treaties.
Instructor(s): C. Parker
Area: Natural Sciences.

Please note, class will meet Saturday, Jan. 23 in the event of inclement weather. This course is for freshmen ONLY. This course is designed to provide students with a strong understanding of the principles of sustainability, how they are applied at Johns Hopkins and in the City of Baltimore, and identify their role within the sustainability sphere. Topics covered include exploration of the fundamentals of sustainability, theory and application; how sustainability principles are embedded in operations in the City and at Hopkins; appreciation for the varieties of viewpoints and perspectives; and developing long-term strategies.
Prerequisites: Students may enroll in one B'More course only.
AS.371.188 OR AS.371.189 OR AS.100.285 OR AS.140.318 OR AS.300.100 OR AS.360.108 OR AS.360.122 OR AS.360.171.
Instructor(s): A. Pennington
Area: Natural Sciences.
AS.271.120. Environmental Photojournalism.
Environmental cognition, consciousness and communication are produced, reproduced, interpreted and remembered with the support of visual representations and, in particular, photography. Images increasingly structure our experience of nature, environmental problems, human-environmental relations, and ecological awareness. Students will review critical literature focusing on visual representation theory, the relationship between images and social change, and the history and typology of environmental photography. A basic understanding of modern environmental history, sustainability issues and environmental problems is required. Students will identify environmental narratives in Baltimore, document their stories through photojournalism, have their images critiqued in class, and develop a final documentary project focusing on one particular environmental narrative. The class is designed with an emphasis on independent research and practice, interdisciplinary analysis and application.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences.

AS.271.107 OR AS.271.107
Instructor(s): A. Monopolis; C. Parker
Area: Social and Behavioral Sciences.

AS.271.304. Sustainable Food Systems.
This course will critically examine the crucial role food systems have played in shaping human history and global environmental change. Of particular interest will be the mutually impactful relationships between food and climate change, population growth, and urbanization. The sustainability of these systems and relationships will be assessed through a lifecycle analysis of food system processes: cultivation, distribution, trade, preparation, consumption, and disposal. The theoretical dimension of this course will be complimented by an experiential learning component involving relevant and related field excursions and on-campus labs.
Instructor(s): A. Monopolis; A. WinklerPrins
Area: Social and Behavioral Sciences.

AS.271.301. Climate Change Adaptation in the Developing World.
This course considers the way in which people and their livelihoods are adapting to climate change in sensitive regions of the developing world. The course will include an overview of climate systems and climate change science, although it will emphasize vulnerability assessment from an ecosystem and livelihood perspective. Using a case-study approach, the focus will be on key economic sectors of agriculture, water resources, forest systems and tourism. A focus of the course is how to develop an informed approach to climate change adaptation that can drive both national policy and international development and donor efforts to create sustainable responses that serve both the local country and global needs. Students will consider adaptive capacity in specific countries, evaluating the feasibility and sustainability of current adaptation strategies, differentiate national and international efforts and effects of adaptation; learn key tools for climate change assessment, review and critique climate data sources for developing countries, and compare climate change adaptation to the developed world. GECS Majors Only. Prerequisites: Intro to Sustainability, Intro to Global Environmental Change, or Climate Change: Science and Policy.
Prerequisites: AS.271.304. Sustainable Food Systems.
Instructor(s): A. Monopolis; C. Parker
Area: Social and Behavioral Sciences.

This course integrates environmental literature, outdoor excursions, nature writing, and ecocriticism. Students will survey a range of authors that have written about nature, environmental issues and sustainability. These include, among others, Aldo Leopold, Henry David Thoreau, Lao Tzu, Edward Abbey, Vandana Shiva, Bill Bryson, Terry Tempest Williams and Michael Pollan. Students will define and explore the concepts of nature, sustainability, and a sense of place. Weekly field trips to Baltimore’s parks and green spaces will encourage students to discover their own sense of place and environmental worldview through careful exploration, observation and reflection. Throughout the course, using a journal, students will write short, ecocritical essays and reflect on their experiences, perspectives, and insights.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences.

AS.271.309. Designing Sustainable Wellness.
This course examines the convergence of social and environmental sustainability within the built environment. The built environment refers to the space, structures and systems humans generate for living, working and playing. This includes everything from homes and office buildings, to neighborhoods and cities, to green spaces and parks. It also includes hard infrastructure, such as energy, transportation and water systems, and soft infrastructure, such as formal human services (e.g. health, education, recreation). More recently, the term has expanded to include conditions related to public health, such as walkability, bikability, and access to healthy foods. This course will examine the conceptual frameworks that support the creation of built environments, assess their impact on environmental and social well-being, and re-imagine methodologies and designs that may better promote “sustainable wellness” or, socio-ecological sustainability, in the future. Through case studies and a final design-based project, students will learn and apply the fundamental principles behind socio-ecologically sustainable design. The course is designed with an emphasis on interdisciplinary analysis and systems thinking. The course is geared towards GECS majors, in addition to students interested in psychology, design, architecture and urban planning.
Instructor(s): A. Monopolis
Area: Engineering, Social and Behavioral Sciences.

Prereq: 270.103 or permission of instructor. This course will investigate the policy and scientific debate over global warming. It will review the current state of scientific knowledge about climate change, examine the potential impacts and implications of climate change, explore our options for responding to climate change, and discuss the present political debate over global warming.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.
AS.271.401. Environmental Ethics.
Environmental Ethics is a philosophical discipline that examines the moral relationship between human beings and the natural environment. Beginning with an analysis of their own values, students will explore complex ethical questions, philosophical paradigms and real-life case studies. Through readings, films, seminar discussions and debates, this course will help students strengthen their ability to communicate viewpoints rooted in ethical principles. Afterwards, students will apply these tools to an examination of contemporary environmental issues, ranging from natural resource depletion, pollution, species extinction, environmental justice, climate change, and overpopulation. This course is geared towards Global Environmental Change & Sustainability and Philosophy majors.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences.

The water, energy and food (WEF) nexus is a topic of growing interest in the research and policy communities. This course will survey WEF concepts and principles, introduce tools of analysis, and engage students in case studies of critical WEF issues in the United States and internationally.
Instructor(s): B. Zaitchik.

This course provides students with a broad introduction to US environmental policymaking and policy analysis. Included are a historical perspective as well as an analysis of future policymaking strategies. Students examine the political and legal framework, become familiar with precedent-setting statutes such as NEPA, RCRA, and the Clean Air and Clean Water Acts, and study models for environmental policy analysis. Cost benefit studies, the limits of science in policymaking, and the impact of environmental policies on society are important aspects of this course. A comparison of national and international policymaking is designed to provide students with the proper perspective. This course is taught in conjunction with an identical graduate course. All students will be expected to perform at a graduate level.
Instructor(s): H. Serassi; R. Solomon
Area: Social and Behavioral Sciences.

Instructor(s): A. Monopolis.

AS.271.502. Independent Study.
Instructor(s): Staff.

AS.271.505. GECS Senior Capstone Seminar - Part II.
The GECS Senior Capstone Seminar will provide the intellectual time and space to bring together the knowledge and tools acquired during the four years of interdisciplinary work on the GECS curriculum into a coherent framework in preparation for careers, and/or graduate work. In addition to the culmination of the capstone project, final paper, and presentations, students will look at relevant current events through the lenses of science, social science and the humanities, and engage in in-depth readings and discussion of these issues.
Instructor(s): A. Monopolis; C. Parker.

AS.271.506. GECS Senior Capstone Seminar Part I.
The GECS Senior Capstone Seminar will provide the intellectual time and space to bring together the knowledge and tools acquired during the four years of interdisciplinary work on the GECS curriculum into a coherent framework in preparation for careers, and/or graduate work. Part I of this module will include the initial, research and planning phase of the capstone project. Part II, during the Spring semester, will involve the application and implementation phase.
Instructor(s): A. Monopolis.

AS.271.508. Internship.
Instructor(s): C. Parker; Staff.

AS.271.570. Independent Study-Intersession.
Instructor(s): C. Parker.

East Asian Studies
The East Asian Studies major is interdisciplinary and interdepartmental. Its primary purpose is to introduce undergraduates to the knowledge, language skills, and research methods they will need to enter various academic and professional paths relating to China, Japan, and Korea. Majors in East Asian Studies engage in intensive Chinese, Japanese and/or Korean language study through the Center for Language Education and work with faculty on such topics as China in the global economy, nationalism in East Asia, Korean identity and culture, modern Japanese history and politics, Chinese urban history, and women in East Asia. Students are encouraged to pursue original research projects in East Asia with the support of intersession and summer travel grants, stipends for conference presentations, a senior thesis honors option, and seminars that bring together research scholars, faculty, graduate students and undergraduates in a manner that is distinctly Hopkins. Alumni of the program are making their mark around the world in business and finance, academia, law, international development, medicine and public health, engineering, media, public service, and the arts.

China-STEM
Forward thinking and interdisciplinary, Johns Hopkins-China STEM embodies the best of the Johns Hopkins tradition. Building upon well-established partnerships in China and expertise in a variety of technical disciplines, the program addresses the increasing demand for advanced Chinese language education in specialized fields of study. Students, researchers, and practitioners who understand the language, culture, and context of China could significantly enhance their ability to discover new theories, new partnerships, and new practices.

The summer program is designed for undergraduate and graduate students, post-doctoral fellows, and researchers who seek to enhance their Chinese language proficiency for scientific, technological, engineering, and medical (STEM) disciplines. Over the course of eight weeks, students are immersed in rigorous language training, coupled with experiential research trips to laboratories, hospitals, and academic institutions in Nanjing and Beijing.

Complete information on the program, and the application process can be found at: http://krieger.jhu.edu/chinastem/

Hopkins in Nanjing (HIN)
Developed by the East Asian Studies Program at Hopkins in collaboration with the JHU Study Abroad Office and Nanjing University, the fall semester program will include intensive language study as well as two content courses. Students take nine credits of intensive Chinese
language courses at Nanjing University. The two content courses are taught by Hopkins faculty in English and vary each year depending on faculty specializations.

Having our own in-house study abroad program gives us more control over the content and quality of study abroad courses, ensuring that our students have a rigorous and challenging semester abroad curriculum tailored to their academic needs. The program also obviates the need for Hopkins undergraduates to transfer their study abroad credits, a process that many students have found frustrating. It also provides an opportunity for qualified undergraduate majors to conduct research in Nanjing in preparation for writing an honors thesis. In addition, it helps our undergraduates realize the goal of passing the qualifying language examinations for Hopkins Nanjing Center.

Successful applicants must have at least a 3.0 cumulative GPA, and have completed at least 4 semesters of college-level Mandarin (or the equivalent). Undergraduates with junior standing will be given preference in selection. Although the program initially only served Hopkins undergraduates, it is now open to undergraduates from several other institutions as well. For more information and application instructions, visit krieger.jhu.edu/east-asian/study-abroad/hopkins-in-nanjing/

**Hopkins in Tokyo**

In fall 2012, a full-year undergraduate exchange program began with the University of Tokyo, and it is off to a great start. This new study abroad program was designed with Hopkins’ East Asian Studies majors and Japanese language students in mind. As with other departmental study abroad programs at Hopkins, students’ credits and grades will be transferred between the two universities.

This is a direct exchange program between our universities, rather than a program run by Hopkins. For each Hopkins student who attends the University of Tokyo, one University of Tokyo student will attend Hopkins. Each Hopkins student has a Japanese student as his/her personal tutor. The tutors assist students in both academic matters and in daily life.

Limited to 1-3 students per year, admission to the University of Tokyo program is competitive. Students must have completed 4 semesters of college-level Japanese or the equivalent, have a term GPA of 3.0 or above, and submit two faculty references, one of which should be from a Japanese language instructor. For more information and application instructions, visit krieger.jhu.edu/east-asian/study-abroad/hopkins-in-tokyo/

### Requirements for the B.A. Degree

(See also Requirements of a Bachelor’s Degree (p. 20).)

The curriculum of the East Asian Studies major consists of a balanced mixture of language and area studies. The requirements changed significantly for students who entered the University in Fall 2013. Students who entered JHU before Fall 2013 should see the requirements in the archived catalog (http://web.jhu.edu/registrar/catalog) of their year of entry.

Students select from among three discipline-based focus areas - history, political science, or sociology - or create an individualized focus area. In addition to solid language training and content courses about the region, EAS majors receive training in the methods and theory of the particular academic discipline they select as a focus area. If they choose, East Asian Studies majors may double major in International Studies, as the requirements of each of the three focus areas overlap with those of International Studies. The individualized focus area requires consultation and approval of the director of undergraduate studies.

#### Requirements for the B.A. Degree

##### One East Asian Survey Course

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.100.243 China: Neolithic to Song</td>
<td>3</td>
</tr>
<tr>
<td>or AS.100.347 Early Modern China</td>
<td>3</td>
</tr>
<tr>
<td>or AS.100.348 20th-Century China</td>
<td>3</td>
</tr>
</tbody>
</table>

##### Three Additional East Asian Studies Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two East Asian Studies courses at any level</td>
<td>6</td>
</tr>
<tr>
<td>One East Asian Studies course at the 300- or 400-level</td>
<td>3</td>
</tr>
</tbody>
</table>

##### East Asian Foreign Language

Four courses in an East Asian Language at any level

Two courses in an East Asian Language at the third-year level or higher **

##### One Focus Area - History, Political Science, or Sociology

**History focus area**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.100.193 Undergraduate Seminar In History</td>
<td>3</td>

</tr>
<tr>
<td>One East Asian sociology or political science course at the 300- or 400-level</td>
<td>3</td>
</tr>
</tbody>
</table>

Select two of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.230.101 Introduction Sociology</td>
<td>3</td>
</tr>
<tr>
<td>or AS.230.202 Research Methods for the Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>or AS.230.205 Introduction to Social Statistics</td>
<td>3</td>
</tr>
<tr>
<td>or AS.230.213 Social Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

* Or students may take another East Asian survey course as approved by the director of undergraduate studies from the History or History of Science & Technology Departments.

** If a student completes third year level language courses in one language and more advanced courses in that language are not available, the student may, with permission from the EAS Director, substitute other EAS courses for up to two of the required language courses

### Honors

- Honors in the major may be earned by maintaining a GPA of 3.7 in the major and writing a senior honors thesis by taking a two-semester seminar, AS.310.431 Senior Thesis Seminar: East Asian Studies and AS.310.432 Senior Thesis Seminar: East Asian Studies.
The thesis seminar is a total of six credits and may count toward two of the required EAS courses.

**Other Departmental Requirements**

No major requirements may be taken satisfactory/unsatisfactory. All courses required for the major must be passed with a grade of C- or higher. The University encourages students enrolled in this program to take advantage of foreign study options. Courses and programs must be pre-approved by the student's East Asian Studies advisor. Transfer credit policy: Up to six classes may be transferred from study abroad programs or other schools upon approval of the major advisor.

For current faculty and contact information go to http://krieger.jhu.edu/east-asian/directory/

**Faculty**

**Courses**

**AS.310.103. Modern Japan - 1800 to the Present.**
An introduction to the history of Japan from the 18th century to the present. In lectures and discussion we will draw upon a combination of primary source materials (political documents, memoirs, oral histories, journalism, fiction, film) and scholarly writings in order to gain insight into the complex and tumultuous process by which Japan became an industrialized society, a modern nation-state, and a world power.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences.

**AS.310.104. Pacific Crossings: East Asia and the US from the 19th Century to the Present.**
This course examines the connections between US and East Asian history from the 19th century to the present day. We will explore how cultural exchange and confrontation shaped humanitarian, nationalist, and socialist projects in the US, China, Korea, and Japan. Readings include memoirs, travelogues, essays, and novels that provide a window into transpacific history.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences.

**AS.310.105. Medicine and Society in China: From the Song to the Republican Period.**
This course introduces students to medical history in China in relation to gender history, legal history, publishing history, and literature from the Song to the Republican period.
Instructor(s): Y. Zhang
Area: Humanities.
**AS.310.108. Introduction to Chinese Fiction and Drama.**
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

**AS.310.114. Introduction to East Asian Religions.**
This survey course explores the ideas and practices of various East Asian religious traditions. It covers not only major religious teachings - Confucianism, Buddhism, Daoism, and Shinto - but also touches upon other folkloric traditions, such as shamanism, in order to understand the rich diversity of East Asian religions. Using a variety of methodologies such as art history, literature, history, and anthropology and materials such as paintings, tales, and historical documents, students will be introduced to the doctrines and practices of major religious traditions, as well as themes relating to family, gender, the nation state building, and imperialism.
Instructor(s): F. Joo
Area: Humanities.

**AS.310.115. Ghost Tales from China and Japan, 14th-19th Centuries.**
We cannot express our own experience of death – only imagine life after death. How did people in the past conceptualize the world of the dead? Ghost tales will teach us what we imagine as the experience of dead and life after death. This course aims to introduce students to a variety of ghost stories in Late Imperial China and Tokugawa Japan and connect their literary imagination of the dead to the cultural, socio-historical, and religious context of each society as well as to the broad East Asian tradition of supernatural narratives. While we also touch upon earlier traditions on narrating the dead, most of the stories in class readings are from the Ming (1368-1644) and Qing (1644-1911) dynasties of China, and the Tokugawa period (1600-1868) of Japan. Key issues include family, gender, sexuality, body, medicine and many more. Although we will also take a look at visual and theatrical representations of the dead, we will primarily focus on literary texts about ghostly phenomena. Film screenings required. All readings are in English.
Instructor(s): F. Joo
Area: Humanities.

**AS.310.116. Romantic Love in Chinese Literature.**
This course aims to introduce students to a variety of literary texts featuring romantic love from the 9th to the mid-20th centuries in China. The target materials cover a wide range of literary products from Bo Juji’s court poem to the modern Shanghai novella by the woman writer Zhang Ailing (Eileen Chang). As we read romance in a variety of narrative forms such as fiction, drama, and poetry, we will examine changing ideas about marriage, love, sexuality, family, emotion, and morality within the literary discourse as well as in society. Thus, students are expected to connect various literary texts about romance to their socio-historical, literary, and political surroundings. At the same time, we will discuss the shifting significance of romance for writers and reading public and consider how literary texts formed ideas about romance in society. The course is organized chronologically and thematically. Reading assignments are all in English.
Instructor(s): F. Joo
Area: Humanities.

**AS.310.117. Love and Illusion in Japanese Literature. 3 Credits.**
This course aims to introduce students to a variety of literary texts featuring love and illusion from the 12th to the 21st century Japan. We will explore how enchantment and disenchantment play in the literary imagination of romantic love within Japanese literary history. The target texts cover a wide range of literary products from medieval noh drama to the modern novelist Izumi Kyoka’s gothic tales and further to a contemporary Murakami Haruki’s novella. By reading a variety of narrative forms such as diary literature, drama, epic, poetry, and modern fiction, we will examine changing ideas about marriage, love, sexuality, religion, and modernity within the literary discourse.
Instructor(s): F. Joo
Area: Humanities.

**AS.310.118. Japanese Popular Culture. 3 Credits.**
This course will examine Japanese popular culture as a way to discuss contemporary Japanese society. We will investigate a wide range of cultural products - from literature, anime and manga to theater, music, fashion and food – and question how these items are created, circulated, and consumed in Japanese society as well as by individuals. Since many Japanese cultural products also quickly move beyond the national borders in the age of globalization, we will also discuss the global consumption of Japanese popular culture. Topics include gender, sexuality, family, fan community, global capitalism, mass media, race and power. Film screenings and group projects are required. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

**AS.310.203. Women Writers from East Asia, 11th to 19th Centuries.**
Introduction to women-authored texts in East Asia, 11th to 19th centuries. Historical and literary significance of their output in Chinese, Japanese, and Korean societies.
Instructor(s): F. Joo
Area: Humanities.
AS.310.204. Rural Development in Asia.
We will examine the transformation of the Asian countryside from the beginning of the twentieth century up until the present by looking at agrarian structure, economic and social development, collectivization and decollectivization, rural industrialization, agribusiness, sustainable agriculture, and rural unrest. Course materials combine theoretical readings with empirical case studies. While theoretical readings examine global processes involving Asia and elsewhere, case studies cover several Asian countries, with an emphasis on China and India.
Instructor(s): B. Gurel
Area: Humanities, Social and Behavioral Sciences.

AS.310.207. Mapping Migrations in East Asia.
This seminar introduces students to the phenomenon of migration in Japan, South Korea, and Taiwan from theoretical, empirical, and comparative perspectives. The objectives of the course are to understand the 1) historical context behind present-day migrations in East Asia; 2) different patterns of migration flows and their consequences on receiving countries; 3) various theoretical frameworks for migration. The course is divided into three parts. In the first part, the course will examine theoretical approaches to migration, structured around the question of whether East Asia as a region represents a distinct model of migration. In the second, students will explore the empirical cases in greater detail by comparing and contrasting the different types of migrations. The third part addresses the responses to migration by host governments and societies and the implications of migration on citizenship and identity. Recommended Course Background: any class related to the history or politics of Japan, Korea, Taiwan, and/or China.
Instructor(s): D. Kim
Area: Humanities.

AS.310.214. Empire and Hierarchy in East Asia.
This course investigates the spectrum of unequal political authority in international politics. Empire, as one pole of hierarchical politics, persists in today’s multilateral, rule-based order. We will examine the theoretical foundations of hierarchy and empire in the study of international politics in East Asia. In addition, we will look at why empires arose at particular junctures, and contemporary directions in the debate on empire.
Instructor(s): J. Wang
Area: Humanities, Social and Behavioral Sciences.

This course explores the global circulation of political ideas and the formation of transnational social, intellectual, and aesthetic movements in Japan, China, and Korea from the 1880s to the 1980s.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences.

AS.310.221. Introduction to Eastern Religious Traditions.
This course serves as an introduction to Hinduism, Jainism, Buddhism, Sikhism, Confucianism, and Daoism. Successful completion of this course will provide students with a critical understanding of these six traditions.
Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences.

AS.310.303. A World Upturned: Cultures of Catastrophe in Japan.
Focusing on earthquake science and earthquake lore, radioactive mutation and nuclear decimation, this course will consider the relationship between technological culture and large-scale cataclysm. In addition to treating a broad array of written, graphic, and filmic representations of Japan’s past and potential catastrophes, we will also be keeping a close and careful eye on present developments in Japan’s 2011 earthquake/tsunami/nuclear disaster.
Instructor(s): R. Sayre
Area: Humanities, Social and Behavioral Sciences.

In this advanced undergraduate seminar on urban life and the anthropology of aesthetics, we will develop tools with which to think and write about city life in Japan and abroad. ‘Architectonic’ is a philosophical term referring to the ability to pull otherwise autonomous ideas together into a single coherent whole. In this course we will employ methodologies culled from class readings, lectures, web-based resources, and class discussions to collectively construct a digital patchwork of writings and images that will serve as the classes’ own quasi-coherent whole, or ‘architectonic’ of city life in Tokyo.
Instructor(s): R. Sayre
Area: Humanities, Social and Behavioral Sciences.

This survey course is designed to introduce students to Southeast Asia -- the ten member countries of the Association of Southeast Asian Nations (ASEAN) plus Australia and New Zealand. Southeast Asia is an integral part of the broader region of East Asia and a geographic bridge to the Indian subcontinent (South Asia). Southeast Asia has been one of the great success stories in the saga of modernization and development of post-colonial Afro-Asia over the last six decades. Its resulting economic importance is matched by its strategic significance given the presence of imbedded jihadist networks and the emergence of China as a regional great power and aspirant superpower. Nevertheless, the region has been largely overlooked by senior foreign policy and defense officials in Washington. This course will equip students to fill that void by examining the region from the perspective of national security strategy -- broadly understood in its multiple dimensions. Students will be challenged to formulate some element of a viable U.S. national security strategy for the region.
Instructor(s): M. Ott
Area: Social and Behavioral Sciences.

This course introduces students to China’s contemporary political history and current political system. It helps students develop a critical understanding of China’s governance institutions and processes, political economy, and state-society relations. The course focuses primarily on China’s domestic politics but also covers China’s changing role in Asia and the world.
Instructor(s): Y. Yang
Area: Humanities, Social and Behavioral Sciences.
A dramatic rise of popular protests in China today has spurred lively discussions about the causes, dynamics, and impact of these protests. This course will provide students with an opportunity to understand these issues by discussing the social, institutional and cultural background of protests, major forms of protest, social groups involved, government responses, and social implications of various kinds of protests. The first part of the course will explore significant socio-economic changes since 1978 and the effects of these changes on China’s social structure and stratification. This part will also examine changes in governance and political systems in the reform era and review important theories of contentious politics. The second part will examine protests by distinct social groups, including peasants, workers, homeowners, and ethnic minority groups, pro-democratic activists, among others. This part will identify similarities and differences in the demands and actions of different groups, introduce the major forms of popular resistance, and explore how the state deals with them accordingly. The course will conclude with discussion of the outcomes of social protests in China and make a cross-national comparison between protests in China and other authoritarian states. By taking China as an example, this course will enhance students’ knowledge about forms of popular contention and government responses in an authoritarian regime as well as help students develop analytical and critical thinking skills with regard to contentious politics.
Instructor(s): Y. Li
Area: Social and Behavioral Sciences.

AS.310.308. The Frontier in Late Imperial China. 3 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of “China”. Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China’s northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

Program Fee: $6,400 InterSession Abroad Program. This course provides students with a concise overview of modern Japanese political history. Attention is also given to important cultural aspects and the way in which they inform politics. First part of course consists of lectures held at Homewood and the second part takes place on location in Japan. Permission required, course must be taken for a letter grade. Open to program applicants only.
Instructor(s): F. Bauwens
Area: Humanities, Social and Behavioral Sciences.

AS.310.315. First Year Classical Chinese, First Semester.
Readings in prose and poetic texts of the pre-Qin period. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in western languages that treat the culture and writers of the Ancient period. Biweekly quizzes included. A final translation project required. Recommended Course Background: 2 years mandarin or the equivalent.
Instructor(s): F. Joo
Area: Humanities.

AS.310.316. First Year Classical Chinese: Language and Literature of the Ancient Period.
Readings in prose and poetic texts of the Zhou and Han Dynasties. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in western languages that treat the culture and writers of the Ancient period. Quizzes and Tests (Midterm and Final) will cover both language and cultural data. A short paper also required.
Instructor(s): V. Cass
Area: Humanities.

This course introduces the basic syntax, grammar and vocabulary of Classical Chinese or Literary Chinese (guwen##/wenyan wen ##), the written language from Old Chinese to the early twentieth century. Classical Chinese, which differs substantially form modern colloquial Chinese, is the language in which traditional Chinese historical, philosophical, religious and literary works are written. The structure, grammar and vocabulary of Classical Chinese still has large influence on modern Chinese formal documents and newspaper. Therefore, studying Classical Chinese is crucial not only to those who wish to understand original Chinese texts correctly but also to anyone who wants to attain a high level of reading proficiency in modern Chinese.
Prerequisites: AS.373.111 OR AS.373.112 OR AS.373.115 OR AS.373.116 AND AS.373.211 AND AS.373.212 OR AS.373.215 OR AS.373.216
Instructor(s): F. Chao
Area: Humanities.

AS.310.334. Southeast Asia: Contestations, Continuities, Changes.
‘Southeast Asia’ designates a geographical region comprised of countries such as Thailand, Indonesia, Malaysia, Vietnam, the Philippines, and Singapore. These countries are often more different than alike, and their cultural, ethnic, religious and political diversity resists easy reduction. As such, this is not a survey course of the area. Rather, we will examine elements of the Southeast Asian experience that speak to contemporary debates on cultural, political, and religious diversity in globalization’s second wave, and what it can teach us about assimilation, acculturation, and acceptance. We will try to get a feel of the variegated texture of Southeast Asian societies through historically and theoretically oriented texts drawn from different disciplines. Specifically, we will concentrate on responses to European colonialism, nationalist identity formations, and the impact of these histories upon contemporary contentions over the role of religion in public life, migratory practices, and second-wave globalization.
Instructor(s): D. Kwek.

We will examine how major political events, players, norms and institutions have shaped US-Asia relations in the modern era.
Instructor(s): Staff
Area: Social and Behavioral Sciences.
**AS.310.356. The Buddhist Experience.**
This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). In addition to studying the origins of Buddhism in India and its eventual spread across Asia, we will examine unique local interpretations of Buddhism. Particular focus will be on manifestations of Buddhism in art and material culture. Students will gain a critical understanding of the role of texts, art, doctrine, and practice play in the overall Buddhist experience. Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences.

**AS.310.431. Senior Thesis Seminar: East Asian Studies.**
Students may earn honors in the East Asian Studies major by maintaining a 3.7 average in the major and completing a senior thesis by taking the year-long AS.310.431 & AS.310.432 Senior Thesis Seminar: East Asian Studies. Students are required to secure the mentorship of an adviser among the EAS faculty before asking for permission to enroll in the course.
Instructor(s): E. Chung
Area: Humanities, Social and Behavioral Sciences.

**AS.310.432. Senior Thesis Seminar: East Asian Studies.**
This course is the continuation of Senior Thesis Course AS.360.431 for students completing their thesis in the East Asian Studies program.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

**AS.310.435. International Relations Theory and the Margins: The Case of East Asia.**
This course explores how the concept of international relations was introduced, challenged, and negotiated in East Asia. Implicitly comparative, the course illuminates the divergent understanding of familiar terms such as order, hierarchy, history, community, border/territoriality, and law, in light of the East Asian modernity. Students will be asked to reflect on questions of identity in relation to China, Korea, and Japan and to ponder the extent to which those identities may be translated and understood to Western categories. Specifically this course will consider the role played by Sino-centrism, the rise of Japan later, and Westernization in shaping international relations in East Asia. Instructor(s): H. Koyama.

**AS.310.501. Independent Study - East Asia.**
Students carry out an independent research project involving East Asia.
Instructor(s): J. Andreas.

**AS.310.592. Summer Internship. 1 Credit.**
Instructor(s): W. Rowe
Area: Social and Behavioral Sciences.

**AS.310.600. Advanced Topics in East Asian Studies.**
This interdisciplinary seminar gives graduate students in East Asian Studies opportunities to present and receive comments on their dissertation chapters, prospectuses, conference papers, and/or potential publications.
Instructor(s): E. Chung
Area: Humanities, Social and Behavioral Sciences.

**Cross Listed Courses**

**History of Art**

**AS.010.211. Monuments of Asia.**
An examination of selected architectural monuments from across Asia, including the Indian subcontinent, Southeast Asia, China, Japan, and Korea. Ancient to contemporary.
Instructor(s): R. Brown
Area: Humanities.

**AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas.**
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the “global South.” This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of “global modernism.”
Instructor(s): R. Brown
Area: Humanities.

**AS.010.311. Japanese Print Culture and Western Collecting.**
The first half of this seminar will examine issues in Japanese print culture, especially the development and circulation of ukiyo-e prints, during the Edo and Meiji periods (1615-1912). Topics will include technological innovations, the role of publishers, censorship, and prints as didactic objects. The second half of the course will explore the popularity of Japanese prints in the West, including their impact on Japonisme and incorporation into Western collections Cross-list with East Asian Studies
Instructor(s): H. Snow
Area: Humanities.

**AS.010.351. Asian Art After 1945.**
This course examines the art and architecture of East, South, and Southeast Asia produced since the mid-twentieth century. We will engage with theoretical, visual, and political developments in the recent art of this region, reading statements by artists and architects, discussing the rising commercial and international profile of contemporary Asian art, and exploring established and emerging art histories of this period. Cross-list with East Asian Studies
Instructor(s): R. Brown
Area: Humanities.

**AS.010.353. Key Moments in East Asian Politics & Visual Culture.**
Examines key political moments in China, Japan, and Korea from 1850 to the present, focusing on the way visual imagery shapes these events. Includes: Japanese occupation of Korea, Hiroshima and Nagasaki bombings, 1989 Tiananmen square protests, North Korean propaganda.
Instructor(s): R. Brown
Area: Humanities.

**AS.010.411. A Continued History of Chinese Painting, 1400-1800.**
This course examines Chinese painting between 1400 and 1800, a time when this art emerged as both a practice and a means of cultural analysis within Chinese society. Changes in both representational modes and the forms of art-historical consciousness, as reflected in the art criticism of Chinese literati, will be emphasized. Other topics include the shaping of lived environments through interior display, garden-building, and new visions of urban space.
Instructor(s): L. Liu.
**English**

**AS.060.118. Asian American Literature and Film.**
This course offers students a survey of Asian American literature, film and cultural politics. Throughout the course we will evaluate the literary and filmic productions of Asian Americans in order to ask a series of questions: Who is American? Who is Asian American? How does “Asian American” work as a category that uncovers contestations over the meaning of ethnic, sexual, and national identity? We will look at a diverse array of Asian American groups while paying attention to the formation of Asian American subjectivities across differences and the intersections of ethnicity, sexuality, class and gender. Cross-listed with Film and Media Studies
Instructor(s): R. Neutill
Area: Humanities.

**History**

**AS.100.219. Chinese Cultural Revolution.**
The Cultural Revolution was Mao Zedong’s last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revolution decade and since.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

**AS.100.220. Freshman Seminar: Politics, Information, and the State in Early Modern China and Japan.**
This introductory seminar examines culture and politics in early modern East Asia (ca. 1500-1900) by looking at changing modes of communication and attitudes about state control of information and ideology. Freshmen Only.
Instructor(s): E. Mokros
Area: Humanities, Social and Behavioral Sciences.

**AS.100.243. China: Neolithic to Song.**
This class offers a broad overview of changes in China from Neolithic times through the Song Dynasty (roughly from 5000 BCE through the 13th century CE) and will include discussion of art, material culture, and literature as well as politics and society. Close readings of primary sources in discussion sections and extensive use of visual material in lectures will help students gain firsthand perspective on the materials covered. Not open to students who have previously taken AS.100.208.
Cross listed with East Asian Studies
Prerequisites: If you have completed AS.100.208 you may not enroll in AS.100.243.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

**AS.100.248. Japan in the World.**
This course is an introduction to Japan’s history from 1800 to the present with emphasis on the influences of an increasing global circulation of ideas and people. Topics include the emperor system, family and gender, imperialism, World War II, the postwar economy, and global J-pop.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

**AS.100.330. National Identity in 20th Century China & Japan.**
Using primary sources, including literature and film, we will explore the changing ways in which ideologues, intellectuals, and ordinary citizens defined national identity in 20th century China and Japan. Cross-listed with WGS and East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

**AS.100.347. Early Modern China.**
The history of China from the 16th to the late 19th centuries.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

**AS.100.348. 20th-Century China.**
The history of China from the last years of the Qing Empire to the post-Mao reforms.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

**AS.100.381. Religion, Medicine, and the Mind in Japan.**
This seminar explores the relationship between religion and medicine in treating disorders of the mind and soul throughout Japanese history. We will consider such topics as animal spirit possession, Buddhism, family-based care, psychotherapy, gender, and social withdrawal.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

**AS.100.385. Mobility and Encounter in the Medieval Indian Ocean.**
This seminar discusses forms of mobility and exchange- trade and travel, conquest and religious transformation, diasporas and migration, the spread of practices and technologies- across the Indian Ocean from the 8th to 16th centuries.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

**AS.100.411. Readings in the History of Public Health in the 20th and 21st Centuries.**
The students will read major and some minor works in the history of global public health and will each develop their own concept of how and why the major institutions, professions, and practices associated with public health have evolved over the past long century. To help the students focus on their ideas, they will write three essays on particular aspects of the history.
Instructor(s): L. Galamios
Area: Humanities, Social and Behavioral Sciences.

**AS.100.422. Society & Social Change in 18th Century China.**
Reading knowledge of Chinese recommended but not required. Cross listed with East Asian Studies
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

**AS.100.424. Women & Modern Chinese History.**
This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women’s experiences for their own political and social agendas. Cross listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.
AS.140.437. Late Imperial China: History and Fantasy.
Students in this seminar will look at the ways in which Chinese and Western scholars, novelists, film-makers, and artists have represented China’s Late Imperial period. We will look at the way foreigners have imagined China, and the ways in which Chinese writers past and present have fancifully, nostalgically, and inventively rendered their personal and national pasts. The course will explore issues of historical, geographical, and literary imagination. Cross-listed with East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.140.470. Monuments and Memory in Asian History.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.140.479. Problems in Chinese Urban History.
Reading and discussion of works in Western languages on the role of cities in Chinese society, from the Tang dynasty (628-906 A.D.) to the present.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.140.482. Historiography Mod China.
A survey of assumptions and approaches in the study of modern Chinese history, as written by Chinese, Japanese, and Western historians.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.614. Seminar in Modern Chinese History.
A seminar covering major milestones in research on late imperial and modern Chinese history, primarily in English. Open to undergraduates with the permission of the instructor.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.140.659. Women and Modern Chinese History.
Graduate students only. This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women’s experiences for their own political and social agendas. Cross-listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

History of Science Technology
AS.140.146. History of Public Health in East Asia.
This course examines the history of disease, epidemics, and public health responses in East Asia from the 17th-20th centuries. This public health history emphasizes the interactions, connections, and comparisons among China, Japan, Korea, and Taiwan.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences.

AS.140.305. From the Compass to Androids: History of Science, Technology, and Medicine in Asia.
The course explores the history and cultural context of science, medicine, and technology in East Asia, from the ancient Chinese science to the latest scientific and technological developments in Japan.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences.

Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences.

AS.140.354. Science, Technology and Society in Modern East Asia.
The course aims to survey the history of science and technology in East Asian countries—China, Japan, and Korea—since the late 19th century. Since Japan was the only nation in East Asia that succeeded in modernizing itself by adopting western science, technology and politics, it will be studied first. The Chinese and Korean cases then will be reviewed from different angles. The course will emphasize the mutual influence between science & technology and society to answer how they became major industrial powers in the 21st century. Cross-listed with East Asian Studies.
Instructor(s): D. Kim; Y. Li
Area: Humanities, Social and Behavioral Sciences.

AS.140.357. Science Fiction Movies in the East and West.
What is a science fiction (SF) movie? How did SF movies and developments in science and technology influence each other during the twentieth century? What is the use of SF movies for societies? And why are SF movies much more popular in some countries than in others? By watching and analyzing classic and contemporary SF movies from the US, the Soviet Union, Japan, China, and other countries, we will search for answers to these questions. Special emphasis will be given to analyzing how historical, political, and cultural environments in different countries have influenced the production and acceptance of SF movies.
Instructor(s): D. Kim
Area: Humanities, Social and Behavioral Sciences.

Juxtaposing Japanese environmental history and its reflection in popular media, the course will explore the intersection between technology, environment, and culture. The course will be accompanied by relevant movie screenings.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences.

Philosophy
AS.150.227. Introduction to Asian Philosophy.
What is the nature of reality? What is the mind? What is the meaning of life? How ought we to live? In this course, we will explore how some of the better known philosophical systems of India, China and Japan have attempted to answer these most central philosophical questions. We will focus on the following systems: Nyaya, Samkhya-Yoga, Vedanta, Buddhism, Carvaka, Confucianism, Taoism, and Zen.
Instructor(s): B. Miller
Area: Humanities.
Political Science

AS.190.315. Asian American Politics.
This course examines issues of political identity, political incorporation, and political participation of Asian Americans. Themes include Asian American panethnicity, the struggle for immigration and citizenship, Asian American electoral politics, political activism and resistance since the 1960s, and the impact of Asian Americans on the politics of race and ethnicity in the United States.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.320. Politics Of East Asia.
Examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. Topics include state-society relations, late development, nationalism, democratization, political culture, social movements, and globalization.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

This course introduces students to the major debates and issues of postwar Japanese politics. Topics include nationalism, electoral politics, civil society, and immigration.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.341. Korean Politics.
This course introduces students to the historical and institutional foundations of modern South Korean politics. Topics include nationalism, political economic development, civil society, globalization, and ROK-DPRK relations. (CP)
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

This upper-level seminar examines some of the major debates and issues of postwar Japanese and South Korean political economy. Topics include nationalism, gender politics, civil society, immigration, and US-Japan-South Korea trilateral relations.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.442. Civil Society.
This course explores classic and contemporary debates on the concept of civil society and critically examines its analytical value in light of recent developments. Topics include the relationship between civil society, the state, and markets, the role of civil society in development and democratization, social capital, and global civil society. This course is open to graduate students from any discipline. Advanced undergraduate students must obtain permission from the instructor and are expected to keep up with graduate students during class discussions.
Instructor(s): E. Chung.

AS.190.610. Advanced Topics in Contemporary Chinese Politics.
This seminar is structured around key concerns in China’s domestic politics, including the politics of economic reform, central-local-relations, corruption, increasing inequality, the role of intellectuals, the rise of quasi-governmental organizations, various channels for political participation and protest, and other contemporary issues. Undergraduates who wish to be enrolled in this class must have taken AS.190.348 and by permission only.
Instructor(s): K. Tsai
Area: Social and Behavioral Sciences.

This course examines China’s foreign relations since the beginning of the economic reforms. Readings will draw on a diversity of perspectives, both Chinese and non-Chinese, to examine China’s foreign policy debates and strategic choices.
Instructor(s): G. Christoffersen
Area: Social and Behavioral Sciences.

This course is concerned with the relationship between energy security and human security. It will study the energy issues of East Asian countries as they make difficult energy policy choices, attempting to achieve simultaneously economic growth, energy security, and environmental sustainability.
Instructor(s): G. Christoffersen
Area: Social and Behavioral Sciences.

This course examines key issues in U.S.-Chinese relations. We will take an in-depth look at the politics, policies, and topics surrounding strategic balancing, trade, energy, nuclear proliferation on the Korean Peninsula, relations across the Taiwan Strait, China’s rise and the response of the United States and its allies. We will place the relationship between the United States and China in the context of its geopolitical implications not only for the two countries but also for the international system.
Instructor(s): P. Leon
Area: Social and Behavioral Sciences.

This course examines the extent to which globalization is reshaping state-society relations in contemporary East Asia, and how East Asian societies and political systems respond to, and influence, aspects of globalization in turn. Topics to be explored include the origins and trajectories of developmental states in East Asia, macroeconomic and industrial policy-making, social unrest and political organizing, export-led growth and shifting liberalization, the East Asian financial crisis and its aftermath, and today's East Asian political and economic landscapes in a globalizing world.
Instructor(s): P. Leon
Area: Social and Behavioral Sciences.

AS.191.348. Chinese Foreign Policy.
The domestic sources of, and international constraints on, Chinese foreign policy-making will be examined. We will also study the development and evolution of Chinese foreign policy objectives and their implementation during and after the Cold War.
Instructor(s): P. Leon
Area: Social and Behavioral Sciences.
**AS.191.348. Domestic Politics of Contemporary China.**
This course examines salient issues in the domestic politics of contemporary China. It begins with a brief historical overview of China's developments that led to the revolutions of 1911 and 1949, as well as the Cultural Revolution. The main part of the course will explore the era of economic reform and opening that began in the late 1970s and that still continues today. Topics include the relationship between business and politics, obstacles to economic and political reforms, the interplay between foreign relations and domestic politics, institutional and bureaucratic sources of policy-making, the social and political impact of economic growth, the relationship between central and provincial governments, and the questions of political opening and leadership transitions.
Instructor(s): P. Leon
Area: Social and Behavioral Sciences.

**AS.191.359. Size Matters: Small, medium and large states in global politics.**
Do large states dictate the terms in global politics? Are small states doomed to vulnerability in an anarchic world? And are medium states stuck in-between, incapable of exerting any real influence? This course explores whether size is a determinant of foreign policy, security calculus, democratic or authoritarian proclivity, and success in global political economy.
Instructor(s): J. Wang
Area: Social and Behavioral Sciences.

**AS.191.366. Chinese Domestic Politics.**
This course provides an introduction to the key institutions and relationships that make up the modern Chinese political system. The course will examine both theoretical and historical understandings of Chinese politics, considering alternative models of Chinese politics. It examines a range of current Chinese domestic governance issues: the political impact of the economic reforms, state-society relations, the legitimacy of the Communist Party, and Chinese understandings of politics.
Instructor(s): G. Christoffersen
Area: Social and Behavioral Sciences.

**AS.191.368. International Relations of the Asia-Pacific.**
This course will introduce and analyze the international relations of the Asia-Pacific, weighing the various approaches that scholars use for theoretical understanding and policy prescription. From the 19th c. to the 21st c., realist balance of power politics have prevailed. Since the early 20th c., liberal-institutionalism has emerged to challenge realist assumptions in both Track I and Track II organizations such as the Institute of Pacific Relations, APEC, the ASEAN Regional Forum, East Asian Summit, and CSCAP. Constructivism questions these older approaches, focusing on national and regional identity formation in explaining foreign policy outcomes. The course will consider realist, institutionalist and constructivist approaches to Pacific Asia in examining prospects for peace and stability.
Instructor(s): G. Christoffersen
Area: Social and Behavioral Sciences.

**Sociology**

**AS.230.166. Chinese Migration in Modern World History 1500’s-2000’s.**
This interdisciplinary course applies theories of economic sociology to examine the effects of Chinese overseas migration on modern world economy from the sixteenth century to the contemporary era. It examines the contribution of overseas Chinese to the development of capitalism in the following junctures: the East-West economic integration in the pre-modern era, China's modern transformation after the Opium War (1839-1842), the making of US national economy in the early twentieth century, as well as the postwar economic miracles in the Pacific Rim, among others. Special Note: Fulfills History requirement for GSCD track students.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

**AS.230.175. Chinese Revolutions.**
This course introduces the origins, operation and impacts of five major revolutions in modern China between 1850 and 1950. These include the Taiping Rebellion, the republican revolutions, federalist and southern automatic movements, labor strikes as well as peasant rebellions. It draws on the existing historiography that examines China's transition from an empire to a republic, impacts of western and Japanese influences to China, as well as the continuity and change of Chinese social organizations. Cross list with International Studies and East Asian Studies. Fulfills IS History requirement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

**AS.230.217. Chinese Overseas in Global History.**
This course examines the topics of Chinese overseas migration after the long sixteenth century. It investigates the following themes: First, the making of Chinese maritime frontier in the longterm trade and migration across the South China Sea and beyond; Second, economic functions of Chinese overseas networks in the East-West integration from the early modern era to the ongoing wave of globalization; Third, politics of identity and heritage in Chinese overseas communities. Course may not be taken by students that previously took AS.230.166.
Prerequisites: Course may not be taken by students that previously took AS.230.166.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.
**AS.230.228. Colonialism in Asia and Its Contested Legacies.**
This seminar examines the theories and historiography of colonialism in Asia, with special focus on the development of British Straits Settlements and Hong Kong as well as Japanese Taiwan. We will review the competing discourses about the impact of colonial dominations in these areas from the 1800s to the present-day. In the beginning of the era, the British built up the economic linkage between Hong Kong and Penang, Malacca as well as Singapore to sustain its dominance throughout the “Far East.” In the middle of the period, the expanding Japanese empire developed Taiwan as a foothold to compete with the British interests in South China and Southeast Asia. Hong Kong and the Straits Settlements, especially Singapore, became the contested terrain where two colonial powers vied for their influences in the region. The competition was not only about trade, but about the construction of a new East Asian regional order after the end of the Chinese hegemony. In the end of the period, the intervention of the US power in postwar Asia facilitated the retreat of the colonial establishments, British and Japanese ones included. The course that compares the colonial establishments and discourses on colonial legacies among the three areas points out that colonialism constituted an inalienable part of Asian history. Cross listed International Studies (CP) and East Asian Studies. Fulfills History requirement for IS GSCD track students only.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

**AS.230.275. Revolution, Reform and Social Inequality in China.**
This course explores various aspects of social inequality in China during the Mao Zedong and the post-Mao reform eras. We will examine inequality within villages, the rural/urban divide, urban inequality, education and health policies, and gender and ethnic inequality. Each of these issue areas will be tackled analytically, but the aim is also to understand what it was/is like to live in China during and after the Mao era. Formerly offered as AS.230.321.
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences.

**AS.230.285. Maritime East Asia.**
This course examines the transnational connections among merchants and migrants in the waters of East and Southeast Asia from a historical and comparative perspective. We will explore how diplomatic ties, long-distance trade and migration contributed to the making of cosmopolitan cities such as Quanzhou (Zayton), Malacca, Fort Zeelandia (Formosa), Batavia, Manila, Singapore and Hong Kong in the region from the tenth century onwards. The course will close with an examination of how the transnational connections are relevant to understand inter-state competition in Asia’s long twentieth century. Key subjects to be introduced include tribute trade system, trading diasporas, Euro-Chinese co-colonialism, pan-Asianism, as well as history and historiography of maritime silk road.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

**AS.230.328. Social Problems in Contemporary China.**
In this course we will examine contemporary Chinese society, looking at economic development, rural transformation, urbanization and migration, labor relations, changes in class structure and family organization, health care, environmental problems, governance, and popular protest. The course is designed for both graduate and undergraduate students. Undergraduates must have already completed One-Child Policy. Dean’s Teaching Fellowship; Cross listed with East Asian Studies. Fulfills History requirement for IS GSCD track students only.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

**AS.230.336. Family, Gender and Sexuality in China.**
This course examines social changes in China since the beginning of the People’s Republic (1949) through the lenses of family, gender and sexuality. The first half of the course focuses on understanding family institutions, women’s status, gender relations and sexualities in connection with major historical transitions between 1949 and the present. The second half includes readings and discussions around several thematic topics regarding family, gender and sexuality in contemporary China in the broader context of politics, economy, and social norms.
Instructor(s): Y. Dong
Area: Social and Behavioral Sciences.

**AS.230.344. Health and Society in Contemporary China.**
This course explores the social and health consequences of systemic transformations in China, including collapse of the urban work-unit system, resurgence of infectious disease, and implementation of the One-Child Policy. Dean’s Teaching Fellowship; Cross listed with East Asian Studies, Public Health and International Studies.
Instructor(s): R. Core
Area: Social and Behavioral Sciences.

**AS.230.372. Social Protest in Contemporary China.**
This class introduces popular resistance in post-1978 China, examining its socioeconomic, political, and cultural background, various types of protests by multiple social groups, and outcomes of protests. Cross listed with Dean’s Teaching Fellowship.
Instructor(s): Y. Li
Area: Social and Behavioral Sciences.

**AS.230.377. Colonialism and Anti-Colonialism.**
This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

**AS.230.415. Social Problems in Contemporary China.**
This course examines social changes in China since the beginning of the People’s Republic (1949) through the lenses of family, gender and sexuality. The first half of the course focuses on understanding family institutions, women’s status, gender relations and sexualities in connection with major historical transitions between 1949 and the present. The second half includes readings and discussions around several thematic topics regarding family, gender and sexuality in contemporary China in the broader context of politics, economy, and social norms.
Instructor(s): Y. Dong
Area: Social and Behavioral Sciences.

**AS.230.435. The China Boom.**
This course addresses the origins, global impacts, and demise of China’s economic ascendency as a world economic and political powerhouse at the turn of the twenty-first century. The course will cover the historical origins of the China boom and impacts of the boom on global political economic order. It will also address the social-political imbalances within China that contribute to the global financial crisis and recent slowdown of the Chinese economy. Particular topics include late imperial and Maoist legacies’ relation to contemporary economic growth, stages of China’s capitalist development, China’s outward investment in the developing world, formation and limits of US-China economic symbiosis, and China’s participation in global governance, among others.
Instructor(s): H. Hung
Area: Social and Behavioral Sciences.
Humanities Center

AS.300.207. A Mix of Voices: Chinese Literatures from Late Imperial through Modern.

This course examines the arts and culture of China from 1368-2000, with major focus on writers. We will begin with artists of the Ming (1368-1644) and Qing (1644-1911), focusing first on canonical voices: court poets, authors of classical fiction, literati essayists, calligraphers and painters. Outside of the court urban artists observed a dramatically changing world around them. Fiction, drama, memoir and mass-produced arts explored new social alignments and freedoms. The twentieth century brought revolution and party governance, along with arts born of mass media: periodicals, film and wood block print. Finally, post-Mao avant-garde artists both retrieved traditional aesthetics and explored new venues and visions. This look at the literature of China will require both close reading of texts as well as an interdisciplinary examination of the cultural factors that shape literatures.

Instructor(s): V. Cass
Area: Humanities.

AS.300.384. Modern Korean Literature and Film.

We will examine twentieth century Korean culture through short stories that are canonical in modern Korean literature and through a series of films associated with New Korean Cinema. One aim of the course is to gain a sense of the history against which the literary and cinematic artifacts obtain their representative artistic status. A second aim is to inquire into the relationship between written and filmed texts in order to see the limits and advantages of one medium over another for representing national culture. No prior familiarity with Korean language is required.

Instructor(s): S. Rhee
Area: Humanities.

AS.300.408. Lyric Modernity.

A comparative literature course on modern lyric and poetics. The main issue of the course is how the lyric voice is constructed and sustained under the pressures of modernization in the United States, Europe, and Korea. We will also emphasize issues of translation and the relationship of music and poetry. Readings will include texts by Adorno, Benjamin, Grossman, von Hallberg and Waters, and poems by Dickinson, Rilke, and Kim among others. All readings available in English. Cross-listing requested with East Asian Studies, GRLL, and English

Instructor(s): S. Rhee
Area: Humanities.

Interdepartmental

AS.360.244. Korean Culture: Past and Present.

This course will provide an introduction to Korean society and culture through a close study of the recent and highly acclaimed film Chunhyang, which is a theatrical version of a famous 18th century Korean literary work. It provides a complex and visually effective window into late Korean traditional culture, educational system, family and gender issues, literature, and the performing arts. Through class work and readings, students will be able to study the concept of culture as a complex, intricate, and interrelated fabric of meanings and symbols. In this regard, the study of Korea will allow students to begin to acquire the tools to understand many cultures as well as current developments in South and North Korean inter-relations.

Instructor(s): S. Oh
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): J. Andreas
Area: Humanities, Social and Behavioral Sciences.
AS.373.212. Second Year Heritage Chinese II.
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Continuation of AS.373.211. Recommended Course Background: AS.373.211 or permission required. 
Prerequisites: Prereq: AS.373.211 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

AS.373.215. Second Year Chinese.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Cross-listed with East Asian Studies
Prerequisites: AS.373.116 or equivalent.
Instructor(s): A. Chen; Y. Chen
Area: Humanities.

AS.373.216. Second Year Chinese II.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Recommended Course Background: AS.373.215 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.215 or equivalent.
Instructor(s): A. Chen; Y. Chen
Area: Humanities.

AS.373.313. Third Year Heritage Chinese.
This course is a continuation of AS.373.312. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be included on a regular basis. Recommended Course Background: AS.373.313 or Permission Required. Lab required.
Prerequisites: Prereq: AS.373.211 AND AS.373.212 or instructor's permission
Instructor(s): Y. Chen
Area: Humanities.

AS.373.314. Third Year Heritage Chinese II.
This course is a continuation of AS.373.313. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be included on a regular basis. Recommended Course Background: AS.373.313 or Permission Required. Lab required.
Prerequisites: AS.373.313 or equivalent
Instructor(s): Y. Chen
Area: Humanities.

AS.373.315. Third Year Chinese.
This two-semester course consolidates and further expands students’ knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible and written assignments will be given. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.216 or equivalent
Instructor(s): A. Chen
Area: Humanities.

AS.373.316. Third Year Chinese II.
This two-semester course consolidates and further expands students’ knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible, and written assignments will be given. Continuation of AS.373.315. Recommended Course Background: AS.373.315 or permission required.
Prerequisites: Prereq: AS.373.315 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

AS.373.415. Fourth Year Chinese.
This course is designed for students who finished AS.373.316 with a C+ or above (or equivalent). Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students are supposed to be able to understand most of the readings with the aid of a dictionary, so that class discussion is not focused primarily on detailed explanation of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings’ content. Cross-listed with East Asian Studies
Prerequisites: AS.373.315
Instructor(s): J. Yin
Area: Humanities.

AS.373.416. Fourth Year Chinese II.
Continuation of AS.373.415. Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students should understand most of the readings with the aid of a dictionary, so that class discussion need not focus primarily on detailed explanations of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings’ content. Recommended Course Background: AS.373.415 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.415 or equivalent.
Instructor(s): N. Zhao
Area: Humanities.

The main focus of this course is to expand the student’s knowledge of four essential skills in Chinese language and to deepen the student’s knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students’ reading comprehension, maintain conversation skills through class discussion, increase understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Recommended Course Background: Completion of four years of Chinese language or permission required.
Area: Humanities.
AS.378.452. Topics in Chinese Media II.
The main focus of this course is to expand the student’s knowledge of four essential skills in Chinese language and to deepen the student’s knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students’ reading comprehension, maintain conversation skills through class discussion, increase understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Continuation of 373.451. Recommended Course Background: AS.373.451 or its equivalent.
Area: Humanities.

AS.378.491. 5th Year Chinese.
Fifth Year Chinese is designed for students who finished fourth year regular or third year heritage Chinese course at JHU or its equivalent and wish to achieve a higher advanced proficiency level in Chinese. The goal of the course is to help students further develop their listening, speaking, reading and writing skills cohesively and to enhance students’ understanding of Chinese culture and society through language learning. Instructor: N Zhao
Prerequisites: AS.373.416 or AS.373.314 or equivalent.
Instructor(s): J. Chen.

AS.378.115. First Year Japanese.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the year, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 150 kanji in context. Knowledge of grammar will be expanded significantly in AS.378.215. No Satisfactory/Unsatisfactory. Student may choose to attend either lecture at 10:30 am or 12 pm on TTh. Cross-listed with East Asian Studies
Instructor(s): M. Johnson; Y. Nagata

AS.378.116. First Year Japanese II.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the fall term, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 60 kanji in context. Knowledge of grammar will be expanded significantly in 2nd year Japanese. May not be taken Satisfactory/Unsatisfactory. Recommended Course Background: AS.373.115
Prerequisites: Prereq: AS.378.115 or equivalent.
Instructor(s): M. Johnson; S. Katagiri.

Training in spoken and written language, increasing their knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Recommended Course Background: AS.378.115 and AS.378.116 or equivalent.
Prerequisites: AS.378.116 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.216. Second Year Japanese II.
Continuation of Beginning Japanese and Intermediate Japanese I. Training in spoken and written language, increasing students’ knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Lab required. Recommended Course Background: AS.378.215 or equivalent.
Prerequisites: Prereq: AS.378.215 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.315. Third Year Japanese.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Cross-listed with East Asian Studies
Prerequisites: AS.378.215-216
Instructor(s): M. Nakao
Area: Humanities.

AS.378.316. Third Year Japanese II.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Lab required. Continuation of AS.378.315. Recommended Course Background: AS.378.315 or equivalent.
Prerequisites: Prereq: AS.378.315 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It is also appropriate for graduate students who need to be able to read materials written in Japanese. Recommended Course Background: AS.378.115-116 or equivalent.
Instructor(s): M. Johnson
Area: Humanities.

Continued from 378.396: Fundamentals of Japanese Grammar. This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It covers complex grammatical items introduced in the 2nd year level from a higher level, linguistic perspective. It is also appropriate for graduate students who need to be able to read materials written in Japanese.
Prerequisites: 378.116 or equivalent or 378.396
Instructor(s): M. Johnson
Area: Humanities.

By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Recommended Course Background: AS.378.315 and AS.378.316 or equivalent.
Prerequisites: AS.378.316 or equivalent.
Instructor(s): Y. Nagata
Area: Humanities.
AS.378.416. Fourth Year Japanese II.
By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Lab required. Recommended Course Background: AS.378.415
Prerequisites: Prereq: AS.378.415 or equivalent.
Instructor(s): Y. Nagata
Area: Humanities.

This course is designed for graduate students (particularly in East Asian Studies) and undergraduate students whose proficiency level is higher than 4th-year Japanese as offered at Johns Hopkins University or equivalent and those who plan to pursue studies utilizing written Japanese materials. Students will learn effective methods for reading Japanese materials, varying from works of literature to modern academic articles on topics of students’ interest. Cross-listed with East Asian Studies.

AS.378.612. Readings in Japanese Studies II.
This course is designed for graduate students (particularly in East Asian Studies) and undergraduate students whose proficiency level is higher than 4th-year Japanese as offered at Johns Hopkins University or equivalent and those who plan to pursue studies utilizing written Japanese materials. Students will learn effective methods for reading Japanese materials, varying from works of literature to modern academic articles on topics of students’ interest. Cross-listed with East Asian Studies.

AS.380.101. First Year Korean.
Introduces the Korean alphabet, hangeul. Covers basic elements of the Korean language, high-frequency words and phrases, including cultural aspects. Focuses on oral fluency reaching limited proficiency where one can handle simple daily conversations. No Satisfactory/ Unsatisfactory. Cross-listed with East Asian Studies
Instructor(s): J. Song.

AS.380.102. First Year Korean II.
Focuses on improving speaking fluency to limited proficiency so that one can handle simple daily conversations with confidence. It provides basic high-frequency structures and covers Korean holidays. Continuation of AS.380.101. Recommended Course Background: AS.380.101 or permission required.
Prerequisites: Prereq: AS.380.101 or equivalent.
Instructor(s): J. Song.

AS.380.201. Second Year Korean.
Aims for improving oral proficiency and confident control of grammar with vocabulary building and correct spelling intended. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness. Project due on Korean cities. Existing demonstrable skills in spoken Korean preferred.
Prerequisites: Prereqs: AS.380.101 and AS.380.102
Instructor(s): J. Song
Area: Humanities.

AS.380.202. Second Year Korean II.
Aims for improving writing skills with correct spelling. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness, including discussion on family tree. Continuation of AS.380.201. Recommended Course Background: AS.380.201 or equivalent.
Prerequisites: Prereq: AS.380.201 or equivalent.
Instructor(s): J. Song
Area: Humanities.

AS.380.301. Third Year Korean.
Emphasizes reading literacy in classic and modern Korean prose, from easy essays to difficult short stories. Vocabulary refinement and native-like grasp of grammar explored. Project due on Korean culture. Cross-listed with East Asian Studies
Prerequisites: AS.380.202 or equivalent.
Instructor(s): J. Song
Area: Humanities.

AS.380.302. Third Year Korean II.
Emphasizes reading literacy in classic and modern Korean prose. By reading Korean newspapers and professional articles in one’s major, it enables one to be well-versed and truly literate. Continuation of AS.380.301. Cross-listed with East Asian Studies Prerequisite: AS.380.301 or equivalent.
Prerequisites: Prereq: AS.380.301 or equivalent.
Instructor(s): J. Song
Area: Humanities.

Program in Museums and Society
AS.389.369. Encountering the Art of East Asia: Museum Display, Theory and Practice.
Students reconsider the exhibition and interpretation of East Asian Art at the Walters Art Museum, developing a pilot installation to suggest a new permanent display. M&S Practicum Course. Class meets at the Walters Art Museum (extended time to allow for travel). Cross-listed with East Asian Studies.
Instructor(s): R. Mintz
Area: Humanities.

Geography Environmental Engineering
EN.570.407. Comparison of Environmental Challenges and Governance in China and the US.
In cooperation with the School of the Environment at Nanjing University, Nanjing, China, this course will study China’s environmental challenges and governance in the context of America’s own environmental challenges and governance system. Case studies will involve greenhouse gas emissions and a comparison of water quality issues in Tai Lake and the Chesapeake Bay. We will consider how developments may shape business, government, and culture, and the ways in which China and America may learn from one another. The class sessions will be conducted in part “live,” in part by teleconference with Nanjing University, and in part by web (including communications with Nanjing University students and faculty). The objectives for the course are to 1) Provide students with basic information and concepts-of law, business, and governance needed to understand 21st century environmental challenges and governance challenges; 2) Provide students exposure to important environmental problems facing both China and America; 3) Provide students with alternative frameworks needed to sift through and understand the wealth of information about environmental challenges and opportunities faced by China in the globalized world; and 4) Encourage students to learn to observe and think independently about how to frame and address questions of China environmental challenges and governance which may be key to the 21st century.
Instructor(s): E. Bouwer; H. Alavi
Area: Social and Behavioral Sciences.

Economics
The Department of Economics offers programs designed to improve the understanding of important economic problems and to provide the tools
needed for the critical analysis of these problems and for dealing with them in practice.

On the undergraduate level, the department provides both for those who want to become professional economists and for those interested in a specialty related to economics, such as business, law, government, history, health care management, or environmental engineering. Still other students are simply interested in improving their understanding of society or making informed assessments of economic policies as citizens or making wise decisions about personal finances.

On the graduate level, the department provides advanced training for students preparing for careers as professional economists. The program encompasses such fields as macroeconomics, microeconomic theory, econometrics, labor economics, international economics, industrial organization, economic development, and public finance, with an emphasis on the application of economic theory and quantitative methods. Because of the small number of graduate students admitted, they can work closely with faculty in graduate courses and seminars, and have easy and informal access to faculty members.

The introductory courses AS.180.101 Elements of Macroeconomics and AS.180.102 Elements of Microeconomics are open to all students. Courses at the 200-level have Elements of Economics (AS.180.101 and AS.180.102) as prerequisites.

AS.180.301 Microeconomic Theory and AS.180.302 Macroeconomic Theory courses have AS.180.101 and AS.180.102 as well as Calculus I (AS.110.106 or equivalent) as prerequisites. All 300-level courses above 301 and 302 have Microeconomic and/or Macroeconomic Theory (AS.180.301, AS.180.302) as prerequisites (or, with permission of the instructor, corequisites), as well as Elements of Economics and Calculus. Some 300-level courses have additional prerequisites; see individual course listings. Independent study is available, subject to the consent of the department and of the faculty member with whom the student wants to work.

Subject to the consent of the instructor, graduate courses at the 600-level are open to qualified undergraduates. The 600-level courses for which advanced undergraduates are most likely to be qualified are AS.180.601 Microeconomic Theory I and AS.180.603 Macroeconomic Theory I.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor's Degree. (p. 20))

For both the economics major and minor, a minimum grade of C- or better is required for all courses meeting the requirements and courses may not be taken satisfactory/unsatisfactory. Courses from study abroad or taken at other universities may count towards requirements only if they are approved by the department's director of undergraduate studies. Internships, independent studies, and intersessions courses do not apply toward major or minor requirements. Summer courses at universities other than Johns Hopkins DO NOT count toward the major or minor, except with prior approval of the Director of Undergraduate Studies for Economics.

Major Requirements:

**Economics Core**

* Students who use exam credits to satisfy the AS.180.101 Elements of Macroeconomics and/or AS.180.102 Elements of Microeconomics requirements must take additional courses in the department to reach a total of 10 courses in the department.

** Please note: 180.203 "Faculty Research in Economics", a S/U one-credit course, does not count as one of these three courses.

Additional Notes for Students

- EN.550.111 (p. 217) Statistical Analysis I or equivalent (any of the Statistics courses listed above) is a prerequisite for Econometrics.
- The Senior Honors Thesis sequence (AS.180.521 (p. 217) Econometrics, AS.180.521 (p. 217) Research in Economics and AS.180.522 (p. 217) Senior Thesis) cannot be used to satisfy any of the requirements for the major.

Course Scheduling

**Students who may major in economics:**

Freshman or sophomore year: *

Students planning graduate study in economics will find useful:

- AS.110.106 Calculus I
- AS.110.201 Linear Algebra
- AS.110.202 Calculus III
- EN.550.311 Probability and Statistics for the Biological Sciences and Engineering

Related work in other social sciences, history, mathematics, operations research, and computer programming

* Students trying to take these courses after freshman or sophomore year are likely to run into serious schedule conflicts in the junior and senior years because of the need to fulfill the prerequisites for advanced courses.
** Consult with faculty at an early stage.

### Honors Program in Economics

Departmental honors are awarded to those students who satisfy the following requirements:

- All economics courses applied to the major have been taken in the department.
- AS.180.521 Research in Economics and AS.180.522 Senior Thesis. The thesis may not be counted as one of the five economics electives.
- A grade point average of at least 3.5 for all economics courses.

### Minor in Economics

Students with a major in another department may be awarded a minor in economics with satisfactory work in the following courses:

- AS.180.101 Elements of Macroeconomics
- AS.180.102 Elements of Microeconomics

Four economics courses at the 200- or 300-level (not including AS.180.203)

No substitution of courses in other departments for economics electives may be made. Students who use exam credits to satisfy the AS.180.101 (http://e-catalog.jhu.edu/departments-program-requirements-and-courses/arts-sciences/economics) Elements of Macroeconomics and/or AS.180.102 (http://e-catalog.jhu.edu/departments-program-requirements-and-courses/arts-sciences/economics) Elements of Microeconomics requirements must take additional courses in the department to reach a total of 6 courses.

### Center for Financial Economics (CFE)

Founded in 2008 and housed in the Economics Department in the Krieger School of Arts and Sciences at Johns Hopkins, the Center for Financial Economics blends the study of finance and economics, providing in-depth training and cutting-edge research in both. The dual research and teaching missions of the Center are premised on the belief that a deep understanding of modern economies requires an integrated treatment of finance and the broader economic forces driving economic progress. The recent financial crisis vividly illustrates the vital need for improved understanding of these issues on the part of practitioners, policymakers, and academics.

The CFE offers an undergraduate minor, producing expertise in finance within the context of a top-notch liberal arts education. The minor will equip students with a thorough foundation in the workings of financial markets and their role in the broader economy, providing a foundation for careers in finance, business, academics, and government. The Center is working toward offering a financial economics major and a Ph.D. in financial economics.

### The Minor in Financial Economics

The main objective of the minor is to provide students with training in the conceptual framework, guiding concepts, and technical tools of modern finance. The broader goal is to provide insights into the large and the small—the macro and micro—of how this framework helps us understand the workings of the economy. The minor in financial economics includes four required courses and two elective courses chosen from the list below.

#### Required Courses

- AS.180.101 Elements of Macroeconomics 3
- AS.180.102 Elements of Microeconomics 3
- AS.180.263 Corporate Finance 3
- AS.180.367 Investment-Portfolio Management 3

#### Elective Courses (Select two of the following) 6

- AS.180.242 International Monetary Economics
- AS.180.261 Monetary Analysis
- AS.180.266 Financial Markets and Institutions
- AS.180.336 Macroeconomic Strategies
- AS.180.370 Financial Market Microstructure
- AS.180.373 Corporate Restructuring
- EN.660.203 Financial Accounting

Total Credits 18

The minor is open to all majors. A minimum grade of C- or better is required for all courses and they may not be taken satisfactory/unsatisfactory. One cannot take both the economics and financial economics minor. For economics majors, there is a restriction on double-counting: the two elective courses counting toward the minor cannot also count toward the economics major.

### Requirements for Admission

To apply for admission, an application must submit an official transcript of all academic work beyond secondary school and at least two letters of recommendation from previous instructors. Applicants must submit scores from the Graduate Record Examination. All applicants who have not done their undergraduate work in a university where English is the sole language of instruction must take the TOEFL. We have a minimum required score of 100 on the Internet-based test (IBT), or 250 on the computer-based test (CBT), or 600 on the old paper-based test (PBT).

Students should have knowledge of economic theory and statistics and a strong background in mathematics including differential and integral calculus and linear algebra. Admission decisions are primarily based on GRE scores (especially quantitative), academic record (especially in economics and mathematics courses), and letters of recommendation.
We especially welcome applications from under-represented minorities, as diversity is important in our graduate program.

**Requirements for the M.A. Degree**

The department does not admit students from outside Johns Hopkins University who intend to work only for an M.A. However, it does offer this degree as an intermediate step toward the Ph.D. or as a final degree to some of those who do not complete their doctoral work.

Beyond the general university requirements, the department requires for the master’s degree either two years of satisfactory graduate course work or one year of satisfactory graduate course work and an acceptable master’s essay.

**Requirements for the Ph.D. Degree**

The departmental requirements for the doctor’s degree include the following:

- Basic course work in economic theory, mathematical methods of economics, and econometrics, and additional work in specialized branches of economics depending on his/her previous training and special interests. Candidates may take relevant work in related departments, such as History, Mathematics, Mathematical Sciences, Political Science, Sociology, Anthropology, and Public Health.
- The comprehensive examination. Administered by the department, this consists of two written examinations designed to test the candidate’s grasp of micro- and macroeconomics, and a research paper. The written examinations are usually taken at the beginning of the third term, and the research paper is submitted during the fourth term.
- A dissertation. This should be an original investigation worthy of publication, prepared under the supervision of one or more members of the faculty. The candidate must submit the dissertation in final typed form at least three weeks before the date of the Graduate Board Oral Examination.

**Financial Aid**

The department offers a variety of forms of financial support to graduate students enrolled in the Ph.D. program. Students may receive full or partial tuition fellowships, which may be accompanied by cash stipends or teaching assistantships. The department guarantees financial aid for a minimum of five years of graduate study conditional on satisfactory performance and often for a sixth year as well. In the 2013-2014 academic year, full stipends or assistantships will carry an award of approximately $21,000 per year. The T. Rowe Price Fellowship, established by the T. Rowe Price Associates Foundation to honor the memory of Mr. Price, is awarded to an entering graduate student each year. It covers tuition and adds several thousand dollars to the basic stipend for three years and provides for a teaching assistantship thereafter. At the same time, it is possible that the department will be able to offer one or more of the university’s Owen Fellowships to its outstanding graduate applicants. This fellowship consists of a stipend of $27,000 toward the student’s first three years. Although aid is provided on a yearly basis subject to the availability of financial support from the university, it is the department’s policy to continue aid for at least four and usually five years, provided the student is making satisfactory progress.

**Carl Christ Fellowship**

In the academic year 1989–90, the department established the Carl Christ Fellowship fund to honor one of its faculty members for his distinguished service and achievements. The proceeds of the fund are used to support outstanding graduate students at the dissertation stage of their research.

For further information about graduate study in economics, contact the director of graduate admissions, Department of Economics.

For current faculty and contact information go to http://econ.jhu.edu/directoryindex/faculty/

**Faculty**

**Chair**

Robert A. Moffitt
Krieger-Eisenhower Professor: labor economics, applied econometrics, public finance, population economics.

**Professors**

Laurence M. Ball
Macroeconomics.

Christopher Carroll
Macroeconomics.

Gregory Duffee
Carl Christ Professor: finance.

Jon Faust
Louis J. Maccini Professor, Director of the Center for Financial Economics: econometrics, macroeconomics, financial economics.

Mark Gersovitz
Development economics, public finance.

Bruce Hamilton
Professor Emeritus; Urban Economics, Public Finance, Labor Economics.

Yingyao Hu
Micro-econometrics and it’s Applications, Non-classical Measurement Error.

Olivier Jeanne
International macroeconomics.

Edi Karni
Scott and Barbara Black Professor: economics of uncertainty and information, microeconomic theory, decision theory.

M. Ali Khan
Abram G. Hutzler Professor: mathematical economics, microeconomic theory, intellectual history.

Jonathan Wright
Time series econometrics, empirical macroeconomics, finance.

**Assistant Professors**

Jorge Balat

Ying Chen
This course introduces the basic tools of macroeconomics and teaches how they are applied to real world economic policy. Throughout the course, the main goals will be to a) study economic aggregates such as the overall price level, the unemployment rate and the GDP b) understand how they relate to each other. Attention will be given to fiscal and monetary policies. We will also analyze the recent financial crisis and its impact on the economic activity.
Instructor(s): R. Barbera
Area: Social and Behavioral Sciences.

AS.180.102. Elements of Microeconomics.
An introduction to the economic system and economic analysis with emphasis on demand and supply, relative prices, the allocation of resources, and the distribution of goods and services, theory of consumer behavior, theory of the firm, and competition and monopoly, including the application of microeconomic analysis to contemporary problems.
Instructor(s): B. Hamilton
Area: Social and Behavioral Sciences.

AS.180.104. Seminar in Financial Literacy.
The Seminar in Financial Literacy is a two-week seminar designed to introduce Hopkins undergraduates to the financial services industry. The goal is to provide an introduction to a variety of topics in finance, with a practical focus on exposing the students to employment options in the industry. The Seminar will consist of two weeks of lectures, delivered by distinguished Hopkins alumni, followed by a three-day trip to New York City during which we will visit various firms in the industry. By the end of the seminar, students should have developed an understanding of the structure and jargon of the financial services industry. Hence, they should be poised to profit from the firm visits and networking receptions that will take place on the trip to NYC.
Application/Registration for Experiential Learning courses/trips must be processed at the Career Center, Garland Hall 3rd Floor. -REGISTER CAREER CENTER NOT ISIS-
Prerequisites: AS.180.101
Instructor(s): D. Garcia Molina
Area: Social and Behavioral Sciences.
AS.180.117. Game Theory in Social Sciences.
Game Theory is the study of multiple person decision problems that are characterized by the social situations in which the well being of a decision maker depends not only on his own actions but also on those of others. Such problems arise frequently in economics, political science, business, military science, history, biology, etc. In this course, I will introduce the basic tools of game theoretic analysis with an emphasis on applications. In particular, you will first learn how to model different social situations as games and related equilibrium concepts. Then, you will see various examples from different fields. And, we will play several games in the class. Game theory has emerged as a branch of mathematical economics and is still quite mathematical. In this course, I will emphasize the conceptual analysis and applications, and keep the level of mathematical technicalities at the minimum. In a nutshell, we will use mostly the verbal and graphical tools.
Instructor(s): M. Uyanik
Area: Social and Behavioral Sciences.

AS.180.171. Topics in Political Economy.
Societies make their key economic decisions under the constraints imposed by their political institutions. This course studies the interaction between economics and politics in public policy design, with topics ranging from fiscal policy to international development. Some recurring questions include why inefficient policies get enacted and how different political institutions give rise to different policy outcomes.
Instructor(s): L. Karakas
Area: Social and Behavioral Sciences.

In recent years, the assumptions of traditional finance models that market participants are generally rational and prices of securities accurately reflect all available information came under challenge. The field of behavioral finance argues that financial markets are best understood with models in which at least some agents are not fully rational. In this course, we will examine behavioral finance models and their practical applications. This course is based on Harvard Business School cases. Recommended Course Background: AS.180.102
Instructor(s): A. Scherbina

The purpose of this course is to provide students an insight of how Economics can help to understand individual’s legal behavior, and how the Law can affect the way economic agents behave. The course will be divided in two parts, the first one will study the economics of litigation, while the second one will study the social implications of a change in the law. For the first part we will study how litigation costs, information of the parties involved, tort regimes, and the size of the stakes in dispute affect the outcome of a litigation process. For the second part we will study actual courts decisions and their social implications such as welfare participation, business ventures and public policy making.
Prerequisites: AS.180.102 OR AS.180.301
Instructor(s): E. Garcia Morales
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.203. Faculty Research in Economics.
This course will consist of a series of informal lectures by various professors in the Department of Economics. Each lecture will consist of a description of a professional research project which he/she has undertaken over the course of his/her profession career. S/U grading only.
Prerequisites: Prereqs: AS.180.101 AND AS.180.102
Instructor(s): B. Hamilton.

This course provides an introduction to game theory with an emphasis on applications. Applications in economics, political science, business, military science, history, biology, theology and recreation will be covered. No prior knowledge of game theory is presumed and the required mathematical background is minimal (high school algebra and one term of calculus will be sufficient).
Instructor(s): L. Karakas
Area: Social and Behavioral Sciences.

AS.180.228. Economic Development.
Diagnostic test on Elements of Economics is required to be taken in the second week. A review of the historical experience in presently developed economies, model of development, planning techniques, and development policies. The course is aimed at identifying major economic questions relevant to less developed economies and to showing how economic analysis can be used further to understand the obstacles to development and to formulate appropriate policies.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences.

Theory of comparative advantage and the international division of labor: the determinants and pattern of trade, factor price equalization, factor mobility, gains from trade and distribution of income, and theory and practice or tariffs and other trade restrictions. Recommended Course Background: AS.180.101.
Prerequisites: AS.180.102.
Instructor(s): T. Bertrand
Area: Social and Behavioral Sciences.

AS.180.242. International Monetary Economics.
This course presents International Monetary Economics theory and applies it towards gaining an understanding of recent events and current policy issues. The theory presented in this course covers a broad range of topics including exchange rate determination, monetary and fiscal policy in an open economy, balance of payments crises, the choice of exchange rate systems, and international debt. The insights provided by these theoretical frameworks will enable us to discuss topics such as the current global financial crisis, global financial imbalances, the Chinese exchange rate regime, and proposed changes in the international financial architecture.
Prerequisites: AS.180.102; AS.180.101
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

For centuries, international trade has been a source of intense debate within and among nations. Proponents of free trade claim that trade benefits all nations in terms of higher incomes, lower consumer prices, and greater product variety. Opponents point to the painful economic adjustments that accompany the removal of trade barriers. In recent years, the debate has expanded to include labor rights, the environment, health and safety, intellectual property, and national sovereignty. Through the lens of economic theory, we will evaluate the arguments put forth by proponents and opponents of free trade. We will apply these theories to several case studies, with a particular focus on the conflicts that have arisen since the establishment of the World Trade Organization.
Prerequisites: Prereq. AS.180.102
Instructor(s): P. Seneviratne
Area: Social and Behavioral Sciences.
AS.180.252. Economics of Discrimination.
This course examines labor market discrimination by gender, race and ethnicity in the United States. What does the empirical evidence show, and how can we explain it? How much of the difference in observed outcomes is driven by differences in productivity characteristics and how much is due to discrimination? How do economists theorize about discrimination and what methodologies can be employed to test those theories? What has been the impact of public policy in this area; how do large corporations and educational institutions respond; and what can we learn from landmark lawsuits? The course will reinforce skills relevant to all fields of applied economics, including critical evaluation of the theoretical and empirical literature, the reasoned application of statistical techniques, and analysis of current policy issues.
Prerequisites: AS.180.102
Instructor(s): B. Morgan
Area: Social and Behavioral Sciences.

AS.180.261. Monetary Analysis.
This course analyzes the financial and monetary system of the U.S. economy and the design and implementation of U.S. monetary policy. Among other topics, we will examine the role of banks in the economy, the term structure of interest rates, the stock market, the supply of money, the role of the Federal Reserve in the economy, the objectives of monetary policy in the United States and current monetary policy practice.
Prerequisites: AS.180.101 and AS.180.102
Instructor(s): L. Ball
Area: Social and Behavioral Sciences.

AS.180.263. Corporate Finance.
This course is an introduction to the financial management of a corporation. Students study the following broad questions. How should a firm decide whether to invest in a new project? How much debt and equity should a firm use to finance its activities? How should a firm pay its investors? How do taxes affect a firm's investment and financing decisions? What determines the value of a firm? The emphasis throughout the course is on the economic principles that underlie answers to these questions.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): G. Duffee
Area: Social and Behavioral Sciences.

AS.180.266. Financial Markets and Institutions.
Understanding design and functioning of financial markets and institutions, connecting theoretical foundations and real-world applications and cases. Basic principles of asymmetric information problems, management of risk. Money, bond, and equity markets; investment banking, security brokers, and venture capital firms; structure, competition, and regulation of commercial banks. Importance of electronic technology on financial systems.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): J. Faust
Area: Social and Behavioral Sciences.

AS.180.276. Economics of the Internet.
This course explores the Internet from an economist’s perspective, with the objective of understanding the effects on pricing and competitive behavior brought about by lower search and transaction costs in online markets. Unique features of information goods, product differentiation, market dynamics, reputation, and online auctions are among the topics examined. Dean’s Teaching Fellowship course.
Instructor(s): L. Tiererova
Area: Social and Behavioral Sciences.

Application of economic concepts and analysis to the health services system. Review of empirical studies of demand for health services, behavior of providers, and relationship of health services to population health levels. Discussion of current policy issues relating to financing and and resource allocation.
Prerequisites: AS.180.102
Instructor(s): D. Bishai
Area: Social and Behavioral Sciences.

AS.180.301. Microeconomic Theory.
An introduction to the modern theory of allocation of resources, starting with the theories of the individual consumer and producer, and proceeding to analysis of systems of interacting individuals, first in the theory of exchange, then to systems which include production as well.
Prerequisites: Corequisite/Prerequisite: AS.180.101 180.101 must be taken EITHER BEFORE (prerequisite) enrolling in 180.301 or AT THE SAME TIME (corequisite).;Prerequisites: AS.180.102 AND (AS.110.106 OR AS.110.107 OR AS.110.108 OR AS.110.109 OR equivalent)
Instructor(s): A. Trujillo; Y. Chen
Area: Social and Behavioral Sciences.

The course provides a treatment of macroeconomic theory including a static analysis of the determination of output, employment, the price level, the rate of interest, and a dynamic analysis of growth, inflation, and business cycles. In addition, the use and effectiveness of monetary and fiscal policy to bring about full employment, price stability, and steady economic growth will be discussed.
Prerequisites: Coreq for AS.180.302: AS.180.102[C];AS.180.101 and Calculus 1 or equivalent
Instructor(s): A. Korinek
Area: Social and Behavioral Sciences.

AS.180.303. Topics in International Macroeconomics and Finance.
The course will review selected topics in international macroeconomics and finance. The topics for the Fall of 2015 include: financial globalization; international portfolio diversification; the problems posed by “sudden stops” in capital flows to emerging markets; global imbalances and global demand rebalancing; how different exchange rate regimes have fared in the global financial crisis; sovereign default in the light of the Argentine experience; and the ongoing Russian currency and financial crisis. The course involves mathematical modeling as well as data analysis.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

AS.180.305. Time Series Analysis in Economics.
The objective of this course is to study time series with a focus on forecasting. While econometric theory is briefly touched, most of the emphasis is on applied time series modeling and forecasting. Students at the end of the course will be able to use Eviews to model and forecast time series using macroeconomic or financial data.
Area: Humanities.

This course uses data from the sports industry to test standard microeconomic theories of individual and firm behavior. The major focus of this course will be applied empirical analysis.
Instructor(s): B. Phelan
Area: Social and Behavioral Sciences.
In this seminar, we will discuss broad ranging views on the future of finance. Most classes will involve presentations by and discussions with experts in the field on their perspectives regarding how finance will evolve in light of the current turmoil and rapidly changing conditions. We will place an emphasis on bringing in speakers with a wide range of views, including controversial vies. Speakers will come from the finance industry, government, and academics. The grade will be based on classroom participation and a term paper.
Prerequisites: AS.180.301 AND (AS.180.263 OR AS.180.367)
Instructor(s): J. Wright; R. Barbera.

AS.180.308. Financial Regulations in the US.
This course begins with the time of the great Framers and adopts a historical approach to U.S. financial regulations. By examining all major crises and the respective policy responses, the course will provide a narrative on the evolution of the regulatory landscape in America. Students will also be exposed to influential academic papers that address the essentiality (and even the redundancies and failures) of key aspects of financial regulations, including deposit insurance, bank capital and liquidity requirements, and supervisory rules. Dean’s Teaching Fellowship course. Recommended courses: AS.180.261 and AS.180.266
Instructor(s): H. Nguyen
Area: Social and Behavioral Sciences.

AS.180.309. Economics of Uncertainty and Information.
In this course we'll discuss the theory of decision making in the face of risk, the theory of risk aversion and its applications to financial and insurance markets. Building on the theory of individual decision making under risk, we will study the economic implications of asymmetric information, the type of market failures produced by adverse selection and moral hazard problems, and the models that were advanced to analyze these problems, including incentive contracts, screening and signaling equilibria.
Prerequisites: AS.180.301
Instructor(s): E. Karni.

The course explores the economic rationale for, and consequence of, antitrust laws. In addition to economic analysis we will study landmark antitrust cases.
Prerequisites: AS.180.301
Area: Social and Behavioral Sciences.

Students study economic principles and state-of-the-art mathematical models used to value fixed securities and their derivatives. The course emphasizes advanced practical applications as well as theory. Students will develop their own computer code for price fixed-income instruments and evaluate their risks.
Prerequisites: AS.180.367
Instructor(s): G. Duffee
Area: Social and Behavioral Sciences.

AS.180.320. The Marginal Revolution.
This course aims to answer the question “Who, when and where do modern economic theories come from?” By looking at the innovative concept of “marginalism” developed by Walras, Jevons, and Menger in the 1870’s, we can put contemporary ideas in an historical perspective as well as gain a richer understanding of today’s economics discipline. The class uses both primary and secondary sources, and will be discussion oriented.
Prerequisites: AS.180.301
Instructor(s): N. Johnson
Area: Humanities, Social and Behavioral Sciences.

The goal of this course is to use economic models to investigate life events such as going to school, getting married, and having children. The course will focus on individual behavior and outcomes in six important stages of the life cycle: early childhood, schooling, adolescence, marriage and divorce, child bearing years, and retirement. While the course is designed to introduce students to a variety of economic theory and empirical techniques, the material is designed to prepare upper level students to write a proposal on an original research question.
Prerequisites: AS.180.301
Instructor(s): G. Pauley
Area: Social and Behavioral Sciences.

AS.180.328. Economics of Auctions.
A successfully designed auction depends on the idiosyncrasies of the market being studied. Students will learn the core auction formats and some classic theoretical results that provide a benchmark for even the most recent auctions research. Additionally, students will learn simple empirical strategies that allow these models (and the behavior they predict) to be married with real world data. Students will develop the tools needed for analyzing and conducting auctions research.
Prerequisites: AS.180.301
Instructor(s): J. Balat
Area: Social and Behavioral Sciences.

AS.180.334. Econometrics.
Introduction to the methods of estimation in economic research. The first part of the course develops the primary method employed in economic research, the method of least squares. This is followed by an investigation of the performance of the method in a variety of important situations. The development of a way to handle many of the situations in which ordinary least squares is not useful, the method of instrumental variables, concludes the course.
Prerequisites: EN.550.111 OR EN.550.420 OR EN.550.310 OR AS.280.345 OR EN.560.435 OR EN.550.311; Prereq or Coreq: AS.180.301 or AS.180.302
Instructor(s): E. Krasnokutskaya
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.335. Topics in Econometrics.
Area: Social and Behavioral Sciences.

Will sketch out a strategy for anticipating economic turning points. Business cycle basics, monetary policy/financial market/real economy interactions will be reviewed. Long-term growth issues will be explored.
Prerequisites: AS.180.101 AND AS.180.102 AND AS.180.302 or Perm. Req’d.
Instructor(s): R. Barbera
Area: Social and Behavioral Sciences.
AS.180.346. Identification and Estimation in Econometrics.
This is an advanced undergraduate course, introducing a list of frontier theories and methods of identification and estimation for popular econometric models. The course is designed as preparation material for undergraduate students who in the future plan to advance to graduate studies in economics, business, public health, public policies and international studies. Recommended Course Background: AS.180.301.
Prerequisites: AS.180.334
Instructor(s): Y. Sasaki
Area: Social and Behavioral Sciences.

AS.180.350. Economics of Social Networks.
A detailed analysis of why certain social networks are likely to emerge and what the structure of these networks means for a wide range of social and economic interactions.
Prerequisites: AS.180.301
Instructor(s): M. Smirnov
Area: Social and Behavioral Sciences.

AS.180.351. Labor Economics.
The course discusses various issues in labor markets from the perspective of economic theory. We first study the major forces at work that shape labor market behavior; firms' labor demand and workers' labor supply. Then we discuss the equilibrium behavior of employment and wages. Using these tools, we also cover various applied topics in labor economics, such as minimum wage regulations, male-female wage differentials, human capital investment, worker mobility, and unemployment.
Prerequisites: Prereq: AS.180.301
Instructor(s): Y. Takahashi
Area: Social and Behavioral Sciences.

Empirical data may not contain all the variables suggested by economic theories. This course introduces methodologies to identify and estimate economic models containing unobservables. Recommended Course Background: AS.180.301 and AS.180.334.
Instructor(s): Y. Hu
Area: Social and Behavioral Sciences.

AS.180.355. Economics of Poverty/Inequality.
This course focuses on the economics of poverty and inequality. It covers the measurement of poverty and inequality, facts and trends over time, the causes of poverty with inequality with a focus on those related to earnings and the labor market, and public policy toward poverty and inequality, covering both taxation and government expenditure and programs. By the nature of the material, the course is fairly statistical and quantitative. Students should have an intermediate understanding of microeconomic concepts. Basic knowledge of regression analysis is also helpful.
Prerequisites: AS.180.301
Instructor(s): R. Moffit
Area: Social and Behavioral Sciences.

AS.180.363. Sex, Drugs and Dynamic Optimization: The Economics of Risky Behavior.
We apply the tools of economic analysis to understand behaviors that are enjoyable today, but may have negative consequences in the future.
Prerequisites: AS.180.301 AND AS.180.302 AND AS.180.334 or permission of the instructor
Instructor(s): N. Papageorge
Area: Social and Behavioral Sciences.

AS.180.367. Investment-Portfolio Management.
Prerequisites: Prereqs: AS.180.301 AND ( EN.550.111 OR EN.550.112 OR EN.550.310 OR EN.550.311 OR EN.550.420 OR EN.550.430)
Instructor(s): J. Wright
Area: Social and Behavioral Sciences.

Seminar on quantitative concepts, decision-making, and strategy in business organizations. Overall context is ‘value’ – how it is measured and maximized long term. Microeconomic theory of the firm, competitive analysis, corporate finance.
Prerequisites: Prereqs: AS.180.301 AND (EN.550.111 OR AS.180.367 OR AS.180.263 AND AS.180.267) or permission of the instructor.
Instructor(s): J. Knapp
Area: Social and Behavioral Sciences.

Prerequisites: AS.180.301
Instructor(s): C. Fohlin
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.371. Industrial Organization.
Investigation of firm behavior in markets characterized by imperfect competition. Imperfect competition lies in between monopoly and perfect competition and characterizes most major industries in modern capitalist economies. Central issues to be covered in the course include what determines the intensity of competition? What determines the extent of entry and exit? How is it that some firms consistently dominate their industries?
Prerequisites: Prereq: AS.180.301
Instructor(s): E. Krasnokutskaya
Area: Social and Behavioral Sciences.

AS.180.372. Finance and Macroeconomy.
This class is conducted as a round table discussion on current topics at the intersection of finance, monetary policy, and macroeconomics. Students will be expected to read assigned material, participate in the discussion, and take a final exam.
Prerequisites: AS.180.101 AND (AS.180.263 OR AS.180.367) or by instructor permission.
Instructor(s): J. Faust
Area: Social and Behavioral Sciences.

AS.180.373. Corporate Restructuring.
The objective of this course is to familiarize students with financial, legal and strategic issues associated with corporate restructuring process. Main focus of the course is on the restructuring of financially distressed firms. The course surveys a variety of restructuring methods (out-of-court workouts, exchange offers, prepackaged bankruptcies, Chapter 11 bankruptcies, insolvency practices in other countries) available to troubled firms. A small portion of the course is concerned with restructuring employee contracts and equity claims (equity carve-outs, spin-offs, tracking stock). AS.180.263 Corporate Finance recommended.
Prerequisites: AS.180.301
Instructor(s): H. Eraslan
Area: Social and Behavioral Sciences.
**AS.180.385. Evolution and Economics.**
This course provides an introduction to evolutionary theory and its applications to modern economics. We start by introducing formal models of the driving forces of evolution: mutation, selection, and survival of the fittest. Next we investigate how these forces have shaped human preferences and behaviors that are typically taken as given in economic models. Finally, we discuss the evolution of social systems like the economy we live in.
Instructor(s): A. Korinek
Area: Social and Behavioral Sciences.

**AS.180.389. Social Policy Implications of Behavioral Economics.**
Economists increasingly incorporate insights from psychology into models of rational decision-making. Known as "behavioral economics", this line of research considers how, for example, emotions, rules-of-thumb, biased beliefs and time-inconsistent preferences influence how we make choices. Behavioral economics increasingly pervades policy discussions on topics as diverse as: obesity, the role of media, subprime mortgages and voting patterns. Behavioral models are certainly novel, but do they help us to design superior social policies? With the goal of preparing students to address this question, this course (1) provides a thorough overview of the main contributions of behavioral economics, highlighting departures from more traditional economic models and (2) emphasizes how behavioral economic models might (or might not) improve how we think about social policy.
Prerequisites: Prereqs: AS.180.301 AND AS.180.334 or knowledge of statistical analysis up to the level of multi-variate regression.
Instructor(s): N. Papageorge
Area: Social and Behavioral Sciences.

**AS.180.390. Health Economics & Developing Countries.**
Prerequisites: AS.180.301
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences.

**AS.180.391. Economics of China.**
Discussion of the economic experience of Post-War China, primarily emphasizing topics rather than historical narrative: agriculture, industry including corporate governance and public enterprises, international trade, population, migration, education, health, public finances among other topics.
Prerequisites: AS.180.301 OR AS.180.228
Instructor(s): M. Gersovitz

**AS.180.393. Economics of Africa.**
Discussion of the economic experience of post-colonial Africa emphasizing topics rather than a historical narrative: agriculture, manufacturing, trade, population, education, health, public finances among others. Students are responsible for a research paper, topic choice and paper development in close consultation with the instructor, students to give a class presentation on paper findings. Course qualifies as writing intensive for the writing requirement.
Prerequisites: AS.180.228 or permission of instructor
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences.

**AS.180.501. Independent Study.**
Instructor(s): J. Faust; R. Moffitt; Staff.

**AS.180.502. Independent Study.**
Instructor(s): Staff.

**AS.180.504. Independent Study.**
Instructor(s): O. Jeanne; Staff.

**AS.180.505. Independent Study.**
Instructor(s): G. Duffee.

**AS.180.512. Senior Thesis.**
Students enrolled in this course will complete the Senior Honors Thesis under the supervision of a thesis advisor (who will have been chosen by the student prior to registration for AS.180.521). The formal course instructor will be in charge of overseeing registration and submitting grades. He/she will also be available for discussions of progress or problems on the thesis. Please note that your thesis advisor can be any faculty member in the Department of Economics, and need not be the same person as the course instructor. (This course cannot be counted as one of the 5 elective economics courses required for the Economics Major.)
Prerequisites: AS.180.521
Instructor(s): O. Jeanne; Staff.

**AS.180.552. Internship.**
Instructor(s): G. Duffee.

**AS.180.570. Independent Study.**

**AS.180.571. Internship.**
Instructor(s): L. Ball.

**AS.180.597. Research.**
Instructor(s): N. Papageorge; Staff.

**AS.180.599. Independent Study.**
Instructor(s): N. Papageorge; Staff; T. Woutersen.

**AS.180.601. Microeconomic Theory I.**
A systematic presentation of microeconomic theory in both its partial equilibrium and general equilibrium aspects. Topics covered include preferences and utility, exchange, production, theory of the firm, capital and interest, competition and monopoly, stability of equilibrium, and welfare economics.
Instructor(s): E. Karni; M. Khan.

**AS.180.602. Microeconomic Theory.**
First term: a systematic presentation of microeconomic theory both its partial equilibrium and general equilibrium aspects. Topics covered will include preferences and utility, exchange, production, theory of the firm, capital and interest, competition and monopoly, stability of equilibrium, and welfare economics. Second term: a more intensive discussion of selected topics, emphasizing recent contributions.
Instructor(s): E. Karni; Y. Chen.

**AS.180.603. Macroeconomic Theory I.**
A comprehensive treatment of macroeconomic theory, including static analysis of aggregate output employment, the rate of interest, and the price level; aggregative theory of investment, consumption, demand and supply of money; empirical work on aggregative relationships.
Instructor(s): C. Carroll.
First term: a comprehensive treatment of macroeconomic theory, including static analysis of aggregate output employment, the rate of interest, and the price level; aggregative theory of investment, consumption, demand and supply of money; empirical work on aggregative relationships. Second term: the macrodynamic theory of growth, cycles, unemployment and inflation, and selected subjects.
Instructor(s): A. Korinek.

AS.180.605. Advanced Macroeconomics.
Topics of recent research in macro-economics. Content will vary from year to year. Likely topics include implicit contract theory, search theory and unemployment, disequilibrium macroeconomic models, monetary policy and the control of inflation, contract-based rational expectations models, imperfect competition in macrodynamic models, business cycle models, empirical tests of rational expectations models, theories of investment behavior, and debt neutrality.
Instructor(s): E. Sager.

AS.180.606. Advanced Macroeconomics II.
Topics of recent research in macroeconomics. Prof. Ball’s course covers nominal rigidities, dynamic-consistency theories of inflation, inflation inertia and the costs of disinflation, monetary policy, costs and benefits of price stability, benefits of output stabilization, alternative policy rules, measuring inflation, unemployment, efficiency-wage theories, the behavior of the NAIRU, macro in middle-income countries, high inflation and stabilization, currency crises. Prof. Carroll’s course analyzes implications of the buffer-stock and habit formation theories of consumption for comovement of aggregate variables and asset pricing. The models are applied to study the phenomena of declining U.S. saving rate, the dynamic relationship between saving rates and growth, and the equity premium puzzle.
Prerequisites: AS.180.603 AND AS.180.604
Instructor(s): L. Ball.

AS.180.607. Macroeconometrics I.
The course is an attempt to provide a framework for discussing the techniques that are used in macroeconomic analysis. Generally the bias that it has is one of looking at these from the perspective of someone analyzing macroeconomic data for policy analysis. Consequently, many of the applications considered are drawn from the type of research conducted in central banks and finance ministries. Its emphasis is therefore upon the issues raised by the analysis of time series of macro-economic data. Today there is an emerging literature that looks at micro-economic data as well as conducting cross-country studies. We will tend to ignore that material as the methods used in such research are essentially those of micro-econometrics, although sometimes with adjustments made to reflect the nature of macro-economic time series.
Prerequisites: AS.180.633-634
Instructor(s): J. Faust.

AS.180.608. Macroeconometrics II.
Instructor(s): J. Wright.

AS.180.611. Economics of Uncertainty.
A review of the theory of decision making under uncertainty and its applications to problems of optimal insurance, portfolio selection, savings decisions and optimal search. Alternative approaches to decision making under uncertainty will be surveyed. Attitudes towards risk will be characterized and the issues of measurement and comparability of these attitudes discussed, both in the univariate and multivariate cases; applications will be given. The theory of optimal search will be developed with emphasis on its usefulness for the study of labor markets and unemployment.
Instructor(s): E. Karni.

A course describing developments in the theory of choice of uncertainty, responding to evidence that observed behavior is inconsistent with the predictions of expected utility theory. The course will cover rank-dependent models of choice under risk and uncertainty, multiple prior models of choice in the absence of well-defined probabilities and the problem of responding to ‘unknown unknowns’, that is the problem that any model of a decision problem is necessarily incomplete and may be overturned by unanticipated contingencies. Recommended Course Background: AS.180.611-AS.180.612
Instructor(s): J. Quiggin.

This course traces the extent to which modern economic theory, particularly as it pertains to pure competition in market and non-market games under the rationality postulate, is grounded in the language of probability and measure theory. Special attention will be paid to the formal expression of ideas such as economic and numerical negligibility, on the one hand, and diffuseness and conditional independence of information, on the other. Towards this end, the course will develop rigorous formulations of basic ideas of (conceptual rather than computational) probability and apply them: first, to develop the fundamental theorems of welfare economics, including the core theorems; and second, to large anonymous and non-anonymous games as well as to finite-agent games with private information. The course will be self-contained from the technical point of view but will presuppose a level of mathematical maturity that ought typically to be achieved by taking courses such as AS.180.615 and AS.180.601.
Instructor(s): M. Khan.

A course in mathematics for economists not planning to work in quantitative areas, or for those whose mathematics background is weak. The emphasis is on optimization theory; also included are topics in advanced calculus and linear algebra.
Instructor(s): E. Karni.

AS.180.616. Mathematical Methods in Economics II.
This is a continuation of AS.180.615 and is a course in dynamic aspects of optimization models. Techniques of dynamic programming and the calculus of variations will also be developed.
Prerequisites: AS.180.615 or Perm. req'd
Instructor(s): Staff.
The course covers a set of numerical methods that facilitate computation and estimation of equilibrium outcomes in economic environments. The emphasis is put on dynamic models and their applications in multi-agent settings. Topics covered include, among others: solving dynamic programs in discrete and continuous time, approximate dynamic programming, dynamic games, approximations of Markov perfect dynamics, and CCP estimation of dynamic systems.
Instructor(s): P. Jeziorski
Area: Social and Behavioral Sciences.

AS.180.618. Game Theory.
This course is an introduction to cooperative and non-cooperative games. Its focus is non-cooperative game theory with applications in economics. Topics include foundations of solution concepts, refinements of Nash equilibrium, repeated games, games with incomplete information, differential games, and experimental testing of hypotheses.
Prerequisites: AS.180.601
Instructor(s): H. Eraslan.

Corequisites: AS.180.601, AS.180.603
Instructor(s): M. Gersovitz.

AS.180.632. Topics in Applied Microeconometrics.
This course teaches methods for using micro-data to recover structural parameters of microeconomic models. We cover static models, but focus largely on single-agent dynamic programming, including “full solution” methods along with innovations that permit circumvention of daunting computational tasks. Additional topics will be partially based on students’ interests, but will likely include: general equilibrium models, static and dynamic games, matching models, unobserved heterogeneity, structural methods with experimental data and biased expectations. The goal is to teach students to use structural methods in their own research, and so we will delve into the nuts and bolts of structural work, examining how researchers actually get from raw data to results. This includes: how the sub-sample for analysis is chosen, how the model is specified, how the programming problem is solved, which moments are generated, how these are matched to the analogous moments in the data and, importantly, how identification is established.
Instructor(s): N. Papageorge.

Mathematical models of economic behavior and the use of statistical methods for testing economic theories and estimating economic parameters. Subject matter will vary from year to year; statistical methods, such as linear regression, multivariate analysis, and identification, estimation and testing in simultaneous equation models, will be stressed.
Prerequisites: AS.180.636 and AS.180.601
Instructor(s): Y. Hu.

AS.180.636. Statistical Inference.
Theory and applications of statistical inference. Topics include probability and sampling, distribution theory, estimation, hypothesis testing, and simple regression analysis. Statistical applications will be drawn from economics. Limited to graduate students in Economics except by permission of the chair. Recommended Course Background: AS.110.201, AS.110.302
Instructor(s): Y. Sasaki.

AS.180.637. Microeconometrics I.
This is an advanced graduate course on major econometric techniques and models that are used in empirical microeconomics. The first half of the course introduces econometric theories of nonlinear extremum estimation, nonparametric estimation, and semiparametric estimation. The second half of the course illustrates applications of these theories to limited dependent variable models, selection models, and endogenous treatment models with unobserved heterogeneity.
Prerequisites: AS.180.601 AND AS.180.602 AND AS.180.633 AND AS.180.636
Instructor(s): Y. Sasaki.

AS.180.638. Microeconometrics II.
This course introduces techniques that are used in applied research in microeconomics. Focus is on a particular class of models, namely discrete choice models. Well-known models in this class are the logit and probit models. Models that have better properties involve high-dimensional integrals, and this leads us to a discussion of simulation estimation. Finally, dynamic decision models for forward-looking agents who face irreversible decisions are introduced. As an application some models in economic demography are considered.
Prerequisites: AS.180.601 AND AS.180.602
Instructor(s): Y. Hu.

This is a graduate course in international trade. It will develop basic analytical tools and frameworks used in the general equilibrium analysis of international trade. Recent research topics will be discussed in the second half of the course.
Prerequisites: AS.180.601 AND AS.180.603
Instructor(s): P. Krishna.

AS.180.642. International Monetary Economics.
A link between the balance of payments and asset accumulation/decumulation, microeconomics of international finance and open-economy macroeconomics. The section on open-economy macroeconomics covers approaches to balance-of-payments adjustments, theories of exchange rate determination and monetary, fiscal, and exchange-market policies under fixed and flexible rate regimes.
Instructor(s): O. Jeanne.

AS.180.643. Game Theory.
This course covers topics such as repeated games, dynamic games, bargaining and strategic communication.
Prerequisites: AS.180.602
Instructor(s): Y. Chen
Area: Social and Behavioral Sciences.

AS.180.651. Labor Economics I.
Theories of the allocation of time and supply of labor, human capital, demand for labor, market equilibrium, and income distribution. As time allows, other topics, such as unemployment, unions, and compensating differences are discussed. Corequisite: AS.180.601
Instructor(s): R. Moffitt.

The course covers a set of numerical methods that are used to compute and estimate economic models. We focus on dynamic models and their applications in IO and labor economics, including dynamic discrete choice; dynamic games, two-step methods (CCP b sed), general equilibrium models. We also cover several technical tools, such as numerical integration, approximation, and optimization.
Instructor(s): Y. Takahashi.
AS.180.662. Asset Pricing.
This course is an introduction and guide to the most important issues in asset pricing. It begins with classic concepts such as the Capital Asset Pricing Model and the Arbitrage Pricing Theory and continues through continuous-time dynamic no-arbitrage models. It covers both basic theory and classic empirical research. Recommended Course Background: AS.180.604, AS.180.633, AS.180.636 or instructor’s permission.
Instructor(s): G. Duffee.

AS.180.671. Industrial Organization.
This course covers methods in applied empirical Industrial Organization. The focus will be on the use of econometric analysis and data both for descriptive and measurement purposes, and to test the predictions of economic theories. The course will cover demand estimation, cost and production function estimation, and estimation of auction models.
Prerequisites: AS.180.601
Instructor(s): J. Balat.

AS.180.672. Industrial Organization.
First term: This course covers methods in applied empirical Industrial Organization. The focus will be on the use of econometric analysis and data both for descriptive and measurement purposes, and to test the predictions of economic theories. The course will cover demand estimation, cost and production function estimation, and estimation of auction models. Second term: The emphasis in this course is on empirical analysis of firm behavior. The first part of the course focuses on models of the internal organization of the firm. The second part considers empirical analysis of firm behavior in markets, with an emphasis on the “new industrial economics.”
Prerequisites: AS.180.601
Instructor(s): E. Krasnokutskaya.

AS.180.673. Advanced Economics of Labor.
This course is for graduate students at the 3rd year and above who wish to participate in a semester in-depth readings and discussion topics in labor economics and in econometric methods typically used in labor economics and in many other applied microeconomics fields. Students will have to participate in discussions of materials in each class and will have to conduct some kind of related research project. The topics covered in each semester are partly a function of student interest and their dissertation topics.
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

Advanced econometric techniques are often essential to innovative empirical work, but finding and implementing the right methods for a particular problem poses formidable challenges. This course/seminar aims to address these challenges by combining lectures and discussions of foundational econometric methods in areas of student interest (whether those interests be specific for thesis work or more speculative) with examples of implementation, including software development, in more of a ‘workshop’ environment. The emphasis will be on drawing on the resources of econometric theory to address specific empirical issues while at the same time developing implementation skills.
Instructor(s): R. Spady.

The goal of this workshop is to foster active discussion of a research topic among the students and faculty with the ultimate objective of producing new research. The topic and the papers are to be discussed with the input of the participants based on their research interests. Each week one or two participants will lead the discussion. All the participants will be expected to read and think about the papers to be discussed before the presentation Economics Graduate Students Only.
Prerequisites: AS.180.602
Instructor(s): H. Eraslan.

This is a weekly seminar series that brings in speakers from other universities to present their research in the field of applied microeconomics. Graduate Students only.
Instructor(s): R. Moffitt.

This is a seminar series devoted to the presentation of research in microeconomic theory, typically by speakers from outside the department. Graduate students only.
Instructor(s): Y. Chen.

This course features lectures by economists from other universities. They present research findings at the frontier of the field. Graduate students only.
Instructor(s): O. Jeanne.

The purpose of this seminar is to train students to do research in economics. This course is for second year graduate students in the Ph.D program in Economics. Graduates Students Only.
Instructor(s): E. Karni.

AS.180.698. Research/Teaching Practicum.
The purpose of this course is to train students to teach and to do research in economics. This course is for graduate students in the Ph.D. program in economics to obtain graduate credit for work off campus that provides training and the development of skills in teaching and/or research. Before the practicum is begun, the graduate student must identify a sponsoring faculty member or seek permission from the student’s faculty adviser. The faculty member or adviser must sign a form that certifies that graduate credit will be granted, verifies the nature of the work to be performed by the student, and explains how the practicum helps to fulfill a degree requirement. Once completed, the sponsoring faculty member or adviser submits a grade of pass or fail for the student. The course may be used for curricular practical training. Economic majors/Ggraduate students only.
Instructor(s): L. Ball.

AS.180.899. Independent Study.
Instructor(s): Staff.
Cross Listed Courses

Sociology

AS.230.374. Poverty and Public Policy.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Enrollment restricted to Social Policy minors only.

Prerequisites: Students that took AS.360.372 may not take AS.230.374.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences.

Interdepartmental

This course will introduce students to basic concepts in economics, political science and sociology relevant to the study of social problems and the programs designed to remedy them. It will address the many inequalities in access to education and health care, unequal treatment in the criminal justice system, disparities in income and wealth, and differential access to political power. The focus will be on designing effective policies at the national and local level to address these pressing issues. This course is open to all students, but will be required for the new Social Policy Minor. The course is also recommended for students who are interested in law school, medical school, programs in public health, and graduate school in related social science fields. Cross list with Sociology, Economics and Political Science. Freshman, Sophomore and Juniors only.
Instructor(s): B. Morgan; D. Schlozman; K. Edin
Area: Social and Behavioral Sciences.

AS.360.372. Poverty and Public Policy.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Permission of instructor required.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences.

This course analyzes the distinctive US welfare state in historical and comparative perspective. We begin with a survey of the policy context, an historical overview from the poorhouses through the Great Society, and a tour of welfare states across the rich democracies. We then survey developments – and explain the actual workings of policy – across jobs, education, welfare, pensions, and health care. We explore the institutional and political factors behind their divergent trajectories through conservative revival and the age of Obama. Students will write a seminar paper exploring policy development over time in a program or area of their choosing. Enrollment restricted to Social Policy minors only.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences.

AS.360.528. Problems in Applied Economics.
This course focuses on a monetary approach to national income determination and the balance of payments. Money and banking, as well as commodity and financial markets, are dealt with under both central banking, as well as alternative monetary regimes. Particular emphasis is placed on currency board systems. Students learn how to properly conduct substantive economic research, utilizing primary data sources, statistical techniques and lessons from economic history. Findings are presented in the form of either memoranda or working papers of publishable quality. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. Advanced excel programming skills are required and students are expected to be pre-screened for research at the Library of Congress in Washington, D.C.. Bloomberg certification is a requisite.
Prerequisites: EN.660.203
Instructor(s): S. Hanke
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

Geography Environmental Engineering

EN.570.428. Problems in Applied Economics.
This course focuses on a monetary approach to national income determination and the balance of payments. Money and banking, as well as commodity and financial markets, are dealt with under both central banking, as well as alternative monetary regimes. Particular emphasis is placed on currency board systems. Students learn how to properly conduct substantive economic research, utilizing primary data sources, statistical techniques and lessons from economic history. Findings are presented in the form of either memoranda or working papers of publishable quality. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. Advanced excel programming skills are required and students are expected to be pre-screened for research at the Library of Congress in Washington, D.C.. Bloomberg certification is a pre-requisite.
Prerequisites: EN.660.203 AND AS.180.101 AND AS.180.102
Instructor(s): S. Hanke
Area: Social and Behavioral Sciences.
This course focuses on company valuations, using the proprietary Hanke-Guttridge Discounted Free Cash Flow Model. Students use the model and primary data from financial statements filed with the Securities and Exchange Commission to calculate the value of publicly-traded companies. Using Monte Carlo simulations, students also generate forecast scenarios, project likely share-price ranges and assess potential gains/losses. Stress is placed on using these simulations to diagnose the subjective market expectations contained in current objective market prices, and the robustness of these expectations. During the weekly seminar, students’ company valuations are reviewed and critiqued. A heavy emphasis is placed on research and writing. Work products are expected to be of publishable quality.
Prerequisites: EN.660.203 AND ( EN.570.428 OR AS.360.528)
Instructor(s): S. Hanke
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

EN.570.504. Financial Market Research.
This course investigates the workings of financial, foreign exchange, and commodity futures markets. Research is focused on price behavior, speculation, and hedging in these markets. Extensive research and writing of publishable quality are required. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. An approved research proposal is a pre-requisite.
Instructor(s): S. Hanke.

English
The Department of English offers separate undergraduate and graduate programs, each designed to suit the needs of its particular student body. The undergraduate program, in the context of university requirements and elective courses, provides the basis for a liberal education and prepares students for graduate work or professional schools, such as medicine and law, as well as professional teaching and literary scholarship. The graduate program prepares advanced students for professional teaching careers in English literature.

Facilities
Besides the Sheridan Libraries, Hopkins students have easy access to the 12 million volumes and innumerable historical manuscripts of the Library of Congress, as well as the library at Dumbarton Oaks, the Folger Library, the Freer Library, the library of the National Gallery, and many other specialized public collections. Students learn about advances in research and criticism and confer with leading American and European scholars and critics through participation in the activities of the Tudor and Stuart Club, the ELH Colloquium, and the department’s other programming.

Courses in the department are open to all qualified students in the university.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor’s Degree (p. 20).)
In addition to demonstrating foreign language proficiency in at least one classical or modern foreign language, the English major requires students complete general courses in the humanities and social science, a required course in literary study (AS.060.107 Introduction to Literary Study), and nine additional English courses, of which at least three must be literature before 1800. Within the nine additional English courses, at least two and no more than four courses must be designated as lecture courses. Students may identify lecture courses by the presence of the POS-Tag ENGL-LEC in a course description in the schedule of classes. Pre-1800 literature courses are identified by the POS-Tag ENGL-PR1800. Additional details include:
- Only two courses towards the nine required English courses for the major may be taken outside of the department and those must be cross-listed with the English department.
- Only two independent studies or senior essay courses may apply towards the major.
- Students must earn a grade of C- or better in all major requirements and courses may not be taken satisfactory/unsatisfactory.
- Up to two courses taken through approved study abroad programs may be applied towards the major with approval of the director of undergraduate studies.

Major Requirements:
Two courses in the humanities or social sciences 6
Foreign language proficiency through the intermediate level 0-17
AS.060.107 Introduction to Literary Study * 3

Nine Additional English Courses (divided as follows): **
One non-lecture course in pre-1800 literature 3
Two courses in pre-1800 literature 6
Six 200 to 400-level English courses 18
Total Credits 36-53

* Should be taken no later than sophomore year.
** Students are required to take at least two lectures courses and up to four lecture courses may apply towards this requirement.

Advising for Students
All students, whether their goals are professional or not, should choose courses in consultation with their major advisor to suit their individual needs and satisfy departmental requirements. Students planning to enter graduate school in English should study a second foreign language. Students who have not yet been assigned to a major advisor may discuss departmental requirements and curriculum planning with the director of undergraduate studies.

Honors in English
Departmental honors are awarded to undergraduate English majors who achieve a cumulative average of 3.6 or higher for all English courses taken to satisfy the major requirements. For more information about Honors in English, contact the director of undergraduate studies in English.

Senior Essay Option
 Majors with a cumulative G.P.A. of 3.8 in English courses by the end of the fall semester of their junior year may apply to write a senior essay in the fall of their senior year. For further information and deadlines, contact the director of undergraduate studies in English.
English Minor

Students who wish to graduate with a minor in English must take AS.060.107 Introduction to Literary Study, generally within one year of declaring the minor. Six additional English courses are required, of which at least two and no more than three must be lecture courses. At least one of the six courses must be a pre-1800 course. Students must earn a grade of C- or better in all minor requirements and courses may not be taken satisfactory/unsatisfactory.

The Department of English offers advanced programs and guided research leading to the Ph.D. degree in English and American literature in the following major literary fields: the Renaissance, the 18th century, the Romantic period, the Victorian period, American literature, and 20th-century literature.

The department accepts only full-time students working toward the Ph.D.; there is no autonomous M.A. program. Because of its small size and the close association between faculty and students, the department is able to offer an intensive program leading to the Ph.D. in five years.

Requirements for the Ph.D. Degree

Students are required to enroll in three graduate courses in each of the semesters of their first year of study and two in each of the semesters of their second year. By the end of the third year, students will have completed 10 graduate seminars, an oral examination in two fields, and examinations in one or two foreign languages. Fourth-year students will receive dissertation fellowships.

Teaching experience is regarded as an important part of the graduate program, and graduate students are required to teach in the department’s literature and expository writing courses during their second, third, and fifth years at Hopkins.

For further information about graduate study, contact the graduate coordinator at the Department of English or go to http://english.jhu.edu/graduate/.

For current faculty and contact information go to http://english.jhu.edu/people/

Faculty

Chair

Eric Sundquist
Andrew W. Mellon Professor of the Humanities: American literature and culture, including African American and Jewish American; literature of the Holocaust.

Professors

Sharon Achinstein
Sir William Osler Professor of English: Early modern literature, poetry and poetics, gender

Douglas Mao

British, Irish, and U.S. poetry and fiction since 1860; interdisciplinary study of modernism.

Christopher Nealon
American literature, aesthetic theory, poetry and poetics, the history of sexuality

Eric Sundquist
Andrew W. Mellon Professor of the Humanities: American literature and culture, including African American and Jewish American; literature of the Holocaust.

Associate professors

Andrew Daniel
Early modern literature, critical theory, aesthetics.

Mark Thompson
19th- and 20th-century African-American literature, 20th-century German Idealism, French philosophy and aesthetics, theory.

Assistant professors

Jared Hickman
American literature, intellectual and cultural history of Atlantic (anti) slavery, religion and radical politics, critical race studies.

Jeanne-Marie Jackson

Jesse Rosenthal
American literature, aesthetic theory, poetry and poetics, the history of sexuality.

Professors emeriti

Sharon Cameron

Frances Ferguson
Literature, aesthetic theory, and moral/legal philosophy in the 18th and early 19th centuries.

Neil Hertz
Professor Emeritus (Humanities): Romantic literature and critical theory.

Ronald Paulson

Research professor

Larzer Ziff
Caroline Donovan Professor Emeritus of English Literature: American literature.

Joint appointments

John T. Irwin
Professor (Writing Seminars): American literature.

Lecturers

Aliza Watters
Lecturer: Expository Writing Program

Anne-Elizabeth Murdy Brodsky
Lecturer: Expository Writing Program.

Williams Evans
Senior Lecturer: Expository Writing Program.

Patricia Kain
Senior Lecturer and Director: Expository Writing Program.

George Oppel
Lecturer: Expository Writing Program.

Marisa O’Connor
Lecturer: Expository Writing Program.

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

**AS.060.100. Introduction to Expository Writing.**

Introduction to “Expos” is designed to introduce less experienced writers to the elements of academic argument. Students learn to recognize the paradigm of academic argument as they learn to read and summarize academic essays, and then they apply the paradigm in academic essays of their own. Classes are small, no more than 10 students, and are organized around three major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Intro” course teaches students to avoid plagiarism and document sources correctly. “Intro” courses do not specialize in a particular topic or theme and are available to freshmen only.

Instructor(s): A. Brodsky; W. Evans
Area: Humanities.

**AS.060.102. The Novel and the American Family.**

While America and the “American Dream” promise the possibility of unlimited individual development, the American family has often resisted this promise and cramped America’s style. In this course we will explore works by Philip Roth, Eudora Welty, Alice Walker, and Jonathan Franzen that dramatize this tension in devastating and hilarious ways. Against the backdrop of post-WWII America, these writers struggle with issues of race, sex, and the erosion of tradition, shedding light on the challenging relation between the individual and the family.

Area: Humanities.

**AS.060.103. Novels After 9-11.**

This course explores various novels written in English in the wake of the tragedy of 9-11, from various perspectives around the globe. It asks how the form of the novel responded to the events of that date and its aftermath, and in doing so, considers the role of art in shaping our understanding of global events, violence, and the forces that produce them. This course offers a greater appreciation of the novel and its role in history, as well as a framework for comparing different perspectives on a major historical event. It should improve your skills as a reader of fiction and analyst and judge of what you read. In the course of the semester you will: 1) Survey how novels from a variety of positions and perspectives represent and understand the events of 9-11. 2) Learn to analyze the form of the novel, its various elements, and its role in culture and history. 3) Read and evaluate reviews of major novels, from different contexts. 4) Learn to write an intelligent and informed review of a novel.

Instructor(s): M. Favret
Area: Humanities.

**AS.060.104. Counterfactual Literature and Film.**

This course will concern the imagination of our unheld lives—the lives we might have led but have not. Robert Frost’s “The Road Not Taken” is the most familiar instance of this preoccupation, but Frost is only one of many artists for whom unheld lives have been an ongoing concern—Thomas Hardy, Henry James, Virginia Woolf, Philip Larkin, Ian McEwan, and Sharon Olds are among the many others. Why are people so interested in what has not happened to them? And why should writers and film-makers in particular be so interested in these non-events?

Instructor(s): A. Miller
Area: Humanities.

**AS.060.107. Introduction to Literary Study.**

This course serves as an introduction to the basic methods of and critical approaches to the study of literature.

Instructor(s): J. Rosenthal; S. Achinstein
Area: Humanities.

**AS.060.108. Time Travel.**

Why is time travel such a consistent and perplexing them in literature and film over the last 150 years? Why is modernity so concerned with peeking backwards or forwards? This course will examine the history of time-travel fiction, from its beginning in utopian fiction through its box-office dominance in the 1980s, and into today. Writers will likely include Mark Twain, Edward Bellamy, Harold Steele Mackay, Ray Bradbury, Robert Heinlein, and Philip K. Dick. Movies will include *The Terminator*, *Back to the Future*, and *Primer*.

Instructor(s): J. Rosenthal
Area: Humanities.

**AS.060.109. Inheriting Hamlet.**

This class will explore the legacy of Hamlet from critical theory to popular film; from Sigmund Freud to Arnold Schwarzenegger’s “Last Action Hero.” More than any other play by Shakespeare, Hamlet has been the mirror through which later eras have viewed their own image. We will consider these interpretations and, along the way, work to develop some of our own.

Instructor(s): D. Hershinow
Area: Humanities.

**AS.060.110. The African American Novel.**

This course will survey classic novels by African-American writers. From slavery to freedom, from subjection to the qualified triumph of integration, we’ll examine several examples of black writers writing about what it means to be “black” in America, and what it means to be “white” from a “black” perspective.

Instructor(s): D. Tye
Area: Humanities.
AS.060.111. How Not to Be Afraid of Poetry.
What is poetry? And why don’t we like it? This course will explore what makes poetry turn ordinary language into something extraordinary, into shapes and sounds so that sometimes we find it difficult to understand and sometimes we find it gives us great delight. This seminar will open up a range of poetry written in English, including some of the greatest writers of the English language. This course is designed for the students without a strong background in reading poetry but who have the desire to gain it; the main emphasis is exploration of the world and words of poetry and developing an appreciation and analytical understanding of the ways poetry can express, advocate, record, and move. Assignments will include reading poems, becoming an expert about a single poet, attending public poetry readings, creating poems, and writing short weekly assignments about poems. You will be expected to be an active member in classroom discussion and activities. Pre 1800 course.
Instructor(s): S. Achinstein
Area: Humanities.

AS.060.113. Expository Writing.
"Expos" is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please note: Each course has a different topic. To check individual course descriptions, go to the EWP web site. “Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission.
Instructor(s): Staff
Area: Humanities.

AS.060.114. Expository Writing.
“Expos” is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please see the following list of individual course descriptions to decide which sections of “Expos” will most interest you. “Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission.
Instructor(s): Staff
Area: Humanities.

This course will examine how British children’s fiction represents imperialism and national identity. How do these works ask children to think about nation, empire and their roles as gendered and national subjects? We will also consider popular American adaptations of these classics. Materials include both Rudyard Kipling’s and Disney’s The Jungle Book, Frances Hodgson Burnett’s The Secret Garden, J. M. Barrie’s Peter and Wendy and Disney’s Mary Poppins. Students will write a short paper at the end of the course.
Instructor(s): J. Valdez
Area: Humanities.

AS.060.116. Reading Muslims in Global Fiction and Film.
This course will explore representations of complex, fully-developed Muslim characters in fictions detailing experiences from the Balkans, the Indian Ocean, Britain, and the United States. These may include novels by Abdulrazak Gurnah, Orhan Pamuk, and Leila Aboulela, as well as films like A Separation (2011). In studying the way each text represents Muslims and their relationships to their faith, the class will analyze themes of belonging and identity politics, imagined relationships to geographies, and representations of individuality alongside rituals of belief. It will look at how race, socio-economic status, gender, and citizenship contribute to these representations, when and how these texts are read as political acts, and what contributions such fiction has made to aesthetics.
Instructor(s): N. Hashem
Area: Humanities.

AS.060.117. J.R.R. Tolkien.
Tolkien’s The Lord of the Rings trilogy has captured the imaginations of millions of readers since its initial publication in the 1950s. And part of the reason for its power is that Tolkien created much more than a story: in creating an extensive linguistic and mythological features as a background to his narrative, he imagined a new world. In this class, we are going to study that world at some length, through a close reading of The Lord of the Rings trilogy, an examination of The Hobbit and The Silmarillion as supplementary texts, and finally by drawing on some of Tolkien’s nonfictional writings. Students will write one five to six page paper.
Instructor(s): P. Fessenbecker
Area: Humanities.

AS.060.118. Asian American Literature and Film.
This course offers students a survey of Asian American literature, film and cultural politics. Throughout the course we will evaluate the literary and filmic productions of Asian Americans in order to ask a series of questions: Who is American? Who is Asian American? How does “Asian American” work as a category that uncovers contestations over the meaning of ethnic, sexual, and national identity? We will look at a diverse array of Asian American groups while paying attention to the formation of Asian American subjectivities across differences and the intersections of ethnicity, sexuality, class and gender. Cross-listed with Film and Media Studies.
Instructor(s): R. Neuttil
Area: Humanities.

AS.060.119. Oscar Wilde.
At once superficial and profound, artificial and authentic, Oscar Wilde’s life and work are provocatively paradoxical. Reading his liminescent literary work, we’ll discuss such topics as the aestheticist idea of life as fine art, the powers of wit, and the unexpected consequences of getting what you wish for. Readings: a selection of Wilde’s plays, poems, essays, and fiction including a new, uncensored edition of his novel, The Picture of Dorian Gray. Requirements: rigorous in-class discussion and 5-6 pages of writing.
Instructor(s): R. Day
Area: Humanities.
**AS.060.120. The Nineteenth-Century Novella.**
During the nineteenth century, a frequently overlooked mode of fiction—the novella—began to flourish in new ways. In this course we will examine the distinctive features of this genre that is at once too short to be a novel and too long to be a short story. In reading famous works by English and American writers along with excerpts from key texts in narrative theory, we will consider how the peculiar length of the novella facilitates its representation of social interaction and psychic alienation in ways distinct from novel- and story-length works. Works to be studied range from Herman Melville’s Bartleby the Scrivener (1853), “a story of Wall Street” that reverberates strongly in light of today’s Occupy Movement, to Robert Louis Stevenson’s Dr. Jekyll and Mr. Hyde (1886), the classic literary evocation of split personality disorder, to Kate Chopin’s The Awakening (1899), a work condemned upon its first publication for its “sordid” and “immoral” representation of female sexuality.
Instructor(s): J. Hann
Area: Humanities.

**AS.060.121. The British Empire and 20th Century Fiction.**
This course explores the ways in which the British Empire—which at its peak commanded a quarter of the world’s population and landmass—affect the development of British literature in the 20th century. In studying works set in Africa, South Asia, and the Caribbean, we will discuss themes of imperialism, culture, international development, and modernization. Authors include Rudyard Kipling, E.M. Forster, Graham Greene, Jean Rhys, and Arundhati Roy.
Instructor(s): R. Day
Area: Humanities.

**AS.060.122. The Ethnic Gangster in American Cinema.**
In this intersession course we will consider the rise (and fall) of some of America’s most notorious and beloved gangsters: Don Corleone (“The Godfather”), Frank Lucas (“American Gangster”), and Tony Montana (“Scarface”). With the help of short readings from Zizek, Freud, Hobsbawn, and Jameson, we consider what these films have to say about the difficulties and hopes of the immigrant experience, the codes of gangster morality, and the role of organized crime in the American imagination. We will explore the complicated interplay between domestic responsibility, male brotherhood, and violence that is the hallmark of the genre. Students will be asked to write a short paper at the conclusion of the term, and are required to view the movies outside of class time.
Instructor(s): A. Sisson; A. Wexler
Area: Humanities.

**AS.060.123. Freshman Seminar: Prophecy After Science.**
This course explores the history of prophecy from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom. We will focus on the influence of prophecy on the rise of science (and vice-versa). Readings will include texts by William Shakespeare, Francis Bacon, Mary Shelley, and Philip K. Dick.
Instructor(s): W. Miller
Area: Humanities.

**AS.060.125. Nineteenth-Century American Experimental Writing.**
Emerson famously exalted the power of the individual self: “To believe your own thought, to believe what is true for you is true for all men—that is genius.” Melville regarded such hubristic intoxication with “untraditional and independent thinking” as the condition of tragedy. Emily Dickinson’s poems neither extol the “greatness” of the individual nor decry his limitations. Rather her poems invent a language for experiences so solitary and apparently incommunicable that she called them “inner than the bone.” We shall examine the representations of self in the genre-bending writing of these three nineteenth-century giants—writing that forever redefined the essay, the novel, and the poem.
Instructor(s): S. Cameron
Area: Humanities.

**AS.060.127. Muslim Science Fiction.**
This course will explore the wondrous and mysterious world of Islamic Sci-Fi. Writers of Muslim Sci-Fi have asserted a long tradition of speculative fiction and fantasy dating back to the 13th century. We will look into this literary history, beginning with earlier texts like The Arabian Nights, al-Qizwini’s alien story Awaj bin Anfaq and Roquia Hussain’s Sultana’s Dream all the way through to modern texts like G. Willow Wilson’s Alif the Unseen and Saladin Ahmed’s Throne of the Crescent Moon. We will ask how this genre, as opposed to realism, might enable these writers to productively tackle themes of history, science, belief, and the politics of belonging and difference. We will pair our Muslim readings with more canonical science fiction works, such as Mary Shelley’s Frankensteins, H.G. Wells’ The Time Machine, and more recently, Kazuo Ishiguro’s Never Let Me Go, to think through the relationship of the SF writer to a particular cultural moment. We will also look at writers of afrofuturism and magical realism, like Octavia Butler and Gabriel García Márquez, to think about how other writers of color have employed fantasy and the fantastical, and to what ends.
Instructor(s): N. Hashem
Area: Humanities.

**AS.060.129. Writing Africa Now.**
This course surveys post-2000 literary and cultural production from sub-Saharan Africa. Topics will include debates over genre and fiction’s relevance to African experience, legacies of canonical writing about independence, urban Africa as violent or “tragic” landscape, and problems of scale and geographical context. Readings by authors such as Adichie, Wainaina, Duiker, and Vladislavic, and students will be introduced to the main print and online arteries of African intellectual discussion. This class is for non-majors and does not count towards the English major or minor.
Instructor(s): J. Jackson
Area: Humanities.

**AS.060.131. Law and Literature.**
This course queries the nature of legal authority both formally and historically. What distinguishes between law and literature? Is law more authoritative? Is it more ethical? Is it more “real”? Avenues of inquiry will include the power of language to embody, inhabit, or represent law; the relationship between law and ideas about self, liberty, and love; and conflicts and confluences between literary and legal claims to autonomy. Readings may include Sophocles’ Antigone, Andreas Capellanus’ On Love, Shakespeare’s Measure for Measure, William Godwin’s Caleb Williams, and Franz Kafka’s The Trial. This course is for non-majors.
Instructor(s): M. O’Connor
Area: Humanities.
AS.060.132. Death in Twentieth-Century Literature.
A perennial literary motif, death pervades the works of modernist novelists and poets. This course will explore how several modernist writers create a rich inner life through their unique representations of different forms of death: slaughter in the war, suicide, and slow death, as well as the issue of mortality. The readings will include James Joyce's "The Dead," William Faulkner's As I Lay Dying, and poems by W. H. Auden. Students are expected to write a 5-6 page paper for this course.
Instructor(s): N. Zhang
Area: Humanities.

AS.060.133. Medicine and Literature.
This course is designed to introduce students to a range of literary representations of illness. How does literature build upon but exceed the surrounding frame of medical knowledge to explore illness as political crisis, mystical experience, divine punishment, neurotic hallucination, or opportunity? Possible texts include: "The Book of Job"; William Shakespeare, "Hamlet"; Moliere, "La Malade Imaginaire" (The Imaginary Invalid); Virginia Woolf, "On Being Ill"; Thomas Mann, "Death in Venice"; Susan Sontag, "Illness as Metaphor"; David Feldshuh, "Miss Evers' Boys"; Audre Lord, "The Cancer Journals"; Thom Gunn, "The Man with Night Sweats". This course does not count toward the English major or minor.
Instructor(s): A. Daniel
Area: Humanities.

AS.060.134. Franz Kafka.
An introduction to one of the 20th century's most eccentric and important writers. From his German-speaking Jewish background in Austrian-controlled Prague, Franz Kafka managed to overturn the conventions of modern fiction. Both bleak and zany, both logical and absurd, his writing shows the struggle of the individual against the modern institutional world. Discussion topics will include the political and religious views informing Kafka's work, the role of bureaucracies in everyday life, and the impossibility of living within the law. Reading: short stories; his famous novella, The Metamorphosis; and two novels, The Trial and Amerika—all in English translation.
Instructor(s): R. Day
Area: Humanities.

AS.060.136. Literature of the American South.
This course considers the development of southern identity in twentieth-century American fiction. Reading works from authors of different races, genders, and classes, students will explore the importance of region in determining ways of being and modes of expression.
Instructor(s): E. Steedley
Area: Humanities.

All our stories point to Heaven and to Hell: the good are rewarded, the wicked punished. Only, for the storyteller, Heaven is boring; our imaginative power better exercised in the other direction. In this course, we'll think about what that says about us, along with other issues of justice, compassion, conflict, creativity, and moral failure raised by four major writers' literary visions of Hell: Dante Alighieri (Catholic), John Milton (Protestant), Jean-Paul Sartre (atheist), and William Blake (entirely beyond definition).
Instructor(s): A. Sisson
Area: Humanities.

AS.060.138. No "I" in "News": The New Journalism, Hunter S. Thompson to David Foster Wallace.
In 1972, Tom Wolfe noticed a trend in magazine reporting that he called "a 'new' journalism, a 'higher' journalism." This novel breed of reporting, he claimed, was "causing panic, dethroning the novel as the number one literary genre, starting the first new direction in American literature in half a century." It goes without saying that Wolfe considered himself on the cutting edge of the revolution. With no pretense of objectivity, the new journalists unapologetically wrote themselves into stories, stylizing their narratives with the techniques of fiction and recasting fact to suit their intended effect. This course will survey the field of new journalism, from Hunter S. Thompson's drug-fueled, "gonzo" exposé of Southern culture, "The Kentucky Derby is Decadent and Depraved," to mild-mannered George Plimpton's chronicle of his tenure as a middle-aged professional football player, Paper Lion: Confessions of a Last-String Quarterback. We'll also consider some of the movement's precursors and heirs, from Stephen Crane's efforts to brave the heat of battle as a war correspondent to David Foster Wallace's attempt to understand the mild pleasures (and existential terrors) of a cruise ship vacation, "A Supposedly Fun Thing I'll Never Do Again."
Instructor(s): D. Tye
Area: Humanities.

Telling stories is one of the first and most important ways that human beings try to make sense of the world and their experience of it. The narrative art informs fiction and nonfiction alike, is central to the writing of history, anthropology, crime reports and laboratory reports, sports stories and political documentaries. What happened? The answer may be imagined or factual, but it will almost certainly be narrative. This course focuses on the narrative essay, a nonfiction prose form that answers the question of "what happened" in a variety of contexts and aims to make sense not only of what happened but how and why. We will begin by summarizing narrative essays, will move to analyzing them, and in the second half of the course you will write two narrative essays of your own, the first based on a choice of topics and sources, the second of your own design. Authors may include James Baldwin, Annie Dillard, Chang Rae Lee, Danielle Ofri, George Orwell, Richard Rodriguez, Richard Selzer, and Abraham Verghese. You will learn the power of narrative to inform and persuade as you test that power in your own writing.
Instructor(s): P. Kain
Area: Humanities.

AS.060.140. The Ethnic Gangster in the American Cinema.
In this intersession course we will consider the rise (and fall) of some of America's most notorious and beloved gangsters: Don Corleone (The Godfather), Henry Hill (GoodFellas), and Tony Montana (Scarface). With the help of short readings from Freud, Warshow, and Jameson, we consider what these films have to say about the difficulties and hopes of the immigrant experience, the codes of gangster morality, and the role of organized crime in the American imagination. And we will explore the interplay between domestic responsibility, male brotherhood, and violence that is the hallmark of the genre. Students will be asked to write a short paper at the conclusion of the term, and are required to view the movies outside of class time.
Instructor(s): A. Wexler
Area: Humanities.
AS.060.142. Censorship and Modern Literature.
Whether because of its religious or political dissent, sexual deviance, or corrupting effects on readers, literature has often been perceived as threatening the social order. In this course, we will read a variety of famous literary works, which have each been censored, banned, or subject to public outrage. Alongside each work, we will also read documents related to that work’s suppression, such as reviews, court proceedings, and statements by the authors themselves. We will consider the ways in which literature is both the result of individual artistic achievement, and shaped by its social context. Possible authors include Oscar Wilde, Djuna Barnes, D.H. Lawrence, Vladimir Nabokov, Allen Ginsberg, Salman Rushdie, and Brett Easton Ellis. (This course is for non-majors)
Instructor(s): R. Day
Area: Humanities.

AS.060.145. Literature, Science, and Technology.
This class will consider a range of reactions to scientific discoveries in literature, from electricity in the nineteenth century to bioengineering today. We'll pay special attention to the utopian hope, doomsaying despair, and radical reconceptions of reality technological breakthroughs seemed and seem to provide. Authors will include Mary Shelley, Wells, LeGuin, Ishiguro.
Instructor(s): E. Tempesta
Area: Humanities.

AS.060.146. Detective Fiction.
This course will look at the history of English-language detective fiction through the nineteenth and twentieth centuries. We will pay special attention to the way clues and suspense operate, the role of the reader in figuring out the mystery, and the complicated relationship of the detective with official authority. Authors will likely include some selection of Wilkie Collins, Edgar Allan Poe, Arthur Conan Doyle, Agatha Christie, Dashiell Hammet, and Raymond Chandler. This class is for non-majors.
Instructor(s): J. Rosenthal
Area: Humanities.

“No man needs sympathy because he has to work, because he has a burden to carry,” Theodore Roosevelt proclaimed in his “Square Deal” speech of 1903. “Far and away the best prize that life offers is the chance to work hard at work worth doing.” Hard work is at the heart of the American dream, but with unemployment rates at historic highs and the global economy proceeding at a rapid clip, Roosevelt’s words resurrect old questions in a new world: What work is worth doing? Who gets the chance to do it? And what happens when people find themselves doing work that isn’t worth doing? In this course we will consider the meaning and consequences of work, from the heroic to the tragic, through a selection of American literature from the last days of slavery to the present. This course will consider work in all its forms, from the plantation to the boardroom, to help us develop the tools to interpret the varieties and values of labor in modern society.
Instructor(s): E. Tempesta
Area: Humanities.

AS.060.150. Freshman Seminar: Milton’s Paradise Lost: Contexts and Conversations.
This course undertakes an in-depth study of what is arguably the greatest long poem in the English tradition, John Milton’s Paradise Lost. The poem, first published in 1667, is Milton’s take on the Judeo-Christian story of the Fall found in the Bible. Paradise Lost does not merely re-tell the biblical account, however. By expanding three chapters of Genesis into a twelve-book epic meant to rival its classical forbears—most importantly Virgil’s Aeneid—Milton’s poem makes room for new readings of an old story. This course encourages students to find their own new readings of the Genesis story by considering the historical contexts of the poem’s production as well as the conversations Paradise Lost continues to provoke to this day. In addition to reading and discussing the poem, students will become familiar with ongoing sites of critical debate, such as the representations of Satan and of Eve. To help negotiate these conversations, students will complete a guided research project that makes use of the materials available through the library’s Department of Special Collections, housed in Brody Learning Commons. In addition to early editions of Paradise Lost, this treasure trove of rare books offers a wide variety of materials which may deepen an encounter with Milton’s poem, from biblical illustrations to gardening manuals to marriage advice. Students will use the collection to ask questions such as: “How does Milton’s representation of Satan differ from earlier traditions of imagining the devil?” and “Does Milton’s approach to Eve reinforce or revise conventional ideas about women?” Sufficient class time will be dedicated to introducing students to Special Collections so as to facilitate their individual work over the course of the semester.
Instructor(s): R. Buckham
Area: Humanities.

AS.060.151. American Literature, Race, and Civil Rights.
The course will explore the role played by literature in advancing and reflecting upon the African American pursuit of freedom and civil rights over the course of the twentieth century, from the era of harsh segregation through the post-Civil Rights era. Although we will focus primarily on fiction, we will also consider essays, autobiography, and poetry. Writers to be considered, mostly black but some white, may include James Weldon Johnson, Ralph Ellison, Richard Wright, Ann Petry, James Baldwin, William Faulkner, Harper Lee, William Melvin Kelley, Malcolm X, Amiri Baraka, Toni Morrison, and Paule Marshall. This class is for non-majors.
Instructor(s): E. Sundquist
Area: Humanities.

As the moniker “The city that reads” might indicate, Baltimore has a long and distinguished tradition of literary production. In this course, we will focus on two of Baltimore’s most famous writers: Edgar Poe and H.L. Mencken, both of whom were widely read and fiercely discussed in their day. We will read a variety of works from both, including a number of Poe’s short stories and Mencken’s coverage of the Scopes trial, and vist some of the Baltimore institutions dedicated to them. These include Poe’s grave and possibly his house, and the Mencken collection at the Enoch Pratt Free Library.
Prerequisites: Students may enroll in one B’More course only.
AS.371.189 AND AS.270.119 AND AS.270.118 AND AS.060.126 AND AS.100.197 AND AS.300.100 AND AS.360.176 AND AS.220.116 AND AS.280.205 AND AS.230.116 AND AS.220.190 AND AS.220.194
Instructor(s): P. Fessenbecker
Area: Humanities.
AS.060.154. Zombies.
Why does the zombie figure so prominently in modern literary and cinematic texts? What particular anxieties does this figure of mindless violence disclose? Why does the zombie genre so often lend itself to political allegory? How do we make historical sense of this figure’s original association with Afro-Atlantic religions like Haitian voodoo? This course is designed for non-majors interested in developing critical reading and writing skills by investigating this surprisingly rich topic. Texts, literary and cinematic, may include: firsthand accounts of the Atlantic slave trade, Mary Shelley’s “Frankenstein”, Edgar Allan Poe’s short stories, Rudolph Fisher’s "The Conjure-Man Dies", "The Invasion of the Body Snatchers" (dir. Don Siegel), "The Serpent and the Rainbow" (dir. Wes Craven), "Pontypool" (dir. Bruce McDonald), and "Zombieland" (dir. Ruben Fleischer).
Instructor(s): J. Hickman
Area: Humanities.

The Research Paper” is designed to introduce experienced student writers to the fundamental skills of the research process. These include asking research questions, evaluating the usefulness of sources to answer them, synthesizing sources, reading sources critically, and developing arguments that deliver an original thesis. Students will work with a research librarian at the Eisenhower Library, with whom they will learn to navigate traditional databases as well as new media sources. The course culminates with a paper of 12-15 pages that draws upon the cumulative skills of the semester. Each course is capped at ten students and available only to those who have taken “Expository Writing.
Prerequisites: AS.060.113 OR AS.060.114
Instructor(s): A. Watters
Area: Humanities.

AS.060.156. Introduction to Poetry.
This is a beginner’s guide to the varieties of poetry in English from the Anglo-Saxons to today, with a few detours, here and there, into poetry from other languages in translation. We will study how patterns of sound, image, rhythm, and ideas allow us to become better tuned-in to poetry. You should leave the class with a better appreciation of poetry, some improvement in your writing skills, and a new favorite poem. This course does not count toward the English major or minor.
Instructor(s): E. Tempesta
Area: Humanities.

J.R.R. Tolkien’s “The Lord of The Rings” trilogy can honestly be said to have initiated a new genre: a novel-based epic narrative set in a fantasy world. Since Tolkien’s works were first published in the 1940’s, there has been a massive flowering in similar works, as later authors expanded and developed the notion of the multi-volume fantasy narrative. However, these later texts are also, importantly, creative responses to the models Tolkien developed. In this course, we are going to study this genre, identify its history and formal features, and consider the nature of fantasy fiction more generally. What do authors hope to achieve by setting plots and characters in a completely imagined world? What narrative possibilities does such a decision enable, and what possibilities does it foreclose? Does the fantasy genre mask certain ideologies, and how can we uncover them? Authors will include Tolkien, Robert Jordan, George R.R. Martin, and Steven King, and may also include selections from Brandon Sanderson, David Eddings, Patrick Rothfuss, Ursula K. LeGuin, and Elizabeth Moon. This course is for non-majors. (Limit 18)
Instructor(s): P. Fessenbecker
Area: Humanities.

AS.060.158. Advertising and Literary Modernism.
To say that certain modernist authors were skeptical about the growing power of advertising would be an understatement. H.G. Wells described it as a form of “legalized lying,” while F. Scott Fitzgerald quipped that “its constructive contribution to humanity is exactly minus zero.” Such views on marketing were hardly uncommon, as many modernist authors saw advertising as an enemy to true artistic creation. The modernist response to this form of popular culture, however, was not uniformly hostile. Avant-garde artists, who rejected mainstream commercial values, often turned to newspaper ads and posters for the material that they would repurpose for their own work. In the stream of consciousness epic Ulysses, the protagonist works in advertising and his eye is often drawn to the notices and promotions that cover the streets of Dublin. Virginia Woolf even pauses her narrative to depict an airplane writing an ad in smoke letters. This course will explore the variety of stances toward advertising in the modernist period, as well as provide historical context. Novels include: "Sister Carrie", "The Ambassadors", "Mrs. Dalloway", "Turnabout", as well as selections from Ulysses. Critical sources include: Benjamin, Adorno, Williams, Moretti, Brown, and Butler. This course is for non-majors.
Instructor(s): K. Wedekind
Area: Humanities.

AS.060.159. James Joyce’s Ulysses.
Ulysses is often described as impossible to read (it isn’t) and as the greatest novel in the English language (it just might be). A monumental book set in a single day, Ulysses seems to have it all: a panoply of literary styles, religions, philosophies, histories, emotions, and even a wide variety of bodily functions. In addition to offering an up-close look at the novel itself, this course examines the novel’s use of mythology, meditations on Irishness, reflections on capitalism, and its place in "modernism.” By the end of the course, not only will you have read the famously difficult and important Ulysses; you will have understood it, too.
Instructor(s): R. Day
Area: Humanities.
AS.060.168. Literature and the Civil Rights Movement.
The course will examine the role of literature in the American civil rights movement. Both non-fiction and fiction played an essential role in motivating protest and shaping public views. Our focus will be on works that entered into the debates over race, rights, and freedom, and introduced a new vocabulary of cultural pride into African American discourse. Works to be studied will include Martin Luther King, Jr., selected speeches and Why We Can’t Wait (including “Letter from Birmingham Jail”); Malcolm X, selected essays and Autobiography of Malcolm X; James Baldwin, Notes of a Native Son; William Melvin Kelley, A Different Drummer; Ralph Ellison, selected short fiction and essays; William Faulkner, Intruder in the Dust; Amiri Baraka (LeRoi Jones), selected poetry and Dutchman; John Howard Griffin, Black Like Me; Paule Marshall, Praisesong for the Widow. This course does not count toward the English major or minor.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.171. Russian Classics & Their Afterlives.
The idea of the “Russian Soul” has long been a source of captivation to English-language writers. How has their imagination of the dense nineteenth-century works for which Russian literature is best known evolved in the era of globalization? This course reads three major Russian novels in tandem with recent works that invoke them: Tolstoy’s Anna Karenina with Nilo Cruz’s 2003 Pulitzer Prize-winning play Anna in the Tropics; Dostoevsky’s Demons with J.M. Coetzee’s 1994 novel Master of Petersburg; and Turgenev’s Fathers and Sons with Tom Stoppard’s 2002 Coast of Utopia trilogy. We will attend both to the nuances of Russian intellectual history that get lost in the clamor to claim it as universal.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.176. The Russian Novel: Tolstoy and Dostoevsky.
If there is no God, how can I be a captain?” We’ll examine this and other religious, philosophical, and historical questions in Tolstoy’s and Dostoevsky’s titanic novels. Readings (in translation) include War and Peace and The Brothers Karamazov. No prerequisites. Substantial reading; 6-8 page paper; 10 page paper; weekly exercises and quizzes. Freshman/sophomore seminar. This class is for non-majors.
Instructor(s): S. Cameron
Area: Humanities.

AS.060.201. The Nineteenth Century British Novel.
Reading major novelists from the nineteenth century including Austen, C. Brontë, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.202. What is Tragedy?.
This course is an introduction to tragedy. What is a tragedy? How has the genre been defined and redefined over its long and varied existence? And why do authors and audiences keep returning to these spectacles of pity and fear? To consider these questions, we’ll examine plays including Sophocles’ Oedipus Rex, Shakespeare’s Hamlet, Racine’s Phèdre and Beckett’s Endgame, ending with the Coen Brothers’ film No Country for Old Men.
Instructor(s): W. Miller
Area: Humanities.

AS.060.204. Satan in Literature.
What is it about Satan that has captured the literary imagination? From moral opposition to God in the Book of Job, to divine punishment in Dante’s Inferno, from political revolution in Milton’s Paradise Lost to irreverence of tradition in Salman Rushdie’s The Satanic Verses, this class will examine the ways in which Satan has been used in literature to represent a variety of moral, political and social forces, from Ancient, Medieval, Renaissance and Modern eras.
Area: Humanities.

Jane Austen’s novels are often treated as forms of escape from our complicated world to a simpler, more rational time. Arguably, however, her novels originally helped readers navigate profound social problems, particularly the difficulty of knowing friends from enemies. In this course, we will consider depictions of friendship and enmity in four of Austen’s major novels. We will compare these novels to four recent films inspired by her works.
Instructor(s): W. Miller
Area: Humanities.

AS.060.207. Shakespeare.
Reading the major comedies, histories and tragedies alongside the narrative poem “Venus and Adonis” and the sonnets, this survey course considers Shakespeare’s hybrid career as poet and playwright. Pre 1800 course.
Instructor(s): A. Daniel; J. Hickman
Area: Humanities.

AS.060.208. Brit Lit I.
This lecture course tracks the development of vernacular literature in English from the medieval period to the close of the early modern period. Texts include Chaucer’s Canterbury Tales, Spenser’s The Faerie Queene, Milton’s Paradise Lost and Alexander Pope’s “The Rape of the Lock.”
Instructor(s): A. Daniel; C. Scozzaro; J. Childers; R. Best
Area: Humanities.
AS.060.209. The American Novel since World War II.
This course surveys the formal and thematic developments of the American novel from 1945 to the present. Against the backdrop of American post-war triumphalism, we consider how contemporary writers, struggling with issues of identity, race and authenticity, express different and deeply troubled accounts of the American dream. We will pay particular attention to the relationship between fiction and history; the tension between individual and collective identity; the changing role of literature in American culture, and the gradual emergence of postmodernism as a significant force in American literary life. Possible authors include: Richard Wright, Flannery O’Connor, Jack Kerouac, J.D. Salinger, Thomas Pynchon, Philip Roth, Cormac McCarthy, Toni Morrison, John Barth, Saul Bellow, Maxine Hong Kingston.
Instructor(s): A. Wexler
Area: Humanities.

AS.060.211. British Literature I.
What is British Literature? Beginning in the fourteenth century and concluding in the eighteenth century, this survey course examines the time period in which the notion of vernacular English literature, the corporate body of “Great Britain” as a national framework, and, with it, “British-ness” as an imaginary, synthetic identity, were all created. Participants will read a representative group of Geoffrey Chaucer’s “The Canterbury Tales”, Book I of Edmund Spenser’s “The Faerie Queene”, the entirety of John Milton’s “Paradise Lost”, and Alexander Pope’s “The Rape of the Lock.” The course is designed as an introductory level lecture course and is open to all students curious about the beginnings of the English literary canon. It is recommended that students follow this course with its sequel, Professor Mao’s “British Literature II,” which will be offered the following semester. Pre-1800 course.
Instructor(s): A. Daniel
Area: Humanities.

AS.060.212. British Literature II: 18th Century to the Present.
A survey of major authors such as Wordsworth, Keats, Austen, Tennyson, Dickens, Wilde, Woolf, Joyce, and Rushdie. Substantial attention to formal conventions as well as stylistic innovation, to aesthetic value as well as social meaning.
Instructor(s): D. Mao
Area: Humanities.

AS.060.213. The Novel and Globalization.
Novels have long been classified by the national origin of their author, and, for the most part, the great works of the nineteenth and twentieth centuries take place primarily in one country. In the postcolonial era of the 1980s and 90s, many prominent writers explored the process of diasporic movement from one country to another. Recently, though, there has been a lot of talk about a new kind of “rootless” novel that jumps between many locales around the globe. This course reads some of the prime examples of this genre in relation to its immigrant predecessors, identifying its key formal and thematic attributes (such as perspectival and geographical range, multi-stranded plots, and an acute consciousness of linguistic and generic hybridization). We will discuss the trade-offs inherent in developing many places rather than one in terms of style and character development, as well as the political and even ethical implications of abandoning the concept of “home.” Primary works by Abdulrazak Gurnah, Caryll Phillips, David Mitchell, Taiye Selasi, Chimamanda Adichie, and Imraan Coovadia.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.216. Wilde to Eminem: A Literary History of the Obscene.
What is obscene? What is indecency? Where is the line between public and private? How have the answers to these questions changed over the past century? This course will examine artworks and performances from a variety of media which have been publicly accused of indecency or obscenity. Wilde, Joyce, Nabokov, Ginsberg, Bruce, Carlin, Kubrick, Serrano, Lynne, Prince, and Eminem among others will provide the materials for our inquiry.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

AS.060.217. American Literature Since World War II.
This is a survey lecture covering American literature since about 1945, focusing on fiction from Saul Bellow, and James Baldwin to Toni Morrison and Don DeLillo, poetry from Robert Lowell, Sylvia Plath, Adrienne Rich, John Ashbery, and an array of and political journalism from the 1960s to today.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.219. American Literature to 1865.
A survey course of American literature from contact to the Civil War.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.220. What is the Great American Novel?.
This course will investigate the curiously persistent idea of the “Great American Novel” (GAN) through a close engagement with three exemplary candidates for the title that span American literary history (Moby-Dick, Song of Solomon, and Freedom). Students will also read several critical essays to provide both a history of the concept as well as criteria for what might make an American novel "great." Through analyses of the individual novels, students will be encouraged to reflect on the persistence, efficacy, and validity of the GAN.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.221. Coming of Age Novels.
In this course, we will consider how "coming of age" is depicted in the novels of British and American modernism. We will discuss questions of family, sexual love, education, work, and religion contribute to an individual’s personal development in the novels of Virginia Woolf, James Joyce, F. Scott Fitzgerald, Virginia Woolf, and James Baldwin. We will also reflect on how the form of the coming of age novel in the early to mid twentieth century engages with important social and historical developments that protected adolescence as a stage of life, such as labor and education reform. Writing requirements include two 4-5 page papers.
Instructor(s): C. Gannon
Area: Humanities.

AS.060.222. American Literature, 1865 to today.
This course is a survey of major developments in American poetry and narrative fiction from the end of the Civil War to the present day. Authors to be covered may include Mark Twain, Willa Cather, Henry James, James Baldwin, Toni Morrison, Emily Dickinson, Walt Whitman, Wallace Stevens, and John Ashbery.
Instructor(s): C. Nealon
Area: Humanities.
**AS.060.224. The Modern Novel.**
This course covers the British novel from the late nineteenth century to the present, with a particular focus on the decades around World War I. We’ll balance attention to formal innovations and experiments with consideration of social and historical context, exploring issues such as gender, empire, psychology, the city, and war. Our goal will be to understand what makes these novels “modern” and set them apart from their predecessors; to this end, we’ll examine how many important authors also wrote extensively on the craft and aims of fiction. Readings will include representative selections by authors such as Henry James, James Joyce, Ford Madox Ford, E.M. Forster, Virginia Woolf, Jean Rhys, and Ian McEwan.
Instructor(s): A. Grener
Area: Humanities.

**AS.060.228. Occupy Street Walls: Street Art, Public Space, and Law.**
Is the unauthorized placement of artworks in public space vandalism or an aesthetic reclamation of public space? Does street art thrive on illegality? What is the relationship between the law, public space, and street art? This course will situate these questions in the contexts of cultural geography, public space theory, and the long history of art as protest and dissent. Artworks by Banksy, Shepard Fairey, Invader, Murad Sobay, and other artists will be considered.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

**AS.060.229. The Antihero: Heathcliff to Walter White.**
Although it’s common to think of literature a source of ethical wisdom, literary history is actually full of proud, often cynical, figures who lack respect for conventional norms and compel attention by their sheer force of will. This course constructs an abbreviated history of the anti-hero by exploring works of art that both privilege and criticize anti-heroic villains—including Heathcliff (from Wuthering Heights), Mr. Hyde (from Dr. Jekyll and Mr. Hyde), and Walter White (from Breaking Bad).
Instructor(s): M. Flaherty
Area: Humanities.

**AS.060.231. Novels Into Film.**
What does it take to turn a novel into film? How different are the demands and possibilities of these two forms? Why do some novels repeatedly attract filmmakers? And how should we evaluate films that adapt novels? Beginning with the novel Frankenstein and its various film progeny, we will look at a series of pairings between novels and films. These may include Austen’s Pride and Prejudice, Dickens’ Great Expectations, Tarkington’s The Magnificent Ambersons, Stoker’s Dracula and McEwan’s Atonement along with various critical readings about the genre of the novel and the medium of film.
Instructor(s): M. Favret
Area: Humanities.

**AS.060.250. The Anti-hero: from Heathcliff to Walter White.**
Although it’s common to think of literature a source of ethical wisdom, literary history is actually full of proud, often cynical, figures who lack respect for conventional norms and compel attention by their sheer force of will. This course constructs an abbreviated history of the anti-hero by exploring works of art that both privilege and criticize anti-heroic villains including Heathcliff (from Wuthering Heights), Mr. Hyde (from Dr. Jekyll and Mr. Hyde), and Walter White (from Breaking Bad).
Instructor(s): M. Flaherty
Area: Humanities.

**AS.060.253. The Real Jungle-Book: Imperial Kipling.**
The Real Jungle-Book: Rudyard Kipling and the British Empire. Rudyard Kipling’s children’s stories of Mowgli and Shere Khan, of Rikki-Tikki-Tavi, and so forth have passed in many ways into the common English literary culture, as the film versions of his works indicate. Yet they represent a particular time and place: the British Empire at the end of the nineteenth century, when its imperial power was both nearing its height and showing its cracks. They arguably serve, moreover, an imperial purpose, validating English assumptions about the legitimacy of its political control over the countries in the empire. In this class, we’ll read a selection of Kipling’s works against a background of knowledge of the British Empire.
Instructor(s): P. Fessenbecker
Area: Humanities, Social and Behavioral Sciences.

**AS.060.255. The Bible as Literature.**
This course looks at the Bible’s influence on literature by examining the use and impact of the most common biblical stories on canonical literary works. Pre 1800 Course
Instructor(s): M. Thompson
Area: Humanities.

**AS.060.260. Ethnic American Literature.**
This class is an introductory course in ethnic American literature. We will read Native American, Chicano, Latino, Asian American, and African American literatures. The class will pose questions such as: Why ethnic American literature? Why not simply American? What are the dissonances and similarities between these literary voices? We will explore themes such as identity, otherness, and the construction of race and Americanness. Readings in post 1945-course will include works by authors such as James Baldwin, David Henry Hwang, Sherman Alexie, Junot Diaz, Sandra Cisneros, Maxine Hong Kingston, and Jhumpa Lahiri.
Instructor(s): R. Neutill
Area: Humanities.

**AS.060.262. Literature and Knowledge.**
Can poems, plays, and imaginary narratives teach us something about the real world? Or does their fictional status make them unreliable as sources of knowledge? This course explores these questions by examining classical and contemporary discussions of the topic in conjunction with major works of literature. Primary sources include works by Shakespeare, Jane Austen, and William Golding, while the criticism will be represented among others by Aristotle, Dr. Johnson, and Martha Nussbaum.
Instructor(s): R. Maioli dos Santos
Area: Humanities.

**AS.060.265. Nineteenth Century British Novel.**
Reading major novelists from the nineteenth century including Austen, C. Brontë, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities.
AS.060.276. Modern Drama.
An introduction to drama of the late-19th and 20th centuries, with an emphasis on its ideological and political contexts. In modern drama, we find vivid accounts of key aspects of modernity: urbanization, industrialization, migration, war, democracy, capitalism, fascism, communism, and nationalism, to name a few. We will read a selection of plays that ask timely questions about the limits of human subjectivity and integrity in a modern, often dehumanizing world. Modern drama is shaped by, and responds to, social and political changes, such as the demise of the aristocracy, the ambitions of the middle class, totalitarian conquest of Europe, apartheid in South Africa, and the AIDS epidemic in the United States. This course also charts how major debates, movements, and theories in the arts have motivated drama’s diverse forms and themes. Playwrights may include Henrik Ibsen, Oscar Wilde, Anton Chekhov, Bertolt Brecht, Eugene O’Neill, Tennessee Williams, Samuel Beckett, Athol Fugard, Edward Albee, Caryl Churchill, and Tony Kushner. Secondary readings by the playwrights themselves, in addition to Georg Lukacs, T.S. Eliot, Raymond Williams, Eric Bentley, and more recent scholars and critics.
Instructor(s): R. Day
Area: Humanities.

AS.060.278. Social Climbers and Charlatans in American Literature.
"It’s good to be shifty in a new country," declares Johnson Hooper’s swindling vagabond Simon Suggs. The ability to speak in many voices—to play many roles—is one key facet of the rags-to-riches American ideal of not only making something of one’s self, but of making one’s self. But how much social mobility or personal fluidity is too much? In this course, we’ll consider the problem of fashioning a self that is both flexible and authentic, both capacious and individual, as it is represented in a broad swath of American literature. We'll begin with Benjamin Franklin’s Autobiography, in which Franklin reimagines his life into an intricate web of fact and fabrication. From there, we’ll explore the Transcendentalist ideal of the “Moral Sense,” in the form of Emersonian self-reliance and Thoreau’s revolutionary militancy, and its dark side in Poe’s “Imp of the Perverse.” After this, we’ll account for the great showman P.T. Barnum, who splits the difference between legitimate businessman and devious swindler. We’ll see what happens when, in order to make yourself, you first have to steal yourself in “The Narrative of the Life of Frederick Douglass, American Slave”. In Mark Twain’s “Pudd’nhead Wilson” and Nella Larsen’s “Passing”, we’ll investigate how, why, and with what consequences black Americans might try to pass for white. As the semester winds down, we’ll reconsider the rise and fall of Fitzgerald’s Jay Gatsby, the mobster made good (if only for a while), before ending with Nathanael West’s “Miss Lonelyhearts”, a dark comedy about a man who writes an advice column as a woman. The course will explore some of the fine lines—between honest art and heinous hoaxing, belief and delusion, entrepreneurship and charlatanry—relentlessly worked over in American literature since the nation’s inception. Throughout, we’ll take stock of the possibilities and pitfalls lurking in the seemingly incompatible goals of novelty and authenticity, fluidity and authority. Dean’s Teaching Fellowship course.
Instructor(s): D. Tye
Area: Humanities.

AS.060.279. Law and Literature.
This course queries the nature of legal authority both formally and historically. What distinguishes between law and literature? Is law more authoritative? Is it more ethical? Is it more “real”? Avenues of inquiry will include the power of language to embody, inhabit, or represent law; the relationship between law and ideas about self, liberty, and love; and conflicts and confluences between literary and legal claims to autonomy. Readings may include Sophocles’ “Antigone”, Andreas Capellanus’ “On Love”, Shakespeare’s “Measure for Measure”, William Godwin’s “Caleb Williams”, and Franz Kafka’s “The Trial”. Pre-1800 Course
Instructor(s): M. O’Connor
Area: Humanities.

AS.060.280. The Modernist Novel and the Question of Culture.
“’The man ain’t got no culture!’ declare Simon & Garfunkel, of someone who is so unhip as to confuse Bob Dylan with Dylan Thomas. How is such a statement possible, and what does “culture” mean? In some contexts, culture is something you can get by learning about art, music, and literature. But in other contexts, culture is something that everyone already has; we all live in the “culture” of our everyday habits and customs. Out of the tangle of these two meanings, we get concepts like “cultural districts” in cities, “cultural relativism” about moral issues, and even “multiculturalism.” In this course, we’ll read a selection of novels related to modernism, a literary and artistic movement preoccupied with the difference between the two forms of life that “culture” can name—a life of intellectual refinement, and a life of organic connection to one’s community. Along the way, we’ll discuss notions of prestige, sophistication, the relation of religion to the arts, the cultural life of imperialism, and the role of education in forming and reflecting students’ cultural aspirations. Background readings from Matthew Arnold, Walter Pater, Raymond Williams, Pierre Bourdieu, and Francis Mulhem; novels by Oscar Wilde, E.M. Forster, James Joyce, Virginia Woolf, Evelyn Waugh, and V.S. Naipaul. Dean’s Teaching Fellowship course.
Instructor(s): R. Day
Area: Humanities.

Thieves, prostitutes, and murderers populate the early English novel. This course will examine the rise of the novel alongside the emergence of law enforcement and the legal profession in the eighteenth century. We will examine how the novel as a genre coalesces around characters that are placed in risky situations and the legal fictions that develop around them (forms such as testimony, confession, and the arguing of a case). This will require a focus on individual laws (such as the 1662 Poor Relief Act and the 1753 Hardwicke Marriage Act), on the psychologies of guilt and innocence, and on the formal literary challenges of representing transgression and justice. We will also examine critical interpretations of several of the major works, paying special attention to the way they address the primary text’s engagement with law and the legal system. Readings from Defoe, Fielding, Goldsmith, and Austen. Dean’s Teaching Fellowship course. Pre 1800 course
Instructor(s): S. Hershinow
Area: Humanities.
Can novels ask philosophical questions? What do literary narratives and moral arguments have to do with each other? Everyone who has read a novel recognizes that it is in part an expression of ideas: characters, narrators, authors, and so forth say and do things that express a way of thinking. In this course we’ll examine the connections between moral philosophy and literature in nineteenth-century England in a series of four units, each of which pairs a novelist and a philosopher. The novelists will be Jane Austen, Charles Dickens, George Eliot, and E.M. Forster; the major philosophers will include Edmund Burke, John Stuart Mill, Immanuel Kant, and G.E. Moore, and we’ll read excerpts from Jeremy Bentham, Ludwig Feuerbach, F.H. Bradley, and Henry Sigwick. Assignments will include reading quizzes, response papers, and a final essay with a research component. Dean’s Teaching Fellowship course.
Pre 1800 course.
Instructor(s): P. Fessenbecker
Area: Humanities.

AS.060.290. Literary Theory.
This course will provide a survey of many of the major theoretical positions that have been directly or indirectly influential for literary studies. We will read selections from the following: Russian Formalism (Propp, Shklovsky, Bakhtin), structuralism (Levi-Strauss, Barthes), deconstruction (Derrida, de Man), speech act theory (Austin, Butler), Marxism (Jameson), queer theory (Sedgwick, Miller), and distant reading (Moretti). Recommended Course Background: three courses in the English Department.
Instructor(s): F. Ferguson
Area: Humanities.

AS.060.302. Theology of the Narrative.
Everything happens for a reason. "I guess it wasn’t meant to be." People often impose a narrative logic on life events by reference—however attenuated—to a transcendent order of meaning. This course asks two basic questions: How do theological concepts such as God’s omniscience, Providence, predestination, and prophecy get translated into particular narrative structures? How does narrative experimentation function as a critique of traditional theological viewpoints, particularly around the question of how divine agency is related to the existence of evil? Course texts may include: The Book of Job, Denis Diderot, Jacques the Fatalist; Olaudah Equiano, Interesting Narrative; Herman Melville, Moby-Dick; James Agee and Walker Evans, Let Us Now Praise Famous Men; James Baldwin, Go Tell It on the Mountain; Marilynne Robinson, Gilead and Home; Scarlett Thomas, Our Tragic Universe; Terrence Malick, dir., The Tree of Life.
Prerequisites: AS.060.107 Intro to Literary Study, English Lecture Course, or Instructor approval.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.303. Literature of London.
Ian Watt famously linked the rise of the novel with the rise of the city in his seminal work, The Rise of the Novel. This course will survey British literature from the late eighteenth through the early twentieth century that features the city of London. Students will consider how the city and urban life change over the course of the nineteenth century and how they transform literary depictions and understandings of selfhood and the social imagination. They will examine how nineteenth-century literature represents the space of the city and how these efforts to depict the city cause formal and stylistic innovations. How does the compressed space of the city and its intense stimuli affect characters’ sense of identity? Students will also consider the ways in which the city affects understandings of gender, class and race in these texts. This course will focus on the novel, but it will also include excerpts from newspapers, poetry and essays. Students will read Our Mutual Friend over the course of the semester in order to mimic the experience of nineteenth-century serial reading. Other readings will include Evelina, The Secret Agent, and A Study in Scarlet.
Instructor(s): J. Valdez
Area: Humanities.

AS.060.304. Large Novels.
This course will look at novels that are not only large in size, but which also think about the meaning and methods of trying to capture huge segments of the world into a piece of art. How much can be fit into a novel? What is gained and what is lost? How large is too large? We will read Charles Dickens’s “Bleak House”, Lev Tolstoy’s “War and Peace”, and Thomas Pynchon’s “Gravity’s Rainbow”.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.305. The Rise of the Novel.
This course will look at the development of the novel form, from its earliest incarnations. We will pay special attention to questions of how changes in social, cultural, and economic context played a part in the growing popularity and relevance of the novel form. Authors will likely include Miguel de Cervantes, Daniel Defoe, Samuel Richardson, Henry Fielding, Jane Austen, and Henry James. [This course satisfies the pre-1800 requirement]
Instructor(s): J. Rosenthal
Area: Humanities.

A one credit course for those undergrads who have been nominated as Writing Center tutors. Permission required.
Instructor(s): E. Steedley; R. Day
Area: Humanities.
AS.060.308. The Novelty of the Novel.
The English novel has been traditionally regarded as having originated in the eighteenth century, with the works of Defoe, Richardson, and Fielding. This view of the novel's origins owes much to the influence of Ian Watt's The Rise of the Novel (1957). Watt claims that the prose fiction written by these three authors is defined and distinguished from other varieties by its "formal realism" – a set of procedures that made the novel much more lifelike than picaresque tales, courtly novellas, or the romance. Watt's view of the canon is now taken to be too restrictive, but his thesis concerning what was novel about the novel remains influential. In this course students will engage with two aspects of Watt's argument that have been criticized by later critics but still retain some of their original force: the idea that eighteenth-century prose fiction marks a break with the past and that the tradition emerging at that point has English origins. We will be testing these two theses by reading and contrasting older and newer forms of prose fiction from England, France, and Spain, comparing their formal procedures, and discussing how satisfactorily Watt accounts for them. We will also be reading critiques and defenses of Watt by critics including Michael McKeon, J. Paul Hunter, Margaret Anne Doody, and Nicholas Seager. Primary sources will include excerpts from Roger Boyle's romance Parthenissa (1651) alongside Defoe's Moll Flanders (1722); the picaresque tale Lazarillo de Tormes (1554) together with Fielding's road epic Joseph Andrews (1742); and the conjugal drama of Madame de Lafayette's La Princesse de Clèves (1678) together with Richardson's treatment of a similar topic in Pamela (1740). As we read the primary sources we will be also reading the relevant chapters of The Rise of the Novel. By gaining a first-hand view of the actual changes in prose fiction students will be able to appreciate the force of Watt's thesis as well as its limitations. Toward the end of the course they will also engage with the provocative final chapter of Watt's book, which claims that the problems raised by formal realism as practiced by Richardson and Fielding are finally resolved in the work of Jane Austen. Sense and Sensibility should provide the testing ground for this thesis. Pre 1800 course.

Instructor(s): R. Maioli dos Santos
Area: Humanities.

AS.060.309. Home and Wanderlust in Modernist Literature.
This course will examine forms of wanderlust and tensions between rootedness in one's own culture and a cosmopolitan orientation in Henry James, Joyce, Tagore, Hemingway, Isak Dinesen, and Hualing Nieh. Dean's Teaching Fellowship course.

Instructor(s): N. Zhang
Area: Humanities.

AS.060.310. Work and Worth in American Literature.
This course will engage contemporary discussions of economics, labor, and vocation with representations of people at work in the writings of Douglass, Melville, Hurston, Steinbeck, Frost, Yates, Springsteen, and others. Dean's Teaching Fellowship Course

Instructor(s): E. Tempesta
Area: Humanities.

Standard utilitarianism, the dominant philosophical account of moral agency in the Victorian period, has a surprisingly unsophisticated account of self-control: both Jeremy Bentham and John Stuart Mill thought it was relatively straightforward, insofar as agents reliably pursued whatever end appeared to promise the greatest gain in happiness with little psychic effort. But other forms of intellectual life in the period—the now-forgotten "Intuitionist" school, the pre-Freudian psychologists, and perhaps most importantly, an important series of Victorian novelists—recognized that agency was much more complex, and tried to work through the problem that J.C. Prichard called "moral insanity." Conceiving it as a situation where agents cannot for some reason pursue their own reflectively endorsed goals, these authors developed a variety of richly complex accounts of and treatments for the loss of self-control. In this class, we are going to explore those accounts at some length. To start with the utilitarian model as a backdrop to the more complex accounts, we will read selections from Jeremy Bentham and John Stuart Mill in which they lay out their pleasure/pain account of agency, and then work through a set of theoretical materials for use throughout the course. First, we'll examine the intuitionist views of agency from William Whewell and John Grote, who held that moral action essentially required mastering oneself in such a way as to perceive and act upon moral intuitions; then, we'll turn to analyses from Prichard, Forbes Winslow, Henry Mausley, and other early forerunners in the developing field of psychology, and situate these arguments within the philosophical context. With this theoretical frame in place, we will spend the bulk of the course reading a series of novels that address the question of self-control. Beginning with Jane Austen and Charlotte Brontë, we'll consider the ways in which these novels represent the relationship between desire, reflection, and gender. Turning to George Eliot's Romola and Anthony Trollope's Can You Forgive Her?, we'll consider the way Eliot and Trollope analyze the nature of practical rationality. Finally, we'll conclude with two important challenges to the belief in the moral value of self-control, in Thomas Hardy's Tess of the d'Urbervilles and Oscar Wilde's The Picture of Dorian Gray.

Instructor(s): P. Fessenbecker
Area: Humanities.
Primo Levi's well-known essay “The Gray Zone” describes complex states of complicity and moral erosion between the categories of “victims,” “perpetrators,” and “bystanders” during and after the Holocaust. Literature written at the time or in the immediate aftermath, whether memoir, commentary, or fiction, contains many illustrative examples, but even more have arisen at one or another remove from the events, as later generations have confronted an atrocity frequently taken to be historically and morally unique. How did the Holocaust become a touchstone for both extremities of human behavior and problems of representation? When did the Holocaust become available to literature or to the once unthinkable strategies of satire, post-modernism, and even pornography, and can these strategies be considered examples of “the gray zone”? The course will deal with the testimonies of perpetrators such as Rudolf Höss (commandant of Auschwitz) and historical documents setting forth plans for genocide; with memoirs of prisoners such as Filip Müller forced into participation in the Holocaust; and more particularly with literary depictions of life in “the gray zone.” The sequence of readings will be organized mainly around literary texts, but these will be paired, sometimes in two-week sequences, with historical and critical materials that take up the problem of complicity through various perspectives: the role of Jewish leaders during the Holocaust; attempts to fictionalize extremities of evil (e.g., Hitler); the aestheticizing of atrocity; the moral responsibility of bystanders; and the extension of genocidal paradigms to other dimensions such as slavery and animal rights. Texts to be studied (mostly, though not exclusively, written first in English) may include: Primo Levi, The Drowned and the Saved; Rudolph Hoess, Commandant of Auschwitz; Tadeusz Borowski, This Way to the Gas, Ladies and Gentlemen; George Steiner, The Portage to San Cristobal of A. H.; Leslie Epstein King of the Jews; Sylvia Plath, selected poems; Philip Roth, The Plot against America; D. M. Thomas, The White Hotel or Pictures At an Exhibition; Caryl Phillips, The Nature of Blood; and J. M. Coetzee Elizabeth Costello.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.313. Edmund Spenser.
After a diagnostic introduction to his early poetry, this reading intensive seminar will concentrate upon Edmund Spenser’s masterpiece, The Faerie Queene (1590/1596), which we will read in its entirety. Over the course of its sprawling Six Books and its concluding Mutability Cantos, The Faerie Queene marshals an enormous cast of characters (knights, ladies, magicians, giants, monsters) in order to allegorically represent the virtues of Holiness, Temperance, Chastity, Friendship, Justice and Courtesy. Through this framework, his text models the ethical regulation of the body, the aesthetic construction of gender, the politics of national myth-making, and the ongoing processes of colonial violence in which Spenser was himself complicit. But across its vast yet incomplete expanse, Spenser’s text is always centrally concerned with the task of reading. Accordingly, students should emerge from their encounter with this demanding but rewarding poem with a deeper understanding of the task of interpretation itself. As a group we will collectively traverse the surface of the text, and work together to construct a functional account of allegory’s effects. You will be asked to respond to the challenge of Spenser’s work in class discussion, weekly short responses, and three analytic papers.
Instructor(s): A. Daniel
Area: Humanities.

AS.060.314. Social Media Fictions.
Writers around the world are now searching for ways to incorporate new modes of social interaction - e.g. Facebook, Twitter, text messaging, and Skype - into their print work. This course explores the various techniques they have adopted for this purpose, with an eye to critically evaluating their implications for narrative structure and its “reality effect.” From Teju Cole’s very public experiments with the Twitter novel to a Zimbabwean writer’s attempt to capture plot turns through SMS, we will discuss the ways in which narrative is helped or hindered by the ubiquity of social media. Writers studied will include Tendai Huchu, Zadie Smith, Jonathan Franzen, and Eben Venter.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.315. Poetry by Other Means.
In this course, we explore the makings of a new genre: the poet’s novel. Reaching back to the modernist works of Gertrude Stein and Djuna Barnes to look for its resources and its models, searching for antecedents in the queer avant-gardes of the 1970s, and finally delving into the key poets’ novels of just the last five or ten years—including works written by Eileen Myles, Juliana Spahr, Ben Lerner, and Bhanu Kapil—we will collectively develop an account of its yet-uncharted territory and some of its attractions. Our work will open onto a series of questions about both the category of poetry and the significance of narrative, while following thematic threads of friendship, gender and sexuality, self-reflection, feeling, crisis, and utopia. Deans Teaching Fellowship course.
Instructor(s): C. Westcott
Area: Humanities.

AS.060.316. Mapping the Global Metropolis.
Cities have long taken on a central role in literature, but much of our reading about urban space is confined to a few Western hubs. And while the city has traditionally been a space for fictional characters to develop into national subjects, much of the most innovative contemporary writing sees the city as a character of its own. This course will address the representational challenges of globalization through fiction and genre-bending memoir about contemporary metropolises that act as its microcosm: Johannesburg, Lagos, Delhi, London, and New York. We will read primary works by Ivan Vladislavic, Chris Abani, Aravind Adiga, Zadie Smith, and Teju Cole, as well as supplementary excerpts from books including Capital, by Rana Dasgupta, Mike Davis’ Planet of Slums, Atu Quayson’s Oxford Street, Accra, and Loren Kruger’s Imagining the Edgy City. Finally, the course will include theoretical readings about globality and representation, such as Fredric Jameson’s essay on “Cognitive Mapping” and Arjun Appadurai’s seminal book Modernity at Large.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.317. Time Well Wasted: Reading Fiction in the 18th Century.
Is reading fiction just escapism? Or can novels speak to us about real life? We will discuss this question by reading classic works by Defoe, Swift, Fielding, and Sterne. Dean’s Teaching Fellowship Course. Pre 1800 course
Instructor(s): R. Maioli dos Santos
Area: Humanities.
AS.060.318. The Theology of Narrative.
Everything happens for a reason.” “I guess it wasn’t meant to be.” People often impose a narrative logic on life events by reference—however attenuated—to a transcendental order of meaning. This course asks two basic questions: How do theological concepts such as God’s omniscience, Providence, predestination, and prophecy get translated into particular narrative structures? How does narrative experimentation function as a critique of traditional theological viewpoints, particularly around the question of how divine agency is related to the existence of evil? Texts may include: “The Book of Job” (4th century B.C.E.), Voltaire’s “Candide” (1759), Olaudah Equiano’s “Slave Narrative” (1789), Herman Melville’s “Moby-Dick” (1851), Rebecca Harding Davis’s “Life in the Iron-Mills” (1861), James Agee’s “Let Us Now Praise Famous Men” (1941), and Scarlett Thomas’s “Our Tragic Universe” (2010). Recommended Course Background: AS.060.107, a lecture course (200-level) in the English department, or instructor approval.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.319. Values and Gender in Nineteenth-Century British Literature.
The course considers how nineteenth-century British authors—including Ruskin, Gaskell, Eliot, and Wilde—engage and oppose various sets of values in their representations of gender.
Instructor(s): M. Flaherty
Area: Humanities.

AS.060.320. Icons of Feminism.
This course looks at four crucial figures who have haunted feminist thought and responses to feminism over the centuries. Sappho, known as the first female poet, remains an enigmatic icon of feminine desire and creativity; Antigone, the daughter of Oedipus and the heroine of Sophocles’s play Antigone, still inspires feminist analyses of women’s relationship to law, the state and civil society; and Joan of Arc, the militant maid of Orleans, troubles thinking about women and violence as well as women, religion and spirituality. The last figure is Mary Wollstonecraft, often cited as the first modern feminist. The course will examine literary works written about these iconic figures, as well as contemporary feminist writing about their influence and viability as models for the future of feminism.
Instructor(s): M. Favret
Area: Humanities.

In this class, we’re going to briefly survey the major poets of the Victorian era: Alfred, Lord Tennyson, Robert and Elizabeth Barrett Browning, Dante Gabriel Rossetti and his sister Christina, Matthew Arnold, George Meredith, and others. Moreover, we’ll try to situate them in the social, political, and intellectual contexts that gave rise to their works, and investigate the questions that stimulated them and which their works address: we will, for instance, follow Arnold in thinking about the place of religion in the modern world, Meredith in thinking about the nature of moral egoism, and Elizabeth Barrett Browning in recovering the voices of oppressed classes. We’ll also try to address the various formal innovations of poetry in the Victorian era, attending to—for example—Tennyson’s complex re-imagination of the verse of the Arthurian legends and Robert Browning’s development of sophisticated forms of irony. Specific poems to be studied include Tennyson’s “Ulysses” and “The Lady of Shalott,” George Meredith’s “Modern Love,” and Christina Rossetti’s “Goblin Market.”
Instructor(s): P. Fessenbecker
Area: Humanities.

AS.060.322. Indian Ocean.
This course will explore the development of a cosmopolitan ethos in postwar fiction from the Indian Ocean region, with particular focus on South Africa, South Asia, and the Malay Archipelago. Authors will include Aravind Adiga, Pramoedya Ananta Toer, Lloyd Fernando, Tan Twan Eng, and J.M. Coetzee.
Instructor(s): J. Haley
Area: Humanities.

In this course, students will consider the emergence and development of modern British poetry. Beginning with Hopkins and Hardy, two of the forebears of modernist literature, students will read and discuss the war poems of Owen and Sassoon before turning to major modernist poets like Eliot, Pound, and Auden. By reading pertinent critical pieces by and biographical information about these poets, students will acquire an understanding of modernism’s concern with form, its interest in experimentation, and its navigation of both tradition and modernity. Over the course of the semester, students will be asked to write three five-to-seven-page essays on the works previously covered in class.
Instructor(s): E. Steedley
Area: Humanities.

AS.060.326. Spectral Evidence.
Rising to its greatest prominence during the 1692 Salem Witch Trials, “spectral evidence” refers to a category of evidence that involves supernatural claims—dreams, visions, etc. Even in 1692 within the largely homogeneous Euro-American Puritan community, the category raised profound questions about what should count as evidence in legal settings, and, more broadly, about the ontological status of the supernatural—to what extent are certain experiences of the supernatural mediated by private subjectivity and thus difficult to transmit or even illegible in the public sphere? These questions only intensify in cross-cultural contexts like the colonial Americas and postcolonial Australia and South Africa and often get reconfigured into debates about the limits of cultural relativism. This course will examine historical, literary, and filmic sites at which the question of “spectral evidence” comes into play. Texts may include: documents pertaining to the Salem Witch trials; Inquisition records; the novels of Charles Brockden Brown; Nathaniel Hawthorne, “The Scarlet Letter” and other fiction; Edgar Allan Poe, “The Tell-Tale Heart,” “The Pit and the Pendulum,” and other fiction; the spiritualist medium Fox sisters’ confessions; Mark Twain, “Personal Recollections of Joan of Arc”; Arthur Miller, “The Crucible”; Peter Weir, dir., The Last Wave; Gavin Hood, dir., A Reasonable Man; Scott Derrickson, dir., The Exorcism of Emily Rose. Recommended Course Background: AS.060.107, 200-level English course, or instructor approval.
Instructor(s): J. Hickman
Area: Humanities.
Sir Walter Scott and Lord Byron were the best-selling authors of their day by a significant margin. In this course, we’ll attempt to come to terms with their unprecedented success, which was felt within the business of the publishing industry as much as it was in the minds of their fellow writers. Readings include Scott’s poems set in Scotland’s legendary past, Byron’s scandalous and heroic poems (including his masterpiece, Don Juan), as well as a novel by their less-popular contemporary, Jane Austen, whose formally elegant novels must be understood as drawing on and competing with the works of her age’s most dominant literary figures. Additionally, we’ll place a strong emphasis on understanding how the workings of the publishing industry affected not only the habits of reading, but also of writing, during this crucial period in literary history. Secondary readings will help to situate the authors and primary texts in their historical and literary context, and provide practical tools for literary analysis. Assignments will include reading quizzes, response papers, and three longer papers. Required Texts: Walter Scott, The Poetical Works of Walter Scott (Wildside Press) Walter Scott, Waverley (Broadview) Lord Byron, The Major Works (Oxford) Jane Austen, Persuasion (Oxford)
Instructor(s): N. Bujak
Area: Humanities.

AS.060.328. Restoration and 18th Century Literature.
This course is a survey of the major authors and genres in English from 1660-1800. Topics include the rise of the novel, politics and satire, gender and women writers, landscape and ecological consciousness, philosophy, science and literature.
Prerequisites: AS.060.107
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.329. Prophecy after Science.
Prophets and their prophecies are everywhere: whether preached by evangelical visionaries of Rapture, opined by primetime sports forecasters, or sold at hourly rates by countless fortunetellers and astrologers. Our dizzying era, predicated economically, technologically, and politically on objective methods of prediction, comfortably accommodates and even welcomes pre-scientific, prophetic modes of futurity. We look up our horoscopes on our smartphones. How did we come to balance these futures so blithely? Do we - and should we - think of these modes as continuous or separate, complementary or conflicting? This course explores the history of prophecy, from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom, with a focus on the effect of the rise of science in shaping the course of prophetic writings. The majority of texts in this course come from the literature of 1600-1800 - centuries that witnessed the emergence of our modern scientific disciplines, and the recasting of prophecy in terms of the human imagination.
Instructor(s): W. Miller
Area: Humanities.

This course will survey a variety of novels written since 2000, from literary novels to best-sellers, both in English and in translation (into English). We’ll pay attention to formal and aesthetic questions -- what counts as a good story, at this point in history? -- and we’ll hone our skills in recognizing narrative patterns and motifs across different fictional styles. Authors likely to be considered include Arundhati Roy, Junot Díaz, Roberto Bolaño, Muriel Barbery, Marlene van Niekerke, David Mitchell, and Amitav Ghosh.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.331. Poetry and Perfect Worlds.
A seminar exploring poetic representations of ideal realms. Beginning with classical pastoralists, we will move on to medieval and Renaissance arcadias, Romantic geographies, modernist utopias, and the ecopoetics and necropastoral of the twenty-first century. We will consider in detail what makes a place Edenic or utopian and how the fabrication of an imaginary world relates to the construction of a poetic text. Writers studied may include Theocritus, Virgil, Chaucer, Spenser, Milton, Shelley, Tennyson, T. S. Eliot, W. H. Auden, Lisa Robertson, and Juliana Spahr.
Instructor(s): D. Mao
Area: Humanities.

AS.060.332. Jewish American Fiction.
This course will consider the development of Jewish American fiction over the past century through an examination of major authors and topics, with particular attention to novels whose historical trajectories reach geographically back and forth from America to Europe, and temporally back and forth across the Holocaust, the century’s defining event. These novels thus frequently have multiple settings and treat familial, communal, and intellectual life, along with topics such as emigration, anti-Semitism, and religious belief, over a span of several generations. The list includes authors whose works first appeared in Yiddish (Lamed Shapiro and Isaac Bashevis Singer) and authors whose sensibilities are decidedly American, but all write with attention to the tenuous assimilation, dislocation, trauma, and linguistic complexity that often marked twentieth-century Jewish life, no less in the United States at times than in Europe. Works studied will include: Dara Horn, In the Image; Rebecca Goldstein, Mazel; Bernard Malamud, The Fixer; Lamed Shapiro, The Cross and Other Jewish Stories; Isaac Bashevis Singer, Shosha; Cynthia Ozick, The Shawl; Nicole Krauss, A History of Love; Jerzy Kosinski, Steps; Philip Roth, Nemesis; Shalom Auslander, Hope: A Tragedy: A Novel
Instructor(s): E. Sundquist
Area: Humanities.
Through readings of Scripture, medieval and early modern drama and prose fiction, and modern political theory and environmental writing, this course explores the complex and overlapping status of oaths, pledges, promises, pacts, and contracts. Starting with an examination of speech act theory, this upper division seminar will consider a range of literary "scenes of obligation" in which verbal promises or written contracts bind persons together. We will look at how promises and contracts mediate relationships between humanity and inhuman forces (pledges to God, pacts with the Devil), how they consolidate bonds between human beings (business contracts, marriage contracts), and how they are fulfilled, broken, or re-negotiated. Possible texts include: J. L. Austin, "How to Do Things with Words"; John Searle, "Speech Acts"; Anon., "The Building of the Ark"; "The Flood" (York Corpus Christi Plays); Anon., "Arden of Feversham"; Christopher Marlowe, "Doctor Faustus"; Wil liam Shakespeare, "The Merchant of Venice"; Margaret Cavendish, "The Contract"; and chapters from Jean Jacques Rousseau, "The Social Contract"; Carole Pateman, "The Sexual Contract"; and Michel Serres, "The Natural Contract". Pre 1800 course.
Instructor(s): A. Daniel
Area: Humanities.

This course will study the idea of modernity, a term that has been of continuing use in trying to understand ourselves and our society. We will focus on the major works of prose and poetry that attempted to come to terms with modernity in Victorian Britain. Texts are likely to include non-fiction prose by Mill, Arnold, Darwin, Nightingale, and Pater; Eliot's novel Middlemarch; and poetry by Elizabeth Barrett and Robert Browning, Tennyson, Emily Bronte, Christina Rossetti, Hopkins, and Hardy.
Instructor(s): A. Miller
Area: Humanities.

AS.060.337. James Joyce.
A seminar covering the oeuvre of James Joyce, including but not limited to Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and parts of Finnegans Wake. Selected readings in other writers and in relevant historiography; some attention to Joyce criticism.
Instructor(s): D. Mao
Area: Humanities.

AS.060.338. Literary Scenes.
From Paris in the 1920s to San Francisco in the 1960s and beyond, this course will cover literature produced within major and minor literary "scenes" of the 20th Century. Authors include Hemingway, Stein, Woolf, Ginsberg, Kerouac, and others. Dean's Teaching Fellowship course.
Instructor(s): A. Zecca
Area: Humanities.

Focusing on the long nineteenth century, we will examine how major Anglo-American poets treat the complex relationship between madness, passion, and genius. Additional readings in philosophy and psychoanalysis. Dean's Teaching Fellowship course.
Instructor(s): J. Hann
Area: Humanities.

This seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban antislavery novels, slave narratives, and "classics" of American literature like Melville's Benito Cereno. We will consider how the institution of Atlantic slavery was variously represented, justified, and criticized, discovering in the process the deep structures of modern slavery discourse. Texts may include: Aphra Behn, "Oroonoko"; John Woolman's "Journal"; Robert Wedderburn, "The Horrors of Slavery and Other Writings"; Gertruds Gomez de Avellaneda, "Sab"; Frederick Douglass, "My Bondage and My Freedom"; Herman Melville, "Benito Cereno"; Harriet Beecher Stowe, "Dred"; Antonio Castro Alves, "The Slaves".
Instructor(s): J. Hickman
Area: Humanities.

AS.060.341. Milton.
This class will study Milton's poetry and prose across the whole of his writing career, with special attention to Paradise Lost, the great epic poem retelling the story of the fall of humankind. We will consider Milton's literary background, his contemporary political and social milieu, as well as critical debates that surrounding the poet, who was accused of being 'of the devil's party.' Pre-1800 course.
Instructor(s): S. Achinstein
Area: Humanities.

The novel of ideas is often traced to 18th century French or 19th century Russian writing, but it has come broadly to signify works of robust philosophical contemplation. The inherently slippery term seems to indicate a work in which "form" is subsidiary to "content," or at least, in which narrative structures adapt to prioritize thought rather than style, image, or even character. But how, exactly, and about what, do novels "think?" In large part, the novel of ideas is now conflated with a rote and recognizable brand of social realism. This course asks what might qualify as a novel of ideas today, both in terms of the novel's changing relation to geographical space (and thereby the formal spaces in which philosophy might lurk), and of the particular "ideas" it critiques or puts forth. We will read novelists including J.M. Coetzee, Marlene van Niekerk, Jonathan Franzen, Teju Cole, and Ronan Bennett within a longer literary-philosophical tradition, with reference to works such as Candide, War and Peace, Thus Spoke Zarathustra, and Kierkegaard's Diary of a Seducer.
Instructor(s): J. Jackson
Area: Humanities.

This course examines John Milton's commitment to liberty in its many varieties, both public and private, as articulated in his early prose writings and as imagined in his poetic works. Dean's Teaching Fellowship Course. Pre 1800 course.
Instructor(s): R. Buckham
Area: Humanities.
**AS.060.344. The American Renaissance in Technicolor.**
The American Renaissance refers to the boom in U.S. literary production between the 1830s and the 1860s that gave us the American writers who have achieved the greatest stature in the popular mind—Emerson, Thoreau, Hawthorne, Melville, Whitman. This work was in large part animated by literary nationalism—by the self-conscious effort to produce a distinctively "American" literature that could take its rightful place on the world stage. As such, questions about the meaning of American history and the nature of American identity were central to this work both as implicit impetus and explicit theme. Importantly, these questions were being asked during the heyday of "Manifest Destiny"—of Euro-American westward expansion, which displaced Native peoples and Hispanic settlers and perpetuated the enslavement of African Americans. The goal of this course is to read some of the major works of the period’s canonical Euro-American male writers in conjunction with works by African, Native, Latino, and female American writers in order to gain a fuller picture of literary and cultural history during this formative moment. Texts may include: Ralph Waldo Emerson's essays and antislavery lectures; the anonymous historical romance of the Aztec conquest, Xicotencatl; William Apsess, A Son of the Forest, "Eulogy on King Philip"; Frederick Douglass, My Bondage and My Freedom; Henry David Thoreau, Walden, "Slavery in Massachusetts," "Plea for Captain John Brown"; Harriet Beecher Stowe, Uncle Tom's Cabin; Herman Melville, "Hawthorne and His Mosses," Benito Cereno, Moby-Dick; Nathaniel Hawthorne, tales and sketches, The Blithedale Romance; Walt Whitman, Leaves of Grass (1855 edition).
**Prerequisites:** AS.060.107 or English department lecture, or instructor permission.
Instructor(s): J. Hickman
Area: Humanities.

**AS.060.345. Mapping Victorian England.**
The landscape of England changed dramatically during the course of the nineteenth-century, from the unprecedented expansion of the British Empire and the rapid growth of cities and urban environments, to the increasing psychological investment in more confined spaces like the home. In this course, we’ll explore how Victorian literature "maps" these various spaces and, perhaps more importantly, the connections between them. The bulk of our reading will be novels by authors such as Charles Dickens, Elizabeth Gaskell, George Eliot, Anthony Trollope, Thomas Hardy, and Rudyard Kipling, though we’ll also turn to poems, non-fiction prose, and short theoretical readings to enrich our understanding of how Victorian writers attempted to represent the spatial, social, and economic geography of their nation. In addition to examining the "horizontal" connections drawn by these novels—between, for example, the country and the city, the colonies and the capital, the home and the nation as a whole—we’ll also explore how these novelists draw on intellectual developments like the emerging Darwinian worldview and incorporate what we might call “vertical” mapping to understand how the past shapes the present. Throughout, we’ll pay careful attention to how these writers represent the specificity of place and investigate the influence of environment on character and personal development.
Instructor(s): A. Grener
Area: Humanities.

**AS.060.346. Major British Authors: George Eliot.**
In this course we will read the major novels of George Eliot, one of the most significant writers in the history of British fiction. Her novels addressed a number of compelling moral and social issues through powerful narratives about fallen women, disappointed love, tense family dramas, and individual struggles to find meaningful vocation. We will read the works carefully, examining their formal features in relation to philosophical, social, and historical context. To read Eliot is necessarily to enter into a rich engagement with nineteenth-century culture and thought, and in order to further our understanding of her oeuvre, we will read a number of key critical appraisals of individual novels, as well as some of Eliot’s own essays on various topics. Novels will include "Adam Bede", "The Mill on the Floss", "Middlemarch", and "Daniel Deronda".
Instructor(s): A. Anderson
Area: Humanities.

**AS.060.347. American Bibles.**
This course will examine texts drawn from across the Americas—from Mather’s Magnalia Christi Americana to Melville’s Moby-Dick to Euclides da Cunha’s Os Sertões (Rebellion in the Backlands) to Kushner’s Angels in America—that are fundamentally biblical in their inspirations, aspirations, proportions, and allusions. We will consider these texts’ attempts, in the face of globalizing and secularizing forces like Atlantic slavery and German higher criticism, to affirm, undermine, appropriate, and redirect the authority of the ur-canonical text. Recommended Course Background: AS.060.107 or lecture course in English department.
**Prerequisites:** AS.060.107 or a lecture course in the English department.
Instructor(s): J. Hickman
Area: Humanities.

**AS.060.348. Virginia Woolf and Bloomsbury.**
An exploration of the achievements and investments of one of the most influential coteries in the history of Britain. In addition to delving into key fictions by Virginia Woolf, we will examine novels by Leonard Woolf and E. M. Forster, art criticism by Roger Fry and Clive Bell, biographical essays by Lytton Strachey, economic writings by John Maynard Keynes, and poetry by T. S. Eliot.
Instructor(s): D. Mao
Area: Humanities.
This course will introduce students to experimental, conceptual, and constraint-generated literature. In some cases, the texts we will read were created through the application of some particular premise, constraint, or rule-governed system. In other cases, practices of appropriation, creative re-use, or sampling were involved in the generation of textual material (sometimes subjected to editing and transformation, sometimes presented “as is”). What happens to literary meaning, genre identification, and the author/reader contract under these conditions? Can an experiment be evaluated as a success or failure as literature? What’s so “conceptual” about this practice, anyway? And why are the results- often typocast as difficult or resistant to understanding- frequently so funny? In search of answers, we will read widely in experimental and conceptual literature and in the manifestos and critical analyses that surround this work, and we will look at the overlap between experimental and avant-garde literary movements and concurrent processes of “dematerialization” in play within the related domain of the visual arts. Finally, we will consider the importance of digital tools, search engines, and databases in the construction of experimental literature at the present time. Possible authors/texts include Raymond Queneau “Exercises in Style”, Raymond Roussel “How I Wrote Certain of My Books”, Georges Perec “A Void”, Harry Matthews “Oulipo Compendium”, Walter Abish “Alphabetical Africa”, Marjorie Perloff “Unoriginal Genius”, William S. Burroughs “The Cut-Up Method”, Charles Bernstein, “The L=A=N=G=U=A=G=E Book”, Vanessa Place “Notes on Conceptualisms”, Kenneth Goldsmith “The Weather”, Gary Sullivan “The Flarf Files”, Aaron Kunin “The Sore Throat”, Christian Bok “Eunoia”, and David Trinidad and D. A. Powell’s “By Myself, An Autobiography”.
Instructor(s): A. Daniel
Area: Humanities.

AS.060.351. Theory of the Novel.
We all know a novel when we see one, but it’s surprisingly hard to say just what one is. This seminar will introduce the theory of the novel by reading a number of novels along with the works of central thinkers about the novel. We will look at the connection of the rise of the novel form with historical and cultural changes and investigate key stylistic elements. Novelists will likely include Miguel de Cervantes, Johann Wolfgang von Goethe, Jane Austen, Gustave Flaubert, and Virginia Woolf.
Instructor(s): J. Rosenthal
Area: Humanities.

This course takes stock of how the current hot topic of “world literature” has evolved from Immanuel Wallerstein’s work on world-systems theory over the course of the last three decades. We will read work by a wide range of literary critics engaged with the topic of world literature, including Franco Moretti, Pascale Casanova, David Damrosch, Emily Apter, and Alex Beecroft, as well as major “world” novels by Herman Melville, Amitav Ghosh, and Chimamanda Adichie. Students will also be introduced to critical approaches that offer a conceptual alternative to the world literature framework, for example, Edward Said’s ideas on worldliness and contrapuntalism, Gaston Bachelard’s phenomenology of the home, Fredric Jameson’s concept of cognitive mapping, and Eric Hayot’s work on literary “world-creation.” We will ask just how broadly the field can be defined before it loses its critical cohesion. In other words, does world literature exist?
Instructor(s): J. Jackson
Area: Humanities.

AS.060.354. Marlowe and Shakespeare's History Plays.
The first folio of Shakespeare’s works groups his plays into three categories: “Comedies,” “Tragedies,” and “Histories.” This course will consider what a Renaissance history play was. What are the consequences of basing literature on real historical events? How do the ways in history has been dramatized on stage relate to renaissance understandings of history and to how we understand history today? We will read all ten of the plays classed as Histories in the Folio, along with two other Shakespeare plays based on British historical chronicles (King Lear and Cymbeline) and Christopher Marlowe’s Edward II. We will also look at the chronicles and histories that served as sources for the playwrights, and theoretical discussions of the purpose and nature of history and literature from the early modern period. Pre 1800 course
Instructor(s): M. Vinter
Area: Humanities.

This course surveys major authors, genres, and literary movements from 1690-1800. Topics to be discussed include the gendered division of labor, ecological consciousness, British imperialism, the rise of capitalism, and the relation between literary and material labor. We will be reading a variety of texts in poetry, prose, drama, and the novel from authors including Alexander Pope, Daniel Defoe, Jonathan Swift, Eliza Haywood, Stephen Duck, Mary Collier, Mary Leaper, Samuel Richardson, Thomas Gray, Oliver Goldsmith, William Wordsworth, Anna Laetitia Barbauld, and William Blake. Texts will be supplemented with historical, philosophical, and theoretical materials where appropriate. A pre-1800 course.
Instructor(s): K. O’Briain
Area: Humanities.

A comparative study of major works by the South African Nobel Laureates Nadine Gordimer and J.M. Coetzee. Special attention to critical essays by both writers about each other, as well as about issues of shared historical and literary concern. Topics will include the role of the public intellectual in apartheid-era South Africa, competing scales of literary reception and evaluation (e.g. national, international, and universal), and the relationship between politics, form, and genre.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.357. The Novels of Jane Austen.
An intensive study of Austen’s six major novels, read in their literary and historical context.
Instructor(s): J. Kramnick
Area: Humanities.
**AS.060.358. Prophecy and Enlightenment.**

This class considers the relationship between prophecy and enlightenment. These two knowledge regimes, the revelatory and the rational, are often assumed to be opposed, with rationality trumping revelation over revelation in the seventeenth and eighteenth centuries. In recent years, notably post-9/11, we have seen a resurgence of this view from a variety of perspectives, whether of the new atheism or that of historians of enlightenment. We will turn to a number of important primary texts associated with major enlightenment thinkers in order to interrogate more closely the opposition of prophecy and enlightenment at the point of its supposed origin. Doing so should help at once to clarify and complicate the important contemporary narrative pitting science against religion and vice versa. Later in the semester, we will turn to a number of twentieth-century thinkers who bring quite different perspectives to the role of revelation in the history of reason. Pre-1800s course.

Instructor(s): W. Miller

Area: Humanities.

**AS.060.359. Posthumanist Literature.**

Much of the attention surrounding posthumanism has centered upon a late twentieth-century archive of speculative fiction. This 300-level course would take a longer view, tracing a prehistory of literary and critical discourses that challenge the distinction between humanity and its nonhuman others from the late enlightenment to the present day. Students will begin with sections from Jonathan Swift’s Gulliver’s Travels and A Modest Proposal, then progress through texts that link the humanist themes of exploration and conquest to problems of consumption and divergent forms of life, including Herman Melville’s Typee and Thomas M. Disch’s The Genocides. Next they will turn to the link between the bildungsroman, human enhancement, and the concept of “bare life.” Readings in this section include Neal Stephenson’s The Diamond Age, Philip K. Dick’s Do Androids Dream of Electric Sheep, Franz Kafka’s “The Hunger Artist,” and Primo Levi’s If This Is a Man. We will then consider the link between “monstrosity,” hetero-normativity, and sexual abjection. Readings include Mary Shelley’s Frankenstein, James Baldwin’s Another Country, and Margaret Atwood’s Handmaid’s Tale. The course will conclude with two units on posthuman ethics. The first of these, on the concept of “singularity,” will include J.G. Ballard’s The Drowned World and William Gibson’s Neuromancer. Finally, students will consider what Donna Haraway has termed “companionship species,” with readings to include Franz Kafka’s The Metamorphosis and J.M. Coetzee’s Elizabeth Costello. Critical readings will include selections from Katherine Hayles, How We Became Posthuman; Donna Haraway, “A Cyborg Manifesto”; Friedrich Nietzsche, Human, All too Human; Michel Foucault, The History of Sexuality, vol. I; Giorgio Agamben, The Coming Community and Homo Sacer; Jean Jacques Rousseau, Émile; H.G. Wells, Anticipations and Mankind in the Making; Nick Bostrom, Human Enhancement and Global Catastrophic Risks; Alan Weisman, The World Without Us; Peter Singer, Animal Liberation; J.M. Coetzee, The Lives of Animals; and introductory essays by Andy Miah and Neil Badminton.

Instructor(s): J. Haley

Area: Humanities.

**AS.060.360. Jane Austen.**

All of Austen’s completed novels, as well as a selection of her letters. We will examine both her influence on the novel form, and her work’s relation with her social context. We will also consider why Austen has such unprecedented cultural authority today.

Instructor(s): J. Rosenthal

Area: Humanities.

**AS.060.361. Literature, War, Trauma.**

With a focus on the post-World War II period, a world redefined by the catastrophic events of the Holocaust and the atomic bombing of Hiroshima and Nagasaki (as well as the more widespread strategic aerial bombing of civilian targets in Europe and Japan), the course will consider the nexus of literature, war, and trauma across a range of modern works in English, supplemented by some works in translation. What does it mean to live in the shadow of the Holocaust and the ever-present threat of nuclear war? How can annihilation on such a scale be accommodated to historical, theological, and ethical understanding? What is the role of the imagination in addressing such questions? What if the war had had a different outcome? We will investigate the consequences for literature as it attempted to address such questions in fiction, memoir, and commentary. In addition to a range of historical and theoretical readings, we will concentrate on literary works of several kinds: as a point of departure a few primary works by figures such as Primo Levi “The Drowned and the Saved” and John Hersey “Hiroshima”; fictional and non-fictional ruminations on the war’s legacy by figures such as Kurt Vonnegut “Slaughterhouse Five“, D. M. Thomas “The White Hotel“, Msuji Ibuse “Black Rain“, and W. G. Sebald “On the Natural History of Destruction”; counterfactual narratives about the world that might have been, had the Axis powers prevailed, by figures such as Philip K. Dick “The Man in the High Castle”, Ira Levin “The Boys from Brazil”, Philip Roth “The Plot against America”, and Michael Chabon “The Yiddish Policeman’s Union”; and works in which the impact of catastrophic destruction is absorbed into other cultural arenas by figures such as Toni Morrison “Beloved”, Don DeLillo “White Noise”, and J. M. Coetzee “Elizabeth Costello”. Readings are tentative and may be modified. Requirements: class participation, short writing exercises, and two longer papers.

Instructor(s): E. Sundquist

Area: Humanities.

**AS.060.362. Art and the Arab Spring.**

Much has been made of the political ramifications of the Arab Spring: the potential move towards democratic representation, the realization of minority and gender rights, the economic liberalization of markets, the jockeying by world powers to assert influence in the region, and the revitalization of dissident movements. This course will turn its attention to the role of artistic representation in the Arab Spring in order to complicate these political discussions. We will explore widely, considering works of prose, poetry, film, music, performance art, and visual art, from photography to graffiti. We will think through how these mediums are used and to what end, whether as evidence of atrocities, as inspiration and mobilization of dissent, as satirical commentary, or to revitalize appreciation for artistic expression. We will also think about the impact of social media on distribution possibilities and implied audience and track how certain art forms invoke and are invoked by liberal or conservative discourses in complex ways.

Instructor(s): N. Hashem

Area: Humanities.

**AS.060.363. Henry James.**

A reading of the major novels. Recommended Course Background: AS.060.107 or two lower level literature courses.

Instructor(s): S. Cameron

Area: Humanities.
AS.060.364. Utopias.
This course examines how writers have imagined perfect, or at least vastly improved, human societies from antiquity through our own day. Topics of particular interest will be the relation between individual liberty and social cohesion in utopian schemes, views on the nature of happiness and justice, and speculations about the ease or arduousness with which utopia might be created or maintained. Authors to be studied may include Plato, Thomas More, Edward Bellamy, William Morris, Charlotte Perkins Gilman, H. G. Wells, E. M. Forster, and Ursula K. LeGuin.
Instructor(s): D. Mao
Area: Humanities.

AS.060.365. Literature and Modern Philosophy.
Does literature have moral value? How might we begin to answer such a question? This course will survey major attempts by both writers and philosophers to understand the relation between morality and literature, especially fiction. Course will be taught by incoming professor Andrew Miller.
Instructor(s): A. Miller
Area: Humanities.

AS.060.366. Ellison.
After his landmark novel "Invisible Man" appeared in 1952 and won the National Book Award, Ralph Ellison was one of the most highly regarded and influential American writers. Although his writing—beginning with the powerful short stories and criticism that he published in the 1930s and 40s—was steeped in African American history, literature, music, and folklore, he also thought of himself as part of the great tradition of American, European, and classical literature, from Homer through Joyce. He quickly set to work on a second novel dealing with the assassination of a racist senator during the height of the Civil Rights movement, but he came to the end of his life in 1994 without having completed the novel to his own satisfaction. This massive book, which appeared posthumously in a very abbreviated form as Juneteenth and more recently in the much longer Three Days before the Shooting, reveals the work of a master while at the same time it leaves critics and readers with an exceptional puzzle: What would his final intention have been? Why was he unable to complete the novel? How does it speak to the key issues of African American identity, freedom, and the American ideal that Ellison grappled with all his life? At the same time that he worked on his second novel, Ellison became one of the most prolific and important essayists of the twentieth century, and wrote brilliantly about American race relations from the era of segregation through the twentieth century. Even as he was celebrated by the literary establishment, however, Ellison at times found himself as odds with younger black writers and thinkers who felt that public activism, not just artistic greatness, was required of the African American writer. Using Ellison as a lens through which to see the course of American race relations from slavery to the present, the course will include study of all of Ellison's major work: the short stories collected in "Flying Home"; "Invisible Man"; the essays collected in "Shadow and Act" and "Going to the Territory", as well as others; and "Three Days before the Shooting".
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.367. Emerson, Thoreau, Poe.
We shall examine what "divinity," "nature," "Being in general" and "personal identity" differently mean in the writings of Ralph Waldo Emerson, Henry Thoreau, and Edgar Allan Poe, and consider the genres (essay, excursion, home-cosmography, tale, and treatise) in which these authors write. Finally, taking seriously Thoreau's question —"Why do precisely these objects we behold make a world?"—we'll ask how these nineteenth-century American authors construct worlds out of their sustained visions of the intuitive (Emerson), the natural (Thoreau), and the perilous (Poe). Junior/Senior seminar. Recommended Course Background: AS.060.107 or two lower level literature courses.
Instructor(s): S. Cameron
Area: Humanities.

AS.060.368. Aesthetic Play in the Contemporary Global Novel.
This seminar will explore the role of aesthetic play within contemporary world literature in order to ask the question: what challenges to global issues such as imperialism, racial and identity politics, gender parity and socioeconomic disparities are being made not only through subject matter, but through novel approaches to form? We will read short stories, novels, graphic novels, and watch films which subvert expectations about the structure of storytelling: these may include works by Mohsin Hamid, Margaret Atwood, China Miéville, Haruki Murakami, J. M. Coetzee, and Marjane Satrapi. We will also read critical scholarship on the subject of world literature like Pascale Casanova's World Republic of Letters and Aamir R. Mufti's "Orientalism and the Institution of World Literatures."
Instructor(s): N. Hashem
Area: Humanities.

AS.060.371. Major American Authors: Philip Roth.
Over the course of his long career Philip Roth has struck a precarious balance between identification as a Jewish American novelist and insistence that his art escapes such ethnic enclosures. This tension lies at the heart of his work, as indeed some would argue it lies at the heart of the American Jewish experience of the twentieth century. Having emerged as a decidedly rebellious figure who shocked the Jewish community and the nation at large in the 1950s and 60s, Roth has written more than twenty-five novels exploring issues that range from conflicts over assimilation to the roles of the Holocaust and Israel in American Jewish life to the countercultural turbulence of the 1960s to the identity politics of the 1990s. Roth has revealed in forms of fictive autobiography—"counter-lives," "counter-plots," and counterfactual histories—that have enlarged the scope of fiction while still grappling with the tensions and dangers of modern life. Works to be read include: "Goodbye, Columbus"; "Portnoy's Complaint"; "Operation Shylock"; "American Pastoral"; "The Ghost Writer"; "The Anatomy Lesson"; "The Plot Against America"; "The Human Stain"; "The Facts"; "The Counterlife"; "Sabbath's Theater"; and "Nemesis". Requirements: two 8-10 page papers, a class presentation, and participation in discussion.
Instructor(s): E. Sundquist
Area: Humanities.
We will read major fiction by Poe, Melville, and Hawthorne, and consider how conceptions of identity are treated as psychological, philosophical, and historical problems in the writings of these authors. We will also be concerned with the formal inventions that accompany these mid-nineteenth century American investigations of personal identity, and with topics such as gothic horror; divinity; and the status of explanation.
Prerequisites: Prereq: AS.060.107 OR one lower level English course.
Instructor(s): S. Cameron
Area: Humanities.

AS.060.373. Literary Theory.
Two great arguments structure literary criticism and theory: what makes something literature, and what makes something good literature? These arguments will surely never end; but to participate in them can be a great pleasure, and it can sharpen your appreciation of literary writing across the ages. This course will introduce you to the long conversation that has come to be called “literary theory,” with the aim of helping you learn to love not only reading literature, but describing it. Our readings will range from Plato and Aristotle to Kant, Hegel, and Schleiermacher, on to Marx, Freud, and Nietzsche, and finally to a range of recent thinkers.
Instructor(s): C. Nealon
Area: Humanities.

The rise of “creative nonfiction”, in tandem with the acceleration of “reality hunger” in recent years, has shifted scholarly attention (and book sales) in the direction of that which is perceived to be real or true rather than merely imagined or fabricated. But how fictional is “faction”, and through what narrative means is the “real” produced? If nonfiction is a journey that involves the simultaneous opening and occulting of the real, then how does travel writing stitch together its quilts of place and emplacement? These are the kinds of questions we will be asking in this course, based on readings of celebrated contemporary nonfiction writers from across the globe: Haruki Murakami (Underground: The Tokyo Gas Attack and the Japanese Psyche), Katherine Boo (Behind the Beautiful Forevers: Life, Death, and Hope in a Mumbai Undercity), Bruce Chatwin (The Songlines), Jonny Steinberg (A Man of Good Hope), Paul Theroux (The Great Railway Bazaar), and V.S. Naipaul (The Enigma of Arrival). Only open to English Major/minors and Writing Seminars Majors
Instructor(s): L. de Kock
Area: Humanities.

AS.060.375. Literature of the Holocaust.
The course will focus on reactions to, and representations of, the Holocaust in European, Israeli, and American literature. In moving from the initial response of eyewitness testimony, through the emergence of fiction as one means to test the adequacy of historical accounts and memoirs, and on to more recent reflections on the problem of adequately “remembering” the event, we will consider how the Nazi genocide has entered into world consciousness. What does it mean to have an artistic or aesthetic response to such an event? Why has the Holocaust assumed so a significant role in contemporary life that there are entire genres of literature and film devoted to it? We will also look at some more contemporary writers whose work deals indirectly with the after-effects of the Holocaust. Readings may include: Levi, Survival in Auschwitz; Borowski, This Way for the Gas, Ladies and Gentlemen; Delbo, Auschwitz and After; Kosinski, The Painted Bird; Grossman, See Under: Love; Ozick, The Shawl; Epstein, King of the Jews; Roth, The Plot against America; Appelfeld, Badenheim 1939; Coetzee, Elizabeth Costello; Phillips, The Nature of Blood. Cross-listed with Jewish Studies.
Instructor(s): E. Sundquist
Area: Humanities.

AS.060.381. 2500 Years of Tragicomedy.
Spanning an arc from ancient Greek drama to the bleeding edge of contemporary literature, this course gathers together representative examples of a hybrid dramatic mode which has been derided by philosophers and dramatic theorists but beloved by audiences for millennia: tragicomedy. Variously understood as a comic play with dark elements or a dark play with a happy outcome, tragicomedy raises challenging questions about the nature of genre taxonomy, and the slippery relationship between authorial “tone,” artistic intention, and emotional temperament. As such, tragicomedies offer a particularly revealing insight into both the history of drama and philosophical questions about the nature of spectatorial pleasure. Grounding ourselves with a reading of Aristotle’s Poetics and a consideration of Plautus’ “Amphitrion”, we will read a broad swathe of plays divided evenly between a first half which focuses upon the ancient and early modern period and a second half focusing on the last century, possibly including: Euripides “Alcestis”, Christopher Marlowe “The Jew of Malta”, Anonymous, “Arden of Faversham”, William Shakespeare “Hamlet” and “All’s Well That Ends Well”, John Fletcher “The Faithful Shepherdess”, John Dryden “The Maiden Queen”, Samuel Beckett “Endgame”, Tom Stoppard “Rosenzweig and Guildenstern Are Dead”, Harold Pinter “The Caretaker”, Joe Orton, “The Erpingham Camp”, Young Jean Lee “The Shipment.” Pre-1800 course.
Instructor(s): A. Daniel
Area: Humanities.

Although the robust presence of Jane Austen in popular culture attests to the broad historical appeal of her work, her novels are nevertheless deeply concerned with political, philosophical, and aesthetic questions of her own historical moment. In this course, we’ll read Austen in the context of the late eighteenth-century novel in order to understand how she engages with her literary predecessors. We’ll focus in particular on Austen’s innovations in narrative form and technique, innovations that led one of her early critics to claim that she constituted a “new school of fiction.” Readings by Austen will include “Northanger Abbey”, “Sense and Sensibility”, and “Pride and Prejudice” (all of which Austen conceived and began drafting in the 1790s), along with her “juvenilia.” Other readings will include works by Ann Radcliffe, Mary Wollstonecraft, Frances Burney, Charlotte Smith, and Edmund Burke. Pre 1800 course
Instructor(s): A. Grener
Area: Humanities.
AS.060.386. Narrative, the Mind, and Human Experience.
This course will explore how narratives operate as vehicles for organizing and communicating human experience. We’ll begin by examining the basic mechanics of narratives -- What makes a story a story? How do stories organize experience into meaningful sequences? -- before considering how narratives reflect patterns of human evolution and the development of consciousness. Indeed, our primary interest will be these cognitive elements of narrative; we will consider how narratives relate to the structure of the human brain, as well as their capacity to immerse us in the minds of other individuals, both fictional and real. By the end of the semester, then, you’ll not only have a better understanding of how narratives create meaning (and a robust set of terms and concepts with which to approach them), but also a heightened appreciation for how narratives relate to the architecture of your mind and your daily life. Primary texts include novels by Jane Austen, Raymond Chandler, Ford Madox Ford, Kazuo Ishiguro, and Virginia Woolf.
Instructor(s): A. Greener
Area: Humanities.

AS.060.388. Old World/New World Women.
This course considers women’s experiences in British North America during the period 1620-1773 as a three-way encounter between Europeans, Africans, and First-nations peoples of America. We will focus on three great women writers, Anne Bradstreet, Aphra Behn, and Phyllis Wheatley, supplementing their contribution to literary tradition with many sources. Pre-1800 course
Instructor(s): S. Achinstein
Area: Humanities.

AS.060.391. Early American Literature.
This course is an introduction to literatures drawn from across the Americas, although primarily the British North American colonies that would eventually become the United States, from first contact in 1492 up through the American wars of independence. Our readings are roughly organized according to chronology and genre. We will think about the adapted and emergent generic forms through which “the New World” was ongoying invented, including genres like the Indian captivity narrative and the slave narrative that arguably make their debut in world literary history in the Americas during this time frame. We will conclude by attending to the rather late emergence of the novel in American literary history, reading four novels that appeared in the early US national period. The objective of the course is simply to contextualize and analyze a wide array of texts, each of which richly rewards the engaged reader, in order to trace the origins of American literatures. Course texts may include contact narratives (Columbus, Caminha, Smith, Hennepin); conquest narratives (Mather, Las Casas, Poma de Ayala); Indian captivity narratives (Cabeza de Vaca, Rowlandson, Staden); slave narratives (Gronniosaw, Jea, Cugoano); revolutionary polemics (Paine, Bolivar); and the earliest American novels: William Hill Brown, The Power of Sympathy; Hannah Webster Foster, The Coquette; Leonora Sansay, Secret History or, the Horrors of Santo Domingo; Charles Brockden Brown, Arthur Mervyn. Fulfills the pre-1800 requirement.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.394. Class Fictions.
This seminar investigates one of the central concerns of nineteenth-century fiction: social and economic class. Why did raising oneself from humble beginnings and falling into poverty, become such familiar stories? And why are they still so familiar today? We will look at how a number of writers approached the topic of class mobility, each with a unique blend of excitement and anxiety. Authors will likely include Jane Austen, Honoré de Balzac (in translation), Charles Dickens, and William Dean Howells. In order to understand our topic better, we will also look at a selection of theoretical work on the nature of class.
Instructor(s): J. Rosenthal
Area: Humanities.

A traveling salesman turns into a giant cockroach, an American adman switches bodies with his wife, a Brazilian philosopher may or may not be reincarnated as his beloved dog, and a British scientist creates half-animal humanoids on a secluded island. These are just a few examples of the fantastical, allegorical, comical, dreamlike, grotesque, and bizarre stories that were produced throughout the world during the modernist period. Modernism has often been associated with social and political change; colonial rule was waning, cosmopolitanism emerging, and new modes of production were affecting social organization. In literature, modernist authors broke from the realist style and turned instead to myths, folktales, and new forms of expression. In this class, we will consider a range of cultural and historical conditions that inform these stories of transformation. Do these stories reveal anxieties about dehumanization in an increasingly high-pressure workplace or do they reveal fantasies about idleness? Are they nostalgic for a local folkloric tradition in an age of cosmopolitanism or are they creating a kind of mythic universalism? How do these character transformations allow for reassessments of identity in terms of gender construction, sexuality, or in terms of human and animal relations? Authors include: Edgar Allan Poe, Nikolai Gogol, Franz Kafka, H. G. Wells, Virginia Woolf, Rebecca West, Machado de Assis, T. S. Eliot, Charlotte Gilman Perkins, Thorne Smith, and James Joyce. Throughout the semester, the primary texts will be supplemented with secondary reading and critical interpretations. Primary Texts: Machado de Assis, “Philosopher or Dog” T. S. Eliot, “The Wasteland” Charlotte Gilman Perkins, “Herland” Nikolai Gogol, “The Nose” Franz Kafka, “The Metamorphosis” Ovid, selections from “Metamorphoses” Edgar Allan Poe, selections Thorne Smith, “Turnabout” H. G. Wells, “Island of Dr. Moreau” Rebecca West, “The Return of the Soldier” Virginia Woolf, “Orlando”
Instructor(s): K. Wedekind
Area: Humanities.

AS.060.397. Thomas Pynchon.
This course is a study of the fiction of Thomas Pynchon. We will likely focus on two novels, Gravity’s Rainbow (1973) and Against The Day (2009). Along the way, we will discuss Pynchon’s particular interpretation of what character should look like, what the novel’s relationship to history might be, and whether and how his writing examples something called “postmodernism.”
Instructor(s): C. Nealon
Area: Humanities.
In order to log on to JHU’s GuestNet you must “agree that your activities on the Guest Network shall not...[among other things] be obscene.” But what is obscene? What does the law determine as obscene today, and how has that determination changed over the past century? These questions will lead us to considerations of publicity and privacy, morality and standards of decency. This course will examine artworks and performances in a variety of media that have been publicly accused of indecency or obscenity. We will read legal judgments of obscenity and discuss their implications for figures such as Wilde, Joyce, Miller, Ginsberg, Bruce, Carlin, Prince, 2 Live Crew, and others.

Instructor(s): J. Chilton
Area: Humanities.

AS.060.402. The Literature of Atlantic Revolution.
This course will consider how political revolutions in the Atlantic World, from the English Civil War of the 1640s to the European revolutions of 1848, were represented and theorized in contemporary literary texts and how those revolutions in turn affected literary history. We will consider questions like: What is revolution? Can revolution be represented? How do literature and history inform each other? Texts may include: John Milton’s tracts; Thomas Paine’s writings; US and Haitian founding documents; Edmund Burke’s “Reflections on the Revolution in France”; Leonora Sansay’s novel, “Secret History, or the Horrors of Santo Domingo”; selected Hawthorne and Melville short stories; Martin Delany’s “Blake, or the Huts of America”. Pre 1800 course
Instructor(s): J. Hickman
Area: Humanities.

AS.060.408. Rising and Falling in Marlowe and Jonson.
This course considers the problem of negativity within two of the great “success stories” of English Renaissance literature: Christopher Marlowe and Ben Jonson. In praising “the sweet fruition of an earthly crown” or humbly recommending that one “keep thy shop, and thy shop will keep thee”, these authors both seem to extol tangible visions of worldly advancement. Yet each author’s work can also be read as a savage moral critique of those very ambitions and energies. What can the fierce competitions staged within the urban, masculine world of their plays and poems teach us about the lures and limits of success? Tracking their movements in and out of prison, in and out of royal favor, and in and out of critical fashion, we will read either one play or a substantial group of poems per week. Students will be asked to craft two short papers and an extended final essay. Possible texts include: “Tamburlaine”, “The Jew of Malta”, “Edward III”, “The Tragical History of Doctor Faustus”, “Sejanus His Fall”, “Volpone”, “The Alchemist”, “Catiline His Conspiracy”, “The Masque of Blackness”, and “Bartholomew Fair”. Pre 1800 course
Instructor(s): A. Daniel
Area: Humanities.

AS.060.509. Senior Essay.
The English Department offers qualified majors the option of writing a senior essay. This is to be a one-semester project undertaken in the fall of the senior year, resulting in an essay of 30-35 pages. The senior essay counts as a three-credit course which can be applied toward the requirements for the major. Each project will be assigned both an advisor and a second reader. In addition, students writing essays will meet as a group with the Director of Undergraduate Study once or twice in the course of the project. The senior essay option is open to all students with a cumulative GPA of 3.8 or higher in English Department courses at the end of the fall term of their junior year. Project descriptions (generally of one to two pages) and a preliminary bibliography should be submitted to a prospective advisor selected by the student from the core faculty. All proposals must be received at least two weeks prior to the beginning of registration period during the spring term of the junior year. Students should meet with the prospective advisor to discuss the project in general terms before submitting a formal proposal. The advisor will determine whether the proposed project is feasible and worthwhile. Individual faculty need not direct more than one approved senior essay per academic year. Acceptance of a proposal will therefore depend on faculty availability as well as on the strength of the proposal itself. When completed, the senior essay will be judged and graded by the advisor in consultation with the second reader. The senior essay will not be part of the Department’s honors program, which will continue to be based solely on a cumulative GPA of 3.6 in English Department courses.

Instructor(s): E. Sundquist; F. Ferguson; J. Rosenthal.

AS.060.598. Internship-English.
Instructor(s): Staff.

AS.060.606. Renaissance Comedy.
Why is comedy so easy to enjoy and so hard to think about? Is “the comic” a genre, a mode, an affective state, a social practice, or none/all of the above? What does comedy have to do with the body? What does it have to do with social location? What historical accidents, psychological barriers and cultural taboos must be re-considered in order to address these questions? Starting from classic texts in genre theory and psychoanalysis, this course try to put Aristotle and Freud into dialogue with recent early modern critical scholarship on affect, drama and the body. Possible texts/authors include: Aristotle’s Poetics; Sigmund Freud, Jokes and Their relation to the Unconscious; Rosalie Colie The Resources of Kind; Gail Kern Paster, The Body Embarrassed: Drama and the Disciplines of Shame in Early Modern England; Will Stockton, Playing Dirty: Sexuality and Waste in Early Modern Comedy; Julia Kristeva, Powers of Horror: An Essay on Abjection; Alenka Zupanic, The Odd One In: On Comedy, and others. The historical spine of the course will be a weekly sequence of classical and early modern comic plays by Plautus, Terence, Aristophanes, Peele, Lyly, Shakespeare, Jonson, Beaumont, Wycherley, Etheredge, and Behn.
Instructor(s): A. Daniel
Area: Humanities.
AS.060.607. Lives and Afterlives of Anti-Humanism.
This seminar will offer a preliminary history of the 20th-century critique of “humanism” -- a critique that has continued to take new forms, long after we might imagine humanism to have been laid to rest. Beginning with Heidegger and Carl Schmitt, we will spend time with Sartrre, Althusser, the phenomenologists, and key post-structuralists, before moving on to the current variety of post- and anti-humanisms in philosophy (object-oriented ontology, speculative realism), and cultural and critical theory (eco-criticism and queer theory). Why has it been important to critique “humanism”? What is the ongoing appeal of making that critique?
Instructor(s): C. Nealon
Area: Humanities.

AS.060.610. What is Reading?.
What is reading? The question is not meant metaphorically. “We take for granted,” Mark Taylor writes, “our capacities to invent and interpret, and devote ourselves to exercising those capacities and publishing the results.” Yet, he continues, “It is the capacities themselves that need explaining. Reading is not giving a reading . . . Giving readings is important and could be done better if we understood reading . . .

The most amazing phenomenon our profession confronts, and the one for which we have the least explanation, is that a reader can make sense of a text, and that there are certain regularities across the individual senses made of a given text” (Taylor 19). This seminar aims to bring us close to understanding the “most amazing phenomenon our profession confronts,” drawing on recent work in cognitive psychology, history of the book, disability studies, and theories of media new and old. We will consider debates about modes of reading as different as paleography, Braille, and scanion, and reckon with the possibility of non-human reading. I hope to invite in faculty from Cognitive Science and Informatics, Disabilities Studies, Classics and Library Science to explain what they mean when they talk about reading. But the final goal of the seminar is to help us identify the importance of literary studies in that conversation. To what extent does the literary object teach us about reading?
Instructor(s): M. Favret
Area: Humanities.

AS.060.611. Early/Modern/Violence.
This course looks at the intertwining of the categories of secular and religious in the English literature of violence in the early modern period. Literary representations of, and meditations upon, violence will be considered in Spenser, Nashe, Marlowe, Milton and Behn. Early modern thinkers will include humanists, theologians and philosophers (Augustine, Ficino, Calvin, Hobbes, Spinoza, Locke). We will consider such topics as: How religion is (or is not) a ‘transhistorical’ category; how the Enlightenment’s critique of religion was founded on the experience of the ‘wars of religion’; the creation of religious Others; the connection between religion and the rise of the modern state; the war-peace distinction; the friend-enemy distinction; how the sacredness of human life is understood; the links between violence and humanitarianism (indeed, what is the human?); torture; ‘violence’ as a transhistorical category; the pairing of violence to justice. There will be engagement with contemporary thought of Arendt, Derrida, Benjamin, Zizek, Anidjar, Asad, Tilly, Virilio, Schmidtt, Girard, Scarry, Taylor and others.
Instructor(s): S. Achinstein
Area: Humanities.

AS.060.615. The Literary and the Secular.
Embedded many theses of secularization is an implicit process of tropologization—the sign that secularization is underway is precisely when sacred forms and contents begin to circulate as figures unmoored from their original devotional contexts and thereby become subject to everything from blasphemous parody to heterodox elaboration to blasé immanentization, in a word, to the whims of the literary imagination. This seminar will examine theories of secularization that reflect and reflect upon this tacit linkage of the secular and the literary and also trace crucial developments in the literary and intellectual history of Atlantic Romanticism (with a special focus on the distinctive genre of the American romance) that might offer alternative views of undeniable transformations perhaps ineffectively referred to the rubric of “secularization.” Secondary texts may include T.E. Hulme, “Romanticism and Classicism”; Carl Schmitt, Political Theology; Hans Blumenberg, The Legitimacy of the Modern Age; M.H. Abrams, Natural Supernaturalism; Charles Taylor, A Secular Age; Roberto Calasso, Literature and the Gods; Michael Kaufmann, “The Religious, the Secular, and Literary Studies”; Colin Jager, Unquiet Things: Secularism in the Romantic Age. Primary texts may include selected poetry of William Blake, Percy Shelley, Friedrich Hölderlin, and others; canonical theoretical definitions of the “romantic” from the Schlegels, Coleridge, etc.; Joseph Smith, The Book of Mormon; Edgar Allan Poe, Arthur Gordon Pym; Nathaniel Hawthorne, prefaxes, selected tales, The House of Seven Gables, The Marble Faun; Herman Melville, Mardi; Harriet Beecher Stowe, Dred; Martin Delany, Blake or, the Huts of America.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.616. Milton.
A seminar covering the career of John Milton, including all his major poetry and much of his prose. There will be attention to the history of printing, publication and concepts of reading and writing, as well as to current issues and topics within early modern studies that bear on Milton (e.g. materialism, secularization, ‘surface’ reading, political theology, quantitative vs hermeneutic methods, actor-network theory). As such, the course will also be an introduction to various methods in early modern studies.
Instructor(s): M. Thompson; S. Achinstein
Area: Humanities.

AS.060.617. Poetry and Social Organization.
This course will consider how poets writing in English have described, imagined, and critiqued orderings of persons and institutions since the eighteenth century: texts examined will include poems, critical essays, and manifestos as well as writings in several non-literary disciplines. One matter of continuing interest will be the relationship between poems’ internal organization and the organization of societies; another will be the implications of ‘thinking of societies as ordered or subject to ordering. Poets to be studied may include Pope, Wordsworth, Shelley, Eliot, Zukofsky, Oppen, Niedecker, Walcott, and Ronald Johnson.
Instructor(s): D. Mao
Area: Humanities.
AS.060.618. Modernism and Authenticity.
Could modernism as we know it have emerged absent anxiety about what it means really to live, really to feel, really to think? We will explore this question through a range of texts—long and short, fictional and non-fictional, poetic and in prose—by authors such as Friedrich Nietzsche, Oscar Wilde, Gabriele D’Annunzio, W. B. Yeats, T. E. Hulme, E. M. Forster, Mina Loy, T. S. Eliot, F. T. Marinetti, Gertrude Stein, Virginia Woolf, William Carlos Williams, Nella Larsen, Wallace Thurman, Walter Benjamin, Theodor Adorno, and Lionel Trilling. Topics to be considered will include decadent imposture, the attenuation of experience, enchanted and disenchanted violence, and technology-driven alienation.
Instructor(s): D. Mao
Area: Humanities.

AS.060.619. The Time is Out of Joint: Shakespearean Temporalities.
This course is designed to serve a double purpose: first, we shall read and analyze a substantial body of Shakespearean drama and poetry for its resources as a means for thinking about time, temporality, and historical change. Concurrently, we shall read and respond to debates in recent early modern literary scholarship about secularity, modernity and the problem of “presentism” as a critical orientation towards the past. If a previous critical generation enlisted Shakespeare into service as an exemplar of an incipient modernity based upon a tacit assumption of a secular bias, has that assumption been complicated by recent evidence and fresh readings? How might we rethink the relationship between religious discourse and academic periodization? In the process of answering these questions, it is hoped that a plurality of other Shakespeares—whether medieval, untimely, recusant Catholic, crypto-atheist, queer, anarchonic, or “presentist”—might emerge. In addition to Shakespeare, possible critical and secondary authors include Augustine, Henri Bergson, Johannes Fabian, Jan Kott, Madhavi Menon, Elizabeth Freeman, Kathleen Davis, Agnes Heller, Paul Kottman, Eric Mallin, Hugh Grady and Stanley Cavell.
Instructor(s): A. Daniel
Area: Humanities.

This course offers a critical and historical introduction to the Frankfurt School.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.622. Perspective.
Perspective, or point of view, is a seemingly inescapable term in critical work on fiction. In this course we will study this concept as it has been developed in literary studies and, contrastively, in art history and film studies. We’ll enter two overlapping areas of study, one theoretical, one critical. The first concerns the concept of perspective as developed in literary theory, art theory, and film theory; the second concerns a set of fictions, paintings, and films. Our aims will be to develop a more adequate understanding of the concept and to assess the implications of our current usage of it.
Instructor(s): A. Miller
Area: Humanities.

AS.060.623. Cross-Period Literary Study.
This seminar will be an experiment in training graduate students to develop an awareness of scholarship outside their own historical period, so as to re-think contemporary questions of periodization and modernity, as well as genre and form. The course will be organized around literary-critical readings from recent scholarship from the classical period to the 21st century, and around visits from scholars, especially junior scholars, working in those periods.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.625. Modernism and Sacrifice.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.628. Literature of the Holocaust.
The seminar will focus on reactions to, and representations of, the Holocaust in literature. In moving from eyewitness testimony and survivor memoir, through the emergence of fiction as one means to test the adequacy of such accounts or extend them into a new register, and on to more recent reflections on the problem of adequately “remembering” the event in which memory is constantly at issue, we will consider how the Nazi genocide has entered into world consciousness. Although the focus of the course will be on literature, primary readings will be studied with close attention to historical contexts as they bear on questions of authorship, representation, and reception, and to the theoretical vocabularies that have emerged from successive stages of post-Holocaust inquiry. American works will be emphasized but not the sole concern. Primary readings (all in English) will include some of the following: Elie Wiesel, “Night”; Primo Levi, “Survival in Auschwitz”; Charlotte Delbo, “Auschwitz and After”; Tadeusz Borowski, “This Way for the Gas, Ladies and Gentlemen”; John Hersey, “The Wall”; Leon Uris, “Exodus”; Jerzy Kosinski, “The Painted Bird”; Jorge Semprun, “The Long Voyage”; Imre Kertesz, “Fatelessness”; David Grossman, “See: Under Love”; Leslie Epstein, “King of the Jews”; Cynthia Ozick, “The Shawl”; Philip Roth, “The Plot against America”; and William Gass, “The Tunnel”, with various historical and theoretical works in accompaniment. Requirements: a circulated discussion paper; reports on critical/theoretical works; participation in discussion; a research paper.
Instructor(s): E. Sundquist
Area: Humanities.
AS.060.629. Poetry and Poetics after the 'Linguistic Turn'.
This seminar will canvas a few of the many developments in English-language poetry, and in poetic theory, that have emerged since the heyday of post-structuralism, on the one hand, and "language"-driven poetry, on the other. The readings will include recent critical work by Joel Nickels, Ruth Jennison, Oren Izenberg, Maria Damon, and others; the poetry will be a combination of recent volumes by contemporary writers, and individual poems.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.632. Sovereignty, Community, and 17th Century Literature.
Can we think sovereignty and community together? How might the vertical axis of sovereignty and the horizontal axis of community complicate or multiply each other? What conversations are possible when we attempt to reconcile these two contrary formations, and how does the early modern theory and practice of absolutism infect contemporary theory? In this course we will read texts from across the seventeenth century (from Shakespeare and Ford to Milton, Dryden and Behn) in which the person of the monarch, sovereign, leader or judge and the larger structural institution of sovereignty slip out of alignment with each other. We will then read early modern political texts about sovereign power and the constitution of state power and monarchical authority from Jean Bodin, James I, and Thomas Hobbes. This early modern sequence will be placed in dialogue with contemporary theorists of sovereignty and/or community: potential authors include Schmitt, Nancy, Agamben, Esposito, Derrida, Blanchot, and De Landa.
Instructor(s): A. Daniel
Area: Humanities.

This course is about the poetics of the lens and the mirror. From Wordsworth to Hardy, from Anna Barbauld to ‘Michael Field’ (the pseudonym of two women), poetry is haunted by the virtual image. Lens-made technologies, developed in the late Enlightenment, from the ‘high’ science of the telescope and microscope to the popular culture of the magic lantern and optical toys, created for a mass public for the ‘high’ science of the telescope and microscope to the popular culture of the magic lantern and optical toys, created for a mass public for the first time a newly mobile screened image that could be thrown from one surface to another. This was a non-mimetic image made with the aid of the glass lens by light out of light. From this arose the screen practices of the phantasmagoria, diorama, panorama, kaleidoscope, and a host of optical toys exploiting visual ambiguities. The course explores the immanent presence of these in Romantic and Victorian poetry, studying poems and concurrently the documents of visual and optical theory generated by the new technologies. It includes work by male and female poets. We will consider how poets explored the philosophical implications of the poetics of the lens and a new epistemology. Technologies of the lens and mirror had repercussions across aesthetics and politics.
Instructor(s): I. Armstrong
Area: Humanities.

AS.060.642. Readings in Aesthetics.
This course offers a general survey of twentieth-century aesthetics, with particular emphasis on (but not limited to) the Interbellum (1919-1939) and its immediate aftermath. Some of the authors under consideration are: Heidegger; Levinas; Sartre; Blanchot; Bataille; Merleau-Ponty; Benjamin; Adorno; and Gadamer.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.644. The Trouble with "Modernity."
This course will offer some genealogies and critiques of the various modernity-theses that provide us ready-to-hand (and perhaps too easy) periodizations in the humanities. Readings will include Hans Blumenberg, Martin Heidegger, Marshall Berman, Perry Anderson, Hans-Robert Jauss, Larry Norman, Charles Taylor, and Ellen Meiksins Wood.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.646. Transnational American Studies.
This seminar will consider the "transnational turn" in American studies in particular and the humanities more generally. What, if anything, is at stake in this turn? What sort of a corrective does it mean to offer? What political fantasies drive it? Half of the course will be dedicated to reconstructing the genealogy of the turn and will involve reading primarily theoretical and critical texts. Texts may include: Wai-Chee Dimock, "Through Other Continents"; Laura Doyle, "Towards a Philosophy of Transnationalism," Eric Lott, "Anti-American Studies"; Donald Pease, The New American Exceptionalism". The other half will be dedicated to reading American literary texts that have invited or might invite transnationalist readings. Texts may include: Joel Barlow, "The Vision of Columbus"; Herman Melville, "Moby-Dick"; Martin Delany, "Blake, or the Huts of America"; Leslie Marmon Silko, "Almanac of the Dead"; Karen Tei Yamashita, "Tropic of Orange". We will ask to what extent these texts are already doing something like "transnational American studies" and how the longstanding figuration of American nationality (not just the US but other American nations) as a species of transnationality ("a nation of nations") might cause us to reconsider the cultural work of recent transnational American studies.
Instructor(s): J. Hickman
Area: Humanities.

This seminar will explore George Eliot’s major novels alongside selections from the considerable body of criticism that has grown up around her oeuvre. Topics of discussion will be determined in part by seminar participants, but we will certainly address the following: the nature of her idealism (and its relation to her realism), her long argument with religion, the tension between her larger theories of the moral life and her treatment of embedded, struggling individuals, and the larger relations among her sociological, philosophical, and existential perspectives. Eliot was a polymath, and we will need to situate her thinking and her art in relation to a wide range of continental and English sources. We will also pay special attention to the formal features of her novelistic project: the function of her narrators, the character system considered within and across the novels, the role of argument and philosophy within the works, and the particular forms of plotting and mode she employs. Novels will include "Adam Bede", "The Mill on the Floss", "Romola", "Felix Holt", "Middlemarch", and "Daniel Deronda".
Instructor(s): A. Anderson

This course serves as an advanced introduction to the texts, issues and criticism surrounding African-American literature. In it, we will read works from the field’s major genres: the slave narrative; the novel; poetry; autobiography; the essay; and literary criticism. Authors under consideration will include: Wheatley; Du Bois; Douglass; Jacobs; Hurston; Hughes; Wright; Baldwin; Morrison.
Instructor(s): M. Thompson
Area: Humanities.
AS.060.651. Form and Matter.
This course takes a look at revived interest in formalism and materialism in critical theory as it bears on the literature of the long eighteenth century: topics include formalism and close reading from the new criticism to the present, object oriented ontologies and eighteenth-century materialisms, cognitive criticism and phenomenology.
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.652. Narrative and the Unconscious before Freud.
TBD
Instructor(s): J. Rosenthal.

AS.060.656. Literature and Philosophy, Locke to Wordsworth.
This is a class on epistemology, aesthetics, and literary form in eighteenth-century British writing. We will focus particularly on perception and look at how poetry, fiction, and the visual arts recruit and account for phenomenal experience or consider material and natural objects. We’ll ask (for example) what happens when the empirical psychology of consciousness or the categories of the sublime, beautiful, and picturesque take narrative or poetic form. Authors include Locke, Addison, Thomson, Hume, Burke, Sterne, Smith, Gilpin, Cowper, and Wordsworth, read alongside recent criticism and theory, including new work in phenomenology and the philosophy of mind.
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.662. Edwards, Emerson, Thoreau.
We shall examine what “divinity,” “nature,” “Being in general” and “personal identity” differently mean in the writings of Jonathan Edwards, Ralph Waldo Emerson and Henry Thoreau (the emphasis will be on the two nineteenth-century American writers); how “the intuitively beheld and immediately felt” (what Edwards called “experiential religion”) are contrastively understood in the writings of the three; and to what end these literary and philosophical writings marginalize persons-- and even evacuate them--from their scrutiny. We shall also examine features of the prose (Edwards’s “rhetoric of sensation”; Emerson’s contradictions; Thoreau’s infatuation with particulars), and the genres in which the three authors write: the sermon, the treatise, the journal entry, the lecture, and the essay. Finally, we shall consider Adorno’s proposition in “The Essay as Form” that discontinuity is essential to the essay, that “the essay rebels against the doctrine, deeply rooted since Plato, that what is transient and ephemeral is unworthy of philosophy.”
Instructor(s): S. Cameron
Area: Humanities.

AS.060.663. Sacred Spaces and the Novel, 1853-1926.
This course offers both a survey of late nineteenth- and early twentieth-century prose fiction of Britain and its empire and an examination of recent scholarship on literature’s relation to religion and the geographies of modernity. We’ll begin with three Victorian novels inhabiting the convergence between historical imagination and religious inquiry (Charles Kingsley, George Eliot, Walter Pater), move on to three turn-of-the-century narratives in which the momentum of the quest confronts sacred implacability (Olive Schreiner, Joseph Conrad, Rudyard Kipling), and conclude with three novels of the 1920s propelled by pagan ecstasy (E. M. Forster, D. H. Lawrence, Sylvia Townsend Warner). Primary readings will be accompanied by critical and theoretical texts from György Lukács, René Girard, Fredric Jameson, David Harvey, Leela Gandhi, and others.
Instructor(s): D. Mao
Area: Humanities.

AS.060.665. Whitman and Dickinson.
An examination of the formal, conceptual, and philosophical innovations in the work of the two major nineteenth-century American poets. We’ll consider the premises behind Whitman’s poetry of wholes (nothing left out) and Dickinson’s poetry of fragments. How does Whitman reconcile the need for formal universals with the emotional attachment to substantive particulars? How does Dickinson find a language for the off-the-map quality of private experience?
Instructor(s): S. Cameron.

A reading of the major novels.
Instructor(s): S. Cameron
Area: Humanities.

This course takes its cue from a basic etymological kinship between “discovery” and apocalypse (ἀποκάλυψις, literally “un-covering”). How are world-building and world-ending related? What pathways join the literary and philosophical construction of new worlds with theological and theoretical scenarios of revelation, extinction, and doom? In search of answers, this course reads Renaissance narratives of cosmogony, proto-science fiction and utopian discovery alongside contemporary theories of “worlding”, environmental futurity, climate change, and planetary precarity. After commencing with Lucian and Plutarch, we will read a comprehensive sequence of early modern fictions in which utopias, new worlds and/or new planets are visited or “discovered”: Thomas More, Utopia; Robert Greene, Planetomachia; Tommaso Campanella, The City of the Sun; Johannes Kepler, Somnium (The Dream); Francis Bacon, New Atlantis; Margaret Cavendish, The Description of a New World, Called the Blazing World; Aphra Behn’s translation of Fontenelle’s Conversations on the Plurality of Worlds. These early modern texts will be read alongside works in primary philosophy and contemporary eco-theory that constellate key concepts: earth, planet, and world. Texts include Martin Heidegger, Being and Time; Jacques Derrida, “Of An Apocalyptic Tone Recently Adopted In Philosophy”; Timothy Morton, Hyperobjects: Philosophy and Ecology After the End of the World; Jeffrey Cohen, Prismatic Ecology: Ecotheory Beyond Green; Ray Brassier, “The Truth of Extinction” (from Nihil Unbound); Gayatri Chakravorty Spivak, “Planetarity” (from Death of A Discipline).
Instructor(s): A. Daniel
Area: Humanities.

AS.060.673. Migrant Modernism.
Responding to literary scholarship’s continuing concern with the exile, the refugee, the cosmopolitan, and the networks and flows of modernity, this seminar examines the migrant origins and later migrations of English-language modernism. Readings in Ezra Pound, T. S. Eliot, Gertrude Stein, Mike Gold, Claude McKay, Jean Rhys, George Lamming and other writers will be complemented by relevant critical and theoretical texts.
Instructor(s): D. Mao
Area: Humanities.
AS.060.676. Facts and Fiction.
We will examine the vexed place of facts in literature and literary criticism. What are the historical and ideological preconditions for focusing on the study of people that never existed, and events that never occurred? And how did literary criticism privilege an analysis of meaning of works or literary moments, as opposed to verifiable, and reproducible facts? What does all of this tell us about the recent rise of quantitative literary analysis, and the strong resistance it has encountered? This discussion will include an examination of how different disciplines define notions like “fact,” “argument,” and “evidence”—in order to better understand our own discipline’s principles. In addition to a selection of eighteenth- and nineteenth-century novels yet to be determined, readings will include Émile Zola, Martin Heidegger, Wolfgang Iser, Hans-Robert Jauss, Hans-Georg Gadamer, Bertolt Brecht, Georg Lukács, Fredric Jameson, Theodor Adorno, Karl Popper, Mary Poovey and Franco Moretti.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.678. Melville, Poe, Hawthorne.
A reading of the major fiction of Poe, Melville, and Hawthorne with an emphasis on Melville.
Instructor(s): S. Cameron.

This seminar will offer an in-depth examination of the theory and practice of the nineteenth-century realist novel in three traditions: American, British, and French. Our aim will be to understand the central theories and controversies surrounding realism, as well as to interrogate the centrality of realism to novel theory and narrative theory. Authors will likely include Jane Austen, Charles Dickens, George Eliot, Honoré de Balzac, Gustave Flaubert, Frank Norris, and William Dean Howells. Theorists and critics will likely include Erich Auerbach, M. M. Bakhtin, Roland Barthes, Leo Bersani, Bertolt Brecht, Richard Chase, René Girard, Howells, Roman Jakobson, Henry James, Fredric Jameson, Harry Levin, G. H. Lewes, Georg Lukács, Boris Tomashevsky, Ian Watt, and Émile Zola
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.681. Literary Theory.
This course will provide a survey of many of the major theoretical positions that have been directly or indirectly influential for literary studies. We will read selections from the following: Russian Formalism (Propp, Shklovsky, Bakhtin), structuralism (Levi-Strauss, Barthes), American New Criticism (Wimsatt & Beardsley, Brooks) deconstruction (Derrida, de Man), speech act theory (Austin, Butler), Marxism (Jameson), queer theory (Sedgwick, Miller), and distant reading (Luhmann, Moretti).
Instructor(s): F. Ferguson.

AS.060.682. The 21st Century University.
This seminar will focus on the changing contours of the American university in an era of economic instability and crisis. With a look back at the formative relationship between monopoly capitalism and the university in the 19th century, we will investigate the effect on the university of the unraveling of American economic power, with attention to the rise of administrative power and the loss of faculty governance, to the pressures of financialization, and to the contradictory situation into which the university is placed by student activism that calls its founding premises into question. We will also ask what intellectual life looks like under conditions of adjunctification and de-politicization. Reading will include selections from Gerald Graff, Professing English, Christopher Newfield’s Ivy and Industry and Unmaking The Public University, Benjamin Ginberg’s The Fall of The Faculty, Stefano Harney’s and Fred Moten’s Undercommons, and [the x’s] The University Against Itself, as well as material produced by student and faculty activists in the university struggles of the last 5 to 10 years.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.692. Race and Enlightenment.
This course examines the philosophical interplay between Enlightenment aesthetics and the construction of the concept of race. We will read texts in aesthetics and on human difference by Rousseau, Voltaire, Condorcet, Kant, Herder, Jefferson, Burke, Hume and others, in an attempt to see the points at which reflections on art and notions of human biological hierarchy intersect. Particular attention will be paid to the idea of the sublime as it pertains to early anthropological thought.

Area: Social and Behavioral Sciences.

German Romance Languages Literatures

AS.211.475. Inside the Writer's Laboratory.
How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the "laboratory" of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.
Instructor(s): S. Miglietti
Area: Humanities.

This course will not aim at drawing the exhaustive literary landscape of French Middle Ages, neither will it be a Comparative Literature or History class. It may be considered a gateway to French Medieval literature, given that the Modern Fantasy has obviously improved the last decades, the latter being built as a rewriting of Medieval themes and Western European folklore. Looking at texts originally written in Old French, including prose and poetry, but also at the French Medieval iconography, we will try to understand the old roots of the Modern and so popular (but sacrificing) Fantasy Literature. Basic French will be required.
Instructor(s): M. Alinhio
Area: Humanities.

Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. The course aims to give students a thorough grounding in Machaut's literary and musical works, while also introducing them to digital tools to view and analyze original illustrated musical manuscripts of his work. Critical analysis of Machaut's work will be assessed not only through more traditional essay writing, but also through the creation of a multimedia digital edition of a section of his oeuvre using Omeka exhibition software. The course is designed so that no prior knowledge of musical notation or medieval French is necessary.
Instructor(s): T. Rose-Steel
Area: Humanities.

AS.212.789. Literature & Identity in the Age of Globalization.
In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics surrounding the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.

This course will examine the location of Berlin at the heart of European and global culture over the course of the 20th century. In addition to its centrality to German national identity and political culture, Berlin between the World Wars was a weigh station and meeting ground for a variety of languages, cultures, and artistic trends—whether expatriates, refugees, nomads, touring companies, or vagabonds. In what ways did these travelers to Berlin change German popular or intellectual culture? In what ways did Berlin function as a center for avant-garde culture, and in what sense did it remain a peripheral space, in the shadow of grander culture centers such as Moscow, Paris, New York, or Hollywood? What lessons might be taken from the supposed glamour of Berlin between the World Wars and the continued attraction of that period for post-Holocaust adaptation and contemplation? These questions, among others, will be considered with reference to a variety of narratives, dramas, and films taken from German, English, Hebrew, Russian, and Yiddish sources. Authors to be considered will include Walter Benjamin, Joseph Roth, Irmingard Keun, Erich Kästner, Bertolt Brecht, Christopher Isherwood, Sh. Y. Agnon, Vladimir Nabokov, Viktor Shklovsky, and Dovid Bergelson. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.318. The Making of Modern Gender.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.
Area: Humanities.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women’s writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Arnim, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.332. Zionism in Modern Literature: Jewish or Israeli?
This course will be an examination of the themes of nationalism, Zionism, and the problems of the nation-state in modern Jewish literature of the past hundred years. Among the topics we will consider are the unique challenges of a diasporic culture relocating its national aspirations to an unfamiliar and often hostile environment, the controversies surrounding political nationalism within modern Jewish culture, the competition between languages in the formation of Israeli society, the character of Israeli national culture, the relationship of Israel's Jewish majority with its minority population, and the relationship of Israeli culture to the Jewish culture of the diaspora. To what extent does Israeli literature constitute a continuation of themes and techniques found in previous Jewish writing, and to what extent does it represent a new beginning? To what extent can Israeli literature be compared with other varieties of Jewish writing and to what extent is this writing a unique cultural phenomenon? Although the majority of works discussed will be translated from Hebrew—including such leading figures of Israeli literature as S. Y. Agnon, S. Yizhar, Amos Oz, and Orly Castel-Bloom—we will also be considering works translated from Yiddish (Mendele Moykher-Sforim), German (Theodor Herzl), and Arabic (Emile Habiby), as well as contemporary American writers such as Philip Roth and Michael Chabon. All readings and discussions conducted in English.
Cross-listed with Jewish Studies, English, and the Humanities Center
Instructor(s): M. Caplan
Area: Humanities.

AS.213.660. Discourses of Dislocation.
Dislocation—travel, migration, exile, diaspora, immigration—is a preeminent symptom of the modern condition; as Jacques Derrida has suggested, it is one way of characterizing how language itself comes into being. To what extent does the relationship of various modes of mobility serve as a prerequisite for understanding modernity and literary modernism, and to what extent can one understand commonalities among these itinerant discourses? This seminar will consider several varieties of dislocated discourse (the picaresque, the pseudo-autobiography, the travelogue, as well as narratives of immigration, displacement, war and demobilization, and exile) in search of a means to discuss or consider all of them critically. Writers to be considered will include Sigmund Freud, Robert Walser, Yosef Haim Brenner, Walter Benjamin, Theodor Adorno, Jacques Derrida, Irggard Keun, Israel Rabon, Joseph Roth, Flannery O’Connor, Yoel Hoffmann, Anton Shammas, and Salman Rushdie. All readings and discussions available in English. Undergraduates may register with instructor approval.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.666. “To be continued”- Seriality in Literature and Other Media.
Taught in German. By ending with the words “(To be continued)” (“(Ist fortzusetzen)”), Goethe’s Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletroman) along with specific serial narrative techniques. The cliffhanger e.g. - although invented earlier - becomes a prominent technique to create suspense. The course analyzes serialization with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine “Die Gartenlaube”, Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, “The Perils of Pauline” (serial, 1914), “Copycat” (Jon Amiel, 1995), “Twin Peaks” and current US-American TV series.
Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

AS.213.725. Proto-, Modern, and Post-: Locating the –ism in Modernism.
All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “post-modernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is post-modernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-Bloom, Henry Dumas, Moshe Kulbak, Machado de Assis, Mendele Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.
Instructor(s): M. Caplan.

Taught in German. The course analyzes the performative on the basis of the very field that John L. Austin’s speech act theory excludes: literature. What challenges Austin’s speech act theory indeed opens up the question of the performative towards iterability and theatricality and thus calls for the performative as a methodological category of literary criticism. According to Shoshana Felman’s readings of Austin, the performative act can be accentuated as an act of the “speaking body” in which the body is conceived of not as a means of linguistic expression but rather as a spillover of the act of utterance into the statement. How then is the corporeality or materiality of writing asserted in acts of narrating and reading? The course will examine theories of the performative from the perspective of literary criticism as well as analyze literary speech acts (promises, pacts, etc.) in detail.
Readings will include: Austin, Derrida, Felman, Freud, Nietzsche, de Man, Hamacher, Goethe, Büchner, Kafka, Henry James, Thomas Mann etc.
Instructor(s): E. Strowick
Area: Humanities.
In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.

AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music Through the Ages. 3 Credits.
The seminar explores challenges questions with which men have been dealing for centuries: how do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? By addressing literary and philosophical writings, as well as musical examples from different periods and contexts, students will be led through a critical reconsideration of the topic. A variety of materials will be discussed, including genres as different as medieval songs, early modern madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities

AS.214.479. Dante Visits the Afterlife: The Divine Comedy.
Dante’s Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante’s understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities

AS.214.333. Shakespeare on the Opera Stage.
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities.

This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Area: Humanities.

Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.

Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.640. Film Theory.

This class deals with film theory in its history and its current trends. We will examine structuralist, feminist, Marxist, psycho-analytic, Deleuzian, and other theoretical approaches to understanding and interpreting the cinematic medium. We will look at several different film samples from European film to Latin American Film, auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist to class during the semester.

Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.653. Pleasure and Virtue in Renaissance Literature.

This course will examine major literary and philosophical works from Renaissance Italy that thematize pleasure, questioning (explicitly or implicitly) its place in the hierarchy of human values. We will consider the role that the Renaissance rediscovery of Epicurean and Neoplatonic thought played in shaping how pleasure in its various forms was conceptualized and represented. Authors we will read include Lorenzo Valla, Marsilio Ficino, and Niccolò Machiavelli. Reading knowledge of Italian is required.

Instructor(s): J. Coleman
Area: Humanities.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.

The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.

Instructor(s): E. Refini
Area: Humanities.

Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin

Instructor(s): W. Stephens
Area: Humanities.

In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.

Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.

The first objective of the course is to train students in close reading and analysis of literary texts. The second objective is to read prose and poetry by some of the canonical texts in the Latin American tradition written by women. Taught in English.

Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism.

His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish

Instructor(s): E. Gonzalez
Area: Humanities.
AS.215.650. Mexico and the Invention of America.
Departing from O’Gorman, the course will entail a reconsideration of the
discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero,
Humboldt, Dussel and Alzandua will conform part of the readings.
Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

This course will focus on the art of writing poetry, the art of reading
poetry and the poetics of each of the poets whose work is the textual
matter of the course.
Instructor(s): S. Castro-Klaren
Area: Humanities.

Readings from colonial times to the present from three cultural legacies,
Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

The course engages close readings of Borges critical essays and some
of his fiction in order to establish the points of interpellation that Post-
modern theory takes from or shares with Borges’s meditation on the
problem of writing.
Instructor(s): S. Castro-Klaren.

AS.215.777. The Invention of Fiction.
Rather than understand fiction as a constant in human history, this
course will consider it a historically specific form of cultural expression.
We will examine and compare theories of the fictional from an array of
historical moments in order to better understand what fiction is, how it
differs from premodern notions of history and poetry, and how it both
informs and depends on modern notions of knowledge and subjective
agency.
Instructor(s): W. Egginton
Area: Humanities.

In this seminar we will examine a selection of literary reflections on
and engagements with globalization and its mounting failures and
burdens, as it has emerged in Europe and the Americas from the mid-
twentith century to the present. From the economic, constitutional,
and cultural politics around the unification of Europe, to the ideological
and imperial misfortunes of the U.S. after the collapse of the “End-of-
History” thesis, to the resurgence of state populism in Latin America in
the wake of neoliberal exhaustion, literary fiction has been deployed to
post, explore, and contest national and post-national myths of identity.
The seminar will interrogate how this engagement functions both as
aesthetic and theoretical discourse. Readings may include novels by
Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier
Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical
writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and
others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.

Humanities Center
AS.300.111. Shakespeare and his ‘Goddess’.
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’
is both an homage and a sendup of a 300-year-old poetic convention
reaching back to the days of Petrarch and the early humanist poets.
In this course we will trace that tradition from the perspective of
Shakespeare and his contemporaries, finishing the semester with
several plays, including ‘The Taming of the Shrew,’ that further illustrate
and problematize Shakespeare’s ‘goddess’ reference. Readings will
include poetic dialogues between male and female poets, such as those
by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica
Gambara, and Gaspara Stampa; their French counterparts, Maurice
Scève and Les Dames des Roches; and the later English reflections on
the sonnet tradition by Sir Philip Sidney, Shakespeare, and Sidney’s
niece, Lady Mary Wroth. All works will be read in translation. Freshmen
only.
Instructor(s): E. Patton
Area: Humanities.

AS.300.113. Freshmen Seminar: Drama and Gender in Shakespeare’s England.
In this seminar we will read male and female authored plays and discuss
how they reflect contemporary social expectations in Tudor and Stuart
England. Authors include William Shakespeare; Mary Sidney, Countess
of Pembroke; Christopher Marlowe; Elizabeth Cary; Ben Jonson; and
Mary Sidney, Lady Wroth.
Instructor(s): E. Patton
Area: Humanities.

AS.300.211. Great Poems of the Americas.
This course investigates the long poem or post-epic in 20th- and 21st-
century North and Latin America. The epic has been rearticulated in
sequences and series, verse novels, lyric cycles, and collage poems:
from T.S. Eliot’s The Waste Land, the encyclopedic Cantos of Ezra
Pound, and the sweeping Canto General of Pablo Neruda to works
by Derek Walcott and Gwendolyn Brooks and fragmented series by
Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé
Césaire’s Notebook of a Return to the Native Land, Vicente Huidobro’s
playful Altazor, and very recent epic poems from Canadian women
poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As
we test the term post-epic against these texts, we will consider whether
it may be applied equally to the heroic tale and the open field poem.
How do poets interpret the idea of “the Americas” as lands and nations
in these works, and in what tangled ways do their poetics develop
during dialogue across linguistic and geographical distances? To
situate the long poem in history, we’ll examine developments in poetic
form alongside modernization and globalization, and technological and
socio-political changes. We will draw on theories of poetry and poetics
as well as critical theory, taking a comparative, Hemispheric Studies
approach to literature.
Instructor(s): R. Galvin
Area: Humanities.
This seminar celebrates the university’s recent acquisition of State Papers Online (1509-1714), which contains searchable digital images of thousands of contemporary manuscripts. While we read plays, poetry, and essays by such figures as Queen Elizabeth, William Shakespeare, members of the Sydney family, Elizabeth Cary, John Donne, Aemelia Lanyer, Robert Southwell, Andrew Marvell, William Marlowe, Jane Cavendish, Elizabeth Bradkley, and Katherine Philips, we will also be carrying out on-line searches of correspondences, wills, court documents, spy reports (including play-by-play accounts of houses dismantled in searches for hidden priests), and letters of condolence from Queen Elizabeth alongside decoded messages revealing plots to unseat her. In addition to searching virtual archives students will be introduced to early modern paleography, in part through visits to Johns Hopkins University’s brick-and-mortar libraries to consult actual manuscripts, incunabula, and illegal imprints from the 16th and 17th centuries.
Instructor(s): E. Patton
Area: Humanities.

This course will introduce students to some of the key texts of science fiction as the genre emerged during the nineteenth century. We will consider the intellectual contexts for the form’s development in Britain, France, and the United States, as well as its emerging narrative conventions. In particular, we will consider how early sci-fi writers used non-realistic modes to dramatize problems and discoveries were at once real and yet hard to fathom within the parameters of everyday cognition: deep geological time, alternative social arrangements, post-human landscapes. Texts may include H.G. Wells’ The Time Machine, Charlotte Perkins Gilman’s Herland, Samuel Butler’s Erewhon, Edward Bulwer Lytton’s The Coming Race, William Morris’ News from Nowhere, and Jules Verne’s 20,000 Leagues Under the Sea.
Instructor(s): S. Lecourt
Area: Humanities.

AS.300.300. Trauma in Theory, Film, and Fiction.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (“The Emigrants”), Lanzmann (“Shoa”), Spiegelman (“In the Shadow of No Towers”), McCarthy (“Remainder”), and others.
Instructor(s): R. Leys
Area: Humanities, Social and Behavioral Sciences.

AS.300.335. Victorian Literature as World Literature.
What does it mean to read literature in a global context? How are literary texts that we think of as products of distinct national cultures plugged into larger global systems – even if they seem unaware of it? In this course we’ll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker’s Dracula (1897) and Charles Dickens’s Great Expectations (1861). We will retrace how these books exercised cultural influence beyond the borders of Great Britain; how networks of trade, tourism, and imperial power brought authors from different cultures into contact with one another; and how Victorian texts have become a part of our culture in unexpected ways. Other primary texts may include Arthur Conan Doyle’s The Sign of Four (1890), the poetry of Romesh Chunder Dutt, and first-hand accounts of Oscar Wilde’s 1882 American lecture tour; critical readings will cover postcolonial theory, media theory, and histories of colonialism and urbanization.
Instructor(s): S. Lecourt
Area: Humanities.

Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass Is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, Beauvoir and Barthes on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it means to acknowledge another person’s humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community? Cross listed with English.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.363. Reading Judith Shakespeare: poetry and drama by women writers in Elizabethan England (ca 1558-1650).
Virginia Woolf’s account of the thwarted career of Shakespeare’s hypothetical sister, Judith (in A Room of One’s Own) frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lanyer, Mary Wroth, and others. Students will create fictional biographies of “Judith Shakespeare” and her literary accomplishments. Cross listed with English, Theater Arts, Writing Seminars, and WGS.
Instructor(s): E. Patton
Area: Humanities.

AS.300.371. The Modernist Novel: James, Woolf, and Joyce.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century - Henry James, Virginia Woolf, and James Joyce -- who explored and exploded narrative techniques for depicting what Woolf called the “luminous halo” of life. Selected works include: “The Beast in the Jungle,” The Portrait of a Lady, Jacob’s Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.408. Lyric Modernity.
A comparative literature course on modern lyric and poetics. The main issue of the course is how the lyric voice is construed and sustained under the pressures of modernization in the United States, Europe, and Korea. We will also emphasize issues of translation and the relationship of music and poetry. Readings will include texts by Adorno, Benjamin, Grossman, von Hallberg and Waters, and poems by Dickinson, Rilke, and Kim among others. All readings available in English. Cross-listing requested with East Asian Studies, GRLL, and English.
Instructor(s): S. Rhee
Area: Humanities.
In this seminar on 20th-c. poetry of the Americas, we will explore the relations between land, language, and identity. Our point of departure, informed by de Andrade’s “Cannibal Manifesto,” will be the idea that all literary texts form a body upon which writers may feast when they compose new works. Devouring, plundering, and appropriating will be central concepts for our seminar. We’ll debate the politics of literary transculturation (hybridity/mestizaje/métissage), and discuss diasporic and multilingual U.S. American poetry (Louisiana Creole poetry, Nuyorican Poets Café, etc.). We will also investigate issues of authorship and originality; constraint, sampling, and parody; and poetic hoaxes and frauds. Readings may include theoretical texts from Édouard Glissant, Ángel Rama, Néstor García Canclini, and Roberto Schwarz, as well as Deleuze, Foucault, Kristeva, and Barthes. Poetry may be drawn from Caribbean writers Césaire, Senghor, Walcott, Brathwaite, Martí, Palés Matos; Brazilians Haroldo and Augusto de Campos; and North Americans Langston Hughes, Claude McKay, Myung-Mi Kim, Kenneth Goldsmith, Susan Howe, and Christian Bök.
Instructor(s): R. Galvin
Area: Humanities.

Interdepartmental
AS.360.133. Freshman Seminar: Great Books at Hopkins.
Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University’s rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2015 include Homer, Thucydides, Dante, Milton, Diderot, Shelley, Nietzsche, Nabokov, and Douglass.
Instructor(s): E. Patton; E. Russo; R. Bett; S. Achinstein; W. Stephens
Area: Humanities.

AS.360.246. Islamic Literature, Beloved of Western Thinkers.
This course examines political, erotic, aesthetic, and religious aspects of attraction between Western thinkers in a Christian milieu (e.g. Gide, Emerson, Thoreau) and classical works of Islamic literature (Rumi, Hafiz, Abu Nuwas, Arabian Nights).
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences.

Program in Latin American Studies
AS.361.316. Caribbean Writing in Shakespeare, V. S. Naipaul, and Alejo Carpentier.
Readings and polemics concerned with Shakespeare’s play The Tempest (1610-1611) and its postcolonial afterlives; V. S. Naipaul’s novel A House for Mr. Biswas (1961); and Alejo Carpentier’s El siglo de las luces (1962). The socio historical and political contexts of each work and authorship will be considered in depth in terms of dominant notions of writing in current critical theory. Cross-listed with GRLL, English, and Writing Seminars.
Instructor(s): E. Gonzalez
Area: Humanities, Social and Behavioral Sciences.

Center for Africana Studies
This course will explore the history and development of African American poetry from 1750 to the present (blues, rap, and hip-hop) examining the role of race, art, and cultural identity.
Instructor(s): H. Robbins
Area: Humanities, Social and Behavioral Sciences.

Study of Women, Gender, Sexuality
AS.363.302. Queer Identity?
What does “queer” mean? And who gets to say? This course examines tensions, ambiguities, and contradictions that have emerged in popular, political, and theoretical discourses over the past 25 years.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

AS.363.326. Capitalism and Gender.
This course explores a range of critical work relating capitalism to gender, sex, and sexuality: from theoretical accounts of witchcraft, marriage, and prostitution at the birth of capitalist social relations, to classic feminist debates around housework and reproduction, to contemporary thought on affect, finance, and the global dimensions of women’s labor. As a centerpiece to the course we will read sections from Capital, interrogating the place of gender in Marx’s text while developing a grasp of its arguments and influence.
Instructor(s): C. Westcott
Area: Humanities.

Program in Museums and Society
AS.389.355. Literary Culture in the Nineteenth-Century Library.
What did people actually read in the nineteenth century? What can we learn from their books and magazines? In this class, we read nineteenth-century English and American literary works and examine nineteenth-century literary objects from the collection of the George Peabody Library, to better understand the cultural and material environments within which literary works circulated. Featured writers likely to include Edgar Allan Poe, Charles Dickens, Harriet Beecher Stowe, Emily Dickinson, Mark Twain, Stephen Crane. Several field trips to the Peabody Library throughout the semester.
Instructor(s): G. Dean
Area: Humanities.

AS.389.359. Literary Archive.
This course invites students to grapple with the theory and practice of building literary archives in 19th- and 20th-century American culture. For the final project students will work collaboratively to build a digital archive and exhibit of selected materials from the JHU rare book and manuscript collections. Meets in Special Collections. Cross-listed with English. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.

AS.389.360. American Literature on Display.
Focusing on late 19th and early 20th c American literature, course examines representations of “display” within different literary genres and track how display simultaneously shapes print culture and social concerns of the period. Course culminates in the creation of a student-curated digital exhibit using archival and rare book materials to contextualize the work of the journalist, poet and fiction writer Stephen Crane. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.

Film and Media Studies
Film and Media Studies is an undergraduate program incorporating courses in film history, aesthetics, and theory; theory and practice in television, popular culture, and new media; and all aspects of 16mm film and digital video production: screenwriting, animation, narrative, documentary, and experimental film. Our mission is to give our students comprehensive preparation in film and media, enabling them to realize
their scholarly and professional goals by offering excellent instruction in small classes, intensive hands-on experience, and individual mentoring. In addition, we encourage students to take a broad range of courses in the arts and humanities, in the belief that their creativity will be informed by a deep knowledge of history, the arts, and culture. Upon graduation, many of our students pursue careers in the film and media industry, or attend graduate film school before entering the profession. Others pursue careers in a wide variety of professions, including music or drama, journalism, entertainment law, or business.

Requirements for the B.A. Degree
(See also Requirements for a Bachelor’s Degree (p. 20.).)

The major in film and media studies is designed to enable students to understand the history of film and media forms, to think critically about them, and to gain hands-on experience in how they are made.

Majors often participate in the Hopkins Film Society, including the planning and organization of regular film series and the Hopkins Film Festival; Hopkins Cinematics, our student-run film blog; and Frame of Reference, our journal of film and media. Students are encouraged to pursue a variety of internship opportunities in the film and media industries.

In addition to core required courses, each student must complete either a critical studies or production track for the major. All courses applied toward the major must be taken for a letter grade and a grade of C- or better must be earned. The following courses are required for completion of the film and media studies major:

Completion of Critical Studies or Production Track

Critical Studies Track

One (1) of the following introductory production/visual theory courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.061.145</td>
<td>Introduction to Visual Language</td>
<td></td>

</tr>
</tbody>
</table>

Two (2) 200-level film courses

Seven (7) courses at 300- or 400-level courses (only one cross-listed course may count toward this requirement)

One (1) 500-level course, either an internship or independent study

Production Track

One (1) 200-level course

Four (4) 300- or 400-level non-production courses (only one cross-listed course may count toward this requirement)

Intermediate Film Production (061.2xx) or at least one (1) other production course at the 200-300 level

One (1) Advanced Film Production Course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

Faculty

Director

Linda DeLibero
(Film and Media Studies): American film, film history, cultural criticism
Adjunct Assistant Professor
Anne Eakin Moss
(The Humanities Center): Soviet and Russian cinema, film theory

Professor Emeritus
Richard A. Macksey
(Humanities Center, Writing Seminars, History of Science, Medicine, and Technology): film studies, critical theory

Lecturers
Lucy Bucknall
Senior Lecturer: literature and film, film genres, screenwriting, American film

Roberto Buso-Garcia
Lecturer: screenwriting, Latin American film

Thomas Dolby
Professor of the Arts: sound design, film composition

John Mann
Senior Lecturer: film production, documentary film theory, experimental film

Laura Mason
Senior Lecturer (Film and Media Studies; History): history and film, cultural history and media, French film

Matthew Porterfield
Lecturer: film production, screenwriting

Jimmy Joe Roche
Adjunct Lecturer: digital video production

Meredith Ward
Lecturer: stop-motion and drawing animation, experimental film and video, visual theory

Karen Yasinsky
Lecturer: film theory, media studies, popular culture theory, film history

For current course information and registration go to https://isis.jhu.edu/classes/

Courses

AS.061.140. Introduction to Cinema, 1892-1941.
This course teaches students the fundamentals of film analysis and leads them through the first half of our first century of movies. We will focus on the basic elements of film form, as well as their manipulation and use in films across the globe from the turn of the century until the start of World War II. Movements discussed include the silent comedy of Charles Chaplin and Buster Keaton, German Expressionism, Surrealism, Soviet Montage, French poetic realism, Pre-Production Code cinema, and, of course, classical Hollywood. Screenings are required for this course. Lab fee: $40
Instructor(s): M. Ward
Area: Humanities.

AS.061.141. Introduction to Cinema, 1941-present.
Introduction to Cinema provides an overview of American and international cinema from the post World War II era to the present. Through lectures and discussion, weekly screenings, and intensive visual analysis of individual films, we will explore the aesthetic, cultural, political, and economic forces that have shaped the art and industry of film over the past 70 years. Regular quizzes, writing assignments, class participation required. Mandatory film screenings.
Instructor(s): L. Bucknall
Area: Humanities.

AS.061.145. Introduction to Visual Language.
This course is a study of the visual language used to create a moving picture. Through screenings and discussion of films, videos, and related readings, students will develop a visual critical facility and will demonstrate this facility in weekly response papers to screenings and a final independent video project. The course will focus on image construction, including composition, framing, movement inside the frame and use of light. Students will learn to be attentive to rhythm and tempo in picture editing and sound. In-class video assignments included, which students will work on in small groups of three. Lab fee: $40
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.146. The Stand-Up Comic in Society.
Stand-up comics uniquely reflect their own collision of cultures, ideas, and preferences. In this class, students study and analyze influential comics, then create, workshop, and ultimately perform their own four-minute stand-up routine. In addition to classroom hours, this course includes a field trip to an open mic comedy show in Washington, DC on January 13 (students should reserve the time period from around 6:00 PM to midnight for this purpose). The class culminates in a required final performance in front of hundreds of students on the night of January 22 (7:00-10:00 PM). In addition to Tuesday and Friday evenings, the class will meet on Saturday mornings from 9:00 AM to noon.
Instructor(s): A. Ruben
Area: Humanities.

AS.061.147. Introduction to Latin American Cinema.
An introductory overview of the evolution of narrative feature filmmaking in Latin America, with an emphasis on comparing and contrasting myriad technical approaches to visual storytelling in different countries and eras. We address form and content, issues of identity, and politics and aesthetics. We will also discuss the influence, effect and dialogue between the films, their historical contexts and among each other. Filmmakers discussed include Cuarón, Martel, Silva, Alonso, Del Toro, Gutiérrez Alea, Reygadas, Salles, Subiela, Babenco, Sorín and Buñuel, among others. Co-listed with Program in Latin American Studies AS.361.147. Film screenings on T 7:30-10:00 PM are mandatory. $40 lab fee.
Instructor(s): R. Buso-garcia.

AS.061.148. Storytelling for Film and Fiction.
Through the analysis of narrative films, short fiction, myths, fairy tales, and ghost stories, and through the workshopping of their own creative writing, students will explore the art and science of "a good story well told." This course is an essential primer for upper-level screenwriting.
Instructor(s): L. Bucknall.
AS.061.149. Movies We Love.  
Designed for non-majors, this course introduces students to some of the world's great films. Through lectures and screenings scheduled at the Charles Theater or on Homewood campus, faculty from Film and Media Studies and other disciplines will present films they find uniquely significant and explore what makes them great. Lectures will take place in the state-of-the-art screening room at the new Film Center in Station North, a five-minute ride from Homewood on the JHU Shuttle.  
Instructor(s): L. DeLibero; L. Mason  
Area: Humanities.

AS.061.150. Introduction to Film Production: Rediscovering Early Cinema.  
This course presents several basic elements of 16mm film production. These include the use of a light meter, an understanding of camera lenses and how they function, and some basic aesthetic concerns. These aesthetic issues primarily involve shot composition and lighting. You will also learn basic concepts of film editing. You will be assigned readings from classical film theory texts (primarily from Jean Epstein and Sergei Eisenstein). These readings will closely align with specific exercises for each class. This coalescence of the practical with the theoretical is a vital component of the class.  
Instructor(s): J. Mann  
Area: Humanities.

AS.061.152. Introduction to Digital Film.  
This course introduces students to the world of digital filmmaking. Through screenings, production assignments, and in-class labs, students will develop proficiency in digital cameras, sound recording devices, and software. Students will work individually and in groups to produce several video projects. For their final projects students will pitch an idea and develop a more complex film.  
Instructor(s): J. Roche  
Area: Humanities.

An introduction to Hollywood film and the basics of film analysis. Classic and contemporary films considered. Emphasis on discussion over lecture. Not prior experience in film studies required. The course will meet on Sept. 21, Sept. 28, Oct. 5, and Oct. 12 and will be graded pass/fail. For more information, please see the Film and Media Studies Program website.  
Instructor(s): L. Bucknell  
Area: Humanities.

AS.061.161. Introduction to Short Film Making.  
In this course, students will write and direct short films using digital camera equipment, sound recording devices and film editing software programs. We will watch a variety of films in class; hold readings and discussions based on assigned text, take technical workshops on sound, lighting and hold a short workshop on 16mm film. We will study the history of filmmaking, with a strong focus on the avant-garde and experimental genres. We will also learn about current movements and trends that have developed throughout the world and have the opportunity to to meet with Baltimore filmmakers in class. Students will finish the course with a greater understanding of the lineage of cinema and will have learned a range of techniques to create, discover and develop their own language of visual storytelling. We will discuss, engage, explore and most of all have fun! No prior experience with film or video required.  
Instructor(s): M. Rorison  
Area: Humanities.

AS.061.162. Lights, Camera, Action: Independent Film.  
An introduction to the basics of film analysis, focusing on independent crime films. In-class screenings and emphasis on discussion over lecture. This one-credit course will meet on Sept. 19, Sept. 26, Oct. 3, and Oct. 10 and will be graded pass/fail.  
Instructor(s): L. Bucknell  
Area: Humanities.

AS.061.163. Lights, Camera, Action: Screwball Comedy.  
An introduction to the basics of film analysis through a sampling of Hollywood screwball comedies from the thirties. In-class screenings and short written assignments. Emphasis on discussion over lecture. No prior experience in film studies required. This one-credit course will meet September 17, 24, October 1 and 8, and be graded pass/fail. Perfect attendance is required.  
Instructor(s): L. Bucknell  
Area: Humanities.

An introduction to the basics of film analysis, focusing on the work of the highly individual independent filmmaker Woody Allen. Short weekly written responses, in-class screenings, and emphasis on discussion over lecture. No prior experience in film studies required. This one-credit course will meet on Sept. 18, Sept. 25, Oct. 2, and Oct. 9 and will be graded pass/fail.  
Instructor(s): L. Bucknell  
Area: Humanities.

AS.061.165. Lights, Camera, Action: Horror.  
An introduction to the basics of film analysis through a sampling of classic horror. In-class screenings and short written assignments. Emphasis on discussion over lecture. No prior experience in film studies required. This 1-credit course will meet September 16, 23, 30, & October 7, and be graded pass/fail. Perfect attendance is required.  
Instructor(s): L. Bucknell  
Area: Humanities.

In this course students will consider variations of the personal essay film, wherein filmmakers explore their own experiences, both real and imagined. These films constitute dialogues between filmmaker and world using subjective approaches, including but not limited to first person narration. Students will make a short (4-6 minutes) 16mm film from original and possibly archival footage; their own filmic essays based upon personal experiences. We will look at the works of several essay filmmakers including Ross McElwee, Jean Luc Godard, Chris Marker, and Su Friedrich.  
Prerequisites: AS.061.150(C)  
Instructor(s): J. Mann  
Area: Humanities.

AS.061.203. American Contemporary Classics.  
An introduction to the basics of film analysis through the close examination of notable American films from 1980 to the present, including works by Woody Allen, the Coen Brothers, Courtney Hunt, Spike Lee, and Martin Scorsese. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with a revision.  
Instructor(s): L. Bucknell  
Area: Humanities.
AS.061.204. Intermediate Digital Film Production.
This course is designed to further the filmmaking skills students have begun to develop in previous production courses. Students will acquire a more robust proficiency in directing, editing, and cinematography. During the first part of the semester, students will be presented with several “challenges” designed to allow them to hone their creative vision while also solving problems behind the camera and in editing. The second half of the course will allow each student time to produce a 6 - 12min digital film project that is either narrative, documentary, or experimental.
Prerequisites: AS.061.145 OR AS.061.150 OR AS.061.152
Instructor(s): J. Roche
Area: Humanities.

AS.061.205. Introduction to Dramatic Writing: Film.
In this course we will explore the basic principles of visual storytelling in narrative film as they apply to the design and execution of a screenplay. During the course of the semester, each student will work on different writing exercises while they search for their specific story and the best way to approach it. We will study different narrative tools and methods of screenwriting by analyzing films to ascertain how they work or fail to do so at script level. Through in-class critiques, group discussions and one-on-one sessions, students will apply these techniques to their own work as they undergo the process of designing, breaking down, outlining and writing a screenplay for a short film. In-class analysis and debate on the strengths and challenges posed by the students’ work will help shape the thematic emphasis of the second half of the course.
Instructor(s): R. Buso-garcia
Area: Humanities.

AS.061.207. Fatal Women: The Femme Noire in Film Noir.
The femme noire in film noir: "so appealing, so dangerous . . ." An introduction to the basics of film analysis, with in-class screenings and emphasis on discussion over lecture. Students will keep daily film journals. No prior experience in film studies needed. Perfect attendance mandatory.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.208. (Special Topics) Experimental Video.
This course has been modified to fall under the FMS major’s "special topics" 200-level requirement. An introduction to experimental video from the 1960s to present. Understanding "experimental" as an operative to change existing forms of video using aesthetic and ideological innovation. With four video projects. Lab fee: $40
Prerequisites: AS.061.145 OR AS.061.150
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.209. Special Topics: Surrealism and Film.
We will define Surrealism through readings, including those of Andre Breton and Rene Daumal and texts that influenced the movement in the early part of the 20th c. Using an understanding of the practice of surrealism found in the readings as well as surrealist games and writing, we’ll study a diverse group of filmmakers influenced by the practice including Joseph Cornell, Rene Clair, Luis Bunuel and contemporary artists such as Jack Chambers and David Lynch. Assignments include weekly papers and one final creative project. Lab fee: $40
Instructor(s): K. Yasinsky
Area: Humanities.

Cinema loves a chase. Great examples in popular film from the silent era to the present. Comedies, westerns, and crime films will be considered. In-class screenings and emphasis on discussion over lecture. Students will keep a daily film journal to be handed in each class. No prior experience in film studies required.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.219. Special Topics: Animation Workshop.
Students will produce several animations using hand-made techniques, including drawing animation, paper puppets and stop-motion. Screenings and readings will provide a historical and conceptual context to the exploration of animation as an experimental technique within both narrative and non-narrative works. Weekly film screenings.
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.220. Special Topics: Silent Classics.
A survey of silent era masterpieces. From Murnau’s horror film Nosferatu to Keaton’s slapstick comedy Sherlock Jr to Dreyer’s great tragedy The Passion of Joan of Arc, these are films of exceptional beauty and artistry. Chaplin, Eisenstein, von Sternberg, and others also considered. Recommended course background: AS.061.140 or AS.061.141 or AS.061.145.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.221. Special Topics-Producing the Independent Film.
This class will guide students through the process of producing an independent film in the United States. The chronology of lectures and coursework will follow the lifeline of a project, from conception through financing and development, production, postproduction, marketing, and exhibition. Students will learn how to package and pitch projects, budget and schedule a screenplay, develop a financing plan, supervise production and post-production, and mount a viable festival and distribution strategy. Lab Fee: $40
Prerequisites: AS.061.150 OR AS.061.145 OR AS.061.151 OR AS.061.152
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.222. Analyzing Popular Culture.
This course provides an introduction to the critical analysis of popular culture through the major theoretical paradigms of media and cultural theory. The teaching method uses a combination of media studies and sociology to explore popular culture and is designed to encourage students to become more active critics. The course presents a range of media from contemporary popular music to film and television. Smaller subjects include the teen "pop" love song, the politics of representation, and the forming of subcultures.
Instructor(s): M. Ward
Area: Humanities.

AS.061.225. Special Topics: Introduction to Animation.
Students will produce several animations using hand-made, stop-motion techniques, including drawing animation, collage-based and puppet animation. Work will be shot digitally. Screenings and readings will provide a historical and conceptual context.
Instructor(s): K. Yasinsky
Area: Humanities.
**AS.061.226. Special Topics: Writing About Film.**
A workshop focusing on the critical analysis of film, with particular attention to the writing of short analytical and critical essays on a range of movies—recent and classic—using a variety of approaches. Students are required to participate in weekly critiques and discussions of each other's writings.
Instructor(s): L. Mason
Area: Humanities.

**AS.061.228. Almost Grown.**
An introduction to the basics of film analysis through a survey of American coming of age films from the mid 20th century to the present. Attention to questions of race, class, and gender. A variety of genres considered. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with a revision.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.229. French New Wave.**
An exploration of the major films and directors of the French New Wave that is also designed to help students consolidate their skills in the analysis of film. The course will examine the origins of the French New Wave, looking at the directors as critics and as passionate film fans, along with the institutional and historical context of the films. It will also ask how the French New Wave changed the process of filmmaking, and transformed the way we think about the work of the director--inspiring more vocations in filmmaking than any other movement in cinema history. Film screenings T 7:30-10:00PM. $40 lab fee.
Prerequisites: AS.061.140 OR AS.061.141 OR PERMISSION OF INSTRUCTOR
Instructor(s): S. Roos.

**AS.061.249. Film History: Sound and Scores.**
This course will explore the history of film sound from the silent film era to the present day, examining the narrative and aesthetic purpose as well as the functionality of film music. The course will trace the history and development of film music and the process of film scoring through reading, lecture, and film viewing to explore how music and its relationship to film has changed over the last century. Class includes discussion and evaluation of different compositional styles and their purposes. $40 lab fee.
Instructor(s): H. Robbins; T. Dolby.

**AS.061.247. Creatures From Outer Space.**
An introduction to Hollywood cinema and the basics of film analysis through the close reading of selected 20th century American classics including Citizen Kane, On the Waterfront, Annie Hall, and others. Twice-weekly screenings. Short film responses and a final paper, 10pp.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.245. Introduction to Film Theory.**
This course offers an introduction to the major paradigms of film theory, with work ranging from Sergei Eisenstein to Andre Bazin. Frequent film screenings are designed to help illustrate film theory concepts. Designed around one operative question, “What is cinema?” the course explores the varied and divergent answers provided by the great thinkers of the cinema in the past century. Students are expected to enter the course ready to engage in discussion. Film screenings W 7:30-10:00 PM.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Ward
Area: Humanities.

**AS.061.244. Film Genres.**
A survey of American genres: the Western, the Gangster Film, Science Fiction, Horror, Comedy, Melodrama, and others. Twice-weekly screenings. Short film responses and a final paper, 10pp.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.248. American Masterpieces.**
An introduction to the basics of film analysis through the close reading of selected 20th century American classics including Citizen Kane, On the Waterfront, Annie Hall, and others. Emphasis on discussion over lecture. Several short film responses and an essay with optional revision.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.246. Film Genres.**
$40 lab fee A survey of American genres: the Western, the Gangster Film, Science Fiction, Horror, Comedy, Melodrama, and others. Twice-weekly screenings. Short film responses and a final paper, 10pp.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.232. Dreams, Psychois, and Altered States in Cinema.**
In this production course, students will create multiple video projects that reflect the representation of dreams, psychosis, and altered states in cinema. We will screen and deconstruct a variety of feature films, video artworks, and music videos to understand the mechanics and language of subjective realism as a narrative form. We will trace this stylistic lineage from its roots in art house cinema to its rise as an accepted Hollywood modality. We will also explore editing and software techniques that will further students’ ability to create stunning works of strange beauty. Basic proficiency with digital cameras and editing is required. This class fulfills the intermediate film production requirement.
Instructor(s): J. Roche
Area: Humanities.

**AS.061.230. Intermediate Film Production.**
This course continues the work of the Introduction to Film Production course. The course also introduces the use and design of sound through the incorporation of non-sync voice(s) and effects. Each student is responsible for the complete production of a short (4-6 minutes) film, from treatment to shooting script to final edit. The films are shot on 16mm color and/or black and white negative film stock and transferred to digital video. All editing for the films is with non-linear software, generally Final Cut Pro. $100 Lab fee
Prerequisites: AS.061.150 or permission
Instructor(s): J. Mann
Area: Humanities.

**AS.061.231. In Others' Words.**
“In Others Words” explores an enigmatic relationship between images and words. Each student creates a short, 16mm film incorporating their filmed images with texts written by others (fiction and non-fiction). Guided by the notion of collage, these films become a new form of documentary, bringing together seemingly disparate elements to reconfigure our ways of seeing. Drawing from the photo-text works of Wright Morris and C.D. Wright’s poetry, the course adheres to Paul Virilio’s suggestion: “sometimes the best way to see better is to look differently.” This is not about B roll. $125 lab fee.
Prerequisites: AS.061.150
Instructor(s): J. Mann.
Films will include Kurosawa’s Yojimbo, Leone’s Fistful of Dollars, Woo’s the Killer, among others. In-class screenings. Emphasis on discussion over lecture. No prior experience in film studies required.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.251. American Comedy Classics.
A survey of 20th century American comedy from the films of Charlie Chaplin and the Marx Brothers to Dr. Strangelove and Annie Hall. The course will provide an introduction to the basics of film analysis. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with an optional revision.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.252. School Daze.
Teen angst and togas in comedies of American youth from The Graduate to Animal House to Lost in Translation. Course will provide an introduction to the basics of film analysis with an emphasis on discussion over lecture. Several short film responses and an essay with optional revision. No prior experience in the subject required.
Instructor(s): L. Bucknell; L. DeLibero
Area: Humanities.

AS.061.254. Watching the Detectives.
Films of surveillance and detection from the Humphrey Bogart/Howard Hawks classic The Big Sleep, to Polanski’s Chinatown with Jack Nicholson, and David Simon’s HBO series The Wire. The course will offer an introduction to the basics of film analysis. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with an optional revision.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.257. I Want To Be Humphrey Bogart.
A close look at the Hollywood titan Humphrey Bogart in classics including Casablanca, To Have and Have Not, and The Big Sleep. In-class screenings and discussions are emphasized over lecture. No prior experience in film studies required.
Instructor(s): L. Bucknell
Area: Humanities.

Baltimore Filmmakers seeks to explore the unique personal narrative of the Media Artist within contemporary society, fourteen Filmmakers/Video Artists from Baltimore will visit the class room to give talks.
Instructor(s): J. Roche
Area: Humanities.

Using P. Adams Sitney’s text: The Cinema of Poetry, this course will explore the relationship between poetry and the moving image. When experimental film began to define itself in the 1950s and ’60s the terms cine-poem and film-poem were ubiquitous as identifying avant-garde cinema. Poetic structures in the moving image will be studied in relation to language, images and formation of meaning. Students will independently research a poet who greatly inspired and influenced a filmmaker/moving image artist and write on that filmmaker’s work. One moving image project will be undertaken and completed during the semester as well. Weekly assignments will include screenings, reading, writing, and or video work.
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.271. ‘Inside Station North’ TV/Webcast Show.
During this one-semester course you will create a pilot episode for a TV show/webcast tentatively titled ‘Inside Station North.’ It will be a magazine type show focusing on the arts/music/performance community around Baltimore’s vibrant Station North district. We will research comparable shows, design the image and graphic style, investigate alternative broadcast and distribution channels ranging from YouTube and iTunes to Public Television and cable. We will select exciting local artists and venues, and shoot video both on the Sound Stage at the Film Centre and out and about in the neighborhood. We will edit and post-produce the pilot and put it on the air with a view to producing a full series commencing Fall 2016.
Prerequisites: AS.061.140 OR (AS.061.141 AND AS.061.152)
Instructor(s): T. Dolby
Area: Humanities.

AS.061.301. Advanced Film Production: The mongrel film.
In this course, each student is responsible for the design and production of a short 16mm film. The film may be shot on color and/or black and white negative stock. The format is Super 16mm. The film may include sync and/or non-sync sound. The idea behind the “mongrel” film is for the student to incorporate a variety of genres within this project. These may include stylistic elements typically associated with documentaries, experimental, narrative, animation, and lost and found films. $125 Lab fee
Prerequisites: AS.061.150 AND AS.061.202
Instructor(s): J. Mann
Area: Humanities.

AS.061.307. In the City.
Glittering or gritty, rich with opportunity or “pestilential to the morals, the health, and the liberties of man”: the city in popular film from the silent era to the present. Lab fee: $40
Prerequisites: AS.061.140 AND AS.061.141 or instructor permission
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.308. Experimental Video.
An introduction to experimental video from the 1960s to present. Understanding “experimental” as an operative to change existing forms of video using aesthetic and ideological innovation. With four video projects. Lab fee: $40. Recommended Course Background: AS.061.145 or AS.061.150
Area: Humanities.
**AS.061.313. Story and Character Design: for the Screenplay.**
A workshop devoted to developing dimensional characters and compelling, original stories. Weekly screenings, short written exercises, and a longer final project. Weekly screenings M 7:30-10 PM.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.314. Sketching the Scene: Image as Narrative Tool.**
In the first half of the semester, students will be presented with prompts from a variety of media – photography, literature, popular music, et al - intended to stimulate the imagination and spark ideas. These ideas will be explored, cultivated, and mined for their visual information, with emphasis on information that might appear in their filmic representation. In the second half of the semester, students will search independently for cinematic ideas with an eye toward the details of a scene. As students identify scenic elements, their ideas will be developed and carried through the traditional workflow: outline, scenario, and screenplay. At the end of the semester, students will have prepared short scenes ready for pre-production. Lab fee: $40
Instructor(s): M. Porterfield
Area: Humanities.

**AS.061.315. Screenwriting By Genre.**
Story design for the screenplay with special attention to the genres of comedy, horror, melodrama, and adventure. Regular workshops, short written exercises, and a longer final project.
Prerequisites: AS.061.313 or AS.220.342 or instructor’s permission
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.316. Characters for the Screenplay.**
A workshop devoted to creating complex characters for the screen. Students will examine memorable film characters from the silent era to the present, with attention to how these characters are revealed through both the drama and the mise en scène. Weekly screenings. Short critical and creative written exercises and a longer, creative final project.
Prerequisites: (AS.061.270 OR AS.220.204 OR AS.220.337) or instructor permission.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.319. Narrative Filmmaking: Pre-Prod Bootcamp.**
This two-week boot camp for student filmmakers from JHU and the Maryland Institute, College of Art (MICA), provides intensive training in the crucial aspects of preparing to shoot a successful narrative film. A weeklong workshop with a professional screenwriter will allow students to hone and improve their existing screenplays, practice the elements of writing for film, and learn how to do a script breakdown. A second workshop on working with actors, taught by a professional actor, will teach students the ins and outs of casting and directing. Supplemental workshops will cover elements of pre-production such as budgets, production schedules, call sheets, and legal issues.
Instructor(s): R. Buso-garcia
Area: Humanities.

**AS.061.322. Women in Hollywood Film.**
Female beauty, villany, and humanity in popular film from the silent era to the present.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.323. Masculinities.**
Prereq: One Core Course Or Permission From tap dancer to gangster, assassin to anguished teen, versions of the male in film from the silent era to the present. Cross-listed with Studies of Women, Gender, and Sexuality.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.325. The Westerns of Ford, Leone, & Peckinpah.**
A study of three masters – John Ford, Sergio Leone, and Sam Peckinpah - their impact on the genre and on each other. Lab fee: $40
Prerequisites: AS.061.140 or AS.061.141 or Permission
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.328. Gangster Films.**
The bad guy as hero from Little Caesar to Goodfellas. Film screenings Th 7:30-10:00 PM, Sun 7:00-9:30 PM. Lab fee: $40.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.335. Monster Films.**
$40 and one core course or permission required. Monstrous others and monstrous selves in classic 20th century horror.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.339. A Cinema Of Anxiety: Film Noir.**
Postwar film noir: Fuller, Huston, Lang, Mann, Tourneur, and others.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.342. Going "On the Road": The Road Movie.**
This course explores the road film, one of the most popular thematic constructs in American film. Although the journey narrative has its roots in literature, the road film presents a unique variation of stories of wanderlust. Perhaps this is because cinema’s very nature lends itself to the form; the art form entails the creation of space and motion in time. We will follow the road movie from classical cinema to the present, concentrating on its position as a central trope in American mythology but also looking at the ways filmmakers in other cultures have made use of it. Lab fee: $40
Prerequisites: Prereqs: AS.061.140 OR AS.061.141
Instructor(s): L. Deliberio; M. Ward
Area: Humanities.

**AS.061.343. Deadwood and American Justice.**
The course aims at generating well-grounded discussion on issues of justice and social fairness in the wilderness of American westward colonization and spoliation. Issues such as the rule of foul language, chattel sex work, grassroots democracy, gun justice, and other basic elements of the American ethos of conquest and populist sovereignty.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): E. Gonzalez.
AS.061.344. The Viewers in the Dark: One Hundred Years of Cinephilia, from Lumiere to Tsai Ming-Liang.
The movies have attracted a devoted following in their first hundred and twenty years. Here, we discuss the act of moviegoing itself, exploring the ways that film fans have traditionally considered themselves in relation to the silver screen, the movie house, and film culture, from the silent era, with its first moments of illuminated wonder at moving pictures, through early cine-clubs in the 1920s and the enthusiastic movements of film critics-turned-filmmakers with the French New Wave in the 1960s, up through the video store boom and bust. How does the way we literally engage with cinema affect the way that we love movies? With our culture now engaging with the rise of the home theater, we consider where we have come from as moviegoers as part of a genealogy of watchers in the dark, and how theorists have positioned themselves as regards the activity. This course also involves a practicum to enable students to think through questions of moviegoing in acts of moviegoing itself, and reflection on the experience. Thinking through how we have felt and thought about movies, we come to some conclusions about both the nature of film art and its most loyal spectator, the cinephile.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.352. Media Workshop.
Media Workshop mixes the theory and practice of media-making in a workshop environment that allows upper-level students to hone their craft as filmmakers. Based upon the idea of a creative community, the workshop is an advanced lab designed to give students a place to share ideas, create new work, and receive intensive and supportive critique. Work produced in this class will consist of non-narrative experimental exercises, exploring issues of the image, editing, perception, and sound. Students will read filmmaker-theorists like Sergei Eisenstein, Robert Bresson, Stan Brakhage, Maya Deren and Wim Wenders and will produce creative work inspired by the texts.
Instructor(s): M. Porterfield; M. Ward
Area: Humanities.

This course is designed to immerse students in the creative and practical challenges of narrative production. It is our hope that you will emerge with a greater understanding of the professional structure of a film crew, as well as with an understanding of the collaborative creativity necessary to make a narrative short. We will work hard, but if you are interested in video, film and filmmaking, we guarantee you will learn a great deal. In this course students will be divided into teams, each of which will produce a short narrative film based upon a script written by a fellow student. All films will be fully student produced. Students will fill all principal roles: scripting, casting, producing, directing, designing, shooting, sound recording, and editing. Throughout the course, instructors will expose students to relevant films and film professionals in order to illuminate the key creative roles necessary in the making of any film. Instructors will serve a guiding role in the production of student projects, offering technical information and advice. Students will be evaluated not only on the films they produce, but also on their ability to create and contribute to the collaborative art of filmmaking. Lab fee: $100
Prerequisites: Prereq: AS.061.152
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.358. Directing Actors.
This class, intended for students of film, will explore the theory, practice, and ethics of directing actors for the screen. Texts, screenings, production, and performance exercises will be combined over the course of the semester. The goal of this workshop is to inspire young directors and enhance their ability to communicate with their cast with confidence and empathy.
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.359. Documentary Film.
This overview of the history of the documentary film format and its attempt to tell the “truth” examines documentaries from different historical moments and cultures, and asks theoretical and philosophical questions about the construction of argument, and the use of reality, ethnography, and storytelling.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.061.361. Documentary Film Theory.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): J. Mann
Area: Humanities.

AS.061.362. American & European Experimental Film.
Examines an eclectic group of experimental filmmakers including Stan Brakhage, Trin T. Minh-ha, Leslie Thornton, and Michael Snow. Includes screenings of filmmakers’ works and their writings on the subject.
Area: Humanities.

AS.061.364. The Films of Alfred Hitchcock.
Close examinations of Hitchcock’s films from the Lodger to Frenzy. $40 lab fee.
Instructor(s): L. DeLibero
Area: Humanities.

Films of Altman, Peckinpah, Coppola, Penn, Scorsese, and others. Intensive examination of the films and their cultural/political context.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.369. The 1930s in Jazz, Film, and Poetry.
The 1930s in Jazz, Film, and Poetry will focus on three art forms, jazz, film, and poetry, both separately and in conversation with each other during a decade of political, economic, technological, and cultural upheaval. A decade after the invention of amplifiers and public address systems, advances in sound recording and synchronized sound revolutionized film and recording arts. Jazz musicians, filmmakers, and poets collaborated on innovative and radical projects, often funded by the New Deal Federal Writers Project. Team-taught by faculty in Film and Media Studies, the Department of Jazz (Peabody), and the Center for Africana Studies, this course will bring together students from Peabody and the Krieger School of Arts & Sciences to engage with issues of art, culture, and politics during a turbulent decade.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): H. Robbins
Area: Humanities.
AS.061.370. Theorizing Popular Culture.
This course explores the changing role of popular culture via the major paradigms through which it has been considered. Presents a range of media from contemporary popular music to film and television. Lab fee: $40
Prerequisites: AS.061.140 or AS.061.141
Instructor(s): M. Ward
Area: Humanities.

AS.061.371. Unrealities: The Fantastic in Film & Fiction.
The fantastic, the absurd, the blackly comic in films by Cocteau, Hitchcock, and others; and in the short fiction of Barthelme, Cortázar, Hrabal, and others. Several short creative exercises and a longer final project.
Instructor(s): L. Bucknell
Area: Humanities.

An exploration of French films about crime with a particular focus on the reciprocal relations between French and American cinema: how did the French tradition of poetic realism influence the American film noir--and why is our name for the genre one invented by French critics? How did French directors respond to American genre movies, and to the films of Hitchcock? Screenings will include films by Melville, Godard, Clément, Clouzet, Audiard, and Haneke.
Instructor(s): S. Roos.

AS.061.373. Intermediate Dramatic Writing: Film.
This course will explore different approaches towards understanding the fabric of story as it pertains to film. Students will be exposed to key challenges in conceiving, structuring and executing a compelling, memorable and vibrant feature-length screenplay. By studying key examples, we will discuss possible solutions to these issues. In every class, students will share their work in progress and will help each other find approaches or solutions to their specific challenges and issues. We will analyze films with screenplays that effectively play with the form to create lasting, thought-provoking and affecting stories. Through in-class critiques, group discussions and one-on-one sessions, students will apply new tools and approaches to their own work as they undergo the process of designing, breaking down, outlining and writing a full step outline, a beat sheet and the first ten pages of a feature length screenplay. As the semester progresses, in-class analysis and debate on the strengths and challenges posed by the students’ work will shape the thematic emphasis of each class.
Prerequisites: AS.220.204 OR AS.061.205
Instructor(s): R. Buso-garcia
Area: Humanities.

Beyond their balding pates, their notorious reclusiveness, and the relative paucity of their output, Stanley Kubrick and Terrence Malick share a mastery of cinematic space. This course will closely examine selected films from their work, with particular emphasis on their visionary manipulation of the epic vastness and lyrical intimacies of screen space. With this primary concern in mind, we will consider the directors’ engagement with philosophies of history and time, their experiments with narrative and generic conventions, and their enduring fascination with the relationship between the human and natural worlds. Sunday 7:00pm-9:30 pm weekly film screenings. $40 lab fee.
Prerequisites: AS.061.140 OR AS.061.141 OR PERMISSION OF THE INSTRUCTOR.
Instructor(s): L. DeLibero.

AS.061.375. Surrealism and Film.
We will define Surrealism through primary texts, including those of Andre Breton, Antonin Artaud and Rene Daumal and other works that defined and influenced the movement in the early part of the 20th century. Using an understanding of the practice of surrealism found in the readings, as well as in surrealist games and automatic writing, we’ll study a diverse group of filmmakers influenced by the practice, including Luis Buñuel, Joseph Cornell, Raul Ruiz and contemporary artists such as David Lynch. Assignments include weekly papers and one final creative project. Weekly film screenings Monday 7:30-10:00 PM. $40 lab fee. Media, Online
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): K. Yasinsky.

AS.061.376. Arts and Culture Journalism: Interactive Media, Online Publishing.
Students will participate in the ongoing creation of BmoreArt.com, an online arts and culture publication that serves the Baltimore community. In conjunction with visiting professionals, students will investigate the Baltimore cultural community and create different types of editorial content using interactive media including film, video, sound, and writing. Students will produce creative content utilizing their individual areas of expertise - such as visual art, art history, music, literary arts, film, and theater - while working together as a professional organization. A strong emphasis will be placed on the student’s collaborative participation and creative experimentation. Students with differing backgrounds in media will approach this project from unique perspectives, which will be valued and cultivated. Students with previous experience in journalism are welcome. An introductory writing or film course is suggested as a prerequisite.
Instructor(s): C. Ober
Area: Humanities.

This week-long course in Los Angeles gives students inside access to the entertainment industry through daily meetings and workshops with key figures in film, television, new media, and music, many of them JHU alums: directors, producers, screenwriters, studio executives, agents, exhibitors and more. We will visit studios, major agencies and production companies, and will end the week with a JHU networking event and panel discussion with alumni who work in film and television. The course runs from January 4 - 8. Open to all Film and Media Studies majors and minors, with preference given to seniors. Students outside FMS may apply if slots remain open after all FMS students have registered.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.378. Automatic Animation.
A hand-made, 2-D animation course based on ideas of automatism. Students will create their own animated movie during the semester. We’ll study a diverse group of filmmakers influenced by the practice, including Luis Buñuel, Joseph Cornell, Raul Ruiz and contemporary artists such as David Lynch. Assignments include weekly papers and one final creative project. Weekly film screenings Monday 7:30-10:00 PM. $40 lab fee. Media, Online
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): L. DeLibero.
AS.061.379. Audio for Video. 3 Credits.
This 3-credit, 300-level class covers all creative and technical aspects of working in Logic X and ProTools to create professional soundtracks for film, video, commercials and games. It will enable filmmakers, composers and recording arts students to learn how to import and synchronize QuickTime video; ‘spot’ a clip; create tempo maps and click tracks, and blend the three key elements of film sound ie dialog, music and effects. Classes will be mainly taught with students at individual workstations, though some classes will be held on the soundstage (for mixing and live recording techniques) as well as in the recording studio (dubbing and mixing.) Prerequisites: at least one production course (Intro to Film/Video Production, or Recording Arts); plus fluency in either Logic, ProTools, Final Cut or Premier.
Prerequisites: AS.061.150(C), AS.061.152(C), or other introductory film production course; fluency in either Logic, ProTools, Final Cut or Premier.
Instructor(s): T. Dolby

AS.061.381. Sound on Film.
This 3-credit upper-level course, sponsored by the Film and Media Studies Program at JHU and the program in Recording Arts and Sciences at the Peabody Institute, will offer undergraduates and faculty/staff from both institutions an unprecedented opportunity to collaborate on all aspects of designing soundtracks for film. Utilizing in-progress works, student filmmakers from the Film and Media Studies program will work with Peabody students to create soundtracks, from the initial phases of composition and scoring to the final stages of recording and sound syncing. Students will work in small teams in a lab setting to create their soundtracks, exploring a variety of scenarios, including the implications of image-driven music vs music-driven images, and the various uses of acoustic and electronic sound. Lab work will be supplemented by guest lectures and faculty presentations on various aspects—practical, theoretical, and historical—of applying sound to film. Guest lecturers will include sound designers and engineers, composers, editors, historians of film sound, and filmmakers working in both live action and animated film. Weekly film screenings. 
Instructor(s): T. Dolby
Area: Humanities.

AS.061.386. Sundance: Its Role in Contemp Cinema.
This course will allow students to witness and report on one of the most important film festivals in the world. Students will travel to the 2014 Sundance Film Festival, where they will attend screenings, participate in workshops and discussion groups with the instructors and members of the film industry, and write critical assessments of both the films and the festival’s crucial role in independent filmmaking today. Film and Media Studies majors and minors only.
Instructor(s): J. Roche; M. Ward
Area: Humanities.

In this course, film students from JHU and MICA will research, shoot, and edit a 30-minute documentary on JHU’s Baltimore Scholars Program under the supervision of professional filmmakers. Students will learn the techniques of filmmaking and of building a narrative for documentary film. In the process of conducting interviews and research for the film, they will also explore the historical and current relationship between Johns Hopkins University and the Baltimore community.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.388. Cinema Workshop - Cannes Film Festival.
This workshop provides students with access to professional events at the Cannes Film Festival, including screenings, non-competitive programs, tributes, master classes and directors’ showcases. Students are expected to participate in festival events and take an active role in organized discussions, critiques and dialogues. Written and oral assignments. Special Application: Open to JHU Cannes Program participants only.
Instructor(s): L. Mason
Area: Humanities.

AS.061.389. Women Making Movies (Europe).
Whether speaking of short narratives by Alice Guy Blaché, Leni Riefenstahl’s propaganda for Hitler, or the films of Agnes Varda, Lina Wertmuller, Sally Potter, Margarethe von Trotta, Agnieszka Holland and Marjane Satrapi—to name but a few—women have been a dynamic and integral presence in European film history from its earliest days. What has gender meant to them? Does that category, alone or in combination with feminist film criticism, illuminate how we understand their films? Does the fact of being female shape a director’s choice of subject, how she represents it, or how she works? How has a particular director’s work been shaped by other political, social, and historical circumstances? Does an enhanced appreciation of films directed by women change our sense of the canon or of what it means to be an auteur? We will address these and similar questions as we explore a few of the movies made by women over the past 100+ years.
Prerequisites: AS.061.140 OR AS.061.141
Area: Humanities.

AS.061.391. Love and Film.
In this course, we explore different understandings of “love” and the way that film has dealt with the concept as a medium. We explore a variety of approaches to the question of “love” - from the agapic to the familial to the romantic - through a series of interdisciplinary readings ranging from philosophy to anthropology. We will also equally explore the question of how film has engaged with the question of love as a concept, and what depictions of human affection - from the general to the personal - it has offered us. Screenings are required for this course.
$40 Lab fee. Cross-listed with Study of Women, Gender and Sexuality.
Instructor(s): M. Ward
Area: Humanities.

AS.061.396. Modern Paris on Film.
This course uses French film to examine the history of twentieth-century Paris. We will consider how filmmakers interpreted the social, political, and technological transformations that shaped Paris in the modern era, treating movies as expressions of change and means by which filmmakers comment on it. Taught in English. Film screenings Monday 7:30-10:00 PM. $40 lab fee.
Instructor(s): L. Mason
Area: Humanities.

AS.061.397. French Masculinities.
Examines changing ideals of masculinity in France after 1960 as they found expression on film, rooting the work of iconic stars and directors in their cultural, political and historical contexts.
Instructor(s): L. Mason
Area: Humanities.

AS.061.398. Godard.
An intensive study of the most important films of this seminal and influential director.
Prerequisites: AS.061.140 or AS.061.141
Area: Humanities.
AS.061.399. Stop-Motion Puppet Animation.
Students will create their own stop-motion models (puppets) based on a wire armature model. In small groups, students will design and create a simple set and make a short stop-motion movie using a DSLR camera. The question of “why animate” will be explored in student projects and responses to screenings. We will study the history of stop-motion puppet animation from Starewicz to Svankmajer to Nick Park.
Prerequisites: AS.061.140 OR AS.061.141 OR AS.061.150
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.403. Sound on Film II.
This course continues the explorations in sound and music for film begun in AS.061.381. This 3-credit upper-level course, sponsored by the Film and Media Studies Program at JHU and the program in Recording Arts and Sciences at the Peabody Institute, offers undergraduates and faculty/staff from both institutions an unprecedented opportunity to collaborate on all aspects of designing soundtracks for film. Classic and contemporary film scores are screened and analyzed. Then, using their own short films, students from the Film and Media Studies program work with Peabody students to create soundtracks, from the initial phases of ‘spotting’, composition and scoring, through the interim stages of studio recording and sound syncing, and on to final mixing of music with dialog and sound effects using industry-standard Digidesign ProTools. Students work in small teams in a lab setting to create their soundtracks, exploring a variety of scenarios, including the implications of image-driven music vs music-driven images, and the various uses of acoustic and electronic sound. The course also touches on the logistics of music budget, licensing and copyright. Lab work is supplemented by guest lectures and faculty presentations on various aspects - practical and theoretical - of applying sound to film. Guest lecturers may include sound designers and engineers, composers, editors, and filmmakers working in live action, documentary or animated film. Screenings are provided on Sundays from 7:30-10:00 PM. In order to be admitted to the course, students must have completed at least one 5-10 minute short film to be used for scoring a soundtrack during the semester. $40 lab fee.
Instructor(s): T. Dolby.

AS.061.404. Advanced Dramatic Writing: Film.
Intensive workshop course where students will write both a first draft and a full revision of a feature length screenplay. Classes will be designed and centered on the specific challenges of the students’ works-in-progress, with an emphasis on exploring and discussing different narrative approaches and solutions that will enhance their writing and revision processes. Select films will be screened and analyzed as they pertain to the students’ scripts. Students will aim to have a polished draft of their screenplay to be submitted to industry-recognized screenwriting labs at the end of the semester.
Prerequisites: AS.061.373 or AS.220.337
Instructor(s): R. Buso-garcia.

AS.061.413. Lost & Found Film.
This course explores various elements of film production and filmic expression through a somewhat nebulous field typically described as lost films. Lost films (or as they are sometimes called, “orphan” films) can be generally described as films that have, for a variety of reasons, fallen out of the public view. They frequently come from educational, scientific, medical, or industrial films from the 1950s and 1960s. Using these films as source materials, lost film filmmakers explore and expose cultural conventions, visual icons, and historical value materials. Each week, students are responsible for re-editing sources found on an internet archive site. The assignments follow thematic concerns related to film editing. Students complete a final project (4-8 minutes). All editing for the course is accomplished with non-linear software, generally Adobe Premiere or Final Cut.
Instructor(s): J. Mann
Area: Humanities.

AS.061.420. The French New Wave.
Conducted in English Study of the major films of the French New Wave, their origins, context, and afterlife.
Instructor(s): S. Roos
Area: Humanities.

AS.061.421. History and Film.
How do films inform, shape, or fundamentally alter our sense of the past? What are the strengths and limitations of cine-history? This course pairs traditional and avant-garde fiction films and documentaries with essays about history, historiography, memory and the political uses of the past to investigate fast-changing relationships between image and text, film and history. Screening T 7:30-10:00 PM. $40 Lab fee
Instructor(s): L. Mason
Area: Humanities.

AS.061.440. Sr Project-Film.
Prerequisites: AS.061.240, AS.061.301, AND AS.061.304
Instructor(s): J. Mann; M. Porterfield
Area: Humanities.

AS.061.441. Sen Proj-Film Production.
Instructor(s): J. Mann
Area: Humanities.

AS.061.443. Sen Proj-Digital Vid Prd.
Instructor(s): J. Mann; M. Porterfield
Area: Humanities.

AS.061.501. Independent Study - Film.
Instructor(s): Staff.

For students who wish to explore an aspect of film studies not covered by existing courses. The course may be used for research or directed readings/viewings and should include one lengthy essay or several short ones as well as regular meetings with the adviser. Permanently required: Lab Fee: $100 (if production related)
Instructor(s): J. Mann; L. Bucknell; L. DeLibero; M. Porterfield; M. Ward.

AS.061.503. Independent Study-Film/Media.
Permission required
Instructor(s): J. Mann; L. DeLibero; M. Porterfield.

AS.061.504. Independent Study-Film.
Instructor(s): J. Mann; L. DeLibero; M. Ward.

AS.061.505. Internship-Film/Media.
Instructor(s): J. Mann; L. Bucknell; L. DeLibero.
AS.061.506. Internship-Film & Media.
Instructor(s): L. Bucknell; L. DeLibero; M. Ward.
AS.061.573. Independent Study Film Prod.
Instructor(s): L. DeLibero.
AS.061.574. Internship-Film/Media.
AS.061.596. Ind Stdy-Film & Media.
Instructor(s): Staff.
AS.061.599. Internship-Film & Media.
Instructor(s): J. Mann; L. Bucknell; L. DeLibero; M. Ward; T. Dolby.
This course provides students an introduction to the discipline of sound studies and its relationship to three eras of historical forms of technological media. Structured around a problematic of emitter, medium, and receiver, it explores how sound was encoded by its creators as a structure of meaning in early media cultures; how it emerged as a means of aesthetic creation with the rise and dominance of the cinematic medium; and last, how it reaches the infatuated individual listener in the new era of mobile earbud audio. Theorizing our relationship to media through the study of sound and listening, we find new histories to be explored, as well as new media aesthetics to be negotiated. Through engagement with thinkers such as economist Jacques Attali, auditory and cultural historians Emily Thompson and Jonathan Sterne, film sound theorists Michel Chion and Rick Altman, and sound studies scholar Michael Bull, we construct how technologically mediated listening allows us to understand the historical and theoretical components of sound’s media aesthetics. Recommended Course Background: AS.061.245 for undergraduates or JHU graduate student status (open to all JHU graduate students).
Instructor(s): M. Ward
Area: Humanities.

Cross Listed Courses

English
AS.060.118. Asian American Literature and Film.
This course offers students a survey of Asian American literature, film and cultural politics. Throughout the course we will evaluate the literary and filmic productions of Asian Americans in order to ask a series of questions: Who is American? Who is Asian American? How does “Asian American” work as a category that uncovers contestations over the meaning of ethnic, sexual, and national identity? We will look at a diverse array of Asian American groups while paying attention to the formation of Asian American subjectivities across differences and the intersections of ethnicity, sexuality, class and gender. Cross-listed with Film and Media Studies
Instructor(s): R. Neutill
Area: Humanities.

Anthropology
AS.070.132. Invitation to Anthropology.
The screen that brings you last night's Instagrams and celebrity gossip also flashes glimpses of melting icecaps and burning rubble. These are complex times for human beings, both exhilarating and deeply unsettling. This course introduces anthropology as a way of reflecting on the challenges of contemporary life around the globe, focusing on themes such as faith, war, technology, money and ecology.
Area: Humanities, Social and Behavioral Sciences.

AS.070.262. Cuban Intellectuals, Cinema, and the State.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Area: Humanities, Social and Behavioral Sciences.

AS.070.265. Anthropology of Media.
We will examine the mediation of contemporary cultural life through technologies such as cinema, television, radio, design, and the Internet, investigating questions of desire, power, identity, and belonging. Student coursework will center on the development of an ethnographic video project.
Area: Humanities, Social and Behavioral Sciences.

AS.070.309. Anthropology of Media.
We will examine the profound mediation of contemporary human life through technologies like film, television, radio, mobile phones, iPods, and the Internet, investigating questions of desire, politics, production, and the virtual. SPECIAL NOTE: There will be a $30 lab fee for the course.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.337. Digital Media, Democracy, and Control.
This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.
Area: Humanities, Social and Behavioral Sciences.

AS.070.346. Cinema and Ethnography.
Films, like ethnographies, stage encounters with foreign worlds. We will examine this parallel by examining, side-by-side, cinematic and anthropological representations of subjects like environmental conflict, urban poverty, religious pilgrimage and media culture.
Area: Humanities, Social and Behavioral Sciences.

History
AS.100.499. Film and Propaganda in Nazi Germany.
By examining a range of cinematic works—from explicitly ideological pseudo-documentaries to entertainment films—this course will explore the transmission of propaganda into the everyday culture of Nazi Germany.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences.

German Romance Languages Literatures
AS.211.174. Media of Propaganda.
Today, promoting a particular political or personal point of view is not viewed as “propaganda,” but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term “propaganda” will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.
Area: Humanities.
AS.211.330. Curating Media Artists in Residence at JHU.
Curating Media Artists in Residence at JHU: students will be closely involved with JHU's Program in Museum & Society, JHU's Center for Advanced Media Studies (CAMS), and the Baltimore Museum of Art (curator Kristen Hileman) in efforts to research and propose new media artists in residence as well as prepare the residency for 2015. This process will include examining cutting-edge media artists whose work will be discussed both in the classroom as well as on sponsored class trips to media art exhibits in DC and NYC. Students will also assist with the CAMS media art residency of acclaimed French artist Camille Henrot in March 2014.
Area: Humanities.

AS.211.375. Community Based Learning - Documentary Production Practicum: "The Cure:" the History and Culture of Breast Cancer.
This class will accompany Bernadette Wegenstein during some months of producing her feature documentary "The Cure" on the history and culture of breast cancer. It will be a hands-on experience with director/producer Bernadette Wegenstein, editor/producer Patrick Wright and cinematographer Allen Moore filming at the GBMC's Breast Care clinic, the Halsted Medical Archives, and some other Baltimore locations. This class will meet once a week, but some weeks the class will consist in the hands-on experience on the field rather than the actual class meeting.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.412. Temps et recit dans le cinema francais.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators' desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.

AS.211.416. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 214.616 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.

AS.213.305. Contemporary German Film.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmark's The Lives of Others (Academy Award for Best Foreign Language Film, 2006), Caroline Link's Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin's Head-On (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel's Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker's Goodbye, Lenin! (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as "Berlin School" or "Nouvelle Vague Allemande". Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this 'counter-cinema' draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 - discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Instructor(s): E. Strowick
Area: Humanities.

This course will examine the location of Berlin at the heart of European and global culture over the course of the 20th century. In addition to its centrality to German national identity and political culture, Berlin between the World Wars was a weigh station and meeting ground for a variety of languages, cultures, and artistic trends—whether expatriates, refugees, nomads, touring companies, or vagabonds. In what ways did these travelers to Berlin change German popular or intellectual culture? In what ways did Berlin function as a center for avant-garde culture, and in what sense did it remain a peripheral space, in the shadow of grander culture centers such as Moscow, Paris, New York, or Hollywood? What lessons might be taken from the supposed glamour of Berlin between the World Wars and the continued attraction of that period for post-Holocaust adaptation and contemplation? These questions, among others, will be considered with reference to a variety of narratives, dramas, and films taken from German, English, Hebrew, Russian, and Yiddish sources. Authors to be considered will include Walter Benjamin, Joseph Roth, Imrsgad Keun, Erich Kästner, Bertolt Brecht, Christopher Isherwood, Sh. Y. Agnon, Vladimir Nabokov, Viktor Shklovsky, and Dovid Bergelson. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Area: Humanities.
AS.213.349. Weimar Cinema: The Golden Age of German Film.
Taught in German. German cinema of the 1920s is regarded as one of the “golden ages” of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception; Expressionism in film; technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema. 

AS.213.361. The Holocaust in Film and Literature.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.367. Contemporary German Film.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 10 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarcks “The Lives of Others” (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s “Nowhere in Africa” (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s “Head-On” (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s “Downfall” (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s “Goodbye, Lenin!” (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or “Nouvelle Vague Allemande”. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among other influences) to develop radical notions of realism and challenge narrative cinema’ draws on the New German Cinema of the 1970s (among other influences) to develop radical notions of realism and challenge narrative cinema. The course will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.214.616. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 211.416 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.

El arte cinematográfico del gran cinesta español será estudiado a través de su obra, vista en partes selectas, obras enteras y dentro del marco escénico provisto por otras películas del cine español. Recommended Course Background: AS.210.326 or demonstrated proficiency in the language.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.

Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas. 
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.398. Zionism: Literature, Film, Thought.
This course studies the relation between Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the history of Zionism and its influence on Israeli culture. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films.Students wishing to do additional work in Hebrew should enroll in section 2 where students will meet for an additional hour at a time TBD and will earn 4 credits for the course.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.
AS.216.412. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.

This course studies literary and cinematic representations of the apocalypse. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and seek to trace the narrative dynamics as well as literary and cinematic means of apocalyptic representations. We will discuss works from various periods, languages, cultures and religions. Among the issues to be discussed: what is the apocalypse, war and the apocalypse, the Holocaust as apocalypse, Biblical apocalypse, post-apocalyptic works, the apocalypse in popular culture, realism, anti-realism and the apocalypse.
Instructor(s): N. Stahl
Area: Humanities.

AS.216.612. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.
Area: Humanities.

Writing Seminars
AS.220.204. Introduction to Dramatic Writing: Film.
Screenwriting workshop. This course will look at the screenplay as both a literary text and blue-print for production. Several classic screenplays will be analyzed. Students will then embark on their own scripts. We will intensively focus on character development, creating "believable" cinematic dialogue, plot development, conflict, pacing, dramatic foreshadowing, the element of surprise, text and subtext, and visual story-telling. Several classic films will be analyzed and discussed (PSYCHO, CHINATOWN, BLADE RUNNER). Students will learn professional screenplay format and write an 8-12 page screenplay that will be read in class and critiqued.
Instructor(s): M. Lapadula
Area: Humanities.

AS.220.337. Intermediate Dramatic Writing: Film.
An intensive workshop focusing on methodology: enhancing original characterization, plot development, conflict, story, pacing, dramatic foreshadowing, the element of surprise, text and subtext, act structure, and visual storytelling. Each student is expected to present sections of his/her "screenplay-in-progress" to the class for discussion. The screenplay Chinatown will be used as a basic text.
Area: Humanities.

Students read six novels by Hammett, Chandler, Cain, Burnett, and Woolrich and view seven films made from these novels by Huston, Hawks, Wilder, Dmytryk, Richards, Walsh, and Farrow. Cross-listed with Film and Media Studies.
Area: Humanities.

Earth Planetary Sciences
AS.270.115. Environmental Photojournalism and Filmmaking in the Era of New Media.
Students will review critical literature focusing on new media, visual representation theory, the relationship between images and social change, the history and typology of environmental photography and film, and an overview of modern environmental history, sustainability issues and environmental problems. Over the course of the semester, students will blend these conceptual frameworks with new media production. Based in Baltimore, students will identify an environmental narrative, document their particular story through photography or film, develop a new media platform through which to communicate that narrative effectively, and write a final paper analyzing their images, narrative and communication strategies using the theoretical frameworks covered throughout the course. The course is designed with an emphasis on independent research and practice, interdisciplinary analysis and application. One hour class time, plus two hours per week of independent field work and media production (times TBD by student groups)
Instructor(s): N. Stahl
Area: Natural Sciences.

Humanities Center
AS.300.312. Imagining Revolution and Utopia.
Examines theories of revolution and utopia in literature, art and film. Primary case study is Russia and the Soviet Union, with comparative look at influential European works and contemporary politics. Topics include gender and the family, terror, communism and communalism, and the avant-garde in art and film. Cross listed with Studies of Women and Gender, and Sexuality, and Film & Media Studies
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies.
Comedy and musical comedy film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare films of the era in a variety of genres (musical, epic, Western, drama), examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.353. Present Mirth: Stages of Comedy.
A comparative survey of presentational comedies from Aristophanes to Beckett on stage and screen, with some attention to to to the vexed question of theories of comedy [no laughing matter].
Instructor(s): O. Mehrgan; R. Macksey
Area: Humanities.
AS.300.356. From Literature to Film - the case of Israeli Cinema.
This course explores the differences and similarities between two artistic mediums: literature and cinema. Our case study will be the interesting transformation of Hebrew fiction into Israeli films-- a dominant phenomenon in Israeli cinema since its very beginning. Our main framework will be narrative theories, but we will also consider the specific historical, ideological and geo-political aspects involved in this transformation. By comparing the two artistic modes and studying the transformation of 5 literary works into films, students will become familiar with the history of modern Hebrew literature, contemporary Israeli cinema, and the relationship between these two artistic mediums. Cross-listed with Jewish Studies, Film and Media Studies, and Writing Seminars
Instructor(s): N. Stahl
Area: Humanities.

AS.300.366. Russian Avant-Garde Cinema.
Russian cinema was born out of the intense artistic experimentation of the fin-de-siècle avant-garde and developed in a climate of dramatic political and cultural change in the twenties and thirties. While subject to draconian censorship in the Soviet period, it nonetheless engaged in active dialogue with the film industries of Western Europe and America and had a lasting impact on world cinema. This course examines the extraordinary flourishing of avant-garde cinema in the Soviet Union in the 1920s and 30s including films by Eisenstein, Vertov, Pudovkin, and Dovzhenko, their theoretical writings, and their far-reaching influence on film and film theory. All readings in English, films subtitled in English.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.367. Seeing Like a Woman.
This seminar examines the problems of female desire, subjectivity, spectatorship and performance in fiction, poetry, memoir and film from a variety of cultures and theoretical perspectives. Readings include: de Beauvoir, Riley, Butler, Cixous, Tolstoy’s “Family Happiness,” Woolf’s Orlando, Larsen’s Passing; Poetry by Moore, Bishop, Plath, Akhmatova, Tsvetaeva and Szymborska. Films by Deren, Ophuls, Hitchcock, Potter, Campion, Akerman, Varda, Denis.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.399. Cinema and Philosophy.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.

Center for Africana Studies
Close examination of films directed by African American filmmakers as well as a focus on historical and cultural representation of African Americans in American film.
Instructor(s): H. Robbins; L. DeLibero
Area: Humanities.

German and Romance Languages and Literatures
The Department of German and Romance Languages and Literatures offers graduate and undergraduate courses in the languages, literatures, and cultures of France, Germany, Italy, Portugal, Latin America, and Spain. The language program includes a wide range of courses from introductory through conversation and composition to civilization. The literature program treats all periods of literature from both historical and critical-theoretical perspectives. These courses emphasize the close reading of texts and modern theories of literary criticism, particularly those based on contemporary philosophy, psychoanalysis, anthropology, and linguistics. In addition, an active program of visiting professors and lecturers complements the core program offered by the faculty-in-residence.

Facilities
The Milton S. Eisenhower Library has collections that provide an ample basis for advanced research in the German and Romance languages and literatures. With the Peabody Library of The Johns Hopkins University in Baltimore and the Library of Congress and other libraries in nearby Washington, a variety of excellent research resources are available to students and faculty.

A major in the department prepares students for teaching language at the elementary level or for graduate work leading to advanced degrees in French, German, Italian, Latin American, Portuguese, or Spanish studies, or in comparative literature. It also provides excellent background for work in fields such as philosophy, history, international affairs, business, law, or medicine. Opportunities are available to study abroad. Students are encouraged to take advantage of these opportunities.

Requirements for the B.A.
Also see Requirements for a Bachelor’s Degree (p. 20).

Currently, the B.A. degree is offered in French, German, Italian, Romance Languages, or Spanish. A candidate for the B.A. degree in the Department of German and Romance Languages and Literatures should have a good command of the spoken language of his or her specialization, and a general familiarity with the literature written in that language. Each major requires a minimum of 24 hours (or eight courses) beyond the first two years of language instruction; please see specific details for each individual major below. The department also recommends that majors take courses in other literatures, history, philosophy, and anthropology.

The student who has had four years of German or a Romance language in high school or two years of German or a Romance language in college normally begins the major with Conversation and Composition (provided they have results commensurate with that level on the placement test) and (where offered) the undergraduate survey of literature. It is recommended that any student majoring in German or a Romance language spend at least one semester of junior year taking university courses in the country of study. Study abroad credit transfer is arranged by the student in consultation with the director of undergraduate studies and/or the relevant undergraduate language program director, and the Office of Study Abroad. In the senior year, a major may be permitted to take courses in the department at the graduate level.

A minor in German or one of the Romance languages is available to undergraduate students in any major. Like the various majors, the minors allow students to develop competence in German or a Romance language while receiving grounding in the culture and literature of that language. Five or six courses in the department beyond the first two
years of language study are required for each minor option (see below for details).

Note about courses taken in study abroad programs:

A maximum of two courses in the upper-level culture or literature fields can count toward the minimum requirements for the major. Other courses can count only as additional transfer credits or as the equivalent of either Introduction à la littérature I or II. In other words, beyond Introduction à la littérature I and II, a minimum of three more upper-level literature or culture courses must be taken in the department, at least two of which must be upper-level literature courses. Any course that a student wishes to substitute for a JHU course must be pre-approved by the student's French advisor or the DUS of French before departure for the study abroad program and re-approved by their French advisor or the French DUS upon return to JHU and upon submission of ALL materials from the course. As courses for which students have obtained pre-approval the semester before leaving for study abroad are often not offered once the student enrolls in France, students must keep in contact with their French advisor or the DUS of French during the initial weeks of their stay to ensure pre-approval for their final program. For further information about study abroad credits, please see the study abroad page on the GRLL website (http://grll.jhu.edu/french/study-abroad).

Minor in French Literature

All minor requirements must be completed with a grade of C or better and may not be taken satisfactory/unsatisfactory. Please see the GRLL department website study abroad page for restrictions concerning counting study abroad courses for minor credit. Student's are expected to consult with either the director of undergraduate studies or their assigned French faculty advisor to review elective course selections. Requirements are:

* Eloquent French and Real French cannot both count toward the minor.
German

German Major

Students are encouraged to declare their intent to major or minor in German in their sophomore year and to make an advising appointment with the Director of Undergraduate Studies to discuss their academic plans, including options for a study abroad semester or year.

Students must complete a minimum of 18 credit hours in German plans, including options for a study abroad semester or year.

Majors are required to complete the Advanced German sequence (AS.210.361 Advanced German I: Cultural Topics of the Modern German-speaking World and AS.210.362 Advanced German II: Contemporary Issues in the German Speaking World, which counts for 6 credits and is a prerequisite for upper level 213.xxx seminars taught in German. Of the remaining 21 credit hours, majors choose courses designated as 210.3xx; 211.xxx (with approval) and 213.xxx. A minimum of 12 credits must be completed in German literature, culture and thought in courses designated as 213.xxx. No more than 6 credit hours of translation courses may be used to fulfill major requirements. All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

The department strongly advises its majors to gain a knowledge of a second foreign language.

Major requirements are as follows:

Minors are required to complete the Advanced German sequence (210.361-362), which counts for 6 credits and is a prerequisite for upper-level 213.xxx seminars taught in German. Of the remaining twelve (12) credits, minors choose courses designated as 210.3xx; 211.xxx (with approval) and 213.xxx. A minimum of three (3) credits must be completed in German literature, culture and thought courses designated as 213.xxx. No more than three (3) credits of translation courses may be used to fulfill minor requirements. All minor requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

Honors in German

The Department of German offers an Honors Program for highly qualified undergraduates. Students must have a minimum GPA of 3.5 to qualify for the program. Students will work on a project in German literature and thought under the guidance of a faculty advisor. The program is completed by a senior essay more comprehensive in scope than a seminar paper. Students interested in the honors program should meet with the Director of Undergraduate Studies no later than the spring semester of their junior year to discuss the requirements and outline the research project to be conducted the following year.

German Minor

Students are encouraged to declare their intent to major or minor in German in their sophomore year and to make an advising appointment with the Director of Undergraduate Studies to discuss their academic plans, including options for a study abroad semester or year.

Students must complete a minimum of 18 credit hours in German beyond Elementary German (210.161-162) and Intermediate German (210.261-262).

Italian

Italian Major

A minimum of eight semester courses (210.3xx-4xx or 214.2xx-4xx) beyond the first two years (four semesters) of language instruction (AS.210.252 Intermediate Italian II) are required for graduation with a major in Italian. Two courses in Italian films or film-making, Italian history, or art history are acceptable toward the minimum eight semester courses required for the major. Two independent studies are acceptable toward the requirements and they must be taken after a literature course in Italian. At least six of the eight courses must be taught in Italian. Any language requirement waived by exam must be documented in the student’s exam by the end of sophomore year. All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

Honors in Italian

The Department of Italian offers an Honors Program for highly qualified Hopkins undergraduate students. Students must have a minimum GPA of 3.5 to qualify for the program. Students will work on a project in Italian literature and thought under the guidance of a faculty advisor. The program is completed by a senior essay more comprehensive in scope than a seminar paper. Students interested in the honors program should meet with the Director of Undergraduate Studies no later than the spring semester of their junior year to discuss the requirements and outline the research project to be conducted the following year.

Italian Minor

The minor requirements consist of successful completion of language courses through AS.210.252 Intermediate Italian II equivalent placement. Six courses beyond the first two years of language instruction must include 210.351-352 (Advanced Italian Conversation and Composition I and II). At least three of these six courses must be in Italian. No more than one independent study is permitted to count for the minor. The independent study must be taken after a literature course in Italian and have the approval of the advisor and written consent from the Director of Undergraduate Studies. All minor requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

Portuguese

The study of Portuguese gives you access to the diverse cultural and literary worlds of Brazil, Portugal and the Portuguese-speaking African
and Asian countries. In fact, Portuguese is the third most spoken European language, and the most widely spoken language in South America. Today, there are more than 200 million native Portuguese speakers throughout the world from Angola to Brazil and from Portugal to the distant island nation of East Timor in the Pacific. The Portuguese program in the Department of German and Romance Languages and Literatures offers not only the three levels of language training, but also a growing number of courses on literature as well as the culture and civilization of Brazil. We do not currently offer a major or minor in Portuguese but Portuguese may be used as the third language in the three-language option of the Romance Languages major.

**Romance Languages Major**

Students may complete a Romance language major in one of two configurations: by specializing in two of the Romance languages offered by the department, or by focusing in two Romance languages and exploring a third language. All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

The options are configured as follows:

**Dual Language Options**

Students must complete the requirements listed below for two languages (French, Italian, or Spanish).

### French

- AS.210.301 Advanced Writing and Speaking in French
- AS.210.302 Advanced Writing and Speaking in French II 3
- AS.212.333 Introduction à la littérature française 3
- or AS.212.334 Introduction à la littérature française II
- AS.212.429 Thesis Prep (by fall of Senior year) 1
- AS.212.430 Senior Seminar 3
- One French course from the AS.211.3xx-4xx or AS.212.3xx-4xx series 3
- Two French courses from the AS.212.3xx-AS.212.4xx series 6

**Total Credits** 19

### Spanish

- AS.210.311 Advanced Spanish I 3
- AS.210.312 Advanced Spanish II 3
- AS.215.231 Introduction to Literature in Spanish 3
- Two Spanish courses from the AS.211.3xx-4xx or AS.215.3xx-4xx series 6

**Total Credits** 15

### Italian

- AS.210.351 Advanced Italian I 3
- AS.210.352 Advanced Italian II 3
- Three Italian courses from the AS.211.3xx-4xx or AS.214.3xx-4xx series 9

**Total Credits** 15

**Language 3**

The student must satisfy their third language requirement as described below:

### French

- AS.210.301 Advanced Writing and Speaking in French 3
- AS.210.302 Advanced Writing and Speaking in French II 3
- AS.212.333 Introduction à la littérature française 3
- or AS.212.334 Introduction à la littérature française II
- One French course from the AS.212.3xx-4xx series 3

**Total Credits** 12

### Spanish

- AS.210.311 Advanced Spanish I 3
- AS.210.312 Advanced Spanish II 3
- AS.215.231 Introduction to Literature in Spanish 3
- One Spanish course from the AS.215.3xx-4xx series 3

**Total Credits** 12

### Italian

- AS.210.351 Advanced Italian I 3
- AS.210.352 Advanced Italian II 3
- Two Italian courses from the AS.214.3xx-4xx series 6

**Total Credits** 12

### Three Language Options

Students must complete the requirements of two languages (French, Italian, or Spanish) as described in the Languages 1 and 2 section and also complete the requirements of an additional language (French, Italian, Portuguese, or Spanish) as described in the Language 3 section.
Spanish Minor

Students may choose one of these two specialized minors: Spanish for the Professions or Spanish Language and Hispanic Cultures. It is also recommended that Spanish minors study abroad for a semester, a summer, or an intersession. With the approval of the Director of the Spanish Language Program, only two Spanish language courses taken abroad (in programs other than Johns Hopkins programs) or at another accredited institution may be applied toward the minor, and only one additional Spanish language course will be approved for credit (but this course will not count toward the minor). For both minors, all minor requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

One course from the 215.2xx-4xx series 3

Total Credits 18

* If a waiver was provided for Advanced Spanish I, students must take one Spanish course from the following: AS.210.316 Conversational Spanish, AS.210.4xx or AS.211.xxx or AS.215.2xx-4xx series.

** If a waiver was provided for Advanced Spanish II, students must take one Spanish course from the following: AS.210.317 Advanced Spanish Composition or AS.215.2xx-4xx series.
Study Abroad in Madrid, Spain
The Department offers the following courses as part of the study abroad program in Madrid, Spain (Universidad Carlos 3):

215.340 Modern Spanish Literature
This course covers some representative Spanish literary works of the 20th century, and is divided into four sections: pre-Civil War texts (1900–1939), post-Civil War texts (1939–1975), the literature of the Transition (1975–1982), and contemporary literature (1982–2008). Ramón de Valle-Inclán, Miguel de Unamuno, Federico García Lorca, Antonio Buero Vallejo and Adelaida García Morales are some of the authors whose work will be studied. Three exams and a short research paper in addition to class attendance and participation are required.

215.342 Twentieth-century Latin American Literature
The object of this course is to familiarize students with representative literary works of authors such as Horacio Quiroga, Juan Rulfo, Ernesto Sábato, Jorge Luis Borges, Pablo Neruda and Garbriel García Márques, among others. Discussions of literary historical tendencies, esthetic conceptions and narrative techniques will be based on close reading of assigned works. Two exams and two papers in addition to class attendance and participation are required.

215.412 Spanish Theater
This course will cover the development of the history of Spanish theater: authors, esthetic tendencies and historical and cultural contexts. From the early period, the reading of Calderón de la Barca’s La vida es sueño introduces the student to Golden Age Spanish Theater, which will be discussed in the context of the corales de comedias, Spanish society and culture. The emphasis of the course, however, is placed on more recent Spanish theatrical works by authors such as Ramón de Valle-Inclán, Alfonso Sastre, Sanchis Sinisterra and Alonso de Santos. A short essay is required on the Golden Age section of the course; a second (voluntary) paper will analyze Valle Inclán’s Luces de bohemia. There will be a final exam. Attendance and participation are required.

215.305 Spanish Art
Spanish Art covers architecture and art from earliest times. The course is divided into three sections: architecture and urbanism in Spain from antiquity to the 20th century, Spanish painting from Manerism to the 19th century, and contemporary painting and sculpture. Visits to various museums in Madrid—The Prado, Reina Sofía, Sorolla—are included and required. Class assignments, attendance, demonstrated interest and class participation count heavily toward the final grade. There is also a final exam.

211.290 Modern Spanish Culture
Spanish culture will be studied in its historical and social contexts between 1931 and 1982. Movies, textbooks, popular music, photography, posters, literary works and censorship and the Movida Madrileña will constitute the material studied before and after Franco’s dictatorship. Visits to museums (Reina Sofia) and monuments (Valle de los caídos) are an integral part of the course. A final paper and exam are required, as is class attendance and participation.

Requirements for the M.A. degree
The department does not accept applications for the M.A. degree as a terminal degree.

German B.A./M.A. Degree
The department offers highly qualified students the option to complete a combined degree in five years. To receive the B.A./M.A. degree, the student must complete advanced courses in German literature and pass the departmental written and oral master’s examinations. Students interested in this option should make an appointment with the Director of Undergraduate Studies no later than the spring of their junior year to discuss the options available to them.

Graduate Ph.D. Requirements
In addition to general university requirements for the Ph.D., the following regulations apply to graduate students in the Department of German and Romance Languages and Literatures:

To be accepted into the Ph.D. program, students must demonstrate by an exceptionally strong academic record that they are capable of advanced study in literature. They will choose French, German, Italian, Latin American, or Spanish literature as the major field of interest. The student will normally take two to three years of graduate courses and devote the fourth year to study and research in the country on which the student’s study concentrates. The well-prepared student can expect to receive the Ph.D. after five years of study. The graduate program in German and Romance Languages and Literatures emphasizes work in three complementary areas: literary history, close textual analysis (including explication de texte), and theory of interpretation. By way of preparing students in a variety of critical schools, the faculty and the visiting professors offer training in the different disciplines pertaining to critical theory, including philosophy, theory of language, psychoanalytic theory, intellectual history, and cultural anthropology.

In addition to the major language, the Ph.D. candidate must demonstrate proficiency in one or two other languages besides English, depending on the specialization. (See below for further information.)

A dissertation proposal, presented to the faculty and students in their section, is required before official admittance to candidacy for the Ph.D. for French, Italian and Spanish graduate students.

French
For students who choose to specialize in an early modern period (medieval, Renaissance, or 17th century), proficiency in Latin is required by the end of the third semester. Students may also choose a minor field: another Romance literature, modern criticism, comparative literature, medieval studies, or some other field connected with the student’s major field.

German
In addition to fulfilling the general university requirements for advanced degrees, candidates for the M.A. must demonstrate fluency in spoken German, be able to write German reasonably well, have a good knowledge of the history of German language and literature, be familiar with the general cultural background, and have read extensively in German literature, particularly in the periods after 1700. During their first two years at Hopkins, candidates for the M.A. degree must pass two topical examinations. After the M.A., two major qualifying papers
are required under the supervision of two advisors, chosen by the candidate, before work on the dissertation can be undertaken.

Italian
In addition to the major language, the student must demonstrate proficiency in two other foreign languages. The student must take a minimum of five semesters of graduate courses. After this period, normally in the third year, the student will take examinations which, if completed successfully, will lead to candidacy for the Ph.D.

Spanish
In addition to the major language, the student must demonstrate proficiency in two other foreign languages. The student must take a minimum of four semesters of graduate courses. After this period, normally in the third year, the student will take four field examinations which, if completed successfully, will lead to candidacy for the Ph.D.

Graduate Study Abroad
The Department encourages and expects graduates student to do research abroad during their program of study. In the French section, an exchange program with the École Normale Superieure offers the opportunity for graduate students to study in Paris, where they are encouraged to participate to research programs at ENS, EHESS, and other Universities; an exchange program with University Paris-Diderot-Paris 7 offers the opportunity for graduate or post-graduate students in French to study and teach in Paris; and the University of Geneva offers a fellowship each year for a grad student in the French section. Ph.D. students in the French section are also encouraged to apply for the Chateaubriand scholarship offered by the Embassy of France. Exchange programs with the FU Berlin (Friedrich Schlegel Graduate School of Literary Studies), the University of Hamburg, and the Humboldt University, offer the opportunity for graduate students in the German section to study in Germany. In addition, the German section offers Max Kade travel grants for research in a German-speaking country. Italian graduate students can take advantage of a wealth of formal and informal contacts with Italian scholars, archives, and institutes. Spanish students may elect to make their fourth year a non-teaching year. After presenting a research proposal to their advisor, with the approval of that advisor and the head of section, they may elect to go abroad for a semester or the entire academic year in order to conduct research essential to their dissertation.

Financial Aid
The department has a number of fellowships for graduate students. Awards include university fellowships, which carry stipends and teaching fellowships currently set at $28,500 per academic year for teaching one section of an undergraduate language course each semester, in addition to remission of tuition fees. All graduate students are expected to do four years of apprentice teaching of elementary and intermediate level undergraduate courses as part of their professional preparation. The amount of classroom teaching required is usually three to four hours a week. Students are admitted for five years, fully funded, subject to annual review to assure satisfactory progress. In addition, stipends (equivalent to that year’s teaching fellowship) are available for study abroad during the third or fourth year.

Fourth- and fifth-year graduate students may also compete for Dean’s Teaching Fellowships, which provide opportunities for the design and teaching of undergraduate courses in literature, cultural studies, or intellectual history.

Graduate students conducting research in Italian studies compete each year for two Charles S. Singleton Travel Grants for study in Italy. This program is administered by the department and is open to graduate students from other departments.

Application Procedures
Prospective graduate students may visit the departmental website at http://grll.jhu.edu for further information on programs and faculty. All questions regarding the programs offered by the department should be emailed to grll@jhu.edu. Prospective students are encouraged to apply online through the secure Graduate Admissions website (https://app.applyyourself.com/?id=jhu-grad).

For current faculty and contact information go to http://grll.jhu.edu/

Italian literature; history and theory of civility

Eduardo González
Latin American literature, film and media studies.

Jacques Neefs
James M. Beall Professor: Genetic criticism, 19th- and 20th-century literature, theory of the novel.

Elena Russo
17th- and 18th-century French literature

Derek Schilling
Modern and contemporary French literature; film esthetics and theory; geocriticism; urban and suburban studies

Harry Sieber
Renaissance and Baroque literature of Spain.

Walter Stephens

Rochelle Tobias
Modern German literature and thought; German-Jewish culture

**Associate Professors**

Andrea Krauss
Modern German thought and literature

Katrin Pahl
German literature and philosophy around 1800, affect and emotion, gender and sexuality, feminist and queer theory, psychoanalysis, rhetoric, comparative literature, literary theory, Hegel, Kleist

**Assistant Professors**

Nadia Altschul
Medievalism, 19th-century studies, postcolonial studies

Sara Miglietti
French Renaissance literature and thought, European intellectual history, Book history, Translation and reception studies, History of political thought, Environmental humanities

Eugenio Refini
Renaissance poetics, rhetoric, and drama; the Classical tradition; Latin and vernacular humanism; the intersections of music and literature

Neta Stahl
Modern Hebrew literature, religion and literature, narrative theory, genre theory

**Faculty Emeriti**

Richard L. Kagan

Lieselotte E. Kurth
Professor Emerita.

Stephen G. Nichols
James M. Beall Professor Emeritus of French and Research Professor: medieval language, literature, and culture, interrelation of literature with history, philosophy, and art history.

Paul Olson
Professor Emeritus.

**Research Professor**

Bernadette Wegenstein
Media theorist; Director: Center for Advanced Media Studies.

**Language Program Directors**

Flavia Azeredo Cerqueira
Portuguese Language Program Director, Lecturer: Portuguese

Kristin Cook-Gailloud
French Language Program Director, Senior Lecturer: French.

Deborah McGee Mifflin
German Language Program Director, Associate Teaching Professor: German

Loreto Sánchez-Serrano

Spanish Language Program Director, CALL Specialist, Associate Teaching Professor: Spanish

Alessandro Zannirato
Italian Language Program Director, Associate Teaching Professor: Italian

**Senior lecturer**

Bruce Anderson
French language

Claude Guillemand
French language

Aranzazu Moreno Hubbard
Spanish language

Maria del Rosario Ramos
Spanish language

Suzanne Roos
French language

Michelle Tracy
Spanish language

Barry Weingarten
Spanish language

Heidi Wheeler
German language

April Wuensch
French language

**Lecturers**

Beatrice Caplan
Yiddish Language and culture.

Julie Lirot
Spanish language

Naiara Martínez Vélez
Spanish language.

Sergio Ruiz-Perez
Spanish Language.

Michelle Tracy
Spanish language

**Associate Teaching Professors Emeriti**

Mary Miglio Bensabat-Ott
Sociolinguistics with a focus on bilingualism

**Postdoctoral Fellows**

Samuel Spinner
Yiddish Literature and Culture

**Joint Appointments**

Earle Havens
Adjunct Associate Professor

Margaret Keck
Professor of Political Science.
Gianna Pomata  
Professor (School of Medicine)

Todd Shepard  
Associate Professor of History.

Susan Weiss  
Professor of Musicology.

**Recent and Current Visiting Faculty**

Leonard Barkan  
Professor (Princeton University).

Francesco Bausi  
Visiting Professor, University of Calabria

Maurizio Campanelli  
Lecturer, Department of Greek, Latin, and Italian Studies, University of Rome La Sapienza.

Juliette Cherbuliez  
Professor of French (University of Minnesota).

James Coleman  
Visiting Assistant Professor, University of Pittsburgh

Evelyn Ender  
Visiting Professor, Hunter College, CUNY

Christoph Menke  
Max Kade Visiting Professor, Frankfurt/Main

Brian Reilly  
Assistant Professor.

Allen Stoekl  
Professor (Pennsylvania State University).

Juliane Vogel  
Max Kade Visiting Professor, University of Konstanz

**Courses**

**AS.210.101. French Elements I.**

Provides a multi-faceted approach to teaching language and culture to the novice French student. The first semester emphasizes listening and speaking, while laying the foundation in grammar structures, reading, and writing. This course is designed for true beginners: Students with any previous background must take the placement test (http://www.advising.jhu.edu/placement_french.php) and receive below 30 (or below 200 on Webcape). Must complete both semesters successfully in order to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis.

Instructor(s): C. Guillemard; Staff.

**AS.210.102. French Elements II.**

Provides a multi-faceted approach to teaching language and culture to the novice French student. The emphasis of the course is an aural-oral proficiency without neglecting the other basic skills of grammar structure, phonetics, reading, and writing. May not be taken Satisfactory/Unsatisfactory. Recommended course background: AS.210.101 or AS.210.103.

Instructor(s): C. Guillemard; Staff.

**AS.210.103. Learner Managed French Elements I.**

This beginner course is specifically designed for students who have had some exposure to French. They must take the mandatory placement test: http://www.advising.jhu.edu/placement_french.php, and receive between 30 and 49. They will cover the first semester of French Elements at a pace suited for “false beginners” with major online components to supplement class instruction. Must complete the year with 210.102 or 210.104 to obtain credit. May not be taken on a Satisfactory/Unsatisfactory basis.

**AS.210.104. Learner Managed French Elements II.**

Continuation of the refresher course AS.210.103, offered for three credits and letter grade. Recommended for self-motivated students who have some knowledge of French and wish to continue their review of the language intensively. Major online component supplements in-class instruction.

**Prerequisites:** AS.210.101 OR AS.210.103 or appropriate test score

Instructor(s): B. Anderson.

**AS.210.111. Spanish Elements I.**

This is an introductory Spanish language course. On completion of this course, the students will have acquired the basic communicative and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Greetings, University Life, Family and Leisure. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements 1 is the foundation for all consecutive Spanish courses. There are no prerequisites for this course. A placement exam is often required to ensure the appropriate level. Students wishing to retain credits for Spanish Elements I must complete Spanish Elements II with a passing grade. Your enrollment in Spanish Elements I will not be considered for approval until you have emailed the Spanish Language Director.

Instructor(s): M. Tracy; Staff.
AS.210.112. Spanish Elements II.
This introductory Spanish language course is a continuation of the content covered in Spanish Elements I. On completion of this course, the students will have further developed the communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Food, Sports, Shopping, Travel, and Health. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements II prepares the students for Intermediate Spanish. May not be taken on a Satisfactory/Unsatisfactory basis. Prerequisite: AS.210.111. No new enrollments permitted after 4th class session. Recommended Course Background: AS.210.162. Prerequisites: AS.210.111 or appropriate webcape score.

Instructor(s): A. Zannirato; Staff.

Summer Abroad Program. First semester college-level Portuguese. Students will develop basic listening, speaking, reading and writing skills. Some cultural readings are included. This course is intended for program participants with little or no prior Portuguese language instruction. Open to Brazil Program applications only. Course must be taken for a letter grade.

Instructor(s): F. De Azeredo Cerqueira.

AS.210.151. Italian Elements I.
This is a four-credit course, and Italian Elements II (AS.210.152) must be completed in the Spring 2014 to receive credit. The aim of the course is to provide students with basic listening, reading, writing, speaking and interactional skills in the language. All classes are conducted in Italian; oral participation is strongly encouraged from the beginning. Students wishing to retain credits for Italian Elements I must complete Italian Elements II with a passing grade. No Satisfactory/Unsatisfactory option.

Instructor(s): A. Zannirato; Staff.

AS.210.152. Italian Elements II.
Course helps students develop basic listening, reading, writing, speaking, and interactional skills in Italian. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course adopts a continuous assessment system (no mid-term and no final).

Prerequisites: AS.210.151 or Placement Exam Part 1.
Instructor(s): A. Zannirato; Staff.

AS.210.161. German Elements I.
Four skills introduction to German language and culture. Develops proficiency in speaking, writing, reading, and listening skills through the use of basic texts, multi-media, and communicative language activities. Online tools required. Both semesters must be completed with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. Tuesday section is a mandatory hour; choose your section based on the MWF time. Conflicts with Tuesday hour can be resolved after start of semester. Language Program Director: Deborah Mifflin. Students wishing to retain credits for German Elements I must complete German Elements II with a passing grade.

AS.210.162. German Elements II.
Continuation to the introduction to the German language and a development of reading, speaking, writing & listening through the use of basic texts and communicative activities. The culture of the German-language countries is also incorporated into the curriculum. May not be taken on a Satisfactory/Unsatisfactory basis. Choose your section based on MWF schedule. Tuesday hour is mandatory but flexible and conflicts with Tuesday hour can be resolved after the start of the semester.

Prerequisites: AS.210.161 or appropriate score on placement exam.
Instructor(s): D. Mifflin; Staff.

AS.210.163. Elementary Yiddish I.
Year-long course. Includes the four language skills, reading, writing, listening, and speaking, and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Students wishing to retain credits for Yiddish Elements I must complete Yiddish Elements II with a passing grade.

Instructor(s): B. Caplan.

AS.210.164. Elementary Yiddish II.
Year-long course that includes the four language skills--reading, writing, listening, and speaking--and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission.

Instructor(s): B. Caplan
Area: Humanities.

AS.210.171. Italian Elements I for Advanced Spanish Speakers.
Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students completing both semesters with a grade of A- or higher will be able to place into Advanced Italian I (AS.210.351)

Instructor(s): A. Zannirato
Area: Humanities.

Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students successfully completing the course with a grade of A- or higher will be allowed to place into Advanced Italian I (AS.210.351)

Prerequisites: AS.210.171 with a grade of A- or higher.
Instructor(s): A. Zannirato
Area: Humanities.
AS.210.177. Portuguese Elements.
This one-year course introduces students to the basic skills in reading, writing, and speaking the language. Emphasis is placed on oral communication with extensive training in written and listening skills. Class participation is encouraged from the very beginning. All classes are conducted in Portuguese. Extensive language lab is required. Students must complete both semesters with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. No previous knowledge of Portuguese is required. Students wishing to retain credits for Portuguese Elements I must complete Portuguese Elements II with a passing grade.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.178. Portuguese Elements II.
This course expands students knowledge of the basic language skills: reading, writing, listening, speaking. It uses a multifaceted approach to immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa. The focus of the course is on oral communication with, however, extensive training in grammar. The course is conducted entirely in Portuguese. Lab work required. Students must complete both semesters with passing grades to receive credit.
Prerequisites: AS.210.177 or equivalent score on placement test.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.201. Intermediate French I.
This course develops skills in speaking, listening comprehension, reading, and writing. Systematic review of language structures with strong focus on oral communication and acquisition of vocabulary; extensive practice in writing and speaking; readings and films from French-speaking countries. Recommended Course Background: AS.210.102 or AS.210.104 or score between 65 and 89 on Placement test I.
Prerequisites: Students who have taken AS.210.203 [ High Intermediate French I ] are ineligible to register for AS.210.201
Instructor(s): S. Roos; Staff
Area: Humanities.

Focus on oral communication; develops skills in oral and written expression, listening comprehension, and reading, with extensive study of films and readings from French-speaking countries. Online component via Blackboard. Continuation of AS.210.201. Recommended course background: AS.210.201 or AS.210.203.
Instructor(s): S. Roos; Staff
Area: Humanities.

A two-semester course offering a systematic review of language structures, conducted exclusively in French. This course is for students who can express themselves more fluently in both their written and oral work and can analyze more difficult texts than in Intermediate French. Students will study authentic texts, including film “text,” and focus on their written and oral skills. Extensive reading and writing is required. Credit will not be given if previously enrolled in AS.210.201-202 or the equivalent. Recommended Course Background: AS.210.102 or appropriate score on Webcape exam.
Prerequisites: Students who have taken AS.210.201 [ Intermediate French I ] are ineligible to register for AS.210.203
Instructor(s): A. Wuensch
Area: Humanities.

AS.210.204. High Intermediate French II.
This course is for students who can express themselves more fluently in both their written and oral work and can analyze more difficult texts than in Intermediate French. Students will study authentic texts, including film “text”, and focus on their written and oral skills. Taught exclusively in French. Credit will not be given if previously enrolled in AS.210.201-AS.210.202 or the equivalent. Recommended Course Background: AS.210.201, AS.210.203, or Webcape score between 420 and 480.
Prerequisites: Students who have taken AS.210.202 [ Intermediate French II ] are ineligible to register for AS.210.204
Instructor(s): A. Wuensch
Area: Humanities.

AS.210.207. German Pronunciation & Diction Practice.
One-credit course focusing on pronunciation and diction. Students will improve their accent, intonation, sentence melody, and will gain confidence while speaking and reading aloud. Individual feedback and strategies for improvement through regular audio recordings. May be taken Satisfactory/Unsatisfactory. Not for major/minor credit.
Prerequisites: AS.210.161 or above
Instructor(s): D. Mifflin; Staff
Area: Humanities.

This 5-week intensive course will cover the material of Intermediate French II. Through examining excerpts of popular French theater plays (by Camus, Sartre, Feydeau, Ionesco, and others), this class proposes to 1) improve French speaking and writing skills (pronunciation, intonation, vocabulary, syntax, argumentative reasoning, creative writing) 2) understand the linguistic nuances and socio-cultural practices expressed in the texts 3) learn the basic tools of acting (body language, vocal projection, physical expressivity, emotional expression, stage direction, improvisation, etc.). The course will include watching filmed representations of plays, as well as a performance at the end of the term. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based exercises.
Prerequisites: AS.210.201 OR AS.210.205 or appropriate placement.
Instructor(s): K. Haklin
Area: Humanities.

This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of “word games” (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. May be taken concurrently with AS.210.205 or AS.210.305.
Instructor(s): B. Anderson; Staff
Area: Humanities.
This 5-week intensive course will cover the material of Intermediate French I with an emphasis on listening comprehension and speaking: an attractive selection of classic and contemporary French movies (Les Intouchables, Manon des Sources, La Vie en rose, Sugar Cane Alley, among others) will enhance students’ acquisition of the language and will deepen their understanding of French and francophone cultures. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based grammar followed by group discussion on the movies. Creative role-play activities will develop students’ fluency.

**Prerequisites:** AS.210.102 or appropriate placement; placement exam link available at grll.jhu.edu
Instructor(s): C. Guillemard
Area: Humanities.

**AS.210.211. Intermediate Spanish I.**
Intermediate Spanish I is a comprehensive study of Spanish designed for students who have attained an advanced elementary level in the language. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish I will prepare students for the next level of Spanish (Intermediate Spanish II). May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.

**Prerequisites:** AS.210.112 or appropriate placement exam score.
Instructor(s): B. Weingarten; Staff
Area: Humanities.

**AS.210.212. Intermediate Spanish II.**
Intermediate Spanish II is a comprehensive study of Spanish designed for students who have attained a mid-intermediate level in the language or who have completed Spanish 212. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish II will prepare students for the next level of Spanish (Advanced Spanish I). May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.

**Prerequisites:** AS.210.211 or appropriate webc ape score.
Instructor(s): B. Weingarten; Staff
Area: Humanities.

**AS.210.250. Program Abroad: Objective Portuguese - Level II.**
Summer Abroad Program. Third semester college-level Portuguese. Students develop basic listening, speaking, reading and writing skills. Cultural readings included. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.177 & 210.178. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira.

**AS.210.251. Intermediate Italian I.**
Taught in Italian. Course continues building on the four essential skills for communication presented in Italian Elements courses (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken Satisfactory/Unsatisfactory.

**Prerequisites:** AS.210.152 or placement exam
Instructor(s): A. Zannirato; L. Proietti; Staff
Area: Humanities.

**AS.210.252. Intermediate Italian II.**
Taught in Italian. Course continues building on the four essential skills for communication presented in Intermediate Italian I (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken Satisfactory/Unsatisfactory.

**Prerequisites:** AS.210.251 or appropriate placement exam scores (Parts I II).
Instructor(s): A. Zannirato; Staff
Area: Humanities.

**AS.210.261. Intermediate German I.**
Taught in German. This course continues the same four-skills approach (speaking, writing, reading, and listening) from the first-year sequence, introducing and practicing more advanced topics and structures. Expansion and extension through topical readings and discussion and multi-media materials. Online tools required. Language Program Director: Deborah Mifflin

**Prerequisites:** AS.210.162 or placement exam.
Instructor(s): H. Wheeler; Staff
Area: Humanities.

**AS.210.262. Intermediate German II.**
Taught in German. This course is designed to continue the four skills (reading, writing, speaking and listening) approach to learning German. Readings and discussions are topically based and include fairy tales, poems, art and film, as well as readings on contemporary themes such as Germany’s green movement. Students will also review and deepen their understanding of the grammatical concepts of German.

**Prerequisites:** AS.210.261 or placement exam.
Instructor(s): H. Wheeler; Staff
Area: Humanities.

**AS.210.263. Intermediate Yiddish I.**
This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.164 or equivalent, or two years of German and permission of instructor.
Area: Humanities.

**AS.210.264. Intermediate Yiddish II.**
Continuation to Intermediate Yiddish I. This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.263 or instructor permission.
Instructor(s): B. Caplan
Area: Humanities.
AS.210.266. German Conversation.
This course is designed for intermediate and above students who wish to improve their conversational and oral presentational language skills. The syllabus aims to provide useful, relevant language and necessary discourse structures to hold conversations and presentations on varied topics of an everyday, as well as academic nature. Students will practice German to build confidence, develop fluency, and improve pronunciation and accuracy. Short texts, audio and films will provide the basis for discussion. Students’ fields of study and interests will be incorporated into the syllabus and tasks will be matched to the ability level of the students enrolled. Recommended Course Background: AS.210.262 or two years of college German or equivalent. May be taken concurrently with other courses in German. May be taken Pass/Fail. Not for major or minor credit.
Instructor(s): D. Mifflin.

More advanced training in the skills of the language with emphasis on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. All classes are conducted in Portuguese. Extensive language lab is required. May not be taken on a Satisfactory/Unsatisfactory basis.
Prerequisites: AS.210.178 or instructor approval.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

This course is conducted entirely in Portuguese. Emphasis is placed on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. Lab work required.
Prerequisites: Prerequisite: AS.210.177 or AS.210.178 or placement test.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

This course is designed for highly motivated undergraduate and graduate students who want to SPEAK Portuguese. Conversation sessions provide intensive work on communication skills through discussion on issues raised in films, news media & music. Grammar will be reviewed as needed outside of class with tutors or TA, freeing class time for more communicative activities. May not be taken on a Satisfactory / Unsatisfactory basis. Recommended Course Background: one semester of Portuguese (AS.210.177), or Placement test.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.301. Advanced Writing and Speaking in French.
This very interactive third-year language course proposes, in the shape of animated class discussions, to 1) read fictional and non-fictional texts through the French explication de textes approach 2) review and develop grammar and conjugation skills and 3) learn an array of new vocabulary as well as idiomatic expressions used in everyday speech. Focus will be placed on improving language skills through an individualized review of grammar and vocabulary. Language Program Director: Kristin Cook-Gailloud
Instructor(s): A. Labat; K. Cook-Gailloud; L. Cariou; Staff
Area: Humanities.

AS.210.302. Advanced Writing and Speaking in French II.
Designed to further reveal the most fascinating and fearsome features of both written and spoken French, this unconventional course takes into account the unique profile of Johns Hopkins’ undergraduates by addressing their ability to generate powerful and new ideas. To that effect, this course proposes to involve students directly in the process of learning and assessing by raising participatory questions such as “What is the best way to learn this grammar point? What type of test will actually allow me to learn the material so I don’t forget it the next day? How can I move towards fluency without feeling discouraged?”
In full knowledge of our students’ ability to analyze and explore these questions, but also of the exceptionally high challenges they face today, this experimental, self-reflective course endeavors to get rid of needless (and unproductive) stress, and invite them to take pleasure in discovering how to better learn and master the French language.
Instructor(s): A. Wuensch; B. Anderson; Staff
Area: Humanities.

AS.210.306. Medical French.
This interactive course is designed to provide students with specific linguistic tools used in medical and public health fields, as well as a comprehensive understanding of health care systems in the French and francophone world. Through a wide range of media (newspaper articles, scenes from TV series, excerpts of historical and literary texts) and group discussions, we will focus on topics such as physical and mental health, consultation and diagnosis, hospitalization, specialized fields (epidemiology, neurology, psychiatry, etc.) and deontology.
Prerequisites: Prereq: AS.210.201 OR AS.210.202 or equivalent or permission (kacg@jhu.edu)
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.210.309. The Sounds of French.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of “word games” (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. Recommended Course Background: AS.340.101-AS.340.102 or equivalent; AS.210.301 (may be taken concurrently).
Instructor(s): B. Anderson; Staff
Area: Humanities.
AS.210.311. Advanced Spanish I.  
This course is a comprehensive study of the Spanish language focused on the continuing development of students' communicative abilities and their knowledge of Hispanic cultures. Students will expand their use of basic structures of Spanish with a special emphasis on more difficult grammatical and vocabulary aspects, and further improve both their oral and written skills. Students will sharpen their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component with class participation and three exams. Upon successful completion of this course, students will have acquired extended complex language tools that facilitate proficiency in Spanish and its use in various professional contexts. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.  
Prerequisites: AS.210.212 or AS.210.213 or appropriate placement exam score.
Instructor(s): A. Hubbard; Staff
Area: Humanities.

AS.210.312. Advanced Spanish II.  
This course is thorough review of the Spanish language focused on the development of students' communicative abilities and their knowledge of Hispanic cultures. Students will both expand their knowledge of the basic structures of Spanish, with special emphasis on more difficult grammatical and vocabulary aspects, and further improve on oral and written skills. Students will increase their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired more complex language tools to become proficient in Spanish and its use in various professional contexts. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.  
Prerequisites: AS.210.311 (Advanced Spanish) or appropriate placement exam score.
Instructor(s): A. Hubbard; Staff
Area: Humanities.

AS.210.313. Medical Spanish.  
Medical Spanish is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in medicine and health-related fields in Spanish-speaking environments. The student will be able to participate in conversations on topics such as contrasting health systems, body structures, disorders and conditions, consulting your doctor, physical and mental health, first-aid, hospitalization and surgery on completion of this course. In completing the course's final project students will apply, synthesize, and reflect on what has been learned in the class by creating a professional dossier individualized to their professional interests. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.  
Prerequisites: 210.311 (Advanced Spanish I) or appropriate webcake score
Instructor(s): M. Ramos; Staff
Area: Humanities.

Students will increase their vocabulary and practice grammar structures closely related to trade and business practices in the public and private sectors. All language skills are equally emphasized. Highly recommended to students majoring in Business and International Relations. There will be an intensive online component. No Satisfactory/Unsatisfactory option. Students will increase their vocabulary and practice grammar structures closely related to trade and business practices in the public and private sectors. All language skills are equally emphasized. Highly recommended to students majoring in Business and International Relations. There will be an intensive online component. No Satisfactory/Unsatisfactory option. Language Program Director: Loreto Sanchez-Serrano
Prerequisites: AS.210.311 or appropriate S-Cape score
Instructor(s): M. Ramos; Staff
Area: Humanities.

AS.210.315. Spanish for International Relations.  
Spanish for international relations is an advanced examination of grammar and an analysis of international relations' topics in Spanish. By completion of this course the student will have developed the ability to read, critically discuss and demonstrate mastery of political and socio-economic issues in Spanish-speaking environments. Potential topics include a survey of the professions in international relations, NGOs in Latin America, intellectual property, cultural diplomacy, remesas, regional coalitions and treaties, and the environment. Class presentations and final projects will allow students to apply, synthesize, and reflect on what has been learned in the class by participating in a global simulation that will include a written exercise individualized to their professional interests. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session  
Prerequisites: AS.210.311 or appropriate placement exam score.
Instructor(s): M. Ramos; Staff
Area: Humanities.

AS.210.316. Conversational Spanish.  
Conversational Spanish surveys high-interest themes, discusses short films by contemporary Hispanic filmmakers and offers a thorough review of grammar. The student will be able to participate in conversations on topics such as personality traits, social media, political power, art and lifestyles on completion of this course. Conversational skills mastered during the course apply to all careers interconnected by Spanish. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.  
Prerequisites: AS.210.311 (Advanced Spanish I) or appropriate placement exam score.
Instructor(s): M. Ramos; Staff
Area: Humanities.
This third-year course is a hands-on and process-oriented introduction to discussion and compositional analysis. On completion of this course, students will have improved their Spanish writing skills in various types of compositions they might be expected to write in academic settings and in real-life formats such as film reviews, letters to the editor, cover letters, etc. The course also focuses on refinement of grammar and vocabulary use. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.
Prerequisites: AS.210.312 or appropriate placement exam score.
Area: Humanities.

¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instils vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session. Co-listed with AS.211.319
Prerequisites: AS.210.311 or appropriate placement exam score.
Instructor(s): M. Ramos
Area: Humanities.

AS.210.350. Program Abroad: Objective Portuguese - Level III.
Summer Abroad Program. Fifth semester college-level Portuguese. Students further improve conversation and comprehension proficiency. Develop reading and writing skills through literary analysis and grammar review. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.277 & 210.278. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.351. Advanced Italian I.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons and interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final). Taught in Italian. Year course; must complete both semesters for credit. No Satisfactory/Unsatisfactory option. Language Program Director: Alessandro Zannirato
Prerequisites: AS.210.252 or placement exam
Instructor(s): A. Zannirato; Staff
Area: Humanities.

AS.210.352. Advanced Italian II.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons, interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.351 or appropriate placement exam scores (Parts I, II and III).
Instructor(s): A. Zannirato; Staff
Area: Humanities.

AS.210.361. Advanced German I: Cultural Topics of the Modern German-speaking World.
Taught in German. Topically, this course focuses on defining moments in cultural history in German speaking countries in the 2nd half of the 20th century. Films, texts and other media provide a basis for discussing events in post-war Germany from 1945 to 1989. A review and expansion of advanced grammatical concepts and vocabulary underlies the course. Focus on improving expression in writing and speaking. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.262 or placement exam.
Instructor(s): D. Mifflin; Staff
Area: Humanities.

Taught in German. Topically, this course focuses on contemporary issues such as national identity, multiculturalism and the lingering social consequences of major 20th century historical events. Readings include literary and journalistic texts, as well as radio broadcasts, internet sites, music and film. Students read a full-length novel. Emphasis is placed on improving mastery of German grammar, development of self-editing skills and practice in spoken German for academic use. Introduction/Review of advanced grammar.
Prerequisites: AS.210.361 or equivalent score on placement test.
Instructor(s): D. Mifflin; Staff
Area: Humanities.

Taught in German. Course is designed to familiarize students with the vocabulary and standards for doing business in Germany. Taking a cultural approach, students read texts and engage in discussion that elucidate the works of business, commerce & industry in Germany, the world’s third largest economy. Emphasis is placed on vocabulary expansion and writing as it relates to business.
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362.
Instructor(s): H. Wheeler; Staff
Area: Humanities.
Taught in German. This course is designed to provide language training in German tailored to students of science & engineering. Germany has long been a world leader in engineering, most notably in chemical and mechanical engineering. Over the past decades, Germany also has taken a lead in environmental sciences and information technology. In addition, Germany is now becoming an increasingly attractive place to pursue degrees in the technical fields. This course will provide practice and expansion in all language skill areas: analysis of texts, hands-on-activities, preparation of presentations, and discussion of topics. Specific areas of interest to the course members will be taken into consideration for the selection of materials. [Does not replace 210.362 as prerequisite for upper level courses or as major requirement.]
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362 OR EQUIVALENT OR PLACEMENT EXAM
Area: Humanities.

This course will provide students who have completed at least two years of Yiddish with the opportunity to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.368. Advanced Yiddish II.
Continuation of Advanced Yiddish I (AS.210.367). Students will continue to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Prerequisites: AS.210.367
Area: Humanities.

AS.210.369. Yiddish Texts I.
This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing).
Prerequisites: AS.210.368 or permission of instructor.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.370. Yiddish Texts II.
Continuation of Yiddish Texts I. This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing).
Instructor(s): B. Caplan
Area: Humanities.

AS.210.371. From the yidishe gas to the Yiddish Farm: Yiddish Identity and Yiddish Community.
In premodern Ashkenaz, the vernacular Yiddish was an important factor maintaining a distinct Jewish communal identity. With the advent of modernity, and the abandoning of Yiddish by some Jews as their daily language, the choice to speak Yiddish and to use it as a vehicle of modern cultural production became a distinct strand in the web of new Jewish identities. In this course, students will develop a sociolinguistic understanding both of the place of Yiddish in premodern Jewish society, and ways in which the language was -- and is -- seen as essential to living a Jewish life in the modern world. Since this is an advanced language course, readings, discussion and written work will be in Yiddish. Grammar will be reviewed as necessary, according to the needs of the students.
Instructor(s): B. Caplan
Area: Humanities, Social and Behavioral Sciences.

This course will allow students with advanced Yiddish language skills to design their own reading list, in consultation with the instructor, in order to deepen their understanding of an area of Yiddish culture of special interest while at the same time continuing to improve their language skills. Texts may include literary works, scholarship, the press, and archival materials. All discussion and written responses will be in Yiddish.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.391. Advanced Portuguese Language & Literature I.
This third-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read one or two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. Lab work is required. All classes are conducted in Portuguese.
Prerequisites: AS.210.278 or instructor approval.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.392. Advanced Portuguese: Language and Literature II.
This course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read one or two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. The course is conducted entirely in Portuguese. No satisfactory/unsatisfactory.
Prerequisites: AS.210.391 or equivalent score on placement test.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.405. Teaching French in Public School-Community Based Learning.
A Community-Based Learning (CBL) language course for upperclass students that: 1) establishes a mutually beneficial relationship between JHU students, a neighboring Elementary School, and their common community; 2) combines academic components (linguistic, pedagogical and social) with the experiential work with the community partner as a way to reinforce learning. Students participate in weekly meetings in French on campus to prepare for their classes and teach twice a week to 2nd, 3rd, or 4th graders at the Elementary school. Recommended course background: AS.210.301 or AS.210.302.
Area: Humanities.
AS.210.411. Translation for the Professions.
Spanish Translation for the Professions surveys the field of contemporary translation theory and provides practice of translation from English to Spanish. Translation exercises may include comparing and contrasting texts of literature, medicine, health, law, technology, politics, and journalism. Students will identify and differentiate terminology specific to these various fields and will focus on practicing correct uses of the grammatical structures relevant to the translation of both English and Spanish. In the course’s final projects students will apply, synthesize, and reflect on what has been learned in the class by completing a translation exercise individualized to their professional interests. Strategies of communication mastered in this course will help students of Spanish throughout their careers, in that achievement of the course objectives will help students discern, translate, and evaluate the usefulness of translations in different professional settings. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.
Prerequisites: Prereqs: AS.210.313 OR AS.210.314 OR AS.210.315 -
Instructor(s): M. Ramos; Staff
Area: Humanities.

AS.210.412. Spanish Language Practicum-Community Based Learning.
This fourth-year course involves a specially designed project related to the student’s minor concentration. On completion of this course, the student will be able to use the Spanish language in real world contexts. The student-designed project may be related to each student’s current employment context or developed in agencies or organizations that complement student’s research and experimental background while contributing to the improvement of his/her language proficiency. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.
Prerequisites: AS.210.411
Instructor(s): L. Sanchez
Area: Humanities.

AS.210.413. Corso di Perfezionamento.
This forth-year course is an in-depth examination of the Spanish grammar, including a wider range of idiomatic expressions and usages than students might have previously encountered. On completion of this course, students will be able to achieve the ACTFL Advanced-Mid to high level in oral and written expression as well as in reading and listening skills. The course will also help to prepare students for the DELE Intermediate or Superior levels, offered by the Instituto Cervantes. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session.
Prerequisites: (AS.210.311 AND (AS.210.312 OR AS.210.317)) AND (AS.210.313 OR AS.210.314 OR AS.210.315)
Instructor(s): L. Sanchez
Area: Humanities.

This interactive, writing intensive course places emphasis on: 1. Building linguistic tools that will help students reach the highest level of proficiency (advanced lexical, stylistic and idiomatic expressions, linking expressions used in complex sentences, stylistic and grammatical differences between French and English) 2. Enhancing analytical skills through French “Explication de textes” (close reading method) 3. Developing individual style through creative writing
Instructor(s): K. Cook-Gailloud; Staff
Area: Humanities.

AS.210.450. Program Abroad: Objective Portuguese - Level IV.
Summer Abroad Program. Emphasis on the development of communication skills: the ability to comprehend both written and spoken texts, adit o speak, read, and write in Portuguese with native-like proficiency. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira.

This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts, and recognize implicit meaning, 2) produce clear, well-constructed, detailed texts on complex subjects 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option. Recommended Course Background: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Prerequisites: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Instructor(s): A. Zannirato.

AS.210.462. Introduction to German Literature & Culture, 1900 - 1945.
This course is designed to introduce students to the analysis literary and cultural topics. A variety of 20th century texts and visual media will form the basis for discussion of literature and cultural phenomena specific to the time period. This semester will focus on the European capitals of Zurich, Vienna, and Berlin, thereby offering a “European” perspective on literary, cultural, and political events after 1900. Continuities between and differences amongst the three German speaking countries will be investigated. Attention is given to improving student writing. Readings, discussion, and written assignments in German. Recommended Course Background: AS.210.361-AS.210.362
Area: Humanities.

Instructor(s): K. Cook-Gailloud.

Instructor(s): K. Cook-Gailloud; Staff
Area: Humanities.

AS.210.541. Italian Independent Study-Language.
Prerequisites: AS.210.252 or higher or placement exam score Parts 1 and II.
Instructor(s): A. Zannirato
Area: Humanities.

Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

Instructor(s): D. Mifflin
Area: Humanities.
Required for all in-coming teaching assistants in the Department of German and Romance Languages, this course involves a series of workshops which will focus on an overview of the tenets of second language acquisition (SLA) and the research which informs current teaching practice. Students will both study the current state of the L2L profession and look at different methods and techniques for effective second language teaching and learning. The focus of the course will be on the practical applications of the theoretical foundation. This is a full year course meeting 6 times per semester.
Instructor(s): A. Zannirato; D. Mifflin; L. Sanchez
Area: Humanities.

The goal of this course is 1) to familiarize students with different theoretical and practical approaches of language teaching and learning and 2) to understand how these approaches can be used to create a rich learning environment. Participants are expected to engage actively in classroom discussions based on assigned readings, as well as observe classes taught by other instructors in their department. Required for all in-coming teaching assistants in the French section.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.210.615. Adquisición del español como segunda lengua.
This course will aim to clarify for future teachers the important aspect of the Spanish language syntax, related to cultural aspects, second language acquisition, issues of technology and assessment to prepare them for the task they will face in their own language classes. The course will include a review of several topics of Spanish grammar, concepts of second language acquisition and applied linguistics. The course also will help to prepare students for the DELE Superior level offered by the Instituto Cervantes if they opt to take it.
Instructor(s): L. Sanchez
Area: Humanities.

This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts and recognize implicit meaning, 2) produce clear, well-constructed, detailed texts on complex subjects, 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option. Students should have a satisfactory GTA language diagnostic exam score.
Instructor(s): A. Zannirato.

AS.210.661. Reading and Translating German for Academic Purposes.
Taught in English. This is the first semester of a year-long course designed for graduate students in other fields who wish to gain a reading knowledge of the German language. Seniors who intend to do graduate study in other disciplines are also welcome. Instruction includes an introduction to German vocabulary and grammatical structures as well as discussion of relevant translation practices. The goal of the course is for students to gain confidence in reading a variety of texts, including those in their own fields of study. No knowledge of German is assumed. Seniors & Graduate students only.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.662. Reading & Translating German for Academic Purposes II.
Taught in English. Seniors & Graduate students only. This course is designed for graduate students in other departments who wish to gain reading knowledge of the German language and translation practice from German to English. This course is a continuation of the Fall semester. Focus on advanced grammatical structures and vocabulary. For certification or credit.
Prerequisites: AS.210.661 or permission of instructor.
Instructor(s): H. Wheeler; Staff
Area: Humanities.

AS.210.700. German Language Teaching Practicum I.
Provides methodological and practical support and oversight for graduate student instructors teaching Deutsch als Fremdsprache in the American university context. Two-semester sequence, includes orientation during the week before semester begins. Required for German Graduate Teaching Assistants in the first year of their teaching in the program.
Instructor(s): D. Mifflin.

AS.210.701. German Language Teaching Practicum II.
Required for German Graduate Teaching Assistants in the first year of their teaching in the program. Second semester of a two-semester sequence.

AS.211.104. Freshman Seminar: Weimar on the Pacific: German Exile Culture in the United States.
Freshmen seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.
AS.211.174. Media of Propaganda.
Today, promoting a particular political or personal point of view is not viewed as “propaganda,” but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term “propaganda” will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.
Area: Humanities.

This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.205. Cosmic Imagination from Dante to Borges.
Since time immemorial humankind has looked to the skies for clues as to our origins, our destiny, and the nature of existence itself. In some ways, one of the hallmarks of western science has been a story of viewing the cosmos in ever greater clarity and detail. Yet the very nature of the universe—its massive size, the distance and obscurity of its farthest reaches—requires the active intervention of our imaginations to picture it, no matter how powerful the technologies we use. In this course we will look at how western cultures from the middle ages to the present have deployed the imaginative tool of literature to try to grasp the ungraspable, and how those attempts in some cases helped prepare intellectuals and scientists to make very real advances in understanding the universe.
Instructor(s): W. Egginton
Area: Humanities.

AS.211.207. Waves of Feminism through Film and Media.
This course will examine the movements known as second- and third-wave feminism as expressed in film and other media since the 1950s. Second-wave feminism—influenced in part by the French philosopher Simone de Beauvoir but driven by social and economic factors in the US and the post-war, industrialized west—departed from the practical exigencies of suffrage that drove the first wave before it and became concerned with defending the identity of women from being defined in terms of patriarchal norms. From popularized images of working women in US television series to the formalist experimentation of the France’s New-Wave in cinema, the media of the sixties and seventies absorbed and explored many of second-wave feminism’s central themes and critiques. Largely a critique of the perceived Euro-centrism of the second wave, third-wave feminism, coined in the early nineties, focused on the experience of women of color and those from the developing world who did not share the relatively privileged backgrounds of their predecessors. The second part of the course will examine how film and media since the nineties has incorporated and reflected this new inclusiveness, and striven to tell stories of women from a broad spectrum of backgrounds. We will take advantage of the visit to Hopkins by acclaimed media artist Sharon Hayes to examine how her own media practice has been shaped by successive waves of feminist thought and has in turn affected feminism. Other works will include the films of Agnés Varda and Shirin Neshat.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.209. DADA! Avant-Garde Exorcism.
This course surveys the Dada art and literature movement of the early 20th century in Zurich, Berlin, Paris, and New York. This course compares the visual, performative, and literary arts of Dada through both primary and secondary sources in order to further understand the political and aesthetic theories of this school of thought and their interactions with their unique historical moment, so dominated by mechanization, brutality, and war.
Instructor(s): J. Pelcher
Area: Humanities.

Among the organs of the human body the breast has a special place. A marker of sex, of eroticism, of life, motherhood, even the distinction of the mammalian class of vertebrates, the breast carries as much meaning for humanity as it does vital function. The breast, in other words, is a sign and site where Western culture believes life as such to be situated. Sadly, it is also vulnerable to its virulent and deadly form of what has been recently termed “the emperor of all maladies”: cancer. The loss of the breast can provoke a form of “castration anxiety.” This course will explore the history of the breast as symbol of sex and life, along with the cancer that affects it not merely as a medical condition, but as a powerful symbol in culture, art, and literature.
Instructor(s): B. Wegenstein
Area: Humanities.
AS.211.214. Writing & Thinking About Food.
How do you write about food? Is it possible to describe taste? What role does gastronomy have in literature? Taking advantage of the popularity of “foodie” movement and recent scholarly interest in the role of food in culture, this course considers these questions by examining a wide variety of genres from a comparative perspective. Authors include Epicurus and his commentators, Proust, Brillat-Savarin, Shakespeare, Byron, Cervantes, Neruda, Ferran Adrià, Carolyn Korsmeyer and others.
Instructor(s): A. Sheeran
Area: Humanities.

AS.211.221. Italian Matters Italian Manners.
This is an introductory course to Italian culture relying on a tradition of books of conduct including the Middle Ages, the Renaissance, and today.
Instructor(s): P. Forni
Area: Humanities.

AS.211.225. Inverted Worlds: Topsy-Turvy Perspectives.
This course will examine the concept of the inverted world in art, literature and philosophy. It will focus on the aesthetic forms and ideas most closely associated with the overturning of values. Satire and parody make a mockery of existing institutions and cultural norms. At the same time they claim to provide an insight into the modern human condition. Thus, in this course, we will analyze modernity adopting the lens of the inverted world in order to see what needs to be turned upside down in order to be right side up again.
Instructor(s): E. Edelmann
Area: Humanities, Social and Behavioral Sciences.

AS.211.228. Filming Change: French Society through Documentary.
Since the 1960s France has gone through radical changes impacting all aspects of social life, such as race/class dynamics, union/workplace politics, and gender relations. Filmmakers, specifically those working in a documentary mode, have confronted contemporary events in their complexity and offered some of the most compelling accounts of them. This course will introduce students to the recent history of French documentary film, focusing on its capacity to reflect and to fuel social and historical change. Films by Rouch, Varda, Resnais, Marker, Depardon.
Instructor(s): C. Benaglia
Area: Humanities, Social and Behavioral Sciences.

AS.211.235. Panorama of German Thought I.
Taught in English. German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition are Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed the study of cultural, historical, and social phenomena as well as of literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This two-semester survey course will highlight important topics of German Thought, e.g. the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. While the first semester (Fall) covers until 1850 (from Luther to Hegel/Kierkegaard), the second (Spring) focuses on Modern German Thought after 1850 (from Marx to Luhmann). Meets with AS.213.235
Instructor(s): E. Strowick
Area: Humanities.

AS.211.236. Panorama of German Thought II.
Panorama of German Thought from Nietzsche to Habermas. Course will examine major thinkers in nineteenth and twentieth-century German thought with emphasis on the response to Enlightenment philosophy, the critique of reason, the questions about the autonomy of the subject and the search for new individual and collective identities. Reading will include traditional philosophical texts (Nietzsche, Cassirer, Heidegger, Adorno, Habermas) as well as works in anthropology (Gehlen, Scheler), sociology (Simmel, Weber), psychology (Mach, Freud), political theory (Marx, Schmitt) and aesthetics (Benjamin, Warburg, Panofsky). This course is a continuation of Panorama of German Thought I, though the first semester is not a prerequisite for the second. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.211.237. Literature and Medicine.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s “In the Cold” and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: “Philadelphia” (Jonathan Demme, 1993), “Melancholia” (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.
AS.211.253. Freshman Seminar: Why is the Fiddler on the Roof?: The Shtetl in Modern Jewish Culture.
The most familiar portrayal of the shtetl for an American audience is the setting of the Broadway musical Fiddler on the Roof, where the shtetl, or market town, is a bastion of traditional Jewish life. But what exactly was a shtetl? How did traditional Jews live there, and how were their lives affected by the sweep of modernity? How was the Yiddish language, spoken by all shtetl jews, both a repository of tradition and an agent of change? How do representations of the shtetl—from corrupt backwater to pious haven—reflect the concerns of Jews from the nineteenth century up to our own day? Through memoir, literature, film and painting, this course will examine actual lives lived in the shtetl, as well as a selection of the many artistic representations of it. All readings will be in English.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.265. Panorama of German Thought.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): R. Tobias; Staff
Area: Humanities.

AS.211.271. Taking Risks: Literature and Film.
This course will explore concepts of risk in literary texts, philosophy, sociology, and film and discuss to what extent the effort to avoid risk generates knowledge and influences representations of the world. We will think of risk in the realm of accidents, abysses (of thought), and economy by constantly reflecting upon its use of rhetorical devices. Materials include: Henry James, Martin Heidegger, Friedrich Nietzsche, Franz Kafka, Georges Bataille, "The Wolf of Wall Street" and others.
Instructor(s): N. Tolksdorf
Area: Humanities, Social and Behavioral Sciences.

AS.211.276. The Culture of Italian Football.
This course will use football (soccer, or calcio) as a key to understanding fundamental aspects of Italian culture and society. Through football, you will become familiar with the character of Italian cities, with their rivalries, and with their social and linguistic landscapes. We will explore dialects, different social classes, and immigration in Italy, all of which are reflected in the choice of supporting one football club or another. You will also study the use of football in Italian literature, cinema, and music as a metaphor for life, temporality, and for man’s quest for happiness. By studying the connection between clubs/cities and the presence of football in Italian arts, you will understand the close relationship, which permeates all of Italian culture, between artistic expression and local identity. No knowledge of Italian is required, but this will be a chance to read Italian texts for those who can. However, everyone will learn some Italian words and expressions.
Instructor(s): F. Brenna
Area: Humanities, Social and Behavioral Sciences.

This course will track uses of “the underground” in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.211.402 OR HA.211.402
Instructor(s): R. Powers
Area: Humanities.

AS.211.312. Acting French: learning about French language and culture through theater.
Performing a play in a foreign language not only improves language skills, but develops the ability to express oneself through the body and to communicate both efficiently and elegantly. Using excerpts from popular French stage plays by Camus, Sarthe, Feydeau, Ionesco, Pagnol and Rostand among others, this course aims to help students to
1) improve French pronunciation, intonation, syntax, and vocabulary;
2) appreciate and understand linguistic nuance and socio-cultural practices; 3) learn fundamentals of acting that carry over into everyday communication, from body language and vocal projection to the expression of emotion and improvisation. Students will view filmed representations of select plays as well as present an end-of-semester staging. Recommended course background: AS.210.301.
Instructor(s): K. Cook-Gailloud; M. Alhinho
Area: Humanities.

AS.211.318. Women in Pre-Modern French Literature.
This course will examine the changes in the relationship of women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d’Epinay and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities.
AS.211.319. ¡Salsa! The Afro-Antillean song.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instils vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. Concepts learned in this course will be directly applicable to careers linked to intercultural and international relations while also apply to multiple careers in media, music industry and dance. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Instructor(s): M. Ramos
Area: Humanities.

AS.211.329. Contemporary Society on Stage: Koltès, Lagarce, Mouawad.
This course proposes to examine six plays by three leading figures in contemporary French theater to see how the social changes that occurred in the last three decades are viewed and expressed in the French-speaking world. We will closely read two plays by each author as well as excerpts by these and other major playwrights. Works by Jean-Luc Lagarce (Derniers remords avant l'oubli) and Bernard-Marie Koltès (Combat de nègre et de chiens) will enable us to see how issues such as homosexuality, new family relationships and urban violence deeply transformed French society in the 80s and 90s, while Incendies and Forêts by Wajdi Mouawad will allow us to ask how these issues, along with immigration, decisively shape today’s global society. Using literary analysis to reflect upon the contemporary moment and its institutions, the course will incorporate to the extent possible performance recordings and films based on the plays. Course taught in French. Scenes from the plays can be performed at the end of the term.
Prerequisites: AS.210.302
Instructor(s): F. Champy
Area: Humanities.

AS.211.330. Curating Media Artists in Residence at JHU.
Curating Media Artists in Residence at JHU: students will be closely involved with JHU’s Program in Museum & Society, JHU’s Center for Advanced Media Studies (CAMS), and the Baltimore Museum of Art (curator KristenHileman) in efforts to research and propose new media artists in residence as well as prepare the residency for 2015. This process will include examining cutting-edge media artists whose work will be discussed both in the classroom as well as on sponsored class trips to media art exhibits in DC and NYC. Students will also assist with the CAMS media art residency of acclaimed French artist Camille Henrot in March 2014.
Area: Humanities.

AS.211.340. Topics in French Cinema: Amour, Sexualité, Mariage.
What is the nature of desire? Where does it come from, and what determines and conditions it? What do we fall in love with when we fall in love? An exploration of a series of films that ask essential questions about the psychological, political, and social stakes of human love, desire and sexuality, and about the institution of marriage. Focus on discussion and analyses of film sequences in class and on oral presentations. Students will have the opportunity to progress in vocabulary and oral expression. Films studied include works of Truffaut, Godard, Bunuel, Kechiche, Haneke, Breillat and Ophuls.
Instructor(s): S. Roos
Area: Humanities.

AS.211.341. Power and Resistance: Approaches to French Political Thought.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.211.346. 20th Century French Theater and Performance.
Taught in English. In this course, we will survey the themes and techniques that marked the theory and practice of theater in France in the 20th century. As we make our way from the early century avant-garde movements such as Futurism and Surrealism to Antonin Artaud’s Theater of Cruelty, from the Theater of the Absurd and mid-century existentialists to the post-1968 turn to collective authorship, our goal will be twofold: first, we will examine the prominent plays of the era as literary products, generated from within specific socio-political contexts. Second, we will attempt to re-construct their three-dimensional lives in performance, how they looked, sounded and felt to those watching. In addition, we will examine how French theater went from being a playwright-centered institution to a director-centered one, and how acting styles transitioned from psychological realism to a focus on the human body. Course materials will include plays, theoretical texts on the theater, as well as directors’ manifestos, rehearsal notes, set and costume designs and filmed recordings of theatrical events. Cross-listed with Theatre Arts and Studies THIS COURSE CAN COUNT EITHER AS A 212 (LITERATURE--AS.212.346) OR AS A 211 (CULTURE) COURSE FOR THE FRENCH MAJOR AND MINORS.
Instructor(s): E. Fisek
Area: Humanities.
AS.211.358. Writing the Great War: French Literature and World War I.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.

AS.211.367. La Nouvelle Vague.
Exploration des films les plus importants et des principaux cinéastes de la Nouvelle Vague française; introduction à l’analyse et à l’appréciation des films. Conducted in French. Recommended Course Background: AS.210.301 or permission of the instructor. Recommended screenings Tuesday 7:30pm. $40 lab fee.
Instructor(s): S. Roos
Area: Humanities.

AS.211.371. Kafka and the Kafkaesque.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term “kafkaesque” refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka’s poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka’s prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka’s impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka’s oeuvre while developing skills in critical analysis and literary close reading.
Area: Humanities.

AS.211.375. Community Based Learning - Documentary Production Practicum: “The Cure:” the History and Culture of Breast Cancer.
This class will accompany Bernadette Wegenstein during some months of producing her feature documentary “The Cure” on the history and culture of breast cancer. It will be a hands on experience on the field rather than the actual class meeting. Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.211.380. Modern Latin American Culture.
Taught in Spanish. This course will explore the fundamental aspects of Latin American culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Instructor(s): Staff
Area: Humanities.

AS.211.385. Documentary Production Practicum: Community Based Learning: Raqs Media Artists in Residence.
This course accompanies the New Delhi based media art collective raqs, consisting of 3 artists, during their first residency in Baltimore during Spring 2013. Students will be helping prepare the media artists’ solo exhibition opening at the BMA on February 20, and be involved in a production workshop offered through the JHU Digital Media Center. Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.390. Modern Spanish Culture.
This course will explore the fundamental aspects of Spanish culture from the nineteenth to the twenty-first centuries. This course will offer a general survey of the history of Spain and will discuss texts, movies, songs, pictures, and paintings in relation to their social, political, and cultural contexts. This course will be of particular interest for students planning on spending a semester abroad in Spain—specially for those students going to the JHU Fall Semester in Madrid, at Carlos III University. Taught in Spanish. Recommended Course Background: AS.210.311 or appropriate Webcape score.
Instructor(s): L. Sanchez; N. Altschul; S. Castro-Klaren; Staff
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.211.397. Program Abroad: Brazilian Culture & Civilization.
Summer Abroad Program. Intensive language and culture program offered in Rio de Janeiro, Brazil. The Culture and Civilization course strengthens students’ language skills while deepening their understanding of Brazilian history and culture. Pre-req: 1 semester of Portuguese or 1 year of Spanish. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.211.401. La France Contemporaine I.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites, and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301 or AS.210.302 or permission of instructor.
Instructor(s): B. Anderson; Staff
Area: Humanities.
AS.211.402. La France Contemporaine II.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor.
Instructor(s): A. Wuensch; Staff
Area: Humanities.

AS.211.406. The City in Early Modern French Literature.
Prerequisites: AS.212.333 OR AS.212.334 or permission
Instructor(s): W. Anderson
Area: Humanities.

The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We'll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré.
Area: Humanities.

AS.211.412. Temps et recit dans le cinema francais.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators' desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.

AS.211.416. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 214.616 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.

AS.211.420. Real French: From Slang to Sophistication.
This class will teach the realties of the French language, ranging from slang to the most sophisticated forms of expression. We will study excerpts of films, literary works, essays, political speeches, etc., in order to examine which level of speech is at work. Course also provides students with linguistic tools that will help them reach the highest level of written proficiency, as well as develop their personal stylistic voice.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

This course proposes to examine the momentous world exhibition organized in Paris in the year 1900 along with the new technologies and concepts it introduced into the modern world: the first subway line in Paris, talking films on giant screens, escalators, moving walkways, the first large-scale exhibit of the rising Art Nouveau, the first display of Picasso's painting on French territory, and even a presentation on the idea of television at the Palais de l'électricité. Our discussions will include the social, political, cultural, and artistic events that led to this pivotal moment which constituted an emblematic stepping stone between the old world and the new.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.211.427. Libertins, Athées, Imposteurs.
An exploration of the clandestine culture of free-thinkers, hedonists and rakes in France in the 17th and the 18th centuries and their strategies for undermining the theological grounding of morality, politics, sexuality and gender. Readings from Descartes, Cyrano de Bergerac, Molière, Diderot, Sade, Laclos and others. Meets with AS.212.427
Instructor(s): E. Russo
Area: Humanities.

AS.211.430. L'Affaire Dreyfus.
This course proposes to look at persuasive strategies that were engaged during the Dreyfus Affair in order to either incriminate or discriminate the Jewish captain falsely accused of having betrayed the French army. Course will focus on the socio-political events that framed the Dreyfus Affair (anti-Semitism in 19th-century France, caricatures and polemical writings in the press, the consequences of the Franco-Prussian War and of the Commune, the bipolar division that split French society into Dreyfusards and anti-Dreyfusards), as well as its long-term effects (the rise of the extreme right, the creation of the "intellectual", the consolidation of Zionism which ultimately led to the creation of a Jewish state). Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.211.431. Desecrating the Sacred Heart: Science, Religion and Art in Fin-de-Siècle France.
This interactive course analyzes the stakes underlying the construction of Paris' controversial Sacré-Coeur Basilica in Montmartre. In the light of heated 19th-century debates on moral authority that opposed religious believers and partisans of a secular state inspired by a scientific ethos, we will consider how the advocates of both sides use specific rhetorical techniques in the public domain (newspaper articles, caricatures, speeches) and artistic devices (paintings, literary writings) to convince their audience of the validity of their claims. The course will open up onto contemporary debates that show similar ethical conflicts.
Instructor(s): K. Cook-Gailloud
AS.211.469. Limit-Experience, Limit-Texts.
Among the many functions of literary narrative is that of describing and domesticating extreme experience, from the horrors of war and incarceration to religious ecstasy, madness, and acute illness. Writers have long exploited the extreme to probe the reaches of human consciousness and the social pacts that differentiate transgressive from normal behaviors. Drawing on the work of 20th century French-language authors of novels, short stories, and witness accounts (Breton, Camus, Chraibí, Delbo, Duras, Guibert, Le Clézio, Volodine), this course will explore how narrative strategies relate to extreme states, situations, and conditions. At the same time, through excerpts from experimental writers from Surrealism to l’écriture féminine, we will also consider how language itself can create a manner of limit-experience by questioning the boundaries of the readable. Course in French.
Instructor(s): D. Schilling
Area: Humanities.

AS.211.470. French Debate Series: Joan of Arc - Past & Present Interpretation.
In 2012, we celebrated the 600th anniversary of the birth of French heroine Joan of Arc. Through close readings of primary sources such as the proceedings of her trial (which led to her burning at the stake at 19), as well as animated discussions around her representations in the arts (painting, sculpture, literature, music, and cinema), this course proposes to explore past and present implications of her heroic feats in the political, religious, and cultural realms of French society. We will consider in particular how Joan of Arc has been recuperated as an emblem of French nationalism since the Revolution (for example during WWII, where both the Vichy regime and the Resistance brandished her as their national heroin), as well as in the context of the upcoming French 2012 presidential elections. This class strongly emphasizes the acquisition of oral linguistic skills and vocabulary through discussion and debate. Recommended Course Background: AS.210.301 or AS.210.302 or special permission from Kristin Cook-Gailloud (kacg@mac.com) or Claude Guillemand (claude@jhu.edu)
Instructor(s): C. Guillemand
Area: Humanities.

AS.211.471. Jules Verne.
An overview of the corpus of the author of the "Voyages extraordinaires". The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in the new human sciences and their relationship to the development of cultural models. A disabused, even pessimistic thinker, he provides a unique entryway into the fin-de-siècle French mind set. Works to be read will include "Cinq semaines en ballon", "Voyage au centre de la terre", "De la terre à la lune", "20,000 lieues sous les mers" and "L’Île mystérieuse", "Le Tour du monde en quatre-vingt jours", "Robur le conquérant" and "Le Maître du monde", "le Sphinx des glaces", "Le Château des Carpathes", and "Paris au XXe siècle". Class will be taught in French. This course can be taken either as a 211 Culture course or 212 Literature course 212.
Prerequisites: AS.212.334
Instructor(s): W. Anderson
Area: Humanities.

AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century.
2016 marks the bicentennial of Rossini’s irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart’s The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais’ controversial “Figaro trilogy”, stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretensions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano’s The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick’s Barry Lyndon (1975) and Milos Forman’s Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.
Instructor(s): E. Refini
Area: Humanities.

AS.211.475. Inside the Writer’s Laboratory.
How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the “laboratory” of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.
Instructor(s): S. Miglietti
Area: Humanities.

AS.211.501. Independent Study-French Culture.
Instructor(s): Staff
Area: Humanities.

AS.211.791. Film Theory and Critical Methods.
Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas. Cannot be taken if student took any of AS.212.791, AS.213.791, AS.214.791, or AS.215.791
Prerequisites: Cannot be taken if student took any of AS.212.791, AS.213.791, AS.214.791, or AS.215.791
Instructor(s): D. Schilling
Area: Humanities.

AS.211.875. GRLL CPT Research Practicum.
Instructor(s): Staff
Area: Humanities.

AS.211.894. Independent Study - Portuguese Culture.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.
AS.212.115. Dead Men Talking.
How do the dead speak to the living? This question compels the texts and films that this course covers to investigate the words of the dead and the debate surrounding the death penalty, from the guillotine to lethal injection. We will examine the works of Chateaubriand, Stendhal, Balzac, Hugo, Benjamin, Camus, and Wahnich as well as the films of Kubrick and Robbins, among others. All materials will be available in English and French. Instructor(s): A. Alexander Area: Humanities.

AS.212.127. Freshman Seminar: 18th Century Theater.
An introduction to 18th century theater and performance. Using philosophical and critical texts by Aristotle, Chapelain, Diderot, and others, we will examine a series of plays and other works for theatrical performance. Course has a performance requirement. Taught in English. Dean’s Prize Freshman Seminar Instructor(s): O. Sabee Area: Humanities.

AS.212.203. Presence and Absence in Modern French Poetry.
In this one-credit intersession course, we will explore the tension between silence and language, between nothingness and plenitude, bringing into question how both presence and absence are intimately related to literary creation. Although we will primarily focus on the modern poetry of Charles Baudelaire, we will also read poems written by Mallarme, Rimbaud, and Apollinaire. All materials will be provided in both English and French. Instructor(s): J. Neefs Area: Humanities.

This course will not aim at drawing the exhaustive literary landscape of French Middle Ages, neither will it be a Comparative Literature or History class. It may be considered a gateway to French Medieval literature, given that the Modern Fantasy has obviously improved the last decades, the latter being built as a rewriting of Medieval themes and Western European folklore. Looking at texts originally written in Old French, including prose and poetry, but also at the French Medieval iconography, we will try to understand the old roots of the Modern and so popular (but sacrificing) Fantasy Literature. Basic French will be required. Instructor(s): M. Alhinho Area: Humanities.

A failed bourgeois marriage, a scandalous love affair with a Russian diplomat, a crippling state of jealousy, a clandestine abortion: are these topics worthy of literature? Are telling these stories constitutive of a feminism-informed writing? Publishing in the aftermath of the second wave of feminism, Annie Ernaux’s autobiographically grounded books consistently depict experiences of wider concern for women. In this course, we will question the efficacy of four of Ernaux’s testimonial works in stimulating a socially significant discussion around issues relevant to women’s everyday lives, while also considering their place within the canon, whether for feminist, life-writing, or simply literary merit. Instructor(s): R. Powers Area: Humanities.

The City of Light also has a dark side. This course will explore how Paris catacombs, sewers, and underground metro system have captured the imagination of writers and artists since the nineteenth century. Readings will include excerpts from Leroux’s Le Fantôme de l’opéra and Hugo’s Les Misérables, available in both English and French. Films and documentaries will be shown in French with subtitles. Students will be evaluated based on class participation and a final project. Instructor(s): R. Powers Area: Humanities.

The classic detective novel scenario: a crime is committed, a body, discovered, but... whodunit? Untangling two French Caribbean novels consecutively, we attempt to answer just that question. But, what happens if the texts provide no clear solution, point to no definitive culprit? We will consider these unsolvable detective novels as exemplary of a community-based approach to storytelling, asking how we as readers might nevertheless penetrate their mystery. Area: Humanities.

AS.212.301. Evil in French Literature.
In his book, Literature and Evil, Georges Bataille points out that “a rigorous morality results from the complicity in the knowledge of Evil, which is the basis of intense communication”. But what is Evil? What is the nature of this communication? What forms of knowledge does Evil elicit? How is Evil represented? Are there any changes in the representation of Evil throughout centuries? How does it pervade the structures of our daily life? How does literature encompass the idea of Evil? Through a close reading of a variety of French literary texts ranging from medieval (La Chanson de Roland, Tristan et Yseut), Renaissance (Gargantua et Pantagruel), early-modern (Médée, Candide) up to 19th century (Flaubert, Baudelaire) and 20th century (Proust, Ionesco) fiction, we will explore various facets of Evil and its emotional, ethical, cultural, religious, and political impact on the human self and body. Instructor(s): A. Marculescu.

This course will track uses of “the underground” in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola. Prerequisites: AS.212.334 OR HA.212.334 Instructor(s): R. Powers Area: Humanities.
AS.212.317. Thousand Faces: Rousseau’s Literary and Philosophical Writings.
Jean-Jacques Rousseau is not only responsible for the romantic discovery of Self (Les Confessions) or one of the ideological fathers of the French Revolution (Le Contrat Social), or the author of passionate, best-selling novels (La Nouvelle Héloïse). He was also a musician, a playwright, a theorist of education and a botanist. The class will explore various tracks, using Rousseau’s works as an opportunity to understand the century to which he belongs and to explore such topics as: autobiography, Revolutionary ideology, musical forms. This course will be taught in French.
Instructor(s): A. Roge; Staff
Area: Humanities.

AS.212.318. Women in Pre-Modern French Literature.
This course will examine the changes in the relationship of women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d’Épinay and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities.

Did women warriors exist or are they just a (sexual) fantasy? Did men and women writers represent female warriors differently? Can women warriors be considered as women from a philosophical and biological point of view or does warfare diminish their femininity? In this course we will analyze the representation of these heroines based on Italian and French epics, e.g. Ariosto’s "Orlando furioso" (1532), Voltaire’s ‘La pucelle d’Orleans’ (1758), and on iconography and French and Italian opera. Philosophical and historical texts from the Antiquity (e.g. Diodorus of Sicily) and from Queer and Gender studies (e.g. J. Butler) will help us analyze the function of women warriors in these literary texts. The course is based on interactive discussions and can be held in English.
Instructor(s): V. Denzel
Area: Humanities.

AS.212.324. Vive la Difference!: Belonging and Difference in Contemporary France.
This course studies the impact that globalization and mass migration have had on France’s cultural identity by focusing on how recent developments in the arts illuminate the multiethnic nature of French society. Although France has been a “melting pot” in historian Gérard Noiriel’s words for over a century, the official culture of the nation remains skeptical of multiculturalism, highlighting instead an abstract image of the French citizen, shorn of cultural, ethnic, racial or religious differences. In this course, we will examine novels, performance pieces, plays, films and documentaries that challenge, live with and explore this norm, allowing us to ask: What is the relationship between diversity and political community? How do different aesthetic forms imagine belonging, citizenship and diaspora? The syllabus may include work by Mehdi Charef, Yamina Benguigui, Nasser Djemai, Leila Sebbar, Merzak Allouache, Laurent Cantet and Abdellatif Kechiche as well as theoretical readings from Pierre Nora, Dominique Schnapper and Pierre Tévianian. Recommended Course Background: AS.212.333-AS.212.334 or permission of instructor.
Instructor(s): E. Fisek
Area: Humanities.

AS.212.327. Mise et remise en scène: Performing in the 18th Century.
An introduction to texts and performance practices of the eighteenth century French theater, and an exploration of challenges and creative approaches to its restaging today. Course has a performance requirement.
Instructor(s): O. Sabee
Area: Humanities.

AS.212.329. Contemporary Society on Stage: Koltès, Lagarce, Mouawad.
This course proposes to examine six plays by three leading figures in contemporary French theater to see how the social changes that occurred in the last three decades are viewed and expressed in the French-speaking world. We will closely read two plays by each author as well as excerpts by these and other major playwrights. Works by Jean-Luc Lagarce (Derniers remords avant l’oubli ) and Bernard-Marie Koltès (Combat de nègre et de chiens) will enable us to see how issues such as homosexuality, new family relationships and urban violence deeply transformed French society in the 80s and 90s, while Incendies and Forêts by Wajdi Mouawad will allow us to ask how these issues, along with immigration, decisively shape today’s global society. Using literary analysis to reflect upon the contemporary moment and its institutions, the course will incorporate to the extent possible performance recordings and films based on the plays. Course taught in French. Scenes from the plays can be performed at the end of the term.
Prerequisites: AS.210.302
Instructor(s): F. Champy
Area: Humanities.

AS.212.333. Introduction à la littérature française.
Introduction à la Littérature française I and II propose reading and discussion of texts of various genres from the Middle Ages to the 21st century. The two semesters may be taken in either order. Introduction à la littérature française I will cover readings and discussion of texts of various genres from the 14th to the 18th century. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Recommended Course Background: AS.210.301-AS.210.302 or at least one semester of AS.210.301-AS.210.302 with a grade of A and written permission of the instructor.
Instructor(s): S. Miglietti; Staff; W. Anderson
Area: Humanities.

AS.212.334. Introduction à la littérature française II.
Readings and discussion of texts of various genres from the Middle Ages to the 20th century. The two semesters (212.333 and 212.334) may be taken in either order. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Introduction à la littérature française II covers the time period from the Revolution to the present.
Prerequisites: AS.210.301 OR AS.210.302 or at least one semester of AS.210.301 or AS.210.302 with a grade of A and written permission of the instructor.
Instructor(s): D. Schilling
Area: Humanities.
Just who was Edgar Allan Poe, and who is he today? This course explores how and why a multitude of 19th-century French writers constructed Poe as an author. Through selected works from Hugo, Baudelaire, Mallarmé, and Verne, to be read alongside Poe’s original texts, we will study the means by which these figures projected uniquely French versions of this mysterious American writer the better to stake out their own literary revolutions. By exploring versification, translation, adaptation, and the role of the proper name, we will examine the broad literary history that underlies contemporary understandings of Poe. No knowledge of French is required.
Instructor(s): A. Alexander
Area: Humanities.

AS.212.341. Power and Resistance: Approaches to French Political Thought...
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.343. Literature and Science in France 1750-1880.
This course will investigate changes in the meaning and function of the literature of science and of the natural world during the period 1750-1850 (N.B. All course readings, assignments, and discussions will be conducted in French). Dean’s Teaching Fellowship.
Prerequisites: Advanced French I and II (AS.210.301-302), Introduction to French Literature I or II (AS.212.333 or 334)
Instructor(s): H. Roman
Area: Humanities.

AS.212.346. 20th Century French Theater and Performance.
Taught in English. In this course, we will survey the themes and techniques that marked the theory and practice of theater in France in the 20th century. As we make our way from the early century avant-garde movements such as Futurism and Surrealism to Antonin Artaud’s Theater of Cruelty, from the Theater of the Absurd and mid-century existentialists to the post-1968 turn to collective authorship, our goal will be twofold: First, we will examine the prominent plays of the era as literary products, generated from within specific socio-political contexts. Second, we will attempt to re-construct their three-dimensional lives in performance, how they looked, sounded and felt to those watching. In addition, we will examine how French theater went from being a playwright-centered institution to a director-centered one, and how acting styles transitioned from psychological realism to a focus on the human body. Course materials will include plays, theoretical texts on the theater, as well as directors’ manifestos, rehearsal notes, set and costume designs and filmed recordings of theatrical events. Cross-listed with Theatre Arts and Studies. THIS COURSE CAN COUNT EITHER AS A 212 (LITERATURE--AS.212.346) OR AS A 211 (CULTURE) COURSE FOR THE FRENCH MAJOR AND MINORS.
Instructor(s): E. Fisek
Area: Humanities.

AS.212.358. Writing the Great War: French Literature and World War I. 3 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.

AS.212.362. Ecrire l’héroïsme au féminin [Writing Heroism in the Feminine].
How can we define a heroine? What distinguishes heroines from mere female protagonists? Who are the main heroines to have marked the French literary tradition? This course examines how writers have transformed the notion of heroism inherited from Ancient Greece and Rome to lend it different and distinctly gendered shapes in the figure of the female hero: bravery, scandal, crime, sacrifice, nationalism. Focus will be placed on the evolution of the concept from the 17th century to the end of the 20th century in novels and plays by Racine, Madame de Lafayette, Prevost, Balzac, Maupassant, Anouilh, Wittig, and Condé. Recommended Course Background: AS.212.333 or AS.212.334.
Instructor(s): L. Cariou
Area: Humanities.

AS.212.365. Twisted Roots: Writing “Creole” in the French Caribbean. 3 Credits.
This course examines rootedness and hybridity in contemporary literary and critical works from the French Caribbean, exploring the act of writing “Creole” as illustrative of innovative thought-constructs. French students will read and write in French and should register for section 02; other students will read translations and should register for section 01. Discussions will be conducted in English.
Instructor(s): R. Loescher
Area: Humanities.
Distant places have always exerted a particular fascination on the human mind. Many classics of European literature feature journeys to foreign lands, whether real or imaginary: from More’s Utopia and Ariosto’s Moon, to Bacon’s New Atlantis and Swift’s Lilliput. Through a range of examples from early modern France, we will explore the complex relationship between travel and the literary imagination. Topics to discuss include: the style, status, and models of travel literature; cultural encounter, Otherness, and self-representation; imaginary places and social critique. Readings will include fictional texts like Cyrano’s Estats et empires de la Lune, genuine travel reports such as Champlain’s Voyage au Canada, and works that skilfully mix fiction and reality, as in Montesquieu’s Lettres persanes.
Instructor(s): S. Miglietti
Area: Humanities.

AS.212.400. Flaubert’s L’Éducation sentimentale, a Prose Novel for Modern Time.
Undergrads need instructor permission. Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty years after Madame Bovary. Seminar will be taught in French and English. L’Éducation sentimentale edition required: GF Flammarion, 2003.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.401. The Literature of Medieval Cathedrals.
To understand medieval cathedrals we must “read” them through the literature of the age. This course will examine the medieval literature that illuminates some of the great cathedrals of twelfth- and thirteenth-century France. The texts studied will be in modern French translation and will come from a variety of genres: lyric poetry; romance; epic; devotional literature; biography and autobiographical confession. Cannot be taken Satisfactory/Unsatisfactory. Taught in French. Recommended Course Background: AS.210.302
Instructor(s): B. Reilly
Area: Humanities.

AS.212.404. The City in Early-Modern French Literature.
The city is an integral theme, even a privileged character, in the literary and speculative texts of the 17th and 18th century. It is often understood to stand opposition to the royal court and embodies the spirit of the people in a way related to the modern notion of “solidarity”.
This course will look at a number of examples of the peculiar status of the French city (especially Paris) from the late Renaissance to the First Empire. Selections from Marguerite de Valois, Mme de Sévigné, Montesquieu, Diderot, Rousseau, Turgot, Raoul, Réti of la Bretone, Mercier, Saint-Just, Robespierre, Napoléon Bonaparte, with perhaps a coda from Balzac or Michelet. Recommended Course Background: AS.212.333-AS.212.334 or permission of instructor.
Instructor(s): W. Anderson
Area: Humanities.

The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well as a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioiz, Saint-Saëns, Fauré. Co-listed with AS.211.410
Area: Humanities.

AS.212.412. Temps et recit dans le cinema francais.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.

AS.212.417. Textes off/on the Terror from the French Revolution.
Taught in French. During the first half of the semester we will take advantage of the renewed interest in scholarship on the Terror to deal with some of the most famous examples of Revolutionary rhetoric, focusing especially on the trial of Louis XVI and the late speeches of Robespierre. During the second half of the semester we will read literary works produced during the Terror and accounts of the Terror from authors such as Balzac, Dumas, and Michelet. We will be asking questions such as: What was the Reign of Terror and to what extent was its project dependent on public discourse? Why and how does the nature of public oratory change? What happens to definitions of “the literary” and of authorship in a terroristic context?
Area: Humanities.

AS.212.421. Textes et Performances: le théâtre français du 17e au 19e siècle.
Le théâtre français, des classiques aux romantiques. There will be a performance component to this course. Recommended co-registration with 210.312. Acting French. For more information, see http://www.wilda.org/Courses/CourseVault/Undergrad/18thTheaterUG/SyllabusTheater.html
Area: Humanities.

AS.212.427. Libertins, Athées, Imposteurs.
An exploration of the clandestine culture of free-thinkers, hedonists and rakes in France in the 17th and the 18th centuries and their strategies for undermining the theological grounding of morality, politics, sexuality and gender. Readings from Descartes, Cyrano de Bergerac, Molière, Diderot, Sade, Laclos and others. Meets with 211.427
Instructor(s): E. Russo
Area: Humanities.
This course will meet three times during the Fall semester to enable all French majors to prepare their thesis subject, thesis bibliography, and abstract prior to the writing of the Senior Thesis (AS.212.430) in the Spring semester of their senior year. This course is required of all French majors and must be taken during the Fall semester of their senior year. Schedule TBA upon consultation with the class list, as there are only three group meetings. The rest of the meetings are in individual appointments with the DUS or another chosen French professor.

Prerequisites: Prerequisite or Corequisite: AS.210.417; Prerequisite: AS.212.333 OR AS.212.334
Instructor(s): Staff
Area: Humanities.

AS.212.430. Senior Seminar.
An in-depth and closely supervised initiation to research and thinking, oral and written expression, which leads to the composition of a senior thesis in French. Recommended Course Background: AS.212.429.
Instructor(s): Staff; W. Anderson
Area: Humanities.

AS.212.434. Reading Poetry.
Reading poetry is one of the best ways to learn and practice the complex richness of a language. Through close readings and interpretation of prominent poets in French from the Early Modern to the Contemporary period, this course addresses the variations of Poetry through history and its function and importance in society. What do changes in poetic forms mean? How do tensions between verse and prose in modern Poetry work? What makes writing and reading Poetry interesting? Students will compose and present their own "French Poetry Anthology." Course taught in French, though students may also investigate the translatability of Poetry.
Instructor(s): J. Neefs
Area: Humanities.

AS.212.441. Jules Verne.
An overview of the corpus of the author of the "Voyages extraordinaires". The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in utopianism, by philosophical optimism, by the dissolution of language, etc.) and renewed, regenerated (through the sense of the absurd, postmodern immanence, irredeemable violence) – and indeed, there has been a flourishing of the genre in France in the late XXth century. Through readings of a selection of plays, both ancient and modern, and theoretical works, we'll examine the metamorphosis of the tragic hero and heroine, the issues of gender, moral responsibility and the management of the spectator's emotions. Readings from Sophocles, Aristotle, Corneille, Racine, Hegel, Kierkegaard, Anouilh, Sartre, Césaire, Koltès, Gably. Course taught in French.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.443. Marcel Proust, Literature and Art.
Proust's great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust's Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Meets with 212.773, 300.406 and 300.684.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

An overview of the corpus of the author of the "Voyages extraordinaires". The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in the new human sciences and their relationship to the development of cultural models. A disabused, even pessimistic thinker, he provides a unique entryway into the fin-de-siècle French mind set. Works to be considered include "Château des Carpathes", "Le Maître du monde", "le Sphinx des glaces", "Le Tour du monde en quatre-vingt jours", "Robur le conquérant" and "Le Maître du monde", "le Sphinx des glaces", "Le Château des Carpathes", and "Paris au XXe siècle". Class will be taught in French. This course can either be taken as a 211 Culture course or a 212 Literature course.
Instructor(s): W. Anderson
Area: Humanities.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. The course aims to give students a thorough grounding in Machaut’s literary and musical works, while also introducing them to digital tools to view and analyze original illustrated musical manuscripts of his work. Critical analysis of Machaut’s work will be assessed not only through more traditional essay writing, but also through the creation of a multimedia digital edition of a section of his oeuvre using Omeka exhibition software. The course is designed so that no prior knowledge of musical notation or medieval French is necessary. Instructor(s): T. Rose-Steel
Area: Humanities.

AS.212.481. The 18th-Century French Novel.
Key novels will be studied from a variety of approaches. Authors to include Marivaux, Montesquieu, Prévost, Diderot, Crébillon, Rousseau, and Voltaire. Recommended Course Background: AS.212.333 and AS.212.334 or AS.212.333 and permission of the instructor. Instructor(s): W. Anderson
Area: Humanities.

Instructor(s): D. Schilling; E. Russo; W. Anderson.

AS.212.502. French Indep Study-Lit.
Instructor(s): D. Schilling; J. Neefs; S. Miglietti; W. Anderson
Area: Humanities.

AS.212.506. French Independent Study-Spanish.
Instructor(s): E. Gonzalez.

AS.212.504. Around Baudelaire.
Topics in Baudelaire’s art and thought, and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mailarmé, Proust, Benjamin, Starobinski, Bonnefoy, Roubaud, Deguy). Readings and discussion will be mainly in French. Instructor(s): J. Neefs; M. Fried.

The development of the drame bourgeois and the theater criticism of the French Enlightenment. Authors to be studied include Racine, Le Sage, Marivaux, Voltaire, Diderot and Beaumarchais. For more information, please see http://www.wilda.org/Courses/CourseVault/Grad/Theater/Syllabus.html
Instructor(s): W. Anderson.

AS.212.620. The Encyclopédie.
In its attempt to realize fully the potential of a group description of knowledge, the Encyclopédie of Diderot and d’Alembert displays the program of the philosophies in a particularly intense and idiosyncratic form. This intellectual conversation will be studied through the investigation of several different subjects treated in the Encyclopédie; for example, the theory of the encyclopedia itself, history, natural history, literature, medicine, and theories of language. Instructor(s): W. Anderson.

AS.212.632. Utopias.
Reflecting on the genre of the Utopia which from the late 17th century through the late 19th century alludes to diverse ideological constructions, such as the Golden Age, the "Pays de Cocagne", fantastic worlds, primitive societies, the state of nature, "robinsonnades", science fiction. Instructor(s): W. Anderson.

AS.212.640. Mercier.
Playwright, renowned essayist, philosophe of a sort and just plain observer of the late Parisian Enlightenment, Mercier’s literary career embodied the esthetic, political and conceptual changes that occurred in the move from the Ancien Régime to the Révolution française, the Terreur, the Thermidorean period and the Napoleonic movement of Paris. This course will cover some of his plays and other writings, especially his Tableau de Paris and its post-revolutionary continuation Le Nouveau Paris. Instructor(s): W. Anderson.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well. Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.644. Libertinage: entre révolte et fantasme.
The prerevolutionary libertine novel, starring at its center the character of the libertine, is the one most iconically associated with the French novel and with notions of transgressive “Frenchness,” intended both for national use and for export. In the wake of the pioneering work of René Pintard (Le Libertinage érudit dans la première moitié du 17e siècle, 1943) libertinage was emancipated from the fictional realm and promoted to a category of intellectual and cultural history. Yet recent critics have contested the use of this label, arguing that the historical individuals who were so called were a heterogeneous collection who had nothing in common apart from their marginality, which was in turn stigmatized or valorized. The purpose of this course is to examine critically the relationship between fictional and historical libertines, the many overlaps between the “transgressive” and the “erudite” communities, the role they played in the emergence of the “radical” Enlightenment and scientific materialism, their subversive use of language, the fluctuation between protective strategies of equivocation and the audacity of parrésia. Readings from trial documents, pamphlets, correspondence, novels and essays, by G. C. Vanini, François Garasse, Antonio Rocco, Théophile de Viau, Descartes, Cyrano de Bergerac, Dassoucy, Bayle, Boyer d’Argens, Voltaire, Sade, Diderot, Laclos.
Instructor(s): E. Russo.

AS.212.655. Persistence of the City.
This course will address a number of problems derived from current ecological and sustainability concerns, via readings of classic texts of the French avant-garde and modernist tradition (early to mid- twentieth century: Romain, Breton, Le Corbusier, Debord), as well as films (Godard, Resnais) and reportages of more recent date. To be taught in English, this course will be of interest not only to students of French and comparative literature, but to students in urban planning, design, sustainability studies, and architecture. Dates of classes: 2/3, 2/17, 3/2, 3/16, 4/6, 4/20.
Instructor(s): A. Stoekl
Area: Humanities.
AS.212.666. Writers Confront Time, Posterity and Survival.
This course will discuss various ways by which authors see time as shaping and reflecting the reception and the value of their works. I will focus on a select group of Enlightenment philosophers with some forays into classical antiquity and the Romantic period. The purpose of the seminar is to explore the existence of a relationship between models of transmission of aesthetic value and models of cultural, theological and biological “evolution.” Works by Diderot, Voltaire, Charles Bonnet, Rousseau, Ballanche and others.
Instructor(s): E. Russo
Area: Humanities.

AS.212.678. Guillaume de Machaut: exploring medieval authorship in the digital age.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. Students will learn to use digital tools to view and analyze original illustrated musical manuscripts of Machaut’s work.
Instructor(s): T. Rose-Steel.

What if Rousseau’s description of the sentiment de l’existence were to join to the models of consciousness Damasio develops in The Feeling of What Happens? This course explores aspects of consciousness in French literature (Rousseau, Sand, Nerval, Amiel, Flaubert, Valéry, Proust, Sartre) in a dialogue with recent texts in theory, philosophy, neuroscience (e.g. Poulet, Merleau-Ponty, Sartre, Scarry, Noë, Humphrey, Damasio, Sacks).
Instructor(s): E. Ender
Area: Humanities.

AS.212.692. Research Methods.
Texts have lives. From handwritten manuscript to digital format, the various incarnations of the literary text have implications for literary scholarship. This course examines the many lives of a literary text and the issues of access, retrieval, and research. From online resources to the core printed reference works, this course acquaints graduate students with the range of scholarly apparatus in the field of literary studies.
Instructor(s): S. Waterman.

AS.212.696. Literature Confronts Science: Zola.
Zola worked with the theories of heredity of his time in the Rougon-Macquart novels. But he also attempted to use his understanding of biology and thermodynamics to reform the theory of the novel in general. This course will examine these two different effects of science on literature and try to see what leads an author to undertake such a project. For a more extended description, please see http://www.wilda.org/Courses/CourseVault/Grad/Zola/Syllabus.html. Advanced undergraduates with sufficient background may register for this course with permission of the instructor.
Instructor(s): W. Anderson.

AS.212.699. Cultures of Criticism from the Classics to the Romantics.
It is said that the French Enlightenment invented art criticism. Yet art criticism was just one of many forms of critical thought at the time, like theatrical criticism, the genre of the éloge, scientific prefaces, satires, the Querelle des Bouffons, and much more. But what work does critical thought do for the early moderns? It certainly constructs the canon, it regiments the Republic of Letters, it can be seen to create the concept of a literary field. It marks boundaries, invents new languages, even new genres (is the novel always a criticism of its own genre?). Is it only the practitioner of an art who is competent to write the criticism of that art? How does the concept of critical thought evolve over the Long Eighteenth Century, and how does it mutate in the early Romantic period? Authors to be studied include: Racine, Perreault, Voltaire, d’Alembert, Diderot, Rousseau, the natural scientists, Beaumarchais, Mercier, Stendhal, Hugo, Baudelaire.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.700. Flaubert’s L’Éducation sentimentale, a Prose Novel for Modern Time.
Undergrads need instructor permission. Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Éducation sentimentale edition required: GF Flammerion, 2003.
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.703. Literary Renaissance of the 12th Century.
The High Middle Ages in France witnessed both a re-birth of learning and a re-invention of literature. This course examines the medieval French literature that flourished during this “Twelfth-Century Renaissance.” It considers texts across of variety of genres (the roman antique; politely lyric; autobiography; lai; chronicle) in order to interrogate literature’s engagement with the surrounding intellectual currents. In particular this seminar asks how literature’s relation to the past changed during this time and how it came to create something new.
Instructor(s): B. Reilly
Area: Humanities.

AS.212.704. Violence & Tragedy.
This seminar traces the persistence of violence in tragedy. Working though traditional periodization insisting on an evolution away from spectacular baroque violence toward disembodied neoclassical purity, we will explore how violence continually shaped theater as a multi-sensory, multi-medial practice. While the primary source of our discussion will be seventeenth-century France (Hardy, Rotrou, Corneille, Racine, et al.), ample opportunity will be made for students to present research from the literary traditions in which they work. Contemporary theorists and critics (Bersani, Benjamin, Biet, Chartier, Elsner, Greenberg, Loraux, Heller-Roazen, et al.) will be available in English. Taught in English. Dates of classes: 2/10, 2/24, 3/9, 3/30, 4/13, 4/27.
Instructor(s): Staff
Area: Humanities.
AS.212.705. Fictions d’espace: géopoétique du roman de langue française.
En quoi consiste et par quels moyens se construit l’espace dans les fictions littéraires? Quelles fonctions y jouent les toponymes, les descriptions de lieux, les trajectoires des personnages ou encore ces excroissances visuelles que sont les cartes ou les plans? Quels contrats l’écrivain peut-il passer avec son lectorat à l’égard du statut des espaces traversés et décrits, qu’ils se fondent sur le « réel » ou qu’ils soient fabriqués de toutes pièces? Cette introduction à la géopoétique propose d’aborder la mimésis littéraire sous sa dimension spatiale. Si d’une part notre objectif est de forger des concepts d’analyse littéraire en dialogue avec le discours sur l’architecture et la géographie, d’autre part nous chercherons à construire des lectures d’œuvres qui misent sur la puissance évocatrice des espaces et des lieux. Puisant dans la littérature d’expression française depuis 1800, de Balzac à Chamoiseau en passant par Giono, Ramuz, et Percy, nous relèverons divers “chronotopes” (Bakhtine) ayant contribué à forger l’imaginaire géographique. Course in French.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.710. Les religions du 19e Siècle.
Chateaubriand, Michelet, Quinet, Hugo, mais aussi bien Nerval, Baudelaire, Flaubert, Mallarmé, les œuvres du 19ème siècle se rapportent aux paradigmes religieux d’une manière particulièrement forte et problématique. De l’histoire des religions du Progrès, le fait religieux est interprété par la littérature, autant que la littérature se confronte à lui. Le séminaire s’appuiera sur la lecture précise de quelques textes déterminants en ce sens.
Instructor(s): J. Neefs.

AS.212.717. Montesquieu.
The first half of the seminar is devoted to a close reading of some of Montesquieu’s major works in law, politics, fiction, history and the natural sciences, with an emphasis on the negotiations between nature, law and society. The second half will focus on selected interpretations and appropriations of Montesquieu’s thought from the 18th to the 20th century. In English, reading knowledge of French.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.719. Enlightenment and Revolution.
Writing Equality: the French Revolution. Enlightenment authors whose work is relevant to the Revolution (Montesquieu, Rousseau, Condorcet, etc.), Revolutionary authors and orators, and 19th-century authors like Balzac and Stendhal or historians like Tocqueville and Michelet who use literary topoi to come to terms with the Revolution.
Instructor(s): W. Anderson
Area: Humanities.

One is never done with Rousseau: generations of readers and a myriad of critical schools have mapped in many, contradictory ways the vast territory he has explored: composer, musicologist, novelist, dramaturgist, botanist, political philosopher, autobiographer, pedagogue, prophet, dreamer, persecuted victim and, always, provocateur. Rousseau lived and wrote at the intersection of pathos and logos, history and myth, reason and the sacred and his method, if any, was to construct a system against all systems. We will read his major works in light of the debates they have triggered both within the Enlightenment and postmodernism.
Instructor(s): E. Russo.

AS.212.743. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l’ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, À l’ombre des jeunes filles en fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Recommended course background: At least 2 212.xxx courses
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.750. Récits de la marge dans la littérature française depuis 1950.
Examen de romans et récits modernes et contemporains où la marge (géographique, ethnique-sociale, sexuée) apparaît comme un lieu de parole spécifique. L’histoire longue de la figure du ‘z’onard’ et du ‘jeune de banlieue’ permettra d’interroger les processus de légitimation littéraire et l’émergence de subcultures qui suscitent des postures esthétiques novatrices. Textes de Begag, R. Camus, Charef, Chraibi, Clébert, Collard, Djaïdani, Queneau...
Instructor(s): D. Schilling
Area: Humanities.

From exoticist features of the 1920s and 1930s and political works of the 1960s, to family sagas and personal essays looking back on a conflicted past from the standpoint of the new century, Algeria has featured prominently in the French cinematographic imaginary. The independent North African nation has likewise produced compelling narratives that address the colonial legacy, the armed struggle for independence and its aftermath. Addressing from both sides of the Mediterranean an entangled political and cultural history, this course places in critical context conflicting screen representations as well as the institutions, individuals, and publics associated with them. The course will be taught in English, however most course materials will be in French. Undergraduates may take with permission of the instructor and completion of AS.212.333 and AS.212.334. Graduate students need not have completed the prererequisite courses.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.752. The Character Function.
What do we really mean when we talk about a "character" in a discursive work? What are the structuring, esthetic and heuristic functions of such devices? How has the concept of the character evolved from the early modern period to the present day? A sampling of the cases to be considered: Descartes, Leibniz, Marivaux, Racine, Diderot, Rousseau, Robespierre, Napoleon, Michelet, Zola, avatars and "digital angels".
Instructor(s): W. Anderson
Area: Humanities.

AS.212.768. Norms and Forms of Academic Communication.
How to write a book review, an article, a conference paper; how to choose the appropriate journal for publication.
Instructor(s): W. Anderson
Area: Humanities.
AS.212.778. Les écritures contemporaines aux confins des genres [Contemporary French Writing Beyond the Genres].
A critical survey of hybridized or mixed literary forms that have emerged in French-language writing since the postwar revolution of the New Novel and the materialist forays of the Tel Quel group circa 1968. What attitudes might be adopted toward texts that seemingly invent their own rules, refusing generic ascription even as they borrow freely from established narrative and poetic codes? How might we resist the temptation to view works of motivic reprise, pastiche, formal constraint, and intertextual weaving as symptoms or expressions of a disenfranchised "postmodern condition," and endeavor instead to situate these texts in the contemporary moment, as elements of a vital cultural critique? Authors to be considered include Bon, Cadiot, R. Camus, Gavarry, Levé, Père, Quintane, Redonnet, J. Rolin, Simon, and Viel. Seminar in French.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.781. L’entre-deux-guerres en toutes lettres [French Literature Between the Wars].
French literary culture between the wars (1919-1939) promoted the novel as a forum for social comment and formal experimentation alike. Questioning the psychological biases of the ‘roman d’analyse’ and reacting to the collective tragedy of the Great War, interwar writers updated the French language as well as narrative ‘technique’ in light of emergent theories (psychoanalysis, Marxism, phenomenology). Readings from Aragon, Breton, Céline, Cocteau, Colette, Dabit, Mairaix, Némirovsky, Queneau, and Simenon.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.783. Diderot, Power and Representation.
A reading of some of Diderot’s major works in light of his struggle to break out of imposed and self-imposed hierarchies of style and manner, and to reframe or reform radically the relationship between ethics, politics, sexuality, gender and the arts. Special emphasis on Diderot’s self-representation as arbiter of taste, mediator and mentor.
Instructor(s): E. Russo
Area: Humanities.

AS.212.784. Founding Myths: Literature, Historicity, and the Nation.
National identities often coalesce around historical events that acquire the status of “founding myths”. In this seminar, we will draw upon French history to discuss how literature and art (including cinema) can contribute to forging and crystallizing a series of identity-making myths. Cases to consider include the burning of Joan of Arc in 1431, the massacres of St Bartholomew’s Day (1572), and the beheading of Louis XVI in 1793. By analyzing representations of these and other historical moments through a wide range of media, we will seek to penetrate the complex relationship between literature, fiction, and historicity in making national identity—a relationship that proves particularly problematic in the case of violent and divisive events such as those mentioned above. Among the authors studied will be Villon, De Thou, D’Aubigné, Marlowe, Shakespeare, Voltaire, Michelet, Dumas, Hugo, Brecht, Anouilh, Camus.
Instructor(s): S. Miglietti; Staff
Area: Humanities.

AS.212.789. Literature & Identity in the Age of Globalization.
In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posis, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.

AS.212.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism toward interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology, and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce, and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollack, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with AS.212.790, AS.214.790, and AS.215.790.
Prerequisites: ;;
Instructor(s): E. Strowick; J. Neefs.

AS.212.791. Film Theory and Critical Methods.
Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.
AS.212.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshiping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.212.801. French Independent Study.
Instructor(s): D. Schilling; J. Neefs; S. Miglietti; W. Anderson.

AS.212.802. French Dissertation Rsch.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

AS.212.803. French Proposal Prep.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

Freshmen seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.201. Chaplin in Germany: Tramp to Dictator.
Swiss writer Blaise Cendrars declared: “The Germans lost [World War I] because they didn’t get to know Chaplin in time.” We will follow Chaplin’s works from 1921’s The Kid to 1940’s Great Dictator and its reception in Germany, to better understand both those works and the history and politics of their reception. Topics include slap-stick, laughter, poverty, dignity, and class/worker struggles. Readings include Arnheim, Krakauer, Tucholsky, Arendt, Benjamin, Brecht, and Kafka.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.212. The World as Crime Scene.
This class will examine the process of inference and the conclusions that result from it, or - as we will understand it - the process of reading that results in a story. Learning from Sherlock Holmes how to read a crime-scene, we will practice reading images in the Walters Art Museum. Analyzing movies and TV-series, we will learn how a story functions, how a small detail can change it and how the same thing can end up as a different story.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.228. Freud and the Humanities.
It is hard to overestimate Sigmund Freud’s influence on virtually every branch of the Humanities. This course will investigate some of the concepts and methods that have been drawn from Freud, focusing specifically on art and literary criticism. We will consider sections from ‘The Interpretation of Dreams’ as well as a selection of Freud’s brilliant essays.
Instructor(s): J. Schade
Area: Humanities, Social and Behavioral Sciences.

AS.213.299. Weimar on the Pacific: German Exile Culture in the United States.
Taught in German. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film (Fritz Lang, Billy Wilder) to architecture (Richard Neutra, Rudolf M. Schindler), literature (Thomas Mann, Berthold Brecht, Lion Feuchtwanger), and philosophy (Theodor W. Adorno, Hannah Arendt). Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.
AS.213.235. Panorama of German Thought I.
Taught in English. German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition are Luther, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed the study of cultural, historical, and social phenomena as well as of literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This two-semester survey course will highlight important topics of German Thought, e.g. the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. While the first semester (Fall) covers until 1850 (from Luther to Hegel/Kierkegaard), the second (Spring) focuses on Modern German Thought after 1850 (from Marx to Luhmann).
Instructor(s): E. Strowick
Area: Humanities.

AS.213.236. Panorama of German Thought II.
Panorama of German Thought from Nietzsche to Habermas. Course will examine major thinkers in nineteenth and twentieth-century German thought with emphasis on the response to Enlightenment philosophy, the critique of reason, the questions about the autonomy of the subject and the search for new individual and collective identities. Reading will include traditional philosophical texts (Nietzsche, Cassirer, Heidegger, Adorno, Habermas) as well as works in anthropology (Gehlen, Scheler), sociology (Simmel, Weber), psychology (Mach, Freud), political theory (Marx, Schmitt) and aesthetics (Benjamin, Warburg, Panofsky). This course is a continuation of Panorama of German Thought I, though the first semester is not a prerequisite for the second. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.237. Literature and Medicine.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s “In the Cold” and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: “Philadelphia” (Jonathan Demme, 1993), “Melancholia” (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.

AS.213.241. Introduction to the New German Cinema.
Starting in the mid-1960s, a new generation of German filmmakers emerged who proclaimed the “old cinema dead” and sought to develop - in opposition to the commercial film industry of the time - an entirely “new” kind of German cinema. For directors such as Alexander Kluge, Margarethe von Trotta, Rainer Werner Fassbinder, Werner Herzog, and Wim Wenders, the art of filmmaking thus became inseparable from social critique. This one-credit course will explore the films of the “New German Cinema,” focusing on the tumultuous period from 1966 to 1979 in the Federal Republic of Germany, in both their relationship to other European “New Waves,” as well as to the aesthetic, political, and cultural contexts specific to post-war Germany. The course will serve to introduce students to both the history of New German Cinema, as well as to critical and theoretical discourses in contemporary film studies.
Area: Humanities.

AS.213.251. Friedrich Nietzsche.
Freshman Seminar: This seminar offers an introduction to Nietzsche’s work and a first journey into the world of German thought, culture, and literature. Friedrich Nietzsche continues to be one of the most radical and influential philosophers of the West. Famous and infamous for announcing the death of God and the advent of the superhuman, his reverence for philosophical tradition culminated in the call to “philosophize with a hammer” (so as to demolish the constructions of Western metaphysics). He embarrassed the old philosophers exposing their, as he put it, clumsy lovemaking with truth. And he stunned generations of intellectuals after him with his idea of the eternal return of the same. But Nietzsche was also a scintillatingly witty writer, a light-footed and poetic thinker, a bold defender of the experiences of the body, a tender human being, and a sharp critic of German narrow-mindedness.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.257. Credits for Credit: The Political, Economics, and Affects of Debt.
David Graeber has argued that the ethymological prehistory of debt is based on social obligations that sustain society. These social obligations are deeply intertwined with economic structures long before the recent financial crisis kicked in. This seminar will give an introduction to macroeconomic theories of debt in Western capitalism and will explore the entanglement of economics and morality, by asking how our most intimate fields of subjectivities are penetrated and altered by economic forces and policies. Finally, we will analyze recent movies on indebtedness and debt and discuss current examples of a politics against or within indebtedness.
Area: Humanities.
Tought in English. This course will survey the major trends in Yiddish, Hebrew, and English literature published in the United States, Canada, and Mexico since the turn of the 20th century. Our discussions will consider the connections this literature maintains with other “ethnic” schools of writing; what connections, or disruptions, it signifies with Jewish literatures in other eras or locales; to what degree Jewish writing in languages other than English participate in major trends of American literature—or whether this writing could even be considered to anticipate innovations in the American “mainstream.” Topics in this literature will include the disruptions of immigrant life, the shadows of the Holocaust and anti-Semitism, aspirations for social justice, the lure and trauma of the American suburbs, the collapse of the Great Society, gender in American Jewish life, and the new Jewish immigrants of the former Soviet Union. All readings and discussions available in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.265. Panorama of German Thought.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Krakauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): R. Tobias; Staff
Area: Humanities.

AS.213.301. Franz Kafka.
The course is an introduction to the life, work and milieu of Franz Kafka. While reading Kafka's short stories (e.g., Das Urteil, Die Verwandlung, Ein Bericht für eine Akademie, along with diary entries and Letter to his Father (Brief an den Vater), we will pay close attention to the author's understanding of writing, his relationship to his father, Jewish tradition, history, and his fascination of the foreign and the exotic. We will also focus on Kafka’s influences; critical reception; reader problems in approaching Kafka’s works; Kafka's situatedness in fin-de-siècle Prague; and issues in translating Kafka into English. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Glazova
Area: Humanities.

AS.213.305. Contemporary German Film.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmark's The Lives of Others (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin's Head On (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel's Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s Goodbye, Lenin! (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or "Nouvelle Vague Allemande". Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 – discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Instructor(s): E. Strowick
Area: Humanities.

In this class, we will analyze the relationship between surveillance and art. We will discuss in what ways surveillance has been reflected by different genres of art and to what extent surveillance can affect the production of art itself. Thus, after an introduction into the biopolitics of surveillance, we will look at examples from architecture, photography, painting, and Internet art, but with a specific focus on literature and film. Questions for discussion will address the relation of surveillance to the acts of observing, disciplining, controlling, and producing knowledge as well as their consequences for the formation and (self-)perception of the subject.
Instructor(s): E. Strowick
Area: Humanities.

We will study the psychic afterlives of WWI, Nazism, and Stasi experiences and involvements. These are stories that are often not told in the family but nevertheless handed down across generations in powerful, less-than-explicit, and often distorted ways. Drawing on philosophy and psychoanalysis, we will discuss how the need for silence meets the need to talk and to hear. We will read literature and analyze films on the family lives of former political prisoners in the GDR, Stasi informants, Nazi perpetrators, victims of the Holocaust, and soldiers of the First World War. Reading and discussion in German. Recommended Course Background: AS.210.361
Prerequisites: AS.210.361
Instructor(s): K. Pahl
Area: Humanities.
AS.213.309. Walter Benjamin and His World.
All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.
Area: Humanities.

AS.213.310. Classic German Theater.
Taught in German. In this seminar we will read some of the most important plays of German literature, by Lessing, Goethe, Schiller, Kleist, and Büchner. We will explore questions about the role of the theater toward the education of mankind in the spirit of the enlightenment. We will examine how tragedy is reconfigured around the context of the bourgeois family. We will study historical practices of stage production as well as modern filmic and theatrical productions. Finally, we will prepare an informal staging of a play.
Prerequisites: AS.210.361
Instructor(s): K. Pahl.

AS.213.312. Contemporary German Literature (1970 to the present).
The seminar examines the way cultural and historical topics are presented in contemporary German literature. The selected texts originate in different national contexts (Swiss, Austrian, German, German-Turkish, German-Japanese) and deal with questions concerning the representation of national, cultural, and individual identity. We will explore how the texts (de)construct these identities through narrative structures and will contextualize these structures with respect to recent theories of (trans)cultural identities. Authors include: Eugen Gomringer, Yoko Tawada, Terézia Mora, Thomas Hürlimann, Martin Suter, Christoph Schlingensief, Max Frisch, Günter Grass, Thomas Bernhard, Maxim Biller, and Thomas Meinecke. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.313. Heidegger's "Being and Time" and "Rectify.
This course will introduce students to Heidegger’s seminal work as seen through the lens of the TV series Rectify, which considers what it means to be “thrown” into the world and how we construct a meaningful horizon for our experiences. We will explore some of the fundamental concepts in Being and Time, including care, projection, fallenness, affect and time, and being-onto-death, and consider how these same issues are taken up in Rectify, which as a TV show has to develop its own visual vocabulary to explore the structure and nature of being in the world. Taught in English
Instructor(s): R. Tobias
Area: Humanities.

This course will examine the location of Berlin at the heart of European and global culture over the course of the 20th century. In addition to its centrality to German national identity and political culture, Berlin between the World Wars was a weigh station and meeting ground for a variety of languages, cultures, and artistic trends—whether expatriates, refugees, nomads, touring companies, or vagabonds. In what ways did these travelers to Berlin change German popular or intellectual culture? In what ways did Berlin function as a center for avant-garde culture, and in what sense did it remain a peripheral space, in the shadow of grander culture centers such as Moscow, Paris, New York, or Hollywood? What lessons might be taken from the supposed glamour of Berlin between the World Wars and the continued attraction of that period for post-Holocaust adaptation and contemplation? These questions, among others, will be considered with reference to a variety of narratives, dramas, and films taken from German, English, Hebrew, Russian, and Yiddish sources. Authors to be considered will include Walter Benjamin, Joseph Roth, Irmgard Keun, Erich Kästner, Bertolt Brecht, Christopher Isherwood, Sh. Y. Agnon, Vladimir Nabokov, Viktor Shklovsky, and Dovid Bergelson. All readings and discussions in English
Instructor(s): M. Caplan
Area: Humanities.

AS.213.318. The Making of Modern Gender.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.
Area: Humanities.

This course provides students with a foundation for as well as a brief introduction to Critical Theory. While paying close attention to the texts and the form in which they present themselves, we will explore major concepts such as dialectics, metaphysics, and freedom. Students will gain familiarity with historical works that have proven immensely influential in modern Europe and beyond, but will also be expected to consider ways in which such thinking has relevance for today’s world.
Instructor(s): J. Yonover
Area: Humanities.

Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women’s writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Arnim, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.
AS.213.322. Museums and Jews, Jews in Museums.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.

Today's Berlin is a nerve center with strong impulses from Russia, Ukraine, Turkey, Vietnam, India, and other Eastern countries. Through contemporary literature and film, we will explore Berlin's role in a globalized world: how Berliners resist, embrace, or simply describe the influx of people from Eastern countries; how West-Berlins have re-oriented themselves after the fall of the wall; how the majority adapts to the minorities; and how some migrant authors rework the German language by experimenting with translingual writing. By way of literary and filmic analysis, we will inquire if borders or limits can play a productive role; how the history of the divided city figures in the imaginary of immigrant authors; and how, for example, Turkish-German or Russian-German writers inscribe the tensions between East- and West-Berlin into a larger discourse on global East-West relations.
Recommended Course Background: AS.210.362
Instructor(s): K. Pahl.
Area: Humanities.

Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Area: Humanities.

Although Edgar Allen Poe is often called the father of detective fiction, this assumption is not entirely correct. Sixty years before Poe published his “Murders in the Rue Morgue,” Schiller wrote the novella “Der Verbrecher aus verlorener Ehre,” which was decisive for the development of the genre in Germany. Schiller’s novella carried the subtitle, “Eine wahre Geschichte,” which underscored the tension between “true” events and “probable” circumstances which is characteristic of detective fiction in general. In this course we will examine the competing notions of truth (Wahrheit) and probability (Wahrscheinlichkeit) at play in German detective fiction from the eighteenth to nineteenth century. We will explore why the romantics emphasized truth as a defining feature of literature and how the realists replaced this notion with verisimilitude. Authors to include: Schiller, Kleist, Tieck, Hoffmann, Droste-Hülshoff, Fontane, Storm, Paul Heyse, Richard Alewyn. Reading and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.332. Zionism in Modern Literature: Jewish or Israeli?.
This course will be an examination of the themes of nationalism, Zionism, and the problems of the nation-state in modern Jewish literature of the past hundred years. Among the topics we will consider are the unique challenges of a diasporic culture relocating its national aspirations to an unfamiliar and often hostile environment, the controversies surrounding political nationalism within modern Jewish culture, the competition between languages in the formation of Israeli society, the character of Israeli national culture, the relationship of Israel’s Jewish majority with its minority population, and the relationship of Israeli culture to the Jewish culture of the diaspora. To what extent does Israeli literature constitute a continuation of themes and techniques found in previous Jewish writing, and to what extent does it represent a new beginning? To what extent can Israeli literature be compared with other varieties of Jewish writing and to what extent is this writing a unique cultural phenomenon? Although the majority of works discussed will be translated from Hebrew—including such leading figures of Israeli literature as S. Y. Agnon, S. Yizhar, Amos Oz, and Orly Castel-Bloom—we will also be considering works translated from Yiddish (Mendele Moykher-Sforim), German (Theodor Herzl), and Arabic (Emile Habiby), as well as contemporary American writers such as Philip Roth and Michael Chabon. All readings and discussions conducted in English.
Cross-listed with Jewish Studies, English, and the Humanities Center
Instructor(s): M. Caplan
Area: Humanities.

Are all Jews funny, or only the ones from New York? This course will be an advanced-undergraduate examination of literary, theatrical, cinematic, and televised representations of Jewish culture focusing on the construction of cultural discourse through comedy. Taking as a point of departure Sigmund Freud’s Jokes and Their Relation to the Unconscious, we will consider the joke as a mode of narration and cultural coding with specific resonances for the Jewish encounter with modernity. Among the topics to be addressed in this course will be the origins of modern Jewish humor in traditional modes of storytelling and study; the problems of anxiety and otherness articulated and neutralized through humor; the significance of Jews in creating popular culture through the mass media (particularly though not exclusively in the United States) as well as the role of these mediums in transmitting and translating Jewish references to the general culture; the status of the Yiddish language as a vehicle for satire and a vehicle of resistance between tradition and modernity; the uses and abuses of Jewish stereotypes and the relationship of Jewish humor to anti-Semitism; the connections between Jewish humor and other modes of minority discourse; and the question of translation of Jewish humor both from Yiddish into other languages and from the Jewish “in-group” to a “post-ethnic” audience. Authors and performers to be examined will include Avrom Goldfaden, Sholem Aleichem, Franz Kafka, Dzigan and Szmacher, Lenny Bruce, the Marx Brothers, Mel Brooks, Phillip Roth, Woody Allen, Larry David, Sarah Silverman, and the Coen Brothers. All readings and discussions conducted in English.
Instructor(s): M. Caplan

AS.213.345. Healing and Health Beyond Theology. 3 Credits.

Nietzsche argues in The Gay Science that to bring about a new day we need a new health—“great health,” as he calls it, that enables us to surmount the sickness of our age and transcend ourselves. However much of an iconoclast Nietzsche considered himself to be, his idea of “great health” fits squarely within a theological tradition that claims that the condition for becoming a member of the ecclesia is faith, which cleanses the individual of sin and restores him to his original state. This course will examine the theological inheritance that has and continues to shape the notion of sickness and health dominant even in secular contexts, where well-being would seem to be regarded as a condition of the body rather than of the spirit. Reading to include works by Nietzsche, Kierkegaard, Augustine, Tillich, Heidegger, Scholem, Tolstoy, Büchner, Flaubert, and Kafka. Taught in English.

Writing Intensive.

AS.213.348. Picturing Jews: Representing Jewish Identity in Modern Art, Film & Literature.

This course will consider the different ways Jewish identity has been represented in the 19th and 20th centuries, focusing primarily on Central and Eastern Europe. Race, nationalism, religion, language, geography, politics—all helped shape different ways of understanding just what it meant to be a Jew, and all found expression in art and literature by both Jews and non-Jews. Looking at texts originally written in German, Yiddish, and Hebrew, including prose, poetry, journalism and drama, as well as painting, photography, graphic design, architecture, and film we will gain an understanding of the range of ways that Jewish identity could be understood and expressed as well as of the ideological stakes and historical contexts of such representations. Writers and artists examined will include Chagall, Kafka, Sholem Aleichem, and Bialik. All readings will be in translation.
Instructor(s): S. Spinner
Area: Humanities

AS.213.349. Weimar Cinema: The Golden Age of German Film.

Taught in German. German cinema of the 1920s is regarded as one of the “golden ages” of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception; Expressionism in film; technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema.

AS.213.354. Introduction to German Poetry.

This class will introduce students to German poetry from the eighteenth to the twentieth century. We will read selected poems by Goethe, Eichendorff, Mörike, George, Hofmannsthall, Rilke, Trakl, Celan, and Bachmann. In addition we will read several theoretical essays by poets and literary critics alike which examine the lyric form and the curious world that poetry constructs. Readings and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.

This seminar offers an introduction to the work of Goethe (1749-1832) who is one of the most prominent figures in the history of German literature and thought and according to T.S. Eliot ‘one of the wisest of men’. Tracing this wisdom through selected poems, prose, plays and essays, we will closely analyze the fascinating complexity of an oeuvre that reflects Goethe’s interdisciplinary interests in the aesthetic, philosophical, and scientific discourses and controversies of his time. Readings will include: Prometheus, Goetz von Berlichingen, Faust I, The Sorrows of Young Werther, Iphigenia in Tauris, Novella, Metamorphosis of Plants, Theory of Colours etc. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.358. German Pop Culture. 3 Credits.

Taught in German. The term “pop(ular) culture” designates cultural products and practices that are disseminated as ‘mass culture.’ Pop culture is accessible to many and deals with objects and materials that circulate in the everyday life of a society; it functions, one might say, as a cultural archive of the present. In contrast to high culture, pop culture enjoys an ambiguous reputation: It represents the cultural mainstream, functions as an easily consumable commodity and promotes the marketing of dominant ideologies, in the view of critical theory. However, more recent debates within cultural studies discuss pop culture as a site of social-symbolic conflicts and subversive forms of reception. Against this background, the seminar examines pop-culture phenomena in Germany after 1950, including the cult object: soccer, popular film and TV (“Tatort”), German pop music and hits (from “Hitparade” to “Rosenstolz” and beyond), recent pop literature after 1990 (Sibylle Berg, Rainald Götz, Thomas Meinecke). At the center of the analyses are questions related to the historical and political situation of pop culture, its specific aesthetic processes, and the (critique of) ideology performed by these processes.
Prerequisites: AS.210.361[C] AND AS.210.362[C]
Instructor(s): A. Krauss
Area: Humanities.

AS.213.361. The Holocaust in Film and Literature.

How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.
AS.213.367. Contemporary German Film.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 10 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarcks “The Lives of Others” (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s "Nowhere in Africa" (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s “Head-On” (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s “Downfall” (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s “Goodbye, Lenin!” (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or “Nouvelle Vague Allemande”. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among other influences) to develop radical notions of realism and challenge narrative conventions. This course will offer a survey on German Film since 2000 – discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Prerequisites: AS.210.362
Instructor(s): E. Strowick
Area: Humanities.

AS.213.368. German Political Thought.
This course will introduce students to major figures in German political thought from Martin Luther to Karl Marx and Immanuel Kant to Carl Schmitt. The class will explore such issues as the notion of sovereignty, the relationship between church and state, the theory of parliamentary democracy, and the political and economic ramifications of liberalism. Reading and discussion in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.369. Dada’s Ideologies: Literature, Art, & Politics. 3 Credits.
This course will examine the literary and political theories implied in, and encountered by, Dadaist works and praxes. Particular attention will be paid to Dadaist confrontations with the growth of modern mass media, the politics of World War I, and consumerist capitalism in the wake of Taylorism and Fordism. Readings include major Dadaists as well as Althusser, Benjamin, Debord, Gramsci, Irigaray, Lukács, Marx, Saussure, among others.
Instructor(s): J. Pelcher
Area: Humanities.

AS.213.371. Kafka and the Kafkaesque.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term “kafkaesque” refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka’s poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka’s prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka’s impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka’s oeuvre while developing skills in critical analysis and literary close reading.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.376. Art in Literature.
Discussion in German. Since the Enlightenment, works of art have played a prominent role in literary texts, providing an occasion for texts to reflect on their status as art and to explore the possibilities and challenges unique to aesthetics. In this course we will examine novellas and poems that refer to paintings or other works of art to illuminate the nature of art and to reflect on phenomena that have no place in any other discourse. Readings to include works by Lessing, Eichendorff, Storm, Mörike, Adrian, Freud, and Hofmannsthal.
Prerequisites: AS.210.361 AND AS.210.362
Area: Humanities.

AS.213.378. Major City, Minor Literature? Berlin in German-Jewish and Yiddish Literature. 3 Credits.
Between the two World Wars, a period of intense artistic and intellectual vitality, Berlin was an international center for theater, visual arts, and literature. Many important Yiddish-language writers were drawn to Berlin and, together with their German-language counterparts, produced a body of literature that explores issues of modernity and identity. By comparing works in Yiddish and German, we will learn about inter-War Berlin’s cultural diversity and richness, while also gaining insight into the particular issues of writing about Jewish identity in the 1920s, and the implications of writing in a minor language (Yiddish). We will read works by authors including Joseph Roth and Alfred Döblin in German, and Moyshe Kulbak and Dovid Bergelson in Yiddish. All texts will be in translation. Some questions we will explore include: • What is a minority/minor language or literature? • How did German and Yiddish interact in cultural and social spheres? • Can texts in different languages comprise a single body of literature? • What did it mean to be German and what did it mean to be Jewish? • Are assimilation and hybridity useful concepts? • Is there such a thing as Jewish modernism? • How did literature of the period respond to the rise of the Nazi party and the intensification of antisemitism?
Instructor(s): S. Spinner
Area: Humanities.
AS.213.402. Reality Effects: 19th Century German Prose. The course will examine how mid- and late-19th-century literature creates so-called reality effects which make the text seem a representation of the social world. The term "effect" intends to mark a most decisive insight: that literature does not simply depict a pre-given outer life but produces illusionary impressions of 'authenticity' by using various aesthetic and rhetorical devices (e.g. modes of description, frames, specific narrations of time and space). In reading Gottfried Keller, Adalbert Stifter, Conrad Ferdinand Meyer, Theodor Storm and Theodor Fontane we will analyze these aesthetic strategies in relation to literary conventions and codes which readers have learned to interpret as 'realistic'. Given that these conventions change over time and are situated in specific contexts, we will also be discussing the historicity of reality effects with respect to the rise of photography and modern historiography in the 19th century. Taught in German.

Area: Humanities.

AS.213.597. German Lit Ind Stdy-Summer. Instructor(s): M. Caplan.

AS.213.602. Comedy, Tragedy, and the Space Between. This graduate-level seminar will consider the theoretical problems and relationship between tragedy and comedy as modes of narration, methods of performance, and philosophical dispositions. Among the topics we will consider are the reciprocal relationship of comedy and tragedy; their respective derivation from myth, ritual, and philosophical dialogue; the relation of each to concepts of selfhood, society, the body, and the body politic. Along the way we will also examine questions such as why tragedy has attracted so much greater theoretical and philosophical interest than comedy, why comedy has been subdivided into various genres while tragedy has remained relatively indivisible, what political uses these modes of storytelling might signify, and how each serves as a mode of critique toward other narrative and dramatic conventions. Authors to be considered include Sophocles, Shakespeare, E.T.A. Hoffmann, Kafka, Brecht, Sholem Aleichem, Sh. Y. Agnon, Moyshe Kulbak, Ahmadou Kourouma, and the Coen Brothers. Theorists will include Aristotle, Hegel, Nietzsche, Freud, Lacan, and Zupancic. All readings and discussions in English. Instructor(s): M. Caplan.

AS.213.603. Lebendige Bildungen." Goethe's Morphology and its Legacy for the Humanities. The course analyzes the transformations of the relationship between form – life – aesthetics with regard to Goethe's morphological writings as well as the complex history of the reception in the philosophy of life (Spengler, Klages), in literary Modernism (Rilke, Einstein, Benn, Kafka) and in the early cultural studies of the 20th century (Simmel, Cassirer, Blumenberg). The "doctrine of the shape of formation (Bildung) and transformation (Umbildung) of organic bodies," Goethe's morphology considers shape (Gestalt) not as something static but in constant change, taking particular interest in the movable ("das Bewegliche"), ie, processes of transformation in their temporality: "Observing all shapes, particularly organic ones, nowhere do we find something established, something inactive, but rather everything oscillates in constant movement. Hence our language uses the word Bildung for both, the emerged as well as the emerging." A nexus between life and form, Bildung raises the problem of representation: A force towards representation, it itself escapes representation. It is by way of metamorphosis and dynamization of representation that the relationship between life and form is arranged anew, again and again – imposing questions of Bildung, representability (Bildlichkeit), morphological methods and poetics on modern literature and the humanities. Taught in German. Recommended Course Background: AS.210.311-AS.210.312 or instructor permission.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.604. Small Forms. Small forms cover the broad field from aphorism, epigram, fable and riddle to anecdote, short story, novella, ... and treatise. In each of those 'compressional arts' the smallness unfolds in different and historically specific ways. Spanning a period from 1770 to 1940 and focusing (not exclusively) on aphorisms, the seminar will explore the manifold poetics of the small in literature and philosophy: What can small mean on the level of (literary) form? What (historically specific) kind of readings do small forms facilitate? What readings do they thwart? What happens to aphorisms when they become parts of a monstrously large overall composition? What distinguishes small forms from (e.g.) fragments? How do small forms relate to simple forms (jolles) or minor literature (Deleuze)? To what extent do small forms gain epistemological impact, e.g. with respect to the critique of system and systematic philosophy since 1870? Readings include Lichtenberg, Schlegel, Novalis, Nietzsche, Kafka, Robert Walser, Benjamin, Adorno. Readings and discussions in German.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.606. Modern Fiction and the Melancholic Imagination. This course will consider the link between modern fiction and melancholia, which on the one hand seems obvious given the overriding mood of many modern narratives by Beckett, Sebald, Bernhard, Krolow, among others and which on the other hand poses numerous interpretative challenges given the sparing nature of representation in modern fiction and the attachment to things in melancholia. What is the aesthetic sensibility associated with melancholia? Is melancholia limited to baroque representation? How can we conceive of attachment in the absence of things? Readings to include Freud, Benjamin, Adorno, Heidegger, Sebald, Beckett, Bernhard, and Hofmannsth. Instructor(s): R. Tobias
Area: Humanities.
We will read texts by Freud, Klein, Lacan, and Laplanche that are of particular interest for literary and social theory. We will discuss recent literary theory and criticism (especially queer literary theory and criticism) that draws on psychoanalysis. In addition, we will consider psychoanalytically inflected thought on sexuality and conformism by members of the Frankfurt School.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.611. The Baroque and Its Afterlives.
The status of the Baroque as defined and discussed by theorists such as Walter Benjamin and Gilles Deleuze, preeminently, manifests itself in a melancholic preoccupation with relics, ruins, and allegory. As such its aesthetic originates at a cosmological fault-line between life and death. Given these metaphysical characteristics, it should come as little surprise that its subsequent influence on literary modernism constitutes itself in echoes, spectrality, fragmentation, and the grotesque, all of which function as modes of critique working through and against technologies and ideologies of modernity. The fate of the Baroque, in an aptly non-Euclidean baroque figure, both parallels and intersects with the status of other proto-modern discourses such as the carnival in the articulation of the gothic, symbolism, expressionism, and several varieties of modern fantasy. This seminar will discuss one of many possible trajectories for this aesthetic in drama, narrative, and critical theory. Beginning with authors such as Shakespeare, Grimmelshausen, and Calderón de la Barca, we will consider works such as Mozart’s Don Giovanni, the tales of Reb Nakhman and E.T.A. Hoffmann, the fiction of Gérard de Nerval and Der Nister, the critical writing of Theodor Adorno and Jacques Lacan, and films such as Fritz Lang’s Metropolis or the recent adaptation of Coriolanus. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.

This course will explore the aesthetic-political practices of literatures and manifestos grouped under the term historical avant-garde. According to the most general understanding, avant-garde is considered the critique of bourgeois culture and ‘traditional’ art concepts, with this critique being related to a fundamental crisis of bourgeois society. The seminar aims at developing a more specific perspective by discussing the following aspects of avant-garde poetics: the self-reflection of aesthetic discourse in regard to the definition and hierarchization of styles and genres; a theory of language that draws on rhythm and materiality; an aesthetics of production which questions the notion of authorship and ‘organic work’ and stresses instead the constitutive role of repetition, (inter-medial) variation, and chance; the critical intervention in the concept of aesthetic autonomy and its institutions of reception; the “aporias of the avant-garde” (Enzensberger) inherent in its concept of radical innovation and exceptionality. In order to highlight the theoretical implications of avant-garde poetics we will analyze its literary strategies with respect to contemporary debates on modern technologies of art reproduction (Benjamin), the psychoanalytic reframing of the subject, and the advent of literary structuralism/formalism (Jakobson). In addition to that, we will discuss classics of avant-garde scholarship (e.g. Peter Bürger). Authors include: Paul Scheerbart, Hugo Ball, Tristan Tzara, Hans Arp, Carl Einstein, Else Lasker-Schüler, the ‘Sturm-Kreis’, and Arno Holz.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.613. Hermeneutics around 1800 (from Hamann to Büchner).
With Schleiermacher, hermeneutics defined itself as a universal theory of understanding which no longer focuses only on biblical and juridical exegetes but on linguistic utterances in general. It thus became the matrix for subsequent Geisteswissenschaften and paved the way for various critical approaches which even today remain highly influential. The course examines the genesis of modern hermeneutics through the lens of its philological and philosophical precursors, contemporary commentators and literary authors. Key issues will be the underlying concepts of textuality and language, historicity and the subject.
Authors include: Chladenius, Meier, Hamann, Herder, Kant, Schlegel, Schleiermacher, Goethe, Rahel Levin Varnhagen, Jean Paul, Büchner.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

Kleist’s novella “Michael Kohlhaas” (1811) is as much a political parable as it is a meditation on the power of art. In it the Prussian partisan considers the right of resistance as expressed in the struggles of Kohlhaas, whose battle against the House of Saxony would have been recognized by contemporary readers as an allegory for the Prussian struggle against Napoleon’s occupying army. Kant’s short treatise “Über den Gemeinspruch: Das mag in der Theorie richtig sein, taugt aber nicht in der Praxis” (1793) had revived the debate about whether a revolt could ever be justified, given that justice depends on the existence of a state. But “Michael Kohlhaas” is also concerned with another kind of revolt that is arguably more arbitrary, in that it does not serve any end. It is the revolt of art, which overturns existing norms and conventions by establishing a new law: the law of art or what could be called poetic justice. Kleist’s text makes a case for the autonomy of art in the literal sense. Art is self-legislating, a law unto itself, and this feature points as much to the potential as to the danger of art.
Readings to include works by Kleist, Martin Luther, Pufendorf, Breitinger, Kant, Goethe, Tieck, and Adorno.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.617. Peripheral Modernisms.
This graduate-level seminar will consider the relation of centers to margins in the production of modern literature. The starting assumption of this inquiry will be the political, social, and linguistic role of literary modernism as a critique of modernity. If a centrifugal force disseminates the processes of modernization from the metropolis out, can one suggest that modernism, as a critique of modernity, originates at the periphery and works its way inward? When does the critique of modernity begin, and how can one characterize such a critique if in certain cultures it precedes the advent of modernization? How does a consideration of literature from the margins of the industrial and imperial centers of the modern world cause us to rethink the phenomenology— distinct from a taxonomy—of modernism? In what ways can the belatedness of a culture’s modernization lead it to anticipate subsequent crises in modernity? If modernism precedes modernization in the peripheral context, what, then, is post-modernity or post-modernism? Authors to be considered in this course include Reb Nakhman of Breslov, Machado de Assis, Mendele Moyalker-Sforim, Gertrude Stein, Robert Walser, Franz Kafka, William Faulkner, Amos Tutuola, Clarice Lispector, and Yambo Oluoquem. Theoretical perspectives will include Adorno, Bakhtin, Barthes, Benjamin, Deleuze and Guattari, and Derrida. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities.
The seminar will investigate when and in which ways theatrical space was interpreted as a shelter for the fleeing. Starting with Greek tragedy and ending with Elfriede Jelinek’s postdramatical text “Die Schutzfliehenden” we will discuss the relations between the institutions of theater and drama and political concepts of Asylum from a historical perspective. We will proceed on the basis of the idea that the stage offers temporary protection where refugees stop their journey, argue their case and expect a decision. Reading Aeschylus, Euripides, Goethe, Brecht and Jelinek, we will analyze different theatrical set ups and procedures in which the precarious state of the fleeing is and has been negotiated on stage. We will also deal with recent theater projects which open the stage to refugees and give them a platform outside immigration offices. Reading Benjamin and Flores Christian Rang we will also discuss how the relationship of Asylum and theater is reflected in modern theory of tragedy.
Instructor(s): Staff
Area: Humanities.

AS.213.621. Theater: Drama, Performance, Theory.
We will study exemplary plays and theoretical texts about the aesthetics and poetics of drama and the function of theater in society from Lessing to Brecht and beyond – with excursions to Aristotle. We will explore the history of German thought on theater from illusion to verfremdung to postdramatic multi-media formats, from the Bildung of the audience to the autoepiosis of the performance, and from the Nationaltheater to various forms of less than stehende Schaubühnen. We will be concerned with theories of performativity, with the issue of emotions on stage (does theater need emotions? do emotions need theater?), as well as with the close connection of theater, philosophy, and politics (Derrida, Badiou).
Instructor(s): K. Pahl
Area: Humanities.

AS.213.625. Life Worlds: Literature and Phenomenology.
This course will examine the notion of life-world or Lebenswelt, as it increasingly comes to define the nexus of relations that characterize not only human experience but also works of art. A particular interest of the course will be how phenomenology expands our understanding of literature and the critical methods used to approach it. While the reading for the course will be drawn primarily from philosophy, we will also consider poems by Georg Trakl and Rainer Maria Rilke with an eye toward the poetic space they open. To what degree is the space we inhabit with its network of meanings a literary space according to these poets? Readings to include excerpts from: Dilthey, Einleitung in die Geisteswissenschaften; Husserl, Ideen (1913); Krisis der europäischen Wissenschaft; Heidegger, Sein und Zeit; Merleau-Ponty, Phenomenology of Perception; The Visible and the Invisible; and Käte Hamburger, “Die phänomenologische Struktur der Dichtung Rilkes.”
Instructor(s): R. Tobias
Area: Humanities.

AS.213.629. The Art of Framing.
Frames and framings in art and literature are aesthetic means of creating focus. They draw a distinction between interiority and exteriority, foreground and surroundings; they cut out segments from space-time continuum and thus provide basic instruments of orientation, they constitute pictorial representation as well as the compositional structure of literature. From an epistemological perspective one can say that frames create a paradoxical threshold in-between which facilitates both the differentiation and transgression of spheres. It is further remarkable that frames while spectacularly making visible something specific at the same time expose the instances of their own ‘showing’: by implementing frames representation observes itself in the very process of representing. Through constellating systematic and historical readings the seminar will analyze theoretical concepts of frame and framing (Simmel, Genette, Marin, Derrida) and at the same time explore the transformation of frame forms and functions in literature and aesthetic discourse between 1720 and 1830 (Brockes, v. Haller, Wieland, Lessing, Herder, Lichtenberg, Goethe, Moritz, Jean Paul, Schlegel, Brentano, Tieck, Hoffmann). Among the topics to be discussed will be the conceptualization of subject-object relations as an analytical tool to reconstruct how the organizing principles of framing in Enlightenment (point of view, Guckkasten, chain of pictures, landscape/camera obscura) drift into the twilight of epistemological reflection: Around 1800 frame structures (and its doublings/transgressions) present the "Produzierende mit dem Produkt" and thus articulate the insights of transcendental philosophy, they turn into a medium of romantic irony.
Instructor(s): A. Krauss
Area: Humanities.

The seminar will explore to what extent Hegel can be read as contributing to a feminist philosophy. We will focus on Hegelian openings onto the emotional in Phenomenology of Spirit. In addition, we will study feminist philosophers who have drawn on or offered critical readings of Hegel (Irigaray, Butler, Cavarero, Malabou, and others). Co-listed with AS.190.633
Instructor(s): J. Bennett; K. Pahl
Area: Humanities.

AS.213.635. Anthropology and Modernism.
This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of “culture.”
Instructor(s): S. Spinner
Area: Humanities.
AS.213.650. Poetic Thought.
This course will examine essays and poems by Goethe, Hölderlin, and Rilke with an eye toward the ways in which their work addresses issues central to German Idealism and modern German thought. These include the relation of subject to object; the problem of the representation of the whole; the reconciliation of science and art; and the role of consciousness in the construction of the world. Readings to include texts by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer, Henrich, Husserl, Benjamin, Szondi, and Allemann.
Instructor(s): E. Forster; R. Tobias
Area: Humanities.

Taught in German. The course title marks a problem of translation which already Leo Spitzer in his “Prolegomena to an interpretation of the word ‘Stimmung’” underscores: “It is a fact that the German word Stimmung as such is untranslatable.” Mood, attunement, atmosphere are facets of an aesthetics of Stimmung as it developed in literature and philosophy from the 18th to the 20th century. Most recently, Stimmung has had a renaissance as a methodological term in a Literary Criticism which seeks to overcome the paradigm of post-structuralism. As David Wellbery has demonstrated, the linguistic usage of the word Stimmung comprises three aspects: a subjective mode of experience/perception, an atmospheric dimension and a communicative efficacy. It is along those lines that the course analyzes the poetics and aesthetics of Stimmung in German Literature and Thought from the 18th through the 20th century. Stimmung proves to be fertile ground for contagious forms of communication, specific modes of representation (i.e. coloring, nuance), and the dissolution of subject/object boundaries. Furthermore, we will discuss Stimmung as a term of Literary Criticism from the 20th century to the present. Readings will include: Kant, Schiller, Stifter, Fontane, Hofmannsthau, Hermann Bahr, Thomas Mann, Georg Simmel, Martin Heidegger, Leo Spitzer, Erich Auerbach, Gernot Böhme, Hans-Ulrich Gumbrecht.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.656. Thinking of the Environment.
Few concepts are more anthropocentric than the environment. Although the term is usually invoked to describe what is other than the human being, it places the human at the center of the universe by defining nature as the world surrounding him. This course will examine several literary and philosophical texts from Novalis to Celan that approach nature as a sphere alien to thought, which can never be known except through the rhetorical device of prosopopoeia, which gives face to what is inhuman. Readings to include works by Novails, Schlegel, Tieck, Stifter, Rilke, and Celan.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.660. Discourses of Dislocation.
Dislocation—travel, migration, exile, diaspora, immigration—is a preeminent symptom of the modern condition; as Jacques Derrida has suggested, it is one way of characterizing how language itself comes into being. To what extent does the relationship of various modes of mobility serve as a prerequisite for understanding modernity and literary modernism, and to what extent can one understand commonalities among these itinerant discourses? This seminar will consider several varieties of dislocated discourse (the picaresque, the pseudo-autobiography, the travelogue, as well as narratives of immigration, displacement, war and demobilization, and exile) in search of a means to discuss or consider all of them critically. Writers to be considered will include Sigmund Freud, Robert Walser, Yosef Haim Brenner, Walter Benjamin, Theodor Adorno, Jacques Derrida, Irmgard Keun, Israel Rabon, Joseph Roth, Flannery O’Connor, Yoel Hoffmann, Anton Shammas, and Salman Rushdie. All readings and discussions available in English. Undergraduates may register with instructor approval.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.666. “To be continued”- Seriality in Literature and Other Media.
Taught in German. By ending with the words “(To be continued)” [("(ist fortzusetzen")], Goethe’s Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. - although invented earlier - becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine “Die Gartenlaube”, Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, “The Perils of Pauline” (serial, 1914), “Copycat” (Jon Amiel, 1995), “Twin Peaks” and current US-American TV series.
Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

AS.213.668. Kleist.
This seminar will explore the narrative, dramatic, theoretical and quasi-journalistic work of Heinrich von Kleist along two lines of inquiry. We will read his literary experiments as reactions to the major shift in the sex-gender system and the new deployment of sexuality in the eighteenth century. We will discuss his unique role in the production, communication and interpretation of feeling across narrative and theater.
Instructor(s): K. Pahl.
AS.213.673. Adorno's Aesthetic Theory.
The posthumously published Aesthetic Theory is arguably Adorno's most important work. In it he traces the development of autonomous art and locates art's critical potential in its freedom from all notions of utility or purpose that derive from other spheres of life that are themselves corrupted by instrumental reason. We will examine Adorno's analysis of art's unique capacity to challenge conventions and produce new, if ephemeral, configurations. Discussion to focus on such concepts as illusion (Schein), mimesis, non-identity, myth, and truth content.
Instructor(s): R. Tobias.

Area: Humanities.

AS.213.675. Paul Celan's Poetry & Interpretation.
Paul Celan, arguably the most widely known poet writing in the German language after WWII, was once characterized by a hostile literary critic as the author of obscure, scandalously "hermetic" texts. Celan, however, insisted that his poems were open rather than hermetic. He believed his task to consist in speaking a language of witnessing; a language fit for preserving events that would acquire their shape in poems. This language, with its rigorous structure, compact imagery, and surprising inner logic, poses a challenge to understanding, as it is "open for interpretation." Consequently, Celan's poems motivated many prominent thinkers and critics to seek new paradigms of interpretation. In this class, we will read Celan's poetic, prosaic, and theoretical texts in view of their literary, political, and historical significance. We will also read philosophical interpretations of Celan's texts, such as Jacques Derrida's "Shibboleth" and Maurice Blanchot's "The Last to Speak." Along with these thinkers, we will try, by way of reading Celan, to understand how we "understand" poetic texts. The language of writing and discussion in this seminar will be English but most readings will be in German.
Instructor(s): A. Glazova.

Modernity gives rise to various forms of suspicion, including modern forms of resentment and practices of self-discipline (a suspicion of oneself), as well as to an epistemology of suspicion as it is developed in the modern human sciences. The course starts out with an analysis of the detective genre and of the specific transformations it undergoes in modern German literature. In a next step, we will examine literary representations of suspicion within a broader cultural-historical frame: Nietzsche's analysis of resentment serves as one point of reference; another is what Carlo Ginzburg has called the paradigm of clues. The modern human sciences, since the last third of the 19th century, have relied on a method that produces knowledge by way of interpreting clues. While suspicion in the human sciences is related to the production of truth, literature uses suspicion as a way to produce aesthetic and logical undecidabilities. We will analyze literary representations of suspicion with respect to the narrative structure (unreliable narration) and the mediation of suspicion. Finally, the course emphasizes the methodological relevance of suspicion: As a practice of deciphering, interpreting, and reading traces, suspicion calls for being reformulated literary-theoretically. Readings will include: Heinrich von Kleist, E.T.A. Hoffmann, Nietzsche, Theodor Fontane, Freud, Kafka, Thomas Mann, Heimito von Doderer, Peter Handke etc. Taught in German
Instructor(s): E. Strowick
Area: Humanities.

Though every conventional description of modernist aesthetics dates its origins to the era preceding World War I—in some versions several decades before 1914—there has always been an understanding of the War's “catalytic” influence on the aesthetic of chaos, madness, violence, and despair that comes to characterize at least one major strain of modernistic art. Taking the after-effects of the First World War as well as the Russian Revolution(s) as its point of origin, this graduate-level seminar will consider such writers as Sigmund Freud, Walter Benjamin, Sh. Y. Agnon, Sh. Ansky, Guillaume Apollinaire, Isaac Babel, Georges Perec, Erich Maria Remarque, Joseph Roth, Virginia Woolf, and Stefan Zweig. All readings and discussions available in English.
Instructor(s): M. Caplan
Area: Humanities.

AS.213.685. Theories of Translation (1530/1930).
Taught in German. It is one of the topoi of literary studies that translation presupposes interpretation and is thus bound to certain discursive premises. To investigate specifically how this connection between translation and interpretation has developed historically and is embedded in concerns of philosophy of language, the seminar reconstructs concepts (politics) of translation from Luther to Benjamin and Buber-Rosenzweig. One of the focal points is the emergence of a modern theory of representation between 1730 and 1820 (Gottsched, Venzky, Hamann, Herder, Schleiermacher), the effects of which are staged with the aid of different Shakespeare translations (Wieland, Lenz, Schlegel). Finally, by including more recent theories of translation from the milieu of deconstruction/post-structuralism, the seminar seeks to reconsider interpretation from the standpoint of translation, and translation from that of interpretation.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.689. Creativity.
Modernity requires creativity of the artist. But what does this mean? Creativity has been thought of as a gift, but also as a technique or an attitude that can be developed. It thus moves between the mysterious, the mechanical, and the relational. While creativity was of little importance for the normative poetics (Regelpoetik) of the Baroque, the Enlightenment demanded an emancipation from external rules, which led to the apotheosis of human creativity in the idea of the genius. Countering overly idealistic notions of autonomy and human artistic agency, others cultivated practices that acknowledge and even amplify the role of chance. This seminar will focus on the eighteenth and early nineteenth centuries and invite contributions on more recent poetics from its participants. Particular emphasis will be placed on interrogating the roles of the imagination, phantasy, and visualization in the creative process.
Instructor(s): K. Pahl
Area: Humanities.
Readings and discussions in German. This course will be organized around a close reading of “Aus meinem Leben: Dichtung und Wahrheit,” one of the many works of Goethe that was enshrined as prototype of a genre: discourses on modern autobiography emerged in its context and have drawn on its unique performance of writing one’s own life until today. The seminar is devoted to develop a reading of the entire book emphasizing its theoretical implications (subject formation/Bildung, concepts of time/historicity, modes of representation, genre theory, theory of the ‘daemonic’) and its prolific discursive productivity. Meticulously analyzing this productivity along with its epistemological implications, the seminar will explore how “Dichtung und Wahrheit” both establishes and revokes a representative model of autobiography. Instructor(s): A. Krauss
Area: Humanities.

AS.213.706. Literature, Museums, Mimesis.
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.718. Wirkliche Wirklichkeit:” Eccentric Realism.
Taught in German. Categories such as the uncanny, motion, or seriality are not easily associates with German Realism. The course takes a fresh look at texts by Theodor Fontane, Adalbert Stifter, and Theodor Storm in order to explore the thesis of the modernity of Realism. We will analyze framing techniques, temporal structures (e.g. boredom or belatedness) as well as the interrelation between realist poetics and other discourses and media by which realist texts produce reality as perceived reality. The aesthetics and epistemology of Realism will further be discussed with respect to Erich Auerbach’s “Mimesis” and Roland Barthes’ “reality effect.”
Instructor(s): E. Strowick
Area: Humanities.

AS.213.725. Proto-, Modern, and Post-: Locating the -ism in Modernism.
All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “post-modernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is post-modernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-Bloom, Henry Dumas, Moshe Kulbak, Machado de Assis, Mendele Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.
Instructor(s): M. Caplan.
Area: Humanities.

AS.213.741. Literature, Psychoanalysis, and Unassimilable Experience.
This course will consider experiences at the juncture between memory and forgetting, history and oblivion, narration and music. Such liminal experiences are frequently interpreted in psychoanalytic theory as trauma, though there is no reason that a purely negative definition should prevail. The suspension of the self and the concomitant immersion in the sensible world could just as well be regarded as an ecstatic experience. This course will examine the notions of immediacy, singularity, power, and sensuality in psychoanalytic theory (Freud, Lacan, Klein, Malabou) and beyond. Kleist’s “Die heilige Cäcilie” and Kafka’s “Josefine, die Sängerin” will serve as touchstones for our exploration of the ecstasy that literature at once produces and reproduces as a verbal representation and musical medium.
Instructor(s): K. Pahl; R. Tobias
Area: Humanities.

Taught in German. The course analyzes the performative on the basis of the very field that John L. Austin’s speech act theory excludes: literature. What challenges Austin’s speech act theory indeed opens up the question of the performative towards iterability and theatricality and thus calls for the performative as a methodological category of literary criticism. According to Shoshana Felman’s readings of Austin, the performative act can be accentuated as an act of the “speaking body” in which the body is conceived of not as a means of linguistic expression but rather as a spillover of the act of utterance into the statement. How then is the corporeality or materiality of writing asserted in acts of narrating and reading? The course will examine theories of the performative from the perspective of literature and literary criticism as well as analyze literary speech acts (promises, pacts, etc.) in detail. Readings will include: Austin, Derrida, Felman, Freud, Nietzsche, de Man, Hamacher, Goethe, Büchner, Kafka, Henry James, Thomas Mann etc.
Instructor(s): E. Strowick
Area: Humanities.
**AS.213.749. Modern Subjectivities: Legal, Economic, Political.**
The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citizen” or “citizen,” as the political subject. The bourgeois and the citizen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.

Instructor(s): C. Menke; R. Tobias; Staff
Area: Humanities.

**AS.213.755. Philosophy of and the Novel.**
The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhitin, Hamburger, Sartre, Beauvoir, Ricoeur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaubert.

Instructor(s): R. Tobias; Y. Ong
Area: Humanities.

**AS.213.760. Break and Continuity: German Thought around the French Revolution.**
The turn of the eighteenth century saw the political revolution of 1789 as well as interrelated revolutions in thought, symbolic system, value system, family structure, gender relations, etc. We will explore the discourse of revolution in its oscillation between two conceptions – as breakthrough and as return (to the golden age of Greek Antiquity, to a prelapsarian state). From providence to chance event, and between break with and continuity of the old order, German thinkers considered the revolution. We will read Kant, Rousseau, Hölderlin, Hegel, Goethe, Kleist, and others.

Instructor(s): K. Pahl.

**AS.213.771. Exile Literature (1933-1950).**
This seminar addresses German-speaking exile literature from 1933 to 1950. On the basis of historical and political contextualization, readings and discussions will focus on literary theoretical and discourse analytical questions. In contrast to Nazi ideology and its totalitarian claim to constitute “Germanness”, numerous émigrés intended to represent the ‘other’ Germany from outside its national borders. This politicization of exile discourse which made ‘direct’ critical involvement with the regime appear imperative had a lasting effect on literature written in exile. The leitmotif of our analysis will be the question to what extent exile literature developed its critical reflection towards a specific aesthetics of exile; an aesthetics that articulates the reference to the historical-political situation, to Nazi Germany, expulsion, loss of language, dislocation and cultural transfer in form of a critique of representation. We will discuss topics such as the conceptualization of (German) tradition/transference, languages of (non-) identity, theories of (anti-)mimesis, discourse politics and aesthetics, or Avant-garde and exile. Authors include: Thomas Mann, Irmgard Keun, Else Lasker-Schüler, Hannah Arendt, Adorno, Benjamin, Brecht, Lukács, Anna Seghers.

Instructor(s): A. Krauss.

**AS.213.789. Literature & Identity in the Age of Globalization.**
In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.

Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.
AS.213.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. – In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schieriemacher, Nietzsche, Auerbach, Szondi, Bollick, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 214.790, and 215.790
Prerequisites: ;;
Instructor(s): E. Strowick; J. Neefs
Area: Humanities.

Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.213.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshiping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesí Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.213.800. Independent Study.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias.

Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias.

AS.213.813. German Qualifying Paper Preparation.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias.

This is an introductory course to Dante’s Inferno where we will think about the human phenomenon of singing. We will compare songs and texts that are familiar to us today to 14th century cantos written by Dante Alighieri. Dante and our contemporary popular music have more in common than we may first think. They both convey thoughts, feelings, and a range of universal human experiences that cannot be expressed in everyday language. Although Dante’s world and our own are vastly different, there are universal human experiences that were present in his world that still remain relevant today. The phenomenon of singing and of music goes beyond textual limits and students will be placed in a position of finding what they have in common with both the contemporary artist and the medieval poet.
Instructor(s): J. Gomez.

AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music Through the Ages. 3 Credits.
The seminar explores challenging questions with which men have been dealing for centuries: how do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? By addressing literary and philosophical writings, as well as musical examples from different periods and contexts, students will be led through a critical reconsideration of the topic. A variety of materials will be discussed, including genres as different as medieval songs, early modern madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities.

AS.214.171. Freshman Seminar: Witchcraft and Demonology in Renaissance Europe.
Who were the witches? Why were they persecuted for hundreds of years? Why were women identified as the witches par excellence? How many witches were put to death? (Answer: 30-40,000, between about 1400 and 1800.) What traits did European witchcraft share with witch-mythologies in other societies? After the witch-hunts ended, how did “The Witch” go from being “monstrous” to being “admirable” and even “sexy”? Answers are found in history and anthropology, but also in literature, folklore, music, and the visual arts. After an introduction to ancient and medieval witchcraft, we will study European witch-persecution between 1400 and 1800. The second half of the course will concentrate on artistic representations of witches in media ranging from manuscripts to movies, concentrating on Italy, France, Spain, and Germany.
Instructor(s): W. Stephens
Area: Humanities.
**AS.214.207. Italian-American Culture.**
This course explores the many depictions, descriptions, and definitions of Italian-American ethnicity and identity in various media, from the narratives and poetry of the first Italian immigrants in the nineteenth century to the wildly popular, stereotype-promoting American films and television shows of today. Through literature, film, poetry, language, music, and practice of cultural traditions, we will investigate how Italian-Americans express their identity to others. Although this course features a large component on familial and religious traditions, it is open to students of all backgrounds who have an interest in this rich heritage. Italian food will also be studied (and enjoyed!). Cost of food/transportation to restaurant(s) is not included.
Instructor(s): W. Stephens
Area: Humanities.

**AS.214.215. Love Stories in Italian Literature and Cinema.**
The topic of Love will guide us across Italian Literature and Cinema. We will analyze historical Loves and Lovers from the Middle Ages up to the present. We will examine how Love was talked about and portrayed, what Love was and what it has become. Love will help us to better understand Italy and Italy will maybe help us to better understand Love.
Instructor(s): L. Bacchini
Area: Humanities.

**AS.214.220. Program Abroad: Medieval & Early Modern Florence Reality & Imagination.**
Intersession Abroad Program. The course examines Reality and Imagination in Medieval and Early Modern Italian Literature, with an emphasis on modern Florence.
Instructor(s): W. Stephens
Area: Humanities.

**AS.214.237. Madness & Trauma in Modern Italian Literature.**
Illness, whether psychological or physiological, is a common trope in Italian literature. In this course, we will examine the fictional and nonfictional works of modern Italian authors who narrate emotional trauma, mental illness, and abnormal psychology. How do these authors confront illness in their protagonists and in themselves? How do external factors (such as war or wide-spread epidemic) change the way in which a narrator or character sees the world?
Instructor(s): A. Falcone
Area: Humanities.

**AS.214.261. The World of Dante.**
An Introduction to the Divine Comedy
Area: Humanities.

**AS.214.271. Boccaccio's Decameron.**
A close reading of Giovanni Boccaccio's masterpiece will allow the students to become acquainted with the civilization of the European Middle Ages. Among the areas of interest are: medieval Italy as a mosaic of powers, faith and religion, women in society, nobles, commoners and the rise of the middle class, the rituals of love, and the purposes of literature.
Instructor(s): P. Forni
Area: Humanities.

**AS.214.278. Italian Film.**
This undergraduate seminar is an overview of 100 years of Italian film history covering such pivotal moments as the early Futurist films, the creation of Cinecittà, the Italian Neorealist film movement, the legendary Commedia all'italiana films, as well as a discussion of classic Italian auteurs such as Fellini, Pasolini, Wertmüller, Bertolucci, and such contemporaries as Garrone and Sorrentino.
Instructor(s): B. Wegenstein
Area: Humanities.

**AS.214.301. Survey of Italian Literature.**
A viaggio dal Rinascimento alla modernità, per incontrare il genio italiano e conoscere la nostra umanità. Through readings from the most celebrated texts by Italian authors, we will travel from the early renaissance to the 20th century to encounter the struggles and triumphs of the human conscience, and the highest achievements of Italian culture. The course will explore poetry, short story, theatre, epic, and novel, with an introduction to Italian opera. Students will have the opportunity to read Dante Aligheri, Baldassarre Castiglione, Galileo Galilei, Giacomo Leopardi, Giorgio Bassani, and many others in original language, and to discover how these works are relevant in our own life and times. Taught in Italian. Recommended course background: Italian AS.210.252; may be taken concurrently with Advanced Italian II.
Prerequisites: Not open to students who have taken AS.214.302.
Instructor(s): E. Refini
Area: Humanities.

**AS.214.302. The Agony and the Ecstasy from Dante to the Romantics.**
By exploring texts and topics in Italian literature and culture from the Middle Ages to modernity, the course will address a variety of themes crucial to the development of the Italian literary tradition. Authors will include Dante, Petrarch, Boccaccio, Ariosto, Tasso, Leopardi, Manzoni.
The course is taught in English with special sessions in Italian for Italian Majors and Minors (so as to count towards the Italian Major/Minor requirements).
Prerequisites: Not open to students who have taken AS.214.301.
Instructor(s): Staff
Area: Humanities.

**AS.214.303. Rome as told by its Narrators.**
The course is intended for students who would like to learn about Rome through its history, literature, and arts. We shall explore the city and its culture, analyzing the works of several authors and film directors. The main goal is to offer an experience of the Eternal City as a place where the whole of Italy is reflected in its beauty and complexity. The course will be taught in English.
Instructor(s): W. Stephens
Area: Humanities.
AS.214.317. Italian Theater from Commedia dell’arte to Dario Fo.
Students must have completed Intermediate Italian II (210.252) or equivalent. Italian writers and performers have created some of the world’s greatest theatrical works, particularly in the genres of comedy and opera. We will study the evolution of Italian theater from the improvisatory humor of the Commedia dell’arte, through the invention and development of Italian opera, to the zany and politically engaged satire of Dario Fo, winner of the 1997 Nobel Prize in Literature. Other major authors we will study include Carlo Goldoni and Luigi Pirandello. We will view film versions and live performances of plays and operas in Italian. The class will be conducted in Italian.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.330. Love and War in Italian Literature.
This course is based on a choice of narrative and poetic texts from several centuries of Italian narrative and poetry. We will examine the literary renditions of the personal stories of Italians caught within the tragic logic of the war. Our focus is going to be the effects of war on love relationships as they are presented by a number of authors including Dante, Tasso, Tomasi di Lampedusa, Berto, Calvino, Bassani and Morante.
Instructor(s): P. Forni
Area: Humanities.

AS.214.333. Shakespeare on the Opera Stage.
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities.

This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Area: Humanities.

AS.214.346. The Short Story in Italy Across the Centuries.
The genre of the short story was in many ways invented by the Italians. During the later Middle Ages, preachers adopted the short tale, cultivated by fireside storytellers for ages, to add interest to the morals of their sermons. By the late thirteenth century, Italian writers were collecting such stories for entertainment as well as edification. Boccaccio’s Decameron (1352) was the first classic collection and inspired other collections throughout the Renaissance. It and other Italian collections inspired writers in many genres and countries, including Shakespeare and other dramatists. In modern times, short stories have become one of the predominant genres of world literature. This seminar surveys Italian short fiction from the fourteenth through the twenty-first century. Emphasis is on the representation of Italian culture and history through storytelling, including in film. Course will have two full sections, one taught in Italian for majors, the other taught in English, with no prerequisites, for non-majors. Limited to fifteen students per section.
Instructor(s): P. Forni; W. Stephens
Area: Humanities.

AS.214.347. Petrarch and the Beginnings of the Renaissance. 3 Credits.
This course will focus on the life, work, and thought of Francesco Petrarca, or “Petrarch.” Though known today primarily as the author of Italian love poetry, Petrarach considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.350. The Eternal City: Rome in Literature and Film.
This class will be conducted in Italian. By studying the works of modern Italian writers and filmmakers, as well as ancient and medieval texts, we will explore the history and the enduring cultural importance of the city of Rome. We will consider the “myth of Rome” as a center of order and authority, and we will examine texts that subvert this myth by portraying the chaotic, joyous, and unseemly realities of life in Rome. Authors and filmmakers we will study include Virgil, Petrarch, Moravia, Ginzburg, Pasolini, Rossellini, and Fellini.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.353. Travel & Fantasy Worlds in Italian Literature.
This course examines important works of Italian literature that narrate journeys to exotic or imaginary places, blurring the boundaries between reportage and fantasy. We will consider topics including utopias, new worlds and exploration, allegorical and spiritual journeys, construction of identity, and the conceptualization of the “other.” Readings will span from the Middle Ages to the present day, including Marco Polo, Giovanni Boccaccio, and Italo Calvino. The class will be conducted in Italian. Recommended Course Background: AS.210.351 or AS.210.352 or equivalent.
Instructor(s): J. Coleman
Area: Humanities.
AS.214.361. Rome as Told by its Narrators: A Journey through History, Literature, Arts and Film.
The course is intended for students who would like to learn about Rome through its history, literature, arts, and film. We shall explore the city and its culture analyzing the work of several authors. The main goal of that itinerary is to offer a whole experience of Rome through time. The Eternal City is also a place where the whole of Italy is reflected in its beauty and complexity. 
Instructor(s): T. Katinis 
Area: Humanities.

The goal of this course is to acquaint the students with themes and images recurring in the Italian poetic tradition from the Middle Ages to the Novecento. 
Instructor(s): P. Forni 
Area: Humanities.

AS.214.369. Food and Culture in Italy.
Throughout Italy’s history, food traditions have been central to the formation of Italian identities, both national and regional. In this course we will study Italy’s food traditions and explore the ways in which food has become a major theme of Italian literature, film, and music, from the Renaissance to the present day. The class will be conducted in Italian. Students must have completed Intermediate Italian II (AS.210.252) or equivalent. 
Instructor(s): J. Coleman 
Area: Humanities.

Magic and Marvels or Wonders make us question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the magical and the marvelous were bound up with questions and issues very different from those of our time. With the exact sciences still to be invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance, especially the romance and the theater, provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors will attend a weekly supplemental discussion in Italian and compose their written work in Italian. 
Instructor(s): W. Stephens 
Area: Humanities.

What does it mean to be Italian rather than French, American, or anything else? What’s the difference between being Tuscan, Milanese, or Sicilian? Between being Christian, Jewish, Muslim, or “other”? How does the reality of Being Italian differ from the clichés that prejudice, commercialism, or mass media fads help to spread? Considering these questions can be important whether you want to use your Italian in business, in academia, or for sheer pleasure, whether you want to watch films, read books, or see the sights. 
Prerequisites: AS.210.251 AND AS.210.252 
Area: Humanities.

AS.214.376. Warrior Women from Ancient Times to Game of Thrones. 3 Credits.
This course will trace the origins of the warrior woman from ancient times through today’s pop culture and reflect on the multiplicity of its social, cultural, and political ramifications. 
Instructor(s): J. Gomez 
Area: Humanities.

The course will explore the notion of ‘voice’ in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the ‘voice’ in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa’s The Siren and Italo Calvino’s A King Listens. 
Instructor(s): E. Refini 
Area: Humanities.

Who was Niccolò Machiavelli? The author of the Italian Renaissance’s most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli’s major works and to the intellectual, social, and political contexts that shaped his thinking. 
Instructor(s): C. Celenza 
Area: Humanities.

AS.214.393. Italian Opera and the Art of Adaptation.
Italian opera, from its very inception, has developed in close dialogue with other art forms. The pioneering operas of Peri and Monteverdi based on the figure of Orpheus are part of a larger cultural movement that saw Renaissance philosophers (Marsilio Ficino), visual artists (Bronzino) and humanists (Angelo Poliziano) resuscitate and transform the ancient Orpheus myth. The subsequent evolution of opera was influenced by (and influenced) innovations in stage comedy, the novel, and other art forms. In this course, we will explore these connections between the development of opera and other facets of Italian culture. No knowledge of Italian is required. The course will be taught in English; an additional Italian language discussion section will be offered for majors. 
Area: Humanities.
**AS.214.437. The Intellectual World of the Italian Renaissance.**
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities

**AS.214.445. Boccaccio's Decameron and the Multiplicity of Story-Telling.**
Boccaccio's Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio's masterpiece on its own terms and in relation to the development of story-telling, from gossipy "news" (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints' lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and filmic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian. Those students should enroll in section 2 which will be awarded 4 credits.
Instructor(s): W. Stephens
Area: Humanities.

**AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3 Credits.**
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what's natural and what's supernatural? What's human and what's more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto's Orlando furioso (1532) and Tasso's Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

**AS.214.479. Dante Visits the Afterlife: The Divine Comedy.**
Dante’s Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante's understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities.

**AS.214.561. Italian Independent Study.**
Instructor(s): C. Celenza; E. Refini; W. Stephens.

**AS.214.562. Italian Independent Study.**
Instructor(s): C. Celenza; E. Refini; W. Stephens
Area: Humanities.

**AS.214.597. Italian Lit Internship-Summer.**
Instructor(s): J. Coleman; P. Forni.

**AS.214.602. Ruin Loss and the Presence of the Past.**
A seminar that considers how the early moderns encountered the (mostly material, mostly classical) remains of earlier cultures, in both visual and verbal realms. Survival and revival; manuscripts and art works; antiquarianism and the burden of the past; ephemerality and dreams of permanence. Some attention to the methodologies of historicism in both literary and art-historical study, including Burckhardt, Warburg, Panofsky, Greene, and recent work by Nagel and Wood, then a consideration of such figures as Dante, Petrarch, Ronsard, Mantegna, Francesco Colonna, Spenser, Shakespeare, and Milton.
Instructor(s): L. Barkan.
The course aims to outline the musical reception of Michelangelo’s poems from the 16th to the 21st century. Moving from a critical introduction to Michelangelo’s Rime, the course will address Michelangelo’s own ideas on music and the few musical settings of his poems by contemporary composers. The course will turn then to the Post-Romantic renaissance of Michelangelo’s myth as the context within which the main bulk of musical settings of the artist’s poems was produced. What did composers such as Wolf, Britten, Dallapiccola, Shostakovich and Reimann find in Michelangelo’s poetry? Through a close reading of the poems chosen by the composers, the course will explore the biographical, philosophical and socio-historical implications suggested by the different musical settings. No training in music performance or theory is required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.604. # internet.
This seminar will address the history of the internet as participatory platform from such social media as facebook and twitter to blogs and forums of political or activist nature, as well as online gaming environments; the questions raised will regard the social change these platforms produce, the legal implications of sharing information, the political and economical issues around “digital labor” (Scholz), as well as the broader ethical questions about identity and the construction of self in participatory online environments. This class will include a hands-on dimension combining media theory & practice.
Instructor(s): B. Wegenstein
Area: Humanities.

The newly acquired "Bibliotheca Fictiva“ collection of rare books contains over 1200 literary forgeries and related documents, and makes Johns Hopkins the only center in Europe or the Americas equipped to investigate the deep relations between literature (in the broad sense that includes historiography), literary forgery, and literary theory. We will trace the development of the concept of literary counterfeit in humanist scholarship, with its medieval and classical antecedents, and the growth of modern literary genres, particularly the historical novel, that depended on concepts of authenticity and probability or verisimilitude. Theoretical readings, from Lorenzo Valla through postmodern literary theory, will be matched with notorious forgeries and with metatextual fiction, from Rabelais and Cervantes to Borges, Eco, and their imitators. Elementary Latin will be helpful but not required; some paleographical skills will be taught; all sessions will be held in the Bibliotheca Fictiva collection in the rare book room of the new Brody Learning Center.
Instructor(s): E. Havens; W. Stephens
Area: Humanities.

AS.214.610. Latin and Vernacular Eloquence from Dante to Bembo.
This course will examine the coexistence of Latin and the Italian vernaculars as languages of literary expression in Italy between the thirteenth and sixteenth centuries. We will study theoretical works that articulate ideals of eloquence and style for Latin and the vernacular and that conceptualize the nature and relative roles of these languages. We will also consider the social, political, and intellectual factors that influenced how literary authors and translators employed Latin and the vernacular. Reading knowledge of Italian is required. While Latin works will be read primarily in translation, we will work with selected texts in Latin with the goal of better understanding medieval and Renaissance Latin style. Some prior study of Latin is assumed; advanced Latin is not a prerequisite.
Instructor(s): J. Coleman.

AS.214.616. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 211.416 and 070.416.
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.

AS.214.630. Rossellini-Fellini-Pasolini: Italian Cinema and its Meaning Beyond Italy.
The great triumvirate of the Italian cinema, Rossellini, Fellini, and Pasolini can be said without exaggerations to be the fathers of modern film. Through the poetry of their moving images, they lay the groundwork in some ways for almost every kind of cinema that has been made in their wake. This course will examine the breadth of their opus and writings in an effort to understand the source of their influence. Recommended Course Background: AS.210.311-AS.210.312 or instructor permission.
Instructor(s): B. Wegenstein.

AS.214.633. Poetry and Divinity in Medieval and Early-Modern Italy.
The late Middle Ages saw intense debates between humanists (like Petrarch and Mussato) who considered great poetry (even from pagan antiquity) to be replete with divine wisdom, and theologians who condemned poetry as mendacious and spiritually corrupting. These debates intensified in the 15th and 16th centuries, leading to important contributions by thinkers like Marsilio Ficino and Giordano Bruno, who re-conceptualized the nature of poetic inspiration and “divine frenzy.” In this course we will consider how these developments shaped both the theory and practice of poetic composition and interpretation. Discussions will be in English. Ability to read Italian is required.
Instructor(s): J. Coleman
Area: Humanities.
AS.214.637. The Intellectual World of the Italian Renaissance. This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspired by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.

Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.639. The Sound of Poetry: Early Modern Approaches to Poetics, Rhetoric, and Music. Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.

Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.640. Film Theory. This class deals with film theory in its history and its current trends. We will examine structuralist, feminist, Marxist, psycho-analytic, Deleuzian, and other theoretical approaches to understanding and interpreting the cinematic medium. We will look at several different film samples from European film to Latin American Film, auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist to class during the semester.

Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.641. Renaissance Mock Epic: Pulci, Folengo, and Rabelais. Three of the most wildly inventive works of Renaissance literature are Luigi Pulci’s verse romance Morgante (1478/1483), Teofilo Folengo’s macaronic Baldus (1517/1521) and François Rabelais’s five prose tales known to posterity as Gargantua et Pantagruel (1532-1550’s?). Beginning from a template of mock epic, these three works unleash a tornado of linguistic and narrative tours de force, burlesquing and satirizing almost every aspect of literature, politics, and religion, with such reckless gusto that their authors were often accused of irreligion and even atheism. Their frenetic attacks on every conceivable norm of language, good taste, and decorum provide a fascinating “Dionysian” counterpoint to the dignified “Apollinian” works that are more easily assimilable to modern ideas about the essence of the Renaissance. A thorough familiarity with either early modern Italian or early modern French is absolutely essential for full appreciation of these works, as is a basic knowledge of Latin.

Instructor(s): W. Stephens.

AS.214.653. Pleasure and Virtue in Renaissance Literature. This course will examine major literary and philosophical works from Renaissance Italy that thematize pleasure, questioning (explicitly or implicitly) its place in the hierarchy of human values. We will consider the role that the Renaissance rediscovery of Epicurean and Neoplatonic thought played in shaping how pleasure in its various forms was conceptualized and represented. Authors we will read include Lorenzo Valla, Marsilio Ficino, and Niccolò Machiavelli. Reading knowledge of Italian is required.

Instructor(s): J. Coleman
Area: Humanities.

AS.214.655. Translating Knowledge: Brunetto’s Tresor and Dante’s Convivio. By focusing on Brunetto Latini’s Tresor and Dante Alighieri’s Convivio, the seminar will examine the notion of “encyclopedic knowledge” in the Middle Ages. The two works – both examples of “translation” – call traditional ideas of knowledge into question. The seminar will study the Convivio as a response to the Tresor and will situate Dante’s project within a wider discussion of vernacular translation as a key tool for the dissemination of the classical tradition in the Middle Ages.

Instructor(s): E. Refini
Area: Humanities.

AS.214.658. Dante’s Inferno: A Reading for Teaching. How to Teach the Divine Comedy to American Undergraduates.

Instructor(s): P. Forni.

AS.214.659. Italian Renaissance Humanism. In this course we will study representative works by the major figures of Italy’s humanist movement, considering the significance of the movement as a whole and the many currents that scholars have identified within it. Topics and authors we will explore include early Paduan humanism (Lovato, Mussato), Florentine civic humanism (Salutati, Bruni), the birth of philology (Poliziano, Valla), vernacular humanism (Alberti, Landino), and the relationship between humanistic studies and Christian religion (Ficino, Sannazaro, Erasmus). The class will be taught in English. The ability to read Italian is required. Some knowledge of Latin is desirable but is not required.

Instructor(s): J. Coleman
Area: Humanities.

AS.214.668. Boccaccio I.
A reading of Boccaccio’s Decameron completes the unit of two-semester courses on the Florentine writer.
Instructor(s): P. Forni.

AS.214.671. Ancient and Modern in the Mirror of the City: The Image of Rome in Italian Literature from the 13th to the early 19th Century.
The course will run from October 19th through December 7th, meeting twice per week. The source of two formative traditions shaping Italian identity, Antiquity and Christianity, Rome is the most cited place in Italian literature and a key source for Italy’s ongoing dialogue with the past. Yet, every epoch of Italian literature has had its own idea of the past. How did Italian authors shape the image of Rome? Focusing on both canonical and non-canonical writers, this course will provide a unique approach to the history and vicissitudes of classicism in the history of Italian culture. We will explore the following authors and texts: Le miracole de Roma (13th-century translation into the Roman vernacular of the Latin Mirabilia Urbis Romae, 12th cent.); the Anonimo Romano’s Cronica (1350s); Petrarch (Collatio laureationis, epistles); Poggio Bracciolini’s De varietate fortunae (1431); Biondo Flavio’s preface to his Roma instaurata (1444-46); Raphael’s letter on Roman antiquities to Leo X, written in cooperation with Castiglione (1519); Andrea Fulvio’s preface to his Antiquitates Urbis (1527); “Pasquinades” (“Pasquinate”) from the sixteenth century; Rome in Baroque poetry (Marino and Chiabrera) and in the poetry of the early Arcadian Academy (1690s); 18th-century satires on Rome (Devoti, Contucci); Alessandro Vern’s Notti Romane (1792 and 1804), Leopardi’s letters from Rome (1822); and G. G. Belli’s Sonetti on the ruins and monuments of Rome (1830s). Consequently, this course will also provide students with an overview of the many languages of Italian literature, such as medieval Roman vernacular, medieval and humanist Latin, neo-Latin, and nineteenth-century Roman dialect.
Instructor(s): Staff
Area: Humanities.

AS.214.672. Tasso, the Epic & Tradition.
Students will achieve deep familiarity with Tasso’s Gerusalemme liberata and Aminta: read selections from Gerusalemme conquistata, Il mondo creato, Tasso’s Dialogues, and his literary-theoretical treatises; survey important texts of Tasso criticism, and sample Tasso’s legacy in poetry and figurative arts.
Instructor(s): W. Stephens.

This course will be taught from September 2 through October 14, 2015. The course aims to analyze the development of Foscolo’s poetry in the years between the eighteenth and nineteenth centuries (1798-1807), namely the development from the sonnets and the odes to the poem I Sepolcri, starting off from the most common models of the famous contemporary poets (Parini, Monti, Alfieri, Pindemonte) to arrive at a new understanding of “lyric poetry.” Furthermore, the lectures will focus on the discussions and controversy that arose with regards to the Sepolcri (with Pindemonte and others) immediately after publication, when the novelty of the poem aroused bewilderment and perplexity in many critics, readers and poets. The analysis of the anti-Foscolo writings that appeared at this time - and the replies of Foscolo himself - will show how most of the readers of that time, still tied to a static view of literary genres, were negatively affected by the audacity in the mixture of the various registers that characterize the poem (epic, lyric, elegy, satire, tragedy) held responsible both for the lack of formal and stylistic unity of the poem, and its complete obscurity. The class will be taught in Italian.
Instructor(s): F. Bausi; Staff
Area: Humanities.

AS.214.675. The Invention of the Secular Theatre.
Must read Italian, but not limited to Italian graduate students. Between late Antiquity and the fifteenth century, religious and cultural strictures on theatrical activity were enforced continuously, though not consistently. While spectacle (and, in the later Middle Ages, drama) remained important to medieval life, it was left to Italian humanists to reconstitute secular theater in the fullest sense, by reviving the ancient classical forms of comedy and tragedy, and by inventing new forms such as tragicomedy, commedia dell’arte, and opera. Sixteenth-century drama in Italian was the model for the development of dramatic literature in the other major Western European countries, including works of Shakespeare, Molière and other major authors. After reading several classic texts of the Italian sixteenth century in modern editions, students will produce editions and translations of other texts--both sixteenth-century imprints and the unpublished plays in a unique manuscript recently acquired by JHU—for planned publication. All sessions will be held in Special Collections in the Brody Learning Commons, and students will help prepare an exhibition of Renaissance editions.
Instructor(s): E. Havens; W. Stephens
Area: Humanities.

AS.214.676. The Renaissance Comic Romance.
In the second half of the fifteenth century, Italian poets transformed the medieval adventure stories of Charlemagne’s and Arthur’s knights. Luigi Pulci’s earthy, bourgeois Morgante and Matteo Maria Boiardo’s romantic, courtly Orlando innamorato created two variants of a genre that led from Ariosto’s Orlando furioso through Folengo’s Baldus to inspire Rabelais’s Gargantua and Pantagruel, Cervantes’ Don Quixote, and, eventually, the European novel. The course concentrates on the works of Pulci, Boiardo, and Folengo, combining close analysis of their linguistic and narrative fabric with examples of their influence on later comic masterpieces.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.
AS.214.678. Ariosto's Orlando Furioso.
Ludovico Ariosto (1474-1533) was one of the major poetic innovators of the European Renaissance. He is best known for Orlando Furioso, the long epic-romance that also bears traces of his innovations in other genres, especially theatrical comedy in the vernacular. Orlando Furioso is an encyclopaedia of Renaissance genres and topics that was influential throughout European literature. Written as a continuation of Boiardo’s Orlando Innamorato (left unfinished in 1494), Ariosto’s poem overshadowed his competitors, including Giangiorgio Trissino and the Tassos, father and son. From L’Italia liberata dai goti and L’Amadigi to Gerusalemme conquistata (leaving aside the many poems now forgotten), only Gerusalemme liberata achieved anything comparable to the popularity and critical acclaim won by the Furioso. Aside from three complete redactions printed in 1516, 1521, and 1532, Ariosto left at his death five unfinished cantos that were never integrated into the poem, and that would have altered it considerably. Reading ability in Italian required.
Instructor(s): W. Stephens.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities.

AS.214.729. Petrarch and His Legacy.
In this seminar we will study Petrarch’s poetry, as well as selected prose works. We will consider the various facets of Petrarch’s profound influence on European literature and intellectual culture: his role in inaugurating humanism and the revival of classical learning; his new vision of historical change and human subjectivity; the immense impact of his Canzoniere on European lyric poetry and on the development of the Italian language itself. The conclusion of the course will be devoted to early modern authors who adapted the Petrarchian lyric mode in new ways, including Vittoria Colonna, Thomas Wyatt, and Shakespeare.
Instructor(s): J. Coleman
Area: Humanities.

An introduction to the Italian novel of the 20th Century
Instructor(s): P. Forni
Area: Humanities.

This seminal text of the late Middle Ages will be a point of departure for discussing the role of literature in forging the socio-political convictions of Western Civilization.
Instructor(s): P. Forni
Area: Humanities.

Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non-Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities.

AS.214.765. Casiglione and Della Casa.
The students will become acquainted with two of the most influential books of conduct written in the Renaissance: the Cortegiano and the Galateo.
Instructor(s): P. Forni.

AS.214.769. The Orpheus Myth and the Arts in Early Modern Italy.
The revival of the Orpheus myth in Early Modern Italy shaped some of the period’s most important developments in literature, music, and the visual arts: as the first Italian secular play, Angelo Poliziano’s Orfeo marked a new beginning for Italian theater in the late fifteenth century. Just over a century later, the composers and librettists who created Italian opera (Peri, Rinuccini, Monteverdi, Striggio, and others) made the Orpheus myth the most characteristic theme of this new art form. In this course we will study these and other Early Modern works based on the Orpheus myth, as well as their classical antecedents (including texts by Virgil, Ovid, Boethius). We will explore the literary, musical, and artistic repercussions of the rediscovery and reinterpretation of ancient Greek Orphic poetry by intellectuals and poets of Lorenzo de’ Medici’s circle, including Marsilio Ficino, Cristoforo Landino, and Giovanni Pico della Mirandola. Discussions will be conducted in English. Some knowledge of Italian is desirable, but advanced Italian is not a prerequisite.
Instructor(s): J. Coleman.

In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posite, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.
AS.214.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. – In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollack, Nichols, Cercuqilini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 213.790, and 215.790
Prerequisites: 
 Instructor(s): E. Strowick; J. Neefs
Area: Humanities.

Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.214.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshiping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.214.851. Italian Foreign Language Teaching Practicum I.
Required for first-year Italian Graduate Students. Must take Italian Foreign Language Teaching Practicum II (AS.214.852) to receive credit for this course. This course will not have a scheduled meeting time.
Instructor(s): A. Zannirato
Area: Humanities.

AS.214.852. Italian Foreign Language Teaching Practicum II.
Required for First year Italian Graduate Students. This course will not have a scheduled meeting time.
Prerequisites: AS.214.851
Instructor(s): A. Zannirato
Area: Humanities.

AS.214.861. Italian Independent Study.
Instructor(s): C. Celenza; E. Refini; W. Stephens.

AS.214.862. Italian Dissertation Res.
Instructor(s): B. Wegenstein; C. Celenza; E. Refini; P. Forni; W. Stephens.

AS.214.863. Italian Proposal Prep.
Instructor(s): Staff.

The revolts of African slaves and Native Americans in colonial and present-day Latin America have captured the attention of some of the best Latin American and European filmmakers of the last decades. This course will explore the representation of African slaves and Indian rebels on the big screen from a revisionist historical perspective paying attention to the struggle for their liberation and resistance against the abuses of capitalism in connection with postcolonial studies and the key notion of the coloniality of power. We will focus on these issues through the critical analysis of six films: QUILOMBO (Brazil), BURN! (Italy and France), THE LAST SUPPER (Cuba), ERENDIRA IKIKUNARI (Mexico), TUPAC AMARU (Cuba and Peru) and SHIP OF FOOLS (Argentina). All films have English subtitles and all discussions will be in English.
Instructor(s): J. Valiente-Nunez
Area: Humanities, Social and Behavioral Sciences.

AS.215.113. The Andes through Quechua.
Quechua, the lingua franca of the Inka Empire, is the first language of more than ten million people throughout the Andes and second language of millions more. This multi-media course prepares students for further study of Quechua and the Andes. Through film, song, short story, and communicative language instruction, students will learn basic words, phrases, and grammar for oral communication; reading and writing skills; as well as study habits and resources to continue their learning.
Instructor(s): A. Smith
Area: Humanities.

AS.215.117. Film & Feminism.
This course is an introduction to the intersections between film and feminist theory, activism and criticism. Each session will involve a screening and discussion of readings exploring topics such as the nature of the gaze, global feminism, “girl” culture, and constructions of femininity and beauty. Directors include Fellini, Almodovar, Claudia Llosa, Deepa Mehta, Ousmane Sembène and others. The course aims to prepare students for future courses in film and/or women, gender and sexuality studies.
Instructor(s): A. Sheeran
Area: Humanities.
Paul Leduc is a unique independent filmmaker from Mexico whose films explore different aspects of the history of his country. If there is something that defines Leduc’s films, this is his social compromise with the poor and the oppressed and their liberation as well as the denunciation of the abuses committed by capitalist globalization in Mexico. In this course, we will pay attention to these issues when watching Leduc’s five most important films: Reed: Insurgent Mexico (1973), Frida: Alive Nature (1986), What Do You Think? (1986), Baroque (1989) and Cobrador, in God We Trust (2006). All films have English subtitles.
Instructor(s): J. Valiente-Nunez
Area: Humanities, Social and Behavioral Sciences.

Latino/as form a rich and important cultural component of the American community and Latino/a writers comprise a dynamic demographic in the U.S. literary world. This course will examine the work of key Latino/a authors (Junot Diaz, Sandra Cisneros, Julia Alvarez), with a particular emphasis on those of Chicano and Caribbean heritage. In this survey of U.S.-Latino/a fiction, we will explore the various ways that native bi-cultural and bi-lingual individuals negotiate the challenges of identity, belonging, and self-expression through literature.
Instructor(s): J. Baumgardt
Area: Humanities.

During a 1955 gathering of filmmakers in Salamanca, several directors implored their peers and colleagues to rebel against the stringent censorship of Francisco Franco’s regime. In this course, we will examine films produced in Spain following that seminal moment and during the decline of Franco’s dictatorship. In addition to providing the films with a cultural and historical background, we will consider the variety of responses to the state censorship that abounded during Franco’s reign.
Instructor(s): C. Kozy
Area: Humanities.

AS.215.231. Introduction to Literature in Spanish.
The main objective of this course is to examine and discuss specific authors and topics in literature in Spanish from the Middle Ages to the 20th century. The course is designed to cover a selection of Hispanic texts from Spain and Latin America. Literary genres to be studied will include narratives, poetry, and drama. The bulk of each class session will be dedicated to the discussion of the assigned readings. This course is taught in Spanish. This course is required for the major in Spanish.
Instructor(s): E. Gonzalez; Staff
Area: Humanities.

AS.215.243. Freshman Seminar: The Middle Ages in Film.
The Middle Ages and medieval themes are ubiquitous in popular movies of our times. This course studies the Middle Ages as they have been portrayed in film, with a focus on Spain. Course materials include studies on the imaginative uses of the Middle Ages as well as films like The Cid, Tirante el Blanco, Ladyhawke, and Destiny, among others.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.303. Program Abroad: Cuba in Film and Literature.
Interession Abroad Program. The course examines Cuba through contemporary film and literature.
Instructor(s): E. Gonzalez
Area: Humanities.

Area: Humanities.

This course explores the work of the amorous poet and the “lady of his thoughts” from Garcilaso’s sonnets (1543) to don Quijote’s infamous love for the immaterial Dulcinea (1605). A chronological selection of amorous poetry from the period, including Cervantes’ own work as a poet, will be read in conjunction with excerpts from Leon Hebreo’s, Dialogues of Love, the key philosophical text for Neo-platonic love which was in wide circulation among poets of the period.
Instructor(s): G. Ponce
Area: Humanities.

AS.215.311. Radicalism, Film & Literature in Modern Latin America-Community Based Learning.
This course will explore the cultural symbiosis of radical politics, film, and literature in modern Latin America. Beginning with Cuban revolutionary Jose Marti and the definitive end of the Spanish Empire and concluding with current socialist movements in South America, we will analyze key radical texts by the likes of Friedrich Engels and Ernesto “Che” Guevara, classic films like The Battle of Chile by Patricio Guzman, and important works of literature by authors such as Pablo Neruda and Rigoberta Menchu. Note: Class will be conducted in English and all assigned texts will also be in English in order to encourage interdisciplinary enrollment and participation.
Instructor(s): M. Strayer
Area: Humanities.

The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncagiolo and Silva Passuni.
Instructor(s): S. Castro-Klaren
Area: Humanities.

Desde la conquista musulmana hasta la expulsión de los moriscos la Península Ibérica fue una sociedad caracterizada por el multilingüismo y la presencia, muchas veces conflictiva, de habitantes de las tres religiones monoteístas. Este curso presenta un panorama de las literaturas y culturas hispano-musulmanas e hispano-judías, así como hispano-cristianas y de temática morisca, desde la conquista musulmana (711) hasta la segunda parte del Quijote (1615).
Recommended Course Background: AS.210.311-AS.210.312 or instructor permission.
Instructor(s): H. Sieber; N. Altschul
Area: Humanities.
AS.215.327. Modern Political Thought in Latin America.
Sophomores, Juniors and Seniors only. The course is an introduction to modern political tough in Latin America. It draws on essays and novels written by major and influential political thinkers such as D.F. Sarmiento, Gonzalez Prada, J.C. Mariategui, Leopoldo Zea, J. E. Rodo, Octavio Paz, Jose Revueltas, Jose Maria Arguedas, Mario Vargas Llosa, Darcy Ribeiro, Enrique Dussel and the authors of the Sumac Kawsay as well as Liberation Theory central writings. The course will be taught in English. Students wishing to do work in the original Spanish or Portuguese will be encouraged to do so.
Instructor(s): S. Castro-Klaren
Area: Humanities.

A close reading and discussion primarily in Spanish of Cervantes’ masterpiece, with concentration on its major themes and contributions to the formation of the modern novel. We will use A. Murillo’s edition of the novel, Editorial Castalia.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): H. Sieber
Area: Humanities.

AS.215.337. Teatro Espanol del Siglo del Oro.
Close reading of various Spanish authors, among them Lope de Vega, Calderon de la Barca, Moreto, and Zorilla. Students should have taken courses beyond intermediate level or advanced Spanish. This class will be conducted primarily in Spanish as a seminar and will require active participation and discussion. Papers will be written in Spanish.
Undergraduate Seminar.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.338. Introduccion a la literatura argentina.
La literatura se enmarca en la realidad social y es una ventana hacia la cultura. En esta introducción consideraremos diferentes temas de especial importancia en la cultura y literatura argentina, como la separación entre la ciudad (puerto, civilización, contacto europeo) y el campo (provincias, barbarie, tradicionalismo rural) que empieza con el texto fundacional de Domingo F. Sarmiento, Facundo. Observaremos asimismo que esta influyente dicotomía que se establece con la independencia política es modificada con la llegada masiva de inmigrantes a fin de siglo y finalmente pierde su fuerza con la dictadura militar de los años ’70 y con el desencanto neoliberal que estalla con la crisis del 2001.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.334. Nación criolla: cultura y literatura en el siglo XIX.
El curso examina la formación de nuevas identidades hispanoamericanas y la búsqueda de un pasado que las haga legítimas, especialmente en el Cono Sur (Chile, Argentina, Uruguay).
Consideraremos en particular las relaciones con el pasado español y con el pasado amerindio en textos políticos, críticos y literarios de figuras clave del siglo diecinueve, e.g. Domingo Faustino Sarmiento, Andrés Bello, Simón Bolívar, Esteban Echeverría, y José Victorino Lastarria.
Area: Humanities.
AS.215.388. Narrating Mexico: Novel and History. 3 Credits.
The 200 years since the eruption of Mexican Independence present a panorama of struggle, strife, and literary creation. This course explores how Mexican literature formulates, contests and conditions portrayals of the national reality of Mexico. Taught in Spanish. Recommended Course Background: Advanced Spanish I or another Spanish survey course.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

Through the careful study of Carlos Fuentes’ novel of Mexico City, La región más transparente, we will examine the city’s multiple and contending histories and mythographies from the Aztecs to the present as rendered in visual, textual, and performance media: murals, cinema, TV, burlesque, lucha libre, etc. Taught in Spanish; the course requires advanced reading skills in Spanish. Prior consultation with the instructor is required.
Prerequisites: AS.210.311
Instructor(s): E. Gonzalez
Area: Humanities.

Advanced Spanish and reading proficiency. Estudio de las culturas literarias de Argentina, Uruguay y Chile en sus respectivos contextos sociales y políticos desde la conquista española. Las culturas indígenas, el desarrollo de la nación, las culturas populares, culturas inmigrantes, regímenes políticos, actualidad económica y social en la época de la globalización.
Instructor(s): E. Gonzalez
Area: Humanities.

What is human madness? Taking into account Foucault’s famous dictum, “There can be no madness without society,” this course returns to the earliest constructions of madness in the early modern period and moves forward into modernity through a close reading of literary, philosophical and scientific texts published in Spain. Readings include: Cervantes, Leon Hebreo, Huarte de San Juan, Lope de Vega, Calderon, Galdos, Freud, and others. Earlier representations of mental disquiet will be compared with the latest advances in psychology and neurosience published in the JHU Gazette and the HUB. Recommended Course Background: AS.210.312
Instructor(s): G. Ponce
Area: Humanities.

While our modern conception of “horror” owes much to English literature of the 19th century, it has an under-appreciated precedent in the literature of the Spanish Golden Age. In this course we will read tales of witches, monsters, and the living dead from an age that predates ours by 400 years, but whose darkest fears are surprisingly familiar.
Instructor(s): W. Egginton
Area: Humanities.

AS.215.422. Amor y romanticismo en una Novela y tres películas.
Prerequisites: AS.210.311 AND AS.210.312
Area: Humanities.

Close reading of the Lazarillo de Tormes, Guzman de Alfarache, Miguel de Cervantes, and others. Taught in Spanish.
Prerequisites: AS.210.312
Instructor(s): H. Sieber
Area: Humanities.

AS.215.443. Hispanic Literatures and the Arts.
Literary works from different genres (fiction, drama, poetry) by authors from Spain and Latin America are studied and illustrated in reference to the plastic and visual arts and cinema, indigenous, popular, and religious cultures. Cross-listed with PLAS
Instructor(s): E. Gonzalez
Area: Humanities.

El arte cinematográfico del gran cineasta español será estudiado a través de su obra, vista en partes selectas, obras enteras y dentro del marco escénico provisto por otras películas del cine español. Recommended Course Background: AS.210.326 or demonstrated proficiency in the language.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish
Instructor(s): E. Gonzalez
Area: Humanities.

Study of the music and literature inspired by three groups of great liminal influence in the cultural and political affairs of their respective nations. Gauchos (Argentina), Afro Hispanics (Cuba, Puerto Rico, Santo Domingo), Gitanos (Spain). Attention given to popular and learned myths and stereotypes and the history of efforts to establish self-identity. Conducted in Spanish. Recommended Course Background: AS.210.326
Instructor(s): E. Gonzalez
Area: Humanities.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities.

This course will deal with close readings of Borges ficciones and critical essays in order to determine how his thinking on the problem of writing and thinking is fictionalized in his stories.
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.466. The Spanish Avant-garde.
From the turn of the 20th century until the outbreak of Civil war in 1936, Spain witnessed the greatest flourishing in its literary and artistic scenes since its Golden Age 300 years before. In poetry, prose, painting, and film, Spanish artists and intellectuals were innovating artistic forms and participating in new kinds of cultural production and critical practice. In this course we will examine this period, paying special attention to the works of such writers and artists as Miguel de Unamuno, José Ortega y Gasset, Luis Buñuel, Salvador Dalí, Federico García Lorca, and Pablo Picasso. The course will be taught in Spanish.
Instructor(s): W. Egginton
Area: Humanities.

Readings will include selections from Medieval and Renaissance Works, such as "El Conde Lucanor", "Amadis de Gaula", "La carcel de amor", "El Abencerraje", "Lazarillo de Tormes", "La Diana", "El buscon", "Novelas ejemplares" (Cervantes) and "Don Quixote".
Instructor(s): H. Sieber
Area: Humanities.

Taught in Spanish. Este curso examina la presencia del Islam y el concepto del "oriente" en el Cono Sur, especialmente Argentina. Leeremos obras de los siglos 19 y 20 que representan al oriente, y discutiremos los significados y cambios que la llegada de inmigrantes "íslamicos" produjo en la cultura literaria de esta zona de América Latina. Tendremos en cuenta de forma particular que el problema del "oriente" en España y sus colonias es un problema "interno". Debido a que la península ibérica tuvo una importante presencia musulmana durante toda la edad media (711-1609), en los círculos europeos España fue considerada "islámica" y "oriental" también durante los tiempos modernos. Es así que el Oriente llega a América con la conquista de los españoles "islamizados." Cross-listed with PLAS 344
Instructor(s): N. Altschul

Desde el 711 hasta el 1609 de la era cristiana, la Península Ibérica fue una sociedad multi-lingüística con zonas y ciudades pobladas y/o administradas por miembros de las tres religiones abrahámicas monoteístas. Este curso presenta un panorama de las literaturas hispano-musulmanas, hispano-judías e hispano-cristianas haciendo especial hincapié en el contexto histórico de la península. Los textos en árabe y hebreo serán leídos en traducción inglesa o castellana, dependiendo de su accesibilidad. Taught in Spanish
Instructor(s): N. Altschul
Area: Humanities.

AS.215.525. Spanish Independent Study.
Instructor(s): E. Gonzalez; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren
Area: Humanities.

AS.215.527. Spanish Internship.
Instructor(s): E. Gonzalez
Area: Humanities.

We will hone our skills in reading novels as political documents and political documents as narrative with revolution and revolt in the background and Marxism as the main informing theoretical legacy. Writings by Cortázar, Vargas Llosa, Euclides da Cunha, Carpentier, Bolaño, Marx, Gramsci, Mariátegui, Fanon, Deleuze, Toscano, Badiou.
Instructor(s): E. Gonzalez.

Close readings in historical context of José Donoso’s El obsceno pájaro de la noche and Casa de campo, Isabel Allende’s La casa de los espíritus, and Pilar Donoso’s Correr el tupido velo, as well as selected essays from Sandra M. Gilbert’s "Rereading Women"
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.623. Literary Patronage in the Age of Cervantes.
This seminar will concentrate on the roles and relationships of patrons and clients, particularly after the death of Phillip II (1598). Dedications by authors to their patrons will be discussed and each student will select a particular author as a semester-long project. Authors include Cervantes, Gongora, Quevedo, Lope de Vega, Velez de Guevara and Maria de Zayas.
Instructor(s): H. Sieber
Area: Humanities.

This seminar will be based on close readings of the 'Lazarillo de Tormes', selections from Mateo Aleman’s ‘Guzman de Alfarache’, and three of Cervantes’ ‘Novelas ejemplares.’ These texts reflect the impact that Spanish fiction exerted on Golden Age Spanish literary history and on the European novel in general. An extensive bibliography will also be covered.
Instructor(s): H. Sieber.

AS.215.635. Spanish Golden Age Theater.
Close reading of plays by lope de Vega, Calderon, Tirso de Molina, and others.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.639. Don Quijote de la Mancha.
The novel will be the focus of the entire seminar. Recent trends in Cervantes criticism, textual issues related to the novel's publication, biographical, cultural, and social history, and patronage in the Courts of Philip II and III will be topics of discussion and research. The goal is a wide-ranging appreciation and understanding of the novel's original contexts.
Instructor(s): H. Sieber.

AS.215.682. The Novel, Political Theology, and Revolution.
We will hone our skills in reading novels as political documents and political documents as narrative with revolution and revolt in the background and Marxism as the main informing theoretical legacy. Writings by Cortázar, Vargas Llosa, Euclides da Cunha, Carpentier, Bolaño, Marx, Gramsci, Mariátegui, Fanon, Deleuze, Toscano, Badiou.
Instructor(s): E. Gonzalez.

AS.215.687. The Novel and the Ghost of Feminism.
Close readings in historical context of José Donoso’s El obsceno pájaro de la noche and Casa de campo, Isabel Allende’s La casa de los espíritus, and Pilar Donoso’s Correr el tupido velo, as well as selected essays from Sandra M. Gilbert’s "Rereading Women"
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.691. Literary Patronage in the Age of Cervantes.
This seminar will concentrate on the roles and relationships of patrons and clients, particularly after the death of Phillip II (1598). Dedications by authors to their patrons will be discussed and each student will select a particular author as a semester-long project. Authors include Cervantes, Gongora, Quevedo, Lope de Vega, Velez de Guevara and Maria de Zayas.
Instructor(s): H. Sieber
Area: Humanities.
Taking into account the crisis in self (national) representation and the fluidity of identities, the course will delve into the work of major Latin American writers in order to study issues of self-representation across time and specific contexts. The course will begin with the work of Sarmiento and move on to Gilberto Freire, Rachel de Queiroz and Clarise Lispector. In a second stage the course will delve into Garcia Marquez' autobiography and Mario Vargas Llosa's "La tía Julia y el escribidor", to end with Ernesto Cardenal's autobiography.
Instructor(s): S. Castro-Klaren.

Four authorships deeply embroiled in translation and the work of Eros and Thanatos will be studied: J. L. Borges (Pierre Menard), J. Derrida (fragments from La carte postale), Javier Mariás (Corazón tan blanco), and Andrés Neuman (El viajero del siglo).
Instructor(s): E. Gonzalez.
Area: Humanities.

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.
Departing form narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.
Instructor(s): S. Castro-Klaren.

From neuroscience to political theories, we will examine early modern and late modern works in literature and critical thought in which dreams and dreaming intersect with power under diverse political regimes and modalities.
Instructor(s): E. Gonzalez.
Area: Humanities.

AS.215.650. Mexico and the Invention of America.
Departing from O'Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero, Humboldt, Dussel and Alzandua will conform part of the readings.
Taught in English
Instructor(s): S. Castro-Klaren.
Area: Humanities.
Writing Intensive.

This course will focus on the art of writing poetry, the art of reading poetry and the poetics of each of the poets whose work is the textual matter of the course.
Instructor(s): S. Castro-Klaren.
Area: Humanities.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

AS.215.688. Postcolonial Middle Ages.
Taught in English. Postcolonial Studies dramatically changed inquiry on the Middle Ages in the last two decades, mainly in the study of English and French materials. This seminar brings medieval Iberian subjects into the discussion and examines the new critical idioms and approaches of pan-European postcolonial medievalism.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.692. Islamic Spain 711-1609.
Spain was a cultural contact zone throughout the Middle Ages. Emphasizing historical context, this seminar examines the cultures and literatures of Islamicate Iberia from the Muslim conquest to the expulsion of the moriscos. Taught in English. Some readings in Spanish. Open to seniors with permission.
Instructor(s): N. Altschul.

AS.215.695. New and Old Disputations of/for the New World.
This course will focus on readings of original texts--chronicles, reports, treatises, and polemics-- and critical commentary on the issues central to the disputation for control and deployment of the meanings of the "new" world and its status in the realm of coloniality. Besides selections from the Inca Garcilaso de la Vega, Guaman Poma, and Ixtlilxochitl, we will read from Jose de Acosta and Bernabe Cobo. Antonello Gerbi's Disputa Del Nuevo Mundola and Walter Mignolo's The Darker Side of the Renaissance, along with Enrique Dussel's El Encubrimento Del Otro and Charles Man's 1491 will constitute the totality of readings and problematic of the seminar.
Instructor(s): S. Castro-Klaren.
Area: Humanities.

AS.215.710. Medievalisms.
This course examines variegated constructions and redeployments of “the middle ages” in postmedieval times. Topics include historical revivals, the national philologies, literary, and filmic reconstructions, postcolonial medievalisms, and theories of temporality, among others.
Readings in English and Spanish.
Instructor(s): N. Altschul.

From telegrams to tweets, the twentieth-century media revolution appears unique; but the magnitude of the revolution is not unprecedented. Another media revolution preceded ours by about 400 years, and coincided with the dawn of modern Europe. This course will examine examples of inflationary media—media whose deployment affects not just the content being transmitted, but also a culture’s entire understanding of reality—from both ages, with special attention to those deployed in the context of emergent early modern nation states like Spain, but with an eye to better understanding the effects and potentials of analogous media practices today.
Instructor(s): W. Egginton.
AS.215.713. What Are Humanities?.
They are one of three established divisions of knowledge. Almost half the departments at our own university are categorized under that division. We all feel we know what the "humanities" are, but how? Is the best answer we have to that question a paraphrase of Justice Potter Stewart’s definition of pornography, “I know them when I see them”? In this seminar we will examine the question of what the humanities are through the close reading of a series of key texts spanning the period from the Renaissance to the twentieth century. In many ways our readings will be necessarily proleptic, since the very category we are interrogating postdates many of the sources we will be analyzing. Our guiding question, however, will be how the specific division of knowledge under which we now organize our disciplines came into being, and what presuppositions that organization implies. The course will be conducted in English but will include, to the extent possible, readings in the original language. Graduate students should be prepared to work in the original language if it is one that they already master (which may include Latin, Spanish, Italian, French, or German) and with translations when not. Readings may include selections by Desiderius Erasmus, Lorenzo Valla, Juan Luis Vives, Juan Ginés de Sepúlveda, Francisco de Vitoria, Bartolomé de las Casas, Denis Diderot, Johann Wolfgang von Goethe, Immanuel Kant, Martin Heidegger, Maurice Merleau-Ponty, and Jean-Paul Sartre.
Instructor(s): W. Egginton
Area: Humanities.

A close reading of Cervantes’ short stories, with concentration on their literary tradition and their relationship to some of his other works. We will also investigate Spanish court society, politics, and history between 1598 & 1621 and critical bibliography.
Instructor(s): H. Sieber.

Graduate students or advanced seniors. This seminar will explore the corpus of political thought in Latin America since independence (1810) to the present by focusing on the discourses that constructed and continue to construct 5 key questions in the negotiation of power in the post-colonial res politica: territory, nationhood, national subjectivation, cultural imagination, justice and regimes of inclusion and exclusion. Readings will include the work of Sarmiento, Euclides da Cunha, Gonzalez Prada, Mariategui, Marti, Revueltas, Paz, Dussel, Ribeiro, Freire, Arguedas, Liberation Theology and Sumaz Kawsay authors.
Instructor(s): S. Castro-Klaren
Area: Humanities.

The course engages close readings of Borges critical essays and some of his fiction in order to establish the points of interpellation that Post-modern theory takes from or shares with Borges’s meditation on the problem of writing.
Instructor(s): S. Castro-Klaren.

AS.215.753. Latin American Premodern.
Focusing on the idea that Iberian colonization was premodern in character, this course examines the association of Spanish and Portuguese America with topics like feudality, the orient, despotism, and medieval cultural lifestyles. Among others, theoretical discussions include the medieval-modern divide, (neo)medievalism, settler postcolonial theory and comparative colonialisms, modernization and dependency theories; texts include, among others, Argentinians Domingo Sarmiento and José Ingenieros, Brazilians Euclides da Cunha and Gilberto Freire, Peruvian José Carlos Mariátegui, and Cuban Alejo Carpentier.
Instructor(s): N. Altschul.

AS.215.763. Vargas Llosa and Garcia Marquez: Intertextual crossing and World Literature.
The objective of the course is to read critically key works by these two writers in the context of their self stipulated intertexts--Flaubert and Faulkner, respectively-- and the place such intertextual readings in the contexts of the recent discussions on "world literature".
Instructor(s): S. Castro-Klaren.

AS.215.777. The Invention of Fiction.
Rather than understand fiction as a constant in human history, this course will consider it a historically specific form of cultural expression. We will examine and compare theories of the fictional from an array of historical moments in order to better understand what fiction is, how it differs from premodern notions of history and poetry, and how it both informs and depends on modern notions of knowledge and subjective agency.
Instructor(s): W. Egginton
Area: Humanities.

In this seminar we will examine a selection of literary reflections on and engagements with globalization and its mounting failures and burdens, as it has emerged in Europe and the Americas from the mid-twentieth century to the present. From the economic, constitutional, and cultural politics around the unification of Europe, to the ideological and imperial misfortunes of the U.S. after the collapse of the “End-of-History” thesis, to the resurgence of state populism in Latin America in the wake of neoliberal exhaustion, literary fiction has been deployed to posit, explore, and contest national and post-national myths of identity. The seminar will interrogate how this engagement functions both as aesthetic and theoretical discourse. Readings may include novels by Albert Camus, W. G. Sebald, Leonardo Sciascia, Orhan Pamuk, Javier Marías, Roberto Bolaño, and Jonathan Franzen, along with theoretical writings by Gianni Vattimo, Jürgen Habermas, Rodolphe Gasché, and others.
Instructor(s): E. Gonzalez; W. Egginton
Area: Humanities.
AS.215.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. – In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollack, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 213.790, and 214.790
Prerequisites: ;;
Instructor(s): E. Strowick; J. Neefs
Area: Humanities.

Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.215.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius’ Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini's Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesí Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.215.826. Spanish Independent Study.
Instructor(s): E. González; H. Sieber; N. Altschul; S. Castro-Klaren.

Instructor(s): E. González; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

Instructor(s): E. González; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

AS.216.300. Contemporary Israeli Poetry.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, Dalia Rabikovitch, Erez Biton, Roni Somek, Dan Pagis, Yona Wallach, Yair Horwitz, Maya Bejerano, and Yitzhak Laor. Against the background of the poetry of these famous poets we will study recent developments and trends in Israeli poetry, including less known figures such as Mois Benarroch, Shva Salhoov and Almog Behar. Through close reading of the poems, the course will trace the unique style and aesthetic of each poet, and will aim at presenting a wide picture of contemporary Hebrew poetry.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl
Area: Humanities.

Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.342. The Holocaust in Israeli Society and Culture.
This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.
Instructor(s): N. Stahl
Area: Humanities.

AS.216.370. Israel Through Prose.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled.-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.
AS.216.373. War in Israeli Arts and Culture. 3 Credits.
In this course we will study the various representations of what functions as one of Israel's most unifying and yet dividing forces: war. By analyzing literary and cinematic works as well as visual art and popular culture we will attempt to understand the role of war in shaping Israeli society, culture and politics. Topics such as commemoration and mourning, dissent and protest, trauma and memory and the changing image of the soldier will stand at the center of the course. Students with a knowledge of Hebrew wishing to do extra work in Hebrew should enroll in section 2 and the fourth hour will be scheduled at a time convenient to the enrollees and instructor.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.398. Zionism: Literature, Film, Thought.
This course studies the relation between Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the history of Zionism and its influence on Israeli culture. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films.
Students wishing to do additional work in Hebrew should enroll in section 2 where students will meet for an additional hour at a time TBD and will earn 4 credits for the course.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.412. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.

AS.216.612. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.

AS.216.800. Independent Study.
Instructor(s): N. Stahl.

Cross Listed Courses
History of Art
AS.010.204. Italian Art in the Middle Ages.
This course explores key monuments of medieval art and architecture in Italy from c. 400 until 1350. We will concentrate on historical, functional, and aesthetical aspects that lead to the creation of single monuments and art works. Emphasis is given to the analysis of “sacred space” by means of architecture, painted, and sculptural decoration, as well as ritual performances. Another focus is laid on the political dimension of art for the creation of civic identity as well as in the context of the late medieval courts. We raise questions about the importance of materiality and science for the creation of medieval art works.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.216. 20th Century Italian Art.
This course will be a critical survey of the major artistic movements in Italy during the 20th century, from Futurism to Arte Povera. Often seen as a secondary location of artistic production, the class will situate the artists working in Italy within a broader historical and global context.
Instructor(s): K. Johnson
Area: Humanities.

AS.010.312. Surrealism.
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA. Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.
Instructor(s): M. Warnock
Area: Humanities.

With over 1,800 works attributed to him, Francisco de Goya (1746-1828) was constantly inventing, experimenting, and pushing the limits of the representable. This course will begin by examining Goya’s printed oeuvre as one possible itinerary for studying his life and work. The second half of the course will consider alternative narratives for Goya’s career based on genre and theme. Topics will include portraiture, madness, religious painting, and the discovery of Goya by later generations of artists, authors, and filmmakers. The course includes several visits to the print room at the Baltimore Museum of Art. There will be a final paper.
Instructor(s): A. Letvin
Area: Humanities.
AS.010.707. Therapies of Art and Literature in Early Modern Europe.
This seminar examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch’s neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian “wisdom” genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, inventing therapies that were at once sacramental and philosophical, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.
Instructor(s): M. Ward

AS.010.730. Sacred Images in Early Modern Spain.
This course will look at the dialogue between sacred images and art in Baroque Spain. The status of religious images, the “paragone” or competition between sculpture and painting, and the issue of cult, will all be analyzed through the work of such painters as Velázquez, Zurbaran and Ribera. Cross-listed with the Spanish section of GRLL.
Instructor(s): F. Pereda.

Classics
AS.040.716. Petrarch (1304-74) and the Beginnings of Renaissance Latin.
This course will provide close readings of certain Latin texts by Petrarch, with attention to his letters and to other prose works.
Instructor(s): C. Celenza.

Film and Media Studies
This course provides students with an introduction to the discipline of sound studies and its relationship to three eras of historical forms of technological media. Structured around a problematic of emitter, medium, and receiver, it explores how sound was encoded by its creators as a structure of meaning in early media cultures; how it emerged as a means of aesthetic creation with the rise and dominance of the cinematic medium; and last, how it reaches the infatuated individual listener in the new era of mobile earbud audio. Theorizing our relationship to media through the study of sound and listening, we find new histories to be explored, as well as new media aesthetics to be negotiated. Through engagement with thinkers such as economist Jacques Attali, auditory and cultural historians Emily Thompson and Jonathan Sterne, film sound theorists Michel Chion and Rick Altman, and sound studies scholar Michael Bull, we construct how technologically mediated listening allows us to understand the historical and theoretical components of sound’s media aesthetics. Recommended Course Background: AS.061.245 for undergraduates or JHU graduate student status (open to all JHU graduate students).
Instructor(s): M. Ward

Anthropology
AS.070.262. Cuban Intellectuals, Cinema, and the State.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Area: Humanities, Social and Behavioral Sciences.

History
AS.100.602. The French Revolution.
This seminar introduces graduate students to the rich historiography of the French Revolution. Topics include: revolutionary origins, political culture and radicalization, friendship and emotion, family and gender, the search for stability after the Terror, Napoleon’s Brumaire coup.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.

Medicine, Science and the Humanities
AS.145.101. Death and Dying in Art, Literature, and Philosophy: Introduction to Medical Humanities. 3 Credits.
This team-taught course offers an introduction to the new concentration in medicine, science, and humanities by approaching the topic of death and dying from historical, anthropological, philosophical, theological, literary and art historical perspectives. Open to freshmen, and sophomores who have already taken either Great Books II or History of Medicine.
Prerequisites: AS.360.134 OR AS.140.106
Instructor(s): C. Wiener; E. Strowick; L. Lisi; M. Merback
Area: Humanities
Writing Intensive.

AS.145.330. Insomnia in Modern Literature, Philosophy, and Film.
Insomnia, while being defined and treated as a sleep disorder in the field of medical discourse, has attracted other kinds of interest, too. Philosophers and writers have been intrigued by insomnia since antiquity. From their perspectives, the capability of being sleepless not only distinguishes humankind from animals but testifies to human awareness in its ceaseless striving for wisdom and truth. Insomnia appears as vigilance, an exalted state of mind well suited for philosophic reflection, intense scrutiny of the world, and sudden inspiration. Yet these moments of sustained productivity are inextricably bound to insomnia’s “dark” side, the fact that sleeplessness tortures the body and exhausts the mind, haunts the weary wakeful and makes him meditate on insomnia. Thus sleeplessness turns into an obsession with the potential to transform thinking into endless introspection, self-absorbed melancholy, if not misanthropic sarcasm. This course will examine representations of insomnia in modern philosophy, literature and film. We will analyze to what extent interpretations of sleeplessness in the humanities differ from those in medical and scientific discourse. Particular emphasis will be placed on the relationship between insomnia, subjectivity, thinking, and writing. Authors and films to be considered will include among others Emanuel Lévinas, Emil Cioran, Franz Kafka, Samuel Beckett, Ernest Hemingway, F. Scott Fitzgerald, Djuna Barnes, Gabriel García Márquez and Insomnia (2002; Christopher Nolan).
Instructor(s): A. Krauss
Area: Humanities, Social and Behavioral Sciences.

Philosophy
AS.150.483. Topics in Jewish Philosophy: Hassidism.
Hassidism is the ecstatic religious movement that emerged in East European Jewry in the mid eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of Dov Ber of Mezritch between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon’s report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset.
Instructor(s): Y. Melamed.
Political Science

**AS.190.633. Hegel and Feminist Philosophy.**
The seminar will explore to what extent Hegel can be read as contributing to a feminist philosophy. We will focus on Hegelian openings onto the emotional in Phenomenology of Spirit. In addition, we will study feminist philosophers who have drawn on or offered critical readings of Hegel (Irigaray, Butler, Cavarero, Malabou, and others).
Instructor(s): J. Bennett; K. Pahl
Area: Social and Behavioral Sciences.

**AS.191.421. A Normal Country German Politics and Identity.**
This seminar deals with questions pertaining to the formation of modern German nationalism and national identity through the perspective of German politics and history. Dean’s Teaching Fellowship
Instructor(s): F. Bauwens
Area: Social and Behavioral Sciences.

Humanities Center

**AS.300.115. Introduction to Romantic Poetry.**
This course offers an introduction to romantic poetry through a comparative approach to three of the movement's key authors: Friedrich Hölderlin, John Keats, and Giacomo Leopardi. We will work through their main writings in detail along with considerations of their cultural contexts and theoretical and critical approaches to romanticism more broadly.
Instructor(s): L. Lisi
Area: Humanities.

**AS.300.211. Great Poems of the Americas.**
This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot’s The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire’s Notebook of a Return to the Native Land, Vicente Huidobro’s playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of “the Americas” as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we’ll examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.
Instructor(s): R. Galvin
Area: Humanities.

**AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change.**
In contemporary discussions of climate change it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the current prospects of our ecological future. Authors to be studied will include: Lillo, Büchner, Balzac, Dickens, Marx and Engels, Ibsen, Weber, Conrad, Brecht, Miller, Steinbeck, as well as contemporary fiction, politics, and philosophy on climate change. Cross listed with English.
Instructor(s): L. Lisi
Area: Humanities.

**AS.300.379. Israeli Film and Literature.**
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli cinema and literature. The course will follow both a thematic and chronological path in order to study the ways in which Israeli cinema and literature reflect political, ideological, social, and cultural aspects of contemporary Israel. In this context, we will read well-known works by several major authors and will watch major Israeli films from the 1940s to these days. We will also use a comparative approach to study the different artistic means of both mediums and to evaluate their successes in representing the various tensions of Israeli society and culture.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

**AS.300.406. Marcel Proust, Literature and Art.**
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Cross-listed GRLL-French
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

**AS.300.408. Lyric Modernity.**
A comparative literature course on modern lyric and poetics. The main issue of the course is how the lyric voice is constructed and sustained under the pressures of modernization in the United States, Europe, and Korea. We will also emphasize issues of translation and the relationship of music and poetry. Readings will include texts by Adorno, Benjamin, Grossman, von Hallberg and Waters, and poems by Dickinson, Rilke, and Kim among others. All readings available in English. Cross-listing requested with East Asian Studies, GRLL, and English
Instructor(s): S. Rhee
Area: Humanities.
AS.300.419. 1966 before and after: French theory.
The “Languages of Criticism” conference held at Hopkins marked a
watershed moment in the history of literary studies and redefined, for
many scholars and intellectuals, the nature of humanistic inquiries.
This course involves the close study of key texts that, from the postwar
years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan,
Barthes, and Derrida), are landmarks in this changing critical and
philosophical landscape. Knowledge of French is desirable but not
required.
Instructor(s): E. Ender
Area: Humanities.

Interdepartmental
AS.360.133. Freshman Seminar: Great Books at Hopkins.
Students attend lectures by an interdepartmental group of Hopkins
faculty and meet for discussion in smaller seminar groups; each
of these seminars is led by one of the course faculty. In lectures,
panels, multimedia presentations, and curatorial sessions among the
University’s rare book holdings, we will explore some of the greatest
works of the literary and philosophical traditions in Europe and the
Americas. Close reading and intensive writing instruction are hallmarks
of this course; authors for Fall 2015 include Homer, Thucydides, Dante,
Milton, Diderot, Shelley, Nietzsche, Nabokov, and Douglass.
Instructor(s): E. Patton; E. Russo; R. Bett; S. Achinstein; W. Stephens
Area: Humanities.

Program in Latin American Studies
AS.361.130. Introduction to Latin American Studies.
This course provides an introduction to the study of Latin American
cultures and societies from the vantage point of city life and urban
representation. We will engage literatures from a variety of disciplines
to discuss how issues such as modernization and urbanization
processes; tradition, identity and ethnicity; class, marginality and urban
social movements; gender and the changing status of women; arts and
literature are experienced and represented in the Latin American urban
environments.
Instructor(s): E. Gonzalez; G. Paquette; V. Procupez
Area: Humanities, Social and Behavioral Sciences.

AS.361.316. Caribbean Writing in Shakespeare, V. S. Naipaul,
and Alejo Carpentier.
Readings and polemics concerned with Shakespeare’s play The
Tempest (1610-1611) and its postcolonial afterlives; V. S. Naipaul’s
novel A House for Mr. Biswas (1961); and Alejo Carpentier’s El siglo de
las luces (1962). The socio historical and political contexts of each work
and authorship will be considered in depth in terms of dominant notions
of writing in current critical theory. Cross-listed with GRLL, English, and
Writing Seminars.
Instructor(s): E. Gonzalez
Area: Humanities, Social and Behavioral Sciences.

Center for Language Education
AS.384.115. First Year Hebrew.
Designed to provide reading and writing mastery, to provide a
foundation in Hebrew grammar and to provide basic conversational
skills. Cross-listed with Jewish Studies. Final day/time will be determined
during the first week of classes based on students’ schedules.
Instructor(s): Z. Cohen.

AS.384.116. First Year Modern Hebrew II.
Designed to provide reading and writing mastery, to provide a
foundation in Hebrew grammar and to provide basic conversational
skills. Cross-listed with Jewish Studies.
Prerequisites: AS.384.115
Instructor(s): Z. Cohen.

AS.384.215. Second Year Hebrew.
Designed to enrich vocabulary and provide intensive grammatical
review, and enhance fluency in reading, writing and comprehension.
Cross-listed with Jewish Studies. Final day/time will be determined
during the first week of classes based on students’ schedules.
Prerequisites: AS.384.116 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.216. Second Year Modern Hebrew II.
Designed to enrich vocabulary and provide intensive grammatical
review, and enhance fluency in reading, writing and comprehension.
Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.315. Third Year Hebrew.
Designed to maximize comprehension and the spoken language
through literary and newspaper excerpts providing the student with the
language of an educated Israeli. Cross-listed with Jewish Studies. Final
day/time will be determined during the first week of classes based on
students’ schedules.
Prerequisites: AS.384.216 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.316. Third Year Modern Hebrew II.
Designed to: maximize comprehension and the spoken language
through literary and newspaper excerpts providing the student with the
language of an educated Israeli. Recommended Course Background:
AS.384.315 or permission required. Cross-listed with Jewish Studies.
Prerequisites: AS.384.315
Instructor(s): Z. Cohen
Area: Humanities.

Program in Museums and Society
AS.389.353. Revolutions of the Book: Material Culture &
the Transformation of Knowledge from Antiquity to the
Renaissance.
Explores the material culture of knowledge through transformations
in the technologies and arts of communication, taught entirely from
rare books, manuscripts, and artifacts in JHU libraries and museum
collections.
Instructor(s): E. Havens
Area: Humanities.

AS.389.356. Halls of Wonder: Art, Science, and Literature in the
Age of the Marvelous, 1500-1800.
Explore the material culture of “wonder” from the Renaissance to the
Enlightenment in literature, science, and art, with Hopkins’ rare book
collections and the Walters Art Museum. M&S practicum course.
Instructor(s): E. Havens
Area: Humanities.
History

The Department of History offers students the opportunity to work intensively in the classroom and with individual faculty to discover the richness and complexity of history. Undergraduates begin with general courses, but progress quickly to courses that explore topics in depth and provide experience in researching, analyzing, and writing about the past. Graduate students work independently and with faculty advisors on reading and research in their fields of interest, while departmental seminars bring them together to discuss their research, forging a collegial intellectual culture. The department emphasizes European history, United States history, and the histories of Africa, Latin America, and China. Faculty and students participate in a variety of interdisciplinary programs, including Africana Studies, East Asian Studies, Latin American Studies, Judaic Studies, Museums and Society, the Program for the Study of Women, Gender & Sexuality, and the new joint curricular initiative with International Studies, "Global Connections, and Historical Comparisons."

Facilities

In addition to the Milton S. Eisenhower Library at the university, students in the Department of History can use the collections of the Peabody Institute Library, the Enoch Pratt Free Library, and the Maryland Historical Society in Baltimore, and of the Library of Congress, the National Archives, the Folger Shakespeare Library, and other specialized libraries in nearby Washington, D.C. There is provision for regular transportation to and from the Library of Congress. Also within easy distance are the holdings of specialized historical libraries and archives in Annapolis, Richmond, Williamsburg, Charlottesville, Wilmington, Harrisburg, Philadelphia, Trenton, Princeton, Newark, and New York.

Requirements for the B.A. Degree

(Also see Requirements for a Bachelor’s Degree. (p. 20))

The Krieger School classifies history as both a social scientific and humanistic discipline. This accords very well with the wide range of explanatory and interpretive approaches to the past that now prevail in the discipline of history. One of the history program’s goals is to introduce students to these varied approaches. Although the department offers strong preparation for students who seek to specialize in a particular cultural or geographic region, history at Johns Hopkins is primarily issue and topic oriented. It also puts a premium on developing the capacity to reason comparatively and on deepening the student’s understanding of global connections among cultures in the past and in contemporary life.

The department offers undergraduate courses that range from large introductory classes to small, focused seminars that encourage intensive interaction with individual professors and with other students. Beyond the introductory level, most of our courses are writing intensive and promote in all students critical reading skills and the ability to formulate effective written arguments. Through its core curriculum, the major also cultivates skills specific to the historian, especially research and writing based upon the systematic analysis of primary documents.

The program’s overall aim is to deepen the critical habits of mind that arise from the study of time and change. These capacities are the hallmarks of liberal learning, but they are also the foundation for success in post-graduate studies and careers of many kinds, including business, law, and public affairs.

Major in History

- Students must earn a “C-” or higher grade in all courses used to satisfy major requirements and may not be taken satisfactory/unsatisfactory.
- For students who choose to focus on one geographical area (Europe, United States, Latin America, Africa, Asia), two courses must be taken outside the student’s area of focus.
- Except for courses used to satisfy the foreign language proficiency requirement, no more than four courses offered outside the History department (AS.100.xxx) may be used to satisfy major requirements (e.g.: cross-listed, transfer, and study abroad courses). No more than two of these four courses may be offered outside the Krieger School of Arts and Sciences (usually summer transfer credit and/or study abroad courses).

MAJOR REQUIREMENTS

Introductory Courses (select one option): 6
Two introductory history courses (AS.100.1xx)
- or-
One introductory history course (AS.100.1xx) + one “Freshman Seminar” (AS.100.200-229)

Method Requirement (All Majors)
AS.100.193 Undergraduate Seminar in History 3
AS.100.194 Undergraduate Seminar in History 3

Elective Courses
Two history courses at any level 6
Four 300-level or higher history courses 12

Additional Upper-Level Courses (select one option):
AS.100.507 Senior Thesis 2 3
AS.100.508 Senior Thesis 2 3
- or-
Two 300-level or higher history courses 6

Foreign Language Requirement
Foreign language proficiency through the intermediate level 0-18

Total Credits 42-60

1 Foreign language proficiency may be demonstrated by coursework or by special examination, but a language requirement waived by exam must be documented on the student’s transcript.
2 Students must have a cumulative GPA of 3.25 and a cumulative GPA in history of 3.5 or higher by December of their junior year to be eligible for the senior thesis option, a prerequisite for graduating with departmental honors in history.

Cognate Courses The History Department encourages interdisciplinary work in cognate fields of learning. History minors are therefore strongly advised to take additional courses in any department, including the History Department, that relate to the student’s major discipline in a historical way.

Honors Program in History

The history department strongly encourages all eligible history majors to pursue the honors track in history. The track culminates in the senior
thesis, a yearlong, "capstone" research project completed under the direct supervision of an individual faculty advisor. Like all capstone projects, the senior thesis is intellectually challenging and its completion almost always brings with it a tremendous sense of accomplishment. It also hones the talented young historian’s capacity to sustain a cogent argument based on primary evidence in the long form essay. These skills and the completion of a sustained independent project are also important practical assets when seeking a job or a post-graduate education.

A general cumulative GPA of 3.25 and a cumulative GPA in history of 3.5 are prerequisites for graduation with honors and for undertaking the senior thesis. All thesis writers must also enroll in the AS.100.507 Senior Thesis (fall) and AS.100.508 Senior Thesis (spring) - enrollment is by instructor’s permission and will be granted only to students who have obtained a commitment from a faculty thesis advisor. This commitment should normally be obtained no later than April 30th of the junior year.

For questions about the honors track in history or finding a thesis advisor, consult your departmental advisor or Toby L. Ditz, the Director of Undergraduate Studies, toby.ditz@jhu.edu.

Minor in History

The minor in history offers to students majoring in other programs of study an opportunity to pursue a serious interest in history.

• Students must earn a “C-” or higher grade in all courses used to satisfy minor requirements and may not be taken satisfactory/unsatisfactory.

• No more than one course offered outside the History department (AS.100.xxx) may be used to satisfy minor requirements (e.g.: cross-listed, transfer, and study abroad courses).

MINOR REQUIREMENTS

Introductory Courses (select one option): 6
- Two introductory history courses (AS.100.1xx)
- One introductory history course (AS.100.1xx) + one “Freshman Seminar” (AS.100.200-229)

Elective Courses
- One 200-level or higher history course 3
- Three 300-level or higher history courses 9

Total Credits 18

Cognate Courses The History Department encourages interdisciplinary work in cognate fields of learning. History minors are therefore strongly advised to take additional courses in any department, including the History Department, that relate to the student’s major discipline in a historical way.

B.A.- M.A. Programs in History

The department offers two B.A.- M.A options for current Hopkins undergraduate students. Details can be found on the Graduate tab.

The graduate program prepares professionally motivated students for careers as research scholars and college and university teachers. Hence it is designed for candidates who want to proceed directly to the Ph.D. degree, who have developed historical interests, and who are prepared to work independently. Within the areas of European history, American history, and the histories of Africa, Latin America, and China, the department emphasizes social/economic and intellectual/cultural history. Although diplomatic and political history are not emphasized, attention is given to the social, economic, and cultural bases of politics.

The program is organized around seminars rather than courses, credits, or grades. AS.100.781 The Seminar-AS.100.782 The Seminar and satellite seminars in European, American, and Comparative World History bring together students, faculty, and invited scholars from outside the university to discuss their research work. These departmental seminars create a lively intellectual community in which graduate students quickly become contributing members. The combination of flexibility, independence, and scholarly collegiality offered by the Hopkins program gives it a distinctive character.

Students select four fields (one major and three minor) and make their own arrangements with professors for a study program leading to comprehensive examinations at the end of the second year. Those arrangements may include taking a seminar in the field. One, and exceptionally two, minor field may be taken outside the Department of History. Students have maximum flexibility in the construction of individual plans of study, as well as the opportunity to work closely with several professors.

Admission and Financial Aid

In judging applications, the department puts particularly heavy emphasis on the quality of the student’s historical interests and prior research experience. Each applicant must submit a sample of written work. Applicants must also take the general aptitude portions of the Graduate Record Examination. Ordinarily no candidate for admission is accepted whose record does not indicate an ability to read at least one foreign language.

The department accepts only those students who plan to work in the specific fields of the faculty, and each student is admitted only with the approval of a particular professor. Applicants should indicate the proposed field of specialization at the time of application. With the concurrence of a new faculty advisor, students may, of course, later change their major professor.

The department normally provides full fellowship support for all admitted students including both tuition and a stipend. Students are encouraged to apply for external support if eligible.

Four-year B.A.- M.A. Program in History

The B.A.- M.A Program is an accelerated program that allows the undergraduate to complete a BA and an MA in history in four years. It is designed for students who demonstrate exceptional scholarly ability and assumes that the student will complete most other requirements for graduation by the end of the junior year. Minimum prerequisites for admission include a GPA of 3.8 or higher, completion of language requirements through the intermediate level by the end of the junior year, and the securing of a faculty sponsor in the department of history in advance of application. Students seeking admission into the BA-MA program shall submit a formal application to the regular graduate program in history; the application deadline is December 15 of the junior year.

The program of study during the senior year includes 6-7 credits of graduate reading and research seminars or independent study each semester, mastery of the scholarship in the student’s area of research concentration as demonstrated by the successful completion of a
graduate field examination in that area of concentration; and, in lieu of the senior thesis, the completion of a major scholarly research essay equivalent in quality to those completed by first year graduate students in the regular doctoral program. For questions and further details about the program, contact Toby Ditz, Director of Undergraduate Studies, toby.ditz@jhu.edu, or Megan Zeller, mzeller4@jhu.edu, Graduate Coordinator, Department of History, who can also provide details about application procedures.

Five-year Barcelona B.A.- M.A. Program

Hopkins Barcelona
5-year BA/MA in World History Program

This program provides a select group of undergraduates the opportunity to pursue an integrated, consecutive 5-year dual-degree BA/MA between JHU and Universitat Pompeu Fabra (UPF) in Barcelona that will lead to the MA in world history from UPF. JHU students will spend either the fall or spring of their junior year at UPF, earning credits toward their UPF MA requirements. They will receive their Hopkins BA at the end of four years, and then pursue the UPF MA degree in their fifth year of study.

Further information is available through the Office of Study Abroad.

View poster.

Requirements for the Ph.D. Degree

Students are required to have a reading knowledge of those foreign languages that are necessary for the satisfactory completion of their program of graduate study. Students in European history must have a reading knowledge of at least two languages, and students in medieval history must also have a reading knowledge of Latin. Students of Chinese history are expected to have reading knowledge of modern and classical Chinese and in most cases should also have reading knowledge of Japanese and/or a European language. Students in the Latin American area must have a reading knowledge of two of the following, depending upon their particular specialties: French, Spanish, Portuguese, or Dutch. In African history, students must have a reading knowledge of three languages including English and French. Depending upon their fields of specialization, students in African history may have other language needs. Students are expected to pass a written examination in one language within a month after entering the department, and they are required to do so before the end of the first year.

Each student is required to take a seminar under his/her major professor and to participate in at least one departmental seminar each semester.

The student’s knowledge of four fields will be tested by written and oral examinations before the end of the second year of graduate study.

The student must write and defend a dissertation that is a major piece of historical research and interpretation based on primary sources and representing a contribution to historical knowledge. Its content, form, and style must be adequate to make it suitable for publication.

Normally, each student is required to perform some supervised teaching or research duties at some point during the graduate program, most often as a teaching fellow during the second and fourth years.

Interdisciplinary Ph.D. Degree

The departments of History and Anthropology offer an interdisciplinary doctoral degree. For details concerning this degree students should contact either department.

M.A. Degree

The master of arts degree is automatically awarded to each doctoral candidate following the passing of field examinations and the completion of the language requirements. In special circumstances, a student may be permitted to take an M.A. degree after one full year of graduate study. In such cases students will be required to demonstrate by examination an ability to read at least one foreign language, write a satisfactory research essay, and satisfy the director of their research that they have a mastery of the field of history that forms its background. The essay must be submitted to the Graduate Board.

For current faculty and contact information go to http://history.jhu.edu/directory/

Faculty

Chair
John Marshall
Early modern Europe, with emphasis on British and intellectual history.

Professors

Jeffrey Brooks
Russian and Soviet history, with an emphasis on culture and society, the press, and popular culture.

Toby L. Ditz
Director of Undergraduate Studies: Early American cultural and social history, with a special interest in the history of women and gender.

Louis Galambos
Economic, business, and political history of the United States with emphasis on institutional change in the period since 1880.

Peter Jelavich
Modern European cultural and intellectual history.

Pier M. Larson
African history with specialization in East Africa, Madagascar, the Indian Ocean, and the history of slavery and the slave trade in the Atlantic world.

John Marshall
Early modern Europe, with emphasis on British and intellectual history.

Tobie Meyer-Fong
Director of Graduate Studies: East Asia, cultural and social history, race, gender, and nationalism in 20th-century Asia, the Cultural Revolution, contemporary Chinese popular culture, and urban life in China.

Philip D. Morgan
Harry C. Black professor: Early American history, with subsidiary interests in African-American history and the study of the Atlantic world.

Gabriel Paquette
Iberian history, colonial Latin America, and political and intellectual history.

William T. Rowe
John and Diane Cooke Professor of Chinese History: modern East Asia, especially socioeconomic, urban history.

Mary Ryan
John Martin Vincent Professor: 19th-century United States history with emphasis on women, gender, urban history, and the cultural landscape.

Gabrielle Spiegel
Krieger-Eisenhower Professor: medieval history, with special interest in historiography and linguistic analysis.

Ronald G. Walters
Social and cultural history of the United States with special interest in radicalism, reform, race, and popular culture.

Associate Professors
Francois Furstenberg

Michael A. Kwass
Early modern France.

Kenneth Moss
Jewish history, modern Russian, and East European history.

Todd Shepard
20th-century France and the French Empire.

Assistant Professors
Angus Burgin
20th-century United States, political history, intellectual history, and the history of capitalism.

Erin Rowe
Early modern Spanish monarchy, the Mediterranean, saints and sanctity, and women and gender.

Professors Emeriti
Sara S. Berry
Robert Forster
Richard Goldthwaite
Jack P. Greene
Andrew W. Mellon Professor of the Humanities Emeritus.

Michael Johnson
Richard L. Kagan
Franklin W. Knight
Leonard and Helen R. Stulman Professor of History.

Vernon Lidtke
John G. A. Pocock
Harry C. Black Professor Emeritus.

Orest Ranum
Mack Walker
Willie Lee Rose

Dorothy Ross
Arthur O. Lovejoy Professor Emerita.

Nancy Struver
Judith Walkowitz

Courses

AS.100.102. The Medieval World.
This course explores selected topics in the political, economic, social and intellectual history of Western Europe in the period between the fall of the Roman Empire and the 13th century.
Instructor(s): G. Spiegel
Area: Humanities, Social and Behavioral Sciences.

AS.100.103. Early Modern Europe and the Wider World.
This course surveys the history of Europe and its interactions with Africa, the Americas, and Asia during the early modern period (c. 1400-1800). Topics include: the Renaissance, the Reformation, International Relations and Warfare, Colonialism, the Enlightenment, and the Age of Revolutions.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.

AS.100.104. Modern Europe and the Wider World.
European history since the French Revolution. Topics include: revolutions and democratization, industrialization, nationalism, imperialism, two World Wars, fascism, decolonization, Soviet communism, and formation of the European Union.
Instructor(s): P. Jelavich
Area: Humanities, Social and Behavioral Sciences.

An examination of violence - primarily racial and political - in the decades between the American Revolution and Civil War (1789 to 1861).
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences.

AS.100.110. Making America: Politics and Society since the Great Depression.
This course explores the interplay between economic growth and instability, diversity and conformity, war and protest, and liberalism and conservatism in modern American politics and society. Previously offered as AS.100.182, “The United States since 1929.”
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences.

AS.100.111. Making America: The History of Black Americans, I.
This course explores the history of African descended people in North America since the seventeenth century to the early twentieth century.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences.
**AS.100.112. Making America: Mastery & Freedom in British Mainland America, 1607-1789.**
This course examines society, politics, and culture in the colonial British mainland America and the early United States, with special emphasis on the history of domination and freedom in the context of empire and revolution.
Instructor(s): T. Ditz
Area: Humanities, Social and Behavioral Sciences.

**AS.100.113. Making America: Race, Radicalism, and Reform.**
Beginning with the end of Reconstruction and continuing through the present day, this course will examine the complicated ways in which Americans attempted to come to terms with racial, ethnic, cultural, and other forms of diversity.
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences.

**AS.100.114. Making America: U.S. History in the Age of Atlantic Revolution.**
Transnational approaches to U.S. history, c. 1760-1830, with a particular emphasis on the impact of the French and Haitian Revolutions.
Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences.

**AS.100.117. History of Brazil.**
