How do films inform, shape, or fundamentally alter our sense of the past? What are the strengths and limitations of cine-history? This course pairs traditional and avant-garde fiction films and documentaries with essays about history, historiography, memory and the political uses of the past to investigate fast-changing relationships between image and text, film and history. Lab fee: $50 Counts toward 300 or 400-level critical studies requirement.

Anthropology
AS.070.290. Modern South Asia: Bangladesh/Pakistan. 3.00 Credits.
Bangladesh and Pakistan, two major regional players in South Asia, originate in the 1947 Partition of India and shared nationhood between 1947 and 1971, ending with the War of Independence in 1971 in which Bangladesh separated from Pakistan. Since that time the two nation-states have been on different paths that have sometimes mirrored each other. This course brings together contemporary works of national histories, social movements and cultural production to consider the politics of self-differentiation and the points of convergences.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.352. Evolution, Ecology, Becoming. 3.00 Credits.
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orient anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.610
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.605. Anthropology and the Everyday.
Analysis of the everyday groans under the theoretical weight of concepts such “modernity,” “governmentality,” “capitalism,” “globalization” and more recently “security.” What might a sharper focus on the everyday yield in terms of its own analytical frameworks and empirical descriptions? We read some contemporary greats (Foucault, Derrida, Cavell, de Certeau, Lefebvre). Simultaneously we look at how each has been received within ethnography by reading anthropologists in engagement with them (Mahmood, Iyy, Das, Siegel, Harvey). We ask what critical stakes anthropology maintains in relation to the everyday.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies
AS.130.328. Ancient Egypt /Africa. 3.00 Credits.
Recent excavation and research have shed light on several ancient cultures of the Nile and its tributaries. We will look at the available archaeological and textual (all Egyptian) evidence for these societies and their interactions with Egypt between 3500 and 300 B.C. We will also discuss research aims and methods employed now and in the past in Egypt and the Sudan.
Instructor(s): B. Bryan
Area: Humanities

Writing Intensive.
AS.130.352. History of Hasidism. 3.00 Credits.
Although it appears to be a relic of pre-modern Judaism, Hasidism is a phenomenon of the modern era of Jewish history. This course surveys the political and social history of the Hasidic movement over the course of the last three centuries. Students will also explore basic features of Hasidic culture and thought in their historical development. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

History of Science Technology
AS.140.105. History of Medicine. 3.00 Credits.
Course provides an overview of the medical traditions of six ancient cultures; the development of Greek and Islamic traditions in Europe; and the reform and displacement of the Classical traditions during the Scientific Revolution.
Instructor(s): S. LeJacq
Area: Humanities, Social and Behavioral Sciences.

AS.140.146. History of Public Health in East Asia. 3.00 Credits.
This course examines the history of disease, epidemics, and public health responses in East Asia from the 17th-20th centuries. This public health history emphasizes the interactions, connections, and comparisons among China, Japan, Korea, and Taiwan.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.304. Medicine for and by Women in Early Modern Europe. 3.00 Credits.
This course will examine women’s role in early modern European medicine through the reading of early modern medical texts written for or by women. The course is meant for students interested in women’s history, the history of medicine, European history.
Instructor(s): G. Pomata
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.381. History of Reproduction. 3.00 Credits.
This course investigates the history of reproduction in American medicine, science, politics, and culture. It explores changing ideas about reproductive bodies, sexuality, and the family as well as practices of contraception, conception, and childbirth.
Instructor(s): B. Gurtler
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.413. The White Plague: History of Tuberculosis. 3.00 Credits.
Examination of interrelated scientific, medical, social, and cultural dimensions of tuberculosis from early modernity to the present in various geographical and cultural settings. Extensive reading, research based on primary sources. Juniors and Seniors only. Instructor's permission for all others. Cross-listed with History and Anthropology.
Instructor(s): D. Todes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.425. Individualized Medicine from Antiquity to the Genome Age. 3.00 Credits.
A seminar for graduate students and advanced undergraduates. We will explore the notion of the individual in medicine over 25 centuries, from the Hippocratics to the invention of the case study during the Renaissance to the genetic, biochemical, and immunological individual in recent biomedicine. Recommended Course Background: AS.140.105, AS.140.106
Instructor(s): G. Pomata; N. Comfort
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.674. Science and Medicine in Early Modern Atlantic World Culture.
How were changes in scientific and medical ideas reflected in cultural products of the early modern Atlantic world? We will study these ideas as they appeared in literary genres such as poetry, utopias, natural histories and travel narratives. Likewise, we will examine the visual culture of the Atlantic space for clues about changing conceptions about the natural world. Our expedition will encompass Anglophone, French and Hispanic regions, and will pay careful attention to hybrid cultural products that reflect the interaction between indigenous cultures and the (changing) European understanding of the natural world.
Instructor(s): M. Portuondo.

Political Science
AS.191.609. Historical Research Methods and the Study of Politics.
This course is designed for graduate students across the Social Sciences and the Humanities interested in the study of transnational politics from a historical perspective. Taught by Visiting Hinckley Professor Robert A. Hill, students will be introduced to methods of historical interpretation in the examination of archival documents and other sources of scholarly evidence. Utilizing materials and examples from Prof. Hill's own extensive archive of Garveyism, Rastafarianism, Black Hebraism, and other transnational, millenarian political and social movements, students will become familiar with the unique research challenges posed by various forms of political and historical articulation, ranging from formal records of state governments, intelligence records, personal archives, to publications and memoirs of non-governmental actors and organizations.
Instructor(s): R. Hill.

Jewish Studies Program
AS.193.201. Early Modern Jewry in Europe and the Mediterranean. 3.00 Credits.
The course examines the transition from medievalism to modernity among the Jews of Europe and the Mediterranean between the sixteenth and eighteenth centuries, paying attention to both material and intellectual life, and to women and children side by side with merchants and rabbis.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.
AS.193.203. Jews and the British Empire. 3.00 Credits.
What can we learn about Jewish history, politics, and culture by examining Jews in imperial and colonial settings, particularly the British Empire? How has Britain, its empire, history, culture, and language shaped the modern Jewish experience? Over the course of the semester, we will investigate these questions and explore the diverse history of Jews across the British Empire in the modern period. We will move from Britain, to Mandate Palestine, from India to South Africa, and beyond. We will analyze the role that Britain and the British Empire played in the formation of modern Jewish politics and culture, especially Zionism. The course will focus primarily on the 19th and 20th centuries, concluding with an examination of contemporary Jewish antisemitism, anti-Zionism, and relations with Israel.
Instructor(s): E. Imber
Area: Social and Behavioral Sciences.

AS.193.301. Reading the Bible and Encountering its World. 3.00 Credits.
The course examines the interactions between travel and biblical interpretation between the seventeenth and twentieth centuries, paying particular attention to the ways in which travelers to the Middle East and then scholars saw its residents as relics of an unchanging biblical world, whose practices could be used to interpret scriptural texts from both the Old and New Testaments.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.

German Romance Languages Literatures

AS.211.202. Freshman Seminar: A Thousand Years of Jewish Culture. 3.00 Credits.
This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.252. Freshman Seminar: What is a University?. 3.00 Credits.
Readings and discussion in English. Many of the issues we grapple with today regarding higher education have a long history dating back to the eighteenth and nineteenth centuries, when the first modern universities were founded in Germany. What is the relation of research to teaching? How do we define scholarship? What is the difference between professional training and academic study? How do we distinguish secondary education from higher learning? What obligations does the university have vis-à-vis the state, which often finances it in whole or in part? What protections does the state owe the university when it pursues research that runs counter to the interests of state? What purpose does the ivory tower serve in an age in which higher learning is no longer limited to the classroom but is widely available (via books, radio, television, the internet)? In this class we will explore the rich literature from the nineteenth century on the idea of the university and the value of learning. We will conclude the course with an examination of the German roots of Johns Hopkins. Cross-listed with History
Instructor(s): R. Tobias
Area: Humanities.

AS.211.253. Freshman Seminar: Why is the Fiddler on the Roof?: The Shtetl in Modern Jewish Culture. 3.00 Credits.
The most familiar portrayal of the shtetl for an American audience is the setting of the Broadway musical Fiddler on the Roof, where the shtetl, or market town, is a bastion of traditional Jewish life. But what exactly was a shtetl? How did traditional Jews live there, and how were their lives affected by the sweep of modernity? How was the Yiddish language, spoken by all shtetl Jews, both a repository of tradition and an agent of change? How do representations of the shtetl—from corrupt backwater to pious haven—reflect the concerns of Jews from the nineteenth century up to our own day? Through memoir, literature, film and painting, this course will examine actual lives lived in the shtetl, as well as a selection of the many artistic representations of it. All readings will be in English.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.265. Panorama of German Thought. 3.00 Credits.
Classics of German thought since the Enlightenment, with emphasis on philosophies of history and human development, as well as social and cultural theory. Authors include Herder, Lessing, Kant, Schiller, Humboldt, Hegel, Marx, Nietzsche, Weber, and Benjamin.
Instructor(s): P. Jelavich
Area: Humanities
Writing Intensive.

AS.211.341. Power and Resistance: Approaches to French Political Thought.. 3.00 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization. 3.00 Credits.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.
AS.211.449. America Through French Eyes: French Travellers to America. 3.00 Credits.
From early colonial efforts in the sixteenth century through the time of the great political revolutions and down to the present, America has exercised a deep fascination on the French. This course will look at French representations of America in art, literature and political thought across the centuries. Through a range of materials including travel accounts, essays, novels, maps, paintings and film, we will investigate how French perceptions of America have shifted over time, often in response to changes in French society and culture. All texts will be read in translation. Course work will include visits to JHU’s Special Collections and the Walters Art Museum downtown
Instructor(s): S. Miglietti
Area: Humanities.

AS.211.479. Dante’s Journey through the Afterlife. 3.00 Credits.
Dante’s Divine Comedy presents a complete picture of the medieval world-view in all its aspects: physical (the structure of the cosmos), historical (the major actors from Adam to Dante himself) and moral (a complete system of right and wrong). Dante shows how the Christian religion portrayed itself, other religions, the nature of God, humans, angels and devils, and human society. We will explore these topics both from the viewpoint of Dante’s own time, and in terms of its relevance to our own societal and cultural concerns.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.212.341. Power and Resistance: Approaches to French Political Thought. 3.00 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.

AS.213.368. German Political Thought. 3.00 Credits.
This course will introduce students to major figures in German political thought from Martin Luther to Karl Marx and Immanuel Kant to Carl Schmitt. The class will explore such issues as the notion of sovereignty, the relationship between church and state, the theory of parliamentary democracy, and the political and economic ramifications of liberalism. Reading and discussion in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.706. Literature, Museums, Mimesis.
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities
Writing Intensive.

The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citoyen” or “citizen,” as the political subject. The bourgeois and the citoyen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias
Area: Humanities.

AS.214.347. Petrarch and the Beginnings of the Renaissance. 3.00 Credits.
This course will focus on the life, work, and thought of Francesco Petrarca, or Petrarch. Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.
AS.214.390. Machiavelli: A Renaissance Master. 3.00 Credits.
Who was Niccolò Machiavelli? The author of the Italian Renaissance’s most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli’s major works and to the intellectual, social, and political contexts that shaped his thinking.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy. 3.00 Credits.
Dante’s Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante’s understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.437. The Intellectual World of the Italian Renaissance. 3.00 Credits.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.637. The Intellectual World of the Italian Renaissance.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? Writing Intensive.

AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3.00 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion, what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

Giambattista Vico’s Principii di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non-Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.
The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncaglio and Silva Passuni.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.350. Mexico: An interdisciplinary approach to the construction of our image and understanding of Mexico. 3.00 Credits.
The course studies the accounts of the Mexica on the journey and foundation of Tenochtitlan. Later we move on to the clash of cultures with the Spanish conquest (1521). After studying the art of the colonial period, the course focuses of the Mexican Revolution of 1910 and ends with a consideration of the image of the nation in murals and writers such as Octavio Paz, Carlos Fuentes and Elena Garro. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.452. Che Guevara and Magical Realism. 3.00 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.

Taking into account the crisis in self (national) representation and the fluidity of identities, the course will delve into the work of major Latin American writers in order to study issues of self-representation across time and specific contexts. The course will begin with the work of Sarmiento and move on to Gilberto Freire, Rachel de Queiroz and Clarise Lispector. In a second stage the course will delve into Garcia Marquez’ autobiography and Mario Vargas Llosa’s La tia Julia y el escribidor, to end with Ernesto Cardenal’s autobiography.
Instructor(s): S. Castro-Klaren.

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.
Departing form narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.
Instructor(s): S. Castro-Klaren.

AS.215.650. Mexico and the Invention of America.
Departing from O’Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero, Humboldt, Dussel and Alzandua will conform part of the readings. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

Sociology
AS.230.166. Chinese Migration in Modern World History 1500’s-2000’s. 3.00 Credits.
This interdisciplinary course applies theories of economic sociology to examine the effects of Chinese overseas migration on modern world economy from the sixteenth century to the contemporary era. It examines the contribution of overseas Chinese to the development of capitalism in the following junctures: the East-West economic integration in the pre-modern era, China’s modern transformation after the Opium War (1839-1842), the making of US national economy in the early twentieth century, as well as the postwar economic miracles in the Pacific Rim, among others. Special Note: Fulfills History requirement for GSCD track students.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.377. Colonialism and Anti-Colonialism. 3.00 Credits.
This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

Humanities Center
AS.300.139. Introduction to Intellectual History. 3.00 Credits.
This course offers a conceptual and historical introduction to Intellectual History. What makes the “history of ideas” different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call “ideas”? In what sense do they have a history? These are examples of the kind of questions addressed in the course.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.228. Brain and Society. 3.00 Credits.
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.
AS.300.301. Life, Vitality, Thought. Philosophy and the Natural Sciences in Nineteenth Century Europe. 3.00 Credits.

Last year neuroscientists at MIT shined an optogenetic light on brain cells in order to artificially stimulate memories. If every detail of our past has a particular location in the brain, then we could alter, and even destroy, memories. Does this mean that humans are like machines whose history can be erased as easily as we delete files on a computer? Or are memories, like consciousness, not so easily reducible to brain structures? This class will examine how these and other questions shaped the history of modern biology and experimental psychology beginning in the nineteenth century. We will read the works of prominent biologists, psychologists, and philosophers who were all involved in a rich debate over the nature of life and thought.

Instructor(s): L. McGrath  
Area: Humanities  
Writing Intensive.

AS.300.330. Trauma in Theory, Film, and Fiction. 3.00 Credits.

An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (The Emigrants), Lanzmann (Shoah), Spiegelman (In the Shadow of No Towers), McCarthy (Remainder), and others.

Instructor(s): M. Fried  
Area: Humanities, Social and Behavioral Sciences.

AS.300.365. Desire in the Fin de siècle. 3.00 Credits.

This course examines the obsession with desire at the turn of the 20th century in literature, drama, philosophy and social thought and its implications for notions of self and community in modernity. We will read comparatively across European, Russian and American cultures, including Stoker's Dracula, Hamsun's Hunger, plays by Chekhov, Strindberg, Ibsen, Wilde, and stories by Tolstoy, Gorky, Chopin and Larsen.

Instructor(s): A. Eakin Moss  
Area: Humanities  
Writing Intensive.

AS.300.383. History of Madness from the Bible to DSM-V. 3.00 Credits.

Madmen, lunatics or the insane, have seen an extraordinary variety of responses and attitudes across the centuries. Whether seen as a “true” phenomenon or as socially constructed “madness” was defined and treated, examined and controlled, diagnosed and “cured” according to the spirit of the time. This course will follow the varied social imageries of “madness” throughout Western history, from the Bible to the contemporary and controversial Diagnostic Statistical Manual (DSM) in its most recent 5th edition. Alongside primary texts by Hippocrates, Avicenna, Pinel, and Freud and secondary texts by Michel Foucault, Ian Hacking, Edward Shorter, and Elaine Showalter, among others, we will acquaint ourselves with first-person accounts of “madness” and its different forms of treatment, ranging from lunatic asylum, through electric-shock treatments and lobotomies to psychoanalysis. The course will explore the interaction between the historical and social, scientific and political as well as economical factors that have shaped the views of “madness” and its treatment.

Instructor(s): O. Ophir  
Area: Humanities.

East Asian Studies

AS.310.103. Modern Japan - 1800 to the Present. 3.00 Credits.

An introduction to the history of Japan from the 18th century to the present. In lectures and discussion we will draw upon a combination of primary source materials (political documents, memoirs, oral histories, journalism, fiction, film) and scholarly writings in order to gain insight into the complex and tumultuous process by which Japan became an industrialized society, a modern nation-state, and a world power.

Instructor(s): A. Bronson  
Area: Humanities, Social and Behavioral Sciences.

AS.310.105. Medicine and Society in China: From the Song to the Republican Period. 3.00 Credits.

This course introduces students to medical history in China in relation to gender history, legal history, publishing history, and literature from the Song to the Republican period.

Instructor(s): Y. Zhang  
Area: Humanities.

AS.310.108. Introduction to Chinese Fiction and Drama. 3.00 Credits.

This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.

Instructor(s): F. Joo  
Area: Humanities.

AS.310.203. Women Writers from East Asia, 11th to 19th Centuries. 3.00 Credits.

Introduction to women-authored texts in East Asia, 11th to 19th centuries. Historical and literary significance of their output in Chinese, Japanese, and Korean societies.

Instructor(s): F. Joo  
Area: Humanities.

AS.310.215. Enlightenment, Empire, and Democracy: Transnational Political Cultures in East Asia, 1880?1980. 3.00 Credits.

This course explores the global circulation of political ideas and the formation of transnational social, intellectual, and aesthetic movements in Japan, China, and Korea from the 1880s to the 1980s.

Instructor(s): A. Bronson  
Area: Humanities, Social and Behavioral Sciences  
Writing Intensive.

AS.310.221. Introduction to Eastern Religious Traditions. 3.00 Credits.

This course serves as an introduction to Hinduism, Jainism, Buddhism, Sikhism, Confucianism, and Daoism. Successful completion of this course will provide students with a critical understanding of these six traditions.

Instructor(s): J. Valentine  
Area: Humanities, Social and Behavioral Sciences.
AS.310.308. The Frontier in Late Imperial China. 3.00 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of China. Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China’s northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

AS.310.356. The Buddhist Experience. 3.00 Credits.
This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). In addition to studying the origins of Buddhism in India and its eventual spread across Asia, we will examine unique local interpretations of Buddhism. Particular focus will be on manifestations of Buddhism in art and material culture. Students will gain a critical understanding of the role of texts, art, doctrine, and practice play in the overall Buddhist experience. This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences.

Interdepartmental

AS.360.147. Freshmen Seminar: Adam Smith and Karl Marx. 3.00 Credits.
This freshmen seminar examines the ideas of Smith, the greatest proponent of the free market, and Marx, his most radical critic. Freshmen only.
Instructor(s): E. Schoenberger, P. Jelavich
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Program in Latin American Studies

AS.361.130. Introduction to Latin American Studies. 3.00 Credits.
The goal of this course is to provide an overview of Latin America, analyzing political and cultural aspects, chronologically organized. We will begin studying the origins of the multi–ethnic societies, starting with the ancient civilizations and their transformation under colonization. It is important to understand the survival of cultural traits among indigenous peasants today in the countries that were the cradle of ancient civilizations: Mexico, Guatemala and the Andean countries. In the republican era the course will focus on the classical Caribbean dictators in the first half of the 20th century and their reflection in the literature, comparing the historical reality with the magic representation in the work of García Márquez. The course will scrutinize the most important revolutions in the continent: the Mexican, Cuban and Bolivian revolutions and the geopolitics of USA in the Americas. Weekly lectures related to the assigned reading will focus on specific periods, topics and regions. After each lecture, we will review the material, connecting specific details from the readings with the more theoretical aspects provided in my lecture. The course has a website where the PowerPoint presentations will be posted. Students are encouraged to post their questions, comments and suggestions on the web after their readings. Students will be given a study guide for each lecture, which will be the basis for the exams. Our perspective on Latin America will be enhanced by a selection of few films related to the topics.
Instructor(s): M. von der Heydt-Coca
Area: Humanities, Social and Behavioral Sciences.

AS.361.207. Afro-Latin American Biography. 3.00 Credits.
In this course, we will examine biographical accounts of men and women of African descent in Latin America and in the broader Black Atlantic. These individuals include conquistadors and slaves, saints and sinners, revolutionaries and ordinary people. In their life stories, we will not only examine questions of race, gender, and religiosity that were central to the construction of identity in the early modern Atlantic world, but also the nature of the sources that allow us to tell their stories.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.361.410. Colombia and Venezuela: Postcolonial History and the European Novel. 3.00 Credits.
The intertwined histories of Colombia, Venezuela, Panama, and the Caribbean studied in two novels: Joseph Conrad’s Nostromo (1904) and Juan Javier Vázquez’s The Secret History of Costaguana (2007). Other novelists include Rómulo Gallegos (Doña Bárbara, 1929), Alejo Carpentier (The Lost Steps, 1953), and Gabriel García Márquez (The General in his Labyrinth, 1989).
Instructor(s): E. Gonzalez
Area: Humanities.

Center for Africana Studies

AS.362.104. Introduction to the African Diaspora. 3.00 Credits.
This course will begin in Africa before Atlantic slave trade, move to cover that trade into Brazil, the Caribbean and South Carolina. Comparisons of slave systems with Africa, Brazil, some parts of the Caribbean and Carolina (later South Carolina).
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.
African American Societies from across the hemisphere of the Americas. Instructor(s): F. Knight; M. Hinderer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.122. History of Africa (since 1880). 3.00 Credits.
An introduction to the African past since 1880.
Prerequisites: Students are not allow to take both 100.122 and 362.122.
Instructor(s): K. Gallon
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.175. Freshman Seminar: Remembering the Black Power Movement. 3.00 Credits.
This course explores trends, developments, contradictions, and dilemmas related to the Black Power Movement. The objective of studying this historical movement is not to engage in nostalgia, but to think through and learn the lessons of this historic social movement. An active participant in the Black Power Movement as a university undergraduate and graduate student, I do not approach this subject merely as a set of interesting intellectual issues and dynamics that can be explored with complete dispassion and objectivity. Rather, I seek to examine critically some of the contradictions and dilemmas that I, too, was caught up in, seeking to come to grips with and clarify my own participation and activities. We study these historical events with the expectation of making a positive contribution to the future.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.204. Women in African History. 3.00 Credits.
Selected readings written by or about notable African women from the 17th century to the present. Themes explored include slavery, power and religion, economics, health and politics.
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.

AS.362.206. Research Seminar: Baltimore History from the AFRO Newspaper Archives-Community Based Learning. 3.00 Credits.
This small, project-oriented class will introduce you to methods in historical research while exploring major topics in twentieth century Baltimore history. We will use the rich reporting of Baltimore’s Afro-American Newspapers, to explore Baltimore’s place in the larger history of Black urban experience. Students will analyze images and exhibits related to African-American history, as well as research and curate small online exhibits of primary source materials including photographs, newspaper clippings, correspondence, pamphlets, flyers, and maps. We will be among the first scholars to work in the Afro’s rich archival collections, which include over a million images.
Instructor(s): M. Hinderer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.340. Power and Racism. 3.00 Credits.
This course investigates the impact of white supremacy and anti-black racism, as a global system of power, on the political development of the United States of America.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences
Writing Intensive.

AS.362.401. Comparative Slavery in the Americas. 3.00 Credits.
This course examines the development of slavery and racial thought in Latin America and the Atlantic World from the fifteenth century until its demise in the middle and late nineteenth century. Readings in social and cultural history are intended to focus on the life and labor of slaves, while readings from economic and legal history evaluate slavery as an institution. Intellectual histories are also assigned in an attempt to map the development of slavery as an institution typified by racial caste. The primary goal of this course is to give students a background in the major historical debates that have shaped the production of the history of slavery, including questions of identity (creolization vs. African survivals), slave agency and control, and economic vs. racial causes of slavery and the slave trade. All of these topics will be examined through the overarching theme of the course, which is the Tannenbaum thesis: namely, to what extent slavery was experienced differently in Latin America, Anglo-America, and in Africa itself.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.450. Critical Thinking in Africana Studies. 3.00 Credits.
This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes
Writing Intensive.

AS.363.201. Introduction to the Study of Women, Gender, and Sexuality. 3.00 Credits.
This course offers an introduction into the fields of Women’s Studies, Gender Studies, and Sexuality Studies. It explores why we need these fields of inquiry, how they have emerged historically, what some of the major and most interesting contributions are and where we might go from here. The course is meant as a preparation for the other WGS core courses.
Instructor(s): E. Ender
Area: Humanities, Social and Behavioral Sciences.

Music

AS.376.317. Jewish Music. 3.00 Credits.
What is “Jewish music,” and what roles has it played in global and Jewish cultures? This course will address these questions, considering genres and contexts of Jewish music from cantillation to klezmer and from art music to Yiddish cinema. Cross listed with Jewish Studies
Instructor(s): J. Walden
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Program in Museums and Society

AS.389.201. Introduction to the Museum: Past and Present. 3.00 Credits.
This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.
AS.389.261. Curating Homewood. 3.00 Credits.
Instructor(s): C. Arthur
Area: Humanities.

AS.389.275. Interpreting Sites & Collections: An Introduction to Museum Education. 3.00 Credits.
Part public history, part introduction to museum practices, this hands-on course explores how heritage areas and museums serve communities through interpretation. Each year, students partner with a community to develop research-based, visitor-centered interpretive material, in the 2015 Baltimore National Heritage Area. Field trips and community meetings will be a significant part of the course. Cross-listed with History and History of Science. M&S practicum course. Class usually meets 1:30 - 3:50 except for days with field trips.
Instructor(s): E. Maloney
Area: Humanities, Social and Behavioral Sciences.

AS.389.301. Curating Material Culture for the Digital Age. 4.00 Credits.
JHU pioneered the concept of the modern research university in the United States, but what does that mean for the everyday experiences of its students, faculty, staff and friends? Excavate the history of this place through the things collected, made and used here since the university’s founding in 1876. Students research the material culture of Hopkins and present their findings on an interactive website: collectionsweb.jhu.edu. Course includes digital media labs. Cross-listed with History and History of Science. M&S practicum.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.302. The Virtual Museum. 3.00 Credits.
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.
Instructor(s): J. Kingsley
Area: Humanities.

AS.389.356. Halls of Wonder: Art, Science, and Literature in the Age of the Marvelous, 1500–1800. 3.00 Credits.
Instructor(s): E. Havens
Area: Humanities.

AS.389.357. Heaven on Earth: Art, Culture and Wonder in the Vatican Museum and Library. 3.00 Credits.
This interdisciplinary course will explore the institutional, cultural, artistic and architectural history of St. Peter’s and the Vatican Museum and Library from Antiquity through the Renaissance, up to the present day. Class meets in the Dick Macksey Seminar Room of the Brody Learning Commons. Cross-listed with History.
Instructor(s): E. Havens
Area: Humanities.

AS.389.361. Introduction to Material Culture: Early Views of Baltimore. 3.00 Credits.
Students explore early American life relating to the region and Homewood House. Primary research, object study culminate in exhibit focused on trades and crafts, training and work practices. M&S practicum course. Meets at Homewood Museum. Cross-listed with History.
Instructor(s): C. Arthur
Area: Humanities.

AS.389.450. Readings in Material Culture. 3.00 Credits.
Objects, things, stuff- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

AS.389.460. Inventing the Middle Ages from the Renaissance to Today. 3.00 Credits.
Investigate the history of the collection, interpretation and display of medieval art by nations, museums and private collectors. Topics range from antiquarian interest to conception of medieval sculpture as primitive, from the use of medieval objects in nationalistic displays and from early American museums such as the Cloisters in NY to current exhibits such as the Walters. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities.

AS.389.650. Readings in Material Culture. 3.00 Credits.
Objects, things, stuff- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

History of Art
http://arthist.jhu.edu/

Supporting a proud tradition of excellence in humanities scholarship and teaching, Johns Hopkins University offers students a diverse range of resources and opportunities for the study of art history. Courses are taught by an international faculty of respected research scholars, covering many aspects of the Classical and European tradition from the ancient world into the modern era, as well as selected aspects of Near Eastern, Asian, Ancient American, trans-Atlantic and contemporary arts. Participating in small classes with opportunities for informal excursions, students integrate their direct experience of works of art with the knowledge and critical perspective gained through historical research, discussion, and debate.

Programs leading to the B.A. and Ph.D. degrees emphasize the value of investigating works of art in their historical, intellectual, and social contexts, and enable students to deepen their understanding of cultural history through courses in other departments.

Facilities and Opportunities
Located in a metropolitan region of unsurpassed museum collections and research institutions, Johns Hopkins is well situated for the study of art history. The Baltimore Museum of Art, with its rich holdings in modern and contemporary art, African Art, and the history of prints (just to name a few of its strengths), is directly adjacent to the Homewood campus. Downtown, and only a short shuttle ride away, is the renowned Walters
Requirements for the History of Art Major

- Students must earn a "C-" or higher grade in all courses used to satisfy major requirements.
- Courses used to satisfy major requirements may not be taken satisfactorily/unsatisfactorily.

Three Introductory Courses, to comprise:

<table>
<thead>
<tr>

The graduate program is designed to give students working toward the Ph.D. degree an encompassing knowledge of the history of art and a deep understanding of the theories and methodologies pertaining to art historical research. The program emphasizes collaborative working relationships among students and faculty in seminars. Each advanced doctoral candidate benefits from supervision by two faculty members in his or her field.

The program also fosters a close familiarity with the outstanding art treasures in the Baltimore-Washington area relevant to the student’s area of study. In addition to the rich holdings of the Sheridan Libraries of Johns Hopkins University (which include collections of rare books at Garrett Library, Special Collections at Eisenhower Library, and the George Peabody Library downtown) graduate students have access to such research facilities as the Center for Advanced Study in the Visual Arts (National Gallery) and the Dumbarton Oaks Research Library and Collection, both in Washington, D.C.

Admission and Financial Aid

Applicants to the Ph.D. program in History of Art should upload and submit all required application materials and supporting documents through the online application. For information about applying to the Ph.D. program in History of Art, please see the department’s website (http://arthist.jhu.edu/graduate). Applications must be completed by January 16.

To foster close student-faculty relationships and provide for the greatest flexibility in developing each graduate student’s individual curriculum, the department strictly limits the number of students it admits each year.

Financial support for admitted students is provided in the form of tuition grants, a multi-year fellowship stipend (contingent on continued progress), and health insurance coverage, with further opportunities for advanced research and travel funding available. Students in the program may also apply for grants from the Charles Singleton Center for the Study of Pre-Modern Europe, which supports travel, conference participation, and dissertation research in Europe.

Requirements for the Ph.D. Degree

Students may apply for admission to the Ph.D. program with either a B.A. or M.A. degree from another institution in hand. Acceptance requires the approval of the instructors in the areas chosen by the student as major and minor fields; in the case of transfer students, acceptance may be provisional. Unless they can present acceptable language certificates, all students entering the Ph.D. program will be required to pass reading competency examinations in both German and French before the conclusion of the second year of coursework. Italian or Spanish may be substituted for French when a student’s area of study suggests it; a petition must be submitted and approved by the faculty.

Upon successful completion of course work and qualifying exams, students must submit a dissertation proposal. Once approved by the department, the student is admitted to candidacy and commences work on the dissertation. When a student has completed the dissertation, he or she is examined by a Graduate Board committee assembled by the department chair in consultation with the principal faculty advisor. Successful defense of the dissertation and electronic submission of work, complete in all its components, marks the fulfillment of the program’s degree requirements.

In addition to their own studies and research, every student in the Ph.D. program gains valuable pedagogical experience by serving as a teaching assistant, under different faculty mentors, for at least six terms (over the course of a five-year fellowship), and as a faculty research assistant for at least one term.

Requirements for the in-process M.A. Degree

Students entering the Ph.D. program with a Bachelor’s degree may qualify for the M.A. degree upon completion of two semesters of coursework (six graduate-level courses) and completion of the department’s language requirements, but the department does not accept students for the terminal M.A. degree as such.

Art History Fields

Ancient Art

Long associated with the study of classical archaeology, the department affords students of ancient art the opportunity work with a faculty that includes experts in Roman Art and Architecture and Ancient Near Eastern Art. Students also benefit from the close and long-standing relationship with the Department of Classics. Facilities of special relevance to students of Greek and Roman art include the Johns Hopkins Archaeological Museum, located on campus inside Gilman Hall, and the extraordinary holdings of the Walters Art Museum.
Medieval

Ever since its founding in 1947, the department has given special emphasis to the study of medieval art, and that tradition continues with a new generation of medievalists bringing expertise in Early Christian, Islamic, Byzantine, Mediterranean, and Italian Romanesque art and architecture to the program. Students avail themselves of local expertise through the departments of History, English, and German and Romance Languages and Literatures, and frequently consult with curators at the Walters Art Museum, several of whom participate as adjunct faculty. Hopkins students may take the seminars in Byzantine art offered each year at Dumbarton Oaks, and take advantage of the extensive research library there as well. The extraordinary collections at the Walters Art Museum and at Dumbarton Oaks are especially valuable for students interested in manuscript illumination and the minor arts.

Renaissance / Early Modern

Another signature strength of the History of Art Department is its program in Renaissance and Early Modern Europe, where a broad faculty expertise encompasses the art and culture of Italy, Spain, and the countries of northern Europe from the fourteenth to the seventeenth centuries. Graduate students in these areas participate in the programs of the Charles Singleton Center for the Study of Pre-Modern Europe, which sponsors collaborative research abroad and brings a steady stream of world-class lecturers to Baltimore. Students also benefit from the excellent collections of Italian and northern Renaissance art at the Walters Art Museum, the National Gallery, and the Philadelphia Museum of Art.

Modern

At Hopkins a diverse and challenging curriculum in modern art and criticism is offered by a research faculty of international prominence, supplemented by occasional visiting scholars and museum curators. European art from the 18th to the 21st century, American modernism, and modern art in Asia are all among the department's distinctive strengths. Students oriented toward the study of criticism and aesthetic theory can also broaden their perspective and develop their critical skills by taking courses offered through the Humanities Center and the Department of Philosophy. Distinctive collections at the Baltimore Museum of Art and at multiple places in Washington, D.C. (the Hirshhorn Museum, the National Museum of American Art, the Freer/Sackler of the Smithsonian, the Phillips Collection, and others) provide unparalleled resources for students of modern art at all levels.

Courses

AS.010.101. Introduction to History of Western Art I. 4.00 Credits.
A survey of painting, sculpture, and architecture from the Renaissance to the present.
Instructor(s): C. Lakey; H. Kessler
Area: Humanities
Writing Intensive.

AS.010.102. Introduction to the History of Western Art II. 4.00 Credits.
A survey of painting, sculpture, and architecture from the Renaissance to the present. Recommended Course Background: AS.010.101 or instructor permission.
Instructor(s): C. Lakey; S. Campbell
Area: Humanities
Writing Intensive.

AS.010.103. Introduction to the Art of Asia. 3.00 Credits.
A survey of the art and architecture of Asia, from the ancient world to the present and including the Indian subcontinent, China, Japan, Korea, and Southeast Asia.
Instructor(s): Staff.

AS.010.105. Art of the Ancient Americas. 3.00 Credits.
Surveys the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.110. Art of the Islamic World. 3.00 Credits.
This course is an introduction to the art of the Islamic world from the 7th century to the present, to include architecture, painting, mosaic, ceramics, textiles, metalwork, and contemporary media such as video and installation art. In addition to engaging with the region where Islam emerged—the eastern Mediterranean and the Arabian Peninsula—the course examines North Africa, Spain, Iran and Central Asia, and South Asia.
Instructor(s): R. Brown
Area: Humanities.

AS.010.147. South Asian Art, Culture and Politics: Empire, Colony, Nation. 3.00 Credits.
This course explores the visual culture and politics of South Asia from early archaeological settlements to contemporary installation art. Themes will include: the role of the patron, the relation of text and image, architecture and ritual/political space, colonialism, nationalism, modernity, and postcoloniality. Cross-listed with Political Science
Instructor(s): R. Brown
Area: Humanities.

AS.010.162. Freshman Seminar: From Found Object to Junk Art. 3.00 Credits.
The course explores the recurring strategy of using junk materials for artistic creation in the twentieth century, in both Europe and the United States, and considers the different ways this strategy has been employed by artists and experienced by viewers at different historical moments.
Instructor(s): J. Watson
Area: Humanities.

AS.010.201. Attack the Canvas! Violence & Aggression in Painting, 1947-1977. 3.00 Credits.
Through the examination of painterly practice in Japan, Italy, France, Germany, and the United States, this class will explore the radically new approaches to artistic production that occurred between 1947 and 1977.
Instructor(s): K. Johnson
Area: Humanities.

AS.010.203. Abstraction. 3.00 Credits.
Introduction to major works and discourses of, and key debates surrounding, abstraction in the visual arts of Europe and the United States throughout the twentieth century. Visits to the BMA.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.204. Italian Art in the Middle Ages. 3.00 Credits.
This course explores key monuments of medieval art and architecture in Italy from c. 400 until 1350. We will concentrate on historical, functional, and aesthetic aspects that lead to the creation of single monuments and art works. Emphasis is given to the analysis of “sacred space” by means of architecture, painted, and sculptural decoration, as well as ritual performances. Another focus is laid on the emergence on the political dimension of art for the creation of civic identity as well as in the context of the late medieval courts. We raise questions about the importance of materiality and science for the creation of medieval art works.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.205. The Painted Worlds of Early Greece: Fantasy, Form and Action. 3.00 Credits.
This course explores the creation and role of early Aegean wall painting. Found primarily in palaces, villas and ritual spaces, these paintings interacted with architecture to create micro-worlds for social activities taking place in their midst. Their subjects range—from mythological to documentary, from ornamental to instructive. They depict dance and battle, fantastical beasts and daily life. We examine their complex relationship to lived reality as well as the activities that surrounded them, from their crafting, to performance of rituals, to their role in “international” relations.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.010.206. Art and the Sacred in Colonial Latin America. 3.00 Credits.
This course explores the role of the image in the so-called spiritual colonization of the Americas. Drawing on art historical and anthropological perspectives, we will consider a wide range of artistic practices from the viceroyalties of New Spain and Peru. Special emphasis will be placed on questions of cross-cultural exchange and (mis)understanding. Topics include idolatry, demonic visions, relics, wonder-working images, and sacred matter.
Instructor(s): M. Lumbereras Corujo
Area: Humanities
Writing Intensive.

AS.010.208. The Disappearing Wall: Roman Frescoes in Context. 3.00 Credits.
The course introduces ancient Roman wall painting from Pompeii and Rome as images painted on “disappearing walls.” We will analyze these and other murals in historical, archaeological and museum contexts.
Instructor(s): S. O'Connell
Area: Humanities
Writing Intensive.

AS.010.209. Art Since 1945. 3.00 Credits.
Critical survey of artworks, texts, and debates primarily in Europe and the Americas since World War II. Visits to Special Collections, the BMA, and art on Homewood Campus.
Instructor(s): M. Warnock
Area: Humanities.
AS.010.211. Monuments of Asia. 3.00 Credits.
An examination of selected architectural monuments from across Asia, including the Indian subcontinent, Southeast Asia, China, Japan, and Korea. Ancient to contemporary.
Instructor(s): R. Brown
Area: Humanities.

AS.010.212. Mirror Mirror: Reflections in Art from Van Eyck to Velázquez. 3.00 Credits.
Explores the different ways Early Modern painters incorporated mirrors and reflective surfaces into their works for the sake of illusion and metaphor, deception and desire, reflexivity and truth-telling. By transgressing the boundaries of human vision and experience, embedded mirror images often made claims about the powers of art, and the superiority of painting in particular.
Instructor(s): M. Merback
Area: Humanities

AS.010.213. Medieval Renaissances. 3.00 Credits.
A course on the appropriation, citation, and imitation of classical antiquity in the art and architecture of the Middle Ages (ca. 300-1300), emphasizing the active transformation of earlier models rather than passive copying.
Instructor(s): R. Danford
Area: Humanities
Writing Intensive.

AS.010.214. Ancient Americas in Motion. 3.00 Credits.
This course critically examines the visual arts and their makers as portrayed in documentary, historical, and Hollywood films.
Instructor(s): L. Deleoniardis
Area: Humanities

AS.010.215. Transformations of an Empire: Power, Religion, and the Arts in Medieval Rome. 3.00 Credits.
This course investigates the impact of political, religious, and social change for the making of art and architecture in the city of Rome from Constantine the Great (ca. 274-337 CE) until 1308, when the papal court moved to Avignon. From being a thriving metropolis and the political center of an empire in a pagan, multi-ethnic society, Rome became a small town of a few thousand inhabitants dwelling in the ancient ruins under the spiritual leadership of a powerless Christian bishop and unprotected from the invasions of the migrating peoples from Eastern Europe and Central Asia. Later transformations concern the rise to political power of the popes, achieved by the military alliance with the Frankish dynasty of Charlemagne around 800, and the controversy over the superiority of power between the German emperors and the Roman popes. How did the transformation from worldly to religious power affect the architecture of public buildings in the city? What strategies were developed to visually promote the new religious leaders of the city, the popes, and the new Christian God? How did the new status of Rome as one of the most important Christian pilgrimage sites with its countless bodies of Early Christian martyrs in the catacombs outside the city influence urban development? And finally, what impact did the economical ups and downs in these periods of transition have for the arts? As we try to reconstruct the 'image' and the appearance of medieval Rome, this course discusses ideas and concepts behind different forms of leadership, both political and religious, as they intersect with the power of the arts and the self-referential character of a city that is obsessed with its own past.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.216. 20th Century Italian Art. 3.00 Credits.
This course will be a critical survey of the major artistic movements in Italy during the 20th century, from Futurism to Arte Povera. Often seen as a secondary location of artistic production, the class will situate the artists working in Italy within a broader historical and global context.
Instructor(s): K. Johnson
Area: Humanities.

AS.010.218. Modern Art, 1880-1950. 3.00 Credits.
Introduction to major works and discourses of, and key debates surrounding, modernism in the visual arts of Europe and the United States. Visits to the BMA and Special Collections.
Instructor(s): M. Warnock
Area: Humanities

AS.010.219. Constantinople from Founding to Fall: Art of the Byzantine Empire. 3.00 Credits.
The course examines Byzantine art - from the founding to fall of Constantinople, both in Byzantium and beyond its borders - through its religious, political and aesthetic power.
Instructor(s): M. Raucher
Area: Humanities
Writing Intensive.

AS.010.220. Theft, Theory, and Telescopes: Rome and Naples in the Age of Caravaggio. 3.00 Credits.
This course will offer an overview of painting in Rome and Naples in both Caravaggio's generation and the one that followed it, exploring broad shifts in artistic theory and practice from the 1590s to the late 1630s.
Instructor(s): H. Friedman
Writing Intensive.

AS.010.221. Shopping for Status: Patronage & Collecting at the Early Modern European Court. 3.00 Credits.
At the early modern European princely court, wonders of art (ancient sculptures, priceless tapestries, masterpieces of oil on canvas) were displayed alongside wonders of religion, science, and nature (saintly relics, astronomical devices, unicorn horns). Through the study of courtly patronage and collecting practices, this seminar will examine the court as both a locus of power and a social organism. Students will explore the way players at court staged strategic and social exchange through the circulation, organization, display and concealment of art and artifacts to powerful ends.
Instructor(s): R. Teresi
Area: Humanities.

AS.010.224. The Art of Bollywood. 3.00 Credits.
This course examines Hindi cinema produced in Mumbai since the 1950s, focusing on key examples from each decade, from early narratives of navigating the big city to song-and-dance extravaganzas incorporating Indian-Americans. We will look at art represented in film, from modernist sculpture to ancient architecture. The course will also explore the billboards, cinema cards, and other ephemera associated with Bollywood, alongside contemporary artists’ appropriations of Hindi cinema. No knowledge of Hindi is required.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.
AS.010.226. Art, Medicine, and the Body: From Leonardo to Body Worlds. 3.00 Credits.
This course explores five centuries of fruitful collaboration between physicians and artists—those who observe the body in order to heal it, and those who do the same in order to picture it. From medieval medical manuscripts, where the body is portrayed as a microcosm of the created world, to the anatomical forays of Renaissance artists such as Leonardo da Vinci and Albrecht Dürer; from gruesome depictions of bodily pain, disease, and corruption in the art of Matthias Grünewald to the eloquent exposure of the body’s interior by anatomists such as Andreas Vesalius; from the spectacularization of the body in Enlightenment science to the rubberized cadavers of Gunther von Hagen’s Body Worlds project—these and other topics will bring into focus the complex intersections between the history of medicine and the history of art.
Instructor(s): J. Watson
Area: Humanities.

AS.010.227. Holy Images, Profane People: Art & Power in Byzantium. 3.00 Credits.
Byzantium is famous for its gold mosaics and painted icons that represented humanity transformed. Less well known is how the dominance of icons spawned the creation of caricatures and parodies. This course will introduce canonical Byzantine art and architecture, such as Hagia Sophia, marginal psalter illumination, the icon, the Great Palace and mosaics. It also will explore how secular art subverted its norms to lampoon the powerful in Byzantine ivories, amulets and metalwork.
Instructor(s): J. Magruder
Area: Humanities.

AS.010.228. Prophets, Kings, and Demons: The Art of Islamic Book Painting. 3.00 Credits.
Despite the widespread misconception that Islam forbids images of humans and animals, figural representation played a rich and varied role in the historical arts of the Muslim world, particularly in the form of book painting. This course explores the production and consumption of illustrated Islamic manuscripts and albums, situating the paintings in their wider artistic and social contexts. Extending in scope from the Near East to India and from the medieval to the early modern period, the course takes a thematic approach that will introduce some of the key genres of the tradition—including chronicles, fables, and religious works—and investigate broader questions of style, meaning, viewership, text-image relationships, and cross-cultural borrowing. Students will have the opportunity to look at examples of this art firsthand in local collections.
Instructor(s): U. Rustem
Area: Humanities.

AS.010.230. Impressionism, Painting of Modern Life. 3.00 Credits.
This course offers an introduction to one of the major movements in modern painting. We will explore the developments of a new aesthetic and subject matter during a period of vast cultural change in Paris and its environs, from the mid-19th century to the turn of the 20th century. Visits to the Baltimore Museum of Art and the National Gallery of Art will supplement our study of artists including Courbet, Manet, Monet, Degas, Cézanne, Pissarro, Seurat, and more.
Instructor(s): J. Watson
Area: Humanities.

AS.010.232. Art and Architecture of the Medieval Mediterranean World. 3.00 Credits.
This course explores the development of medieval painting, sculpture, and architecture in the Mediterranean region from ca. 250 to 1400. The class will focus especially on moments and sites of contact between Western European, Byzantine, and Islamic cultures and will examine the impact of cross-cultural exchange on artistic and architectural production.
Instructor(s): C. Lakey
Area: Humanities.

AS.010.233. Art and Astrology in the Middle Ages. 3.00 Credits.
This course explores the relationship between art and astrology from the early Middle Ages to the early Renaissance. We look at a wide range of media—mosaic, painting, metalwork, manuscripts, and sculpture—that speak to the central place of astrology in medieval systems of knowledge, and the practical uses of astrology for medicine and politics. Readings and discussions cover a variety of themes, including the transmission of astrological knowledge, the emergence of large-scale astrological mural programs, the use of precious stones and amulets, and the ways in which artworks probe the tensions between astrology and Christian theology. A recurring topic will be principle of “celestial influence”—the idea that the stars emit rays that affect people and events on earth—and its implications for artistic production and reception, as well as how art objects could even predict, or represent predictions of, future events. Primary sources (in English translation) include Albertus Magnus, Abu Ma’shar, al-Kindi, Roger Bacon, and others. Secondary readings include Aby Warburg, Erwin Panofsky, Fritz Saxl, Michael Camille, Georges Didi-Huberman, and others.
Instructor(s): M. Hauknes
Area: Humanities.

AS.010.234. Lower, Later, Farther Away: Roman Art Beyond the Center. 3.00 Credits.
This course will introduce students to three topics that represent a dramatic shift away from the traditional “center” of the study of Roman art (art created for the wealthy and politically privileged citizens of central Italy between the first century BCE and the first century CE). Students will explore art created by and for the Roman lower classes, as created in late antiquity, and as created in the provinces of the empire. There will be a final paper.
Instructor(s): E. Bevis
Area: Humanities.

AS.010.236. Palaces, Temples and Tombs in Mesopotamia. 3.00 Credits.
Mesopotamia, the “land between the rivers,” is considered the cradle of civilization. Its earliest urban centers appeared by 3500 BCE in the region of modern-day Iraq, Iran, and Syria. Along with urbanism came the emergence of temples and palaces as large-scale elite institutions (replete with written records). Their arts manifest some of the earliest complex representations. This course explores the art and architecture within the social, political and cultural context of ancient Sumer, Babylonia and Assyria. It provides an integrated picture of the arts of Mesopotamia from 3500 to 330 BCE with an emphasis on the development of visual narrative and the use of art in the expression of authority and legitimacy.
Instructor(s): M. Feldman
Area: Humanities.
AS.010.251. Medieval Spaces: Site, Image, and Viewer in the Middle. 3.00 Credits.
This course serves as an introduction to medieval art by analyzing the relationships between architecture and images at holy sites from the 4th century CE through the 14th. The course will focus primarily on how those relationships structured viewers’ experiences of the divine by understanding how works functioned for specific audiences in a particular spatial context. In reviewing the origins and transformations of Christian visual culture we will investigate how site-specific image production in Western Europe and Byzantium informed social and political relations; how theological problems related to image worship affected the form and content of the visual arts; and how developments in public and private devotion altered the spaces for imaginative display.
Instructor(s): C. Lakey
Area: Humanities.

AS.010.254. Art and Architecture of Early Christian and Medieval North Africa. 3.00 Credits.
Survey of Early Christian and medieval art and architecture in North Africa, with an emphasis on indigenous developments and cultural exchange in the Mediterranean world, 4th to 13th century. Dean’s Teaching Fellowship course.
Instructor(s): N. Dennis
Area: Humanities.

AS.010.256. Nineteenth-Century European Art. 3.00 Credits.
A selective survey of European painting and sculpture from the French Revolution to the start of the First World War. The nineteenth century ushered in an era which saw political instability, industrialization, imperialism, and the growth of popular culture come to bear on the very conditions of art-making. Focusing on key moments in this history, the course aims to recover the real intensity and strangeness of art’s involvement with modernity. Topics include neo-classicism; art and revolution; the rise of landscape; the triumph of the bourgeoisie; the gendering of art; and the birth of the avant-garde.
Instructor(s): J. Melius
Area: Humanities.

AS.010.263. Paris / New York After the War. 3.00 Credits.
This course introduces the developments in art after World War II, in both Paris and New York, and studies how certain sensibilities overlapped and intersected as the two cities vied to be the international center of modern art. Recommended Course Background: AS.010.102
Prerequisites: AS.010.102
Instructor(s): J. Watson
Area: Humanities.

AS.010.291. Architectural History of Baltimore. 3.00 Credits.
Focusing on Baltimore’s built environment and drawing upon primary sources, this course will explore the major European and American design theories, values, and practices of the last several centuries with an eye towards establishing Baltimore’s place within a national and global urban environmental context. Topics addressed in this course include city building, class and race, architectural revivalism, transportation, urban renewal, and post-industrialism.
Instructor(s): M. Perschler
Area: Humanities
Writing Intensive.

AS.010.300. Houses of the Ancient Mediterranean. 3.00 Credits.
In the ancient world the house was not merely a private space for interacting with family and close friends, but the setting for a diverse array of social rituals and activities. This course will examine the houses of the ancient Mediterranean, from the Bronze Age through Late Antiquity, in order to better understand how they acted as medium through which culture is passed down and transformed. There will be a particular focus on the architecture and décor of such residences and we will draw on methods and readings from the History of Art, Classics, and Archaeology. This course will take advantage of Baltimore’s museums and together we will visit the collections of ancient art at the Johns Hopkins Archaeology Museum, the Walters Art Museum, and The Baltimore Museum of Art (BMA). We will also visit the BMA’s current installation, “Imagining Home,” whose exploration of home as a universal theme is directly related to the goals of this course. There will be a final paper.
Instructor(s): N. Berlin
Area: Humanities.

AS.010.301. Art and Interactions in the Eastern Mediterranean from 2000-500 BCE. 3.00 Credits.
The Mediterranean Sea has always acted as a connector for the many great civilizations that flourished around its shores. From 2000 to 500 BCE, these interactions were particularly dynamic, resulting in a diversity of arts including painting wall frescoes, precious jewelry, and elaborate furnishings and weaponry. This course examines the arts of the interactions among the Egyptians, Near Easterners, and Greeks, considering the role of artistic products in intercultural relations.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.302. The World as Image: Art and Knowledge in the Middle Ages. 3.00 Credits.
This class will explore the relationship between art and knowledge in the Middle Ages (600-1400 CE). In particular, we will examine the ways in which medieval painters, sculptors, and architects engaged with the cultural phenomenon of “encyclopedism” by creating artworks that sought to capture all the world’s knowledge in a single visual program. In our exploration of this topic we will consider a wide range of works, from medieval maps and scientific manuscripts to large-scale tapestries and the architectural programs of the great Gothic cathedrals. Central themes include text-image relationships and the role of pictorial techniques, such as allegory, personification, and analogy for visualizing complex ideas. We will also examine the representation of knowledge in medieval poetry and see how medieval authors employed ekphrasis to create visual artworks within their texts to serve as placeholders for encyclopedic learning.
Instructor(s): M. Hauknes
Area: Humanities.
AS.010.303. Flavian Art, AD 69-96. 3.00 Credits.
This course investigates Roman art and architecture during the Flavian age, in Rome and in the provinces of the empire. With the Flavians, the capital of the empire enjoyed a period of intense building activity: the great projects of Vespasian and Domitian radically transformed its image. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting, epigraphy and literary sources) to reconstruct the built environment of Rome and other towns (Pompeii, Herculaneum, etc).
Instructor(s): P. Tucci
Area: Humanities.

AS.010.304. Pictures on Walls: Murals and Mosaics in the Byzantine and Medieval Worlds. 3.00 Credits.
This course examines the development monumental mosaic and fresco in the medieval Mediterranean (ca. 250-1300), through key monuments in places like Constantinople, Thessaloniki, Cyprus, Palermo, Rome, and Venice.
Instructor(s): M. Hauknes
Area: Humanities.

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas. 3.00 Credits.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the "global South." This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of "global modernism."
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.307. Diplomats, Dealers, and Diggers: The Birth of Archaeology and the Rise of Collecting from the 19th c. to Today. 3.00 Credits.
The development of archaeology in the Middle East – its history of explorers, diplomats, missionaries and gentlemen-scholars – profoundly shaped the modern world, from the creation of new museums and the antiquities market to international relations and terrorism.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.308. Art and Architecture in Republican Rome. 3.00 Credits.
The course investigates the influence of the Hellenistic world on Roman artists, architects and patrons during the Republican age (509-31 BC).
Instructor(s): P. Tucci
Area: Humanities.

AS.010.309. Gifts and Thefts in the Middle Ages. 3.00 Credits.
Why were some medieval objects valued as gifts, others appropriated as spolia, and still others taken by force? How does transferring objects from one cultural context into another change their meaning? Western, Byzantine, and Islamic art, 6th-13th centuries.
Instructor(s): R. Danford
Area: Humanities.

AS.010.310. The 'Long Sixties' in Europe. 3.00 Credits.
Emphasis will be on advanced artistic practice primarily in France, Italy, the Benelux, and German-speaking countries; students will curate an exhibition of avant-garde journals from the Sheridan Libraries.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.311. Late Antique and Early Christian Art. 3.00 Credits.
The transformation of the Roman empire after the 3rd century CE and its influence on art and architecture
Instructor(s): P. Tucci
Area: Humanities.

AS.010.312. Surrealism. 3.00 Credits.
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA. Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.
Instructor(s): M. Warnock
Area: Humanities
Writing Intensive.

AS.010.314. The Great Debate on Images: from Zurich to Guadalupe. 3.00 Credits.
Images became a central topic of debate at the time of the Protestant Reformation. Images were not only a topic of doctrinal discussion, but also a target for desecration and destruction. The response to Iconoclasm on the Catholic side of this divide was also intense before, during and after the Council of Trent (1547-63), leading to a reconsideration of images' role in an economy of the sacred. But the geography of this debate was not limited to Europe: the evangelization of the New World constituted a new scenario in which previous arguments and doctrinal positions were challenged under completely different circumstances. The Great Image Debate is not only a crucial episode of history, but it is also an argument reflecting on the nature of images and their paradoxical contribution to the Early "modern" world. This course is geared towards students with interests in History, Art History and Anthropology.
Instructor(s): F. Pereda
Area: Humanities
Writing Intensive.

AS.010.315. Art of the Assyrian Empire, 1000-600 BCE. 3.00 Credits.
The Assyrian Empire dominated the ancient world from 1000-612 BCE, stretching from Iran to Egypt and laying the foundation for the later Persian and Macedonian empires. With imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This course provides an integrated picture of the imperial arts of this first great empire, situating it within the broader social and political contexts of the first millennium BCE.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.316. Venetian Art and the Mediterranean World: 1350-1550. 3.00 Credits.
This course is an investigation into the fashioning of Venetian identity in architecture and the visual arts, with a particular address to the encounter with Byzantine and Islamic traditions and exchanges with other centers of the Italian peninsula.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.319. Medieval Art and Architecture of the Holy Land. 3.00 Credits.
Discusses political and religious contexts in the Middle East, where specific territories (Jerusalem) were claimed by all three monotheistic religions for cult practices. Resulting conflicts influenced Jewish, Medieval, and Islamic art and architecture in the region.
Instructor(s): N. Zchomelidse
Area: Humanities.
AS.010.320. Art of Colonial Peru. 3.00 Credits.
The visual arts of viceregal Peru (16th-18th c) are considered in historical context. Religious orders, art schools, artisan guilds and cofradia are examined as are the social and political implications of art patronage.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.321. The Art and Architecture of a Roman Town. 3.00 Credits.
Pompeii, buried by the eruption of Mons Vesuvius in AD 79, offers the best evidence of everyday life in the Roman world. The course examines its public buildings and houses, as well as the main villas outside the city walls. A final paper will be required.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.322. Knowledge, Holiness, and Pleasure: The Illustrated Book in the Medieval World. 3.00 Credits.
The book was the primary source for the collection of knowledge in the Middle Ages. It was also the medium for the preservation and proliferation of the texts that underlay the three monotheistic religions (Judaism, Christianity, Islam). Finally, the book served as a source for elite entertainment, perhaps most importantly in Late Antiquity and the later Middle Ages. This course investigates the role of the illustrated book within the political, religious, and artistic developments that took place after the rise of Christianity from the end of the Roman Empire until the early modern period in the medieval West and in Byzantium, permeating Jewish and Islamic traditions. We will examine how the different types of books, such as horizontal and vertical scrolls, large and miniature size codices influenced the placement, conception, and style of the illustrations. The course also addresses processes of manufacture, issues of materiality (i.e. precious multi-media book covers, papyrus, parchment, paper), and the relationship between text and image. A major aspect of the seminar focuses on the performative aspect of the book in its wide range of functions: secular and liturgical, public and private. Students will be able to work first hand with manuscripts and facsimiles from the rare book collection of Eisenhower Library and the Walters Art Museum.
Instructor(s): N. Zchomelidse.

AS.010.323. Art of the Roman Empire. 3.00 Credits.
This course explores Roman art and architecture in the imperial age (late 1st century BC - 4th century AD) with an emphasis on individual monuments and their decorative elements.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.324. Art and Architecture in the Augustan Age. 3.00 Credits.
Investigates Roman art and architecture during the Augustan age (31 BC – AD 14). Augustus' cultural program influenced many aspects of Roman life, leading to the creation of a new visual language that transformed Roman society. Methodologically, the focus will be on the integration of diverse sources to reconstruct and discuss the images and the built environment of the Augustan age.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.326. Monsters, Madmen, and Matadors: Goya between Truth and Fantasy. 3.00 Credits.
With over 1,800 works attributed to him, Francisco de Goya (1746-1828) was constantly inventing, experimenting, and pushing the limits of the representable. This course will begin by examining Goya's printed oeuvre as one possible itinerary for studying his life and work. The second half of the course will consider alternative narratives for Goya's career based on genre and theme. Topics will include portraiture, madness, religious painting, and the discovery of Goya by later generations of artists, authors, and filmmakers. The course includes several visits to the print room at the Baltimore Museum of Art. There will be a final paper.
Instructor(s): A. Letvin
Area: Humanities.

AS.010.327. The Harem and the Veil: Space and Gender in the Islamic World. 3.00 Credits.
This course explores the constructed imagery of the harem and the veil in relation to politics and visual culture in the Middle East, North Africa, India, and Euro-America. Topics will include: Ottoman palace architecture, Orientalist painting, mandating/banning the veil, Islamic feminisms. We will address visual culture broadly, including advertising, architecture, contemporary art, film, news media.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.328. The Holy Undead: Relics, Reliquaries, and the Cult of Saints in Medieval and Early Modern Europe. 3.00 Credits.
According to medieval Christian theology, the saints resided in both the earthly and heavenly spheres and would often bridge this gap in order to interact with the living. Their bodily remains and possessions were powerful sites of potential contact between the sacred and profane. Through their relics, saints could straddle the two realms in order to heal, intercede, perform miracles, or even enact punishment. Images of relics, reliquaries, miraculous images, and the like helped to narrate, authenticate, or negotiate transactions between the devotee and the divine. This course will provide students with a historical overview of the medieval cult of saints and relics, focusing primarily on the ways in which images could invest these sacred objects and bodily remains with power and meaning.
Instructor(s): T. Golan
Area: Humanities.

AS.010.329. Building an Empire: Architecture of the Ottoman Capitals, c. 1300–1600. 3.00 Credits.
Centered on modern-day Turkey and encompassing vast territories in Asia, Africa, and Europe, the Ottoman Empire (1299 – 1923) was the longest lived and among the most powerful Islamic states in history, with an artistic tradition to match. This course explores the functional and symbolic role that architecture played during the empire's formative centuries, when three successive capitals — Bursa, Edirne, and Istanbul — served to visualize the sultans' growing claims to universal authority. With reference to mosques, palaces, tombs, and other categories of architecture, the course will examine the buildings in their artistic, social, and political contexts. Themes to be addressed include patronage and audience, architectural practice and the building trade, ceremonial and ritual, topography and urban planning, and the relationship of Ottoman architecture to other traditions.
Instructor(s): U. Rustem
Area: Humanities.
AS.010.333. The Making of Renaissance Rome 1300-1600. 3.00 Credits.
The multiple identities of the ancient city as these are understood and represented through the work of artists such as Giotto, Filarete, Raphael, Bramante, and Caravaggio; the writings of Petrarch, Pius II, Alberti, and Montaigne; the statecraft and patronage of the Renaissance popes.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.334. Problems in Ancient American Art. 3.00 Credits.
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS and Program in Museum and Society.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.340. Renaissance Art in the Netherlands, 1400-1500. 3.00 Credits.
Explores the major painters working in the Low Countries during the fifteenth century: Melchior Broederlam, the Master of Flémalle, Jan van Eyck, Rogier van der Weyden; Hans Memling, Hugo van der Goes, Hieronymus Bosch, and others.
Instructor(s): M. Merback
Area: Humanities.

AS.010.347. Inventing Antiquity in the Early Renaissance. 3.00 Credits.
A close look at how the ancient Greek, Roman and Jewish worlds were imagined and reconstructed by early Renaissance scholars, poets, warlords and artists.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.351. Asian Art After 1945. 3.00 Credits.
This course examines the art and architecture of East, South, and Southeast Asia produced since the mid-twentieth century. We will engage with theoretical, visual, and political developments in the recent art of this region, reading statements by artists and architects, discussing the rising commercial and international profile of contemporary Asian art, and exploring established and emerging art histories of this period. Cross-list with East Asian Studies.
Instructor(s): R. Brown
Area: Humanities.

AS.010.353. Key Moments in East Asian Politics & Visual Culture. 3.00 Credits.
Examines key political moments in China, Japan, and Korea from 1850 to the present, focusing on the way visual imagery shapes these events. Includes: Japanese occupation of Korea, Hiroshima and Nagasaki bombings, 1989 Tiananmen square protests, North Korean propaganda.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.357. Monumentality in Classical Art and Architecture: From Greece to Rome. 3.00 Credits.
This course investigates the Romans’ reception of Greek and Hellenistic art and architecture, as well as Rome’s original contribution during the republican and imperial age. Its goal is to examine the effects of Hellenization on Roman society and the creation of a completely new visual language.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.360. Medieval Art in Europe: Methodology, Historiography, Theory. 3.00 Credits.
The course explores the conceptual character of medieval European art from Late Antiquity to the end of the Middle Ages with an emphasis on methodological, historiographical, and theoretical issues. Using selected monuments and objects from a wide geographical range and dating from the 4th to the 14th centuries as case studies, students will also familiarize with the methodological developments of art historical research. The course will focus in particular on the anthropological turn of medieval art history and medieval image theory.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.364. Babylon: Myth and Reality. 3.00 Credits.
"Babylon - the name resonates, from the Biblical whore of Revelations to sci-fi. But what do we really know about the ancient city and its civilization?"
Instructor(s): M. Feldman
Area: Humanities.

AS.010.365. Art of the Ancient Andes. 3.00 Credits.
The ancient visual arts of Andean South America and their respective cultural contexts form the basis of this course. In conjunction with the Baltimore Museum of Art and the Johns Hopkins Archaeological Museum students will have access to collections for study.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.366. Native American Art. 3.00 Credits.
The works of Native American artists are examined and discussed in their respective social and historical contexts. Such works include Hopewell stone sculpture, Mimbres pictorial painting, and Tlingit guardian figures. We examine the concept of sacred landscape through analysis of monumental earthworks and effigy mounds, Anasazi architecture, and rock art. In conjunction with the Baltimore Museum of Art and the Johns Hopkins Archaeological Museum students will have access to collections for study.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.370. History of Art: Histories, Methods, Theories. 3.00 Credits.
This course will be a short introduction to the construction of the discipline and to the different methodologies developed in the analysis of works of art, as a way to understand the basic challenges faced today by Art History.
Instructor(s): F. Pereda
Area: Humanities
Writing Intensive.

AS.010.382. The Politics of Display in South Asia. 3.00 Credits.
Through examining collecting, patronage, colonial exhibitions, and museums, this course examines how South Asia has been constructed in practices of display. Themes: politics of representation, spectacle, ethnography, and economies of desire related to colonialism and the rise of modernity. Cross-list with Anthropology, Museums and Society and Political Science.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.
AS.010.389. The Stone and the Thread. 3.00 Credits.
This course examines the built environment of the Inka and considers architecture in its social, historical, and cultural contexts. Shared forms and ideas implicit in the fiber arts offer comparative points for analysis and discussion.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.398. Tombs for the Living. 3.00 Credits.
Centering on the tomb as the unit of analysis, this course examines the cultural and material aspects of death and funerary ritual. Draws on case studies from North America, Mesoamerica, and the Andes. Collections study in museums.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.400. Looking at Language: Vision and Textuality from Surrealism to the Present. 3.00 Credits.
Considers the emergence of the "written painting" and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Ligon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.401. Early Modern Vision and Artistic Practice. 3.00 Credits.
This seminar examines shifting theories of vision in making and perceiving art from species and the Eucharist to Vermeer and the camera obscura.
Instructor(s): C. Fowler
Area: Humanities
Writing Intensive.

AS.010.402. Ancient Art in Fascist Italy. 3.00 Credits.
The course examines the role played by Roman art and architecture during the twenty years of the Fascist regime (1922-1943). There will be a final paper.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.403. Art and Science in the Middle Ages. 3.00 Credits.
This course investigates the intersections of art and science from the Carolingian period through the fourteenth century and the historical role images played in the pursuit of epistemic truths. Science – from the Latin scientia, or knowledge – in the Middle Ages included a broad range of intellectual pursuits into both the supernatural and natural worlds, and scholars have classified these pursuits in various ways (i.e. experimental or theoretical science, practical science, magic, and natural philosophy). A particular focus of this seminar will be placed on the assimilation of Greek and Islamic scientific advances in cartography, cosmology, and optical theory into the Latin theological tradition.
Instructor(s): C. Lakey
Area: Humanities
Writing Intensive.

AS.010.404. The Cult Image in the Renaissance. 3.00 Credits.
This course discusses the role of cult images in the Renaissance period. While art historical scholarship has regarded images of cult as a medieval phenomenon, more recent studies (Holmes, Pon) address precisely the fact that image cults multiplied in line with the development of new aesthetic principles and theories of art in the context of the humanist circles in early modern Italy. The class challenges the idea of a division between the era of images and that of art as proposed by Hans Belting some 25 years ago. We investigate the emergence of a variety of new types of images made for public cults, such as wall paintings, prints, wooden sculpture, feathers, and their architectural and urban settings. How did the medieval tradition of the icon merge with the scientific and humanistic achievements of the early modern period? Moreover, we will examine the proliferation of cult images from Italy to other parts of Europe and beyond, such as the Americas and Asia, where the conception of new such images drew heavily on indigenous artistic and religious practices. There will be a final paper. Course is co-listed with AS.010.616.
Instructor(s): N. Zschomelidse
Area: Humanities
Writing Intensive.

AS.010.405. Depicting the Invisible God in the Middle Ages. 3.00 Credits.
Discusses conditions of medieval image making and theory. Each meeting focuses on how to represent God in the visual arts and introduces iconographic concepts and their reception.
Instructor(s): N. Zschomelidse
Area: Humanities
Writing Intensive.

AS.010.406. Performance Art in America and Europe: 1909 to Present. 3.00 Credits.
Performance Art has come to occupy a crucial place in histories of twentieth- and twenty-first-century art. Moving chronologically, this course will survey the development of performance as a medium across a range of primarily western historical, political, and social contexts, beginning with experiments in live art undertaken by the Italian Futurists and ending with contemporary practices. As we examine specific artists and movements, we will also explore the intersections between performance and other media; the ways performance artists have engaged questions of politics, race, gender, sexuality, and the relationship between performer and audience; theories of performance and performativity; and the place of performance within broader histories of art. What is performance art, we will ask, and what creative possibilities did it offer its practitioners at different historical moments? Throughout the semester, we will also lend careful consideration to the special problems that attend an investigation of ephemeral and time-based work. How is performance art best exhibited and best preserved? What challenges do time-based works present for the writer and for the historian? And, more basically, how should we approach the study of performance art? through the use of films? photographs? textual documentation? In other words, what exactly is it that we are studying when we turn our attention to performance?
Instructor(s): K. Marksoski
Area: Humanities.
AS.010.407. Ancient Americas Metallurgy. 3.00 Credits.
Centering on a series of case studies, this course addresses the technology, aesthetics, and social significance of metals. We trace the development of metals from 1500 BCE in Chile and Peru, to the 16th century in Colombia and central Mexico, pausing to examine its forms and meanings in various cultural contexts, and the ideas that inform its value. In conjunction with the Baltimore Museum of Art (BMA), the Walters Art Museum (WAM), and the Johns Hopkins Archaeology Museum (JHUAM), students will have access to ancient metal works for study.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.408. Venetian Art and the Mediterranean 1440-1560. 3.00 Credits.
How Venetian art 1450-1580 was informed by the city's unique ecological environment and its status as a nexus of cultural interaction in the Mediterranean. Emphasis on recent scholarship.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.410. The Epistemology of Photography. 3.00 Credits.
This seminar will ask how photography produces ways of knowing: how does photography's reality-effect shape its dissemination and absorption? Is photography’s emergence during the colonial era coincidental or catalytic? How is memory (re)constituted in a photography-saturated world? What kinds of histories does photography encourage and discourage? Is a photograph an object? We will read across disciplines (literature, anthropology, history, history of art, political science, theory) to investigate the epistemology of photography and the photograph.
Instructor(s): R. Brown
Writing Intensive.

AS.010.411. A Continued History of Chinese Painting, 1400-1800. 3.00 Credits.
This course examines Chinese painting between 1400 and 1800, a time when this art emerged as both a practice and a means of cultural analysis within Chinese society. Changes in both representational modes and the forms of art-historical consciousness, as reflected in the art criticism of Chinese literati, will be emphasized. Other topics include the shaping of lived environments through interior display, garden-building, and new visions of urban space.
Instructor(s): L. Liu

AS.010.413. Historical and Conceptual Bases of Art History. 3.00 Credits.
Critical readings in and of relevance to the intellectual foundations of the modern discipline of art history. Texts by Kant, Hegel, Heidegger, Wölfflin, Riegl, Panofsky, Melville, and Derrida, among others. There will be a final paper.
Instructor(s): M. Warnock
Area: Humanities
Writing Intensive.

AS.010.415. Modernism and Postmodernism in Architecture. 3.00 Credits.
"Form forever follows function," "the house is a machine for living in," "less is more," "less is a bore"—when and where did these architectural catch phrases originate, and what did they mean to the people who coined them and attempted to express them in their designs for buildings? In this course we will study the major architectural theories and design trends of the late 19th and 20th centuries in Europe and the United States—a turbulent and complicated period in the history of architecture commonly known as Modernism and Postmodernism. Topics and personalities addressed in this course will include Expressionism, the Bauhaus, Le Corbusier, urbanism, functionalism, and Frank Lloyd Wright.
Instructor(s): M. Perschler
Area: Humanities.

AS.010.419. Passion Cult, Passion Image, Passion Drama. 3.00 Credits.
A set of interdisciplinary explorations of the Passion of Christ theme, viewed as a mythic paradigm within European visual culture, religious consciousness and cultic practice since the High Middle Ages.
Instructor(s): M. Merback
Area: Humanities
Writing Intensive.

AS.010.420. Leonardo da Vinci: Between Art and Science. 3.00 Credits.
This course will explore the life and work of Leonardo da Vinci using an interdisciplinary approach that seeks to create a dialogue between the material more often studied in "traditional" art historical courses (his paintings, drawings, sculptures, architectural designs) and Leonardo's exploration of various scientific subjects (optics, anatomy, engineering, geometry). Students will discover the common intellectual threads that link Leonardo's dizzying array of intellectual pursuits, and why he is often described as the original "Renaissance man." Topics include his designs for a submarine, steam engine, helicopter, tank, parachute, self-propelling wagon, bicycle, as well as more "traditional" art historical subjects including his most famous paintings, from the Mona Lisa to the Last Supper. Open to students from any major or background.
Instructor(s): E. Bernick
Area: Humanities.

AS.010.421. Creating Sacred Space in the Ancient and Medieval World. 3.00 Credits.
What makes a space sacred? How is it different from other spaces? This seminar explores the various means - visual, artifactual, architectural, and performative - of creating sacred space in the ancient and medieval worlds of the Near East and Mediterranean. Possible cases for study include early Sumerian temples, state-sponsored Assyrian temples, votive deposits, Greek sanctuaries, sanctuaries and landscape, early medieval Jewish, Christian, and Islamic cult buildings, cave sanctuaries, pilgrim sites, icons and sacred space.
Instructor(s): M. Feldman
Area: Humanities
Writing Intensive.

AS.010.422. Early Modern Dutch and Flemish Painting. 3.00 Credits.
Explores the major painters and printmakers working in the Netherlands during the sixteenth and early seventeenth centuries: Pieter Brueghel, Jan Gossaert, Pieter Aertsen, Peter Paul Rubens, Jan Steen, Jan Vermeer, and many others.
Instructor(s): M. Merback
Area: Humanities.
AS.010.424. Collecting Roman Art: From Antiquity to Present. 3.00 Credits.
A survey of the most important collections of Greek and Roman sculpture, from the late-Republican age through the Middle Ages and the Renaissance, until the creation of the main museums in Europe and in the United States.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.430. Trans-Mediterranean Visual Culture and the Spanish Empire. 3.00 Credits.
This course focuses on the visual culture and the artistic interconnections among the territories under the global hegemony of the Spanish Empire. Students explore the so-called Spanish Golden Age through the lens of the circulation of ideas, artworks and artists as a practice that significantly shaped Early Modernity. We will navigate and discuss the mutual artistic exchanges between Spain, its American Colonies, its Italian territories (Milan, Naples and Sicily), and its allies (Genoa and Florence), as part of an extraordinarily extended network of political and cultural relationships, across the Mediterranean and beyond. The syllabus includes topics such as: the reception of the Renaissance in Columbus' mudejar [Moorish] Seville; traveling Iberian artists in search of Michelangelo's model; El Greco's Mediterranean; Titian's influence on Velázquez's artistic practice; the visual response to the miraculous catholic images in Latin America, such as the Virgin of Guadalupe, and to the canonization of Rosa of Lima, the first saint of the New World. There will be a final paper.
Instructor(s): F. Loffredo
Area: Humanities.

AS.010.433. Sculpture and the Embodied Viewer. 3.00 Credits.
This seminar serves as an introduction to reading and writing about visual experience. Our primary focus will be on the relationship between embodied viewers and the art of sculpture broadly defined. By exploring the art of sculpture in all of its historical forms, from the ancient to the contemporary we will investigate the experiential and spatial challenges sculpture poses in order to develop the necessary analytic skills for understanding and interpreting the visual arts. We will combine on-site studies of sculptures in local collections (including the Walters Art Museum, the Baltimore Museum of Art, and public works in Baltimore and on campus) with the development of a critical vocabulary with which to write about sculptural objects, one that draws on the critical histories of sculpture from the birth of art history to the present day.
Instructor(s): C. Lakey
Area: Humanities
Writing Intensive.

AS.010.434. Italian Art, Politics, and Religion in the time of Dante, c. 1250-1400. 3.00 Credits.
This seminar will investigates the interrelationship between art, politics, and religion on the Italian peninsula during the later Middle Ages. We will focus on the major cities as patrons of the arts (visual and poetic), e.g. Florence, Siena, Padua, Milan, Naples, Venice, and Rome, in order to understand how the elite used art to further their political and religious agendas. Select topics include: the rise of the Mendicant orders; the importance of Dante's Divine Comedy on manuscript production; artistic competition among communes; the rise of the individual artist; humanism and the arts.
Instructor(s): C. Lakey
Area: Humanities.

AS.010.435. Minimalism in Transnational Context. 3.00 Credits.
Critical examination of arguably the most important crux in post-WWII art, criticism, and theory, with attention to displacements and transformations of Minimalism outside the US. There will be a final paper.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.436. Orientalism and Occidentalism: The Discourse of the Other in the Visual Arts. 3.00 Credits.
This course explores works of art and architecture that reveal or are informed by the long, complex, and often troubled relationship between the West and the Islamic world. Though extending in scope from the early modern period into our own time, the course focuses on the eighteenth and nineteenth centuries, when East-West artistic interactions were arguably at their liveliest and most charged. Topics to be addressed include Ottoman Baroque architecture, Orientalist painting of the nineteenth century, Qajar portraiture and photography, Islamicate architecture at Western world's fairs, and the recent Danish cartoons of the Prophet Muhammad. Students will be encouraged to consider the differences as well as commonalities between these various modes of cross-cultural representation and engagement, and to think critically about the political, cultural, and artistic conditions that engendered and shaped them.
Instructor(s): U. Rustem
Area: Humanities
Writing Intensive.

AS.010.437. New Approaches to Roman Art and Architecture. 3.00 Credits.
The course addresses the new methodologies and avenues of research in the study of Roman art and architecture, and examines their theoretical implications.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.438. Word and Image in Renaissance Italy: Rethinking the Art of Humanism. 3.00 Credits.
This course examines the intersection of intellectual and artistic milieux with case studies from Petrarch to Tasso.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.440. Velázquez and 17th Century Spanish Naturalism. 3.00 Credits.
An introduction to Spanish Baroque painting, with specific attention to the emergence of naturalism in the work of Diego Velázquez, Francisco de Zurbarán, Murillo and Ribera. This course is open to graduate students.
Instructor(s): F. Pereda
Area: Humanities.

AS.010.444. Topics in Postwar European Art. 3.00 Credits.
This seminar examines aspects of artistic production in Western Europe primarily in the period 1950-1972, with an emphasis on the art of France, Italy, the Benelux, and German-speaking countries. How was the work of art reimagined and repositioned in the wake of World War II and the horrors of the Holocaust, in the context of reconstruction and an emerging consumer society, and in light of the Cold War? How did postwar artists conceive the claims of artistic tradition and painting in particular in a rapidly expanding field of aesthetic practices and possibilities? Is there such a thing as "European art," and if so, how does it relate to or mediate among various national identities? These and related questions will be at the heart of our discussions.
Instructor(s): M. Warnock
Area: Humanities.
AS.010.451. The Reception of Roman Art in the Middle Ages and in the Renaissance. 3.00 Credits.
The course investigates the survival of Greek and Roman antiquities in the Middle Ages and in the Renaissance.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.466. Sculpture After Sculpture. 3.00 Credits.
A survey of major theories of sculpture from the mid-Twentieth Century to the present day. Through close readings of critical texts, we will consider the nexuses of debate: late modernism; minimalism; land art and the alleged dispersion of sculpture as an autonomous medium; site-specific and mobile site sculpture; giganticist sculpture; and the resurgence of a conventional sculpture of bodily proportion during the last fifteen years after sculpture as a medium was declared obsolete: a sculpture "after" sculpture. Readings: Writings by Henry Moore, Herbert Read, Clement Greenberg, Michael Fried, Donald Judd, Robert Morris, Robert Smithson, Rosalind Krauss, Yve-Alain Bois, Douglas Crimp, Hal Foster, Alex Potts, Miwon Kwon, and George Baker.
Instructor(s): J. Meyer
Area: Humanities.

AS.010.470. Power and Politics in Assyrian Art. 3.00 Credits.
Assyria, centered in northern Iraq, created one of the world's first great empires that dominated the ancient Near Eastern world from around 900 to 612 BCE. In concert with imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This seminar examines the close relationship between the arts and politics in the Assyrian empire. Some themes that will be explored are: historical narrative, text and image, portable luxury arts and gender, politics and religion. The course will engage in close visual analysis of the ancient materials and readings of critical scholarship.
Instructor(s): M. Feldman
Area: Humanities
Writing Intensive.

AS.010.471. Roman Painting and Sculpture. 3.00 Credits.
This seminar explores Roman wall painting and sculpture tracing their origins, chronological development, subjects, social context, and techniques, and highlighting their influence on European artists from the Middle Ages to the Neoclassical period.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.481. Classics of Art Criticism. 3.00 Credits.
Readings by Diderot, Baudelaire, Fry, Greenberg.
Instructor(s): M. Fried
Area: Humanities.

AS.010.501. Independent Study. 0.00 - 3.00 Credits.
Instructor(s): Staff.

AS.010.502. Independent Study. 0.00 - 3.00 Credits.
Instructor(s): Staff.

AS.010.503. Reading Course in History of Art. 2.00 Credits.
Open to students by arrangement with a faculty advisor in the History of Art Department.
Instructor(s): M. Merback.

AS.010.506. Internship - Spring. 1.00 Credit.
Instructor(s): C. Lakey.

AS.010.507. Internship. 1.00 Credit.
Instructor(s): S. Campbell.

AS.010.521. Honors Thesis. 0.00 - 3.00 Credits.
Open to students by arrangement with a faculty advisor in the History of Art Department. Interested students should review the program description available in the department office.
Instructor(s): Staff
Writing Intensive.

AS.010.522. Honors Thesis. 3.00 Credits.
Instructor(s): Staff
Writing Intensive.

AS.010.596. Internship-Summer. 1.00 Credit.
Instructor(s): E. Rodini; K. Tuma; M. Koortbojian; P. Tucci; R. Brown.

AS.010.597. Independent Study-Summer. 3.00 Credits.
Instructor(s): L. Deleonardis; M. Koortbojian; R. Brown; S. Campbell.

AS.010.600. Looking at Language: Vision and Textuality from Surrealism to the Present.
Considers the emergence of the "written painting" and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Ligon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.

This seminar examines shifting theories of vision in making and perceiving art from species and the Eucharist to Vermeer and the camera obscura.
Instructor(s): C. Fowler
Area: Humanities.

The course explores the significance of the Severan marble plan of Rome and its potential to shed new light on the building program of Septimius Severus and Caracalla.
Instructor(s): P. Tucci.

AS.010.603. The Active Body: On Display and in Performance.
An examination of two recent developments in art history and museum studies: the recognition of the object as active and agentic and a growing critical engagement with the body of the artist and performance art. The seminar will unsettle these two themes with the history of living humans on display, from nineteenth-century exhibitions to present-day craftpeople, thinking through bodies, objects, and performance through disciplinary engagements from anthropology, political theory, art history, and museum studies. Open to motivated undergraduates.
Instructor(s): R. Brown
Area: Humanities.

AS.010.604. The Five Senses and Art in Pre-Modern Europe (1100-1500).
The course investigates the importance of sensation in the creation and perception of Medieval and Renaissance art. Starting from the premise that sensation is a cultural phenomenon, this seminar invites students to rethink the relationship of the visual and the textual to the non-visual and the non-textual. Open to advanced majors in History of Art by permission.
Instructor(s): M. Bagnoli; N. Zchomelidse.
This course examines Chinese painting between 1400 and 1800, a
time when this art emerged as both a practice and a means of cultural
analysis within Chinese society. Changes in both representational modes
and the forms of art-historical consciousness, as reflected in the art
criticism of Chinese literati, will be emphasized. Other topics include the
shaping of lived environments through interior display, garden-building,
and new visions of urban space.
Instructor(s): C. Lakey.

AS.010.606. Sculpture After Sculpture.
A survey of major theories of sculpture from the mid-Twentieth Century to
the present day. Through close readings of critical texts, we will consider
the following nexes of debate: late modernism; minimalism; land art
and the alleged dispersion of sculpture as an autonomous medium;
site-specific and mobile site sculpture; giganticist sculpture; and the
resurgence of a conventional sculpture of bodily proportion during the
last fifteen years after sculpture as a medium was declared obsolete: a
sculpture “after” sculpture. Readings: Writings by Henry Moore, Herbert
Read, Clement Greenberg, Michael Fried, Donald Judd, Robert Morris,
Robert Smithson, Rosalind Krauss, Yve-Alain Bois, Douglas Crimp, Hal
Foster, Alex Potts, Miwon Kwon, and George Baker.
Instructor(s): J. Meyer.

AS.010.607. The Epistemology of Photography.
This seminar will ask how photography produces ways of knowing:
how does photography’s reality-effect shape its dissemination
and absorption? Is photography’s emergence during the colonial
era coincidental or catalytic? How is memory (re)constituted in a
photography-saturated world? What kinds of histories does photography
courage and discourage? Is a photograph an object? We will read
across disciplines (literature, anthropology, history, history of art, political
science, theory) to investigate the epistemology of photography and the
photograph.
Instructor(s): R. Brown.

AS.010.608. The Picture as Object.
This seminar will explore cases of Italian pre-modern picture-making in
various media (painting, metal, stone, textile, etc) that solicit tactile as
well as sensory engagement, and that call into question the Albertian
metaphor of pictura as window. Case studies will include mosaics, reliefs,
pastiglia, medals, portable paintings, and works by Giotto, Carlo Crivelli,
and Sebastiano del Piombo, among others.
Instructor(s): C. Lakey; S. Campbell.

AS.010.609. Art and Science in the Middle Ages.
This course investigates the intersections of art and science from the
Carolingian period through the fourteenth century and the historical role
images played in the pursuit of epistemic truths. Science – from the Latin
scientia, or knowledge – in the Middle Ages included a broad range of
intellectual pursuits into both the supernatural and natural worlds, and
scholars have classified these pursuits in various ways (i.e. experimental
or theoretical science, practical science, scientific, magic, and natural philosophy).
A particular focus of this seminar will be placed on the assimilation of
Greek and Islamic scientific advances in cartography, cosmology, and
optical theory into the Latin theological tradition.
Instructor(s): C. Lakey
Area: Humanities.

AS.010.610. Image, Theory, Matter in Medieval Visual Culture.
This seminar considers the relationship between foundational
approaches to medieval art history and recent methodologies that focus
on ‘thing-signification.’ Primary materials in local collections will be
closely analyzed.
Instructor(s): C. Lakey.

AS.010.611. Selected Topics in Near Eastern Art.
Topics tp be determined.
Instructor(s): M. Feldman.

AS.010.613. Renaissance Italy: Questions of Artistic Geography.
The role of place in the art historiography of the Renaissance, with
readings in geographical theory. The seminar will also consider the role in
the art of Lorenzo Lotto, Gaudenzio Ferrari, Cesare da Sesto, Romanino,
Moretto, Pordenone, Titian, and other artists active before the canon-
formation enterprise of Giorgio Vasari definitively altered the map of
Italian art after 1550.
Instructor(s): S. Campbell.

AS.010.614. Problems in Theory and Method: Reception, Response,
Reflexivity.
Critical exploration of the major models developed by art historians to
describe the forms of attention mobilized by visual imagery, the role
of the beholder in realizing meaning, the dynamics of response, and
the reflexivity of works of art. Intersections with literary history and
theory, phenomenology, and reception-aesthetics will be examined in
tandem with art-historical case studies. Authors include Riegl, Benjamin,
Gombrich, Baxandall, Kemp, Fried, Crary, Bryson, Melville, Husserl, Iser,
Jauss, Merleau-Ponty, Foucault, Barthes, Deleuze and Guattari.
Instructor(s): M. Merback.

AS.010.615. The Reform of the Image in Catholic Europe 1500-1600.
Aspects of the reform of art in Italy and Spain, as manifested in official
attempts to discipline artistic practice and through artistic initiatives;
emphasis on primary sources and recent scholarly debates.
Instructor(s): F. Pereda; S. Campbell.

AS.010.616. The Cult Image in the Renaissance.
This course discusses the role of cult images in the Renaissance period.
While art historical scholarship has regarded images of cult as a medieval
phenomenon, more recent studies (Holmes, Pon) address precisely the
fact that image cults multiplied in line with the development of new
aesthetic principles and theories of art in the context of the humanist
circles in early modern Italy. The class challenges the idea of a division
between the era of images and that of art as proposed by Hans Belting
some 25 years ago. We investigate the emergence of a variety of new
types of images made for public cults, such as wall paintings, prints,
wooden sculpture, feathers, and their architectural and urban settings.
How did the medieval tradition of the icon merge with the scientific and
humanistic achievements of the early modern period? Moreover, we
will examine the proliferation of cult images from Italy to other parts of
Europe and beyond, such as the Americas and Asia, where the conception
of new such images drew heavily on indigenous artistic and religious
practices. There will be a final paper. Co-listed with AS.010.404
Instructor(s): N. Zchomelidse
Area: Humanities.
AS.010.617. Performance Art in America and Europe: 1909 to Present.
Performance Art has come to occupy a crucial place in histories of twentieth- and twenty-first-century art. Moving chronologically, this course will survey the development of performance as a medium across a range of primarily western historical, political, and social contexts, beginning with experiments in live art undertaken by the Italian Futurists and ending with contemporary practices. As we examine specific artists and movements, we will also explore the intersections between performance and other media; the ways performance artists have engaged questions of politics, race, gender, sexuality, and the relationship between performer and audience; theories of performance and performativity; and the place of performance within broader histories of art. What is performance art, we will ask, and what creative possibilities did it offer its practitioners at different historical moments? Throughout the semester, we will also lend careful consideration to the special problems that attend an investigation of ephemeral and time-based work. How is performance art best exhibited and best preserved? What challenges do time-based works present for the writer and for the historian? And, more basically, how should we approach the study of performance art? through the use of films? photographs? textual documentation? In other words, what exactly is it that we are studying when we turn our attention to performance?
Instructor(s): K. Markoski
Area: Humanities.

AS.010.618. Historical and Conceptual Bases of Art History.
Critical readings in and of relevance to the intellectual foundations of the modern discipline of art history. Texts by Kant, Hegel, Heidegger, Wölflin, Riegl, Panofsky, Melville, and Derrida, among others. There will be a final paper.
Instructor(s): M. Warnock
Area: Humanities
Writing Intensive.

AS.010.619. Readings in Modern and Contemporary Asian Art.
Focusing on a range of art practices and movements in South, Southeast, and East Asia from the 20th and 21st centuries. Specific topics may include: performance art and the body, exhibitionary practices, nationalism and transnationalism, the role of the figural, modes of abstraction, art and the authoritarian state, Marxism and art practices, postcolonial politics and visual culture, artists’ travels to, from, and within Asia, spirituality and modernism, sexuality and gender. Undergraduates by special permission of the instructor.
Instructor(s): R. Brown
Area: Humanities.

Beginning with the anti-colonial and popular art of the turn of the nineteenth century, the seminar will address the subcontinent’s participation in modernism, interrelations between high and vernacular art, appropriations of spirituality, critical engagements with sexuality and feminism, and experimentations with film, performance, and new media into the 21st century. Questions related to nationalism, modernity, postcoloniality, religio-political conflict, commercialization, international biennials, and globalization. Note: Course will engage with Raqs Media Collective’s spring campus residency. Seminar is open to motivated undergraduates.
Instructor(s): R. Brown.

AS.010.630. Trans-Mediterranean Visual Culture and the Spanish Empire.
This course focuses on the visual culture and the artistic interconnections among the territories under the global hegemony of the Spanish Empire. Students explore the so-called Spanish Golden Age through the lens of the circulation of ideas, artworks and artists as a practice that significantly shaped Early Modernity. We will navigate and discuss the mutual artistic exchanges between Spain, its American Colonies, its Italian territories (Milan, Naples and Sicily), and its allies (Genoa and Florence), as part of an extraordinarily extended network of political and cultural relationships, across the Mediterranean and beyond. The syllabus includes topics such as: the reception of the Renaissance in Columbus’ mudéjar [Moorish] Seville; traveling Iberian artists in search of Michelangelo’s model; El Greco’s Mediterranean; Titian’s influence on Velázquez’s artistic practice; the visual response to the miraculous catholic images in Latin America, such as the Virgin of Guadalupe, and to the canonization of Rosa of Lima, the first saint of the New World. There will be a final paper.
Instructor(s): F. Loffredo
Area: Humanities.

AS.010.631. Art, Science and Representation in the Middle Ages.
This seminar investigates the relationship between art, science, and theories of representation from the late antique period through the fourteenth century. Select topics include illuminated cosmological and astronomical manuscripts; Islamic cartographers and astrologers at the court of Roger II in Palermo; the rise of optical theory and scientific representation; and the intersection of diagrammatic and mimetic theories of images.
Instructor(s): C. Lakey.

AS.010.635. Minimalism in Transnational Context.
Critical examination of arguably the most important crux in post-WWII art, criticism, and theory, with attention to displacements and transformations of Minimalism outside the US. There will be a final paper.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.636. Orientalism and Occidentalism: The Discourse of the Other in the Visual Arts.
This course explores works of art and architecture that reveal or are informed by the long, complex, and often troubled relationship between the West and the Islamic world. Though extending in scope from the early modern period into our own time, the course focuses on the eighteenth and nineteenth centuries, when East-West artistic interactions were arguably at their liveliest and most charged. Topics to be addressed include Ottoman Baroque architecture, Orientalist painting of the nineteenth century, Qajar portraiture and photography, Islamicate architecture at Western world’s fairs, and the recent Danish cartoons of the Prophet Muhammad. Students will be encouraged to consider the differences as well as commonalities between these various modes of cross-cultural representation and engagement, and to think critically about the political, cultural, and artistic conditions that engendered and shaped them.
Instructor(s): U. Rustem
Area: Humanities.
AS.010.637. Ottoman Baroque and Beyond.
The eighteenth century saw the Ottoman capital of Istanbul transformed by the introduction of a brand-new style of architecture that scholars have dubbed the Ottoman Baroque. Informed, as its name suggests, by Western European models, this new manner of building heralded a permanent shift in late Ottoman visual culture that has been reductively discussed as decadent “Westernization.” This seminar will challenge the conventional wisdom and reconsider the Ottoman Baroque as a timely and sophisticated artistic statement by which the empire reaffirmed its global standing in terms that were both locally rooted and internationally resonant. Topics to be addressed include the semiotics of style; the roles and relationships of patrons, artists, and viewers; architecture as a locus of ceremonial and spectacle; and cross-cultural connections and networks. Although focusing on the architecture of eighteenth-century Istanbul, the seminar will extend into other regions and art forms that demonstrate the impact of the Ottoman Baroque, and it will also consider the style’s afterlife in the context of nineteenth-century Ottoman modernity.
Instructor(s): U. Rustem
Area: Humanities.

Instructor(s): S. Campbell
Area: Humanities
Writing Intensive.

This seminar examines the notion of the authentic in conjunction with medieval images. It investigates the construction, reception, and theoretical grounding of authenticity in regard to reliquaries, icons, and imprints on cloth or seals. These objects elucidate the shift from mimesis towards other artistic strategies (stylization, abstraction, bricolage) in the medieval period. Rather than studying different modes of representation, we will focus on the very validity of representation in the Middle Ages.
Instructor(s): N. Zchomelidse

When (and where) was modernism? Acknowledging the central role art from around the globe played in the production of the modern, this seminar will engage with the emergent art historical, methodological, and theoretical literature shaping the history of modern art after the global turn. Particular case studies of regional art movements (in e.g. Cuba, Brazil, India, Japan, Iran, Nigeria) alongside discussion of key exhibitions and institutions.
Instructor(s): R. Brown.

AS.010.647. Velázquez: Painting and the Paradoxes of Representation.
This seminar will focus on the work of Diego Velázquez (1599-1660). Following a chronological order, it will explore his work as a continuous testing of the limits of truth in painting, beginning in Seville in the 1620’s and concluding with Las Meninas. The seminar will look into the practice and theory of Naturalism in Spain in relation to artistic, religious and scientific discussions of representation in Baroque Europe.
Instructor(s): F. Pereda.

AS.010.649. Mantegna and Bellini: painting and art theory 1450-1500.
Mantegna’s and Bellini’s work will be considered in the context of humanist and antiquarian culture of Padua, Venice and Mantua.
Instructor(s): S. Campbell.

AS.010.651. The Reception of Roman Art in the Middle Ages and in the Renaissance.
The course investigates the survival of Greek and Roman antiquities in the Middle Ages and in the Renaissance.
Instructor(s): P. Tucci
Area: Humanities.

The depiction of visionary experiences is an important and frequent topic in medieval art. This course discusses iconographical and theoretical preconditions for the development of a particularly challenging body of medieval images that range from the visions of Old Testament prophets, to John’s Apocalypse, dreams, and visionary experiences in the context of female monasticism (Hildegard von Bingen, Gertrud von Helfta). Issues covered in this course are: patristic and medieval theories of vision, devotional practices, and the scientific approach towards vision in the later Middle Ages.
Instructor(s): N. Zchomelidse
Area: Humanities.

AS.010.654. Topics in Postwar Abstraction.
Emphasis on European and American case studies from Pollock to the present; figures may include: Newman, Still, Frankenthaler, Louis, Noland, Olitski, Stella, Ryman, Marden, Hantaï, Bishop, Jorn, Uecker, and Klein.
Instructor(s): M. Fried; M. Warnock.

AS.010.655. Religion in Roman Art.
This course explores the relationships between Roman art and religion through a survey of key topics and issues, from the archaic period to late antiquity, providing an introduction into how to use both textual and material evidence as sources for understanding Roman art and society.
Instructor(s): P. Tucci.

AS.010.656. Depicting the Invisible God in the Middle Ages.
Discusses conditions of medieval image making and theory. Each meeting focuses on how to represent God in the visual arts and introduces iconographic concepts and their reception.
Instructor(s): N. Zchomelidse.

How Venetian art 1450-1580 was informed by the city’s unique ecological environment and its status as a nexus of cultural interaction in the Mediterranean. Emphasis on recent scholarship.
Instructor(s): S. Campbell
Area: Humanities.

AS.010.659. Passion Cult, Passion Image, Passion Drama.
A set of interdisciplinary explorations of the Passion of Christ theme, viewed as a mythic paradigm within European visual culture, religious consciousness and cultic practice since the High Middle Ages.
Instructor(s): M. Merback.

AS.010.687. Topics in Postwar European Art.
This seminar examines aspects of artistic production in Western Europe primarily in the period 1950-1972, with an emphasis on the art of France, Italy, the Benelux, and German-speaking countries. How was the work of art reimagined and repositioned in the wake of World War II and the horrors of the Holocaust, in the context of reconstruction and an emerging consumer society, and in light of the Cold War? How did postwar artists conceive the claims of artistic tradition and painting in particular in a rapidly expanding field of aesthetic practices and possibilities? Is there such a thing as “European art,” and if so, how does it relate to or mediate among various national identities? These and related questions will be at the heart of our discussions.
Instructor(s): M. Warnock.
AS.010.689. Seeing Sculpture.
This course explores the art of sculpture in all of its historical forms, from the ancient world to contemporary art, and introduces students to the experiential and spatial challenges sculpture poses. Our focus will combine on-site studies of sculpture in local collections with the development of a critical vocabulary with which to write about those objects, one that draws on the rich history of responses to sculpture from the birth of modern art history to the present.
Instructor(s): C. Lakey
Area: Humanities.

AS.010.700. Subversive Mirrors of Medieval and Renaissance Art and Literature.
This seminar explores the various strategies of subversion employed by European painters, printmakers, and sculptors from c. 1300 to c. 1600: irony and satire, comic inversion and serious play (serio ludere), the grotesque and anti-classical formlessness, carnivalesque folly, inverted worlds, and impossible utopias will all be examined as phenomena of culture and in relation to their parallels and sources in literature. The seminar will culminate in a collaborative workshop with German counterparts from the Technische Universität Dresden, to take place on the Homewood Campus in early May.
Instructor(s): M. Merback
Area: Humanities.

AS.010.705. Dürer & Grünewald.
Recent perspectives on the two most celebrated artists of the German Renaissance, their lives and intersecting careers, their major works, and the shifting tides of reception that ultimately made them representatives of zweierlei deutsche Kunst – opposed models of German art’s epochal achievement.
Instructor(s): M. Merback.

AS.010.706. Pilgrimage: Art and Anthropology.
Research paradigms and problems in the study of Christian pilgrimage, ca. 500-1500, and its relation to prevailing forms of visual culture, popular and elite. Topics include: the historical development of European cult forms and shifting conceptions of sanctity; articulations in the environmental poetics of pilgrimage shrines; case studies of miracle-cycles and votives, portable objects and pilgrimage devotionalia, and works of art thematizing the penitential, experiential, and therapeutic dynamisms of homo viator.
Instructor(s): M. Merback.

AS.010.707. Therapies of Art and Literature in Early Modern Europe.
This seminar examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch’s neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian wisdom genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, innovating therapies that were at once sacramental and philosophical, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.
Instructor(s): M. Merback.

AS.010.720. Roman Art and Archaeology: The Capitoline Hill.
An interdisciplinary seminar on the Capitoline Hill in Rome, with its focus on archaeological and architectural issues, as well as on the legacy of the classical world (from an ideal point of view, but also for what concerns the physical reuse of the memories of the past).
Instructor(s): P. Tucci.

This seminar will concentrate in the artistic production in the time of the Catholic Monarchs (1472-1516). The immigration of Flemish artists, the mechanics of patronage, and the interreligious uses of images will be addressed with a historical perspective.
Instructor(s): F. Pereda

AS.010.733. Evidence in Early Modern Art: Italy and Spain.
This course will analyze the uses of evidence in Early Baroque art at the crossroads of History of Art, Science and Religion. How do images/paintings produce evidence? How does evidence relate to belief? And to skepticism? And how does it affect shifting conceptions of Naturalism? Case studies will include paintings by such artists as Caravaggio, Velázquez, Ribera or Zurbarán.
Instructor(s): F. Pereda
Area: Humanities.

AS.010.751. Writing the Italian Renaissance, Burckhardt to Panofsky.
A critical reading of texts by various thinkers including Alfred Gell, Horst Bredekamp, David Freedberg, Whitney Davis, and David Summers. Open to qualified undergraduates with the permission of the instructor. This course is being co-taught with Jeremy Melius.
Instructor(s): J. Melius; S. Campbell.

Cross Listed Courses

Classics
AS.040.119. The World of Pompeii. 3.00 Credits.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.
AS.040.137. Freshman Seminar: Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum. 3.00 Credits.
This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.150. Island Archeology: Land and Sea in Ancient Crete, Cyprus and the Cyclades. 3.00 Credits.
Islands present highly distinctive contexts for social life. We examine three island worlds of the ancient eastern Mediterranean. These are places where water had a unique and powerful meaning and boat travel was part of daily life, where palaces flourished and contact with other societies implied voyages of great distance. Class combines close study of material and visual culture with consideration of island-specific interpretive paradigms; trips to Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.201. Digging Up the Gods: The Archaeology of Roman Sanctuaries. 3.00 Credits.
This course will explore the major sites of Ancient Italy, such as Rome, Ostia, and Pompeii, from temples to dedications, and their role in religion and society. Cross-listed with History of Art.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.218. Celebration and Performance in Early Greece. 3.00 Credits.
Surviving imagery suggests that persons in Minoan and Mycenaean societies engaged in various celebratory performances, including processions, feasts, and ecstatic dance. This course explores archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions. 3.00 Credits.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.320. Myth In Classical Art. 3.00 Credits.
This course traces the representation of the principal gods and heroes of Greek myth in the visual arts (sculpture and vase-painting), as well as later reflections in Roman painting.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.363. Craft and Craftpersons of the Ancient World: Status, Creativity and Tradition. 3.00 Credits.
This course explores the dynamic work and social roles of craftpersons in early Greece, the eastern Mediterranean and Near East. Readings and discussion will query the identities and contributions of these people—traders, captives, lauded masters, and even children—through topics including gender, class, and ethnicity. Special focus on late third-early first millennia BCE; local field trips.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.366. The Archaeology of Ancient Cyprus: Investigating a Mediterranean Island World in the JHU Museum. 3.00 Credits.
This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.621. Proseminar to Classical Archaeology.
An introduction to research methods and current topics of discussion in the scholarship on Greek and Roman art and archaeology.
Instructor(s): A. Shapiro.

AS.040.655. Attic Hero Cults.
This seminar will combine the evidence of literary and epigraphical sources with archaeological material (votive reliefs, vase iconography) to explore the central role of hero cult in the religious life of ancient Athens. Cross-listed with History of Art
Instructor(s): A. Shapiro.

AS.040.671. Greek Portraiture and Society.
This seminar will explore the development of Greek portrait sculpture from the Early Classical through the Hellenistic periods and the contexts of its display in Greek cities.
Instructor(s): A. Shapiro.

Anthropology
AS.070.300. The Global Artwork. 3.00 Credits.
This course is about art practice in a postcolonial context, where the techniques and pictorial concepts formed by a European history of art are confronted by other traditions of representation, beset by different kinds of political struggles, and posed against the background of religious traditions other than that of Christianity. What problems of history, difference and the self arise in this context, and what forms of art practice emerge to address these problems? In what ways do these forms of art practice draw upon religious traditions, and how do we think about the displacement of religious traditions in modern art? In this course, we will explore these questions by examining the modern art of the Middle East, South Asia, and China, in conjunction with readings from anthropology, art history, comparative literature, philosophy and religious studies.
Instructor(s): S. Al-Bahloy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
Near Eastern Studies

AS.130.213. Introduction to Ancient Egyptian Art. 3.00 Credits.
This class is a combination of illustrated lecture and discussion, punctuated with visits to museums with Egyptian collections. Participants must be able to join at least one overnight trip to New York and/or Boston (weekend) and be available for two half day visits to Philadelphia and Washington, D.C. or elsewhere (TBA as best for participants), in addition to visiting Baltimore institutions with the class as part of the course. Discussion of sculpture will take place in front of the objects, so attendance is important for the visits.
Instructor(s): B. Bryan
Area: Humanities

AS.130.329. Ancient Egyptian Art and Archaeology. 3.00 Credits.
A survey of Egyptian art as seen in the temples, tombs, funerary, and minor arts of Egypt between 3000 and 100 B.C. Slide lectures will provide a survey of art from the Pyramids to Augustus Caesar and will focus on such topics as the principles of Egyptian art; can the term art apply to early Egypt? How were artisans trained and what techniques and materials were utilized in their work? Co-listed (meets with) AS.133.750.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.377. Creating an Egyptian Temple. 3.00 Credits.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art – particularly wall reliefs – in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.420. Seminar in Research Methods in Near Eastern Studies: Text and Image in Ancient Near Eastern Art and Texts. 3.00 Credits.
This writing intensive seminar examines how textual and artistic production were used separately and together to engender and communicate social, cultural, and political meaning in ancient Mesopotamia and the rest of the Near East from the 4th millennium to the Hellenistic period. Using a variety of case studies, students will develop skills in specific research skills such as critical reading, analysis, and interpretation. AS.130.420 is required of NES Majors, but is also open to non-majors who have taken at least one 100-level and one 300-level Near Eastern Civilization course, or with the consent of the instructor.
Cross-listed with History of Art.
Instructor(s): M. Feldman; P. Delnero
Area: Humanities
Writing Intensive.

AS.133.657. Creating an Egyptian Temple.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art – particularly wall reliefs – in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities.

German Romance Languages Literatures

AS.213.369. Dada's Ideologies: Literature, Art, & Politics. 3.00 Credits.
This course will examine the literary and political theories implied in, and encountered by, Dadaist works and praxes. Particular attention will be paid to Dadaist confrontations with the growth of modern mass media, the politics of World War I, and consumerist capitalism in the wake of Taylorism and Fordism. Readings include major Dadaists as well as Althusser, Benjamin, Debord, Gramsci, Irigaray, Lukács, Marx, Saussure, among others.
Instructor(s): J. Pelcher
Area: Humanities.

AS.213.616. The Aesthetic Discourse of Modernity.
When, in 1985, Jürgen Habermas published his lectures on The Aesthetic Discourse of Modernity, he pursued a double aim. He offered a critique of French Theory while at the same time providing a foundation for a normative category of modernity in the tradition of Hegel. Curiously there is one subject he does not touch on, though it seems necessary for a sufficient understanding of modernity: the realm of art and literature. This course will develop a critique of Habermas' normative notion of modernity through re-readings of texts by Nietzsche, Benjamin, Horkheimer/Adorno, Derrida, Bataille and Foucault to elaborate an alternative category of aesthetic modernity. Taught in English. Reading knowledge of German and French is not required, but recommended.
Instructor(s): Staff
Area: Humanities.

AS.214.171. Freshman Seminar: Witchcraft and Demonology in Renaissance Europe. 3.00 Credits.
Who were the witches? Why were they persecuted for hundreds of years? Why were women identified as the witches par excellence? How many witches were put to death? (Answer: 30-40,000, between about 1400 and 1800.) What traits did European witchcraft share with witch-mythologies in other societies? After the witch-hunts ended, how did “The Witch” go from being “monstrous” to being “admirable” and even “sexy”? Answers are found in history and anthropology, but also in literature, folklore, music, and the visual arts. After an introduction to ancient and medieval witchcraft, we will study European witch-persecution between 1400 and 1800. The second half of the course will concentrate on artistic representations of witches in media ranging from manuscripts to movies, concentrating on Italy, France, Spain, and Germany.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.
AS.214.672. Tasso, the Epic & Tradition. Students will achieve deep familiarity with Tasso’s Gerusalemme liberata and Aminta; read selections from Gerusalemme conquistata, Il mondo creato, Tasso’s Dialogues, and his literary-theoretical treatises; survey important texts of Tasso criticism, and sample Tasso’s legacy in poetry and figurative arts. Instructor(s): W. Stephens.

Humanities Center

AS.300.644. Theory, Painting, Vision. Theory, Painting, Vision: Readings to be selected but they will definitely include texts by Barthes, Cavell, Wall, and Michaels. Instructor(s): M. Fried.

Center for Africana Studies

AS.362.208. From Nok to Nsukka: Approaches to the Art of Nigeria. 3.00 Credits. This course provides an introduction to art traditions within Nigeria’s borders; it also explores historiography and the impact of modern nation-building on art history and the development of museum exhibitions. Instructor(s): K. Gunsch Area: Humanities

Program in Museums and Society

AS.389.105. Freshman Seminar: Art in the Museum. 3.00 Credits. Go behind the scenes of local art museums to explore fundamental concepts and social issues particular to the collection and display of art in the past and today. Instructor(s): J. Kingsley Area: Humanities Writing Intensive

AS.389.130. Mini Course: Conservation, An Introduction to Technical Art History. 1.00 Credit. Look through the eyes of a conservator and learn how to answer historical questions by analyzing the physical nature of works of art. Objects examined will include paintings, sculpture and works on paper from the collection of the Baltimore Museum of Art. Class meets 4 times, on February 7, 14, 21 and 28, at the BMA. Syllabus and organizational meeting at JHU on Thursday, January 31, 5:30pm. Instructor(s): T. Primeau Area: Humanities

AS.389.201. Introduction to the Museum: Past and Present. 3.00 Credits. This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered. Cross-listed with History and History of Art. Instructor(s): J. Kingsley Area: Humanities, Social and Behavioral Sciences

AS.389.205. Examining Archaeological Objects. 3.00 Credits. This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art. Instructor(s): S. Balachandran Area: Humanities

AS.389.303. World of Things. 3.00 Credits. This course introduces students to current approaches to objects, their materials, and materiality. Each class starts from a specific inspiration (body parts, fakes, the materiality of ISIS.....) and treats the museum as a site for investigating the relationship between people and things. Instructor(s): J. Kingsley.

AS.389.320. Photographs on the Edge: Ara Güler in Archives of the Smithsonian’s Freer and Sackler Galleries. 3.00 Credits. Work as a curator alongside Smithsonian staff, researching the work of Turkish photographer Ara Güler to develop an exhibit that considers relationships between the history of photography, archives and the museum. Class will travel several times to the Freer and Sackler Galleries in Washington D.C. M&S practicum course. Instructor(s): N. Micklewright Area: Humanities, Social and Behavioral Sciences.

AS.389.340. Critical Issues in Art Conservation. 3.00 Credits. The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology Instructor(s): S. Balachandran Area: Humanities

AS.389.354. Paper Museums: Exhibiting Artists’ Books at the Baltimore Museum of Art. 3.00 Credits. Students work with BMA collection and staff to develop and organize an exhibition of artists’ books. Various aspects of museum work are explored, including research, interpretation, presentation, programming, and marketing. M&S practicum course. Instructor(s): R. Hoisington Area: Humanities.

AS.389.358. Collecting and Cataloging the Contemporary. 3.00 Credits. Students will study, help author catalog of an important Baltimore contemporary art collection. Course alternates meetings focused on theories and practices of art collecting with collection visits and field trips. M&S practicum. Cross-listed with History of Art. Instructor(s): V. Anderson Area: Humanities, Social and Behavioral Sciences Writing Intensive

AS.389.373. Encountering the Art of South Asia: Museum Display, Theory and Practice. 3.00 Credits. Students reconsider the exhibition and interpretation of South Asian Art at the Walters Art Museum to suggest a new permanent display. Class meets at the Walters Art Museum. M&S practicum course. Instructor(s): R. Brown; R. Mintz Area: Humanities.
Major in History of Science, Medicine, and Technology

Offered in cooperation with the Institute of the History of Medicine, this major allows students to combine substantive work in science with study of the social and historical context of modern science, medicine, and technology. The aim of the program is to produce graduates who are scientifically literate and technically competent, and who at the same time understand science and medicine not as static, autonomous enterprises but rather as modes of thought that have developed in specific social contexts.

The major is appropriate for any student planning a career in medicine or other areas of the health care industry. It is also flexible enough to serve as a basis for a variety of careers where an informed knowledge of science and technology and their impact on society is important. Such careers include broad areas of business and industry, journalism, teaching, museum work, and specialized areas of law and public policy.

Requirements for the B.A. Degree

Also see Requirements for a Bachelor's Degree. (p. 10)

- Sciences: Students are required to have a total of 30 credits in science, engineering, and mathematics courses coded (E, N, or Q), of which at least nine credits must be above the 100-level. Laboratory courses in science count toward this requirement. Calculus I is strongly recommended.
- History of Science, Medicine and Technology: A total of 24 credits of course work in the history of science, medicine and technology are required. These must include at least two survey courses and four additional courses above the 100-level.
- Students in their senior year may take graduate courses with permission.
- A minimum grade of C- is necessary in all courses applied toward the requirements of the major and requirements may not be taken satisfactory/unsatisfactory. Each course must be at least 3 credits.

Two Survey Courses (select from the following): * 6

Additional History of Science, Medicine & Technology Courses **

Two history of science, medicine & technology courses at any level 6

Four 200-400 level history of science, medicine & technology courses 12

Science, Math, or Engineering Courses (N, Q, or E)

Nine credits of 200-level or higher N, Q, or E courses 9

Twenty-one credits of N, Q, or E courses at any level 21

Total Credits 54

* Other courses might serve to fulfill the survey course requirement with permission of the director of undergraduate studies.

** The courses AS.140.411 Senior Research Seminar and AS.140.412 Research Seminar may not be used towards this requirement.
A typical program might include the following sequence of courses:

### Freshman

**Honors in the Major**

Students who demonstrate excellence in course work are eligible to write an honors thesis (AS.140.411 Senior Research Seminar and AS.140.412 Research Seminar) in their final year for additional credits. Students must have outstanding recommendations from two department members to be eligible for the thesis. Departmental honors are conferred if a student has a GPA of 3.5 or better in major requirements and receives a grade of A- or better on the thesis.

**Minor in the History of Science, Medicine and Technology**

The department offers a minor which may be combined with other science, social science, or humanities majors. To complete the requirements for the minor, students must have a total of 18 credits in the history of science, medicine, or technology, including at least one survey course. A minimum grade of C- is necessary in all courses applied toward the requirements of the major and requirements may not be taken satisfactory/unsatisfactory. Each course must be at least 3 credits.

### One Survey Course (select from the following):

**Ph.D. in the History of Science and Technology**

The graduate program in the history of science and technology leads to the Ph.D. degree. Although an M.A. degree is granted, candidates who seek only that degree are not ordinarily admitted. The object of the Ph.D. program is to provide the rigorous training necessary for a scholarly career in teaching and research; consequently, the focus of the student’s activity will be the research seminars of the department. Faculty from the Institute of the History of Medicine in the School of Medicine also participate in the program.

**Admission**

Application deadline is January 15. All official supplemental materials (official transcripts, official GRE scores, and, when applicable, official TOEFL scores) should be sent directly to the Graduate Admissions Office at:

Johns Hopkins University
Full-time Graduate Studies in Arts, Sciences, and Engineering
Graduate Admissions Office
Shriver Hall 28
3400 North Charles Street
Baltimore, Maryland 21218

For further information on our faculty and programs, please visit our website at: [http://host.jhu.edu](http://host.jhu.edu).

**Requirements for the Ph.D. Degree**

Before candidates begin full-time research on their dissertations, they must prepare themselves adequately in the appropriate fields of knowledge, become skilled in the techniques of historical research, and be able to carry out a sustained piece of historical analysis and writing.

In the first year of the program students are introduced to the methods and techniques of research and complete a year-long survey course in the history of science or the history of medicine. Students in their second year of study present a research paper to the department. In the second and third years of study, students prepare a field in history and two specialized fields in the history of science, medicine, or technology. The fields are individually arranged and satisfied. The fields entail broad and intensive reading and the passing of a comprehensive examination and/or presentation of a major research paper. Before being admitted for formal candidacy for the degree, the student must also demonstrate a reading knowledge of two foreign languages. The final requirement for
the Ph.D. degree is the completion of a dissertation that is an original contribution to historical knowledge and of a standard suitable for publication.

The History of Science and Technology is by its nature interdisciplinary, and students are encouraged to undertake study in related areas such as history, philosophy, and the natural and medical sciences.

Facilities
The Eisenhower Library and the Welch Medical Library contain about two million volumes, including the special collections of the Institute of the History of Medicine in Baltimore. These research facilities are supplemented by the rare book holdings at Evergreen House, the Pratt Library, and the Peabody Library.

Other important research collections are available to students. In Philadelphia, collections include the Chemical Heritage Foundation, the American Philosophical Society, and the Academy of Natural Sciences. The Hagley Museum and Library’s collections in the history of American science and technology are within easy distance of campus, as are the incomparable holdings of the Library of Congress, the National Library of Medicine, and other governmental agencies in Washington, D.C.

Financial Aid
The department has several graduate fellowships and teaching assistantships. Students may also be eligible for federal financial support through the National Science Foundation. Information on these and other fellowships can be obtained through the fellowship advisor at the student’s college, or from the Fellowship Office of the National Academy of Sciences, National Research Council, Washington, D.C. 20025. In the recent past, doctoral candidates have also won support for their research in the United States and abroad through such sources as the Smithsonian Fellowships, the Fulbright-Hays grants, the Spencer Foundation, and the Deutscher Akademischer Austauschdienst (DAAD) Fellowship.

For current faculty and contact information go to http://host.jhu.edu/people/

Faculty
Chair
Maria Portuondo
Associate Professor: History of science, science and exploration, science and technology in Latin America, early modern Spanish and Latin American Cosmography and geography.

Professors
Robert H. Kargon
Willis K. Shepard Professor of the History of Science: history of physics; science and social change; science in America.

Sharon Kingsland
History of biology, especially ecology, genetics and behavioral biology; science in America.

Stuart W. Leslie
History of technology, history of science-based industry.

Lawrence M. Principe
Drew Professor of the Humanities, history of chemistry and alchemy, early modern science, science and religion.

Assistant Professors
Yulia Frumer
History of science, Japanese history.

Joris Mercelis
History of modern technology, especially technology related to chemical industries.

Affiliated Faculty School of Medicine
Nathaniel C. Comfort
Professor: history of biology, especially genetics, molecular biology, and biomedicine; history of recent science, oral-history and interviewing. Current project: History of human and medical genetics in America.

Mary E. Fissell
Professor: European health care and popular medicine, 17th and 18th centuries; early modern gender and the body.

Jeremy Greene
Elizabeth Treide and A. McGehee Harvey Chair in History of Medicine, Associate Professor: 20th century clinical medicine, therapeutics, pharmaceuticals, global health, history of disease.

Marta Hanson
Associate Professor: history of East Asian Medicine; History of Chinese science and medicine; history of epidemics and disease in China.

Graham Mooney
Assistant Professor: history of public health, 19th and 20th centuries; historical epidemiology; historical demography; disease surveillance and risk.

Randall M. Packard
William H. Welch Professor of History of Medicine: history of disease; public health; and medicine, health, and disease in Africa.

Gianna Pomata
Professor: medieval and Renaissance European medicine; natural history; Italy; history of history and of scholarship.

Daniel P. Todes
Professor: history of Russian medicine and science, social relations of scientific thought, history of biomedical sciences.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.140.105. History of Medicine. 3.00 Credits.
Course provides an overview of the medical traditions of six ancient cultures; the development of Greek and Islamic traditions in Europe; and the reform and displacement of the Classical traditions during the Scientific Revolution.
Instructor(s): S. LeJacq
Area: Humanities, Social and Behavioral Sciences.

AS.140.106. History of Modern Medicine. 3.00 Credits.
The history of Western medicine from the Enlightenment to the present, with emphasis on ideas, science, practices, practitioners, and institutions, and the relationship of these to the broad social context.
Instructor(s): N. Comfort
Area: Humanities, Social and Behavioral Sciences.
AS.140.111. Freshman Seminar: 3.00 Credits.
This Freshmen Seminar explores instances of first contact between different world cultures and western science (16th-20th c.). Some cases considered include Jesuits in the Chinese imperial court, Spanish missionaries and the Maya, etc.
Instructor(s): M. Portuondo
Area: Humanities, Social and Behavioral Sciences.

AS.140.113. Freshmen Seminar: Darwin, Freud, Pavlov: Perspectives on Human Nature. 3.00 Credits.
Instructor(s): D. Todes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.115. Freshman Seminar: Artificial Humans. 3.00 Credits.
Looking at the history of attempts to augment or construct human beings, the course will explore the role of technology in molding human existence and shaping the definition of humanity.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.117. Freshman Seminar: Writing about Science and Medicine. 3.00 Credits.
Scientific literature is not an oxymoron. Doctors and scientists write, sometimes beautifully. How? Why? We will both dissect and emulate classics of this genre and discuss how literary skill can inform both patient care and laboratory practice, and how it can shape the role of science in society. Freshmen Only.
Instructor(s): N. Comfort
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.123. Johns Hopkins: The Idea of a University. 3.00 Credits.
Who was Ira Remsen and why is he interred in the building bearing his name? Was the School of Medicine's best surgeon really a life-long drug addict? This freshman seminar will explore the history of our university since its founding in 1876, including its schools of medicine, public health, nursing, the Applied Physics Laboratory and SAIS. We'll look carefully at the archives and develop a thematic class exhibit. Research and writing intensive.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.129. Freshman Seminar: Johns Hopkins Medicine. 3.00 Credits.
Johns Hopkins medicine has set the standards since the late 19th c. Learn how Hopkins reinvented medical education, public health, and hospital care and meet the people behind the famous names.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.144. Freshmen Seminar: Culture, Communication and Technology. 3.00 Credits.
This seminar traces the evolution and impact of oral transmission, writing, print, photography, film, and electric and electronic media.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.146. History of Public Health in East Asia. 3.00 Credits.
This course examines the history of disease, epidemics, and public health responses in East Asia from the 17th-20th centuries. This public health history emphasizes the interactions, connections, and comparisons among China, Japan, Korea, and Taiwan.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.154. Freshman Seminar: Picture This: A Photographic History of Johns Hopkins University. 3.00 Credits.
Every picture tells a story, if you know how to read it. This freshman seminar will explore the history of Hopkins through images, creating interactive timelines of important themes in the university's history.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.163. Jungle Doctors: Medical Missions in Africa from David Livingstone to Paul Farmer. 3.00 Credits.
Freshman seminar using a variety of primary and secondary sources, students will explore the motivations and activities of expatriates practicing medicine in Africa from the 19th century to the present.
Instructor(s): J. Cummiskey
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.165. Enlightenment Science Through Brilliant Books. 3.00 Credits.
Course explores the brilliant scientific and philosophic achievements of the 18th-century intellectual movement known as the Enlightenment through the reading of a selection of key authors (Voltaire, Franklin, the great Encyclopedists...). Includes introduction to research method and writing in the humanities.
Instructor(s): J. Richard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.213. Topics in Biomedicine. 3.00 Credits.
pWhat are some of the main issues and fields that defined medical research and practice after 1945? What were the new physical, technological, and conceptual tools that defined the postwar era of medicine? How did new technologies and research endeavors configure new ways of diagnosing disease, monitoring patients, and delivering medical care and therapies? As students consider the rise of genetics and genetic therapy and organ transplantation as well as the broad implementation of electronics and digital computers after 1945, they will also consider the cultural, social, ethical, and policy-related implications of these various innovations that make up the rise of biomedicine. One main goal of the course is to give students an historical understanding—at least from the last eighty years—of why medical care and therapeutic possibilities are what they are today.
Instructor(s): N. Anderson
Area: Humanities, Social and Behavioral Sciences.

AS.140.226. Aviation in America. 3.00 Credits.
This course surveys manned flight in America, with particular emphasis on how technological changes and sociocultural events have influenced one another in the development of aircraft.
Instructor(s): L. Karafantis
Area: Humanities, Social and Behavioral Sciences.
AS.140.301. History of Science: Antiquity To Renaissance. 3.00 Credits.
The first part of a three-part survey of the history of science. This course deals with the concepts, practice, and the cultural roles of scientific thought from classical antiquity to the time of Copernicus. Topics include the pre-Socratics, the systems of Plato and Aristotle and their continuing influence, Islamic science, Latin medieval scholasticism and the universities, and Renaissance hermeticism/natural magic. Interactions across science, art, technology, and theology are highlighted.
Instructor(s): L. Principe
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.302. Rise of Modern Science. 3.00 Credits.
Survey of major scientific advances from 18th to 20th century, from Newtonian science to the age of Big Science.
Instructor(s): J. Mercelis
Area: Humanities, Social and Behavioral Sciences.

AS.140.304. Medicine for and by Women in Early Modern Europe. 3.00 Credits.
This course will examine women’s role in early modern European medicine through the reading of early modern medical texts written for or by women. The course is meant for students interested in women’s history, the history of medicine, European history.
Instructor(s): G. Pomata
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.305. From the Compass to Androids: History of Science, Technology, and Medicine in Asia. 3.00 Credits.
The course explores the history and cultural context of science, medicine, and technology in East Asia, from the ancient Chinese science to the latest scientific and technological developments in Japan.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences.

AS.140.306. Science And Religion. 3.00 Credits.
Science and religion are crucial influences on Western culture. This course examines their interrelations during the past 2000 years, including the Athens-Jerusalem debate, medieval theology, the Galileo affair, evolution, and current issues.
Instructor(s): L. Principe
Area: Humanities, Social and Behavioral Sciences.

AS.140.311. Ecology, Health, and the Environment. 3.00 Credits.
Explores historical and current problems relating to the environment and human health, with emphasis on the Chesapeake region and Baltimore. Students write research papers.
Instructor(s): S. Kingsland
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.315. Spaceflight and Society: Exploring the History of the Final Frontier. 3.00 Credits.
This course explores the history of spaceflight, emphasizing its civil component, but also including national security and commercial activities, and the interactions among all components of spaceflight around the world.
Instructor(s): R. Launius
Area: Humanities, Social and Behavioral Sciences.

AS.140.320. Modernity on Display: Technology and Ideology in the Era of World War II. 3.00 Credits.
Seminar focuses on ideological at World’s Fairs over technological modernity with special emphasis upon World War II and the Cold War.
Instructor(s): A. Molella; R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.321. Scientific Revolution. 3.00 Credits.
Explore how the Western understanding of nature changed between 1500 and 1720 through the works of astronomers and astrologers, naturalists and magi, natural philosophers and experimentalists, doctors and alchemists & others.
Instructor(s): L. Principe
Area: Humanities, Social and Behavioral Sciences.

AS.140.324. Commercializing Science: Academic Entrepreneurs from Kelvin to Venter. 3.00 Credits.
From the nineteenth-century physicist William Thomson (Lord Kelvin) to contemporary geneticists such as Walter Gilbert and Craig Venter, academic scientists and engineers across a broad range of disciplines have created their own companies. This course examines the motives behind these entrepreneurial ventures, the strategies employed, and the factors influencing their success.
Instructor(s): J. Mercelis
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.327. Science and Utopia. 3.00 Credits.
Seminar examines the changing role of science in planning the ideal community from the 17th century to the present. Readings include works by Campanella, Bellamy, H.G. Wells, Orwell, B.F. Skinner and Walt Disney.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.328. Science and Technology in Slave Regimes. 3.00 Credits.
What does science and technology look like in slave regimes? This seminar explores this question from a trans-national perspective by comparing cases in the Antebellum US, Cuba, Brazil and other countries.
Instructor(s): M. Portuondo; R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.331. Mind, Body and Society: The History of Psychology. 3.00 Credits.
We will explore various modern approaches to the relationship of mind, body and society; to the nature of scientific psychology and its relationship to human values.
Instructor(s): D. Todes
Area: Humanities, Social and Behavioral Sciences.

AS.140.333. The Idea of the Artificial Human in History. 3.00 Credits.
Course examines the concept of the artificial human as a mirror of changing world-views from late middle ages through the twentieth century. Readings include Mary Shelley, Wells, Capek, Piercy.
Instructor(s): R. Kargon
Area: Humanities, Social and Behavioral Sciences.

AS.140.343. What it Means to be Human: Perspectives in the History of Anthropology, 1860-1995. 3.00 Credits.
This course explores the changing scientific, social, and cultural ideas that shaped how anthropologists and other scholars approached the study of human beings from the mid-nineteenth through the twentieth centuries.
Instructor(s): A. Link
Area: Humanities, Social and Behavioral Sciences.
AS.140.344. Rejected Knowledge? Alchemy and Astrology in Early Modern European Science and Medicine. 3.00 Credits.
This course surveys the rise and fall of alchemy and astrology in early modern Europe. Topics include chemical and astrological medicine, prognostication, and the quest for the Philosopher’s Stone.
Instructor(s): J. Rivest
Area: Humanities, Social and Behavioral Sciences.

AS.140.345. Animal Minds: Beyond the Black Box. 3.00 Credits.
How do migratory birds and fish find their way home? Do honeybees communicate using a “dance language”? Do chimpanzees have mental lives akin to those of human beings? How do scientists attempt to answer such questions, and why was the “animal mind” a taboo for over 50 years in American science? Focusing on ethology and psychology from Darwin to the present, this course examines the history of the study of animal cognition and behavior. A major emphasis throughout the course will be on the question of animal consciousness from the late-19th through the 20th century.
Instructor(s): R. Nash
Area: Humanities, Social and Behavioral Sciences.

AS.140.346. History of Chinese Medicine. 3.00 Credits.
Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.347. History Of Genetics. 3.00 Credits.
Intellectual and social history of the gene concept, including Mendelism, eugenics, medical genetics, DNA, genomics, and personalized medicine.
Instructor(s): N. Comfort
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.350. Disability in 20th century America: Rights, Restrictions, Reproduction. 3.00 Credits.
Is disability a biological fact or determined by culture? This class discusses different ideas of difference in the context of disability rights, professional power, reproductive technology and bioethics. Cross-listed with Studies of Women, Gender, and Sexuality.
Instructor(s): M. Schmidt
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.352. Who Wants to be a Billionaire?: High Tech & the American University. 3.00 Credits.
Long before Facebook, faculty and students were creating startups on campus. This course examines college entrepreneurship from its 19th-century origins to today: the potential perils, profits, and promise for entrepreneurs and universities alike.
Instructor(s): S. Morris
Area: Humanities, Social and Behavioral Sciences.

AS.140.353. Women, Health, and Medicine in Modern America. 3.00 Credits.
This course explores women’s interactions with science, medicine, and health in the late-19th and 20th century United States. It is framed by an interest in medicalization, sex/gender, and feminism. Cross-listed with Studies of Women, Gender, and Sexuality.
Instructor(s): D. Stillwell
Area: Humanities, Social and Behavioral Sciences.

AS.140.354. Science, Technology and Society in Modern East Asia. 3.00 Credits.
The course aims to survey the history of science and technology in East Asian countries—China, Japan and Korea—since the late 19th century. Since Japan was the only nation in East Asia that succeeded in modernizing itself by adopting western science, technology and politics, it will be studied first. The Chinese and Korean cases then will be reviewed from different angles. The course will emphasize the mutual influence between science & technology and society to answer how they became major industrial powers in the 21st century. Cross-listed with East Asian Studies.
Instructor(s): D. Kim; Y. Li
Area: Humanities, Social and Behavioral Sciences.

AS.140.355. History of Modern Astronomy: Expanding Universes and Space Telescopes. 3.00 Credits.
Astronomy today, in its tools, techniques, practices and tempers, bears little resemblance to astronomy in 1900. This course will cover how scientists expanded the universe in the past century and how the universe of astronomical practice expanded as well: as a profession, as an avocation, and as a cultural resource.
Instructor(s): D. DeVorkin
Area: Humanities, Social and Behavioral Sciences.

AS.140.357. Science Fiction Movies in the East and West. 3.00 Credits.
What is a science fiction (SF) movie? How did SF movies and developments in science and technology influence each other during the twentieth century? What is the use of SF movies for societies? And why are SF movies much more popular in some countries than in others? By watching and analyzing classic and contemporary SF movies from the US, the Soviet Union, Japan, China, and other countries, we will search for answers to these questions. Special emphasis will be given to analyzing how historical, political, and cultural environments in different countries have influenced the production and acceptance of SF movies.
Instructor(s): D. Kim
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.362. The Communications Revolution. 3.00 Credits.
Investigates the nature and impact of phenomenal changes in transportation and communication since the 19th-century, including iconic developments such as the Panama Canal, Brooklyn Bridge, airplanes, automobiles, television, wireless communication and the internet.
Instructor(s): S. Morris
Area: Humanities, Social and Behavioral Sciences.

AS.140.365. From Colonial to Global Health: Health, Healing and European Expansion, 1500-1950. 3.00 Credits.
This course traces the impact of European expansion on health, medicine and disease control from the Age of Exploration to the emergence of international and global health in the early twentieth century. Dean’s Teaching Fellowship course.
Instructor(s): K. Arner
Area: Humanities, Social and Behavioral Sciences Writing Intensive.
AS.140.368. Technological Transformations. 3.00 Credits.
Course explores the historical development of revolutionary technologies and their transformations of the individual and society. Focus on computing, biotech, consumer goods, warfare, manufacturing, agriculture, imaging, energy, transportation, and sustainability.
Instructor(s): M. Portuondo
Area: Humanities, Social and Behavioral Sciences.

AS.140.370. History of Mental Illness and Psychiatry in Modern West. 3.00 Credits.
This course will be an introduction to the history of madness in modern Europe and America. In particular, it will examine the ideas that have shaped perceptions of madness, insanity, and mental illness; the changing experiences of those afflicted, the development of those professions designed to look after those deemed mad, insane, and mentally ill; and the social and cultural assumptions behind treatments, policies, and public opinions.
Instructor(s): J. Ballenger
Area: Humanities, Social and Behavioral Sciences.

AS.140.371. The History of Forensic Medicine: Medicine and the Law in Western Society, 1500-2000. 3.00 Credits.
This course explores the history of forensic medicine from some of its earliest roots to the present day, investigating everything from witchcraft trials to DNA profiling.
Instructor(s): S. LeJaqc
Area: Humanities, Social and Behavioral Sciences.

AS.140.376. A Second World Within the World of Nature: The History of Geographic Thought. 3.00 Credits.
This course traces the development of the science of geography from antiquity through the mid-nineteenth century. Readings explore the legal, political, cultural and theological resonances of geography during this period.
Instructor(s): M. Franco
Area: Humanities, Social and Behavioral Sciences.

AS.140.379. Health and the City: Urban Public Health in Historical Perspective. 3.00 Credits.
This course examines the history of cities as spaces of public health concern since the nineteenth century, and seeks to understand how social, political, and economic contexts have shaped urban public health interventions.
Instructor(s): E. Anders
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.381. History of Reproduction. 3.00 Credits.
This course investigates the history of reproduction in American medicine, science, politics, and culture. It explores changing ideas about reproductive bodies, sexuality, and the family as well as practices of contraception, conception, and childbirth.
Instructor(s): B. Gurtler
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.382. Plagues and Societies in World History. 3.00 Credits.
This course examines some of the most notable epidemics in world history from the Black Death to Ebola in 2014. Topics include the origins of epidemic diseases; the relations between epidemics and warfare, empires, and trade; and the sociocultural underpinnings of disease response.
Instructor(s): K. Arner
Area: Humanities, Social and Behavioral Sciences.

AS.140.390. Science and Technology in Latin America. 3.00 Credits.
The course surveys the development of western science and technology in Hispanic America (1492 to the present). We begin studying the hybridization of scientific practices between European and Native American cultures during the early colonial era and end with the transfer of technologies and industrialization of the 20th century. We emphasize the role on science and technology in state formation, the acculturation of foreign ideas in colonial and postcolonial societies, and the role of intellectual elites in modernization programs.
Instructor(s): M. Portuondo
Area: Humanities, Social and Behavioral Sciences.

AS.140.398. Godzilla and Fukushima: Japanese Environment in History and Films. 3.00 Credits.
Juxtaposing Japanese environmental history and its reflection in popular media, the course will explore the intersection between technology, environment, and culture. The course will be accompanied by relevant movie screenings.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.411. Senior Research Seminar. 2.00 Credits.
Departmental Majors Writing a Senior Thesis Only
Instructor(s): R. Kargon; S. Kingsland
Area: Humanities, Social and Behavioral Sciences.

AS.140.412. Research Seminar. 2.00 Credits.
Instructor(s): M. Portuondo; S. Kingsland
Area: Humanities, Social and Behavioral Sciences.

AS.140.413. The White Plague: History of Tuberculosis. 3.00 Credits.
Examination of interrelated scientific, medical, social, and cultural dimensions of tuberculosis from early modernity to the present in various geographical and cultural settings. Extensive reading, research based on primary sources. Juniors and Seniors only. Instructor's permission for all others. Cross-listed with History and Anthropology.
Instructor(s): D. Todes
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.425. Individualized Medicine from Antiquity to the Genome Age. 3.00 Credits.
A seminar for graduate students and advanced undergraduates. We will explore the notion of the individual in medicine over 25 centuries, from the Hippocratics to the invention of the case study during the Renaissance to the genetic, biochemical, and immunological individual in recent biomedicine. Recommended Course Background: AS.140.105, AS.140.106
Instructor(s): G. Pomata; N. Comfort
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.445. Mixing It Up: Interdisciplinarity in Science. 3.00 Credits.
Many landmark discoveries in science, such as the discovery of the double helix, were achieved through an interdisciplinary approach. Our course explores how institutions of research and education have advanced science through the promotion of interdisciplinarity. Case studies examine important problems in physical and biological sciences whose solutions required interdisciplinary approaches. Research paper required.
Instructor(s): R. Kargon; S. Kingsland
Area: Humanities, Social and Behavioral Sciences.
Instructor(s): L. Principe. 
Reading knowledge of French required. 
Participants will write a paper or dissertation chapters for discussion.

AS.140.655. Early Modern Science in France.
This seminar examines 17th- and 18th-century French science and medicine and their social, political, and institutional contexts. Participants will write a paper or dissertation chapters for discussion. Reading knowledge of French required.
Instructor(s): L. Principe.

AS.140.659. Looking Back at Science of Tomorrow.
The course will look at the history of science through the lens of science fiction, and explore the role of scientific imagination in the development of sciences.
Instructor(s): Y. Frumer.

AS.140.662. Research Seminar in the History of Science: The Laboratory in Theory and Practice since the 17th century.
This seminar traces the evolution and impact of the laboratory in the natural and social science 1600-2000.
Instructor(s): L. Principe; R. Kargon.

AS.140.663. Crossing Boundaries: Studies in Comparative History.
Course takes a comparative look at how scientific ideas, practices, methods, technologies are translated across disciplinary, institutional, and national borders.
Instructor(s): R. Kargon; S. Kingsland.

AS.140.667. Special Topics in the History of Physics.
This seminar will focus upon the history of electromagnetism, heat and energy, mechanics and the transition to modern physics, 1800-1920.
Readings, discussion, papers.
Instructor(s): R. Kargon.

AS.140.668. Technology in Context.
The course will explore topics in the history of technology focusing on a variety of methodologies pertinent to the subject.
Instructor(s): J. Greene; Y. Frumer.

AS.140.669. Special Topics in the History of the Physical Sciences.
This seminar will focus upon the history of the physical sciences.
Readings, discussion, papers.
Instructor(s): R. Kargon.

AS.140.670. Special Topics in the History of Physics in Higher Education.
This seminar will focus upon the history of the establishment of physics in US higher education 1870-1940. Readings, discussion, papers
Instructor(s): R. Kargon.

AS.140.673. The Modern Synthesis in Historical Perspective.
Research seminar in history of evolutionary biology
Instructor(s): S. Kingsland.

AS.140.674. Science and Medicine in Early Modern Atlantic World Culture.
How were changes in scientific and medical ideas reflected in cultural products of the early modern Atlantic world? We will study these ideas as they appeared in literary genres such as poetry, utopias, natural histories and travel narratives. Likewise, we will examine the visual culture of the Atlantic space for clues about changing conceptions about the natural world. Our expedition will encompass Anglophone, French and Hispanic regions, and will pay careful attention to hybrid cultural products that reflect the interaction between indigenous cultures and the (changing) European understanding of the natural world.
Instructor(s): M. Portuondo.

AS.140.705. History of Science: Antiquity To Renaissance.
The first part of a three-part survey of the history of science. This course deals with the concepts, practice, and the cultural roles of scientific thought from classical antiquity to the time of Copernicus. Topics include the pre-Socratics, the systems of Plato and Aristotle and their continuing influence, Islamic science, Latin medieval scholasticism and the universities, and Renaissance hermeticism/natural magic. Interactions across science, art, technology, and theology are highlighted.
Lecture meets with AS.140.301
Instructor(s): L. Principe.
Seminar on major scientific developments from 18th-20th century.
Weekly readings, discussion and class presentations. Students may attend lectures for 140.302.
Instructor(s): J. Mercelis; R. Kargon; S. Kingsland.

AS.140.710. Scientific Revolution.
Reading intensive seminar that studies the events and ideas that transformed western science from Medieval natural philosophy to the experimental sciences (1500-1720s). Lecture meets with AS.140.321.
Instructor(s): L. Principe.

Instructor(s): R. Kargon.

AS.140.802. Directed Readings & Diss.
Instructor(s): R. Kargon.

AS.140.803. Independent Study-Summer.
Instructor(s): S. Kingsland.

Instructor(s): S. Kingsland.

AS.140.812. Directed Readings & Diss.
Instructor(s): S. Kingsland.

Instructor(s): S. Leslie.

AS.140.832. Directed Readings & Diss.
Instructor(s): S. Leslie.

Instructor(s): L. Principe.

AS.140.836. Directed Readings & Diss.
Instructor(s): L. Principe.

Instructor(s): M. Portuondo.

AS.140.842. Directed Readings & Diss.
Instructor(s): M. Portuondo.

AS.140.843. Directed Reading & Dissertation.
Instructor(s): Y. Frumer.

AS.140.844. Directed Reading & Dissertation.
Instructor(s): Y. Frumer.

Instructor(s): J. Mercelis.

Instructor(s): R. Packard.

AS.140.854. Directed Readings & Diss.
Instructor(s): R. Packard.

AS.140.863. Directed Reading and Dissertation.
Instructor(s): G. Pomata.

AS.140.864. Directed Readings and Dissertation.
Instructor(s): G. Pomata.

Instructor(s): N. Comfort.

AS.140.874. Directed Readings & Diss.
Instructor(s): N. Comfort.

Instructor(s): M. Hanson.

AS.140.876. Directed Reading & Dissertation.
Instructor(s): M. Hanson.

AS.140.877. Directed Reading & Dissertation.
Instructor(s): J. Greene.

AS.140.878. Directed Readings and Dissertation.
Instructor(s): J. Greene.

Instructor(s): D. Todes.

AS.140.892. Dir Rdg & Dissertation.
Instructor(s): D. Todes.

Instructor(s): M. Fissell.

AS.140.894. Directed Readings & Diss.
Instructor(s): M. Fissell.

Instructor(s): G. Mooney.

AS.140.896. Directed Readings & Diss.
Instructor(s): G. Mooney.

Cross Listed Courses

History of Art

AS.010.233. Art and Astrology in the Middle Ages. 3.00 Credits.
This course explores the relationship between art and astrology from the early Middle Ages to the early Renaissance. We look at a wide range of media—mosaic, painting, metalwork, manuscripts, and sculpture—that speak to the central place of astrology in medieval systems of knowledge, and the practical uses of astrology for medicine and politics. Readings and discussions cover a variety of themes, including the transmission of astrological knowledge, the emergence of large-scale astrological mural programs, the use of precious stones and amulets, and the ways in which artworks probe the tensions between astrology and Christian theology. A recurring topic will be principle of “celestial influence”—the idea that the stars emit rays that affect people and events on earth—and its implications for artistic production and reception, as well as how art objects could even predict, or represent predictions of, future events. Primary sources (in English translation) include Albertus Magnus, Abu Ma’shar, al-Kindi, Roger Bacon, and others. Secondary readings include Aby Warburg, Erwin Panofsky, Fritz Saxl, Michael Camille, Georges Didi-Huberman, and others.
Instructor(s): M. Hauknes
Area: Humanities.
AS.010.302. The World as Image: Art and Knowledge in the Middle Ages. 3.00 Credits.
This class will explore the relationship between art and knowledge in the Middle Ages (600-1400 CE). In particular, we will examine the ways in which medieval painters, sculptors, and architects engaged with the cultural phenomenon of "encyclopédism" by creating artworks that sought to capture all the world’s knowledge in a single visual program. In our exploration of this topic we will consider a wide range of works, from medieval maps and scientific manuscripts to large-scale tapestries and the architectural programs of the great Gothic cathedrals. Central themes include text-image relationships and the role of pictorial techniques, such as allegory, personification, and analogy for visualizing complex ideas. We will also examine the representation of knowledge in medieval poetry and see how medieval authors employed ekphrasis to create visual artworks within their texts to serve as placeholders for encyclopedic learning.
Instructor(s): M. Hauknes
Area: Humanities.

AS.010.420. Leonardo da Vinci: Between Art and Science. 3.00 Credits.
This course will explore the life and work of Leonardo da Vinci using an interdisciplinary approach that seeks to create a dialogue between the material more often studied in "traditional" art historical courses (his paintings, drawings, sculptures, architectural designs) and Leonardo’s exploration of various scientific subjects (optics, anatomy, engineering, geometry). Students will discover the common intellectual threads that link Leonardo’s dizzying array of intellectual pursuits, and why he is often described as the original “Renaissance man.” Topics include his designs for a submarine, steam engine, helicopter, tank, parachute, self-propelling wagon, bicycle, as well as more “traditional” art historical subjects including his most famous paintings, from the Mona Lisa to the Last Supper. Open to students from any major or background.
Instructor(s): E. Bernick
Area: Humanities.

AS.010.707. Therapies of Art and Literature in Early Modern Europe. 3.00 Credits.
This seminar examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch’s neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian wisdom genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, innovating therapies that were at once sacramental and philosophically, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.
Instructor(s): M. Merback
Area: Humanities.

Anthropology
AS.070.352. Evolution, Ecology, Becoming. 3.00 Credits.
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orient anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.610
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

Co-listed with AS.070.352
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies
AS.130.259. Ancient Science and Technology. 3.00 Credits.
A survey of scientific practices and technological innovations in the ancient world, including astronomy, medicine, law, and divination. Special attention will be devoted to the relationship between magic and science during the periods covered.
Instructor(s): P. Delnero
Area: Humanities, Social and Behavioral Sciences.

Political Science
AS.190.471. The University and Society. 3.00 Credits.
In the 20th century, American universities became the envy of the world, leading in most categories of scholarly productivity and attracting students from every nation. In recent years, though, American higher education has come to face a number of challenges including rapidly rising costs, administrative bloat, corporatization and moofication. We will examine the problems and promises of American higher education, the political struggles within the university and the place of the university in the larger society. Upper classes and Grad Students only.
Instructor(s): B. Ginsberg; R. Kargon
Area: Social and Behavioral Sciences.

German Romance Languages Literatures
AS.211.237. Literature and Medicine. 3.00 Credits.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s In the Cold and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: Philadelphia (Jonathan Demme, 1993), Melancholia (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.
AS.213.237. Literature and Medicine. 3.00 Credits.

Instructor(s): E. Strowick
Area: Humanities, Social and Behavioral Sciences.

Humanities Center
AS.300.228. Brain and Society. 3.00 Credits.
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neuropsychology, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.

East Asian Studies
AS.310.303. A World Upturned: Cultures of Catastrophe in Japan. 3.00 Credits.
Focusing on earthquake science and earthquake lore, radioactive mutation and nuclear decimation, this course will consider the relationship between technological culture and large-scale cataclysm. In addition to treating a broad array of written, graphic, and filmic representations of Japan’s past and potential catastrophes, we will also be keeping a close and careful eye on present developments in Japan’s 2011 earthquake/tsunami/nuclear disaster.
Instructor(s): R. Sayre
Area: Humanities, Social and Behavioral Sciences.

Program in Museums and Society
AS.389.275. Interpreting Sites & Collections: An Introduction to Museum Education. 3.00 Credits.
Part public history, part introduction to museum practices, this hands-on course explores how heritage areas and museums serve communities through interpretation. Each year, students partner with a community to develop research-based, visitor-centered interpretive material, in the 2015 Baltimore National Heritage Area. Field trips and community meetings will be a significant part of the course. Cross-listed with History and History of Science. M&S practicum course. Class usually meets 1:30 - 3:50 except for days with field trips.
Instructor(s): E. Maloney
Area: Humanities, Social and Behavioral Sciences.

AS.389.301. Curating Material Culture for the Digital Age. 4.00 Credits.
JHU pioneered the concept of the modern research university in the United States, but what does that mean for the everyday experiences of its students, faculty, staff and friends? Excavate the history of this place through the things collected, made and used here since the university’s founding in 1876. Students research the material culture of Hopkins and present their findings on an interactive website: collectionsweb.jhu.edu. Course includes digital media labs. Cross-listed with History and History of Science. M&S practicum.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.450. Readings in Material Culture. 3.00 Credits.
Objects, things, stuff- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

AS.389.650. Readings in Material Culture.
Objects, things, stuff- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

Humanities Center
http://humctr.jhu.edu/

The Humanities Center reflects a characteristic quality of Johns Hopkins University as an intellectual community. The coordinated study of Western civilization through its literature, art, philosophy, and history has been one of the oldest continuing concerns at Hopkins. Because it has remained by design and tradition the smallest of the major American universities and because of the interdisciplinary interests of some of its most distinguished faculty, Hopkins has fostered to a remarkable degree the free exchange between scholars and students across departmental boundaries. In addition to its programmatic concern with comparative literature, intellectual history, and feminist theory, the Humanities Center does much to coordinate such exchange, which it encourages among students and scholars at all levels of their careers.

Supplementing its regular course offerings, the Humanities Center from time to time sponsors conferences, colloquia, and short-term seminars on topics of special interest to its graduate students and to the intellectual community at large. The center is also responsible for publishing annually the Comparative Literature issue of MLN; graduate
students may apply to work as editorial assistants in its production and are invited to contribute to its reviews of current publications.

A recent development has been the appointment of several distinguished scholars as associates of the Humanities Center for terms of variable length. Each associate visits the campus once a year to teach an intensive seminar open to graduate students (and in certain cases to advanced undergraduates) in the Humanities Center as well as in other departments. The associates also meet informally with interested students and faculty and in general play an active role in the intellectual life of the university.

The Humanities Center’s activities for undergraduates address two different needs. For students interested in a general liberal arts preparation or one of the university’s preprofessional programs, the Center provides a broad introduction to the documents and thought of Western culture. For freshmen the Center offers the Great Books at Hopkins course, as well as a variable array of courses taught by the Center’s faculty. For students interested in preparing for graduate school, the Center also offers a fundamental preparation geared to the individual’s specific talents that can be the basis for more specialized humanistic study at the graduate level. Qualified juniors and seniors, as well as sophomores planning to study abroad in their junior year, are provided the opportunity to pursue an independent and often interdisciplinary research project through the Honors Program. In either case, the Center stresses skill in critical reading and writing, sophistication in the use of research tools, and supervised independent study. The coherence of each individual’s program depends upon careful consultation with the faculty advisor.

The Humanities Center does not offer a departmental major.

**Honors Program in the Humanities**

The Humanities Center Honors Program was initiated in 1976, the centennial of the founding of Johns Hopkins University. The program offers all qualified undergraduates the possibility of pursuing an independent and often interdisciplinary research project in the junior and senior year. Students can propose a topic in any humanistic discipline, including intellectual or cultural history, English and comparative literature, women and gender studies, minority literature and culture, film studies, anthropology, philosophy, and others. Past topics have also examined points of intersection between the arts and the sciences, so that the Honors Program in the Humanities also give majors outside the humanities a chance to broaden and combine their studies.

**Requirements**

To be eligible, a student’s performance in courses taken in the humanities, and particularly in the chosen field(s) of study, should be distinctly above average, and the proposed topic should show coherence, focus, and seriousness of purpose. Each project must be sponsored by two faculty members, one of whom will be the primary advisor. In appropriate cases, one of these sponsors may be external to the university. Successful completion of the Honors Program is conditional on completion of the student’s research thesis and participation in the Honors Seminar for two years, the second of which must be the student’s senior year.

**Application process**

This is a two-year program normally beginning in the junior year, with applications accepted in the spring semester of the sophomore year. Second-semester freshmen who plan to study abroad in their junior year or who already possess the necessary qualifications are also encouraged to apply. Applications can either be submitted by email to yi.ping.ong@gmail.com or submitted in hard copy to Yi-Ping Ong in Gilman Hall 213. All applications should include:

1. A completed application form, including the name of at least one faculty member the student plans to work with
2. Brief statement of purpose outlining the proposed thesis topic, with initial bibliography
3. Unofficial transcript of undergraduate course work

**Required Course Work**

**Sophomore year (optional)**

It is recommended that sophomores who plan to study abroad in their junior year, as well as those who are ready to begin their honors research, should consider participating in the Honors Seminar during their sophomore year. In general, such students should follow the course work as described below for the junior year.

**Junior year**

1. Two courses chosen from relevant offerings in the Humanities Center curriculum. Students’ work will be based on undergraduate courses offered by the core faculty of the Humanities Center and the course offerings of faculty with joint appointments in the Humanities Center.
2. A year-long Honors Seminar for all students in the program, in which the general progress of the students’ writing and research will be discussed and senior students will present work-in-progress reports. The seminar meets once every two weeks and participation is mandatory for all students enrolled in the Honors Program.
3. Optional independent study course on thesis project with one or both sponsors.

**Junior agenda**

- September-October: Students should identify and meet with a prospective faculty advisor. Two faculty advisors are required for the final thesis; at least one of these advisors must be a Humanities Center faculty member or affiliate. Once students have received a commitment from two advisors to supervise the thesis, they should begin to compose a comprehensive reading list in consultation with their advisor.
- November-January: Using the reading list as a guide, students will conduct exploratory research in the field of their proposed project.
- February-March: Students will present a 3-5 page prospectus, formulating the central questions of the thesis, in the Honors Seminar.

**Senior year**

1. Independent study course in the spring semester toward completion of the thesis.
2. Two courses, as above, with Humanities Center faculty and affiliates.
3. Continued participation in the two-semester Honors Seminar (see above under “junior year” for description), with periodic “work-in-progress” reports and oral presentation of the thesis research in the spring semester.

**Senior agenda**

- Students will complete theses in consultation with their advisor and continue to attend the Honors Seminar. In April and May, students will present their final theses in the Honors Seminar.
Great Books at Hopkins

This course introduces students to the humanities at Johns Hopkins through exploration of some of the Western world’s most important literary works of art. Great Books at Hopkins is a course designed for first-year undergraduates that examines some of the greatest works of the literary and philosophical tradition in Europe and the Americas. With lectures, panel discussions, multimedia presentations, and small seminars, professors from a variety of academic disciplines lead students in exploring authors from Homer to the present. Close reading and intensive writing instruction are hallmarks of the course, as is a varied reading list which has included Dante’s *Inferno*, Cervante’s *Don Quixote*, and Woolf’s *A Room of One’s Own*.

The Center sponsors programs of study leading to the Ph.D. degree in two general fields: comparative literature and intellectual history. These programs are designed with the cooperation of the faculty in the adjacent literary and historical departments. Only a few highly qualified applicants can be admitted; the center gives priority to candidates whose proposed course of study is congruent with faculty interests and strengths. Click here (http://humctr.jhu.edu/graduate/phd) for degree requirements.

Building on its successful doctoral and undergraduate honors programs, the Humanities Center has recently introduced a one-year Master of Arts program in Humanistic Studies (http://humctr.jhu.edu/graduate/ma).

Requirements for the Ph.D. Degree

Each student works with an ad hoc committee of three faculty members who help to design a coherent, individual program of studies. During the first two years the candidate works closely with each of his or her advisors. The course of studies, seminars, and tutorials leads to three area examinations administered by the advisory committee. During the second year, qualified students are invited to teach under faculty supervision, and on occasion advanced students have been allowed to offer undergraduate seminars of their own design.

Program in Comparative Literature

Normally, candidates for the Ph.D. in comparative literature should be competent in three national literatures and have a general familiarity with critical theory. Students in this program are encouraged to spend at least one year of study abroad, usually as members of groups working in Paris, Florence, Hamburg, Geneva, or Madrid in programs sponsored by the modern language departments and the Center. The University maintains the Villa Spelman in Florence as a study center, and the departments of German and Romance Languages and Literatures have regular programs of faculty exchange.

Students in the comparative literature program can apply for a joint major with the Department of German and Romance Languages and Literatures. They become supervised teaching assistants in that department and receive a master’s degree in German upon completion of the field examinations, before the doctoral degree in comparative literature. On a more ad hoc basis, similar arrangements for well-qualified candidates can generally be made with the departments of Classics and German and Romance Languages and Literatures.

Program in Intellectual History

The Center’s doctoral program also allows flexibility in the construction of a course of study in intellectual history involving comparatist and interdisciplinary approaches. Candidates should also note related special programs at Hopkins, such as the program in political theory and the research facilities of the Institute of the History of Medicine.

Advisor

Upon their arrival, entering students should select, in consultation with the Director, a member of the Center’s faculty to serve as their academic advisor, pro tem. As time goes on and their interests further define themselves, they may wish to change advisors and may very well wind up working most closely with faculty in another department; should this become the case, they should nevertheless meet regularly that is, each semester to discuss their progress with whomever in the Center is serving as Director of Graduate Studies.

Course Work

During their first two years, students are expected to take two seminars for credit each semester, in addition to whatever language courses they may enroll in and whatever courses they choose to audit. They should select seminars—which need not be restricted to Humanities Center offerings—in consultation with their advisors. Students arriving after having taken graduate courses elsewhere should discuss with the director of graduate studies the possibility of having that work counted toward satisfying the Center’s course requirements.

Third-Year Review

At some point during their third year of residence—after completing all outstanding seminar papers, and preferably by mid-year—students will have their work reviewed by a faculty committee composed of three teachers from among the Humanities Center faculty and from among the faculty from the other departments with whom the student plans to conduct field exams. The purpose of the review is to allow the faculty to assess the student’s progress, to clarify her/his status as regards remaining coursework, and to define future fields. In preparation for this review, the student will circulate, in advance of the meeting, materials that the student judges to be work that will best serve the purpose of the review.

Field Examinations

Students are expected, in their third and fourth years, to complete three field exams. The purpose of requirement is two-fold: the exams may serve to help a student refine her/his thinking about a dissertation topic, or they may be a means of extending and deepening a student’s knowledge of an area of studies in which s/he proposes to teach and conduct research. The examinations themselves may take a variety of forms: one could work further on a project begun in a seminar and produce a longer paper that would become part of a dissertation; one could read one’s way into and across a particular field, writing a series of short papers on one’s reading, or else sitting for a written or oral examination on the material studied; one could design and teach an undergraduate course in one’s area of interest; one could complete the requirements for a M.A. degree in another department, as a way of strengthening one’s claim to teach in that field. These are choices to be discussed with one’s committee at the third-year review.

Undergraduate Teaching

During one’s years at the Center one will have a number of opportunities to develop one’s skills and confidence as a teacher. In the second year and thereafter, students will ordinarily serve as assistants in courses taught by the Center’s faculty or, if appropriate, in courses in other departments: in the past, our students have taught in the French and
German language programs, in English composition and literature courses, as well as assisting in history, philosophy and political science courses. More experienced students are encouraged to teach courses of their own invention—as a way of completing a field exam, or in competition for one of the Dean’s Teaching Fellowships, or simply to add to the Center’s array of offerings.

**Dissertation Review**

A second formal review of a student’s work will take place after the completion of field exams, either in the fourth or in the fall semester of a student’s fifth year. The aim of this review is to bring the student together with the faculty with whom s/he will write a dissertation. This review will not take place until the student believes that s/he has a substantial piece of work associated with the dissertation, e.g., the draft of a chapter. This work will be circulated before the review, along with a prospectus of 10-40 pages, to the faculty the student wishes to have as dissertation advisors. (If all of these advisors are from outside the Humanities Center, one of the Center’s faculty, selected by the student, will also sit in on the review.) This discussion is not intended to replace the Graduate Board Oral, which will take place after the dissertation has been completed, but will serve to mark the transition from work on the field exams to the preparation and writing of a thesis.

**Departmental Presentations**

Late in a student’s work on a dissertation—preferably in the fifth year or the beginning of the sixth—s/he will be asked to give a talk on material from her/his dissertation to the assembled students and faculty of the Center and invited guests. The aim of this requirement is to give students experience in the more formal presentation of their work, to make possible a wider range of response to that work than a dissertation committee can provide, and to allow all students of the Center—whose research interests vary widely—to become better acquainted with each other’s projects.

**Requirements for the MA in Humanistic Studies**

The MA in Humanistic Studies is aimed both at seniors from across the University who seek to deepen their education by way of interdisciplinary study in literature, philosophy, and religion during an added fifth year of study as well as at students who graduated elsewhere and who consider pursuing graduate studies in intellectual history or comparative literature here or at other universities.

This terminal MA consists of eight courses over two semesters and a MA thesis with directed study during the summer months. The program places an emphasis on elaborating an individualized curriculum and on close collaboration with Humanities Center faculty in the writing of the thesis. Students accepted into the program from within Johns Hopkins benefit from a tuition reduction.

The coursework will follow the following template:

<table>

To apply, please submit the following to http://grad.jhu.edu/apply/apply-now/:

- Official Application
- Statement of purpose
- Three letters of recommendation
- Transcripts
- Sample of work
- Supplementary Application Form (Language Form)
- GRE scores and subject (optional)
- TOEFL/IELTS scores (if applicable)

**Financial Aid**

Tuition grants, stipends, and teaching fellowships are available to doctoral candidates.

For current faculty and contact information go to http://humctr.jhu.edu/people/

**Faculty**

**Professors Emeriti**

- Michael Fried
- Neil Hertz
- Ruth Leys
- Richard A. Macksey
- Stephen G. Nichols
- Nancy S. Struver

**Director**

Hent de Vries

Russ Family Chair in the Humanities; Director, Humanities Center (secondary appointment: Department of Philosophy) Modern European thought, history and critique of metaphysics, philosophies of religion, political theologies, concepts of violence, literature and temporality

**Professor**

Paola Marrati

Director of Graduate Studies Modern and contemporary French Philosophy, American Pragmatism and Skepticism, Phenomenology, Philosophy and Cinema, Feminist and Queer Theory; (secondary appointment: Department of Philosophy)

**Associate Professor**

Leonardo Lisi

Director of Undergraduate Studies European literature of the long nineteenth century; European modernism; Kierkegaard and German idealism; tragedy and the tragic; philosophical aesthetics and literary forms

**Assistant Professors**

Anne Eakin Moss
Russian literature and cinema; women's studies, literary theory and film

ey

Yi-Ping Ong
19th- and 20th-century literature and philosophy, the novel, modernism, existentialism, ethics, and justice in contemporary Anglophone literature

Adjunct Associate Professor
Orna Ophir
History and theory of psychoanalysis, psychology, and psychiatry; medical humanities and the sociology of knowledge; psychoanalytic aesthetics, Melanie Klein

Senior Lecturer
Elizabeth Patton
Humanities Center 1999; 2014. Program Director, Master of Liberal Arts: Advanced Academic Programs 2016

Joint Appointments
Sharon Achinstein
Sir William Osler Professor of English (English): Early modern literature, poetry and poetics, gender

Christopher Celenza
Charles Homer Haskins Professor, Classics and German and Romance Languages and Literatures

Veena Das
Krieger-Eisenhower Professor (Anthropology): history and myth, philosophy and anthropology, violence, social suffering, medical anthropology; South Asia, Europe

Eckart Förster
Professor (Philosophy): metaphysics, history of philosophy, Kant and German idealism

Yitzhak Melamed
Professor (Philosophy): Early Modern Philosophy; German Idealism; Metaphysics; Time; Humanism and its Critiques; Medieval Jewish Philosophy and Rabbinics

Kenneth Moss
Associate Professor, Felix Posen Chair in Modern Jewish History (History): Modern Jewish history; history of Israel; Russia, Poland, and Eastern Europe; Jewish political thought; Hebrew and Yiddish literature and culture; history and sociology of nationalism; theory and practice of cultural history; history of the cultural sphere

Christopher Nealon
Professor (English): American literature, aesthetic theory, poetry and poetics, the history of sexuality

Jacques Neefs
James M. Beall Professor of French (German and Romance Languages): 19th Century French Literature

Gabrielle Spiegel
Krieger-Eisenhower Professor (History): Medieval history, with special interest in historiography and linguistic analysis

Elisabeth Strowick
Professor (GRLL): Modern German literature and thought, literary theory, poetics of knowledge

Molly Warnock
Assistant Professor (History of Art): European and North American art and critical theory from early twentieth-century modernism to the present

Michael Williams
Krieger-Eisenhower Professor (Philosophy): Epistemology; philosophy of language; history of modern philosophy

Dimitrios Yatromanolakis
Associate Professor (Classics): Greek papyrology; ancient Greek vase inscriptions; archaic and classical social and cultural history; ancient Greek vase painting; historical and comparative anthropology

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.300.110. Philosophies of Existence. 3.00 Credits.
The question about the meaning of existence is as old as philosophy itself. In the nineteenth and twentieth centuries, however, this question received renewed attention due to various modern processes, chief among which was the process of secularization, giving rise to a philosophical movement that has come to be known as existentialism. This course will offer an examination of key themes, concepts, and doctrines that are associated with existentialist thought including: the rejection of the Aristotelian-scholastic distinction between essence and existence; the rejection of the Cartesian notions that “nothingness possesses no attributes or qualities” and that the infinite is prior to the finite; the problem of repetition and the thought experiment of the eternal return; the problems of death and suicide; and the philosophical significance of feelings such as anxiety, boredom, and nausea, and of experiences such as loneliness and despair. Reading will include a selection of texts by Pascal, Kierkegaard, Nietzsche, Shestov, Jaspers, Heidegger, Sartre, Camus, and others.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati
Area: Humanities.

AS.300.111. Shakespeare and his ‘Goddess’. 3.00 Credits.
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’ is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. In this course we will trace that tradition from the perspective of Shakespeare and his contemporaries, finishing the semester with several plays, including ‘The Taming of the Shrew,’ that further illustrate and problematize Shakespeare’s ‘goddess’ reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scève and Les Dames des Roches; and the later English reflections on the sonnet tradition by Sir Philip Sidney, Shakespeare, and Sidney’s niece, Lady Mary Wroth. All works will be read in translation. Freshmen only.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.102. Great Minds. 3.00 Credits.
Introductory survey of foundational texts of modern Western literature, thought and cinema. This semester will include works by Descartes, Marx, Dostoeyevsky, Tolstoy, Woolf, Wittgenstein, Heidegger, Arendt, and Pierre Hadot, and films by Dziga Vertov and Carl Theodor Dreyer. The course is taught in lectures and seminar discussions led by the course faculty.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati
Area: Humanities.

AS.300.100. Great Minds. 3.00 Credits.
Introductory survey of foundational texts of modern Western literature, thought and cinema. This semester will include works by Descartes, Marx, Dostoeyevsky, Tolstoy, Woolf, Wittgenstein, Heidegger, Arendt, and Pierre Hadot, and films by Dziga Vertov and Carl Theodor Dreyer. The course is taught in lectures and seminar discussions led by the course faculty.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati
Area: Humanities.

AS.300.101. Great Minds. 3.00 Credits.
Introductory survey of foundational texts of modern Western literature, thought and cinema. This semester will include works by Descartes, Marx, Dostoeyevsky, Tolstoy, Woolf, Wittgenstein, Heidegger, Arendt, and Pierre Hadot, and films by Dziga Vertov and Carl Theodor Dreyer. The course is taught in lectures and seminar discussions led by the course faculty.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati
Area: Humanities.

AS.300.102. Great Minds. 3.00 Credits.
Introductory survey of foundational texts of modern Western literature, thought and cinema. This semester will include works by Descartes, Marx, Dostoeyevsky, Tolstoy, Woolf, Wittgenstein, Heidegger, Arendt, and Pierre Hadot, and films by Dziga Vertov and Carl Theodor Dreyer. The course is taught in lectures and seminar discussions led by the course faculty.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati

Introductory survey of foundational texts of modern Western literature, thought and cinema. This semester will include works by Descartes, Marx, Dostoeyevsky, Tolstoy, Woolf, Wittgenstein, Heidegger, Arendt, and Pierre Hadot, and films by Dziga Vertov and Carl Theodor Dreyer. The course is taught in lectures and seminar discussions led by the course faculty.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati
Area: Humanities.
AS.300.113. Freshmen Seminar: Drama and Gender in Shakespeare's England. 3.00 Credits.

In this seminar we will read male and female authored plays and discuss how they reflect contemporary social expectations in Tudor and Stuart England. Authors include William Shakespeare; Mary Sidney, Countess of Pembroke; Christopher Marlowe; Elizabeth Cary; Ben Jonson; and Mary Sidney, Lady Wroth.

Instructor(s): E. Patton
Area: Humanities.

AS.300.115. Introduction to Romantic Poetry. 3.00 Credits.

This course offers an introduction to romantic poetry through a comparative approach to three of the movement’s key authors: Friedrich Hölderlin, John Keats, and Giacomo Leopardi. We will work through their main writings in detail along with considerations of their cultural contexts and theoretical and critical approaches to romanticism more broadly.

Instructor(s): O. Mehrgan
Area: Humanities.

AS.300.133. Freshmen Seminar: Women of Epic Fame in Literature and Drama, 800 BCE-1650 CE. 3.00 Credits.

From Homer's Odyssey to Shakespeare's Antony and Cleopatra, powerful women who achieve their ends by working from within the system are often overlooked or not fully explored. Our readings and discussions will foreground these women of fiction, while we also consider the social conditions of their living contemporaries. Readings will include: Homer's Odyssey (Penelope); Virgil's Aeneid (Dido); Dante's Inferno (Beatrice); Milton's Paradise Lost (Eve), and several accounts of Cleopatra in plays by Shakespeare and his contemporary women writers. Cross listed with Theater Arts, Writing Seminars, and WGS.

Instructor(s): T. Tower
Area: Humanities
Writing Intensive.

AS.300.139. Introduction to Intellectual History. 3.00 Credits.

This course offers a conceptual and historical introduction to Intellectual History. What makes the "history of ideas" different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call "ideas"? In what sense do they have a history? These are examples of the kind of questions addressed in the course.

Instructor(s): P. Marrati
Area: Humanities.

AS.300.143. Introduction to Comparative Literature. 3.00 Credits.

This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.

Instructor(s): L. Lisi
Area: Humanities.

AS.300.150. Introduction to Brain and Society. 3.00 Credits.

On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields' resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.

Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.

AS.300.202. Life and Form in Modern Thought. 3.00 Credits.

This course is a theoretical treatment of the question of form in fragmented bourgeois society since the late eighteenth century. Essential to modernity is a political and philosophical conflict between established forms and individual and collective lives. We will treat the concepts of form, freedom, and subjectivity in four spheres: aesthetics, morality, political economy, history. We will read texts by Kant, Hegel, Marx, Lukacs, Weber, and Adorno, literary works by Goethe, Rilke, Kafka, Stevens, and discuss paintings by Manet, Malevich, Guglielmo.

Instructor(s): O. Mehrgan
Area: Humanities.

AS.300.211. Great Poems of the Americas. 3.00 Credits.

This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot's The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire's Notebook of a Return to the Native Land, Vicente Huidobro's playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of "the Americas" as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we'll examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.

Instructor(s): R. Galvin
Area: Humanities.

AS.300.213. Homelessness in America. 3.00 Credits.

This course examines homelessness in the United States from multiple perspectives. Students will hear first-hand from individuals who have experienced homelessness as well as experts in the field.

Instructor(s): T. Gottbreht
Area: Humanities.

AS.300.228. Brain and Society. 3.00 Credits.

On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields' resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.

Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.
AS.300.231. Introduction to Comparative Literature. 3.00 Credits.
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities
Writing Intensive.

AS.300.232. Existentialism. 3.00 Credits.
What is existence and why do we care about it? What happens when we think about the nothing? What is the philosophical significance of issues such as commitment, marriage, death, and suicide, or of feelings such as anxiety, boredom, and nausea? We will consider these themes and read a selection of texts dealing with them by some of the most famous thinkers associated with the existentialist tradition, including Pascal, Kierkegaard, Nietzsche, Heidegger, Sartre, and Camus.
Instructor(s): O. Mehrgan
Area: Humanities.

AS.300.239. Philosophy and the Emotions. 2.00 Credits.
We will read some of the most important texts in the history of the philosophy of the emotions, including works by Plato, Descartes, Spinoza, Schopenhauer, Heidegger, and Freud. We will discuss themes such as love, shame, apathy, anxiety, the mind-body problem, the notion of spirit, the notion of mood, and the overall problem of the distinction between emotion and reason.
Instructor(s): A. Rot
Area: Humanities.

AS.300.241. The Literature of the Everyday. 3.00 Credits.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read closely a set of novels by Flaubert, Mann, Dickens, Zola, Tolstoy, and Woolf from the period between 1850 and 1950 in which the development of realism reaches its climax. These novels explore the nature of work, family, the body, consciousness, and the changing relation between individual and tradition in modernity. We will situate these novels in their social, historical, and literary contexts, and establish a set of terms for the formal study of the novel as a genre (plot, character, setting, narrative, etc.). (Students of all levels who are interested in literature are encouraged to take this course.)
Instructor(s): Y. Ong
Area: Humanities.

AS.300.281. Sovereignty and Modern Drama. 3.00 Credits.
This course is interested in the relationship between sovereignty and drama. By placing the common individual center stage, twentieth-century modern drama achieved a theatrical revolution. And yet the modern theater has not completely shed itself of its former preoccupation with kings and their undoing, as evidenced by the royal figures who show up in plays by influential playwrights as various in their political and artistic commitments as Strindberg, Ibsen, Jarry, Yeats, Shaw, Pirandello, O’Neill, Anouilh, Brecht, Sartre, Ionesco, and others. This course seeks to examine how, when, and why royal personages are employed in modern drama. What does the theater have to say about sovereignty and authority? About humanism and anti-humanism? Is theater linked to sovereignty? If so, how? This course will consider the political, philosophical, and theatrical critiques implicit in the plays where sovereigns are found, paying close attention as well to the problem of theatricality. Dean’s Teaching Prize Fellowship Course.
Instructor(s): N. Jerr
Area: Humanities.

AS.300.282. Great Poems of the Americas: Post-Epics. 3.00 Credits.
“In America the natural man has triumphed over the imported book,” announced José Martí. The call to cast off the literary forms of Old Europe echoed throughout the hemisphere during the 20th century, as poets sought to write a new kind of “American” poetry. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems, such that it has become the “post-epic.” We will investigate the long poem in 20th-century North and Latin America, from the encyclopedic Cantos of Ezra Pound and the sweeping Canto General of Pablo Neruda to briefer works by Derek Walcott and GWendolyn Brooks, and fragmented series by Gertrude Stein and César Vallejo. We will read texts including Charles Olson’s sprawling history of America, The Maximus Poems, and William Carlos Williams’ Paterson; Aimé Césaire’s Notebook of a Return to My Native Land and Kamau Brathwaite’s The Arrivants; Elizabeth Bishop’s cartographic North & South; Octavio Paz’s single, 584-line, cyclical sentence, Sunstone; and Vicente Huidobro’s careening, linguistically playful Altazor. As we test our definition of “post-epic” against these texts, we will consider whether the term may be applied equally to the heroic tale and the “open field” poem. To situate the long poem in history, we will examine changes in poetic form alongside questions of modernization and globalization, technology and development, and socio-political transformation.
Instructor(s): R. Galvin
Area: Humanities
Writing Intensive.

AS.300.283. Nineteenth-Century Science Fiction: Ecology, Utopia, and Catastrophe. 3.00 Credits.
This course will introduce students to some of the key texts of science fiction as the genre emerged during the nineteenth century. We will consider the intellectual contexts for the form’s development in Britain, France, and the United States, as well as its emerging narrative conventions. In particular, we will consider how early sci-fi writers used non-realistic modes to dramatize problems and discoveries were at once real and yet hard to fathom within the parameters of everyday cognition: deep geological time, alternative social arrangements, post-human landscapes. Texts may include H.G. Wells’ The Time Machine, Charlotte Perkins Gilman’s Herland, Samuel Butler’s Erewhon, Edward Bulwer Lytton’s The Coming Race, William Morris’ News from Nowhere, and Jules Verne’s 20,000 Leagues Under the Sea.
Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.
AS.300.290. Freshman Seminar: Shakespeare and his “Goddess”: real and imaginary lovers in the poetry and drama of early modern Europe. 3.00 Credits.
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’ is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. Incorporating music and drama, we will examine that sonnet tradition from the perspective of Shakespeare and his contemporaries, tracing both the historical roots of the Shakespearian sonnet form its influence on the music of the present day, and finishing the semester with Shakespeare’s The Taming of the Shrew, a play that further illustrates and problematizes Shakespeare’s ‘goddess’ reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scève, Louis Labé, Joachim du Bellay and Pernette du Guillet; and later reflections on the sonnet by Shakespeare and his English contemporaries: Sir Philip Sidney; Sidney’s niece, Mary Herbert; Lady Wroth; John Donne; Robert Southwell; and Katherine Philips. All continental works will be read in translation.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.291. Freshman Seminar: Home and Exile. 3.00 Credits.
This interdisciplinary seminar examines the concept of home and the condition of exile in 20th century Russian and Soviet culture from a variety of theoretical and methodological perspectives. Students will be introduced to classics of Soviet dissident, exile, and official literature (Akhmatova, Brodsky, Nabokov, Bulgakov, Zamyatin), Soviet films (including Tarkovsky’s Solaris), as well as key theoretical texts about what it means to be “at home.” Open to freshmen and sophomores with approval of professor.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.300. Life, Vitality, Thought. Philosophy and the Natural Sciences in Nineteenth Century Europe. 3.00 Credits.
Last year neuroscientists at MIT shined an optogenetic light on brain cells in order to artificially stimulate memories. If every detail of our past has a particular location in the brain, then we could alter, and even destroy, memories. Does this mean that humans are like machines whose history can be erased as easily as we delete files on a computer? Or are memories, like consciousness, not so easily reducible to brain structures?
This class will examine how these and other questions shaped the history of modern biology and experimental psychology beginning in the nineteenth century. We will read the works of prominent biologists, psychologists, and philosophers who were all involved in a rich debate over the nature of life and thought.
Instructor(s): L. McGrath
Area: Humanities
Writing Intensive.

AS.300.301. Making Modern Poetry. 3.00 Credits.
Making Modern Poetry will explore the intersection and conversation between literature, art history, and graphic design by examining the rapid global development of poetry, art, and print from 1890 to 1930. We will read canonical modernist poets such as T.S. Eliot and Ezra Pound as well as those less familiar, like Mina Loy and César Moro, considering texts comparatively across national borders and through their relations to other arts. All readings will be in English.
Instructor(s): B. Gillespie
Area: Humanities
Writing Intensive.

AS.300.302. Multum in Parvo: Forms of Short Fiction. 3.00 Credits.
The theory and practice of reading brief narratives, from the parable to the post-modern short story. We will be attending to the rhetorical and ethical issues that are raised within the compass of such fictions, with consideration of some specific forms that have shaped the development of recent literary tales: the case history, portraits of the artist, fictions of detection, and certain enduring philosophic myths. Time permitting, we’ll also examine how a few of our narratives have been translated into another medium such as film.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.305. Islamic Philosophy. 3.00 Credits.
This course is an introduction to key concepts and seminal texts of Islamic Philosophy in the classical period, running from the 7th to the 13th century. Although instrumental to the transmission of Greek philosophy and to the rise of modern philosophy in the western world, Islamic philosophy is not merely a conduit of transmission. Philosophers on Islamic lands, offered original philosophical solution to both old problems, and new problems that arose with monotheism. We will begin our examination of the specificity of Islamic Philosophy by situating it in its historical and political context. We will have to tackle fundamental questions: How did philosophers who wrote in Arabic translate and transmit Greek philosophical texts? What does it mean to do philosophy within an Islamic context? Is it not an oxymoron to talk about philosophy within a religious context? The course is divided into three sections that treat of three general fields: politics, metaphysics and psychology and discusses the major Philosophers of the classical period, with particular attention paid to the work of Alfarabi, Avicenna and Averroes.
Instructor(s): L. Ferhat
Area: Humanities
Writing Intensive.

AS.300.307. Dostoevsky and Critical Theory. 3.00 Credits.
The tormented, obsessive and sadistic characters of Dostoevsky’s novels posed a challenge to positivism and reason too scandalous and compelling to be ignored. The novels inspired some of the most brilliant and influential thinkers of the nineteenth and twentieth centuries in the fields of religion, philosophy, psychology and literary theory. We will read three of Dostoevsky’s philosophically challenging novels alongside works by these critics and philosophers. While exploring their ideas about faith and unbelief, madness and reason, violence and torture, society and history, we will also inquire into the relationships among literature, philosophy and biography and examine the processes of influence and adaptation.
Instructor(s): A. Eakin Moss
Area: Humanities.
AS.300.310. Introduction to Psychoanalysis. 3.00 Credits.
One of the most controversial intellectual endeavors of the 20th century, psychoanalysis is a theory about human nature, motivation, behavior, development and experience, as well as a clinical method of treatment for psychological disorders. We will read texts by Freud, Jung, Ferenczi, Rank, Horney, Klein, Anna Freud, Lacan, and others.
Instructor(s): O. Ophir
Area: Humanities

AS.300.314. Dreams - From Genesis to Freud. 3.00 Credits.
Die Traumdeutung is one of the groundbreaking books of the 20th century. Translated into English as The Interpretation of Dreams, this book argues that dreams are both interpretable and meaningful. Unlike the psychiatrists of his days, Freud held that dreams are expressions of the subject and thus positioned himself closer to the ancient conception of dreams than to the views of the positivistic science of his days. He emphasized that dreams represent not so much an objective reality but rather the symbolic manifestation of the truth of the subject's unconscious, a "symptom" of a history.
Instructor(s): O. Ophir
Area: Humanities

AS.300.316. Philosophy and Revolution: Four Case Studies. 3.00 Credits.
This course offers a historical and systematic inquiry into the modern idea, most clearly expressed by the young Karl Marx, that revolution should be the realization of philosophy. We will take up four revolutionary moments or four crucial years in four places and study them together with their philosophical influences and / or consequences: the French Revolution of 1789/1792 with Hegel, the Russian/October Revolution of 1917 with Lenin and Georg Lukács, the Iranian Revolution of 1979 with Michel Foucault, the Egyptian Revolution of 2011 with Alain Badiou. Some of the concept with which we will be engaging include freedom, alienation, historical necessity, reification, political spirituality, infinity.
Instructor(s): O. Mehrgan
Area: Humanities
Writing Intensive.

AS.300.317. Russian Novel. 3.00 Credits.
Russian authors began writing novels in the shadow of counterparts in Western Europe, and thus had the chance to experiment with the form and scope of genres and themes they found in European literature: Alexander Pushkin’s novel in verse Eugene Onegin pays homage to Byron’s Don Juan and satirizes Richardson’s Pamela, Mikhail Lermontov’s nested stories A Hero of Our Time owes a debt to Romantic and gothic fiction, and Nikolai Gogol’s Dead Souls brings Dante’s Inferno to the Russian provinces. From these literary forefathers emerged the likes of Feodor Dostoevsky and Leo Tolstoy, who made a lasting impact on world literature with their psychological and philosophical novels. This course examines the Russian novel in its historical and cultural context alongside contributions of Russian literary criticism in defining novel form and genre.
Area: Humanities
Writing Intensive.

AS.300.318. The Modernist Novel: Mann, Woolf, and Joyce. 3.00 Credits.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century – Thomas Mann, Virginia Woolf, and James Joyce – who explored and exploded narrative techniques for depicting what Woolf called the "luminous halo" of life. Selected novels include: Death in Venice, Buddenbrooks, Jacob’s Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities

AS.300.319. Skepticism and Theology. 3.00 Credits.
This course examines the relation between the history of philosophical theology and the foundations of modern skepticism by focusing on their mutual point of departure: the concept of the human being as an essentially finite being limited in its capacity to know others, the world, and God.
Instructor(s): T. Dika
Area: Humanities
Writing Intensive.

AS.300.322. Reason, Religion, and Modernism in Europe. 3.00 Credits.
Amidst the rise in psychological research in France and the secular reforms of the Third Republic, French philosophical and religious thinkers upended their Catholic tradition in the late nineteenth century. This seminar explores the Modernist turn in Catholicism, which drew on scientific advancements in order to challenge Church hierarchies and fundamentally transform Catholics' personal relationship to God. Our objective is to examine the intersection of science, faith, and society in historical and philosophical perspective.
Instructor(s): L. McGrath
Area: Humanities

AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies. 3.00 Credits.
Comedy and musical comedy film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare films of the era in a variety of genres (musical, epic, Western, drama), examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender.
Instructor(s): A. Eakin Moss
Area: Humanities

AS.300.325. American Madness – History of the Treatment of the Mentally Ill. 3.00 Credits.
As mental illnesses became a social issue during the 18th century, community institutions were created in order to handle the needs of individuals with such illnesses collectively. This course will investigate the history of these institutions in the USA from the seemingly quiet, secluded, and peaceful private asylums in country settings, at the beginning of the 19th century, through the notorious crowded public, so-called “psychopathic hospitals” in mid-20th century, to the crisis-services, short-term acute psychiatric units, and out-patient services that followed the “death of the asylum” at the end of the 20th century. The history of the institutional care of the mentally ill in America is also the story of American psychiatry changing attitudes towards these individuals. Reading will include selections from 200 years of writings of asylum superintendents, psychiatrists, patients, and historians of psychiatry such as Foucault, Goffman, Grob, Scull, Lunbeck, Micale, and Mora.
Instructor(s): O. Ophir
Area: Humanities.
AS.300.326. Comparative Modernisms. 3.00 Credits.
Dynamic, unprecedented literary innovation marks the first part of the 20th century. This course moves from Dadaism, Surrealism, and the Harlem Renaissance, through Anglo-American, Caribbean, and Brazilian modernisms, and the Latin American vanguard. We'll investigate literary experimentation in connection with the visual arts, modernization, colonialism, race, gender, and war. We will read novels, poetry, and essays from major writers who may include Apollinaire, André Breton, Marcel Proust; Gertrude Stein, HD, Djuna Barnes, Elsa von Freytag-Loringhoven, Mina Loy, T.S. Eliot; James Joyce, W.B. Yeats; Langston Hughes, Zora Neale Hurston, Jean Toomer; Claude McKay, Aimé Césaire, Louise Bennett, Jean Rhys, Nicolás Guillén; Oswald de Andrade, Julio Cortázar, Oliverio Girondo, Jorge Luis Borges.
Instructor(s): R. Galvin
Area: Humanities
Writing Intensive.

AS.300.327. Introduction to Comparative American Cultures: Obama and Philosophy. 3.00 Credits.
This course will investigate the philosophical as well as theological, juridical and political, and rhetorical and literary backgrounds that have informed and shaped Barack Obama's writings, speeches, and policy strategies leading up to and during his presidency. While paying minute attention to a few selected controversial debates in domestic and international governance and relations, and while discussing the question of Obama's legacy in and after the upcoming elections, our primary focus will be on understanding the curious blend of Christian realism, influenced by the theologian Reinhold Niebuhr, the tradition of American civic republicanism and pragmatism, and Obama's specific brand of post-Civil Rights, if not necessarily post-racial, politics. All these tenets coalesce in a vision and politics that may well be described as one of deep pragmatism. Attention will be paid to Obama's early appeal to simple ideas and small miracles, each of them yielding the Biblical and sobered injunction of a hope against hope. But extensive consideration of his thought and impact in the assessment of biographers and intellectual historians, legal scholars and political theorists, cultural critics and pundits will add to our attempt to understand and take stock of the Obama phenomenon as well.
Instructor(s): H. de Vries
Area: Humanities
Writing Intensive.

AS.300.328. Wittgenstein's Conception of Philosophical Activity. 3.00 Credits.
This course will focus on Wittgenstein's conception of philosophical activity: a critique of language and a clarification of logic; but what will interest us most is his idea that philosophy is a work on oneself. We will be reading Wittgenstein's two main works, the Tractatus Logico-Philosophicus and Philosophical Investigations, as well as On Certainty.
Instructor(s): S. El Amin
Area: Humanities.

AS.300.330. Trauma in Theory, Film, and Fiction. 3.00 Credits.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (The Emigrants), Lanzmann (Shoah), Spiegelman (In the Shadow of No Towers), McCarthy (Remainder), and others.
Instructor(s): M. Fried
Area: Humanities, Social and Behavioral Sciences.

AS.300.333. Melancholy in Science, Literature, and Film. 3.00 Credits.
This course explores the manifold nature of melancholy from an interdisciplinary perspective that combines sciences, history of medicine, and the arts. Defined by Greek medicine as the excess of black bile, melancholy, in its long history, has been seen as disease of the soul, state of intellectual grace, or psychological condition. The course will examine chronologically the development and variety of the meanings of melancholy between medical texts, visual representations, poetry, psychoanalytic theory, and films. The works analyzed will include, among others, those by Galen, Robert Burton, Albrecht Dürer, Shakespeare, Cervantes, Baudelaire, Freud, Lars von Trier.
Instructor(s): E. Fabietti
Area: Humanities.

AS.300.335. Victorian Literature as World Literature. 3.00 Credits.
What does it mean to read literature in a global context? How are literary texts that we think of as products of distinct national cultures plugged into larger global systems – even if they seem unaware of it? In this course we'll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker's Dracula (1897) and Charles Dickens's Great Expectations (1861). We will retrace how these books exercised cultural influence beyond the borders of Great Britain; how networks of trade, tourism, and imperial power brought authors from different cultures into contact with one another; and how Victorian texts have become a part of our culture in unexpected ways. Other primary texts may include Arthur Conan Doyle's The Sign of Four (1890), the poetry of Romesh Chunder Dutt, and first-hand accounts of Oscar Wilde's 1882 American lecture tour; critical readings will cover postcolonial theory, media theory, and histories of colonialism and urbanization.
Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.

AS.300.337. The Rise of the Modern Short Story. 3.00 Credits.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.338. Comic Evolution: Stages in Development of Comedy. 3.00 Credits.
An eclectic tour of comic forms and theories from classical antiquity to contemporary practice. Although the textual focus will be on stage comedy, we'll also consider the comic in other forms and media—film [Keaton], comic strip [Herriman], and contemporary satire. Some of the familiar questions on the agenda: topical vs. 'perennial' material, the social functions of comedy, the ‘shelf life’ of humor, butts & scapegoats, symmetries & asymmetries between comedy and tragedy, verbal and non-verbal comic devices, the general rhetoric of comedy, and the possibility of a Grand Unified Theory. (Final paper.)
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.
AS.300.340. Thinking the Body/The Body Thinking: Introduction to Aesthetics from the Perspective of Dance. 3.00 Credits.
In the nineteenth and twentieth centuries, dance has developed into a serious art form. However, philosophers of art have paid little attention to dance. Why is this the case? Is dance perhaps too corporeal or too unreflective or in some other way too marginal to be a fruitful topic for philosophical reflection? Or does the failure of mainstream philosophical aesthetics to take dance seriously perhaps signal unacknowledged biases in such approaches? Might dance, the art form whose medium is the human body, have something to contribute to current philosophical interest in rethinking the human body and, particularly, the relation between mind and body? Seeking responses to questions such as these, this course provides an introduction to the place of dance in the philosophy of art. The first half of the course examines portions of seven foundational texts in the philosophy of art and culture as well as philosophical accounts of dance that draw on these foundational texts in a range of ways. The aim is not only to explore dance from the perspective of traditional aesthetic theories, but also to explore such traditional theories from the perspective of arguably the art form which they have been most resistant to treating seriously. This oblique angle of entry into mainstream approaches to general aesthetic topics will bring into focus important questions that might be easily overlooked if one examines such theories only in light of their preferred examples of art. The second part of the course explores dance as itself a mode of philosophical reflection, examining how the work of choreographers such as George Balanchine, Jerome Bel, William Forsythe, Crystal Pite and Yvonne Rainer explore the possibilities and limits of their medium: the human body. One proposal will be of particular concern: Might such instances of the body thinking bring into focus more adequate ways of thinking about the body?
Instructor(s): K. Boyce
Area: Humanities
Writing Intensive.

AS.300.343. Philosophy and Literary Form. 3.00 Credits.
This course examines the difference literary form can make to the shaping of philosophical content. Philosophers have tended to treat literary form as merely ornamental. For this reason, they have often underestimated the philosophical significance not only of certain works of literature but also the literary form of even those works uncontroversially considered to be philosophical. This course explores the philosophical significance of literary forms in both kinds of works. The first half examines how and why Anglo-American philosophers have incorporated the interpretation of individual literary works into their philosophical writing. We will concentrate on three works of literature—Ibsen’s A Doll’s House, James’s The Golden Bowl and Wordsworth’s Prelude—each of which has attracted significant philosophical attention. The second half of the course examines how philosophers have brought literary analysis to bear in order to illuminate the philosophical achievement of certain canonical philosophical texts. We will concentrate on three literary forms—dialogue, meditation and confession—as these forms are instantiated by three works of philosophy: Plato’s Republic, Descartes’s Meditations and Wittgenstein’s Philosophical Investigations.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.345. Madness Interpreted – A Case Study in Medical Humanities. 3.00 Credits.
Too often conventional medical education teaches the student to translate a rich and complex narrative of illness into a minimalistic account, stripped of its ambiguities. Case presentations, too, are highly formalized reports lacking the historical, cultural, and social context. Although medicine since antiquity relies on the interpretation of observations, “evidence-based medicine,” when reductively used, tends to ignore the basic fact that we are “self-interpreting animals.” Patients and doctors alike try to make sense of their experiences as they recount them and, hence, case narratives teach us not only about disease and medical practice but also what it means to be human. This course will concentrate on the “case” of what is arguably the most famous psychiatric patient in the world, Daniel Paul Schreber, the German fin-de-siècle Senatspräsident of the Saxon Supreme Court. Beginning with Freud, the first doctor who turned Schreber’s rich psychotic delusional world, as expressed in his bizarre, at times comic and then again painful, Memoir, into a “case of paranoia,” we will follow the many interpretations that this narrative of illness with its unique cosmology, private theology, extraordinary creatures, transgressed sexuality, and cataclysmic vision of the universe, inspired in generations of psychoanalysts, historians, philosophers, theologians, literary critics, essayists, and scholars in political science as well as queer studies. Whether he was a paranoid schizophrenic, victim of traumatic abuse, a solipsistic philosopher, proto-fascist, or cultural hero, Schreber’s memoir offers a paradigmatic case in the study of the field of medical humanities. Readings will include: Schreber, Freud, Benjamin, Canetti, Klein, Lacan, Deleuze and Guattari, de Certeau, Lingis, Lyotard, and Santner. Cross-listed with GRLL and History.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.346. Forms of Moral Community: The Contemporary World Novel. 3.00 Credits.
Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, Beauvoir and Barthes on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it mean to acknowledge another person’s humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community? Cross-listed with English.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.348. What is Philosophy?. 3.00 Credits.
This course studies different understandings of the task, scope, and methods of philosophy across its history. It does not aim to offer a comprehensive overview of the discipline, but rather to discuss in depth some of its foundational texts. Authors include: Plato, Aristotle, Descartes, Kant, Heidegger, Wittgenstein.
Instructor(s): P. Marrati
Area: Humanities.
AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change. 3.00 Credits.
In contemporary discussions of climate change, it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class, we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the prospects of our ecological future today. Authors to be studied: George Lillo, Balzac, Dickens, Marx and Engels, Ibsen, Weber, Brecht, Arthur Miller, Steinbeck, Pope Francis, and contemporary fiction, politics and philosophy on climate change.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.350. Skepticism on Stage and Page. 3.00 Credits.
This course explores influential interpretations of and responses to skepticism in literature, philosophy and theater. Case Studies will include: Descartes, Ibsen, James, Kafka, Kierkegaard, Poe, Shakespeare, and Wittgenstein.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.351. The Phenomenon of Boredom from an Interdisciplinary Perspective. 3.00 Credits.
We will examine the history, philosophy, sociology, and psychology of boredom and consider the characteristics, concerns, and methods of the different fields and disciplinary frameworks in which this phenomenon has been studied.
Instructor(s): A. Rot
Area: Humanities
Writing Intensive.

AS.300.352. Fictions of Autobiography. 3.00 Credits.
A comparative survey of autobiographical writing as a creative process. Beginning with a few classic examples (Augustine, Petrarch, Montaigne, Rousseau), the seminar will proceed to more recent adventures in the first-person singular. Modern instances will include self-creation in several genres and media, including narrative, dramatic, and cinematic forms. Seminar meets at 107 St. Martin’s Road.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.353. Present Mirth: Stages of Comedy. 3.00 Credits.
A comparative survey of presentational comedies from Aristophanes to Beckett on stage and screen, with some attention to to to the vexed question of theories of comedy [no laughing matter].
Instructor(s): O. Mehrgan; R. Macksey
Area: Humanities
Writing Intensive.

AS.300.357. Forms of Modern Fiction. 3.00 Credits.
A comparative tour of modern narrative forms from 3 continents. The emphasis is on the development of shorter fictional models, though some of the founders and innovators are better known for their novels. The emphasis will be on the emergence new structural, rhetorical, and thematic concerns, including adaptation to other media. There will be an optional hour for queries and discussion TBA.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.359. Homelessness in America: Interdisciplinary and Critical Perspectives. 3.00 Credits.
This course examines innovative research, writings, and other media concerning homelessness in the United States, with special emphasis on critical/philosophical and interdisciplinary approaches that shed new light on the issue.
Instructor(s): T. Gottbreht
Area: Humanities.

AS.300.360. Critical Thinking and its History. 3.00 Credits.
This course aims at discussing different conceptions of “critique” and “critical thinking” in modern and contemporary philosophy. Readings include: Descartes, Kant, Adorno, Foucault, Arendt, Said, Butler.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.361. Fiction & Case History: Constructive Reading. 3.00 Credits.
A comparative seminar in the attentive reading of short fictions and other narratives. Attention to the reader’s share as well as that of the author in the construction of stories; consideration of the diagnostic and therapeutic uses of the imagination.
Instructor(s): K. Boyce
Area: Humanities
Writing Intensive.

AS.300.362. Beauty and the Predicate Calculus. 3.00 Credits.
Frege’s development of a predicate calculus made possible the evolution of a distinctively “analytic” tradition in philosophy. But arguably that tradition has failed to fully appreciate the implications of this important development. The course will begin by examining how Frege himself understood the importance of his advance. It will then consider arguments to the effect that some of the most influential accounts of mind and action—namely those shaped by Donald Davidson—fail by failing to take this advance adequately into account. In light of these arguments in philosophy of mind and action, we will reconsider the implications of Frege’s advance for aesthetics. The principle aim of the course will be to construct an account of art and criticism that takes those implications fully into account. Efforts to construct alternatives that overcome this purported failing will be examine
Instructor(s): K. Boyce
Area: Humanities
Writing Intensive.

AS.300.363. Reading Judith Shakespeare: poetry and drama by women writers in Elizabethan England (ca 1558-1650). 3.00 Credits.
Virginia Woolf’s account of the thwarted career of Shakespeare’s hypothetical sister, Judith (in A Room of One’s Own) frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lyner, Mary Wroth, and others. Students will create fictional biographies of “Judith Shakespeare” and her literary accomplishments. Cross listed with English, Theater Arts, Writing Seminars, and WGS.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.365. Desire in the Fin de siecle. 3.00 Credits.
This course examines the obsession with desire at the turn of the 20th century in literature, drama, philosophy and social thought and its implications for notions of self and community in modernity. We will read comparatively across European, Russian and American cultures, including Stoker’s Dracula, Hamsun’s Hunger, plays by Chekhov, Strindberg, Ibsen, Wilde, and stories by Tolstoy, Gorky, Chopin and Larsen.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.
AS.300.366. Russian Avant-Garde Cinema. 3.00 Credits.
Russian cinema was born out of the intense artistic experimentation of the fin-de-siècle avant-garde and developed in a climate of dramatic political and cultural change in the twenties and thirties. While subject to draconian censorship in the Soviet period, it nonetheless engaged in active dialogue with the film industries of Western Europe and America and had a lasting impact on world cinema. This course examines the extraordinary flourishing of avant-garde cinema in the Soviet Union in the 1920s and 30s including films by Eisenstein, Vertov, Pudovkin, and Dovzhenko, their theoretical writings, and their far-reaching influence on film and film theory. All readings in English, films subtitled in English. Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.367. Seeing Like a Woman. 3.00 Credits.
This seminar examines the problems of female desire, subjectivity, spectatorship and performance in fiction, poetry, memoir and film from a variety of cultures and theoretical perspectives. Readings include: de Beauvoir, Riley, Butler, Cixous, Tolstoy's Family Happiness, Woolf's Orlando, Larsen's Passing; Poetry by Moore, Bishop, Plath, Akhmatova, Tsvetaeva and Szyborska. Films by Deren, Ophuls, Hitchcock, Potter, Campion, Akerman, Varda, Denis.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.369. The Bible and Philosophy (Introduction to Intellectual History). 3.00 Credits.
This course will examine several attempts by ancient, modern, and contemporary thinkers to come to terms with the Biblical concept of creation and providence, revelation and prophecy, law and election, apocalypse and eschatology, with a special emphasis on the first articulation of the idea of Christian universalism, faith and justification, time and eternity, sacrifice and the body. Readings will include the entire corpus of St. Paul's authentic letters, the major Scriptural passages on which he draws, but also selections from Philo of Alexandria, St. Augustine, Spinoza, Nietzsche, Karl Barth, Jakob Taubes, Alain Badiou, Giorgio Agamben, and others.
Instructor(s): H. de Vries
Area: Humanities

AS.300.372. Dance and the Russian Avant-Garde. 3.00 Credits.
This course will explore the relationship between art and dance during the explosion of artistic creativity at the time of the Russian Revolution (1900s-1920s) as well as the influence of the Russian Avant-Garde on modern dance and theories of movement through the 20th century. We will examine how dance both gave physical form to aesthetic, philosophical and political ideas and catalyzed new forms of thinking about the human body and modern spaces. Lecture and discussion of readings and screenings will be paired with a weekly movement workshop in the dance studio that will introduce students to different forms and theories of avant-garde and modernist dance and movement theory. No prior dance experience or knowledge of Russian is required.
Instructor(s): A. Eakin Moss; C. Dinapoli
Area: Social and Behavioral Sciences.

AS.300.377. Cinema and Philosophy. 3.00 Credits.
Why is contemporary philosophy so interested in cinema? Do movies have anything to say about philosophical problems? What are the most productive ways of bringing films and philosophy into conversation?
Instructor(s): M. Shuster
Area: Humanities.

AS.300.379. Israeli Film and Literature. 3.00 Credits.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli cinema and literature. The course will follow both a thematic and chronological path in order to study the ways in which Israeli cinema and literature reflect political, ideological, social, and cultural aspects of contemporary Israel. In this context, we will read well-known works by several major authors and will watch major Israeli films from the 1940s to these days. We will also use a comparative approach to study the different artistic means of both mediums and to evaluate their successes in representing the various tensions of Israeli society and culture.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.300.383. History of Madness from the Bible to DSM-V. 3.00 Credits.
Madmen, lunatics or the insane, have seen an extraordinary variety of responses and attitudes across the centuries. Whether seen as a “true” phenomenon or as socially constructed “madness” was defined and treated, examined and controlled, diagnosed and “cured” according to the spirit of the time. This course will follow the varied social imageries of “madness” throughout Western history, from the Bible to the contemporary and controversial Diagnostic Statistical Manual (DSM) in its most recent 5th edition. Alongside primary texts by Hippocrates, Avicenna, Pinel, and Freud and secondary texts by Michel Foucault, Ian Hacking, Edward Shorter, and Elaine Showalter, among others, we will acquaint ourselves with first-person accounts of “madness” and its different forms of treatment, ranging from lunatic asylum, through electric-shock treatments and lobotomies to psychoanalysis. The course will explore the interaction between the historical and social, scientific and political as well as economical factors that have shaped the views of “madness” and its treatment.
Instructor(s): O. Ophir
Area: Humanities.
AS.300.389. Freud's Cases - Source of Psychoanalytic Knowledge. 3.00 Credits.

Even though major scientific discoveries have been made from the intensive study of singular cases, modern science is mostly quantitative in its approach. In this course we will follow psychoanalysis' use of clinical practice as the primary context for the generation of knowledge. We will use two notions from the philosophy of science: "exemplars" (Kuhn) and "personal knowledge" (Polanyi), as we read Freud's cases in which he combines theoretical consideration and detailed investment in the singularity of the person. In his accounts of the "hysteria" of Dora, the "phobia" of Little Hans, the "obsession" of the Rat Man, the "infantile neurosis" of the Wolf Man and Schreber's "paranoia," Freud not only generated theoretical and technical knowledge but also constituted the "single case study" genre of investigation, as the primary source of psychoanalytic knowledge. Readings will include: Freud, Foucault, Polanyi, Kuhn, Hacking, and Forrester. Cross-listed with Film and Media Studies
Instructor(s): O. Ophir
Area: Humanities.

AS.300.393. The Literature of the Everyday: Realism in the 19th- and 20th-Century Novel. 3.00 Credits.

The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read works by Flaubert, Dickens, Zola, Eliot, Mann, Tolstoy, and Woolf in the context of critical theories of realism.
Instructor(s): Y. Ong
Area: Humanities.
Writing Intensive.

AS.300.395. How Freud Changed the Way We Think. 3.00 Credits.

An examination of aspects of the history and theory of psychoanalysis, focusing on the question of origins in Freud's work. Texts by Freud, Laplanche, Lacan, Derrida, and others.
Instructor(s): M. Fried
Area: Humanities.

AS.300.399. Cinema and Philosophy. 3.00 Credits.

Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.
Writing Intensive.

AS.300.411. Animal Minds. 3.00 Credits.

An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-list with AS.150.490
Instructor(s): M. Fried; M. Williams
Area: Humanities.

AS.300.412. Flaubert. 3.00 Credits.

Through a close reading of Flaubert's novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L'Education sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L'Education sentimentale edition required: GF Flammarion, 2003. Co-listed with 300.604
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.300.414. Starobinski: The Art of Interpretation. 3.00 Credits.

How can we become better readers of the signs and symptoms that texts, as well as minds and bodies, address to us? An eminent figure of European intellectual life, deeply versed in the world of the arts and of medicine, Jean Starobinski will guide us through this inquiry. With his seminal work Jean-Jacques Rousseau: Transparency and Obstruction as our focus, we will learn why the ideas of this modern humanist have had such a wide-ranging influence on twentieth-century conceptions of subjectivity, interiority, imagination, and illness (e.g. nostalgia, melancholia, paranoia). We will also learn through his work on Rousseau, why Starobinski's groundbreaking ideas about writing (l'écriture) shaped some of the major debates of French theory. This course is taught in English. For graduate students, reading knowledge of French is desirable. Next to Transparency and Obstruction, readings involve selections from Starobinski's essays and from Rousseau. No exams, but a short oral presentation and a final essay.
Instructor(s): E. Ender
Area: Humanities.
Writing Intensive.

AS.300.415. Law of the Cannibal: Trans-American Poetics. 3.00 Credits.

In this seminar on 20th-c. poetry of the Americas, we will explore the relations between land, language, and identity. Our point of departure, informed by de Andrade's "Cannibal Manifesto," will be the idea that all literary texts form a body upon which writers may feast when they compose new works. Devouring, plundering, and appropriating will be central concepts for our seminar. We'll debate the politics of literary transculturation (hybridity/mestizaje/métissage), and discuss diasporic and multilingual U.S. American poetry (Louisiana Creole poetry, Nuyorican Poets Café, etc.). We will also investigate issues of authorship and originality; constraint, sampling, and parody; and poetic hoaxes and frauds. Readings may include theoretical texts from Édouard Glissant, Ángel Rama, Néstor Garcia Canclini, and Roberto Schwarz, as well as Deleuze, Foucault, Kristeva, and Barthes. Poetry may be drawn from Caribbean writers Césaire, Senghor, Walcott, Brathwaite, Martí, Palés Matos; Brazilians Haroldo and Augusto de Campos; and North Americans Langston Hughes, Claude McKay, Myung-Mi Kim, Kenneth Goldsmith, Susan Howe, and Christian Bök.
Instructor(s): R. Galvin
Area: Humanities.
Writing Intensive.

AS.300.416. Wittgenstein, Religion, and Ethics. 3.00 Credits.

Starting out from the Lecture on Ethics, this course will investigate Wittgenstein's approaches to religion and ethics, mysticism and the spiritual, and contrast these with those of his contemporaries and later interpreters. Readings will include Ludwig Wittgenstein, Martin Heidegger, Elizabeth Anscombe, C.S. Lewis, Hilary Putnam, Richard Rorty, Stanley Cavell, Martin Stokhof, and others.
Instructor(s): H. de Vries
Area: Humanities.
AS.300.417. Women in Psychoanalysis - The Second Generation of Psychoanalysis. 3.00 Credits.
With its forced dissemination after the Anschluss of Austria with Germany in 1938, psychoanalysis shifted its center of gravity not only from Vienna to London, creating “a new kind of diaspora,” but also from a patriarchal and phallocentric focus towards a mother-child centered theory and practice. After Freud’s death, psychoanalysis, notably in Britain, was led by two women psychoanalysts, Melanie Klein and Anna Freud, each with a very different view on the nature of childhood, sexuality and aggression, intellectual development, the development of responsibility, motherhood, pathology, and the life of the mind as such. This course will introduce the important intellectual psychoanalytic concepts and theories, which were developed not only through the clinical work of these two exceptional women with children, but also through what came to be known in the history of psychoanalysis as “The Controversial Discussions”: a set of intense debates between two thought collectives organized around these female pioneers. Readings will include: Sigmund Freud, Klein, Anna Freud, Winnicott, Heimann, Jones, and Isaccs. Cross-listed with History, Psychology, WGS.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.419. 1966 before and after: French theory. 3.00 Credits.
The “Languages of Criticism” conference held at Hopkins marked a watershed moment in the history of literary studies and redefined, for many scholars and intellectuals, the nature of humanistic inquiries. This course involves the close study of key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities.

AS.300.420. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis. 3.00 Credits.
Freud’s idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be un-American. In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.610
Instructor(s): O. Ophir
Area: Humanities.

AS.300.421. Spiritual Exercises: Concepts and Practices. 3.00 Credits.
This course will introduce the concepts, practices, and history of spiritual exercises and its modern transformations. Readings include Marcus Aurelius, Philo of Alexandria, St. Augustine, St. Ignatius of Loyola, Henri Bergson, Ludwig Wittgenstein, Stanley Cavell, and Pierre Hadot.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.422. Luther, Philosophy, Politics: 500 Years After the Reformation. 3.00 Credits.
As historical legend has it, in 1517 the German monk and then professor of theology Martin Luther inaugurated a revolution in thinking, belief and moral practice, known as the Protestant Reformation by nailing his Ninety-Five Theses, under the title Disputation on the Power of Indulgences, to the door of the Castle Church of Wittenberg. Known for his brutal characterization of reason as the devil’s whore, his theology of the hidden god, his catechisms, the doctrine of the two realms, and his condemnation of peasants’ revolts of his days, Luther’s influence has been profound and lasting. We will study some of his most influential theses, treatises, and sermons and will seek to gauge the effect they had on the Western narrative of secularization and modernity, together with their deep influence on post-Reformation and, indeed, recent philosophy and political thought. Readings include: Luther, G.W. F. Hegel, Max Weber, Martin Heidegger, Karl Barth, Erik Peterson, Dietrich Bonhoeffer, Kaj Munk, Ernst Bloch, Philippe Lacoue-Labarthe, Marcel Gauchet, Giorgio Agamben, and others.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.423. Contemporary Theory: New Materialisms, New Vitalisms, and the Post- Traumatic Subject. 3.00 Credits.
A discussion of: recent versions of materialism and realism, including materialisms informed by neuroscience; vital materialism; the latest developments in trauma and affect theory; and related trends. Texts by Zizek, Malabou, Damasio, Pippin, McDowell, Johnston, Brassier, Churchland, LeDoux, and others.
Instructor(s): M. Fried
Area: Humanities.

AS.300.424. Psychoanalysis as a Theory of Thinking. 3.00 Credits.
This course will introduce students to the writings of Wilfred Bion, the British psychoanalyst who expanded Sigmund Freud’s and Melanie Klein’s metapsychology. Bion developed an epistemological theory of thinking, surmising that the mind grows when it is exposed to the truth of one’s emotional experience. In his many writings and lectures, Bion developed a sophisticated theoretical model that conceptualizes the transformation of emotional experience into the capacity for thought. While in his early writings he is inspired by life sciences and mathematics, in his later writings Bion shifts away from the scientific view to an aesthetic/mystical vertex, drawing on poets mystics and philosophers, such as Keats, Milton, Shakespeare, Sophocles, Meister Eckhart, St John of the Cross, Plato, Hume and Kant.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.427. Reading Freud. 3.00 Credits.
Sigmund Freud was one of the most influential thinkers of the 20th century. Psychoanalysis, which was his theory of mind, a research method, and a therapeutic technique, offered concepts that pervade Western culture and the humanities. In this seminar which is designed for students from all fields of knowledge, we will closely and chronologically read Freud’s major works, follow his developing theories, and become familiar with psychoanalytic concepts such as the unconscious, the uncanny, instincts, sexuality and aggression, which illuminated mysteries in other fields, from literature to anthropology, from political science to religious studies, and from philosophy to the arts.
Instructor(s): O. Ophir
Area: Humanities.
AS.300.431. Russian Literary Modernisms. 3.00 Credits.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.641
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.433. Cavell: Skepticism and the Ordinary. 3.00 Credits.
This seminar studies the main works and concepts of Stanley Cavell, one of the most original and influential philosophers of the 20th century. It will address in particular his analyses of skepticism, the ordinary, and moral perfectionism as they are expressed in philosophy, but also in literature and films.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.435. Emmanuel Levinas: Essential Works, Guiding Concepts, Lasting Influence. 3.00 Credits.
This seminar will address the major writings and guiding concepts of Emmanuel Levinas and investigate his increasing critical role as a touchstone and dividing line in the formation of twentieth century and contemporary schools of thought (phenomenology, pragmatism, post-analytic philosophy, literary, feminist, and political theory, anthropology). Additional readings will include Stanley Cavell, Jacques Derrida, Vasily Grossman, Jean-François Lyotard, and Hilary Putnam.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.501. Independent Study. 3.00 Credits.
Instructor(s): E. Patton; H. de Vries.

AS.300.507. Honors Seminar. 3.00 Credits.
The Honors Seminar is a mandatory component of the Honors Program in Humanities, which offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. Qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider applying to the Program. In the 2016-2017 academic year, the Seminar will focus on selected works by Anton Chekhov, which will serve as a point of departure for discussion on the relation between different intellectual disciplines and pursuits.
Instructor(s): A. Eakin Moss; M. Shuster
Writing Intensive.

AS.300.508. Honors Seminar. 3.00 Credits.
The Honors Seminar is a mandatory component of the Honors Program in Humanities, which offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. AS.300.509. Independent Research. 0.00 - 3.00 Credits.
Instructor(s): E. Patton.

AS.300.599. Independent Study. 3.00 Credits.
Instructor(s): L. Lisi; R. Macksey.

AS.300.602. Theory, Painting, Vision.
Reading in philosophy, theory, criticism. Texts by Merleau-Ponty, Heidegger, Foucault, Derrida, Cavell, and Pippin, among others.
Instructor(s): M. Fried.

AS.300.603. Readings in Russian Poetry, Prose and Theory.
Readings to be selected by mutual agreement among the students and instructor. Reading knowledge of Russian required.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.604. Flaubert.
Through a close reading of Flaubert's novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Éducation sentimentale edition required: GF Flammarion, 2003. Co-listed with 300.412
Instructor(s): J. Neefs; M. Fried.

An examination of aspects of the history and theory of psychoanalysis, focusing on the question of origins in Freud's work. Texts by Freud, Laplanche, Lacan, Derrida, and others.
Instructor(s): M. Fried.
AS.300.610. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis.

Freud's idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be un-American. In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.420

Instructor(s): O. Ophir
Area: Humanities.

AS.300.612. Topics in Kierkegaard's Philosophy: Repetition, Revelation, Anxiety, and Fear.

Close study of the rhetoric and arguments of four of Kierkegaard's most important works from 1843-44: Repetition, Philosophical Fragments, The Concept of Anxiety, and Fear and Trembling. Contextualizing readings by Kant, Schelling, Hegel, and J.L. Heiberg.

Instructor(s): L. Lisi.

AS.300.613. The Ancient Quarrel: Literature and Philosophy.

Key turning points in the debate over which kind of knowledge, philosophical or literary, most benefits the soul and society. We will investigate the various ways in which literature has been construed as moral or immoral, and the use of literary modes of persuasion and argument in philosophical texts. Possible authors include: Homer, Plato, Aristotle, Sidney, Shakespeare, Rousseau, Kierkegaard, Tolstoy, Heidegger, Sartre, Beauvoir, Nussbaum, Cavell, Diamond, James, Coetzee, and Mulhall.

Instructor(s): Y. Ong.

AS.300.616. Thinking the Body/The Body Thinking: Introduction to Aesthetics from the Perspective of Dance.

In the nineteenth and twentieth centuries, dance has developed into a serious art form. However, philosophers of art have paid little attention to dance. Why is this the case? Is dance perhaps too corporeal or too unreflective or in some other way too marginal to be a fruitful topic for philosophical reflection? Or does the failure of mainstream philosophical aesthetics to take dance seriously perhaps signal unacknowledged biases in such approaches? Might dance, the art form whose medium is the human body, have something to contribute to current philosophical interest in rethinking the human body and, particularly, the relation between mind and body? Seeking responses to questions such as these, this course provides an introduction to the place of dance in the philosophy of art. The first half of the course examines portions of seven foundational texts in the philosophy of art and culture as well as philosophical accounts of dance that draw on these foundational texts in a range of ways. The aim is not only to explore dance from the perspective of traditional aesthetic theories, but also to explore such traditional theories from the perspective of arguably the art form which they have been most resistant to treating seriously. This oblique angle of entry into mainstream approaches to general aesthetic topics will bring into focus important questions that might be easily overlooked if one examines such theories only in light of their preferred examples of art. The second part of the course explores dance as itself a mode of philosophical reflection, examining how the work of choreographers such as George Balanchine, Jerome Bel, William Forsythe, Crystal Pite and Yvonne Rainer explore the possibilities and limits of their medium: the human body. One proposal will be of particular concern: Might such instances of the body thinking bring into focus more adequate ways of thinking about the body?

Instructor(s): K. Boyce
Area: Humanities.

AS.300.617. Philosophy and Literature in Either/Or.

Celebrated and reviled alike, Kierkegaard's 1843 Either/Or has been viewed as both the culmination of the Enlightenment project and the birth of existentialism, a playful work of romantic literature and a piece of late-Hegelian philosophy, a vindication of the secular everyday and the articulation of a modern faith in a transcendent God. In this course we read the work closely and in its entirety and pay particular attention to the relation between its philosophical arguments and literary forms of presentation.

Instructor(s): L. Lisi.

AS.300.625. Russian Literary and Critical Theory.

Close reading of major authors from the Russian literary theoretical and critical tradition including Bakhtin, Eikhenbaum, Jakobson, Lotman, Shklovsky and Tynianov. Student will present primary sources or case studies from their own fields and research.

Instructor(s): A. Eakin Moss.
AS.300.626. Philosophy of/and the Novel.
The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unsolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhtin, Hamburger, Sartre, Beauvoir, Ricoeur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaubert.
Instructor(s): R. Tobias; Y. Ong.

Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.628. Contemporary Theory: New Materialisms, New Vitalisms, and the Post- Traumatic Subject.
A discussion of: recent versions of materialism and realism, including materialisms informed by neuroscience; vital materialism; the latest developments in trauma and affect theory; and related trends. Texts by Zizek, Malabou, Damasio, Pippin, McDowell, Johnston, Brassier, Churchland, LeDoux, and others.
Instructor(s): M. Fried
Area: Humanities.

This seminar examines what in Bergson’s philosophy remains, or becomes, challenging for contemporary debates. Particular emphasis is given to his concepts of life and time, but also to his philosophical anthropology and his reflections on the ambiguous interplay between war, technology, and religion.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.631. Russian Literary Modernisms.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.431
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.637. Faust and Philosophy.
This course combines the close reading of Goethe’s epic Faust with the study of a number of philosophical texts that either influenced Goethe’s work or were influenced by it. Particular attention will be paid to the relation between literary form and philosophical argument. Authors besides Goethe will include Fichte, Schelling, Schiller, Friedrich and August Wilhelm Schlegel, Hegel, Kierkegaard, Karl Rosenkranz and Theodor Vischer. Discussion in English; reading knowledge of German required.
Instructor(s): L. Lisi
Area: Humanities.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well. Course taught in French. Recommended Course Background: AS.212.333 and 212.334
Instructor(s): J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.300.642. Philosophy and Literature in Kierkegaard’s Either/Or.
Celebrated and reviled alike, Kierkegaard’s 1843 Either/Or has been viewed as both the culmination of the Enlightenment project and the birth of existentialism, a playful work of romantic literature and a piece of late-Hegelian philosophy, a vindication of the secular everyday and the articulation of a modern faith in a transcendent God. In this course we read the work closely and in its entirety and pay particular attention to the relation between its philosophical arguments and literary forms of presentation.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.644. Theory, Painting, Vision.
Theory, Painting, Vision: Readings to be selected but they will definitely include texts by Barthes, Cavell, Wall, and Michaels.
Instructor(s): M. Fried.

AS.300.649. The Fate of Nothing from Goethe to Heidegger.
Nothing and negativity play a central role in the literature and philosophy of the long nineteenth-century. In this course, we look closely at a number of approaches to these problematic concepts in Goethe, Hölderlin, Hegel, Schopenhauer, Leopardi, Kierkegaard, Nietzsche and Heidegger.
Instructor(s): L. Lisi.

AS.300.651. What Remains of the Human?.
This seminar discusses modern and contemporary philosophical and anthropological conceptions of the human and its uncertain boundaries: between the cultural and natural, the human and the inhuman, the animal and the spiritual, the living and the dead and so forth. Particular attention will be devoted to the ethical and political implications any definition of the human inevitably invites.
Instructor(s): P. Marrati.

This seminar analyzes Deleuze’s philosophy in the light of his attempt to renew Kant’s critical and transcendental method and in dialogue with other contemporary conceptions of critiques.
Instructor(s): P. Marrati
Area: Humanities.
AS.300.653. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.657. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives, II.
Starting with a brief overview and recapitulation of themes discussed in its Introduction and Division One, this jointly will focus on Division Two of Being and Time and bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.658. Must We Mean What We Say?.
Starting out from Stanley Cavell’s programmatic book and title, this seminar will revisit his discussion of J.L. Austin, John Searle, Jacques Derrida, and Shoshana Felman, with special emphasis on these authors’ theories of intentionality, seriousness, and sincerity, and with reference to the ancient and modern concepts of tragedy on which they partly rely. In addition to the aforementioned thinkers’ relevant works, reading will include selections from Euripides, Henrik Ibsen, Isaiah Berlin, Emmanuel Levinas, and Jean-Luc Marion.
Instructor(s): H. de Vries.

AS.300.660. Humanities Thesis Seminar.
Required thesis seminar for Humanities Center MA students.
Instructor(s): Staff
Area: Humanities.

AS.300.664. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l’ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, À l’ombre des jeunes filles en fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergraduates, with authorization of the instructor.
Instructor(s): J. Neefs; M. Fried.

AS.300.686. Mysticism and Mechanicism.
This seminar will investigate the historical, conceptual, and practical intertwinement of spirit and automatism, mind and machine, global religion and technological media. We will start out from the spiritual automaton motif as it appears in Spinoza and Leibniz and follow its echoes in more recent debates (concerning the ghost the machine, the idea of artificial intelligence, and all those realities often called virtual). Readings will include Henri Bergson, Ludwig Wittgenstein, Gilbert Ryle, Walter Benjamin, Henri Atlan, Lambert Wiesing, and others.
Instructor(s): H. de Vries.

AS.300.688. Autour de Baudelaire (Around Baudelaire).
Topics in Baudelaire’s art and thought and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mallarmé, Proust, Benjamin, Starobinski, Bonnefoy). Readings and discussion will be mainly in French. Co-listed with AS.212.604
Instructor(s): J. Neefs; M. Fried.

AS.300.689. Deleuze and Philosophy: Time, Life, Becoming.
This seminar aims at analyzing the major concepts of Deleuze’s philosophy and their ethical and political implications for contemporary debates.
Instructor(s): P. Marrati.

Instructor(s): P. Marrati.

AS.300.800. Independent Study.
Instructor(s): H. de Vries; M. Fried; P. Marrati.

AS.300.801. Ind Stdy-Field Exams.
Instructor(s): H. de Vries.

AS.300.802. Independent Study Field Exam.
Instructor(s): E. Forster; H. de Vries; M. Fried; P. Marrati.

Instructor(s): H. de Vries.

AS.300.804. Dissertation Research.
Instructor(s): H. de Vries.

AS.300.805. Literary Pedagogy.
Instructor(s): H. de Vries.

AS.300.806. Literary Pedagogics.
Instructor(s): H. de Vries.

AS.300.808. In Study Field Exam.
Instructor(s): E. Forster.

AS.300.810. Thesis Seminar.
Thesis Seminar.
Instructor(s): P. Marrati.

AS.300.890. Research Practicum.
Instructor(s): M. Fried.

Cross Listed Courses
History of Art
AS.010.310. The ‘Long Sixties’ in Europe. 3.00 Credits.
Emphasis will be on advanced artistic practice primarily in France, Italy, the Benelux, and German-speaking countries; students will curate an exhibition of avant-garde journals from the Sheridan Libraries.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.400. Looking at Language: Vision and Textuality from Surrealism to the Present. 3.00 Credits.
Considers the emergence of the “written painting” and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Ligon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.413. Historical and Conceptual Bases of Art History. 3.00 Credits.
Critical readings in and of relevance to the intellectual foundations of the modern discipline of art history. Texts by Kant, Hegel, Heidegger, Wölfflin, Riegl, Panofsky, Melville, and Derrida, among others. There will be a final paper.
Instructor(s): M. Warnock
Area: Humanities
Writing Intensive.
AS.010.435. Minimalism in Transnational Context. 3.00 Credits.  
Critical examination of arguably the most important crux in post-WWII art, criticism, and theory, with attention to displacements and transformations of Minimalism outside the US. There will be a final paper.  
Instructor(s): M. Warnock  
Area: Humanities.

AS.010.618. Historical and Conceptual Bases of Art History.  
Critical readings in and of relevance to the intellectual foundations of the modern discipline of art history. Texts by Kant, Hegel, Heidegger, Wölfflin, Riegl, Panofsky, Melville, and Derrida, among others. There will be a final paper.  
Instructor(s): M. Warnock  
Area: Humanities  
Writing Intensive.

AS.010.635. Minimalism in Transnational Context.  
Critical examination of arguably the most important crux in post-WWII art, criticism, and theory, with attention to displacements and transformations of Minimalism outside the US. There will be a final paper.  
Instructor(s): M. Warnock  
Area: Humanities.

AS.010.654. Topics in Postwar Abstraction.  
Emphasis on European and American case studies from Pollock to the present; figures may include: Newman, Still, Frankenthaler, Louis, Noland, Olitski, Stella, Ryman, Marden, Hantai, Bishop, Jorn, Uecker, and Klein.  
Instructor(s): M. Fried; M. Warnock  
Area: Humanities.

AS.010.760. Agency and Other Topics in Contemporary Theory of Art History.  
A critical reading of texts by various thinkers including Alfred Gell, Horst Bredenkamp, David Freedberg, Whitney Davis, and David Summers. Open to qualified undergraduates with the permission of the instructor. This course is being co-taught with Prof. Ruth Leys.  
Instructor(s): M. Fried.

Classics
AS.040.121. Ancient Greek Mythology: Art, Narratives, and Modern Mythmaking. 3.00 Credits.  
Focuses on major and often intricate myths and mythical patterns of thought as they are reflected in compelling ancient visual and textual narratives. Being one of the greatest treasure troves of the ancient world, these myths will further be considered in light of their rich reception in the medieval and modern world (including their reception in the modern fields of anthropology and philosophy).  
Instructor(s): D. Yatromanolakis  
Area: Humanities.

AS.040.126. Religion, Music and Society in Ancient Greece. 3.00 Credits.  
Emphasis on ancient Greek ritual and mythology; on ancient music, religion, and society; and on cultural institutions such as symposia (drinking parties) and festivals.  
Instructor(s): D. Yatromanolakis  
Area: Humanities.
AS.060.621. The Cultures of the Sonnet in the English Renaissance.  
This is a course on lyric theory in the Renaissance and as such is a good introduction to early modern literary study. We will take up the early modern form of the sonnet as a test case for the interaction between vernacularity and globalization. We will consider early modern topics including “invention,” “imitation,” and rhetoric, as well as explore formal concerns that are intertwined with political, social, cultural, and economic experiences of early modernity. Along with the consideration of the emergence of literatures in new languages and nationalist differentiation, we will also consider mechanization (whether in print or literary trope) that produced both early modern literature and political life in an international system. We will consider such topics as sequence; modes of address; vernacularity and linguistic nationalism; the themes of love v. empire; the social role of the sonnet; the nature and materiality of writing; patronage and circulation; the question of private, occasional, and public poetry; the place of sonnets in manuscript collections; the histories of books; poetic subjectivity and objective thought; and we will also read a good many sonnets, largely in English, through close attention to language, media and transmission histories. Some contemporary literary theory on the sonnet will be introduced, as well as sonnets in European languages other than English, depending on the students’ interests and proclivities. Students will be expected to work in the manuscript and print collections of the Bodleian library to prepare a class report on their chosen topics. The class puts the sonnet in relation to other forms in Renaissance literature and thus should serve as a good survey of the period and its issues.  
Instructor(s): S. Achinstein  
Area: Humanities  
Writing Intensive.

History  
AS.100.728. Historical Writing in the Middle Ages.  
This course will begin with readings of critical theory relating to historical writing. It will then examine a series of medieval texts: Eusebius, Bede, Suger, and Geoffrey of Monmouth, for example, to demonstrate the ways in which theory can generate better readings of medieval texts.  
Instructor(s): G. Spiegel.

AS.100.741. Recent Theoretical Issues in History.  
An examination of recent theoretical issues in history, including: history as/and memory; the return of presence in history; the turn to affect and the rise of neurohistory; posthistoricism and the uses of literary theory in history; and the uses of photography and visual cultures in history. Cross-listed with Humanities Center.  
Instructor(s): G. Spiegel; M. Fried  
Area: Humanities, Social and Behavioral Sciences.

German Romance Languages Literatures  
AS.211.364. Drama Queens: Opera, Gender, and the Poetics of Excess.  
3.00 Credits.  
What is a drama queen? According to the Oxford English Dictionary, a drama queen is “a person who is prone to exaggeratedly dramatic behaviour” and “a person who thrives on being the centre of attention.” While drama queens exist among us, the world of opera is certainly one of their ideal environments. Echoing back to their tragic fates, the powerful voices of Dido, Medea, Violetta, and Tosca never ceased to affect their empathetic public. In fact, excess and overreactions are two main features of the operatic experience both on stage and in the audience. By focusing on the ways in which operatic characters are brought to life, the course explores the social, political, and gender dynamics that inform the melodramatic imagination. Students will have the opportunity to attend live HD broadcasts of Verdi’s La Traviata and Tchaikovsky’s Eugene Onegin from the Metropolitan Opera. No musical skills required.  
Instructor(s): E. Refini  
Area: Humanities  
Writing Intensive.

AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century.  
3.00 Credits.  
2016 marks the bicentennial of Rossini’s irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart’s The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais’ controversial “Figaro trilogy”, stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretensions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano’s The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick’s Barry Lyndon (1975) and Milos Forman’s Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.  
Instructor(s): E. Refini  
Area: Humanities  
Writing Intensive.

AS.212.604. Around Baudelaire.  
Topics in Baudelaire’s art and thought, and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mallarmé, Proust, Benjamin, Starobinski, Bonnefoy, Roubaud, Deguy). Readings and discussion will be mainly in French.  
Instructor(s): J. Neefs; M. Fried.
Interdepartmental

AS.360.133. Freshman Seminar: Great Books at Hopkins. 3.00 Credits.
Freshman Seminar: Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University’s rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2016 include Homer, Plato, Boccaccio, Diderot, Shelley, Nietzsche, Nabokov, Douglass, and Woolf.
Instructor(s): A. Eakin Moss; E. Russo; R. Bett; W. Stephens
Area: Humanities
Writing Intensive.

AS.360.134. Great Books at Hopkins II: The Sciences. 3.00 Credits.
Great Books at Hopkins II: The Sciences will combine readings from philosophy and literature with foundational texts from several scientific disciplines. Readings for this spring will explore links between traditional theories of economics and genetics in the context of literary developments, and will include: Xenophon’s Oeconimicus, Mendel’s Experiments on Plant Hybridization, Marx’s Communist Manifesto, Darwin’s Voyage of the Beagle, Swift’s A Modest Proposal, Wharton’s House of Mirth, and Joyce’s Finnegans Wake.
Instructor(s): E. Patton; M. Roller
Area: Humanities
Writing Intensive.

Art

AS.371.140. Cartooning. 3.00 Credits.
Not open to Freshmen. A history-and-practice overview for students of the liberal arts. The conceptual basis and historical development of cartooning is examined in both artistic and social contexts. Class sessions consist of lecture (slides/handouts), exercises, and ongoing assignments. Topics include visual/narrative analysis, symbol & satire, editorial/political cartoons, character development, animation. Basic drawing skills are preferred but not required.
Instructor(s): T. Chalkley
Area: Humanities.

AS.371.149. Visual Reality. 3.00 Credits.
In art, Realism is a simulation of visual reality. But art can also simulate alternative realities, those realities or truths which exist only in daydreams or nightmares. In this class, we will learn to explore and create representations of these additional moments of existence. This will require thinking creatively or outside the box, a useful skill in any field. Using a variety of media, students are asked to solve problems to which there is no one correct answer.
Instructor(s): D. Bakker
Area: Humanities.

AS.371.151. Photoshop/Digital Darkroom. 3.00 Credits.
Photoshop is not only the digital darkroom for processing images created with digital cameras; it is also a creative application for making original artwork. In this course, students use Photoshop software as a tool to produce images from a fine art perspective, working on projects that demand creative thinking while gaining technical expertise. Students will make archival prints, have regular critiques, and attend lectures on the history of the manipulated image and its place in culture. We will look at art movements which inspire digital artists, including 19th-century collage, dada, surrealism, and the zeitgeist of Hollywood films. Students must have a digital SLR camera. Prior knowledge of Photoshop is not required. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on SIS; no need to email.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.152. Introduction to Digital Photography. 3.00 Credits.
Students learn to use their digital cameras through a variety of documentary, landscape and portrait projects, which will help them develop technical and creative skills. Critiques and slide lectures of historic photographs, which range from postmortem daguerreotypes to postmodern digital imagery, help students develop a personal vision. Students are provided digital SLR cameras and gain proficiency with one-on-one instruction in the field. Basics for print adjustment and output will be covered. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on SIS; no need to email.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.162. Black & White: Digital Darkroom. 3.00 Credits.
In this digital course, students explore the black-and-white aesthetic. They develop camera skills on numerous field trips including Ladew Topiary Gardens, the Maryland Zoo & Botanical Gardens, and an optional weekend trip to Cape Henlopen State Park in Delaware. Students meet frequently for critiques and discussions based on historic and contemporary imagery. They will learn to use Photoshop for image adjustment. Techniques such as high dynamic range, duotone, panorama and infrared will be covered. Students work on a project of their choice and produce a portfolio of ten prints. Digital SLRs are provided. Attendance at 1st class is mandatory. No need to email for approval.
Instructor(s): P. Berger
Area: Humanities.

AS.371.303. Documentary Photography. 3.00 Credits.
In this hands-on course, we will explore different genres of documentary photography, including the fine art document, photojournalism, social documentary photography, the photo essay and photography of propaganda. Students will work on a semester-long photo-documentary project on a subject of their choice. Digital SLRs will be provided. The makeup of this class will include five JHU undergraduate students and five Baltimore Youth Film Arts Program fellows. There will be two one-day field trips on weekends to city and countryside locations. Attendance at first class is mandatory. No need to email for approval.
Instructor(s): P. Berger
Area: Humanities.
AS.371.304. Photo Seminar: Wet Darkroom. 3.00 Credits.
In this film based course, students develop a project of their choice over the semester working independently in the darkroom and meeting for weekly critiques and discussions. Using the zone system (a method of pre-visualization developed by Ansel Adams) students will experiment with different film, paper and developer combinations specific to their projects. Writing in the form of a journal as well as critical analysis of images are integral parts of the seminar experience.
Prerequisites: AS.371.146 or Permission Required
Area: Humanities.

Interdisciplinary Studies

The undergraduate major in interdisciplinary studies allows students to combine disciplines in Krieger School of Arts and Sciences to develop a major focused on a particular topic or intellectual theme. Therefore, courses proposed for this interdisciplinary major must have coherence and build toward a rich exploration of a clear set of principles or questions.

Requirements for a B.A. Degree with a Major in Interdisciplinary Studies

Also see Requirements for a Bachelor's Degree (p. 10).

Students in the humanities and social sciences who wish to design their own major, or who wish to divide their studies between departments, may create their own program in Interdisciplinary Studies. This interdisciplinary major may straddle several traditional disciplines but must maintain a substantive theme or focus. For example, a student interested in the American Revolutionary period may construct a curriculum including courses from History, English, History of Art, and Sociology. Another may wish to focus on children in poverty, drawing from Anthropology and Economics. Proposals for the interdisciplinary major should be submitted at the end of the sophomore year.

This major requires the support of a faculty advisor and the approval of the Arts and Sciences Curriculum Committee. A student wishing to complete this major must work with a full-time faculty member from the Homewood campus to construct a curricular plan that includes courses representing 45 to 60 credits. These courses can include all related prerequisites and related courses, such as language study. Independent study, research, and internships may be included. Twenty-one credits must be earned at the 300-level or higher. Courses from the School of Engineering are not permitted, except by petition.

The proposal should explain how each of these courses provides insight on the given topic, concept, issue, time period, etc. There is no need to defend the principle of interdisciplinary study, as that is a given, but the student must explain how the courses from two or more departments represent a conceptual whole.

After receiving approval from a sponsoring faculty advisor, the student then works with the Office of Academic Advising to finalize the proposal and present it to the Curriculum Committee, consisting of faculty and undergraduates, who must approve the proposal by majority vote. After approval, the student continues to work with the faculty advisor and Academic Advising to oversee completion of requirements.

Rules:

• Students pursuing this major must still meet all other requirements for a bachelor's degree (p. 10) in the Krieger School of Arts and Sciences.
• All courses for the major must be taken for a letter grade and students must earn a C- or better in courses completing major requirements.
• Students must earn 45-60 credits in the completion of the major.
• At least 21 credits must be completed at the 300-level or higher and may not be counted toward another major or minor.
• Courses offered by the School of Engineering may not be included in major requirements. (Some minor exceptions may be permissible.)

International Studies

The International Studies major is an interdisciplinary program drawn from the departments of political science, history, economics, languages, sociology, and anthropology. There are three programs in International Studies: a regular undergraduate major leading to the B.A. degree in four years, and two accelerated programs leading to a B.A. and M.A. degree in five years. One of the accelerated programs is in partnership with the Johns Hopkins School of Advanced International Studies in Washington, D.C. and the other is with political science institute Sciences Po in Paris. The three programs, and all other aspects of the International Studies Program, are described on the International Studies website at http://krieger.jhu.edu/internationalstudies

Requirements for the B.A. Degree

Also see Requirements for a Bachelor's Degree. (p. 10)

Students considering a major in International should begin introductory courses required of the major early in their college careers. Choices may include an introductory history course at the 100-level, AS.180.101 Elements of Macroeconomics-AS.180.102 Elements of Microeconomics, and one of the core political science courses.

Major Requirements

The international studies major is comprised of three main components:

• Foreign language study
• Core courses in history, political science, and economics
• Focus area of the student’s choosing

In addition, students must earn a grade of C- or better in all course applied towards major requirements and courses may not be taken satisfactory/unsatisfactory. Students must also complete at least 15 credits of major requirements at the 300 level or higher (excluding foreign language used to fulfill the language requirement).

Foreign Language

Proficiency in one major foreign language is required. This requirement may be met either by taking two courses beyond the intermediate level or by special examination. If the student can demonstrate proficiency through examination, s/he must take an additional two semesters of either a new language or upper-level literature and culture courses taught in the language of proficiency.

Core Courses

Courses fulfilling the specific requirements below are listed on the International Studies website (http://krieger.jhu.edu/internationalstudies/courses).
• Five courses in history, including one introductory course at the 100-level from the History Department at Johns Hopkins University. Four out of the five courses must be Global history (identified by the POS-Tag INST-GLOBAL in their course description in the schedule of classes).
• One course in international politics
• One course in American politics
• Two courses in comparative politics
• One course in political theory
• Four courses in economics. One must be an internationally-oriented course listed on the International Studies website. Two courses must be AS.180.101 Elements of Macroeconomics and AS.180.102 Elements of Microeconomics. The final course may be of the students’ choosing from courses offered in the Economics Department.

Focus Area Specialization
Every major in International Studies selects a specialization area, which consists of four semester courses within a coherent field of interest. Specialization fields may be organized in terms of area (Latin America, East Asia), theme (security studies, international economics), or language (e.g., Mandarin, Arabic). These courses may not overlap with other requirements of the major.

Major Requirements:
Foreign Language Study
Two courses beyond the intermediate level or if proficient based on exam, two additional language courses

One Core Political Science Course
AS.190.102 Introduction To Comparative Politics 3
or AS.190.104 International Politics
or AS.190.209 Contemporary International Politics
or AS.190.111 Introduction to Global Studies
or AS.190.111 Introduction to Global Studies
or AS.230.150 Issues in International Development

Political Science Courses
One international relations course 3
One American politics course 3
Two comparative politics courses 6
One political theory course 3

Economics Courses
AS.180.101 Elements of Macroeconomics 3
AS.180.102 Elements of Microeconomics 3
One AS.180.xxx course 3
One approved internationally-focused economics course 3

Five History Courses
One AS.100.1xx history course 3
Four additional history courses with the POS-Tag INST-GLOBAL 12

Focus Area
Four courses with a coherent field of interest 12

Sample Four Year Plan of Study
Note: Not displayed on plan below is the requirement that at least 15 credits (5 courses) be taken at 300 level or above, excluding language courses used to fulfill the language requirement.

Freshman
Fall Credits Spring Credits
AS.190.111 Introduction to Global Studies (or other core political science course) 3
AS.180.102 Elements of Microeconomics 3

Sophomore
Fall Credits Spring Credits
Foreign language 3
International relations political science course 3
Economics course (AS.180.xxx) 3
History elective (INST-GLOBAL) 3

Junior
Fall Credits Spring Credits
Foreign language 3
American politics political science course 3
History elective (INST-GLOBAL) 3
Internationally-focused economics course (INST-ECON) 3

Senior
Fall Credits Spring Credits
Focus area course 3
Focus area course 3
History elective (INST-GLOBAL) 3

Total Credits: 77

Double-Major and Major-Minor Programs
Students may pursue one of International Studies’ unique double-major or major-minor programs. These are offered in conjunction with affiliated departments and allow students to concentrate their course of study within a specific department or program while simultaneously benefiting from the interdisciplinary training offered by the International Studies major.

Students pursuing a double-major program will receive a major in International Studies as well as a major in the affiliated department or
program. For example, students pursuing the Global Social Change and Development track will receive a double major in International Studies and Sociology. The student’s faculty adviser will be a faculty member from the affiliated department or program.

Students pursuing a major-minor program will receive a major in International Studies and a minor in the affiliated department or program (e.g., students pursuing the Global Modernity and the Jewish Experience minor will receive a minor in Jewish Studies) and benefit from a faculty adviser in the affiliated department or program.

Successful completion of an approved double-major or major-minor program will satisfy the International Studies major’s focus area requirement.

**Senior Thesis and Honors in the Major**

International studies majors also have the opportunity to write a senior research thesis. To be eligible to write a thesis, seniors must identify a faculty sponsor who will supervise the project. Students will work out a specific work plan with their faculty sponsor suitable for their project. In addition to completion of a senior thesis, students who wish to receive honors in the major will also need a GPA of 3.7 or better in all major requirements.

**Study Abroad**

Studying abroad is especially valuable for International Studies majors. JHU encourages all IS majors to spend one or both semesters of their junior year abroad. International Studies sponsors a number of study abroad programs designed for IS majors and administers them in collaboration with the Office of Study Abroad.

The Junior Year Abroad at SAIS Bologna, offered through the Bologna campus of the Paul H. Nitze School of Advanced International Studies (SAIS), allows motivated International Studies majors to spend their junior year taking graduate level classes at the SAIS Bologna campus. Students who spend their junior year in Bologna and subsequently apply for graduate studies at SAIS will receive one semester of credit at SAIS for their work in Bologna.

A similar exchange program with the French political science institute Sciences Po allows students to spend a semester or a year studying at one of Sciences Po’s seven regional campuses: Paris, Menton, Reims, Poitiers, Le Havre, Nancy, or Dijon. Courses are offered in English as well as French and thus are open to students regardless of their knowledge of French. One of Europe’s most prestigious universities, Sciences Po has a strong international focus and allows students to develop a cross-cultural and transatlantic perspective, while simultaneously offering unique access to the field of international affairs.

Sciences Po’s School of Journalism also offers a competitive spring semester English language program in Journalism. This selective program is designed for students who are interested in pursuing a career in journalism or who have had some journalism experience. The program curriculum consists of a combination of lectures, workshops and reporting projects, in addition to mandatory French language classes for students who are not proficient in French.

Additionally, the Office of Study Abroad also offers a wide range of study abroad opportunities across the globe tailored to specific interests.

Five-Year Accelerated B.A./M.A. Program with the Paul H. Nitze School of Advanced International Studies (SAIS)

For students wishing to pursue a master’s degree after graduation from Hopkins, the university offers an accelerated and competitive International Studies B.A./M.A. Program drawing upon its resources at SAIS, located in Washington, D.C. Combining a liberal arts curriculum with a strong specialization in international studies, the program allows those enrolled to receive the B.A. and M.A. degrees in five years instead of the usual six.

Approximately eight sophomores are selected for the program each year. Admission is limited to those who are highly motivated toward careers for which a background in international studies is essential: research, teaching, or practice in international affairs. Financial assistance is available to those admitted based on need and on academic achievement.

Five-Year Accelerated B.A./M.A. Program with Sciences Po

Students may also apply to participate in a five-year accelerated B.A./M.A. program with Sciences Po, one of Europe's finest schools of political science. The B.A./M.A. Program is aimed principally at students who are interested in international affairs and who would like to develop their intellectual and professional capabilities from an international and multidisciplinary perspective. After the junior year, students spend two years at Sciences Po’s Paris campus completing graduate-level coursework at the Paris School of International Affairs (PSIA), which houses the majority of Sciences Po’s internationally-oriented master’s programs. PSIA is a bilingual institution, thus students may choose to pursue either an English or French track. Students may also elect to pursue a master’s degree at the School of Journalism, School of Communication, or School of Law. Students interested in an academic career may also choose to pursue a research master’s with the Doctoral Program at Sciences Po. Students who are not proficient in French will also pursue French language training during their course of study at Sciences Po. Students will earn a B.A. from Hopkins after their first year in Paris and a master’s from Sciences Po after their second year.

Applicants follow an application and review process similar to the one for the SAIS program. Approximately three to four sophomores are selected each year for the Sciences Po program. Students pay tuition to Johns Hopkins for the first year in Paris and to Sciences Po for the second. Financial aid from Johns Hopkins continues only through the end of a student’s fourth year.

**Progress toward the B.A./M.A. Degrees**

Students in both programs described above spend their first three years at the Homewood campus and the last two at either SAIS or Sciences Po. Students receive the B.A. degree at the end of their first year at either SAIS or Sciences Po and the M.A. at the end of their second year.

Students selected for either of the accelerated programs may not study abroad during their Homewood years, with the exception of summer or intersession programs.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.192.110. Special Opportunities in Undergraduate Learning: Library Research & Proposal Writing Skills for International Studies Students. 1.00 Credit.
This course offers training to undergraduate students in International Studies (and related majors) on the fundamentals of library research and research/grant proposal writing. The course will introduce students to the major research resources in global studies in the humanities and social sciences, strategies and techniques to conduct effective research, and how to use library research to enhance research and grant proposal writing. This course aims to help students learn the basics of research and grant proposal writing and develop research skills for use in their major coursework and major-related research projects.
Instructor(s): Y. Ye.
Area: Social and Behavioral Sciences.

AS.192.401. Political Violence. 2.00 Credits.
This class will function predominantly as a discussion seminar that uses the case of the Lebanese Civil War to examine the causes, duration, and dynamics of civil war as well as the debates surrounding foreign intervention and peacebuilding. Themes include: ethnic violence; economic explanations for civil war; civilian targeting; intra-rebellion dynamics; sexual and gender-based violence; election violence; occupation; peacekeeping; and the Responsibility to Protect.
Instructor(s): S. Parkinson
Area: Social and Behavioral Sciences.

AS.192.402. Military Organizations in the Middle East and North Africa. 2.00 Credits.
This course will examine the diverse roles state and non-state military organizations play in MENA politics, economics, and society. Each week will use an organizational case study as a window into core themes such as military involvement in state economies, militia politics, or combatant discipline in war.
Instructor(s): S. Parkinson
Area: Social and Behavioral Sciences.

AS.192.501. Internship- International Studies. 1.00 Credit.
Instructor(s): S. Morgan.

AS.192.551. Program Abroad: International Studies - Leadership Seminar. 1.00 Credit.
The International Studies Leadership Seminar builds core leadership skills and introduces students to critical social, political and economic policies in their local and international contexts. The seminar takes place in different countries each year and builds upon global partnerships that exist between the International Studies Program, Johns Hopkins University, and academic institutions worldwide. Global partners include Waseda University, SAIS Europe, and Sciences Po, among others. Students engage in joint projects, panel presentations and other assignments designed to develop skills in critical analysis and public speaking. Seminar may be taken multiple times.
Instructor(s): S. Morgan.

AS.192.591. Research- International Studies. 1.00 Credit.
Instructor(s): S. Morgan.

AS.192.598. Independent Study. 3.00 Credits.
Approval Required.
Instructor(s): S. Morgan.

Cross Listed Courses
Anthropology
AS.070.285. Understanding Aid: Anthropological Perspectives for Technology-Based Interventions. 3.00 Credits.
This course combines anthropological perspectives with the discussion and examination of technology-based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.
Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.333. Theologies of Political Life. 3.00 Credits.
This course explores the relationship between modern political forms and theological traditions. Looking at developments both in the West and the postcolonial world, we will examine the multiple ways in which theological traditions have continued to inform how political life is conceived and pursued. In particular, we will focus on the relation between liberalism and the Christian tradition; the turn to messianism in critical theory; the transformation of the šari‘a into a legal form; and its imbrication in anti-colonial politics.
Instructor(s): S. Al-Bahloy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

History
AS.100.117. History of Brazil. 3.00 Credits.
This course is an introduction to the history of Brazil from the 16th century to the present, from the early phases of colonization to the 2014 World Cup.
Instructor(s): G. Paquette
Area: Humanities.

AS.100.121. History of Africa to 1880. 3.00 Credits.
A history of Africa from human evolution to the mid-nineteenth century focusing on key themes in social, economic, and political history.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.129. Introduction to Modern Jewish History. 3.00 Credits.
Study of modern Jewish history from the late 19th century to the present, including: the Holocaust: Extensive attention to US Jewry and State of Israel.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.
AS.100.209. Freshman Seminar: Mexico and the World from Cortés to Cartels. 3.00 Credits.
This introductory course examines Mexico's political, economic, and cultural role in global history from the time of Spanish conquest until the twenty-first century.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.219. Chinese Cultural Revolution. 3.00 Credits.
The Cultural Revolution was Mao Zedong's last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revolution decade and since.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.220. Freshman Seminar: Politics, Information, and the State in Early Modern China and Japan. 3.00 Credits.
This introductory seminar examines culture and politics in early modern East Asia (ca. 1500-1900) by looking at changing modes of communication and attitudes about state control of information and ideology. Freshmen Only.
Instructor(s): E. Mokros
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.246. Colonial Latin American History Survey. 3.00 Credits.
This course offers a general survey of Colonial Latin American history, covering both Spanish and Portuguese America, from European conquest to the revolutionary wars of independence. Emphasis will be placed in exploring the nature and effects of conquest, the making of new pluri-ethnic societies, and the eventual break of these societies from Spain and Portugal.
Instructor(s): G. Garcia Montufar
Area: Humanities, Social and Behavioral Sciences.

AS.100.255. The Haitian Revolution in World History. 3.00 Credits.
This introductory seminar examines the revolution that transformed the slave colony of Saint-Domingue into the first black republic and second independent nation in the Americas, and its repercussions around the world. Non-Majors welcome.
Instructor(s): N. Marvin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.279. Europe since 1945. 3.00 Credits.
This lecture course examines the political, social, and cultural history of postwar Europe with emphasis on the Cold War and the formation of the European Union.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.320. Writing U.S. Empire. 3.00 Credits.
Attends to the composition and interpretive problems raised by studying the history of American imperialism, 1880s-1930s.
Instructor(s): N. Connolly
Writing Intensive.

AS.100.324. Dostoevsky's Russia. 3.00 Credits.
Dostoevsky and the culture of his era but also echoes of his ideas of Russia, religion, ethnicity, freedom, authority, and gender from 1917 until today. Short papers, quizzes.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.342. Colonial Lives: Individuals in the Atlantic World, 1600-1850. 3.00 Credits.
This course traces the emergence of an Atlantic world, 1600-1850, through the lens of biography. Major themes include European colonization, cross-cultural encounters, slavery and trade, imperial warfare, and political revolutions. Prior experience in an introductory history course strongly recommended.
Instructor(s): W. Brown
Area: Humanities, Social and Behavioral Sciences.

AS.100.343. Diaspora, Nation, Race, and Politics. 3.00 Credits.
For millions of people across the globe, political fate in the 20th century was defined at the intersection of diaspora, race, and nation — and this may be true in the 21st century as well. This course, a collaborative effort involving a historian and a political scientist, explores the parallels and divergences in the deployment of these terms in nationalist and transnational mobilization, literature and aesthetics, and group identity formation in Eastern Europe, Africa and the New World of the Americas. Set against the backdrop of the fall of significant empires in the late 19th and early 20th centuries, we will explore themes of migration, human rights, the nation-state system, and racism through history, political sociology, and political and social theory. We will pay particular attention to the theoretically exemplary Jewish and Black experiences of diaspora, race, and nation, engaging both with how those experiences were specially shaped by the imposition of national and racial logics and with Black and Jewish politics and thought in relation to those categories. Readings include Max Weber, W. E. B. Du Bois, Booker T. Washington, Theodor Herzl, Hannah Arendt, Benedict Anderson, Rogers Brubaker, Andrew Zimmerman, Michele Mitchell, David Scott.
Instructor(s): K. Moss; M. Hanchard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.347. Early Modern China. 3.00 Credits.
The history of China from the 16th to the late 19th centuries.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.348. 20th-Century China. 3.00 Credits.
The history of China from the last years of the Qing Empire to the post-Mao reforms.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.353. Youth and Youth Movements during 20th Century: Germany, Britain, and the U.S. 3.00 Credits.
Through texts, music, and films, this course examines the rise of youth as a social and cultural category in a variety of forms, ranging from spontaneous (such as Rock’n’Roll and Techno) to state-organized (Hitler Youth).
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.355. Islam between History and Anthropology. 3.00 Credits.
Co-taught by an anthropologist and a historian, this course will explore recent scholarly debates about—and critiques of—the representations of Islam and Muslim societies.
Instructor(s): N. Khan; T. Shepard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.412. Jewish History in British Mandatory Palestine 1917-1947. 3.00 Credits.
Recent historical writing on Jewish politics, culture, and society in British Mandatory Palestine, 1917-1947. Significant attention will also be paid to work on Palestinian Arab society and politics and to Jewish-Arab-British relations.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.424. Women & Modern Chinese History. 3.00 Credits.
This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women’s experiences for their own political and social agendas. Cross listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.445. African Fiction as History. 3.00 Credits.
An exploration of Modern African history through the African historical novel.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.482. Historiography Mod China. 3.00 Credits.
A survey of assumptions and approaches in the study of modern Chinese history, as written by Chinese, Japanese, and Western historians.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.488. The Early Caribbean and the Atlantic World Seminar. 3.00 Credits.
The Caribbean was the key focal point of overseas European expansion in the early modern world. Its centrality, importance, and significance will be explored.
Instructor(s): P. Morgan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.497. Year of Revolt: 1968 in Europe. 3.00 Credits.
This course will examine the dramatic events of 1968 in Western and Eastern Europe during 1968—a year of social and political revolts, generational conflicts, and cultural activism—as well as their long-term consequences.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Near Eastern Studies
AS.130.170. Diplomacy and Conflict in the Ancient Middle East. 3.00 Credits.
The Middle East is home to the invention of agriculture, cities, and writing. It is also in the Middle East that we find evidence of humanity’s earliest diplomatic activity in, for instance, the actual letters sent by ancient kings to one another, the treaties drawn up after their conflicts, and the inscriptions that commemorate their conquests. In this course, we examine texts such as these to explore questions such as: How do we characterize the international system of the ancient Middle East? Does this system change over the approximately two millennia for which we have documentation? Is it better to approach ancient diplomacy through present-day eyes or in the context of ancient world-views? Is an understanding of diplomacy in the ancient Middle East relevant to our understanding of modern international relations? All texts read in translation.
Instructor(s): J. Lauinger
Area: Humanities.

History of Science Technology
AS.140.398. Godzilla and Fukushima: Japanese Environment in History and Films. 3.00 Credits.
Juxtaposing Japanese environmental history and its reflection in popular media, the course will explore the intersection between technology, environment, and culture. The course will be accompanied by relevant movie screenings.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Philosophy
AS.150.237. Foundations of Modern Political Philosophy. 3.00 Credits.
This course is an introduction to modern political philosophy through an intensive study of the classic texts. The focus will be on the nature and limits of political authority under modern social conditions. Authors included are Machiavelli, Hobbes, Locke, Rousseau and Mill.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.320. Marx: Critique of Political Economy. 3.00 Credits.
A close reading of Marx’s Capital: Volume One. Specific attention will be given to clarification of Marx’s methodology, the foundational categories of his critique of political economy, the systematic unity of his theory, and the underlying normative concepts which inform his work. No previous course in philosophy or social sciences is required.
Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.411. Arabic-Islamic Philosophy. 3.00 Credits.
Introduction to major philosophers of the Arabic-Islamic tradition, including Avicenna, al-Ghazali, and Averroes. Topics addressed include the existence of God, metaphysics (e.g., causality), human freedom and knowledge, revelation and reason.
Instructor(s): S. Ogden
Area: Humanities.
Economics

AS.180.228. Economic Development. 3.00 Credits.
Diagnostic test on Elements of Economics is required to be taken in the second week. A review of the historical experience in presently developed economies, model of development, planning techniques, and development policies. The course is aimed at identifying major economic questions relevant to less developed economies and to showing how economic analysis can be used further to understand the obstacles to development and to formulate appropriate policies.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): L. Ball; M. Gersovitz; R. Moffitt
Area: Social and Behavioral Sciences.

AS.180.241. International Trade. 3.00 Credits.
This course presents international trade theory and applies it to policy analysis and empirical studies. The theory covers both the classical theory of comparative advantage as well as recent advances of new trade theory. A broad range of real-world topics, including trade flows, factor mobility, trade policy and institutions will be discussed.
Prerequisites: AS.180.102.
Instructor(s): T. Bertrand
Area: Social and Behavioral Sciences.

AS.180.242. International Monetary Economics. 3.00 Credits.
This course presents International Monetary Economics theory and applies it towards gaining an understanding of recent events and current policy issues. The theory presented in this course covers a broad range of topics including exchange rate determination, monetary and fiscal policy in an open economy, balance of payments crises, the choice of exchange rate systems, and international debt. The insights provided by these theoretical frameworks will enable us to discuss topics such as the current global financial crisis, global financial imbalances, the Chinese exchange rate regime, and proposed changes in the international financial architecture.
Prerequisites: AS.180.102 AS.180.101
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

AS.180.266. Financial Markets and Institutions. 3.00 Credits.
Understanding design and functioning of financial markets and institutions, connecting theoretical foundations and real-world applications and cases. Basic principles of asymmetric information problems, management of risk. Money, bond, and equity markets; investment banking, security brokers, and venture capital firms; structure, competition, and regulation of commercial banks. Importance of electronic technology on financial systems.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): J. Faust
Area: Social and Behavioral Sciences.

AS.180.289. Economics of Health. 3.00 Credits.
Application of economic concepts and analysis to the health services system. Review of empirical studies of demand for health services, behavior of providers, and relationship of health services to population health levels. Discussion of current policy issues relating to financing and and resource allocation.
Prerequisites: AS.180.102
Instructor(s): D. Bishai
Area: Social and Behavioral Sciences.

AS.180.303. Topics in International Macroeconomics and Finance. 3.00 Credits.
The course will review selected topics in international macroeconomics and finance. The topics for the Fall of 2015 include: financial globalization; international portfolio diversification; the problems posed by “sudden stops” in capital flows to emerging markets; global imbalances and global demand rebalancing; how different exchange rate regimes have fared in the global financial crisis; sovereign default in the light of the Argentine experience; and the ongoing Russian currency and financial crisis. The course involves mathematical modeling as well as data analysis.
Prerequisites: Pre-reqs: AS.180.101 AND AS.180.102 AND AS.180.302
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

AS.180.351. Labor Economics. 3.00 Credits.
The course discusses various issues in labor markets from the perspective of economic theory. We first study the major forces at work that shape labor market behavior; firms’ labor demand and workers’ labor supply. Then we discuss the equilibrium behavior of employment and wages. Using these tools, we also cover various applied topics in labor economics, such as minimum wage regulations, male-female wage differentials, human capital investment, worker mobility, and unemployment.
Prerequisites: Prereq: AS.180.301
Instructor(s): Y. Takahashi
Area: Social and Behavioral Sciences.

AS.180.355. Economics of Poverty/Inequality. 3.00 Credits.
This course focuses on the economics of poverty and inequality. It covers the measurement of poverty and inequality, facts and trends over time, the causes of poverty and inequality with a focus on those related to earnings and the labor market, and public policy toward poverty and inequality, covering both taxation and government expenditure and programs. By the nature of the material, the course is fairly statistical and quantitative. Students should have an intermediate understanding of microeconomic concepts. Basic knowledge of regression analysis is also helpful.
Prerequisites: AS.180.301
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

AS.180.389. Social Policy Implications of Behavioral Economics. 3.00 Credits.
Economists increasingly incorporate insights from psychology into models of rational decision-making. Known as behavioral economics, this line of research considers how, for example, emotions, rules-of-thumb, biased beliefs and time-inconsistent preferences influence how we make choices. Behavioral economics increasingly pervades policy discussions on topics as diverse as: obesity, the role of media, subprime mortgages and voting patterns. Behavioral models are certainly novel, but do they help us to design superior social policies? With the goal of preparing students to address this question, this course (1) provides a thorough overview of the main contributions of behavioral economics, highlighting departures from more traditional economic models and (2) emphasizes how behavioral economic models might (or might not) improve how we think about social policy.
Prerequisites: Preqs: AS.180.301 AND AS.180.334 or knowledge of statistical analysis up to the level of multi-variate regression.
Instructor(s): N. Papageorge
Area: Social and Behavioral Sciences.
AS.180.390. Health Economics & Developing Countries. 3.00 Credits.
Prerequisites: AS.180.301
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.391. Economics of China. 3.00 Credits.
Discussion of the economic experience of Post-War China, primarily emphasizing topics rather than historical narrative: agriculture, industry including corporate governance and public enterprises, international trade, population, migration, education, health, public finances among other topics.
Prerequisites: AS.180.301
Instructor(s): M. Gersovitz
Writing Intensive.

Political Science
AS.190.101. Introduction to American Politics. 3.00 Credits.
This course examines the ideals and operation of the American political system. It seeks to understand how our institutions and politics work, why they work as they do, and what the consequences are for representative government in the United States. Emphasis is placed on the federal government and its electoral, legislative, and executive structures and processes. As useful and appropriate, attention is also given to the federal courts and to the role of the states. The purpose of the course is to understand and confront the character and problems of modern government in the United States in a highly polarized and plebiscitary era.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

AS.190.102. Introduction To Comparative Politics. 3.00 Credits.
To understand politics, the sound bites of the modern media take us only so far. In this course, we will take a step back and implement an intellectually rigorous method. Scholars of comparative politics use the method of comparison in order to illuminate important political phenomena of our times. Following this method, we will embark on a scholarly tour of the world and compare the politics of various countries. We will also trace these politics back to their historical sources. We will work from the assumption that there is something to be gained from such comparisons across space and time.
Instructor(s): N. Jabko
Area: Social and Behavioral Sciences.

AS.190.108. Freshmen Seminar: The Human Condition. 3.00 Credits.
This freshman seminar will focus on reading just one book, The Human Condition, by Hannah Arendt. Such a narrow focus is justified by the breadth of topics the book itself discusses and the influence these various discussions have had on modern political thought. Among the various topics that will be studied and talked about are the meaning of the distinctions Arendt makes between "public," "private," and "social," as well as between "labor," "work," and "action." In the course of their studies, students will be challenged to think about the relation of philosophy to politics, the significance of the scientific revolution for public life, the character of contemporary society, and what it means to be "free." Also, by focusing on just one book, students will have the opportunity to learn how to do the kind of close reading and textual analysis success in college requires. In addition to reading assignments, students will be required to write four short papers.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.109. Politics of East Asia. 3.00 Credits.
This course examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. We analyze two enduring themes of classic and contemporary scholarship in comparative politics: development and democracy. The purpose is to introduce students to the various schools of thought within comparative politics as well as to the central debates concerning East Asian politics.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.199. Freshman Seminar: The Politics of Water. 3.00 Credits.
Exploration of how international and domestic political processes shape and are shaped by water - its availability, its trajectory, and its quality. Students will learn to use different research methods and writing strategies. Class will involve seminar discussions and fieldtrips to sites in and around the Baltimore area, some carried out jointly with Anthropology
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

AS.190.209. Contemporary International Politics. 3.00 Credits.
An introduction to international politics. Emphasis will be on continuity and change in international politics and the causes of war and peace. The first half of the course will focus on events prior to the end of the Cold War, including the Peloponnesian War, the European balance of power, imperialism, the origins and consequences of WWI and WWII, and the Cold War. The second half will focus on international politics since 1990, including globalization, whether democracies produce peace, the impact of weapons of mass destruction, terrorism, and the prospects for peace in the 21st century. Theories of realism and liberalism will also be considered.
Instructor(s): S. David
Area: Social and Behavioral Sciences.

AS.190.220. Global Security Politics. 3.00 Credits.
Contemporary and emerging technologies of nuclear (weapons, terrorism, energy) outer space (missiles, missile defense, asteroids), biosecurity (bioweapons, pandemics, terrorism) and cyber (war, spying, surveillance) and implications for security, international politics, arms control, and political freedom.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.226. Global Governance. 3.00 Credits.
Global problems like poverty, financial instability, human rights abuses, and climate change threaten both international order and human well-being. In the absence of a world state, these problems must be addressed by an increasingly complex, transnational network of organizations and social groups. First, we will aim to understand and explain how global problems are governed through detailed case studies of International Organizations and Non-Governmental Organizations such as the United Nations, World Bank, Intergovernmental Panel on Climate Change, Amnesty International and more. Second, we will critically evaluate the successes and failures of these organizations and explore the possibilities for improving democratic governance at the global level.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences.
AS.190.227. U.S. Foreign Policy. 3.00 Credits.
This course will provide and analysis of US foreign policy with a focus on the interests, institutions, and ideas underpinning its development. While the course will offer a broader survey, the emphasis will be on important developments during the Cold War, such as the articulation of containment strategies and nuclear deterrence, and the analysis of contemporary foreign policy questions, including the problems of terrorism and failed states. In addition to security issues, attention will also be paid to significant developments in international trade policy. Instructor(s): S. Schmidt
Area: Social and Behavioral Sciences.

AS.190.280. Political Persuasion. 3.00 Credits.
An introduction to Euro-American political thought, with a focus on the role of language, rhetoric, and Eros within politics. Texts by Plato, Machiavelli, Hobbes, Walt Whitman, and Emma Goldman.
Instructor(s): J. Bennett
Area: Social and Behavioral Sciences.

AS.190.281. Virtue, Labor, and Power (Classics of Political Thought II). 3.00 Credits.
This is not a class in the history of political thought. Instead, it is an opportunity for a selective, circumscribed, but very focused engagement with some of the most powerful and provocative texts in that history. We will read selections from six thinkers (Socrates, Machiavelli, Locke, Marx, Nietzsche, and Foucault), focusing on three themes (Virtue, Labor, and Power). These texts have all profoundly shaped the way we think about politics, and the are texts that resonate with our own political problematics today.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences.

AS.190.283. The Politics of Memory (Classics of Political Thought IV). 3.00 Credits.
Was George Orwell right that those who control the past control the future—and those who control the present control the past? This is a course on the politics of memory: how political power shapes what is available to be remembered, the timing, spaces, and occasions of commemoration, and who is permitted to invoke (or disavow) the past. We will engage a range of highly contested works of ancient, modern and contemporary political theory to investigate how the past might haunt present day politics through memories that are conscious and unconscious. The themes we will take up include: the correspondence between memory and freedom; whether we ever be free given that we are creatures endowed with memory, whether it is sometimes politically necessary (or even possible) for people to forget, and what politics of memory emboldens, or threatens, democracy. There are no prerequisites for this course.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.301. Global Political Economy. 3.00 Credits.
Examines the intersection of politics and economics in global affairs. Focuses on theoretical approaches to global political economy; institutions of governance of the global political economy; flows of goods, services, capital, and information; and transborder problems. Recommended Course Background: AS.190.209
Prerequisites: Not open if you have previously taken AS.190.216.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.307. Race, Politics and Literature. 3.00 Credits.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.311. Disposable People: Race, Immigration and Biopolitics. 3.00 Credits.
This course will explore theories and practices of race and immigration in order to illuminate the proliferation of populations regarded as disposable in contemporary politics. We will pay special attention to the contestable criteria used to determine eligibility for membership in the human race. We will also examine how political power influences the relays between citizenship status and those whose lives are worthy of protection, and those who should be allowed to die.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.320. Politics Of East Asia. 3.00 Credits.
Examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. Topics include state-society relations, late development, nationalism, democratization, political culture, social movements, and globalization.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.325. Democracy And Elections. 3.00 Credits.
An examination of most aspects of democratic elections with the exception of the behavior of voters. Topics include the impact of various electoral systems and administrative reforms on the outcome of elections, standards for evaluations of electoral systems, and the impact of the Arrow problem on normative theories of democratic elections.
Instructor(s): R. Katz
Area: Social and Behavioral Sciences.

AS.190.326. Global and Local Politics of Information. 3.00 Credits.
Considers global and comparative politics of information, information technologies, and the Internet. Examines governance of information (ownership of information, rights to information, privacy) and governance of information technologies, and the Internet. Examines governance of information and biological weapons, ballistic missile defense and proliferation. Students who previously took AS.190.327 Politics of Information may not take this course.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.327. Global Security-Nuclear Age. 3.00 Credits.
This course examines the impact of weapons of mass destruction on international politics with an emphasis on security issues. The first half of the course focuses on the history of nuclear weapons development during the Cold War and theories of deterrence. The second half of the class considers contemporary issues including terrorism, chemical and biological weapons, ballistic missile defense and proliferation. Requirements include a midterm, final and a ten page paper.
Instructor(s): S. David
Area: Social and Behavioral Sciences.
AS.190.331. Comparative Racial Politics. 3.00 Credits.  
Students will learn to utilize qualitative, interpretive methods of comparative politics to examine dynamics of racial and/or ethnic politics in the nation-states of Cuba, Brazil, Britain and France, Germany, and the United States. Readings will emphasize the role of the state, political economy, national culture, racist ideologies and anti-racist politics in the formation, maintenance and transformation of conditions of race-based inequalities. Students will also become familiar with theories and concepts of race and ethnicity, and the histories of social movements in the aforementioned societies founded, in part, on racial and/or ethnic identification as a response to inequality. Formerly titled: Race and Racism in Comparative Perspective.  
Instructor(s): M. Hanchard  
Area: Social and Behavioral Sciences.  

AS.190.333. American Constitutional Law. 3.00 Credits.  
This course covers enduring debates about the way the Constitution has structured the U.S. government and about which powers the Constitution assigns to the federal government and to the states. We will examine these debates in the context of American political history and thought by studying the writings of prominent participants, and landmark Supreme Court cases.  
Instructor(s): E. Zackin  
Area: Social and Behavioral Sciences.  

AS.190.334. Constitutional Law. 3.00 Credits.  
The second semester of a two semester course. Topics include executive and emergency power, racial and gender equality, and selected free speech and religious freedom issues.  
Prerequisites: AS.190.333  
Instructor(s): E. Zackin  
Area: Social and Behavioral Sciences.  

AS.190.335. Imagining Borders. 3.00 Credits.  
What is a border and why do borders matter in global politics. What do borders mean under conditions of globalization? An examination of the politics of borders, transborder flows, and networks within and across borders. The readings which come from political science and other disciplines, will include theoretical and case-specific works.  
Instructor(s): R. Marlin-Bennett  
Area: Social and Behavioral Sciences.  

AS.190.337. The Constitution and the Criminal Justice System. 3.00 Credits.  
Explores how the Constitution has shaped the theory and practice of the American criminal justice system, including arrests, searches and seizure of evidence, interrogation, prosecution, adjudication and plea bargaining, and sentencing. What is a fair trial? What is due process? What is equality before the law? What are the limits of capital punishment?  
Instructor(s): L. Foley  
Area: Social and Behavioral Sciences.  

AS.190.339. American Racial Politics. 3.00 Credits.  
Recommended Course Background: AS.190.214  
Instructor(s): L. Spence  
Area: Social and Behavioral Sciences.  

AS.190.340. Black Politics I. 3.00 Credits.  
This course is a survey of the bases and substance of politics among black Americans and the relation of black politics to the American political system up to the end of Jim Crow. The intention is both to provide a general sense of pertinent issues and relations over this period as a way of helping to make sense of the present and to develop criteria for evaluating political scientists’ and others’ claims regarding the status and characteristics of black American political activity.  
Instructor(s): L. Spence  
Area: Social and Behavioral Sciences.  

AS.190.342. Black Politics II. 3.00 Credits.  
Recommended Course Background: AS.190.340.  
Instructor(s): L. Spence  
Area: Social and Behavioral Sciences.  

AS.190.368. Pluralism. 3.00 Credits.  
This seminar will explore the theory and politics of pluralism: from European debates over religious tolerance to American debates over constitutional founding; from liberal political philosophy to radical democracy. Authors may include Bentley, Dahl, Locke, Madison, Ranciere, Rawls, Young. Recommended Course Background: Previous course in political theory or permission of instructor.  
Instructor(s): S. Chambers  
Area: Social and Behavioral Sciences.  

AS.190.391. Time to Kill: Race, Punishment, Death and Desire. 3.00 Credits.  
This course examines the role of race in determining who deserves to be punished, the timing and occasions of punitive action and how long punishment should endure. Key to our inquiry is how racialized presumptions about human desire might justify punitive logics of power. The class explores inequalities in the distribution of punishment and death in order to illuminate how race shapes questions of whose time is more valuable, who lives and who dies, and ultimately whose lives count as human.  
Instructor(s): P. Brendese  
Area: Social and Behavioral Sciences.  

AS.190.393. Theories of Constitutional Interpretation. 3.00 Credits.  
In this course, we will read and discuss a variety of arguments about how best to interpret constitutional texts, with particular attention to debates about the U.S. Constitution. The course will also cover debates about the role of ordinary people, legislatures, and judges in determining the content of constitutional law.  
Instructor(s): E. Zackin  
Area: Social and Behavioral Sciences.
AS.190.396. Capitalism and Ecology. 3.00 Credits.
Capitalism and Ecology focuses on the relations between capitalism and climate during the era of the Anthropocene. How do capitalist processes of extraction, consumption, production and governance contribute to the pace of climate warming, glacier flows, the ocean conveyor system, species loss and other phenomena? What are the effects and the possible modes of political response? How do the nonhuman, self-organizing processes change on their own as they also amplify the effects of capitalist emissions? The course combines texts on capitalism and activism with those by geoscientists on how the nonhuman systems work. Books by Michael Benton, Hayek, Naomi Klein, Fred Hirsch, Fred Pearce, Maurizio Lazzarato and Connolly will be drawn upon to engage these issues. A previous course in political theory is recommended. The class is organized around student presentations on assigned readings. Two papers, 10-12 pages in length. Extensive class discussion.
Instructor(s): W. Connolly
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

AS.190.398. Politics Of Good & Evil. 3.00 Credits.
The politics of good and evil places a set of classic myths into conversation with recent philosophical and political work on good and evil. The myths include the Book of Job, Genesis (J version), two dramas by Sophocles, a reading from Augustine, and Voltaire’s Candide. Texts by Nietzsche, William James and Connolly are then placed into conversation with each other and hose mythic texts. Kohlberg’s The Sixth Extinction closes the class, allowing us to look again at the relevance of myth to today. This class is organized around “elemental theory” in which diverse existential stories jostle and disturb both each other and us. Previous work in theory is highly recommended. Assignments: A class presentation, two 10-12 page papers, extensive class discussion.
Instructor(s): W. Connolly
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.408. Sovereignty: Historical Perspectives and Contemporary Issues. 3.00 Credits.
This seminar provides an in-depth exploration of the concept of sovereignty by examining its historical development and its use in international relations scholarship. Our discussion will also be informed by works in political theory and the international law literature. The course is open to advanced undergraduate students and graduate students.
Instructor(s): S. Schmidt
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.412. Political Violence. 3.00 Credits.
An examination of the ways in which violence has been used to secure political ends. Topics include terrorism, assassination, genocide, coups, rebellions and war itself. Students examine what makes types of political violence unique and what unites them. ( Formerly AS.190.372)
Instructor(s): S. David
Area: Social and Behavioral Sciences.

AS.190.425. The New Deal and American Politics. 3.00 Credits.
This seminar explores how the New Deal, the fundamental moment in the post-Civil War United States, has structured politics and government across a variety of domains ever since. Topics include presidential leadership, executive power, political parties, labor, race, and the welfare state.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.426. Science and Expertise in Global Politics. 3.00 Credits.
An in-depth examination of complex global problems that demand the effective use of scientific and expert knowledge in global governance. We will begin with a theoretical overview covering different perspectives on the role of knowledge and technology in global politics before looking in more detail at case studies drawn from environmental politics, nuclear management, colonial history, international political economy, UN peacekeeping, and more.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.430. Time and Punishment. 3.00 Credits.
“If you can’t do the time, don’t do the crime.” According to ask.com, this common expression was made popular in the 1970s by the theme song for the television show “Beretta.” Aside from amusing us with the irony that the star of “Beretta” was Robert Blake who was later charged with the murder of Bony Lee Bakely, the expression raises a profound issue: What is the relationship between punishment and time? This course will explore that question. Topics to be discussed include different philosophical understandings and experiences of time, views of mortality and fate, theories of punishment, specific punishments in the U.S. (including sentences of juveniles, life, death, and LWOP), as well as punishments that are not specifically meted out but are known to be the consequences of political, social, and economic circumstance. Students will read texts in criminology, political theory, philosophy, and jurisprudence, as well as a selection of Supreme Court cases, novels, and short stories. This writing intensive course is limited to undergraduates who have taken at least one “Classics of Political Thought” course (190.280, 190.281, 190.282, or 190.283).
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.436. Republican Orders and Sustainability. 3.00 Credits.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

AS.190.438. Violence and Politics. 3.00 Credits.
This seminar will address the role of violence—both domestic and international—in political life. Though most claim to abhor violence, since the advent of recorded history, violence and politics have been intimately related. States practice violence against internal and external foes. Political dissidents engage in violence against states. Competing political forces inflict violence upon one another. Writing in 1924, Winston Churchill declared—and not without reason—that, The story of the human race is war. Indeed, violence and the threat of violence are the most potent forces in political life. It is, to be sure, often averred that problems can never truly be solved by the use of force. Violence, the saying goes, is not the answer. This adage certainly appeals to our moral sensibilities. But whether or not violence is the answer presumably depends upon the question being asked. For better or worse, it is violence that usually provides the most definitive answers to three of the major questions of political life—statehood, territoriality and power. Violent struggle, in the form of war, revolution, civil war, terrorism and the like, more than any other immediate factor, determines what states will exist and their relative power, what territories they will occupy, and which groups will and will not exercise power within them.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences
Writing Intensive.
AS.190.441. Comparative European Politics. 3.00 Credits.
In comparison with other regions of the world, Europe can easily appear as a pacified and somewhat boring place. This course will question this stereotype through an examination of European politics in historical and cross-national perspective. From a historical perspective, Europe has been the crucible of modern politics. And to this day, Europe remains a locus of intense conflict as well as remarkably diverse experimentation. We will read seminal scholarly works as well as recent comparative politics literature on European politics. The goal is to understand and discuss central concepts that comparative politics scholars mobilize in the study of European politics across time and space. Topics will include: political, legal, and economic governance; the evolution of democracy, the welfare state, partisan politics, immigration, race, and religion; European integration and globalization.
Instructor(s): N. Jabko
Area: Social and Behavioral Sciences.

AS.190.442. Civil Society. 3.00 Credits.
This course explores classic and contemporary debates on the concept of civil society and critically examines its analytical value in light of recent developments. Topics include the relationship between civil society, the state, and markets, the role of civil society in development and democratization, social capital, and global civil society. This course is open to graduate students from any discipline. Advanced undergraduate students must obtain permission from the instructor and are expected to keep up with graduate students during class discussions.
Instructor(s): E. Chung
Writing Intensive.

AS.190.471. The University and Society. 3.00 Credits.
In the 20th century, American universities became the envy of the world, leading in most categories of scholarly productivity and attracting students from every nation. In recent years, though, American higher education has come to face a number of challenges including rapidly rising costs, administrative bloat, corporatization and moocification. We will examine the problems and promises of American higher education, the political struggles within the university and the place of the university in the larger society. Upper classes and Grad Students only.
Instructor(s): B. Ginsberg; R. Kargon
Area: Social and Behavioral Sciences.

AS.190.491. Game Theory in the Social Sciences. 3.00 Credits.
Strategic thinking is a fundamental component of many political and economic phenomena, from international wars and national elections to wage bargains and monopoly power. Game Theory is a set of ideas and techniques for analyzing strategic interactions and making predictions about its outcomes. This course provides an introduction to Game Theory and its main applications to relevant political and social outcomes. Juniors and Seniors Only.
Prerequisites: AS.110.106 or AS.110.108
Instructor(s): S. Mazzuca
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.190.678. Law and Politics.
As a field, Law and Politics has evolved from the study of constitutional law and judicial politics to the political behavior of judges and their associates to the study of law and society, the operation of law and courts "on the ground" in the international arena as well as in the United States, historical institutionalism, and the carceral state. In this graduate course, we will review some of the classic texts in the field, with a focus on the tension between legal institutions and democratic politics. In particular, we will examine how that tension is manifest in the foundations of the American political system and in critical reflection on contemporary practices of American democracy. Students will turn in response papers every week on the reading. In addition, there will be two 10-20 page papers due during the semester. Graduate Students Only.
Instructor(s): E. Zackin; J. Culbert
Area: Social and Behavioral Sciences.

AS.191.107. Global Politics in Theory and Film. 3.00 Credits.
This class offers an introduction to different approaches to the study of international politics by using film, literature, and political theory. The class explores realist, constructivist, feminist, and critical theories of global politics. It addresses two broad themes: the emergence of global political spaces and, second, the implications of "globalization" for contemporary politics. The class both provides an introduction to the study of international politics and takes an in-depth look at the global.
Instructor(s): B. Meiches
Area: Social and Behavioral Sciences.

AS.191.109. Freshman Seminar: American Democracy and its Discontents. 3.00 Credits.
Dean's Prize Freshman Seminar
Instructor(s): K. Anfinson
Area: Social and Behavioral Sciences
Writing Intensive.

AS.191.111. The Limits of Tolerance: Nation-States, Immigration, and Islam in Europe. 3.00 Credits.
An examination of the politics and policies affecting the experiences of Muslim immigrants in Europe, this course explores the connections between national identity, group and individual identities, and religious beliefs.
Instructor(s): M. Luhman
Area: Social and Behavioral Sciences.

AS.191.112. Freshman Seminar: War, The Garrison State & The American Security Tradition. 3.00 Credits.
Interstate war threatens constitutional government because of various power concentrations necessary for survival. For much of its existence, the United States avoided this dilemma given its separated geographic location vis-à-vis Europe, and continental hegemony. However, technological advances, specifically nuclear weapons and intercontinental means of delivery, reduced American effective distance from large despotic powers in the 20th century. In this nuclear age, how would it be possible to prepare for total war without becoming a garrison state? Dean's Prize Freshman Seminar
Instructor(s): R. Fried
Area: Social and Behavioral Sciences.

AS.191.114. Free Expression in the 21st Century. 3.00 Credits.
This course will explore the theoretical underpinnings of the freedom of expression protection and some of the key contemporary debates that surround free expression in an age of mobilization, globalization, and digitization. Dean's Prize Freshman Seminar
Instructor(s): G. Jones
Area: Social and Behavioral Sciences
Writing Intensive.
AS.191.309. Non-Western Political Theory. 3.00 Credits.
This course is designed to introduce and critically examine some of the most influential non-western traditions, thinkers, texts, and ideas in the global history of political thought. We will focus on material from the Middle East, South Asia, and East Asia. Thinkers covered in the course include: Al-Mawardi, Confucius, Lao Tzu, Sayyid Qutb, and Tiruvalluvar. We will also read key portions of the following texts: Qur’an, Law Code of Manu, and the Mahabharata.
Instructor(s): S. Gray
Area: Social and Behavioral Sciences
Writing Intensive.

AS.191.321. Anti-colonial and Post-colonial Revolutions. 3.00 Credits.
This course will explore various revolutions in the colonial world first looking to the Haitian and Spanish American revolutions of the 19th century. Then moving to the 20th century, we examine African and Indian independence through the writings of Franz Fanon on the Algerian revolution and through Gandhi’s treatise on Indian self-determination. We subsequently examine revolutionary movements in the context of the Cold War and the tension between the communist tradition and a budding non-aligned movement among former colonial states. We explore these issues through the works of leaders like Ho Chi Minh, Jawaharlal Nehru and Thomas Sankara. Lastly, we turn to Steven Biko and his writing on the South African anti-Apartheid revolution and to Eastern European independence from the Soviet Union through the writings of Vaclav Havel. In the final class we will wrap up by exploring some of the themes from the course and their relevance for our thinking about the Arab Spring. The course aims at an international understanding of the ideas that traversed these revolutions and of how the people involved understood the relationship of their movement to their imaginings and aspirations for broader global change. We explore how important leaders made innovations to the political vocabulary of their time in their pursuit of change. But in thinking through their ideas, we will pose critical questions on themes like race, class and gender.
Instructor(s): A. Stack
Area: Social and Behavioral Sciences.

AS.191.324. International Relations of Security and Development. 3.00 Credits.
This course examines how the politics of security and development shape relations between “global North” and “global South”, engaging both historical and contemporary debates around intervention, humanitarianism and development.
Instructor(s): C. McNeill
Area: Social and Behavioral Sciences.

AS.191.330. The Political Subject of Economics. 3.00 Credits.
Instructor(s): T. Hanafin
Area: Social and Behavioral Sciences.

AS.191.333. Philosophies of Capitalism from Rousseau to Hayek. 3.00 Credits.
Although we commonly speak of capitalism as if there were a consensus regarding the basic tendencies of this peculiar economic system, there is a vast amount of disagreement among philosophers and social scientists about the most fundamental issues. These arguments range from moral arguments over the (in)justice of capitalist economies to more profound ontological debates about what capitalism is and what it means for human experience. This course examines these issues by reading in conjunction a set of profound economic thinkers, including Rousseau, Adam Smith, Hayek, and Karl Polanyi.
Instructor(s): C. England
Area: Social and Behavioral Sciences.

AS.191.335. Arab-Israeli Conflict (IR). 3.00 Credits.
The course will focus on the origin and development of the Arab-Israeli conflict from its beginnings when Palestine was controlled by the Ottoman Empire, through World War I, The British Mandate over Palestine, and the first Arab-Israeli war (1947-1949). It will then examine the period of the Arab-Israeli wars of 1956, 1967, 1973, and 1982, the Palestinian Intifadas (1987-1993 and 2000-2005); and the development of the Arab-Israeli peace process from its beginnings with the Egyptian-Israeli treaty of 1979, the Oslo I and Oslo II agreements of 1993 and 1995, Israel’s peace treaty with Jordan of 1994, the Road Map of 2003; and the periodic peace talks between Israel and Syria. The conflict will be analyzed against the background of great power intervention in the Middle East, the rise of political Islam and the dynamics of Intra-Arab politics, and will consider the impact of the Arab Spring.
Instructor(s): R. Freedman
Area: Social and Behavioral Sciences.

AS.191.345. Russian Foreign Policy (IR). 3.00 Credits.
This course will explore the evolution of Russian Foreign Policy from Czarist times to the present. The main theme will be the question of continuity and change, as the course will seek to determine to what degree current Russian Foreign Policy is rooted in the Czarist(1613-1917) and Soviet(1917-1991) periods, and to what degree it has operated since 1991 on a new basis. The main emphasis of the course will be on Russia’s relations with the United States and Europe, China, the Middle East and the countries of the former Soviet Union—especially Ukraine, the Baltic States, Transcaucasia and Central Asia. The course will conclude with an analysis of the Russian reaction to the Arab Spring and its impact both on Russian domestic politics and on Russian foreign policy.
Instructor(s): R. Freedman
Area: Social and Behavioral Sciences.

AS.191.346. American Political Parties. 3.00 Credits.
This course examines the major American political party organizations and the party system in relation to the electorate, interest groups and the institutions of American government since 1964.
Instructor(s): A. Hiramatsu
Area: Social and Behavioral Sciences.

AS.191.359. Size Matters: Small, medium and large states in global politics. 3.00 Credits.
Do large states dictate the terms in global politics? Are small states doomed to vulnerability in an anarchic world? And are medium states stuck in-between, incapable of exerting any real influence? This course explores whether size is a determinant of foreign policy, security calculus, democratic or authoritative proclivity, and success in global political economy.
Instructor(s): J. Wang
Area: Social and Behavioral Sciences
Writing Intensive.

AS.191.373. Greek and Christian Political Theory. 3.00 Credits.
This seminar will carefully examine some of the most important and influential texts and thinkers in the early Greek and Christian traditions. We will read works by Homer, Hesiod, Thucydides, Sophocles, Plato, Aristotle, Augustine, and Aquinas.
Instructor(s): S. Gray
Area: Social and Behavioral Sciences
Writing Intensive.

AS.191.393. The Arab Spring and the New Revolution. 3.00 Credits.
Instructor(s): R. Ford
Area: Social and Behavioral Sciences.
AS.191.399. The Political Economy of Development. 3.00 Credits.
Ideas about the processes of economic development have undergone significant change since the end of World War II. The theory and practice of "development" has evolved over the intervening decades as both the structures of national economies and global markets have changed. Indeed, we might no longer agree what development is, who it is for and whether it is desirable. Today, development as a concept and a rallying cry is often expanded and reshaped to mean enforcing 'market reform,' monitoring multi;ateral aid programs, or even hastening globalization. How did this happen? What does it mean? How did we get to where we are today?
Instructor(s): A. Naseemullah
Area: Social and Behavioral Sciences.

AS.191.402. Numbers, Pictures, Politics. 3.00 Credits.
Aitchison students only.
Instructor(s): L. Drutman
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.191.416. International Human Rights. 3.00 Credits.
Develops an understanding of what human rights are and how they work at the international level. Also examines critical accounts of human rights as vehicles of power.
Instructor(s): A. Ross
Area: Social and Behavioral Sciences
Writing Intensive.

AS.191.417. Global Governance in A Diverse World. 3.00 Credits.
Studies how and why international organizations wield authority in a world of sovereign states. Also considers non-state actors and the globalized context of communication in which global governance is practiced.
Instructor(s): A. Ross
Area: Social and Behavioral Sciences
Writing Intensive.

German Romance Languages Literatures
AS.211.265. Panorama of German Thought. 3.00 Credits.
Classics of German thought since the Enlightenment, with emphasis on philosophies of history and human development, as well as social and cultural theory. Authors include Herder, Lessing, Kant, Schiller, Humboldt, Hegel, Marx, Nietzsche, Weber, and Benjamin.
Instructor(s): P. Jelavich
Area: Humanities
Writing Intensive.

AS.211.341. Power and Resistance: Approaches to French Political Thought.. 3.00 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.211.380. Modern Latin American Culture. 3.00 Credits.
Taught in Spanish. This course will explore the fundamental aspects of Latin-America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin-America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.312
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization. 3.00 Credits.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.212.341. Power and Resistance: Approaches to French Political Thought.. 3.00 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.
AS.213.104. Freshman Seminar: Weimar on the Pacific: German Exile Culture in the United States. 3.00 Credits.
Freshmen seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.265. Panorama of German Thought. 3.00 Credits.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.305. Contemporary German Film. 3.00 Credits.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarck’s The Lives of Others (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s Head-On (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s Goodbye, Lenin! (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or Nouvelle Vague Allemande. Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 – discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.322. Museums and Jews, Jews in Museums. 3.00 Credits.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.
AS.213.387. Major City, Minor Literature? Berlin in German-Jewish and Yiddish Literature. 3.00 Credits.

Between the two World Wars, a period of intense artistic and intellectual vitality, Berlin was an international center for theater, visual arts, and literature. Many important Yiddish-language writers were drawn to Berlin and, together with their German-language counterparts, produced a body of literature that explores issues of modernity and identity. By comparing works in Yiddish and German, we will learn about inter-War Berlin’s cultural diversity and richness, while also gaining insight into the particular issues of writing about Jewish identity in the 1920s, and the implications of writing in a minority language (Yiddish). We will read works by authors including Joseph Roth and Alfred Döblin in German, and Moyshe Kulbak and David Bergelson in Yiddish. All texts will be in translation. Some questions we will explore include: • What is a minority/minor language or literature? • How did German and Yiddish interact in cultural and social spheres? • Can texts in different languages comprise a single body of literature? • What did it mean to be German and what did it mean to be Jewish? • Are assimilation and hybridity useful concepts? • Is there such a thing as Jewish modernism? • How did literature of the period respond to the rise of the Nazi party and the intensification of antisemitism?

Instructor(s): S. Spinner
Area: Humanities

The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncaglio and Silva Passuni.

Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.327. Modern Political Thought in Latin America. 3.00 Credits.

Sophomores, Juniors and Seniors only. The course is an introduction to modern political thought in Latin America. It draws on essays and novels written by major and influential political thinkers such as D.F. Sarmiento, Gonzalez Prada, J.C. Mariategui, Leopoldo Zea, J. E. Rodo, Octavio Paz, Jose Revueltas, Jose Maria Arguedas, Mario Vargas Llosa, Darcy Ribeiro, Enrique Dussel and the authors of the Sumac Kawasy as well as Liberation Theology central writings. The course will be taught in English. Students wishing to do work in the original Spanish or Portuguese will be encouraged to do so.

Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.350. Mexico: An interdisciplinary approach to the construction of our image and understanding of Mexico. 3.00 Credits.

The course studies the accounts of the Mexica on the journey and foundation of Tenochtitlan. Later we move on to the clash of cultures with the Spanish conquest (1521). After studying the art of the colonial period, the course focuses of the Mexican Revolution of 1910 and ends with a consideration of the image of the nation in murals and writers such as Octavio Paz, Carlos Fuentes and Elena Garro. Taught in English.

Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.342. The Holocaust in Israeli Society and Culture. 3.00 Credits.

This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.

Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.215.370. Israel Through Prose. 3.00 Credits.

This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmo, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled.-Carmo, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann.

Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.

Departing form narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.

Instructor(s): S. Castro-Klaren.

Graduate students or advanced seniors. This seminar will explore the corpus of political thought in Latin America since independence (1810) to the present by focusing on the discourses that constructed and continue to construct 5 key questions in the negotiation of power in the post-colonial res publica: territory, nationhood, national subjectivation, cultural imagination, justice and regimes of inclusion and exclusion. Readings will include the work of Sarmiento, Euclides da Cunha, Gonzalez Prada, Mariategui, Marti, Revueltas, Paz, Dussel, Ribeiro, Freire, Arguedas, Liberation Theology and Sumaz Kawasy authors.

Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.216.307. Reflective Mirrors: Israeli and Palestinian Cinema. 3.00 Credits.

Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.

Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.342. The Holocaust in Israeli Society and Culture. 3.00 Credits.

This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.

Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.216.370. Israel Through Prose. 3.00 Credits.

This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmo, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled.-Carmo, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann.

Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.
AS.216.373. War in Israeli Arts and Culture. 3.00 Credits.
In this course we will study the various representations of what functions as one of Israel’s most unifying and yet dividing forces: war. By analyzing literary and cinematic works as well as visual art and popular culture we will attempt to understand the role of war in shaping Israeli society, culture and politics. Topics such as commemoration and mourning, dissent and protest, trauma and memory and the changing image of the soldier will stand at the center of the course. Students with a knowledge of Hebrew wishing to do extra work in Hebrew should enroll in section 2 and the fourth hour will be scheduled at a time convenient to the enrollees and instructor.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

Sociology
AS.230.147. Introduction to Islam and Islamicate Societies since 1800. 3.00 Credits.
This course is an introduction to contemporary Islam and Muslim societies from approximately 1800 to the present. Key themes will include the colonial encounter, state formation and reform, revolution, Islamic revival, and globalization. Reflecting Islam’s status as a world religion, the course will touch on developments around the Muslim-majority world and in the West.
Instructor(s): R. Calder
Area: Social and Behavioral Sciences.

AS.230.150. Issues in International Development. 3.00 Credits.
This course will provide an undergraduate level introduction to the study and practice, as well as the successes and failures, of international development. Students will be introduced to the various theoretical frameworks used to explain underdevelopment. Students will also explore the practice of development since the 1950s by examining specific strategies employed in Latin America, South Asia, East Asia, and Africa. Using a variety of country-specific case studies, students will have the opportunity to apply the theoretical and practical frameworks learned in the class to assess the successes and failures of real-life cases.
Instructor(s): M. Levien; R. Agarwala
Area: Social and Behavioral Sciences.

AS.230.166. Chinese Migration in Modern World History 1500’s-2000’s. 3.00 Credits.
This interdisciplinary course applies theories of economic sociology to examine the effects of Chinese overseas migration on modern world economy from the sixteenth century to the contemporary era. It examines the contribution of overseas Chinese to the development of capitalism in the following junctures: the East-West economic integration in the pre-modern era, China’s modern transformation after the Opium War (1839-1842), the making of US national economy in the early twentieth century, as well as the postwar economic miracles in the Pacific Rim, among others. Special Note: Fulfills History requirement for GSCD track students.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.175. Chinese Revolutions. 3.00 Credits.
This course introduces the origins, operation and impacts of five major revolutions in modern China between 1850 and 1950. These include the Taiping Rebellion, the republican revolutions, federalist and southern automatic movements, labor strikes as well as peasant rebellions. It draws on the existing historiography that examines China’s transition from an empire to a republic, impacts of western and Japanese influences to China, as well as the continuity and change of Chinese social organizations. Cross list with International Studies and East Asian Studies. Fulfills IS History requirement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.213. Social Theory. 3.00 Credits.
This course provides an introduction to classical sociological theories (with an emphasis on Marx, Weber, and Durkheim). Contemporary theoretical perspectives on social inequality, conflict, and social change are also explored. Emphasis is placed on understanding the theoretical constructs as well as on applying them in the analysis of current social issues. Special Note: Required for IS GSCD track students.
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.221. Global Social Change. 3.00 Credits.
This course introduces students to issues of global social change, with a particular focus on the challenges of international development and the contemporary globalization process. Specific themes include world income inequality and global poverty, the rise of supranational organizations (e.g. WTO and EU) and their relations with sovereign states, anti-globalization activism, the rise of China and India in the global economy, and the origins as well as consequences of the current global economic crisis, among others. Lectures will be aided by documentary films and other multi-media materials. Special Note: Fulfills Economics requirement for IS GSCD track students only. Formerly offered as AS 230.353. Students who took AS.230.353 cannot take AS.230.221.
Prerequisites: Students who took AS.230.353 cannot take AS.230.221.
Instructor(s): H. Hung
Area: Social and Behavioral Sciences
Writing Intensive.
AS.230.228. Colonialism in Asia and Its Contested Legacies. 3.00 Credits.
This seminar examines the theories and historiography of colonialism in Asia, with special focus on the development of British Straits Settlements and Hong Kong as well as Japanese Taiwan. We will review the competing discourses about the impact of colonial dominations in these areas from the 1800s to the present-day. In the beginning of the era, the British built up the economic linkage between Hong Kong and Penang, Malacca as well as Singapore to sustain its dominance throughout the “Far East.” In the middle of the period, the expanding Japanese empire developed Taiwan as a foothold to compete with the British interests in South China and Southeast Asia. Hong Kong and the Straits Settlements, especially Singapore, became the contested terrain where two colonial powers vied for their influences in the region. The competition was not only about trade, but about the construction of a new East Asian regional order after the end of the Chinese hegemony. In the end of the period, the intervention of the US power in postwar Asia facilitated the retreat of the colonial establishments, British and Japanese ones included. The course that compares the colonial establishments and discourses on colonial legacies among the three areas points out that colonialism constituted an inalienable part of Asian history. Cross listed International Studies (CP) and East Asian Studies.Fulfills History requirement for IS GSCD track students only.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.265. Research Tools and Technologies for the Social Sciences. 3.00 Credits.
This course will introduce students to a range of software programs that are critical for conducting social scientific research in the 21st century. Students will develop competency in the use of computer programs for statistical analysis, database management, the creation of maps and timelines, and the presentation of research reports. The course uses examples from ongoing social science faculty research projects at Johns Hopkins on global inequality and international development. Required for GSCD track students
Instructor(s): M. Kang
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.275. Revolution, Reform and Social Inequality in China. 3.00 Credits.
This course explores various aspects of social inequality in China during the Mao Zedong and the post-Mao reform eras. We will examine inequality within villages, the rural/urban divide, urban inequality, education and health policies, and gender and ethnic inequality. Each of these issue areas will be tackled analytically, but the aim is also to understand what it was/is like to live in China during and after the Mao era. Formerly offered as AS.230.321.
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.285. Maritime East Asia. 3.00 Credits.
This course examines the transnational connections among merchants and migrants in the waters of East and Southeast Asia from a historical and comparative perspective. We will explore how diplomatic ties, long-distance trade and migration contributed to the making of cosmopolitan cities such as Quanzhou (Zayton), Malacca, Fort Zeelandia (Formosa), Batavia, Manila, Singapore and Hong Kong in the region from the tenth century onwards. The course will close with an examination of how the transnational connections are relevant to understand interstate competition in Asia’s long twentieth century. Key subjects to be introduced include tribute trade system, trading diasporas, Euro-Chinese co-colonialism, pan-Asianism, as well as history and historiography of maritime silk road.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.313. Space, Place, Poverty & Race: Sociological Perspectives on Neighborhoods & Public Housing. 3.00 Credits.
Is a neighborhood just a grouping of individuals living in the same place, or do neighborhoods have collective meanings and impacts on children and families? We will capitalize on research methodologies used to define and describe neighborhoods and their effects on economic and educational outcomes. These include case studies, census data, surveys, quasi/experimental data. Focus is on how research measures neighborhood effects and incorporates community level processes into models of social causation (e.g., social capital/control, community efficacy, civic engagement). Also examined: patterns in residential mobility, segregation, and preferences within black and white populations; development of housing policy in the U.S.; programs to determine how neighborhoods affect issues of social importance. Statistics and public policy background is helpful but not required.
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.325. Global Social Change and Development Practicum. 3.00 Credits.
This course provides hands on research experience in the field of global social change and development. Students will participate in a collaborative research project analyzing the causes and consequences of the recent upsurge of protest around the world in comparison with previous historical waves of social unrest. The course fulfills the research practicum requirement for Sociology majors and is required for the GSCD track.
Prerequisites: AS.230.265 or permission of instructor.
Instructor(s): B. Silver; S. Karatasli
Area: Social and Behavioral Sciences.

AS.230.343. Political Sociology of Latin America. 3.00 Credits.
This course provides an overview of Latin America through its historical, economic, social, and political dimensions. Emphasis will be given to the analysis of social structures: class, race and ethnicity, and the contemporary social movements. The course begins with an overview of the pre-Columbian civilizations and colonial legacies that gave rise to the multiethnic societies and the ethnic conflicts which characterize contemporary Latin America.Cross-listed with Program in Latin American Studies and International Studies (CP)
Instructor(s): M. von der Heydt-Coca
Area: Social and Behavioral Sciences.
AS.230.344. Health and Society in Contemporary China. 3.00 Credits.
This class examines the social and health consequences of systemic transformations in China, including collapse of the urban work-unit system, resurgence of infectious disease, and implementation of the One-Child Policy. Dean’s Teaching Fellowship; Cross listed with East Asian Studies, Public Health and International Studies.
Instructor(s): R. Core
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.346. Economic Sociology of Latin America. 3.00 Credits.
This course will offer an overview of Latin America’s economic reality as an intertwined process of economic and political domestic factors within the constraints of the world economy. Latin American development will be analyzed from a historical perspective. The first half of the semester the course will focus on the analysis of the economic developmental patterns starting in the middle of the 19th century to the populist era in the middle of the 20th century. In the second half of the semester, we will analyze in depth the contemporary neoliberal approach to development. Globalization is the force that drives economic, social and political processes in Latin America. The course will include case studies as well the social conflicts generated by the increasing polarization of the society. Students will be exposed to important sociological theories.
Instructor(s): M. von der Heydt-Coca
Area: Social and Behavioral Sciences.

AS.230.356. Contemporary African Social Movements. 3.00 Credits.
This course is a survey of contemporary social movements in sub-Saharan Africa. The course will begin with an introduction to social movement theory. Subsequent weeks will each focus on a different type of movement (e.g. independence movements, labor movements, women’s movements, environmental movements, etc.) The limited coverage of African issues in the US media tends to focus on either catastrophes or on development projects that are driven by international NGOs and the governments of northern countries. Through this course, students will gain a clear understanding of the broad range of actions that African civil society is using to address social problems throughout the continent. Materials used will include academic analysis of movements, writings by movement participants themselves, and films. The course will also introduce students to the most widely used social movement theories. Because these theories have been largely developed by social scientists in northern countries, the students will be asked to assess their applicability to African movements. Through this critical application of social theory, students will investigate the specific possibilities and constraints facing social and political actors in contemporary Africa. Cross listed with Dean’s Teaching Fellowship, International Studies (CP) and Africana Studies.
Instructor(s): B. Scully
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.362. Migration & Development. 3.00 Credits.
This course focuses on the relationship between international migration and development. The course first introduces theories of international migration, immigrant integration, and international development. Building on this foundation, we then examine how immigrants interact with their homeland and how sending country governments tap their diaspora to improve development outcomes. Cross-listed with International Studies (CP, IR). Fulfills Economics requirement for IS GSCD track students only.
Instructor(s): L. Hao; R. Agarwala
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.363. Sociology of Dispossession. 3.00 Credits.
The “grabbing” of land and natural resources has, in recent years, generated widespread political conflict across the Global South and put dispossession on the agenda of academics and policymakers. Nevertheless, compared to other social relations—such as labor exploitation—dispossession has not been central to social scientific understandings of capitalism, the state, “development,” or politics. In this class, we will collectively explore the nascent field that we might call the sociology of dispossession. We will begin with existing theoretical approaches to the problem, and then proceed to challenge, reconstruct or supplant those theories as we consider a wide range of historical examples of dispossession—including the English enclosures, colonial plunder, large dams, mining, water privatization, Special Economic Zones, transnational agricultural investments, conservation projects, and climate-induced displacement. Students will write weekly reading responses and a final paper.
Instructor(s): M. Levien
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.364. Ethnic Violence in Comparative and Global Perspective. 3.00 Credits.
This course provides a framework for understanding and analyzing different forms of ethnic violence including ethnic riots, ethnic wars, and genocides around the world. Beginning with foundational texts on defining ethnic groups, we will examine causes and dynamics of ethnic mobilization and violence from different disciplines and perspectives. Throughout the course, we will explore texts that treat key themes in studies of ethnic violence including globalization, economic development, inequality, dismantling of the developmental state, migration, state formation and failure, conflict resolution, and democratization; focusing on various cases of ethnic violence in different regions including Eastern Europe, Basque Region, Turkey, Sudan, India, Sri Lanka, China, and historical cases like Northern Ireland. Fulfills Non-Western History (NWHIST) requirement for IS GSCD students only.
Instructor(s): S. Kumral
Area: Social and Behavioral Sciences.

AS.230.366. From Habeas Corpus to Eminent Domain: Urban Development and Urban Planning in Comparative-Historical Perspective. 3.00 Credits.
This course offers a broad survey of urban development in the United States by examining both the intended and unintended consequences of urban planning. Using a comparative-historical framework, issues of power, conflict, representation, participation, and planning within urban development and the American city will be addressed and critiqued with specific reference to Baltimore. Cross listed with International Studies (AP). Fulfills History requirement for IS GSCD track students only.
Instructor(s): D. Pasciuti
Area: Social and Behavioral Sciences
Writing Intensive.
AS.230.367. Islamic Finance. 3.00 Credits.
Today, Islamic finance is a global industry comprising nearly $2 trillion in assets, with hubs from Kuala Lumpur to Dubai to London. But half a century ago, nothing called “Islamic finance” existed. So where did Islamic finance come from? Why is it growing so fast? And what does it mean for finance to be Islamic? We discuss the ban on riba in the Quran and hadith, finance in early and medieval Islamic societies, petrodollars and the birth of Islamic banking in the 1970s, the rise of Islamic capital markets since 2000, contemporary shariah-compliant financial structures, and the constitution of piety through financial practice.
Instructor(s): R. Calder
Area: Social and Behavioral Sciences.

AS.230.375. Nations, States, and Boundaries. 3.00 Credits.
This course explores the historical origins and development of the modern global political order based on sovereign nation-states, the crisis of this order through the twentieth century, as well as the unraveling of this order at the turn of the twenty-first century. We will focus on how dominant political organizations in the changing world order (such as states, political parties, and transnational governing bodies) have been shaped by different social forces (such as classes and ethnic groups) and vice versa. Topics covered include rise and fall of modern nationalism, formation of regional and global governing structures, “civilizational” turn of global politics, waves of separatism and redrawing of nation’s boundaries after the Cold War, politics of immigration and citizenship, among others.
Instructor(s): H. Hung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.377. Colonialism and Anti-Colonialism. 3.00 Credits.
This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.381. Sociology of the Middle East and North Africa. 3.00 Credits.
This course takes a sociological approach to the contemporary Middle East and North Africa. Topics include urbanization and demographic change; rentier welfare states and the global political economy of oil; women in higher education and the labor force; the 2011 Arab Spring; conflict in Syria, Libya, and Yemen; Amazigh (Berber) identity in northwest Africa; Israel-Palestine; “Dubai, Inc.” and the sociology of migrant labor; neoliberal Islamic politics in Turkey; cinema and everyday life in Iran; conservative monarchy in Morocco and Saudi Arabia; and the role of the United States in the MENA region. Students will give presentations, write memos, and submit two papers. One aim of the course is to turn students into clear, polished academic writers and thinkers.
Instructor(s): R. Calder
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.383. Courts, Housing, and the City: A Research Seminar on Social Justice in Baltimore. 3.00 Credits.
This course will join an existing survey of the Housing Court in Baltimore City by the Public Justice Center (PJC) of Maryland to examine the role and process of evictions in the Baltimore civil litigation system. The course will examine the history of housing in Baltimore and the changing role of the courts in housing rights and law from the mid-20th century to the present. Working with the PJC’s Human Right to Housing Project, students will be expected to participate in the survey collection process by attending Rent Court and participating in the data collection process, followed by cleaning and analysis of the data. Counts as American Politics/Sociology of the United States for GSCD Track.
Prerequisites: AS.230.205 AND AS.230.265 or permission of instructor
Instructor(s): D. Pasciuti
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.385. Contemporary Social Theory. 3.00 Credits.
This course will examine how major social theorists of the 20th century advanced upon the “classical” social theories of Marx, Weber, and Durkheim. As they grappled with the historical events and social concerns of the 20th century—the Russian revolution and its degeneration into Stalinism, the failure of communist movements in the West, the rise and fall of fascism and Nazism, the consolidation of capitalist democracies and welfare states, the emergence of anti-colonial movements in the “Third World,” and the persistence of race, gender and sexuality as forms of domination—social theorists provided novel answers to classical questions of social theory: 1) what is the structure of modern society, how does it change, and how is it reproduced?; 2) what is the relation between social structures and ideas, knowledge, and subjectivity?; and 3) what are the conditions of possibility for human freedom? Theorists to be covered include Antonio Gramsci, Franz Fanon, W.E.B. DuBois, Georg Lukacs, Talcott Parsons, Herbert Marcuse, Jurgen Habermas, Louis Althusser, Pierre Bourdieu, Michel Foucault, Nancy Fraser, Patricia Hill Collins, Judith Butler, and Henri Lefebvre. In addition to understanding and comparing the theories, we will try to use them to understand contemporary societies.
Instructor(s): M. Levien
Area: Social and Behavioral Sciences
Writing Intensive.
AS.230.435. The China Boom. 3.00 Credits.
This course addresses the origins, global impacts, and demise of China's economic ascendency as a world economic and political powerhouse at the turn of the twenty-first century. The course will cover the historical origins of the China boom and impacts of the boom on global political economic order. It will also address the social-political imbalances within China that contributed to the global financial crisis and recent slowdown of the Chinese economy. Particular topics include late imperial and Maoist legacies' relation to contemporary economic growth, stages of China's capitalist development, China's outward investment in the developing world, formation and limits of US-China economic symbiosis, and China's participation in global governance, among others.
Instructor(s): H. Hung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.460. Research Seminar on Stratification in the Modern World Economy: 1600-2014. 3.00 Credits.
This course examines stratification in the modern world economy from the 16th century to today, covering classical and contemporary theoretical perspectives and empirical studies on the hierarchical structure of the capitalist world economy (including Baran and Sweezy, Piketty, Frank, Arrighi, Chase-Dunn, Korzeniewicz and T. Moran, W. W. Rostow). Students will be expected to recreate and extend these empirical studies and engage in a quantitative discussion of theories of global inequality and development. In doing so, we will discuss how methodological choices, research designs, choice of indicators and inequality measures affect the outcomes and conclusions of this research. Using this theoretical and empirical background, the course will engage key questions on the contemporary and historical conditions of world inequality such as, has world income inequality been increasing or decreasing over time? Do we see stability or change in the hierarchical structure of the capitalist world economy? What are the consequences for contemporary rise of China and recent global financial meltdown for world income inequality? What will stratification in the world economy look like in the 21st century? Counts as IR/Global Sociology or Economics/Economic Sociology for GSCD Track.
Prerequisites: AS.230.150 AND AS.230.265 or permission of instructor.
Instructor(s): D. Pasciuti; S. Karatasli
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

Earth Planetary Sciences

AS.271.360. Climate Change: Science & Policy. 3.00 Credits.
Prereq: 270.103 or permission of instructor. This course will investigate the policy and scientific debate about global warming. It will review the current state of scientific knowledge about climate change, examine the potential impacts and implications of climate change, explore our options for responding to climate change, and discuss the present political debate over global warming.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.271.403. Environmental Policymaking and Policy Analysis. 3.00 Credits.
This course provides students with a broad introduction to US environmental policymaking and policy analysis. Included are a historical perspective as well as an analysis of future policymaking strategies. Students examine the political and legal framework, become familiar with precedent-setting statutes such as NEPA, RCRA, and the Clean Air and Clean Water Acts, and study models for environmental policy analysis. Cost benefit studies, the limits of science in policymaking, and the impact of environmental policies on society are important aspects of this course. A comparison of national and international policymaking is designed to provide students with the proper perspective. This course is taught in conjunction with an identical graduate course. All students will be expected to perform at a graduate level.
Instructor(s): H. Serassio; R. Solomon
Area: Social and Behavioral Sciences.

Humanities Center

AS.300.139. Introduction to Intellectual History. 3.00 Credits.
This course offers a conceptual and historical introduction to Intellectual History. What makes the “history of ideas” different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call “ideas”? In what sense do they have a history? These are examples of the kind of questions addressed in the course.
Instructor(s): P. Marrati
Area: Humanities.

East Asian Studies

AS.310.103. Modern Japan - 1800 to the Present. 3.00 Credits.
An introduction to the history of Japan from the 18th century to the present. In lectures and discussion we will draw upon a combination of primary source materials (political documents, memoirs, oral histories, journalism, fiction, film) and scholarly writings in order to gain insight into the complex and tumultuous process by which Japan became an industrialized society, a modern nation-state, and a world power.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences.

AS.310.115. Ghost Tales from China and Japan, 14th-19th Centuries. 3.00 Credits.
We cannot express our own experience of death – only imagine life after death. How did people in the past conceptualize the world of the dead? Ghost tales will teach us what we imagine as the experience of dead and life after death. This course offers a conceptual and historical introduction to intellectual history. What makes the “history of ideas” different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call “ideas”? In what sense do they have a history? These are examples of the kind of questions addressed in the course.
Instructor(s): F. Joo
Area: Humanities.
AS.310.207. Mapping Migrations in East Asia. 3.00 Credits.
This seminar introduces students to the phenomenon of migration in Japan, South Korea, and Taiwan from theoretical, empirical, and comparative perspectives. The objectives of the course are to understand the 1) historical context behind present-day migrations in East Asia; 2) different patterns of migration flows and their consequences on receiving countries; 3) various theoretical frameworks for migration. The course is divided into three parts. In the first part, the course will examine theoretical approaches to migration, structured around the question of whether East Asia as a region represents a distinct model of migration. In the second part, students will explore the empirical cases in greater detail by comparing and contrasting the different types of migrations. The third part addresses the responses to migration by host governments and societies and the implications of migration on citizenship and identity. Recommended Course Background: any class related to the history or politics of Japan, Korea, Taiwan, and/or China.
Instructor(s): M. Ott
Area: Humanities
Writing Intensive.

AS.310.305. Southeast Asia and US Security. 3.00 Credits.
This survey course is designed to introduce students to Southeast Asia – the ten member countries of the Association of Southeast Asian Nations (ASEAN) plus Australia and New Zealand. Southeast Asia is an integral part of the broader region of East Asia and a geographic bridge to the Indian subcontinent (South Asia). Southeast Asia has been one of the great success stories in the saga of modernization and development of post-colonial Afro-Asia over the last six decades. Its resulting economic importance is matched by its strategic significance given the presence of imbedded jihadist networks and the emergence of China as a regional great power and aspirant superpower. Nevertheless, the region has been largely overlooked by senior foreign policy and defense officials in Washington. This course will equip students to fill that void by examining the region from the perspective of national security strategy – broadly understood in its multiple dimensions. Students will be challenged to formulate some element of a viable U.S. national security strategy for the region.
Instructor(s): M. Ott
Area: Social and Behavioral Sciences.

AS.310.306. Domestic Politics of Contemporary China. 3.00 Credits.
This course introduces students to China’s contemporary political history and current political system. It helps students develop a critical understanding of China’s governance institutions and processes, political economy, and state-society relations. The course focuses primarily on China’s domestic politics but also covers China’s changing role in Asia and the world.
Instructor(s): Y. Yang
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.308. The Frontier in Late Imperial China. 3.00 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of China. Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China’s northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

AS.310.356. The Buddhist Experience. 3.00 Credits.
This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). In addition to studying the origins of Buddhism in India and its eventual spread across Asia, we will examine unique local interpretations of Buddhism. Particular focus will be on manifestations of Buddhism in art and material culture. Students will gain a critical understanding of the role of texts, art, doctrine, and practice play in the overall Buddhist experience. This course is a survey of Buddhist practice across Asia, covering a span of nearly 2500 years (from ca 500 BCE until the present). Instructor(s): J. Valentine
Area: Humanities, Social and Behavioral Sciences.

Program in Latin American Studies
AS.361.130. Introduction to Latin American Studies. 3.00 Credits.
The goal of this course is to provide an overview of Latin America, analyzing political and cultural aspects, chronologically organized. We will begin studying the origins of the multi–ethnic societies, starting with the ancient civilizations and their transformation under colonization. It is important to understand the survival of cultural traits among indigenous peasants today in the countries that were the cradle of ancient civilizations: Mexico, Guatemala and the Andean countries. In the republican era the course will focus on the classical Caribbean dictators in the first half of the 20th century and their reflection in the literature, comparing the historical reality with the magic representation in the work of Garcia Marquez. The course will scrutinize the most important revolutions in the continent: the Mexican, Cuban and Bolivian revolutions and the geopolitics of USA in the Americas. Weekly lectures related to the assigned reading will focus on specific periods, topics and regions. After each lecture, we will review the material, connecting specific details from the readings with the more theoretical aspects provided in my lecture. The course has a website where the PowerPoint presentations will be posted. Students are encouraged to post their questions, comments and suggestions on the web after their readings. Students will be given a study guide for each lecture, which will be the basis for the exams. Our perspective on Latin America will be enhanced by a selection of few films related to the topics.
Instructor(s): M. von der Heydt-Coca
Area: Humanities, Social and Behavioral Sciences.
AS.361.207. Afro-Latin American Biography. 3.00 Credits.
In this course, we will examine biographical accounts of men and women of African descent in Latin America and in the broader Black Atlantic. These individuals include conquistadors and slaves, saints and sinners, revolutionaries and ordinary people. In their life stories, we will not only examine questions of race, gender, and religiosity that were central to the construction of identity in the early modern Atlantic world, but also the nature of the sources that allow us to tell their stories.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.361.330. Latin America Otherwise: Voicing Dissent. 3.00 Credits.
This course proposes to look at various Latin American texts through an unconventional lens: that of dissent. Partly inspired by French philosopher Jacques Ranciere (2001), we will take as a premise the idea of dissent not simply as a moment of protest or resistance, nor of the collective plea for rights, but the moment when already given or accepted ways of living and institutional forms are unexpectedly modified by subjects not previously recognized as political. We will draw from diverse materials, ranging from political theory texts, Latin American literature, the literature on development, to the experiences of various social movements in the region. Recommended Course Background: an introductory level course in International Studies, Political Science, Anthropology, or Sociology
Instructor(s): T. Zille
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Center for Africana Studies
AS.361.204. Introduction to the African Diaspora. 3.00 Credits.
This course will begin in Africa before Atlantic slave trade, move to cover that trade into Brazil, the Caribbean and South Carolina. Comparisons of slave systems with Africa, Brazil, some parts of the Caribbean and Carolina (later South Carolina).
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.

AS.362.122. History of Africa (since 1880). 3.00 Credits.
An introduction to the African past since 1880.
Prerequisites: Students are not allowed to take both 100.122 and 362.122.
Instructor(s): K. Gallon
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.340. Power and Racism. 3.00 Credits.
This course investigates the impact of white supremacy and anti-black racism, as a global system of power, on the political development of the United States of America.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences
Writing Intensive.

AS.362.344. Education Politics in Urban America. 3.00 Credits.
This seminar analyzes trends, developments, and future challenges related to the politics of urban public schooling with a concentration on community political dynamics and the struggle for equal educational opportunity and quality education. The course emphasizes the impact of socioeconomic class inequality, racial/ethnic conflict, and gender politics on the changing character of public school reform since the 1954 Supreme Court decision of Brown v. Board of Education. Cross-listed with Africana Studies.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences
Writing Intensive.

Military Science
AS.374.255. US Intelligence Community: Theory & Practice. 3.00 Credits.
US Intelligence Community (3 credits, letter grade) Taught by former U.S. Intelligence Officers and members of U.S. Defense and Intelligence Community, “US Intelligence Community: Theory & Practice” (USIC) is a course designed to introduce and familiarize the student with the function, organization, and operational elements of the U.S. Intelligence Community (IC). Explore the USIC and gain experience in developing raw data into intelligence products through individual coursework & group production. The full-spectrum of US intelligence will be covered to include All-Source Intelligence production, multi-source data fusion processes, Special Operations, Counter-Terrorism, current affairs and future projections.
Instructor(s): F. Hoffman; M. Boston
Area: Social and Behavioral Sciences
Writing Intensive.

Islamic Studies
The minor in Islamic Studies is open to all undergraduates regardless of major. It provides the intellectual and linguistic training to approach Islam — and the world — in a historically and culturally informed way, challenging stereotypes and misconceptions while exploring the diversity and complexity of the world’s second-largest religion.

The minor in Islamic Studies was introduced in Spring 2016.

All courses must be taken for letter grades and receive a grade of C- or higher.

The Leonard and Helen R. Stulman Jewish Studies Program
http://krieger.jhu.edu/jewishstudies/
The Leonard and Helen R. Stulman Jewish Studies Program was founded in 2002 to coordinate the many academic activities at Johns Hopkins dedicated to the study of Jewish history, literature, language, philosophy, politics, and religion. The program gives students the opportunity to explore over three millennia of Jewish culture, ranging from ancient Israel to the present. The Stulman Program sponsors visiting professors and course offerings in a wide variety of disciplines, awards undergraduate travel funds and graduate fellowships, and provides many opportunities for students, faculty, and the general public to participate in a wide range of lectures, conferences, and other special events.

The program offers a minor to students interested in the many dimensions of Jewish life, religion, and culture, from ancient times to the present. It will also interest students who wish to study cultures and civilizations in which thinking about Jews and Judaism played an important role, that is, students interested in Christianity, Islam, or the culture of global modernity. Because of its interdisciplinary nature, the Jewish studies minor offers students access to a broad array of humanities and social sciences disciplines. It therefore serves as a good complement to many majors, as well as providing indispensable intellectual training to anyone interested in Jewish professional life.

Minor in the Leonard and Helen R. Stulman Jewish Studies Program

The Jewish Studies minor requires a minimum of six courses (amounting to at least 18 credits) selected from those approved by the Advisory Committee of the Jewish Studies Program. The courses must be from at least two departments, and at least three must be upper-level courses (300-level or above). All courses applied towards the minor must be taken for a letter grade and a grade of C- or better must be earned. In addition, only two courses with any single professor can be counted towards the minor.

The requirements for a minor in Jewish studies are as follows:

<table>
<thead>
<tr>
<th>Six Jewish Studies Courses</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Three courses at any level</td>
<td>9</td>
</tr>
<tr>
<td>Three 300-level or higher courses</td>

</tr>
<tr>
<td>Total Credits</td>
<td>18</td>
</tr>
</tbody>
</table>

Students may take up to two courses in Hebrew or Yiddish language study to apply towards the minor requirements.

For current faculty and contact information go to http://krieger.jhu.edu/jewishstudies/faculty_directory/index.html

Faculty

Professors

Steven R. David
(Political Science): Vice Dean for Centers and Programs: international relations, security studies, comparative politics.

Hent DeVries
Professor Russ Family Chair in the Humanities, (Humanities): modern European thought, history and critique of metaphysics, philosophies of religion, political theologies, concepts of violence, literature and temporality.

Benjamin Ginsberg

David Bernstein Professor (Political Science): Director, Washington Center for the Study of American Government: American government and politics, political development.

Herbert L. Kessler, Emeritus
(History of Art): Early Christian and medieval art.

Theodore J. Lewis

Ruth Leys, Emeritus
(Humanities): history and theory of psychoanalysis, history of psychiatry and psychology, 19th- and 20th-century intellectual history, feminist theory.

Kyle P. McCarter

Yitzhak Melamed
(Philosophy): Jewish Philosophy, (esp. Maimonides and Crescas), Rabbinics, Kabbalah and Hasidism.

Glenn M. Schwartz

Rochelle Tobias
(German): modern literature.

Eric Sundquist
Andrew W. Mellon Professor of the Humanities: American Literature and Culture, including African American and Jewish American, Literature of the Holocaust.

Associate Professors

Pawel Maciejko
Stulman Chair in Rabbinics and Traditional Judaism; (History) Jewish mystical tradition

Kenneth B. Moss
Felix Posen Associate Professor (History) and Director, Jewish Studies Program: modern Jewish history, Russia and Eastern Europe, Yishuv/Palestine and Israel, Jewish political thought, nationalism, theory and practice of cultural history.

Assistant Professor

Neta Stahl
(Department of German and Romance Languages and Literatures): Comparative and Modern Hebrew literature, religion and literature.

Lecturers

Beatrice Caplan
(Department of German and Romance Languages and Literatures): Zelda and Myer Tandetnik Lecturer in Yiddish.

Ellen Ann Robbins
(Near Eastern Studies).

Language Instruction

Zvi Cohen
Lecture (Center for Language Education).

**Courses**

**AS.193.100. Yiddish Bibliography: a seminar for intermediate and advanced Yiddish students. 3.00 Credits.**
Yiddish Bibliography: a seminar for intermediate and advanced Yiddish students. The seminar’s aim is to introduce the students to a large set of Yiddish resources, along various topics and research areas, while improving their Yiddish reading and expression skills.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.

**AS.193.200. Early Holocaust Literature: Jewish Poetry and Prose 1939-1949. 3.00 Credits.**
Introduces the two earliest forms of Holocaust literature: literary writing by Jews under Nazi rule and literary writing by Jewish survivors of the Holocaust produced in its immediate wake (between liberation in 1945 and the decisive moment of the foundation of the State of Israel in 1948). Treats questions of literature as a form of immediate reaction to persecution and annihilation, literature as testimony, the relationship of poetics and early Holocaust memory and consciousness. Reference will be made mainly to professional writers in Yiddish and Polish. All readings in English translation.
Instructor(s): M. Trinh
Area: Social and Behavioral Sciences
Writing Intensive.

**AS.193.201. Early Modern Jewry in Europe and the Mediterranean. 3.00 Credits.**
The course examines the transition from medievalism to modernity among the Jews of Europe and the Mediterranean between the sixteenth and eighteenth centuries, paying attention to both material and intellectual life, and to women and children side by side with merchants and rabbis.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.

**AS.193.202. Everyday Voices of the Holocaust: Popular Jewish Poetic Expression in the Ghettos and Camps. 3.00 Credits.**
The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of multi-lingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multi-cultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed - also with emphasis on the differences and similarities between Eastern and Western European Jewry.
Instructor(s): M. Trinh.

**AS.193.203. Jews and the British Empire. 3.00 Credits.**
What can we learn about Jewish history, politics, and culture by examining Jews in imperial and colonial settings, particularly the British Empire? How has Britain, its empire, history, culture, and language shaped the modern Jewish experience? Over the course of the semester, we will investigate these questions and explore the diverse history of Jews across the British Empire in the modern period. We will move from Britain, to Mandate Palestine, from India to South Africa, and beyond. We will analyze the role that Britain and the British Empire played in the formation of modern Jewish politics and culture, especially Zionism. The course will focus primarily on the 19th and 20th centuries, concluding with an examination of contemporary British antisemitism, anti-Zionism, and relations with Israel.
Instructor(s): E. Imber
Area: Social and Behavioral Sciences.

**AS.193.300. Readings in Yiddish. 3.00 Credits.**
Instructor(s): E. Niborski
Area: Social and Behavioral Sciences.

**AS.193.301. Reading the Bible and Encountering its World. 3.00 Credits.**
The course examines the interactions between travel and biblical interpretation between the seventeenth and twentieth centuries, paying particular attention to the ways in which travelers to the Middle East and then scholars saw its residents as relics of an unchanging biblical world, whose practices could be used to interpret scriptural texts from both the Old and New Testaments.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.

**AS.193.304. Everyday Voices of the Holocaust: Popular Jewish Poetic Expression in the Ghettos and Camps. 3.00 Credits.**
The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of multi-lingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multi-cultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed. Emphasis will be put on the differences and similarities between Eastern and Western European Jewry.
Instructor(s): M. Trinh
Area: Social and Behavioral Sciences.

**AS.193.305. The Emergence of Israel. 3.00 Credits.**
Is there a single unified story of the emergence of the State of Israel? In this seminar we will trace the origins of contemporary Israel’s diverse society, discover the plurality and diversity of that society’s stories about itself, and discover some of the roots of its conflicted multiculturalism through a critical reading of texts ranging from works of utopian social and political radicalism to expressions of national-religious messianism. All texts in English translation.
Instructor(s): I. Bartal.
Cross Listed Courses

English

AS.060.332. Jewish American Fiction. 3.00 Credits.
This course will consider the development of Jewish American fiction over the past century through an examination of major authors and topics, with particular attention to novels whose historical trajectories reach geographically back and forth from America to Europe, and temporally back and forth across the Holocaust, the century’s defining event. These novels thus frequently have multiple settings and treat familial, communal, and intellectual life, along with topics such as emigration, anti-Semitism, and religious belief, over a span of several generations. The list includes authors whose works first appeared in Yiddish (Lamed Shapiro and Isaac Bashevis Singer) and authors whose sensibilities are decidedly American, but all write with attention to the tenuous assimilation, dislocation, trauma, and linguistic complexity that often marked twentieth-century Jewish life, no less in the United States at times than in Europe. Works studied will include: Dara Horn, In the Image; Rebecca Goldstein, Mazel; Bernard Malamud, The Fixer; Lamed Shapiro, The Cross and Other Jewish Stories; Isaac Bashevis Singer, Shosha; Cynthia Ozick, The Shawl; Nicole Krauss, A History of Love; Jerzy Kosinski, Steps; Philip Roth, Nemesis; Shalom Auslander, Hope: A Tragedy: A Novel
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.375. Literature of the Holocaust. 3.00 Credits.
The course will focus on reactions to, and representations of, the Holocaust in European, Israeli, and American literature. In moving from the initial response of eyewitness testimony, through the emergence of fiction as one means to test the adequacy of historical accounts and memoirs, and on to more recent reflections on the problem of adequately “remembering” the event, we will consider how the Nazi genocide has entered into world consciousness. What does it mean to have an artistic or aesthetic response to such an event? Why has the Holocaust assumed so a significant role in contemporary life that there are entire genres of literature and film devoted to it? We will also look at some more contemporary writers whose work deals indirectly with the after-effects of the Holocaust. Readings may include: Levi, Survival in Auschwitz; Borowski, This Way for the Gas, Ladies and Gentlemen; Delbo, Auschwitz and After; Kosinski, The Painted Bird; Grossman, See Under: Love; Ozick, The Shawl; Epstein, The Cross and Other Jewish Stories; Isaac Bashevis Singer, Shosha; Cynthia Ozick, The Shawl; Nicole Krauss, A History of Love; Jerzy Kosinski, Steps; Philip Roth, Nemesis; Shalom Auslander, Hope: A Tragedy: A Novel
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.382. Jewish American Literature. 3.00 Credits.
A survey of major works, principally novels.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

History

AS.100.128. Ancient and Medieval Jewish History. 3.00 Credits.
History of the Jews under empires and monarchies, from the Persian restoration to the Spanish expulsion. Emphasis on Jews in the Middle East and how the rise of Christianity and Islam challenged, transformed and strengthened Judaism. Cross listed with Jewish Studies.
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

AS.100.129. Introduction to Modern Jewish History. 3.00 Credits.
Jewish history 1750-present in Europe, the Near East, the US, Israel; the challenges of modernity and new forms of Jewish life and conflict from Enlightenment and emancipation, Hasidism, Reform and Orthodox Judaism to capitalism and socialism; empire, nationalism and Zionism; the Holocaust. Extensive attention to US Jewry and State of Israel.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.315. Jewish Political Thought and Social Imagination, 1880-1940. 3.00 Credits.
How a range of Jewish thinkers, activists, and creative writers grappled intellectually with the challenge of the nation-state, the rise and collapse of empires, antisemitism as a political phenomenon, the nature of politics and political action, the nature of modern societies, and the question of Jewish self-determination and sovereignty, 1880-1940. Readings by Herzl, Bernard Lazare, Freud, Kafka, Leshtshinsky, Arendt, Adorno, Michael Chabon, among others.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.343. Diaspora, Nation, Race, and Politics. 3.00 Credits.
For millions of people across the globe, political fate in the 20th century was defined at the intersection of diaspora, race, and nation — and this may be true in the 21st century as well. This course, a collaborative effort involving a historian and a political scientist, explores the parallels and divergences in the deployment of these terms in nationalist and transnational mobilization, literature and aesthetics, and group identity formation in Eastern Europe, Africa and the New World of the Americas. Set against the backdrop of the fall of significant empires in the late 19th and early 20th centuries, we will explore themes of migration, human rights, the nation-state system, and racism through history, political sociology, and political and social theory. We will pay particular attention to the theoretically exemplary Jewish and Black experiences of diaspora, race, and nation, engaging both with how those experiences were specially shaped by the imposition of national and racial logics and with Black and Jewish politics and thought in relation to those categories.
Instructor(s): K. Moss; M. Hanchard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.344. The Holocaust. 3.00 Credits.
This course expands the knowledge of the Holocaust by including experiences of Eastern European Jewry and by discussing recent historiographic debates in the field such as ‘ordinary men,’ perpetrators, and collaboration. Prior experience in an introductory European history or Jewish studies course strongly recommended.
Instructor(s): L. Braun
Area: Humanities, Social and Behavioral Sciences.
AS.100.345. Religion, Secularity, and Nationhood in Modern Jewish Identity Politics. 3.00 Credits.
How have ethnonational, religious, and secular forms of self-definition played out in Jewish life over the past hundred years, and what sorts of relationships are taking shape between them now? Particular foci include: religious revival in Israel and the fate of Zionism's ostensibly secular nationalist project in comparative perspective (Ravitzky, Walzer, Friedland); the surprising flourishing of kabbalistic/mystical thought in contemporary Jewish life (Garb); varieties of secular and religious visions of Jewish collective identity (Ohana, Lustick); new and resurgent forms of Judaism in the US; religion and gender (Fader), among other topics. Time at end of semester for independent reading and research.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.351. God, Self, Nation and Revolution in East European Jewish Life and Thought, 1860-1939. 3.00 Credits.
The divided Jewish community of modern Eastern Europe defined many of the key modern forms of Jewish identity, politics, culture, and religion and forged bewildering array of syntheses, hybrids, and even negations of Jewishness in relation to the unprecedented political, cultural, and social dilemmas of life in Eastern Europe. Focus on key texts of Jewish religious and secular thought created in Imperial Russia and interwar Poland.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.354. History of Israel, 1948-1970. 3.00 Credits.
The political, social, and culture history of the State of Israel and its inhabitants during its pivotal first two decades, as reconstructed in recent historiography.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.363. The Development of the Sabbatian Movement. 3.00 Credits.
This course examines the development of Sabbatianism, the most important messianic movement in the history of Judaism. We shall discuss the messianic claims of Sabbatai Tsevi, the spread of religious fervor among the Jews of Middle East, Europe, and North Africa, rabbinic opposition to the movement, and shall compare it to similar phenomena in Islam and Christianity. Special attention will be paid to reading of primary Sabbatian sources in English translation.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.

AS.100.371. Jewish History in the 20th Century. 3.00 Credits.
Jewish history, politics, and culture across a century of enormous transformations and transformative enormities in Europe, the US, and the Middle East. Topics include: impacts on Jewish life of World War I, the Russian Revolution, and the post-imperial reorderings of the Eastern Europe and the Middle East; Zionism and other modes of Jewish contestatory politics; the consolidation of American Jewry; Nazism and the Holocaust in Europe; formation and development of the State of Israel; the global reorderings of Jewish life amid cross-currents of the Cold War, conflict in the Middle East, and success in the US. Substantial attention to recent and contemporary history including the dramatic changes in Israeli society and polity over the past forty years and the ongoing Israeli-Palestinian conflict. Each week, professor will provide detailed background lecture during first session and second session will be devoted to in-depth discussion of key primary texts and historical monographs that capture Jewish responses to 20th century processes and events.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.412. Jewish History in British Mandatory Palestine 1917-1947. 3.00 Credits.
Recent historical writing on Jewish politics, culture, and society in British Mandatory Palestine, 1917-1947. Significant attention will also be paid to work on Palestinian Arab society and politics and to Jewish-Arab-British relations.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.415. Papyrus, Parchment, and Paper. 3.00 Credits.
The diffusion of writing technologies before the industrial age, especially around the Mediterranean; the preservation of lightweight, portable texts; modern discoveries (Oxyrhynchus, Dead Sea Scrolls, Nag Hammadi, Cairo Geniza).
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.447. Christian-Jewish Polemics in the Middle Ages and the Construction of the Enemy. 3.00 Credits.
The four great public Christian-Jewish disputations of the high middle ages: Paris, Barcelona, Majorca, Tortosa. Original Hebrew and Latin sources in English translation; questions of the changing motives for anti-Judaism and the formation of a persecuting society.
Instructor(s): P. Capelli
Area: Humanities, Social and Behavioral Sciences.

AS.100.611. Kabbalah and the Enlightenment: Reading 'The Manuscript Found in Saragossa'.
The course will discuss the European Enlightenment’s attitude to the Jewish esoteric lore. As a lens to discuss this topic, we shall use Jan Potocki’s novel "The Manuscript Found in Saragossa".
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.
AS.100.624. How to Be a Disciple of the Sages: Norms of Behavior, Ethics and Etiquette in Early Rabbinic Literature.
Moral instruction in early rabbinic literature (Pirqe Aboth, Aboth de-Rabbi Nathan, Derekh Eretz Rabbah and Zuta, Pereq ha-Shalom) is a very revealing example of the composite character of rabbinic Judaism, its manifold, not only Biblical roots, and its intense osmosis of neighboring traditions: Hellenistic and Roman philosophies, early Christian and Islamic doctrines, rules and handbooks of manners from medieval European monasteries and courts. This seminar will investigate the classical sources of Jewish morals in both Jewish and non-Jewish texts.
Instructor(s): P. Capelli
Area: Humanities, Social and Behavioral Sciences.

AS.100.643. Jewish Paths Through Modernity.
Intensive introduction to the key trends and trajectories in modern Jewish history and the major themes in Jewish historiography. Intended to serve both graduate students outside the Jewish history field and students beginning the graduate study of modern Jewish history. Open to undergraduate seniors with the permission of the instructor.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.655. Jewish History and Historiography in Ottoman and British Palestine.
Recent historiography on Jewish politics, culture, and society in late Ottoman and British Mandatory Palestine, 1880s-1947, English and Hebrew. With permission of the professor.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.667. Topics in Modern Jewish History.
Intensive readings in historiography of modern Jewry, with particular focus on Jewish life in 19th - 20th century Palestine and the State of Israel. Recommended Course Background: AS.100.668
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.759. The Cairo Geniza (Spring).
Documentary sources from the Cairo Geniza in Judaeo-Arabic, Arabic, and Hebrew. Paleography, genre, diplomatic, corpora and editorial technique; historical context, interpretation, historiography and history of the field. Cross listed with Jewish Studies.
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies

AS.130.118. Ancient Israel: In Their Own Words. 3.00 Credits.
The course will focus on the inscriptions of ancient Israel and its neighbors from the first millennium BCE. Texts speak to us directly in ways that other nonverbal archaeological remains – such as architecture or pottery – cannot. Also, secondary sources written by later historians and commentators are similarly limited, as they are separated from original events by space, time, and cultural situation. Considering how individuals from an ancient culture articulate thoughts “in their own words” is invaluable to any meaningful reconstruction of history. Participants will learn to glean information from inscriptions, including those that are fragmentary or seemingly mundane. They will experience hands-on history writing, using primary sources in translation, though those with any knowledge of ancient languages, especially Classical Hebrew, will be able and encouraged to engage with the texts in their original vernacular. Basic knowledge of world history will be helpful though not prerequisite.
Prerequisites: AS.130.134
Instructor(s): H. Parker
Area: Humanities.

AS.130.140. Hebrew Bible / Old Testament. 3.00 Credits.
The Bible is arguably the most read and yet most misinterpreted book of all time, one of the most influential and yet most misapplied work of literature. The Hebrew Bible (Old Testament) is Scripture to Jews and Christians yet also a rich collection of literature w/ numerous literary genres that has been highly influential on secular Western culture. At its core, it is our most important literary source that (when wed with archaeology) helps us to understand the people and culture of Iron Age Israel and Judah. This is an introductory course surveying of the books of the Hebrew Bible (Old Testament) giving primary attention to the religious ideas they contain and the ancient contexts in which they were composed. Topics include: The Academic Study of Religion, Ancient Creation Accounts, Ancestral Religion, The Exodus and Moses, Covenant, Tribalism and Monarchy, The Ideology of Kingship, Prophecy, Priestly Sources, Psalms, Wisdom Literature, and Apocalyptic Thought.
Instructor(s): T. Lewis
Area: Humanities.

AS.130.202. Ancient Mythology. 3.00 Credits.
This course explores the mythology of the ancient Near East from the invention of writing in Sumer in 3000 B.C. until the conquest of Alexander the Great near the end of the first millennium B.C. Mythological texts from Mesopotamia, Egypt, Anatolia, the Levant, and the Bible will be read from a comparative perspective. Special attention is paid to the origin and development of the epic, culminating in the great Epic of Gilgamesh, but considerable time is also given to the vast mythological and historical literature, and such diverse genres as love poetry, proverbs, humorous dialogues, Omens, and legal and medical texts. All readings are in English translation.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.301. History of Ancient Syria-Palestine. 3.00 Credits.
A survey of the history of Ancient Syria and Cannan, including Ancient Israel.
Instructor(s): P. McCarter
Area: Humanities.

AS.130.302. History: Ancient Syria-Palestine II. 3.00 Credits.
A survey of the history of Ancient Syria and Cannan, including ancient Israel. Taught with AS.134.661. Cross-listed with Jewish Studies.
Instructor(s): P. McCarter
Area: Humanities.
AS.130.330. The Garden of Eden. 3.00 Credits.
References to the story of the Garden of Eden can be found in every significant issue of our time, from sex to politics, from race to the environment. The course will examine the story itself as well as how it's been interpreted, leading up to today. Enthusiastic participation required.
Instructor(s): E. Robbins
Area: Humanities.

AS.130.341. Traditionalism vs. Orthodoxy in the Modern Era: The Case of Judaism. 3.00 Credits.
During the Modern Era in European history, the Traditionalist Jewish civilization of Europe that had evolved over many centuries went into deep crisis. The new political, social, and intellectual realities which characterized Modernity seriously challenged, overwhelmed, and indeed threatened to destroy the Jewish Traditionalist culture and society. In response, different Traditionalist thinkers and communities evolved a number of strategies for surviving in a modern environment, strategies that unexpectedly transformed Traditionalism into something different, which came to be called Orthodox Judaism. This course explores this process of transformation, which has had an important impact on Jewish life in the modern and post-modern eras. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.343. Dead Sea Scrolls-English. 3.00 Credits.
A survey of the manuscripts found at Qumran and other sites near the Dead Sea.
Instructor(s): P. McCarter
Area: Humanities.

AS.130.346. Introduction to the History of Rabbinic Literature. 3.00 Credits.
Broadly surveying classic rabbinic literature, including the Talmud and its commentaries, the legal codes and the response, this seminar explores the immanent as well as the external factors that shaped the development of this literature, the seminal role of this literature in Jewish self-definition and self-perception, and the role of this literature in pre-modern and modern Jewish culture.
Instructor(s): D. Katz
Area: Humanities.

AS.130.348. Religious Law Wrestles With Change: The Case of Judaism. 3.00 Credits.
Description: How does a religious system which defines its ancient laws as God-given and unchangeable apply them to radically different and changing social, political and intellectual situations? This course explores the literature of Questions and Answers(She'elot u-Teshuvot), the Jewish legal responsa which have struggled to match Jewish religious law to modern life for fifteen centuries. A sweeping survey of Jewish history as revealed by one of its most impenetrable yet fascinating sources. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.352. History of Hasidism. 3.00 Credits.
Although it appears to be a relic of pre-modern Judaism, Hasidism is a phenomenon of the modern era of Jewish history. This course surveys the political and social history of the Hasidic movement over the course of the last three centuries. Students will also explore basic features of Hasidic culture and thought in their historical development. Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.359. Reading the Talmud in the Post-Talmudic Era. 3.00 Credits.
Life and Death, Survival and Martyrdom, in the Literature of Post-Talmudic Rabbinic Judaism. Readings in the Original Sources (Knowledge of Hebrew Required). Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.366. Reading the Talmud in Pre-modern Jewish Culture. Attempting to Cope With Abusive Husbands: Annullment of Marriage in the Literature of Post Talmudic Rabbinic Judaism. 3.00 Credits.
The evolution of Talmudic thinking resulted in laws which made marriage too easy, divorce too difficult. This generated centuries of attempts to grapple with the consequences of this conundrum in real-life situations. This course analyzes the literature produced by these attempts. Students will read texts in original Hebrew.
Instructor(s): D. Katz
Area: Humanities.

AS.130.367. Jerusalem: The Holy City in History and Archaeology. 3.00 Credits.
Jerusalem has a global significance utterly disproportionate to its size or wealth, and it has been this way since the days when the city was first settled. On the one hand, this is due to Jerusalem's role as a sacred space for all three of the world's largest monotheistic religions: Christianity, Islam, and Judaism. On the other, Jerusalem has long been the fulcrum of geopolitical struggles in the Middle East and beyond. This lecture course explores Jerusalem's political, cultural, and religious trajectory over the past three millennia through the lens of the city's amazingly rich historical and archaeological records. In so doing, we unravel the mythical and historical threads that combine to create the powerful symbolic resonance of Jerusalem today, discovering en route that, when it comes to Jerusalem, identifying what is "myth" and what is "history" is a complex and contested undertaking.
Instructor(s): J. Osborne
Area: Humanities.

AS.130.373. Prophets and Prophecy in the Bible. 3.00 Credits.
From thundering voices of social justice to apocalyptic visionaries, biblical prophets have been revered by Jews, Christians and Muslims for thousands of years. They have inspired civic leaders such as Martin Luther King Jr. yet also provided fodder for modern charlatans promising a utopian future. Yet who were these individuals (orators? politicians? diviners? poets?) and what was the full range of their message as set against the Realpolitik world of ancient Israel, Iraq, Egypt, Syria and Jordan?
Instructor(s): T. Lewis
Area: Humanities.

AS.130.376. Ancient Ritual. 3.00 Credits.
This course will introduce students to the vast body of rituals that were practiced and performed in antiquity, with a particular emphasis on rituals from ancient Mesopotamia, Egypt, and the Hebrew Bible. In addition to examining rituals from a comparative perspective, anthropological and sociological studies of ritual will be read and discussed to shed light on the social, cultural, and political significance of ritual in the ancient world and beyond.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.411. Elementary Biblical Hebrew. 3.00 Credits.
Survey of grammar and reading of simple texts. (Credit given only on completion of AS.130.440 and AS.130.441). May not be taken on a satisfactory/unsatisfactory basis.
Instructor(s): K. Medill
Area: Humanities.
AS.130.442. Readings - Hebrew Prose. 3.00 Credits.
Reading of biblical Hebrew prose, especially from the Pentateuch, Joshua, Judges, Samuel, and Kings. Cross-listed with Jewish Studies.
Instructor(s): R. Liebermann
Area: Humanities.

AS.130.443. Reading Of Hebrew Prose. 3.00 Credits.
Reading of Biblical Hebrew prose, especially from the Pentateuch, Joshua, Judges, Samuel, and Kings.
Instructor(s): R. Liebermann
Area: Humanities.

AS.134.604. The Book Of Job.
Reading the Hebrew text of the book of Job with attention to philology, textual criticism, and various aspects of interpretation.
Instructor(s): T. Lewis
Area: Humanities.

A rapid reading course aimed at increasing proficiency in reading the Hebrew text of the book of Ezekiel. Various aspects of translation and interpretation will be studied (e.g., grammar, textual criticism, Philology) including literary, historical, and theological questions. Cross-listed with Jewish Studies.
Instructor(s): T. Lewis.
Area: Humanities.

AS.134.652. Seminar in Ancient Israelite Religion.
Topics include history of scholarship, methodology, representations of deity, the aniconic tradition, solar Yahwism, sacred space, blood rituals, passover, royal cult, family religion, divination, prophecy, incantations, etc.
Instructor(s): T. Lewis.

An advanced course in Aramaic devoted to the study of Old Aramaic inscriptions. We will be translating and analyzing a selection of texts from Northern Syria (e.g. Bar-Rakib; Hadad; Kuttabuwa, Nerab, Panamuwa, Sefire, Zakur), Southern Syria (e.g. Bar-Hadad/Melqart Stela, Hazael, Tel Dan) and Northern Mesopotamia (e.g. Tell Fakhariyyah). Students will be expected to vocalize such texts as a study in historical and comparative linguistics and to clarify their understanding of the morphology and syntax.
Instructor(s): T. Lewis.
Area: Humanities.

AS.150.428. Spinoza's Theological Political Treatise. 3.00 Credits.
The course is an in-depth study of Spinoza's Theological-Political Treatise. Among the topics to be discussed are: Spinoza's Bible criticism, the nature of religion, philosophy and faith, the nature of the ancient Hebrew State, Spinoza's theory of the State, the role of religion in Spinoza's political theory, the freedom to philosophize, the metaphysics of Spinoza's Theological-Political Treatise, and finally, the reception of the TTP.
Instructor(s): Y. Melamed.

AS.150.483. Topics in Jewish Philosophy: Hassidism. 3.00 Credits.
Hassidism is the ecstatic religious movement that emerged in East European Jewry in the mid eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of Dov Ber of Mezrich between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon's report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset.
Instructor(s): Y. Melamed.

AS.190.434. Does Israel Have a Future?. 3.00 Credits.
Israel is one of the only countries whose existence is openly challenged. This class will examine the future of Israel focusing on international and domestic threats to its continued existence as a Jewish democracy. Lessons from the destruction of the ancient Israelite kingdoms and from contemporary state deaths will be included. The course will conclude by considering efforts that Israel can undertake to meet the threats it faces.
Instructor(s): S. David
Area: Social and Behavioral Sciences.

AS.191.335. Arab-Israeli Conflict (IR). 3.00 Credits.
The course will focus on the origin and development of the Arab-Israeli conflict from its beginnings when Palestine was controlled by the Ottoman Empire, through World War I, The British Mandate over Palestine, and the first Arab-Israeli war (1947-1949). It will then examine the period of the Arab-Israeli wars of 1956, 1967, 1973, and 1982, the Palestinian Intifadas (1987-1993 and 2000-2005), and the development of the Arab-Israeli peace process from its beginnings with the Egyptian-Israeli treaty of 1979, the Oslo I and Oslo II agreements of 1993 and 1995, Israel's peace treaty with Jordan of 1994, the Road Map of 2003, and the periodic peace talks between Israel and Syria. The conflict will be analyzed against the background of great power intervention in the Middle East, the rise of political Islam and the dynamics of Intra-Arab politics, and will consider the impact of the Arab Spring.
Instructor(s): R. Freedman
Area: Social and Behavioral Sciences.

AS.191.398. The International Politics of Genocide. 3.00 Credits.
This course examines the creation of the concept of genocide and explores its controversial evolution in international law, humanitarian efforts, and global politics. Dean's Teaching Fellowship course.
Instructor(s): B. Meiches
Area: Social and Behavioral Sciences.

Political Science
AS.190.344. Seminar In Anti-Semitism. 3.00 Credits.
Jews are prominent in a number of key industries, play important roles in the political process, and hold many major national offices. For example, though Jews constitute barely two percent of America's citizens, about one-third of the nation's wealthiest 400 individuals are Jewish and more than ten percent of the seats in the U.S. Congress are held by Jews.
One recent book declared that, "From the Vatican to the Kremlin, from the White House to Capitol Hill, the world's movers and shakers view American Jewry as a force to be reckoned with." Of course, Jews have risen to power in many times and places ranging from the medieval Muslim world and early modern Spain through Germany and the Soviet Union in the 20th century. In nearly every prior instance, though, Jewish power proved to be evanescent. No sooner had the Jews become "a force to be reckoned with" than they found themselves banished to the political margins, forced into exile or worse. Though it may rise to a great height, the power of the Jews seems ultimately to rest on a rather insecure foundation.
Cross-listed with Jewish Studies.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

Writing Intensive.
German Romance Languages Literatures

AS.210.163. Elementary Yiddish I. 3.00 Credits.
Year-long course. Includes the four language skills, reading, writing, listening, and speaking—and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Students wishing to retain credits for Yiddish Elements I must complete Yiddish Elements II with a passing grade. Instructor(s): B. Caplan.

AS.210.164. Elementary Yiddish II. 3.00 Credits.
Year-long course that includes the four language skills—reading, writing, listening, and speaking—and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.263. Intermediate Yiddish I. 3.00 Credits.
This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.164 or equivalent, or two years of German and permission of instructor.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.367. Advanced Yiddish. 3.00 Credits.
This course will provide students who have completed at least two years of Yiddish with the opportunity to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing. Instructor(s): B. Caplan
Area: Humanities.

AS.210.368. Advanced Yiddish II. 3.00 Credits.
Continuation of Advanced Yiddish I (AS.210.367). Students will continue to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Prerequisites: AS.210.367
Instructor(s): B. Caplan
Area: Humanities.

AS.210.369. Yiddish Texts I. 3.00 Credits.
This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing).
Prerequisites: AS.210.368 or permission of instructor.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.370. Yiddish Texts II. 3.00 Credits.
Continuation of Yiddish Texts I. This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing). Recommended Course Background: Yiddish Texts I or permission of the instructor.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.174. Media of Propaganda. 3.00 Credits.
Today, promoting a particular political or personal point of view is not viewed as propaganda, but rather as building a community of equally-minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term propaganda will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl's Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current Facebook nation.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.202. Freshman Seminar: A Thousand Years of Jewish Culture. 3.00 Credits.
This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Caplan
Area: Humanities.
AS.211.253. Freshman Seminar: Why is the Fiddler on the Roof?: The Shtetl in Modern Jewish Culture. 3.00 Credits.
The most familiar portrayal of the shtetl for an American audience is the setting of the Broadway musical Fiddler on the Roof, where the shtetl, or market town, is a bastion of traditional Jewish life. But what exactly was a shtetl? How did traditional Jews live there, and how were their lives affected by the sweep of modernity? How was the Yiddish language, spoken by all shtetl Jews, both a repository of tradition and an agent of change? How do representations of the shtetl—from corrupt backwater to pious haven—reflect the concerns of Jews from the nineteenth century up to our own day? Through memoir, literature, film and painting, this course will examine actual lives lived in the shtetl, as well as a selection of the many artistic representations of it. All readings will be in English.
Instructor(s): B. Wegenstein
Area: Humanities

AS.211.348. Holocaust Consciousness — An Intercultural and Interdisciplinary Approach Through Media Studies and Psychology. 3.00 Credits.
This course approaches Holocaust consciousness in the U.S. and Europe within a psychological and media-theoretical frame-work. It is also part of a larger research project between the Center for Advanced Media Studies at JHU and the Sigmund Freud University in Vienna. During the semester students will be tele-conferencing during five to six class sessions with students in the same course held at the Sigmund Freud University and taught by Professors Nora Ruck and Markus Brunner. Together we will examine Holocaust consciousness in the U.S. and Europe, and such phenomena as trauma, inter-generational transmission, and projection of the trauma of the victims’ and/or the perpetrators’. As primary materials we will be using war memoirs and documentary films (from the films of the “Bilderverbot” to today’s family ethnographies). Students will be teamed in small, inter-cultural groups to address both U.S. and a European perspectives on these materials. An excursion to the U.S. Holocaust Memorial Museum in Washington D.C. will also be part of the course.
Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.

AS.211.432. The Dreyfus Affair: Lying for Truth. 3.00 Credits.
In 1894 French military captain Alfred Dreyfus was found guilty of a crime of treason he did not commit. The true reasons for his arrest are still under debate today: was this a sheer act of antisemitism? Why did the army create false proof against a man they knew was innocent? What was the role of the press in propagating the Affair? This course proposes to approach the Dreyfus Affair in all its complex forms, while encouraging students to carry out original and innovative research based on a wide range of resources (caricatures and articles in the press, pamphlets, paintings, films, music, photographs, court transcripts, government archives, private letters, and hopefully more).
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.213.309. Walter Benjamin and His World. 3.00 Credits.
All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.322. Museums and Jews, Jews in Museums. 3.00 Credits.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.324. What is Jewish Culture?. 3.00 Credits.
We talk about Jewish literature, music, and art—but can a book, or a song, or a painting be Jewish? We will examine the premises of this question and the many answers that have been formulated in response to it focusing on modern European (and some American) culture. Jewishness as it relates to human identity has been conceived of as related to religion, ethnicity, race, nation, language, geography, and politics. But these keywords have also been used to engage with the question of the Jewish identity not of a person, but of a cultural product. To understand the implications of calling, say, a book Jewish, we will examine the history of the concept of culture and its emergence in the context of the formation of modern Jewish identity. We will examine theoretical and literary texts originally written in German, Yiddish, Hebrew, and English, as well as painting, photography, film, and architecture from Europe, Israel and the Americas. We will aim to arrive at an understanding of the ways that the idea of culture intersects with the formation of Jewish identity in modernity. All readings will be in English.
Instructor(s): S. Spinner
Area: Humanities.
AS.213.332. Zionism in Modern Literature: Jewish or Israeli?. 3.00 Credits.
This course will be an examination of the themes of nationalism, Zionism, and the problems of the nation-state in modern Jewish literature of the past hundred years. Among the topics we will consider are the unique challenges of a diasporic culture relocating its national aspirations to an unfamiliar and often hostile environment, the controversies surrounding political nationalism within modern Jewish culture, the competition between languages in the formation of Israeli society, the character of Israeli national culture, the relationship of Israel's Jewish majority with its minority population, and the relationship of Israeli culture to the Jewish culture of the diaspora. To what extent does Israeli literature constitute a continuation of themes and techniques found in previous Jewish writing, and to what extent does it represent a new beginning? To what extent can Israeli literature be compared with other varieties of Jewish writing and to what extent is this writing a unique cultural phenomenon? Although the majority of works discussed will be translated from Hebrew—including such leading figures of Israeli literature as S. Y. Agnon, S. Yizhar, Amos Oz, and Orly Castel-Bloom—we will also be considering works translated from Yiddish (Mendele Moykher-Sforim), German (Theodor Herzl), and Arabic (Emile Habiby), as well as contemporary American writers such as Philip Roth and Michael Chabon. All readings and discussions conducted in English. Cross-listed with Jewish Studies, English, and the Humanities Center.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.336. Dancing About Architecture: Jewish Humor and the Construction of Cultural Discourse. 3.00 Credits.
Are all Jews funny, or only the ones from New York? This course will be an advanced-undergraduate examination of literary, theatrical, cinematic, and televised representations of Jewish culture focusing on the construction of cultural discourse through comedy. Taking as a point of departure Sigmund Freud's Jokes and Their Relation to the Unconscious, we will consider the joke as a mode of narration and cultural coding with specific resonances for the Jewish encounter with modernity. Among the topics to be addressed in this course will be the origins of modern Jewish humor in traditional modes of storytelling and study; the problems of anxiety and otherness articulated and neutralized through humor; the significance of Jews in creating popular culture through the mass media (particularly though not exclusively in the United States) as well as the role of these mediums in transmitting Jewish references to the general culture; the status of the Yiddish language as a vehicle for satire and a vehicle of resistance between tradition and modernity; the uses and abuses of Jewish stereotypes and the relationship of Jewish humor to anti-Semitism; the connections between Jewish humor and other modes of minority discourse; and the question of translation of Jewish humor both from Yiddish into other languages and from the Jewish "in-group" to a "post-ethnic" audience. Authors and performers to be examined will include Avrom Goldfaden, Sholem Aleichem, Franz Kafka, Dzigan and Szumacher, Lenny Bruce, the Marx Brothers, Mel Brooks, Phillip Roth, Woody Allen, Larry David, Sarah Silverman, and the Coen Brothers. All readings and discussions conducted in English.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.348. Picturing Jews: Representing Jewish Identity in Modern Art, Film & Literature. 3.00 Credits.
This course will consider the different ways Jewish identity has been represented in the 19th and 20th centuries, focusing primarily on Central and Eastern Europe. Race, nationalism, religion, language, geography, politics—all helped shape different ways of understanding just what it meant to be a Jew, and all found expression in art and literature by both Jews and non-Jews. Looking at texts originally written in German, Yiddish, and Hebrew, including prose, poetry, journalism and drama, as well as painting, photography, graphic design, architecture, and film we will gain an understanding of the range of ways that Jewish identity could be understood and expressed as well as of the ideological stakes and historical contexts of such representations. Writers and artists examined will include Chagall, Kafka, Sholem Aleichem, and Bialik. All readings will be in translation.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.361. The Holocaust in Film and Literature. 3.00 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.383. Jewish Travel Literature. 3.00 Credits.
Exile; Diaspora; Wandering; Refugee; Immigrant—these are all keywords that have been closely associated with Jews and the Jewish experience. What binds them all is movement, whether individual or communal, voluntary or involuntary. This course will examine the connection between movement and Jewish culture and history through the various forms of Jewish travel writing. In looking at depictions of travel both fictional and historical from the Middle Ages to the 20th century we will revisit and interrogate many of these keywords to understand the ways they have been deployed to understand Jewish identity in literature and beyond. A central point of consideration will be the role of travel in shaping conceptions of Jewish identity as well as Jewish literature in the modern period. We will examine novels, short stories, reportage, and travelogues describing real and imagined journeys from and to Asia, the Middle East, Europe, and America. All readings will be in English translation, primarily from sources in Yiddish, Hebrew, and German.
Instructor(s): S. Spinner
Area: Humanities.
AS.213.387. Major City, Minor Literature? Berlin in German-Jewish and Yiddish Literature. 3.00 Credits.

Between the two World Wars, a period of intense artistic and intellectual vitality, Berlin was an international center for theater, visual arts, and literature. Many important Yiddish-language writers were drawn to Berlin and, together with their German-language counterparts, produced a body of literature that explores issues of modernity and identity. By comparing works in Yiddish and German, we will learn about inter-War Berlin’s cultural diversity and richness, while also gaining insight into the particular issues of writing about Jewish identity in the 1920s, and the implications of writing in a minor language (Yiddish). We will read works by authors including Joseph Roth and Alfred Döblin in German, and Moyshe Kulbak and Dovid Bergelson in Yiddish. All texts will be in translation. Some questions we will explore include: • What is a minority/minor language or literature? • How did German and Yiddish interact in cultural and social spheres? • Can texts in different languages comprise a single body of literature? • What did it mean to be German and what did it mean to be Jewish? • Are assimilation and hybridity useful concepts? • Is there such a thing as Jewish modernism? • How did literature of the period respond to the rise of the Nazi party and the intensification of antisemitism?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.407. Museums and Identity. 3.00 Credits.

This course will explore the phenomenon of the “identity” museum through case studies involving Jewish and Holocaust museums around the world. The museum boom of the last half-century has centered in large part around museums dedicated to the culture and history of particular minority groups; recent notable (and relatively local) examples include the brand new National Museum of African American History and Culture in Washington and the National Museum of American Jewish History in Philadelphia. Our understanding of the contemporary theory and practice of such museums will be based on an examination of the history of the various museological traditions that engage Jewish identity from the 19th century to the present, including the collection and display of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities

Writing Intensive.

AS.213.706. Literature, Museums, Mimesis.

Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Instructor(s): S. Spinner
Area: Humanities

Writing Intensive.

AS.213.725. Proto-, Modern, and Post-: Locating the –ism in Modernism.

All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “post-modernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is post-modernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-Bloom, Henry Dumas, Moyshe Kulbak, Machado de Assis, Mendele Mokher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.
Instructor(s): M. Caplan.

Though every conventional description of modernist aesthetics dates its origins to the era preceding World War I—in some versions several decades before 1914—there has always been an understanding of the War’s “catalytic” influence on the aesthetic of chaos, madness, violence, and despair that comes to characterize at least one major strain of modernistic art. Taking the after-effects of the First World War as well as the Russian Revolution(s) as its point of origin, this graduate-level seminar will consider such writers as Sigmund Freud, Walter Benjamin, Sh. Y. Agnon, Sh. Ansky, Guillaume Apollinaire, Isaac Babel, Georges Perec, Erich Maria Remarque, Joseph Roth, Virginia Woolf, and Stefan Zweig. All readings and discussions available in English.

AS.213.385. Anthropology and Modernism.

This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of “culture.”
Instructor(s): S. Spinner
Area: Humanities.
AS.216.300. Contemporary Israeli Poetry. 3.00 Credits.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, Dalia Rabikovitch, Erez Biton, Roni Somek, Dan Pagis, Yona Wollach, Yair Horwitz, Maya Bejerano, and Yitzhak Laor. Against the background of the poetry of these famous poets we will study recent developments and trends in Israeli poetry, including less known figures such as Mois Benarroch, Shva Salhoov and Almog Behar. Through close reading of the poems, the course will trace the unique style and aesthetic of each poet, and will aim at presenting a wide picture of contemporary Hebrew poetry.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities

AS.216.334. Israeli and Palestinian Cinema. 3.00 Credits.
This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive

AS.216.342. The Holocaust in Israeli Society and Culture. 3.00 Credits.
This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive

AS.216.370. Israel Through Prose. 3.00 Credits.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled.-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive

AS.216.373. War in Israeli Arts and Culture. 3.00 Credits.
In this course we will study the various representations of what functions as one of Israel's most unifying and yet dividing forces: war. By analyzing literary and cinematic works as well as visual art and popular culture we will attempt to understand the role of war in shaping Israeli society, culture and politics. Topics such as commemoration and mourning, dissent and protest, trauma and memory and the changing image of the soldier will stand at the center of the course. Students with a knowledge of Hebrew wishing to do extra work in Hebrew should enroll in section 2 and the fourth hour will be scheduled at a time convenient to the enrollees and instructor.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Humanities Center

**AS.300.330. Trauma in Theory, Film, and Fiction. 3.00 Credits.**
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (The Emigrants), Lanzmann (Shoah), Spiegelman (In the Shadow of No Towers), McCarthy (Remainder), and others.
Instructor(s): M. Fried
Area: Humanities, Social and Behavioral Sciences.

**AS.300.379. Israeli Film and Literature. 3.00 Credits.**
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli cinema and literature. The course will follow both a thematic and chronological path in order to study the ways in which Israeli cinema and literature reflect political, ideological, social, and cultural aspects of contemporary Israel. In this context, we will read well-known works by several major authors and will watch major Israeli films from the 1940s to these days. We will also use a comparative approach to study the different artistic means of both mediums and to evaluate their successes in representing the various tensions of Israeli society and culture.
Instructor(s): N. Stahl, Z. Cohen
Area: Humanities
Writing Intensive.

**Music**

**AS.376.317. Jewish Music. 3.00 Credits.**
What is “Jewish music,” and what roles has it played in global and Jewish cultures? This course will address these questions, considering genres and contexts of Jewish music from cantillation to klezmer and from art music to Yiddish cinema. Cross-listed with Jewish Studies
Instructor(s): J. Walden
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Center for Language Education

**AS.384.115. First Year Hebrew. 4.00 Credits.**
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Instructor(s): Z. Cohen

**AS.384.116. First Year Modern Hebrew II. 3.00 Credits.**
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies.
Prerequisites: AS.384.115
Instructor(s): Z. Cohen.

**AS.384.215. Second Year Hebrew. 3.50 Credits.**
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.116 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

**AS.384.216. Second Year Modern Hebrew II. 3.00 Credits.**
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

**AS.384.315. Third Year Hebrew. 4.00 Credits.**
Designed to maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.216 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

**AS.384.316. Third Year Modern Hebrew II. 3.00 Credits.**
Designed to maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Recommended Course Background: AS.384.315 or permission required. Cross-listed with Jewish Studies.
Prerequisites: AS.384.315
Instructor(s): Z. Cohen

Program in Museums and Society

**AS.389.350. Staging Suburbia with the Jewish Museum of Maryland-Community Based Learning. 3.00 Credits.**
Work as a public historian alongside Jewish Museum of Maryland curators and staff, researching primary documents and artifacts to develop an exhibition about Baltimore’s Jewish suburbs. The show will travel throughout Baltimore. M&S practicum course. Cross-listed with History and Jewish Studies.
Instructor(s): D. Weiner
Area: Humanities, Social and Behavioral Sciences.

Center for Language Education

http://krieger.jhu.edu/cle
The Center for Language Education (CLE) was established in 1992 and presently offers foreign-language courses in Arabic, Chinese, Hebrew, Hindi, Japanese, Korean, and Russian.

The CLE also offers evening, non-credit English as a Second Language (ESL) courses, English for International Teaching Assistants (ITAs), and a Summer Intensive English Language Program for visiting and pre-college students. The Summer Program consists of classes in Oral Communication, Academic and Professional Writing, Accent Reduction, American Culture, and TOEFL Preparation.

The Goucher-Hopkins Cooperative Program in Russian

The Goucher College–Johns Hopkins University Cooperative Program in Russian Language, Literature, and Culture offers a full range of courses to be drawn from for JHU students to complete either a second major or minor in Russian.

Second Major in Russian

The Russian double-major, designed to give students a working command of both the written and spoken language and a deeper understanding of the cultural and literary development of the Russian people from the advent of Christianity to the present day, consists of 30 credits beyond, but not including, the course AS.377.208 Intensive Intermediate Russian. At least 3 courses (9 credits) must be at the 300-level or higher. Russian may only be completed as an additional major; students must have a different primary major. A grade of C- or better
must be earned in all courses applied towards the major and courses may not be taken satisfactory/unsatisfactory.

Russian majors are strongly encouraged to enroll in a summer immersion or spend a semester abroad in Moscow, St. Petersburg, or Vladimir through the Bard-Smolny, ACTR, or CIEE programs. A three-week summer immersion to Odessa, Ukraine is offered some years as part of the language study. Completion of AS.377.209 Advanced Russian Grammar is typically a prerequisite to study abroad. A portion of the credits earned during approved study abroad summer and semester programs may be applied toward the minor or double-major.

**Minor in Russian**

The minor consists of 18 credits beyond, but not including, the course AS.377.208 Intensive Intermediate Russian. A grade of C- or better must be earned in all courses applied towards the minor and courses may not be taken satisfactory/unsatisfactory.

**Grading and Course Progression for Languages Offered by the Center for Language Education**

For beginning courses, only AS.377.131 Elements of Russian I may be taken satisfactory/unsatisfactory. Other languages may be taken satisfactory/unsatisfactory only at the intermediate level and above. A student earning a D in a course is not eligible to pass to the next higher level course. Students are granted credit for each semester course successfully completed, regardless of enrollment or performance in a subsequent course.

AS.370.022. Reading & Writing English - Intermediate.
Instructor(s): M. Walsh
Writing Intensive.

Instructor(s): Staff.

AS.370.032. Reading & Writing English 3.
Instructor(s): Staff
Writing Intensive.

AS.370.034. American Culture Through Film.
Instructor(s): Staff
Writing Intensive.

Instructor(s): M. Walsh.

AS.370.042. Reading & Writing English - Advanced Plus.
Instructor(s): Staff
Writing Intensive.
AS.370.044. Accent Reduction.
In person registration only This course is designed to help non-native American English speakers tackle American English language skills and improve their pronunciation and manner of speaking dramatically. The course incorporates the learning of language skills such as the sounds, stress patterns, rhythm, and intonation patterns of American English. This is a separate process from learning the grammar and vocabulary of American English. The completion of this course will result in accent modification, accent improvement and easily understandable conversational speech and will help the learner to function more effectively at work and outside of work.
Instructor(s): J. Yarmolinskaya.

AS.370.050. Strengthening English for the TOEFL.
This course will be an in-depth study of higher level English grammar. Students will build on their foundational grammar skills, gaining confidence in the more subtle nuances of grammar. Sentence structure will be studied at length giving students the ability to more clearly express their ideas. Other focus areas will include but are not limited to, the perfect tenses, higher level punctuation, and modal verbs.
Instructor(s): M. Walsh.

Description: This course will be an in-depth study of higher level English grammar. Students will build on their foundational grammar skills, gaining confidence in the more subtle nuances of grammar. Sentence structure will be studied at length giving students the ability to more clearly express their ideas. Other focus areas will include but are not limited to, the perfect tenses, higher level punctuation, and modal verbs.
Instructor(s): E. Dunn.

AS.370.060. Accent Reduction for ITAs.
This course is intended for international Teaching Assistants (TAs) who are not native speakers of English. It focuses on improving students' perception and pronunciation of American English through learning articulation, phonetics, and phonology. Students learn the basics of anatomy of speech production in order to understand how difficult sounds and sound contrasts are made. Students also learn the International Phonetic Alphabet (IPA) to help them distinguish sound contrasts that are difficult depending on the individual students' native languages. Moving beyond individual sounds, students learn how sounds change depending on what word or phrase they appear in and when they appear in fast or colloquial speech. Finally, students learn and practice intonation appropriate for various types of statements and questions.
Instructor(s): J. Yarmolinskaya.

This course is intended for international Teaching Assistants (TAs) who are not well acquainted with the culture of American universities. It focuses on improving students' understanding of the culture and communication norms in American academia. Students learn the basics of conversation and e-mail etiquette in America, as well as the norms of interacting with college students they teach, professors, and colleagues in situations such as classes, office hours, lab meetings, and scientific meetings. Students practice designing and presenting lectures, supporting materials, tests, and assignments for classes they TA, as well as scholarly presentations of their research to the scientific community. This course is open only to graduate students in AS/EN.
Instructor(s): J. Yarmolinskaya.

AS.370.064. Academic Writing.
This course is intended for international teaching assistants, graduate students and postdoctoral fellows who are not native speakers of English. Students will read and analyze the content, structure, and style of a wide range of academic and professional writing in order to improve their own essays, articles, reports, theses, critiques, and proposals using those features. They will learn to explain, support, compare and argue their ideas effectively through attention to organization, vocabulary, and style. Grammar will be infused into the course as it applies to revision and editing of written work and consistency within various types of writing. Students will use a variety of strategies to improve skills in idea development, organization, word choice, sentence fluency, voice, grammar and mechanics. Writing tasks will be integrated with content, vocabulary, and grammar from various texts.
Instructor(s): Staff.

This course is intended for international teaching assistants, graduate students and postdoctoral fellows who are not native speakers of English. This course aims to enable students to succeed in academic, professional, and social discussions and conversations. By focusing on strategies for initiating oral communication, responding to the comments and ideas of others; as well as improving listening skills, students will become better overall at speaking and listening to English. Fiction and non-fiction media from a variety of sources will be used to stimulate discussion, sharpen listening skills, and build vocabulary. Exercises and drills will target specific grammar trouble spots and explicit pronunciation errors. So as to empower students in formal speaking situations, they will be asked to deliver two short 2-4 minute presentations and one longer 5-8 minute presentation. Extensive practice and feedback from instructor and classmates encourage students' confidence in their public speaking skills.
Instructor(s): D. McNeal.

This course aims to enable English language learning students to succeed in professional and social discussions and conversations by honing their public speaking skills. This course will focus on strategies for creating, delivering and observing a variety of presentations. Exercises and drills will target specific grammar trouble spots and explicit pronunciation errors. Material will augmented so as to empower students in formal and social speaking situations. Students will be asked to deliver seven short 3-5 minute presentations and one longer 5-8 minute presentation. Extensive practice and feedback from the instructor and classmates will encourage students' confidence in their public speaking skills. At the end of this course, it is expected that students will be able to deliver cogent and engaging presentations as well as be able to provide insightful and educated feedback on others' presentations.
Instructor(s): D. McNeal.

AS.373.111. First Year Heritage Chinese. 3.50 Credits.
This course is designed for students who were raised in an environment in which Chinese is spoken by parents or guardians at home and for those who are familiar with the language and possess native-like abilities in comprehension and speaking. The course therefore focuses on reading and writing (including the correct use of grammar). Cross-listed with East Asian Studies
Instructor(s): N. Zhao; R. Hsieh.
AS.373.112. First Year Heritage Chinese II. 3.00 Credits.
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Lab required. Continuation of AS.373.111. Recommended Course Background: AS.373.111 or permission required.
Prerequisites: Prereq: AS.373.111 or equivalent
Instructor(s): N. Zhao.

AS.373.115. First Year Chinese. 4.50 Credits.
This course is designed primarily for students who have no prior exposure to Chinese. The objective of the course is to help students build a solid foundation of the four basic skills—listening, speaking, reading, and writing in an interactive and communicative learning environment. The emphasis is on correct pronunciation, accurate tones and mastery of basic grammatical structures. Note: Students with existing demonstrable skills in spoken Chinese should take AS.373.111-112. No Satisfactory/Unsatisfactory. Students may choose to attend either lecture at 12pm or 3pm on TTh. Cross-listed with East Asian Studies
Instructor(s): J. Chen; L. Yin; N. Zhao; Y. Chen.

AS.373.116. First Year Chinese II. 4.50 Credits.
Introductory course in Modern Standard Chinese. Goals: mastery of elements of pronunciation and control of basic vocabulary of 800-900 words and most basic grammatical patterns. Students work first with Pin-Yin system, then with simplified version of written Chinese characters. Course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be introduced on a regular basis. Cross-listed with East Asian Studies
Instructor(s): A. Chen

AS.373.211. Second Year Heritage Chinese. 3.50 Credits.
This course is designed for students who finished AS.373.112 with C+ and above (or equivalent). Students in this course possess native-like abilities in comprehension and speaking. The course focuses on reading and writing. Cross-listed with East Asian Studies
Prerequisites: AS.373.112 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

AS.373.212. Second Year Heritage Chinese II. 3.00 Credits.
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Recommended Course Background: AS.373.211 or permission required.
Prerequisites: Prereq: AS.373.211 or equivalent
Instructor(s): A. Chen
Area: Humanities.

AS.373.215. Second Year Chinese. 4.50 Credits.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Cross-listed with East Asian Studies
Prerequisites: AS.373.116 or equivalent.
Instructor(s): A. Chen; J. Yin
Area: Humanities.

AS.373.216. Second Year Chinese II. 4.50 Credits.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Recommended Course Background: AS.373.215 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.215 or equivalent.
Instructor(s): A. Chen; J. Yin
Area: Humanities.

AS.373.261. Intermediate Workshop & Practicum in Engineering Chinese. 2.00 Credits.
JHU China-STEM Program: Engineering. Specialized intermediate language instruction for students of Mandarin in fields of science and engineering. Courses offered at the Nanging Center in Nanjing, China. By application only. Two years of College-level Mandarin required for admission to the China-STEM Program.
Instructor(s): N. Yu
Area: Humanities.

AS.373.271. Intermediate Workshop and Practicum in Health Sciences Chinese. 2.00 Credits.
JHU China-STEM Program: Engineering. Specialized intermediate language instruction for students of Mandarin in fields of science and engineering. Courses offered at the Nanging Center in Nanjing, China. By application only. Two years of College-level Mandarin required for admission to the China-STEM Program.
Instructor(s): N. Yu
Area: Humanities.

AS.373.313. Third Year Heritage Chinese. 3.00 Credits.
This course is designed for those who have already taken AS.373.212 or equivalent. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be introduced on a regular basis. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.211 AND AS.373.212 or instructor’s permission
Instructor(s): J. Yin
Area: Humanities.

AS.373.314. Third Year Heritage Chinese II. 3.00 Credits.
This course is a continuation of AS.373.313. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be included on a regular basis. Lab required.
Prerequisites: AS.373.313 or equivalent
Instructor(s): J. Yin
Area: Humanities.

AS.373.315. Third Year Chinese. 3.50 Credits.
This two-semester course consolidates and further develops students’ knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible and written assignments will be given. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.216 or equivalent
Instructor(s): A. Chen
Area: Humanities.
AS.373.316. Third Year Chinese II. 3.50 Credits.
This two-semester course consolidates and further expands students’ knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese as feasible, and written assignments will be given. Continuation of AS.373.315.
Recommended Course Background: AS.373.315 or permission required.
Prerequisites: Prereq: AS.373.315 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

AS.373.361. Chinese for Engineers. 6.00 Credits.
JHU China-STEM Program: Engineering: Specialized intermediate language instruction for students of Mandarin in fields of science and engineering. Courses offered at the Nanging Center in Nanjing, China. By application only. Two years of College-level Mandarin required for admission to the China-STEM Program.
Instructor(s): N. Yu
Area: Humanities.

AS.373.362. Advanced Workshop & Practicum in Engineering Chinese. 2.00 Credits.
JHU China-STEM Program: Engineering: Specialized intermediate language instruction for students of Mandarin in fields of science and engineering. Courses offered at the Nanging Center in Nanjing, China. By application only. Two years of College-level Mandarin required for admission to the China-STEM Program.
Instructor(s): Staff
Area: Humanities.

AS.373.371. Health Sciences Chinese. 6.00 Credits.
JHU China-STEM Program: Engineering: Specialized intermediate language instruction for students of Mandarin in fields of science and engineering. Courses offered at the Nanging Center in Nanjing, China. By application only. Two years of College-level Mandarin required for admission to the China-STEM Program.
Instructor(s): N. Yu
Area: Humanities.

Instructor(s): N. Yu
Area: Humanities.

AS.373.373. Fourth Year Chinese II. 3.00 Credits.
Continuation of AS.373.415. Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students should understand most of the readings with the aid of a dictionary, so that class discussion need not focus primarily on detailed explanations of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings’ content. Recommended Course Background: AS.373.415 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: AS.373.315
Instructor(s): L. Yin
Area: Humanities.

AS.373.416. Fourth Year Chinese II. 3.00 Credits.
Continuation of AS.373.415. Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students should understand most of the readings with the aid of a dictionary, so that class discussion need not focus primarily on detailed explanations of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings’ content. Recommended Course Background: AS.373.415 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.415 or equivalent.
Instructor(s): L. Yin
Area: Humanities.

AS.373.451. Topics in Chinese Media. 3.00 Credits.
The main focus of this course is to expand the student’s knowledge of four essential skills in Chinese language and to deepen the student’s knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students’ reading comprehension, maintain conversation skills through class discussion, increase understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Recommended Course Background: Completion of four years of Chinese language or permission required.
Instructor(s): N. Zhao
Area: Humanities.

AS.373.491. 5th Year Chinese. 3.00 Credits.
Fifth Year Chinese is designed for students who finished fourth year or third year heritage Chinese course at JHU or its equivalent and wish to achieve a higher advanced proficiency level in Chinese. The goal of the course is to help students further develop their listening, speaking, reading and writing skills cohesively and to enhance students’ understanding of Chinese culture and society through language learning.
Prerequisites: AS.373.416 or AS.373.314 or equivalent.
Instructor(s): N. Zhao.

AS.373.492. Fifth Year Chinese. 3.00 Credits.
Fifth Year Chinese is designed for students who finished fourth year regular or third year heritage Chinese course at JHU or its equivalent and wish to achieve a higher advanced proficiency level in Chinese. The goal of the course is to help students further develop their listening, speaking, reading and writing skills cohesively and to enhance students’ understanding of Chinese culture and society through language learning.
Prerequisites: AS.373.491 or equivalent.
Instructor(s): N. Zhao.

AS.373.501. Independent Study - Chinese. 0.00 - 4.00 Credits.
Instructor(s): L. Lievens; M. Johnson.

AS.373.502. Independent Study - Chinese. 2.00 Credits.
Independent Study - Chinese
Instructor(s): L. Lievens; M. Johnson.

AS.375.115. First Year Arabic. 4.50 Credits.
Introductory course in speaking, listening, reading, and writing Modern Standard Arabic. Presents basic grammatical structures and a basic vocabulary. Through oral-aural drill in classroom, tapes in Language Laboratory, and reading/writing exercises, students attain a basic level of competence on which they can build in subsequent years of study.
Instructor(s): S. Jafire.
AS.375.116. First Year Arabic II. 4.50 Credits.
Continuation of AS.375.115. Introductory course in speaking, listening, reading, and writing Modern Standard Arabic. Presents basic grammatical structures and a basic vocabulary. Through oral-aural drill in classroom, tapes in Language Laboratory, and reading/writing exercises, students attain a basic level of competence on which they can build in subsequent years of study. Accelerated students should register for Section 01. May not be taken Satisfactory/ Unsatisfactory
Prerequisites: Prereq: AS.375.115 or equivalent.
Instructor(s): F. Abdallah; K. Tahrawi; S. Jafire.

AS.375.119. Beginning Arabic I. 3.00 Credits.
Introductory course in speaking, listening, reading, and writing Modern Standard Arabic. Presents basic grammatical structures and a basic vocabulary. Through oral-aural drill in classroom, tapes in Language Laboratory, and reading/writing exercises, students attain a basic level of competence on which they can build in subsequent years of study.
Instructor(s): F. Abdallah; K. Tahrawi.

AS.375.120. Beginning Arabic II. 3.00 Credits.
Continuation of Beginning Arabic I. Introductory course in speaking, listening, reading, and writing Modern Standard Arabic. Presents basic grammatical structures and a basic vocabulary. Through oral-aural drill in classroom, tapes in Language Laboratory, and reading/writing exercises, students attain a basic level of competence on which they can build in subsequent years of study.
Instructor(s): K. Tahrawi.

AS.375.215. Second Year Arabic. 4.00 Credits.
Designed to bring students up to competency level required for third/fourth year Arabic. Students will consolidate and expand their mastery of the four basic skills acquired in AS.375.115-116. More authentic material—written, audio, and visual—will be used, and culture will be further expanded on as a fifth skill. Recommended Course Background: AS.375.115-116 or equivalent.
Prerequisites: AS.375.116 or equivalent.
Instructor(s): B. Rajab
Area: Humanities.

AS.375.216. Second Year Arabic II. 4.00 Credits.
Continuation of AS.375.215. Designed to bring students up to competency level required for third/fourth year Arabic. Students will consolidate and expand their mastery of the four basic skills acquired in AS.375.115-116. More authentic material—written, audio, and visual—will be used, and culture will be further expanded on as a fifth skill. Accelerated students should register for Section 01. Recommended Course Background: AS.375.215 or permission required.
Prerequisites: Prereq: AS.375.215 or equivalent.
Instructor(s): B. Rajab
Area: Humanities.

AS.375.301. Third Year Arabic. 3.00 Credits.
Designed to enhance students’ ability to read, discuss, and write about various topics covered in traditional and contemporary Arabic texts. Recommended Course Background: AS.375.216 or equivalent.
Prerequisites: AS.375.116
Instructor(s): S. Jafire
Area: Humanities.

AS.375.302. Third Year Arabic II. 3.00 Credits.
Designed to enhance students’ ability to read, discuss, and write about various topics covered in traditional and contemporary Arabic texts. Continuation of AS.375.301. Recommended Course Background: AS.375.301 or permission required.
Prerequisites: Prereq: AS.375.301 or equivalent.
Instructor(s): B. Rajab
Area: Humanities.

AS.375.401. Fourth Year Arabic. 3.00 Credits.
This is an introductory course to different periods of the Arabic literature. Selections of famous Arabic poetry and short prose works are the substance of the course.
Prerequisites: AS.375.302 or equivalent.
Instructor(s): B. Rajab
Area: Humanities.

AS.375.501. Independent Study-Arabic. 0.00 - 3.00 Credits.
Instructor(s): M. Johnson.

AS.375.801. Independent Study - Arabic.
Graduate level Independent Study course in Arabic.
Instructor(s): B. Rajab.

AS.375.802. Independent Study -- Arabic.
Instructor(s): B. Rajab
Area: Humanities.

AS.377.131. Elements of Russian I. 4.00 Credits.
Designed to give student a firm foundation in the language, with special emphasis on the development of vocabulary, basic reading, and conversational skills. (Section 02 taught at Goucher College)
Instructor(s): A. Czeczulin; O. Samilenko.

AS.377.132. Elementary Russian II. 4.00 Credits.
Designed to give students a firm foundation in the language, with special emphasis on the development of vocabulary, basic reading, and conversational skills. Continuation of AS.377.131. Section 02 taught at Goucher. May not be taken Satisfactory/Unsatisfactory. Recommended Course Background: AS.377.131.
Instructor(s): A. Czeczulin; O. Samilenko.

AS.377.200. Say What You Mean, Mean What You Say. 3.00 Credits.
This course focuses on language as a form of communication – verbal, nonverbal and written. It is designed to prepare students to study their own language(s) as well as foreign languages such as Russian, relying on physical cues, common grammar, and the global need to express oneself to others, by taking a hard look at the mechanics of creating an entertainment sensation. Taught at Goucher College.
Instructor(s): A. Czeczulin
Area: Humanities.

AS.377.208. Intensive Intermediate Russian. 4.00 Credits.
Intensive oral work; continued emphasis on grammar and reading comprehension. Section 02 taught at Goucher College.
Prerequisites: AS.377.132
Instructor(s): A. Czeczulin
Area: Humanities.
AS.377.209. Advanced Russian Grammar. 4.00 Credits.
Continuation of AS.377.208. Intensive oral work; continued emphasis on grammar and reading comprehension.
Instructor(s): A. Czeczulin
Area: Humanities.

AS.377.210. Russian Conversation & Composition. 3.00 Credits.
Discussions based on readings, films, and multimedia exercises. Special attention is paid to the active use of grammar structures in fourth semester Russian. Recommended Course Background: AS.377.209 or instructor’s permission.
Prerequisites: AS.377.209
Instructor(s): O. Samilenko
Area: Humanities.

AS.377.211. Introduction to Russian Literature I. 3.00 Credits.
This first intensive reading course of the literary sequence focuses on a survey of major writers, genres, and literary movements of mid-nineteenth century Russia including select works of Pushkin, Gogol, Lermontov, Turgenev, Tolstoy and Dostoevsky adapted to the intermediate level. Taught in Russian
Prerequisites: AS.377.209 and AS.377.210 or permission of instructor.
Instructor(s): O. Samilenko
Area: Humanities.

AS.377.237. The Russian Press. 3.00 Credits.
Reading and discussion of topics drawn from the Russian press.
Designed to strengthen the student's command of Russian vocabulary, especially in the areas of history, political science, and economics, while providing a deeper insight into the dynamics of everyday life in Russia today. Taught at Goucher College.
Prerequisites: AS.377.209 OR AS.377.210 OR Permission of instructor.
Instructor(s): A. Czeczulin
Area: Humanities.

AS.377.253. The Soul of Russia: Culture and Civilization. 3.00 Credits.
The evolution of Russian culture and civilization from the Mongol invasion to the present day conducted through a study of literary texts, architecture, art, music, film, and multimedia. Taught in English. Held at Goucher.
Instructor(s): A. Czeczulin
Area: Humanities
Writing Intensive.

AS.377.269. The Russian Fairy Tale. 3.00 Credits.
A survey course of Russian oral and subsequent written tradition using multimedia and presented against the background of the Indo-European tradition. Taught in English at Goucher College
Instructor(s): A. Czeczulin
Area: Humanities
Writing Intensive.

AS.377.270. Out of the Shadows: Women in Russia. 3.00 Credits.
This course will explore the role of Russian women in the world by carefully examining the significance of contributions by these women. Diverse perspectives will be explored (Russian and Russian National). Students will examine and analyze texts written by and about women struggling with questions regarding patriarchal and male-based society. The fact that these women have remained hidden from Russia and the world at large will also be addressed, using feminist methodologies. This course will provide students with the opportunity to pursue their own questions in dialogue. Rus 270 is available as a traditional or hybrid class. Offered Fall 2015 and every fall. Taught at Goucher College.
Instructor(s): A. Czeczulin
Area: Humanities.

AS.377.318. Chekov and the Short Story. 3.00 Credits.
Chekov's short stories and plays studied against the social, political, and philosophic background of his time. Close readings and in-depth stylistic analysis. Designed for advanced students. Taught in Russian
Instructor(s): O. Samilenko
Area: Humanities.

AS.377.335. Technical Translation. 3.00 Credits.
Advanced work in translating Russian into English in the sciences and social sciences. Taught at Goucher.
Instructor(s): A. Czeczulin
Area: Humanities.

AS.377.353. The Soul of Russia: Russian Culture and Civilization and Capstone Project. 4.00 Credits.
Students will learn about Russian traditions, folklore, conceptions of the world, and the search for national identity in juxtaposition with Russian history and literature. Seven topics will be covered using literature, music, cuisine and dance. At the 300-level students are required to complete a research paper and a capstone project that includes work in the Russian language done through reading and written assignments or through a documented community-based learning capstone project with the instructor's permission. The course is taught in English. Students taking 253 receive 3 credits. Students taking 353 receive 4 credits.
Instructor(s): A. Czeczulin
Area: Humanities
Writing Intensive.

AS.377.395. Senior Seminar I: Novels of the Golden Age. 3.00 Credits.
Folkloric Elements in the works of Pushkin, Gogol, Lermontov, and Leskov.
Instructor(s): O. Samilenko
Area: Humanities.

AS.377.396. Senior Seminar II: Masterpieces of the 20th Century. 3.00 Credits.
A close study of Russian poetry from the eighteenth century to the present, including major poetic movements. Taught in Russian.
Instructor(s): O. Samilenko
Area: Humanities.

AS.377.501. Independent Study-Russian. 3.00 Credits.
Through arrangement with the instructor.
Instructor(s): A. Czeczulin; O. Samilenko.

AS.377.505. Independent Study - Russian Technical Translation. 0.00 - 3.00 Credits.
Advanced work in translating Russian into English in the sciences and social sciences.
Prerequisites: AS.377.237 or Instructor permission.
Instructor(s): A. Czeczulin.

AS.377.506. Russian-Independent Study. 0.00 - 3.00 Credits.
Instructor(s): O. Samilenko.

AS.377.599. Independent Study. 3.00 Credits.
Instructor(s): O. Samilenko.
AS.378.115. First Year Japanese. 4.50 Credits.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the year, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 150 kanji in context. Knowledge of grammar will be expanded significantly in AS.373.215. Lab required. Recommended Course Background: AS.378.115 or equivalent.
Prerequisites: Prereq: AS.378.115 or equivalent.
Instructor(s): M. Johnson; S. Katagiri.

AS.378.116. First Year Japanese II. 4.50 Credits.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the fall term, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 60 kanji in context. Knowledge of grammar will be expanded significantly in 2nd year Japanese. Lab required. Recommended Course Background: AS.378.115 or equivalent.
Prerequisites: Prereq: AS.378.115 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.215. Second Year Japanese. 4.50 Credits.
Training in spoken and written language, increasing their knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Recommended Course Background: AS.378.115 and AS.378.116 or equivalent.
Prerequisites: AS.378.116 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.216. Second Year Japanese II. 4.50 Credits.
Continuation of Beginning Japanese and Intermediate Japanese I. Training in spoken and written language, increasing students' knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Lab required. Recommended Course Background: AS.378.215 or equivalent.
Prerequisites: Prereq: AS.378.215 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.315. Third Year Japanese. 3.00 Credits.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Cross-listed with East Asian Studies.
Prerequisites: AS.378.215-216
Instructor(s): M. Nakao
Area: Humanities.

AS.378.316. Third Year Japanese II. 3.00 Credits.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Lab required. Continuation of AS.378.315. Recommended Course Background: AS.378.315 or equivalent.
Prerequisites: Prereq: AS.378.315 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.396. Fundamentals of Japanese Grammar. 2.00 Credits.
This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It is also appropriate for graduate students who need to be able to read materials written in Japanese. Recommended Course Background: AS.378.315 and AS.378.316 or equivalent.
Prerequisites: AS.378.316 or equivalent.
Instructor(s): M. Nakao; S. Katagiri
Area: Humanities.

AS.380.101. First Year Korean. 4.50 Credits.
Introduces the Korean alphabet, hangeul. Covers basic elements of the Korean language, high-frequency words and phrases, including cultural aspects. Focuses on oral fluency reaching Limited Proficiency where one can handle simple daily conversations. No Satisfactory/ Unsatisfactory. Recommended Course Background: AS.373.215 or equivalent.
Cross-listed with East Asian Studies.
Instructor(s): J. Song; S. Lee.
AS.380.102. First Year Korean II. 3.00 Credits.
Focuses on improving speaking fluency to Limited Proficiency so that one can handle simple daily conversations with confidence. It provides basic high-frequency structures and covers Korean holidays. Continuation of AS.380.101. Recommended Course Background: AS.380.101 or permission required.
Prerequisites: Prereq: AS.380.101 or equivalent.
Instructor(s): J. Song; S. Lee.

AS.380.201. Second Year Korean. 4.00 Credits.
Aims for improving oral proficiency and confident control of grammar with vocabulary building and correct spelling intended. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness. Project due on Korean cities. Existing demonstrable skills in spoken Korean preferred.
Prerequisites: Prereqs: AS.380.101 and AS.380.102
Instructor(s): S. Lee
Area: Humanities.

AS.380.202. Second Year Korean II. 3.00 Credits.
Aims for improving writing skills with correct spelling. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness, including discussion on family tree. Continuation of AS.380.201. Recommended Course Background: AS.380.201 or equivalent.
Prerequisites: Prereq: AS.380.201 or equivalent.
Instructor(s): S. Lee
Area: Humanities.

AS.380.301. Third Year Korean. 3.00 Credits.
Emphasizes reading literacy in classic and modern Korean prose, from easy essays to difficult short stories. Vocabulary refinement and native-like grasp of grammar explored. Project due on Korean culture. Cross-listed with East Asian Studies
Prerequisites: AS.380.202 or equivalent.
Instructor(s): S. Lee
Area: Humanities.

AS.380.302. Third Year Korean II. 3.00 Credits.
Emphasizes reading literacy in classic and modern Korean prose. By reading Korean newspapers and professional articles in one’s major, it enables one to be well-versed and truly literate. Continuation of AS.380.301. Cross-listed with East Asian Studies Prerequisite: AS.380.301 or equivalent.
Prerequisites: Prereq: AS.380.301 or equivalent.
Instructor(s): S. Lee
Area: Humanities.

AS.381.101. First Year Hindi I. 3.00 Credits.
Course focuses on acquisition of additional vocabulary and grammatical structures in culturally authentic contexts, listening, speaking, reading, and writing comprehension. No Satisfactory/ Unsatisfactory Lab Req’d.
Instructor(s): U. Saini.

AS.381.102. First Year Hindi II. 3.00 Credits.
This course prepares students to function in everyday situations in the Hindi speaking world. Focuses on the acquisition of basic vocabulary and grammatical structures in culturally authentic contexts through listening, speaking, reading, and writing comprehension. Hindi reading and writing is taught in its original Dayva-nagari script. Oral-aural drills in class and work in the Language Lab is required.
Prerequisites: Prereq: AS.381.101 or equivalent.
Instructor(s): U. Saini.

AS.381.201. Second Year Hindi I. 3.00 Credits.
Course provides refinement of basic language skills in cultural context. Emphasis will be on expansion of vocabulary and grammatical structures and further development of communicative skills. Recommended Course Background: AS.381.101, AS.382.102
Prerequisites: AS.381.102 or equivalent.
Instructor(s): U. Saini
Area: Humanities.

AS.381.202. Second Year Hindi II. 3.00 Credits.
Course provides refinement of basic language skills in cultural context. Emphasis will be on expansion of vocabulary and grammatical structures and further development of communicative skills. Continuation of AS.381.201. Recommended Course Background: AS.381.201 or permission required.
Prerequisites: Prereq: AS.381.201 or equivalent.
Instructor(s): U. Saini
Area: Humanities.

AS.381.301. Third Year Hindi I. 3.00 Credits.
Learn to converse in Hindi through Hindi songs, films, and media. Promotes the active use of Hindi in culturally authentic contexts. Development of fluency in oral and written communication is emphasized.
Prerequisites: AS.381.201 AND AS.381.202
Instructor(s): U. Saini
Area: Humanities
Writing Intensive.

AS.381.302. Third Year Hindi II. 3.00 Credits.
This course is geared towards listening comprehension, enrichment of vocabulary and exposure to various social situations. Students will get an opportunity to learn to narrate and support their views in informal and formal styles. The course will promote a meaningful interaction to understand the cultural nuances.
Prerequisites: Prereq: AS.381.301 or equivalent.
Instructor(s): U. Saini
Area: Humanities
Writing Intensive.

Independent study in Arabic above 3rd year level.
Instructor(s): U. Saini.

AS.384.115. First Year Hebrew. 4.00 Credits.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Instructor(s): Z. Cohen.

AS.384.116. First Year Modern Hebrew II. 3.00 Credits.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies.
Prerequisites: AS.384.115
Instructor(s): Z. Cohen.

AS.384.215. Second Year Hebrew. 3.50 Credits.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.116 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.
AS.384.216. Second Year Modern Hebrew II. 3.00 Credits.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required. 
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.315. Third Year Hebrew. 4.00 Credits.
Designed to maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.216 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.316. Third Year Modern Hebrew II. 3.00 Credits.
Designed to: maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Recommended Course Background: AS.384.315 or permission required. Cross-listed with Jewish Studies.
Prerequisites: AS.384.315
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.503. Summer Internship-Hebrew. 1.00 Credit.
Instructor(s): Z. Cohen

Cross Listed Courses
East Asian Studies
AS.310.316. First Year Classical Chinese: Language and Literature of the Ancient Period. 3.00 Credits.
Readings in prose and poetic texts of the Zhou and Han Dynasties. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in Western languages that treat the culture and writers of the Ancient period. Quizzes and Tests (Midterm and Final) will cover both language and cultural data. A short paper also required.
Instructor(s): V. Cass
Area: Humanities.

AS.310.321. Classical Chinese. 3.00 Credits.
This course introduces the basic syntax, grammar and vocabulary of Classical Chinese or Literary Chinese (guwen??/wenyan wen ???), the written language from Old Chinese to the early twentieth century. Classical Chinese, which differs substantially form modern colloquial Chinese, is the language in which traditional Chinese historical, philosophical, religious and literary works are written. The structure, grammar and vocabulary of Classical Chinese still has large influence on modern Chinese formal documents and newspaper. Therefore, studying Classical Chinese is crucial not only to those who wish to understand original Chinese texts correctly but also to anyone who wants to attain a high level of reading proficiency in modern Chinese.
Prerequisites: AS.373.111 OR AS.373.112 OR AS.373.115 OR AS.373.116 AND AS.373.211 AND AS.373.212 OR AS.373.215 OR AS.373.216
Instructor(s): F. Chao
Area: Humanities.

Latin American Studies
http://anthropology.jhu.edu/plas/index.html

The Program in Latin American Studies (PLAS) promotes the study of the histories, cultures, societies, and political systems of Latin America and the Caribbean at the Johns Hopkins University. PLAS’s curricular offerings and extracurricular activities provide undergraduate and graduate students with opportunities to explore the rich political, aesthetic, intellectual, and scientific traditions of Latin America. The program also regularly sponsors scholarship and teaching related to Latino Studies. Drawing on faculty expertise across the disciplines, PLAS aims to generate new perspectives on Latin America, the Caribbean, and the experience of Latinos in the United States.

PLAS coordinates an undergraduate major and minor in Latin American studies. The major and minor are designed to deepen student interest in, and understanding of, Latin America through course work and extracurricular programs. The program encourages and supports students wishing to undertake summer research in Latin America as well as those who seek to study abroad at Latin American universities.

PLAS contributes to the professional training of graduate students through an array of interdisciplinary seminars, colloquia, and symposia featuring eminent senior scholars. The program also supports an annual conference organized by the graduate student group. PLAS offers pre-dissertation winter and summer research grants as well as a graduate teaching fellowship. It also co-sponsors student-initiated exhibitions, conferences, and special events. Information about PLAS may be found on its website:

http://krieger.jhu.edu/plas/

Major/Minor in Latin American Studies
Also see Requirements for a Bachelor’s Degree (p. 10).

The Program in Latin American Studies (PLAS) coordinates a major and a minor in Latin American studies. It aims to provide undergraduate students with a broad understanding of the complexity and richness of Latin American political, social, and cultural phenomena. As a result of completing the major or the minor, students will have gained a deep understanding of Latin American politics, economy, society, and culture, as well as of the intricate relationship between the region and the United States.

Learning Goals:

Students who graduate with a major or a minor in Latin American studies from Johns Hopkins will be able to:

- Demonstrate command of either Spanish or Portuguese in order to read documents, literature, or view media at an advanced level.
- Write effectively and support their arguments with appropriate evidence.
- Demonstrate an understanding of research methodologies drawn from both the humanities and social sciences appropriate to the field of Latin American studies.
- Critically evaluate the position of Latin America in an increasingly globalized world
- Demonstrate an awareness of the variety of cultures in Latin America.
- Demonstrate familiarity with the Latin American literary tradition and be able to analyze and interpret literary texts.

Students who decide to major or minor in Latin American studies are required to study Spanish or Portuguese. Language requirements can be waived for those who demonstrate suitable knowledge of either
Spanish or Portuguese, or in an Amerindian language such as Quechua or Guarani. The general "Introduction to Latin American Studies" course is required for the major.

Though students may choose to emphasize a particular area of specialization within Latin American studies (e.g., politics, public health, literature), the major and minor programs require a distribution of courses across a variety of areas.

Requirements for the Major

The requirements for a major in Latin American Studies are as follows:

- Four lower-level courses (100- and 200-level courses) dealing with Latin America, one of which must be the general introductory course (AS.361.130 Introduction to Latin American Studies) to Latin America.
- Five upper-level courses (300-level courses and above) focused on Latin America.
- Two electives courses (at any level) relevant or with reference to Latin America.
- Language proficiency (i.e., reading fluidity and basic conversational skills) through the advanced level in either Spanish or Portuguese will be required. Language requirements can be waived for those who demonstrate a suitable proficiency in either Spanish or Portuguese.
- No grade below C- will be accepted for the major requirements and courses may not be taken satisfactory/unsatisfactory.

Language proficiency in Spanish or Portuguese through the advanced level: 0-22

Requirements for the Minor

The requirements for a minor in Latin American Studies are as follows:

- Four upper-level courses (300 or above) focused on Latin America. Intersession courses may not be used to fulfill this requirement.
- Two additional courses at any level dealing with Latin America. Note: 3-credit intersession or summer session non-language courses offered by JHU may be used to fulfill this requirement.
- Language proficiency through the intermediate level in either Spanish or Portuguese.
- No grade below C- will be accepted for the minor requirement and courses may not be taken satisfactory/unsatisfactory.

Language proficiency in Spanish or Portuguese through the intermediate level: 0-16

* Language proficiency can be demonstrated by the completion of AS.210.212 Intermediate Spanish II or AS.210.278 Intermed/Adv Portuguese or via placement exam.

For current course information and registration go to https://isis.jhu.edu/classes/
Latin American Studies

AS.361.124. Latin American Film: Mini-Course. 1.00 Credit.
This course provides a brief, four-week, one-credit introduction to the cultural, political and aesthetic domains of Latin American cinema through thematically focused discussions of four feature-length films.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

AS.361.130. Introduction to Latin American Studies. 3.00 Credits.
The goal of this course is to provide an overview of Latin America, analyzing political and cultural aspects, chronologically organized. We will begin studying the origins of the multi-ethnic societies, starting with the ancient civilizations and their transformation under colonization. It is important to understand the survival of cultural traits among indigenous peasants today in the countries that were the cradle of ancient civilizations: Mexico, Guatemala and the Andean countries. In the republican era the course will focus on the classical Caribbean dictators in the first half of the 20th century and their reflection in the literature, comparing the historical reality with the magic representation in the work of Garcia Marquez. The course will scrutinize the most important revolutions in the continent: the Mexican, Cuban and Bolivian revolutions and the geopolitics of USA in the Americas. Weekly lectures related to the assigned reading will focus on specific periods, topics and regions. After each lecture, we will review the material, connecting specific details from the readings with the more theoretical aspects provided in my lecture. The course has a website where the PowerPoint presentations will be posted. Students are encouraged to post their questions, comments and suggestions on the web after their readings. Students will be given a study guide for each lecture, which will be the basis for the exams. Our perspective on Latin America will be enhanced by a selection of few films related to the topics.
Instructor(s): M. von der Heydt-Coca
Area: Humanities, Social and Behavioral Sciences.

AS.361.502. Independent Study. 0.00 - 3.00 Credits.
Instructor(s): D. Poole; E. Gonzalez; G. Paquette; S. Castro-Klaren.

AS.361.550. Internship. 1.00 Credit.
Instructor(s): D. Poole; G. Paquette.

Cross-Listed Course Offerings

Anthropology

AS.070.285. Understanding Aid: Anthropological Perspectives for Technology-Based Interventions. 3.00 Credits.
This course combines anthropological perspectives with the discussion and examination of technology-based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.
Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

German and Romance Languages & Literatures

AS.211.380. Modern Latin American Culture. 3.00 Credits.
Taught in Spanish. This course will explore the fundamental aspects of Latin American culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.312
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization. 3.00 Credits.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.215.458. Cuba and its Culture Since the Revolution. 3.00 Credits.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

History

AS.100.439. Cuban Revolution and the Contemporary Caribbean. 3.00 Credits.
A lecture course dealing with the development of the Cuban Revolution and the tortuous history of the Caribbean during the 19th and 20th centuries.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.440. The Revolutionary Experience in Latin America. 3.00 Credits.
Comparative examinations of revolutionary political changes in Haiti, Mexico, Bolivia, and Cuba. Cross-listed with Latin American Studies
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.441. Society, Politics, and Economics in Latin America. 3.00 Credits.
This course traces the complex relationship between politics, economics, and social changes in Latin America and the Caribbean since World War II.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences.

History of Art
AS.010.105. Art of the Ancient Americas. 3.00 Credits.
Surveys the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.320. Art of Colonial Peru. 3.00 Credits.
The visual arts of viceregal Peru (16th-18th c) are considered in historical context. Religious orders, art schools, artisan guilds and cofradía are examined as are the social and political implications of art patronage.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.334. Problems in Ancient American Art. 3.00 Credits.
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS and Program in Museum and Society
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.365. Art of the Ancient Andes. 3.00 Credits.
The ancient visual arts of Andean South America and their respective cultural contexts form the basis of this course. In conjunction with the Baltimore Museum of Art and the Johns Hopkins Archaeological Museum students will have access to collections for study.
Instructor(s): L. Deleonardis
Area: Humanities.

History of Science
AS.140.390. Science and Technology in Latin America. 3.00 Credits.
The course surveys the development of western science and technology in Hispanic America (1492 to the present). We begin studying the hybridization of scientific practices between European and Native American cultures during the early colonial era and end with the transfer of technologies and industrialization of the 20th century. We emphasize the role on science and technology in state formation, the acculturation of foreign ideas in colonial and postcolonial societies, and the role of intellectual elites in modernization programs.
Instructor(s): M. Portuondo
Area: Humanities, Social and Behavioral Sciences.

Political Science
AS.190.331. Comparative Racial Politics. 3.00 Credits.
Students will learn to utilize qualitative, interpretive methods of comparative politics to examine dynamics of racial and/or ethnic politics in the nation-states of Cuba, Brazil, Britain and France, Germany, and the United States. Readings will emphasize the role of the state, political economy, national culture, racist ideologies and anti-racist politics in the formation, maintenance and transformation of conditions of race-based inequalities. Students will also become familiar with theories and concepts of race and ethnicity, and the histories of social movements in the aforementioned societies founded, in part, on racial and/or ethnic identification as a response to inequality. Formerly titled: Race and Racism in Comparative Perspective.
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.

AS.190.392. Introduction to Latin American Politics. 3.00 Credits.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

AS.190.411. Environment and Development in the Third World. 3.00 Credits.
A research seminar examining the politics of environmental issues in developing countries, with special focus on Latin America.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.419. Identity and Nations in Latin American Politics. 3.00 Credits.
This seminar class explores formation and political mobilization of identities - group, ethnic, gendered, national, cosmopolitan - in Latin America. Although some of the reading will be broadly comparative, the spring 2013 version of the class will focus especially on Brazil. Requirements will include short response papers and a term paper. Portuguese or Spanish desirable but not required. Enrolled students must be juniors or seniors and must have taken at least one prior course in comparative politics.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences
Writing Intensive.

Sociology
AS.230.343. Political Sociology of Latin America. 3.00 Credits.
This course provides an overview of Latin America through its historical, economic, social, and political dimensions. Emphasis will be given to the analysis of social structures: class, race and ethnicity, and the contemporary social movements. The course begins with an overview of the pre-Columbian civilizations and colonial legacies that gave rise to the multiethnic societies and the ethnic conflicts which characterize contemporary Latin America.Cross-listed with Program in Latin American Studies and International Studies (CP)
Instructor(s): M. von der Heydt-Coca
Area: Social and Behavioral Sciences.
AS.230.346. Economic Sociology of Latin America. 3.00 Credits.
This course will offer an overview of Latin America’s economic reality as an intertwined process of economic and political domestic factors within the constraints of the world economy. Latin American development will be analyzed from a historical perspective. The first half of the semester the course will focus on the analysis of the economic developmental patterns starting in the middle of the 19th century to the populist era in the middle of the 20th century. In the second half of the semester, we will analyze in depth the contemporary neoliberal approach to development. Globalization is the force that drives economic, social and political processes in Latin America. The course will include case studies as well the social conflicts generated by the increasing polarization of the society. Students will be exposed to important sociological theories.
Instructor(s): M. von der Heydt-Coca
Area: Social and Behavioral Sciences.

For current faculty and contact information go to http://anthropology.jhu.edu/plas/people.html

Faculty
Director
Gabriel Paquette
Director, Program in Latin American Studies Professor, Department of History

Professors
Sara Castro-Klarén
(German and Romance Languages and Literatures): Latin American literature, colonial studies, discourse analysis, contemporary novel.

Lisa DeLeonardis
Austen-Stokes Professor (History of Art): Art and archaeology of the ancient Americas.

William Egginton
(German and Romance Languages and Literatures): Spanish and Latin American literatures; literary theory; and the relation between literature and philosophy.

Eduardo González
Latin American Literature and Cinema. (German and Romance Languages and Literatures): Spain, Latin America and Caribbean literature and cinema.

James D. Goodyear
Associate Director of Public Health Studies Program, Professor (History of Science, Medicine and Technology): history of medicine, Latin American history, Brazil.

Michael Hanchard
(Political Science): comparative politics, Latin American politics, and comparative racial politics.

Margaret E. Keck
(Political Science): comparative politics, Latin American politics, and the environment.

Deborah Poole
(Anthropology): visuality and representation in Latin America, Peru, and Mexico; race and ethnicity; violence, liberalism, and the state; law and judicial reform.

Beverly J. Silver
(Sociology): historical sociology, labor and social movements, political sociology, international development.

Lea Ybarra
(German and Romance Languages and Literatures): Chicano and Latino studies.

Assistant Professors
Nadia Altschul
Assistant Professor, Department of German and Romance Languages and Literatures

Clara Han
(Anthropology): Medical Anthropology, Health and the Economy, Public Health, Social Studies of Medicine and Technology, Inequality, Latin America, Chile.

Sebastian Mazzuca
Assistant Professor, Department of Political Science

Jian Obarrio
(Anthropology): Law, temporality and the political, state and economy, memory and subjectivity, magic, value and violence, Southern Africa, Latin America.

Cindy Parker
Assistant Professor, Department of Earth and Planetary Sciences

Maria Portuondo
(History of Science): science and exploration, science and technology in Latin America, early modern Spanish and Latin American Cosmography and geography.

Erin Rowe
Assistant Professor, Department of History

Lecturers
Flavia De Azeredo-Cerqueira
Portuguese Language Program Director and Lecturer in Portuguese

Magda von der Heydt-Coca
(Sociology): contemporary sociology, Andean region.

Professors Emeriti
Mary M. Bensabat-Ott
Lecturer, German and Romance Languages and Literatures

Richard Kagan
Professor, History

Franklin Knight
Professor, History Latin American and Caribbean

Lea Ybarra
Interdepartmental, cross-listed with: Romance Languages & Literatures, Political Science, History, Sociology and Chicano Studies

Mathematics
http://www.mathematics.jhu.edu/

Mathematics, more than the fundamental language and underlying analytical structure of science and technology, is a formal way of thinking—an art that ties together the abstract structure of reason and the formal development of the logic that defines the scientific method. From the study of just how arguments and theories are formed in language and
technology to the framework of quantitative and qualitative models of the natural and social sciences, mathematics is based upon the development of precise expressions, logical arguments, and the search for and exposure of pattern and structure.

The undergraduate program in the Department of Mathematics is intended both for students interested in attaining the proper preparation for graduate study and research in pure mathematics, and for students interested in using mathematics to define, properly pose, and solve problems in the sciences, engineering, and other areas. With either purpose, the focus of the program is to help those who wish to understand further the logical content, geometric meaning, and abstract reasoning of mathematics itself. A flexible program involving a broad selection of courses is a department tradition. The program begins by introducing students to the basics of algebra and mathematical analysis and then gives them the choice of exploring topics in theoretical mathematics or studying applications to physics, economics, engineering, computer science, probability, statistics, or mechanics.

The graduate program is designed primarily to prepare students for research and teaching in mathematics. It is naturally centered around the research areas of the faculty, which include algebraic geometry, algebraic number theory, differential geometry, partial differential equations, topology, several complex variables, algebraic groups, and representation theory. The program can be supplemented in applied directions by courses in theoretical physics, computer science, mechanics, probability, and statistics offered in other departments of the Krieger School of Arts and Sciences and in the Department of Applied Mathematics in the Whiting School of Engineering.

Facilities
The Mathematics Department resides in Krieger Hall on the Keyser Quad of Homewood. Adjacent to Krieger Hall, The University's Milton S. Eisenhower Library has an unusually extensive collection of mathematics literature, including all the major research journals, almost all of which are accessible electronically. The stacks are open to students. The department also has a useful reference library, the Philip Hartman Library. Graduate students share departmental offices, and study space can also be reserved in the university library. Graduate students may access the department's Linux and Windows servers, as well as computers in graduate student offices. The department also hosts numerous research seminars, special lectures, and conferences throughout the academic year.

Math Course Placement and Sequencing for All Students
There are different versions of Calculus I and II offered by the Mathematics Departments and students should select their first course in math at JHU based on their major intentions and placement. Students intending to major in mathematics, the physical sciences, or engineering are encouraged to begin with the AS.110.108 Calculus I - AS.110.109 Calculus II (For Physical Sciences and Engineering) sequence or AS.110.113 Honors Single Variable Calculus. Students majoring in other subjects may wish to take the AS.110.106 Calculus I (Biology and Social Sciences) - AS.110.107 Calculus II (For Biological and Social Science) sequence which relates the methods of calculus to the biological and social sciences. A one-semester pre-calculus course (AS.110.105 Introduction to Calculus) is offered for students who could benefit from additional preparation in the basic tools (algebra and trigonometry) used in calculus.

Entering students may receive course credit for Calculus I or Calculus I and II on the basis of the College Board Advanced Placement (AP) or International Baccalaureate (IB) exams (p. 25). All students, regardless of completion of advanced placement exams previously, must take a departmental placement exam to determine their appropriate first course in mathematics. Additional placement information can be found here (http://www.mathematics.jhu.edu/new/undergrad/advising_placement.htm).

After completing a Calculus II course, the courses AS.110.201 Linear Algebra, AS.110.202 Calculus III, or AS.110.302 Diff Equations/Applic may be taken in any order. The department offers honors courses in both AS.110.212 Honors Linear Algebra and AS.110.211 Honors Multivariable Calculus.

Requirements for the B.A. Degree
In addition to the Requirements for a Bachelor's Degree (p. 10), a candidate for the bachelor's degree in mathematics is required to have completed the major requirements listed below. All courses used to meet these requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

Requirements for a Minor in Mathematics

All courses used to meet the mathematics minor requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory. One course in the Applied Mathematics and Statistics Department (at the 300-level or above) may be substituted for one of the elective courses for the minor.

Honors Program in Mathematics

As a general guideline, departmental honors are awarded to recipients of the B.A. degree who have completed AS.110.311 Methods of Complex Analysis, as well as AS.110.401 Advanced Algebra I, AS.110.415 Honors Analysis I, AS.110.416 Honors Analysis II, and one more course at the 400-level or above with at least a 3.6 average in these six courses.

J.J. Sylvester Prize

The J.J. Sylvester Prize in Mathematics, which carries a cash award, is given each year to the one of two top-performing graduating seniors majoring in mathematics for outstanding achievement.

The B.A./M.A. Program

By applying the same courses simultaneously toward the requirements for the B.A. and M.A. degrees, an advanced student can qualify for both degrees in four years. Admission to the program is by the standard graduate application form, which should be completed in the junior year. At least a 3.0 average is required in the 400-level mathematics courses taken while resident at the university. Students may contact the graduate program assistant for further information.

Undergraduate Teaching Assistantships

The department awards many upper-level undergraduates the opportunity to act as recitation instructors to our freshman courses, enabling them to practice the art of teaching and talking mathematics and to earn a valuable credential while studying for their degree.
Admission

Admission to the Ph.D. program is based on academic records, letters of recommendation, and Graduate Record Examination scores. International applicants are required to submit a TOEFL or IELTS score if English is not their native language.

Basic Program

Graduate study is centered around three core areas:

### Analysis

- AS.110.605 Real Variables
- AS.110.607 Complex Variables
- AS.110.608 Riemannian Surfaces
- AS.110.631 Partial Differential Equations I
- & AS.110.632 Partial Differential Equations II
- AS.110.645 Riemannian Geometry
- & AS.110.646 and Riemannian Geometry

### Algebra

- AS.110.601 Algebra
- & AS.110.602 and Algebra
- AS.110.617 Number Theory
- AS.110.619 Lie Groups and Lie Algebras
- AS.110.643 Algebraic Geometry
- & AS.110.644 and Algebraic Geometry

### Topology

- AS.110.615 Algebraic Topology
- & AS.110.616 and Algebraic Topology

These 600-level graduate courses are preliminary to research and are built upon the foundations constituted by the 400-level courses: AS.110.401 Advanced Algebra I, AS.110.402 Advanced Algebra II, AS.110.405 Analysis I, AS.110.406 Analysis II or AS.110.311 Methods of Complex Analysis, and AS.110.413 Introduction To Topology.

The 700-level courses are designed to bring students abreast of recent developments and to prepare them for research in the area of their choice.

Requirements for the M.A. Degree

Although the Mathematics Department does not admit students seeking a terminal M.A. degree, students in the Ph.D. program may earn an M.A. degree. Advanced undergraduate students may also apply to be admitted to the accelerated B.A./M.A. program.

M.A. candidates must complete:

- Four graduate courses given by the Johns Hopkins Mathematics Department;
- Two additional courses at the graduate or 400-level, other than AS.110.401, AS.110.405, and AS.110.415, given by the Johns Hopkins Mathematics Department, or, with the permission of the graduate program director, graduate mathematics courses given by other departments or universities.

All courses used to satisfy the requirements must be completed with a grade of B- or better. (Advanced graduate courses completed with a grade of P can also be used to satisfy the requirements.)

Requirements for the Ph.D. Degree

The departmental requirements for the Ph.D. degree are:

1. Candidates must show satisfactory work in Algebra (AS.110.601-AS.110.602), Real Variables (AS.110.605), Complex Variables (AS.110.607), Algebraic Topology (AS.110.615), and one additional mathematics graduate course in their first year. The seminars and qualifying exam preparation course cannot be used to fulfill this requirement. The algebra and analysis requirements can be satisfied by passing the corresponding written qualifying exam in September of the first year; these students must complete at least two courses each semester. Students having sufficient background in topology can substitute an advanced topology course for AS.110.615, with the permission of the instructor.

2. Candidates must pass written qualifying exams by the beginning of their second year in Analysis (Real and Complex) and in Algebra. Exams are scheduled for September and May of each academic year.

3. Candidates must show satisfactory work in at least two mathematics graduate courses each semester of their second year, and, if they have not passed their oral qualifying exam, in the first semester of their third year.

4. Candidates must pass a departmental oral qualifying examination in the student's chosen area of research by April 8th of the third year. The topic of the exam is chosen in consultation with the faculty member who has agreed (provisionally) to be the student's thesis advisor, who will also be involved in administering the exam.

5. There is no longer a Mathematics Department foreign language requirement. With the vast majority of articles written in English, the importance of having the capability of reading another language has diminished. However, important earlier literature in certain areas of mathematics may be written in French, German, or Russian. Moreover, some articles are still being written in French. It is now at the discretion of the student's thesis advisor whether to impose a language requirement.

6. Candidates must produce a dissertation based upon independent and original research.

7. Candidates will gain teaching experience in mathematics as a teaching assistant for undergraduate courses. The student will be under the supervision of both the faculty member teaching the course and the director of undergraduate studies. First year students are given a reduced TA workload in the spring semester (this is related to item #2).

8. After completion of the thesis research the student will defend their dissertation by means of the Graduate Board Oral Exam. The exam must be held at least three weeks before the Graduate Board deadline the candidate wishes to meet.

Financial Aid

Students admitted to the Ph.D. program receive teaching assistantships and full tuition fellowships. Exceptional applicants become candidates for one of the university's George E. Owen Fellowships.

William Kelso Morrill Award

The William Kelso Morrill Award for excellence in the teaching of mathematics is awarded every spring to the graduate student who best exemplifies the traits of Kelso Morrill: a love of mathematics, a love of teaching, and a concern for students.
Excellence in Teaching Awards

Three awards are given each year to a junior faculty member and graduate student teaching assistants who have demonstrated exceptional ability and commitment to undergraduate education.

For current faculty and contact information go to http://www.mathematics.jhu.edu/new/people/people-faculty.htm

Faculty

Chair
Nitu Kitchloo
Professor; Symplectic geometry, topology of Kac-Moody groups, classical algebraic topology.

Professors
Caterina Consani
Arithmetic geometry, number theory, and non-commutative geometry.

Hans Lindblad
Harmonic analysis, PDE, fluid dynamics, relativity.

Chikako Mese
Geometric analysis.

Mauro Maggioni

Jack Morava
Algebraic topology, mathematical physics.

Kate Okikiolu
Harmonic analysis, spectral theory, geometry.

David Savitt
Number theory, Galois representations.

Bernard Shiffman
Several complex variables, complex geometry.

Vyacheslav V. Shokurov
Algebraic geometry.

Yannick Sire
Harmonic analysis, real geometry, complex geometry.

Christopher Sogge
J.J. Sylvester Professor; Fourier analysis, partial differential equations.

Joel Spruck
J.J. Sylvester Professor; Partial differential equations, geometric analysis.

W. Stephen Wilson
Algebraic topology, homotopy theory.

Steven Zucker
Hodge theory, algebraic geometry.

Assistant Professors
Jacob Bernstein
Minimal surface theory, mean curvature flow.

Benjamin Dodson
Partial differential equations, harmonic analysis.

Emily Riehl
Homotopy theory.

Brian Smithling
Arithmetic, algebraic geometry.

Yi Wang
Geometric Analysis, PDE, Harmonic Analysis, Conformed Geometry.

Associate Teaching Professor
Richard Brown
Director of Undergraduate Studies; Dynamical systems, low-dimensional topology.

Emeriti
J. Michael Boardman
Differential topology, algebraic topology.

Philip Hartman
Differential equations, differential geometry.

Takashi Ono
Algebra, number theory, algebraic groups.

J.J. Sylvester Assistant Professor
Giovanni DiMatteo
Number theory.

Jonas Luehrmann
Partial differential equations, mathematical physics.

Mona Merling
Homotopy Theory.

Hang Xu
Complex geometry.

YingYing Zhang
Geometric analysis, complex geometry.

Xudong Zhang
Algebraic geometry.

Associate Research Scientist/Lecturer
Jian Kong
IT Senior Lecturer; Algebraic geometry.

Assistant Research Scientist and Senior Lecturer
Wenjing Liao
High-dimensional data analysis, machine learning, imaging, signal processing.

James Murphy
Harmonic analysis, machine learning, remotely sensed image processing.

Assistant Research Professor
Sui Tang
Applied harmonic analysis, mathematical signal processing.

Stefano Vigogna
Machine Learning, Harmonic Analysis.

Joint Appointments
Gregory Eyink
Professor (Applied Mathematics); Mathematical physics, fluid mechanics, turbulence, dynamical systems.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses

AS.110.105. Introduction to Calculus. 4.00 Credits.
This course starts from scratch and provides students with all the background necessary for the study of calculus. It includes a review of algebra, trigonometry, exponential and logarithmic functions, coordinates and graphs. Each of these tools will be introduced in its cultural and historical context. The concept of the rate of change of a function will be introduced. Not open to students who have studied calculus in high school.
Instructor(s): M. Martin
Area: Quantitative and Mathematical Sciences.

AS.110.106. Calculus I (Biological and Social Sciences). 4.00 Credits.
Differential and integral calculus. Includes analytic geometry, functions, limits, integrals and derivatives, introduction to differential equations, functions of several variables, linear systems, applications for systems of linear differential equations, probability distributions. Many applications to the biological and social sciences will be discussed.
Instructor(s): S. Vigogna
Area: Quantitative and Mathematical Sciences.

AS.110.107. Calculus II (For Biological and Social Science). 4.00 Credits.
Differential and integral Calculus. Includes analytic geometry, functions, limits, integrals and derivatives, introduction to differential equations, functions of several variables, linear systems, applications for systems of linear differential equations, probability distributions. Applications to the biological and social sciences will be discussed, and the courses are designed to meet the needs of students in these disciplines.
Instructor(s): S. Vigogna; V. Lorman
Area: Quantitative and Mathematical Sciences.

AS.110.108. Calculus I. 4.00 Credits.
Differential and integral calculus. Includes analytic geometry, functions, limits, integrals and derivatives, polar coordinates, parametric equations, Taylor’s theorem and applications, infinite sequences and series. Some applications to the physical sciences and engineering will be discussed, and the courses are designed to meet the needs of students in these disciplines.
Instructor(s): H. Xu
Area: Quantitative and Mathematical Sciences.

AS.110.109. Calculus II (For Physical Sciences and Engineering). 4.00 Credits.
Differential and integral calculus. Includes analytic geometry, functions, limits, integrals and derivatives, polar coordinates, parametric equations, Taylor’s theorem and applications, infinite sequences and series. Some applications to the physical sciences and engineering will be discussed, and the courses are designed to meet the needs of students in these disciplines.
Instructor(s): M. Arap; X. Zheng
Area: Quantitative and Mathematical Sciences.

AS.110.113. Honors Single Variable Calculus. 4.00 Credits.
This is an honors alternative to the Calculus sequences AS.110.106-AS.110.107 or AS.110.108-AS.110.109 and meets the general requirement for both Calculus I and Calculus II (although the credit hours count for only one course). It is a more theoretical treatment of one variable differential and integral calculus and is based on our modern understanding of the real number system as explained by Cantor, Dedekind, and Weierstrass. Students who want to know the why’s and how’s of Calculus will find this course rewarding. Previous background in Calculus is not assumed. Students will learn differential Calculus (derivatives, differentiation, chain rule, optimization, related rates, etc), the theory of integration, the fundamental theorem(s) of Calculus, applications of integration, and Taylor series. Students should have a strong ability to learn mathematics quickly and on a higher level than that of the regular Calculus sequences.
Instructor(s): V. Lorman
Area: Quantitative and Mathematical Sciences.

AS.110.160. Discover Hopkins: Mathematics of Infinity. 1.00 Credit.
An interdisciplinary introduction to the history of infinity in mathematics, from Zeno’s paradox to the development of calculus to the crisis in the foundations of mathematics in the early 20th century. We will read about history, discuss philosophy, and learn some mathematics (including a crash course in mathematical logic and proof, building up to the rigorous definition of limits). A previous course in calculus is not required, but some mathematical maturity will be necessary.
Instructor(s): V. Lorman

AS.110.201. Linear Algebra. 4.00 Credits.
Prerequisites: Grade of C- or better in 110.107 or 110.109 or 110.113, or a 5 on the AP BC exam.
Instructor(s): G. Di Matteo; J. Bernstein
Area: Quantitative and Mathematical Sciences.

AS.110.202. Calculus III. 4.00 Credits.
Calculus of functions of more than one variable: partial derivatives, and applications; multiple integrals, line and surface integrals; Green's Theorem, Stokes' Theorem, and Gauss' Divergence Theorem.
Prerequisites: Grade of C- or better in AS.110.107 or AS.110.109 OR AS.110.113, or a 5 on the AP BC exam.
Instructor(s): G. Di Matteo; V. Pingali
Area: Quantitative and Mathematical Sciences.

AS.110.211. Honors Multivariable Calculus. 4.00 Credits.
This course includes the material in AS.110.202 with some additional applications and theory. Recommended for mathematically able students majoring in physical science, engineering, or especially mathematics AS.110.211- AS.110.212 used to be an integrated yearlong course, but now the two are independent courses and can be taken in either order.
Prerequisites: Pre/Co-Requisite: 110.201 or 110.212
Instructor(s): Y. Zhang
Area: Quantitative and Mathematical Sciences.
AS.110.212. Honors Linear Algebra. 4.00 Credits.
This course includes the material in AS.110.201 with some additional applications and theory. Recommended for mathematically able students majoring in physical science, engineering, or mathematics. AS.110.211-AS.110.212 used to be an integrated yearlong course, but now the two are independent courses and can be taken in either order. This course satisfies a requirement for the math major that its non-honors sibling does not.
Prerequisites: Grade of B+ or better in 110.107 or 110.109 or 110.113, or a 5 on the AP BC exam.
Instructor(s): S. Zucker
Area: Quantitative and Mathematical Sciences.

AS.110.225. Problem Solving Lab. 2.00 Credits.
An introduction to some fundamental techniques of mathematical problem solving, such as induction, invariants, inequalities and generating functions.
Instructor(s): D. Savitt
Area: Quantitative and Mathematical Sciences.

AS.110.302. Diff Equations/Applic. 4.00 Credits.
This is an applied course in ordinary differential equations, which is primarily for students in the biological, physical and social sciences, and engineering. The purpose of the course is to familiarize the student with the techniques of solving ordinary differential equations. The specific subjects to be covered include first order differential equations, second order linear differential equations, applications to electric circuits, oscillation of solutions, power series solutions, systems of linear differential equations, autonomous systems, Laplace transforms and linear differential equations, mathematical models (e.g., in the sciences or economics).
Prerequisites: Grade of C- or better in 110.107 or 110.109 or 110.113, or a 5 on the AP BC exam.
Instructor(s): R. Brown; Y. Sire
Area: Quantitative and Mathematical Sciences.

AS.110.304. Elementary Number Theory. 4.00 Credits.
The student is provided with many historical examples of topics, each of which serves as an illustration of and provides a background for many years of current research in number theory. Primes and prime factorization, congruences, Euler’s function, quadratic reciprocity, primitive roots, solutions to polynomial congruences (Chevalley’s theorem), Diophantine equations including the Pythagorean and Pell equations, Gaussian integers, Dirichlet’s theorem on primes.
Prerequisites: Grade of C- or better in 110.201 or 110.212
Instructor(s): T. Wright; W. Wilson
Area: Quantitative and Mathematical Sciences.

AS.110.306. Honors Differential Equations. 4.00 Credits.
This course includes the material in 110.302 Differential Equations but with a strong emphasis on theory and proofs. Recommended only for mathematics majors or mathematically able students majoring in physical science or engineering.
Prerequisites: Grade of B+ or better in AS.110.107 or AS.110.109 or AS.110.113 or a 5 on the Advanced Placement BC exam.
Instructor(s): J. Gell-redman
Area: Quantitative and Mathematical Sciences.

AS.110.311. Methods of Complex Analysis. 4.00 Credits.
This course is an introduction to the theory of functions of one complex variable. Its emphasis is on techniques and applications, and it serves as a basis for more advanced courses. Functions of a complex variable and their derivatives; power series and Laurent expansions; Cauchy integral theorem and formula; calculus of residues and contour integrals; harmonic functions.
Prerequisites: Grade of C- or better in 110.202 or 110.211
Instructor(s): Y. Sire
Area: Quantitative and Mathematical Sciences.

AS.110.321. Honors Complex Analysis. 4.00 Credits.
This course is an introduction to the theory of functions of one complex variable for honors students. Its emphasis is on techniques and applications, and it serves as a basis for more advanced courses. Topics will include functions of a complex variable and their derivatives; power series and Laurent expansions; Cauchy integral theorem and formula; calculus of residues and contour integrals; harmonic functions, as well as applications to number theory and harmonic analysis.
Instructor(s): B. Dodson
Area: Quantitative and Mathematical Sciences.

AS.110.328. Non-Euclidean Geometry. 4.00 Credits.
For 2,000 years, Euclidean geometry was the geometry. In the 19th century, new, equally consistent but very different geometries were discovered. This course will delve into these geometries on an elementary but mathematically rigorous level.
Instructor(s): M. Merling
Area: Quantitative and Mathematical Sciences.

AS.110.401. Advanced Algebra I. 4.00 Credits.
An introduction to the basic notions of modern algebra. Elements of group theory: groups, subgroups, normal subgroups, quotients, homomorphisms. Generators and relations, free groups, products, commutative (Abelian) groups, finite groups. Groups acting on sets, the Sylow theorems. Definition and examples of rings and ideals. Introduction to field theory. Linear algebra over a field. Field extensions, constructible polygons, non-trisectability.
Prerequisites: Grade of C- or better in 110.201 or 110.212
Instructor(s): J. Kong
Area: Quantitative and Mathematical Sciences.

AS.110.402. Advanced Algebra II. 4.00 Credits.
Splitting field of a polynomial, algebraic closure of a field. Galois theory: correspondence between subgroups and subfields. Solvability of polynomial equations by radicals.
Instructor(s): B. Smithling
Area: Quantitative and Mathematical Sciences.

AS.110.405. Analysis I. 4.00 Credits.
This course is designed to give a firm grounding in the basic tools of analysis. It is recommended as preparation (but may not be a prerequisite) for other advanced analysis courses. Real and complex number systems, topology of metric spaces, limits, continuity, infinite sequences and series, differentiation, Riemann-Stieltjes integration.
Prerequisites: Grade of C- or better in 110.201 or 110.212 and 110.202 or 110.211
Instructor(s): J. Luehrmann
Area: Quantitative and Mathematical Sciences.
AS.110.406. Analysis II. 4.00 Credits.
This course continues AS.110.405 with an emphasis on the fundamental notions of modern analysis. Sequences and series of functions, Fourier series, equicontinuity and the Arzela-Ascoli theorem, the Stone-Weierstrass theorem, functions of several variables, the inverse and implicit function theorems, introduction to the Lebesgue integral.
Instructor(s): J. Spruck
Area: Quantitative and Mathematical Sciences.

AS.110.413. Introduction To Topology. 4.00 Credits.
Topological spaces, connectedness, compactness, quotient spaces, metric spaces, function spaces. An introduction to algebraic topology: covering spaces, the fundamental group, and other topics as time permits.
Prerequisites: Grade of C- or better in 110.202 or 110.211
Instructor(s): W. Wilson
Area: Quantitative and Mathematical Sciences.

AS.110.415. Honors Analysis I. 4.00 Credits.
This highly theoretical sequence in analysis is reserved for the most able students. The sequence covers the real number system, metric spaces, basic functional analysis, the Lebesgue integral, and other topics.
Instructor(s): Y. Sire
Area: Quantitative and Mathematical Sciences.

AS.110.416. Honors Analysis II. 4.00 Credits.
Prerequisites: Grade of C- or better in AS.110.415
Instructor(s): B. Shiffman
Area: Quantitative and Mathematical Sciences.

AS.110.417. Partial Diff Equations. 4.00 Credits.
Prerequisites: Grade of C- or better in 110.202 or 110.211
Instructor(s): J. Spruck
Area: Quantitative and Mathematical Sciences.

AS.110.421. Dynamical Systems. 4.00 Credits.
This is a course in the modern theory of Dynamical Systems. Topic include existence and uniqueness of general ODEs, nonlinear analysis and stability, including bifurcation theory and stable and center manifolds, smooth flows, limit sets, Hamiltonian mechanics, perturbation theory and structural stability.
Prerequisites: Grade of C- or better in 110.201 or 110.212 OR 110.202 or 110.211 and 110.302
Instructor(s): H. Xu
Area: Quantitative and Mathematical Sciences.

AS.110.422. Representation Theory. 4.00 Credits.
This course will focus on the basic theory of representations of finite groups in characteristic zero: Schur's Lemma, Mashcke's Theorem and complete reducibility, character tables and orthogonality, direct sums and tensor products. The main examples we will try to understand are the representation theory of the symmetric group and the general linear group over a finite field. If time permits, the theory of Brauer characters and modular representations will be introduced.
Prerequisites: Prereq: (AS.110.201 OR AS.110.212) AND AS.110.401
Instructor(s): M. Merling
Area: Quantitative and Mathematical Sciences.

AS.110.423. Lie Groups for Undergraduates. 4.00 Credits.
This course is an introduction to Lie Groups and their representations at the upper undergraduate level. It will cover basic Lie Groups such as SU(2), U(n), the Euclidean Motion Group and Lorentz Group. This course is useful for students who want a working knowledge of group representations. Some aspects of the role of symmetry groups in particle physics such as some of the formal aspects of the electroweak and the strong interactions will also be discussed. Recommended Course Background: AS.110.202; prior knowledge of group theory (AS.110.401) would be helpful.
Instructor(s): S. Zucker
Area: Quantitative and Mathematical Sciences.

AS.110.427. Introduction Calculus of Variations. 4.00 Credits.
The calculus of variations is concerned with finding optimal solutions (shapes, functions, etc.) where optimality is measured by minimizing a functional (usually an integral involving the unknown functions) possibly with constraints. Applications include mostly one-dimensional (often geometric problems: brachistochrone, geodesics, minimum surface area of revolution, isoperimetric problem, curvature flows, and some differential geometry of curves and surfaces. Recommended Course Background: Calculus III
Prerequisites: Grade of B+ or better in AS.110.201 and AS.110.202
Instructor(s): Y. Zhang
Area: Quantitative and Mathematical Sciences.

AS.110.431. Knot Theory. 4.00 Credits.
The theory of knots and links is a facet of modern topology. The course will be mostly self-contained, but a good working knowledge of groups will be helpful. Topics include braids, knots and links, the fundamental group of a knot or link complement, spanning surfaces, and low dimensional homology groups.
Instructor(s): C. McTague
Area: Quantitative and Mathematical Sciences.

AS.110.432. Introduction To Differential Geometry. 4.00 Credits.
Theory of curves and surfaces in Euclidean space: Frenet equations, fundamental forms, curvatures of a surface, theorems of Gauss and Mainardi-Codazzi, curves on a surface; introduction to tensor analysis and Riemannian geometry; theorema egregium; elementary global theorems.
Prerequisites: Grade of C- or better in (AS.110.201 or AS.110.212) and (AS.110.202 or AS.100.211)
Instructor(s): J. Spruck
Area: Quantitative and Mathematical Sciences.
AS.110.441. Calculus on Manifolds. 4.00 Credits.
This course provides the tools for classical three-dimensional physics and mechanics. This course extends these techniques to the general locally Euclidean spaces (manifolds) needed for an understanding of such things as Maxwell's equations or optimization in higher dimensional contexts, eg. in economics. The course will cover the theory of differential forms and integration. Specific topics include Maxwell's equations in terms of 4D Lorentz geometry, vector (in particular, tangent) bundles, an introduction to de Rham theory, and Sard's theorem on the density of regular values of smooth functions. The course is intended to be useful to mathematics students interested in analysis, differential geometry, and topology, as well as to students in physics and economics.
Instructor(s): J. Morava
Area: Quantitative and Mathematical Sciences.

AS.110.443. Fourier Analysis. 4.00 Credits.
Prerequisites: Grade of C- or better in (AS.110.201 OR AS.110.212) AND (AS.110.202 OR AS.110.211)
Instructor(s): Y. Wang
Area: Quantitative and Mathematical Sciences.

AS.110.446. Introduction to Statistical Learning, Data Analysis and Signal Processing. 4.00 Credits.
Introduction to high dimensional data sets: key problems in statistical and machine learning. Geometric aspects. Principal component analysis, linear dimension reduction, random projections. Concentration phenomena: examples and basic inequalities. Metric spaces and embeddings thereof. Kernel methods. Nonlinear dimension reduction, manifold models. Regression. Vector spaces of functions, linear operators, projections. Orthonormal bases; Fourier and wavelet bases, and their use in signal processing and time series analysis. Basic approximation theory. Linear models, least squares. Bias and variance tradeoffs, regularization. Sparsity and compressed sensing. Multiscale methods. Graphs and networks. Random walks on graphs, diffusions, page rank. Block models. Spectral clustering, classification, semi-supervised learning. Algorithmic and computational aspects of the above will be consistently in focus, as will be computational experiments on synthetic and real data. Linear algebra will be used throughout the course, as will multivariable calculus and basic probability (discrete random variables). Basic experience in programming in C or MATLAB or R or Octave. Recommended Course Background: More than basic programming experience in Matlab or R; some more advanced probability (e.g. continuous random variables), some signal processing (e.g. Fourier transform, discrete and continuous). Co-listed with EN.550.416
Prerequisites: AS.110.201
Instructor(s): M. Maggioni
Area: Quantitative and Mathematical Sciences.

AS.110.503. Undergraduate Research in Mathematics. 0.00 - 4.00 Credits.
Instructor(s): C. Mese; C. Sogge; S. Raymond; S. Zucker.

AS.110.586. Independent Study. 0.00 - 4.00 Credits.
Instructor(s): Staff.

AS.110.595. Internship. 1.00 Credit.

AS.110.601. Algebra.
An introductory graduate course on fundamental topics in algebra to provide the student with the foundations for number theory, algebraic geometry, and other advanced courses. Topics include group theory, commutative algebra, Noetherian rings, local rings, modules, rudiments of category theory, homological algebra, field theory, Galois theory, and non-commutative algebras.
Instructor(s): V. Shokurov
Area: Quantitative and Mathematical Sciences.

AS.110.602. Algebra.
An introductory graduate course on fundamental topics in algebra to provide the student with the foundations for Number Theory, Algebraic Geometry, and other advanced courses. Topics include group theory, commutative algebra, Noetherian rings, local rings, modules, and rudiments of category theory, homological algebra, field theory, Galois theory, and non-commutative algebras. Recommended Course Background: AS.110.401-AS.110.402
Instructor(s): S. Zucker
Area: Quantitative and Mathematical Sciences.

AS.110.605. Real Variables.
Measure and integration on abstract and locally compact spaces (extension of measures, decompositions of measures, product measures, the Lebesgue integral, differentiation, Lp-spaces); introduction to functional analysis; integration on groups; Fourier transforms.
Instructor(s): C. Mese
Area: Quantitative and Mathematical Sciences.

AS.110.607. Complex Variables.
Analytic functions of one complex variable. Topics include Mittag-Leffler Theorem, Weierstrass factorization theorem, elliptic functions, Riemann-Roch theorem, Picard theorem, and Nevanlinna theory. Recommended Course Background: AS.110.311, AS.110.405
Instructor(s): C. Mese.

AS.110.608. Riemann Surfaces.
Abstract Riemann surfaces. Examples: algebraic curves, elliptic curves and functions on them. Holomorphic and meromorphic functions and differential forms, divisors and the Mittag-Leffler problem. The analytic genus. Bezout's theorem and applications. Introduction to sheaf theory, with applications to constructing linear series of meromorphic functions. Serre duality, the existence of meromorphic functions on Riemann surfaces, the equality of the topological and analytic genera, the equivalence of algebraic curves and compact Riemann surfaces, the Riemann-Roch theorem. Period matrices and the Abel-Jacobi mapping, Jacobi inversion, the Torelli theorem. Uniformization (time permitting).
Instructor(s): B. Shiffman; C. Mese.

AS.110.612. Complex Geometry.
Instructor(s): B. Shiffman.

AS.110.615. Algebraic Topology.
Polyhedra, simplicial and singular homology theory, Lefschetz fixed-point theorem, cohomology and products, homological algebra, Künneth and universal coefficient theorems, Poincaré and Alexander duality theorems.
Instructor(s): C. Mese; J. Morava.
AS.110.616. **Algebraic Topology.**
Polyhedra, simplicial and singular homology theory, Lefschetz fixed-point theorem, cohomology and products, homological algebra, Künneth and universal coefficient theorems, Poincaré; and Alexander duality theorems.

**Prerequisites:** AS.110.401 AND AS.110.413
Instructor(s): M. Merling
Area: Quantitative and Mathematical Sciences.

AS.110.617. **Number Theory.**
Topics in advanced algebra and number theory, including local fields and adeles, Iwasawa-Tate theory of zeta functions and connections with Hecke's treatment, semisimple algebras over local and number fields, adeles geometry.

Instructor(s): C. Mese; G. Di Matteo
Area: Quantitative and Mathematical Sciences.

AS.110.619. **Lie Groups and Lie Algebras.**
Lie groups and Lie algebras, classification of complex semi-simple Lie algebras, compact forms, representations and Weyl formulas, symmetric Riemannian spaces.

**Prerequisites:** AS.110.402
Instructor(s): C. Mese; J. Morava
Area: Quantitative and Mathematical Sciences.

AS.110.631. **Partial Differential Equations I.**
An introductory graduate course in partial differential equations. Classical topics include first order equations and characteristics, the Cauchy-Kowalewski theorem, Laplace's equations, heat equation, wave equation, fundamental solutions, weak solutions, Sobolev spaces, maximum principles.

**Prerequisites:** AS.110.605
Instructor(s): B. Dodson.

AS.110.632. **Partial Differential Equations II.**
An introductory graduate course in partial differential equations. Classical topics include first order equations and characteristics, the Cauchy-Kowalewski theorem, Laplace's equation, heat equation, wave equation, fundamental solutions, weak solutions, Sobolev spaces, maximum principles. The second term focuses on special topics such as second order elliptic theory.

Instructor(s): C. Mese; H. Lindblad; R. Brown.

AS.110.633. **Harmonic Analysis.**
Fourier multipliers, oscillatory integrals, restriction theorems, Fourier integral operators, pseudodifferential operators, eigenfunctions. Undergrads need instructor's permission.

Instructor(s): C. Sogge
Area: Quantitative and Mathematical Sciences.

AS.110.635. **Microlocal Analysis.**
Microlocal analysis is the geometric study of singularities of solutions of partial differential equations. The course will begin by introducing the geometric theory of (Schwartz) distributions: Fourier transform and Sobolev spaces, pseudo-differential operators, wave front set of a distribution, elliptic operators, Lagrangean distributions, oscillatory integrals, method of stationary phase, Fourier integral operators. The second semester will develop the theory and apply it to special topics such as asymptotics of eigenvalues/eigenfunctions of the Laplace operator on a Riemann manifold, linear and non-linear wave equation asymptotics of quantum systems, Bochner-Riesz means, maximal theorems.

Instructor(s): H. Lindblad.

AS.110.637. **Functional Analysis.**
Instructor(s): C. Mese; J. Spruck.

AS.110.643. **Algebraic Geometry.**
Affine varieties and commutative algebra. Hilbert's theorems about polynomials in several variables with their connections to geometry. General varieties and projective geometry. Dimension theory and smooth varieties. Sheaf theory and cohomology. Applications of sheaves to geometry; e.g., the Riemann-Roch theorem. Other topics may include Jacobian varieties, resolution of singularities, geometry on surfaces, connections with complex analytic geometry and topology, schemes.

Instructor(s): V. Shokurov.

AS.110.644. **Algebraic Geometry.**
Affine varieties and commutative algebra. Hilbert's theorems about polynomials in several variables with their connections to geometry. General varieties and projective geometry. Dimension theory and smooth varieties. Sheaf theory and cohomology. Applications of sheaves to geometry; e.g., the Riemann-Roch Theorem. Other topics may include Jacobian varieties, resolution of singularities, geometry on surfaces, schemes, connections with complex analytic geometry and topology.

Instructor(s): C. Consani
Area: Quantitative and Mathematical Sciences.

AS.110.645. **Riemannian Geometry.**
Differential manifolds, vector fields, flows, Frobenius' theorem. Differential forms, déRham's theorem, vector bundles, connections, curvature, Chern classes, Cartan structure equations. Riemannian manifolds, Bianchi identities, geodesics, exponential maps. Geometry of submanifolds, hypersurfaces in Euclidean space. Other topics as time permits, e.g., harmonic forms and Hodge theorem, Jacobi equation, variation of arc length and area, Chern-Gauss-Bonnet theorems.

Instructor(s): B. Shiffman; C. Mese.

AS.110.646. **Riemannian Geometry.**
The goal is to give a self-contained course on mean curvature flow, starting with the basic linear heat equation in Euclidean space and — hopefully — getting to topics of current research. Mean curvature flow is a geometric heat equation that shares many properties with Ricci flow, harmonic map heat flow, Yang-Mills flow and the Navier-Stokes equations. Recommended Course Background: AS.110.605 and an undergraduate course in differential geometry; AS.110.645 and AS.110.631

Instructor(s): C. Mese.

AS.110.712. **Topics in Mathematical Physics.**
Instructor(s): J. Morava.
AS.110.722. Topics in Homotopy Theory.
The course will focus on recent developments in homotopy theory, such as Galois theory for $E_n (n \geq 2)$ ring-spectra, and on connections with number theory; in particular, work of Bhatt, Hesselholt, Lurie, Scholze and others on topological Hochschild homology and its applications to geometry over the p-adic complex numbers.
Instructor(s): J. Morava
Area: Quantitative and Mathematical Sciences.

AS.110.724. Topics in Arithmetic Geometry.
Topics around the subject of Arithmetic Geometry will be covered in this course.
Instructor(s): B. Smithling
Area: Quantitative and Mathematical Sciences.

AS.110.726. Topics in Analysis.
The topics covered will involve the theory of calculus of Functors applied to Geometric problems like Embedding theory. Other related areas will be covered depending on the interest of the audience.
Instructor(s): Y. Sire
Area: Quantitative and Mathematical Sciences.

AS.110.727. Topics/Algebraic Topology.
Instructor(s): C. Mese; E. Riehl.

AS.110.728. Topics in Algebraic Topology.
Instructor(s): N. Kitchloo.

AS.110.731. Topics in Geometric Analysis.
Instructor(s): Y. Wang.

AS.110.735. Topics In Hodge Theory.
Instructor(s): C. Mese; R. Brown; V. Shokurov
Area: Quantitative and Mathematical Sciences.

AS.110.737. Topics Algebraic Geometry.
Instructor(s): C. Consani.

AS.110.738. Topics Algebraic Geometry.
Introduction to toric varieties. This class is a general introduction to toric varieties. Toric varieties are special kinds of algebraic varieties which can be described by lattices and convex sets. They provide a rich source of concrete examples in complex geometry or mathematical physics. If time permits, we discuss in the end the stability of toric embeddings. Students should know basic notions of algebraic geometry (schemes, sheaves, linear systems), as covered in AS.110.643.
Instructor(s): C. Mese, R. Brown; V. Shokurov
Area: Quantitative and Mathematical Sciences.

Instructor(s): H. Lindblad.

AS.110.742. Topics In Partial Differential Equations.
In this course we will be discussing some dispersive evolution equations, primarily the nonlinear Schrodinger equation. Topics will include well - posedness theory, conservation laws, and scattering. The course will be accessible to students who have not taken graduate partial differential equations or functional analysis.
Instructor(s): B. Dodson.

AS.110.748. Topics in Geometry.
Instructor(s): J. Spruck.

AS.110.749. Topics in Differential Geometry.
In this class, we will study Aaron Naber and Jeff Cheeger’s recent result on proving codimension four conjecture. We plan to talk about some early results of the structure on manifolds with lower Ricci bound by Cheeger and Colding. We will prove quantitative splitting theorem, volume convergence theorem, and the result that almost volume cone implies almost metric cone. Then we will discuss regularity of Einstein manifolds and the codimension four conjecture.
Instructor(s): Y. Wang
Area: Quantitative and Mathematical Sciences.

AS.110.755. Topics in Fluid Dynamics.
Graduate students only.
Instructor(s): J. Bernstein
Area: Quantitative and Mathematical Sciences.

AS.110.756. Topics in Algebra.
This will be a course in commutative algebra. Topics may include: Noetherian rings and modules, the Nullstellensatz, Hilbert basis theorem, localization, integrality, Noether normalization, primary decomposition, DVRs, Dedekind domains, dimension theory, smoothness and regularity, and homological methods.
Instructor(s): C. Consani
Area: Quantitative and Mathematical Sciences.

AS.110.758. Topics in Complex Geometry.
Instructor(s): B. Shiffman.

AS.110.761. Topics in Topology.
Instructor(s): N. Kitchloo
Area: Quantitative and Mathematical Sciences.

AS.110.762. Topics in Topology II.
Instructor(s): N. Kitchloo.

AS.110.764. Topics in Riemannian Geometry.
Topics courses are restricted to graduate students only.
Instructor(s): J. Bernstein.

AS.110.769. Seminar in Complex Geometry.
Presentations of current research papers by faculty, graduate students and invited guest speakers. For graduate students only.
Instructor(s): V. Pingali
Area: Quantitative and Mathematical Sciences.

Presentations of current research papers by faculty, graduate students and invited guest speakers. For graduate students only.
Instructor(s): C. Sogge
Area: Quantitative and Mathematical Sciences.

AS.110.791. Seminar in Algebraic Geometry and Number Theory.
Presentations of current research papers by faculty, graduate students and invited guest speakers. For graduate students only.
Instructor(s): B. Smithling
Area: Quantitative and Mathematical Sciences.

AS.110.792. Seminar in Algebraic Geometry and Number Theory.
Presentations of current research papers by faculty, graduate students and invited guest speakers. For graduate students only.
Instructor(s): B. Smithing
Area: Quantitative and Mathematical Sciences.

AS.110.793. Seminar in Topology.
For graduate students only. Presentations of current research papers by faculty, graduate students and invited guest speakers.
Instructor(s): W. Wilson
Area: Quantitative and Mathematical Sciences.

AS.110.795. Seminar in Data Analysis.
Presentations of current research papers by faculty, graduate students and invited guest speakers. For graduate students only.
Instructor(s): M. Maggioni
Area: Quantitative and Mathematical Sciences.
AS.110.796. Seminar in Complex Analysis.
Seminar on current research in functions of several complex variables. Graduate students only.
Instructor(s): B. Shiffman.

AS.110.797. Seminar in Chromatic Homotopy.
Undergraduates with instructors permission or signature from the Program Coordinator.
Instructor(s): J. Morava.

AS.110.798. Seminar in Number Theory.
Presentations of current research papers by faculty, graduate students and invited guest speakers. For graduate students only.
Instructor(s): B. Smithling; C. Consani.

AS.110.799. Seminar in Algebraic Geometry.
For graduate students only. Presentations of current research papers by faculty, graduate students and invited guest speakers.
Instructor(s): J. Martinez Garcia; V. Shokurov.

AS.110.800. Independent Study-Graduates.
Area: Quantitative and Mathematical Sciences.

AS.110.801. Thesis Research.
Instructor(s): Staff.

Medicine, Science, and the Humanities
http://krieger.jhu.edu/msh

About
This is an interdisciplinary, humanities-based major using a cultural and historical context to explore scientific inquiry and the roots of medicine. The medicine, science, and the humanities major is ideal for students who plan to pursue careers in the health professions as well as those interested in issues of importance to science and medicine, and students who plan to pursue graduate work in a range of humanities, social science, or professional disciplines.

MSH Major Goals and Objectives
Goal
Medicine, science, and humanities majors will develop an interdisciplinary understanding of the cultural and historical roots of scientific inquiry and medicine, with the ability to apply these precepts to contemporary life.

Objectives
MSH majors will:

• Gain an introductory awareness of theory, interpretation, and methods in a specific humanistic topic related to science and medicine
• Acquire and develop skills of interpretation and analysis in a specific humanities discipline by focusing on primary and secondary sources such as literature, imagery, film, artifacts, and commentary
• Acquire fundamental skills of writing and oral presentation, emphasizing clear and logical exposition to enhance student readiness for subsequent graduate school, professional school, or the workforce
• Acquire knowledge and experience in the natural sciences
• Understand the advantages of multiculturalism through intermediate mastery of a language beyond English.

Major Requirements

Introductory Level

• Introduction to Medical Humanities (Fall 2015: Death and Dying in Art, Literature, and Philosophy)
• One course focusing on classic scientific and medical texts
  • Examples: History of Medicine, History of Modern Medicine, or Great Books at Hopkins II: The Sciences
• Other courses may apply with approval from the director of undergraduate studies

Required Core Humanities Courses
• At least 4 courses totaling at least 12 credits in one, pre-approved humanities department
• 6 credits must be at the 300-level or higher
• Approved humanities departments: Anthropology, Classics, English, German and Romance Languages and Literatures, History, History of Art, History of Science and Technology, Humanities Center, Near Eastern Studies, Philosophy, and the Writing Seminars

Foreign Language
• Through the intermediate level (second year at the college-level)

Additional Courses in the Sciences and the Humanities
• At least 6 courses totaling 18 credits in sciences and humanities; at least 2 of these courses must be in the humanities and at least 2 must be science courses. Of the 6 courses, 4 must be at the 200-level or higher

AS.145.101 Death and Dying in Art, Literature, and Philosophy: 3
Introduction to Medical Humanities

<table>

Total Credits: 50

* Examples of current choices include: AS.150.219, AS.360.134, AS.140.105, and AS.140.106

Additional Course Information

Study Abroad

Courses taken abroad count toward the major only if approved by the director of undergraduate studies in consultation with your adviser. This should be arranged prior to travel.

Thinking About Pre-Med?
Johns Hopkins offers an undergraduate pre-med program, but it is not a major. It is an advising track program through the Office of Pre-Professional Advising (http://web.jhu.edu/prepro). Any Johns Hopkins undergraduate student pursuing any major may also pursue the pre-med advising track.

The pre-professional advisers work with the students, providing them with academic advising, assistance in selecting the proper courses, and help with the medical school application process. Please note that the MSH major does not fulfill all of the requirements for a pre-med course of study. Speak with your adviser for more information.

Faculty

Director
Charles Wiener
Professor of Medicine and Physiology Director, Medicine, Science, and the Humanities Major

Professor
Bernadette Wegenstein
Professor of Media Studies, Department of German and Romance Languages and Literatures

Assistant Professor
Joshua Smith
Assistant Professor, Classics

Visiting Professor
Evelyne Ender
Visiting Professor, Department of German and Romance Languages and Literatures

AS English Courses

AS.060.100. Introduction to Expository Writing. 3.00 Credits.
Introduction to "Expos" is designed to introduce less experienced writers to the elements of academic argument. Students learn to recognize "The Fundamental Structure of Academic Argument" as they learn to read and summarize academic essays, and then they apply the fundamental structure in academic essays of their own. Classes are small, no more than 10 students, and are organized around three major writing assignments. Each course guides students' practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each "Intro" course teaches students to avoid plagiarism and document sources correctly. "Intro" courses do not specialize in a particular topic or theme and are available to freshmen only.
Instructor(s): A. Brodsky; M. O'Connor; W. Evans
Area: Humanities
Writing Intensive.

AS.060.102. The Novel and the American Family. 3.00 Credits.
While America and the "American Dream" promise the possibility of unlimited individual development, the American family has often resisted this promise and cramped America's style. In this course we will explore works by Philip Roth, Eudora Welty, Alice Walker, and Jonathan Franzen that dramatize this tension in devastating and hilarious ways. Against the backdrop of post-WWII America, these writers struggle with issues of race, sex, and the erosion of tradition, shedding light on the challenging relation between the individual and the family.
Instructor(s): R. Day
Area: Humanities.
AS.060.103. Novels After 9-11. 3.00 Credits.
This course explores various novels written in English in the wake of the tragedy of 9-11, from various perspectives around the globe. It asks how the form of the novel responded to the events of that date and its aftermath, and in doing so, considers the role of art in shaping our understanding of global events, violence, and the forces that produce them. This course offers a greater appreciation of the novel and its role in history, as well as a framework for comparing different perspectives on a major historical event. It should improve your skills as a reader of fiction and analyst and judge of what you read. In the course of the semester you will: 1) Survey how novels from a variety of positions and perspectives represent and understand the events of 9-11. 2) Learn to analyze the form of the novel, its various elements, and its role in culture and history. 3) Read and evaluate reviews of major novels, from different contexts. 4) Learn to write an intelligent and informed review of a novel.
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.104. Counterfactual Literature and Film. 3.00 Credits.
This course will concern the imagination of our unled lives—the lives we might have led but have not. Robert Frost's "The Road Not Taken" is the most familiar instance of this preoccupation, but Frost is only one of many artists for whom unled lives have been an ongoing concern—Thomas Hardy, Henry James, Virginia Woolf, Philip Larkin, Ian McEwan, and Sharon Olds are among the many others. Why are people so interested in what has not happened to them? And why should writers and film-makers in particular be so interested in these non-events?
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.107. Introduction to Literary Study. 3.00 Credits.
This course serves as an introduction to the basic methods of and critical approaches to the study of literature. Some sections may have further individual topic descriptions; please check in ISIS when searching for courses.
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.108. Time Travel. 3.00 Credits.
Why is time travel such a consistent and perplexing theme in literature and film over the last 150 years? Why is modernity so concerned with peeking backwards or forwards? This course will examine the history of time-travel fiction, from its beginning in utopian fiction through its box-office dominance in the 1980s, and into today. Writers will likely include Mark Twain, Edward Bellamy, Harold Steele Mackay, Ray Bradbury, Robert Heinlein, and Philip K. Dick. Movies will include *The Terminator*, *Back to the Future*, and *Primer*.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.109. The African American Novel. 3.00 Credits.
This course will survey classic novels by African-American writers. From slavery to freedom, from subjection to the qualified triumph of integration, we’ll examine several examples of black writers writing about what it means to be black in America, and what it means to be white from a black perspective.
Instructor(s): D. Tye
Area: Humanities
Writing Intensive.

AS.060.110. How Not to Be Afraid of Poetry. 3.00 Credits.
What is poetry? And why don’t we like it? This course will explore what makes poetry turn ordinary language into something extraordinary, into shapes and sounds so that sometimes we find it difficult to understand and sometimes we find it gives us great delight. This seminar will open up a range of poetry written in English, including some of the greatest writers of the English language. This course is designed for the students without a strong background in reading poetry but who have the desire to gain it; the main emphasis is exploration of the world and words of poetry and developing an appreciation and analytical understanding of the ways poetry can express, advocate, record, and move. Assignments will include reading poems, becoming an expert about a single poet, attending public poetry readings, creating poems, and writing short weekly assignments about poems. You will be expected to be an active member in classroom discussion and activities. Pre 1800 course.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.112. Major Authors: Dickens and Film. 3.00 Credits.
From the earliest moments of cinema, Charles Dickens' writing has proven extraordinarily stimulating for film-makers. Why might this be? What does it tell us about Dickens—and what does it tell us about the pleasures and demands of both fiction and film? To address these complex questions we'll read a handful of Dickens' works (most likely Oliver Twist, Great Expectations, Christmas Carol and Little Dorrit), watch their adaptations, and read a small set of critical essays.
Requirements are likely to include two papers, response papers, and a class presentation.
Instructor(s): A. Miller
Area: Humanities

AS.060.113. Expository Writing. 3.00 Credits.
"Expos" is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply "The Fundamental Structure of Academic Argument" in academic essays of their own. Classes are capped at 15 students and organized around three major essay assignments. Each course guides students' practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each "Expos" course teaches students to document sources correctly and provides its own topic or theme to engage students' writing and thinking. Please see the following list of individual course descriptions to decide which sections of "Expos" will most interest you. "Expos" courses are available to freshmen, sophomores, and juniors, and to seniors by special permission.
Instructor(s): Staff

Writing Intensive.
Writing Intensive.

Area: Humanities

Writing that forever redefined the essay, the novel, and the poem in the genre-bending writing of these three nineteenth-century giants—them “inner than the bone.” We shall examine the representations of self experiences so solitary and apparently incommunicable that she called nor decry his limitations. Rather her poems invent a language for Emily Dickinson’s poems neither extol the “greatness” of the individual “untraditional and independent thinking” as the condition of tragedy. —that is genius.” Melville regarded such hubristic intoxication with your own thought, to believe what is true for you is true for all men Emerson famously exalted the power of the individual self: “To believe your own thought, to believe what is true for you is true for all men—that is genius.” Melville regarded such hubristic intoxication with “untraditional and independent thinking” as the condition of tragedy. Emily Dickinson’s poems neither extol the “greatness” of the individual nor decry his limitations. Rather her poems invent a language for experiences so solitary and apparently incommunicable that she called them “inner than the bone.” We shall examine the representations of self in the genre-bending writing of these three nineteenth-century giants—writing that forever redefined the essay, the novel, and the poem.

Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.060.114. Expository Writing. 3.00 Credits.

“Expos” is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please see the following list of individual course descriptions to decide which sections of “Expos” will most interest you.

“Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission from the English Department.

Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.116. Reading Muslims in Global Fiction and Film. 3.00 Credits.

This course will explore representations of complex, fully-developed Muslim characters in fictions detailing experiences from the Balkans, the Indian Ocean, Britain, and the United States. These may include novels by Abdurazak Gurnah, Ofran Pamuk, and Leila Aboulela, as well as films like A Separation (2011). In studying the way each text represents Muslims and their relationships to their faith, the class will analyze themes of belonging and identity politics, imagined relationships to geographies, and representations of individuality alongside rituals of belief. It will look at how race, socio-economic status, gender, and citizenship contribute to these representations, when and how these texts are read as political acts, and what contributions such fiction has made to aesthetics.

Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

AS.060.123. Freshman Seminar: Prophecy After Science. 3.00 Credits.

This course explores the history of prophecy from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom. We will focus on the influence of prophecy on the rise of science (and vice-versa). Readings will include texts by William Shakespeare, Francis Bacon, Mary Shelley, and Philip K. Dick.

Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.125. Nineteenth-Century American Experimental Writing. 3.00 Credits.

Emerson famously exalted the power of the individual self: “To believe your own thought, to believe what is true for you is true for all men—that is genius.” Melville regarded such hubristic intoxication with “untraditional and independent thinking” as the condition of tragedy. Emily Dickinson’s poems neither extol the “greatness” of the individual nor decry his limitations. Rather her poems invent a language for experiences so solitary and apparently incommunicable that she called them “inner than the bone.” We shall examine the representations of self in the genre-bending writing of these three nineteenth-century giants—writing that forever redefined the essay, the novel, and the poem.

Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.127. Muslim Science Fiction. 3.00 Credits.

This course will explore the wondrous and mysterious world of Islamic Sci-Fi. Writers of Muslim Sci-Fi have asserted a long tradition of speculative fiction and fantasy dating back to the 13th century. We will look into this literary history, beginning with earlier texts like The Arabian Nights, al-Qzwinī’s alien story Awaj bin Anfaq and Roquia Hussain’s Sultana’s Dream all the way through to modern texts like G. Willow Wilson’s Alif the Unseen and Saladin Ahmed’s Throne of the Crescent Moon. We will ask how this genre, as opposed to realism, might enable these writers to productively tackle themes of history, science, belief, and the politics of belonging and difference. We will pair our Muslim readings with more canonical science fiction works, such as Mary Shelley’s Frankenstein, H. G. Wells’ The Time Machine, and more recently, Kazuo Ishiguro’s Never Let Me Go, to think through the relationship of the SF writer to a particular cultural moment. We will also look at writers of afrofuturism and magical realism, like Octavia Butler and Gabriel García Márquez, to think about how other writers of color have employed fantasy and the fantastical, and to what ends.

Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

AS.060.129. Writing Africa Now. 3.00 Credits.

This course surveys post-2000 literary and cultural production from sub-Saharan Africa. Topics will include debates over genre and fiction’s relevance to African experience, legacies of canonical writing about independence, urban Africa as violent or “tragic” landscape, and problems of scale and geographical context. Readings by authors such as Adichie, Wainaina, Duiker, and Vladislavic, and students will be introduced to the main print and online arteries of African intellectual discussion. This class is for non-majors and does not count towards the English major or minor.

Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.134. Franz Kafka. 3.00 Credits.

An introduction to one of the 20th century’s most eccentric and important writers. From his German-speaking Jewish background in Austrian-controlled Prague, Franz Kafka managed to overturn the conventions of modern fiction. Both bleak and zany, both logical and absurd, his writing shows the struggle of the individual against the modern institutional world. Discussion topics will include the political and religious views informing Kafka’s work, the role of bureaucracies in everyday life, and the impossibility of living within the law. Reading: short stories; his famous novella, The Metamorphosis; and two novels, The Trial and Amerika—all in English translation.

Instructor(s): R. Day
Area: Humanities.

AS.060.136. Literature of the American South. 3.00 Credits.

This course considers the development of southern identity in twentieth-century American fiction. Reading works from authors of different races, genders, and classes, students will explore the importance of region in determining ways of being and modes of expression.

Instructor(s): E. Steedley
Area: Humanities.
AS.060.138. No I in News: The New Journalism, Hunter S. Thompson to David Foster Wallace. 3.00 Credits.
In 1972, Tom Wolfe noticed a trend in magazine reporting that he called "a 'new' journalism, a 'higher' journalism." This novel breed of reporting, he claimed, was "causing panic, dethroning the novel as the number one literary genre, starting the first new direction in American literature in half a century." It goes without saying that Wolfe considered himself on the cutting edge of the revolution. With no pretense of objectivity, the new journalists unapologetically wrote themselves into stories, stylizing their narratives with the techniques of fiction and recasting fact to suit their intended effect. This course will survey the field of new journalism, from Hunter S. Thompson's drug-fueled, "gonzo" exposed of Southern culture, "The Kentucky Derby is Decadent and Depraved," to mild-mannered George Plimpton's chronicle of his tenure as a middle-aged professional football player, Paper Lion: Confessions of a Last-String Quarterback. We'll also consider some of the movement's precursors and heirs, from Stephen Crane's efforts to brave the heat of battle as a war correspondent to David Foster Wallace's attempt to understand the mild pleasures (and existential terrors) of a cruise ship vacation, "A Supposedly Fun Thing I'll Never Do Again."
Instructor(s): D. Tye
Area: Humanities
Writing Intensive.

AS.060.139. Expository Writing: The Narrative Essay. 3.00 Credits.
Telling stories is one of the first and most important ways that human beings try to make sense of the world and their experience of it. The narrative art informs fiction and nonfiction alike, is central to the writing of history, anthropology, crime reports and laboratory reports, sports stories and political documentaries. What happened? The answer may be imagined or factual, but it will almost certainly be narrative. This course focuses on the narrative essay, a nonfiction prose form that answers the question of "what happened" in a variety of contexts and aims to make sense not only of what happened but how and why. We will begin by summarizing narrative essays, will move to analyzing them, and in the second half of the course you will write two narrative essays of your own, the first based on a choice of topics and sources, the second of your own design. Authors may include James Baldwin, Annie Dillard, Chang Rae Lee, Danielle Ofr, George Orwell, Richard Rodriguez, Richard Selzer, and Abraham Verghese. You will learn the power of narrative to inform and persuade as you test that power in your own writing.
Instructor(s): P. Kain
Area: Humanities
Writing Intensive.

AS.060.140. Censorship and Modern Literature. 3.00 Credits.
Whether because of its religious or political dissent, sexual deviance, or corrupting effects on readers, literature has often been perceived as threatening the social order. In this course, we will read a variety of famous literary works, which have each been censored, banned, or subject to public outrage. Alongside each work, we will also read documents related to that work's suppression, such as reviews, court proceedings, and statements by the authors themselves. We will consider the ways in which literature is both the result of individual artistic achievement, and shaped by its social context. Possible authors include Oscar Wilde, Dijuna Barnes, D.H. Lawrence, Vladimir Nabokov, Allen Ginsberg, Salman Rushdie, and Brett Easton Ellis. (This course is for non-majors)

AS.060.150. Freshman Seminar: Milton’s Paradise Lost: Contexts and Conversations. 3.00 Credits.

This course undertakes an in-depth study of what is arguably the greatest long poem in the English tradition, John Milton’s Paradise Lost. The poem, first published in 1667, is Milton’s take on the Judeo-Christian story of the Fall found in the Bible. Paradise Lost does not merely re-tell the biblical account, however. By expanding three chapters of Genesis into a twelve-book epic meant to rival its classical forbears—most importantly Virgil’s Aeneid—Milton’s poem makes room for new readings of an old story. This course encourages students to find their own new readings of the Genesis story by considering the historical contexts of the poem’s production as well as the conversations Paradise Lost continues to provoke to this day. In addition to reading and discussing the poem, students will become familiar with ongoing sites of critical debate, such as the representations of Satan and of Eve. To help negotiate these conversations, students will complete a guided research project that makes use of the materials available through the library’s Department of Special Collections, housed in Brody Learning Commons. In addition to early editions of Paradise Lost, this treasure trove of rare books offers a wide variety of materials which may deepen an encounter with Milton’s poem, from biblical illustrations to gardening manuals to marriage advice. Students will use the collection to ask questions such as: How does Milton’s representation of Satan differ from earlier traditions of imagining the devil? and Does Milton’s approach to Eve reinforce or revise conventional ideas about women? Sufficient class time will be dedicated to introducing students to Special Collections so as to facilitate their individual work over the course of the semester.

Writing Intensive.

AS.060.151. American Literature, Race, and Civil Rights. 3.00 Credits.

The course will explore the role played by literature in advancing and reflecting upon the African American pursuit of freedom and civil rights over the course of the twentieth century, from the era of harsh segregation through the post-Civil Rights era. Although we will focus primarily on fiction, we will also consider essays, autobiography, and poetry. Writers to be considered, mostly black but some white, may include James Weldon Johnson, Ralph Ellison, Richard Wright, Ann Petry, James Baldwin, William Faulkner, Harper Lee, William Melvin Kelley, Malcolm X, Amiri Baraka, Toni Morrison, and Paule Marshall. This class is for non-majors.

Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.154. Zombies. 3.00 Credits.

Why is the zombie figure so prominent in modern literary and cinematic texts? What particular anxieties does this figure of mindless violence and death disclose? Why does the zombie genre so often lend itself to political allegory? How do we make historical sense of this figure’s original association with Afro-Atlantic religions like Haitian voodoo? This course is designed for non-majors interested in developing critical reading and writing skills by investigating this surprisingly rich topic. Texts, literary and cinematic, may include: firsthand accounts of the Atlantic slave trade, Mary Shelley’s Frankenstein, Edgar Allan Poe’s short stories, Rudolph Fisher’s The Conjure-Man Dies, The Invasion of the Body Snatchers (dir. Don Siegel), The Serpent and the Rainbow (dir. Wes Craven), Pontypool (dir. Bruce McDonald), and Zombieland (dir. Ruben Fleischer).

Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.155. Expository Writing: Introduction to the Research Paper - Controversies in Adolescence. 3.00 Credits.

"Introduction to the Research Paper" is designed to introduce more experienced student writers to the fundamental skills of the research process. These include asking research questions, evaluating the usefulness of sources to answer them, synthesizing sources, reading sources critically, and developing arguments that deliver an original thesis. Students will work with a research librarian at the Eisenhower Library, with whom they will learn to navigate traditional databases as well as new media sources. The Research Paper is topic-based and divided into three linked units of instruction. The course culminates with a paper of 10-12 pages that draws upon the cumulative skills of the semester. Each course is capped at ten students and available only to those who have taken "Expository Writing" (060.113/114)
Instructor(s): A. Watters
Area: Humanities
Writing Intensive.

AS.060.157. J.R.R. Tolkien and the Contemporary Fantasy Epic. 3.00 Credits.

J.R.R. Tolkien’s "The Lord of The Rings" trilogy can honestly be said to have initiated a new genre: a novel-based epic narrative set in a fantasy world. Since Tolkien's works were first published in the 1940's, there has been a massive flowering in similar works, as later authors expanded and developed the notion of the multi-volume fantasy narrative. However, these later texts are also, importantly, creative responses to the models Tolkien developed. In this course, we are going to study this genre, identify its history and formal features, and consider the nature of fantasy fiction more generally. What do authors hope to achieve by setting plots and characters in a completely imagined world? What narrative possibilities does such a decision enable, and what possibilities does it preclude? Does the fantasy genre mask certain ideologies, and how can we uncover them? Authors will include Tolkien, Robert Jordan, George R.R. Martin, and Steven King, and may also include selections from Brandon Sanderson, David Eddings, Patrick Rothfuss, Ursula K. LeGuin, and Elizabeth Moon. This course is for non-majors. (Limit 18)
Instructor(s): P. Fessenbecker
Area: Humanities
Writing Intensive.

AS.060.158. Advertising and Literary Modernism. 3.00 Credits.

To say that certain modernist authors were skeptical about the growing power of advertising would be an understatement. H.G. Wells described it as a form of “legalized lying,” while F. Scott Fitzgerald quipped that “its constructive contribution to humanity is exactly minus zero.” Such views on marketing were hardly uncommon, as many modernist authors saw advertising as an enemy to true artistic creation. The modernist response to this form of popular culture, however, was not uniformly hostile. Avant-garde artists, who rejected mainstream commercial values, often turned to newspaper ads and posters for the material that they would repurpose for their own work. In the stream of consciousness epic Ulysses, the protagonist works in advertising and his eye is often drawn to the notices and promotions that cover the streets of Dublin. Virginia Woolf even pauses her narrative to depict a fictional crowd of Londoners contemplating an airplane writing an ad in smoke letters. This course will explore the variety of stances toward advertising in the modernist period, as well as provide historical context. Novels include: Sister Carrie, The Ambassadors, Mrs. Dalloway, Turnabout, as well as selections from Ulysses. Critical sources include: Benjamin, Adorno, Williams, Moretti, Brown, and Butler. This course is for non-majors.
Instructor(s): K. Wedekind
Area: Humanities
Writing Intensive.
AS.060.159. James Joyce’s Ulysses. 3.00 Credits.
Ulysses is often described as impossible to read (it isn’t) and as the greatest novel in the English language (it just might be). A monumental book set in a single day, Ulysses seems to have it all: a panoply of literary styles, religions, philosophies, histories, emotions, and even a wide variety of bodily functions. In addition to offering an up-close look at the novel itself, this course examines the novel’s use of mythology, meditations on Irishness, reflections on capitalism, and its place in modernism. By the end of the course, not only will you have read the famously difficult and important Ulysses; you will have understood it, too.
Instructor(s): R. Day
Area: Humanities.

AS.060.164. The Marriage Plot: From Jane Austen to Bridesmaids. 3.00 Credits.
No device has been more essential to the modern novel than that of marriage. In this course we will examine the history of the marriage plot in literature and film, beginning with Jane Austen’s Pride and Prejudice and concluding with the 2011 film Bridesmaids. We will have occasion to inquire into the significance of marriage to the form of the novel as well as the ways in which the marriage plot has been appropriated, adapted, and deconstructed in nineteenth-century novels and contemporary novels alike. This class will also include a digital component as we will all collaborate to create a growing database of tropes common to marriage plots.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.165. The Russian Novel: Tolstoy and Dostoyevsky. 3.00 Credits.
The idea of the Russian Soul has long been a source of captivation to English-language writers. How has their imagination of the dense nineteenth-century works for which Russian literature is best known evolved in the era of globalization? This course reads three major Russian novels in tandem with recent works that invoke them: Tolstoy’s Anna Karenina with Nilo Cruz’s 2003 Pulitzer Prize-winning play Anna in the Tropics; Dostoevsky’s Demons with J.M. Coetzee’s 1994 novel Master and Margarita; and Turgenev’s Fathers and Sons with Tom Stoppard’s 2002 Coast of Utopia trilogy. We will attend both to the aspects of Russian writing that find perennial appeal, and to the nuances of Russian intellectual history that get lost in the clamor to claim it as universal.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.166. Russian Classics & Their Afterlives. 3.00 Credits.
The idea of the Russian Soul has long been a source of captivation to English-language writers. How has their imagination of the dense nineteenth-century works for which Russian literature is best known evolved in the era of globalization? This course reads three major Russian novels in tandem with recent works that invoke them: Tolstoy’s Anna Karenina with Nilo Cruz’s 2003 Pulitzer Prize-winning play Anna in the Tropics; Dostoevsky’s Demons with J.M. Coetzee’s 1994 novel Master of Petersburg; and Turgenev’s Fathers and Sons with Tom Stoppard’s 2002 Coast of Utopia trilogy. We will attend both to the aspects of Russian writing that find perennial appeal, and to the nuances of Russian intellectual history that get lost in the clamor to claim it as universal.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.167. The Russian Novel: Tolstoy and Dostoyevsky. 3.00 Credits.
If there is no God, how can I be a captain? We’ll examine this and other religious, philosophical, and historical questions in Tolstoy’s and Dostoevsky’s titanic novels. Readings (in translation) include War and Peace and The Brothers Karamazov. No prerequisites. Substantial reading; 6-8 page paper; 10 page paper; weekly exercises and quizzes. Freshman/sophomore seminar. This class is for non-majors.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.168. Introduction to the Gothic. 3.00 Credits.
Intended as a survey of American and British Gothic fiction (with some excursions into poetry, film, and television), this course will introduce students to the genre of the Gothic and some of its key terms via a selection of major works of Gothic literature from the 19th and 20th Centuries, as well as some of its more popular incarnations (True Blood, the Twilight series). By the end of the course students should have a better understanding of why the Gothic mode continues to play such an important role in our cultural imagination and be better equipped to think and write critically about any manifestation of Gothic terror, from In Cold Blood to True Blood. Students will write short (1-2 page) weekly response papers along with one longer 5-7 page paper.
Instructor(s): A. Zecca; E. Steedley
Area: Humanities.

AS.060.203. Bible as Literature. 3.00 Credits.
This course looks at the ways in which the bible has and can be read as literature.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.204. Satan in Literature. 3.00 Credits.
What is it about Satan that has captured the literary imagination? From moral opposition to God in the Book of Job, to divine punishment in Dante’s Inferno, from political revolution in Milton’s Paradise Lost to irreverence of tradition in Salman Rushdie’s The Satanic Verses, this class will examine the ways in which Satan has been used in literature to represent a variety of moral, political and social forces, from Ancient, Medieval, Renaissance and Modern eras.
Instructor(s): J. Chilton
Area: Humanities.

AS.060.205. Friends and Enemies in Jane Austen. 3.00 Credits.
Jane Austen’s novels are often treated as forms of escape from our complicated world to a simpler, more rational time. Arguably, however, her novels originally helped readers navigate profound social problems, particularly the difficulty of knowing friends from enemies. In this course, we will consider depictions of friendship and enmity in four of Austen’s major novels. We will compare these novels to four recent films inspired by her works.
Instructor(s): W. Miller
Area: Humanities
Writing Intensive.
AS.060.207. Shakespeare. 3.00 Credits.
Reading the major comedies, histories and tragedies alongside the narrative poem "Venus and Adonis" and the sonnets, this survey course considers Shakespeare's hybrid career as poet and playwright. Pre 1800 course.
Instructor(s): A. Daniel; J. Hickman
Area: Humanities.

AS.060.208. Brit Lit I. 3.00 Credits.
This lecture course tracks the development of vernacular literature in English from the medieval period to the close of the early modern period. Texts include Chaucer's Canterbury Tales, Spenser's The Faerie Queene, Milton's Paradise Lost and Alexander Pope's "The Rape of the Lock.
Instructor(s): A. Daniel; C. Scozzaro; E. Tempesta; J. Childers; R. Best
Area: Humanities.

AS.060.210. British Literature II. 3.00 Credits.
This course provides a framework for grasping the dazzling variety and explosive innovation of literature in English during the last quarter-millennium. Attending both to textual details and to historical contexts, we will see how Wordsworth, Austen, Keats, Tennyson, Dickens, Wilde, Woolf, Rushdie, and other writers extend and undo tradition, illuminate their times and places as well as our own, and conspire to bring to us the intense experience distinctive to great literary art.
Instructor(s): A. Guevarez; D. Mao
Area: Humanities.

AS.060.211. British Literature I. 3.00 Credits.
What is British Literature? Beginning in the fourteenth century and concluding in the eighteenth century, this survey course examines the time period in which the notion of vernacular English literature, the corporate body of "Great Britain" as a national framework, and, with it, "British-ness" as an imaginary, synthetic identity, were all created. Participants will read a representative group of Geoffrey Chaucer's "The Canterbury Tales", Book I of Edmund Spenser's "The Faerie Queene", the entirety of John Milton's "Paradise Lost", and Alexander Pope's "The Rape of the Lock." The course is designed as an introductory level lecture course and is open to all students curious about the beginnings of the English literary canon. It is recommended that students follow this course with its sequel, Professor Mao's "British Literature II," which will be offered the following semester. Pre-1800 course
Instructor(s): A. Daniel
Area: Humanities.

AS.060.212. British Literature II: 18th Century to the Present. 3.00 Credits.
A survey of major authors such as Wordsworth, Keats, Austen, Tennyson, Dickens, Wilde, Woolf, Joyce, and Rushdie. Substantial attention to formal conventions as well as stylistic innovation, to aesthetic value as well as social meaning.
Instructor(s): D. Mao
Area: Humanities.

AS.060.213. The Novel and Globalization. 3.00 Credits.
Novels have long been classified by the national origin of their author, and, for the most part, the great works of the nineteenth and twentieth centuries take place primarily in one country. In the postcolonial era of the 1980s and 90s, many prominent writers explored the process of diasporic movement from one country to another. Recently, though, there has been a lot of talk about a new kind of "rootless" novel that jumps between many locales around the globe. This course reads some of the prime examples of this genre in relation to its immigrant predecessors, identifying its key formal and thematic attributes (such as perspectival and geographical range, multi-stranded plots, and an acute consciousness of linguistic and generic hybridization). We will discuss the trade-offs inherent in developing many places rather than one in terms of style and character development, as well as the political and even ethical implications of abandoning the concept of "home."
Primary works by Abdulrazak Gurnah, Caryl Phillips, David Mitchell, Taiye Selasi, Chimamanda Adichie, and Imraan Coovadia.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.214. Jane Austen. 3.00 Credits.
An in-depth study of Austen's writing, from her juvenilia through her posthumously published novels, with an occasional glance to movie adaptations. The course will focus on persistent questions about Austen's relationship to feminism, and issues of gender and sexuality, as well as issues of style and technique.
Instructor(s): M. Favret
Area: Humanities.

AS.060.219. American Literature to 1865. 3.00 Credits.
A survey course of American literature from contact to the Civil War.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.220. What is the Great American Novel?. 3.00 Credits.
This course will investigate the curiously persistent idea of the Great American Novel (GAN) through a close engagement with three exemplary candidates for the title that span American literary history (Moby-Dick, Song of Solomon, and Freedom). Students will also read several critical essays to provide both a history of the concept as well as criteria for what might make an American novel great. Through analyses of the individual novels, students will be encouraged to reflect on the persistence, efficacy, and validity of the GAN.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.221. Coming of Age Novels. 3.00 Credits.
In this course, we will consider how coming of age is depicted in the novels of British and American modernism. We will discuss how questions of family, sexual love, education, work, and religion contribute to an individual's personal development in the novels of Virginia Woolf, James Joyce, F. Scott Fitzgerald, Virginia Woolf, and James Baldwin. We will also reflect on how the form of the coming of age novel in the early to mid twentieth century engages with important social and historical developments that protected adolescence as a stage of life, such as labor and education reform. Writing requirements include two 4-5 page papers.
Instructor(s): C. Gannon
Area: Humanities.
AS.060.222. American Literature, 1865 to today. 3.00 Credits.
This course is a survey of major developments in American poetry and narrative fiction from the end of the Civil War to the present day. Authors to be covered may include Mark Twain, Willa Cather, Henry James, James Baldwin, Toni Morrison, Emily Dickinson, Walt Whitman, Wallace Stevens, and John Ashbery.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.224. The Modern Novel. 3.00 Credits.
This course covers the British novel from the late nineteenth century to the present, with a particular focus on the decades around World War I. We’ll balance attention to formal innovations and experiments with consideration of social and historical context, exploring issues such as gender, empire, psychology, the city, and war. Our goal will be to understand what makes these novels “modern” and sets them apart from their predecessors; to this end, we’ll examine how many important authors also wrote extensively on the craft and aims of fiction. Readings will include representative selections by authors such as Henry James, James Joyce, Ford Madox Ford, E.M. Forster, Virginia Woolf, Jean Rhys, and Ian McEwan.
Instructor(s): A. Grener
Area: Humanities.

AS.060.229. The Antihero: Heathcliff to Walter White. 3.00 Credits.
Although it’s common to think of literature a source of ethical wisdom, literary history is actually full of proud, often cynical, figures who lack respect for conventional norms and compel attention by their sheer force of will. This course constructs an abbreviated history of the anti-hero by exploring works of art that both privilege and criticize anti-heroic villains—including Heathcliff (from Wuthering Heights), Mr. Hyde (from Dr. Jekyll and Mr. Hyde), and Walter White (from Breaking Bad).
Instructor(s): M. Flaherty
Area: Humanities.

AS.060.231. Novels Into Film. 3.00 Credits.
What does it take to turn a novel into film? How different are the demands and possibilities of these two forms? Why do some novels repeatedly attract filmmakers? And how should we evaluate films that adapt novels? Beginning with the novel Frankenstein and its various film progeny, we will look at a series of pairings between novels and films. These may include Austen’s Pride and Prejudice, Dickens’ Great Expectations, Tarkington’s The Magnificent Ambersons, Stoker’s Dracula and McEwan’s Atonement along with various critical readings about the genre of the novel and the medium of film.
Instructor(s): M. Favret
Area: Humanities.

AS.060.255. The Bible as Literature. 3.00 Credits.
This course looks at the Bible’s influence on literature by examining the use and impact of the most common biblical stories on canonical literary works. Pre 1800 Course
Instructor(s): M. Thompson
Area: Humanities.

AS.060.260. Ethnic American Literature. 3.00 Credits.
This class is an introductory course in ethnic American literature. We will read Native American, Chicano, Latino, Asian American, and African American literatures. The class will pose questions such as: Why ethnic American literature? Why not simply American? What are the dissonances and similarities between these literary voices? We will explore themes such as identity, otherness, and the construction of race and Americanness. Readings in post 1945-course will include works by authors such as James Baldwin, David Henry Hwang, Toni Morrison, Sherman Alexie, Junot Diaz, Sandra Cisneros, Maxine Hong Kingston, and Jhumpa Lahiri.
Instructor(s): R. Neutill
Area: Humanities.

AS.060.262. Literature and Knowledge. 3.00 Credits.
Can poems, plays, and imaginary narratives teach us something about the real world? Or does their fictional status make them unreliable as sources of knowledge? This course explores these questions by examining classical and contemporary discussions of the topic in conjunction with major works of literature. Primary sources include works by Shakespeare, Jane Austen, and William Golding, while the criticism will be represented among others by Aristotle, Dr. Johnson, and Martha Nussbaum.
Instructor(s): R. Maioli dos Santos
Area: Humanities.

AS.060.265. Nineteenth Century British Novel. 3.00 Credits.
Reading major novelists from the nineteenth century including Austen, C. Brontë, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.276. Modern Drama. 3.00 Credits.
An introduction to drama of the late-19th and 20th centuries, with an emphasis on its ideological and political contexts. In modern drama, we find vivid accounts of key aspects of modernity: urbanization, industrialization, migration, war, democracy, capitalism, fascism, communism, and nationalism, to name a few. We will read a selection of plays that ask timely questions about the limits of human subjectivity and integrity in a modern, often dehumanizing world. Modern drama is shaped by, and responds to, social and political changes, such as the demise of the aristocracy, the ambitions of the middle class, totalitarian conquest of Europe, apartheid in South Africa, and the AIDS epidemic in the United States. This course also charts how major debates, movements, and theories in the arts have motivated drama’s diverse forms and themes. Playwrights may include Henrik Ibsen, Oscar Wilde, Anton Chekhov, Bertolt Brecht, Eugene O’Neill, Tennessee Williams, Samuel Beckett, Athol Fugard, Edward Albee, Caryl Churchill, and Tony Kushner. Secondary readings by the playwrights themselves, in addition to Georg Lukacs, T.S. Eliot, Raymond Williams, Eric Bentley, and more recent scholars and critics.
Instructor(s): R. Day
Area: Humanities
Writing Intensive.
AS.060.278. Social Climbers and Charlatans in American Literature. 3.00 Credits.
"It's good to be shifty in a new country," declares Johnson Hooper's swindling vagabond Simon Suggs. The ability to speak in many voices—to play many roles—is one key facet of the rags-to-riches American ideal of not only making something of one's self, but of making one's self. But how much social mobility or personal fluidity is too much? In this course, we'll consider the problem of fashioning a self that is both flexible and authentic, both capacious and individual, as it is represented in a broad swath of American literature. We'll begin with Benjamin Franklin's Autobiography, in which Franklin reimagines his life into an intricate web of fact and fabrication. From there, we'll explore the Transcendentalist ideal of the "Moral Sense," in the form of Emersonian self-reliance and Thoreau's revolutionary militancy, and its dark side in Poe's "Imp of the Perverse." After this, we'll account for the great showman P.T. Barnum, who splits the difference between legitimate businessman and devious swindler. We'll see what happens when, in order to make yourself, you first have to steal yourself in "The Narrative of the Life of Frederick Douglass, American Slave". In Mark Twain's "Pudd'nhead Wilson" and Nella Larsen's "Passing," we'll investigate how, why, and with what consequences black Americans might try to pass for white. As the semester winds down, we'll reconsider the rise and fall of Fitzgerald's Jay Gatsby, the mobster made good (if only for a while), before ending with Nathanael West's "Miss Lonelyhearts", a dark comedy about a man who writes an advice column as a woman. The course will explore some of the fine lines—between honest art and heinous hoaxing, belief and delusion, entrepreneurship and charlatanry—relentlessly worked over in American literature since the nation's inception. Throughout, we'll take stock of the possibilities and pitfalls lurking in the seemingly incompatible goals of novelty and authenticity, fluidity and authority. Dean's Teaching Fellowship course.
Instructor(s): D. Tye
Area: Humanities
Writing Intensive.

AS.060.302. Theology of the Narrative. 3.00 Credits.
Everything happens for a reason. I guess it wasn't meant to be. People often impose a narrative logic on life events by reference—however attenuated—to a transcendent order of meaning. This course asks two basic questions: How do theological concepts such as God's omniscience, Providence, predestination, and prophecy get translated into particular narrative structures? How does narrative experimentation function as a critique of traditional theological viewpoints, particularly around the question of how divine agency is related to the existence of evil? Course texts may include: The Book of Job, Denis Diderot, Jacques the Fatalist; Olaudah Equiano, Interesting Narrative; Herman Melville, Moby-Dick; James Agee and Walker Evans, Let Us Now Praise Famous Men; James Baldwin, Go Tell It On the Mountain; Marilynnne Robinson, Gilead and Home; Scarlett Thomas, Our Tragic Universe; Terrence Malick, dir., The Tree of Life.
Prerequisites: AS.060.107 Intro to Literary Study, English Lecture Course, or instructor approval.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.303. Literature of London. 3.00 Credits.
Ian Watt famously linked the rise of the novel with the rise of the city in his seminal work, The Rise of the Novel. This course will survey British literature from the late eighteenth through the early twentieth century that features the city of London. Students will consider how the city and urban life change over the course of the nineteenth century and how they transform literary depictions and understandings of selfhood and the social imagination. They will examine how nineteenth-century literature represents the space of the city and how these efforts to depict the city cause formal and stylistic innovations. How does the compressed space of the city and its intense stimuli affect characters' sense of identity? Students will also consider the ways in which the city affects understandings of gender, class and race in these texts. The course will focus on the novel, but it will also include excerpts from newspapers, poetry and essays. Students will read Our Mutual Friend over the course of the semester in order to mimic the experience of nineteenth-century serial reading. Other readings will include Evelina, The Secret Agent, and A Study in Scarlet.
Instructor(s): J. Valdez
Area: Humanities
Writing Intensive.

AS.060.304. Large Novels. 3.00 Credits.
This course will look at novels that are not only large in size, but which also think about the meaning and methods of trying to capture huge segments of the world into a piece of art. How much can be fit into a novel? What is gained and what is lost? How large is too large? We will read Charles Dickens's Bleak House, Lev Tolstoy's War and Peace, and Thomas Pynchon's Gravity's Rainbow.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.306. The Rise of the Novel. 3.00 Credits.
This course will look at the development of the novel form, from its earliest incarnations. We will pay special attention to questions of how changes in social, cultural, and economic context played a part in the growing popularity and relevance of the novel form. Authors will likely include Miguel de Cervantes, Daniel Defoe, Samuel Richardson, Henry Fielding, Jane Austen, and Henry James. [This course satisfies the pre-1800 requirement]
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.307. Training\Writing\Consulting. 1.00 Credit.
A one credit course for those undergrads who have been nominated as Writing Center tutors. Permission required.
Instructor(s): A. Sheeran
Area: Humanities
Writing Intensive.
AS.060.308. The Novelty of the Novel. 3.00 Credits.
The English novel has been traditionally regarded as having originated in the eighteenth century, with the works of Defoe, Richardson, and Fielding. This view of the novel’s origins owes much to the influence of Ian Watt’s The Rise of the Novel (1957). Watt claims that the prose fiction written by these three authors is defined and distinguished from other varieties by its “formal realism” – a set of procedures that made the novel much more lifelike than picaresque tales, courtly novellas, or the romance. Watt’s view of the canon is now taken to be too restrictive, but his thesis concerning what was novel about the novel remains influential. In this course students will engage with two aspects of Watt’s argument that have been criticized by later critics but still retain some of their original force: the idea that eighteenth-century prose fiction marks a break with the past and that the tradition emerging at that point has English origins. We will be testing these two theses by reading and contrasting older and newer forms of prose fiction from England, France, and Spain, comparing their formal procedures, and discussing how satisfactorily Watt accounts for them. We will also be reading critiques and defenses of Watt by critics including Michael McKeon, J. Paul Hunter, Margaret Anne Doody, and Nicholas Seager. Primary sources will include excerpts from Roger Boyle’s romance Parthenissa (1651) alongside Defoe’s Moll Flanders (1722); the picaresque tale Lazarillo de Tormes (1554) together with Fielding’s road epic Joseph Andrews (1742); and the conjugal drama of Madame de Lafayette’s La Princesse de Clèves (1678) together with Richardson’s treatment of a similar topic in Pamela (1740). As we read the primary sources we will be also reading the relevant chapters of The Rise of the Novel. By gaining a first-hand view of the actual changes in prose fiction students will be able to appreciate the force of Watt’s thesis as well as its limitations. Toward the end of the course they will also engage with the provocative final chapter of Watt’s book, which claims that the problems raised by formal realism as practiced by Richardson and Fielding are finally resolved in the work of Jane Austen. Sense and Sensibility should provide the testing ground for this thesis. Pre 1800 course.
Instructor(s): R. Maioli dos Santos
Area: Humanities
Writing Intensive.

AS.060.309. Home and Wanderlust in Modernist Literature. 3.00 Credits.
This course will examine forms of wanderlust and tensions between rootedness in one’s own culture and a cosmopolitan orientation in Henry James, Joyce, Tagore, Hemingway, Isak Dinesen, and Hualing Nieh. Dean’s Teaching Fellowship course.
Instructor(s): N. Zhang
Area: Humanities
Writing Intensive.

AS.060.310. Work and Worth in American Literature. 3.00 Credits.
This course will engage contemporary discussions of economics, labor, and vocation with representations of people at work in the writings of Douglass, Melville, Hurston, Steinbeck, Frost, Yates, Springsteen, and others. Dean’s Teaching Fellowship Course
Instructor(s): E. Tempesta
Area: Humanities
Writing Intensive.

AS.060.311. On Moral Insanity: Self-Control in Victorian Philosophy, Psychology, and Fiction. 3.00 Credits.
Standard utilitarianism, the dominant philosophical account of moral agency in the Victorian period, has a surprisingly unsophisticated account of self-control: both Jeremy Bentham and John Stuart Mill thought it was relatively straightforward, insofar as agents reliably pursued whatever end appeared to promise the greatest gain in happiness with little psychic effort. But other forms of intellectual life in the period—the now-forgotten “Intuitionist” school, the pre-Freudian psychologists, and perhaps most importantly, an important series of Victorian novelists—recognized that agency was much more complex, and tried to work through the problem that J.C. Prichard called “moral insanity.” Conceiving it as a situation where agents cannot for some reason pursue their own reflectively endorsed goals, these authors developed a variety of richly complex accounts of and treatments for the loss of self-control. In this class, we are going to explore those accounts at some length. To start with the utilitarian model as a backdrop to the more complex accounts, we will read selections from Jeremy Bentham and John Stuart Mill in which they lay out their pleasure/pain account of agency, and then work through a set of theoretical materials for use throughout the course. First, we’ll examine the intuitionist views of agency from William Whewell and John Grote, who held that moral action essentially required mastering oneself in such a way as to perceive and act upon moral intuitions; then, we’ll turn to analyses from Prichard, Forbes Winslow, Henry Mausley, and other early forerunners in the developing field of psychology, and situate these arguments within the philosophical context. With this theoretical frame in place, we will spend the bulk of the course reading a series of novels that address the question of self-control. Beginning with Jane Austen and Charlotte Brontë, we’ll consider the ways in which these novels represent the relationship between desire, reflection, and gender. Turning to George Eliot’s Romola and Anthony Trollope’s Can You Forgive Her?, we’ll consider the way Eliot and Trollope analyze the nature of practical rationality. Finally, we’ll conclude with two important challenges to the belief in the moral value of self-control, in Thomas Hardy’s Tess of the d’Urbervilles and Oscar Wilde’s The Picture of Dorian Gray.

AS.060.312. Literature of the Gray Zone: The Holocaust and Its Shadow. 3.00 Credits.

Primo Levi's well-known essay "The Gray Zone" describes complex states of complicity and moral erosion between the categories of "victims," "perpetrators," and "bystanders" during and after the Holocaust. Literature written at the time or in the immediate aftermath, whether memoir, commentary, or fiction, contains many illustrative examples, but even more have arisen at one or another remove from the events, as later generations have confronted an atrocity frequently taken to be historically and morally unique. How did the Holocaust become a touchstone for both extremities of human behavior and problems of representation? When did the Holocaust become available to literature or to the once unthinkable strategies of satire, post-modernism, and even pornography, and can these strategies be considered examples of "the gray zone"? The course will deal with the testimonies of perpetrators such as Rudolf Höss (commandant of Auschwitz) and historical documents setting forth plans for genocide; with memoirs of prisoners such as Filip Müller forced into participation in the Holocaust; and more particularly with literary depictions of life in "the gray zone." The sequence of readings will be organized mainly around literary texts, but these will be paired, sometimes in two-week sequences, with historical and critical materials that take up the problem of complicity through various perspectives: the role of Jewish leaders during the Holocaust; attempts to fictionalize extremities of evil (e.g., Hitler); the aestheticizing of atrocity; the moral responsibility of bystanders; and the extension of genocidal paradigms to other dimensions such as slavery and animal rights. Texts to be studied (mostly, though not exclusively, written first in English) may include: Primo Levi, The Drowned and the Saved; Rudolph Hoess, Commandant of Auschwitz; Tadeusz Borowski, This Way to the Gas; Ladies and Gentlemen; George Steiner, The Portage to San Cristobal of A. H.; Leslie Epstein King of the Jews; Sylvia Plath, selected poems; Philip Roth, The Plot against America; D. M. Thomas, The White Hotel or Pictures At an Exhibition; Caryl Phillips, The Nature of Blood; and J. M. Coetzee Elizabeth Costello.

AS.060.313. Edmund Spenser. 3.00 Credits.

After a diagnostic introduction to his early poetry, this reading intensive seminar will concentrate upon Edmund Spenser’s masterpiece, The Faerie Queene (1590/1596), which we will read in its entirety. Over the course of its sprawling Six Books and its concluding Mutability Cantos, The Faerie Queene marshals an enormous cast of characters (knights, ladies, magicians, giants, monsters) in order to allegorically represent the virtues of Holiness, Temperance, Chastity, Friendship, Justice and Courtesy. Through this framework, his text models the ethical regulation of the body, the aesthetic construction of gender, the politics of national myth-making, and the ongoing processes of colonial violence in which Spenser was himself complicit. But across its vast yet incomplete expanse, Spenser’s text is always centrally concerned with the task of reading. Accordingly, students should emerge from their encounter with this demanding but rewarding poem with a deeper understanding of the task of interpretation itself. As a group we will collectively traverse the surface of the text, and work together to construct a functional account of allegory’s effects. You will be asked to respond to the challenge of Spenser’s work in class discussion, weekly short responses, and three analytic papers.

AS.060.314. Social Media Fictions. 3.00 Credits.

Writers around the world are now searching for ways to incorporate new modes of social interaction - e.g. Facebook, Twitter, text messaging, and Skype - into their print work. This course explores the various techniques they have adopted for this purpose, with an eye to critically evaluating their implications for narrative structure and its reality effect. From Teju Cole’s very public experiments with the Twitter novel to a Zimbabwean writer’s attempt to capture plot turns through SMS, we will discuss the ways in which narrative is helped or hindered by the ubiquity of social media. Writers studied will include Tendai Huchu, Zadie Smith, Jonathan Franzen, and Eben Venter.

Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.315. Poetry by Other Means. 3.00 Credits.

In this course, we explore the makings of a new genre: the poet’s novel. Reaching back to the modernist works of Gertrude Stein and Djuna Barnes to look for its resources and its models, searching for antecedents in the queer avant-gardes of the 1970s, and finally delving into the key poets’ novels of just the last five or ten years—including works written by Eileen Myles, Juliana Spahr, Ben Lerner, and Bhanu Kapil—we will collectively develop an account of its yet-uncharted territory and some of its attractions. Our work will open onto a series of questions about both the category of poetry and the significance of narrative, while following thematic threads of friendship, gender and sexuality, self-reflection, feeling, crisis, and utopia. Deans Teaching Fellowship course.

Instructor(s): C. Westcott
Area: Humanities
Writing Intensive.

AS.060.316. Mapping the Global Metropolis. 3.00 Credits.

Cities have long taken on a central role in literature, but much of our reading about urban space is confined to a few Western hubs. And while the city has traditionally been a space for fictional characters to develop into national subjects, much of the most innovative contemporary writing sees the city as a character of its own. This course will address the representational challenges of globalization through fiction and genre-bending memoir about contemporary metropolises that act as its microcosm: Johannesburg, Lagos, Delhi, London, and New York. We will read primary works by Ivan Vladislavic, Chris Abani, Aravind Adiga, Zadie Smith, and Teju Cole, as well as supplementary excerpts from books including Capital, by Rana Dasgupta, Mike Davis’ Planet of Slums, Atou Quayson’s Oxford Street, Accra, and Loren Kruger’s Imagining the Edgy City. Finally, the course will include theoretical readings about globality and representation, such as Fredric Jameson’s essay on "Cognitive Mapping" and Arjun Appadurai’s seminal book Modernity at Large.

AS.060.317. Time Well Wasted: Reading Fiction in the 18th Century. 3.00 Credits.

Is reading fiction just escapism? Or can novels speak to us about real life? We will discuss this question by reading classic works by Defoe, Swift, Fielding, and Sterne. Dean’s Teaching Fellowship Course. Pre 1800 course

Instructor(s): R. Maioli dos Santos
Area: Humanities
Writing Intensive.
AS.060.319. Values and Gender in Nineteenth-Century British Literature. 3.00 Credits.
The course considers how nineteenth-century British authors—including Ruskin, Gaskell, Eliot, and Wilde—engage and oppose various sets of values in their representations of gender.
Instructor(s): M. Flaherty
Area: Humanities
Writing Intensive.

AS.060.320. Icons of Feminism. 3.00 Credits.
This course looks at four crucial figures who have haunted feminist thought and responses to feminism over the centuries. Sappho, known as the first female poet, remains an enigmatic icon of feminine desire and creativity; Antigone, the daughter of Oedipus and the heroine of Sophocles’s play Antigone, still inspires feminist analyses of women’s relationship to law, the state and civil society; and Joan of Arc, the militant maid of Orleans, troubles thinking about women and violence as well as women, religion and spirituality. The last figure is Mary Wollstonecraft, often cited as the first modern feminist. The course will examine literary works written about these iconic figures, as well as contemporary feminist writing about their influence and viability as models for the future of feminism.
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.321. Victorian Poetry. 3.00 Credits.
In this class, we’re going to briefly survey the major poets of the Victorian era: Alfred, Lord Tennyson, Robert and Elizabeth Barrett Browning, Dante Gabriel Rossetti and his sister Christina, Matthew Arnold, George Meredith, and others. Moreover, we’ll try to situate them in the social, political, and intellectual contexts that gave rise to their works, and investigate the questions that stimulated them and which their works address: we will, for instance, follow Arnold in thinking about the place of religion in the modern world, Meredith in thinking about the nature of moral egoism, and Elizabeth Barrett Browning in recovering the voices of oppressed classes. We’ll also try to address the various formal innovations of poetry in the Victorian era, attending to—for example—Tennyson’s complex re-imagination of the verse of the Arthurian legends and Robert Browning’s development of sophisticated forms of irony. Specific poems to be studied include Tennyson’s “Ulysses” and “The Lady of Shalott,” George Meredith’s “Modern Love,” and Christina Rossetti’s “Goblin Market.”
Instructor(s): P. Fessenbecker
Area: Humanities
Writing Intensive.

AS.060.322. Indian Ocean. 3.00 Credits.
This course will explore the development of a cosmopolitan ethos in postwar fiction from the Indian Ocean region, with particular focus on South Africa, South Asia, and the Malay Archipelago. Authors will include Aravind Adiga, Pramoedya Ananta Toer, Lloyd Fernando, Tan Twan Eng, and J.M. Coetzee.
Instructor(s): J. Haley
Area: Humanities
Writing Intensive.

AS.060.323. Modern British Poetry. 3.00 Credits.
In this course, students will consider the emergence and development of modern British poetry. Beginning with Hopkins and Hardy, two of the forebears of modernist literature, students will read and discuss the war poems of Owen and Sassoon before turning to major modernist poets like Eliot, Pound, and Auden. By reading pertinent critical pieces and by and biographical information about these poets, students will acquire an understanding of modernism’s concern with form, its interest in experimentation, and its navigation of both tradition and modernity. Over the course of the semester, students will be asked to write three five-to-seven-page essays on the works previously covered in class.
Instructor(s): E. Steedley
Area: Humanities
Writing Intensive.

AS.060.325. George Eliot. 3.00 Credits.
In this course we will read the major novels (and some essays) by George Eliot, one of the most intellectually engaging of British novelists. Her fiction explores ethical, social, and aesthetic issues concerning sexual politics, the limits of morality, the demands of family, the desperation of skepticism, and the capacities of the novel form. Students should leave the course with a heightened sense of the powers of the novel and the seriousness of its ambitions. Texts are likely to include Adam Bede and The Mill on the Floss, but our focus will be on her two last and most ambitious novels, Middlemarch and Daniel Deronda.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.326. Spectral Evidence. 3.00 Credits.
Rising to its greatest prominence during the 1692 Salem Witch Trials, spectral evidence refers to a category of evidence that involves supernatural claims—dreams, visions, etc. Even in 1692 within the largely homogeneous Euro-American Puritan community, the category raised profound questions about what should count as evidence in legal settings, and, more broadly, about the ontological status of the supernatural—to what extent are certain experiences of the supernatural mediated by private subjectivity and thus difficult to transmit or even illegible in the public sphere? These questions only intensify in cross-cultural contexts like the colonial Americas and postcolonial Australia and South Africa and often get reconfigured into debates about the limits of cultural relativism. This course will examine historical, literary, and filmic sites at which the question of spectral evidence comes into play. Texts may include: documents pertaining to the Salem Witch trials; Inquisition records; the novels of Charles Brockden Brown; Nathaniel Hawthorne, “The Scarlet Letter” and other fiction; Edgar Allan Poe, The Tell-Tale Heart, The Pit and the Pendulum, and other fiction; the spiritualist medium Fox sisters’ confessions; Mark Twain, “Personal Recollections of Joan of Arc”; Arthur Miller, “The Crucible”; Peter Weir, dir., The Last Wave; Gavin Hood, dir., A Reasonable Man; Scott Derrickson, dir., The Exorcism of Emily Rose. Recommended Courses Background: AS.060.107, 200-level English course, or instructor approval.

Writing Intensive.
AS.060.327. Best Sellers in the Early Nineteenth Century: Sir Walter Scott, Lord Byron, and Jane Austen. 3.00 Credits.
Sir Walter Scott and Lord Byron were the best-selling authors of their day by a significant margin. In this course, we'll attempt to come to terms with their unprecedented success, which was felt within the business of the publishing industry as much as it was in the minds of their fellow writers. Readings include Scott’s poems set in Scotland's legendary past, Byron’s scandalous and heroic poems (including his masterpiece, Don Juan), as well as a novel by their less-popular contemporary, Jane Austen, whose formally elegant novels must be understood as drawing on and competing with the works of her age’s most dominant literary figures. Additionally, we'll place a strong emphasis on understanding how the workings of the publishing industry affected not only the habits of reading, but also of writing, during this crucial period in literary history. Secondary readings will help to situate the authors and primary texts in their historical and literary context, and provide practical tools for literary analysis. Assignments will include reading quizzes, response papers, and three longer papers. Required Texts: Walter Scott, The Poetical Works of Walter Scott (Wildside Press) Walter Scott, Waverley (Broadview) Lord Byron, The Major Works (Oxford) Jane Austen, Persuasion (Oxford)

Writing Intensive.

AS.060.328. Restoration and 18th Century Literature. 3.00 Credits.
This course is a survey of the major authors and genres in English from 1660-1800. Topics include the rise of the novel, politics and satire, gender and women writers, landscape and ecological consciousness, philosophy, science, and literature.
Prerequisites: AS.060.107
Instructor(s): J. Kramnick
Area: Humanities
Writing Intensive.

AS.060.329. Prophecy after Science. 3.00 Credits.
Prophets and their prophecies are everywhere: whether preached by evangelical visionaries of Rapture, opined by primetime sports forecasters, or sold at hourly rates by countless fortunetellers and astrologers. Our dizzying era, predicated economically, technologically, and politically on objective methods of prediction, comfortably accommodates and even welcomes pre-scientific, prophetic modes of futurity. We look up our horoscopes on our smartphones. How did we come to balance these futures so blithely? Do we – and should we – think of these modes as continuous or separate, complementary or conflicting? This course explores the history of prophecy, from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom, with a focus on the effect of the rise of science in shaping the course of prophetic writings. The majority of texts in this course come from the literature of 1600-1800 – centuries that witnessed the emergence of our modern scientific disciplines, and the recasting of prophecy in terms of the human imagination.
Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.330. The Contemporary Novel. 3.00 Credits.
This course will survey a variety of novels written since 2000, from literary novels to best-sellers, both in English and in translation (into English). We'll pay attention to formal and aesthetic questions – what counts as a good story, at this point in history? – and we'll hone our skills in recognizing narrative patterns and motifs across different fictional styles. Authors likely to be considered include Arundhati Roy, Junot Díaz, Roberto Bolaño, Muriel Barbery, Marlene van Niekerke, David Mitchell, and Amitav Ghosh.
Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.

AS.060.331. Poetry and Perfect Worlds. 3.00 Credits.
A seminar exploring poetic representations of ideal realms. Beginning with classical pastoral, we will move on to medieval and Renaissance arcadia, Romantic geographies, modernist utopias, and the ecopoetics and necropastoral of the twenty-first century. We will consider in detail what makes a place Edenic or utopian and how the fabrication of an imaginary world relates to the construction of a poetic text. Writers studied may include Theocritus, Virgil, Chaucer, Spenser, Milton, Shelley, Tennyson, T. S. Eliot, W. H. Auden, Lisa Robertson, and Juliana Spahr.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.332. Jewish American Fiction. 3.00 Credits.
This course will consider the development of Jewish American fiction over the past century through an examination of major authors and topics, with particular attention to novels whose historical trajectories reach geographically back and forth from America to Europe, and temporally back and forth across the Holocaust, the century’s defining event. These novels thus frequently have multiple settings and treat familial, communal, and intellectual life, along with topics such as emigration, anti-Semitism, and religious belief, over a span of several generations. The list includes authors whose works first appeared in Yiddish (Lamed Shapiro and Isaac Bashevis Singer) and authors whose sensibilities are decidedly American, but all write with attention to the tenuous assimilation, dislocation, trauma, and linguistic complexity that often marked twentieth-century Jewish life, no less in the United States at times than in Europe. Works studied will include: Dara Horn, In the Image; Rebecca Goldstein, Mazel; Bernard Malamud, The Fixer; Lamed Shapiro, The Cross and Other Jewish Stories; Isaac Bashevis Singer, Shosha; Cynthia Ozick, The Shawl; Nicole Krauss, A History of Love; Jerzy Kosinski, Steps; Philip Roth, Nemesis; Shalom Auslander, Hope: A Tragedy: A Novel
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.
AS.060.333. God on Trial. 3.00 Credits.
This course traces an illustrious literary tradition, spanning centuries, that dramatizes the subjection of a deity to a human legal inquiry. We will especially attend to how and with what implications massive theological and philosophical questions such as the existence and nature of the divine and the meaning of and proper ethical response to suffering are worked out through this very specific representational gambit. Texts may include: The Book of Job; Voltaire, Candide; Herman Melville, Moby-Dick; Fyodor Dostoevsky, The Brothers Karamazov; Rebecca Harding Davis, Life in the Iron-Mills; Elie Wiesel, The Trial of God; Tony Kushner, Angels in America; Margaret Atwood, The Handmaid’s Tale; James Morrow, Blameless in Abaddon; OMG: Oh My God! dir. Umesh Shukla; graphic novelists Jonathan Hickman et al., God is Dead.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.336. Victorian Modernity. 3.00 Credits.
This course will study the idea of modernity, a term that has been of continuing use in trying to understand ourselves and our society. We will focus on the major works of prose and poetry that attempted to come to terms with modernity in Victorian Britain. Texts are likely to include non-fiction prose by Mill, Arnold, Darwin, Nightingale, and Pater; Eliot's novel Middlemarch; and poetry by Elizabeth Barrett and Robert Browning, Tennyson, Emily Bronte, Christina Rosetti, Hopkins, and Hardy.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.337. James Joyce. 3.00 Credits.
A seminar covering the oeuvre of James Joyce, including but not limited to Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and parts of Finnegans Wake. Selected readings in other writers and in relevant historiography; some attention to Joyce criticism.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.338. Literary Scenes. 3.00 Credits.
From Paris in the 1920s to San Francisco in the 1960s and beyond, this course will cover literature produced within major and minor literary “scenes” of the 20th Century. Authors include Hemingway, Stein, Woolf, Ginsberg, Kerouac, and others. Dean’s Teaching Fellowship course.
Instructor(s): A. Zecca
Area: Humanities
Writing Intensive.

AS.060.339. Lunatics, Lovers, Poets: Obsessive Minds in Romantic and Victorian Verse. 3.00 Credits.
Focusing on the long nineteenth century, we will examine how major Anglo-American poets treat the complex relationship between madness, passion, and genius. Additional readings in philosophy and psychoanalysis. Dean’s Teaching Fellowship course.
Instructor(s): J. Hann
Area: Humanities
Writing Intensive.

AS.060.340. The Literature of Atlantic Slavery. 3.00 Credits.
This seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban antislavery novels, slave narratives, and “classics” of American literature like Melville’s Benito Cereno. We will consider how the institution of Atlantic slavery was variously represented, justified, and criticized, discovering in the process the deep structures of modern slavery discourse. Texts may include: Aphra Behn, Oroonoko; John Woolman’s Journal; Robert Wedderburn, The Horrors of Slavery and Other Writings; Gertrudis Gomez de Avellaneda, Sab; Frederick Douglass, My Bondage and My Freedom; Herman Melville, Benito Cereno; Harriet Beecher Stowe, Dred; Antonio Castro Alves, The Slaves.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.341. Milton. 3.00 Credits.
This class will study Milton’s poetry and prose across the whole of his writing career, with special attention to Paradise Lost, the great epic poem retelling the story of the fall of humankind. We will consider Milton’s literary background, his contemporary political and social milieu, as well as critical debates that surrounding the poet, who was accused of being ‘of the devil’s party.’ Pre-1800 course.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.342. Contemporary Novel of Ideas. 3.00 Credits.
The novel of ideas is often traced to 18th century French or 19th century Russian writing, but it has come broadly to signify works of robust philosophical contemplation. The inherently slippery term seems to indicate a work in which “form” is subsidiary to “content,” or at least, in which narrative structures adapt to prioritize thought rather than style, image, or even character. But how, exactly, and about what, do novels “think”? In large part, the novel of ideas is now conflated with a rote and recognizable brand of social realism. This course asks what might qualify as a novel of ideas today, both in terms of the novel’s changing relation to geographical space (and thereby the formal spaces in which philosophy might lurk), and of the particular “ideas” it critiques or puts forth. We will read novelists including J.M. Coetzee, Marlene van Niekerk, Jonathan Franzen, Teju Cole, and Ronan Bennett within a longer literary-philosophical tradition, with reference to works such as Candide, War and Peace, Thus Spoke Zarathustra, and Kierkegaard’s Diary of a Seducer.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.343. Milton and Liberty: Public and Private. 3.00 Credits.
This course examines John Milton’s commitment to liberty in its many varieties, both public and private, as articulated in his early prose writings and as imagined in his poetic works. Dean’s Teaching Fellowship Course. Pre 1800 course.
Instructor(s): R. Buckham
Area: Humanities
Writing Intensive.
AS.060.344. The American Renaissance in Technicolor. 3.00 Credits.
The American Renaissance refers to the boom in U.S. literary production between the 1830s and the 1860s that gave us the American writers who have achieved the greatest stature in the popular mind—Emerson, Thoreau, Hawthorne, Melville, Whitman. This work was in large part animated by literary nationalism—by the self-conscious effort to produce a distinctively American literature that could take its rightful place on the world stage. As such, questions about the meaning of American history and the nature of American identity were central to this work both as implicit impetus and explicit theme. Importantly, these questions were being asked during the heyday of Manifest Destiny—of Euro-American westward expansion, which displaced Native peoples and Hispanic settlers and perpetuated the enslavement of African Americans. The goal of this course is to read some of the major works of the period’s canonical Euro-American male writers in conjunction with works by African, Native, Latino, and female American writers in order to gain a fuller picture of literary and cultural history during this formative moment. Texts may include: Ralph Waldo Emerson’s essays and antislavery lectures; the anonymous historical romance of the Aztec conquest, Xicotencatl; William Aпess, A Son of the Forest, Eulogy on King Philip; Frederick Douglass, My Bondage and My Freedom; Henry David Thoreau, Walden, Slavery in Massachusetts, Plea for Captain John Brown; Harriet Beecher Stowe, Uncle Tom’s Cabin; Herman Melville, Hawthorne and His Misses, Benito Cereno, Moby-Dick; Nathaniel Hawthorne, tales and sketches, The Blithedale Romance; Walt Whitman, Leaves of Grass (1855 edition).
Prerequisites: AS.060.107 or English department lecture, or instructor permission.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.345. Mapping Victorian England. 3.00 Credits.
The landscape of England changed dramatically during the course of the nineteenth-century, from the unprecedented expansion of the British Empire and the rapid growth of cities and urban environments, to the increasing psychological investment in more confined spaces like the home. In this course, we’ll explore how Victorian literature “maps” these various spaces and, perhaps more importantly, the connections between them. The bulk of our reading will be novels by authors such as Charles Dickens, Elizabeth Gaskell, George Eliot, Anthony Trollope, Thomas Hardy, and Rudyard Kipling, though we’ll also turn to poems, non-fiction prose, and short theoretical readings to enrich our understanding of how Victorian writers attempted to represent the spatial, social, and economic geography of their nation. In addition to examining the “horizontal” connections drawn by these novels—between, for example, the country and the city, the colonies and the capital, the home and the nation as a whole—we’ll also explore how these novelists draw on intellectual developments like the emerging Darwinian worldview and incorporate what we might call “vertical” mapping to understand how the past shapes the present. Throughout, we’ll pay careful attention to how these writers represent the specificity of place and investigate the influence of environment on character and personal development.
Instructor(s): A. Grener
Area: Humanities
Writing Intensive.

AS.060.346. The American Romance. 3.00 Credits.
Reviewers in the nineteenth century noted that narrative fiction on either side of the Atlantic seemed to be moving in different directions—the social-realist panoramas of Charles Dickens and George Eliot were confronted by the metaphysical puzzle-boxes, allegorical curios, and sentimental interfaces of Edgar Allan Poe, Nathaniel Hawthorne, Herman Melville, Lydia Maria Child, and Harriet Beecher Stowe. In the period, this divergence was often characterized by reference to a generic or modal distinction between the novel—the very name of which advertised its modernity—and the romance, which was associated with medieval literary traditions. British novelists sensibly confined themselves to representing and anatomizing that which was probable in contemporary social reality, whereas American romancers insisted on violating verisimilitude via flights of fancy (e.g., deathless black cats and white whales), whether out of political activism, aestheticist indulgence, or esoteric exploration. The twofold objective of this course is, first and foremost, simply to engross ourselves with a series of compellingly weird narrative fictions by American writers that self-identify as—and self-consciously theorize—modern romance—a reward in itself; and, second, to trace the history of the romance/novel distinction from early nineteenth-century reviews to contemporary criticism, discovering in the process the cultural work this distinction—and its elision—has been made to do. Primary texts may include: Lydia Maria Child, Hobomok; Catharine Maria Sedgwick, Hope Leslie; Edgar Allan Poe, tales, Narrative of Arthur Gordon Pym; Nathaniel Hawthorne, tales, The House of Seven Gables, The Blithedale Romance; Herman Melville, Mardi; Harriet Beecher Stowe, The Minister’s Wooing.
Prerequisites: Pre-req: AS.060.107 or permission of the instructor.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.347. American Bibles. 3.00 Credits.
This course will examine texts drawn from across the Americas—from Mather’s Magnalia Christi Americana to Melville’s Moby-Dick to Euclides da Cunha’s Os Sertões (Rebellion in the Backlands) to Kushner’s Angels in America—that are fundamentally biblical in their inspirations, aspirations, proportions, and allusions. We will consider these texts’ attempts, in the face of globalizing and secularizing forces like Atlantic slavery and German higher criticism, to affirm, undermine, appropriate, and redirect the authority of the ur-canonical text. Recommended Course Background: AS.060.107 or lecture course in English department.
Prerequisites: AS.060.107 or a lecture course in the English department.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.348. Virginia Woolf and Bloomsbury. 3.00 Credits.
An exploration of the achievements and investments of one of the most influential coteries in the history of Britain. In addition to delving into key fictions by Virginia Woolf, we will examine novels by Leonard Woolf and E. M. Forster, art criticism by Roger Fry and Clive Bell, biographical essays by Lytton Strachey, economic writings by John Maynard Keynes, and poetry by T. S. Eliot.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.
AS.060.349. Clint Eastwood, Race, and the American Western. 3.00 Credits.
Drawing from the body of work reflecting the Hollywood gunfighter and outlaw folk-hero Clint Eastwood, the course will investigate American cinematic representations of slavery (and more specifically its absence), the Civil War and racial formation along the United States' southwestern frontier in films produced from the 1950s through the contemporary period. A focus on the cultural icon Clint Eastwood enables a close examination of American cinematic fantasies of the frontier, frontier violence and the desire to escape or erase the tensions of race and slavery that have deeply permeated the American cultural consciousness, particularly the creation of American masculine ideals. The course will also take decided note of the national shift from liberal “Great Society Programs” of the 1960s to the conservative “neoliberal” social and cultural ideals in the 1980s and 1990s. Our purpose is to consider the organization and reformation of hegemonic power by way of the complex morality play the western film evokes, typically considering the interstitial geographies between civilization and savagery, belonging and alienation, and metropolitan and colonial outpost. We will privilege in our discussions the contested frontiers of racial dominion. The curriculum is complicated by several significant points of departure from the traditional category of the Hollywood-based American western: a film to frame the question of colonialism and resistance, as well as examples of black cinematic efforts re-drawing boundaries of the racial frontier. (Are they formed at the Caribbean, the easternmost littoral? The postindustrial city? Do they correspond to the romance of organized crime and its fantasy of empire?)

AS.060.350. Literature by Other Means: Experimental and Conceptual Fiction and Poetry. 3.00 Credits.
This course will introduce students to experimental, conceptual, and constraint-generated literature. In some cases, the texts we will read were created through the application of some particular premise, constraint, or rule-governed system. In other cases, practices of appropriation, creative re-use, or sampling were involved in the generation of textual material (sometimes subjected to editing and transformation, sometimes presented “as is”). What happens to literary meaning, genre identification, and the author/reader contract under these conditions? Can an experiment be evaluated as a success or failure as literature? What’s so “conceptual” about this practice, anyway? And why are the results-often typecast as difficult or resistant to understanding- frequently so funny? In search of answers, we will read widely in experimental and conceptual literature and in the manifestos and critical analyses that surround this work, and we will look at the overlap between experimental and avant-garde literary movements and concurrent processes of “dematerialization” in play within the related domain of the visual arts. Finally, we will consider the importance of digital tools, search engines, and databases in the construction of experimental literature at the present time. Possible authors/texts include Raymond Queneau “Exercises in Style”, Raymond Roussel “How I Wrote Certain of My Books”, Georges Perec “A Void”, Harry Matthews “Oulipo Compendium”, Walter Abish “Alphabetical Africa”, Marjorie Perloff “Unoriginal Genius”, William S. Burroughs “The Cut-Up Method”, Charles Bernstein, “The L=A=N=G=U=A=G=E Book”, Vanessa Place “Notes on Conceptualisms”, Kenneth Goldsmith “The Weather”, Gary Sullivan “The Flarf Files”, Aaron Kunin “The Sore Throat”, Christian Bok “Eunoia”, and David Trinidad and D. A Powell’s “By Myself, An Autobiography”.

Writing Intensive.

AS.060.351. Theory of the Novel. 3.00 Credits.
We all know a novel when we see one, but it’s surprisingly hard to say just what one is. This seminar will introduce the theory of the novel by reading a number of novels along with the works of central thinkers about the novel. We will look at the connection of the rise of the novel form with historical and cultural changes and investigate key stylistic elements. Novelists will likely include Miguel de Cervantes, Johann Wolfgang von Goethe, Jane Austen, Gustave Flaubert, and Virginia Woolf.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.351. Theory of the Novel. 3.00 Credits.
AS.060.352. John Keats' Guide to City Living. 3.00 Credits.
This course will take John Keats' poems and letter as a guide to London in the 1810's; from the anatomy theaters of the hospitals where he trained, to the raucous parties and poetry slams of his radical literary friends; from museums and theaters to brothels and sickrooms. Keats' intensely sensual poems are at once bookish and attuned to his environment: they provide lessons on how to abide in a large urban center. For his writing is intensely urban, even when it ventures far from the gloom of the metropolis. Reading the letters he wrote to his brother on the (then-) frontier in Kentucky, we can find yet another key to how he shaped London. We will look at maps of the city, see where the new housing developments were being constructed as old buildings were torn down, visit the jail where his friend, Leigh Hunt, was incarcerated for ridiculing the Prince Regent, see the theater posters and pamphlets Keats saw, as well as the parks and squares he could not enter. The goal for this course is to learn about Keats' work, but also to try to reconstruct how his city looked and sounded and felt and what, finally, it meant to the poet. Ideally, the course will collectively create a digitized map of Keats' London that serves as well as a guide to his poems.
Prerequisites: Pre-req: AS.060.107
Instructor(s): M. Favret

Writing Intensive.

AS.060.353. World Literature in Theory and Practice. 3.00 Credits.
This course takes stock of how the current hot topic of "world literature" has evolved from Immanuel Wallerstein's work on world-systems theory over the course of the last three decades. We will read work by a wide range of literary critics engaged with the topic of world literature, including Franco Moretti, Pascale Casanova, David Damrosch, Emily Apter, and Alex Beecroft, as well as major "world" novels by Herman Melville, Amitav Ghosh, and Chimamanda Adichie. Students will also be introduced to critical approaches that offer a conceptual alternative to the world literature framework, for example, Edward Said's ideas on worldliness and contrapuntalism, Gaston Bachelard's phenomenology of the home, Fredric Jameson's concept of cognitive mapping, and Eric Hayot's work on literary "world-creation." We will ask just how broadly the field can be defined before it loses its critical cohesion. In other words, does world literature exist?
Instructor(s): J. Jackson

Writing Intensive.

AS.060.354. Marlowe and Shakespeare's History Plays. 3.00 Credits.
The first folio of Shakespeare's works groups his plays into three categories: "Comedies," "Tragedies," and "Histories." This course will consider what a Renaissance history play was. What are the consequences of basing literature on real historical events? How do the ways in which history has been dramatized on stage relate to renaissance understandings of history and to how we understand history today? We will read all ten of the plays classed as Histories in the Folio, along with two other Shakespeare plays based on British historical chronicles (King Lear and Cymbeline) and Christopher Marlowe's Edward II. We will also look at the chronicles and histories that served as sources for the playwrights, and theoretical discussions of the purpose and nature of history and literature from the early modern period. Pre 1800 course
Instructor(s): M. Vinter
Area: Humanities
Writing Intensive.

AS.060.355. Eighteenth Century British Literature. 3.00 Credits.
This course surveys major authors, genres, and literary movements from 1690-1800. Topics to be discussed include the gendered division of labor, ecological consciousness, British imperialism, the rise of capitalism, and the relation between literary and material labor. We will be reading a variety of texts in poetry, prose, drama, and the novel from authors including Alexander Pope, Daniel Defoe, Jonathan Swift, Eliza Haywood, Stephen Duck, Mary Collier, Mary Leaper, Samuel Richardson, Thomas Gray, Oliver Goldsmith, William Wordsworth, Anna Laetitia Barbauld, and William Blake. Texts will be supplemented with historical, philosophical, and theoretical materials where appropriate. A pre-1800 course.
Instructor(s): K. O'Briain
Area: Humanities
Writing Intensive.

AS.060.356. Gordimer and Coetzee: Politics and Form. 3.00 Credits.
A comparative study of major works by the South African Nobel Laureates Nadine Gordimer and J.M. Coetzee. Special attention to critical essays by both writers about each other, as well as about issues of shared historical and literary concern. Topics will include the role of the public intellectual in apartheid-era South Africa, competing scales of literary reception and evaluation (e.g. national, international, and universal), and the relationship between politics, form, and genre.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.357. The Novels of Jane Austen. 3.00 Credits.
An intensive study of Austen's six major novels, read in their literary and historical context.
Instructor(s): J. Kramnick
Area: Humanities
Writing Intensive.

AS.060.358. Prophecy and Enlightenment. 3.00 Credits.
This class considers the relationship between prophecy and enlightenment. These two knowledge regimes, the revelatory and the rational, are often assumed to be opposed, with rationality triumphant over revelation in the seventeenth and eighteenth centuries. In recent years, notably post-9/11, we have seen a resurgence of this view from a variety of perspectives, whether that of the new atheism or that of historians of enlightenment. We will turn to a number of important primary texts associated with major enlightenment thinkers in order to interrogate more closely the opposition of prophecy and enlightenment at the point of its supposed origin. Doing so should help at once to clarify and complicate the important contemporary narrative pitting science against religion and vice versa. Later in the semester, we will turn to a number of twentieth-century thinkers who bring quite different perspectives to the role of revelation in the history of reason. Pre-1800s course.
Instructor(s): W. Miller
Area: Humanities
Writing Intensive.
AS.060.359. Posthumanist Literature. 3.00 Credits.

Much of the attention surrounding posthumanism has centered upon a late-twentieth-century archive of speculative fiction. This 300-level course would take a longer view, tracing a prehistory of literary and critical discourses that challenge the distinction between humanity and its nonhuman others from the late enlightenment to the present day. Students will begin with sections from Jonathan Swift’s Gulliver’s Travels and A Modest Proposal, then progress through texts that link the humanist themes of exploration and conquest to problems of consumption and divergent forms of life, including Herman Melville’s Typee and Thomas M. Disch’s The Genocides. Next they will turn to the link between the bildungsroman, human enhancement, and the concept of bare life. Readings in this section include Neal Stephenson’s The Diamond Age, Philip K. Dick’s Do Androids Dream of Electric Sheep, Franz Kafka’s The Hunger Artist, and Primo Levi’s If This Is a Man. We will then consider the link between monstrosity, hetero-normativity, and sexual abjection. Readings include Mary Shelley’s Frankenstein, James Baldwin’s Another Country, and Margaret Atwood’s Handmaid’s Tale. The course will conclude with two units on posthuman ethics. The first of these, on the concept of singularity, will include J.G. Ballard’s The Drowned World and William Gibson’s Neuromancer. Finally, students will consider what Donna Harraway has termed companion species, with readings to include Franz Kafka’s The Metamorphosis and J.M. Coetzee’s Elizabeth Costello. Critical readings will include selections from Katherine Hayles, How We Became Posthuman; Donna Harraway, “A Cyborg Manifesto”; Friedrich Nietzsche, Human, All too Human; Michel Foucault, The History of Sexuality, vol. I; Giorgio Agamben, The Coming Community and Homo Sacer; Jean Jacques Rousseau, Émile; H.G. Wells, Anticipations and Mankind in the Making; Nick Bostrom, Human Enhancement and Global Catastrophic Risks; Alan Weisman, The World Without Us; Peter Singer, Animal Liberation; J.M. Coetzee, The Lives of Animals; and introductory essays by Andy Miah and Neil Badminton.

Area: Humanities
Writing Intensive.

AS.060.361. Literature, War, Trauma. 3.00 Credits.

With a focus on the post-World War II period, a world redefined by the cataclysmic events of the Holocaust and the atomic bombing of Hiroshima and Nagasaki (as well as the more widespread strategic aerial bombing of civilian targets in Europe and Japan), the course will consider the nexus of literature, war, and trauma across a range of modern works in English, supplemented by some works in translation. What does it mean to live in the shadow of the Holocaust and the ever-present threat of nuclear war? How can annihilation on such a scale be accommodated to historical, theological, and ethical understanding? What is the role of the imagination in addressing such questions? What if the war had had a different outcome? We will investigate the consequences for literature as it attempted to address such questions in fiction, memoir, and commentary. In addition to a range of historical and theoretical readings, we will concentrate on literary works of several kinds: as a point of departure a few primary works by figures such as Primo Levi The Drowned and the Saved and John Hersey Hiroshima; fictional and non-fictional ruminations on the war’s legacy by figures such as Kurt Vonnegut Slaughterhouse Five, D. M. Thomas The White Hotel, Msuji Ibuse Black Rain, and W. G. Sebald On the Natural History of Destruction; counterfactual narratives about the world that might have been, had the Axis powers prevailed, by figures such as Philip K. Dick The Man in the High Castle, Ira Levin The Boys from Brazil, Philip Roth The Plot against America, and Michael Chabon The Yiddish Policeman’s Union; and works in which the impact of catastrophic destruction is absorbed into other cultural arenas by figures such as Toni Morrison Beloved, Don DeLillo White Noise, and J. M. Coetzee Elizabeth Costello. Readings are tentative and may be modified. Requirements: class participation, short writing exercises, and two longer papers.

Writing Intensive.

AS.060.362. Art and the Arab Spring. 3.00 Credits.

Much has been made of the political ramifications of the Arab Spring: the potential move towards democratic representation, the realization of minority and gender rights, the economic liberalization of markets, the jockeying by world powers to assert influence in the region, and the revitalization of dissident movements. This course will turn its attention to the role of artistic representation in the Arab Spring in order to complicate these political discussions. We will explore widely, considering works of prose, poetry, film, music, performance art, and visual art, from photography to graffiti. We will think through how these mediums are used and to what end, whether as evidence of atrocities, as inspiration and mobilization of dissent, as satirical commentary, or to revitalize appreciation for artistic expression. We will also think about the impact of social media on distribution possibilities and implied audience and track how certain art forms invoke and are invoked by liberal or conservative discourses in complex ways.

Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.
AS.060.364. Utopias. 3.00 Credits.
This course examines how writers have imagined perfect, or at least vastly improved, human societies from antiquity through our own day. Topics of particular interest will be the relation between individual liberty and social cohesion in utopian schemes, views on the nature of happiness and justice, and speculations about the ease or arduousness with which utopia might be created or maintained. Authors to be studied may include Plato, Thomas More, Edward Bellamy, William Morris, Charlotte Perkins Gilman, H. G. Wells, E. M. Forster, and Ursula K. LeGuin. Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.365. Literature and Modern Philosophy. 3.00 Credits.
Does literature have moral value? How might we begin to answer such a question? This course will survey major attempts by both writers and philosophers to understand the relation between morality and literature, especially fiction. Course will be taught by incoming professor Andrew Miller. Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.366. Ellison. 3.00 Credits.
After his landmark novel Invisible Man appeared in 1952 and won the National Book Award, Ralph Ellison was one of the most highly regarded and influential American writers. Although his writing—beginning with the powerful short stories and criticism that he published in the 1930s and 40s—was steeped in African American history, literature, music, and folklore, he also thought of himself as part of the great tradition of American, European, and classical literature, from Homer through Joyce. He quickly set to work on a second novel dealing with the assassination of a racist senator during the height of the Civil Rights movement, but he came to the end of his life in 1994 without having completed the novel to his own satisfaction. This massive book, which appeared posthumously in a very abbreviated form as Juneteenth and more recently in the much longer Three Days before the Shooting, reveals the work of a master while at the same time it leaves critics and readers with an exceptional puzzle: What would his final intention have been? Why was he unable to complete the novel? How does it speak to the key issues of African American identity, freedom, and the American ideal that Ellison grappled with all his life? At the same time that he worked on his second novel, Ellison became one of the most prolific and important essayists of the twentieth century, and wrote brilliantly about American race relations from the era of segregation through the twentieth century. Even as he was celebrated by the literary establishment, however, Ellison at times found himself as odds with younger black writers and thinkers who felt that public activism, not just artistic greatness, was required of the African American writer. Using Ellison as a lens through which to see the course of American race relations from slavery to the present, the course will include study of all of Ellison’s major work: the short stories collected in Flying Home; Invisible Man; the essays collected in Shadow and Act and Going to the Territory, as well as others; and Three Days before the Shooting.

AS.060.368. Aesthetic Play in the Contemporary Global Novel. 3.00 Credits.
This seminar will explore the role of aesthetic play within contemporary world literature in order to ask the question: what challenges to global issues such as imperialism, racial and identity politics, gender parity and socioeconomic disparities are being made not only through subject matter, but through novel approaches to form? We will read short stories, novels, graphic novels, and watch films which subvert expectations about the structure of storytelling: these may include works by Mohsin Hamid, Margaret Atwood, China Mielville, Haruki Murakami, J. M. Coetzee, and Marjane Satrapi. We will also read critical scholarship on the subject of world literature like Pascale Casanova’s World Republic of Letters and Aamir R. Mufti’s “Orientalism and the Institution of World Literatures.”
Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

AS.060.370. The Nineteenth Century Novel. 3.00 Credits.
In this course we will read some of the most significant—and enjoyable—of nineteenth-century novels, focusing on the questions they presented for their first readers and present for readers today. Our focus will be on the technical means by which the novelists achieve their effects. How do they convey the thoughts and feelings of their characters, for instance? How do they represent the interactions between their characters within broader social environments? How do these novels represent history? How do they represent different genders? By means of what literary devices do they do all this? Our aims in the course will be to understand the fiction of the period and to see how the devices used by these authors to conceive their psychological, ethical and political worlds continue to inform our conception of our world.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.372. Melville, Poe, Hawthorne. 3.00 Credits.
We will read major fiction by Poe, Melville, and Hawthorne, and consider how conceptions of identity are treated as psychological, ethical, and historical problems in the writings of these authors. We will also be concerned with the formal inventions that accompany these mid-nineteenth century American investigations of personal identity, and with topics such as gothic horror, divinity, and the status of explanation.
Prerequisites: Prereq: AS.060.107 OR one lower level English course.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.373. Literary Theory. 3.00 Credits.
Two great arguments structure literary criticism and theory: what makes something literature, and what makes something good literature? These arguments will surely never end; but to participate in them can be a great pleasure, and it can sharpen your appreciation of literary writing across the ages. This course will introduce you to the long conversation that has come to be called “literary theory,” with the aim of helping you learn to love not only reading literature, but describing it. Our readings will range from Plato and Aristotle to Kant, Hegel, and Schiermercher, on to Marx, Freud, and Nietzsche, and finally to a range of recent thinkers.
Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.
AS.060.374. Border Crossings: Travel Writing and the Journeys of Nonfiction. 3.00 Credits.
The rise of “creative nonfiction”, in tandem with the acceleration of “reality hunger” in recent years, has shifted scholarly attention (and book sales) in the direction of that which is perceived to be real or true rather than merely imagined or fabricated. But how fictional is “fiction”, and through what narrative means is the “real” produced? If nonfiction is a journey that involves the simultaneous opening and occulting of the real, then how does travel writing stitch together its quilts of place and emplacement? These are the kinds of questions we will be asking in this course, based on readings of celebrated contemporary nonfiction writers from across the globe: Haruki Marurkami (Underground: The Tokyo Gas Attack and the Japanese Psyche), Katherine Boo (Behind the Beautiful Forevers: Life, Death, and Hope in a Mumbai Undercity), Bruce Chatwin (The Songlines), Jonny Steinberg (A Man of Good Hope), Paul Theroux (The Great Railway Bazaar), and V.S. Naipual (The Enigma of Arrival).
Only open to English Major/minors and Writing Seminars Majors
Instructor(s): L. de Kock
Area: Humanities
Writing Intensive.

AS.060.375. Literature of the Holocaust. 3.00 Credits.
The course will focus on reactions to, and representations of, the Holocaust in European, Israeli, and American literature. In moving from the initial response of eyewitness testimony, through the emergence of fiction as one means to test the adequacy of historical accounts and memoirs, and on to more recent reflections on the problem of adequately “remembering” the event, we will consider how the Nazi genocide has entered into world consciousness. What does it mean to have an artistic or aesthetic response to such an event? Why has the Holocaust assumed such a significant role in contemporary life that there are entire genres of literature and film devoted to it? We will also look at some more contemporary writers whose work deals indirectly with the after-effects of the Holocaust. Readings may include: Levi, Survival in Auschwitz; Borowsk, This Way for the Gas, Ladies and Gentlemen; Delbo, Auschwitz and After; Kosinski, The Painted Bird; Grossman, See Under: Love; Oizick, The Shawl; Epstein, King of the Jews; Roth, The Plot against America; Appelfeld, Baddenheim 1939; Coetzee, Elizabeth Costello; Phillips, The Nature of Blood. Cross-listed with Jewish Studies.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.376. Staging Church and State in Early Modern England. 3.00 Credits.
Freedom of religion and the separation of church and state are among the fundamental principles of modern western government, and yet they are frequently misunderstood. Why would people believe they have a mandate from God to grant freedom of worship to religious minorities? Why did the state give up its monopoly on religion? What role should religious beliefs play in public life? These all remain live questions in today’s political discourse, but today their complex answers tend to hide behind the ill-defined concept of secularity. This course examines a pivotal moment in the development of modern governance to ask what imaginative writing can tell us about the ways in which the early moderns sought to resolve these tensions between religious belief and participation in diverse civil society. Dean’s Teaching Fellowship. Open Only to English Majors and Minors, and Writing Seminars majors.
Instructor(s): K. Roberts
Area: Humanities
Writing Intensive.

AS.060.377. Re-Writing Democracy in America, 1865-1920. 3.00 Credits.
In his landmark two-volume work Democracy in America (1835, 1840), Alexis de Tocqueville famously argued that the ideal of democratic equality pervaded all aspects of life in America. Despite these claims, it was only after the Civil War, with the Reconstruction Amendments (1865-1870), that the language of equality made its way into the U.S. Constitution. Even as Africans Americans gained the promise of equality before the law by 1870, Jim Crow laws persisted well into the 20th century, while women did not win the long fight for suffrage until 1920. This course will consider how American writers between 1865 and 1920 consciously or unconsciously re-wrote Tocqueville’s analysis of democracy in America to account for the opening up of political equality to once-excluded groups as well as the undemocratic realities that many people experienced in their everyday lives (in the form of discrimination, deepening class divisions, and gender inequality). Reading novels, poems, autobiographies and travel narratives from this era, we will explore the extent to which democratic reform registers in lives of everyday individuals, with an eye for those moments when state-level changes are reflected or, more commonly, come up short in practice.
Instructor(s): J. Sampson
Area: Humanities
Writing Intensive.
AS.060.381. 2500 Years of Tragicomedy. 3.00 Credits.
Spanning an arc from ancient Greek drama to the bleeding edge of contemporary literature, this course gathers together representative examples of a hybrid dramatic mode which has been derided by philosophers and dramatic theorists but beloved by audiences for millennia: tragicomedy. Variously understood as a comic play with dark elements or a dark play with a happy outcome, tragicomedy raises challenging questions about the nature of genre taxonomy, and the slippery relationship between authorial “tone,” artistic intention, and emotional temperament. As such, tragicomodies offer a particularly revealing insight into both the history of drama and philosophical questions about the nature of spectatorial pleasure. Grounding ourselves with a reading of Aristotle’s Poetics and a consideration of Plautus’ “Amphitryon,” we will read a broad swathe of plays divided evenly between a first half which focuses upon the ancient and early modern period and a second half focusing on the last century, possibly including: Euripides “Alcestis”, Christopher Marlowe “The Jew of Malta”, Anonymous, “Arden of Faversham”, William Shakespeare “Hamlet” and “All’s Well That Ends Well”, John Fletcher “The Faithful Shepherdess”, John Dryden “The Maidhen Queen”, Samuel Beckett “Endgame”, Tom Stoppard “Rosencrantz and Guildenstern Are Dead”, Harold Pinter “The Caretaker”, Joe Orton, “The Eppingham Camp”, Young Jean Lee “The Shipment.” Pre-1800 course.

Writing Intensive.

AS.060.382. Jewish American Literature. 3.00 Credits.
A survey of major works, principally novels.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.384. Jane Austen and the Eighteenth-Century Novel. 3.00 Credits.
Although the robust presence of Jane Austen in popular culture attests to the broad historical appeal of her work, her novels are nevertheless deeply concerned with political, philosophical, and aesthetic questions of her own historical moment. In this course, we’ll read Austen in the context of the late eighteenth-century novel in order to understand how she engages with her literary predecessors. We’ll focus in particular on Austen’s innovations in narrative form and technique, innovations that led one of her early critics to claim that she constituted a “new school of fiction.” Readings by Austen will include Northanger Abbey, Sense and Sensibility, and Pride and Prejudice (all of which Austen conceived and began drafting in the 1790s), along with her “juvenilia.” Other readings will include works by Ann Radcliffe, Mary Wollstonecraft, Frances Burney, Charlotte Smith, and Edmund Burke. Pre 1800 course
Instructor(s): A. Grener
Area: Humanities
Writing Intensive.

AS.060.386. Narrative, the Mind, and Human Experience. 3.00 Credits.
This course will explore how narratives operate as vehicles for organizing and communicating human experience. We’ll begin by examining the basic mechanics of narratives — What makes a story, a story? How do stories organize experience into meaningful sequences? — before considering how narratives reflect patterns of human evolution and the development of consciousness. Indeed, our primary interest will be these cognitive elements of narrative; we will consider how narratives relate to the structure of the human brain, as well as their capacity to immerse us in the minds of other individuals, both fictional and real. By the end of the semester, then, you’ll not only have a better understanding of how narratives create meaning (and a robust set of terms and concepts with which to approach them), but also a heightened appreciation for how narratives relate to the architecture of your mind and your daily life. Primary texts include novels by Jane Austen, Raymond Chandler, Ford Madox Ford, Kazuo Ishiguro, and Virginia Woolf.
Instructor(s): A. Grener
Area: Humanities
Writing Intensive.

AS.060.388. Old World/New World Women. 3.00 Credits.
The course considers the transatlantic writing of three women in the early modern period, Anne Bradstreet, Aphra Behn, and Phillis Wheatley. We will consider issues of identity, spatiality, religion, commerce, enforced labor, sexuality, race, and gender, along with literary tradition, formal analysis and poetics. We will read a good deal of these early women writers. Foremost in our mind will be the question of how perceptions of space and time are mediated through the global experiences of early modernity.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.391. Early American Literature. 3.00 Credits.
This course is an introduction to literatures drawn from across the Americas, although primarily the British North American colonies that would eventually become the United States; from first contact in 1492 up through the American wars of independence. Our readings are roughly organized according to chronology and genre. We will think about the adapted and emergent generic forms through which “the New World” was ongoingly invented, including genres like the Indian captivity narrative and the slave narrative that arguably make their debut in world literary history in the Americas during this time frame. We will conclude by attending to the rather late emergence of the novel in American literary history, reading four novels that appeared in the early US national period. The objective of the course is simply to contextualize and analyze a wide array of texts, each of which richly rewards the engaged reader, in order to trace the origins of American literatures. Course texts may include contact narratives (Columbus, Caminha, Smith, Hennepin); conquest narratives (Mather, Las Casas, Poma de Ayala); Indian captivity narratives (Cabeza de Vacca, Rowlandson, Staden); slave narratives (Gronniosaw, Jea, Cuganodjo); revolutionary polemics (Paine, Bolivar); and the earliest American novels: William Hill Brown, The Power of Sympathy; Hannah Webster Foster, The Coquette; Leonora Sansay, Secret History or, the Horrors of Santo Domingo; Charles Brockden Brown, Arthur Mervyn. Fulfills the pre-1800 requirement.

Writing Intensive.
AS.060.394. Class Fictions. 3.00 Credits.
This seminar investigates one of the central concerns of nineteenth-century fiction: social and economic class. Why did raising oneself from humble beginnings and falling into poverty, become such familiar stories? And why are they still so familiar today? We will look at how a number of writers approached the topic of class mobility, each with a unique blend of excitement and anxiety. Authors will likely include Jane Austen, Honoré de Balzac (in translation), Charles Dickens, and William Dean Howells. In order to understand our topic better, we will also look at a selection of theoretical work on the nature of class.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.395. Global Tales of Transformation. 3.00 Credits.
A traveling salesman turns into a giant cockroach, an American adman switches bodies with his wife, a Brazilian philosopher may or may not be reincarnated as his beloved dog, and a British scientist creates half-animal humanoids on a secluded island. These are just a few examples of the fantastical, allegorical, comical, dreamlike, grotesque, and bizarre stories that were produced throughout the world during the modernist period. Modernism has often been associated with social and political change; colonial rule was waning, cosmopolitanism emerging, and new modes of production were affecting social organization. In literature, modernist authors broke from the realist style and turned instead to myths, folktales, and new forms of expression. In this class, we will consider a range of cultural and historical conditions that inform these stories of transformation. Do these stories reveal anxieties about dehumanization in an increasingly high-pressure workplace or do they reveal fantasies about idleness? Are they nostalgic for a local folkloric tradition in an age of cosmopolitanism or are they creating a kind of mythic universalism? How do these character transformations allow for reassessments of identity in terms of gender construction, sexuality, or in terms of human and animal relations? Authors include: Edgar Allan Poe, Nickolai Gogol, Franz Kafka, H. G. Wells, Virginia Woolf, Rebecca West, Machado de Assis, T. S. Eliot, Charlotte Gilman Perkins, Thorne Smith, and James Joyce. Throughout the semester, the primary texts will be supplemented with secondary reading and critical interpretations. Primary Texts: Machado de Assis, "Philosopher or Dog" T. S. Eliot, The Wasteland Charlotte Gilman Perkins, "Herland" Nikolai Gogol, The Nose Franz Kafka, "The Metamorphosis" Ovid, selections from "Metamorphoses" Edgar Allan Poe, selections Thorne Smith, "Turnabout" H. G. Wells, "Island of Dr. Moreau" Rebecca West, "The Return of the Soldier" Virginia Woolf, "Orlando"

Writing Intensive.

AS.060.397. Thomas Pynchon. 3.00 Credits.
Intensive reading of two major Pynchon novels, along with theories of modernity, postmodernity, etc.
Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.

AS.060.398. Obscenity and the Law in 20th-Century Literature. 3.00 Credits.
In order to log on to JHU’s GuestNet you must "agree that your activities on the Guest Network shall not...[among other things] be obscene." But what is obscene? What does the law determine as obscene today, and how has that determination changed over the past century? These questions will lead us to considerations of publicity and privacy, morality and standards of decency. This course will examine artworks and performances in a variety of media that have been publicly accused of indecency or obscenity. We will read legal judgments of obscenity and discuss their implications for figures such as Wilde, Joyce, Miller, Ginsberg, Bruce, Carlin, Prince, 2 Live Crew, and others.

AS.060.502. Independent Study. 0.00 - 3.00 Credits.
Instructor(s): M. Thompson.

AS.060.505. Internship - English. 1.00 Credit.
Instructor(s): D. Mao.

AS.060.506. Internship-English. 0.00 - 3.00 Credits.
Instructor(s): Staff.

AS.060.509. Senior Essay. 3.00 Credits.
The English Department offers qualified majors the option of writing a senior essay. This is to be a one-semester project undertaken in the fall of the senior year, resulting in an essay of 30-35 pages. The senior essay option is open to all students with a cumulative GPA of 3.8 or higher in English Department courses at the end of the fall term of their junior year. Project descriptions (generally of one to two pages) and a preliminary bibliography should be submitted to a prospective advisor selected by the student from the core faculty. All proposals must be received at least two weeks prior to the beginning of registration period during the spring term of the junior year. Students should meet with the prospective advisor to discuss the project in general terms before submitting a formal proposal. The advisor will determine whether the proposed project is feasible and worthwhile. Individual faculty need not direct more than one approved senior essay per academic year. Acceptance of a proposal will therefore depend on faculty availability as well as on the strength of the proposal itself. When completed, the senior essay will be judged and graded by the advisor in consultation with the second reader. The senior essay will not be part of the Department’s honors program, which will continue to be based solely on a cumulative GPA of 3.6 in English Department courses.

Instructor(s): Staff.
**AS.060.606. Renaissance Comedy.**

Why is comedy so easy to enjoy and so hard to think about? Is “the comic” a genre, a mode, an affective state, a social practice, or none of all of the above? What does comedy have to do with the body? What does it have to do with social location? What historical accidents, psychological barriers and cultural taboos must be re-considered in order to address these questions? Starting from classic texts in genre theory and psychoanalysis, this course try to put Aristotle and Freud into dialogue with recent early modern critical scholarship on affect, drama and the body. Possible texts/authors include: Aristotle’s Poetics; Sigmund Freud, Jokes and Their relation to the Unconscious; Rosalie Colie The Resources of Kind; Gail Kern Paster, The Body Embarrassed: Drama and the Disciplines of Shame in Early Modern England; Will Stockton, Playing Dirty: Sexuality and Waste in Early Modern Comedy; Julia Kristeva, Powers of Horror: An Essay on Abjection; Alenka Zupancic, The Odd One In: On Comedy, and others. The historical spine of the course will be a weekly sequence of classical and early modern comic plays by Plautus, Terence, Aristophanes, Peele, Lyly, Shakespeare, Jonson, Beaumont, Wycherley, Etherege, and Behn.

Area: Humanities.

**AS.060.607. Lives and Afterlives of Anti-Humanism.**

This seminar will offer a preliminary history of the 20th-century critique of humanism – a critique that has continued to take new forms, long after we might imagine humanism to have been laid to rest. Beginning with Heidegger and Carl Schmitt, we will spend time with Sartre, Althusser, the phenomenologists, and key post-structuralists, before moving on to the current variety of post- and anti-humanisms in philosophy (object-oriented ontology, speculative realism), and cultural and critical theory (eco-criticism and queer theory). Why has it been important to critique humanism? What is the ongoing appeal of making that critique?

Instructor(s): C. Nealon
Area: Humanities.

**AS.060.608. The Idea of Tradition.**

The idea of tradition – of a body from texts from the past that helps explain the genealogy of the present – is central to literary criticism, and indeed to all of the humanities. But where did we get the idea that the present could be understood best through texts from the past? Can we imagine a humanities without it? This course will look at the development of the idea of tradition in the eighteenth and nineteenth centuries. We will pay particular attention to the connections between the developing ideas of tradition and the changing forms of literary expression in those periods—particularly the developmental novel.Novelist will likely include Goethe, Scott, Austen, Eliot and James. In terms of theory we will pay particular attention to questions of historicity and presentism in historiography, hermeneutics and Marxist theory. Theorist will likely include Vico, Shaftesbury, Dilthey, Lukacs, Heidegger, Adorno, Horkeheimer, Gadamer, Jauss, Kosseleck, and T.S. Eliot.

Writing Intensive.

**AS.060.609. Extreme Criticism.**

“How far can I go?” It is a question (memorably posed by Neil Hertz) of what we might call interpretive tact: what will your readers or listeners accept? How far can you take them with you as you enter into the interpretive possibilities that have come to matter to you, that you believe to be true, meaningful, important, interesting . . . When, eyes slowly unfocusing, do they start drifting away? That most of the critics we read are determinedly tactful is an occasionally dismaying thought. This seminar, by contrast, will engage the issue of interpretive tact by reading critics who might be thought to violate it. I’d like to think about the issue with a collection of interested students. Among the potentially tactless works we might discuss are Stanley Cavell’s essay on King Lear, Laura Kipnis’s Against Love: A Polemic T.J. Clark’s The Sight of Death, Michael Fried’s Flaubert’s Gueuloir, Avita Ronnell’s Telephone Book (or perhaps her less extreme Stupidity), Roland Barthes’ S/Z, Garrett Stewart’s Reading Voices, Franco Moretti’s Distant Reading, Lauren Berlant’s Desire/Love, William Empson’s Seven Types of Ambiguity, Lee Edelman’s No Future, Barbara Johnson’s “Bringing Out D. A. Miller” I’d be open to other suggestions by seminar members.

**AS.060.610. What is Reading?.**

What is reading? The question is not meant metaphorically. “We take for granted,” Mark Taylor writes, “our capacities to invent and interpret, and devote ourselves to exercising those capacities and publishing the results.” Yet, he continues, “It is the capacities themselves that need explaining. Reading is not giving a reading . . . Giving readings is important and could be done better if we understood reading. . . . The most amazing phenomenon our profession confronts, and the one for which we have the least explanation, is that a reader can make sense of a text, and that there are certain regularities across the individual senses made of a given text” (Taylor 19). This seminar aims to bring us close to understanding the “most amazing phenomenon our profession confronts,” drawing on recent work in cognitive psychology, history of the book, disability studies, and theories of media new and old. We will consider debates about modes of reading as different as paleography, Braille, and scansion, and reckon with the possibility of non-human reading. I hope to invite in faculty from Cognitive Science and Informatics, Disabilities Studies, Classics and Library Science to explain what they mean when they talk about reading. But the final goal of the seminar is to help us identify the importance of literary studies in that conversation. To what extent does the literary object teach us about reading?

Instructor(s): M. Favret
Area: Humanities
Writing Intensive.
AS.060.611. Early/Modern/Violence.
This course looks at the intertwining of the categories of secular and religious in the English literature of violence in the early modern period. Literary representations of, and meditations upon, violence will be considered in Spenser, Nashe, Marlowe, Milton and Behn. Early modern thinkers will include humanists, theologians and philosophers (Augustine, Ficino, Calvin, Hobbes, Spinoza, Locke). We will consider such topics as: How religion is (or is not) a ‘transhistorical’ category; how the Enlightenment’s critique of religion was founded on the experience of the ‘wars of religion’, the creation of religious Others; the connection between religion and the rise of the modern state; the war-peace distinction; the friend-enemy distinction; how the sacredness of human life is understood; the links between violence and humanitarianism (indeed, what is the human?); torture; ‘violence’ as a transhistorical category; the pairing of violence to justice. There will be engagement with contemporary thought of Arendt, Derrida, Benjamin, Zizek, Anidjar, Asad, Tilly, Virilio, Schmidt, Girard, Scarry, Taylor and others.
Instructor(s): S. Achinstein
Area: Humanities.

AS.060.612. Poetry and Poetics After The Linguistic Turn.
This course is a survey of recent critical work on English-language poetry, mostly North American. Much of the work is by younger scholars. I have chosen to highlight this recent body of writing because I think that, taken together, it signals a shift away from what since the 1980s had been the dominant model for "reading" poetry, which was under the sign of "Theory." Readings will include work by Jasper Bernes, Joel Nickels, Nadia Nurhussein, Margaret Ronda, Daniel Tiffany, and others.
Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.

AS.060.613. American Movement.
This seminar will examine representations of people in motion in U.S. writing from 1900 to the present. Migration, international and intranational, will be central to our study, but we’ll also consider other forms of travel, transits of authorial and readerly attention, the policing and pleasures of vagrancy, and predicaments of stasis in both primary texts and critical/theoretical work around mobility. Our syllabus is still in process, but authors and directors studied may include Henry James, Anzia Yezierska, Claude McKay, Gertrude Stein, Muriel Rukeyser, John Steinbeck, John Ford, Simone de Beauvoir, Victor Villaseñor, Juliana Spahr, and Jayne Anne Phillips.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

The field now known as “global Anglophone literature” has emerged from a complicated and rapidly advancing disciplinary lineage. A host of past and present recodings – including postcolonial, Commonwealth, Third World, global, transnational, world, and the Global South – provide a record of the wider profession’s anxieties in relation to non-Western literary traditions. This course prepares graduate students to be able to articulate some of the subtle differences in approach that this nexus of closely related terms may obscure, from the heyday of postcolonial theory in the 1980s and 90s to contemporary subfields like Indian Ocean studies. In addition to key critical texts by theorists including Edward Said, Gayatri Spivak, Franco Moretti, Peter Hallward, and Emily Apter, students will be introduced to some outstanding recent methodologies and critiques from the adjacent body of work on comparative literature.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.615. The Literary and the Secular.
Embedded in many theses of secularization is an implicit process of tropologization—the sign that secularization is underway is precisely when sacred forms and contents begin to circulate as figures unmoored from their original devotional contexts and thereby become subject to everything from blasphemous parody to heterodox elaboration to blasé immanentization, in a word, to the whims of the literary imagination. This seminar will examine theories of secularization that reflect and reflect upon this tacit linkage of the secular and the literary and also trace crucial developments in the literary and intellectual history of Atlantic Romanticism (with a special focus on the distinctive genre of the American romance) that might offer alternative views of undeniable transformations perhaps ineffectively referred to the rubric of “secularization.” Secondary texts may include T.E. Hulme, “Romanticism and Classicism”; Carl Schmitt, Political Theology; Hans Blumenberg, The Legitimacy of the Modern Age; M.H. Abrams, Natural Supernaturalism; Charles Taylor, A Secular Age, Roberto Calasso, Literature and the Gods; Michael Kaufmann, “The Religious, the Secular, and Literary Studies”; Colin Jager, Unquiet Things: Secularism in the Romantic Age. Primary texts may include selected poetry of William Blake, Percy Shelley, Friedrich Hölderlin, and others; canonical theoretical definitions of the “romantic” from the Schlegels, Coleridge, etc.; Joseph Smith, The Book of Mormon; Edgar Allan Poe, Arthur Gordon Pym; Nathaniel Hawthorne, prefaces, selected tales, The House of Seven Gables, The Marble Faun; Herman Melville, Mardi; Harriet Beecher Stowe, Dred; Martin Delany, Blake or, the Huts of America.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.616. Milton.
A seminar covering the career of John Milton, including all his major poetry and much of his prose. There will be attention to the history of printing, publication and concepts of reading and writing, as well as to current issues and topics within early modern studies that bear on Milton (e.g. materialism, secularization, ‘surface’ reading, political theology, quantitative vs hermeneutic methods, actor-network theory). As such, the course will also be an introduction to various methods in early modern studies.
Instructor(s): M. Thompson; S. Achinstein
Area: Humanities.
AS.060.618. Modernism and Authenticity.
Could modernism as we know it have emerged absent anxiety about what it means really to live, really to feel, really to think? We will explore this question through a range of texts—long and short, fictional and non-fictional, poetic and in prose—by authors such as Friedrich Nietzsche, Oscar Wilde, Gabriele D’Annunzio, W. B. Yeats, T. E. Hulme, E. M. Forster, Mina Loy, T. S. Eliot, F. T. Marinetti, Gertrude Stein, Virginia Woolf, William Carlos Williams, Nella Larsen, Wallace Thurman, Walter Benjamin, Theodor Adorno, and Lionel Trilling. Topics to be considered will include decadent imposture, the attenuation of experience, enchanted and disenchanted violence, and technology-driven alienation.
Instructor(s): D. Mao
Area: Humanities.

AS.060.619. The Time is Out of Joint: Shakespearean Temporalities.
This course is designed to serve a double purpose: first, we shall read and analyze a substantial body of Shakespearean drama and poetry for its resources as a means for thinking about time, temporality, and historical change. Concurrently, we shall read and respond to debates in recent early modern literary scholarship about secularity, modernity and the problem of “presentism” as a critical orientation towards the past. If a previous critical generation enlisted Shakespeare into service as an exemplar of an incipient modernity based upon a tacit assumption of a secular bias, has that assumption been complicated by recent evidence and fresh readings? How might we rethink the relationship between religious discourse and academic periodization? In the process of answering these questions, it is hoped that a plurality of other Shakespearean, whether medieval, untimely, recusant Catholic, crypto-atheist, queer, anarchistic, or “presentist”- might emerge. In addition to Shakespeare, possible critical and secondary authors include Augustine, Henri Bergson, Johannes Fabian, Jan Kott, Madhavi Menon, Elizabeth Freeman, Kathleen Davis, Agnes Heller, Paul Kottman, Eric Mallin, Hugh Grady and Stanley Cavell.
Instructor(s): A. Daniel
Area: Humanities.

This course offers a critical and historical introduction to the Frankfurt School.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.621. The Cultures of the Sonnet in the English Renaissance.
This is a course on lyric theory in the Renaissance and as such is a good introduction to early modern literary study. We will take up the early modern form of the sonnet as a test case for the interaction between vernacularity and globalization. We will consider early modern topics including “invention,” “imitation,” and rhetoric, as well as explore formal concerns that are intertwined with political, social, cultural and economic experiences of early modernity. Along with the consideration of the emergence of literatures in new languages and nationalist differentiation, we will also consider mechanization (whether in print or literary trope) that produced both early modern literature and political life in an international system. We will consider such topics as sequence; modes of address; vernacularity and linguistic nationalism; the themes of love v. empire; the social role of the sonnet; the nature and materiality of writing; patronage and circulation; the question of private, occasional, and public poetry; the place of sonnets in manuscript collections; the histories of books; poetic subjectivity and objective thought; and we will also read a good many sonnets, largely in English, through close attention to language, media and transmission histories. Some contemporary literary theory on the sonnet will be introduced, as well as sonnets in European languages other than English, depending on the students’ interests and proclivities. Students will be expected to work in the manuscript and print collections of the Bodleian library to prepare a class report on their chosen topics. The class puts the sonnet in relation to other forms in Renaissance literature and thus should serve as a good survey of the period and its issues.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.622. Perspective.
Perspective, or point of view, is a seemingly inescapable term in critical work on fiction. In this course we will study this concept as it has been developed in literary studies and, contrastively, in art history and film studies. We'll enter two overlapping areas of study, one theoretical, one critical. The first concerns the concept of perspective as developed in literary theory, art theory, and film theory; the second concerns a set of fictions, paintings, and films. Our aims will be to develop a more adequate understanding of the concept and to assess the implications of our current usage of it.
Instructor(s): A. Miller
Area: Humanities.

AS.060.623. Cross-Period Literary Study.
This seminar will be an experiment in training graduate students to develop an awareness of scholarship outside their own historical period, so as to re-think contemporary questions of periodization and modernity, as well as genre and form. The course will be organized around literary-critical readings from recent scholarship from the classical period to the 21st century, and around visits from scholars, especially junior scholars, working in those periods.
Instructor(s): C. Nealon
Area: Humanities.
AS.060.624. Romanticism and the Ends of Affect.
This seminar will consider both what affect studies have learned from Romanticism and the limits –practical, ethical, intellectual—of reading Romantic poetry within the framework that has been constructed by affect studies over the past two decades. It will provide a general survey of scholarship on affect, of criticism attending to the self-consciously affecting literary experiments of the age, and to primary works by a select number of romantic writers, most probably Wordsworth and Coleridge’s Lyrical ballads, Joanna Baillie’s Plays and the letters and poems of John Keats.
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.629. Poetry and Poetics after The 'Linguistic Turn'.
This seminar will canvas a few of the many developments in English-language poetry, and in poetic theory, that have emerged since the heyday of post-structuralism, on the one hand, and language-driven poetry, on the other. The readings will include recent critical work by Joel Nickels, Ruth Jennison, Oren Izenberg, Maria Damon, and others; the poetry will be a combination of recent volumes by contemporary writers, and individual poems.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.630. Mapping Frederick Douglass’s Escape: An Historic Maryland Odyssey.
This course provides an in-depth portrait of the historic Marylander Frederick Douglass, born near Hillsboro in Talbot County, Maryland around 1818, and who successfully escaped slavery in Baltimore in September 1838. We will read Douglass’s three autobiographies and other writings, as well as two biographies of Douglass to understand his importance in American life over time. The course includes three “living classroom” components. At the Douglass/Meyers Museum at Fells Point, Baltimore, students will learn 19th century techniques to build a sailing such as Douglass learned when he worked in the shipyards. Students will tour the Anacostia, DC Frederick Douglass Museum. The course culminates with a sailing trip from Baltimore’s Fells Point to historic St. Michael's, kayaking along the Tuckahoe and Miles Rivers, and overnight camping on the grounds of a former plantation on Maryland's Eastern Shore.
Instructor(s): L. Jackson
Area: Humanities.

AS.060.632. Sovereignty, Community, and 17th Century Literature.
Can we think sovereignty and community together? How might the vertical axis of sovereignty and the horizontal axis of community complicate or multiply each other? What conversations are possible when we attempt to reconcile these two contrary formations, and how does the early modern theory and practice of absolutism inflect contemporary theory? In this course we will read texts from across the seventeenth century (from Shakespeare and Ford to Milton, Dryden and Behn) in which the person of the monarch, sovereign, leader or judge and the larger structural institution of sovereignty slip out of alignment with each other. We will then read early modern political texts about sovereign power and the constitution of state power and monopolical authority from Jean Bodin, James I, and Thomas Hobbes. This early modern sequence will be placed in dialogue with contemporary theorists of sovereignty and/or community; potential authors include Schmitt, Nancy, Agamben, Esposito, Derrida, Blanchot, and De Landa.
Instructor(s): A. Daniel
Area: Humanities.

This course is about the poetics of the lens and the mirror. From Wordsworth to Hardy, from Anna Barbauld to ‘Michael Field’ (the pseudonym of two women), poetry is haunted by the virtual image. Lens-made technologies, developed in the late Enlightenment, from the ‘high’ science of the telescope and microscope to the popular culture of the magic lantern and optical toys, created for a mass public for the first time a newly mobile screened image that could be thrown from one surface to another. This was a non-mimetic image made with the aid of the glass lens by light out of light. From this arose the screen practices of the phantasmagoria, diorama, panorama, kaleidoscope, and a host of optical toys exploiting visual ambiguities. The course explores the immanent presence of these in Romantic and Victorian poetry, studying poems and concurrently the documents of visual and optical theory generated by the new technologies. It includes work by male and female poets. We will consider how poets explored the philosophical implications of the poetics of the lens and a new epistemology. Technologies of the lens and mirror had repercussions across aesthetics and politics.
Instructor(s): I. Armstrong
Area: Humanities.

AS.060.642. Readings in Aesthetics.
This course offers a general survey of twentieth-century aesthetics, with particular emphasis on (but not limited to) the Interbellum (1919-1939) and its immediate aftermath. Some of the authors under consideration are: Heidegger; Levinas; Sartre; Blanchot; Bataille; Merleau-Ponty; Benjamin; Adorno; and Gadamer.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.644. The Trouble with Modernity.
This course will offer some genealogies and critiques of the various modernity-theses that provide us ready-to-hand (and perhaps too easy) periodizations in the humanities. Readings will include Hans Blumenberg, Martin Heidegger, Marshall Berman, Perry Anderson, Hans-Robert Jauss, Larry Norman, Charles Taylor, and Ellen Meiksins Wood.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.646. Transnational American Studies.
This seminar will consider the transnational turn in American studies in particular and the humanities more generally. What, if anything, is at stake in this turn? What sort of a corrective does it mean to offer? What political fantasies drive it? Half of the course will be dedicated to reconstructing the genealogy of the turn and will involve reading primarily theoretical and critical texts. Texts may include: Wai-Chee Dimock, Through Other Continents; Laura Doyle, Towards a Philosophy of Transnationalism, Eric Lott, Anti-American Studies; Donald Pease, The New American Exceptionalism. The other half will be dedicated to reading American literary texts that have invited or might invite transnationalist readings. Texts may include: Joel Barlow, The Vision of Columbus; Herman Melville, Moby-Dick; Martin Delany, Blake, or the Huts of America; Leslie Marmon Silko, Almanac of the Dead; Karen Tei Yamashita, Tropic of Orange. We will ask to what extent these texts are already doing something like transnational American studies and how the longstanding figuration of American nationality (not just the US but other American nations) as a species of transnationality (a nation of nations) might cause us to reconsider the cultural work of recent transnational American studies.
Instructor(s): J. Hickman
Area: Humanities.
This course serves as an advanced introduction to the texts, issues and criticism surrounding African-American literature. In it, we will read works from the field’s major genres: the slave narrative; the novel; poetry; autobiography; the essay; and literary criticism. Authors under consideration will include: Wheatley; Du Bois; Douglass; Jacobs; Hurston; Hughes; Wright; Baldwin; Morrison.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.651. Form and Matter.
This course takes a look at revived interest in formalism and materialism in critical theory as it bears on the literature of the long eighteenth century: topics include formalism and close reading from the new criticism to the present, object oriented ontologies and eighteenth-century materialisms, cognitive criticism and phenomenology.
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.652. Narrative and the Unconscious before Freud.
TBD
Instructor(s): J. Rosenthal.

AS.060.656. Literature and Philosophy, Locke to Wordsworth.
This is a class on epistemology, aesthetics, and literary form in eighteenth-century British writing. We will focus particularly on perception and look at how poetry, fiction, and the visual arts recruit and account for phenomenal experience or consider material and natural objects. We’ll ask (for example) what happens when the empirical psychology of consciousness or the categories of the sublime, beautiful, and picturesque take narrative or poetic form. Authors include Locke, Addison, Thomson, Hume, Burke, Sterne, Smith, Gilpin, Cowper, and Wordsworth, read alongside recent criticism and theory, including new work in phenomenology and the philosophy of mind.
Instructor(s): J. Kramnick
Area: Humanities.

AS.060.662. Edwards, Emerson, Thoreau.
We shall examine what “divinity,” “nature,” “Being in general” and “personal identity” differently mean in the writings of Jonathan Edwards, Ralph Waldo Emerson and Henry Thoreau (the emphasis will be on the two nineteenth-century American writers); how “the intuitively beheld and immediately felt” (what Edwards called “experiential religion”) are contrastively understood in the writings of the three; and to what end these literary and philosophical writings marginalize persons— and even evacuate them—from their scrutiny. We shall also examine features of the prose (Edwards’s “rhetoric of sensation”; Emerson’s contradictions; Thoreau’s infatuation with particulars), and the genres in which the three authors write: the sermon, the treatise, the journal entry, the lecture, and the essay. Finally, we shall consider Adorno’s proposition in “The Essay as Form” that discontinuity is essential to the essay, that “the essay rebels against the doctrine, deeply rooted since Plato, that what is transient and ephemeral is unworthy of philosophy.”
Instructor(s): S. Cameron
Area: Humanities.

AS.060.665. Whitman and Dickinson.
An examination of the formal, conceptual, and philosophical innovations in the work of the two major nineteenth-century American poets. We’ll consider the premises behind Whitman’s poetry of wholes (nothing left out) and Dickinson’s poetry of fragments. How does Whitman reconcile the need for formal universals with the emotional attachment to substantive particulars? How does Dickinson find a language for the off-the-map quality of private experience?
Instructor(s): D. Mao
Area: Humanities.

AS.060.663. Sacred Spaces and the Novel, 1853-1926.
This course offers both a survey of late nineteenth- and early twentieth-century prose fiction of Britain and its empire and an examination of recent scholarship on literature’s relation to religion and the geographies of modernity. We’ll begin with three Victorian novels inhabiting the convergence between historical imagination and religious inquiry (Charles Kingsley, George Eliot, Walter Pater), move on to three turn-of-the-century narratives in which the momentum of the quest confronts sacred implacability (Olive Schreiner, Joseph Conrad, Rudyard Kipling), and conclude with three novels of the 1920s propelled by pagan ecstasy (E. M. Forster, D. H. Lawrence, Sylvia Townsend Warner). Primary readings will be accompanied by critical and theoretical texts from György Lukács, René Girard, Fredric Jameson, David Harvey, Leela Gandhi, and others.
Instructor(s): S. Cameron
Area: Humanities.
AS.060.673. Migrant Modernism.
Responding to literary scholarship’s continuing concern with the exile, the refugee, the cosmopolitan, and the networks and flows of modernity, this seminar examines the migrant origins and later migrations of English-language modernism. Readings in Ezra Pound, T. S. Eliot, Gertrude Stein, Mike Gold, Claude McKay, Jean Rhys, George Lamming and other writers will be complemented by relevant critical and theoretical texts.
Instructor(s): D. Mao
Area: Humanities.

AS.060.676. Facts and Fiction.
We will examine the vexed place of facts in literature and literary criticism. What are the historical and ideological preconditions for focusing on the study of people that never existed, and events that never occurred? And how did literary criticism privilege an analysis of meaning of works or literary moments, as opposed to verifiable, and reproducible facts? What does all of this tell us about the recent rise of quantitative literary analysis, and the strong resistance it has encountered? This discussion will include an examination of how different disciplines define notions like fact, argument, and evidence—in order to better understand our own discipline's principles. In addition to a selection of eighteenth- and nineteenth-century novels yet to be determined, readings will include Émile Zola, Martin Heidegger, Wolfgang Iser, Hans-Robert Jauss, Hans-Georg Gadamer, Bertolt Brecht, Georg Lukács, Fredric Jameson, Theodor Adorno, Karl Popper, Mary Poovey and Franco Moretti.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.678. Melville, Poe, Hawthorne.
A reading of the major fiction of Poe, Melville, and Hawthorne with an emphasis on Melville.
Instructor(s): S. Cameron.

This seminar will offer an in-depth examination of the theory and practice of the nineteenth-century realist novel in three traditions: American, British, and French. Our aim will be to understand the central theories and controversies surrounding realism, as well as to interrogate the centrality of realism to novel theory and narrative theory. Authors will likely include Jane Austen, Charles Dickens, George Eliot, Honoré de Balzac, Gustave Flaubert, Frank Norris, and William Dean Howells. Theorists and critics will likely include Erich Auerbach, M. M. Bakhtin, Roland Barthes, Leo Bersani, Bertolt Brecht, Richard Chase, René Girard, Howells, Roman Jakobson, Henry James, Fredric Jameson, Harry Levin, G. H. Lewes, Georg Lukács, Boris Tomashevsky, Ian Watt, and Émile Zola
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.682. The 21st Century University.
This seminar will focus on the changing contours of the American university in an era of economic instability and crisis. With a look back at the formative relationship between monopoly capitalism and the university in the 19th century, we will investigate the effect on the university of the unraveling of American economic power, with attention to the rise of administrative power and the loss of faculty governance, to the pressures of financialization, and to the contradictory situation into which the university is placed by student activism that calls its founding premises into question. We will also ask what intellectual life looks like under conditions of adjudicitation and de-politicization. Reading will include selections from Gerald Graff, Professing English, Christopher Newfield’s Ivy and Industry and Unmaking The Public University, Benjamin Ginberg’s The Fall of The Faculty, Stefano Harney’s and Fred Moten’s Undercommons, and [the x’s] The University Against Itself, as well as material produced by student and faculty activists in the university struggles of the last 5 to 10 years.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.692. The Enlightenment, Aesthetics and Race.
This course examines the philosophical interplay between Enlightenment aesthetics and the construction of the concept of race. We will read texts in aesthetics and on human difference by Rousseau, Voltaire, Condorcet, Kant, Herder, Jefferson, Burke, Hume and others, in an attempt to see the points at which reflections on art and notions of human biological hierarchy intersect. Particular attention will be paid to the idea of the sublime as it pertains to early anthropological thought.

Instructor(s): A. Daniel.

Cross Listed Courses

History of Science Technology
AS.140.674. Science and Medicine in Early Modern Atlantic World Culture.
How were changes in scientific and medical ideas reflected in cultural products of the early modern Atlantic world? We will study these ideas as they appeared in literary genres such as poetry, utopias, natural histories and travel narratives. Likewise, we will examine the visual culture of the Atlantic space for clues about changing conceptions about the natural world. Our expedition will encompass Anglophone, French and Hispanic regions, and will pay careful attention to hybrid cultural products that reflect the interaction between indigenous cultures and the (changing) European understanding of the natural world.
Instructor(s): M. Portuondo.
Jewish Studies Program
AS.193.304. Everyday Voices of the Holocaust: Popular Jewish Poetic Expression in the Ghettos and Camps. 3.00 Credits.
The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of multi-lingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multi-cultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed. Emphasis will be put on the differences and similarities between Eastern and Western European Jewry.
Instructor(s): M. Trinh
Area: Social and Behavioral Sciences.

German Romance Languages Literatures
AS.211.475. Inside the Writer’s Laboratory. 3.00 Credits.
How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the laboratory of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.211.479. Dante’s Journey through the Afterlife. 3.00 Credits.
Dante’s Divine Comedy presents a complete picture of the medieval world-view in all its aspects: physical (the structure of the cosmos), historical (the major actors from Adam to Dante himself) and moral (a complete system of right and wrong). Dante shows how the Christian religion portrayed itself, other religions, the nature of God, humans, angels and devils, and human society. We will explore these topics both from the viewpoint of Dante’s own time, and in terms of its relevance to our own societal and cultural concerns.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.212.205. Winter Is Coming: Writing and Rewriting French Dark Ages. 3.00 Credits.
This course will not aim at drawing the exhaustive literary landscape of French Middle Ages, neither will it be a Comparative Literature or History class. It may be considered a gateway to French Medieval literature, given that the Modern Fantasy has obviously improved the last decades, the latter being built as a rewriting of Medieval themes and Western European folklore. Looking at texts originally written in Old French, including prose and poetry, but also at the French Medieval iconography, we will try to understand the old roots of the Modern and so popular (but sacrificing) Fantasy Literature. Basic French will be required.
Instructor(s): M. Alhinho
Area: Humanities.

AS.212.478. Guillaume de Machaut: exploring medieval authorship in the digital age. 3.00 Credits.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. The course aims to give students a thorough grounding in Machaut’s literary and musical works, while also introducing them to digital tools to view and analyze original illustrated musical manuscripts of his work. Critical analysis of Machaut’s work will be assessed not only through more traditional essay writing, but also through the creation of a multimedia digital edition of a section of his oeuvre using Omeka exhibition software. The course is designed so that no prior knowledge of musical notation or medieval French is necessary.
Instructor(s): T. Rose-Steel
Area: Humanities
Writing Intensive.

AS.213.318. The Making of Modern Gender. 3.00 Credits.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.321. Bodies and Pleasures. 3.00 Credits.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women’s writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Amim, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.
AS.213.660. Discourses of Dislocation.
Dislocation—travel, migration, exile, diaspora, immigration—is a preeminent symptom of the modern condition; as Jacques Derrida has suggested, it is one way of characterizing how language itself comes into being. To what extent does the relationship of various modes of mobility serve as a prerequisite for understanding modernity and literary modernism, and to what extent can one understand commonalities among these itinerant discourses? This seminar will consider several varieties of dislocated discourse (the picaresque, the pseudo-autobiography, the travelogue, as well as narratives of immigration, displacement, war and demobilization, and exile) in search of a means to discuss or consider all of them critically. Writers to be considered will include Sigmund Freud, Robert Walser, Yosef Haim Brenner, Walter Benjamin, Theodor Adorno, Jacques Derrida, Irmgard Keun, Israel Rabon, Joseph Roth, Flannery O’Connor, Yoel Hoffmann, Anton Shammas, and Salman Rushdie. All readings and discussions available in English. Undergraduates may register with instructor approval.

Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.666. "To be continued"- Seriality in Literature and Other Media.
Taught in German. By ending with the words "(To be continued)" (["ist fortzusetzen")], Goethe’s Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. – although invented earlier – becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine “Die Gartenlaube”, Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, “The Perils of Pauline” (serial, 1914), “Copycat” (Jon Amiel, 1995), “Twin Peaks” and current US-American TV series.

Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

AS.213.725. Proto-, Modern, and Post-: Locating the –ism in Modernism.
All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “postmodernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is postmodernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-Bloom, Henry Dumas, Moyshe Kulbak, Machado de Assis, Mendele Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.

Instructor(s): M. Caplan.
Taught in German. The course analyzes the performative on the basis of the very field that John L. Austin’s speech act theory excludes: literature. What challenges Austin’s speech act theory indeed opens up the question of the performative towards iterability and theatricality and thus calls for a theory of the performative as a methodological category of literary criticism. According to Shoshana Felman’s readings of Austin, the performative act can be accentuated as an act of the “speaking body” in which the body is conceived of not as a means of linguistic expression but rather as a spiller of the act of utterance into the statement. How then is the corporeality or materiality of writing asserted in acts of narrating and reading? The course will examine theories of the performative from the perspective of literature and literary criticism as well as analyze literary speech acts (promises, pacts, etc.) in detail. Readings will include: Austin, Derrida, Felman, Freud, Nietzsche, de Man, Hamacher, Goethe, Bünchner, Kafka, Henry James, Thomas Mann etc.
Instructor(s): E. Strowick
Area: Humanities.

AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music Through the Ages. 3.00 Credits.
How do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? A variety of readings and musical examples will be discussed, including genres as diverse as medieval songs, madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. The seminar will include field trips to the Baltimore Museum of Art, the Meyerhoff Symphony Hall, the Peabody Institute, and the Evergreen Museum and Library. Students will also have the opportunity to attend a live HD broadcast of Mozart’s Don Giovanni from the Metropolitan Opera. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities.

AS.214.333. Shakespeare on the Opera Stage. 3.00 Credits.
From Rossini’s Otello to Cole Porter's Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.341. The Book of Nature, the Nature of Books: The Origins of Literary Ecology. 3.00 Credits.
This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Instructor(s): T. Tower
Area: Humanities
Writing Intensive.
Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.640. Film Theory.
This class deals with film theory in its history and its current trends. We will examine structuralist, feminist, Marxist, psycho-analytic, Deleuzian, and other theoretical approaches to understanding and interpreting the cinematic medium. We will will look at several different film samples from European film to Latin American Film, auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist to class during the semester.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.753. Women Writing in Latin America: Prose and Poetry by Sor Juana, Mistral, Lisoba, Pizarnik, Castellanos, and other poets. 3.00 Credits.
The first objective of the course is to train students in close reading and analysis of literary texts. The second objective is to read prose and poetry by some of the canonical texts in the Latin American tradition written by women. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.214.756. A multidisciplinary Introduction to the Study of Latin America. 3.00 Credits.
The course brings together knowledges drawn from the fields of geography, history, anthropology, literature and art in order to provide access to the complexity of Latin America. Students may opt do the reading in the original Spanish or Portuguese and also write in either language.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.452. Che Guevara and Magical Realism. 3.00 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish
Instructor(s): E. Gonzalez
Area: Humanities.
AS.215.489. Poetry in Latin America: A multilingual survey from 1200 to the present. 3.00 Credits.
The course focuses on a presentation of the multiple traditions of poetry writing that make up the Latin American tradition from the Mexico poets at about 1200 to current writers in Latin America. Original poetry in Nahuatl, Maya-Quiche, Spanish and Portuguese will be read alongside translations into English. Attention will be paid to translation theory.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

Departing from O’Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero, Humboldt, Dussel and Alzandua will conform part of the readings. Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

This course will focus on the art of writing poetry, the art of reading poetry and the poetics of each of the poets whose work is the textual matter of the course.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez

The course engages close readings of Borges critical essays and some of his fiction in order to establish the points of interpellation that Post-modern theory takes from or shares with Borges’s meditation on the problem of writing.
Instructor(s): S. Castro-Klaren.

AS.215.777. The Invention of Fiction.
Rather than understand fiction as a constant in human history, this course will consider it a historically specific form of cultural expression. We will examine and compare theories of the fictional from an array of historical moments in order to better understand what fiction is, how it differs from premodern notions of history and poetry, and how it both informs and depends on modern notions of knowledge and subjective agency.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

Humanities Center
AS.300.111. Shakespeare and his ‘Goddess’. 3.00 Credits.
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’ is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets.
In this course we will trace that tradition from the perspective of Shakespeare and his contemporaries, finishing the semester with several plays, including ‘The Taming of the Shrew,’ that further illustrate and problematize Shakespeare’s ‘goddess’ reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scève and Les Dames des Roches; and the later English reflections on the sonnet tradition by Sir Philip Sidney, Shakespeare, and Sidney’s niece, Lady Mary Wroth. All works will be read in translation. Freshmen only.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.113. Freshmen Seminar: Drama and Gender in Shakespeare’s England. 3.00 Credits.
In this seminar we will read male and female authored plays and discuss how they reflect contemporary social expectations in Tudor and Stuart England. Authors include William Shakespeare; Mary Sidney, Countess of Pembroke; Christopher Marlowe; Elizabeth Cary; Ben Jonson; and Mary Sidney, Lady Wroth.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.211. Great Poems of the Americas. 3.00 Credits.
This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot’s The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire’s Notebook of a Return to the Native Land, Vicente Huidobro’s playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of “the Americas” as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we’ll examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.
Instructor(s): R. Galvin
Area: Humanities
**AS.300.283. Nineteenth-Century Science Fiction: Ecology, Utopia, and Catastrophe. 3.00 Credits.**

This course will introduce students to some of the key texts of science fiction as the genre emerged during the nineteenth century. We will consider the intellectual contexts for the form's development in Britain, France, and the United States, as well as its emerging narrative conventions. In particular, we will consider how early sci-fi writers used non-realistic modes to dramatize problems and discoveries were at once real and yet hard to fathom within the parameters of everyday cognition: deep geological time, alternative social arrangements, post-human landscapes. Texts may include H.G. Wells’ The Time Machine, Charlotte Perkins Gilman’s Herland, Samuel Butler’s Erewhon, Edward Bulwer Lytton’s The Coming Race, William Morris’ News from Nowhere, and Jules Verne’s 20,000 Leagues Under the Sea.

Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.

**AS.300.302. Making Modern Poetry. 3.00 Credits.**

Making Modern Poetry will explore the intersection and conversation between literature, art history, and graphic design by examining the rapid global development of poetry, art, and print from 1890 to 1930. We will read canonical modernist poets such as T.S. Eliot and Ezra Pound as well as those less familiar, like Mina Loy and César Moro, considering texts comparatively across national borders and through their relations to other arts. All readings will be in English.

Instructor(s): B. Gillespie
Area: Humanities
Writing Intensive.

**AS.300.330. Trauma in Theory, Film, and Fiction. 3.00 Credits.**

An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (The Emigrants), Lanzmann (Shoah), Spiegelman (In the Shadow of No Towers), McCarthy (Remainder), and others.

Instructor(s): M. Fried
Area: Humanities, Social and Behavioral Sciences.

**AS.300.335. Victorian Literature as World Literature. 3.00 Credits.**

What does it mean to read literature in a global context? How are literary texts that we think of as products of distinct national cultures plugged into larger global systems – even if they seem unaware of it? In this course we'll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker's Dracula (1897) and Charles Dickens's Great Expectations (1861). We will retrace how these books exercised cultural influence beyond the borders of Great Britain; how networks of trade, tourism, and imperial power brought authors from different cultures into contact with one another; and how Victorian texts have become a part of our culture in unexpected ways. Other primary texts may include Arthur Conan Doyle’s The Sign of Four (1890), the poetry of Romesh Chunder Dutt, and first-hand accounts of Oscar Wilde’s 1882 American lecture tour; critical readings will cover postcolonial theory, media theory, and histories of colonialism and urbanization.

Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.

**AS.300.346. Forms of Moral Community: The Contemporary World Novel. 3.00 Credits.**

Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, Beauvoir and Barthes on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it means to acknowledge another person’s humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community? Cross listed with English.

Instructor(s): Y. Ong
Area: Humanities.

**AS.300.363. Reading Judith Shakespeare: poetry and drama by women writers in Elizabethan England (ca 1558-1650). 3.00 Credits.**

Virginia Woolf's account of the thwarted career of Shakespeare's hypothetical sister, Judith (in A Room of One's Own) frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lanyer, Mary Wroth, and others. Students will create fictional biographies of “Judith Shakespeare” and her literary accomplishments. Cross listed with English, Theater Arts, Writing Seminars, and WGS.

Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

**AS.300.371. The Modernist Novel: James, Woolf, and Joyce. 3.00 Credits.**

The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century – Henry James, Virginia Woolf, and James Joyce – who explored and exploded narrative techniques for depicting what Woolf called the “luminous halo” of life. Selected works include: The Beast in the Jungle, The Portrait of a Lady, Jacob’s Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.

Instructor(s): Y. Ong
Area: Humanities.
AS.300.415. Law of the Cannibal: Trans-American Poetics. 3.00 Credits.
In this seminar on 20th-c. poetry of the Americas, we will explore the relations between land, language, and identity. Our point of departure, informed by de Andrade’s “Cannibal Manifesto,” will be the idea that all literary texts form a body upon which writers may feast when they compose new works. Devouring, plundering, and appropriating will be central concepts for our seminar. We’ll debate the politics of literary transculturation (hybridity/mestizaje/métissage), and discuss diasporic and multilingual U.S. American poetry (Louisiana Creole poetry, Nuyorican Poets Café, etc.). We will also investigate issues of authorship and originality; constraint, sampling, and parody; and poetic hoaxes and frauds. Readings may include theoretical texts from Édouard Glissant, Ángel Rama, Néstor García Canclini, and Roberto Schwarz, as well as Deleuze, Foucault, Kristeva, and Barthes. Poetry may be drawn from Caribbean writers Césaire, Senghor, Walcott, Brathwaite, Martí, Palés Matos; Brazilians Haroldo and Augusto de Campos; and North Americans Langston Hughes, Claude McKay, Myung-Mi Kim, Kenneth Goldsmith, Susan Howe, and Christian Bök.
Instructor(s): R. Galvin
Area: Humanities
Writing Intensive.

Interdepartmental
AS.360.133. Freshman Seminar: Great Books at Hopkins. 3.00 Credits.
Freshman Seminar: Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University’s rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2016 include Homer, Plato, Boccaccio, Diderot, Shelley, Nietzsche, Nabokov, Douglass, and Woolf.
Instructor(s): A. Eakin Moss; E. Russo; R. Bett; W. Stephens
Area: Humanities
Writing Intensive.

Program in Latin American Studies
AS.361.316. Caribbean Writing in Shakespeare, V. S. Naipaul, and Alejo Carpentier. 3.00 Credits.
Readings and polemics concerned with Shakespeare’s play The Tempest (1610-1611) and its postcolonial afterlives; V. S. Naipaul’s novel A House for Mr. Biswas (1961); and Alejo Carpentier’s El siglo de las luces (1962). The socio historical and political contexts of each work and authorship will be considered in depth in terms of dominant notions of writing in current critical theory. Cross-listed with GRLL, English, and Writing Seminars.
Instructor(s): E. Gonzalez
Area: Humanities, Social and Behavioral Sciences.

Study of Women, Gender, Sexuality
AS.363.302. Queer Identity?. 3.00 Credits.
What does queer mean? And who gets to say? This course examines tensions, ambiguities, and contradictions that have emerged in popular, political, and theoretical discourses over the past 25 years.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

AS.363.326. Capitalism and Gender. 3.00 Credits.
This course explores a range of critical work relating capitalism to gender, sex, and sexuality: from theoretical accounts of witchcraft, marriage, and prostitution at the birth of capitalist social relations, to classic feminist debates around housework and reproduction, to contemporary thought on affect, finance, and the global dimensions of women’s labor. As a centerpiece to the course we will read sections from Capital, interrogating the place of gender in Marx’s text while developing a grasp of its arguments and influence.
Instructor(s): C. Westcott
Area: Humanities
Writing Intensive.

Program in Museums and Society
AS.389.343. Edgar Allan Poe and His Afterlives. 3.00 Credits.
What did people actually read in the nineteenth century? What can we learn from their books and magazines? In this class, we read nineteenth-century English and American literary works and examine nineteenth-century literary objects from the collection of the George Peabody Library, to better understand the cultural and material environments within which literary works circulated. Featured writers likely to include Edgar Allan Poe, Charles Dickens, Harriet Beecher Stowe, Emily Dickinson, Mark Twain, Stephen Crane. Several field trips to the Peabody Library throughout the semester.
Instructor(s): G. Dean
Area: Humanities
Writing Intensive.

AS.389.355. Literary Archive in the Nineteenth-Century Library. 3.00 Credits.
This course invites students to grapple with the theory and practice of building literary archives in 19th- and 20th-century American culture. For the final project students will work collaboratively to build a digital archive of selected materials from the JHU rare book and manuscript collections. Meets in Special Collections. Cross-listed with English. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities
Writing Intensive.

AS.389.359. Literary Archive. 3.00 Credits.
Focusing on late 19th and early 20th c American literature, course examines representations of display within different literary genres and track how display simultaneously shapes print culture and social concerns of the period. Course culminates in the creation of a student-curated digital exhibit using archival and rare book materials to contextualize the work of the journalist, poet and fiction writer Stephen Crane. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.

AS German Romance Languages Literatures Courses

AS.210.101. French Elements I. 4.00 Credits.
Provides a multi-faceted approach to teaching language and culture to the novice French student. The first semester emphasizes listening and speaking, while laying the foundation in grammar structures, reading, and writing. This course is designed for true beginners: Students with any previous background must take the placement test (http://www.advising.jhu.edu/placement_french.php) and receive below 30 (or below 200 on Webcapse). Must complete both semesters successfully in order to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis.
Instructor(s): C. Guillemaud.

AS.210.102. French Elements II. 4.00 Credits.
The second semester of this intensive course for beginners provides students with the tools to read a play (Antigone by Jean Anouilh), to polish a written autobiography, and to develop their oral skills. A variety of cultural material help students acquire grammatical structures and expand their vocabulary. May not be taken on a Satisfactory/Unsatisfactory basis. Prerequisites: AS.210.101 or AS.210.103. New students must take the placement test (http://www.advising.jhu.edu/placement_french.php) and contact the instructor: cguelle1@jhu.edu.
Instructor(s): C. Guillemaud.

AS.210.103. Learner Managed French Elements I. 3.00 Credits.
This beginner course is specifically designed for students who have had some exposure to French. They must take the mandatory placement test: http://www.advising.jhu.edu/placement_french.php, and receive between 30 and 49. They will cover the first semester of French Elements at a pace suited for false beginners with major online components to supplement class instruction. Must complete the year with 210.102 or 210.104 to obtain credit. May not be taken on a Satisfactory/Unsatisfactory basis.
Instructor(s): B. Anderson.

AS.210.104. Learner Managed French Elements II. 3.00 Credits.
Continuation of the refresher course AS.210.103, offered for three credits and letter grade. Recommended for self-motivated students who have some knowledge of French and wish to continue their review of the language intensively. Major online component supplements in-class instruction.
Prerequisites: AS.210.101 OR AS.210.103 or appropriate test score
Instructor(s): B. Anderson.

AS.210.111. Spanish Elements I. 4.00 Credits.
This introductory Spanish language course is a continuation of the content covered in Spanish Elements I. On completion of this course, the students will have further developed the communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Food, Sports, Shopping, Travel, and Health. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements II prepares the students for Intermediate Spanish. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after 4th class session. Prerequisite: AS.210.111 or appropriate placement exam score.
Instructor(s): M. Tracy.

AS.210.112. Spanish Elements II. 4.00 Credits.
This introductory Spanish language course is a continuation of the content covered in Spanish Elements I. On completion of this course, the students will have further developed the communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Food, Sports, Shopping, Travel, and Health. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements II prepares the students for Intermediate Spanish. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after 4th class session. Prerequisite: AS.210.111 or appropriate placement exam score.
Instructor(s): M. Tracy.

AS.210.150. Program Abroad: Preliminary Portuguese. 3.00 Credits.
Summer Abroad Program. First semester college-level Portuguese. Students will develop basic listening, speaking, reading and writing skills. Some cultural readings are included. This course is intended for program participants with little or no prior Portuguese language instruction. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.151. Italian Elements I. 4.00 Credits.
This is a four-credit course, and Italian Elements II (AS.210.152) must be completed in the Spring 2014 to receive credit. The aim of the course is to provide students with basic listening, reading, writing, speaking and interactional skills in the language. All classes are conducted in Italian; oral participation is strongly encouraged from the beginning. Students wishing to retain credits for Italian Elements I must complete Italian Elements II with a passing grade. No Satisfactory/Unsatisfactory option.
Instructor(s): Staff.

AS.210.152. Italian Elements II. 4.00 Credits.
Course helps students develop basic listening, reading, writing, speaking, and interactional skills in Italian. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.151 or Placement Exam Part 1.
Instructor(s): Staff.

AS.210.161. German Elements I. 3.00 Credits.
Four skills introduction to German language and culture. Develops proficiency in speaking, writing, reading, and listening skills through the use of basic texts, multi-media, and communicative language activities. Online tools required. Both semesters must be completed with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. Tuesday section is a mandatory hour; choose your section based on the MWF time. Conflicts with Tuesday hour can be resolved after start of semester. Language Program Director: Deborah Mifflin. Students wishing to retain credits for German Elements I must complete German Elements II with a passing grade.
Instructor(s): D. Mifflin.
AS.210.162. German Elements II. 4.00 Credits.
Continuation to the introductory German language and culture with a development of reading, speaking, writing & listening through the use of basic texts and communicative activities. The culture of the German-speaking countries is also incorporated into the curriculum. May not be taken on a Satisfactory/Unsatisfactory basis. Choose your section based on MWF schedule. Tuesday hour is mandatory but flexible and conflicts with Tuesday hour can be resolved after the start of the semester.
Prerequisites: AS.210.161 or appropriate score on placement exam.
Instructor(s): Staff.

AS.210.163. Elementary Yiddish I. 3.00 Credits.
Year-long course. Includes the four language skills—reading, writing, listening, and speaking—and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Students wishing to retain credits for Yiddish Elements I must complete Yiddish Elements II with a passing grade.
Instructor(s): B. Caplan.

AS.210.164. Elementary Yiddish II. 3.00 Credits.
Year-long course that includes the four language skills—reading, writing, listening, and speaking—and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.171. Accelerated Italian Elements I for Advanced Spanish Speakers. 4.00 Credits.
Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students completing both semesters with a grade of A- or higher will be able to place into Advanced Italian I (AS.210.351)
Instructor(s): A. Zannirato
Area: Humanities.

AS.210.177. Portuguese Elements. 4.00 Credits.
This one-year course introduces students to the basic skills in reading, writing, and speaking the language. Emphasis is placed on oral communication with extensive training in written and listening skills. Class participation is encouraged from the very beginning. All classes are conducted in Portuguese. Students must complete both semesters with passing grades to receive credit. May not be taken on a Satisfactory / Unsatisfactory basis. No previous knowledge of Portuguese is required.
Instructor(s): Staff.

AS.210.178. Portuguese Elements II. 4.00 Credits.
This course expands students knowledge of the basic language skills: reading, writing, listening, speaking. It uses a multifaceted approach to immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa. The focus of the course is on oral communication with, however, extensive training in grammar. The course is conducted entirely in Portuguese. Lab work required. Students must complete both semesters with passing grades to receive credit.
Prerequisites: AS.210.177 or equivalent score on placement test.
Instructor(s): Staff.

AS.210.201. Intermediate French I. 3.00 Credits.
This course develops skills in speaking, listening comprehension, reading, and writing. Systematic review of language structures with strong focus on oral communication and acquisition of vocabulary; extensive practice in writing and speaking; readings and films from French-speaking countries. Recommended Course Background: AS.210.102 or AS.210.104 or score between 65 and 89 on Placement test I.
Prerequisites: Students who have taken AS.210.203 (High Intermediate French) are ineligible to register for AS.210.201
Instructor(s): S. Roos
Area: Humanities.

Focus on oral communication; develops skills in oral and written expression, listening comprehension, and reading, with extensive study of films and readings from French-speaking countries. Online component via Blackboard. Continuation of AS.210.201. Recommended course background: AS.210.201 or AS.210.203.
Instructor(s): Staff
Area: Humanities.

AS.210.208. Intermediate French II Through Acting. 3.00 Credits.
This 5-week intensive course will cover the material of Intermediate French II. Through examining excerpts of popular French theater plays (by Camus, Sartre, Feydeau, Ionesco, and others), this class proposes to 1) improve French speaking and writing skills (pronunciation, intonation, vocabulary, syntax, argumentative reasoning, creative writing) 2) understand the linguistic nuances and socio-cultural practices expressed in the texts 3) learn the basic tools of acting (body language, vocal projection, physical expressivity, emotional expression, stage direction, improvisation, etc.). The course will include watching filmed representations of plays, as well as a performance at the end of the term. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based exercises.
Prerequisites: AS.210.201 OR AS.210.205 or appropriate placement.
Instructor(s): K. Haklin
Area: Humanities.
AS.210.209. The Sounds of French. 3.00 Credits.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of word games (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. May be taken concurrently with AS.210.205 or AS.210.305.
Instructor(s): Staff
Area: Humanities.

This 5-week intensive course will cover the material of Intermediate French I with an emphasis on listening comprehension and speaking: an attractive selection of classic and contemporary French movies (Les Intouchables, Manon des Sources, La Vie en rose, Sugar Cane Alley, among others) will enhance students' acquisition of the language and will deepen their understanding of French and francophone cultures. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based grammar followed by group discussion on the movies. Creative role-play activities will develop students' fluency.
Prerequisites: AS.210.102 or appropriate placement; placement exam
link available at grll.jhu.edu
Instructor(s): C. Guillemard
Area: Humanities.

AS.210.211. Intermediate Spanish I. 3.00 Credits.
Intermediate Spanish I is a comprehensive study of Spanish designed for students who have attained a mid-intermediate level in the language. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish I will prepare students for the next level of Spanish (Advanced Spanish I). There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th
Prerequisites: AS.210.211 or appropriate placement exam score.
Instructor(s): Staff
Area: Humanities.

AS.210.212. Intermediate Spanish II. 3.00 Credits.
Intermediate Spanish II is a comprehensive study of Spanish designed for students who have attained a mid-intermediate level in the language or who have completed Spanish 212. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish II will prepare students for the next level of Spanish (Advanced Spanish I). There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th
Prerequisites: AS.210.212 or appropriate placement exam score.
Instructor(s): Staff
Area: Humanities.

AS.210.250. Program Abroad: Objective Portuguese - Level II. 3.00 Credits.
Summer Abroad Program. Third semester college-level Portuguese. Students develop basic listening, speaking, reading and writing skills. Cultural readings included. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.177 & 210.178. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azêredo Cerqueira
Writing Intensive.

AS.210.251. Intermediate Italian I. 3.00 Credits.
Taught in Italian. Course continues building on the four essential skills for communication presented in Italian Elements courses (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken Satisfactory/Unsatisfactory.
Prerequisites: AS.210.152 or placement exam
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.210.252. Intermediate Italian II. 3.50 Credits.
Taught in Italian. Course continues building on the four essential skills for communication presented in Intermediate Italian I (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken Satisfactory/Unsatisfactory.
Prerequisites: AS.210.251 or appropriate placement exam scores (Parts I-II).
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.210.261. Intermediate German I. 3.00 Credits.
Taught in German. This course continues the same four-skills approach (speaking, writing, reading, and listening) from the first-year sequence, introducing and practicing more advanced topics and structures. Expansion and extension through topical readings and discussion and multi-media materials. Online tools required. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.162 or placement by exam.
Instructor(s): H. Wheeler
Area: Humanities.
**AS.210.262. Intermediate German II. 3.00 Credits.**
Taught in German. This course is designed to continue the four skills (reading, writing, speaking and listening) approach to learning German. Readings and discussions are topically based and include fairy tales, poems, art and film, as well as readings on contemporary themes such as Germany’s green movement. Students will also review and deepen their understanding of the grammatical concepts of German.
**Prerequisites:** AS.210.261 or placement exam.
Instructor(s): H. Wheeler
Area: Humanities.

**AS.210.263. Intermediate Yiddish I. 3.00 Credits.**
This course will focus on understanding the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Emphasis will be placed on reading literary texts and historical documents. These primary sources will be used as a springboard for work on the other language skills: writing, listening, and speaking. Recommended Course Background: AS.210.164 or equivalent, or two years of German and permission of instructor.
Instructor(s): B. Caplan
Area: Humanities.

**AS.210.266. German Conversation. 1.00 Credit.**
This course is designed for intermediate and above students who wish to improve their conversational and oral presentational language skills. The syllabus aims to provide useful, relevant language and necessary discourse structures to hold conversations and presentations on varied topics of an everyday, as well as academic nature. Students will practice German to build confidence, develop fluency, and improve pronunciation and accuracy. Short texts, audio and films will provide the basis for discussion. Students’ fields of study and interests will be incorporated into the syllabus and tasks will be matched to the ability level of the students enrolled. Recommended Course Background: AS.210.262 or two years of college German or equivalent. May be taken concurrently with other courses in German. May be taken Pass/Fail. Not for major or minor credit.
Instructor(s): Staff.

**AS.210.277. Intermediate/ Advanced Portuguese. 3.00 Credits.**
More advanced training in the skills of the language with emphasis on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. All classes are conducted in Portuguese. Extensive language lab is required. May not be taken on a Satisfactory/Unsatisfactory basis.
**Prerequisites:** AS.210.178 or instructor approval.
Instructor(s): V. Rodrigues
Area: Humanities.

**AS.210.278. Intermed/Adv Portuguese. 3.00 Credits.**
This course is conducted entirely in Portuguese. Emphasis is placed on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. Lab work required.
**Prerequisites:** Prerequisite: AS.210.177 AND AS.210.178 or placement test.
Instructor(s): Staff
Area: Humanities.

**AS.210.288. Portuguese: Conversation through Film & Music. 3.00 Credits.**
This course is designed for highly motivated undergraduate and graduate students who want to SPEAK Portuguese. Conversation sessions provide intensive work on communication skills through discussion on issues raised in films, news media & music. Grammar will be reviewed as needed outside of class with tutors or TA, freeing class time for more communicative activities. May not be taken on a Satisfactory / Unsatisfactory basis. Recommended Course Background: one semester of Portuguese (AS.210.177), or Placement test.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

**AS.210.301. Advanced French I: Achieving Accuracy. 3.00 Credits.**
Students in AS.210.301 will focus primarily on written expression, learning to ‘decipher’ classic and contemporary French texts, in order to expand their vocabulary and communicate their ideas in writing with clarity and accuracy. (A primary focus on oral expression is provided in AS.210.302; the two advanced-level courses may be taken in either order.) Language Program Director: Kristin Cook-Gailloud
Instructor(s): Staff
Area: Humanities
Writing Intensive.

**AS.210.302. Advanced French II: Reaching Fluency. 3.00 Credits.**
Students in 210.302 will focus primarily on oral expression through individual and group work on contemporary media (music, film, current events) in order to expand their vocabulary and become fluent in conversation across social-cultural contexts. (A primary focus on written expression is provided in 210.301; the two advanced-level courses may be taken in either order.)
Instructor(s): A. Wuensch; K. Cook-Gailloud
Area: Humanities
Writing Intensive.

**AS.210.306. Medical French. 3.00 Credits.**
This interactive course is designed to provide students with specific linguistic tools used in medical and public health fields, as well as a comprehensive understanding of health care systems in the French and francophone world. Through a wide range of media (newspaper articles, scenes from TV series, excerpts of historical and literary texts) and group discussions, we will focus on topics such as physical and mental health, consultation and diagnosis, hospitalization, specialized fields (epidemiology, neurology, psychiatry, etc.) and deontology.
**Prerequisites:** Prereg: AS.210.201 OR AS.210.202 or equivalent or permission (kacg@jhu.edu)
Instructor(s): K. Cook-Gailloud
Area: Humanities

**AS.210.309. The Sounds of French. 3.00 Credits.**
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of word games (abbreviations, acronyms, and verlang). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. Recommended Course Background: AS.340.101-AS.340.102 or equivalent; AS.210.301 (may be taken concurrently).
Instructor(s): B. Anderson
Area: Humanities.
AS.210.311. Advanced Spanish I. 3.00 Credits.
This course is a comprehensive study of the Spanish language focused on the continuing development of students' communicative abilities and their knowledge of Hispanic cultures. Students will expand their use of basic structures of Spanish with a special emphasis on more difficult grammatical and vocabulary aspects, and further improve both their oral and written skills. Students will sharpen their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component with class participation and three exams. Upon successful completion of this course, students will have acquired extended complex language tools that facilitate proficiency in Spanish and its use in various professional contexts. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after the third class session.
Prerequisites: AS.210.212 or appropriate placement exam score.
Instructor(s): Staff
Area: Humanities.

AS.210.312. Advanced Spanish II. 3.00 Credits.
This course is thorough review of the Spanish language focused on the development of students' communicative abilities and their knowledge of Hispanic cultures. Students will both expand their knowledge of the basic structures of Spanish, with special emphasis on more difficult grammatical and vocabulary aspects, and further improve on oral and written skills. Students will increase their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired more complex language tools to become proficient in Spanish and its use in various professional contexts. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 (Advanced Spanish) or appropriate placement exam score.
Instructor(s): Staff
Area: Humanities.

AS.210.313. Medical Spanish. 3.00 Credits.
Medical Spanish is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in medicine and health-related fields in Spanish-speaking environments. The student will be able to participate in conversations on topics such as contrasting health systems, body structures, disorders and conditions, consulting your doctor, physical and mental health, first-aid, hospitalization and surgery on completion of this course. In completing the course's final project students will apply, synthesize, and reflect on what has been learned in the class by creating a professional dossier individualized to their professional interests. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Prerequisites: 210.311 (Advanced Spanish I) or appropriate placement exam score
Instructor(s): Staff
Area: Humanities.

AS.210.314. Spanish for International Commerce. 3.00 Credits.
Spanish for international business is an overview of business topics in an international Spanish-speaking context with an emphasis on deep review of grammar and vocabulary acquisition. On completion of this course the student will have developed the ability to read and critically discuss business and government relations in Latin America and will have examine entrepreneurship, finance, marketing, business ethics, human resources and commerce in the Spanish speaking world. In completing the course's final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own professional interests. Concepts learned in this course will be directly applicable to careers linked to international relations and will apply to various careers in business. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Language Program Director: Loreto Sanchez-Serrano
Prerequisites: AS.210.311 or appropriate S-Cape score
Instructor(s): A. Hubbard
Area: Humanities.

AS.210.315. Spanish for International Relations. 3.00 Credits.
Spanish for international relations is an advanced examination of grammar and an analysis of international relations' topics in Spanish. By completion of this course the student will have developed the ability to read, critically discuss and demonstrate mastery of political and socio-economic issues in Spanish-speaking environments. Potential topics include a survey of the professions in international relations, NGOs in Latin America, intellectual property, cultural diplomacy, remesas, regional coalitions and treaties, and the environment. Class presentations and final projects will allow students to apply, synthesize, and reflect on what has been learned in the class by participating in a global simulation that will include a written exercise individualized to their professional interests. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session.
Prerequisites: AS.210.311 or appropriate placement exam score.
Instructor(s): Staff
Area: Humanities.

AS.210.316. Conversational Spanish. 3.00 Credits.
Conversational Spanish surveys high-interest themes, discusses short films by contemporary Hispanic filmmakers and offers a thorough review of grammar. The student will be able to participate in conversations on topics such as personality traits, social media, political power, art and lifestyles on completion of this course. Conversational skills mastered during the course apply to all careers interconnected by Spanish. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 (Advanced Spanish I) or appropriate placement exam score.
Instructor(s): Staff
Area: Humanities.
AS.210.317. Adv Spanish Composition. 3.00 Credits.
This third-year course is a hands-on and process-oriented introduction to discussion and compositional analysis. On completion of this course, students will have acquired skills related to various types of compositions that might be expected to write in academic settings and in real-life formats such as film reviews, letters to the editor, cover letters, etc. The course also focuses on refinement of grammar and vocabulary use. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.
Prerequisites: AS.210.312 or appropriate placement exam score.
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.

AS.210.319. ¡Salsa! The Afro-Antillean song. 3.00 Credits.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instills vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. In completing the course's final project students will apply, synthesize, and reflect on what they have learned in the class by creating a professional dossier individualized to their own personal musical interests. On completion of the course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session. Co-listed with AS.211.319
Prerequisites: AS.210.311 or appropriate placement exam score.
Instructor(s): M. Ramos
Area: Humanities.

AS.210.350. Program Abroad: Objective Portuguese - Level III. 3.00 Credits.
Summer Abroad Program. Fifth semester college-level Portuguese. Students further improve conversation and comprehension proficiency. Develop reading and writing skills through literary analysis and grammar review. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.277 & 210.278. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.351. Advanced Italian I. 3.00 Credits.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons, interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.352 or appropriate placement exam scores (Parts I, II and III).
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.210.352. Advanced Italian II. 3.00 Credits.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons, interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.351 or appropriate placement exam scores (Parts I, II and III).
Instructor(s): Staff
Area: Humanities

AS.210.353. Advanced Italian III. 3.00 Credits.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons, interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.351 or appropriate placement exam scores (Parts I, II and III).
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.210.361. Advanced German I: Cultural Topics of the Modern German-speaking World. 3.00 Credits.
Taught in German. Topically, this course focuses on defining moments in cultural history in German speaking countries in the 2nd half of the 20th century. Films, texts and other media provide a basis for discussing events in post-war Germany from 1945 to 1989. A review and expansion of advanced grammatical concepts and vocabulary underlies the course. Focus on improving expression in writing and speaking. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.262 or placement exam.
Instructor(s): D. Mifflin
Area: Humanities
Writing Intensive.

AS.210.362. Advanced German II: Contemporary Issues in the German Speaking World. 3.00 Credits.
Taught in German. Topically, this course focuses on contemporary issues such as national identity, multiculturalism and the lingering social consequences of major 20th century historical events. Readings include literary and journalistic texts, as well as radio broadcasts, internet sites, music and film. Students read a full-length novel. Emphasis is placed on improving mastery of German grammar, development of self-editing skills and practice in spoken German for academic use. Introduction/Review of advanced grammar.
Prerequisites: AS.210.361 or equivalent score on placement test.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.210.363. Business German. 3.00 Credits.
Taught in German. Course is designed to familiarize students with the vocabulary and standards for doing business in Germany. Taking a cultural approach, students read texts and engage in discussion that elucidate the works of business, commerce & industry in Germany, the world’s third largest economy. Emphasis is placed on vocabulary expansion and writing as it relates to business.
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362.
Area: Humanities.
AS.210.365. German for Science and Engineering. 3.00 Credits.
Taught in German. This course is designed to provide language training in German tailored to students of science & engineering. Germany has long been a world leader in engineering, most notably in chemical and mechanical engineering. Over the past decades, Germany also has taken a lead in environmental sciences and information technology. In addition, Germany is now becoming an increasingly attractive place to pursue degrees in the technical fields. This course will provide practice and expansion in all language skill areas: analysis of texts, hands-on-activities, preparation of presentations, and discussion of topics. Specific areas of interest to the course members will be taken into consideration for the selection of materials. [Does not replace 210.362 as prerequisite for upper level courses or as major requirement.]
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362 OR EQUIVALENT OR PLACEMENT EXAM
Instructor(s): Staff
Area: Humanities.

AS.210.367. Advanced Yiddish. 3.00 Credits.
This course will provide students who have completed at least two years of Yiddish with the opportunity to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.368. Advanced Yiddish II. 3.00 Credits.
Continuation of Advanced Yiddish I (AS.210.367). Students will continue to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Prerequisites: AS.210.367
Instructor(s): B. Caplan
Area: Humanities.

AS.210.369. Yiddish Texts I. 3.00 Credits.
This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing). Recommended Course Background: Yiddish Texts I or permission of the instructor.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.370. Yiddish Texts II. 3.00 Credits.
Continuation of Yiddish Texts I. This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing). Recommended Course Background: Yiddish Texts I or permission of the instructor.
Instructor(s): B. Caplan
Area: Humanities.

AS.210.371. From the yidishe gas to the Yiddish Farm: Yiddish Identity and Yiddish Community. 3.00 Credits.
In premodern Ashkenaz, the vernacular Yiddish was an important factor maintaining a distinct Jewish communal identity. With the advent of modernity, and the abandoning of Yiddish by some Jews as their daily language, the choice to speak Yiddish and to use it as a vehicle of modern cultural production became a distinct strand in the web of new Jewish identities. In this course, students will develop a sociolinguistic understanding both of the place of Yiddish in premodern Jewish society, and ways in which the language was -- and is -- seen as essential to living a Jewish life in the modern world. Since this is an advanced language course, readings, discussion and written work will be in Yiddish. Grammar will be reviewed as necessary, according to the needs of the students.
Instructor(s): B. Caplan
Area: Humanities, Social and Behavioral Sciences.

AS.210.375. Avant-garde movements: The MODERNISM in Portuguese speaking countries. 3.00 Credits.
This course surveys the avant-garde movements in Portuguese speaking countries, giving special attention to Portugal and Brazil. In the first half of the past century, Brazilian and Portuguese writers started a movement that later was considered as a revolution in the literary world. Analysis and discussion of the movement, on both sides of the Atlantic, will offer the opportunity to contemplate authors including, but not limited to Fernando Pessoa, Almada Negreiros, Sá-Carneiro, Branquinho da Fonseca, Gaspar Simões, Casais Monteiro, José Régio, and on the Brazilian side Mario de Andrade, Oswald de Andrade, Manuel Bandeira, Menotti del Picchia, and much later, Graciliano Ramos, Rachel de Queiroz, José Lins do Rego and obviously Jorge Amado. It explores the impact the Lusophone Modernism had in other avant-garde movements. Readings in Portuguese; the class is taught in Portuguese. THERE IS NO FINAL EXAM. May not be taken on a Satisfactory / Unsatisfactory basis. Prereq: Advanced Portuguese and Literature I (AS.210.391) or Placement test.
Instructor(s): Staff.

AS.210.391. Advanced Portuguese Language & Literature I. 3.00 Credits.
This third-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. All classes are conducted in Portuguese. Permission required
Prerequisites: AS.210.278 or placement test.
Instructor(s): V. Rodrigues
Area: Humanities
Writing Intensive.

AS.210.392. Advanced Portuguese: Language and Literature II. 3.00 Credits.
This course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read several works by major Brazilian, Portuguese, and/or Afro-Portuguese writers, followed by intensive writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. The course is conducted entirely in Portuguese. No satisfactory/unsatisfactory. Pre-requisites: 210.391 or placement test.
Prerequisites: AS.210.391 or equivalent score on placement test.
Instructor(s): Staff
Area: Humanities
Writing Intensive.
AS.210.394. Portuguese for the professions. 3.00 Credits.
Enjoy lunchtime while preparing for your future career. Portuguese for the professions is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in a Portuguese speaking environment. It focuses on the development of advanced communication skills according to students’ individualized professional interests through conversations, readings, discussions, writings and media. The course also highlights cultural nuances of the professional Portuguese-speaking world. Grammar will be reviewed as needed in class, but most of it will be done outside of class with tutors or a TA, freeing class time for more communicative activities. There is no final exam. May not be taken on a Satisfactory / Unsatisfactory basis. Prereq: one semester of Portuguese (AS.210.177), Two semesters of Spanish or Placement test.
Instructor(s): Staff
Area: Humanities.

AS.210.405. Teaching French in Public School-Community Based Learning. 3.00 Credits.
A Community-Based Learning (CBL) language course for upperclass students that: 1) establishes a mutually beneficial relationship between JHU students, a neighboring Elementary School, and their common community; 2) combines academic components (linguistic, pedagogical and social) with the experiential work with the community partner as a way to reinforce learning. Students participate in weekly meetings in French on campus to prepare for their classes and teach twice a week to 2nd, 3rd, or 4th graders at the Elementary school. Recommended course background: AS.210.301 or AS.210.302.
Instructor(s): C. Guilemard
Area: Humanities.

AS.210.409. Le monde francophone. 3.00 Credits.
This course examines both sociolinguistic and cultural aspects of the French-speaking world and the relationship between la francophonie and France itself. We focus on five regions—Sub-Saharan Africa (Cameroun and Senegal), Northern Africa (Morocco and Algeria), the Caribbean (Martinique and Haiti), North America (Quebec), and Europe (Belgium)—and consider language features unique to those regional varieties, the status of French as opposed to other indigenous languages and creoles, the demographics of their speakers, and the representation of their culture in media (particularly in short stories, poetry, song, and film). A semester-long research project on one of these main areas will allow students to combine their study of the French-speaking world with other disciplines of interest to them.
Instructor(s): B. Anderson
Area: Humanities.

AS.210.411. Translation for the Professions. 3.00 Credits.
Spanish Translation for the Professions surveys the field of contemporary translation theory and provides practice of translation from English to Spanish. Translation exercises may include comparing and contrasting texts of literature, medicine, health, law, technology, politics, and journalism. Students will identify and differentiate terminology specific to these various fields and will focus on practicing correct uses of the grammatical structures relevant to the translation of both English and Spanish. In the course’s final projects students will apply, synthesize, and reflect on what has been learned in the class by completing a translation exercise individualized to their professional interests. Strategies of communication mastered in this course will help students of Spanish throughout their careers, in that achievement of the course objectives will help students discern, translate, and evaluate the usefulness of translations in different professional settings. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Prerequisites: Prereq: AS.210.313 OR AS.210.314 OR AS.210.315 - Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.210.412. Spanish Language Practicum-Community Based Learning. 3.00 Credits.
This fourth-year course involves a specially designed project related to the student’s minor concentration. On completion of this course, the student will be able to use the Spanish language in real world contexts. The student-designed project may be related to each student’s current employment context or developed in agencies or organizations that complement student’s research and experimental background while contributing to the improvement of his/her language proficiency. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after first week of class.
Prerequisites: AS.210.411
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.

AS.210.413. Curso de Perfeccionamiento. 3.00 Credits.
This forth-year course is an in-depth examination of the Spanish grammar, including a wider range of idiomatic expressions and usages than students might have previously encountered. On completion of this course, students will be able to achieve the ACTFL Advanced-Mid to high level in oral and written expression as well as in reading and listening skills. The course will also help to prepare students for the DELE Intermediate or Superior levels, offered by the Instituto Cervantes. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session.
Prerequisites: (AS.210.312 OR AS.210.317) AND (AS.210.313 OR AS.210.314 OR AS.210.315)
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.
AS.210.417. Eloquent French. 3.00 Credits.
This highly interactive, writing intensive course places emphasis on: 1) providing students with linguistic tools that will help them reach a high level of written proficiency (advanced lexical, stylistic and idiomatic expressions, linking words used to develop and enrich complex sentences, stylistic and grammatical differences between French and English) 2) enhancing students’ analytical skills by introducing them to the French method of Explication de textes 3) teaching students to develop an academic style of writing by studying the different components of the dissertation française (introduction, problématique, argumentation, conclusion, utilisation de sources) 4) teaching students to develop their own style of writing. To that effect, we will study excerpts of French literary texts that deal with themes likely to enhance their own creative writing (lieux imaginaires, mémoire et autobiographie, création d’un personnage de roman, for example).
Instructor(s): K. Cook-Gailloud
Area: Humanities
Writing Intensive.

AS.210.450. Program Abroad: Objective Portuguese - Level IV. 3.00 Credits.
Summer Abroad Program. Emphasis on the development of communication skills: the ability to comprehend both written and spoken texts, adn to speak, read, and write in Portuguese with native-live proficiency. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.210.451. Corso di Perfezionamento. 0.00 - 3.00 Credits.
This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts, and recognize implicit meaning, 2) produce clear, well-constructed, detailed texts on complex subjects 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option. Recommended Course Background: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Prerequisites: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Instructor(s): A. Zannirato
Area: Humanities
Writing Intensive.

AS.210.462. Introduction to German Literature & Culture, 1900 - 1945. 3.00 Credits.
This course is designed to introduce students to the analysis literary and cultural topics. A variety of 20th century texts and visual media will form the basis for discussion of literature and cultural phenomena specific to the time period. This semester will focus on the European capitals of Zurich, Vienna, and Berlin, thereby offering a “European” perspective on literary, cultural, and political events after 1900. Continuities between and differences amongst the three German speaking countries will be investigated. Attention is given to improving student writing. Readings, discussion, and written assignments in German. Recommended Course Background: AS.210.361-AS.210.362
Instructor(s): D. Mifflin
Area: Humanities.

AS.210.501. French Independent Study/Language. 3.00 Credits.
Instructor(s): K. Cook-Gailloud.

AS.210.502. French Indep Stdy-Lang. 0.00 - 3.00 Credits.
Instructor(s): K. Cook-Gailloud.

AS.210.541. Italian Independent Study-Language. 0.00 - 3.00 Credits.
Prerequisites: AS.210.252 or higher or placement exam score Parts I and II.
Instructor(s): A. Zannirato.

AS.210.551. Portuguese Independent Study. 3.00 Credits.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.561. German Independent Study - Language. 3.00 Credits.
Instructor(s): D. Mifflin.

The goal of this course is 1) to familiarize students with different theoretical and practical approaches of language teaching and learning and 2) to understand how these approaches can be used to create a rich learning environment. Participants are expected to engage actively in classroom discussions based on assigned readings, as well as observe classes taught by other instructors in their department. Required for all in-coming teaching assistants in the French section.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.210.615. Adquisición del español como segunda lengua.
This course will aim to clarify for future teachers the important aspect of the Spanish language syntax, related to cultural aspects, second language acquisition, issues of technology and assessment to prepare them for the task they will face in their own language classes. The course will include a review of several topics of Spanish grammar, concepts of second language acquisition and applied linguistics The course also will help to prepare students for the DELE Superior level offered by the Instituto Cervantes if they opt to take it.
Instructor(s): L. Sanchez
Area: Humanities.

AS.210.661. Reading and Translating German for Academic Purposes. Taught in English. This is the first semester of a year-long course designed for graduate students in other fields who wish to gain a reading knowledge of the German language. Seniors who intend to do graduate study in other disciplines are also welcome. Instruction includes an introduction to German vocabulary and grammatical structures as well as discussion of relevant translation practices. The goal of the course is for students to gain confidence in reading a variety of texts, including those in their own fields of study. No knowledge of German is assumed. Seniors & Graduate students only.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.662. Reading & Translating German for Academic Purposes II. Taught in English. Seniors & Graduate students only. This course is designed for graduate students in other departments who wish to gain reading knowledge of the German language and translation practice from German to English. This course is a continuation of the Fall semester. Focus on advanced grammatical structures and vocabulary. For certification or credit.
Prerequisites: AS.210.661 or permission of instructor.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.700. German Language Teaching Practicum I. Provides methodological and practical support and oversight for graduate student instructors teaching Deutsch als Fremdsprache in the American university context. Two-semester sequence, includes orientation during the week before semester begins. Required for German Graduate Teaching Assistants in the first year of their teaching in the program.
Instructor(s): D. Mifflin.

AS.210.701. German Language Teaching Practicum II. Required for German Graduate Teaching Assistants in the first year of their teaching in the program. Second semester of a two-semester sequence.
Instructor(s): D. Mifflin.

AS.211.102. The Cosmic Imagination: How Literature Changes Our Understanding of the Universe. 3.00 Credits.
Since time immemorial humankind has looked to the skies for clues as to our origins, our destiny, and the nature of existence itself. In some ways, one of the hallmarks of western science has been a story of viewing the cosmos in ever-greater clarity and detail. Yet the very nature of the universe—its massive size, the distance and obscurity of its farthest reaches—requires the active intervention of our imaginations to picture it, no matter how powerful the technologies we use. In this course we will look at how western cultures from the middle ages to the present have deployed the literary and philosophical imagination to try to grasp the ungraspable, and how those attempts in some cases helped prepare intellectuals and scientists to make very real advances in understanding the universe.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.211.104. Freshman Seminar: Weimar on the Pacific: German Exile Culture in the United States. 3.00 Credits.
Freshmen seminar. After Hitler's seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.

AS.211.174. Media of Propaganda. 3.00 Credits.
Today, promoting a particular political or personal point of view is not viewed as propaganda, but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term propaganda will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl's Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.202. Freshman Seminar: A Thousand Years of Jewish Culture. 3.00 Credits.
This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Caplan
Area: Humanities.
AS.211.207. Waves of Feminism through Film and Media. 3.00 Credits.
This course will examine the movements known as second- and third-wave feminism as expressed in film and other media since the 1950s. Second-wave feminism— influenced in part by the French philosopher Simone de Beauvoir but driven by social and economic factors in the US and the post-war, industrialized west—depicted from the practical exigencies of suffrage that drove the first wave before it and became concerned with defending the identity of women from being defined in terms of patriarchal norms. From popularized images of working women in US television series to the formalist experimentation of the France’s New-Wave in cinema, the media of the sixties and seventies absorbed and explored many of second-wave feminism’s central themes and critiques. Largely a critique of the perceived Euro-centricism of the second wave, third-wave feminism, coined in the early nineties, focused on the experience of women of color and those from the developing world who did not share the relatively privileged backgrounds of their predecessors. The second part of the course will examine how film and media since the nineties has incorporated and reflected this new inclusiveness, and strive to tell stories of women from a broad spectrum of backgrounds. We will take advantage of the visit to Hopkins by acclaimed media artist Sharon Hayes to examine how her own media practice has been shaped by successive waves of feminist thought and has in turn affected feminism. Other works will include the films of Agnès Varda and Shirin Neshat.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.237. Literature and Medicine. 3.00 Credits.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novellas). As prominently depicted in Thomas Bernhard’s In the Cold and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: Philadelphia (Jonathan Demme, 1993), Melancholia (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.

AS.211.238. Made in Italy: Italian Style in Context. 1.00 Credit.
This one-credit course will seek to contextualize and critique the emergence of cultural commodities within the Italian experience, and their export to the rest of the world. Discussions will concentrate, among other topics, on Italian fashion through the analysis of texts and visual arts, including films. The course is taught in English. No knowledge of Italian is required, but those who can read in Italian will have an opportunity to do so. Everyone will learn some Italian words and expressions. This class may be combined with AS.211.248 [Eataly: an exploration of Italian food culture] and AS.211.258 [Italy Off the Beaten Path] to count toward the Major or the Minor in Italian.
Instructor(s): L. Proietti
Area: Humanities.

AS.211.248. Eataly: an exploration of Italian food cultures. 1.00 Credit.
Italian cuisine is often recognized as one of the finest in the world. This one-credit course will offer an exploration of Italian food cultures past and present. Discussion topics will include the Slow Food Movement, the tension between local and global, and the representation of food in literature, film, and the media. The course is taught in English. No knowledge of Italian is required, but those who can read in Italian will have an opportunity to do so. Everyone will learn some Italian words and expressions. This class may be combined with AS.211.238 [Made in Italy: Italian Style in Context] and AS.211.258 [Italy Off the Beaten Path] to count toward the Major or the Minor in Italian.
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.211.252. Freshman Seminar: What is a University?. 3.00 Credits.
Readings and discussion in English. Many of the issues we grapple with today regarding higher education have a long history dating back to the eighteenth and nineteenth centuries, when the first modern universities were founded in Germany. What is the relation of research to teaching? How do we define scholarship? What is the difference between professional training and academic study? How do we distinguish secondary education from higher learning? What obligations does the university have vis-à-vis the state, which often finances it in whole or in part? What protections does the state owe the university when it pursues research that runs counter to the interests of state? What purpose does the ivory tower serve in an age in which higher learning is no longer limited to the classroom but is widely available (via books, radio, television, the internet)? In this class we will explore the rich literature from the nineteenth century on the idea of the university and the value of learning. We will conclude the course with an examination of the German roots of Johns Hopkins. Cross-listed with History
Instructor(s): R. Tobias
Area: Humanities.

AS.211.253. Freshman Seminar: Why is the Fiddler on the Roof?: The Shetl in Modern Jewish Culture. 3.00 Credits.
The most familiar portrayal of the shetl for an American audience is the setting of the Broadway musical Fiddler on the Roof, where the shtetl, or market town, is a bastion of traditional Jewish life. But what exactly was a shtetl? How did traditional Jews live there, and how were their lives affected by the sweep of modernity? How was the Yiddish language, spoken by all shtetl Jews, both a repository of tradition and an agent of change? How do representations of the shtetl—from corrupt backwater to pious haven—reflect the concerns of Jews from the nineteenth century up to our own day? Through memoir, literature, film and painting, this course will examine actual lives lived in the shtetl, as well as a selection of the many artistic representations of it. All readings will be in English.
Instructor(s): B. Caplan
Area: Humanities.

AS.211.258. Italy Off the Beaten Path. 1.00 Credit.
For centuries, Italy has attracted countless visitors in search of culture and beauty. This one-credit course is an invitation to a journey from South to North across some of the most stunning - and perhaps lesser-known - treasures of Italian cities, regions, and communities. The course is taught in English. No knowledge of Italian is required, but those who can read in Italian will have an opportunity to do so. Everyone will learn some Italian words and expressions. This class may be combined with AS.211.238 [Made in Italy: Italian Style in Context] and AS.211.248 [Eataly: an exploration of Italian food culture] to count toward the Major and the Minor in Italian.
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.
AS.211.265. Panorama of German Thought. 3.00 Credits.
Classics of German thought since the Enlightenment, with emphasis on
philosophies of history and human development, as well as social and
cultural theory. Authors include Herder, Lessing, Kant, Schiller, Humboldt,
Hegel, Marx, Nietzsche, Weber, and Benjamin.
Instructor(s): P. Jelavich
Area: Humanities
Writing Intensive.

AS.211.304. Paris Souterrain: Paris Underground. 3.00 Credits.
This course will track uses of “the underground” in major canonical and
peripheral literary works in the nineteenth century. Readings will include
works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.211.402 OR HA.211.402
Instructor(s): R. Powers
Area: Humanities.

AS.211.312. Acting French: learning about French language and culture
through theater. 3.00 Credits.
Performing a play in a foreign language not only improves language
skills, but develops the ability to express oneself through the body and to
communicate both efficiently and elegantly. Using excerpts from popular
French stage plays by Camus, Sartre, Feydeau, Ionesco, Pagnol and
Rostand among others, this course aims to help students to 1) improve
French pronunciation, intonation, syntax, and vocabulary; 2) appreciate
and understand linguistic nuance and socio-cultural practices; 3) learn
fundamentals of acting that carry over into everyday communication,
from body language and vocal projection to the expression of emotion
and improvisation. Students will view filmed representations of select
plays as well as present an end-of-semester staging. Recommended
course background: AS.210.301.
Instructor(s): K. Cook-Gailloud; M. Alhinho
Area: Humanities.

AS.211.318. Women in Pre-Modern French Literature. 3.00 Credits.
This course will examine the changes in the relationship of women to
literature in France up to the French Revolution from several points
of view: (1) What were the social and intellectual contexts of gender
distinctions? (2) How did men writing about women differ from women
writing about women? (3) How were these questions affected by the
changing norms of literary production? Texts by Marguerite de Valois,
Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau,
Mme d’Épinay and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.211.319. ¡Salsa! The Afro-Antillean song. 3.00 Credits.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an
international Spanish-speaking context. As a language course, it reviews
grammar and instills vocabulary acquisition through the close analysis of
the biggest hits of salsa from the past one hundred years. On completion
of this course the student will have developed the ability to read and
critically discuss music and its history in the Spanish-speaking Caribbean
and will have examined cultural roots, market dominance, and media
crossovers in the musical universe of the Spanish-speaking archipelago
of the Antilles. In completing the course’s final project students will apply,
synthesize, and reflect on what has been covered in the class by creating
a professional dossier individualized to their own personal musical
interests. Concepts learned in this course will be directly applicable to
careers linked to intercultural and international relations while also apply
to multiple careers in media, music industry and dance. There is no final
exam. May not be taken satisfactory/unsatisfactory. Not open to native
speakers of Spanish. No new enrollments permitted after the third class
session.
Instructor(s): M. Ramos
Area: Humanities.

AS.211.327. Italian Eco-cinema: Inconvenient Truths from 1945 to 2015.
3.00 Credits.
For centuries Italy, i.e. the Bel Paese, has been acclaimed for its natural
beauty. However, during the country’s rapid transformation from an
agrarian to an industrial society, its natural wonders came under
threat. Starting from the early post-war period to the current post-
modern era, politically committed filmmakers have been unveiling
Italy’s “inconvenient truths.” This class takes an eco-critical approach to
Italian cinema, examining its ethics and aesthetics. We shall start with
the works of iconic filmmakers such as Roberto Rossellini, Pier Paolo
Pasolini, and Michelangelo Antonioni, and move to more contemporary
films such as Matteo Garrone’s Gomorrah, Alice Rohrwacher’s The
Wonders, and other feature and documentary films that embody the
philosophies of the Slow Food and environmentalist movements.
Instructor(s): L. Di Bianco
Area: Humanities.

AS.211.329. Contemporary Society on Stage: Koltès, Lagarce, Mouawad.
3.00 Credits.
This course proposes to examine six plays by three leading figures
in contemporary French theater to see how the social changes that
occurred in the last three decades are viewed and expressed in the
French-speaking world. We will closely read two plays by each author as
well as excerpts by these and other major playwrights. Works by Jean-
Luc Lagarce (Derniers remords avant l’oubli) and Bernard-Marie Koltès
(Combat de nègre et de chiens) will enable us to see how issues such as
homosexuality, new family relationships and urban violence deeply
transformed French society in the 80s and 90s, while Incendies and
Forêts by Wajdi Mouawad will allow us to ask how these issues, along
with immigration, decisively shape today’s global society. Using literary
analysis to reflect upon the contemporary moment and its institutions,
the course will incorporate to the extent possible performance recordings
and films based on the plays. Course taught in French. Scenes from the
plays can be performed at the end of the term.
Prerequisites: AS.210.302
Instructor(s): F. Champy
Area: Humanities
Writing Intensive.
AS.211.330. Curating Media Artists in Residence at JHU. 3.00 Credits.
Curating Media Artists in Residence at JHU: students will be closely involved with JHU’s Center for Advanced Media Studies (CAMS), and the Baltimore Museum of Art (curator Kristen Hileman) in preparing technical aspects of the BMA Black Box exhibit of the 16mm film, Captain Gervásio’s Family, by the internationally acclaimed artist duo Tamar Guimarães and Kasper Akhøj. This black and white silent film is a portrait of a Spiritist community in Palmela, a small town in Brazil, where half of the inhabitants are believed to be psychic mediums. In addition, students will be involved in helping curate an artist talk and panel on the topic of “Documenting the Spiritual,” with the Stanford anthropologist Tanya Luhrman, and other experts on religious practices from Brazilian shamanism to various religious and spiritual practices from our own Baltimore communities. Further, students will have the unique opportunity to see some raw footage from the artists’ latest documentary film project, part fieldwork and part staging, that engages with the Palmelian psychic mediums’ cosmological perspectives. Says Tamar Guimarães: If Captain Gervásio’s Family tied the medium’s journey into the after-life’s boundless and phantasmal modernity to cinematic spectrality—— where cinema, the ultimate modern medium is also the ashen-grey world of the haunted and the ghostly, the new film will insist on the mediums’ technological inventions. Please note that the class time will be flexibly adapted to the needs of the artists’ residency. If you have a very full calendar in the Spring it is best advised not to take this class.
Instructor(s): B. Wegenstein  
Area: Humanities

AS.211.341. Power and Resistance: Approaches to French Political Thought. 3.00 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson  
Area: Humanities

AS.211.348. Holocaust Consciousness — An Intercultural and Interdisciplinary Approach Through Media Studies and Psychology. 3.00 Credits.
This course approaches Holocaust consciousness in the U.S. and Europe within a psychological and media-theoretical framework. It is also part of a larger research project between the Center for Advanced Media Studies at JHU and the Sigmund Freud University in Vienna. During the semester students will be tele-conferencing during five to six class sessions with students in the same course held at the Sigmund Freud University and taught by Professors Nora Ruck and Markus Brunner. Together we will examine Holocaust consciousness in the U.S. and Europe, and such phenomena as trauma, inter-generational transmission, and projection of the trauma of the victims’ and/or the perpetrators’ As primary materials we will be using war memoirs and documentary films (from the films of the “Bilderverbot” to today’s family ethnographies). Students will be teamed in small, inter-cultural groups to address both U.S. and a European perspectives on these materials. An excursion to the U.S. Holocaust Memorial Museum in Washington D.C. will also be part of the course.
Instructor(s): B. Wegenstein  
Area: Humanities  
Writing Intensive.

AS.211.353. ¡Máscaras mexicanas!. 3.00 Credits.
Although masks are now global symbols of Mexican culture, the origins and evolution of the mask in Mexico are often shrouded in mystery. This course explores masked representations and stories of masking across a wide variety of media, including movies, comics, novels, plays, and wrestling performances. The question of the mask in Mexico is examined in different historical, literary, social, and religious contexts, with particular focus given to the masks of saints, gods, wrestlers, bandits, and superheroes. This course provides students with a basic understanding of Mexican history from the 19th to the 21st century, as well as different ways to engage theoretically with one of Mexico’s most iconic cultural emblems. Class taught in Spanish. Writing intensive. Recommend Course Background: As.210.311 or equivalent.
Instructor(s): C. Ray  
Area: Humanities  
Writing Intensive.

AS.211.358. Writing the Great War: French Literature and World War I. 3.00 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402  
Instructor(s): C. Benaglia  
Area: Humanities.

AS.211.363. The Italian-American Experience: From the Margins to the Mainstream. 3.00 Credits.
This course explores the many depictions, descriptions, and definitions of Italian-American ethnicity and identity in various media, from the narratives and poetry of the first Italian immigrants in the nineteenth century to the wildly popular, stereotype-promoting American films and television shows of today. Through literature, film, poetry, language, music, gender studies, and study of religious and cultural traditions, we will investigate how Italian-Americans express their identity to others.
Instructor(s): A. Falcone  
Area: Humanities.
AS.211.364. Drama Queens: Opera, Gender, and the Poetics of Excess. 3.00 Credits.
What is a drama queen? According to the Oxford English Dictionary, a drama queen is “a person who is prone to exaggeratedly dramatic behaviour” and “a person who thrives on being the centre of attention.” While drama queens exist among us, the world of opera is certainly one of their ideal environments. Echoing back to their tragic fates, the powerful voices of Dido, Medea, Violetta, and Tosca never ceased to affect their empathetic public. In fact, excess and overreactions are two main features of the operatic experience both on stage and in the audience. By focusing on the ways in which operatic characters are brought to life, the course explores the social, political, and gender dynamics that inform the melodramatic imagination. Students will have the opportunity to attend live HD broadcasts of Verdi’s La Traviata and Tchaikovsky’s Eugene Onegin from the Metropolitan Opera. No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.211.366. Cuisine and Culture in Latin American Film. 3.00 Credits.
This course is a comprehensive study of presentations of food in Latin American Film. Cuisines are cultural symbols that bind together people in ritual and into a community. The goal of this class is to interpret how food habits function beyond providing calories and sustenance. Films from Latin America will be used as an entrée to discussing topics of food as medicine, family/community, and gender and as links to the history of Latin America. Students will be able to identify and differentiate between tropes of, as well as approaches to, food in film, and theories of food production, distribution and consumption in Latin America. Assignments will include a weekly film viewing, along with primary theoretical readings (in Spanish) around food and culture. Several presentations and a final project will focus on continuing research into food representations in films selected by individual students in which you will be able to apply what you have learned during this course to analyze additional works, thereby gaining a deeper understanding of Latin American cultures and values.
Prerequisites: Advanced Spanish I (210.311), or appropriate placement exam score
Instructor(s): J. Lirot
Area: Humanities.

AS.211.367. La Nouvelle Vague. 3.00 Credits.
Exploration des films les plus importants et des principaux cinéastes de la Nouvelle Vague française; introduction à l’analyse et à l’appréciation des films. Conducted in French. Recommended Course Background: AS.210.301 or permission of the instructor. Recommended screenings Tuesday 7:30pm. $40 lab fee.
Instructor(s): S. Roos
Area: Humanities.

AS.211.371. Kafka and the Kafkaesque. 3.00 Credits.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term “kafkaesque” refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka’s poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka’s prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka’s impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka’s oeuvre while developing skills in critical analysis and literary close reading.
Instructor(s): A. Krauss
Area: Humanities.

AS.211.375. Community Based Learning - Documentary Production Practicum: The Cure: the History and Culture of Breast Cancer. 3.00 Credits.
This class will accompany Bernadette Wegenstein during some months of producing her feature documentary “The Cure” on the history and culture of breast cancer. It will be a hands on experience with director/producer Bernadette Wegenstein, editor/producer Patrick Wright and cinematographer Allen Moore filming at the GBMC’s Breast Care clinic, the Halsted Medical Archives, and some other Baltimore locations. This class will meet once a week, but some weeks the class will consist in the hands-on experience on the field rather than the actual class meeting.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.380. Modern Latin American Culture. 3.00 Credits.
Taught in Spanish. This course will explore the fundamental aspects of Latin America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.312
Area: Humanities.

AS.211.385. Documentary Production Practicum: Raqs Media Artists in Residence. 3.00 Credits.
This course accompanies the New Delhi based media art collective raqs, consisting of 3 artists, during their first residency in Baltimore during Spring 2013. Students will be helping prepare the media artists’ solo exhibition opening at the BMA on February 20, and be involved in a production workshop offered through the JHU Digital Media Center.
Instructor(s): B. Wegenstein
Area: Humanities.
AS.211.390. Modern Spanish Culture. 3.00 Credits.
This course will explore the fundamental aspects of Spanish culture from the nineteenth to the twenty-first centuries. The course will offer a general survey of the history of Spain and will discuss texts, movies, songs, pictures, and paintings in relation to their social, political, and cultural contexts. This course will be of particular interest for students planning on spending a semester abroad in Spain—specially for those students going to the JHU Fall Semester in Madrid, at Carlos III University. Taught in Spanish. Recommended Course Background: AS.210.311 or appropriate Webcape score.
Prerequisites: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization. 3.00 Credits.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor's permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.211.397. Program Abroad: Brazilian Culture & Civilization. 3.00 Credits.
Summer Abroad Program. Intensive language and culture program offered in Rio de Janeiro, Brazil. The Culture and Civilization course strengthens students' language skills while deepening their understanding of Brazilian history and culture. Pre-req: 1 semester of Portuguese or 1 year of Spanish. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.211.401. La France Contemporaine. 3.00 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301 or AS.210.302 or permission of instructor.
Instructor(s): A. Wuensch
Area: Humanities.

AS.211.402. La France Contemporaine II. 3.00 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor.
Instructor(s): A. Wuensch; B. Anderson
Area: Humanities.

AS.211.410. Toward Modernity: France 1848-1885. 3.00 Credits.
The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We'll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.211.412. Temps et recit dans le cinema francais. 3.00 Credits.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators' desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.

AS.211.416. Visual Languages in Medical Knowledge. 3.00 Credits.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 214.616 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.

AS.211.420. Real French: From Slang to Sophistication. 3.00 Credits.
This class will teach the realities of the French language, ranging from slang to the most sophisticated forms of expression. We will study excerpts of films, literary works, essays, political speeches, etc., in order to examine which level of speech is at work. Course also provides students with linguistic tools that will help them reach the highest level of written proficiency, as well as develop their personal stylistic voice.
Instructor(s): K. Cook-Gailloud
Area: Humanities.
AS.211.427. Libertins, Athées, Imposteurs. 3.00 Credits.
An exploration of the clandestine culture of free-thinkers, hedonists and rakes in France in the 17th and the 18th centuries and their strategies for undermining the theological grounding of morality, politics, sexuality and gender. Readings from Descartes, Cyrano de Bergerac, Molière, Diderot, Sade, Laclos and others. Meets with AS.212.427
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.

AS.211.431. Desecrating the Sacred Heart: Science, Religion and Art in Fin-de-Siècle France. 3.00 Credits.
This interactive course analyzes the stakes underlying the construction of Paris’ controversial Sacré-Coeur Basilica in Montmartre. In the light of heated 19th-century debates on moral authority that opposed religious believers and partisans of a secular state inspired by a scientific ethos, we will consider how the advocates of both sides use specific rhetorical techniques in the public domain (newspaper articles, caricatures, speeches) and artistic devices (paintings, literary writings) to convince their audience of the validity of their claims. The course will open out onto contemporary debates that show similar ethical conflicts.
Instructor(s): K. Cook-Gailloud.
Area: Humanities
Writing Intensive.

AS.211.449. America Through French Eyes: French Travellers to America. 3.00 Credits.
From early colonial efforts in the sixteenth century through the time of the great political revolutions and down to the present, America has exercised a deep fascination on the French. This course will look at French representations of America in art, literature and political thought across the centuries. Through a range of materials including travel accounts, essays, novels, maps, paintings and film, we will investigate how French perceptions of America have shifted over time, often in response to changes in French society and culture. All texts will be read in translation. Course work will include visits to JHU’s Special Collections and the Walters Art Museum downtown
Instructor(s): S. Miglietti
Area: Humanities.

AS.211.469. Limit-Experience, Limit-Texts. 3.00 Credits.
Among the many functions of literary narrative is that of describing and domesticating extreme experience, from the horrors of war and incarceration to religious ecstasy, madness, and acute illness. Writers have long exploited the extreme to probe the reaches of human consciousness and the social pacts that differentiate transgressive from normal behaviors. Drawing on the work of 20th century French-language authors of novels, short stories, and witness accounts (Breton, Camus, Chraibi, Delbo, Duras, Guibert, Le Clézio, Volodine), this course will explore how narrative strategies relate to extreme states, situations, and conditions. At the same time, through excerpts from experimental writers from Surrealism to the écriture féminine, we will also consider how language itself can create a manner of limit-experience by questioning the boundaries of the readable. Course in French.
Instructor(s): D. Schilling
Area: Humanities.

AS.211.471. Jules Verne. 3.00 Credits.
An overview of the corpus of the author of the Voyages extraordinaire. The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in the new human sciences and their relationship to the development of cultural models. A disabused, even pessimistic thinker, he provides a unique entryway into the fin-de-siècle French mind set. Works to be read will include Cinq semaines en ballon, Voyage au centre de la terre, De la terre à la lune, 20,000 lieues sous les mers and L’Île mystérieuse, Le Tour du monde en quatre-vingt jours, Robur le conquérant and Le Maître du monde, le Sphinx des glaces, Le Château des Carpathes, and Paris au XXe siècle. Class will be taught in French. This course can be taken either as a 211 Culture course or 212 Literature course 212.
Prerequisites: AS.212.334
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century. 3.00 Credits.
2016 marks the bicentennial of Rossini’s irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart’s The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais’ controversial “Figaro trilogy”, stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretensions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano’s The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick’s Barry Lyndon (1975) and Milos Forman’s Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.

Area: Humanities.

AS.211.894. Independent Study - Portuguese Culture.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.212.127. Freshman Seminar: 18th Century Theater. 3.00 Credits.
An introduction to 18th century theater and performance. Using philosophical and critical texts by Aristotle, Chapelain, Diderot, and others, we will examine a series of plays and other works for theatrical performance. Course has a performance requirement. Taught in English.
Dean's Prize Freshman Seminar
Instructor(s): O. Sabee
Area: Humanities.

AS.212.170. Freshman Seminar: Writing the Great War. French Literature and World War I. 3.00 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in English
Instructor(s): C. Benaglia
Area: Humanities.

AS.212.304. Paris Souterrain: Paris Underground. 3.00 Credits.
This course will track uses of "the underground" in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.212.334 OR HA.212.334
Instructor(s): R. Powers
Area: Humanities.

AS.212.318. Women in Pre-Modern French Literature. 3.00 Credits.
This course will examine the changes in the relationship of women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d'Épinay and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.326. Listening In: The Sounds of French Poetry. 3.00 Credits.
The sounds and rhythms of French language poetry have evolved sharply over time. How can listening to the musicality of poems enhance our understanding of poetic meaning? To attune the ear, develop poetic voice and a heightened sensibility to the visual and aural experience of poems, students will listen to, record, recite and translate poetry. Readings will range from classical works such as Racine's Phèdre and Molière's Tartuffe to poets such as Baudelaire, Hugo, Mallarmé, and Tzara. Recommended Course Background: AS.212.333 or AS.212.334
Instructor(s): J. Whitaker
Area: Humanities
Writing Intensive.

AS.212.327. Mise et remise en scene: Performing in the 18th Century. 3.00 Credits.
An introduction to texts and performance practices of the eighteenth century French theater, and an exploration of challenges and creative approaches to its restaging today. Course has a performance requirement.
Instructor(s): O. Sabee
Area: Humanities
Writing Intensive.

AS.212.329. Contemporary Society on Stage: Koltès, Lagarce, Mouawad. 3.00 Credits.
This course proposes to examine six plays by three leading figures in contemporary French theater to see how the social changes that occurred in the last three decades are viewed and expressed in the French-speaking world. We will closely read two plays by each author as well as excerpts by these and other major playwrights. Works by Jean-Luc Lagarce (Derniers remords avant l'oubli ) and Bernard-Marie Koltès (Combat de nègre et de chiens) will enable us to see how issues such as homosexuality, new family relationships and urban violence deeply transformed French society in the 80s and 90s, while Incendies and Forêts by Wajdi Mouawad will allow us to ask how these issues, along with immigration, decisively shape today's global society. Using literary analysis to reflect upon the contemporary moment and its institutions, the course will incorporate to the extent possible performance recordings and films based on the plays. Course taught in French. Scenes from the plays can be performed at the end of the term.
Prerequisites: AS.210.302
Instructor(s): F. Champy
Area: Humanities
Writing Intensive.

AS.212.331. Paris 1900: the Great World Exhibition and the Beginning of Modernism. 3.00 Credits.
Held in Paris, the 1900 World’s Fair introduced to the modern world such striking innovations as subways, moving images on giant screens, escalators, colossal electrical shows, and the first painting by Pablo Picasso to be shown on French soil. Focused on key cultural and socio-political events surrounding this momentous turn-of-the-century display of wealth and power, this course examines the paradoxes of a modernizing French nation which even as it promoted individual rights alongside technology and economic growth was headed towards world conflict. Students will perform original research by exploring the rare book collection at JHU as well as the substantial digital archives now documenting the period.
Instructor(s): K. Cook-Gailloud
Area: Humanities.
AS.212.333. Introduction à la littérature française. 3.00 Credits.
Introduction à la Littérature française I and II propose reading and discussion of texts of various genres from the Middle Ages to the 21st century. This sequence is intended as an introduction to the methods, questions, and techniques of textual analysis through intensive reading, discussion, and production of written texts. Introduction à la littérature française I covers some of the greatest classics of French literature and thought from the Middle Ages to the Revolution. The two semesters may be taken in either order. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Recommended Course Background: AS.210.301-AS.210.302 or at least one semester of AS.210.301-AS.210.302 with a grade of A and written permission of the instructor. For more info see http://grll.jhu.edu/french/undergraduate/courses/
Instructor(s): S. Miglietti; W. Anderson
Area: Humanities
Writing Intensive.

AS.212.334. Introduction à la littérature française II. 3.00 Credits.
Readings and discussion of texts of various genres from the Middle Ages to the 20th century. The two semesters (212.333 and 212.334) may be taken in either order. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Introduction à la littérature française II covers the time period from the Revolution to the present.
Prerequisites: AS.210.301 OR AS.210.302 or at least one semester of AS.210.301 or AS.210.302 with a grade of A and written permission of the instructor.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.336. The Violence of the Stage. 3.00 Credits.
Modern French drama since World War II has been a privileged space for public representations of violence. Featuring works by playwrights from Sartre to Réza and from Beckett to Mouawad, this course examines the meanings and functions of violence in performance (murder, terrorism), as well as different possibilities for theatrical staging and film adaptation.
Recommended Course Background: AS.212.334
Instructor(s): G. Briex
Area: Humanities.

AS.212.339. Constructing Poe: How 19th Century France created an icon. 3.00 Credits.
Just who was Edgar Allan Poe, and who is he today? This course explores how and why a multitude of 19th-century French writers constructed Poe as an author. Through selected works from Hugo, Baudelaire, Mallarmé, and Verne, to be read alongside Poe’s original texts, we will study the means by which these figures projected uniquely French versions of this mysterious American writer the better to stake out their own literary revolutions. By exploring versification, translation, adaptation, and the role of the proper name, we will examine the broad literary history that underlies contemporary understandings of Poe. No knowledge of French is required.
Instructor(s): A. Alexander
Area: Humanities
Writing Intensive.

AS.212.340. Topics in French Cinema: Immigration, identité, différence culturelle. 3.00 Credits.
An exploration of immigration, identity, and cultural differences through the lens of recent French and Francophone films. Focus on discussion and analyses of film sequences in class and on oral presentations. Students will have the opportunity to progress in vocabulary, oral expression, and in critical analysis. Films studied include works of Kassowitz, the Dardennes, Kechiche, Hanek, and Audiard. Conducted in French. Recommended course background: completion of AS. 210.301 or equivalent score on Placement test.
Instructor(s): S. Roos
Area: Humanities.

AS.212.341. Power and Resistance: Approaches to French Political Thought.. 3.00 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.342. Medicine, Science, and the Humanities

AS.212.343. Literature and Science in France 1750-1880. 3.00 Credits.
This course will investigate changes in the meaning and function of the literature of science and of the natural world during the period 1750-1850 (N.B. All course readings, assignments, and discussions will be conducted in French). Dean’s Teaching Fellowship.
Prerequisites: Advanced French I and II (AS 210.301-302), Introduction to French Literature I or II (AS 212.333 or 334)
Instructor(s): H. Roman
Area: Humanities
Writing Intensive.

AS.212.358. Writing the Great War: French Literature and World War I. 3.00 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in English.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.
AS.212.362. Ecrire l’héroïsme au féminin [Writing Heroism in the Feminine]. 3.00 Credits.
How can we define a heroine? What distinguishes heroines from mere female protagonists? Who are the main heroines to have marked the French literary tradition? This course examines how writers have transformed the notion of heroism inherited from Ancient Greece and Rome to lend it different and distinctly gendered shapes in the figure of the female hero: bravery, scandal, crime, sacrifice, nationalism. Focus will be placed on the evolution of the concept from the 17th century to the end of the 20th century in novels and plays by Racine, Madame de Lafayette, Prevost, Balzac, Maupassant, Anouilh, Wittig, and Condé. Recommended Course Background: AS.212.333 or AS.212.334.
Instructor(s): L. Cariou
Area: Humanities.

AS.212.363. Twisted Roots: Writing Creole in the French Caribbean. 3.00 Credits.
This course examines rootedness and hybridity in contemporary literary and critical works from the French Caribbean, exploring the act of writing Creole as illustrative of innovative thought-constructs. French students will read and write in French and should register for section 02; other students will read translations and should register for section 01. Discussions will be conducted in English.
Instructor(s): R. Loescher
Area: Humanities.

AS.212.365. Avant la Révolution: littérature et critique sociale en France (1500-1789). 3.00 Credits.
This course will explore some key moments in the literature and thought of pre-revolutionary France, focusing on the ways that Renaissance and Enlightenment authors used literature to create alternative spaces from which to critique and rethink the worlds in which they lived. Readings will include Rabelais, Montaigne, Fontenelle, Montesquieu, Voltaire, Diderot, and Rousseau. Assessed work will include an oral presentation and a research paper on a topic of your choice. Throughout the course you will acquire finer critical and analytical skills, polish your oral and written French, and familiarize yourself with advanced research methods in the human sciences. Recommended course background: at least one semester of Introduction à la littérature française (I or II). For more info see http://grll.jhu.edu/french/undergraduate/courses/
Prerequisites: Pre-reqs: AS.212.333 OR AS.212.334
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.212.368. Avant la Révolution: littérature et critique sociale en France (1500-1789). 3.00 Credits.
The half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré. Co-listed with AS.212.410
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.370. Ecrire l’héroïsme au féminin [Writing Heroism in the Feminine]. 3.00 Credits.
How can we define a heroine? What distinguishes heroines from mere female protagonists? Who are the main heroines to have marked the French literary tradition? This course examines how writers have transformed the notion of heroism inherited from Ancient Greece and Rome to lend it different and distinctly gendered shapes in the figure of the female hero: bravery, scandal, crime, sacrifice, nationalism. Focus will be placed on the evolution of the concept from the 17th century to the end of the 20th century in novels and plays by Racine, Madame de Lafayette, Prevost, Balzac, Maupassant, Anouilh, Wittig, and Condé. Recommended Course Background: AS.212.333 or AS.212.334.
Instructor(s): L. Cariou
Area: Humanities.

AS.212.383. Ecrire l’ailleurs : littérature, voyage, utopie. 3.00 Credits.
Distant places have always exerted a particular fascination on the human mind. Many classes of European literature feature journeys to foreign lands, whether real or imaginary: from More’s Utopia and Ariosto’s Moon, to Bacon’s New Atlantis and Swift’s Lilliput. Through a range of examples from early modern France, we will explore the complex relationship to Bacon’s New Atlantis and Swift’s Lilliput. Through a range of examples from pre-revolutionary France, focusing on the ways that Renaissance and Enlightenment authors used literature to create alternative spaces from which to critique and rethink the worlds in which they lived. Readings will include Rabelais, Montaigne, Fontenelle, Montesquieu, Voltaire, Diderot, and Rousseau. Assessed work will include an oral presentation and a research paper on a topic of your choice. Throughout the course you will acquire finer critical and analytical skills, polish your oral and written French, and familiarize yourself with advanced research methods in the human sciences. Recommended course background: at least one semester of Introduction à la littérature française (I or II). For more info see http://grll.jhu.edu/french/undergraduate/courses/
Prerequisites: Pre-reqs: AS.212.333 OR AS.212.334
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.212.400. Flaubert’s L’Éducation sentimentale, a Prose Novel for Modern Time. 3.00 Credits.
Undergrads need instructor permission. Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Education sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Education sentimentale edition required: GF Flammarion, 2003.
Instructor(s): J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.212.410. Toward Modernity: France 1848-1885. 3.00 Credits.
The half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré. Co-listed with AS.212.410
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.412. Temps et recit dans le cinema francais. 3.00 Credits.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities

AS.212.417. Texts of/on the Terror from the French Revolution. 3.00 Credits.
Taught in French. During the first half of the semester we will take advantage of the renewed interest in scholarship on the Terror to deal with some of the most famous examples of Revolutionary rhetoric, focusing especially on the trial of Louis XVI and the late speeches of Robespierre. During the second half of the semester we will read literary works produced during the Terror and accounts of the Terror from authors such as Balzac, Dumas, and Michelet. We will be asking questions such as: What was the Reign of Terror and to what extent was its project dependent on public discourse? Why and how does the nature of public oratory change? What happens to definitions of the literary and of authorship in a terroristic context?
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.
AS.212.421. Textes et Performances: le théâtre français du 17e au 19e siècle. 3.00 Credits.
Le théâtre français, des classiques aux romantiqnes. There will be a performance component to this course. Recommended co-registration with 210.312. Acting French. For more information, see http://www.wilda.org/Courses/CourseVault/Undergrad/18thTheaterUG/SyllabusTheater.html
Instructor(s): W. Anderson
Area: Humanities.

AS.212.427. Libertins, Athées, Imposteurs. 3.00 Credits.
An exploration of the clandestine culture of free-thinkers, hedonists and rakes in France in the 17th and the 18th centuries and their strategies for undermining the theological grounding of morality, politics, sexuality and gender. Readings from Descartes, Cyrano de Bergerac, Molière, Diderot, Sade, Laclos and others. Meets with 211.427
Instructor(s): E. Russo
Area: Humanities.

AS.212.429. Thesis Prep. 1.00 Credit.
Preparation of the thesis topic, a comprehensive annotated bibliography, and abstract prior to the writing of the Senior Thesis (AS.212.430). Meetings are by individual appointments with the chosen French faculty mentor. Normally 212.429 is taken in the Fall semester of the senior year.
Prerequisites: Prerequisite or Corequisite: AS.210.417;Prerequisite: AS.212.333 AND AS.212.334
Instructor(s): Staff
Area: Humanities.

AS.212.430. Senior Seminar. 3.00 Credits.
An in-depth and closely supervised initiation to research and thinking, oral and written expression, which leads to the composition of a senior thesis in French. Recommended Course Background: AS.212.429.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson
Area: Humanities Writing Intensive.

AS.212.432. The Dreyfus Affair: Lying for Truth. 3.00 Credits.
In 1894 French military captain Alfred Dreyfus was found guilty of a crime of treason he did not commit. The true reasons for his arrest are still under debate today: was this a sheer act of antisemitism? Why did the army create false proof against a men they knew was innocent? What was the role of the press in propagating the Affair? This course proposes to approach the Dreyfus Affair in all its complex forms, while encouraging students to carry out original and innovative research based on a wide range of resources (caricatures and articles in the press, pamphlets, paintings, films, music, photographs, court transcripts, government archives, private letters, and hopefully more).
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.212.442. Souvenirs de la France occupée 1940-1944 [Memories of Occupied France, 1940-1944]. 3.00 Credits.
How do writers and filmmakers active in France since World War II shaped the collective memory of German occupation, deportation, and liberation, both forging and contesting myths of the French nation through the wartime experience of resistance and collaboration? In what ways do distinct modes of written and audiovisual expression (fiction, testimony, documentary) conjoin with individual or group perspectives to color our understanding of France’s “dark years”? See full description here: http://grll.jhu.edu/french/undergraduate/courses/
Prerequisites: AS.212.334 OR ( AS.211.401 AND AS.211.402 )
Instructor(s): D. Schilling
Area: Humanities.

AS.212.449. France, terre des migrations [French Histories of Migration]. 3.00 Credits.
Comme le Canada ou les Etats-Unis, la France est une grande terre d’immigration qui depuis le 19e siècle a accueilli sur son sol des populations du monde entier. En examinant témoignages, textes de fiction et films documentaires, nous suivrons les expériences contrastées de diverses vagues de migrants chassés par la faim, le chômage ou les persécutions. Quels mécanismes ont favorisé ou freiné l’intégration économique, sociale et civique de ces migrants qui ont rejoint la République française? Que veut dire “être immigré” aujourd’hui?
Prerequisites: AS.211.401
Instructor(s): D. Schilling
Area: Humanities.

AS.212.466. The Pleasures of Tragedy. 3.00 Credits.
Why do we experience pleasure in watching representations of bad things happening to people on stage? Are the emotions aroused by tragedy ethical or immoral? These are just some of tragedy’s many paradoxes, which have been explored by philosophers over time, from Plato to Augustine, to Rousseau, to Hume. This course proposes to explore some of the enigmas and conundrums raised by a genre which everybody agrees cannot be defined by common formal and thematic features, but which we all feel able to recognize when we see it. Is there an essence of tragedy that endures from 5th century Greece to today? Or are the things that make us call a play tragedy radically different according to time and place? How is tragedy related to philosophy, religion and politics? Tragedy has been declared in turn “dead” (killed by Christian notions of redemption, by political utopianism, by philosophical optimism, by the dissolution of language, etc.) and renewed, regenerated (through the sense of the absurd, postmodern immanence, irredeemable violence) – and indeed, there has been a flourishing of the genre in France in the late XXth century. Through readings of a selection of plays, both ancient and modern, and theoretical works, we’ll examine the metamorphosis of the tragic hero and heroine, the issues of gender, moral responsibility and the management of the spectator’s emotions. Readings from Sophocles, Aristotle, Corneille, Racine, Hegel, Kierkegaard, Anouilh, Sartre, Césaire, Koltès, Gabily. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): E. Russo
Area: Humanities Writing Intensive.

AS.212.469. Limit-Experience, Limit-Texts. 3.00 Credits.
Why tell stories? What power do writers wield against the disorder of life? How do literary narratives measure up to experiences that usher us beyond the limits of the imaginable? In this course we will examine modern and contemporary works in French that engage with such limit states and situations as combat, imprisonment, madness, terminal illness, and corporeal transformation. Authors to be considered include Carrère, Chevillard, Darrieussecq, Delbo, Duras, Guibert, and Volodine.
Instructor(s): D. Schilling
Area: Humanities.
AS.212.470. Censorship in Language and Practice. From the Ancien Regime to Democracy. 3.00 Credits.
An exploration of the boundaries of acceptability when speaking about religion, government, sexuality and gender. Students will learn about the political, theological and legal basis of blasphemy and punishable behavior, and how they have changed from the time of divine-right monarchy to contemporary laïcité. Selected readings ranging from the clandestine culture of free-thinkers and rakes in the 17th century, to the trials and causes célèbres of the Enlightenment, to modern-day democratic polemics.
Prerequisites: AS.210.302
Instructor(s): E. Russo
Area: Humanities.

AS.212.471. Jules Verne. 3.00 Credits.
An overview of the corpus of the author of the Voyages extraordinaires. The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age. Yet he was also an astute erudite thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his exploring or colonizing contemporaries, a dabbler in the new human sciences and their relationship to the development of cultural models. A disabused, even pessimistic thinker, he provides a unique entryway into the fin-de-siècle French mind set. Works to be read will include Cinq semaines en ballon, Voyage au centre de la terre, De la terre à la lune, 20,000 lieues sous les mers and L’Île mystérieuse, Le Tour du monde en quatre-vingt jours, Robur le conquérant and Le Maître du monde, Le Sphinx des glaces, Le Château des Carpathes, and Paris au XXe siècle. Class will be taught in French. This course can either be taken as a 211 Culture course or a 212 Literature course.
Prerequisites: AS.212.334
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.481. The 18th-Century French Novel. 3.00 Credits.
Key novels will be studied from a variety of approaches. Authors to include Marivaux, Montesquieu, Prévost, Diderot, Crébillon, Rousseau, and Voltaire. Recommended Course Background: AS.212.333 and AS.212.334 or AS.212.333 and permission of the instructor.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.501. French Independent Study. 3.00 Credits.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

AS.212.502. French Indep Study-Lit. 3.00 Credits.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

AS.212.596. Independent Study-Spanish. 3.00 Credits.
Instructor(s): E. Gonzalez.

AS.212.604. Around Baudelaire. 3.00 Credits.
Topics in Baudelaire's art and thought, and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mallarmé, Proust, Benjamin, Starobinski, Bonnefoy, Roubaud, Deguy). Readings and discussion will be mainly in French.
Instructor(s): J. Neefs; M. Fried.

The development of the drame bourgeois and the theater criticism of the French Enlightenment. Authors to be studied include Racine, Le Sage, Marivaux, Voltaire, Diderot and Beaumarchais. For more information, please see http://www.wilda.org/Courses/Course Vault/Grad/Theater/Syllabus.html
Instructor(s): W. Anderson.

AS.212.620. The Encyclopédie.
In its attempt to realize fully the potential of a group description of knowledge, the Encyclopédie of Diderot and d’Alembert displays the program of the philosophies in a particularly intense and idiosyncratic form. This intellectual conversation will be studied through the investigation of several different subjects treated in the Encyclopédie; for example, the theory of the encyclopedia itself, history, natural history, literature, medicine, and theories of language.
Instructor(s): W. Anderson.

AS.212.632. Utopias.
Reflecting on the genre of the Utopia which from the late 17th century through the late 19th century alludes to diverse ideological constructions, such as the Golden Age, the Pays de Cocagne, fantastic worlds, primitive societies, the state of nature, robinsonnades, science fiction.
Instructor(s): W. Anderson.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.644. Libertinage: entre révolte et fantasme.
The prerevolutionary libertine novel, starring at its center the character of the libertine, is the one most iconically associated with the French novel and with notions of transgressive “Frenchness,” intended both for national use and for export. In the wake of the pioneering work of René Pintard (Le Libertinage érudit dans la première moitié du 17e siècle, 1943) libertinage was emancipated from the fictional realm and promoted to a category of intellectual and cultural history. Yet recent critics have contested the use of this label, arguing that the historical individuals who were so called were a heterogeneous collection who had nothing in common apart from their marginality, which was in turn stigmatized or valorized. The purpose of this course is to examine critically the relationship between fictional and historical libertines, the many overlaps between the “transgressive” and the “erudite” communities, the role they played in the emergence of the “radical” Enlightenment and scientific materialism, their subversive use of language, the fluctuation between protective strategies of equivocation and the audacity of parrésia. Readings from trial documents, pamphlets, correspondence, novels and essays, by G. C. Yannini, François Garasse, Antonio Rocco, Théophile de Viau, Descartes, Cyrano de Bergerac, Dassoucy, Bayle, Boyer d’Argens, Voltaire, Sade, Diderot, Laclos.
Instructor(s): E. Russo.
AS.212.666. Writers Confront Time, Posterity and Survival.
This course will discuss various ways by which authors see time as shaping and inflecting the reception and the value of their works. I will focus on a select group of Enlightenment philosophers with some forays into classical antiquity and the Romantic period. The purpose of the seminar is to explore the existence of a relationship between models of transmission of aesthetic value and models of cultural, theological and biological evolution. Works by Diderot, Voltaire, Charles Bonnet, Rousseau, Ballanche and others.
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.

AS.212.669. Time, Survival and the Artwork.
How does time inflect the reception and the value of the artwork, both visual and written, and how do authors imagine their work is to survive physical destruction and temporal uprooting? How are the concepts of decadence, degeneration, catastrophe and palingenesis articulated? The course explores these questions and theorizes the existence of a relationship between models of transmission of aesthetic value and models of cultural, theological and biological evolution. Works by Perrault, Diderot, Falconet, Voltaire, Bonnet, Chateaubriand, Ballanche, Blanchot, T. S. Eliot.
Instructor(s): E. Russo
Area: Humanities.

AS.212.678. Guillaume de Machaut: exploring medieval authorship in the digital age.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. Students will learn to use digital tools to view and analyze original illustrated musical manuscripts of Machaut’s work.
Instructor(s): T. Rose-Steel.

What if Rousseau’s description of the sentiment de l’existence were to join to the models of consciousness Damasio develops in The Feeling of What Happens? This course explores aspects of consciousness in French literature (Rousseau, Sand, Nerval, Amiel, Flaubert, Valéry, Proust, Sartre) in a dialogue with recent texts in theory, philosophy, neuroscience (e.g. Poulet, Merleau-Ponty, Sartre, Scarry, Noë, Humphrey, Damasio, Sacks).
Instructor(s): E. Ender
Area: Humanities
Writing Intensive.

AS.212.696. Literature Confronts Science: Zola.
Zola worked with the theories of heredity of his time in the Rougon-Macquart novels. But he also attempted to use his understanding of biology and thermodynamics to reform the theory of the novel in general. This course will examine these two different effects of science on literature and try to see what leads an author to undertake such a project. For a more extended description, please see http://www.wilda.org/Courses/CourseVault/Grad/Zola/Syllabus.html. Advanced undergraduates with sufficient background may register for this course with permission of the instructor.
Instructor(s): W. Anderson.

AS.212.699. Cultures of Criticism from the Classics to the Romantics.
It is said that the French Enlightenment invented art criticism. Yet art criticism was just one of many forms of critical thought at the time, like theatrical criticism, the genre of the éloge, scientific prefaces, satires, the Querelle des Bouffons, and much more. But what work does critical thought do for the early moderns? It certainly constructs the canon, it regiments the Republic of Letters, it can be seen to create the concept of a literary field. It marks boundaries, invents new languages, even new genres (is the novel always a criticism of its own genre?). Is it only the practitioner of an art who is competent to write the criticism of that art? How does the concept of critical thought evolve over the Long Eighteenth Century, and how does it mutate in the early Romantic period? Authors to be studied include: Racine, Perreaut, Voltaire, d’Alembert, Diderot, Rousseau, the natural scientists, Beaumarchais, Mercier, Stendhal, Hugo, Baudelaire.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.700. Flaubert’s L’Éducation sentimentale, a Prose Novel for Modern Time.
Undergrads need instructor permission. Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Éducation sentimentale edition required: GF Flammarion, 2003.
Instructor(s): J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.212.705. Fictions d’espace: geopoetique du roman de langue francaise.
En quoi consiste et par quels moyens se construit l’espace dans les fictions litteraires ? Quelles fonctions y jouent les toponymes, les descriptions de lieux ou les trajectoires des personnages ? Quels contrats l’écrivain peut-il passer avec son lectorat à l’égard du statut des espaces traversés et décrits, qu’ils se fondent sur le « réel » ou qu’ils soient fabriqués de toutes pièces ? Seront abordées dans cette introduction à la géopoétique narrative des œuvres de Balzac, Maupassant, Giono, Gracq, Duras, Chamoiseau, Sony et Echenoz entre autres.
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.
AS.212.707. French Documentary Filmmaking.
Overview of the history of French documentary filmmaking featuring works by Cavalier, Depardon, Epstein, Malle, Marker, Painlevé, Philibert, Resnais, Rouch, Simon, Varda, and Vautier. Emphasis will be placed on the rhetorical functions of editing and on the relation forged among filmmakers, their subjects, and the public. Extensive weekly viewing is required.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.719. Enlightenment and Revolution.
Writing Equality: the French Revolution. Enlightenment authors whose work is relevant to the Revolution (Montesquieu, Rousseau, Condorcet, etc.), Revolutionary authors and orators, and 19th-century authors like Balzac and Stendhal or historians like Tocqueville and Michelet who use literary topos to come to terms with the Revolution.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

Victor Hugo as a prominent figure in the Nineteenth Century France and in Europe, and in French Literature. Poetry, Novels, Theater, Essays, outstanding political involvement, we will examine all aspects of Hugo’s works and poetics, as action in History and Modern politics. Close reading of poems from Les Contemplations and La Légende des siècles, of Le Dernier jour d’un condamné and Les Travailleurs de la mer, of Hernani, and of Châtiments and some political discourses.
Instructor(s): J. Neefs
Area: Humanities

Throughout his life Rousseau presented himself by turns as the citizen of a Republic, a stateless outcast, the resident of a vanishing homeland of the heart, and the focal point of an international conspiracy. He invented new foundations for political communities that could never be implemented or were severely misunderstood during the revolutionary Terror. The families he portrayed were both patriarchal and defiantly anti-normative. He affirmed his desire to belong and insisted on his irreducible difference; he extolled friendship and engineered breakups. Through readings of Rousseau’s major political, autobiographical and fictional works we shall examine how and why communities, personal identity and citizenship are alternately built and destroyed. Course open to undergraduates.
Instructor(s): E. Russo

AS.212.743. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l’ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, À l’ombre des jeunes filles en fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor.
Recommended course background: At least 2 212.3xx courses

AS.212.750. Récits de la marge dans la littérature française depuis 1950.
Examen de romans et récits modernes et contemporains où la marge (géographique, ethno-sociale, sexuée) apparaît comme un lieu de parole spécifique. L’histoire longue de la figure du ‘zonard’ et du ‘jeune de banlieue’ permettra d’interroger les processus de légitimation littéraire et l’émergence de subcultures qui suscitent des postures esthétiques novatrices. Textes de Begag, R. Camus, Charef, Chraïbi, Clébert, Collard, Djaidani, Queneau...
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

From exoticist features of the 1920s and 1930s and political works of the 1960s, to family sagas and personal essays looking back on a conflicted past from the standpoint of the new century, Algeria has featured prominently in the French cinematographic imaginary. The independent North African nation has likewise produced compelling narratives that address the colonial legacy, the armed struggle for independence and its aftermath. Addressing from both sides of the Mediterranean an entangled political and cultural history, this course places in critical context conflicting screen representations as well as the institutions, individuals, and publics associated with them. The course will be taught in English, however most course materials will be in French. Undergraduates may take with permission of the instructor and completion of AS.212.333 and AS.212.334. Graduate students need not have completed the prerequisite courses.
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

AS.212.752. The Character Function.
What do we really mean when we talk about a character in a discursive work? What are the structuring, esthetic and heuristic functions of such devices? How has the concept of the character evolved from the early modern period to the present day? A sampling of the cases to be considered: Descartes, Leibniz, Marivaux, Racine, Diderot, Rousseau, Robespierre, Napoleon, Michelet, Zola, avatars and digital angels.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.768. Norms and Forms of Academic Communication.
How to write a book review, an article, a conference paper; how to choose the appropriate journal for publication.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.
AS.212.774. Classiques de la Renaissance.
In this seminar we will read two great classics of Renaissance France: Montaigne’s Essais (1580, 1588, 1595), a hodge-podge of erudite and powerfully introspective pieces of short prose; and Aubigné’s epic poem Les Tragiques (1616), written in response to the ravages of the civil war that torn France apart in the late sixteenth century. In addition to being two masterpieces of French prose and poetry respectively, Montaigne’s Essais and Aubigné’s Tragiques share a number of common features, such as rich intertextual ties with ancient literary models (from Plutarch, Virgil and Seneca to the Bible) and a complex genetic history resulting from multiple waves of textual revision, both in manuscript and in print. A close reading of these works will therefore allow us to address broader issues in literary theory and practice advanced techniques for textual analysis. Open to advanced undergrads
Instructor(s): S. Miglietti
Area: Humanities.

AS.212.778. Les écritures contemporaines aux confins des genres [Contemporary French Writing Beyond the Genres.
A critical survey of hybridized or mixed literary forms that have emerged in French-language writing since the postwar revolution of the New Novel and the materialist forays of the Tel Quel group circa 1968. What attitudes might be adopted toward texts that seemingly invent their own rules, refusing generic ascription even as they borrow freely from established narrative and poetic codes? How might we resist the temptation to view works of motivic reprise, pastiche, formal constraint, and intertextual weaving as symptoms or expressions of a disenfranchised postmodern condition, and endeavor instead to situate these texts in the contemporary moment, as elements of a vital cultural critique? Authors to be considered include Bon, Cadiot, R. Camus, Gavarry, Levé, Pérec, Quintane, Redonnet, J. Rolin, Simon, and Viel.
Seminar in French.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.781. L’entre-deux-guerres en toutes lettres [French Literature Between the Wars].
French literary culture between the wars (1919-1939) promoted the novel as a forum for social comment and formal experimentation alike. Questioning the psychological biases of the ‘roman d’analyse’ and reacting to the collective tragedy of the Great War, interwar writers updated the French language as well as narrative ‘technique’ in light of emergent theories (psychoanalysis, Marxism, phenomenology). Readings from Aragon, Breton, Céline, Cocteau, Colette, Dabit, Malraux, Némirovsky, Queneau, and Simonon.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.783. Diderot, Power and Representation.
A reading of some of Diderot’s major works in light of his struggle to break out of imposed and self-imposed hierarchies of style and manner, and to reframe or reform radically the relationship between ethics, politics, sexuality, gender and the arts. Special emphasis on Diderot’s self-representation as arbiter of taste, mediator and mentor.
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.

AS.212.784. Founding Myths: Literature, Historicity, and the Nation.
National identities often coalesce around historical events that acquire the status of “founding myths”. In this seminar, we will draw upon French history to discuss how literature and art (including cinema) can contribute to forging and crystallizing a series of identity-making myths. Cases to consider include the burning of Joan of Arc in 1431, the massacres of St Bartholomew’s Day (1572), and the beheading of Louis XVI in 1793. By analyzing representations of these and other historical moments through a wide range of media, we will seek to penetrate the complex relationship between literature, fiction, and historicity in making national identity—a relationship that proves particularly problematic in the case of violent and divisive events such as those mentioned above. Among the authors studied will be Villon, De Thou, D’Aubigné, Marlowe, Shakespeare, Voltaire, Michelet, Dumas, Hugo, Brecht, Anouilh, Camus.
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.212.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism toward interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology, and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce, and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollock, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with AS.212.790, AS.214.790, and AS.215.790
Prerequisites: ;
Instructor(s): S. Strowick; J. Neefs.

AS.212.791. Film Theory and Critical Methods.
Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.
AS.212.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.212.801. French Independent Study.

AS.212.803. French Proposal Prep.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

AS.213.104. Freshman Seminar: Weimar on the Pacific: German Exile Culture in the United States. 3.00 Credits.
Freshmen seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film (Fritz Lang, Billy Wilder) to architecture (Richard Neutra, Rudolf M. Schindler), literature (Thomas Mann, Berthold Brecht, Lion Feuchtwanger), and philosophy (Theodor W. Adorno, Hannah Arendt). Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art, politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.229. Weimar on the Pacific: German Exile Culture in the United States. 3.00 Credits.
Taught in German. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film (Fritz Lang, Billy Wilder) to architecture (Richard Neutra, Rudolf M. Schindler), literature (Thomas Mann, Berthold Brecht, Lion Feuchtwanger), and philosophy (Theodor W. Adorno, Hannah Arendt). Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. Area: Humanities.

AS.213.237. Literature and Medicine. 3.00 Credits.
Taught in English. The course will analyze literary representations of illness as well as explore interfaces between literary and medical knowledge in more general ways. Both literature and medicine can be considered semiotics as they deal with the study of signs; further, both are invested in interpretation. We will analyze the relation between literature and madness, explore “illness as metaphor” (Susan Sontag) and discuss case studies in relation to literary genres (for example, Freud is surprised to notice that his studies on hysteria read like novels). As prominently depicted in Thomas Bernhard’s In the Cold and theoretically analyzed by Michel Foucault, the course will further address the nexus between medical institutions and power. Readings will include: Antonin Artaud, Thomas Bernhard, Georg Büchner, Michel Foucault, Sigmund Freud, Henry James, Franz Kafka, Thomas Mann, Daniel Paul Schreber, Susan Sontag, etc. Films: Philadelphia (Jonathan Demme, 1993), Melancholia (Lars von Trier, 2011).
Instructor(s): E. Strowick
Area: Humanities.

AS.213.251. Freshman Seminar: Friedrich Nietzsche. 3.00 Credits.
Nietzsche’s writings continue to inform contemporary thinking about morality, psychology, art, culture, and politics. He started out as a daring scholar of Greek antiquity, went on first to advocate and then to repudiate a grand project of cultural renewal, and eventually transformed his authorial persona into the site of an unprecedented theoretical experiment in which the most cherished ideals of Western culture were turned against themselves. In discussing his works we will focus on such themes as the struggle to affirm life in the face of the challenge of nihilism, modernity, cultural decadence, selhood and individualism, the status of nature, and the effort to overcome metaphysical thinking. Close attention will be paid to the strategies of writing through which Nietzsche negotiates the conflict between intellectual integrity and aesthetic appeal, truth and illusion.
Instructor(s): M. Dornbach
Area: Humanities.
AS.213.265. Panorama of German Thought. 3.00 Credits.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Krakauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.304. German Aesthetic Thought. 3.00 Credits.
Central to modernity is the idea that certain perceptual experiences are worth having for their own sake, even if they do not directly serve any moral, political or cognitive aims. Aesthetics emerged in the eighteenth century as a theory of such experiences, and among them especially of the beautiful and the sublime. It soon became increasingly concerned with questions regarding the significance of art as a privileged realm of human production and experience. In the German-language intellectual lineage that begins with Kant, aesthetics moved from the margins of theoretical attention to its very center, where it could engage with some of the most pressing dilemmas of modernity. We read excerpts from relevant theoretical texts (Kant, Schiller, the early Romantics, Hegel) as well as texts that perform model cases of aesthetic reflection in relation to concrete works of art (Lessing, Kierkegaard, Nietzsche, Benjamin, Adorno).
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.305. Contemporary German Film. 3.00 Credits.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmark’s The Lives of Others (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s Head-On (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s Goodbye, Lenin! (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or Nouvelle Vague Allemande. Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 – discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.308. Schweigen in der Familie. 3.00 Credits.
We will study the psychic afterlives of involvements in WW1, National Socialism and the state security service of the GDR. In particular, we will focus on (auto-)biographical and documentary-film examinations of perpetrators in the family. Within the family, these stories are often shrouded in silence but nevertheless handed down across generations in powerful, less-than-explicit, and often distorted ways. Drawing on philosophy and psychoanalysis, we will discuss how the need for silence meets the need to hear and to talk. Recommended Course Background: AS.210.362.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.309. Walter Benjamin and His World. 3.00 Credits.
All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.
AS.213.310. Classic German Theater. 3.00 Credits.
Taught in German. In this seminar we will read some of the most important plays of German literature, by Lessing, Goethe, Schiller, Kleist, and Büchner. We will explore questions about the role of the theater toward the education of mankind in the spirit of the enlightenment. We will examine how tragedy is reconfigured around the context of the bourgeois family. We will study historical practices of stage production as well as modern filmic and theatrical productions. Finally, we will prepare an informal staging of a play.
Prerequisites: AS.210.361
Instructor(s): K. Pahl
Area: Humanities.

AS.213.312. Contemporary German Literature (1970 to the present). 3.00 Credits.
The seminar examines the way cultural and historical topics are presented in contemporary German literature. The selected texts originate in different national contexts (Swiss, Austrian, German, German-Turkish, German-Japanese) and deal with questions concerning the representation of national, cultural, and individual identity. We will explore how the texts (de)construct these identities through narrative structures and will contextualize these structures with respect to recent theories of (trans)cultural identities. Authors include: Eugen Gomringer, Yoko Tawada, Terézia Morá, Thomas Härlimann, Martin Suter, Christoph Schlingensief, Max Frisch, Günter Grass, Thomas Bernhard, Maxim Biller, and Thomas Meinecke. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.313. Heidegger's Being and Time and Rectify. 3.00 Credits.
This course will introduce students to Heidegger's seminal work as seen through the lens of the TV series Rectify, which considers what it means to be “thrown” into the world and how we construct a meaningful horizon for our experiences. We will explore some of the fundamental concepts in Being and Time, including care, projection, fallenness, affect and time, and being-onto-death, and consider how these same issues are taken up in Rectify, which as a TV show has to develop its own visual vocabulary to explore the structure and nature of being in the world. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.319. Who Thinks Abstractly? Fundamentals of Critical Theory. 1.00 Credit.
This course provides students with a foundation for as well as a brief introduction to Critical Theory. While paying close attention to the texts and the form in which they present themselves, we will explore major concepts such as dialectics, metaphysics, and freedom. Students can expect to gain familiarity with historical works that have proven immensely influential in modern Europe and beyond, but will also be expected to consider ways in which such thinking has relevance for today's world. Papers dealing directly with ideas from two of the four main units will be required. All texts will be available through Blackboard except Adorno & Horkheimer, Dialectic of Enlightenment. "Additional" readings are flexible and can be tailored to the interests of students.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.322. Museums and Jews, Jews in Museums. 3.00 Credits.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.324. What is Jewish Culture?. 3.00 Credits.
We talk about Jewish literature, music, and art—but can a book, or a song, or a painting be Jewish? We will examine the premises of this question and the many answers that have been formulated in response to it focusing on modern European (and some American) culture. Jewishness as it relates to human identity has been conceived of as related to religion, ethnicity, race, nation, language, geography, and politics. But these keywords have also been used to engage with the question of the Jewish identity not of a person, but of a cultural product. To understand the implications of calling, say, a book Jewish, we will examine the history of the concept of culture and its emergence in the context of the formation of modern Jewish identity. We will examine theoretical and literary texts originally written in German, Yiddish, Hebrew, and English, as well as painting, photography, film, and architecture from Europe, Israel and the Americas. We will aim to arrive at an understanding of the ways that the idea of culture intersects with the formation of Jewish identity in modernity. All readings will be in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.329. Berlin Ost-Ost-West. 3.00 Credits.
Today's Berlin is a nerve center with strong impulses from Russia, Ukraine, Turkey, Vietnam, India, and other Eastern countries. Through contemporary literature and film, we will explore Berlin's role in a globalized world: how Berliners resist, embrace, or simply describe the influx of people from Eastern countries; how West-Berliners have re-oriented themselves after the fall of the wall; how the majority adapts to the minorities; and how some migrant authors rework the German language by experimenting with translanguaging. By way of literary and filmic analysis, we will inquire if borders or limits can play a productive role; how the history of the divided city figures in the imaginary of immigrant authors; and how, for example, Turkish-German or Russian-German writers inscribe the tensions between East- and West-Berlin into a larger discourse on global East-West relations.
Recommended Course Background: AS.210.362
Instructor(s): K. Pahl
Area: Humanities.

AS.213.330. “What is an Image?” - Technology, Art and Visual Culture around 1900. 3.00 Credits.
Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Instructor(s): J. Schade
Area: Humanities.
AS.213.331. Detective Fiction in its Nascence. 3.00 Credits.
Although Edgar Allen Poe is often called the father of detective fiction, this assumption is not entirely correct. Sixty years before Poe published his "Murders in the Rue Morgue," Schiller wrote the novella "Der Verbrecher aus verlorenen Ehre," which was decisive for the development of the genre in Germany. Schiller's novella carried the subtitle, "Eine wahre Geschicht," which underscored the tension between "true" events and "probable" circumstances which is characteristic of detective fiction in general. In this course we will examine the competing notions of truth (Wahrheit) and probability (Wahrscheinlichkeit) at play in German detective fiction from the eighteenth to nineteenth century. We will explore why the romantics emphasized truth as a defining feature of literature and how the realists replaced this notion with verisimilitude. Authors to include: Schiller, Kleist, Tieck, Hoffmann, Droste-Hülshoff, Fontane, Storm, Paul Heyse, Richard Alewyn. Reading and discussion in German.
Instructor(s): R. Tobias
Area: Humanities

AS.213.336. Dancing About Architecture: Jewish Humor and the Construction of Cultural Discourse. 3.00 Credits.
Are all Jews funny, or only the ones from New York? This course will be an advanced-undergraduate examination of literary, theatrical, cinematic, and televised representations of Jewish culture focusing on the construction of cultural discourse through comedy. Taking as a point of departure Sigmund Freud's Jokes and Their Relation to the Unconscious, we will consider the joke as a mode of narration and cultural coding with specific resonances for the Jewish encounter with modernity. Among the topics to be addressed in this course will be the origins of modern Jewish humor in traditional modes of storytelling and study; the problems of anxiety and otherness articulated and neutralized through humor; the significance of Jews in creating popular culture through the mass media (particularly though not exclusively in the United States) as well as the role of these mediums in transmitting and translating Jewish references to the general culture; the status of the Yiddish language as a vehicle for satire and a vehicle of resistance between tradition and modernity; the uses and abuses of Jewish stereotypes and the relationship of Jewish humor to anti-Semitism; the connections between Jewish humor and other modes of minority discourse; and the question of translation of Jewish humor both from Yiddish into other languages and from the Jewish "in-group" to a "post-ethnic" audience. Authors and performers to be examined will include Avrom Goldfaden, Sholem Aleichem, Franz Kafka, Dzigan and Szumacher, Lenny Bruce, the Marx Brothers, Mel Brooks, Phillip Roth, Woody Allen, Larry David, Sarah Silverman, and the Coen Brothers. All readings and discussions conducted in English.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.345. Healing and Health Beyond Theology. 3.00 Credits.
Nietzsche argues in The Gay Science that to bring about a new day we need a new health—"great health," as he calls it, that enables us to surmount the sickness of our age and transcend ourselves. However, much of an iconoclast Nietzsche considered himself to be, his idea of "great health" fits squarely within a theological tradition that claims that the condition for becoming a member of the ecclesia is faith, which cleanses the individual of sin and restores him to his original state. This course will examine the theological inheritance that has and continues to shape the notion of sickness and health dominant even in secular contexts, where well-being would seem to be regarded as a condition of the body rather than of the spirit. Reading to include works by Nietzsche, Kierkegaard, Augustine, Tillich, Heidegger, Scholtem, Tolstoy, Büchner, Flaubert, and Kafka. Taught in English.

AS.213.348. Picturing Jews: Representing Jewish Identity in Modern Art, Film & Literature. 3.00 Credits.
This course will consider the different ways Jewish identity has been represented in the 19th and 20th centuries, focusing primarily on Central and Eastern Europe. Race, nationalism, religion, language, geography, politics—all helped shape different ways of understanding just what it meant to be a Jew, and all found expression in art and literature by both Jews and non-Jews. Looking at texts originally written in German, Yiddish, and Hebrew, including prose, poetry, journalism and drama, as well as painting, photography, graphic design, architecture, and film we will gain an understanding of the range of ways that Jewish identity could be understood and expressed as well as of the ideological stakes and historical contexts of such representations. Writers and artists examined will include Chagall, Kafka, Sholem Aleichem, and Bialik. All readings will be in translation.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.349. Weimar Cinema: The Golden Age of German Film. 3.00 Credits.
Taught in German. German cinema of the 1920s is regarded as one of the golden ages of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception; Expressionism in film; technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): E. Strowick

AS.213.354. Introduction to German Poetry. 3.00 Credits.
This class will introduce students to German poetry from the eighteenth to the twentieth century. We will read selected poems by Goethe, Eichendorff, Mörke, George, Hofmannsthal, Rilke, Trakl, Celan, and Bachmann. In addition we will read several theoretical essays by poets and literary critics alike which examine the lyric form and the curious world that poetry constructs. Readings and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.
AS.213.356. Goethe. 3.00 Credits.
This seminar offers an introduction to the work of Goethe (1749-1832) who is one of the most prominent figures in the history of German literature and thought and according to T.S. Eliot ‘one of the wisest of men’. Tracing this wisdom through selected poems, prose, plays and essays, we will closely analyze the fascinating complexity of an oeuvre that reflects Goethe’s interdisciplinary interests in the aesthetic, philosophical, and scientific discourses and controversies of his time. Readings will include: Prometheus, Goetz von Berlichingen, Faust I, The Sorrows of Young Werther, Iphigenia in Tauris, Novella, Metamorphosis of Plants, Theory of Colours etc. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.358. German Pop Culture. 3.00 Credits.
Taught in German. The term "pop(ular) culture" designates cultural products and practices that are disseminated as ‘mass culture.’ Pop culture is accessible to many and deals with objects and materials that circulate in the everyday life of a society; it functions, one might say, as a cultural archive of the present. In contrast to high culture, pop culture enjoys an ambiguous reputation: It represents the cultural mainstream, functions as an easily consumable commodity and promotes the marketing of dominant ideologies, in the view of critical theory. However, more recent debates within cultural studies discuss pop culture as a site of social-symbolic conflicts and subversive forms of reception. Against this background, the seminar examines pop-culture phenomena in Germany after 1950, including the cult object: soccer, popular film and TV ("Tatort"), German pop music and hits (from "Hitparade" to "Rosenstolz" and beyond), recent pop literature after 1990 (Sibylle Berg, Rainald Götz, Thomas Meinecke). At the center of the analyses are questions related to the historical and political situation of pop culture, its specific aesthetic processes, and the (critique of) ideology performed by these processes.
Prerequisites: AS.210.361[C] AND AS.210.362[C]
Instructor(s): A. Krauss
Area: Humanities.

AS.213.359. Kleist. 3.00 Credits.
Heinrich von Kleist was one of the most intriguing literary figures of the early nineteenth century in Germany. Neither Classicist nor Romanticist, he developed a unique style that combines such different elements as complex rhythmicality, drastic imagery, and philosophical precision. His novellas, plays, and nonfiction prose explore questions of gender, colonialism, the tragic, and of innocence and double dealing. Among the texts we will read together are The Betrothal in St. Domingo (Kleist’s literary response to the Haitian revolution), Penthesilea (the play about lovers who can find each other only in war ends in a splatter scene), and Marquise of O (the story of a woman whose father rejects her because she finds herself pregnant, and yet she has no memory of the sexual intercourse that must have led to her current situation). Language of Instruction: German
Prerequisites: Pre-req: AS.210.362
Instructor(s): K. Pahl
Area: Humanities.

AS.213.361. The Holocaust in Film and Literature. 3.00 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.368. German Political Thought. 3.00 Credits.
This course will introduce students to major figures in German political thought from Martin Luther to Karl Marx and Immanuel Kant to Carl Schmitt. The class will explore such issues as the notion of sovereignty, the relationship between church and state, the theory of parliamentary democracy, and the political and economic ramifications of liberalism. Reading and discussion in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.369. Dada's Ideologies: Literature, Art, & Politics. 3.00 Credits.
This course will examine the literary and political theories implied in, and encountered by, Dadaist works and praxes. Particular attention will be paid to Dadaist confrontations with the growth of modern mass media, the politics of World War I, and consumerist capitalism in the wake of Taylorism and Fordism. Readings include major Dadaists as well as Althusser, Benjamin, Debord, Gramsci, Irigaray, Lukács, Marx, Saussure, among others.
Instructor(s): J. Pelcher
Area: Humanities.

AS.213.371. Kafka and the Kafkaesque. 3.00 Credits.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term “kafkaesque” refers to the unique character of a literary universe that is perceived as both eerie and hilariously comical. Among the texts we will read together are The Trial, Metamorphosis, Amerika (Kafka’s semi-autobiographical novel about an American family in Berlin), and The Castle. Language of Instruction: German
Prerequisites: Pre-req: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.
AS.213.375. Landscapes in Crisis: Perspectives of Modern Subjectivity. 3.00 Credits.
In crisis, groups and individuals face economical, environmental, physical or political necessities creating a critical status that ultimately hints towards a loss of something valuable: health, freedom, security, wealth, ... One might say, in a crisis, the outlook is grim. This seminar will focus on the one who is looking — the subject that produces the outlook and that we consider a critical thinker. The critical thinker is a rather new phenomenon, it is strongly tied to a freedom of thought that allegedly allows us to paint and frame our own worldview. We will work with the emergence and variations of landscape from 14th century painting to late 20th century film, with an emphasis on historical turning points such as the French Revolution, the two world wars and the fall of the 'iron curtain' that led to today's world order. Writers, directors and painters will include, among others: Peter Brueghel the Older, Jean Jacques Rousseau, Edgar Allan Poe, John Dos Passos, Peter Weiss, Michel Foucault, Werner Herzog, Wim Wenders. All media and discussions in English.
Instructor(s): M. Heim
Area: Humanities.

AS.213.376. Art in Literature. 3.00 Credits.
Discussion in German. Since the Enlightenment, works of art have played a prominent role in literary texts, providing an occasion for texts to reflect on their status as art and to explore the possibilities and challenges unique to aesthetics. In this course we will examine novelas and poems that refer to paintings or other works of art to illuminate the nature of art and to reflect on phenomena that have no place in any other discourse.
Readings to include works by Lessing, Eichendorff, Storm, Mörike, Adrian, Freud, and Hofmannsthal.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): R. Tobias
Area: Humanities.

AS.213.383. Jewish Travel Literature. 3.00 Credits.
Exile; Diaspora; Wandering; Refugee; Immigrant—these are all keywords that have been closely associated with Jews and the Jewish experience. What binds them all is movement, whether individual or communal, voluntary or involuntary. This course will examine the connection between movement and Jewish culture and history through the various forms of Jewish travel writing. In looking at depictions of travel both fictional and historical from the Middle Ages to the 20th century we will revisit and interrogate many of these keywords to understand the ways they have been deployed to understand Jewish identity in literature and beyond. A central point of consideration will be the role of travel in shaping conceptions of Jewish identity as well as Jewish literature in the modern period. We will examine novels, short stories, reportage, and travelogues describing real and imagined journeys from and to Asia, the Middle East, Europe, and America. All readings will be in English translation, primarily from sources in Yiddish, Hebrew, and German.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.387. Major City, Minor Literature? Berlin in German-Jewish and Yiddish Literature. 3.00 Credits.
Between the two World Wars, a period of intense artistic and intellectual vitality, Berlin was an international center for theater, visual arts, and literature. Many important Yiddish-language writers were drawn to Berlin and, together with their German-language counterparts, produced a body of literature that explores issues of modernity and identity. By comparing works in Yiddish and German, we will learn about inter-War Berlin's cultural diversity and richness, while also gaining insight into the particular issues of writing about Jewish identity in the 1920s, and the implications of writing in a minor language (Yiddish). We will read works by authors including Joseph Roth and Alfred Döblin in German, and Moyshe Kulbak and David Bergelson in Yiddish. All texts will be in translation. Some questions we will explore include: • What is a minority/minor language or literature? • How did German and Yiddish interact in cultural and social spheres? • Can texts in different languages comprise a single body of literature? • What did it mean to be German and what did it mean to be Jewish? • Are assimilation and hybridity useful concepts? • Is there such a thing as Jewish modernism? • How did literature of the period respond to the rise of the Nazi party and the intensification of antisemitism?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.407. Museums and Identity. 3.00 Credits.
This course will explore the phenomenon of the "identity" museum through case studies involving Jewish and Holocaust museums around the world. The museum boom of the last half-century has centered in large part around museums dedicated to the culture and history of particular minority groups; recent notable (and relatively local) examples include the brand new National Museum of African American History and Culture in Washington and the National Museum of American Jewish History in Philadelphia. Our understanding of the contemporary theory and practice of such museums will be based on an examination of the history of the various museological traditions that engage Jewish identity from the 19th century to the present, including the collection and display of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. We will deal with two primary museological phenomena: first, the introduction of the "primitive other" into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. We will explore these topics through historical documents, theoretical readings, and case studies including visits to nearby museums. All readings in English.
Instructor(s): S. Spinner
Area: Humanities.
AS.213.433. Fictional Autobiographies and Autobiographical Fiction. 3.00 Credits.
This course will examine fictional works that pose as memoirs or autobiographies, which is not a genre unique to the twentieth century but which rose to prominence in the modern period as a result of historical developments. We will consider the aesthetic presuppositions that gave rise to the novel and culminated in the great realist narratives of the nineteenth century that claimed to do nothing less than represent real life situations. Novels such as Robert Walser’s Jakob von Gunten, Thomas Mann’s Felix Krull, Bernhard’s Auslöschung, Beckett’s Malone Dies, and Coetzee’s Waiting for the Barbarians call these assumptions into question by focusing on the inner life of a hero who lives only in writing and writes to live. Fictional autobiographies provide a fertile ground for reconsidering such issues as what it means to tell a story and whether life takes the form of a story, which have gone unaddressed in narrative theory.
Instructor(s): R. Tobias

AS.213.597. German Lit Ind Stdy-Summer. 3.00 Credits.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

This course will consider the link between modern fiction and melancholia, which on the one hand seems obvious given the overriding mood of many modern narratives by Beckett, Sebald, Bernhard, Krolow, among others and which on the other hand poses numerous interpretative challenges given the sparing nature of representation in modern fiction and the attachment to things in melancholia. What is the aesthetic sensibility associated with melancholia? Is melancholia limited to baroque representation? How can we conceive of attachment in the absence of things? Readings to include Freud, Benjamin, Adorno, Heidegger, Sebald, Beckett, Bernhard, and Hofmannsthhal.
Instructor(s): R. Tobias
Area: Humanities.

We will read texts by Freud, Klein, Lacan, and Laplanche that are of particular interest for literary and social theory. We will discuss recent literary theory and criticism (especially queer literary theory and criticism) that draws on psychoanalysis. In addition, we will consider psychoanalytically inflected thought on sexuality and conformism by members of the Frankfurt School.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.611. The Baroque and Its Afterlives.
The status of the Baroque as defined and discussed by theorists such as Walter Benjamin and Gilles Deleuze, preeminently, manifests itself in a melancholic preoccupation with relics, ruins, and allegory. As such its aesthetic originates at a cosmological fault-line between life and death. Given these metaphysical characteristics, it should come as little surprise that its subsequent influence on literary modernism constitutes itself in echoes, spectrality, fragmentation, and the grotesque, all of which function as modes of critique working through and against technologies and ideologies of modernity. The fate of the Baroque, in an aptly non-Euclidean baroque figure, both parallels and intersects with the status of other proto-modern discourses such as the carnival in the articulation of the gothic, symbolism, expressionism, and several varieties of modern fantasy. This seminar will discuss one of many possible trajectories for this aesthetic in drama, narrative, and critical theory. Beginning with authors such as Shakespeare, Grimmelshausen, and Calderón de la Barca, we will consider works such as Mozart’s Don Giovanni, the tales of Reb Nahman and E.T.A. Hoffmann, the fiction of Gérard de Nerval and Der Nister, the critical writing of Theodor Adorno and Jacques Lacan, and films such as Fritz Lang’s Metropolis or the recent adaptation of Coriolanus. All readings and discussions in English.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

This course will explore the aesthetic-political practices of literatures and manifestos grouped under the term historical avant-garde. According to the most general understanding, avant-garde is considered the critique of bourgeois culture and ‘traditional’ art concepts, with this critique being related to a fundamental crisis of bourgeois society. The seminar aims at developing a more specific perspective by discussing the following aspects of avant-garde poetics: the self-reflection of aesthetic discourse in regard to the definition and hierarchization of styles and genres; a theory of language that draws on rhythm and materiality; an aesthetics of production which questions the notion of authorship and ‘organic work’ and stresses instead the constitutive role of repetition, (inter-)medial) variation, and chance; the critical intervention in the concept of aesthetic autonomy and its institutions of reception; the “aporias of the avant-garde” (Enzensberger) inherent in its concept of radical innovation and exceptionality. In order to highlight the theoretical implications of avant-garde poetics we will analyze its literary strategies with respect to contemporary debates on modern technologies of art reproduction (Benjamin), the psychoanalytic reframing of the subject, and the advent of literary structuralism/formalism (Jakobson). In addition to that, we will discuss classics of avant-garde scholarship (e.g., Peter Bürger). Authors include: Paul Scheerbart, Hugo Ball, Tristan Tzara, Hans Arp, Carl Einstein, Else Lasker-Schüler, the ‘Sturm-Kreis’, and Arno Holz.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.
AS.213.613. Hermeneutics around 1800 (from Hamann to Büchner).
With Schleiermacher, hermeneutics defined itself as a universal theory of
understanding which no longer focuses only on biblical and juridical
exegeses but on linguistic utterances in general. It thus became the
matrix for subsequent Geisteswissenschaften and paved the way for
various critical approaches which even today remain highly influential.
The course examines the genesis of modern hermeneutics through
the lens of its philological and philosophical precursors, contemporary
commentators and literary authors. Key issues will be the underlying
concepts of textuality and language, historicity and the subject.
Authors include: Chladenius, Meier, Hamann, Herder, Kant, Schlegel,
Schleiermacher, Goethe, Rahel Levin Varnhagen, Jean Paul, Büchner.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

Kleist’s novella “Michael Kohlhaas” (1811) is as much a political parable
as it is a meditation on the power of art. In it the Prussian partisan
considers the right of resistance as expressed in the struggles of
Kohlhaas, whose battle against the House of Saxony would have been
recognized by contemporary readers as an allegory for the Prussian
struggle against Napoleon’s occupying army. Kant’s short treatise “Über
den Gemeinspruch: Das mag in der Theorie richtig sein, taugt aber nicht
in der Praxis” (1793) had revived the debate about whether a revolt could
ever be justified, given that justice depends on the existence of a state.
But “Michael Kohlhaas” is also concerned with another kind of revolt that
is arguably more arbitrary, in that it does not serve any end. It is the revolt
of art, which overturns existing norms and conventions by establishing
a new law: the law of art or what could be called poetic justice. Kleist’s
text makes a case for the autonomy of art in the literal sense. Art is
self-legislating, a law unto itself, and this feature points as much to the
potential as to the danger of art. Readings to include works by Kleist,
Martin Luther, Pufendorf, Breitinger, Kant, Goethe, Tieck, and Adorno.
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

The seminar will investigate when and in which ways theatrical
space was interpreted as a shelter for the fleeing. Starting with Greek
tragedy and ending with Elfriede Jelinek’s postdramatic text “Die
Schutzflohenden” we will discuss the relations between the institutions
of theater and drama and political concepts of Asylum from a historical
perspective. We will proceed on the basis of the idea that the stage offers
temporary protection where refugees stop their journey, argue their case
and expect a decision. Reading Aeschylus, Euripides, Goethe, Brecht
and Jelinek, we will analyze different theatrical set ups and procedures
in which the precarious state of the fleeing is and has been negotiated
on stage. We will also deal with recent theater projects which open the
stage to refugees and give them a platform outside Immigration offices.
Reading Benjamin and Florens Christian Rang we will also discuss how
the relationship of Asylum and theater is reflected in modern theory of
tragedy.
Instructor(s): E. Vogel
Area: Humanities.

AS.213.625. Life Worlds: Literature and Phenomenology.
This course will examine the notion of life-world or Lebenswelt, as it
increasingly comes to define the nexus of relations that characterize
not only human experience but also works of art. A particular interest
of the course will be how phenomenology expands our understanding of
literature and the critical methods used to approach it. While the
reading for the course will be drawn primarily from philosophy, we will
also consider poems by Georg Trakl and Rainer Maria Rilke with an
eye toward the poetic space they open. To what degree is the space
we inhabit with its network of meanings a literary space according to
these poets? Readings to include excerpts from: Dilthey, Einleitung in die
Geisteswissenschaften; Husserl, Ideen (1913); Krisis der europäischen
Wissenschaft; Heidegger, Sein und Zeit; Merleau-Ponty, Phenomenology
of Perception; The Visible and the Invisible; and Käte Hamburger, “Die
phänomenologische Struktur der Dichtung Rilkes.”
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.213.629. The Art of Framing.
Frames and Framings in art and literature are aesthetic means of
creating focus. They draw a distinction between interiority and exteriority,
foreground and surroundings; they cut out segments from space-time
continuum and thus provide basic instruments of orientation, they
constitute pictorial representation as well as the compositional structure
of literature. From an epistemological perspective one can say that
frames create a paradoxical threshold in-between which facilitates both
the differentiation and transgression of spheres. It is further remarkable
that frames while spectacularly making visible something specific at the
same time expose the instances of their own ‘showing’: by implementing
frames representation observes itself in the very process of representing.
Through constellating systematic and historical readings the seminar
will analyze theoretical concepts of frame and framing (Simmel, Genette,
Marin, Derrida) and at the same time explore the transformation of frame
forms and functions in literature and aesthetic discourse between 1720
and 1830 (Brockes, v. Haller, Wieland, Lessing, Herder, Lichtenberg,
Goethe, Moritz, Jean Paul, Schlegel, Brentano, Tieck, Hoffmann). Among
the topics to be discussed will be the conceptualization of subject-
object relations as an analytical tool to reconstruct how the organizing
principles of framing in Enlightenment (point of view, Guckkasten,
chain of pictures, landscape/camera obscura) drift into the twilight
of epistemological reflection: Around 1800 frame structures (and its
doublings/transgressions) present the Produzierende mit dem Produkt
and thus articulate the insights of transcendental philosophy, they turn
into a medium of romantic irony.
Instructor(s): A. Krauss
Area: Humanities

The seminar will explore to what extent Hegel can be read as contributing
to a feminist philosophy. We will focus on Hegelian openings onto
the emotional in Phenomenology of Spirit. In addition, we will study
feminist philosophers who have drawn on or offered critical readings
of Hegel (Irigaray, Butler, Cavarero, Malabou, and others). Co-listed with
AS.190.633
Instructor(s): J. Bennett; K. Pahl
Area: Humanities
Writing Intensive.
AS.213.635. Anthropology and Modernism.
This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of “culture.”
Instructor(s): S. Spinner
Area: Humanities.

AS.213.650. Poetic Thought.
This course will examine essays and poems by Goethe, Hölderlin, and Rilke with an eye toward the ways in which their work addresses issues central to German Idealism and modern German thought. These include the relation of subject to object; the problem of the representation of the whole; the reconciliation of science and art; and the role of consciousness in the construction of the world. Readings to include texts by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer, Henrich, Husser, Benjamin, Szondi, and Allemann.
Instructor(s): E. Forster; R. Tobias
Area: Humanities.

AS.213.656. Thinking of the Environment.
Few concepts are more anthropocentric than the environment. Although the term is usually invoked to describe what is other than the human being, it places the human at the center of the universe by defining nature as the world surrounding him. This course will examine several literary and philosophical texts from Novalis to Celan that approach nature as a sphere alien to thought, which can never be known except through the rhetorical device of prosopopoeia, which gives face to what is inhuman. Readings to include works by Novalis, Schlegel, Tieck, Stifter, Rilke, and Celan.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.664. Dirt.
Near the outset of Büchner’s “Lenz,” the protagonist seeks to impress himself into the earth, “[E]r dehnte sich aus und lag über der Erde, er wühtete sich in das All hinein, es war eine Lust, die ihm wehe tat.” This course will examine the desire to merge with the surface of the earth and to become a planetary body, at once utterly material and utterly ethereal. The earth’s crust will emerge as the interface between cosmic forces and human existence, the atmosphere and the pedosphere. We will consider how history, biography, and geological time intersect in dirt, or what William Bryant Logan has recently called the “ecstatic skin of the earth,” in texts by Goethe, Alexander von Humboldt, Novalis, Nietzsche, Büchner, Walser, Rilke, Kafka, and Sebald.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.668. Kleist.
This seminar will explore the narrative, dramatic, theoretical and quasi-journalistic work of Heinrich von Kleist along two lines of inquiry. We will read his literary experiments as reactions to the major shift in the sex-gender system and the new deployment of sexuality in the eighteenth century. We will discuss his unique role in the production, communication and interpretation of feeling across narrative and theater.
Instructor(s): K. Pahl.

AS.213.670. Theories of the Human in German Modernity.
Fifty years ago Michel Foucault advanced the influential argument that modern thought foundered on the circular undertaking to ground the possibility of human knowledge in actual knowledge of the human being. We survey various conceptions of the human developed in German modernity with a view to Foucault’s diagnosis. Against the background of pre-modern and early modern conceptions of the human, we focus on the tradition of anthropological thinking inaugurated by Herder, including spin-offs of German idealism in the writings of the later Schelling, Schopenhauer, and Marx. We consider the rivalry between twentieth-century philosophical anthropology (Plessner) and Heideggerian fundamental ontology, Hans Jonas’ phenomenology of the human, as well as recent disputes regarding the significance of the human standpoint.
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.673. Adorno’s Aesthetic Theory.
The posthumously published Aesthetic Theory is arguably Adorno’s most important work. In it he traces the development of autonomous art and locates art’s critical potential in its freedom from all notions of utility or purpose that derive from other spheres of life that are themselves corrupted by instrumental reason. We will examine Adorno’s analysis of art’s unique capacity to challenge conventions and produce new, if ephemeral, configurations. Discussion to focus on such concepts as illusion (Schein), mimesis, non-identity, myth, and truth content.
Instructor(s): R. Tobias.

Modernity gives rise to various forms of suspicion, including modern forms of resentment and practices of self-discipline (a suspicion of oneself), as well as to an epistemology of suspicion as it is developed in the modern human sciences. The course starts out with an analysis of the detective genre and of the specific transformations it undergoes in modern German literature. In a next step, we will examine literary representations of suspicion within a broader cultural-historical frame: Nietzsche’s analysis of resentment serves as one point of reference; another is what Carlo Ginzburg has called the paradigm of clues. The modern human sciences, since the last third of the 19th century, have relied on a method that produces knowledge by way of interpreting clues. While suspicion in the human sciences is related to the production of truth, literature uses suspicion as a way to produce aesthetic and logical undecidabilities. We will analyze literary representations of suspicion with respect to the narrative structure (unreliable narration) and the mediality of suspicion. Finally, the course emphasizes the methodological relevance of suspicion: As a practice of deciphering, interpreting, and reading traces, suspicion calls for being reformulated literary-theoretically. Readings will include: Heinrich von Kleist, E. T. A. Hoffmann, Nietzsche, Theodor Fontane, Freud, Kafka, Thomas Mann, Heimito von Doderer, Peter Handke etc. Taught in German
Instructor(s): E. Strowick
Area: Humanities.
Though every conventional description of modernist aesthetics dates its origins to the era preceding World War I—in some versions several decades before 1914—there has always been an understanding of the War’s “catalytic” influence on the aesthetic of chaos, madness, violence, and despair that comes to characterize at least one major strain of modernistic art. Taking the after-effects of the First World War as well as the Russian Revolution(s) as its point of origin, this graduate-level seminar will consider such writers as Sigmund Freud, Walter Benjamin, Sh. Y. Agnon, Sh. Ansky, Guillaume Apollinaire, Isaac Babel, Georges Perec, Erich Maria Remarque, Joseph Roth, Virginia Woolf, and Stefan Zweig. All readings and discussions available in English.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.
AS.213.685. Theories of Translation (1530/1930).
Taught in German. It is one of the topoi of literary studies that translation presupposes interpretation and is thus bound to certain discursive premises. To investigate specifically how this connection between translation and interpretation has developed historically and is embedded in concerns of philosophy of language, the seminar reconstructs concepts (politics) of translation from Luther to Benjamin and Buber-Rosenzweig. One of the focal points is the emergence of a modern theory of representation between 1730 and 1820 (Gottsched, Venzky, Hamann, Herder, Schleiermacher), the effects of which are staged with the aid of different Shakespeare translations (Wieland, Lenz, Schlegel). Finally, by including more recent theories of translation from the milieu of deconstruction/post-structuralism, the seminar seeks to reconsider the standpoint of translation and translation from that of interpretation.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.
AS.213.689. Creativity.
Modernity requires creativity of the artist. But what does this mean? Creativity has been thought of as a gift, but also as a technique or an attitude that can be developed. It thus moves between the mysterious, the mechanical, and the relational. While creativity was of little importance for the normative poetics (Regelpoetik) of the Baroque, the Enlightenment demanded an emancipation from external rules, which led to the apotheosis of human creativity in the idea of the genius. Countering overly idealistic notions of autonomy and human artistic agency, others cultivated practices that acknowledge and even amplify the role of chance. This seminar will focus on the eighteenth and early nineteenth centuries and invite contributions on more recent poets from its participants. Particular emphasis will be placed on interrogating the roles of the imagination, phantasy, and visualization in the creative process.
Instructor(s): K. Pahl
Area: Humanities.

Readings and discussions in German. This course will be organized around a close reading of “Aus meinem Leben: Dichtung und Wahrheit,” one of the many works of Goethe that was enthroned as prototype of a genre: discourses on modern autobiography emerged in its context and have drawn on its unique performance of writing one’s own life until today. The seminar is devoted to develop a reading of the entire book emphasizing its theoretical implications (subject formation/Bildung, concepts of time/historicity, modes of representation, genie theory, theory of the ‘daemonic’) and its prolific discursive productivity. Meticulously analyzing this productivity along with its epistemological implications, the seminar will explore how “Dichtung und Wahrheit” both establishes and revokes a representative model of autobiography.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.705. Hegel’s Phenomenology of Spirit.
We will study key passages of The Phenomenology of Spirit from a queer-feminist perspective and engage with some of the feminist scholarship on Hegel
Instructor(s): K. Pahl
Area: Humanities.

AS.213.706. Literature, Museums, Mimesis.
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities
Writing Intensive.

AS.213.718. Wirkliche Wirklichkeit: Eccentric Realism.
Taught in German. Categories such as the uncanny, motion, or seriality are not easily associates with German Realism. The course takes a fresh look at texts by Theodor Fontane, Adalbert Stifter, and Theodor Storm in order to explore the thesis of the modernity of Realism. We will analyze framing techniques, temporal structures (e.g. boredom or belatedness) as well as the interrelation between realist poetics and other discourses and media by which realist texts produce reality as perceived reality. The aesthetics and epistemology of Realism will further be discussed with respect to Erich Auerbach’s “Mimesis” and Roland Barthes “reality effect.”
Instructor(s): E. Strowick
Area: Humanities.
AS.213.741. Literature, Psychoanalysis, and Unassimilable Experience.
This course will consider experiences at the juncture between memory and forgetting, history and oblivion, narration and music. Such liminal experiences are frequently interpreted in psychoanalytic theory as trauma, though there is no reason that a purely negative definition should prevail. The suspension of the self and the concomitant immersion in the sensible world could just as well be regarded as an ecstatic experience. This course will examine the notions of immediacy, singularity, power, and sensuality in psychoanalytic theory (Freud, Lacan, Klein, Malabou) and beyond. Kleist’s “Die heilige Cäcile” and Kafka’s “Josefine, die Sängerin” will serve as touchstones for our exploration of the ecstasy that literature at once produces and reproduces as a verbal representation and musical medium.
Instructor(s): R. Pahl
Area: Humanities.

The course explores some aspects of the contradictory constitution of the modern subject as a split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citizen” or “citizen,” as the political subject. The bourgeois and the citizen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflicting relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias
Area: Humanities.

The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning and limitation? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias
Area: Humanities.

AS.213.760. Break and Continuity: German Thought around the French Revolution.
The turn of the eighteenth century saw the political revolution of 1789 as well as interrelated revolutions in thought, symbolic system, value system, family structure, gender relations, etc. We will explore the discourse of revolution in its oscillation between two conceptions – as breakthrough and as return (to the golden age of Greek Antiquity, to a prelapsarian state). From providence to chance event, and between break with and continuity of the old order, German thinkers considered the revolution. We will read Kant, Rousseau, Hölderlin, Hegel, Goethe, Kleist, and others.
Instructor(s): K. Pahl

This seminar addresses German-speaking exile literature from 1933 to 1950. On the basis of historical and political contextualization, readings and discussions will focus on literary theoretical and discourse analytical questions. In contrast to Nazi ideology and its totalitarian claim to constitute “Germanness”, numerous émigrés intended to represent the ‘other’ Germany from outside its national borders. This politicization of exile discourse which made ‘direct’ critical involvement with the regime appear imperative had a lasting effect on literature written in exile. The leitmotif of our analysis will be the question to what extent exile literature developed its critical reflection towards a specific aesthetics of exile; an aesthetics that articulates the reference to the historical-political situation, to Nazi Germany, expulsion, loss of language, dislocation and cultural transfer in form of a critique of representation. We will discuss topics such as the conceptualization of (German) tradition/transference, languages of (non-) identity, theories of (anti-)mimesis, discourse politics and aesthetics, or Avant-garde and exile. Authors include: Thomas Mann, Irmgard Keun, Else Lasker-Schüler, Hannah Arendt, Adorno, Benjamin, Brecht, Lukács, Anna Seghers.
Instructor(s): A. Krauss.

AS.213.790. What is Philology?
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. – In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more relevant discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bollack, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 214.790, and 215.790
Prerequisites: 
Instructor(s): E. Strowick; J. Neefs
Area: Humanities.
AS.213.791. **Film Theory and Critical Methods.**
Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.213.792. **GRLL SEMINAR/Fellini - Almodóvar.**
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., *The Great Beauty*). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ *Satyricon*, about the worshipping of the most important deity in late antiquity, Isis, in light of Fellini’s *Satyricon*; and Thierry Jonquet’s novel *Tarantula* and the French-Italian horror film, *Eyes Without a Face* (1960), which were both the basis for Almodóvar’s *The Skin I Live In* (2011). We will be reading Karen Pinkus’ *Montesi Scandal*, a unrealized screenplay about the birth of the Paparazzi in Fellini’s *Rome*, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.

Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias.

AS.214.171. **Freshman Seminar: Witchcraft and Demonology in Renaissance Europe. 3.00 Credits.**
Who were the witches? Why were they persecuted for hundreds of years? Why were women identified as the witches par excellence? How many witches were put to death? (Answer: 30-40,000, between about 1400 and 1800.) What traits did European witchcraft share with witch-mythologies in other societies? After the witch-hunts ended, how did “The Witch” go from being “monstrous” to being “admirable” and even “sexy”? Answers are found in history and anthropology, but also in literature, folklore, music, and the visual arts. After an introduction to ancient and medieval witchcraft, we will study European witch-persecution between 1400 and 1800. The second half of the course will concentrate on artistic representations of witches in media ranging from manuscripts to movies, concentrating on Italy, France, Spain, and Germany.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.176. **Freshman Seminar: Warrior Women from Ancient Times to Game of Thrones. 3.00 Credits.**
Dean’s Teaching Fellowship This course will trace the origins of the warrior woman from ancient times through today’s pop culture and reflect on the multiplicity of its social, cultural, and political ramifications.
Instructor(s): J. Gomez
Area: Humanities.

AS.214.261. **The World of Dante. 3.00 Credits.**
An Introduction to the Divine Comedy
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.271. **Boccaccio's Decameron. 3.00 Credits.**
A close reading of Giovanni Boccaccio’s masterpiece will allow the students to become acquainted with the civilization of the European Middle Ages. Among the areas of interest are: medieval Italy as a mosaic of powers, faith and religion, women in society, nobles, commoners and the rise of the middle class, the rituals of love, and the purposes of literature.
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.278. **Italian Film. 3.00 Credits.**
This undergraduate seminar is an overview of 100 years of Italian film history covering such pivotal moments as the early Futurist films, the creation of Cinecittà, the Italian Neorealist film movement, the legendary Commedia all’Italiana films, as well as a discussion of classic Italian auteurs such as Fellini, Pasolini, Wertmüller, Bertolucci, and such contemporaries as Garrone and Sorrentino.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.301. **Survey of Italian Literature. 3.00 Credits.**
Un viaggio dal Rinascimento alla modernità, per incontrare il genio italiano e conoscere la nostra umanità. Through readings from the most celebrated texts by Italian authors, we will travel from the early renaissance to the 20th century to encounter the struggles and triumphs of the human conscience, and the highest achievements of Italian culture. The course will explore poetry, short story, theatre, epic, and novel, with an introduction to Italian opera. Students will have the opportunity to read Dante Alighieri, Baldassarre Castiglione, Galileo Galilei, Giacomo Leopardi, Giorgio Bassani, and many others in original language, and to discover how these works are relevant in our own life and times. Taught in Italian. Recommended course background: Italian AS.210.252; may be taken concurrently with Advanced Italian II.

AS.214.302. **Prerequisites: Not open to students who have taken AS.214.252.**
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.
AS.214.302. The Agony and the Ecstasy from Dante to the Romantics. 3.00 Credits.

By exploring texts and topics in Italian literature and culture from the Middle Ages to modernity, this course will address the themes of suffering and triumph as they are expressed through several great authors, many of whom were fundamental to the development of the Western European tradition. These authors will include Dante, Petrarch, Boccaccio, Machiavelli, Ariosto, Tasso, Foscolo, Leopardi, and Manzoni. The course will also explore the relationship between these works and other forms of culture, such as painting and music. The course is taught in English with special sessions in Italian for Italian majors and minors, so as to count towards the Italian Major/Minor requirements. 

Prerequisites: Not open to students who have taken AS.214.301.

Area: Humanities

AS.214.317. Italian Theater from Commedia dell'arte to Dario Fo. 3.00 Credits.

Students must have completed Intermediate Italian II (210.252) or equivalent. Italian writers and performers have created some of the world's greatest theatrical works, particularly in the genres of comedy and opera. We will study the evolution of Italian theater from the improvisatory humor of the Commedia dell'arte, through the invention and development of Italian opera, to the zany and politically engaged satire of Dario Fo, winner of the 1997 Nobel Prize in Literature. Other major authors we will study include Carlo Goldoni and Luigi Pirandello. We will view film versions and live performances of plays and operas in Italian. The class will be conducted in Italian.

Instructor(s): J. Coleman

Area: Humanities

AS.214.324. Futurism and the birth of Avant-garde. 3.00 Credits.

The course will explore Futurism, the first great avant-garde movement in modern European history, and its vast and mostly unknown literary production. We will analyze Futurism in its social, literary, and historical background, as well as in its artistic contributions to Italian and European culture. We will focus on Filippo Tommaso Marinetti (1876 - 1944), founder of the movement and cornerstone of all its diverse souls and manifestations, and analyzing his manifestos, poetry, novels, tales and plays, we will shed light on the peculiarity of a movement that acted as the initial spark, and has given shape to the following literary and artistic avant-gardes of the XX Century. The final project for the course can be either a paper or a translation project. Reading knowledge of Italian is suggested.

Instructor(s): L. Bacchini

Area: Humanities

AS.214.346. The Short Story in Italy Across the Centuries. 3.00 Credits.

The genre of the short story was in many ways invented by the Italians. During the later Middle Ages, preachers adopted the short tale, cultivated by fireside storytellers for ages, to add interest to the morals of their sermons. By the late thirteenth century, Italian writers were collecting such stories for entertainment as well as edification. Boccaccio's Decameron (1352) was the first classic collection and inspired other collections throughout the Renaissance. It and other Italian collections inspired writers in many genres and countries, including Shakespeare and other dramatists. In modern times, short stories have become one of the predominant genres of world literature. This seminar surveys Italian short fiction from the fourteenth through the twenty-first century. Emphasis is on the representation of Italian culture and history through storytelling, including in film. Course will have two full sections, one taught in Italian for majors, the other taught in English, with no prerequisites, for non-majors. Limited to fifteen students per section.

Instructor(s): P. Forni; W. Stephens

Area: Humanities

Writing Intensive.

AS.214.347. Petrarch and the Beginnings of the Renaissance. 3.00 Credits.

This course will focus on the life, work, and thought of Francesco Petrarca, or Petrarch. Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.

Instructor(s): C. Celenza

Area: Humanities

Writing Intensive.

AS.214.361. Rome as Told by its Narrators: A Journey through History, Literature, Arts and Film. 3.00 Credits.

The course is intended for students who would like to learn about Rome through its history, literature, arts, and film. We shall explore the city and its culture analyzing the work of several authors. The main goal of that itinerary is to offer a whole experience of Rome through time. The Eternal City is also a place where the whole of Italy is reflected in its beauty and complexity.

Instructor(s): T. Katinis

Area: Humanities

AS.214.362. Italian Journeys: Medieval and Early Modern. 3.00 Credits.

Italy's history as a unified country is fairly recent, but the very idea of "Italy" is a very old one. Indeed, many "Italies" have existed throughout the centuries, thus contributing - not without conflicts - to one of the richest cultures in the world. By exploring texts and topics from the Middle Ages to modernity, this course will address the cultural history and geography of Italy, focusing on both its centers (Rome, Florence, Venice, etc.) and its peripheries. A veritable journey through Italy, the course will address authors that were fundamental to the development of the Western European tradition (e.g. Dante, Petrarch, Boccaccio, Machiavelli, Ariosto, Tasso). The course will also explore the relationship between these works and other forms of culture, such as painting, music, cinema. The course is taught in English with sessions in Italian for Italian Majors and Minors so that the course will count towards their requirements.

Instructor(s): E. Refini

Area: Humanities

Writing Intensive.
AS.214.363. Italian Journeys: Modern and Contemporary. 3.00 Credits.
This class examines classics from 19th and 20th century Italian literature focusing on the relationship between human beings and the environment, while interrogating issues of gender, class, migration, and national identity. Taking literary and visual journeys throughout Italy, we shall contemplate the significance of the seascape from the Sicilian fishing village in Verga’s The House by the Medlar Tree, the Sicilian countryside in Tomasi di Lampedusa’s The Leopard, the wild island of Procida in Elsa Morante’s Arturo’s Island, the Langhe hills of Piedmont in Pavese’s The Moon and the Bonfires, and the cityscapes of Italo Calvino’s Invisible Cities. In addition to novels, we shall also analyze poetry, films inspired by the literary texts examined, and study the work of photographers such as Paul Strand and Luigi Ghirri, whose art is also devoted to Italian landscape. This class is taught in English. Special sessions will be held in Italian for Italian Majors and Minors.
Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.

AS.214.367. Masterpieces of Italian Poetry. 3.00 Credits.
The goal of this course is to acquaint the students with themes and images recurring in the Italian poetic tradition from the Middle Ages to the Novecento.
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.369. Food and Culture in Italy. 3.00 Credits.
Throughout Italy's history, food traditions have been central to the formation of Italian identities, both national and regional. In this course we will study Italy's food traditions and explore the ways in which food has become a major theme of Italian literature, film, and music, from the Renaissance to the present day. The class will be conducted in Italian. Students must have completed Intermediate Italian II (AS.210.252) or equivalent.
Instructor(s): J. Coleman
Area: Humanities
Writing Intensive.

AS.214.370. Magic and Marvel of the Renaissance. 3.00 Credits.
Magic and Marvels or Wonders make us question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the magical and the marvelous were bound up with questions and issues very different from those of our time. With the exact sciences still to be invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance, especially the romance and the theater, provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.374. Being Italian: Autobiography and Identity in Literature and Media. 3.00 Credits.
What does it mean to be Italian rather than French, American, or anything else? What’s the difference between being Tuscan, Milanese, or Sicilian? Between being Christian, Jewish, Muslim, or “other”? How does the reality of Being Italian differ from the clichés that prejudice, commercialism, or mass media fads help to spread? Considering these questions can be important whether you want to use your Italian in business, in academia, or for sheer pleasure, whether you want to watch films, read books, or see the sights.
Prerequisites: AS.210.251 AND AS.210.252
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.376. Warrior Women from Ancient Times to Game of Thrones. 3.00 Credits.
This course will trace the origins of the warrior woman from ancient times through today’s pop culture and reflect on the multiplicity of its social, cultural, and political ramifications.
Instructor(s): J. Gomez
Area: Humanities.

AS.214.377. Gendered Voices. 3.00 Credits.
The course will explore the notion of ‘voice’ in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the ‘voice’ in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa’s The Siren and Italo Calvino’s A King Listens.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.390. Machiavelli: A Renaissance Master. 3.00 Credits.
Who was Niccolò Machiavelli? The author of the Italian Renaissance’s most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli’s major works and to the intellectual, social, and political contexts that shaped his thinking.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.
AS.214.393. Italian Opera and the Art of Adaptation. 3.00 Credits.
Italian opera, from its very inception, has developed in close dialogue with other art forms. The pioneering operas of Peri and Monteverdi based on the figure of Orpheus are part of a larger cultural movement that saw Renaissance philosophers (Marsilio Ficino), visual artists (Bronzino) and humanists (Angelo Poliziano) resurrect and transform the ancient Orpheus myth. The subsequent evolution of opera was influenced by (and influenced) innovations in stage comedy, the novel, and other art forms. In this course, we will explore these connections between the development of opera and other facets of Italian culture. No knowledge of Italian is required. The course will be taught in English; an additional Italian language discussion section will be offered for majors.
Instructor(s): W. Stephens
Area: Humanities.

AS.214.437. The Intellectual World of the Italian Renaissance. 3.00 Credits.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the "lost" Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin — not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance "humanists," inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their "native" tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.445. Boccaccio's Decameron and the Multiplicity of Story-Telling. 3.00 Credits.
Boccaccio’s Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio’s masterpiece on its own terms and in relation to the development of story-telling, from gossipy “news” (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints’ lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and filmic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian. Those students should enroll in section 2 which will be awarded 4 credits.
Instructor(s): W. Stephens

Writing Intensive.

AS.214.561. Italian Independent Study. 0.00 - 3.00 Credits.
Instructor(s): Staff.

AS.214.562. Italian Independent Study. 0.00 - 3.00 Credits.
Instructor(s): B. Wegenstein; C. Celenza; E. Refini; P. Forni; W. Stephens.

AS.214.597. Italian Lit Internship-Summer. 3.00 Credits.
Instructor(s): J. Coleman; P. Forni.

The course aims to outline the musical reception of Michelangelo’s poems from the 16th to the 21st century. Moving from a critical introduction to Michelangelo’s Rime, the course will address Michelangelo’s own ideas on music and the few musical settings of his poems by contemporary composers. The course will then turn to the Post-Romantic renaissance of Michelangelo’s myth as the context within which the main bulk of musical settings of the artist’s poems was produced. What did composers such as Wolf, Britten, Dallapiccola, Shostakovich and Reimann find in Michelangelo’s poetry? Through a close reading of the poems chosen by the composers, the course will explore the biographical, philosophical and socio-historical implications suggested by the different musical settings. No training in music performance or theory is required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

The newly acquired Bibliotheca Fictiva collection of rare books contains over 1200 literary forgeries and related documents, and makes Johns Hopkins the only center in Europe or the Americas equipped to investigate the deep relations between literature (in the broad sense that includes historiography), literary forgery, and literary theory. We will trace the development of the concept of literary counterfeit in humanist scholarship, with its medieval and classical antecedents, and the growth of modern literary genres, particularly the historical novel, that depended on concepts of authenticity and probability or verisimilitude. Theoretical readings, from Lorenzo Valla through postmodern literary theory, will be matched with notorious forgeries and with metalexterary fiction, from Rabelais and Cervantes to Borges, Eco, and their imitators. Elementary Latin will be helpful but not required; some paleographical skills will be taught; all sessions will be held in the Bibliotheca Fictiva collection in the rare book room of the new Brody Learning Center.
Instructor(s): E. Havens; W. Stephens
Area: Humanities.

AS.214.616. Visual Languages in Medical Knowledge.
This interdisciplinary course, co-taught by professor Veena Das (Anthropology) and Research professor and filmmaker Bernadette Wegenstein (German and Romance Languages and Literatures) will track the mediation of images in the making of medical knowledge and show how sensory knowledge is incorporated or transformed in the process. Co-listed with 211.416 and 070.416
Instructor(s): B. Wegenstein; V. Das
Area: Humanities.
AS.214.637. The Intellectual World of the Italian Renaissance.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.655. Translating Knowledge: Brunetto’s Tresor and Dante’s Convivio.
By focusing on Brunetto Latini’s Tresor and Dante Alighieri’s Convivio, the seminar will examine the notion of “encyclopedic knowledge” in the Middle Ages. The two works – both examples of “translation” – call traditional ideas of knowledge into question. The seminar will study the Convivio as a response to the Tresor and will situate Dante’s project within a wider discussion of vernacular translation as a key tool for the dissemination of the classical tradition in the Middle Ages.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.658. Dante’s Inferno: A Reading for Teaching.
How to Teach the Divine Comedy to American Undergraduates.
Instructor(s): P. Forni.

In this course we will study representative works by the major figures of Italy’s humanist movement, considering the significance of the movement as a whole and the many currents that scholars have identified within it. Topics and authors we will explore include early Paduan humanism (Lovato, Mussato), Florentine civic humanism (Salutati, Bruni), the birth of philology (Poliziano, Valla), vernacular humanism (Alberti, Landino), and the relationship between humanistic studies and Christian religion (Ficino, Sannazaro, Erasmus). The class will be taught in English. The ability to read Italian is required. Some knowledge of Latin is desirable but is not required.
Instructor(s): J. Coleman
Area: Humanities
Writing Intensive.

AS.214.671. Ancient and Modern in the Mirror of the City: The Image of Rome in Italian Literature from the 13th to the early 19th Century.
The course will run from October 19th through December 7th, meeting twice per week. The source of two formative traditions shaping Italian identity, Antiquity and Christianity, Rome is the most cited place in Italian literature and a key source for Italy’s ongoing dialogue with the past. Yet, every epoch of Italian literature has had its own idea of the past. How did Italian authors shape the image of Rome? Focusing on both canonical and non-canonical writers, this course will provide a unique approach to the history and vicissitudes of classicism in the history of Italian culture. We will explore the following authors and texts: Le miracole de Roma (13th-century translation into the Roman vernacular of the Latin Mirabilia Urbis Romae, 12th cent.); the Anonom Romano’s Cronica (1350s); Petrarch (Collatio laureationis, epistles); Poggio Bracciolini’s De varietate fortunae (1431); Biondo Flavio’s preface to his Roma instaurata (1444-46); Raphael’s letter on Roman antiquities to Leo X, written in cooperation with Castiglione (1519); Andrea Fulvio’s preface to his Antiquitates Urbis (1527); Pasquínades (Pasquinate) from the sixteenth century; Rome in Baroque poetry (Marino and Chiabrera) and in the poetry of the early Arcadian Academy (1690s); 18th-century satires on Rome (Devoti, Contucci); Alessandro Verri’s Notti Romane (1792 and 1804), Leopardi’s letters from Rome (1822); and G. G. Belli’s Sonetti on the ruins and monuments of Rome (1830s). Consequently, this course will also provide students with an overview of the many languages of Italian literature, such as medieval Roman vernacular, medieval and humanist Latin, neo-Latin, and nineteenth-century Roman dialect.
Instructor(s): W. Stephens.

AS.214.672. Tasso, the Epic & Tradition.
Students will achieve deep familiarity with Tasso’s Gerusalemme liberata and Aminta; read selections from Gerusalemme conquistata, Il mondo creato, Tasso’s Dialogues, and his literary-theoretical treatises; survey important texts of Tasso criticism, and sample Tasso’s legacy in poetry and figurative arts.
Instructor(s): W. Stephens.

This course will be taught from September 2 through October 14, 2015. The course aims to analyze the development of Foscolo’s poetry in the years between the eighteenth and nineteenth centuries (1798-1807), namely the development from the sonnets and the odes to the poem I Sepolcri, starting off from the most common models of the famous contemporary poets (Parini, Monti, Alfieri, Pindemonte) to arrive at a new understanding of lyric poetry. Furthermore, the lectures will focus on the discussions and controversy that arose with regards to the Sepolcri (with Pindemonte and others) immediately after publication, when the novelty of the poem aroused bewilderment and perplexity in many critics, readers and poets. The analysis of the anti-Foscolo writings that appeared at this time - and the replies of Foscolo himself - will show how most of the readers of that time, still tied to a static view of literary genres, were negatively affected by the audacity in the mixture of the various registers that characterize the poem (epic, lyric, elegy, satire, tragedy) held responsible both for the lack of formal and stylistic unity of the poem, and its complete obscurity. The class will be taught in Italian.
Instructor(s): F. Bausi
Area: Humanities
Writing Intensive.
AS.214.675. The Invention of the Secular Theatre.
Must read Italian, but not limited to Italian graduate students. Between late Antiquity and the fifteenth century, religious and cultural strictures on theatrical activity were enforced continuously, though not consistently. While spectacle (and, in the later Middle Ages, drama) remained important to medieval life, it was left to Italian humanists to reconstitute secular theater in the fullest sense, by reviving the ancient classical forms of comedy and tragedy, and by inventing new forms such as tragicomedy, commedia dell'arte, and opera. Sixteenth-century drama in Italian was the model for the development of dramatic literature in the other major Western European countries, including works of Shakespeare, Molière and other major authors. After reading several classic texts of the Italian sixteenth century in modern editions, students will produce editions and translations of other texts—both sixteenth-century imprints and the unpublished plays in a unique manuscript recently acquired by JHU—for planned publication. All sessions will be held in Special Collections in the Brody Learning Commons, and students will help prepare an exhibition of Renaissance editions.
Instructor(s): E. Havens; W. Stephens
Area: Humanities
Writing Intensive.

AS.214.676. The Renaissance Comic Romance.
In the second half of the fifteenth century, Italian poets transformed the medieval adventure stories of Charlemagne’s and Arthur’s knights. Luigi Pulci’s earthy, bourgeois Morgante and Matteo Maria Boiardo’s romantic, courtly Orlando innamorato created two variants of a genre that led from Ariosto’s Orlando furioso through Folengo’s Baldus to inspire Rabelais’s Gargantua and Pantagruel, Cervantes’ Don Quixote, and, eventually, the European novel. The course concentrates on the works of Pulci, Boiardo, and Folengo, combining close analysis of their linguistic and narrative fabric with examples of their influence on later comic masterpieces.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.678. Ariosto’s Orlando Furioso.
Ludovico Ariosto (1474-1533) was one of the major poetic innovators of the European Renaissance. He is best known for Orlando Furioso, the long epic-romance that also bears traces of his innovations in other genres, especially theatrical comedy in the vernacular. Orlando Furioso is an encyclopedia of Renaissance genres and topics that was influential throughout European literature. Written as a continuation of Boiardo’s Orlando Innamorato (left unfinished in 1494), Ariosto’s poem overshadowed his competitors, including Giangiorgio Trissino and the Tassos, father and son. From L’Italia liberata dai goti and L’Amadigi to Gerusalemme conquistata (leaving aside the many poems now forgotten), only Gerusalemme liberata achieved anything comparable to the popularity and critical acclaim won by the Furioso. Aside from three complete redactions printed in 1516, 1521, and 1532, Ariosto left at his death five unfinished cantos that were never integrated into the poem, and that would have altered it considerably. Reading ability in Italian required.
Instructor(s): W. Stephens.

AS.214.689. Flânerie and Female Authorship in Contemporary Italian Cinema.
This course examines the prolific production of Italian women filmmakers inscribing their work into a national cinematic tradition. The most prominent visual leitmotif in films by directors such as Marina Spada, Francesca Comencini, Alice Rohrwacher and others, is that of the wandering woman contemplating the cityscape. What does the act of walking signify in these works? How do these filmmakers embrace and transform Italy’s cinematic tradition? After highlighting the figure of the city-walker in post-war classics by Roberto Rossellini and Vittorio De Sica, we shall discuss from a gender perspective films such as Fellini’s Nights of Cabiria, Pasolini’s Mamma Roma, and Antonioni’s La Notte, which feature female city-walkers who stroll throughout urban peripheries created during the country’s rush toward modernity. Then, we shall analyze the work of women directors who recurrently employ the narrative strategy of flânerie to construct female narratives of displacement and liminality. We shall question how and to what extent this contemporary cinematic production is indebted to the masters of neorealism and the auteurs from the sixties. Critical and theoretical readings will include essays by Michel de Certeau, Siegfried Kracauer, Janet Wolk, Elizabeth Wilson, Anne Friedberg, Giuliana Bruno, and others.
Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.

The metaphor of the theatre of the world is a long-lasting one: from antiquity to our own days through the Middle Ages, the Renaissance, and the Baroque, the idea of the world as a stage has been the core of both dramatic writings and discourses on drama. By considering the metaphor and its meanings in a broad chronological perspective, the seminar aims to identify key moments in its evolution. In particular, it will focus on the ways in which – within the production of early modern morality plays – the metaphor of the theatrum mundi regained its literal meaning by being represented on stage. Along with a selection of allegorical plays and relevant visual materials, we will consider theoretical sources including classical and Christian authors, neo-platonic writings and medieval exegesis, Renaissance thinkers such as Pico della Mirandola and modern philosophers such as Walter Benjamin.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.711. Dissolving Margins: Space and Female Subjectivity in the Work of Elena Ferrante.
Elena Ferrante is Italy’s most acclaimed contemporary novelist, although her true identity remains unknown. Having been translated into multiple languages and published in 39 countries, with over a million of copies sold in the United States alone, her ‘Neapolitan Quartet’ triggered what has been called “Ferrante Fever.” This course investigates the reasons behind this global, literary phenomenon while exploring themes such as female subjectivity and the interplay with space and society, the question of female authorship, women’s participation in, or exclusion from, history, and the internal violence of a rapidly changing society. We shall read Ferrante’s entire oeuvre: Troubling Love (1999) The Days of the Abandonment (2002), and The Lost Daughter (2006), the Neapolitan Quartet (2012-2014), as well the collection of letters and essays Frantumaglia. (2016). Theoretical readings will include essays by Julia Kristeva, Luce Irigaray, Steve Pile, and others.
Instructor(s): L. Di Bianco
Area: Humanities.
AS.214.716. Translation and Vernacular Readership in Italy, 1250-1500. Translation is usually acknowledged as instrumental to the rise of vernacular readership in medieval and early modern Europe. By reconsidering seminal contributions such as Erich Auebarch’s, this seminar will explore the textual and cultural implications of the translative process that played a major role in the medieval reception of antiquity. Special attention will be given to translation theory and its history.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.729. Petrarch and His Legacy. In this seminar we will study Petrarch’s poetry, as well as selected prose works. We will consider the various facets of Petrarch’s profound influence on European literature and intellectual culture: his role in inaugurating humanism and the revival of classical learning; his new vision of historical change and human subjectivity; the immense impact of his Canzoniere on European lyric poetry and on the development of the Italian language itself. The conclusion of the course will be devoted to early modern authors who adapted the Petrarchan lyric mode in new ways, including Vittoria Colonna, Thomas Wyatt, and Shakespeare.
Instructor(s): J. Coleman
Area: Humanities
Writing Intensive.

Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.746. Giovanni Boccaccio’s Decameron: A New Interpretation. This seminal text of the late Middle Ages will be a point of departure for discussing the role of literature in forging the socio-political convictions of Western Civilization.
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.753. Tasso the Madman. In late sixteenth-century Europe, Tasso’s name was a synonym for madness. The Elizabethan stage hosted a play on Tasso’s Melancholy; Montaigne belatedly recalled observing the mad poet in prison. Biographers and dramatists spread the myth into the nineteenth century, but Tasso’s dialogues and letters tell a more complex and nuanced story of suffering and struggle, life and work.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.765. Casiglione and Della Casa. The students will become acquainted with two of the most influential books of conduct written in the Renaissance: the Cortegiano and the Galateo.
Instructor(s): P. Forni.

AS.214.769. The Orpheus Myth and the Arts in Early Modern Italy. The revival of the Orpheus myth in Early Modern Italy shaped some of the period’s most important developments in literature, music, and the visual arts: as the first Italian secular play, Angelo Poliziano’s Orfeo marked a new beginning for Italian theater in the late fifteenth century. Just over a century later, the composers and librettists who created Italian opera (Peri, Rinuccini, Monteverdi, Striggio, and others) made the Orpheus myth the most characteristic theme of this new art form. In this course we will study these and other Early Modern works based on the Orpheus myth, as well as their classical antecedents (including texts by Virgil, Ovid, Boethius). We will explore the literary, musical, and artistic repercussions of the rediscovery and reinterpretation of ancient Greek Orphic poetry by intellectuals and poets of Lorenzo de’ Medici’s circle, including Marsilio Ficino, Cristoforo Landino, and Giovanni Pico della Mirandola. Discussions will be conducted in English. Some knowledge of Italian is desirable, but advanced Italian is not a prerequisite.
Instructor(s): J. Coleman.

AS.214.790. What is Philology?. In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology’s interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. – In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bolllack, Nichols, Cerquiglini, and Ferrer among others. The course will be taught in English.
Meets with 212.790, 213.790, and 215.790
Prerequisites: ;;

Area: Humanities.

AS.214.791. Film Theory and Critical Methods. Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.
AS.214.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshiping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.214.851. Italian Foreign Language Teaching Practicum I.
Required for first-year Italian Graduate Students. Must take Italian Foreign Language Teaching Practicum II (AS.214.852) to receive credit for this course. This course will not have a scheduled meeting time.
Instructor(s): A. Zannirato
Area: Humanities
Writing Intensive.

AS.214.852. Italian Foreign Language Teaching Practicum II.
Required for First year Italian Graduate Students. This course will not have a scheduled meeting time.

AS.215.207. Freshman Seminar: Comics & Short Stories in Latin America. 3.00 Credits.
Comics and short stories are literary forms that succeed by at once embracing and defying their apparent limitations. This course provides a comparative understanding of the evolution of the two forms in Latin America by bringing together the works of legendary comic artists like Quino (Argentina), Rius (Mexico), and Los Bros Hernandez (USA) with short form masterpieces by authors including Jorge Luis Borges, Julio Cortázar, Elena Garro, and Rosario Castellanos. Students will learn critical strategies for approaching and evaluating marginalized and alternative literatures and will deepen their understanding of the histories and cultures of Latin America in the 20th and 21st centuries. Class taught in English.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

AS.215.231. Introduction to Literature in Spanish. 3.00 Credits.
The main objective of this course is to examine and discuss specific authors and topics in literature in Spanish from the Middle Ages to the 20th century. The course is designed to cover a selection of Hispanic texts from Spain and Latin America. Literary genres to be studied will include narratives, poetry, and drama. The bulk of each class session will be dedicated to the discussion of the assigned readings. This course is taught in Spanish. This course is required for the major in Spanish.
Area: Humanities.

AS.215.243. Freshman Seminar: The Middle Ages in Film. 3.00 Credits.
The Middle Ages and medieval themes are ubiquitous in popular movies of our times. This course studies the Middle Ages as they have been portrayed in film, with a focus on Spain. Course materials include studies on the imaginative uses of the Middle Ages as well as films like The Cid, Tirante el Blanco, Ladyhawke, and Destiny, among others.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.253. Borges on Islam, Judaism and Christianity. 3.00 Credits.
This class offers an introduction to the life and works of world-renowned Argentine author Jorge Luis Borges. It offers students an opportunity to make in a depth examination of several of his most notable essays, short stories, and a few of his poems. The class is centered on texts which refer directly or indirectly to the relationship between national identity and religion. Questions will arise, such as: are literary portrayals of Islam related to politics? Do all Argentines consider that Argentine-Jews are Argentinean? Why is this? If we are the West, what is the Orient?
Instructor(s): M. Ruhlmann
Area: Humanities.

AS.215.265. ELECTRIC APOCALYPSE: Rock in Latin America. 3.00 Credits.
Rap, Metal, Punk Rock, and the other children of Rock and Roll are a global phenomena, and can serve as a site wherein hegemonic ideological culture is contested and resisted. These musical vocabularies manage to noisily articulate the voice of otherwise silent resistance by cultivating a peculiar and often paradoxical relationship with violence. This course will take Tristan Garcia’s dialectic of electric adolescence as a point of departure for analysis of the relationship between music, violence, and social critique in Latin America.
Prerequisites: AS.210.212
Instructor(s): C. Ray
Area: Humanities.

AS.215.271. Life and Death: Philosophy in Spain. 3.00 Credits.
If there is an essence of Modern Spanish philosophy, the debate which raged between Miguel de Unamuno and José Ortega y Gasset provoked each thinker to realize that essence in profoundly divergent ways. And yet, what connects the two figures is a shared fascination with the rigorous investigation of their social reality and the mystery of the self. This course will examine the works and lives of Unamuno and Ortega y Gasset and, with the aid of Kierkegaard and Nietzsche, strive to understand their confrontation with eternity and mortality.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.
AS.215.311. Radicalism, Film & Literature in Modern Latin America - Community Based Learning. 3.00 Credits.
This course will explore the cultural symbiosis of radical politics, film, and literature in modern Latin America. Beginning with Cuban revolutionary Jose Marti and the definitive end of the Spanish Empire and concluding with current socialist movements in South America, we will analyze the interplay of radical texts and events with the works of major authors. The course will also be conducted in English and all assigned texts will be translated. In order to encourage interdisciplinary enrollment and participation, class will be conducted in English and all assigned texts will also be in English. In order to encourage interdisciplinary enrollment and participation.
Instructor(s): M. Strayer
Area: Humanities
Writing Intensive.

The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncagiolo, and Silva Passuni.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.327. Modern Political Thought in Latin America. 3.00 Credits.
Sophomores, Juniors and Seniors only. The course is an introduction to modern political thought in Latin America. It draws on essays and novels written by major and influential political thinkers such as D.F. Sarmiento, Gonzalez Prada, J.C. Mariategui, Leopoldo Zea, J. E. Rodó, Octavio Paz, Jose Revueltas, Jose Maria Arguedas, Mario Vargas Llosa, Darcy Ribeiro, Enrique Dussel and the authors of the Sumac Kawsay as well as Liberation Theology central writings. The course will be taught in English. Students wishing to do work in the original Spanish or Portuguese will be encouraged to do so.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.336. Don Quijote. 3.00 Credits.
A close reading and discussion primarily in Spanish of Cervantes’ masterpiece, with concentration on its major themes and contributions to the formation of the modern novel. We will use A. Murillo’s edition of the novel, Editorial Castalia.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): H. Sieber
Area: Humanities.

AS.215.337. Teatro Espanol del Siglo del Oro. 3.00 Credits.
Close reading of various Spanish authors, among them Lope de Vega, Calderon de la Barca, Moreto, and Zorilla. Students should have taken courses beyond intermediate level or advanced Spanish. This class will be conducted primarily in Spanish as a seminar and will require active participation and discussion. Papers will be written in Spanish. Undergraduate Seminar.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.338. Introduccion a la literatura argentina. 3.00 Credits.
La literatura se enmarca en la realidad social y es una ventana hacia la cultura. En esta introducción consideraremos diferentes temas de especial importancia en la cultura y literatura argentina, como la separación entre la ciudad (puerto, civilización, contacto europeo) y el campo (provincias, barbarie, tradicionalismo rural) que empieza con el texto fundacional de Domingo F. Sarmiento, Facundo. Observaremos asimismo que esta influente dicotomía que se establece con la independencia política es modificada con la llegada masiva de inmigrantes a fin de siglo y finalmente pierde su fuerza con la dictadura militar de los años ’70 y con el desencanto neoliberal que estalla con la crisis del 2001.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.341. Perspectives on the Study of Latin America. 3.00 Credits.
An interdisciplinary approach to the study of Latin America since Independence. The course will reply on an historical approach to the the study of literature, art and the formation of cultural epochs and periods.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.343. Nación criolla: cultura y literatura en el siglo XIX. 3.00 Credits.
El curso examina la formación de nuevas identidades hispanoamericanas y la búsqueda de un pasado que las haga legítimas, especialmente en el Cono Sur (Chile, Argentina, Uruguay). Consideraremos en particular las relaciones con el pasado español y con el pasado amerindio en textos políticos, críticos y literarios de figuras clave del siglo diecinueve, e.g. Domingo Faustino Sarmiento, Andrés Bello, Simón Bolívar, Esteban Echeverría, y José Victorino Lastarria.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.345. Children & Adolescents in Latin America. 3.00 Credits.
Through the close reading of primary texts written by or about adolescents, this course examines youth participation in Latin American art and society from the mid 20th century. Students wishing to complete the writing portions of the course in Spanish or Portuguese should enroll in section 2 which will award 4 credits instead of the usual 3.
Instructor(s): L. Reynolds
Area: Humanities.

AS.215.350. Mexico: An interdisciplinary approach to the construction of our image and understanding of Mexico. 3.00 Credits.
The course studies the accounts of the Mexico on the journey and foundation of Tenochtitlan. Later we move on to the clash of cultures with the Spanish conquest (1521). After studying the art of the colonial period, the course focuses of the Mexican Revolution of 1910 and ends with a consideration of the image of the nation in murals and writers such as Octavio Paz, Carlos Fuentes and Elena Garro. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.
AS.215.363. Film and Franquismo: Repression and Resistance in Spanish Cinema. 3.00 Credits.
This course will examine the cinema of Spain that was produced from the onset of the Spanish Civil War in 1936 until the death of dictator Francisco Franco in 1975. The films we will analyze include partisan documentaries, government propaganda shorts, escapist musicals, wry comedies, neo-realist thrillers, iconoclastic dramas, and meditations on national and personal trauma. In addition, we will contextualize our analyses by reading seminal works of Spanish cultural history, social criticism and film theory. This course is taught in English.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.375. Cinema in Spain and Latin America. 3.00 Credits.
We will study and discuss a selection of recent films from Spain, Argentina, Peru, Mexico and Cuba. We will concentrate on hot political and social issues in these countries as reflected in each film. Issues under discussion will be: the formal study and vocabulary of film and cinema in Spanish; gender and sexuality; national memory and trauma; trends in commercial film-making at the local and global levels; the imprint of social media networks. Taught in Spanish. Advanced Spanish is a prerequisite. The course counts as credit for the Major and Minor in Spanish and may apply as the equivalent to Intro to Literature In Spanish AS. 215. 231.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.388. Narrating Mexico: Novel and History. 3.00 Credits.
The 200 years since the eruption of Mexican Independence present a panorama of struggle, strife, and literary creation. This course explores how Mexican literature formulates, contests and conditions portrayals of the national reality of Mexico. Taught in Spanish. Recommended Course Background: Advanced Spanish I or another Spanish survey course.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

AS.215.402. Senior Seminar: Literaturas y culturas del Cono Sur: Argentina, Uruguay y Chile. 3.00 Credits.
Advanced Spanish and reading proficiency. Estudio de las culturas literarias de Argentina, Uruguay y Chile en sus respectivos contextos sociales y políticos desde la conquista española. Las culturas indígenas, el desarrollo de la nación, las culturas populares, culturas inmigrantes, regímenes políticos, actualidad económica y social en la época de la globalización.
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive.

AS.215.403. Cine en Común. 3.00 Credits.
Eleven commercial films in Spanish closely examined through screenings, class discussion, and short papers. Besides basic film appreciation, the course intents to develop a common critical vocabulary between Spanish and English to discuss movies in plain language and in terms relevant to social issues
Prerequisites: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.411. Folly & Insanity in Spanish Culture: Origins of Modern Madness in the Literature of Spain. 3.00 Credits.
What is human madness? Taking into account Foucault’s famous dictum, there can be no madness without society, this course returns to the earliest constructions of madness in the early modern period and moves forward into modernity through a close reading of literary, philosophical and scientific texts published in Spain. Readings include: Cervantes, Leon Hebreo, Huarte de San Juan, Lope de Vega, Calderon, Galdos, Freud, and others. Earlier representations of mental disquiet will be compared with the latest advances in psychology and neuroscience published in the JHU Gazette and the HUB. Recommended Course Background: AS.210.312
Instructor(s): G. Ponce
Area: Humanities
Writing Intensive.

AS.215.415. Horror in Spanish Literature. 3.00 Credits.
While our modern conception of horror owes much to English literature of the 19th century, it has an under-appreciated precedent in the literature of the Spanish Golden Age. In this course we will read tales of witches, monsters, and the living dead from an age that pre-dates ours by 400 years, but whose darkest fears are surprisingly familiar.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.215.422. Amor y romanticismo en una Novela y tres películas. 3.00 Credits.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.440. The Picaresque Novel in Spain. 3.00 Credits.
Close reading of the Lazarillo de Tormes, Guzman de Alfarache, Miguel de Cervantes, and others. Taught in Spanish.
Prerequisites: AS.210.312
Instructor(s): H. Sieber
Area: Humanities.

AS.215.443. Hispanic Literatures and the Arts. 3.00 Credits.
Literary works from different genres (fiction, drama, poetry) by authors from Spain and Latin America are studied and illustrated in reference to the plastic and visual arts and cinema, indigenous, popular, and religious cultures. Cross-listed with PLAS
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.451. El Cine de Pedro Almodóvar. 3.00 Credits.
El arte cinematográfico del gran cineasta español será estudiado a través de su obra, vista en partes selectas, obras enteras y dentro del marco escénico provisto por otras películas del cine español. Recommended Course Background: AS.210.326 or demonstrated proficiency in the language.
Instructor(s): E. Gonzalez
Area: Humanities.
AS.215.458. Cuba and its Culture Since the Revolution. 3.00 Credits.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities

AS.215.463. Borges: His Fiction and Critical Essays. 3.00 Credits.
This course will deal with close readings of Borges ficciones and critical essays in order to determine how his thinking on the problem of writing and thinking is fictionalized in his stories.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive

AS.215.466. The Spanish Avant-garde. 3.00 Credits.
From the turn of the 20th century until the outbreak of Civil war in 1936, Spain witnessed the greatest flourishing in its literary and artistic scenes since its Golden Age 300 years before. In poetry, prose, painting, and film, Spanish artists and intellectuals were innovating artistic forms and participating in new kinds of cultural production and critical practice. In this course we will examine this period, paying special attention to the works of such writers and artists as Miguel de Unamuno, José Ortega y Gasset, Luis Buñuel, Salvador Dalí, Federico García Lorca, and Pablo Picasso. The course will be taught in Spanish.
Instructor(s): W. Egginton
Area: Humanities

AS.215.474. Origins of the Spanish Novel. 3.00 Credits.
Readings will include selections from Medieval and Renaissance Works, such as El Conde Lucanor, Amadis de Gaula, La carcel de amor, El Abencerraje, Lazirillo de Tormes, La Diana, El buscon, Novelas ejemplares (Cervantes) and Don Quixote.
Instructor(s): H. Sieber
Area: Humanities

AS.215.476. El moro de al-Andalus al Siglo de Oro y América. 3.00 Credits.
Este curso examina la figura del moro en el medioevo, la modernidad temprana, y las colonias americanas desde la conquista islámica de 711 hasta la expulsión de los moriscos en 1614. Temas incluyen identidades híbridas, arabizadas y transculturales de conquistados y conquistadores; los comienzos andalusíes de la picaresca; el estilo mudéjar en España, y las colonias americanas; y los festivales de moros y cristianos en la América colonial entre otros. Las lecturas incluyen selecciones del Mio Cid, el Conde Lucanor, las Guerras civiles de Granada, Ozmín y Daraja, El Abencerraje, la Conquista de Jerusalén de Tlaxcala 1539, y episodios de Don Quijote.
Prerequisites: Prereq: AS.210.311
Instructor(s): N. Altschul
Area: Humanities

AS.215.477. La Habana Miami: One World and Two Cities. 3.00 Credits.
A tale of two cities approach to the exceptional bond between two nations in the age of migration. The arts, the blogosphere, cinema and music and the vast unknown.
Prerequisites: Pre-req: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities

AS.215.484. Orientalismo al Sur. 3.00 Credits.
Taught in Spanish. Este curso examina la presencia del Islam y el concepto del “oriente” en el Cono Sur, especialmente Argentina. Leeremos obras de los siglos 19 y 20 que representan al oriente, y discutiremos los significados y cambios que la llegada de inmigrantes “islámicos” produjo en la cultura literaria de esta zona de América Latina. Tendremos en cuenta de forma particular que el problema del “oriente” en España y sus colonias es un problema “interno”. Debido a que la península ibérica tuvo una importante presencia musulmana durante toda la edad media (711-1609), en los círculos europeos España fue considerada “islámica” u “oriental” también durante los tiempos modernos. Es así que el Oriente llega a América con la conquista de los españoles “islamizados.” Cross-listed with PLAS
Instructor(s): N. Altschul
Writing Intensive

AS.215.491. Muslim, Jewish & Christian Literatures of Medieval Spain. 3.00 Credits.
Desde el 711 hasta el 1609 de la era cristiana, la Península Ibérica fue una sociedad multi-lingüística con zonas y ciudades pobladas y/o administradas por miembros de las tres religiones abrahámicas一则原话
monoteístas. Este curso presenta un panorama de las literaturas hispano-musulmanas, hispano-judías e hispano-cristianas haciendo especial hincapié en el contexto histórico de la península. Los textos en árabe y hebreo serán leídos en traducción inglesa o castellana, dependiendo de su accesibilidad. Taught in Spanish
Instructor(s): N. Altschul
Area: Humanities

AS.215.525. Spanish Independent Study. 1.00 - 3.00 Credits.
Instructor(s): E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

AS.215.526. Spanish Independent Study. 0.00 - 3.00 Credits.
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

AS.215.527. Spanish Internship. 1.00 Credit.
Instructor(s): E. Gonzalez.

Close readings in historical context of José Donoso’s El obsceno pájaro de la noche and Casa de campo, Isabel Allende’s La casa de los espiritus, and Pilar Donoso’s Correr el tupido velo, as well as selected essays from Sandra M. Gilbert’s Rereading Women
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive

AS.215.618. Literary Patronage in the Age of Cervantes.
This seminar will concentrate on the roles and relationships of patrons and clients, particularly after the death of Phillip II (1598). Dedications by authors to their patrons will be discussed and each student will select a particular author as a semester-long project. Authors include Cervantes, Gongora, Quevedo, Lope de Vega, Velez de Guevara and Maria de Zayas.
Instructor(s): H. Sieber
Area: Humanities

AS.215.526. Spanish Independent Study. 0.00 - 3.00 Credits.
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

Close readings in historical context of José Donoso’s El obsceno pájaro de la noche and Casa de campo, Isabel Allende’s La casa de los espiritus, and Pilar Donoso’s Correr el tupido velo, as well as selected essays from Sandra M. Gilbert’s Rereading Women
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive

AS.215.623. Literary Patronage in the Age of Cervantes.
This seminar will concentrate on the roles and relationships of patrons and clients, particularly after the death of Phillip II (1598). Dedications by authors to their patrons will be discussed and each student will select a particular author as a semester-long project. Authors include Cervantes, Gongora, Quevedo, Lope de Vega, Velez de Guevara and Maria de Zayas.
Instructor(s): H. Sieber
Area: Humanities

This seminar will be based on close readings of the ‘Lazarillo de Tormes’, selections from Mateo Aleman’s ‘Guzman de Alfarache’, and three of Cervantes’ ‘Novelas ejemplares.’ These texts reflect the impact that Spanish fiction exerted on Golden Age Spanish literary history and on the European novel in general. An extensive bibliography will also be covered.
Instructor(s): E. Sieber.
AS.215.635. Spanish Golden Age Theater.
Close reading of plays by Lope de Vega, Calderon, Tirso de Molina, and others.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.639. Don Quijote de la Mancha.
The novel will be the focus of the entire seminar. Recent trends in Cervantes criticism, textual issues related to the novel’s publication, biographical, cultural, and social history, and patronage in the Courts of Philip II and III will be topics of discussion and research. The goal is a wide-ranging appreciation and understanding of the novel’s original contexts.
Instructor(s): H. Sieber.

Taking into account the crisis in self (national) representation and the fluidity of identities, the course will delve into the work of major Latin American writers in order to study issues of self-representation across time and specific contexts. The course will begin with the work of Sarmiento and move on to Gilberto Freire, Rachel de Queiroz and Clarise Lispector. In a second stage the course will delve into Garcia Marquez’ autobiography and Mario Vargas Llosa’s La tía Julia y el escribidor, to end with Ernesto Cardenal’s autobiography.
Instructor(s): S. Castro-Klaren.

Four authorships deeply enmeshed in translation and the work of Eros and Thanatos will be studied: J. L. Borges (Pierre Menard), J. Derrida (fragments from La carte postale), Javier Marías (Corazón tan blanco), and Andrés Neuman (El viajero del siglo).
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive.

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.
Departing form narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.
Instructor(s): S. Castro-Klaren.

From neuroscience to political theories, we will examine early modern and late modern works in literature and critical thought in which dreams and dreaming intersect with power under diverse political regimes and modalities.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.667. Cities in Motion, Worlds Adrift.
We will explore the comparative phenomenology of the city in historical reference to literary, cinematic, and TV serial values. Modalities of segregation and diviseness will dominate our inquiry. Undergrads by request and with approval of instructor.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.692. Islamic Spain 711-1609.
Spain was a cultural contact zone throughout the Middle Ages. Emphasizing historical context, this seminar examines the cultures and literatures of Islamicate Iberia from the Muslim conquest to the expulsion of the moriscos. Taught in English. Some readings in Spanish. Open to seniors with permission.
Instructor(s): N. Altschul.

AS.215.695. New and Old Disputations of/for the New World.
This course will focus on readings of original texts—chronicles, reports, treatises, and polemics— and critical commentary on the issues central to the disputation for control and deployment of the meanings of the new world and its status in the realm of coloniality. Besides selections from the Inca Garcilaso de la Vega, Guaman Poma, and Ixtlilxochitl, we will read from Jose de Acosta and Bernabe Coello. Antonelger’s Disputa Del Nuevo Mundola and Walter Mignolo’s The Darker Side of the Renaissance, along with Enrique Dussel’s El Encubrimiento Del Otro and Charles Man’s 1491 will constitute the totality of readings and problematic of the seminar.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.710. Medievalisms.
This course examines variegated constructions and redeployments of “the middle ages” in postmedieval times. Topics include historical revivals, the national philologies, literary, and filmic reconstructions, postcolonial medievalisms, and theories of temporality, among others.
Readings in English and Spanish.
Instructor(s): N. Altschul.

From telegrams to tweets, the twentieth-century media revolution appears unique; but the magnitude of the revolution is not unprecedented. Another media revolution preceded ours by about 400 years, and coincided with the dawn of modern Europe. This course will examine examples of inflationary media—media whose deployment affects not just the content being transmitted, but also a culture’s entire understanding of reality—from both ages, with special attention to those deployed in the context of emergent early modern nation states like Spain, but with an eye to better understanding the effects and potentials of analogous media practices today.
Instructor(s): W. Egginton.

AS.215.713. What Are Humanities?.
They are one of three established divisions of knowledge. Almost half the departments at our own university are categorized under that division. We all feel we know what the humanities are, but how? Is the best answer we have to that question a paraphrase of Justice Potter Stewart’s definition of pornography, “I know them when I see them”? In this seminar we will examine the question of what the humanities are through the close reading of a series of key texts spanning the period from the Renaissance to the twentieth century. In many ways our readings will be necessarily proleptic, since the very category we are interrogating postdates many of the sources we will be analyzing. Our guiding question, however, will be how the specific division of knowledge under which we now organize our disciplines came into being, and what presuppositions that organization implies. The course will be conducted in English but will include, to the extent possible, readings in the original language. Graduate students should be prepared to work in the original language if it is one that they already master (which may include Latin, Spanish, Italian, French, or German) and with translations when not.
Readings may include selections by Desiderius Erasmus, Lorenzo Valla, Juan Luis Vives, Juan Ginés de Sepúlveda, Francisco de Vitoria, Bartolomé de las Casas, Denis Diderot, Johann Wolfgang von Goethe, Immanuel Kant, Martin Heidegger, Maurice Merleau-Ponty, and Jean-Paul Sartre.
Instructor(s): W. Egginton
Area: Humanities.
A close reading of Cervantes' short stories, with concentration on their literary tradition and their relationship to some of his other works. We will also investigate Spanish court society, politics, and history between 1598 & 1621 and critical bibliography.
Instructor(s): H. Sieber.

Graduate students or advanced seniors. This seminar will explore the corpus of political thought in Latin America since independence (1810) to the present by focusing on the discourses that constructed and continue to construct 5 key questions in the negotiation of power in the post-colonial res politica: territory, nationhood, national subjectivity, cultural imagination, justice and regimes of inclusion and exclusion. Readings will include the work of Sarmiento, Euclides da Cunha, Gonzalez Prada, Mariategui, Marti, Revueltas, Paz, Dussel, Ribeiro, Freire, Arguedas, Liberation Theology and Sumaz Kawsay authors.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.753. Latin American Premodern.
Focusing on the idea that Iberian colonization was premodern in character, this course examines the association of Spanish and Portuguese America with topics like feudality, the orient, despotism, and medieval cultural lifestyles. Among others, theoretical discussions include the medieval-modern divide, (neo)medievalism, settler postcolonial theory and comparative colonialisms, modernization and dependency theories; texts include, among others, Argentinians Domingo Sarmiento and José Ingenieros, Brazilians Euclides da Cunha and Gilberto Freire, Peruvian José Carlos Mariátegui, and Cuban Alejo Carpentier.
Instructor(s): N. Altschul.

AS.215.763. Vargas Llosa and Garcia Marquez: Intertextual crossing and World Literature.
The objective of the course is to read critically key works by these two writers in the context of their self stipulated intertexts--Flaibert and Faulkner, respectively-- and the place such intertextual readings in the contexts of the recent discussions on world literature.
Instructor(s): S. Castro-Klaren.

AS.215.778. Topics in Baroque and Neobaroque Literature.
This seminar we will look at theories and source texts comprising the cultural production known as the Baroque and Neobaroque, categories that extend to and include some twentieth-century and contemporary aesthetic practices. Although the focus of the seminar will be largely literary and theoretical, we will look at some examples of visual culture as well. Students will prepare several presentations and a final research paper. Presentations in the second portion of the course should be prepared in reference to a primary corpus you intend to write you final paper on.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.215.790. What is Philology?.
In recent years, philology has gained new attention as a field of methodological reflection which at the same time opens up Literary Criticism towards interdisciplinary research and media studies as it emphasizes the specific status of Literary Criticism in the humanities. The course will examine the changing field(s) of philology from the 18th century to the present in both historical and systematic scope. Including methods of textual criticism, edition philology, and hermeneutics, philology has been addressing questions of theory, methodology and epistemology in various constellations. Precisely because philology's interest lies in connecting languages and literatures to their historical contexts, one of its primary tasks is to account for the epistemic framework and limitations of such historicization, so as to ensure that the literary object not be confused with historical contexts but is perceived as a distinct phenomenon in itself. -- In addition to these questions, the course will discuss methods of edition philology, ranging from historical-critical edition to “material philology” and “genetic criticism” along with analyzing editions of Kafka, Joyce and Flaubert. Further, we will examine the more recent discussion on philology and new media (e.g. digital editions). Readings will include Vico, Schlegel, Schleiermacher, Nietzsche, Auerbach, Szondi, Bolllack, Nichols, Cergiguini, and Ferrer among others. The course will be taught in English. Meets with 212.790, 213.790, and 214.790
Prerequisites: ;
Instructor(s): E. Strowick; J. Neefs
Area: Humanities.

Placed at the crossroads of aethetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.215.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors' work, i.e., the "road beyond neorealism" for Fellini, and Almodóvar's queerness as expressed in his true-and-false testimonies." We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius' Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini's Satyricon; and Thierry Jonquet's novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar's The Skin I Live In (2011). We will be reading Karen Pinkus' Montesi Scandal, an unrealized screenplay about the birth of the Paparazzi in Fellini's Rome, as well as Almodóvar's columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.
AS.215.826. Spanish Independent Study.
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

AS.216.300. Contemporary Israeli Poetry. 3.00 Credits.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, Dalia Rabikovitch, Erez Biton, Roni Somek, Dan Pagis, Yona Wollach, Yair Horwitz, Maya Bejerano, and Yitzhak Laor. Against the background of the poetry of these famous poets we will study recent developments and trends in Israeli poetry, including less known figures such as Mois Benarroch, Shva Salhoov and Almog Behar. Through close reading of the poems, the course will trace the unique style and aesthetic of each poet, and will aim at presenting a wide picture of contemporary Hebrew poetry.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.307. Reflective Mirrors: Israeli and Palestinian Cinema. 3.00 Credits.
Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.342. The Holocaust in Israeli Society and Culture. 3.00 Credits.
This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.
Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.216.370. Israel Through Prose. 3.00 Credits.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffman. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled. -Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffman.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.373. War in Israeli Arts and Culture. 3.00 Credits.
In this course we will study the various representations of what functions as one of Israel's most unifying and yet dividing forces: war. By analyzing literary and cinematic works as well as visual art and popular culture we will attempt to understand the role of war in shaping Israeli society, culture and politics. Topics such as commemoration and mourning, dissent and protest, trauma and memory and the changing image of the soldier will stand at the center of the course. Students with a knowledge of Hebrew wishing to do extra work in Hebrew should enroll in section 2 and the fourth hour will be scheduled at a time convenient to the enrollees and instructor.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.398. Zionism: Literature, Film, Thought. 3.00 Credits.
This course studies the relation between Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the history of Zionism and its influence on Israeli culture. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films. Students wishing to do additional work in Hebrew should enroll in section 2 where students will meet for an additional hour at a time TBD and will earn 4 credits for the course.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities

AS.216.412. The Divine in Literature and Cinema. 3.00 Credits.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.

AS.216.444. Apocalypse Now: Apocalypse in Literature and Cinema. 3.00 Credits.
This course studies literary and cinematic representations of the apocalypse. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and seek to trace the narrative dynamics as well as literary and cinematic means of apocalyptic representations. We will discuss works from various periods, languages, cultures and religions. Among the issues to be discussed: what is the apocalypse, war and the apocalypse, the Holocaust as apocalypse, Biblical apocalypse, post-apocalyptic works, the apocalypse in popular culture, realism, anti-realism and the apocalypse.
Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.216.500. Independent Study. 0.00 - 3.00 Credits.
Instructor(s): N. Stahl.
AS.216.612. The Divine in Literature and Cinema.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.
AS.216.800. Independent Study.
Instructor(s): N. Stahl.

Cross Listed Courses

History of Art
AS.010.204. Italian Art in the Middle Ages. 3.00 Credits.
This course explores key monuments of medieval art and architecture in Italy from c. 400 until 1350. We will concentrate on historical, functional, and aesthetical aspects that lead to the creation of single monuments and art works. Emphasis is given to the analysis of “sacred space” by means of architecture, painted, and sculptural decoration, as well as ritual performances. Another focus is laid on the emergence on the political dimension of art for the creation of civic identity as well as in the context of the late medieval courts. We raise questions about the importance of materiality and science for the creation of medieval art works.
Instructor(s): N. Zchomelidse
Area: Humanities.
AS.010.216. 20th Century Italian Art. 3.00 Credits.
This course will be a critical survey of the major artistic movements in Italy during the 20th century, from Futurism to Arte Povera. Often seen as a secondary location of artistic production, the class will situate the artists working in Italy within a broader historical and global context.
Instructor(s): K. Johnson
Area: Humanities.
AS.010.312. Surrealism. 3.00 Credits.
Topics include: art and the unconscious, “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA. Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.
Instructor(s): M. Warnock
Area: Humanities
Writing Intensive.
AS.010.326. Monsters, Madmen, and Matadors: Goya between Truth and Fantasy. 3.00 Credits.
With over 1,800 works attributed to him, Francisco de Goya (1746-1828) was constantly inventing, experimenting, and pushing the limits of the representable. This course will begin by examining Goya’s printed oeuvre as one possible itinerary for studying his life and work. The second half of the course will consider alternative narratives for Goya’s career based on genre and theme. Topics will include portraiture, madness, religious painting, and the discovery of Goya by later generations of artists, authors, and filmmakers. The course includes several visits to the print room at the Baltimore Museum of Art. There will be a final paper.
Instructor(s): A. Letvin
Area: Humanities.

AS.010.430. Trans-Mediterranean Visual Culture and the Spanish Empire. 3.00 Credits.
This course focuses on the visual culture and the artistic interconnections among the territories under the global hegemony of the Spanish Empire. Students explore the so-called Spanish Golden Age through the lens of the circulation of ideas, artworks and artists as a practice that significantly shaped Early Modernity. We will navigate and discuss the mutual artistic exchanges between Spain, its American Colonies, its Italian territories (Milan, Naples and Sicily), and its allies (Genoa and Florence), as part of an extraordinarily extended network of political and cultural relationships, across the Mediterranean and beyond. The syllabus includes topics such as: the reception of the Renaissance in Columbus’ mudéjar [Moorish] Seville; traveling Iberian artists in search of Michelangelo’s model; El Greco’s Mediterranean; Titian’s influence on Velázquez’s artistic practice; the visual response to the miraculous catholic images in Latin America, such as the Virgin of Guadalupe, and to the canonization of Rosa of Lima, the first saint of the New World. There will be a final paper.
Instructor(s): F. Loffredo
Area: Humanities.
AS.010.434. Italian Art, Politics, and Religion in the time of Dante, c. 1250-1400. 3.00 Credits.
This seminar will investigates the interrelationship between art, politics, and religion on the Italian peninsula during the later Middle Ages. We will focus on the major cities as patrons of the arts (visual and poetic), e.g. Florence, Siena, Padua, Milan, Naples, Venice, and Rome, in order to understand how the elite used art to further their political and religious agendas. Select topics include: the rise of the Mendicant orders; the importance of Dante’s Divine Comedy on manuscript production; artistic competition among communes; the rise of the individual artist; humanism and the arts.
Instructor(s): C. Lakey
Area: Humanities.
AS.010.707. Therapies of Art and Literature in Early Modern Europe.
This seminar examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch’s neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian wisdom genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, innovating therapies that were at once sacramental and philosophical, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.
Instructor(s): M. Merback.

Classics
AS.040.238. Magic and Miracles from Antiquity to the Renaissance. 3.00 Credits.
This course will explore concepts of magic and miracles and their different forms from ancient Greece and Rome and early Christianity through the Middle Ages up to the Renaissance. Dean’s Teaching Fellowship Course
Instructor(s): M. Mueller.
AS.040.601. Italian Renaissance Humanism and Modern Humanities.
This course will reflect on certain key moments in the development of Latinate and Italian Renaissance humanism and will also include reading and discussion of certain recent landmark contributions to the history of the modern humanities.
Instructor(s): C. Celenza.
Writing Intensive.

Literary and art historical perspectives. This team-taught course offers an introduction to the new concentration AS.145.101. Death and Dying in Art, Literature, and Philosophy: Medicine, Science and the Humanities.

Area: Humanities, Social and Behavioral Sciences.

Instructor(s): L. Humphreys

9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages. This course examines the relationship between intellectuals and the search for stability after the Terror, Napoleon’s Brumaire coup. Through engagement with thinkers such as economist Jacques Attali, auditory and cultural historians Emily Thompson and Jonathan Sterne, film sound theorists Michel Chion and Rick Altman, and sound studies scholar Michael Bull, we construct how technologically mediated listening allows us to understand the historical and theoretical components of sound’s media aesthetics. Recommended Course Background: AS.061.245 for undergraduates or JHU graduate student status (open to all JHU graduate students).

Instructor(s): C. Celenza.

Area: Humanities

Writing Intensive.

Anthropology

AS.070.262. Cuban Intellectuals, Cinema, and the State. 3.00 Credits.

This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.

Instructor(s): L. Humphreys

Area: Humanities, Social and Behavioral Sciences.

History

AS.100.602. The French Revolution.

This seminar introduces graduate students to the rich historiography of the French Revolution. Topics include: revolutionary origins, political culture and radicalization, friendship and emotion, family and gender, the search for stability after the Terror, Napoleon’s Brumaire coup.

Instructor(s): L. Mason

Area: Humanities, Social and Behavioral Sciences.

History of Science Technology

Medicine, Science and the Humanities

AS.145.101. Death and Dying in Art, Literature, and Philosophy: Introduction to Medical Humanities. 3.00 Credits.

This team-taught course offers an introduction to the new concentration in medicine, science, and humanities by approaching the topic of death and dying from historical, anthropological, philosophical, theological, literary and art historical perspectives.

Instructor(s): B. Wegenstein; C. Wiener; E. Ender; J. Smith

Area: Humanities

Writing Intensive.

Philosophy

AS.150.483. Topics in Jewish Philosophy: Hassidism. 3.00 Credits.

Hassidism is the ecstatic religious movement that emerged in Eastern European Jewry in the mid-eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of Dov Ber of Mezrich between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon’s report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset.

Instructor(s): Y. Melamed.

Political Science

The seminar will explore to what extent Hegel can be read as contributing to a feminist philosophy. We will focus on Hegelian openings onto the emotional in Phenomenology of Spirit. In addition, we will study feminist philosophers who have drawn on or offered critical readings of Hegel (Irigaray, Butler, Cavarero, Malabou, and others).

Instructor(s): J. Bennett; K. Pahl

Area: Social and Behavioral Sciences.

Humanities Center

AS.300.115. Introduction to Romantic Poetry. 3.00 Credits.

This course offers an introduction to romantic poetry through a comparative approach to three of the movement’s key authors: Friedrich Hölderlin, John Keats, and Giacomo Leopardi. We will work through their main writings in detail along with considerations of their cultural contexts and theoretical and critical approaches to romanticism more broadly.

Instructor(s): L. Lisi

Area: Humanities.
AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change. 3.00 Credits.
In contemporary discussions of climate change, it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class, we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the prospects of our ecological future today. Authors to be studied: George Lillo, Balzac, Dickens, Marx and Engels, Ibsen, Weber, Brecht, Arthur Miller, Steinbeck, Pope Francis, and contemporary fiction, politics and philosophy on climate change.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.379. Israeli Film and Literature. 3.00 Credits.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli cinema and literature. The course will follow both a thematic and chronological path in order to study the ways in which Israeli cinema and literature reflect political, ideological, social, and cultural aspects of contemporary Israel. In this context, we will read well-known works by several major authors and will watch major Israeli films from the 1940s to these days. We will also use a comparative approach to study the different artistic means of both mediums and to evaluate their successes in representing the various tensions of Israeli society and culture.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities Writing Intensive.

AS.300.419. 1966 before and after: French theory. 3.00 Credits.
The “Languages of Criticism” conference held at Hopkins marked a watershed moment in the history of literary studies and redefined, for many scholars and intellectuals, the nature of humanistic inquiries. This course involves the close study of key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities.

Interdepartmental Program in Latin American Studies
AS.361.130. Introduction to Latin American Studies. 3.00 Credits.
The goal of this course is to provide an overview of Latin America, analyzing political and cultural aspects, chronologically organized. We will begin studying the origins of the multi-ethnic societies, starting with the ancient civilizations and their transformation under colonization. It is important to understand the survival of cultural traits among indigenous peasants today in the countries that were the cradle of ancient civilizations: Mexico, Guatemala and the Andean countries. In the republican era the course will focus on the classical Caribbean dictators in the first half of the 20th century and their reflection in the literature, comparing the historical reality with the magic representation in the work of Garcia Marquez. The course will scrutinize the most important revolutions in the continent: the Mexican, Cuban and Bolivian revolutions and the geopolitics of USA in the Americas. Weekly lectures related to the assigned reading will focus on specific periods, topics and regions. After each lecture, we will review the material, connecting specific details from the readings with the more theoretical aspects provided in my lecture. The course has a website where the PowerPoint presentations will be posted. Students are encouraged to post their questions, comments and suggestions on the web after their readings. Students will be given a study guide for each lecture, which will be the basis for the exams. Our perspective on Latin America will be enhanced by a selection of few films related to the topics.
Instructor(s): M. von der Heydt-Coca
Area: Humanities, Social and Behavioral Sciences.

Music
AS.376.305. Operatic Technologies. 3.00 Credits.
Operatic Technologies offers an introduction to opera via a series of case studies about the materials used to produce it. With a particular focus on the Italian case, we will trace issues such as how auditoriums have historically been illuminated; orchestras directed; machines used to create and sustain illusion and operas simulcast. Students will leave this course with a clear sense of how the look and feel of the operatic experience has changed over time; how technological practices established in the past continue to determine productions now, and how the cinema can be considered an extension of opera. Our course includes a visit to the cinema to see a Metropolitan Opera simulcast. Ability to read music is not required.

AS Humanities Center Courses

AS.300.102. Great Minds. 3.00 Credits.
Introductory survey of foundational texts of modern Western literature, though and cinema. This semester will include works by Descartes, Marx, Dostoevsky, Tolstoy, Woolf, Wittgenstein, Heidegger, Arendt, and Pierre Hadot, and films by Dziga Vertov and Carl Theodor Dreyer. The course is taught in lectures and seminar discussions led by the course faculty.
Instructor(s): A. Eakin Moss; H. de Vries; P. Marrati
Area: Humanities.

AS.300.110. Philosophies of Existence. 3.00 Credits.
The question about the meaning of existence is as old as philosophy itself. In the nineteenth and twentieth centuries, however, this question received renewed attention due to various modern processes, chief among which was the process of secularization, giving rise to a philosophical movement that has come to be known as existentialism. This course will offer an examination of key themes, concepts, and doctrines that are associated with existentialist thought including: the rejection of the Aristotelian-scholastic distinction between essence and existence; the rejection of the Cartesian notions that “nothingness possesses no attributes or qualities” and that the infinite is prior to the finite; the problem of repetition and the thought experiment of the eternal return; the problems of death and suicide; and the philosophical significance of feelings such as anxiety, boredom, and nausea, and of experiences such as loneliness and despair. Reading will include a selection of texts by Pascal, Kierkegaard, Nietzsche, Shostov, Jaspers, Heidegger, Sartre, Camus, and others.
Instructor(s): A. Rot
Area: Humanities.

AS.300.133. Freshmen Seminar: Women of Epic Fame in Literature and Drama, 800 BCE-1650 CE. 3.00 Credits.
From Homer’s Odyssey to Shakespeare’s Antony and Cleopatra, powerful women who achieve their ends by working from within the system are often overlooked or not fully explored. Our readings and discussions will foreground these women of fiction, while we also consider the social conditions of their living contemporaries. Readings will include: Homer’s Odyssey (Penelope); Virgil’s Aenead (Dido); Dante’s Inferno (Beatrice); Milton’s Paradise Lost (Eve), and several accounts of Cleopatra in plays by Shakespeare and his contemporary women writers. Cross listed with Theater Arts, Writing Seminars, and WGS.
Instructor(s): T. Tower
Area: Humanities
Writing Intensive.

AS.300.139. Introduction to Intellectual History. 3.00 Credits.
This course offers a conceptual and historical introduction to Intellectual History. What makes the “history of ideas” different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call “ideas”? In what sense do they have a history? These are examples of the kind of questions addressed in the course.
Instructor(s): P. Marrati
Area: Humanities.
AS.300.143. Introduction to Comparative Literature. 3.00 Credits.
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.202. Life and Form in Modern Thought. 3.00 Credits.
This course is a theoretical treatment of the question of form in fragmented bourgeois society since the late eighteenth century. Essential to modernity is a political and philosophical conflict between established forms and individual and collective lives. We will treat the concepts of form, freedom, and subjectivity in four spheres: aesthetics, morality, political economy, history. We will read texts by Kant, Hegel, Marx, Lukacs, Weber, and Adorno, literary works by Goethe, Rilke, Kafka, Stevens, and discuss paintings by Manet, Malevich, Guglielmo.
Instructor(s): O. Mehrgan
Area: Humanities.

AS.300.213. Homelessness in America. 3.00 Credits.
This course examines homelessness in the United States from multiple perspectives. Students will hear first-hand from individuals who have experienced homelessness as well as experts in the field.
Instructor(s): T. Gottbreht
Area: Humanities.

AS.300.228. Brain and Society. 3.00 Credits.
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neurenum7learning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.

AS.300.231. Introduction to Comparative Literature. 3.00 Credits.
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities
Writing Intensive.

AS.300.232. Existentialism. 3.00 Credits.
What is existence and why do we care about it? What happens when we think about the nothing? What is the philosophical significance of issues such as commitment, marriage, death, and suicide, or of feelings such as anxiety, boredom, and nausea? We will considers these themes and read a selection of texts dealing with them by some of the most famous thinkers associated with the existentialist tradition, including Pascal, Kierkegaard, Nietzsche, Heidegger, Sartre, and Camus.
Instructor(s): O. Mehrgan
Area: Humanities.

AS.300.239. Philosophy and the Emotions. 2.00 Credits.
We will read some of the most important texts in the history of the philosophy of the emotions, including works by Plato, Descartes, Spinoza, Schopenhauer, Heidegger, and Freud. We will discuss themes such as love, shame, apathy, anxiety, the mind-body problem, the notion of spirit, the notion of mood, and the overall problem of the distinction between emotion and reason.
Instructor(s): A. Rot
Area: Humanities.

AS.300.241. The Literature of the Everyday. 3.00 Credits.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read closely a set of novels by Flaubert, Mann, Dickens, Zola, Tolstoy, and Woolf from the period between 1850 and 1950 in which the development of realism reaches its climax. These novels explore the nature of work, family, the body, consciousness, and the changing relation between individual and tradition in modernity. We will situate these novels in their social, historical, and literary contexts, and establish a set of terms for the formal study of the novel as a genre (plot, character, setting, narrative, etc.). (Students of all levels who are interested in literature are encouraged to take this course.)
Instructor(s): Y. Ong
Area: Humanities.
AS.300.280. Great Poems of the Americas: Post-Epics. 3.00 Credits.
"In America the natural man has triumphed over the imported book," announced José Martí. The call to cast off the literary forms of Old Europe echoed throughout the hemisphere during the 20th century, as poets sought to write a new kind of “American” poetry. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems, such that it has become the “post-epic.” We will investigate the long poem in 20th-century North and Latin America, from the encyclopedic Cantos of Ezra Pound and the sweeping Canto General of Pablo Neruda to briefer works by Derek Walcott and Gwendolyn Brooks, and fragmented series by Gertrude Stein and César Vallejo. We will read texts including Charles Olson’s sprawling history of America, The Maximus Poems, and William Carlos Williams’s Paterson; Aimé Césaire’s Notebook of a Return to My Native Land and Kamau Brathwaite’s The Arrivants; Elizabeth Bishop’s cartographic North & South; Octavio Paz’s single, 584-line, cyclical sentence, Sunstone; and Vicente Huidobro’s careening, linguistically playful Altazor. As we test our definition of “post-epic” against these texts, we will consider whether the term may be applied equally to the heroic tale and the “open field” poem. To situate the long poem in history, we will examine changes in poetic form alongside questions of modernization and globalization, technology and development, and socio-political transformation.
Instructor(s): R. Galvin
Area: Humanities
Writing Intensive.

AS.300.290. Freshman Seminar: Shakespeare and his “Goddess”: real and imaginary lovers in the poetry and drama of early modern Europe. 3.00 Credits.
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’ is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. Incorporating music and drama, we will examine that sonnet tradition from the perspective of Shakespeare and his contemporaries, tracing both the historical roots of the Shakespearian sonnet form its influence on the music of the present day, and finishing the semester with Shakespeare’s The Taming of the Shrew, a play that further illustrates and problematizes Shakespeare’s ‘goddess’ reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scéve, Louis Labé, Joachim du Bellay and Pernette du Guillot; and later reflections on the sonnet by Shakespeare and his English contemporaries: Sir Philip Sidney; Sidney’s niece, Mary Herbert, Lady Wroth; John Donne; Robert Southwell; and Katherine Phillips. All continental works will be read in translation.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.291. Freshman Seminar: Home and Exile. 3.00 Credits.
This interdisciplinary seminar examines the concept of home and the condition of exile in 20th century Russian and Soviet culture from a variety of theoretical and methodological perspectives. Students will be introduced to classics of Soviet dissident, exilic, and official literature (Akhmatova, Brodsky, Nabokov, Bulgakov, Zamyatin), Soviet films (including Tarkovsky’s Solaris), as well as key theoretical texts about what it means to be “at home.” Open to freshmen and sophomores with approval of professor.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.301. Life, Vitality, Thought. Philosophy and the Natural Sciences in Nineteenth Century Europe. 3.00 Credits.
Last year neuroscientists at MIT shined an optogenetic light on brain cells in order to artificially stimulate memories. If every detail of our past has a particular location in the brain, then we could alter, and even destroy, memories. Does this mean that humans are like machines whose history can be erased as easily as we delete files on a computer? Or are memories, like consciousness, not so easily reducible to brain structures? This class will examine how these and other questions shaped the history of modern biology and experimental psychology beginning in the nineteenth century. We will read the works of prominent biologists, psychologists, and philosophers who were all involved in a rich debate over the nature of life and thought.
Instructor(s): L. McGrath
Area: Humanities
Writing Intensive.
AS.300.303. Multum in Parvo: Forms of Short Fiction. 3.00 Credits.
The theory and practice of reading brief narratives, from the parable to the post-modern short story. We will be attending to the rhetorical and ethical issues that are raised within the compass of such fictions, with consideration of some specific forms that have shaped the development of recent literary tales: the case history, portraits of the artist, fictions of detection, and certain enduring philosophic myths. Time permitting, we'll also examine how a few of our narratives have been translated into another medium such as film.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.305. Islamic Philosophy. 3.00 Credits.
This course is an introduction to key concepts and seminal texts of Islamic Philosophy in the classical period, running from the 7th to the 13th century. Although instrumental to the transmission of Greek philosophy and to the rise of modern philosophy in the western world, Islamic philosophy is not merely a conduit of transmission. Philosophers on Islamic lands, offered original philosophical solution to both old problems, and new problems that arose with monotheism. We will begin our examination of the specificity of Islamic Philosophy by situating it in its historical and political context. We will have to tackle fundamental questions: How did philosophers who wrote in Arabic translate and transmit Greek philosophical texts? What does it mean to do philosophy within an Islamic context? Is it not an oxymoron to talk about philosophy within a religious context? The course is divided into three sections that treat of three general fields: politics, metaphysics and psychology and discusses the major Philosophers of the classical period, with particular attention paid to the work of Alfarabi, Avicenna and Averroes.
Instructor(s): L. Ferhat
Area: Humanities
Writing Intensive.

AS.300.307. Dostoevsky and Critical Theory. 3.00 Credits.
The tormented, obsessive and sadistic characters of Dostoevsky's novels posed a challenge to positivism and reason too scandalous and compelling to be ignored. The novels inspired some of the most brilliant and influential thinkers of the nineteenth and twentieth centuries in the fields of religion, philosophy, psychology and literary theory. We will read three of Dostoevsky's philosophically challenging novels alongside works by these critics and philosophers. While exploring their ideas about faith and unbelief, madness and reason, violence and torture, society and history, we will also inquire into the relationships among literature, philosophy and biography and examine the processes of influence and adaptation.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.310. Introduction to Psychoanalysis. 3.00 Credits.
One of the most controversial intellectual endeavors of the 20th century, psychoanalysis is a theory about human nature, motivation, behavior, development and experience, as well as a clinical method of treatment for psychological disorders. We will read texts by Freud, Jung, Ferenczi, Rank, Horney, Klein, Anna Freud, Lacan, and others.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.314. Dreams - From Genesis to Freud. 3.00 Credits.
Die Traumdeutung is one of the groundbreaking books of the 20th century. Translated into English as The Interpretation of Dreams, this book argues that dreams are both interpretable and meaningful. Unlike the psychiatrists of his days, Freud held that dreams are expressions of the subject and thus positioned himself closer to the ancient conception of dreams than to the views of the positivistic science of his days. He emphasized that dreams represent not so much an objective reality but rather the symbolic manifestation of the truth of the subject's unconscious, a "symptom" of a history.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.316. Philosophy and Revolution: Four Case Studies. 3.00 Credits.
This course offers a historical and systematic inquiry into the modern idea, most clearly expressed by the young Karl Marx, that revolution should be the realization of philosophy. We will take up four revolutionary moments or four crucial years in four places and study them together with their philosophical influences and / or consequences: the French Revolution of 1789/1792 with Hegel, the Russian/October Revolution of 1917 with Lenin and Georg Lukacs, the Iranian Revolution of 1979 with Michel Foucault, the Egyptian Revolution of 2011 with Alain Badiou. Some of the concept with which we will be engaging include freedom, alienation, historical necessity, reification, political spirituality, infinity.
Instructor(s): O. Mehrgan
Area: Humanities
Writing Intensive.

AS.300.317. Russian Novel. 3.00 Credits.
Russian authors began writing novels in the shadow of counterparts in Western Europe, and thus had the chance to experiment with the form and scope of genres and themes they found in European literature: Alexander Pushkin's novel in verse Eugene Onegin pays homage to Byron's Don Juan and satirizes Richardson's Pamela; Mikhail Lermontov's nested stories A Hero of Our Time owes a debt to Romantic and gothic fiction, and Nikolai Gogol's Dead Souls brings Dante's Inferno to the Russian provinces. From these literary forefathers emerged the likes of Feodor Dostoevsky and Leo Tolstoy, who made a lasting impact on world literature with their psychological and philosophical novels. This course examines the Russian novel in its historical and cultural context alongside contributions of Russian literary criticism in defining novel form and genre.
Area: Humanities
Writing Intensive.

AS.300.318. The Modernist Novel: Mann, Woolf, and Joyce. 3.00 Credits.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century – Thomas Mann, Virginia Woolf, and James Joyce – who explored and exploded narrative techniques for depicting what Woolf called the "luminous halo" of life. Selected novels include: Death in Venice, Buddenbrooks, Jacob’s Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities.
AS.300.319. Skepticism and Theology. 3.00 Credits.
This course examines the relation between the history of philosophical theology and the foundations of modern skepticism by focusing on their mutual point of departure: the concept of the human being as an essentially finite being limited in its capacity to know others, the world, and God.
Instructor(s): T. Dika
Area: Humanities
Writing Intensive.

AS.300.322. Reason, Religion, and Modernism in Europe. 3.00 Credits.
Amidst the rise in psychological research in France and the secular reforms of the Third Republic, French philosophical and religious thinkers upended their Catholic tradition in the late nineteenth century. This seminar explores the Modernist turn in Catholicism, which drew on scientific advancements in order to challenge Church hierarchies and fundamentally transform Catholics' personal relationship to God. Our objective is to examine the intersection of science, faith, and society in historical and philosophical perspective.
Instructor(s): L. McGrath
Area: Humanities.

AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies. 3.00 Credits.
Comedy and musical comedy film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare films of the era in a variety of genres (musical, epic, Western, drama), examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.325. American Madness – History of the Treatment of the Mentally Ill. 3.00 Credits.
As mental illnesses became a social issue during the 18th century, community institutions were created in order to handle the needs of individuals with such illnesses collectively. This course will investigate the history of these institutions in the USA from the seemingly quiet, secluded, and peaceful private asylums in country settings, at the beginning of the 19th century, through the notorious crowded public, so-called “psychopathic hospitals” in mid-20th century, to the crisis-services, short-term acute psychiatric units, and out-patient services that followed the “death of the asylum” at the end of the 20th century. The history of the institutional care of the mentally ill in America is also the story of American psychiatry changing attitudes towards these individuals. Reading will include selections from 200 years of writings of asylum superintendents, psychiatrists, patients, and historians of psychiatry such as Foucault, Goffman, Grob, Scull, Lunbeck, Micale, and Mora.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.326. Comparative Modernisms. 3.00 Credits.
Dynamic, unprecedented literary innovation marks the first part of the 20th century. This course moves from Dadaism, Surrealism, and the Harlem Renaissance, through Anglo-American, Caribbean, and Brazilian modernisms, and the Latin American vanguard. We’ll investigate literary experimentation in connection with the visual arts, modernization, colonialism, race, gender, and war. We will read novels, poetry, and essays from major writers who may include Apollinaire, André Breton, Marcel Proust; Gertrude Stein, HD, Djuna Barnes, Elsa von Freytag-Loringhoven, Mina Loy, T.S. Eliot; James Joyce, W.B. Yeats; Langston Hughes, Zora Neale Hurston, Jean Toomer; Claude McKay, Aimé Césaire, Louise Bennett, Jean Rhys, Nicolás Guillén; Oswald de Andrade, Julio Cortáz, Oliverio Girondo, Jorge Luis Borges.
Instructor(s): R. Galvin
Area: Humanities
Writing Intensive.

AS.300.327. Introduction to Comparative American Cultures: Obama and Philosophy. 3.00 Credits.
This course will investigate the philosophical as well as theological, juridical and political, and rhetorical and literary backgrounds that have informed and shaped Barack Obama's writings, speeches, and policy strategies leading up to and during his presidency. While paying minute attention to a few selected controversial debates in domestic and international governance and relations, and while discussing the question of Obama's legacy in and after the upcoming elections, our primary focus will be on understanding the curious blend of Christian realism, influenced by the theologian Reinhold Niebuhr, the tradition of American civic republicanism and pragmatism, and Obama's specific brand of post-Civil Rights, if not necessarily post-racial, politics. All these tenets coalesce in a vision and politics that may well be described as one of deep pragmatism. Attention will be paid to Obama's early appeal to simple ideas and small miracles, each of them yielding the Biblical and sobered injunction of a hope against hope. But extensive consideration of his thought and impact in the assessment of biographers and intellectual historians, legal scholars and political theorists, cultural critics and pundits will add to our attempt to understand and take stock of the Obama phenomenon as well.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.328. Wittgenstein's Conception of Philosophical Activity. 3.00 Credits.
This course will focus on Wittgenstein's conception of philosophical activity: a critique of language and a clarification of logic; but what will interest us most is his idea that philosophy is a work on oneself. We will be reading Wittgenstein's two main works, the Tractatus Logico-Philosophicus and Philosophical Investigations, as well as On Certainty.
Instructor(s): S. El Amin
Area: Humanities.
AS.300.333. Melancholy in Science, Literature, and Film. 3.00 Credits.
This course explores the manifold nature of melancholy from an interdisciplinary perspective that combines sciences, history of medicine, and the arts. Defined by Greek medicine as the excess of black bile, melancholy, in its long history, has been seen as disease of the soul, state of intellectual grace, or psychological condition. The course will examine chronologically the development and variety of the meanings of melancholy between medical texts, visual representations, poetry, psychoanalytic theory, and films. The works analyzed will include, among others, those by Galen, Robert Burton, Albrecht Dürer, Shakespeare, Cervantes, Baudelaire, Freud, Lars von Trier.
Instructor(s): E. Fabietti
Area: Humanities.

AS.300.337. The Rise of the Modern Short Story. 3.00 Credits.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.338. Comic Evolution: Stages in Development of Comedy. 3.00 Credits.
An eclectic tour of comic forms and theories from classical antiquity to contemporary practice. Although the textual focus will be on stage comedy, we’ll also consider the comic in other forms and media—film (Keaton), comic strip (Herriman), and contemporary satire. Some of the familiar questions on the agenda: topical vs. ‘perennial’ material, the social functions of comedy, the ‘shelf life’ of humor, butts & scapegoats, symmetries & asymmetries between comedy and tragedy, verbal and non-verbal comic devices, the general rhetoric of comedy, and the possibility of a Grand Unified Theory. (Final paper.)
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.340. Thinking the Body/The Body Thinking: Introduction to Aesthetics from the Perspective of Dance. 3.00 Credits.
In the nineteenth and twentieth centuries, dance has developed into a serious art form. However, philosophers of art have paid little attention to dance. Why is this the case? Is dance perhaps too corporeal or too unreflective or in some other way too marginal to be a fruitful topic for philosophical reflection? Or does the failure of mainstream philosophical aesthetics to take dance seriously perhaps signal unacknowledged biases in such approaches? Might dance, the art form whose medium is the human body, have something to contribute to current philosophical interest in rethinking the human body and, particularly, the relation between mind and body? Seeking responses to questions such as these, this course provides an introduction to the place of dance in the philosophy of art. The first half of the course examines portions of seven foundational texts in the philosophy of art and culture as well as philosophical accounts of dance that draw on these foundational texts in a range of ways. The aim is not only to explore dance from the perspective of traditional aesthetic theories, but also to explore such traditional theories from the perspective of arguably the art form which they have been most resistant to treating seriously. This oblique angle of entry into mainstream approaches to general aesthetic topics will bring into focus important questions that might be easily overlooked if one examines such theories only in light of their preferred examples of art. The second part of the course explores dance as itself a mode of philosophical reflection, examining how the work of choreographers such as George Balanchine, Jerome Bel, William Forsythe, Crystal Pite and Yvonne Rainer explore the possibilities and limits of their medium: the human body. One proposal will be of particular concern: Might such instances of the body thinking bring into focus more adequate ways of thinking about the body?
Instructor(s): K. Boyce
Area: Humanities
Writing Intensive.

AS.300.343. Philosophy and Literary Form. 3.00 Credits.
This course examines the difference literary form can make to the shaping of philosophical content. Philosophers have tended to treat literary form as merely ornamental. For this reason, they have often underestimated the philosophical significance not only of certain works of literature but also the literary form of even those works uncontroversially considered to be philosophical. This course explores the philosophical significance of literary forms in both kinds of works. The first half examines how and why Anglo-American philosophers have incorporated the interpretation of individual literary works into their philosophical writing. We will concentrate on three works of literature—Ibsen’s A Doll’s House, James’s The Golden Bowl and Wordsworth’s Prelude—each of which has attracted significant philosophical attention. The second half of the course examines how philosophers have brought literary analysis to bear in order to illuminate the philosophical achievement of certain canonical philosophical texts. We will concentrate on three literary forms—dialogue, meditation and confession—as these forms are instantiated by three works of philosophy: Plato’s Republic, Descartes’s Meditations and Wittgenstein’s Philosophical Investigations.
Instructor(s): K. Boyce
Area: Humanities.
AS.300.345. Madness Interpreted – A Case Study in Medical Humanities. 3.00 Credits.
Too often conventional medical education teaches the student to translate a rich and complex narrative of illness into a minimalistic account, stripped of its ambiguities. Case presentations, too, are highly formalized reports lacking the historical, cultural, and social context. Although medicine since antiquity relies on the interpretation of observations, "evidence-based medicine," when reductively used, tends to ignore the basic fact that we are "self-interpreting animals." Patients and doctors alike try to make sense of their experiences as they recount them and, hence, case narratives teach us not only about disease and medical practice but also what it means to be human. This course will concentrate on the "case" of what is arguably the most famous psychiatric patient in the world, Daniel Paul Schreber, the German 19th-century Senatspräsident of the Saxon Supreme Court. Beginning with Freud, the first doctor who turned Schreber’s rich psychotic delusional world, as expressed in his bizarre, at times comic and then again painful, Memoir, into a "case of paranoia," we will follow the many interpretations that this narrative of illness with its unique cosmology, private theology, extraordinary creatures, transgressed sexuality, and cataclysmic vision of the universe, inspired in generations of psychoanalysts, historians, philosophers, theologians, literary critics, essayists, and scholars in political science as well as queer studies. Whether he was a paranoid schizophrenic, victim of traumatic abuse, a solipsistic philosopher, proto-fascist, or cultural hero, Schreber’s memoir offers a paradigmatic case in the study of the field of medical humanities. Readings will include: Schreber, Freud, Benjamin, Canetti, Klein, Lacan, Deleuze and Guattari, de Certeau, Lingis, Lyotard, and Santner. Cross-listed with GRLL and History.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.348. What is Philosophy?. 3.00 Credits.
This course studies different understandings of the task, scope, and methods of philosophy across its history. It does not aim to offer a comprehensive overview of the discipline, but rather to discuss in depth some of its foundational texts. Authors include: Plato, Aristotle, Descartes, Kant, Heidegger, Wittgenstein.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.350. Skepticism on Stage and Page. 3.00 Credits.
This course explores influential interpretations of and responses to skepticism in literature, philosophy and theater. Case Studies will include: Descartes, Ibsen, James, Kafka, Kierkegaard, Poe, Shakespeare, and Wittgenstein.
Instructor(s): K. Boyce
Area: Humanities.

AS.300.351. The Phenomenon of Boredom from an Interdisciplinary Perspective. 3.00 Credits.
We will examine the history, philosophy, sociology, and psychology of boredom and consider the characteristics, concerns, and methods of the different fields and disciplinary frameworks in which this phenomenon has been studied.
Instructor(s): A. Rot
Area: Humanities
Writing Intensive.

AS.300.352. Fictions of Autobiography. 3.00 Credits.
A comparative survey of autobiographical writing as a creative process. Beginning with a few classic examples (Augustine, Petrarch, Montaigne, Rousseau), the seminar will proceed to more recent adventures in the first-person singular. Modern instances will include self-creation in several genres and media, including narrative, dramatic, and cinematic forms. Seminar meets at 107 St. Martin’s Road.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.353. Present Mirth: Stages of Comedy. 3.00 Credits.
A comparative survey of presentational comedies from Aristophanes to Beckett on stage and screen, with some attention to to the vexed question of theories of comedy [no laughing matter].
Instructor(s): O. Mehrgan; R. Macksey
Area: Humanities
Writing Intensive.

AS.300.355. Forms of Modern Fiction. 3.00 Credits.
A comparative tour of modern narrative forms from 3 continents. The emphasis is on the development of shorter fictional models, though some of the founders and innovators are better known for their novels. The emphasis will be on the emergence new structural, rhetorical, and thematic concerns, including adaptation to other media. There will be an optional hour for queries and discussion TBA.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.359. Homelessness in America: Interdisciplinary and Critical Perspectives. 3.00 Credits.
This course examines innovative research, writings, and other media concerning homelessness in the United States, with special emphasis on critical/philosophical and interdisciplinary approaches that shed new light on the issue.
Instructor(s): T. Gottbreht
Area: Humanities.

AS.300.360. Critical Thinking and its History. 3.00 Credits.
This course aims at discussing different conceptions of “critique” and “critical thinking” in modern and contemporary philosophy. Readings include: Descartes, Kant, Adorno, Foucault, Arendt, Said, Butler.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.361. Fiction & Case History: Constructive Reading. 3.00 Credits.
A comparative seminar in the attentive reading of short fictions and other narratives. Attention to the reader's share as well as that of the author in the construction of stories; consideration of the diagnostic and therapeutic uses of the imagination.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.
AS.300.362. Beauty and the Predicate Calculus. 3.00 Credits.
Ferre's development of a predicate calculus made possible the evolution of a distinctively "analytic" tradition in philosophy. But arguably that tradition has failed to fully appreciate the implications of this important development. The course will begin by examining how Ferre himself understood the importance of his advance. It will then consider arguments to the effect that some of the most influential accounts of mind and action—namely those shaped by Donald Davidson—fail by failing to take this advance adequately into account. In light of these arguments in philosophy of mind and action we will reconsider the implications of Ferre's advance for aesthetics. The principle aim of the course will be to construct an account of art and criticism that takes those implications fully into account. Efforts to construct alternatives that overcome this purported failing will be examine
Instructor(s): A. Eakin Moss
Area: Humanities

Writing Intensive.

AS.300.365. Desire in the Fin de siècle. 3.00 Credits.
This course examines the obsession with desire at the turn of the 20th century in literature, drama, philosophy and social thought and its implications for notions of self and community in modernity. We will read comparatively across European, Russian and American cultures, including Stoker's Dracula, Hamsun's Hunger, plays by Chekhov, Strindberg, Ibsen, Wilde, and stories by Tolstoy, Gorky, Chopin and Larsen.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.366. Russian Avant-Garde Cinema. 3.00 Credits.
Russian cinema was born out of the intense artistic experimentation of the fin-de-siècle avant-garde and developed in a climate of dramatic political and cultural change in the twenties and thirties. While subject to draconian censorship in the Soviet period, it nonetheless engaged in active dialogue with the film industries of Western Europe and America and had a lasting impact on world cinema. This course examines the extraordinary flourishing of avant-garde cinema in the Soviet Union in the 1920s and 30s including films by Eisenstein, Vertov, Pudovkin, and Dovzhenko, their theoretical writings, and their far-reaching influence on film and film theory. All readings in English, films subtitled in English.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.367. Seeing Like a Woman. 3.00 Credits.
This seminar examines the problems of female desire, subjectivity, spectatorship and performance in fiction, poetry, memoir and film from a variety of cultures and theoretical perspectives. Readings include: de Beauvoir, Riley, Butler, Cixous, Tolstoy's Family Happiness, Woolf's Orlando, Larsen's Passing; Poetry by Moore, Bishop, Plath, Akhmatova, Tsvetaeva and Szymborska. Films by Deren, Ophuls, Hitchcock, Potter, Campion, Akerman, Varda, Denis.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.369. The Bible and Philosophy (Introduction to Intellectual History). 3.00 Credits.
This course will examine several attempts by ancient, modern, and contemporary thinkers to come to terms with the Biblical concept of creation and provience, revelation and prophecy, law and election, apocalypse and eschatology, with a special emphasis on the first articulation of the idea of Christian universalism, faith and justification, and time and eternity, sacrifice and the body. Readings will include the entire corpus of St. Paul's authentic letters, the major Scriptural passages on which he draws, but also selections from Philo of Alexandria, St. Augustine, Spinoza, Nietzsche, Karl Barth, Jakob Taubes, Alain Badiou, Giorgio Agamben, and others.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.370. What Computers Can't Do and other Controversies. 3.00 Credits.
A critical examination of recent debates over the interface between the humanities and the natural sciences. Topics include: computer models of the mind; consciousness and the brain; affect theory and the neurosciences; mirror neuron theory; literature and the natural sciences; the new trauma theory.
Instructor(s): M. Fried
Area: Humanities.

AS.300.372. Dance and the Russian Avant-Garde. 3.00 Credits.
This course will explore the relationship between art and dance during the explosion of artistic creativity at the time of the Russian Revolution (1900s-1920s) as well as the influence of the Russian Avant-Garde on modern dance and theories of movement through the 20th century. We will examine how dance both gave physical form to aesthetic, philosophical and political ideas and catalyzed new forms of thinking about the human body and modern spaces. Lecture and discussion of readings and screenings will be paired with a weekly movement workshop in the dance studio that will introduce students to different forms and theories of avant-garde and modernist dance and movement theory. No prior dance experience or knowledge of Russian is required.
Instructor(s): A. Eakin Moss; C. Dinapoli
Area: Social and Behavioral Sciences.

AS.300.377. Cinema and Philosophy. 3.00 Credits.
Why is contemporary philosophy so interested in cinema? Do movies have anything to say about philosophical problems? What are the most productive ways of bringing films and philosophy into conversation?
Instructor(s): M. Shuster
Area: Humanities.
AS.300.383. History of Madness from the Bible to DSM-V. 3.00 Credits.
Madmen, lunatics or the insane, have seen an extraordinary variety of responses and attitudes across the centuries. Whether seen as a “true” phenomenon or as socially constructed “madness” was defined and treated, examined and controlled, diagnosed and “cured” according to the spirit of the time. This course will follow the varied social imageries of “madness” throughout Western history, from the Bible to the contemporary and controversial Diagnostic Statistical Manual (DSM) in its most recent 5th edition. Alongside primary texts by Hippocrates, Avicenna, Pinel, and Freud and secondary texts by Michel Foucault, Ian Hacking, Edward Shorter, and Elaine Showalter, among others, we will acquaint ourselves with first-person accounts of “madness” and its different forms of treatment, ranging from lunatic asylum, through electric-shock treatments and lobotomies to psychoanalysis. The course will explore the interaction between the historical and social, scientific and political as well as economical factors that have shaped the views of “madness” and its treatment.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.389. Freud's Cases - Source of Psychoanalytic Knowledge. 3.00 Credits.
Even though major scientific discoveries have been made from the intensive study of singular cases, modern science is mostly quantitative in its approach. In this course we will follow psychoanalysis’ use of clinical practice as the primary context for the generation of knowledge. We will use two notions from the philosophy of science: “exemplars” (Kuhn) and “personal knowledge” (Polanyi), as we read Freud’s cases in which he combines theoretical consideration and detailed investment in the singularity of the person. In his accounts of the “hysteria” of Dora, the “phobia” of Little Hans, the “obsession” of the Rat Man, the “infantile neurosis” of the Wolf Man and Schreber’s “paranoia,” Freud not only generated theoretical and technical knowledge but also constituted the “single case study” genre of investigation, as the primary source of psychoanalytic knowledge. Readings will include: Freud, Foucault, Polanyi, Kuhn, Hacking, and Forrester. Cross-listed with Film and Media Studies
Instructor(s): O. Ophir
Area: Humanities.

AS.300.393. The Literature of the Everyday: Realism in the 19th- and 20th-Century Novel. 3.00 Credits.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read works by Flaubert, Dickens, Zola, Eliot, Mann, Tolstoy, and Woolf in the context of critical theories of realism.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.395. Stages of Comedy: Theory & Practice. 3.00 Credits.
A comparative survey of dramatic and cinematic events, with some attention to the various attempts to present a theory of comedy. Seminar will include some food and drinks to support the discussions.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.397. How Freud Changed the Way We Think. 3.00 Credits.
An examination of aspects of the history and theory of psychoanalysis, focusing on the question of origins in Freud’s work. Texts by Freud, Laplanche, Lacan, Derrida, and others.
Instructor(s): M. Fried
Area: Humanities.

AS.300.399. Cinema and Philosophy. 3.00 Credits.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.

AS.300.411. Animal Minds. 3.00 Credits.
An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-list with AS.150.490
Instructor(s): M. Fried; M. Williams
Area: Humanities.

AS.300.412. Flaubert. 3.00 Credits.
Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Education sentimentale edition required: GF Flammarion, 2003. Co-listed with 300.604
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.300.414. Starobinski: The Art of Interpretation. 3.00 Credits.
How can we become better readers of the signs and symptoms that texts, as well as minds and bodies, address to us? An eminent figure of European intellectual life, deeply versed in the world of the arts and of medicine, Jean Starobinski will guide us through this inquiry. With his seminal work Jean-Jacques Rousseau: Transparency and Obstruction as our focus, we will learn why the ideas of this modern humanist have had such a wide-ranging influence on twentieth-century conceptions of subjectivity, interiority, imagination, and illness (e.g. nostalgia, melancholia, paranoia). We will also learn through his work on Rousseau, why Starobinski’s groundbreaking ideas about writing (l’écriture) shaped some of the major debates of French theory. This course is taught in English. For graduate students, reading knowledge of French is desirable. Next to Transparency and Obstruction, readings involve selections from Starobinski’s essays and from Rousseau. No exams, but a short oral presentation and a final essay.
Instructor(s): E. Ender
Area: Humanities.

AS.300.416. Wittgenstein, Religion, and Ethics. 3.00 Credits.
Starting out from the Lecture on Ethics, this course will investigate Wittgenstein’s approaches to religion and ethics, mysticism and the spiritual, and contrast these with those of his contemporaries and later interpreters. Readings will include Ludwig Wittgenstein, Martin Heidegger, Elizabeth Anscombe, C.S. Lewis, Hilary Putnam, Richard Rorty, Stanley Cavell, Martin Stokhof, and others.
Instructor(s): H. de Vries
Area: Humanities.
AS.300.417. Women in Psychoanalysis - The Second Generation of Psychoanalysis. 3.00 Credits.
With its forced dissemination after the Anschluss of Austria with Germany in 1938, psychoanalysis shifted its center of gravity not only from Vienna to London, creating "a new kind of diaspora," but also from a patriarchal and phallocentric focus towards a mother-child centered theory and practice. After Freud's death, psychoanalysis, notably in Britain, was led by two women psychoanalysts, Melanie Klein and Anna Freud, each with a very different view on the nature of childhood, sexuality and aggression, intellectual development, the development of responsibility, motherhood, pathology, and the life of the mind as such. This course will introduce the important intellectual psychoanalytic concepts and theories, which were developed not only through the clinical work of these two exceptional women with children, but also through what came to be known in the history of psychoanalysis as "The Controversial Discussions": a set of intense debates between two thought collectives organized around these female pioneers. Readings will include: Sigmund Freud, Klein, Anna Freud, Winnicott, Heimann, Jones, and Isaccs. Cross-listed with History, Psychology, WGS.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.420. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis. 3.00 Credits.
Freud's idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be un-American. In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.610
Instructor(s): O. Ophir
Area: Humanities.

AS.300.421. Spiritual Exercises: Concepts and Practices. 3.00 Credits.
This course will introduce the concepts, practices, and history of spiritual exercises and its modern transformations. Readings include Marcus Aurelius, Philo of Alexandria, St. Augustine, St. Ignatius of Loyola, Henri Bergson, Ludwig Wittgenstein, Stanley Cavell, and Pierre Hadot.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.422. Luther, Philosophy, Politics: 500 Years After the Reformation. 3.00 Credits.
As historical legend has it, in 1517 the German monk and then professor of theology Martin Luther inaugurated a revolution in thinking, belief and moral practice, known as the Protestant Reformation by nailing his Ninety-Five Theses, under the title Disputation on the Power of Indulgences, to the door of the Castle Church of Wittenberg. Known for his brutal characterization of reason as the devil's whore, his theology of the hidden god, his catechisms, the doctrine of the two realms, and his condemnation of peasants' revolts of his days, Luther's influence has been profound and lasting. We will study some of his most influential theses, treatises, and sermons and will seek to gauge the effect they had on the Western narrative of secularization and modernity, together with their deep influence on post-Reformation and, indeed, recent philosophy and political thought. Readings include: Luther, G.W. F. Hegel, Max Weber, Martin Heidegger, Karl Barth, Erik Peterson, Dietrich Bonhoeffer, Kaj Munk, Ernst Bloch, Philippe Lacoue-Labarthe, Marcel Gauchet, Giorgio Agamben, and others.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.423. Contemporary Theory: New Materialisms, New Vitalisms, and the Post- Traumatic Subject. 3.00 Credits.
A discussion of: recent versions of materialism and realism, including materialisms informed by neuroscience; vital materialism; the latest developments in trauma and affect theory; and related trends. Texts by Zizek, Malabou, Damasio, Pippin, McDowell, Johnston, Brassier, Churchland, LeDoux, and others.
Instructor(s): M. Fried
Area: Humanities.

AS.300.424. Psychoanalysis as a Theory of Thinking. 3.00 Credits.
This course will introduce students to the writings of Wilfred Bion, the British psychoanalyst who expanded Sigmund Freud's and Melanie Klein's metapsychology. Bion developed an epistemological theory of thinking, surmising that the mind grows when it is exposed to the truth of one's emotional experience. In his many writings and lectures, Bion developed a sophisticated theoretical model that conceptualizes the transformation of emotional experience into the capacity for thought. While in his early writings he is inspired by life sciences and mathematics, in his later writings Bion shifts away from the scientific view to an aesthetic/mystical vertex, drawing on poets mystics and philosophers, such as Keats, Milton, Shakespeare, Sophocles, Meister Eckhart, St John of the Cross, Plato, Hume and Kant.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.427. Reading Freud. 3.00 Credits.
Sigmund Freud was one of the most influential thinkers of the 20th century. Psychoanalysis, which was his theory of mind, a research method, and a therapeutic technique, offered concepts that pervade Western culture and the humanities. In this seminar which is designed for students from all fields of knowledge, we will closely and chronologically read Freud's major works, follow his developing theories, and become familiar with psychoanalytic concepts such as the unconscious, the uncanny, instincts, sexuality and aggression, which illuminated mysteries in other fields, from literature to anthropology, from political science to religious studies, and from philosophy to the arts.
Instructor(s): O. Ophir
Area: Humanities.
AS.300.431. Russian Literary Modernisms. 3.00 Credits.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.641
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.433. Cavell: Skepticism and the Ordinary. 3.00 Credits.
This seminar studies the main works and concepts of Stanley Cavell, one of the most original and influential philosophers of the 20th century. It will address in particular his analyses of scepticism, the ordinary, and moral perfectionism as they are expressed in philosophy, but also in literature and films.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.435. Emmanuel Levinas: Essential Works, Guiding Concepts, Lasting Influence. 3.00 Credits.
This seminar will address the major writings and guiding concepts of Emmanuel Levinas and investigate his increasing critical role as a touchstone and dividing line in the formation of twentieth century and contemporary schools of thought (phenomenology, pragmatism, post-analytic philosophy, literary, feminist, and political theory, anthropology).
Additional readings will include Stanley Cavell, Jacques Derrida, Vasily Grossman, Jean-François Lyotard, and Hilary Putnam.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.501. Independent Study. 3.00 Credits.
Instructor(s): E. Patton; H. de Vries.

AS.300.507. Honors Seminar. 3.00 Credits.
The Honors Seminar is a mandatory component of the Honors Program in Humanities, which offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. Qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider applying to the Program. In the 2016-2017 academic year, the Seminar will focus on selected works by Anton Chekhov, which will serve as a point of departure for discussion on the relation between different intellectual disciplines and the idea of the humanities.
Instructor(s): A. Eakin Moss
Writing Intensive.

AS.300.508. Honors Seminar. 3.00 Credits.
The Honors Seminar is a mandatory component of the Honors Program in Humanities, which offers qualified undergraduates the possibility of pursuing an independent research project in their Junior and Senior years in any humanistic discipline or combination of disciplines: intellectual history, comparative literature, philosophy, critical theory, psychoanalysis, religion, film, etc., as well as points of intersection between the arts and the sciences. Qualified students may apply for admission to the concurrent BA/MA degree program. Sophomores who plan to study abroad in their Junior year should also consider applying to the Program. In the 2014-2015 academic year, the Seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.641
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.509. Independent Research. 0.00 - 3.00 Credits.
Instructor(s): E. Patton.

AS.300.599. Independent Study. 3.00 Credits.
Instructor(s): L. Lisi; R. Macksey.

AS.300.602. Theory, Painting, Vision.
Reading in philosophy, theory, criticism. Texts by Merleau-Ponty, Heidegger, Foucault, Derrida, Cavell, and Pippin, among others.
Instructor(s): M. Fried.

AS.300.603. Readings in Russian Poetry, Prose and Theory.
Readings to be selected by mutual agreement among the students and instructor. Reading knowledge of Russian required.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.604. Flaubert.
Through a close reading of Flaubert’s novel, selective consideration of the drafts and of the historical, political and artistic context, we shall examine the making of that masterpiece of narrative prose, which Flaubert himself conceived under the sign of modernity. Our central concern, in other words, is with L’Éducation sentimentale as a second crucial event in aesthetic modernity, twenty two years after Madame Bovary. Seminar will be taught in French and English. L’Éducation sentimentale edition required: GF Flammarion, 2003. Co-listed with 300.412
Instructor(s): J. Neefs; M. Fried.

AS.300.607. Topics in the History and Theory of Psychoanalysis: The Problem of Origns.
An examination of aspects of the history and theory of psychoanalysis, focusing on the question of origins in Freud’s work. Texts by Freud, Laplanche, Lacan, Derrida, and others.
Instructor(s): M. Fried.
AS.300.610. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis.
Freud’s idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be un-American. In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.420
Instructor(s): O. Ophir
Area: Humanities.

AS.300.612. Topics in Kierkegaard’s Philosophy: Repetition, Revelation, Anxiety, and Fear.
Close study of the rhetoric and arguments of four of Kierkegaard’s most important works from 1843-44: Repetition, Philosophical Fragments, The Concept of Anxiety, and Fear and Trembling. Contextualizing readings by Kant, Schelling, Hegel, and J.L. Heiberg.
Instructor(s): L. Lisi.

AS.300.613. The Ancient Quarrel: Literature and Philosophy.
Key turning points in the debate over which kind of knowledge, philosophical or literary, most benefits the soul and society. We will investigate the various ways in which literature has been construed as moral or immoral, and the use of literary modes of persuasion and argument in philosophical texts. Possible authors include: Homer, Plato, Aristotle, Sidney, Shakespeare, Rousseau, Kierkegaard, Tolstoy, Heidegger, Sartre, Beauvoir, Nussbaum, Cavell, Diamond, James, Coetzee, and Mulhall.
Instructor(s): Y. Ong.

AS.300.616. Thinking the Body/The Body Thinking: Introduction to Aesthetics from the Perspective of Dance.
In the nineteenth and twentieth centuries, dance has developed into a serious art form. However, philosophers of art have paid little attention to dance. Why is this the case? Is dance perhaps too corporeal or too unreflective or in some other way too marginal to be a fruitful topic for philosophical reflection? Or does the failure of mainstream philosophical aesthetics to take dance seriously perhaps signal unacknowledged biases in such approaches? Might dance, the art form whose medium is the human body, have something to contribute to current philosophical interest in rethinking the human body and, particularly, the relation between mind and body? Seeking responses to questions such as these, this course provides an introduction to the place of dance in the philosophy of art. The first half of the course examines portions of seven foundational texts in the philosophy of art and culture as well as philosophical accounts of dance that draw on these foundational texts in a range of ways. The aim is not only to explore dance from the perspective of traditional aesthetic theories, but also to explore such traditional theories from the perspective of arguably the art form which they have been most resistant to treating seriously. This oblique angle of entry into mainstream approaches to general aesthetic topics will bring into focus important questions that might be easily overlooked if one examines such theories only in light of their preferred examples of art. The second part of the course explores dance as itself a mode of philosophical reflection, examining how the work of choreographers such as George Balanchine, Jerome Bel, William Forsythe, Crystal Pite and Yvonne Rainer explore the possibilities and limits of their medium: the human body. One proposal will be of particular concern: Might such instances of the body thinking bring into focus more adequate ways of thinking about the body?
Instructor(s): K. Boyce
Area: Humanities.

AS.300.617. Philosophy and Literature in Either/Or.
Celebrated and reviled alike, Kierkegaard’s 1843 Either/Or has been viewed as both the culmination of the Enlightenment project and the birth of existentialism, a playful work of romantic literature and a piece of late-Hegelian philosophy, a vindication of the secular everyday and the articulation of a modern faith in a transcendent God. In this course we read the work closely and in its entirety and pay particular attention to the relation between its philosophical arguments and literary forms of presentation.
Instructor(s): L. Lisi.

AS.300.625. Russian Literary and Critical Theory.
Close reading of major authors from the Russian literary theoretical and critical tradition including Bakhtin, Eikhenbaum, Jakobson, Lotman, Shklovsky and Tynianov. Student will present primary sources or case studies from their own fields and research.
Instructor(s): A. Eakin Moss.
AS.300.626. Philosophy of/and the Novel.
The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhtin, Hamburger, Sartre, Beauvoir, Ricoeur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaubert.
Instructor(s): R. Tobias; Y. Ong.

Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.628. Contemporary Theory: New Materialisms, New Vitalisms, and the Post-Traumatic Subject.
A discussion of: recent versions of materialism and realism, including materialisms informed by neuroscience; vital materialism; the latest developments in trauma and affect theory; and related trends. Texts by Zizek, Malabou, Damasio, Pippin, McDowell, Johnston, Brassier, Churchland, LeDoux, and others.
Instructor(s): M. Fried
Area: Humanities.

This seminar examines what in Bergson’s philosophy remains, or becomes, challenging for contemporary debates. Particular emphasis is given to his concepts of life and time, but also to his philosophical anthropology and his reflections on the ambiguous interplay between war, technology, and religion.
Instructor(s): P. Marrati.

AS.300.631. Russian Literary Modernisms.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.431
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.637. Faust and Philosophy.
This course combines the close reading of Goethe’s epic Faust with the study of a number of philosophical texts that either influenced Goethe’s work or were influenced by it. Particular attention will be paid to the relation between literary form and philosophical argument. Authors besides Goethe will include Fichte, Schelling, Schiller, Friedrich and August Wilhelm Schlegel, Hegel, Kierkegaard, Karl Rosenkranz and Theodor Vischer. Discussion in English; reading knowledge of German required
Instructor(s): L. Lisi
Area: Humanities.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well. Course taught in French. Recommended Course Background: AS.212.333 and 212.334
Instructor(s): J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.300.642. Philosophy and Literature in Kierkegaard’s Either/Or.
Celebrated and reviled alike, Kierkegaard’s 1843 Either/Or has been viewed as both the culmination of the Enlightenment project and the birth of existentialism, a playful work of romantic literature and a piece of late-Hegelian philosophy, a vindication of the secular everyday and the articulation of a modern faith in a transcendent God. In this course we read the work closely and in its entirety and pay particular attention to the relation between its philosophical arguments and literary forms of presentation.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.644. Theory, Painting, Vision.
Theory, Painting, Vision: Readings to be selected but they will definitely include texts by Barthes, Cavell, Wall, and Michaels.
Instructor(s): M. Fried.

AS.300.649. The Fate of Nothing from Goethe to Heidegger.
Nothing and negativity play a central role in the literature and philosophy of the long nineteenth-century. In this course, we look closely at a number of approaches to these problematic concepts in Goethe, Hölderlin, Hegel, Schopenhauer, Leopardi, Kierkegaard, Nietzsche and Heidegger.
Instructor(s): L. Lisi.

AS.300.651. What Remains of the Human?.
This course discusses modern and contemporary philosophical and anthropological conceptions of the human and its uncertain boundaries: between the cultural and natural, the human and the inhuman, the animal and the spiritual, the living and the dead and so forth. Particular attention will be devoted to the ethical and political implications any definition of the human inevitably invites.
Instructor(s): P. Marrati.

This seminar analyzes Deleuze’s philosophy in the light of his attempt to renew Kant’s critical and transcendental method and in dialogue with other contemporary conceptions of critiques.
Instructor(s): P. Marrati
Area: Humanities.
AS.300.653. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.657. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives, II.
Starting with a brief overview and recapitulation of themes discussed in its Introduction and Division One, this jointly will focus on Division Two of Being and Time and bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.658. Must We Mean What We Say?.
Starting out from Stanley C.von's programmatic book and title, this seminar will revisit his discussion of J.L. Austin, John Searle, Jacques Derrida, and Shoshana Felman, with special emphasis on these authors' theories of intentionality, seriousness, and sincerity, and with reference to the ancient and modern concepts of tragedy on which they partly rely. In addition to the aforementioned thinkers' relevant works, reading will include selections from Euripides, Henrik Ibsen, Isaiah Berlin, Emmanuel Levinas, and Jean-Luc Marion.
Instructor(s): H. de Vries.

AS.300.660. Humanities Thesis Seminar.
Required thesis seminar for Humanities Center MA students.
Instructor(s): Staff
Area: Humanities.

AS.300.684. Marcel Proust, Literature and Art.
Proust's great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l'ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé will put this to the test. Required editions: "Proust's Du côté de chez Swann," Gallimard, Folio, "À l'ombre des jeunes filles en fleurs," Gallimard, Folio, "La Prisonnière," Gallimard Folio, "Le Temps retrouvé," Gallimard, Folio, "Contre Sainte-Beuve," Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Undergraduate are Seniors permitted to take this course. Recommended course background: At least 2 212.3xx courses.
Instructor(s): J. Neefs; M. Fried.

AS.300.686. Mysticism and Mechanism.
This seminar will investigate the historical, conceptual, and practical intertwining of spirit and automatisms, mind and machine, global religion and technological media. We will start out from the spiritual automaton motif as it appears in Spinoza and Leibniz and follow its echoes in more recent debates (concerning the ghost of the machine, the idea of artificial intelligence, and all those realities often called virtual). Readings will include Henri Bergson, Ludwig Wittgenstein, Gilbert Ryle, Walter Benjamin, Henri Atlan, Lambert Wiesing, and others.
Instructor(s): H. de Vries.

AS.300.688. Autour de Baudelaire (A Round Baudelaire).
Topics in Baudelaire's art and thought and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mallarmé, Proust, Benjamin, Starobinski, Bonnefoy). Readings and discussion will be mainly in French. Co-listed with AS.212.604.
Instructor(s): J. Neefs; M. Fried.

AS.300.689. Deleuze and Philosophy: Time, Life, Becoming.
This seminar aims at analyzing the major concepts of Deleuze’s philosophy and their ethical and political implications for contemporary debates.
Instructor(s): P. Marrati.

Instructor(s): P. Marrati.

AS.300.800. Independent Study.
Instructor(s): H. de Vries; M. Fried; P. Marrati.

AS.300.801. Ind Stdy-Field Exams.
Instructor(s): H. de Vries.

AS.300.802. Independent Study Field Exam.
Instructor(s): E. Forster; H. de Vries; M. Fried; P. Marrati.

Instructor(s): H. de Vries.

AS.300.804. Dissertation Research.
Instructor(s): H. de Vries.

AS.300.805. Literary Pedagogy.
Instructor(s): H. de Vries.

AS.300.806. Literary Pedagogics.
Instructor(s): H. de Vries.

AS.300.808. In Study Field Exam.
Instructor(s): E. Forster.

AS.300.810. Thesis Seminar.
Thesis Seminar.
Instructor(s): P. Marrati.

AS.300.890. Research Practicum.
Instructor(s): M. Fried.

Cross Listed Courses

History of Art
AS.010.310. The 'Long Sixties' in Europe. 3.00 Credits.
Emphasis will be on advanced artistic practice primarily in France, Italy, the Benelux, and German-speaking countries; students will curate an exhibition of avant-garde journals from the Sheridan Libraries.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.400. Looking at Language: Vision and Textuality from Surrealism to the Present. 3.00 Credits.
Considers the emergence of the “written painting” and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Ligon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.413. Historical and Conceptual Bases of Art History. 3.00 Credits.
Critical readings in and of relevance to the intellectual foundations of the modern discipline of art history. Texts by Kant, Hegel, Heidegger, Wölfflin, Riegl, Panofsky, Melville, and Derrida, among others. There will be a final paper.
Instructor(s): M. Warnock
Area: Humanities
Writing Intensive.
AS.010.435. Minimalism in Transnational Context. 3.00 Credits.
Critical examination of arguably the most important crux in post-WWII art, criticism, and theory, with attention to displacements and transformations of Minimalism outside the US. There will be a final paper.
Instructor(s): M. Warnock
Area: Humanities.
Writing Intensive.

AS.010.654. Topics in Postwar Abstraction.
Emphasis on European and American case studies from Pollock to the present; figures may include: Newman, Still, Frankenthaler, Louis, Noland, Olitski, Stella, Ryman, Marden, Hantai, Bishop, Jorn, Uecker, and Klein. Open to qualified undergraduates with the permission of the instructor. This course is being co-taught with Prof. Ruth Leys.
Instructor(s): M. Fried; M. Warnock
Area: Humanities.

AS.010.656. Agency and Other Topics in Contemporary Theory of Art History.
A critical reading of texts by various thinkers including Alfred Gell, Horst Bredekamp, David Freedberg, Whitney Davis, and David Summers. Open to qualified undergraduates with the permission of the instructor. This course is being co-taught with Prof. Ruth Leys.
Instructor(s): M. Fried.

Classics

AS.040.121. Ancient Greek Mythology: Art, Narratives, and Modern Mythmaking. 3.00 Credits.
Focuses on major and often intricate myths and mythical patterns of thought as they are reflected in compelling ancient visual and textual narratives. Being one of the greatest treasure troves of the ancient world, these myths will further be considered in light of their rich reception in the medieval and modern world (including their reception in the modern fields of anthropology and philosophy).
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.126. Religion, Music and Society in Ancient Greece. 3.00 Credits.
Emphasis on ancient Greek ritual and mythology; on ancient music, religion, and society; and on cultural institutions such as symposia (drinking parties) and festivals.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.148. Ancient Israel and Ancient Greece in Opera and on Film. 3.00 Credits.
Some of the most breathtaking (early and later) operas and films have been in intense dialogue with ancient societies, narratives, and cultural concepts. Contemporary hit movies center on diverse aspects of ancient narratives: the beginning of the world, violent wars, politics, erotic themes, and intricate existential questions. The course will introduce students to a comparative examination of the variety of approaches to ancient Israel and ancient Greece in the spectacular worlds of opera and cinema. The course will focus on major texts and archaeological material related to antiquity; works of world cinema will be analyzed.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.693. The Pre-Socratics and Early Plato.
This seminar will focus on the earliest phases of European philosophy. Topics that will be examined include: scholarly approaches to the fragments of major thinkers such as Heraclitus and Empedocles; the concept of fragment; the transition from the pre-Socratics to early Plato; the later reception of Heraclitus and Pythagoras in European thought.
Instructor(s): M. Bredekamp, D. Yatromanolakis
Area: Humanities.

English

History

AS.100.728. Historical Writing in the Middle Ages.
This course will begin with readings of critical theory relating to historical writing. It will then examine a series of medieval texts: Eusebius, Bede, Suger, and Geoffrey of Monmouth, for example, to demonstrate the ways in which theory can generate better readings of medieval texts.
Instructor(s): G. Spiegel.

AS.100.741. Recent Theoretical Issues in History.
An examination of recent theoretical issues in history, including: history as/and memory; the return of presence in history; the turn to affect and the rise of neurohistory; posthistoricism and the uses of literary theory in history; and the uses of photography and visual cultures in history. Cross-listed with Humanities Center.
Instructor(s): G. Spiegel; M. Fried
Area: Humanities, Social and Behavioral Sciences.

German Romance Languages Literatures

Interdepartmental

AS.360.134. Great Books at Hopkins II: The Sciences. 3.00 Credits.
Great Books at Hopkins II: The Sciences will combine readings from philosophy and literature with foundational texts from several scientific disciplines. Readings for this spring will explore links between traditional theories of economics and genetics in the context of literary developments, and will include: Xenophon’s Oeconomicus, Mendel’s Experiments on Plant Hybridization, Marx’s Communist Manifesto, Darwin’s Voyage of the Beagle, Swift’s A Modest Proposal, Wharton’s House of Mirth, and Joyce’s Finnegans Wake.
Instructor(s): E. Patton; M. Roller
Area: Humanities
Writing Intensive.
Art

AS.371.140. Cartooning. 3.00 Credits.
Not open to Freshmen. A history-and-practice overview for students of the liberal arts. The conceptual basis and historical development of cartooning is examined in both artistic and social contexts. Class sessions consist of lecture (slides/handouts), exercises, and ongoing assignments. Topics include visual/narrative analysis, symbol & satire, editorial/political cartoons, character development, animation. Basic drawing skills are preferred but not required.
Instructor(s): T. Chalkley
Area: Humanities.

AS.371.149. Visual Reality. 3.00 Credits.
In art, Realism is a simulation of visual reality. But art can also simulate alternative realities, those realities or truths which exist only in daydreams or nightmares. In this class, we will learn to explore and create representations of these additional moments of existence. This will require thinking creatively or outside the box, a useful skill in any field. Using a variety of media, students are asked to solve problems to which there is no one correct answer.
Instructor(s): D. Bakker
Area: Humanities.

AS.371.151. Photoshop/Digital Darkroom. 3.00 Credits.
Photoshop is not only the digital darkroom for processing images created with digital cameras; it is also a creative application for making original artwork. In this course, students use Photoshop software as a tool to produce images from a fine art perspective, working on projects that demand creative thinking while gaining technical expertise. Students will make archival prints, have regular critiques, and attend lectures on the history of the manipulated image and its place in culture. We will look at art movements which inspire digital artists, including 19th-century collage, dada, surrealism, and the zeitgeist of Hollywood films. Students must have a digital SLR camera. Prior knowledge of Photoshop is not required. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on SIS; no need to email.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.152. Introduction to Digital Photography. 3.00 Credits.
Students learn to use their digital cameras through a variety of documentary, landscape and portrait projects, which will help them develop technical and creative skills. Critiques and slide lectures of historic photographs, which range from postmortem daguerreotypes to postmodern digital imagery, help students develop a personal vision. Students are provided digital SLR cameras and gain proficiency with one-on-one instruction in the field. Basics for print adjustment and output will be covered. Attendance at first class is mandatory. Approval for this course will be considered after enrollment on SIS; no need to email.
Instructor(s): H. Ehrenfeld
Area: Humanities.

AS.371.162. Black & White: Digital Darkroom. 3.00 Credits.
In this digital course, students explore the black-and-white aesthetic. They develop camera skills on numerous field trips including Ladew Topiary Gardens, the Maryland Zoo & Botanical Gardens, and an optional weekend trip to Cape Henlopen State Park in Delaware. Students meet frequently for critiques and discussions based on historic and contemporary imagery. They will learn to use Photoshop for image adjustment. Techniques such as high dynamic range, duotone, panorama and infrared will be covered. Students work on a project of their choice and produce a portfolio of ten prints. Digital SLRs are provided. Attendance at 1st class is mandatory. No need to email for approval.
Instructor(s): P. Berger
Area: Humanities.

AS.371.303. Documentary Photography. 3.00 Credits.
In this hands-on course, we will explore different genres of documentary photography, including the fine art document, photojournalism, social documentary photography, the photo essay and photography of propaganda. Students will work on a semester-long photo-documentary project on a subject of their choice. Digital SLRs will be provided. The makeup of this class will include five JHU undergraduate students and five Baltimore Youth Film Arts Program fellows. There will be two one-day field trips on weekends to city and countryside locations. Attendance at first class is mandatory. No need to email for approval.
Instructor(s): P. Berger
Area: Humanities.

AS.371.304. Photo Seminar: Wet Darkroom. 3.00 Credits.
In this film-based course, students develop a project of their choice over the semester working independently in the darkroom and meeting for weekly critiques and discussions. Using the zone system (a method of pre-visualization developed by Ansel Adams) students will experiment with different film, paper and developer combinations specific to their projects. Writing in the form of a journal as well as critical analysis of images are integral parts of the seminar experience.
Prerequisites: AS.371.146 or Permission Required
Area: Humanities.

AS Philosophy Courses

AS.150.111. Philosophic Classics. 3.00 Credits.
The course introduces students to philosophy by critically examining selected texts in the Western philosophical tradition. Philosophers whose ideas will be examined include Plato, Descartes, Kant and Nietzsche.
Instructor(s): A. Abazari
Area: Humanities
Writing Intensive.

AS.150.112. Philosophical Problems. 3.00 Credits.
An introduction to philosophy through several central problems. This year’s topics are free will, death, time, and race.
Instructor(s): S. Gross
Area: Humanities.

AS.150.113. Freshman Seminar: Objectivity. 3.00 Credits.
This course examines the notion of objectivity and challenges to it. Its topics include the status of objective facts and beliefs, the structure of social reality, and rational disagreement. Dean’s Prize Freshman Seminar
Instructor(s): N. Goldberg
Area: Humanities.
AS.150.114. Philosophy of Human Rights. 3.00 Credits.
From domestic debates about abortion and health care to international dialogue about women’s rights, genital mutilation and genocide, human rights claims have become increasingly common, and we’ve come to rely on the discourse of human rights to assess the way human beings are treated by one another and by states. But what are human rights? How are human rights claims justified? Are human rights really objective and universal or are they contingent and relative to particular cultures? Where did the human rights culture begin, and how has it become so important? This course aims to explore these questions by examining foundational human rights documents, historical works on human rights and contemporary philosophical inquiry into their foundations (or lack thereof).
Instructor(s): T. Wilk
Area: Humanities.

AS.150.116. Mortal Questions. 3.00 Credits.
What is the meaning of life? Is the question well-formed? What does living well require? Does death give human life meaning? What does it mean to say that life is ‘absurd’? Are we free to do as we choose? What should we make of human nature or the human condition in light of the great and ever more pervasive technological advances of the present epoch? Will we transform our nature? In light of threats of environmental catastrophes spurred by global warming, nuclear war and the like, what do we make of our daily lives and the activities that compose them? Do those equipped with the relevant capacities and apprised of the relevant information bear a moral obligation to the communities of which they are members? Crucially, these questions require us to reflect deeply on our human values. To address these questions, we will read selected works of philosophers ranging in time from Plato to the present – including both analytic and continental philosophers, men and women, the canonized and otherwise.
Instructor(s): D. Lindeman
Area: Humanities
Writing Intensive.

AS.150.118. Introduction to Formal Logic. 3.00 Credits.
An introduction to symbolic logic and probability. In the first two parts of the course we study formal ways of determining whether a conclusion follows from its premises. Included are truth-functional logic and predicate logic. In the third part we study the basic rules of probability, and learn how to make probability calculations and decisions in life. Co-listed with AS.150.632 (for graduate students) (01-F 11:00-11:50am).
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.119. Existentialism. 3.00 Credits.
Existentialism is a philosophical movement that made a dramatic entry into the 20th century intellectual scene and had a profound and long lasting influence on it. The central themes developed by existentialist thinkers transgressed the boundaries of academic philosophy and found their expression in plays, novels, cinema, poetry, political tracts, etc. Through close reading of the seminal texts by Kierkegaard, Nietzsche, Heidegger, Sartre, and Merleau-Ponty, we will explore the core tenets of the existentialist legacy. The philosophical texts will be supplemented by related works of fiction and films. Freshmen Only.
Instructor(s): G. Lebanidze
Area: Humanities.

AS.150.125. Introduction to Modern Philosophy. 3.00 Credits.
The course will examine four major figures of early modern philosophy: Descartes, Leibniz, Hume, and Kant. Although the most recent of these thinkers died more than 200 years ago, we still refer to them as “modern” philosophers, revealing their great influence on the way we think about ourselves and our place in the world. The course will look at what these philosophers thought about questions such as: What kind of beings are we and how are we related to the world around us? Is knowledge of the world possible and if so what are its sources? Can we answer the question of God’s existence? Is order something we find in the world or impose on it? etc.
Instructor(s): G. Lebanidze
Area: Humanities
Writing Intensive.

AS.150.126. Relativism. 3.00 Credits.
More than any other modern philosophical doctrine, relativism has found currency outside of the academy. Talk of “equally valid” points of view has become a commonplace, even when the matter under discussion is a straightforwardly factual. We will examine many different relativistic doctrines, including the views that people coming from very different backgrounds or with very different beliefs do not have the grounds to criticize one another, and that such individuals cannot so much as understand one another. In the first two-thirds of the course we will evaluate arguments for and against views such as these. Towards the end of the semester we will explore what the fall-out for our everyday lives would be (or should be) if some kind of relativism were true.
Freshmen only.
Instructor(s): N. Tebben
Area: Humanities.

AS.150.127. Realism and Antirealism in the Philosophy of Science. 3.00 Credits.
Are our best scientific theories approximately true, or useful but false? Does science converge on the truth over time? This course addresses such questions by surveying the scientific realism debate. Dean’s Prize Teaching Fellowship course. Freshmen Only.
Instructor(s): J. Hricko
Area: Humanities.

AS.150.128. Cognitive Science & Political Philosophy. 3.00 Credits.
Cognitive Science & Political Philosophy: Is a person born a republican, or are they raised that way? Are democrats Democrats because they have emotional personalities? Is politics the product of evolution, or of culture? Should the brain sciences determine public policy and law? In this course we will consider these questions and many more like them by looking at recent work in philosophy and the brain sciences.
Instructor(s): J. Waterman
Area: Humanities.

AS.150.129. The Theory of Knowledge: Classic and Contemporary Questions. 3.00 Credits.
What is knowledge and how to define it? Does knowing require an ability to produce supporting reasons or is it sufficient that our beliefs track the truth? Which general model better its structure, Foundationilsm, Coherentism or Infinitism? Does knowing depend on context? Can we discover empirically what knowledge is? These are key questions we will be discussing in our seminar, inspired by reading texts ranging from classics like Plato, the Stoics, and Sextus Empiricus, to contemporary authors like Gettier, Davidson, Goldman, DeRose, and others. Dean’s Prize Freshman Seminar.
Instructor(s): P. Stojanovic
Area: Humanities.
AS.150.205. Introduction to the History of Modern Philosophy. 3.00 Credits.
An overview of philosophical thought in the seventeenth and eighteenth centuries. We shall focus on fundamental questions in epistemology (knowledge, how we acquire it, its scope and limits), metaphysics (the ultimate nature of reality, the relation of mind and body, free will), and theology (the existence and nature of God, God’s relation to the world, whether knowledge of such things is possible): all questions that arose in dramatic ways as a result of the rise of modern science. The principal philosophers to be discussed are Descartes, Locke, Hume and Kant, though we shall also make the acquaintance of Spinoza, Leibniz and Berkeley.
Instructor(s): M. Williams
Area: Humanities.

AS.150.215. Business Ethics. 3.00 Credits.
What is a responsible business practice? Do corporations have responsibility as moral agents? What is the relation between business and environment? In this course we will investigate the relationship between business practices and ethical thinking by analyzing and assessing philosophical arguments about the moral status of business. We will start by reading philosophical texts that offer an analysis of moral practices, decision-making procedures, and moral theories. In particular, we will read historical text by Aristotle, Hume, Adam Smith, Mill, Marx, and Keynes. Then we will see how these philosophical concepts and theories can be applied to the contemporary world of business. The main goal of this course is to critically evaluate the philosophical foundations and justifications for business and economic systems, and how these applies to specific issues as workplace discrimination, ethics of advertising, environmental destruction and consumer protection.
Instructor(s): M. Bergamaschi Ganapini
Area: Humanities.

AS.150.216. Minds and Machines. 3.00 Credits.
The course is a philosophical introduction to the topic of artificial intelligence. We will examine such questions as whether machines can think and whether we can build robots that have emotions, personalities and a sense of self. In doing so, we will touch upon a closely connected question: is the human mind itself a machine?
Instructor(s): N. Andonovski
Area: Humanities, Natural Sciences.

AS.150.217. Neuroethics. 3.00 Credits.
Can electroencephalography show that we lack free will? Can modern neuroimaging show that someone will commit a crime in the future? Is it ethical to use this promethean knowledge to put them in jail before they even commit a crime? In Neuroethics, we’ll consider these and other pressing questions emerging at the frontiers of neuroscience and modern moral theory.
Prerequisites: This course is equivalent to AS.150.472
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.219. Introduction to Bioethics. 3.00 Credits.
Introduction to a wide range of moral issues arising in the biomedical fields, e.g. physician-assisted suicide, human cloning, abortion, surrogacy, and human subjects research. Cross-listed with Public Health Studies.
Instructor(s): H. Bok
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.150.220. Introduction to Moral Philosophy. 3.00 Credits.
An introduction to moral philosophy through in-depth and critical reading of selected texts from the history of philosophy. The philosophers whose texts will be discussed include Plato, Aristotle, Kant and Nietzsche.
Instructor(s): H. Bok; L. Theunissen
Area: Humanities.

AS.150.223. Formal Methods of Philosophy. 3.00 Credits.
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with AS.150.434)
Instructor(s): J. Bledin
Area: Humanities.

AS.150.227. Introduction to Asian Philosophy. 3.00 Credits.
What is the nature of reality? What is the mind? What is the meaning of life? How ought we to live? In this course, we will explore how some of the better known philosophical systems of India, China and Japan have attempted to answer these most central philosophical questions. We will focus on the following systems: Nyaya, Samkhya-Yoga, Vedanta, Buddhism, Carvaka, Confucianism, Taoism, and Zen.
Instructor(s): B. Miller
Area: Humanities.

AS.150.229. Religion and/or Science?. 3.00 Credits.
Are Religion and Science necessarily in conflict, can they coexist, or do they in fact require each other’s existence? Is scientific method so different from religious thinking? Can science discredit God? Is it possible to be rational and remain religious? In this course, we will explore these and other related questions and examine possible answers. In the process, we will read the texts of both classical and contemporary philosophers and scientists who tackled with these problems.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.235. Philosophy of Religion. 3.00 Credits.
Can one prove or disprove the existence of God? What is the relation between reason and faith? Are science and religion at odds with one another? We will consider historically significant discussions of these questions as well as important contemporary writings.
Instructor(s): S. Gross
Area: Humanities.

AS.150.236. Contemporary Moral Issues. 3.00 Credits.
In this course, we will discuss ethical controversies related to some of the issues currently debated in the public sphere: homosexuality, sexism, racism, immigration, abortion, cloning, genetic enhancement, war, terrorism, torture, and others. Our goal will be to explore how major philosophical theories in ethics approach these controversies, and how they can help us understand and resolve these controversies.
Instructor(s): P. Stojanovic
Area: Humanities.
AS.150.237. Foundations of Modern Political Philosophy. 3.00 Credits.
This course is an introduction to modern political philosophy through an intensive study of the classic texts. The focus will be on the nature and limits of political authority under modern social conditions. Authors included are Machiavelli, Hobbes, Locke, Rousseau and Mill.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.238. Philosophy, Science Fiction, and Human Nature. 3.00 Credits.
This is an introduction to philosophy through themes in science fiction. Particular emphasis will be on philosophical questions related to what it means to be a human such as personal identity, free will, the nature of mind, and the nature of knowledge.
Instructor(s): J. Simpson
Area: Humanities
Writing Intensive.

AS.150.245. Introduction to Philosophy of Mind. 3.00 Credits.
This is an introduction to the central problems of philosophy of mind: the mind-body problem and the problem of self-knowledge. Of particular interest in contemporary work is the relation of mind and brain and whether, or how, we acquire self-knowledge.
Instructor(s): M. Williams
Area: Humanities.

AS.150.248. Introduction to Metaphysics. 3.00 Credits.
The class is an introduction to contemporary, analytic, metaphysics. Topics to be discussed include: what is metaphysics, the nature of existence, time and temporality, modality and possible worlds, identity and personal identity, persistence, mereology, causation, and universals and abstract entities.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.253. Introduction to Philosophy of Psychology. 3.00 Credits.
Psychology is the study of mind and behavior, and philosophy of psychology is the study of the foundations of psychology. Foundational issues in psychology addressed by philosophy of psychology come in the form of the following questions. What is the nature of mental representation? What is the basic architecture of the mind, and is it innate? Can psychological theories proceed in abstraction from the environment? The purpose of this course is to introduce students to these and related questions and the various answers they've been given.
Instructor(s): D. Lindeman
Area: Social and Behavioral Sciences.

AS.150.259. Introduction to the Theory of Knowledge. 3.00 Credits.
An introduction to the central problems, concepts and theories of philosophical epistemology (theory of knowledge). Topics to be explored will include: what is knowledge (and why do we want it)? Can we get it (skeptics answer “No!”), or is everything in the end a matter of opinion? (skeptics say “Yes!”). Theories of knowledge and justification: foundationalism versus the coherence theory; externalism versus internalism in epistemology. To what extent is knowledge an appropriate object of theory? Readings from early 20th century through contemporary sources.
Instructor(s): M. Williams
Area: Humanities.

AS.150.300. Prometheus Editorial Workshop. 1.00 Credit.
Prometheus is an international undergraduate philosophy journal published by students at Johns Hopkins University. The purpose of the journal is to promote philosophic discourse of the highest standard by offering students an opportunity to engage in open discussion, participate in the production and publication of an academic journal, and establish a community of aspiring philosophers. Students enrolled in this workshop will act as the staff readers for the journal. For more information, please visit www.prometheus-journal.com. Prerequisite: MUST have taken one philosophy course.
Instructor(s): C. Cummings
Area: Humanities.

AS.150.301. Undergraduate Seminar: Practical Reason. 3.00 Credits.
How does reasoning that results in action differ from reasoning that results in belief? Is all practical reasoning a kind of means-end (instrumental) reasoning, or is there a form of moral reasoning that is presupposed by instrumental reasoning? These questions and more will occupy us as we work our way through the recent philosophical debates about practical reason. Restricted to philosophy majors and minors only.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.304. The Ethics of Human Experimentation. 3.00 Credits.
This course will explore ethical theory, key historical events, and operational requirements of research involving human beings. Weekly discussions will focus on seminal literature and case studies that highlight conceptual and practical challenges related to informed consent; research ethics review; risk/benefit analysis; justice/fairness; globalization of research; participation of vulnerable populations; clinical equipoise; obligations to research participants and communities during studies and after research is completed; and deception in psychological and behavioral research. The course will also explore the emergence and development of the rules governing the protection of human subject research.
Instructor(s): J. Ali
Area: Humanities.

AS.150.305. Global Health & Human Rights: Theoretical Foundations & Practical Implications. 3.00 Credits.
This course systematically examines the human right to health. Topics will include the theoretical foundation(s) of human rights; how human rights compare and contrast to other dominant views of global justice (including Rawlsian versions, cosmopolitanism, and capabilities, among others); and whether (or under what circumstances) health can be properly called a “right”. Special scrutiny will be given to access to essential medicines as a recent example of the invocation of a right to health.
Instructor(s): M. DeCamp
Area: Humanities.
AS.150.309. Introduction to Philosophy of Physics. 3.00 Credits.
This course starts on July 7th and runs until August 1st. This course aims at introducing the student to the basic philosophical issues that lie at the heart of the modern physicist's conception of nature. To this end, we will look carefully at the foundations of two modern theories of physics, namely, the special theory of relativity and quantum theory. Relativity revolutionized our understanding of space and time, whereas quantum physics shattered our established beliefs about causality and determinism in nature. In the special relativity section of this class, we will cover topics such as the speed of light postulate, conventionality of simultaneity thesis, and the twin paradox. In the foundations of quantum physics, we will probe the measurement problem, Schrödinger's cat paradox and the uncertainty principle. No previous background in physics is required.
Instructor(s): G. Guralp
Area: Humanities, Natural Sciences.

AS.150.311. Undergraduate Seminar: Philosophy of Ludwig Wittgenstein. 3.00 Credits.
We will read Wittgenstein's two great works: Tractatus Logico-Philosophicus (1921) and Philosophical Investigations (1953). If you have previously taken AS.150.442 you may not register for AS.150.311.
Prerequisites: If you have previously taken AS.150.442 you may not register for AS.150.311.
Instructor(s): M. Williams
Area: Humanities.

AS.150.312. Philosophy and Complexity. 3.00 Credits.
This course aims to engage with philosophical problems that stem from sciences of complexity in an interdisciplinary way. We will pose questions concerning how disciplines such as biology, economics, neuroscience, astrophysics etc. deal with the problem of complexity, and we will look at the basic problems philosophers of science single out in this context. After introducing the general problematic of the course, we will have two main parts under which we examine the philosophy of complex systems. The first part will be devoted to the epistemological aspects of the problem such as models, laws, explanation and evidence, and the second part will examine the metaphysical aspects of emergence and reduction.
Instructor(s): G. Guralp
Area: Humanities.

AS.150.315. Philosophy of Human Rights. 3.00 Credits.
From domestic debates about abortion and health care to international dialogue about women's rights, genital mutilation and genocide human rights claims have become increasingly common, and we've come to rely on the discourse of human rights to assess the way human beings are treated by one another and by states. But what are human rights? How are human rights claims justified? Are human rights really objective and universal or are they contingent and relative to particular cultures? Where did the human rights culture begin, and how has it become so important? This course aims to explore these questions by examining foundational human rights documents, historical works on human rights and contemporary philosophical inquiry into their foundations (or lack thereof).
Instructor(s): T. Wilk
Area: Humanities
Writing Intensive.

AS.150.316. Puzzles and Paradoxes. 3.00 Credits.
The course is a survey of puzzles and paradoxes of truth, belief, knowledge, meaning, confirmation, rational action, and vagueness. Specific puzzles and paradoxes include, among others: Russell's paradox, the Liar paradox, Moore's paradox, the Skeptical paradox, Newcomb's paradox, and the Sorites paradox. Besides being fun to think about, these puzzles and paradoxes touch on many areas of philosophy, including philosophy of language, logic, metaphysics, and epistemology. When introducing each puzzle or paradox, attention will be paid to its history and significance. In addition to this exposure to some of the many domains of philosophy, students will gain analytical skills applicable well beyond philosophy.
Instructor(s): D. Lindeman
Area: Humanities.

AS.150.317. Undergraduate Seminar for Philosophy Majors: Can Everything Be Explained?. 3.00 Credits.
We will study various philosophical theories about the nature of explanation, reduction, and speculation.
Instructor(s): P. Achiinstein
Area: Humanities.

AS.150.320. Marx: Critique of Political Economy. 3.00 Credits.
A close reading of Marx's Capital: Volume One. Specific attention will be given to clarification of Marx's methodology, the foundational categories of his critique of political economy, the systematic unity of his theory, and the underlying normative concepts which inform his work. No previous course in philosophy or social sciences is required.
Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.322. Emotion, Mind & Morality. 3.00 Credits.
In this course, we will investigate a number of important philosophical questions about the normative structure of emotions and their role in moral cognition by surveying some of the classic works in philosophy. We will also read a number of contemporary papers. Finally, we will look at recent work in psychology and cognitive neuroscience on the impact of emotion on reason.
Instructor(s): M. Bergamaschi Ganapini
Area: Humanities
Writing Intensive.

AS.150.323. Undergraduate Seminar: Topics in Meta-Ethics. 3.00 Credits.
This is a seminar on theoretical topics in ethics. We focus on debates over cognitivism and non-cognitivism; realism and anti-realism: reasons internalism and externalism; relativism and pluralism. We read contemporary classics by Sharon Street, T.M. Scanlon, Joseph Raz, Bernard Williams, Allan Gibbard, and others.
Instructor(s): L. Theunissen
Area: Humanities
Writing Intensive.
AS.150.325. Philosophy of Oppression and Resistance. 3.00 Credits.
Human social structures can be oppressive in either explicit or covert forms, even in societies highly committed to just democratic ideals. The course will investigate what it means for an individual, practice, or institution to be oppressive, and will explore the concrete mechanisms which can underlie racialized and gendered forms of oppression in particular. Special attention will be given to the political and moral problems raised by hate speech, pornography, propaganda, ideology, and material inequality. Finally, we will discuss how social agents can resist explicit and covert oppression in a way that is conducive to the realization of just ideals.
Instructor(s): K. Powell
Area: Humanities
Writing Intensive.

AS.150.326. Philosophy of Art: A Historical Introduction. 3.00 Credits.
A reading of a number of important texts from the history of philosophy dealing with topics in the philosophy of art. Particular attention will be given to the German aesthetic tradition, and especially to Hegel’s aesthetics, although the most important ancient Greek contributions will be considered as well. In particular, we will read Plato, Aristotle, Plotinus, Kant, Schiller, early German Romantics, and Hegel, as well as selected secondary literature. No previous coursework in philosophy or history of art is required.
Instructor(s): A. Kabeshkin
Area: Humanities.

AS.150.330. Decisions, Games & Social Choice. 3.00 Credits.
This course is an introduction to decision theory, game theory, and social choice theory with an emphasis on their philosophical underpinnings and philosophical applications. Topics covered include the Prisoner’s Dilemma, Newcomb’s Problem, convention and social contracts, risk, and Arrow’s Theorem.
Instructor(s): J. Bledin
Area: Humanities.

AS.150.400. Realism & Antirealism in the Philosophy of Science. 3.00 Credits.
Are our best scientific theories approximately true, or useful but false? Does science converge on the truth over time? This course addresses such questions by surveying the scientific realism debate.
Instructor(s): J. Hricko
Area: Humanities, Social and Behavioral Sciences.

AS.150.401. Greek Philosophy: Plato and His Predecessors. 3.00 Credits.
A study of pre-Socratic philosophers, especially those to whom Plato reacted; also an examination of major dialogues of Plato with emphasis upon his principal theses and characteristic methods.Cross-listed with Classics.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.402. Aristotle. 3.00 Credits.
A study of major selected texts of Aristotle.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.403. Hellenistic Philosophy. 3.00 Credits.
A study of later Greek philosophy, stretching roughly from the death of Aristotle to the Roman imperial period. Epicureans, Stoics, and Skeptics will be the main philosophical schools examined.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.405. Alienation. 3.00 Credits.
In this course we will study the topic of alienation both historically and systematically. We will examine the concept’s historical roots at the turn of the 19th century and engage with contemporary discussions by authors working in philosophy of mind, ethics and political philosophy.
Instructor(s): D. Moyar
Area: Humanities
Writing Intensive.

AS.150.406. Can Science Explain Everything?. 3.00 Credits.
What is scientific explanation? We will examine various theories about this in order to determine whether and how science can explain everything physical and everything mental (including consciousness, emotions, purposes, and values). In addition to science are non-scientific theories, for example, religious ones, necessary? Do they compete with or complement scientific ones?
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.407. Enlightenment and Alienation. 3.00 Credits.
Why does the increase in enlightenment not correlate with an increase in morality and happiness? Jean-Jacques Rousseau raised this question in the middle of the 18th century and it remains a pressing question today. The course will examine the issue in Rousseau, Hegel, Marx, and Adorno, as well as in the contemporary work of Richard Moran and Rahel Jaeggi.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.411. Arabic-Islamic Philosophy. 3.00 Credits.
Introduction to major philosophers of the Arabic-Islamic tradition, including Avicenna, al-Ghazali, and Averroes. Topics addressed include the existence of God, metaphysics (e.g., causality), human freedom and knowledge, revelation and reason.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.412. Kant’s Critique of Practical Reason. 3.00 Credits.
A historical and systematic study of Kant’s ethics and philosophy of religion, with special attention to his Critique of Practical Reason.
Instructor(s): E. Forster
Area: Humanities.

AS.150.414. Topics in Political Philosophy: Justice and Pluralism. 3.00 Credits.
This course will examine recent liberal political philosophy, with particular emphasis on the work of John Rawls and Jürgen Habermas.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.415. Schelling’s System of Transcendental Idealism. 3.00 Credits.
Schelling’s System of Transcendental Idealism is one of the key texts in the transition from Kant to Hegel. It is also one of Schelling’s clearest and most successful publications, and one of the best introductions to his philosophy. This course offers a close examination of the System of Transcendental Idealism against the background of Kant and Fichte.
Instructor(s): E. Forster
Area: Humanities.
AS.150.416. Kant’s major minor writings. 3.00 Credits.
Some of Kant’s so-called minor writings are in fact brilliant essays that
represent important stages in the formation and development of his
mature, critical philosophy. In this course we will study ten of these
essays in detail.
Instructor(s): E. Forster
Area: Humanities.

AS.150.417. Kant’s ‘Critique Of Pure Reason’. 3.00 Credits.
An examination of the philosophy of Immanuel Kant, with emphasis on
The Critique of Pure Reason.
Instructor(s): E. Forster
Area: Humanities.

AS.150.419. Kant’s Critique/Judgment. 3.00 Credits.
This course will examine closely and in detail the aesthetic and
teological parts of Kant’s third masterpiece, The Critique of the Power of
Judgment.
Instructor(s): E. Forster
Area: Humanities.

AS.150.420. Mathematical Logic I. 3.00 Credits.
The development, first, of sentential logic and, then, of first-order
predicate logic. Topics covered include formal languages, effective
procedures, truth-functional and Tarski semantics, logical entailment,
systems of derivation, deductive soundness and completeness,
compactness, theories, formalization of mathematics, sizes of models,
and interpretations between theories.
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.421. Mathematical Logic II. 3.00 Credits.
Gödel’s two incompleteness theorems regarding, first the
unaxiomatizability of arithmetic and, second, the impossibility of
proving the consistency of arithmetic using arithmetic methods (unless
arithmetic is inconsistent). Computability and Church’s Thesis.
Prerequisites: Prereq: AS.150.420
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.422. Axiomatic Set Theory. 3.00 Credits.
A development of Zermelo-Fraenkel set theory (ZF), including the axiom
of choice (ZFC), a system in which all of mathematics can be formulated
(i.e., entails all theorems of mathematics). Although, we’ll do an exposure
to transfinite ordinals and cardinals in general so that you can get
a sense for how stupendously ”large” these can be, the main thrust
concerns certain simple, seemingly well-posed conjectures whose status
appears problematic. For example, the Continuum Hypothesis (CH)
is the conjecture that the cardinality of the real numbers is the first
uncountable cardinality, i.e., the first cardinality greater than that of
the set of natural numbers. Equivalently, there is no uncountable subset
of real numbers strictly smaller in cardinality than the full set of reals. (You’d
think that if there were one, you would be able eventually to find such.)
Cantor thought that CH is true, but could not prove it. Gödel showed, at
least, that if ZFC is consistent, then so is ZFC + CH. However, Paul Cohen
later proved that if ZFC is consistent, then so is ZFC + the negation of
CH. In fact, CH could fail in astoundingly many ways. For example, the
cardinality of the continuum could be (weakly) inaccessible, i.e., of a
cardinality that cannot even be proved to exist in ZFC (although the
reals can certainly be proved to exist in ZFC). So, are there further,
tuitively true axioms that can be added to ZFC to resolve the cardinality
of the continuum, and CH is definitely true or false? Or, as Cohen thought,
does CH simply lack a definite truth value?
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.424. Foundations of Probability & Induction. 3.00 Credits.
An examination of various interpretations of probability, including
classical and priori, frequency, propensity, subjective, and logical. Also,
we will study views about evidence as well as paradoxes of inductive
reasoning, including Hume’s skepticism, and the grue and ravens
paradoxes. No previous knowledge of probability is required.
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.425. Poetic Thought. 3.00 Credits.
This course will examine essays and poems by Goethe, Hölderlin, and
Rilke with an eye toward the ways in which their work addresses issues
central to German Idealism and modern German thought. These include
the relation of subject to object; the problem of the representation
of the whole; the reconciliation of science and art; and the role of
consciousness in the construction of the world. Readings to include texts
by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer,
Henrich, Husserl, Benjamin, and Allemann. Reading knowledge of German
is required.
Instructor(s): E. Forster; R. Tobias
Area: Humanities, Natural Sciences.

AS.150.426. Philosophy and Disability. 3.00 Credits.
In this course, we will consider various philosophical issues related to
disability. What counts as a disability? What obligations do we have, both
as individuals and as a society, to people with disabilities? What counts
as respecting people with disabilities, and what counts as unjustifiable
discrimination against them?
Prerequisites: AS.150.219 OR AS.150.220
Instructor(s): H. Bok
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.150.427. Aristotelian Philosophical Psychology. 3.00 Credits.
What did philosophy of mind look like before Descartes? It centered on
study of the soul (psuche), or philosophical psychology. This course
will focus on Aristotle’s view of the soul, its functions, and its relation
to matter (hylomorphism), as well as the development of his thought
by later ancient and medieval Aristotelians, including Alexander of
Aphrodias, Averroes, and Aquinas. Will conclude with examination of
some renewed interest in Aristotle relative to contemporary philosophy
of mind.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.428. Spinoza’s Theological Political Treatise. 3.00 Credits.
The course is an in-depth study of Spinoza’s Theological-Political
Treatise. Among the topics to be discussed are: Spinoza’s Bible criticism,
the nature of religion, philosophy and faith, the nature of the ancient
Hebrew State. Spinoza’s theory of the State, the role of religion in
Spinoza’s political theory, the freedom to philosophize, the metaphysics
of Spinoza’s Theological-Political Treatise, and finally, the reception of
the TTP.
Instructor(s): Y. Melamed.
AS.150.429. Topics in Logic: Ontology and Knowledge Representation. 3.00 Credits.
Knowledge representation deals with the possible structures by which the content of what is known can be formally represented in such a way that queries can be posed and inferences drawn. Ontology concerns the hierarchical classification of entities from given domains of knowledge together with the relations between various classes, subclasses, or individuals. The main framework in which we will work is that of description logics, which are decidable fragments of varying degrees of first order predicate logic. In ontology development we will examine RDF (Resource Description Framework), its extension to RDFS, and OWL (Web Ontology Language), and use the software Protegé for specific applications. Finally, we will take a look at query languages such as SPARQL (SPARQL Protocol and RDF Query Language).
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.430. Hegel's Phenomenology of Spirit. 3.00 Credits.
An in-depth study of Hegel's masterpiece, the Phenomenology of Spirit. We will be concentrating on the first half of the text.
Instructor(s): E. Forster.

AS.150.431. Introduction to Philosophy of Science. 3.00 Credits.
This course introduces students to some major philosophical problems about science, including these three: (1) Is there a universal set of rules constituting the "scientific method" that scientists must always follow in order to be rational? (2) Can science provide knowledge of an "unobservable" world underlying our experiences, and if so how? Or is science confined to speaking about the world of observation? (3) Are there important differences between philosophy and science? We will consider disputes between rationalists (e.g., Descartes) and empiricists (e.g., Newton) on scientific method, historical and contemporary debates between scientific realists and instrumentalist about the reach of science, as well as different viewpoints concerning the relationship between philosophy and science. No particular science or philosophy background is presupposed.
Instructor(s): P. Achinstein; R. Bett
Area: Humanities.

AS.150.432. Hegel's Phenomenology of Spirit, Part 2. 3.00 Credits.
This course is a continuation of Hegel's Phenomenology of Spirit, Part One, taught last Spring. We will closely study the second half of the book, compare its methodology with that of the first half, and end with an examination of Hegel's systematic reflections in the Preface.
Prerequisites: AS.150.430
Instructor(s): E. Forster
Area: Humanities.

AS.150.433. Philosophy of Space and Time. 3.00 Credits.
Is space an entity that exists independently of matter, or is it only an abstraction from spatial relations between bodies? Is there a lapse of time even when nothing changes, or is time only a measure of motion? Are motion and rest contrary states of a body, or are there only changes in the positions of bodies relative to one another? Philosophers and physicists have disputed these questions from antiquity to the present day. We survey the arguments and attempt to find a resolution. But there are further questions. Is there a fact of the matter as to the geometry of space (Euclidean or non-Euclidean), or as to whether spatially separated events occur at the same time? Why does time but not space have a "direction"? Are past, present and future objective features of reality? Are space and time ultimately discrete on small scales? Do space and time, or even just spatio-temporal relations between bodies and events, really exist? Or are they merely emergent features of a fundamental non-spatio-temporal reality?
Instructor(s): R. Rynasiewicz
Area: Humanities, Natural Sciences.

AS.150.434. Formal Methods of Philosophy. 3.00 Credits.
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with AS.150.223)
Instructor(s): J. Bledin
Area: Humanities.

AS.150.437. KANT'S Opus Postumum. 3.00 Credits.
Why did Kant, after he had completed the three Critiques, work on a book with the title, Transition from the Metaphysical Foundations of Natural Science to Physics – better known as his Opus postumum? Why did this project eventually come to include ethics and result in a revision of Kant's transcendental philosophy? Questions like these will be answered by means of a close study of Kant's text, and by relating the text to (a) his Metaphysical Foundations of Natural Science and (b) to his ethical writings from the critical period.
Instructor(s): E. Forster
Area: Humanities.

AS.150.438. Spinoza's Ethics. 3.00 Credits.
The seminar is an in depth study of Spinoza's major work, The Ethics.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.439. Epistemology. 3.00 Credits.
Is knowledge (or even strong evidence) required, or possible, in science and in philosophy? We will focus on whether standard forms of nondemonstrative reasoning are justified, how if at all one can gain knowledge of the observable and unobservable world, whether and how theories in philosophy can be established, and what to do in science and philosophy when you can't prove or get strong evidence for your theory.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.442. The Philosophy of Ludwig Wittgenstein. 3.00 Credits.
A close reading of Wittgenstein's masterwork, The Philosophical Investigations is required.
Instructor(s): M. Williams
Area: Humanities.
AS.150.443. Wittgenstein’s Philosophy of Mind. 3.00 Credits.
The seminar will begin with a careful examination of the private language argument in the Philosophical Investigations. Among the additional themes we will examine are his analogy between philosophy of mathematics and his philosophy of psychology, implicit criticisms of the representational theory of mind, the problem of other minds and the role of deception, and the “grammar” of psychological concepts. There are numerous manuscripts concerned with mental and psychological concepts. Two volumes of the Remarks on the Philosophy of Psychology will be ordered for the seminar, though we will not be “working through” them in a systematic way. The Philosophical Investigations and Zettel are essential. Recommended Course Background: Familiarity with Wittgenstein’s work.
Instructor(s): M. Williams
Area: Humanities.

AS.150.444. The Identity of Indiscernibles. 3.00 Credits.
Can two things (such as bodies, events, moments, thoughts, or geometrical points) have precisely the same qualities? If so, what makes them different from each other? In this class we will explore the debate about the Principle of the Identity of Indiscernibles. Readings will include texts by: Leibniz, Clarke, Max Black, Ayer, Ian Hacking, Robert Adams, and Michael Della Rocca.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.446. Hegel’s Science of Logic. 3.00 Credits.
In this course we will focus on the first two parts of Hegel’s Science of Logic, and address the following issues (among others). In what sense is Hegel’s dialectical logic continuous with the classical metaphysical tradition and in what sense is it a critique of traditional metaphysics? What motivates the project, or what questions does Hegel think his logic can answer that previous logics did not?
Instructor(s): D. Moyar; E. Forster
Area: Humanities.

AS.150.452. Freedom of Will & Moral Responsibility. 3.00 Credits.
What are freedom of the will and moral responsibility? Are they compatible with determinism or naturalism? This course will examine various philosophers’ answers to these questions.
Instructor(s): H. Bok
Area: Humanities
Writing Intensive.

AS.150.454. The Value of Humanity. 3.00 Credits.
Are human beings distinctively valuable? What makes us valuable? And how should we respond to the value of human beings? The course is divided into four parts. The first part takes up questions about the basis of human value. We consider various proposals, including Kant’s, about the valuable feature or capacity of human beings. Are we valuable in virtue of having a good will, in virtue of being agents, in virtue of being valuers, or something further? The second part takes up questions about the explanation of the value of human beings. Does the proposed feature make us valuable because it instantiates a simple value property, making us valuable in ourselves, or simpliciter? We consider whether the notion of value simpliciter is a notion we fully understand, or need. Does the proposed feature make us valuable because it makes us good-for something or someone? Who or what does it make us good-for? Or again, does the proposed feature make us such that we are objects of an appropriate attitude or practical stance? If so, what is the attitude or stance? The third part of the course takes up normative questions about the appropriate mode of responding to human beings. We consider whether it makes sense to say that human beings are ends-in-themselves, and what it would mean to treat a person as an end-in-itself. We also consider various accounts of respect. A guiding question is whether human beings are the only appropriate objects of respect, or whether we can respect other beings, and even artifacts. The fourth part of the class applies what we have learned so far to related topics: to the question of whether human life or existence is valuable, and conversely, whether death is disvaluable. We consider, albeit briefly, the value of human beings in relation to the value of animals. And we ask about the role of Kantian notions like dignity in applied contexts, so that highly philosophical considerations about value are shown to have real-world bearing.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.455. Ethics And Animals. 3.00 Credits.
Instructor(s): H. Bok
Area: Humanities
Writing Intensive.

AS.150.456. Medieval Philosophy. 3.00 Credits.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.460. Rawls and His Critics. 3.00 Credits.
John Rawls was the most important moral and political thinker of the 20th century. In this course we will look at his two main works, A Theory of Justice and Political Liberalism, along with some of the more influential criticisms of his ideas. Main topics will include the derivation of principles of justice, the role of the good in liberal political theory, and the nature of reasonable pluralism.
Instructor(s): D. Moyar; H. Bok
Area: Humanities.

AS.150.461. Russell, Frege, Wittgenstein: Foundations of Analytic Philosophy. 3.00 Credits.
Russel, Frege, and Wittgenstein (in Tractatus) provided much of the philosophical foundation for 20th C.analytic philosophy. Their influence continues to be felt, especially in their conception of philosophical problems and the methods by which they can be solved.
Instructor(s): M. Williams
Area: Humanities.
AS.150.462. Islamic Political Philosophy. 3.00 Credits.
An introduction to the history of Islamic political philosophy, primarily focused on two flashpoints of encounter between the religion of Islam and other philosophical/political systems—an early one with ancient Greek philosophy (especially in the works of Plato and Aristotle), and a period of interface with modern Western secular political thought, from the late 19th century to present. Our goal will be to try to understand some of the varying responses in each period as Muslim thinkers seek authentic engagement with external and internal trends, both religious and philosophical. The focus will be on primary texts from philosophically engaged thinkers (who may or may not consider themselves philosophers).
Instructor(s): M. Williams
Area: Humanities.

AS.150.465. Genetics, Genomics and Society. 3.00 Credits.
This course will examine the ethical, legal and social implications (ELSI) of human genetics through the lens of significant and field-defining periods and events in the history of the field. We will study the ELSI issues raised by those events, and how the events have shaped and defined the current state of the science and emerging scientific, ethical, policy and public health issues. Juniors and Seniors only.
Instructor(s): D. Mathews
Area: Humanities, Social and Behavioral Sciences.

AS.150.466. Recent Work in Skepticism. 3.00 Credits.
We all take it for granted that perceptual experience yields knowledge of the world around us. But in the first of his Meditations on First Philosophy, Descartes invents a new and puzzling thought experiment. He imagines an Evil Demon with the power to manipulate the total course of his (Descartes’s) experience, so that what he naturally takes to be experience of the world around him is really a kind of perpetual dream: a simulation or virtual reality, as we might way today. Descartes’s problem, which has made its way into popular culture through films like those in the “Matrix” series, remains a source of philosophical puzzlement.
While no one believes that skeptical hypotheses like Demon or computer deception are true, it is not easy to say how we can exclude them. Given that the deception is systematic, it seems that any “evidence” I cite could itself be part of the simulation. So how do I (or could I) know (for sure) that I’m not the victim of the Deceiver or the Matrix? We shall examine some of the latest attempts to respond to Descartes’s challenge. Does the “How could I know?” question admit of a theoretical answer, or is the question itself somehow ill-posed? Can we answer it without making significant concessions to skepticism? Exploring such questions should teach us some interesting lessons about knowledge (or the concept of knowledge).
Instructor(s): M. Williams
Area: Humanities.

AS.150.467. Neuroethics. 3.00 Credits.
Course will consider the bearing of theories of justice on health care. Topics will include national health insurance, rationing and cost containment, and what justice requires of researchers in developing countries.
Instructor(s): H. Bok
Area: Humanities.

AS.150.468. Global Food Ethics. 3.00 Credits.
This course is an introduction to ethical issues that arise within the contemporary global agrifood system. The overarching goal of the class is to give you the opportunity to think critically about a variety of conflicting views as to how we should produce, distribute, and consume food to achieve food security for over 9.6 billion people by 2050. We will borrow tools from practical ethics and theories of justice to shed light on these pressing issues that determine our common future and the way we personally relate to the food we eat.
Instructor(s): Y. Saghai
Area: Humanities.

AS.150.472. Neuroethics. 3.00 Credits.
Neuroethics: Can electroencephalography show that we lack free will? Can modern neuroimaging show that someone will commit a crime in the future? Is it ethical to use this Promethean knowledge to put them in jail before they even commit a crime? In Neuroethics, we’ll consider these and other pressing questions emerging at the frontiers of neuroscience and modern moral theory.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.474. Justice and Health. 3.00 Credits.
This course will examine the ethical, legal and social implications (ELSI) of human genetics through the lens of significant and field-defining periods and events in the history of the field. We will study the ELSI issues raised by those events, and how the events have shaped and defined the current state of the science and emerging scientific, ethical, policy and public health issues. Juniors and Seniors only.
Instructor(s): D. Mathews
Area: Humanities, Social and Behavioral Sciences.

AS.150.467. Philosophy and Cognitive Science. 3.00 Credits.
This term’s topic is perception. Questions will include: How does perception differ from belief, hallucination, imagination? Can what we believe affect what we perceive? What distinguishes the various senses? Is linguistic comprehension a kind of perception?
Instructor(s): S. Gross
Area: Humanities
Writing Intensive.

AS.150.479. The Ethics of Making Babies. 3.00 Credits.
In this class, we will investigate many aspects of the ethics of making babies, asking not only which children we should create and how we should create them, but whether we should make any more people at all. Investigating these questions will take us through large chunks of moral theory, bioethics, and public health ethics. For more information, or to request permission of the instructor (for those who do not meet the prerequisite requirements), email Travis Rieder at trieder@jhu.edu.
Recommended Course Background: One course in ethics or bioethics, or permission of the instructor.
Instructor(s): T. Rieder
Area: Humanities.
AS.150.487. Fundamental Principles of Philosophical Rationalism. 3.00 Credits.
At the center of Leibniz rationalist metaphysics are four interrelated philosophical principles: (1) The Law of Non-Contradiction, (2) The Principle of Sufficient Reason (roughly, the claim that everything must have a reason), (3) The identity of indiscernibles (roughly, the claim that there are no two perfectly similar things), and (4) The Predicate in Subject Principle (the claim that in every true proposition the concept of the predicate is somehow contained in the concept of the subject). In this class we will study these four principles, i.e., their modal strength, range, justification, and interrelations both in early modern philosophy (Leibniz, Spinoza, and Clarke), and in contemporary philosophy (Della Rocca, Sam Levey, Dasgupta, Max Black).
Instructor(s): J. Bledin; Y. Melamed
Area: Humanities.

AS.150.488. Enlightenment Moral and Political Theory. 3.00 Credits.
Instructor(s): H. Bok
Area: Humanities
Writing Intensive.

AS.150.490. Animal Minds. 3.00 Credits.
An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-listed 300.411
Instructor(s): M. Williams
Area: Humanities, Social and Behavioral Sciences.

AS.150.491. Introduction to Scientific Methods. 3.00 Credits.
We will study various methods for proving scientific claims defended by scientists and philosophers. Included will be rationalism (Descartes), various forms of empiricism (Newton, Mill, Whewell), realism vs. anti-realism, and scientific strategies to follow when you cannot prove your favorite theory. No particular scientific background required.
Instructor(s): P. Achinstein
Area: Humanities, Social and Behavioral Sciences.

AS.150.494. Descartes. 3.00 Credits.
The course is an introduction to the philosophy of Rene Descartes. We will read most of his main philosophical works, and part of his correspondence. The class is open to both undergraduate and graduate students.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.495. Sex, Drugs, and Bioethics: Medicine and Morality in Modern America. 3.00 Credits.
Alongside rock n’ roll, sex and drugs have classically been seen as sites of moral or ethical transgression, particularly in post-war America. Unlike rock n’ roll, however, sex and drugs have always been bound up with the practice of medicine. This course explores the interaction of medical science with the moral and ethical issues which surround i) reproduction, sexual pleasure, and gender roles and ii) the use of drugs, both therapeutic, enhancing and recreational. Bridging these two sides of the course is the question of medicalisation, and how medical science is used to construct socially normative ideals about sexuality, behavior, emotion and physical capacity, and how in turn those moral norms are used to justify or argue for the development of particular medical practices. The aim of the course is to illuminate the mutually constitutive interplay of medicine and morality in modern America. Topics covered include: abortion, contraception, IVF, sex-selection, gene selection, adolescent sexualities, prostitution, STD surveillance, medicalisation of sexual dysfunction, medicalisation of emotion and behavior, ‘moral enhancement’, ADHD, Performance Enhancing Drugs, cosmetic surgery, neuroenhancement, recreational drugs, the war on drugs, the purpose of medicine.
Instructor(s): D. O’Connor
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.150.496. Topics in the Theory of Value. 3.00 Credits.
We ask a basic question in value theory: what is it for something to be good, or of value? Is it for something to instantiate the simple value property ‘good’? Can goodness be identified with some natural property, perhaps, the property ‘pleasant’, or some dispositional property, perhaps, ‘what we desire to desire’? Is goodness a relation between some object, state of affairs, or activity and a subject, so that the good is benefit? On the other hand, are reasons and not values primitive in value theory, so that we should theorize about the good in terms of appropriate responses to it? We will read classic works by G. E. Moore, Peter Geach, Judith Jarvis Thomson, Connie Rosati, Nicholas Sturgeon, Richard Kraut, Donald Regan, T. M. Scanlon, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.497. Kant and the Early Moderns. 3.00 Credits.
A critical examination of Kant’s dialogue with his Early Modern predecessors (Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume), and of their own respective positions.
Instructor(s): E. Forster, Y. Melamed
Area: Humanities.

AS.150.498. Modal Logic and Its Applications. 3.00 Credits.
In the first part of the course, we’ll investigate the theory of modal logic, considering its syntax, semantics, and proof theory. We’ll then turn to some its philosophical applications: epistemic logic, counterfactuals, deontic logic, intuitionistic logic, and the metaphysics of time.
Instructor(s): J. Bledin
Area: Humanities, Quantitative and Mathematical Sciences.
AS.150.499. The Principle of Sufficient Reason. 3.00 Credits.
According to the Principle of Sufficient Reason every fact must have a reason, or explanation. In other words: there are no brute facts. If a certain penguin has three dots on its right wing – there must be a reason for that as well. In the first half of the course we will read works by the two philosophers who introduced the principle: Spinoza and Leibniz. In the second part, we will read texts by Kant, Maimon, Hegel, Schopenhauer, and some contemporary analytic philosophers, and discuss the plausibility, implications, and justification of the principle.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.511. Directed Study. 3.00 Credits.
Individual study of special topics, under regular supervision of a faculty member. Special permission is required.
Instructor(s): Staff
Writing Intensive.

AS.150.512. Directed Study. 0.00 - 3.00 Credits.
Instructor(s): Staff.

AS.150.551. Honors Project. 3.00 Credits.
See departmental major adviser.
Instructor(s): Staff.

AS.150.552. Honors Project. 0.00 - 3.00 Credits.
Instructor(s): Staff.

AS.150.598. Internship. 1.00 Credit.
Instructor(s): D. Moyar; M. Tumulty

AS.150.601. Graduate Seminar: Topics in the Theory.
Graduate students from non-Philosophy departments need instructor permission. We ask a very basic question in value theory: what is it for something to be good, or of value? Is it for something to instantiate the simple value property 'good'? Can goodness be identified with some natural property, perhaps, the property 'pleasant', or some dispositional property, perhaps, 'what we desire to desire'? Is goodness a relation between some object, state of affairs, or activity and a subject, so that the good is benefit? On the other hand, are reasons and not values primitive in value theory, so that we should theorize about the good in terms of appropriate responses to it? We will read classic works by G. E. Moore, Peter Geach, Judith Jarvis Thomson, Connie Rosati, Nicholas Sturgeon, Michael Smith, Richard Kraut, Donald Regan, T. M. Scanlon, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.604. Probability and Evidence.
Leading theories about the meaning of probability, and about the concept of evidence. No previous course in probability is necessary.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.605. Foundations of Ethics.
The seminar will serve as an advanced, topical introduction to normative theories in ethics, and will include some meta-ethics. Our central question is: what is the foundation, or motivational basis, of ethics? Is it the individual asking what she wants for her life? Is it the determination of rational requirements on action? We think about the relationship between reason, reasons, and motivation. We consider the debate over internalism and externalism about reasons. We work through the distinction between agent-neutral and agent-relative reasons and values. Among others, we will read Thomas Nagel, Phillipa Foot, Shelly Kagan, Samuel Scheffler, Derek Parfit, G. E. M. Anscombe, and Bernard Williams.
Instructor(s): L. Theunissen
Area: Humanities.

Course will focus on ancient skepticism as a way of life, and on the role of epistemological argument in skepticism so conceived. The seminar will end with a brief look at early modern reactions to ancient skepticism.
Instructor(s): M. Williams; R. Bett.

AS.150.607. Graduate Seminar: Knowledge and Perception.
How does perception reveal the world, if it does? Why have philosophical reflections on perception often led to skepticism? For background, we will start with readings from Ayer and Austin (on the sense-datum theory), and Sellars (on the Myth of the Given). We will then spend time on contemporary disjunctive accounts of perceptual consciousness, with readings from McDowell, Travis and (possibly) others.
Instructor(s): M. Williams
Area: Humanities.

AS.150.608. Graduate Seminar-Speculation: Scientific and Philosophical.
Some say that speculation whether in science or philosophy, should be avoided at all costs (e.g., Descartes, Newton). Others say that speculation is okay as long as it is followed by argument or evidence (e.g., Popper). Still others encourage one to freely speculate in the absence of argument or evidence (e.g., Feyerabend). Are any of these views right? What is speculation, and is it subject to any universal standards? What is evidence, and is it subject to universal standards? Readings will be from authors mentioned above and from quite a few others. We will look at some very general influential philosophical=scientific speculations, such as the claim that nature is simple and that everything is explainable, as well as some more specific ones.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.609. Graduate Seminar - Philosophy.
An examination of Derek Parfit's "On What Matters".
Instructor(s): H. Bok
Area: Humanities.

AS.150.610. Virtue Ethics.
A study of recent work in virtue ethics.
Instructor(s): H. Bok.

Schelling’s Philosophical Investigations into the Nature of Human Freedom counts among his most important works – Heidegger called it “one of the deepest works of Western philosophy.” It is also one of the most enigmatic ones. In this course, we will contrast it with Schelling’s philosophy of nature and investigate the extent to which his theory of freedom is necessitated by problems in his philosophy of nature.
Instructor(s): E. Forster
Area: Humanities.
AS.150.614. Topics in Meta-Ethics (Graduate Seminar).
This is a seminar on theoretical topics in ethics. We focus on debates over cognitivism and non-cognitivism; realism and anti-realism; reasons internalism and externalism; relativism and skepticism. We read contemporary classics by Sharon Street, T. M. Scanlon, Joseph Raz, Bernard Williams, Allan Gibbard, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.615. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic. Co-listed with AS.300.653
Instructor(s): H. de Vries; M. Williams
Area: Humanities.

AS.150.616. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives II.
Starting with a brief overview and recapitulation of themes discussed in its Introduction and Division One, this jointly will focus on Division Two of Being and Time and bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams
Area: Humanities.

AS.150.619. Topics in Hegel's Philosophy: The Philosophy of Right.
This course will be a close reading of G.W.F. Hegel's Philosophy of Right. Some of the main topics for discussion will be the relation of law and morality, the dependence of the political philosophy on Hegel's Logic, and the relation of individual and social conceptions of freedom.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.627. Seminar in Epistemology.
Topic: Realism and its Critics Questions circling around issues of "realism" have been prominent in contemporary philosophy. Some philosophers argue for or against realism across the board. Here the fundamental issue is often taken to be semantic: can truth be radically evidence-transcendent, so that a proposition must be true or false even if we will never have evidence one way or another? But there are also more local questions. Do scientific theories that postulate unobservables aim to state literal truths about such theoretical entities (as scientific realists claim), or are they better understood as devices for linking and systematizing observational evidence (as instrumentalists or constructive empiricists argue)? Are there mind-independent moral or aesthetic facts (as moral and aesthetic realists suppose), or are moral and aesthetic judgments better understood in some other way, for example as fundamentally "expressive" rather than "descriptive". Many philosophers continue to hold that such questions raise deep metaphysical issues. But this view has been challenged by metaphysical quietists, who argue that the whole issue of realism versus non- or anti-realism is best avoided. So should we be realists, either in general or selectively? Or is quietism the better option? What is realism anyway? The aim of this seminar is to explore influential arguments that arise in the attempt to answer such questions.
Instructor(s): M. Williams; P. Achinstein
Area: Humanities.

AS.150.630. Seminar in Metaphysics: Mind and Cosmos.
We will begin by reading Thomas Nagel's new book: Mind and Cosmos. This will be followed by other works to be selected in class.
Instructor(s): P. Achinstein.

AS.150.632. Formal Logic.
An introduction to symbolic logic and probability. In the first two parts of the course we study formal ways of determining whether a conclusion of an argument follows from its premises. Included are truth-functional logic and predicate logic. In the third part we study the basic rules of probability, and learn how to make probability calculations and decisions in life. Co-listed with AS.150.118 (for undergraduate students) (01-F 11:00-11:50am).
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.633. Kant's Opus Postumum.
This research seminar examines the reasons that led Kant to revise his transcendental philosophy late in life. Special attention to problems in the Metaphysics of Nature and the Metaphysics of Morals. Students should be familiar with Kant's theoretical and practical philosophy.
Instructor(s): E. Forster

AS.150.634. Seminar in Philosophy of German Idealism: Explanation or Construction? The Question of Method in the Philosophy of Nature.
"We must do away with all explanation, and description alone must take its place." This sentence, although written over a century later and in a different context, could serve as a motto for what is perhaps the most important debate about the proper method of Naturphilosophie in German Idealism. In this seminar we will examine the philosophical significance of this debate over the role of explanation in our knowledge of nature. Readings will come from Jacobi, Goethe, Schiller, Kant, Schelling, Hegel, as well as from Pascal, Spinoza, and Newton.
Instructor(s): E. Forster
Area: Humanities.

This seminar will be an examination of Wittgenstein's On Certainty. We will be concerned with detailed readings of the passages as well as more general interpretative claims.

This seminar will focus on language acquisition as involving a special kind of learning, one that requires the active participation of an adult in what the child does. The account we will be discussing draws heavily on Wittgenstein's philosophy of language, particular the treatment of the problem of similarity and the development of reference.
Instructor(s): M. Williams
Area: Humanities.

A study of Kant's major works in moral philosophy.
Instructor(s): H. Bok.
Although all three were Copernicans in the broad sense, these great mathematician-philosophers of the 17th century held subtly different positions on the question whether the sun or the earth moves, in large part because they proposed very different analyses of what it is for a body to move. These analyses emerge from quite divergent views on space, time, matter, mind, and scientific-philosophical method in relation to natural theology. The focus of the seminar is on the interaction of these views: Newton's rejection of Descartes' Followed by the clash between Newton's and Leibniz's.
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.652. Seminar in the Philosophy of Science.
Philosophy of experiment, Bayesianism, severe tests. Readings from Hacking, Galison, Franklin, Mayo, and others. Applications range from physiology to cosmology.
Instructor(s): R. Rynasiewicz
Area: Humanities, Social and Behavioral Sciences.

AS.150.653. Philosophy of Physics Seminar: Non-Locality for the Layperson.
Non-locality arises when measurement outcomes on space-like separated systems are correlated in such a way that no common cause or super-luminal signaling could possibly account for the pattern of the correlations. Such happens in quantum mechanics. Einstein referred to it as “spooky action-at-a-distance.” Schrödinger spoke of the states of the separated quantum systems as “entangled.” Non-locality, rather than the failure of determinism, has come to be regarded as the deeper feature separating quantum from classical physics. However, whether nature is local or non-local can be defined independently of quantum mechanics, and, in principle, reality could be even more non-local than as described by quantum mechanics. This seminar will be a gentle introduction to non-locality, as presented in Jeff Bub’s Bananaworld: Quantum Mechanics for Primates, which presupposes no prior background in quantum theory. But there is more. Pondering super-non-local possibilities suggests that the wave-function need not be ontologically fundamental, thus freeing us from the outrageous conclusion that the world branches upon measurement into parallel realities corresponding to spectrum of possible measurement outcomes. It remains to be seen, however, how one might then avoid laping into Quantum Bayesianism, which holds that the wave function merely represents our subjective degrees of belief about what will happen.
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.655. Practical Reason in German Idealism.
In this course we will examine the development of idealist theories of practical reason. We will read Kant’s Critique of Practical Reason, Fichte’s System of Ethics, and selections from Hegel’s writings.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.656. Philosophy of Language.
We will investigate one or more specialized topics in formal semantic and pragmatics.
Instructor(s): J. Bledin.

AS.150.657. Topics in the Philosophy of Language.
An examination of recent work in the philosophy of language and/or related work in the philosophy of mind.
Instructor(s): S. Gross.

AS.150.659. Topics in Formal Semantics: Counterfactuals?.
In this seminar, we will investigate the semantics and communicative function of counterfactuals. Among the questions that we will consider are these: What are the compositional semantic values of counterfactual conditionals? What is the context change potential of a counterfactual and what kind of structure must we add to the common ground of a conversation to model its communicative effect? Do counterfactuals recommend a dynamic approach to meaning? Are counterfactual conditionals truth-apt? Do they serve to describe the world? If so, which aspect of reality is a counterfactual sensitive to?
Instructor(s): J. Bledin
Area: Humanities, Social and Behavioral Sciences.

Non-locality arises when measurement outcomes on space-like separated systems are correlated in such a way that no common cause or super-luminal signaling could possibly account for the pattern of the correlations. Such happens in quantum mechanics. Einstein referred to it as “spooky action-at-a-distance.” Schrödinger spoke of the states of the separated quantum systems as “entangled.” Non-locality, rather than the failure of determinism, has come to be regarded as the deeper feature separating quantum from classical physics. Please see AS.150.810 for section number to use when registering.
Instructor(s): Staff.

Preparing philosophy graduate students for the impending job market by discussions of, and practicing for, constructing and submitting dossiers, interviews and giving talks both in and outside one's particular field. Open to all philosophy graduate students, regardless of year and field. No degree credits. Offered sporadically.
Instructor(s): P. Achinstein.

AS.150.821. Research Seminar in Language and Mind.
A workshop for current departmental research in language and mind. Permission required.
Instructor(s): S. Gross
Area: Humanities.

Cross Listed Courses
Psychological Brain Sciences
AS.200.336. Foundations of Mind. 4.00 Credits.
An interdisciplinary investigation into the innateness of concepts: perception, number, language, and morality, physics discussed. Evidence from animals, infants, patients, brains. Students collect data in sections investigating claims from the readings. Cross-listed with Cognitive Science and Philosophy.
Instructor(s): J. Halberda; L. Feigenson
Area: Social and Behavioral Sciences.
German Romance Languages Literatures
Theatre Arts Studies
AS.225.328. The Existential Drama: Philosophy and Theatre of the Absurd. 3.00 Credits.

Existentialism, a powerful movement in modern drama and theatre, has had a profound influence on contemporary political thought, ethics, and psychology, and has transformed our very notion of how to stage a play. Selected readings and lectures on the philosophy of Kierkegaard, Nietzsche, Camus and Sartre -- and discussion of works for the stage by Sartre, Ionesco, Genet, Beckett, Albee, Pinter, Athol Fugard (with Nkani & Nshone), Heiner Müller and the late plays of Caryl Churchill. Opportunities for projects on Dürrenmatt, Frisch, Havel, Witkiewicz, and Mrozek.
Instructor(s): J. Martin
Area: Humanities
Writing Intensive.

Humanities Center
Center for Africana Studies
AS.362.450. Critical Thinking in Africana Studies. 3.00 Credits.

This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes
Writing Intensive.

For current course information and registration go to https://sis.jhu.edu/classes/

AS Program in Museums and Society Courses
AS.389.103. Freshman Seminar: Museum Matters. 3.00 Credits.

Museums are crucibles, places where public memory, identity, and cultural values are shaped and debated. We examine this premise through weekly visits to Baltimore museums of art, science, history (and many more), critical group discussion, and intensive writing assignments. Freshmen only.
Instructor(s): C. Arthur; E. Rodini
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.389.105. Freshman Seminar: Art in the Museum. 3.00 Credits.

Go behind the scenes of local art museums to explore fundamental concepts and social issues particular to the collection and display of art in the past and today.
Instructor(s): J. Kingsley
Area: Humanities
Writing Intensive.

AS.389.107. Freshman Seminar: Technical Research on Archaeological Objects in the Johns Hopkins Archaeological Museum. 3.00 Credits.

Freshmen will learn and apply analytical methods used in the technical study of archaeological objects by examining and researching ancient examples in the Johns Hopkins Archaeological Museum. Freshman Only.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.110. Freshman Seminar: All about Things. 3.00 Credits.

What can objects tell us about the world, past and present? Using theoretical, archival, technical, and visual processes and in-depth research at Evergreen Museum & Library, we explore this question. Freshman Only.
Instructor(s): E. Rodini
Area: Humanities
Writing Intensive.

AS.389.120. Discover Johns Hopkins: Examining Archaeological Objects. 1.00 Credit.

In this course, we examine artifacts from the Johns Hopkins Archaeological Museum in order to learn about the role of materials such as ceramics, metal, glass, faience and stone in the history, art and culture of the ancient world. We will visit local artists’ studios to understand how these materials are utilized today, and examine comparative examples in local art museums. Students will work hands on with artifacts each day.
Instructor(s): S. Balachandran.

AS.389.130. Mini Course: Conservation, An Introduction to Technical Art History. 1.00 Credit.

Look through the eyes of a conservator and learn how to answer historical questions by analyzing the physical nature of works of art. Objects examined will include paintings, sculpture and works on paper from the collection of the Baltimore Museum of Art. Class meets 4 times, on February 7, 14, 21 and 28, at the BMA. Syllabus and organizational meeting at JHU on Thursday, January 31, 5:30pm.
Instructor(s): T. Primeau
Area: Humanities.

AS.389.201. Introduction to the Museum: Past and Present. 3.00 Credits.

This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.202. Introduction to the Museum: Issues and Ideas. 3.00 Credits.

This course considers the practical, political, and ethical challenges facing museums today, including the impact of technology and globalization, economic pressures, and debates over the ownership and interpretation of culture.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.205. Examining Archaeological Objects. 3.00 Credits.

This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.
AS.389.250. Conservation of Material Culture: Art, Artifacts and Heritage Sites. 3.00 Credits.
Alongside specialists in area museums, we explore the conservation of material culture in various media. Topics include manufacturing methods and material degradation as well as conservation treatments, science, and ethics. Cross-listed with History of Art. One other course in Museums & Society, History of Art, Archaeology, or Material Sciences permission from the Museums & Society director.
Instructor(s): L. Trusheim
Area: Humanities.

AS.389.261. Curating Homewood. 3.00 Credits.
Instructor(s): C. Arthur
Area: Humanities.

AS.389.275. Interpreting Sites & Collections: An Introduction to Museum Education. 3.00 Credits.
Part public history, part introduction to museum practices, this hands-on course explores how heritage areas and museums serve communities through interpretation. Each year, students partner with a community to develop research-based, visitor-centered interpretive material, in the 2015 Baltimore National Heritage Area. Field trips and community meetings will be a significant part of the course. Cross-listed with History and History of Science. M&S practicum course. Class usually meets 1:30 - 3:50 except for days with field trips.
Instructor(s): E. Maloney
Area: Humanities, Social and Behavioral Sciences.

AS.389.301. Curating Material Culture for the Digital Age. 4.00 Credits.
JHU pioneered the concept of the modern research university in the United States, but what does that mean for the everyday experiences of its students, faculty, staff and friends? Excavate the history of this place through the things collected, made and used here since the university’s founding in 1876. Students research the material culture of Hopkins and present their findings on an interactive website: collectionsweb.jhu.edu. Course includes digital media labs. Cross-listed with History and History of Science. M&S practicum.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.302. The Virtual Museum. 3.00 Credits.
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.
Instructor(s): J. Kingsley
Area: Humanities.

AS.389.303. World of Things. 3.00 Credits.
This course introduces students to current approaches to objects, their materials, and materiality. Each class starts from a specific inspiration (body parts, fakes, the materiality of ISIS....) and treats the museum as a site for investigating the relationship between people and things.
Instructor(s): J. Kingsley.

AS.389.320. Photographs on the Edge: Ara Güler in Archives of the Smithsonian’s Freer and Sackler Galleries. 3.00 Credits.
Work as a curator alongside Smithsonian staff, researching the work of Turkish photographer Ara Güler to develop an exhibit that considers relationships between the history of photography, archives and the museum. Class will travel several times to the Freer and Sackler Galleries in Washington D.C. M&S practicum course.
Instructor(s): N. Micklewright
Area: Humanities, Social and Behavioral Sciences.

AS.389.321. GhostFood: Curatorial Practicum with the Contemporary. 3.00 Credits.
Students work with Baltimore’s Contemporary and NYC artist Miriam Simun on GhostFood, a project using art to engage important questions concerning the environment, climate change, and the politics of food. Instructor Permission. Contact erodini@jhu.edu for enrollment approval. M&S practicum course.
Instructor(s): D. Haggag
Area: Humanities.

AS.389.335. Recreating Ancient Greek Ceramics. 4.00 Credits.
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.340. Critical Issues in Art Conservation. 3.00 Credits.
The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.349. Art, Museums and the Law. 3.00 Credits.
The course encourages students to consider how artistic processes and cultural institutions are shaped by legal principles and vice versa. The interplay between art, museums and the law will be explored from historical, cultural and legal perspectives using a variety of source material.
Instructor(s): W. Lehmann
Area: Humanities.

AS.389.350. Staging Suburbia with the Jewish Museum of Maryland-Community Based Learning. 3.00 Credits.
Work as a public historian alongside Jewish Museum of Maryland curators and staff, researching primary documents and artifacts to develop an exhibition about Baltimore’s Jewish suburbs. The show will travel throughout Baltimore. M&S practicum course. Cross-listed with History and Jewish Studies.
Instructor(s): D. Weiner
Area: Humanities, Social and Behavioral Sciences.

AS.389.354. Paper Museums: Exhibiting Artists’ Books at the Baltimore Museum of Art. 3.00 Credits.
Students work with BMA collection and staff to develop and organize an exhibition of artists’ books. Various aspects of museum work are explored, including research, interpretation, presentation, programming, and marketing. M&S practicum course.
Instructor(s): R. Hoisington
Area: Humanities.
AS.389.357. Heaven on Earth: Art, Culture and Wonder in the Vatican Museum and Library. 3.00 Credits.
This interdisciplinary course will explore the institutional, cultural, artistic and architectural history of St. Peter’s and the Vatican Museum and Library from Antiquity through the Renaissance, up to the present day. Class meets in the Dick Macksey Seminar Room of the Brody Learning Commons. Cross-listed with History.
Instructor(s): E. Havens
Area: Humanities.

AS.389.358. Collecting and Cataloguing the Contemporary. 3.00 Credits.
Students will study, help author catalog of an important Baltimore contemporary art collection. Course alternates meetings focused on theories and practices of art collecting with collection visits and field trips. M&S practicum. Cross-listed with History of Art.
Instructor(s): V. Anderson
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.389.361. Introduction to Material Culture: Early Views of Baltimore. 3.00 Credits.
Students explore early American life relating to the region and Homewood House. Primary research, object study culminate in exhibit focused on trades and crafts, training and work practices. M&S practicum course. Meets at Homewood Museum. Cross-listed with History.
Instructor(s): C. Arthur
Area: Humanities.

AS.389.369. Encountering the Art of East Asia: Museum Display, Theory and Practice. 3.00 Credits.
Students reconsider the exhibition and interpretation of East Asian Art at the Walters Art Museum, developing a pilot installation to suggest a new permanent display. M&S Practicum Course. Class meets at the Walters Art Museum (extended time to allow for travel). Cross-listed with East Asian Studies.
Instructor(s): R. Mintz
Area: Humanities.

AS.389.371. The Artist in the Museum: Making Books. 3.00 Credits.
Hopkins curatorial staff and photography instructor introduce the concept of books as art. Students create artist’s books inspired by campus collections for inclusion in an Evergreen exhibition. FIRST CLASS IS MANDATORY. M&S practicum course. Cross-listed with Homewood Art Workshops.
Instructor(s): J. Abbott; P. Berger
Area: Humanities.

AS.389.372. Zoos as Community Institutions. 3.00 Credits.
This course examines zoos and living collections from historical and contemporary perspectives, taking into account the potentially conflicting role of zoos as conservation organizations, educational institutions, and entertainment venues. The class culminates in the creation of conservation education content for Baltimore City elementary school children. M&S practicum course.
Instructor(s): L. Finkelstein
Area: Humanities Writing Intensive.

AS.389.373. Encountering the Art of South Asia: Museum Display, Theory and Practice. 3.00 Credits.
Students reconsider the exhibition and interpretation of South Asian Art at the Walters Art Museum to suggest a new permanent display. Class meets at the Walters Art Museum. M&S practicum course.
Instructor(s): R. Brown; R. Mintz
Area: Humanities.

AS.389.375. Museums and Social Responsibility. 3.00 Credits.
Do museums have a social responsibility? What roles should they play in their communities? Should they be agents of social change or social justice? This course explores the ways in which museums engage with local communities. Students work in partnership with a specific museum to develop an original and fundable proposal that attends to its social responsibility. Field trips and guest speakers will be a key feature of this course. M&S practicum course. CBL course. Cross-listed with Sociology. Responsibility. Field trips and guest speakers will be a key feature of this course. M&S practicum course. CBL course. Cross-listed with Sociology.
Instructor(s): E. Maloney
Area: Humanities.

AS.389.378. Collections Remix: Black at Hopkins. 3.00 Credits.
We turn a critical eye on our university’s material culture and memory under the guidance of local experts on collecting and interpreting materials that represent the African-American experience. Students will develop a strategic plan to guide future collecting on campus and will stage creative interventions with or around objects to reveal hidden stories and rethink existing interpretation. M&S Practicum. CBL course.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.385. Global Perspectives on the Museum. 3.00 Credits.
Course examines practices of collecting, display and preservation beyond the western museum tradition, focusing on how these practices reflect and construct political, historical, ethnic and nationalist narratives. Counts towards the international studies major. Cross-listed with Anthropology.
Instructor(s): E. Rodini; S. Balachandran
Area: Humanities, Social and Behavioral Sciences.

AS.389.386. Islamic Art in the 21st Century Museum. 3.00 Credits.
What narratives about Islam and Islamic art does the visitor encounter at the museum? Recent re-installations of Islamic art will be studied in the context of current issues, including Islamophobia, attacks on cultural heritage, and hesitation in addressing matters of faith in public institutions. Cross-listed with History of Art and Islamic Studies.
Instructor(s): A. Landau
Area: Humanities, Social and Behavioral Sciences.

AS.389.390. Library / Laboratory. 3.00 Credits.
This interdisciplinary and project-driven class investigates the library as a site of experimentation and an expression of different knowledge regimes. Material includes literary treatments of the library, historical and critical readings, guest lectures, rare materials from special collections and field work.
Instructor(s): G. Dean
Area: Humanities.

AS.389.440. Who Owns Culture?. 3.00 Credits.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.450. Readings in Material Culture. 3.00 Credits.
Objects, things, stuff- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.
AS.389.460. Inventing the Middle Ages from the Renaissance to Today. 3.00 Credits.
Investigate the history of the collection, interpretation and display of medieval art by nations, museums and private collectors. Topics range from antiquarian interest to conception of medieval sculpture as primitive, from the use of medieval objects in nationalistic displays and from early American museums such as the Cloisters in NY to current exhibits such as the Walters. Cross-listed with History and History of Art. Instructor(s): J. Kingsley
Area: Humanities.

AS.389.501. Independent Study- Museums & Society. 3.00 Credits.
Instructor(s): E. Rodini.

AS.389.502. Independent Study- Museum and Society. 1.00 - 3.00 Credits.
Instructor(s): E. Rodini; J. Kingsley.

AS.389.511. Museum & Society Internship. 1.00 Credit.
Instructor(s): E. Rodini.

AS.389.512. Museum & Society Internship. 0.00 - 3.00 Credits.
Instructor(s): J. Kingsley.

AS.389.521. Capstone in Museums and Society. 1.00 - 3.00 Credits.
The Capstone allows students to develop and carry out their own, hands-on research project in a museum, collection, archive, or other living resource. Final projects must involve some form of public presentation (exhibition, lecture, poster, web-based, etc.) and a work of self-reflection (journal, brief paper, blog, or other). Projects must be approved and overseen by a supervising faculty member and approved by the Program's Director, in keeping with the University's Independent Work Policy. Instructor permission required.
Instructor(s): E. Rodini; J. Kingsley.

AS.389.522. Capstone in Museum and Society. 1.00 - 3.00 Credits.
The Capstone allows students to develop and carry out their own, hands-on research project in a museum, collection, archive, or other living resource. Final projects must involve some form of public presentation (exhibition, poster, web-based, etc.) and a work of self-reflection (journal, brief paper, blog, or other). Projects must be approved and overseen by a supervising faculty member and approved by the Program's Director, in keeping with the University's Independent Work Policy. Prerequisites: AS.389.201; Prereq or coreq AS.389.202
Instructor(s): E. Rodini; J. Kingsley.

AS.389.594. Independent Study. 0.00 - 3.00 Credits.

AS.389.599. Museum & Society Internship. 1.00 Credit.
Instructor(s): E. Rodini; J. Kingsley.

AS.389.650. Readings in Material Culture.
Objects, things, stuff: this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

Cross Listed Courses

History of Art

AS.010.221. Shopping for Status: Patronage & Collecting at the Early Modern European Court. 3.00 Credits.
At the early modern European princely court, wonders of art (ancient sculptures, priceless tapestries, masterpieces of oil on canvas) were displayed alongside wonders of religion, science, and nature (saintly relics, astronomical devices, unicorn horns). Through the study of courtly patronage and collecting practices, this seminar will examine the court as both a locus of power and a social organism. Students will explore the way players at court staged strategic and social exchange through the circulation, organization, display and concealment of art and artifacts to powerful ends.
Instructor(s): R. Teresi
Area: Humanities.

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas. 3.00 Credits.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the “global South.” This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of “global modernism.”
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.307. Diplomats, Dealers, and Diggers: The Birth of Archaeology and the Rise of Collecting from the 19th c. to Today. 3.00 Credits.
The development of archaeology in the Middle East – its history of explorers, diplomats, missionaries and gentlemen-scholars – profoundly shaped the modern world, from the creation of new museums and the antiquities market to international relations and terrorism.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.334. Problems in Ancient American Art. 3.00 Credits.
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS and Program in Museum and Society
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.382. The Politics of Display in South Asia. 3.00 Credits.
Through examining collecting, patronage, colonial exhibitions, and museums, this course examines how South Asia has been constructed in practices of display. Themes: politics of representation, spectacle, ethnography, and economies of desire related to colonialism and the rise of modernity. Cross-list with Anthropology, Museums and Society and Political Science.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.
AS.010.424. Collecting Roman Art: From Antiquity to Present. 3.00 Credits.
A survey of the most important collections of Greek and Roman sculpture, from the late-Republican age through the Middle Ages and the Renaissance, until the creation of the main museums in Europe and in the United States.
Instructor(s): P. Tucci
Area: Humanities.

Classics
AS.040.119. The World of Pompeii. 3.00 Credits.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.

AS.040.137. Freshman Seminar: Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum. 3.00 Credits.
This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions. 3.00 Credits.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities

Anthropology
AS.070.103. Community Based Learning - Africa & The Museum. 3.00 Credits.
An introduction to Africa, artistic creativity, collection and exhibition: as African history, as anthropology of art and objects, and as public controversy in our national institutions. Works with the Baltimore Museum of Art. Cross-listed with Africana Studies and Programs in Museums and Society.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.287. Displaying Race. 3.00 Credits.
Through hands-on archival and museum research, students in this class will develop a proposal for displaying a small collection of plaster busts that were cast in the late 19th century from live indigenous subjects. Readings from the class will explore the ethical, legal and political issues surrounding the public display of anthropological and historical artifacts that were collected as part of now discredited regimes of racial classification. How can displays be used to reveal the distance that separates 19th century racial thought from our modern day understandings of physical and cultural difference? How can we responsibly display likenesses that may have been collected under coercive conditions? How can such objects be used to educate people about the place of indigenous peoples in the museum? What laws and ethical conventions govern the display of such objects? In addition to regular class meetings, students will be expected to carry out archival research and interviews in local archives and museums.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

History
AS.100.249. Baltimore as Historical Site. 3.00 Credits.
The city of Baltimore will serve as a laboratory in which to study American History. We will explore the urban landscape on foot as well as through written sources.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.470. Monuments and Memory In Asian History. 3.00 Credits.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Near Eastern Studies
AS.130.251. Made for the Gods: Votive Egyptian Objects in the Archaeological Museum. 3.00 Credits.
This course investigates Egyptian votive objects made as gifts to the Gods. Students will learn about Egyptian religious practices and study groups of objects in the Archaeological Museum to learn to identify how they were produced, when, and for what functions. Physical analyses of the objects will be part of the class and facilitated by museum staff.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.334. Egyptian Funerary Arts in the Archaeological Museum. 3.00 Credits.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum's website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan; S. Balachandran
Area: Humanities.
AS.133.706. Egyptian Funerary Arts in the Archaeological Museum.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum's website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan.

History of Science Technology
AS.140.123. Johns Hopkins: The Idea of a University. 3.00 Credits.
Who was Ira Remsen and why is he interred in the building bearing his name? Was the School of Medicine’s best surgeon really a life-long drug addict? This freshman seminar will explore the history of our university since its founding in 1876, including its schools of medicine, public health, nursing, the Applied Physics Laboratory and SAIS. We’ll look carefully at the archives and develop a thematic class exhibit. Research and writing intensive.
Instructor(s): S. Leslie
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.140.320. Modernity on Display: Technology and Ideology in the Era of World War II. 3.00 Credits.
Seminar focuses on ideological at World's Fairs over technological modernity with special emphasis upon World War II and the Cold War.
Instructor(s): A. Molella; R. Kargon
Area: Humanities, Social and Behavioral Sciences.

German Romance Languages Literatures

AS Writing Seminars Courses
AS.220.101. Mini-Term: Narrative Medicine. 1.00 Credit.
The course will introduce students to the role of storytelling in medicine through a variety of essays, short stories and documentaries, from Susan Sontag's Illness as Metaphor to Atul Gawande's Complications to Terry Wrong's Hopkins. In addition to studying these narratives, students will produce their own written works and meet guest writers from the local medical community. Throughout, the course will provide students with valuable practice in critical analysis and reasoning, skills that are tested on entrance exams such as the MCAT.
Instructor(s): E. Parker
Area: Humanities.
AS.220.105. Fiction/Poetry Writing I. 3.00 Credits.
A course in realist fiction and traditional verse, with readings in Eudora Welty, Vladimir Nabakov, Henry James, Robert Frost, Paul Fussell, John Gardner, Seamus Heane, and Gwendolyn Brooks. This first course for writers is a study of forms of short fiction and metered verse. Students compose short stories and poems; includes practice of critical attention to literary models and workshop of student writing. This course is a prerequisite for most upper level courses. This course is part one of the year-long Introduction to Fiction and Poetry, and must be taken before AS.220.106.
Instructor(s): Staff
Area: Humanities
Writing Intensive.
AS.220.106. Fiction/Poetry Writing II. 3.00 Credits.
The second half of IFP, a course in counter-traditional antirealist fiction and free verse (Emily Dickinson, Virginia Woolf, Elizabeth Bishop, Franz Kafka, Italo Calvino, and William Carlos Williams). This course is a prerequisite for most upper level courses.
Prerequisites: AS.220.105
Instructor(s): Staff
Area: Humanities
Writing Intensive.
AS.220.108. Introduction to Fiction & Nonfiction. 3.00 Credits.
A course in realist fiction and nonfiction, with readings by Eudora Welty, Vladimir Nabokov, Henry James; George Orwell, Beryl Markham and Truman Capote. Students compose short stories and essays with attention to literary models. AS.220.105 can be substituted for AS.220.108.
Instructor(s): J. Cavanaugh-Simpson
Area: Humanities
Writing Intensive.
AS.220.138. Make 'Em Laugh. 3.00 Credits.
The quickest way to kill a joke is to explain it. So how do we learn to be funny? In this class, we'll explore techniques in humor writing. Whether poking holes in accepted absurdities or helping us laugh at death, humor makes us smile and think. Each week, we’ll focus on a different type of humor—dark comedy, satire, etc.—through stories, nonfiction, criticism, and author interviews. Students will write imitations and original work.
Instructor(s): G. Kirby
Area: Humanities
Writing Intensive.
AS.220.142. Seriously Funny: Writing Humor Poetry. 3.00 Credits.
This course will examine both light verse and how humor can enrich serious subjects in poetry. We will explore many subjects, from bad love to aesthetic experiences. Principal readings will range from classic exemplars such as Shakespeare, Dryden, and Eliot to selections from American poets since 1950, as represented in the anthology Seriously Funny: Poems about Love, Death, Religion, Art, Politics, Sex, and Everything Else. Students will be required to write several seriously funny poems of their own. Fun is mandatory.
Instructor(s): S. Greer
Area: Humanities.
AS.220.146. Introduction to Science Writing. 3.00 Credits.
Science writing is science written in plain English and told as a story. Students research, write, edit others, rewrite. They also analyze published stories for structure, substance, accessibility, and clarity.
Area: Humanities
Writing Intensive.
AS.220.148. Portraits of the Artists: Writing Self in Fiction. 3.00 Credits.
Flannery O’Connor once said “Anybody who has survived his childhood has enough information about life to last him the rest of his days.” Fiction is a carefully hewn combination of memory and imagination, and while it is impossible to know how much of the literary canon is sourced in autobiography, the truism holds firm: people write what they know. In this course, we will focus on modern and contemporary autobiographical fiction, looking closely at source, creative process, craft, and style, in order to answer the essential question, How does a writer successfully roll fact into fiction? Students will complete writing activities and participate in discussions and workshops. They will produce either an autobiographical story, or the first chapter of a longer work. Novels: Portrait of the Artist as a Young Man, Joyce; The Bell Jar, Plath; The Lover, Duras. Stories by Hemingway, Updike, Munro, O’Brien, Casey.
Instructor(s): J. Slovak
Area: Humanities.

AS.220.150. Steal This Book. 3.00 Credits.
From Spike Lee to The Clash, art can wield immense influence on our worldview. This class will explore the intersection of social critique and American literature. Class texts will also include a range of pertinent films, documentaries, and popular music. We'll examine the social utility of art and how artists use their craft to make a statement. Class work includes Blackboard posts on current events, weekly creative writing assignments, and a final portfolio of creative work.
Instructor(s): J. Takacs
Area: Humanities
Writing Intensive.

AS.220.152. Words of Light: Poetry and Photography. 3.00 Credits.
This course examines the role of lyric poetry in a media culture that has become obsessed with photographs. In a world where everyone with a cell phone is a photographer — and every literate person a writer — how do we create valuable work? We will pair genres of photography and lyric poetry in discussion — landscape photos and poems of place, for example — and view each through the other. Students will read a body of poetry and criticism (prose by Walter Benjamin, Susan Sontag, Penelope Pelizzon, Roland Barthes, et al.). In addition to bringing worthwhile comments on the readings to each class, students will submit one original poem and one original photo each week for credit.* Prerequisites: Each student is required to have a device capable of taking digital photos. Cell phones are fine.
Instructor(s): S. Greer
Area: Humanities
Writing Intensive.

AS.220.162. Writing for Children: The Tales We Can’t Seem to Forget. 1.00 Credit.
In this summer mini-course, students will use canonical works of children’s literature to inspire their own stories and verses, which they will read aloud and discuss in a workshop setting. We will focus on the uses and reuses of fairy and folk tales — from early works compiled by the Brothers Grimm and Charles Perrault to fantasies from the Victorian era by Mary de Morgan and Oscar Wilde. We will end with contemporary reimaginings by Roald Dahl, Neil Gaiman, Angela Carter and Lauren Child. Class will include discussion of illustration, recent trends in children’s literature, and the publishing process. Course instructor Sarah Smith is the former Children’s Book editor at the New York Times Book Review.
Instructor(s): S. Smith
Area: Humanities.

AS.220.165. Writing Unreality: Fantastical Fiction. 3.00 Credits.
While fiction is by definition not “real,” some modes of fiction present deliberate departures from the world as we know it. This class will examine fantastical and non-realist writing, including surreal and magic realist stories, as well as works with fairy-tale and folklore influences, and stories with elements of the uncanny or supernatural. Students will read and discuss representative fiction, complete weekly creative assignments, and participate in workshop of a final, full-length piece.
Instructor(s): S. Robinson
Area: Humanities.

AS.220.167. Serious Nonsense: Light & Comic Poetry. 1.00 Credit.
This course will provide a guided tour of some of the funniest poems ever written in English. Genres covered will include light verse, satire, parody, absurdism (“nonsense”), and others. We'll explore the serious side of comic poetry and vice versa. Students will have the opportunity to write their own comic verse in the genres discussed.
Instructor(s): A. Allen
Area: Humanities.

AS.220.180. Special Opportunities in Undergraduate Learning: Metaphor and Poetry. 1.00 Credit.
We all use figurative language, such as metaphor, simile, and irony. But what does it mean for language to be figurative, and how does this affect its meaning? This course will approach these questions from the angle of poetry. We'll ask further questions like: how do some poets use metaphor differently from others? What does Shakespeare mean when he says “my love is as a fever”? We'll read passages from different critics on metaphor, including several from Lakoff and Turner’s More Than Cool Reason: A Field Guide to Poetic Metaphor and Denis Donoghue’s Metaphor. Students will write poems with specific metaphorical requirements; they'll learn to use conceits (metaphors that govern an entire poem); they'll learn to use conventional metaphors; most importantly, they'll learn to think critically about why certain metaphors work and certain ones don't.
Instructor(s): J. Frantz.

AS.220.195. Fitzgerald’s Short Stories. 3.00 Credits.
An examination of F. Scott Fitzgerald’s major short stories in the 1920s and 1930s. We'll analyze Fitzgerald’s commitment to exploring the tension between two opposing intellectual movements: literary naturalism (which championed the primacy of environmental determinism) and literary realism (which championed the primacy of free will). We'll trace Fitzgerald's mercurial loyalty to each movement: his abandonment of one school of thought for the other, from one year to the next. In May Day he even embraced both movements equally—testimony to his belief that the test of a first-rate intelligence is the ability to hold two opposed ideas in mind at the same time and still retain the ability to function. Did Fitzgerald ultimately advocate one school of thought over the other? Or, did he intend simply to stage the debate between them?
Instructor(s): J. Rockefeller V
Area: Humanities
Writing Intensive.
AS.220.200. Introduction to Fiction. 3.00 Credits.
Study in the reading and writing of short narrative with focus on basic
technique: subject, narrative voice, character, sense of an ending, etc.
Students will write weekly sketches, present story analyses in class,
and workshop one finished story. Selected parallel readings from such
models of the form as Henry James, Anton Chekov, James Joyce, John
Cheever, Alice Munro, and others. Permission Required. (Formerly
AS.220.191.)
Prerequisites: AS.220.105 AND AS.220.106
Instructor(s): K. Noel; M. Klam; T. Davies
Area: Humanities.

AS.220.201. Introduction to Poetry. 3.00 Credits.
A study of the fundamentals and strategies of poetry writing. This course
combines analysis and discussion of traditional models of poetry with
workshop critiques of student poems and student conferences with the
instructor. (Formerly AS.220.141)
Prerequisites: AS.220.105 AND AS.220.106
Instructor(s): A. Allen; G. Williamson
Area: Humanities.

AS.220.202. Introduction to Non-Fiction: Matters of Fact. 3.00 Credits.
A first course in nonfiction writing, emphasizing how facts can be woven
into narrative forms to portray verifiable, rather than imagined, people
and events. Students read and discuss model works, then write frequent
papers to refine their own style. (Formerly AS.220.145.)
Instructor(s): W. Biddle
Area: Humanities
Writing Intensive.

AS.220.204. Introduction to Dramatic Writing: Film. 3.00 Credits.
Screenwriting workshop. This course will look at the screenplay as both
a literary text and blueprint for production. Several classic screenplays
will be analyzed. Students will then embark on their own scripts. We
will intensively focus on character development, creating believable
cinematic dialogue, plot development, conflict, pacing, dramatic
foreshadowing, the element of surprise, text and subtext, and visual story-
telling. Several classic films will be analyzed and discussed (PSYCHO,
CHINATOWN, BLADE RUNNER). Students will learn professional
screenplay format and write an 8-12 page screenplay that will be read in
class and critiqued.
Instructor(s): M. Lapadula
Area: Humanities
Writing Intensive.

AS.220.206. Writing about Science I: Daily News Journalism. 3.00
Credits.
This course is designed to teach students the skills of daily news
reporting, with a focus on covering science news. Students will learn how
turn scientific discoveries into lively and engaging prose for the general
public, interview sources, and pitch stories to news organizations. The
skills taught are applicable to all areas of journalism, not just science
journalism. Please note that a brief writing test is required for this course
(this may be waived for Writing Seminars students). To schedule this test,
please contact the instructor at dgrimm5@jhu.edu.
Instructor(s): D. Grimm
Area: Humanities
Writing Intensive.

AS.220.209. Poetic Symbols: Past and Future. 3.00 Credits.
Poetic Symbols: Past and Future. In this course we will trace the lineages
of familiar poetic symbols, or tropes, that have occurred centrally and
with regularity in literary history. We will investigate how they evolve with
time and reveal changing styles and sensibilities from author to author
and age to age. That’s the past. The future is the next poem you will
write as the assignment for each of the symbols we read. Recommended
Course background: AS.220.105
Instructor(s): G. Williamson
Area: Humanities.

3.00 Credits.
Using the political and economic milieu of science and technology
as a context for our writing, we will study how social factors such as
government, money, secrecy, and ethics affect the conduct and public
presentation of scientific and medical research. Controversies from
20th century history as well as current events will be discussed. Writing
assignments to satisfy the W requirement will consist of short papers
derived from classroom topics.
Instructor(s): W. Biddle
Area: Humanities
Writing Intensive.

AS.220.211. Journalism for Writers. 3.00 Credits.
Learn reporting through analysis of famous and infamous work by
contemporary journalists such as Janet Malcolm, Michael Finkel, Sarah
Corbett and Seymour Hersch. Students will use readings to understand
concepts central to news and feature writing, including libel, fair use,
balanced reporting, and appropriate sourcing. They will then head out to
find and write their own stories about local issues using best practices
learned in class. Sarah Harrison Smith is a former managing editor of the
Instructor(s): S. Smith
Area: Humanities
Writing Intensive.

AS.220.212. Line and Lineage: A Survey of Poetry Writing. 3.00 Credits.
In this lecture-based course, students will build their knowledge of the
history of poetry writing in English through a chronological exploration of
the poetic line. This course will serve as a foundation for future studies in
the writing and reading of poetry. It is highly recommended that students
take this course in their sophomore year, followed by Jean McGarry’s
Survey of Fiction Writing course in Spring 2017. Writing Seminars Majors
Only
Prerequisites: AS.220.105 AND AS.220.106
Area: Humanities.

AS.220.213. Fiction Survey: Once Upon a Time. 3.00 Credits.
A review of the origins and development of the realist short story from
fable, fairy tale, saint’s life, Bible story, through versions created in the
Renaissance and classic (19th and 20th century) periods, to modern
narratives. Writing Seminars majors only.
Prerequisites: AS.220.105 AND AS.220.106
Instructor(s): J. McGarry
Area: Humanities.
AS.220.309. Writing Healthy Baltimore. 3.00 Credits.
Students will explore public health issues in Baltimore and then write about them first in short pieces, and then in longer, polished works. The framework will be the mayor’s Healthy Baltimore 2015 initiative—launched in 2011 to address the city’s top-10 public health problems, including obesity, smoking, drug and alcohol abuse, STDs, cancer, and environmental health hazards. Students will study the initiative and its historical context; examine data sets; explore where and how the initiative intersects with public health practitioners and advocacy groups at the neighborhood level; and write what they learn in different formats, including essays, breaking news, and substance analysis. Students will then “workshop” each other’s papers.
Instructor(s): K. Masterson
Area: Humanities
Writing Intensive.

AS.220.310. Intermediate Fiction: Nature Writing. 3.00 Credits.
Our central text will be Thoreau’s Walden. Most of our readings will be American, though we will read excerpts from Lucretius and Darwin. We will examine various ways in which the natural world has been depicted in nonfiction, fiction, and poetry. Students will write critical papers on nature writers as well as to do creative nature writing of their own. Our authors may include: Emerson, Rachel Carson, Loren Eiseley, John Updike, Robert Frost, Donald Culross Peattie.
Instructor(s): B. Leithauser
Area: Humanities
Writing Intensive.

AS.220.311. Intermediate Fiction: Point of View. 3.00 Credits.
A consideration of not just the obvious point-of-view choices writers face—first person or third? one perspective or many?—but also questions of reliability and distance. Reading may include Chekhov, Faulkner, Nabokov, Munro, Diaz, and others. Students will write and workshop their own short stories.
Instructor(s): R. Puchner
Area: Humanities
Writing Intensive.

AS.220.312. Intermediate Fiction: Detail and Description. 3.00 Credits.
An intermediate workshop focusing on the question of how to make fictional worlds feel real. We’ll read 19th, 20th, and 21st century short fiction by authors such as Anton Chekhov, Jhumpa Lahiri, Junot Diaz, and Alice Munro, focusing particularly on how authors make the lives on the page feel three-dimensional. Students will write stories and exercises, including exercises that involve exploring Baltimore in order to observe and write about the city in which we live. Recommend Course Background: Students need to have completed a 200-level Writing Seminars course.
Prerequisites: AS.220.105 AND AS.220.106
Instructor(s): K. Noel
Area: Humanities.

AS.220.313. Writing about the Arts. 3.00 Credits.
Learn the practice of arts journalism, from reviewing to conducting interviews and writing profiles. In class, students will study the work of some of the best writers in this field, pitch story ideas, report and write, and then discuss their pieces in a workshop setting. Instruction will include journalistic ethics, plagiarism, libel law, and use of social media. Students can expect class visits from established journalists. Writing Seminars Majors only
Instructor(s): S. Smith
Area: Humanities.

AS.220.315. Intermediate Poetry: Sound Effects. 3.00 Credits.
This course explores the crucial role sound plays in the power of poetry, from early roots in oral traditions to contemporary contexts. Through readings, discussion, academic reflection, and creative exercises, participants will explore a range of sound techniques in their own poems and in the poems of others.
Instructor(s): D. Malech
Area: Humanities.

AS.220.316. Seminar: Opinion Writing. 3.00 Credits.
The study of exposition and argument in literary prose, with exposure to journalistic practices. Instructor will assign topics on which students write essays and subsequently discuss in class and critique for style, grammar, coherence, and effectiveness. Permission required.
Instructor(s): G. Kane; J. Cavanaugh-Simpson
Area: Humanities
Writing Intensive.

AS.220.317. Writing about Science II. 3.00 Credits.
Skills taught will include how to construct a long-form narrative, how to create profiles, and how to maintain reader interest throughout. Class speakers will include award-winning science journalists from New York to DC, who will share the secrets of their craft. The primary writing assignment will be a 3,000-word feature piece that is pitched, reported, and workshopped throughout the course of the class. Writing About Science (formerly Becoming a Science Journalist) is recommended as a prerequisite for this course. Students who have not taken this course will need to complete a short writing test and obtain the permission of the instructor to enroll.
Instructor(s): D. Grimm
Area: Humanities
Writing Intensive.

AS.220.318. Intermediate Fiction: Voice. 3.00 Credits.
This workshop will focus intensely on student writing, and on reading stories with a strong narrative voice, the kinds of stories in which the reader can hear the narrator speaking, where the voice gets stuck in the reader’s mind, where the story feels like an invasion of the narrator’s private thoughts, or is a retelling of the tale for some invisible public, or is the quiet, clear prose of a diarist, journaling into the void.
Instructor(s): M. Klam
Area: Humanities.

AS.220.324. Intermediate Fiction: Landscape & Setting. 3.00 Credits.
An intermediate fiction workshop focusing on the question of place. We’ll read 19th, 20th, and 21st century short fiction (including some set in Baltimore) in which setting strongly affects plot. While we’ll talk about each story holistically, we’ll also spend time discussing how authors make the physical world feel three-dimensional, and how place can lean on—even change—what happens in a story. Students will write stories and exercises, including exercises that involve exploring Baltimore in order to observe and write about the city in which we live.
Instructor(s): K. Noel
Area: Humanities.

AS.220.325. Intermediate Fiction: Story and Plot. 3.00 Credits.
The study of plot, with questions, both practical and theoretical, inevitably raised by the short story form. Readings in Chekhov, James, O’Connor, Cheever, Joyce, and Hemingway.
Instructor(s): T. Davies
Area: Humanities.
AS.220.327. Intermediate Fiction: Characters. 3.00 Credits.
A study of fictional persons in works by Fitzgerald, Joyce, W.C. Williams, and Rilke. Students write sketches and compose at least one complete story.
Instructor(s): A. McDermott
Area: Humanities.

AS.220.329. Forming The Short Story. 3.00 Credits.
In the early 1800s popular writers began to compress novel-like narrations into much shorter forms. By the 1880s what we recognize today as the short story had emerged. In this course we will trace the development of the form from its earliest stirrings in the tales of ETA Hoffmann through the Russians Pushkin, Gogol, and Turgenev, to its apotheosis in the stories of Chekhov and Wharton. Critical responses will be creative, using short sketches to experiment with the techniques, some adopted others rejected, and constraints experienced by writers along the way.
Instructor(s): T. Davies
Area: Humanities
Writing Intensive.

AS.220.331. Intermediate Fiction: Forms of Fiction. 3.00 Credits.
A look at some non-realistic methods, in stories and novels, for dealing with the real world. Students will write one page exercises and short stories. Recommended Course Background: Students need to have completed a 200-level Writing Seminars class.
Prerequisites: Prereqs: AS.220.105 AND AS.220.106
Instructor(s): T. Davies
Area: Humanities

AS.220.334. Intermediate Fiction: Indexed Fiction. 3.00 Credits.
A course in fiction writing that utilizes a wiki environment. Students will write and maintain multiple fictional data sets, read and edit other students' work in the same, and coordinate and interlink their sets with the goal of creating a collaborative web-based fiction.
Prerequisites: AS.220.200
Instructor(s): T. Davies
Area: Humanities

AS.220.337. Intermediate Dramatic Writing: Film. 3.00 Credits.
An intensive workshop focusing on methodology: enhancing original characterization, plot development, conflict, story, pacing, dramatic foreshadowing, the element of surprise, text and subtext, act structure, and visual storytelling. Each student is expected to present sections of his/her screenplay-in-progress to the class for discussion. The screenplay Chinatown will be used as a basic text.
Instructor(s): R. Buso-garcia
Area: Humanities
Writing Intensive.

AS.220.339. Seminar: Science Stories. 3.00 Credits.
Science Stories is designed to teach students the skills of daily science news reporting and writing. Lectures will cover topics such as how to write news ledes, how to get great quotes, how to find stories, and how best to interact with researchers and outside experts. Every other week, scientists from local institutions will present their latest research to the class. Students ask questions and are given a week to write up a daily news story, which is workshopped during the following class. As a final project, students will be asked to find and write a daily news story on their own.
Prerequisites: AS.220.146 or 220.203 or permission of instructor
Instructor(s): D. Grimm
Area: Humanities
Writing Intensive.
AS.220.377. Intermediate Poetry: Poetic Forms. 3.00 Credits.
Poetic Forms I fulfills one of the Intermediate requirements for The Writing Seminars Major. It deals with rhyme, meter, traditional forms, and ad hoc forms of students’ own making. Whether you are a poet, novelist, song writer, science writer, or dramatist, this course will help you master lines and sentences even better. Departmental permission required.
Instructor(s): G. Williamson
Area: Humanities.

AS.220.378. Intermediate Poetry: Poetic Forms II. 3.00 Credits.
The course builds on the information and techniques encountered in Poetic Forms I, and uses them in reading and imitating a range of contemporary poets.
Instructor(s): G. Williamson
Area: Humanities.

AS.220.379. Intermediate Poetry: Performing Shakespeare. 3.00 Credits.
This course, which begins with careful textual study, offers students the opportunity to experience Shakespeare’s language as a spoken expression, marked by rhythm, sound, rhetoric, and emotion. By working with (and ultimately committing to memory) sonnets, speeches, and scenes, students will deepen their understanding of Shakespeare’s art, through performance and brief critical writings. Recommended Course Background: Need to have completed a 200-level Writing Seminars’ class.
Instructor(s): D. Yezzi
Area: Humanities.

AS.220.380. Intermediate Fiction: The Scene. 3.00 Credits.
Emphasis in writing scenes—the building blocks of fiction—units of action, units of dialogue. Readings will include the stories of Chekhov, Cheever, Hemingway, and Carver. Recommended Course Background: AS.220.200
Instructor(s): T. Davies
Area: Humanities.

AS.220.382. Intermediate Poetry: Narrative Strategies in Poetry Writing. 3.00 Credits.
Before a poem is anything else, it is the hint, implication, outline, or raw matter of a story, that fundamental human-making shape of expression. Story-writing is learned behavior and its alternative approaches are the makers of form and vision, of communication that is worth re-experiencing, or not. In this course we consider how poets have written narratives and how today’s poets continue to do so. We will read one book of poems by each of eight contemporary poets who will visit the class, including Pulitzer Prize winners Claudia Emerson and Stephen Dunn, and discuss narrative strategies with these poets. Students will then write a poem imitating each visitor and we will workshop the poems on next class meeting after the visit. There will also be short response papers and a final essay (or examination—the student’s choice).
Instructor(s): D. Smith
Area: Humanities.

AS.220.383. Intermediate Fiction: The 20th Century. 3.00 Credits.
We will look at modern American novellas. Authors will include: Henry James, Edith Wharton, Katherine Anne Porter, John Updike, Steven Milhauser, Truman Capote, Elizabeth Spencer. Frequent short writing assignments, to be discussed in workshop.
Instructor(s): B. Leithauser
Area: Humanities.

AS.220.377. Intermediate Poetry: Poetic Forms. 3.00 Credits.
The class will read and discuss classic autobiographical texts by Benjamin Franklin, Frederick Douglass, Henry Thoreau, Henry Adams, Gertrude Stein, Malcolm X, and others. Students will write and workshop their own life stories of substantial length.
Instructor(s): W. Biddle
Area: Humanities
Writing Intensive.

AS.220.385. Intermediate Nonfiction: Communicating Risk. 3.00 Credits.
Scientists, engineers and physicians create and define risks. The public perceives these risks and decides what is acceptable. We will study the psychology and politics of risk communication between experts and laymen.
Instructor(s): W. Biddle
Area: Humanities
Writing Intensive.

AS.220.387. Intermediate Poetry: The Poet as Observer. 3.00 Credits.
A workshop course with readings and writing assignments that emphasize the artistic value of the outward gaze. Students will keep a daily journal of observations, and over the semester will develop those observations into at least 10 new poems. Course readings will include work by Rainer Maria Rilke, Elizabeth Bishop, and Theodore Roethke. Permission Required.
Instructor(s): J. Arthur
Area: Humanities.

AS.220.389. Intermediate Poetry: The Dramatic Element. 3.00 Credits.
This course will explore the dramatic mode of poetry, from the plays of the Greeks and Shakespeare to the lyric poems of Hardy, Yeats, Frost, Brooks, Hecht, and others. Weekly writing assignments, suggested by the readings, will include character monologues, dialogue, conflict, and other aspects of the dramatic lyric. Student poems will be discussed in a workshop format.
Instructor(s): D. Yezzi
Area: Humanities.

AS.220.391. Performing Poetry & Fiction. 3.00 Credits.
Performing Fiction & Poetry: An Acting Workshop for Writers. This hands-on performance workshop, combining literary and theatrical practice, will look closely at what makes a performance or reading compelling, clear, and resonant. Through textual analysis, vocal technique, and group discussion, students will create a pliant and powerful reading style to best serve their work. The course includes regular writing assignments in poetry and fiction and weekly performance and group discussion.
Instructor(s): D. Yezzi
Writing Intensive.

AS.220.392. Intermediate Poetry: Tall Tales and Short on Narrative Poetry. 3.00 Credits.
Tall Tales and Short: On Narrative Poetry. Many of the most resonant and influential stories in history have been told in verse—The Iliad, The Aeneid, Beowulf, The Divine Comedy, The Prelude. This course will examine narrative poems—from Homer to the present, both long and short—with an eye toward how they function formally and generically. Students will adapt an array age-old storytelling techniques for their own poems. There will be weekly writing assignments in poetry and group discussion of student writing.
Instructor(s): D. Yezzi
Area: Humanities
Writing Intensive.
AS.220.393. Intermediate Poetry: Poets in Conversation. 3.00 Credits.
An exploration of poetic process as ongoing discourse within and across generations. Readings, writing assignments, and in-class workshop of student poems will encourage and enable course participants to join the conversation themselves.
Instructor(s): D. Malech
Area: Humanities
Writing Intensive.

AS.220.397. Intermediate Poetry: The Lyric. 3.00 Credits.
What is a lyric poem in the 21st Century? What causes such a thing? What does it sound like? What is it good for? Who writes them? We will. By reading lyric poems written over the last 500 years in English, and by writing our own original work we will find some answers to these questions. This class will have a special emphasis on Free Verse and the particular challenges and joys of such a poem. This workshop aims to generate new work and to cultivate skills necessary for a writer.
Permission Required.
Instructor(s): S. Scafidi
Area: Humanities.

AS.220.399. Intermediate Poetry: Playwriting for Poets: Suiting the Action. 3.00 Credits.
Many of the finest modern and contemporary poets were also groundbreaking dramatists, including Goethe, Yeats, Eliot, Millay, Cummings, Brecht, and Walcott. Taking these writers' poetic dramas as models, students will explore the elements of playwriting - plot, character, rhythm, etc. - in order to create original dramatic works. Speeches, scenes, and short plays will be read aloud in class and considered in a workshop setting.
Instructor(s): D. Yezzi
Area: Humanities
Writing Intensive.

AS.220.400. Advanced Poetry Workshop. 3.00 Credits.
The capstone course in poetry writing. Consideration of various poetic models in discussion, some assigned writing, primarily workshop of student poems. Students will usually complete a collection poems.
(Formerly AS.220.396.)
Prerequisites: AS.220.201
Instructor(s): M. Salter
Area: Humanities.

AS.220.401. Advanced Fiction Workshop. 3.00 Credits.
The capstone course in fiction writing, primarily devoted to workshop of student stories. Some assignments, some discussion of literary models, two or three completed student stories with revisions. Completion of Intermediate Fiction is required for admission. (Formerly AS.220.355)
Prerequisites: AS.220.200
Instructor(s): M. Klam; R. Puchner
Area: Humanities.

AS.220.403. Readings in Poetry: The Branch Will Not Break. 3.00 Credits.
Readings in Contemporary Poetry. Confession, place, myth and image are the four compass points of American poetry best embodied in the work of James Wright. With the work of Wright at the center of the compass, we will read the Selected Poems of four major living poets and discover how these directions and forces play out over the course of a career.
Permission required.
Instructor(s): S. Scafidi
Area: Humanities.

AS.220.406. Readings in Fiction: Hard-Boiled Fiction and Film Noir. 3.00 Credits.
Students read six novels by Hammett, Chandler, Cain, Burnett, and Woolrich and view seven films made from these novels by Huston, Hawks, Wilder, Dmytryk, Richards, Walsh, and Farrow. Cross-listed with Film and Media Studies.
Instructor(s): J. Irwin
Area: Humanities
Writing Intensive.

AS.220.409. Readings in Fiction: Faulkner, Fitzgerald, & Hemingway. 3.00 Credits.
An examination of the fiction of three American modernist masters in the context of the early 20th century movement in the verbal and visual arts.
Not a workshop course.
Instructor(s): J. Irwin
Area: Humanities.

AS.220.410. Readings in Poetry: Four Women Poets. 3.00 Credits.
A study of technique and strategy in the poetry of Emily Dickinson, Marianne Moore, Elizabeth Bishop, and Amy Clampitt. Not a workshop course.
Instructor(s): M. Salter
Area: Humanities.

AS.220.411. Readings in Poetry: Sex & Death in Contemporary American Poetry. 3.00 Credits.
Between sex and death the body has a varied wild life in American poetry. In a survey of contemporary work this seminar will consider the life of the body, its relationship to the imagination and the kaleidoscopic world of the senses. Reading erotic poems, elegies, poems of sickness and health, and of age and youth, we will find an intimate politics of the body. Students will read and respond critically to American poems written over the last forty years.
Instructor(s): S. Scafidi
Area: Humanities.

AS.220.412. Readings in Poetry: Eliot, Crane & Stevens. 3.00 Credits.
An examination of the poetry of Eliot, Crane and Stevens in the context of the modernist movement in the verbal and visual arts.
Not a workshop course. Juniors and seniors majors are given preference.
Instructor(s): J. Irwin
Area: Humanities.

AS.220.416. Readings in Fiction: Five from the Fifties. 3.00 Credits.
We will examine five American writers who were emerging or thriving in the middle of the 20th century: John Cheever, Flannery O'Connor, Peter Taylor, John Updike, and Vladimir Nabokov. We will read short stories by all five, as well as the following novels: O'Connor's Wise Blood, Updike's Of the Farm, Nabokov's Lolita and Pale Fire.
Instructor(s): B. Leithauser
Area: Humanities
Writing Intensive.

AS.220.417. Advanced Nonfiction Workshop. 3.00 Credits.
Classes will be devoted to writing and collective editing of factual work of significant length and ambition, including essays, journalistic reports, histories, and biographies. Instructor permission required.
Instructor(s): W. Biddle
Area: Humanities
Writing Intensive.
AS.220.418. Readings in Fiction: The Novella. 3.00 Credits.
Registration Restrictions: Permission required. Twentieth-century novellas, with a new author and book each week. The course asks: What can and has been accomplished by American fiction writers in fewer than 150 pages?
Instructor(s): B. Leithauser
Area: Humanities
Writing Intensive.

AS.220.420. Readings in Contemporary Fiction: Coetzee, Delillo, Freudenberg, Johnson. 3.00 Credits.
The central concern of this course is to read, study, think about, and discuss several novels and short story collections, paying special attention to the voice and structural techniques these authors have invented to create compelling works.
Instructor(s): M. Klam
Area: Humanities.

AS.220.422. Readings in Fiction: Women Behaving Badly!. 3.00 Credits.
This course will focus on fiction that centers around a profoundly flawed female protagonist, an antiheroine. Why is it that we love some of these women in spite of their wrongdoing? How do we connect to a character who is acting in ways that we would never hope to act? And how is it that bad behavior is often perceived as sexy? Are evil women any less or more evil than their male counterparts? Students will read 8 books with villainesses whose crimes range from poor parenting to serial killing. One final paper (10-20 pages) will be due at the end of the semester on a topic of the student’s choosing, relating to one or more of the protagonists from the reading list.
Instructor(s): J. Blau
Area: Humanities.

AS.220.423. Readings in Fiction: Castaways in Literature. 3.00 Credits.
Our primary text will be Defoe’s Robinson Crusoe. We will read spin-offs of Robinson Crusoe (Muriel Spark’s Robinson, J. M. Coetzee’s Foe, Elizabeth Bishop’s Crusoe in England) as well as Golding’s Lord of the Flies and Sylvia Townsend Warner’s Mr. Fortune’s Maggot. Selections from Homer, Swift, and Byron. We will conclude with Shakespeare’s The Tempest. (Leithauser)
Instructor(s): B. Leithauser
Area: Humanities.

AS.220.424. Science as Narrative. 3.00 Credits.
Class reads the writings of scientists to explore what their words would have meant to them and their readers. Discussion will focus on the shifting scientific/cultural context throughout history. Authors include Aristotle, Copernicus, Galileo, Descartes, Newton, Darwin, Freud, Einstein, Heisenberg, Bohr, Crick and Watson.
Instructor(s): R. Panek
Area: Humanities
Writing Intensive.

AS.220.425. Readings in Fiction: The Story Cycle. 3.00 Credits.
A study of the short story cycle as a literary form. Authors may include Joyce, Schulz, Anderson, Welty, Calvino, Munro, Erdrich, Diaz and others.
Instructor(s): R. Puchner
Area: Humanities.

AS.220.426. Readings in Poetry: Early Auden and his Contemporaries. 3.00 Credits.
A close study of the writing that Auden, Isherwood, Spender, and MacNeice produced during the 1930s against the backdrop of the Great Depression, the Spanish Civil War, and the rise of Nazism. This is not a workshop course, but students will have the opportunity to respond artistically as well as analytically to the course readings.
Instructor(s): J. Arthur.

AS.220.427. Readings in Fiction: The Novella. 3.00 Credits.
A study of the novella as a literary form. Authors may include Melville, Turgenev, Tolstoy, Chekhov, Kafka, James, Wharton, Baldwin, Porter, Rufo, Smiley, and others.
Instructor(s): B. Leithauser
Area: Humanities
Writing Intensive.

AS.220.428. Readings in Fiction: The Stories and Letters of Anton Chekhov. 3.00 Credits.
We will read the major long and short stories of Chekhov, along with selected letters written in the full course of his lifetime. Juniors and Seniors only.
Prerequisites: AS.220.105 AND AS.220.106 AND AS.220.200 AND 300 level Intermediate Fiction
Instructor(s): J. McGarry
Area: Humanities.

AS.220.429. Readings in Poetry: Poetry of Ireland Since 1900. 3.00 Credits.
A close study of twentieth- and twenty-first-century Irish poetry. Course readings will include work by W.B. Yeats, Austin Clarke, Michael Longley, Seamus Heaney, Eiléan Ní Chuilleanáin, Eavan Boland, Ciaran Carson, and others. This is not a workshop course, but students will have the opportunity to respond artistically as well as analytically to the course readings.
Instructor(s): J. Arthur
Area: Humanities.

AS.220.430. Readings in Poetry: Lives of the Poets. 3.00 Credits.
Lives of the Poets: Hecht, Merrill, Sexton, Plath. “The intellect of man is forced to choose / perfection of the life, or of the work,” wrote Yeats. This course examines important intersections between the life and the work in the poems and memoirs of four, biographically interconnected poets. Poems treating subjects of depression and mental illness (Hecht, Sexton, Plath), the terror of war (Hecht), the depredations of disease (Merrill), and suicide (Sexton, Plath), find their sources in these poets fascinating—and, to varying degrees, troubled—lives.
Instructor(s): D. Yezzi
Area: Humanities.

AS.220.431. Readings in Fiction: Origins of the Short Story. 3.00 Credits.
This course will trace the development of the short story beginning with its tentative emergence from the shadow of the novel, through the early commercial period triggered by the invention of inexpensive newpsrint, and to its full maturation at the turn of the 20th century. Works by E.T.A. Hoffmann, Heinrich Von Kleist, Alexander Pushkin, Nikolai Gogol, Ivan Turgenev, Guy de Maupassant, Henry James, Anton Chekhov, and Edith Wharton.
Instructor(s): T. Davies
Area: Humanities.
AS.220.432. Readings in Fiction: Innovators of the Short Story. 3.00 Credits.
In this class, we'll look at particularly influential writers who’ve had a lasting effect on the form of the short story, reshaping it through their own idiosyncratic vision. Authors may include Hawthorne, Kafka, Chekhov, Babel, Joyce, Borges, O’Connor, Welty, Barthelme, Paley, and Munro.
Instructor(s): R. Puchner
Area: Humanities.

AS.220.434. Readings in Poetry: The Mind in Motion: The Rhetoric of Poetry. 3.00 Credits.
This course examines how argument and formal thought shape poetry. Through class discussion about readings ranging from Donne to Dickinson to contemporary poets, and through critical and creative exercises, students will explore poems that reveal not only feeling and observation, but also the architecture of the analytical mind at work.
Instructor(s): D. Malech
Area: Humanities.

AS.220.435. Readings in Poetry: The Romance Tradition. 3.00 Credits.
A writer’s survey of the medieval romance and of the subsequent poetry that it inspired. Course readings will include Sir Gawain and the Green Knight, The Death of King Arthur, and romances by Chretien de Troyes, as well as poetry by Spenser, Tennyson, and Robert Browning. This is a workshop course, but students will have the opportunity to respond artistically as well as analytically to the course readings.
Instructor(s): J. Arthur
Area: Humanities.

AS.220.436. Readings in Fiction: A Writer's Journal. 3.00 Credits.
We will study the role journals play in the work of Virginia Woolf, Franz Kafka, Rainer Maria Rilke, and Anton Chekov. Readings include novels, stories, and diaries.
Instructor(s): J. McGarry
Area: Humanities.

AS.220.437. Creating the Poetry Chapbook. 3.00 Credits.
Students will build on previous work in the major by completing a project of sustained length, depth, and cohesion (25-35 pages) in their final semester. The course will include independent creative and critical work, peer review and discussion, and meetings with the instructor. Application only; Advanced Poetry prerequisite.
Prerequisites: AS.220.400
Instructor(s): J. Arthur
Area: Humanities.

AS.220.438. Readings in Poetry: Of Late: Poetry & Social Justice. 3.00 Credits.
In this Community-Based Learning course, students will explore poetry of social and political engagement in partnership with high-school age writers from Writers in Baltimore Schools. Participants will put learning into practice by organizing community conversation, reflection, and collaboration. Participation in some events outside of class time will be required.
Instructor(s): D. Malech
Area: Humanities.

AS.220.439. Readings in Fiction: Caribbean Voices. 3.00 Credits.
Caribbean history is reflected in the literature of emigration and collapse of empire. We’ll study novels by Naipaul, Rhys, and other 20th century authors.
Instructor(s): W. Biddle
Area: Humanities
Writing Intensive.

AS.220.441. Readings in Poetry: Shakespeare and Company. 3.00 Credits.
A study of some of Shakespeare’s sources and how he transformed them, and also how future generations transformed Shakespeare. Examples will include The Tempest and W.H. Auden’s multi-part poem in response, The Sea and the Mirror. Students will write their own creative responses to some of Shakespeare’s plays. Writing Seminars Majors only
Prerequisites: AS.220.105 AND AS.220.106 AND AS.220.201
Instructor(s): M. Salter
Area: Humanities.

AS.220.442. Readings in Fiction: Narrative Strategies of Jane Austen. 3.00 Credits.
We will read the major novels with the aim of detecting the chief patterns and devices the author uses to make the familiar and ubiquitous marriage plot suspenseful and gripping. Writing Seminars Majors only
Prerequisites: AS.220.105 AND AS.220.106 AND AS.220.200
Instructor(s): J. McGarry
Area: Humanities.

AS.220.443. Readings in Poetry: International Voices. 3.00 Credits.
International voices will combine the workshop of poems by students with a study of contemporary poems written by black British writers and British writers in dialect, African-American writers, Caribbean writers, and Indian and South African poets who are writing in English. The study of broad themes and subjects will be combined with a particular appreciation of linguistic and acoustic matters - which means among other things that time will be spent listening to and evaluating recordings of the poets concerned. Writing Seminars Majors Only
Prerequisites: AS.220.105 AND AS.220.106 AND AS.220.201
Instructor(s): A. Motion
Area: Humanities.

AS.220.444. Divided Loyalties: Translating Poetry. 3.00 Credits.
Translation is impossible” and “All is translation”: between these rival claims literary translating takes place. In this workshop course, students will translate a foreign-language poet of their choice and learn to place their approach to translating within the appropriate historical and theoretical contexts.
Prerequisites: AS.220.105 AND AS.220.106 AND AS.220.201
Instructor(s): C. Childers
Area: Humanities.

AS.220.445. Readings in Fiction: Novels about Journalism. 3.00 Credits.
Fiction writers writing about nonfiction writers: Miss Lonelyhearts, by Nathanael West; Bel Ami, by Guy de Maupassant; Psmith, Journalist, by P.G. Wodehouse; Scoop, by Evelyn Waugh; The Shipping News, by E. Annie Proulx.
Instructor(s): W. Biddle
Area: Humanities.
AS.220.446. Readings in Fiction: The Art of Fiction: the Novels of Henry James and Robert Louis Stevenson. 3.00 Credits.
Given the significant differences between their aims and styles as novelists - James the great investigator of the interior life, and Stevenson the equally great exponent of the adventure story - it’s somewhat surprising to find the two men were good friends who admired one another’s work. This course will use their friendship as a starting point to explore their novels in general, while paying particular attention to their narrative techniques; the novels under discussion will include Daisy Miller, Turn of the Screw, Portrait of a Lady, Treasure Island, Dr Jekyll and Mr Hyde, and Kidnapped. Students will also be asked to create original work that both responds to and takes off from their reading of these books.
Instructor(s): A. Motion
Area: Humanities.

AS.220.447. Theater and Social Concern. 3.00 Credits.
In this Community-Based Learning course, students will explore theatre and areas of social concern in partnership with high-school age writers from Writers in Baltimore Schools. Participants will put learning into practice by organizing community conversation, reflection, and collaboration. Participation in some events outside of class time will be required.
Instructor(s): D. Yezzi
Area: Humanities.

AS.220.448. Readings in Fiction: Hybrid Forms. 3.00 Credits.
We will read essays that have the texture and imagination of a short story; stories that are closer to poems, journalists who use the tools common to fiction, and novelists whose work straddles the line between autobiography and fiction. Our reading for the semester will be based around broad, thematic concerns. We will discuss the relationship between form and content, the ethics of narration, and ultimately, how we can apply the tools and techniques of the writers we’ve read to our own creative and critical writing. Students will be expected to write short, critical responses to the readings as well as generate a substantial body of creative text. At the end of the semester, students will submit a portfolio that includes one extended work of creative writing, along with a critical essay.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.220.449. Readings in Poetry: Exploring Baltimore Through Poetry. 3.00 Credits.
Students in this course will write poems based on an exploration of Baltimore itself: weekly assignments will require the students to get off campus, visit specific sites around town, and craft their observations into original poems. Course readings will include work by Baltimore authors past and present; other readings, drawn from further afield, will take up the question of what it means to explore a city. Writing Seminars majors only.
Prerequisites: AS.220.105 AND AS.220.106
Instructor(s): J. Arthur
Area: Humanities.

AS.220.501. Independent Study. 3.00 Credits.
Ordinarily no more than one independent study course may be counted among the eight Writing Seminars courses presented for graduation.

AS.220.502. Independent Study. 1.00 - 3.00 Credits.
Instructor(s): Staff.

AS.220.505. Writing Seminars Internship. 1.00 Credit.
Instructor(s): Staff.

AS.220.506. Writing Seminars Internship. 0.00 - 3.00 Credits.
Instructor(s): T. Davies.

AS.220.507. Honors Thesis. 3.00 Credits.
Permission Required.
Instructor(s): Staff.

AS.220.508. Honors Thesis. 0.00 - 3.00 Credits.
Department Permission Required.

AS.220.509. Practicing Journalism Internship. 1.00 Credit.
This internship is given in conjunction with local media and must be taken on a satisfactory/unsatisfactory basis. It covers many aspects of the operation of a metropolitan newspaper or magazine or TV station. Permission Required. Satisfactory/ Unsatisfactory only.
Instructor(s): M. Klam; T. Davies; W. Biddle.

AS.220.510. Practicing Journalism. 1.00 Credit.
Permission Required.

AS.220.513. Teaching Writing. 3.00 Credits.
Permission Required.
Instructor(s): D. Malech.

AS.220.592. Internship-Summer. 1.00 Credit.
Instructor(s): Staff.

AS.220.594. Practicing Journalism Internship. 1.00 Credit.
Instructor(s): D. Basford; J. Arthur; J. McGarry; T. Davies; W. Biddle.

AS.220.596. Teach Writing-Internship. 1.00 Credit.
Instructor(s): S. Dixon.

AS.220.598. Independent Study. 3.00 Credits.
Instructor(s): G. Blake; G. Williamson; J. McGarry; T. Davies.

The central concern of this course is to read, study, think about, and discuss several novels and short story collections, paying special attention to the voice and structural techniques these authors have invented to create compelling works. Restricted to Graduate Students.
Instructor(s): M. Klam
Area: Humanities.

We will examine a number of classic and contemporary coming-of-age novels. Students will compose their own: an original work of fiction that may well described as such.
Instructor(s): A. McDermott
Area: Humanities.

AS.220.610. Readings in Fiction: Alternatives to Realism.
Instructor(s): A. McDermott.

AS.220.613. Writing about Science.
A seminar in the writing of factual prose about scientific matters, whether for the general reader or for professional scientists as audience. Weekly writing, editing, and reading assignments. Permission required.
Instructor(s): A. Finkbeiner.

AS.220.614. Graduate - Science Workshop.
Intensive seminar, at a professional level, in writing factual prose about science for the general reader. Students find, research, and structure their own stories. Weekly writing, editing. Permission required.
Instructor(s): A. Finkbeiner.

AS.220.619. Graduate Poetic Forms I.
Instructor(s): M. Salter.
AS.220.623. Fiction Workshop.
Discussion and critique of fiction manuscripts by students enrolled in the M.F.A. program. Some assignments possible.
Instructor(s): R. Puchner.

AS.220.624. Graduate Fiction Workshop.
Discussion and critique of fiction manuscripts by students enrolled in the M.F.A. program. Some assignments possible.
Instructor(s): J. McGarry.

AS.220.625. Poetry Workshop.
Discussion and critique of poetry manuscripts by students enrolled in the M.F.A. program. Some assignments possible.
Instructor(s): D. Malech.

AS.220.626. Graduate Poetry Workshop.
Discussion and critique of poetry manuscripts by students enrolled in the M.F.A program. Some assignments possible.
Instructor(s): A. Motion.

A study of American poetry written after 1945 with discussion of aesthetic movements, events, historical and contextual, and the character of evolution and practices in poetic structures. Readings vary.
Instructor(s): D. Smith
Area: Humanities.

We will read all—or most—of Chekhov’s short stories, his notebook, as well as the letters that have been translated into English.
Instructor(s): J. McGarry.

A study of three major poets (English, Irish, American) who each introduced signature tones, techniques, and themes in modern poetry. Some other figures, such as Louise Bogan and the World War I poets, may be discussed.
Instructor(s): M. Salter.

AS.220.646. Graduate Readings in Fiction and Poetry.
A graduate course designed to develop both close reading and genre study, and to support the teaching of Introduction to Fiction and Poetry (IFP) I and II. Readings in selected works of American, English, and European poetry and short fiction. Course required by all graduate students in fiction and poetry.
Instructor(s): D. Yezzi; J. McGarry; M. Klam
Area: Humanities.

A practical study of prosody rooted in the formalist tradition and continuing into theories of free verse. Readings include essays by Ezra Pound, William Carlos Williams, T.S. Eliot, Charles Olson, and Denise Levertov. This is not a workshop course, but students will have the opportunity to respond artistically as well as analytically to the course readings. Graduate students only.
Instructor(s): J. Arthur
Area: Humanities.

AS.220.648. Forms: The Longer Poem as Anthology.
A study of form through three poets especially concerned with formal variety as a complement to, and manifestation of, theme and voice. Readings will include book-length works by George Herbert (The Temple); Auden (The Sea and the Mirror); Schnackenberg (The Throne of Labdacus).
Instructor(s): M. Salter
Area: Humanities.

This course focuses on three poets whose individual relationships with form, inspiration, and innovation continue to shed light on the poetic process.
Instructor(s): D. Malech
Area: Humanities.

Based on a close reading of major texts, this course will look at the ways in which Romantic and port-Romantic British poetry deals with the passage of time, how it creates elegiac structures, and how it records various kinds of loss: the loss of self, the loss of traditional consolations (especially in terms of the environment), and the threatened loss of poetry itself. Students will be encouraged to respond creatively, as well as critically. Restricted to graduate students in the M.F.A program.
Instructor(s): A. Motion
Area: Humanities.

AS.220.651. Readings in Fiction: Five from the Fifties.
We will examine five American writers who were emerging or thriving in the middle of the 20th century: John Cheever, Bernard Malamud, Vladimir Nabokov, Jean Stafford, John Updike. We will read short stories by all five, as well as the following novels: Malamud’s The Assistant, Nabokov’s Lolita and Pale Fire. Restricted to graduate students in the M.F.A program.
Instructor(s): B. Leithauser
Area: Humanities.

This course will look at the way poets have responded to the environment, from the early Romantic period to the present day. In the process, it will study and show how the role of the natural world in poetry has changed from being a cause for celebration and a mirror for self-scrutiny, into a way of continuing these things while also expressing anxiety about the effects of global warming any other dangers to the health of the planet. Poets included in the discussion will include Wordsworth, Clare, Hopkins, Frost, Auden, Hughes and Heaney.
Instructor(s): A. Motion
Area: Humanities.

Which books do writers often foist on other writers, telling them You have to read this? In this course, we’ll look at books that have yet to find much popular appeal, but which writers often speak about in reverential tones. Authors may include James Salter, Paula Fox, Dezso Kosztolanyi, J.L. Carr, Juan Rulfo, Tom Drury, Christina Stead, Evan S. Connell, Leonard Gardner, Joy Williams, and Penelope Fitzgerald.
Instructor(s): R. Puchner
Area: Humanities.

AS.220.654. Readings in Fiction: Rediscovered Masters.
Readings from modern novels and collections of short fiction which, however well received at time of publication, fell into subsequent eclipse before undergoing something of a revival. Many of the titles will be drawn from the series of New York Review of Books Classics.
Instructor(s): B. Leithauser
Area: Humanities.
A study of the interplay of the line and the sentence in poetry, with an emphasis on syntax. Some prose works will also be used for context. Poets employing syntax with great verve and precision, whether they obey or disrupt the rules, will be read in order to inform students' own stylistic choices.
Instructor(s): J. Arthur
Area: Humanities.

AS.220.656. Readings in Fiction: Doing Likewise: Imitation, Continuation, Updating, Upending.
In this course, we will look at stories and novels that take their inspiration from other authors, mostly Shakespeare. We'll consider both the old work and the new. Written assignments will require class members to do likewise.
Instructor(s): A. McDermott
Area: Humanities.

A study of major figures, including Dickinson, Moore, Bishop, Clampitt, Brooks, and others. The theme of place and displacement will be a focus.
Instructor(s): M. Saltz
Area: Humanities.

Translation is impossible" and "All is translation": between these rival claims literary translating takes place. In this workshop course, students will translate a foreign-language poet of their choice and learn to place their approach to translating within the appropriate historical and theoretical contexts. Writing Seminars majors only. Special Notes: Students should have reading knowledge of at least one foreign language.
Instructor(s): C. Childers
Area: Humanities.

AS.220.800. Independent Study.
Instructor(s): Staff.

Instructor(s): Staff.

Cross Listed Courses
Film and Media Studies

AS.061.205. Introduction to Dramatic Writing: Film. 3.00 Credits.
In this course we will explore the basic principles of visual storytelling in narrative film as they apply to the design and execution of a screenplay. During the course of the semester, each student will work on different writing exercises while they search for their specific story and the best way to approach it. We will study different narrative tools and methods of screenwriting by analyzing films to ascertain how they work or fail to do so at script level. Through in-class critiques, group discussions and one-on-one sessions, students will apply these techniques to their own work as they undergo the process of designing, breaking down, outlining and writing a screenplay for a short film. In-class analysis and debate on the strengths and challenges posed by the students' work will help shape the thematic emphasis of the second half of the course.
Instructor(s): R. Wolfson
Area: Humanities
Writing Intensive.

AS.061.371. Unrealities: The Fantastic in Film & Fiction. 3.00 Credits.
The fantastic, the absurd, the blackly comic in films by Cocteau, Hitchcock, and others; and in the short fiction of Barthelme, Cortazar, Hrabal, and others. Several short creative exercises and a longer final project.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.373. Intermediate Dramatic Writing: Film. 3.00 Credits.
This course will explore different approaches towards understanding the fabric of story as it pertains to film. Students will be exposed to key challenges in conceiving, structuring and executing a compelling, memorable and vibrant feature-length screenplay. By studying key examples, we will discuss possible solutions to these issues. In every class, students will share their work in progress and will help each other find approaches or solutions to their specific challenges and issues. We will analyze films with screenplays that effectively play with the form to create lasting, thought-provoking and affecting stories. Through in-class critiques, group discussions and one-on-one sessions, students will apply new tools and approaches to their own work as they undergo the process of designing, breaking down, outlining and writing a full step outline, a beat sheet and the first ten pages of a feature length screenplay. As the semester progresses, in-class analysis and debate on the strengths and challenges posed by the students' work will shape the thematic emphasis of each class.
Prerequisites: AS.220.204 OR AS.061.205 OR AS.061.270
Instructor(s): R. Buso-garcia
Area: Humanities
Writing Intensive.

AS.061.376. Arts and Culture Journalism: Interactive Media, Online Publishing. 3.00 Credits.
Students will participate in the ongoing creation of BmoreArt.com, an online arts and culture publication that serves the Baltimore community. In conjunction with visiting professionals, students will investigate the Baltimore cultural community and create different types of editorial content using interactive media including film, video, sound, and writing. Students will produce creative content utilizing their individual areas of expertise - such as visual art, art history, music, literary arts, film, and theater - while working together as a professional organization. A strong emphasis will be placed on the student's collaborative participation and creative experimentation. Students with differing backgrounds in media will approach this project from unique perspectives, which will be valued and cultivated. Students with previous experience in journalism are welcome. An introductory writing or film course is suggested as a prerequisite.
Instructor(s): C. Ober
Area: Humanities
Writing Intensive.

AS.061.404. Advanced Dramatic Writing: Film. 3.00 Credits.
Intensive workshop course where students will write both a first draft and a full revision of a feature length screenplay. Classes will be designed and centered on the specific challenges of the students' works-in-progress, with an emphasis on exploring and discussing different narrative approaches and solutions that will enhance their writing and revision processes. Select films will be screened and analyzed as they pertain to the students' scripts. Students will aim to have a polished draft of their screenplay to be submitted to industry-recognized screenwriting labs at the end of the semester.
Instructor(s): R. Buso-garcia
Writing Intensive.
Anthropology
AS.070.203. Healing: Politics and Poetics. 3.00 Credits.
Metaphors of health and illness; individual and social. The body in pain and the body politic. Ethnographies of historical memory vis-à-vis medicine, epidemics, sacredness, shamanism, terror, humanitarianism, truth and reconciliation.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.
AS.070.337. Digital Media, Democracy, and Control. 3.00 Credits.
This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

German Romance Languages Literatures
Theatre Arts Studies
AS.225.324. Adaptation for the Stage. 3.00 Credits.
For aspiring playwrights, dramaturgs, and literary translators, this course is a workshop opportunity in learning to adapt both dramatic and non-dramatic works into fresh versions for the stage. Students with ability in foreign languages and literatures are encouraged to explore translation of drama as well as adaptation of foreign language fiction in English. Fiction, classical dramas, folk and fairy tales, independent interviews, or versions of plays from foreign languages are covered.
Instructor(s): J. Martin
Area: Humanities Writing Intensive.

AS.225.330. Playwriting Strategies. 3.00 Credits.
A seminar and workshop in playwriting with Dr. Joe Martin, playwright and dramaturge. Student writers, developing their plays, will learn how to open up to the creative process, “brainstorm,” refine their work, and shape it toward an act of artistic communication. Writer’s techniques, such as attending to plot or “story,” delineation of character, creating effective “dialog,” even overcoming “writer’s block,” will be addressed. This course is designed to be complementary to – not a replacement for – playwriting classes in the Writing Seminars.
Instructor(s): J. Martin
Writing Intensive.

Humanities Center
East Asian Studies
AS.310.116. Romantic Love in Chinese Literature. 3.00 Credits.
This course aims to introduce students to a variety of literary texts featuring romantic love from the 9th to the mid-20th centuries in China. The target materials cover a wide range of literary products from Bo Juyi’s court poem to the modern Shanghai novella by the woman writer Zhang Ailing (Eileen Chang). As we read romance in a variety of narrative forms such as fiction, drama, and poetry, we will examine changing ideas about marriage, love, sexuality, family, emotion, and morality within the literary discourse as well as in society. Thus, students are expected to connect various literary texts about romance to their socio-historical, literary, and political surroundings. At the same time, we will discuss the shifting significance of romance for writers and reading public and consider how literary texts formed ideas about romance in society. The course is organized chronologically and thematically. Reading assignments are all in English.
Instructor(s): F. Joo
Area: Humanities.

Interdepartmental
Program in Latin American Studies
Center for Africana Studies
AS.362.304. Reading and Writing Black Poetry. 3.00 Credits.
This course is an exploration of twentieth and twenty-first century black poetry and poetics. Readings include Paul Laurence Dunbar, Langston Hughes, Gwendolyn Brooks, Amiri Baraka, Sonia Sanchez, Nikki Giovanni, Lucille Clifton, Rita Dove, Natasha Trethewey, Terrance Hayes, Claudia Rankine, and Danez Smith. Texts will be mined for theme as well as formal technique as a basis for poetic experimentation.
Instructor(s): A. Gunn
Area: Humanities Writing Intensive.

Program in Museums and Society

Military Science

The JHU Army Reserve Officers’ Training Corps (ROTC) was among the first to be established by Congress in 1916 and is routinely ranked at the top of the Nation’s 273 programs. Nearly 3,000 Hopkins students have received Army officer commissions through the program, with over 40 attaining the rank of general officer. Students can enter the program with as little as two years remaining as an undergraduate or may complete the requirements while pursuing a graduate degree. Upon graduation, Hopkins students are commissioned as a second lieutenant in the U.S. Army. Some are selected to attend a funded law school or several medical programs, while others serve in the Active Army, Reserves or National Guard. ROTC basic classes are open to all students: The Leadership and Management class specializes in leader development and is an excellent course for students aspiring to become leaders on campus and beyond. Additional information on military science or ROTC can be obtained at our building (behind the athletic center), by asking a current cadet, and by calling 1-800-JHU-ROTC or 410-516-7474. You can also email us at rotc@jhu.edu or visit the JHU ROTC website at http://jhurotc.com/page.php?page=home.

Scholarship and Financial Assistance
To apply for an ROTC scholarship go to http://www.goarmy.com/rotc/scholarships.html. Scholarship opportunities are regularly improved and incentives are added. Applications for scholarships by qualified students are awarded throughout the semester, and are often retroactive. A non-scholarship program is also available. For health profession and nursing students, ROTC can offer numerous opportunities to achieve specialized education, additional postgraduate scholarships and accession/graduation bonuses.

Curriculum
The curriculum normally consists of a two-year Basic Course (freshmen / sophomores) and a two-year Advanced Course (juniors / seniors). Some modification to this curriculum is common, as with graduate or transfer students. Completing the 30-day Leader’s Training Course (LTC) at Fort Knox, KY, is equivalent to the Basic Course. Successful graduates of LTC are normally offered ROTC scholarships and an opportunity to enroll in the Advanced Course. Junior-ROTC experience, prior military service and military academy attendance may also qualify for Basic Course completion.

All Advanced Course students are cadets and have a contractual agreement with the Army. These students attend the National Leadership
Air Force ROTC Program

Admission to the Air Force ROTC program is available to JHU students through an agreement with the University of Maryland. AFROTC courses have been scheduled to enable students to complete all the requirements in one morning per week at the College Park campus. JHU students are eligible to compete for all AFROTC scholarships and flying programs. The two-, three-, and four-year scholarships pay tuition, books, fees, and a monthly stipend during the school year. After graduation and the successful completion of AFROTC requirements, students are commissioned second lieutenants in the Air Force.

Those interested in this program should call 301-314-3242 or write to:

AFROTC Det 330
University of Maryland
Cole Field House, Room 2126
College Park, MD 20742-1021

Courses

AS.374.101. Introduction to the Army and Critical Thinking, ROTC 101. 2.00 Credits.
Introduces you to the personal challenges and competencies that are critical for effective leadership and communication. You will learn how the personal development of life skills such as cultural understanding, goal setting, time management, stress management, and comprehensive fitness relate to leadership, officership, and the Army profession. As you become more acquainted with the course, you will learn the structure of the ROTC Basic Course program consisting of MSL 101, 102, 201, 202, Fall and Spring Leadership Labs, and Cadet Initial Entry Training (CIET). The focus is on developing basic knowledge and comprehension of Army leadership dimensions, attributes and core leader competencies while gaining an understanding of the ROTC program, its purpose in the Army, and its advantages for the student.

Instructor(s): D. Normand; R. Buckhalt; T. ONeil.

AS.374.102. Introduction to the Profession of Arms. 2.00 Credits.
AS.374.102 introduces you to the professional challenges and competencies that are needed for effective execution of the profession of arms and Army communication. Through this course, you will learn how Army ethics and values shape the army and the specific ways that these ethics are inculcated into Army culture. This semester, you will: explore the Seven Army Values and the Warrior Ethos, investigate the Profession of Arms and Army leadership as well as an overview of the Army, and gain practical experience using critical communication skills.

Instructor(s): R. Buckhalt; R. Graves.

AS.374.110. Basic Leadership Laboratory, ROTC 101. 1.00 Credit.
These introductory courses in a laboratory environment are designed to expose students to practical experiences, challenges and individual learning opportunities in a small group. Students learn the fundamentals of an organization and apply principles of leadership and management at the foundation level. Students develop military courtesy, organizational discipline, communication and basic leadership and management skills. Ultimately, students understand how to facilitate and lead a small group of four to five people as an integral part of a larger organization of 75-100 people through situational training opportunities in a variety of conditions. As a leadership practicum, students have the opportunity to serve in leadership positions and receive tactical and technical training. In addition to learning to lead groups of five to 100 people, students will also be exposed to training on first aid, operating Army equipment, Army activities such as rappelling and drill and ceremony. These laboratories are required for enrolled ROTC participants who desire to be considered for a commission in the Army. Corequisite: AS.374.101-AS.374.102.

Instructor(s): D. Normand; R. Buckhalt; T. O’Neil.

AS.374.120. Basic Leadership Laboratory II. 1.00 Credit.
Students learn and apply team echelon leadership at an entry level. They continue development of military courtesy, discipline, communication and basic Soldier skills. Ultimately, students understand how to operate in and lead 4-5 persons through a program of training opportunities in a variety of conditions. Freshmen only.

Instructor(s): R. Buckhalt; R. Graves.
AS.374.201. Leadership & Teamwork I. 2.00 Credits.
The focus of this course is on developing leadership and communication skills. Case studies will provide a tangible context for learning and applying aspects of team building, values, the Army Warrior Ethos, and principles of war as they apply in the contemporary operating environment. The key objective of this course is to develop knowledge of the Army's leadership philosophies and integrate this knowledge into personal skills and team development. At the end of this course, students will be able to describe and perform tasks during the four basic phases of team building; demonstrate the types and elements of interpersonal communication; illustrate, explain, and apply the Principles of War; identify and apply problem solving steps, and apply basic leadership procedures in simple and complex situations. Corequisite: AS.374.210 for ROTC students; none for non-ROTC students.
Instructor(s): B. Sime; D. Normand; L. Scott; T. ONeil.

AS.374.202. Leadership & Teamwork II. 2.00 Credits.
Class examines how to build effective teams, various methods for influencing action, effective communication in setting and achieving goals, decision-making, creativity in problem solving, and providing feedback. Recommended Course Background: AS.374.201 or permission required.
Instructor(s): L. Scott; R. Buckhalt; T. ONeil.

AS.374.210. Basic Team Leadership. 1.00 Credit.
Students lead and assist in leading 4-5 person teams through a variety of training opportunities. They learn the troop-leading procedures, basic problem solving, and tactical skills aimed at military leadership. Students will mentor and assist members of their team with improving their own skills and leadership as well. Corequisite: AS.374.201.
Instructor(s): B. Sime; D. Normand; L. Scott; T. ONeil.

AS.374.220. Advanced Team Leadership. 1.00 Credit.
Students perform duties of and develop their leadership, as team leaders during a variety of induced training opportunities. Continued emphasis is placed on troop-leading procedures and simple problem solving. Students lead physical fitness training and mentor subordinates in military, academic and extra-curricular activities. Successful completion of advanced team leadership allows students to progress into ROTC Advanced Courses. Sophomores only.
Instructor(s): L. Scott; R. Buckhalt.

AS.374.255. US Intelligence Community: Theory & Practice. 3.00 Credits.
US Intelligence Community (3 credits, letter grade) Taught by former U.S. Intelligence Officers and members of U.S. Defense and Intelligence Community, "US Intelligence Community: Theory & Practice" (USIC) is a course designed to introduce and familiarize the student with the function, organization, and operational elements of the U.S. Intelligence Community (IC). Explore the USIC and gain experience in developing raw data into intelligence products through individual coursework & group production. The full-spectrum of US intelligence will be covered to include All-Source Intelligence production, multi-source data fusion processes, Special Operations, Counter-Terrorism, current affairs and future projections.
Instructor(s): F. Hoffman; M. Boston
Area: Social and Behavioral Sciences Writing Intensive.

AS.374.301. Leadership and Tactical Theory I. 2.00 Credits.
Students will be introduced to the tenets of Army leadership, officership, Army values, ethics and personal development. Students will learn the fundamentals of physical training, land navigation, orders production, and small unit tactics at the squad and platoon level. Each student will be given multiple opportunities to plan and lead squad level tactical missions in the classroom and during Leadership Laboratories. Corequisite: AS.374.310. Recommended Course Background: Basic Course completion.
Instructor(s): B. Sime; D. Normand; D. Yi Writing Intensive.

AS.374.302. Leadership and Tactics. 2.00 Credits.
Examines the role communications, values, and ethics play in effective leadership through application of principles in tactical scenarios. Emphasis is on improving written and oral communications skills and military tactics proficiency. ROTC cadets only. Corequisite: AS.374.320.
Prerequisites: AS.374.301 in the Fall
Corequisites: AS.374.320
Instructor(s): B. Sime; D. Yi Writing Intensive.

AS.374.307. Leadership in Military History. 2.00 Credits.
This course provides students with a historical perspective to decisions made by American military leaders: battlefield complexity, resource limitations, and teamwork deficiencies. Students cover major military engagements from the colonial period through the current operating environment. Students examine how leaders motivated their men, devised battle strategies, implemented rules of engagement, and managed supplies, transportation, and logistics for their troops. Requires permission of the Director of Military Science. Registration restricted to contracted ROTC cadets only.
Instructor(s): D. Normand; R. Buckhalt Writing Intensive.

AS.374.310. Basic Tactical Leadership Lab. 1.00 Credit.
In Leadership Laboratory, students are given the opportunity to apply what they have learned in the classroom, in a tactical or field environment. Students learn and demonstrate the fundamentals of leadership by planning, coordinating, navigating, motivating, and leading squads in the execution of both garrison and tactical missions. Students are evaluated as part of the Leadership Development Program and FM 6-22, Army Leadership. Ultimately, prepares students to excel at the four-week National Leadership Development and Assessment Course at Fort Lewis, WA. Corequisite: AS.374.301.
Instructor(s): B. Sime; D. Normand; D. Yi.

AS.374.320. Advanced Tactical Leadership. 1.00 Credit.
Students further develop their leadership skills by directing and coordinating the efforts of 9-60 personnel on offensive, defensive and civil-support tactical-tasks. Develop written plans for garrison and field environments while supervising its execution. Ultimately, prepares students to excel at the four-week National Leadership Development and Assessment Course at Fort Lewis, WA. Permission required. Juniors only.
Instructor(s): B. Sime; D. Yi.
AS.374.401. Adaptive Leadership. 2.00 Credits.
Students are assigned the duties and responsibilities of an Army battalion staff officer and must apply the fundamentals of principles of training, the training management, the Army writing style and military decision making to weekly training meetings. Students plan, execute and assess ROTC training and other Mission Essential Tasks. Students will study how Army values and leader ethics are applied in the Contemporary Operating Environment and how these values and ethics are relevant to everyday life. The student will study the Army officer's role in developing subordinates via counseling and administrative actions, as well as managing their own career. Students will be given numerous opportunities to train, mentor and evaluate underclass students enrolled in the ROTC Basic Course while being mentored and evaluated by experienced ROTC cadre. Corequisite: AS.374.410. Recommended Course Background: AS.374.301-AS.374.302, AS.374.310-AS.374.320 and the Basic Course.
Instructor(s): Staff.

AS.374.402. Adaptive Leadership/Professionalism. 2.00 Credits.
Study includes practical exercises on establishing an ethical command climate and developing values required of a professional officer. Students apply their leadership skills in the ROTC battalion and prepare for commissioning. Corequisite: AS.374.002. ROTC cadets only.
Instructor(s): M. Gorreck; W. Greenberg.

AS.374.407. Being a Platoon Leader. 1.00 Credit.
This course prepares Cadets for actual challenges not necessarily described in text books that junior officers may face in today's Army. Topics include: serving during war, conflict management, ethical dilemmas, time-constrained planning, and change management. This course also serves as prerequisite for the Basic Officer Leadership Course “B” phase by providing students with reinforced development on: deployment preparation, the military style of writing, supply management, human resources management, family support and operations management. Students will also learn how the Army's organizational structure and administration affects Soldiers across ranks and over time. Finally, students will learn ways to leverage automation to improve their efficiency and effectiveness of records management and developing presentations for superiors.
Instructor(s): G. Stambone; M. Gorreck.

AS.374.410. Advanced Planning & Decision Making I. 1.00 Credit.
Students develop a semester-long progression of programmed training activates that support completion of the unit’s Mission Essential Task List. The laboratory builds from fall to spring semester as students master advanced problem solving, resource synchronization and executive decision making. Students evaluate, mentor and develop subordinate leaders as part of the Leadership Development Program and FM 6-22, Army Leadership. The course serves as the final evaluation and determination on a student’s ability to lead Soldier’s as a Second Lieutenant in the US Army. Co-requisite: AS.374.401-AS.374.402. Recommended Course Background: AS.374.301-AS.374.302, AS.374.310-AS.374.320 and Basic Course.
Instructor(s): Staff.

AS.374.420. Advanced Organizational Planning. 1.00 Credit.
Students develop a semester-long progression of training activates that support completion of the unit’s Mission Essential Task List. The laboratory builds on the first semester’s achievements through advanced problem solving, resource synchronization and executive decision making. Students evaluate and develop subordinate leaders as part of the Leadership Development Program and FM 6-22, Army Leadership. The course serves as the final evaluation and determination on a student’s ability to lead Soldier's as a Second Lieutenant in the US Army. Permission required. Seniors only.
Instructor(s): M. Gorreck; R. Graves.

AS.374.456. 21st Century Intelligence Issues. 3.00 Credits.
Taught by former U.S. Intelligence Officers and members of U.S. Defense and Intelligence Community, 21st Century Intelligence Issues introduces students to current and future intelligence issues of the 21st century, to include intelligence successes and failures; adversarial deception and deception awareness; intelligence, the law, and government oversight; covert action; and critical 21st century intelligence challenges posed by terrorism, weapons of mass destruction, cyber warfare, unconventional warfare, and non-state actor threats.
Prerequisites: AS.374.555 or AS.374.255
Instructor(s): F. Hoffman; M. Boston
Area: Social and Behavioral Sciences
Writing Intensive.

AS.374.501. Independent Study. 1.00 Credit.
Instructor(s): J. Wood; M. Gorreck; R. Graves
Writing Intensive.

AS.374.512. Internship-Military Science. 0.00 - 3.00 Credits.
Students will select a topic relevant to the study of military leadership and will complete a project based on current military doctrine and the contemporary operating environment of current military operations. Permission required.
Instructor(s): M. Gorreck
Writing Intensive.

AS.374.556. USIC Individual Research Topics (IRT) Independent Study Seminar. 3.00 Credits.
Extension of AS.374.255, USIC Theory and Practices is an independent study course to formalize the research, analysis and production processes of United States Intelligence Cycle (USIC). The research topics will focus on collaboration of USIC thru specific topics in USIC sectors of HUMINT, SIGINT, OSINT, MASINT, Cyber-Security and Intelligence affairs.
Prerequisites: AS.374.255 OR AS.374.555
Instructor(s): F. Hoffman; M. Boston; M. Gorreck
Writing Intensive.

AS.374.557. US Intelligence Community: National Security Analysis Independent Study. 3.00 Credits.
Extension of AS.374.556, USIC Theory and Practices is an independent study course to formalize the research, analysis and production processes of United States Intelligence Community (USIC). The research topics will focus on US National Security issues.
Prerequisites: AS.374.556
Instructor(s): F. Hoffman; M. Boston; M. Gorreck
Writing Intensive.
Museums and Society

http://krieger.jhu.edu/museums/

The Program in Museums and Society is concerned with the institutions that shape knowledge and understanding through the collection, preservation, interpretation, and/or presentation of material culture. It focuses on the role of museums (broadly defined) and their contents in societies past and present, including their cultural, intellectual, and political significance.

A minor in Museums and Society complements study in a range of fields, including but not limited to anthropology, archaeology, history, history of art, and history of science and technology. Many courses include visits to or focused work in local and regional institutions, as well as in on-campus collections (Archaeological Museum, Homewood Museum, Evergreen Museum and Library, and the Sheridan Libraries).

Whether they are researching a historical artifact or debating the obligations of public institutions, students in the program are challenged to approach their discipline from a new angle. While some may choose to pursue a museum career, the program has the larger goal of encouraging critical, careful thinking about some of the most influential cultural institutions of our day.

Requirements for a Minor in Museums and Society

Course requirements for the minor in Museums and Society are designed to introduce students to a broad set of historical, theoretical, and practical museum issues and to give them the opportunity to explore museums first-hand. Prospective minors should consult with the Director of Undergraduate Studies for guidance in designing a program of study.

- A minimum of six different courses (amounting to at least 18 credits) selected from those approved by the program.
- Four additional courses in the program: Of these courses, at least three must be 300-level or higher and at least two different primary disciplines must be represented; these four courses must also include a minimum of three credits of "practicum" [POS-Tag PMUS-PRAC] work.

- Courses used to satisfy minor requirements must be taken for a letter grade. Students must earn a "C-" or higher grade in all courses used to satisfy minor requirements.

**Introductory Courses**

<td>3</td>
</tr>
</tbody>
</table>

**Four Upper-Level Electives**

At least three must be 300-level or higher courses

Three credits of practicum work [POS-Tag PMUS-PRAC]

Two courses must be from at least two different primary disciplines

Total Credits 18

Additional details:

**Introduction to the Museum sequence**: Ideally, students should take at least one of the two introductory courses before enrolling in more focused courses, but this is not required.

**Departmental distribution**: In keeping with the interdisciplinary nature of the program, students are encouraged to explore various fields and must complete courses in at least two different primary disciplines beyond Museums and Society. Primary disciplines are defined either as the home department for the course (identified by the course’s three-digit prefix), as the first cross-listing beyond Museums and Society, or as the home discipline of the instructor. Students should seek guidance from the program to ensure they are fulfilling this requirement, and should note that Independent Study and Capstone credits cannot be applied to it.

**Practicum Work**: Practicum credits can be earned only from courses designated as Museums and Society "practicum" in the course description [POS-Tag PMUS-PRAC].

**Independent Study and Capstone**: Students have two options for pursuing independent work for credit in Museums and Society. The Independent Study typically takes a more traditional academic approach to research and presentation; the Capstone encourages research that is engaged with collections and results in an alternative, often public project. Students interested in these options should consult the university’s independent work policy and follow the guidelines outlined under Independent Research (http://krieger.jhu.edu/museums-society/academics/independent-research). Approval for credit will not be given until a project has been officially approved by an appropriate mentor, in full and frequent consultation with the Program in Museums and Society.

No more than 3 credits of independent work can be applied to the minor.

**Internships**: Internships are valuable opportunities to expand horizons, learn in the field, and investigate real-world applications of academic work. The Program in Museums and Society highly encourages students to explore internship options and works with the Career Center to do so. However, while the program sponsors interns for academic credit when needed by the host institution, such credit cannot be used to satisfy minor requirements. Students interested in receiving credit for independent work should consider the Independent Study and Capstone options instead.

**Other Information**: No course other than the Independent Study or Capstone may be counted toward the minor more than once (up to a maximum of 3 credits).
Sample Program of Study for a Minor in Museums and Society
A sample path toward completion might include the following sequence, but many other paths are possible. Please consult with the Director of Undergraduate Studies for guidance.

Betsy M. Bryan
Alexander Badawy Chair in Egyptian Art and Archaeology, Near Eastern Studies: Egyptian art and archaeology, and Egyptology.

Stephen Campbell
Henry M. and Elizabeth P. Wiesenfeld Professor and Chair, History of Art: Italian Renaissance art, the studiolo and Renaissance collecting.

Marian Feldman

Robert H. Kargon
Willis K. Shepard Professor of the History of Science, History of Science and Technology: history of physics, science, and social change.

Stuart W. Leslie
History of Science and Technology: history of technology, science-based industry, and 20th-century American science.

Tobie Meyer-Fong
History: social, cultural history of China since 1600.

Bernadette Wegenstein
German and Romance Languages: media arts; film; critical theory.

Associate Professor
Rebecca M. Brown
History of Art: Southeast Asian art and politics of display.

Assistant Professors
Yulia Frumer
History of Science and Technology: East Asia; and tediological instruments.
Pier Luigi Tucci  
History of Art: Roman art and architecture; spolia; and collecting of ancient art.

Molly Warnock  
History of Art: modern art.

**Teaching Faculty**

Emily S.K. Anderson  
Senior Lecturer, Classics and History of Art: Aegean and Eastern Mediterranean Bronze Age art and archaeology, material culture, sociocultural interaction, craft, and glyptic.

Lisa DeLeonardis  
Austen Stokes Associate Professor in Art of the Ancient Americas, History of Art: ancient art of the Americas.

**Affiliated Instructors and Museum Professionals**

James Archer Abbott  
Philip Franklin Wagley Director and Curator, Evergreen Museum and Library: 19th- and 20th-century American decorative arts and furniture; historic houses; curatorial practice, including collections management and exhibitions.

Virginia Anderson  
Art Historian and Independent Scholar.

Catherine Rogers Arthur  
Director and Curator, Homewood Museum and Lecturer, History: American decorative arts, historic house museums, museum practice.

Sanchita Balachandran  
Curator/Conservator, Johns Hopkins Archaeological Museum and Lecturer, Near Eastern Studies: conservation history and ethics; archaeological conservation and site management; collections management and museum practice.

Doreen Bolger  

Gabrielle Dean  
Curator, Rare Books and Manuscripts and Lecturer, Museums and Society: history of books, libraries, reading, literary culture; books as objects.

Lori Beth Finkelstein  
Vice-President of Education, Interpretation and Volunteer Programs, Maryland Zoo in Baltimore.

Deanna Haggag  
Director, The Contemporary Museum of Baltimore.

Earl Havens  
William Kurrelmeyer Curator of Rare Books and Manuscripts and Adjunct Assistant Professor, Department of History: early modern Europe, history of collecting, early libraries.

Rena Hoisington  
Associate Curator of Prints, Drawings and Photographs, The Baltimore Museum of Art.

Amy Landau  
Associate Curator of Islamic and Soth Asian Art, The Walters Art Museum.

Elizabeth Maloney  
Museum Educator and Independent Scholar.

Robert Mintz  
Mr. and Mrs. Thomas Quincy Curator of Asian Art and Chief Curator, The Walters Art Museum.

Arthur Molella  
Director, Lemelson Center for the Study of Invention and Innovation, National Museum of American History, Smithsonian Institution.

Jacqueline M. O’Regan  

Lorraine C. Trusheim  
Independent Objects Conservator, Halcyon Objects Conservation LLC.

For current course information and registration go to https://sis.jhu.edu/classes/

**Courses**

**AS.389.103. Freshman Seminar: Museum Matters. 3.00 Credits.**  
Museums are crucibles, places where public memory, identity, and cultural values are shaped and debated. We examine this premise through weekly visits to Baltimore museums of art, science, history (and many more), critical group discussion, and intensive writing assignments. Freshmen only.  
Instructor(s): C. Arthur; E. Rodini  
Area: Humanities, Social and Behavioral Sciences  
Writing Intensive.

**AS.389.105. Freshman Seminar: Art in the Museum. 3.00 Credits.**  
Go behind the scenes of local art museums to explore fundamental concepts and social issues particular to the collection and display of art in the past and today.  
Instructor(s): J. Kingsley  
Area: Humanities  
Writing Intensive.

**AS.389.107. Freshman Seminar: Technical Research on Archaeological Objects in the Johns Hopkins Archaeological Museum. 3.00 Credits.**  
Freshmen will learn and apply analytical methods used in the technical study of archaeological objects by examining and researching ancient examples in the Johns Hopkins Archaeological Museum. Freshman Only.  
Instructor(s): S. Balachandran  
Area: Humanities.

**AS.389.110. Freshman Seminar: All about Things. 3.00 Credits.**  
What can objects tell us about the world, past and present? Using theoretical, archival, technical, and visual processes and in-depth research at Evergreen Museum & Library, we explore this question. Freshman Only.  
Instructor(s): E. Rodini  
Area: Humanities  
Writing Intensive.

**AS.389.120. Discover Hopkins: Examining Archaeological Objects. 1.00 Credit.**  
In this course, we examine artifacts from the Johns Hopkins Archaeological Museum in order to learn about the role of materials such as ceramics, metal, glass, faience and stone in the history, art and culture of the ancient world. We will visit local artists’ studios to understand how these materials are utilized today, and examine comparative examples in local art museums. Students will work hands on with artifacts each day.  
Instructor(s): S. Balachandran.
AS.389.130. Mini Course: Conservation, An Introduction to Technical Art History. 1.00 Credit.
Look through the eyes of a conservator and learn how to answer historical questions by analyzing the physical nature of works of art. Objects examined will include paintings, sculpture and works on paper from the collection of the Baltimore Museum of Art. Class meets 4 times, on February 7, 14, 21 and 28, at the BMA. Syllabus and organizational meeting at JHU on Thursday, January 31, 5:30pm.
Instructor(s): T. Primeau  
Area: Humanities.

AS.389.201. Introduction to the Museum: Past and Present. 3.00 Credits.
This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends. Anthropology, art, history, and science museums are considered. Cross-listed with History and History of Art.  
Instructor(s): J. Kingsley  
Area: Humanities, Social and Behavioral Sciences.

AS.389.202. Introduction to the Museum: Issues and Ideas. 3.00 Credits.
This course considers the practical, political, and ethical challenges facing museums today, including the impact of technology and globalization, economic pressures, and debates over the ownership and interpretation of culture.  
Instructor(s): E. Rodini  
Area: Humanities, Social and Behavioral Sciences.

AS.389.205. Examining Archaeological Objects. 3.00 Credits.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.  
Instructor(s): S. Balachandran  
Area: Humanities.

AS.389.250. Conservation of Material Culture: Art, Artifacts and Heritage Sites. 3.00 Credits.
Alongside specialists in area museums, we explore the conservation of material culture in various media. Topics include manufacturing methods and material degradation as well as conservation treatments, science, and ethics. Cross-listed with History of Art. One other course in Museums & Society, History of Art, Archaeology, or Material Sciences OR permission from the Museums & Society director.  
Instructor(s): L. Trusheim  
Area: Humanities.

AS.389.261. Curating Homewood. 3.00 Credits.
Instructor(s): C. Arthur  
Area: Humanities.

AS.389.275. Interpreting Sites & Collections: An Introduction to Museum Education. 3.00 Credits.
Part public history, part introduction to museum practices, this hands-on course explores how heritage areas and museums serve communities through interpretation. Each year, students partner with a community to develop research-based, visitor-centered interpretive material, in the 2015 Baltimore National Heritage Area. Field trips and community meetings will be a significant part of the course. Cross-listed with History and History of Science. M&S practicum course. Class usually meets 1:30 - 3:50 except for days with field trips.  
Instructor(s): E. Maloney  
Area: Humanities, Social and Behavioral Sciences.

AS.389.301. Curating Material Culture for the Digital Age. 4.00 Credits.
JHU pioneered the concept of the modern research university in the United States, but what does that mean for the everyday experiences of its students, faculty, staff and friends? Excavate the history of this place through the things collected, made and used here since the university’s founding in 1876. Students research the material culture of Hopkins and present their findings on an interactive website: collectionsweb.jhu.edu. Course includes digital media labs. Cross-listed with History and History of Science. M&S practicum.  
Instructor(s): J. Kingsley  
Area: Humanities, Social and Behavioral Sciences.

AS.389.302. The Virtual Museum. 3.00 Credits.
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.  
Instructor(s): J. Kingsley  
Area: Humanities.

AS.389.303. World of Things. 3.00 Credits.
This course introduces students to current approaches to objects, their materials, and materiality. Each class starts from a specific inspiration (body parts, fakes, the materiality of ISIS.....) and treats the museum as a site for investigating the relationship between people and things.  
Instructor(s): J. Kingsley.

AS.389.320. Photographs on the Edge: Ara Güler in Archives of the Smithsonian's Freer and Sackler Galleries. 3.00 Credits.
Work as a curator alongside Smithsonian staff, researching the work of Turkish photographer Ara Güler to develop an exhibit that considers relationships between the history of photography, archives and the museum. Class will travel several times to the Freer and Sackler Galleries in Washington D.C. M&S practicum course.  
Instructor(s): N. Micklewright  
Area: Humanities, Social and Behavioral Sciences.

AS.389.321. GhostFood: Curatorial Practicum with the Contemporary. 3.00 Credits.
Students work with Baltimore’s Contemporary and NYC artist Miriam Simun on GhostFood, a project using art to engage important questions concerning the environment, climate change, and the politics of food. Instructor Permission. Contact erodini@jhu.edu for enrollment approval. M&S practicum course.  
Instructor(s): D. Haggag  
Area: Humanities.
AS.389.335. Recreating Ancient Greek Ceramics. 4.00 Credits.
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.340. Critical Issues in Art Conservation. 3.00 Credits.
The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-Listed with History of Art and Anthropology
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.343. Edgar Allan Poe and His Afterlives. 3.00 Credits.
We will investigate the creative development and iconic afterlife of a canonical American author, Edgar Allan Poe, as a case-study in literary legacy and cultural heritage. What is the lifespan of a literary work, and how do works "stay alive" for later generations? Students will examine rare Poe materials and create a digital exhibition of Poe archives.
Instructor(s): G. Dean
Area: Humanities, Social and Behavioral Sciences.

AS.389.349. Art, Museums and the Law. 3.00 Credits.
The course encourages students to consider how artistic processes and cultural institutions are shaped by legal principles and vice versa. The interplay between art, museums and the law will be explored from historical, cultural and legal perspectives using a variety of source material.
Instructor(s): W. Lehmann
Area: Humanities.

AS.389.350. Staging Suburbia with the Jewish Museum of Maryland-Community Based Learning. 3.00 Credits.
Work as a public historian alongside Jewish Museum of Maryland curators and staff, researching primary documents and artifacts to develop an exhibition about Baltimore's Jewish suburbs. The show will travel throughout Baltimore. M&S practicum course. Cross-listed with History and Jewish Studies.
Instructor(s): D. Weiner
Area: Humanities, Social and Behavioral Sciences.

AS.389.353. Revolutions of the Book: Material Culture & the Transformation of Knowledge from Antiquity to the Renaissance. 3.00 Credits.
Explores the material culture of knowledge through transformations in the technologies and arts of communication, taught entirely from rare books, manuscripts, and artifacts in JHU libraries and museum collections.
Instructor(s): E. Havens
Area: Humanities
Writing Intensive.

AS.389.354. Paper Museums: Exhibiting Artists' Books at the Baltimore Museum of Art. 3.00 Credits.
Students work with BMA collection and staff to develop and organize an exhibition of artists' books. Various aspects of museum work are explored, including research, interpretation, presentation, programming, and marketing. M&S practicum course.
Instructor(s): R. Hoisington
Area: Humanities.

AS.389.355. Literary Culture in the Nineteenth-Century Library. 3.00 Credits.
What did people actually read in the nineteenth century? What can we learn from their books and magazines? In this class, we read nineteenth-century English and American literary works and examine nineteenth-century literary objects from the collection of the George Peabody Library, to better understand the cultural and material environments within which literary works circulated. Featured writers likely to include Edgar Allan Poe, Charles Dickens, Harriet Beecher Stowe, Emily Dickinson, Mark Twain, Stephen Crane. Several field trips to the Peabody Library throughout the semester.
Instructor(s): G. Dean
Area: Humanities
Writing Intensive.

AS.389.356. Halls of Wonder: Art, Science, and Literature in the Age of the Marvelous, 1500-1800. 3.00 Credits.
Instructor(s): E. Havens
Area: Humanities.

AS.389.357. Heaven on Earth: Art, Culture and Wonder in the Vatican Museums and Library. 3.00 Credits.
This interdisciplinary course will explore the institutional, cultural, artistic and architectural history of St. Peter's and the Vatican Museum and Library from Antiquity through the Renaissance, up to the present day. Class meets in the Dick Macksey Seminar Room of the Brody Learning Commons. Cross-listed with History.
Instructor(s): E. Havens
Area: Humanities.

AS.389.358. Collecting and Cataloguing the Contemporary. 3.00 Credits.
Students will study, help author catalog of an important Baltimore contemporary art collection. Course alternates meetings focused on theories and practices of art collecting with collection visits and field trips. M&S practicum. Cross-listed with History of Art.
Instructor(s): V. Anderson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.389.359. Literary Archive. 3.00 Credits.
This course invites students to grapple with the theory and practice of building literary archives in 19th- and 20th-century American culture. For the final project students will work collaboratively to build a digital archive and exhibit of selected materials from the JHU rare book and manuscript collections. Meets in Special Collections. Cross-listed with English. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.

AS.389.360. American Literature on Display. 3.00 Credits.
Focusing on late 19th and early 20th c American literature, course examines representations of display within different literary genres and track how display simultaneously shapes print culture and social concerns of the period. Course culminates in the creation of a student-curated digital exhibit using archival and rare book materials to contextualize the work of the journalist, poet and fiction writer Stephen Crane. M&S practicum course.
Instructor(s): G. Dean
Area: Humanities.
AS.389.361. Introduction to Material Culture: Early Views of Baltimore. 3.00 Credits.
Students explore early American life relating to the region and Homewood House. Primary research, object study culminate in exhibit focused on trades and crafts, training and work practices. M&S practicum course. Meets at Homewood Museum. Cross-listed with History.
Instructor(s): C. Arthur
Area: Humanities.

AS.389.369. Encountering the Art of East Asia: Museum Display, Theory and Practice. 3.00 Credits.
Students reconsider the exhibition and interpretation of East Asian Art at the Walters Art Museum, developing a pilot installation to suggest a new permanent display. M&S Practicum Course. Class meets at the Walters Art Museum (extended time to allow for travel). Cross-listed with East Asian Studies.
Instructor(s): R. Mintz
Area: Humanities.

AS.389.371. The Artist in the Museum: Making Books. 3.00 Credits.
Hopkins curatorial staff and photography instructor introduce the concept of books as art. Students create artist’s books inspired by campus collections for inclusion in an Evergreen exhibition. FIRST CLASS IS MANDATORY. M&S practicum course. Cross-listed with Homewood Art Workshops.
Instructor(s): J. Abbott; P. Berger
Area: Humanities
Writing Intensive.

AS.389.373. Encountering the Art of South Asia: Museum Display, Theory and Practice. 3.00 Credits.
This course examines zoos and living collections from historical and contemporary perspectives, taking into account the potentially conflicting role of zoos as conservation organizations, educational institutions, and entertainment venues. The class culminates in the creation of conservation education content for Baltimore City elementary school children. M&S practicum course.
Instructor(s): L. Finkelstein
Area: Humanities

AS.389.375. Museums and Social Responsibility. 3.00 Credits.
Do museums have a social responsibility? What roles should they play in their communities? Should they be agents of social change or social justice? This course explores the ways in which museums engage with local communities. Students work in partnership with a specific museum to develop an original and fundable proposal that attends to its social responsibility. Field trips and guest speakers will be a key feature of this course. M&S practicum course. CBL course. Cross-listed with Sociology. Field trips and guest speakers will be a key feature of this course. M&S practicum course. CBL course. Cross-listed with Sociology.
Instructor(s): E. Maloney
Area: Humanities.

AS.389.378. Collections Remix: Black at Hopkins. 3.00 Credits.
We turn a critical eye on our university’s material culture and memory under the guidance of local experts on collecting and interpreting materials that represent the African-American experience. Students will develop a strategic plan to guide future collecting on campus and will stage creative interventions with or around objects to reveal hidden stories and rethink existing interpretation. M&S Practicum. CBL course.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.385. Global Perspectives on the Museum. 3.00 Credits.
Course examines practices of collecting, display and preservation beyond the western museum tradition, focusing on how these practices reflect and construct political, historical, ethnic and nationalist narratives. Counts towards the international studies major. Cross-listed with Anthropology.
Instructor(s): E. Rodini; S. Balachandran
Area: Humanities, Social and Behavioral Sciences.

AS.389.386. Islamic Art in the 21st Century Museum. 3.00 Credits.
What narratives about Islam and Islamic art does the visitor encounter at the museum? Recent re-installations of Islamic art will be studied in the context of current issues, including Islamophobia, attacks on cultural heritage, and hesitation in addressing matters of faith in public institutions. Cross-listed with History of Art and Islamic Studies.
Instructor(s): A. Landau
Area: Humanities, Social and Behavioral Sciences.

AS.389.390. Library / Laboratory. 3.00 Credits.
This interdisciplinary and project-driven class investigates the library as a site of experimentation and an expression of different knowledge regimes. Material includes literary treatments of the library, historical and critical readings, guest lectures, rare materials from special collections and field work.
Instructor(s): G. Dean
Area: Humanities.

AS.389.440. Who Owns Culture?. 3.00 Credits.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.450. Readings in Material Culture. 3.00 Credits.
Objects, things, stuff- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

AS.389.460. Inventing the Middle Ages from the Renaissance to Today. 3.00 Credits.
Investigate the history of the collection, interpretation and display of medieval art by nations, museums and private collectors. Topics range from antiquarian interest to conception of medieval sculpture as primitive, from the use of medieval objects in nationalistic displays and from early American museums such as the Cloisters in NY to current exhibits such as the Walters. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities.

AS.389.501. Independent Study-Museums & Society. 3.00 Credits.
Instructor(s): E. Rodini.
AS.389.502. Independent Study- Museum and Society. 1.00 - 3.00 Credits.
Instructor(s): E. Rodini; J. Kingsley.

AS.389.511. Museum & Society Internship. 1.00 Credit.
Instructor(s): E. Rodini.

AS.389.512. Museum & Society Internship. 0.00 - 3.00 Credits.
Instructor(s): J. Kingsley.

AS.389.521. Capstone in Museums and Society. 1.00 - 3.00 Credits.
The Capstone allows students to develop and carry out their own, hands-
on research project in a museum, collection, archive, or other living resource. Final projects must involve some form of public presentation (exhibition, lecture, poster, web-based, etc.) and a work of self-reflection (journal, brief paper, blog, or other). Projects must be approved and overseen by a supervising faculty member and approved by the Program’s Director, in keeping with the University’s Independent Work Policy. Instructor permission required.
Instructor(s): E. Rodini; J. Kingsley.

AS.389.522. Capstone in Museum and Society. 1.00 - 3.00 Credits.
The Capstone allows students to develop and carry out their own, hands-
on research project in a museum, collection, archive, or other living resource. Final projects must involve some form of public presentation (exhibition, lecture, poster, web-based, etc.) and a work of self-reflection (journal, brief paper, blog, or other). Projects must be approved and overseen by a supervising faculty member and approved by the Program’s Director, in keeping with the University’s Independent Work Policy. Prerequisites: AS.389.201; Prereq or coreq AS.389.202
Instructor(s): E. Rodini; J. Kingsley.

AS.389.594. Independent Study. 0.00 - 3.00 Credits.
AS.389.599. Museum & Society Internship. 1.00 Credit.
Instructor(s): E. Rodini; J. Kingsley.

AS.389.650. Readings in Material Culture.
Objects, things, stuff- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

Cross Listed Courses

History of Art
AS.010.221. Shopping for Status: Patronage & Collecting at the Early Modern European Court. 3.00 Credits.
At the early modern European princely court, wonders of art (ancient sculptures, priceless tapestries, masterpieces of oil on canvas) were displayed alongside wonders of religion, science, and nature (saintly relics, astronomical devices, unicorn horns). Through the study of courtly patronage and collecting practices, this seminar will examine the court as both a locus of power and a social organism. Students will explore the way players at court staged strategic and social exchange through the circulation, organization, display and concealment of art and artifacts to powerful ends.
Instructor(s): R. Teresi
Area: Humanities.

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas. 3.00 Credits.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the "global South." This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of "global modernism.”
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.307. Diplomats, Dealers, and Diggers: The Birth of Archaeology and the Rise of Collecting from the 19th c. to Today. 3.00 Credits.
The development of archaeology in the Middle East – its history of explorers, diplomats, missionaries and gentlemen-scholars – profoundly shaped the modern world, from the creation of new museums and the antiquities market to international relations and terrorism.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.310. The ‘Long Sixties’ in Europe. 3.00 Credits.
Emphasis will be on advanced artistic practice primarily in France, Italy, the Benelux, and German-speaking countries; students will curate an exhibition of avant-garde journals from the Sheridan Libraries.
Instructor(s): M. Warnock
Area: Humanities.

AS.010.312. Surrealism. 3.00 Credits.
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA. Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.
Instructor(s): M. Warnock
Area: Humanities
Writing Intensive.

AS.010.334. Problems in Ancient American Art. 3.00 Credits.
Selected topics which may include collecting the pre-Columbian past and connoisseurship, the formation of national museums, post-Columbian appropriations. Collections study in museums. May also be used toward credit for the Archaeology major. Cross-listed with PLAS and Program in Museum and Society
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.382. The Politics of Display in South Asia. 3.00 Credits.
Through examining collecting, patronage, colonial exhibitions, and museums, this course examines how South Asia has been constructed in practices of display. Themes: politics of representation, spectacle, ethnography, and economies of desire related to colonialism and the rise of modernity. Cross-list with Anthropology, Museums and Society and Political Science.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.
AS.010.424. Collecting Roman Art: From Antiquity to Present. 3.00 Credits.
A survey of the most important collections of Greek and Roman sculpture, from the late-Republican age through the Middle Ages and the Renaissance, until the creation of the main museums in Europe and in the United States.
Instructor(s): P. Tucci
Area: Humanities.

Classics
AS.040.119. The World of Pompeii. 3.00 Credits.
This course will focus on the history and archaeology of Pompeii. Close attention will also be paid to the reception of Pompeian materials in European and American culture. Cross-listed with History of Art and the Program in Museums and Society.
Instructor(s): H. Valladares
Area: Humanities.

AS.040.137. Freshman Seminar: Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum. 3.00 Credits.
This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions. 3.00 Credits.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities

Anthropology
AS.070.103. Community Based Learning - Africa & The Museum. 3.00 Credits.
An introduction to Africa, artistic creativity, collection and exhibition: as African history, as anthropology of art and objects, and as public controversy in our national institutions. Works with the Baltimore Museum of Art. Cross-listed with Africana Studies and Programs in Museums and Society.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.287. Displaying Race. 3.00 Credits.
Through hands-on archival and museum research, students in this class will develop a proposal for displaying a small collection of plaster busts that were cast in the late 19th century from live indigenous subjects. Readings from the class will explore the ethical, legal and political issues surrounding the public display of anthropological and historical artifacts that were collected as part of now discredited regimes of racial classification. How can displays be used to reveal the distance that separates 19th century racial thought from our modern day understandings of physical and cultural difference? How can we responsibly display likenesses that may have been collected under coercive conditions? How can such objects be used to educate people about the place of indigenous peoples in the museum? What laws and ethical conventions govern the display of such objects? In addition to regular class meetings, students will be expected to carry out archival research and interviews in local archives and museums.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences.

History
AS.100.249. Baltimore as Historical Site. 3.00 Credits.
The city of Baltimore will serve as a laboratory in which to study American History. We will explore the urban landscape on foot as well as through written sources.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.470. Monuments and Memory In Asian History. 3.00 Credits.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Near Eastern Studies
AS.130.251. Made for the Gods: Votive Egyptian Objects in the Archaeological Museum. 3.00 Credits.
This course investigates Egyptian votive objects made as gifts to the Gods. Students will learn about Egyptian religious practices and study groups of objects in the Archaeological Museum to learn to identify how they were produced, when, and for what functions. Physical analyses of the objects will be part of the class and facilitated by museum staff.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.334. Egyptian Funerary Arts in the Archaeological Museum. 3.00 Credits.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum’s website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan; S. Balachandran
Area: Humanities.
AS.133.706. Egyptian Funerary Arts in the Archaeological Museum. This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum's website and present their results for inclusion in the museum cataloging project.
Instructor(s): B. Wegenstein
Area: Humanities

History of Science Technology
AS.140.123. Johns Hopkins: The Idea of a University. 3.00 Credits.
Who was Ira Remsen and why is he interred in the building bearing his name? Was the School of Medicine’s best surgeon really a life-long drug addict? This freshman seminar will explore the history of our university since its founding in 1876, including its schools of medicine, public health, nursing, the Applied Physics Laboratory and SAIS. We’ll look carefully at the archives and develop a thematic class exhibit. Research and writing intensive.
Instructor(s): S. Spinner
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.320. Modernity on Display: Technology and Ideology in the Era of World War II. 3.00 Credits.
Seminar focuses on ideological at World’s Fairs over technological modernity with special emphasis upon World War II and the Cold War.
Instructor(s): A. Molella; R. Kargon
Area: Humanities, Social and Behavioral Sciences

German Romance Languages Literatures
AS.213.322. Museums and Jews, Jews in Museums. 3.00 Credits.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.407. Museums and Identity. 3.00 Credits.
This course will explore the phenomenon of the “identity” museum through case studies involving Jewish and Holocaust museums around the world. The museum boom of the last half-century has centered in large part around museums dedicated to the culture and history of particular minority groups; recent notable (and relatively local) examples include the brand new National Museum of African American History and Culture in Washington and the National Museum of American Jewish History in Philadelphia. Our understanding of the contemporary theory and practice of such museums will be based on an examination of the history of the various museological traditions that engage Jewish identity from the 19th century to the present, including the collection and display of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. We will explore these topics through historical documents, theoretical readings, and case studies including visits to nearby museums. All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.706. Literature, Museums, Mimesis. Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities Writing Intensive.

Music

http://www.peabody.jhu.edu/
The Peabody Institute of The Johns Hopkins University is an internationally acclaimed music conservatory. The Peabody campus, located at historic Mount Vernon Place, is on the university shuttle bus route between Homewood campus and the medical institutions in East Baltimore. Faculty of the Peabody Institute offer classes on the Homewood campus that are open to all undergraduates.

Qualified Hopkins undergraduates may, for no extra charge, register for classes in music history, music theory, music education, recording techniques, and computer music offered on the Peabody campus. There are also limited opportunities to take private lessons and participate in ensembles.

**Concerts**

Homewood students are welcome to attend Peabody’s many concerts and are entitled to one complimentary ticket per concert, excluding opera and dance productions. Multiple performances of the same program do not count as separate concerts. Students can order tickets or e-tickets through University Tickets, accessible through the Peabody website (http://www.peabody.jhu.edu/). To pick up will-call tickets, students need to show their Hopkins ID at the Peabody Box Office, Monday through Friday, 10 a.m. to 4 p.m. or during the hour before the concert. The Box Office is in the lower level of the Grand Arcade in the Conservatory building, call (667) 208-6620.

**Private Lessons**

Private lessons are available to students at varying levels of accomplishment on a musical instrument.

- Half-hour or hour lessons are offered for credit in the Peabody Conservatory for the intermediate to advanced musician.
- Non-credit lessons are available in the Peabody Preparatory, space permitting.

The annual registration fee will be waived for all JHU students. School of Arts and Sciences and Engineering students are eligible to receive a cross-registration discount of 25 percent for Preparatory private lessons by obtaining a cross-registration form from their division each semester.

Students wishing to take advantage of this opportunity should consult the Peabody Conservatory and/or Preparatory catalogs for more information.

Auditions for lesson assignments at the intermediate or advanced level take place at the beginning of each term. Students wishing to audition should contact the Peabody Registrar’s Office, 410-234-4578, for information.

Students can sign up for Mattin Center instrumental practice facilities by bringing their Jcard to the office of Student Leadership & Involvement, also located in the Mattin Center.

**Ensemble Membership**

Membership in the Hopkins Symphony Orchestra, the Johns Hopkins University Band, and the Hopkins Glee Club, all of which rehearse and perform on the Homewood campus, is open to all university students. Membership in the Hopkins Symphony Orchestra is by audition on a space-available basis. Seating is limited, especially in the winds. Contact the HSO Office in Shriver Hall at 410-516-6542 for audition information, which can also be found online at http://www.jhu.edu/jhso/about/audition_info.html.

Participation in the Peabody-Hopkins Chorus and Peabody Singers is open to all university students upon completion of a satisfactory audition. Please contact Senior Ensemble Coordinator Paul Faatz at pfaatz1@peabody.jhu.edu if you wish to schedule an audition or would like additional information.

Advanced instrumentalists who wish to be considered for membership in Peabody's large instrumental ensembles—the Peabody Symphony Orchestra, Peabody Concert Orchestra, Peabody Wind Ensemble, Peabody Camerata (contemporary music), Peabody Improvisation and Multimedia Ensemble, and Peabody Jazz Orchestra—are welcome to take part in the placement audition process which takes place each fall during the week prior to Peabody’s registration process. In order to be given an audition slot, instrumentalists must be taking private minor lessons with a Peabody instructor, and that instructor must inform the Peabody Ensemble Office that they’ve evaluated the player’s ability to be on par with that of the student’s peers at Peabody. Occasional exceptions to this policy have been made for players of instruments which are uncommon or currently under-represented at Peabody. Due to the fact that each of the instrumental ensembles can accommodate only a certain number of players of each instrument, placement into these ensembles is made on a space-available basis, with priority given to Peabody instrumental majors for whom participation in large ensembles is a degree requirement.

Please direct any questions regarding participation in Peabody’s large ensemble program to Senior Ensemble Coordinator Paul Faatz at pfaatz1@peabody.jhu.edu.

http://www.peabody.jhu.edu/conservatory/homewood/

**Minor in Music**

The School of Arts and Sciences offers a music minor to students majoring in other fields. The minor is intended for students who have some training and background in music and wish to pursue their interest in a systematic way without getting their degree in the field. It consists of a selection of music courses, including music history, music theory, ensembles, and/or lessons at Peabody. Students must earn a grade of C- or better in all courses applied towards the minor and courses can not be taken satisfactory/unsatisfactory.

**Requirements for the Music Minor**

One additional music theory III course: 3

Total Credits: 22-24

* Two semesters of lessons or ensembles with the approval of minor advisor.
Applied Music Experience

Since the study of music should always take place in the context of practical music making, students completing the minor in music must participate in an applied music experience for at least two semesters. Students must select an applied music experience in consultation with their advisor, who will approve the applied music experience. These experiences are not required to be for academic credit. Most students will select either private instrument lessons at Peabody or participation in an ensemble at Peabody or on the Homewood campus.

For current faculty and contact information go to http://www.peabody.jhu.edu/about/people/

Faculty

Peabody Faculty on Homewood Campus

Richard Giarusso
Department of Musicology: 19th- and 20th-century music, German song, Wagner, Mahler, English music, music appreciation.

Sharon Gail Levy
Department of Music Theory: Piano literature 1750–1950, music analysis, baroque counterpoint, music appreciation.

Laura Protano-Biggs
Department of Musicology: opera, operatic technologies.

David Smooke
Department of Music Theory: Song Analysis, Theories of Rhythm, Popular Music.

Stephen Stone
Department of Music Theory: music theory courses. Advisor for the minor in music theory.

Andrew Talle
Department of Musicology: J.S. Bach, German music, 18th- and 19th-century music, music appreciation.

Elizabeth D. Tolbert
Department of Musicology: expressive culture and intercultural aesthetics, performance, gender, ritual, ethnomusicology, music and language.

Susan Forscher Weiss
Department of Musicology (joint appointment in Romance Languages and Literatures): medieval and Renaissance music, social history, performance practice, history of instruments.

Courses

AS.376.111. Rudiments of Music Theory and Musicianship. 3.00 Credits.
This course introduces written and aural music fundamentals including notation, scales, intervals, chords, rhythm, meter and sight-singing. Students will compose melodies and short pieces and complete listening projects. Course does not count towards the completion of the minor. Instructor(s): L. Perry; M. Rickelton; N. Draper.

AS.376.211. Music Theory I. 3.00 Credits.
Introduction to basic principles of tonal music through listening, analysis and music making. Students study melody, harmony, voice leading, figured bass and dissonance treatment, and will also undertake short composition projects. Must have taken the qualifying examination or AS.376.111. Recommended to be taken concurrently with AS.376.221. Instructor(s): J. Crouch; J. Fishbein; T. Hardaway.

AS.376.212. Music Theory II. 3.00 Credits.
This course continues the written and aural work of the previous course but focuses on chromatic harmony while continuing the study of melody, counterpoint and figured bass. Prerequisite: AS.376.211 (Music Theory I). Recommended to be taken with AS.376.222 (Musicianship II). Instructor(s): N. Draper.

AS.376.214. Music Theory III - Formal Analysis. 3.00 Credits.
An examination of the musical forms of the Common Practice Period and the logic of their structures. Forms studied will include variation, binary, rounded binary, ternary, rondo, sonata-allegro, and sonata-rondo. Recommended Course Background: AS.376.212
Instructor(s): J. Fishbein.

AS.376.215. Music Theory III - Twentieth Century Music. 3.00 Credits.
An exploration of the music and analytical tools of the twentieth century. Topics will include set analysis, serial techniques, exotic and synthetic scales, neo-tonality, and geometric proportions. Recommended Course Background: AS.376.212
Instructor(s): J. Fishbein.

AS.376.216. Theory III - Counterpoint. 3.00 Credits.
A study of contrapuntal music, emphasizing composition in both the sixteenth- and eighteenth-century styles as epitomized by Palestrina and Bach.
Instructor(s): T. Hardaway.

AS.376.217. Music Theory III - Song. 3.00 Credits.
An examination of text-setting and song-writing in a variety of eras and styles. Topics will include art song, lieder, jazz standards, and pop tunes. Instructor(s): M. Rickelton.

AS.376.221. Musicianship I. 2.00 Credits.
Study in the basic skills of reading and hearing music. Recommended to be taken concurrently with AS.376.211, Music Theory I. Instructor(s): K. Wile.

AS.376.222. Musicianship II. 2.00 Credits.
Further studies in the basic skills of reading and hearing music. Recommended to be taken concurrently with AS.376.212, Music Theory II.
Instructor(s): K. Wile.
AS.376.231. Western Classical Music. 3.00 Credits.
This course is an introduction to the rich tradition of Western Classical music. We will examine this music from a variety of perspectives, including: 1) its historical, intellectual, and cultural background; 2) the biographical background of its composers; 3) its stylistic context; and 4) analysis of the music itself. We will approach these perspectives through a variety of activities, such as lectures, readings, writing, exams and in-class discussion.
Instructor(s): R. Giarusso
Area: Humanities.

AS.376.242. Introduction to Popular Music. 3.00 Credits.
A survey of the stylistic features and social contexts of American popular music since the 1950s.
Instructor(s): D. Smooke; M. Rickelson
Area: Humanities.

AS.376.245. Introduction to Sound, Audio, and Recording Arts. 3.00 Credits.
In this course we will undertake a comprehensive survey of sound, audio and the related technology. While covering sound recording from an historical perspective, we'll touch on related material in physics, music, psychology and acoustics. In lab exercises and assignments, students will have the opportunity to learn in a hands-on environment as practical applications of the lecture material are explored. Assignments will include critical listening, in addition to basic recording, editing and mixing of audio. The course will culminate in a comprehensive final project.
Instructor(s): A. Stella
Area: Humanities.

AS.376.250. Introduction to Computer Music. 3.00 Credits.
Introduction to Computer Music is an opportunity for people with no specialized training in music to explore electronic art music as a long-standing, if obscure, body of art, then to participate in creative work in the style. Participants will gain a heuristic understanding of forms of musical composition that operate outside the conventions of regular rhythm and harmony as they record and manipulate sound to sculpt it into original musical works. The lecture portion combines an historical overview of electronic music, rudiments of acoustics and musical perception, and instruction in compositional techniques and in using computers as creative musical tools. The laboratory portion, given at the Digital Media Center, serves as a workshop for creative exploration and for the completion of assigned creative projects including original works of digital sound art.
Instructor(s): S. Burt
Area: Humanities.

AS.376.252. Jazz History. 3.00 Credits.
Survey, investigation, and study of Jazz music and how it shaped American history from its origins to current times.
Instructor(s): I. Sims
Area: Humanities.

AS.376.258. Jazz Improvisation and Theory. 3.00 Credits.
Study of the theory and practice of Jazz Improvisation. Must have taken the qualifying examination or AS.376.111.
Instructor(s): I. Sims

AS.376.280. Creative Musical Improvisation. 3.00 Credits.
A musical performance class and workshop in which we will explore many different aspects of and approaches to creative musical improvisation through readings, lectures, recordings, videos, and personal experience. The emphasis will be placed on free improvisation, without pre-set song forms, chord progressions or other pre-determined structures. Most improvising will be done in small sub-groupings of anywhere from 2 to 5 students who will take turns performing short improvised pieces for the rest of the class and will be followed up with open discussions about the effectiveness of musical choices made by the participants. Ear training exercises and game pieces, such as John Zorn's Cobra will be used to help students gain experience and build confidence improvising in this way. This course is open to any University student who plays an instrument or sings, and is interested in gaining experience with and knowledge about free improvisation.
Instructor(s): M. Formanek
Area: Humanities.

AS.376.303. Musical Theater from Aristophanes to Leonard Bernstein. 3.00 Credits.
This course examines the birth of musical theatre from Greek tragedy through the liturgical and secular plays of the middle ages and Renaissance, to the classical and romantic singspiels, operettas, and zarzuelas of the modern era, by such figures as Aristophanes, Adam de la Halle, Hildegard of Bingen, Angelo Poliziano, Juan del Encina, Wolfgang Amadeus Mozart, Gilbert and Sullivan, Ernesto Lecuona, Igor Stravinsky, and Kurt Weill. These will serve as a backdrop for a closer examination of the musicals of Jerome Kern, Cole Porter, George Gershwin, Irving Berlin, Richard Rodgers, Harold Arlen, Frank Loesser, Leonard Bernstein and others. In addition to studying and placing the works of these Broadway giants into a social, political, and economic context, we will study and perform from representative musicals and attend a performance at the Lyric Theatre. Student will be expected to write a capstone project.
Instructor(s): S. Weiss
Area: Humanities
Writing Intensive.

AS.376.305. Operatic Technologies. 3.00 Credits.
Operatic Technologies offers an introduction to opera via a series of case studies about the materials used to produce it. With a particular focus on the Italian case, we will trace issues such as how auditoriums have historically been illuminated; orchestras directed; machines used to create and sustain illusion and operas simulcast. Students will leave this course with a clear sense of how the look and feel of the operatic experience has changed over time; how technological practices established in the past continue to determine productions now, and how the cinema can be considered an extension of opera. Our course includes a visit to the cinema to see a Metropolitan Opera simulcast. Ability to read music is not required.
Instructor(s): L. Protano Biggs
Area: Humanities
Writing Intensive.
AS.376.308. Meet the Musician: Today's Classical Musician. 3.00 Credits.
Classical music in America is dead," Slate Magazine declared online in January 2014. In this seminar, students will learn that this art form is indeed alive and well. Peabody graduate students will perform solo and small ensemble works, present original research, and participate in open discussions about musical research, performance, professional challenges, and more. Homewood students will read articles on a weekly basis prior to the lecture-recitals. In response to each lecture-recital, students will write weekly reaction papers and prepare questions for the group discussion.
Instructor(s): M. Wertheimer
Area: Humanities
Writing Intensive.

AS.376.309. Exploring American Music Through a Culture Lens. 3.00 Credits.
This course explores the richness of our American musical heritage through a cultural lens. A wide breadth of musical genres will be discussed such as jazz, r&b, rock, rap, pop, country, spirituals, gospel, polka, folk, and classical, as well as the role of music in mass socio-political movements. A spotlight will be given to artists who have successfully crossed genres in their careers such as Winton Marsalis, Louis Moreau Gottschalk, William Grant Still, Scott Joplin, and Gunther Schuller, among others.
Instructor(s): L. Kafka
Area: Humanities
Writing Intensive.

AS.376.317. Jewish Music. 3.00 Credits.
What is “Jewish music,” and what roles has it played in global and Jewish cultures? This course will address these questions, considering genres and contexts of Jewish music from cantillation to klezmer and from art music to Yiddish cinema. Cross listed with Jewish Studies
Instructor(s): J. Walden
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.376.341. Music and Literature: 20th Century Opera. 3.00 Credits.
The varied repertoire of 20th-century opera offers a rewarding context for the study of the rich and complex relationship between music and text. In this course, we will study a select group of 20th -century operas and the source texts (plays, short stories, and poems) upon which they are based. We will consider the changes that occur in translating the texts from one genre to the other, along with ways in which each opera influences our understanding of the source, and vice versa. As part of this focused study, we will also gain a broader familiarity with the styles of some of the most important composers of the last century. Major works to be studied include Pelléas et Mélisande (Maeterlinck & Debussy), Wozzeck (Büchner & Berg), Peter Grimes (Crabbe & Britten), Death in Venice (Mann & Britten), and The Tempest (Shakespeare & Adès).
Instructor(s): R. Giarusso
Area: Humanities
Writing Intensive.

AS.376.371. Introduction to Music Cognition. 3.00 Credits.
What underlies our aesthetic response to music? How and why are we able to identify certain sounds as music? To what extent are music and natural language similar? What is it about music that evokes such powerful emotions such as happiness and sadness? What is unique to musical creativity? Examining such questions from cognitive science, neuroscience, psychology, and philosophical perspectives, this course explores relevant research and theory in the emerging domain of music perception and cognition. Students will complete a final research paper on the topic of their choice that integrates the course material.
Instructor(s): M. Lopez-Gonzalez
Area: Natural Sciences, Social and Behavioral Sciences.

AS.376.404. History of Musical Instruments. 3.00 Credits.
The history, technology, and performance of Western European musical instruments, their precursors, and their non-western counterparts, addressed by experts and explored on visits to historic collections.
Instructor(s): S. Weiss
Area: Humanities
Writing Intensive.

AS.376.407. Music and Evolution. 3.00 Credits.
This course will examine the bio-cultural evolution of music in light of recent interdisciplinary research on the social bases of human cognitive evolution, and explore its implications for current debates in musicology, ethnomusicology, psychology of music, and human cognitive evolution.
Instructor(s): E. Tolbert
Area: Humanities
Writing Intensive.

AS.376.428. 6 Mozart Operas. 3.00 Credits.
Lotharios and lovers, Turkish pashas and harem girls, churlish masters and wily servants, enraged women, bird-catchers, Italian soldiers disguised as Albanians, a Cretan King, and the Queen of the Night. These characters and many others occupy the worlds created in the operas of Wolfgang Amadeus Mozart. This course focuses on six of Mozart’s most enduring operatic works: Idomeneo, The Abduction from the Seraglio, The Magic Flute, The Marriage of Figaro, Don Giovanni, and Così fan tutte. It explores the origins of the stories and characters of these operas, and the musical structures Mozart developed to convey these narratives in music, in the genres of opera seria, Singspiel, and opera buffa. In examining these operas, students will investigate Mozart’s collaborations with librettists, the singers and theatrical venues for which he composed, and the patrons and audiences he hoped to appeal to with these works. Discussions of each opera will also turn to their performance, considering documentation of their premieres and nineteenth-century revivals, and more recent stage and cinematic productions available on DVD and online by directors including Joseph Losey, Ingmar Bergman, Peter Sellars, Jonathan Miller, Robert Wilson, and Julie Taymor, as well as in the movie Amadeus, to compare how interpretations of the opera have differed over time and between directors.
Instructor(s): J. Walden
Area: Humanities
Writing Intensive.
AS.214.333. Shakespeare on the Opera Stage. 3.00 Credits.
From Rossini's Otello to Cole Porter's Kiss me Kate, from Verdi's Macbeth to Leonard Bernstein's West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.377. Gendered Voices. 3.00 Credits.
The course will explore the notion of ‘voice’ in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the ‘voice’ in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa's The Siren and Italo Calvino's A King Listens.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music Through the Ages. 3.00 Credits.
How do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? A variety of readings and musical examples will be discussed, including genres as diverse as medieval songs, madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. The seminar will include field trips to the Baltimore Museum of Art, the Meyerhoff Symphony Hall, the Peabody Institute, and the Evergreen Museum and Library. Students will also have the opportunity to attend a live HD broadcast of Mozart’s Don Giovanni from the Metropolitan Opera. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.211.364. Drama Queens: Opera, Gender, and the Poetics of Excess. 3.00 Credits.
What is a drama queen? According to the Oxford English Dictionary, a drama queen is “a person who is prone to exaggeratedly dramatic behaviour” and “a person who thrives on being the centre of attention.” While drama queens exist among us, the world of opera is certainly one of their ideal environments. Echoing back to their tragic fates, the powerful voices of Dido, Medea, Violetta, and Tosca never ceased to affect their empathetic public. In fact, excess and overreactions are two main features of the operatic experience both on stage and in the audience. By focusing on the ways in which operatic characters are brought to life, the course explores the social, political, and gender dynamics that inform the melodramatic imagination. Students will have the opportunity to attend live HD broadcasts of Verdi’s La Traviata and Tchaikovsky’s Eugene Onegin from the Metropolitan Opera. No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century. 3.00 Credits.
2016 marks the bicentennial of Rossini’s irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart’s The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais’ controversial “Figaro trilogy”, stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretensions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano’s The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick’s Barry Lyndon (1975) and Milos Forman’s Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.211.385. Guillaume de Machaut: exploring medieval authorship in the digital age.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. Students will learn to use digital tools to view and analyze original illustrated musical manuscripts of Machaut’s work.
Instructor(s): T. Rose-Steel.
The course aims to outline the musical reception of Michelangelo’s poems from the 16th to the 21st century. Moving from a critical introduction to Michelangelo’s Rime, the course will address Michelangelo’s own ideas on music and the few musical settings of his poems by contemporary composers. The course will turn then to the Post-Romantic renaissance of Michelangelo’s myth as the context within which the main bulk of musical settings of the artist’s poems was produced. What did composers such as Wolf, Britten, Dallapiccola, Shostakovich and Reimann find in Michelangelo’s poetry? Through a close reading of the poems chosen by the composers, the course will explore the biographical, philosophical and socio-historical implications suggested by the different musical settings. No training in music performance or theory is required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

Sociology
AS.230.371. Sociology of Rock. 3.00 Credits.
This course examines the history and dynamics of rock music using key concepts and perspectives from sociology. The course is divided into four sections, each of which examines the phenomenon of rock music from a different analytical perspective. The first section on the origins of rock looks at the confluence of developments in post-war America, especially in terms of race, class and generational change, which produced this new musical form. The second section, “Rock as Cultural Production,” looks at all aspects of the rock “field,” not just artists and audiences but record labels, stores, DJ’s and radio stations, the music press and journalists, performance venues. The third section examines rock as a force for social change and protest from the 1960s until present, and the final section examines the performative aspects of rock as a kind of “interaction ritual” with its own microsociological dynamics.
Instructor(s): T. Nelson
Area: Social and Behavioral Sciences
Writing Intensive.

Natural Sciences Area Major
The Natural Sciences Area major allows students to combine appropriate upper-level courses in two different areas of natural science. Students may bridge biology and chemistry, chemistry and physics, or some other combination as long as the curriculum forms a coherent whole. The major prepares students for careers in medicine, dentistry, or veterinary science, if the introductory courses chosen by the student include those prescribed for admission to these professional schools.

Students selecting the Natural Sciences Area major can also go on to graduate study in natural science, though they may have to take some remedial work in graduate school, if their undergraduate program does not include courses usually required by a traditional major in a particular subject.

Requirements for a B.A. Degree
Also see Requirements of a Bachelor’s Degree (p. 10).

Requirements of the natural sciences area major are:

### Science Electives

- Natural science or quantitative credits at any level * | 20
- At least five courses of upper level natural science electives at the 300- or 400-level in at most 2 departments ** | 15

### Humanities and Social Science Electives

- Humanities or social science credits at any level **** | 12
- At least four courses of humanities or social science electives at the 300- or 400-level in at most 2 departments ***** | 12

* While students typically take these credits at the 100- or 200-level, 300- or 400-level N or Q credits not used to fulfill the upper level science elective credits may be used.
** Laboratory, research, internship, independent study, and summer courses outside JHU may not be used. Permission to count courses from more than two departments is often granted if the material involved constitutes a coherent program (for example, biochemistry courses from Biology, Biophysics and Chemistry). No more than two (2) courses and no more than six (6) credits may be taken in appropriate areas of engineering, mathematics, applied math and statistics, or (N)-coded psychology.
Minimum GPA Standards
Students must maintain an overall grade point average of 2.0 in their major. Satisfactory/unsatisfactory graded courses may not count towards major requirements.

Near Eastern Studies
http://neareast.jhu.edu/

The Department of Near Eastern Studies offers programs in four main areas: Egyptology, Assyriology, Northwest Semitic languages and literatures (including the Hebrew Bible), and Near Eastern Archaeology. The department approaches Near Eastern civilizations primarily through their own records, and language study is therefore an important part of the curriculum. However, many undergraduate courses require no knowledge of foreign languages and any interested student may take them.

Facilities
The university’s Milton S. Eisenhower Library contains an outstanding collection of books and journals in the branches of Near Eastern studies pursued by the department. The Johns Hopkins Archaeological Museum has a collection of Near Eastern antiquities, including excellent study collections of Egyptian artifacts and Palestinian pottery. The Baltimore-Washington area is especially rich in library and museum facilities. Of special interest to students of the Near East are the Walters Art Museum, the Smithsonian Institution, and the Library of Congress.

The ancient Near East is where history begins. It is where the first crops were sown, the first towns built, and where writing was first invented. The origins of Western culture are to be found in its great civilizations, from the three great monotheistic religions—Christianity, Islam, and Judaism—to everyday aspects of our life that we take for granted, such as the alphabet and marking time by hours and minutes. The Near Eastern studies major can be the focal point of a broad liberal arts education, as well as a basis for graduate study. An undergraduate major can specialize in one of the four main areas of specialization of the department: Egyptology, Assyriology, Northwest Semitic languages and literatures (including the Hebrew Bible), and Near Eastern Archaeology – or in the civilizations of the ancient Near East in general.

Near Eastern Studies Major Requirements
Also see Requirements for a Bachelor’s Degree (p. 10).

Students must earn a “C-” or higher grade in all courses used to satisfy major requirements and courses may not be taken satisfactory/unsatisfactory.

Two Introductory Courses (Select two of the following):

- AS.130.101 Ancient Near Eastern Civilizations
- or AS.130.126 Gods and Monsters in Ancient Egypt
- or AS.130.135 Christianity and Judaism
- or AS.130.252 Introduction to the Ancient Near East
- or AS.130.300 History: Ancient Mesopotamia
- or AS.130.313 History of Egypt from ca. 1200-30 BCE
- or AS.130.306 History of the Ancient Near East
- or AS.130.382 History: Ancient Mesopotamia II when offered
- or AS.130.420 Seminar in Research Methods in Near Eastern Art and Texts
- or AS.130.135 Christianity and Judaism
- or AS.130.301 History of Ancient Syria-Palestine
- or AS.130.302 History: Ancient Syria-Palestine II
- or AS.130.303 Seminar in Near Eastern History: Egypt
- or AS.130.313 History of Egypt from ca. 1200-30 BCE
- or AS.130.300 History Ancient Mesopotamia when offered
- or AS.130.382 History: Ancient Mesopotamia II when offered

Note: AS.130.420 - This writing intensive seminar covers different selected topics in order help students develop skills in specific research areas such as critical reading, analysis, interpretation, and writing. Specific topics vary each semester. AS.130.420 is required of NES Majors, but is also open to non-majors who have taken at least one 100-level and one 300-level Near Eastern Civilization course, or with the consent of the instructor. It is recommended that NES majors take the class during their sophomore or junior years.

* Students pursuing the language focus area need to select four courses from the following languages: Akkadian, Arabic, Ancient Egyptian, Biblical Hebrew, Modern Hebrew or Sumerian. These may not be 300-level.

Honors
Those seniors wishing to be considered for departmental honors may choose to write a senior thesis. A student must maintain a 3.5 GPA in the major (through the junior year) to be eligible for departmental honors. It is advisable for such students to contact a faculty member to supervise the thesis during the spring semester of their junior year. The student should then register for two semesters of independent study in the senior year.

Sample Program
A typical path toward degree completion might include the following sequence of courses:

Near Eastern Studies Minor Requirements

To minor in Near Eastern Studies, a student must complete six courses (18 credits) from among the department’s offerings. One of these courses must be from among the Department’s regularly offered introductory courses to the ancient Near East: 130.101 Ancient Near Eastern Civilizations; 130.126 Gods and Monsters in Ancient Egypt; 130.135 Pyramids, Temples and Tombs. The remaining five courses are selected, in consultation with the director of undergraduate studies in Near Eastern Studies, to meet the needs and interests of the student. Minors may wish to survey all of the different fields covered by the department or to focus on a single ancient language, culture, or methodology in more depth.

Students must earn a “C-” or higher grade in all courses used to satisfy minor requirements and courses may not be taken satisfactory/unsatisfactory.

AS.130.101 Ancient Near Eastern Civilizations 3
or AS.130.126 Gods and Monsters in Ancient Egypt
or AS.130.135 Pyramids, Temples and Tombs

5 Additional Near Eastern Studies Courses 15

Total Credits: 18

The graduate program, the oldest of its kind in the nation, is designed to train professional scholars and teachers in the above-mentioned areas. The courses listed below may be modified in particular years to suit the needs of students currently in residence. Reading and private study under the direction of the faculty are considered as important as work in class. The seminars allow small groups of students and faculty to engage in close study of special problems. As the program is intended to lead to the Ph.D., students are admitted as candidates for the M.A. only in unusual cases.

Requirements for the Ph.D. Degree

Students working full time toward the Ph.D. may expect to do three to four years of course work, after which comprehensive examinations must be written before work on the dissertation begins. The examinations cover a student’s major and minor fields of concentration. After passing these examinations, the student, in consultation with the faculty, prepares a dissertation proposal for faculty consideration and then proceeds to write the dissertation.

An ability to read scholarly French and German is necessary, and an examination in one of these must be passed within the first semester of residence at Hopkins. The examination in the other may be delayed not more than one year. Some command of Greek and Latin is necessary to pursue biblical studies.

Financial Aid

The department awards most students admitted to the Ph.D. program who are in need of financial aid a basic annual fellowship covering full tuition and a full stipend for living expenses for up to five years. For some of this period, the department’s support may take the form of a teaching assistantship. In addition, the period of support may be extended by the various competitive awards available to advanced students within the university. When appropriate, the department will award travel stipends for graduate students to participate in archaeological excavations in the Near East or visit collections in this country and abroad.

For further information on graduate study in Near Eastern Studies, visit the departmental website at http://neareast.jhu.edu/.

For current faculty and contact information go to http://neareast.jhu.edu/directory/

Jacob Lauinger
Assyriology.

Professor Emeritus
Jerrold S. Cooper
W.W. Spence Professor Emeritus of Semitic Languages.
Courses

AS.130.101. Ancient Near Eastern Civilizations. 3.00 Credits.
Review of important issues in ancient Near Eastern history and culture from the Neolithic era to the Persian period. Included will be an examination of the Neolithic agricultural revolution, the emergence of cities, states and writing, and formation of empires. Cultures such as Sumer and Akkad, Egypt, the Hittites, Israelites, Assyrians, Babylonians, and Persians will be discussed.
Instructor(s): G. Schwartz
Area: Humanities.

AS.130.102. From the Neanderthals to the Neolithic. 3.00 Credits.
Emphasizing theories about human biological and cultural development, this course consists of an in-depth survey of Neanderthal morphology and culture, a brief discussion of evolutionary theory and our fossil ancestors, and concludes with an exploration of the mechanisms and results of the shift from hunting and gathering to farming. (Course formerly known as Introduction: Human Prehistory.) Cross-listed with Anthropology.
Instructor(s): S. McCarter
Area: Humanities.

AS.130.105. Freshman Seminar: Sex, Drugs, and Rock & Roll in Ancient Egypt. 3.00 Credits.
This seminar explores the social roles of sexuality, alcohol, other drugs, music, fragrance, and sensuality in secular and religious areas of Egyptian life, largely but not exclusively during the New Kingdom, ca. 1500 to 1000 B.C. The ancient attitudes towards these elements will be explored through the ancient textual sources in translation and the artistic representations.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.106. Freshman Seminar: Ancient Empires. 3.00 Credits.
Freshman Only A case-study approach to the political, social, and cultural history of one of the ancient Near Eastern states commonly described as an “empire,” such as the Akkadian Empire, the Neo-Assyrian Empire, the Neo-Babylonian Empire, or the Achaemenid (Persian) Empire. Individual classes mix a discussion of theoretical issues relevant to the study of ancient empires with close attention to primary sources.
Instructor(s): J. Lauinger
Area: Humanities
Writing Intensive.

AS.130.107. Freshman Seminar - BIG: Monumental Buildings and Sculpture in Antiquity and Today. 3.00 Credits.
The building of sculpted monuments and monumental architecture seems to be a universal human trait in all parts of the world, from the pyramids of ancient Egypt to the inuksuit cairns of the Inuit. What explains our urge to create monumental things? Why are monuments built, and how do we experience them? This course explores various answers to these questions through the disciplines that most frequently address monuments: archaeology, architecture, and art history. We will examine the archaeological record through a series of famous case studies from around the world to investigate the social significance of monuments in their original ancient contexts. We will also determine whether lessons learned from the past can be applied to the study of monuments today, and whether studying modern monuments—including those from our immediate surroundings in Baltimore—can help us understand those of the past. As a writing intensive seminar, students will also be taught techniques in academic essay writing, culminating in a final paper analyzing the social significance of a monument from the past or present.
Instructor(s): J. Osborne
Area: Humanities
Writing Intensive.

AS.130.108. Freshman Seminar: Demons & Doctors: Magic and Medicine in the Ancient Near East. 3.00 Credits.
This course will provide an introduction to the magical and medical arts of ancient Mesopotamia and Syria-Palestine by engaging with ritual texts dealing with disease, exorcisms, sorcery, and harmful ghosts.
Instructor(s): E. Guinn-Villareal
Area: Humanities
Writing Intensive.

AS.130.109. Freshman Seminar: Ancient Homes and Houses. 3.00 Credits.
What will your bedroom tell future archaeologists? What can ancient houses tell archaeologists of past societies? This course explores methods/theories of Household Archaeology in the Near East and beyond.
Instructor(s): J. Swerida
Area: Humanities

AS.130.110. Introduction To Archaeology. 3.00 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): C. Brinker
Area: Humanities, Social and Behavioral Sciences.

AS.130.111. Freshman Seminar: Cleopatra’s Egypt. 3.00 Credits.
Egypt in the time of Cleopatra was a fascinating mix of peoples and cultures. Jews, Greeks, and other ethnic groups lived in this unique landscape along with the native Egyptians. In this class we will consider the rich civilization and complex history of Egypt during the reign of this legendary Queen.
Instructor(s): R. Jasnow
Area: Humanities
Writing Intensive.
AS.130.116. Freshman Seminar: Ritual and Magic in Ancient Egypt. 3.00 Credits.
This course will serve to introduce students to the study of religion, ritual and magic through the lens of a specific culture: ancient Egypt. Throughout the course students will be introduced to ancient Egyptian culture and will interact with Egyptian texts and artifacts, including those found in the collections of the Johns Hopkins Archaeological Museum, in order to illustrate key concepts.
Instructor(s): M. Fraser
Area: Humanities.

AS.130.118. Ancient Israel: In Their Own Words. 3.00 Credits.
This course will focus on the inscriptions of ancient Israel and its neighbors from the first millennium BCE. Texts speak to us directly in ways that other nonverbal archaeological remains – such as architecture or pottery – cannot. Also, secondary sources written by later historians and commentators are similarly limited, as they are separated from original events by space, time, and cultural situation. Considering how individuals from an ancient culture articulate thoughts “in their own words” is invaluable to any meaningful reconstruction of history. Participants will learn to glean information from inscriptions, including those that are fragmentary or seemingly mundane. They will experience hands-on history writing, using primary sources in translation, though those with any knowledge of ancient languages, especially Classical Hebrew, will be able and encouraged to engage with the texts in their original vernacular. Basic knowledge of world history will be helpful though not prerequisite.
Prerequisites: AS.130.134
Instructor(s): H. Parker
Area: Humanities.

AS.130.122. Freshman Seminar: The Archaeology of Death, Burial, and the Human Skeleton. 3.00 Credits.
This course will introduce students to the archaeological investigation of past human populations through their mortuary and physical human remains. To this end, major theories and methodologies will be introduced, along with pertinent case studies for discussion.
Instructor(s): C. Brinker
Area: Humanities.

AS.130.126. Gods and Monsters in Ancient Egypt. 3.00 Credits.
To provide a basic introduction to Egyptian Religion, with a special focus on the nature of the gods and how humans interact with them. We will devote particular time to the Book of the Dead and to the magical aspects of religion designed for protective purposes.
Instructor(s): R. Jasnow
Area: Humanities.

AS.130.135. Pyramids, Temples and Tombs. 3.00 Credits.
Introduction to the monuments and culture of Egypt from 3500 B.C. to 100 A.D. From the pyramids at Giza to Hellenistic Alexandria, this course surveys in slide illustrated lectures the remains of one of the world’s greatest early cultures.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.140. Hebrew Bible / Old Testament. 3.00 Credits.
The Bible is arguably the most read and yet most misinterpreted book of all time, one of the most influential and yet most misapplied work of literature. The Hebrew Bible (Old Testament) is Scripture to Jews and Christians yet also a rich collection of literature with numerous literary genres that has been highly influential on secular Western culture. At its core, it is our most important literary source that (when wed with archaeology) helps us to understand the people and culture of Iron Age Israel and Judah. This is an introductory course surveying of the books of the Hebrew Bible (Old Testament) giving primary attention to the religious ideas they contain and the ancient contexts in which they were composed. Topics include: The Academic Study of Religion, Ancient Creation Accounts, Ancestral Religion, The Exodus and Moses, Covenant, Tribalism and Monarchy, The Ideology of Kingship, Prophecy, Priestly Sources, Psalms, Wisdom Literature, and Apocalyptic Thought.
Instructor(s): T. Lewis
Area: Humanities.

AS.130.170. Diplomacy and Conflict in the Ancient Middle East. 3.00 Credits.
The Middle East is home to the invention of agriculture, cities, and writing. It is also in the Middle East that we find evidence of humanity’s earliest diplomatic activity in, for instance, the actual letters sent by ancient kings to one another, the treaties drawn up after their conflicts, and the inscriptions that commemorate their conquests. In this course, we examine texts such as these to explore questions such as: How do we characterize the international system of the ancient Middle East? Does this system change over the approximately two millennia for which we have documentation? Is it better to approach ancient diplomacy through present-day eyes or in the context of ancient world-views? Is an understanding of diplomacy in the ancient Middle East relevant to our understanding of modern international relations? All texts read in translation.
Instructor(s): J. Lauinger
Area: Humanities.

AS.130.174. Scientists and Soothsayers: The Pursuit of Knowledge in Ancient Egypt. 3.00 Credits.
The ancient world viewed Egypt as a repository of wisdom and learning, and even today, Egypt possesses in the modern consciousness a reputation for secret knowledge. From within Egypt, a diverse corpus of texts meant to record and transmit knowledge have survived and attest to Egyptian “scholarship.” This course will focus on what kinds of knowledge belonged to this written tradition (3000 BCE to 300 CE) and how those texts reflected broader social and cultural norms. This course will also consider, where relevant, the relationship between the intellectual traditions of Egypt and other societies of the ancient world, particularly Greece and Mesopotamia. Strong correlations between the Egyptian material and modern intellectual and scientific traditions, such as mathematics, astronomy, and medicine exist; but magic, divination, and religion were often treated in the same systematic, critical manner by the Egyptians. Thus the course will challenge modern understandings of science, and modern dichotomies such as rational versus irrational. After a brief introduction to Egypt, the first few weeks will concern who created these texts, who had access to them, and their physical and intellectual milieu. Then, each week will cover a particular area of knowledge, its primary sources, social and multicultural context, and its relationship to the theoretical themes of the course.
Instructor(s): K. Davis
Area: Humanities.
AS.130.177. World Prehistory: An Anthropological Perspective. 3.00 Credits.
How and why did our nomadic hunting and gathering ancestors become farmers? What led agricultural societies to build cities, develop writing, religious institutions, wage war, and trade for exotic goods? This course surveys prehistory and ancient history from the origins of human culture to the emergence of civilization. Although prehistory and ancient history yield evidence of tremendous cultural diversity this course emphasizes common elements of past human experience, culture, and culture change. These include the origins of modern humans and their adjustment to a variety of post-ice age environments, shifts from hunting and gathering to agricultural lifeways, and the initial development of the world’s earliest cities and civilizations.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

AS.130.201. Cleopatra. 3.00 Credits.
Few individuals in history have left as lasting an impression as that of Cleopatra. In this seminar-style class we will examine both the fact and fiction associated with her eventful life (and death). All readings in translation.
Instructor(s): R. Jasnow
Area: Humanities
Writing Intensive.

AS.130.202. Ancient Mythology. 3.00 Credits.
This course explores the mythology of the ancient Near East from the invention of writing in Sumer in 3000 B.C. until the conquest of Alexander the Great near the end of the first millennium B.C. Mythological texts from Mesopotamia, Egypt, Anatolia, the Levant, and the Bible will be read from a comparative perspective. Special attention is paid to the origin and development of the epic, culminating in the great Epic of Gilgamesh, but considerable time is also given to the vast mythological and historical literature, and such diverse genres as love poetry, proverbs, humorous dialogues, Omens, and legal and medical texts. All readings are in English translation.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.203. Archaeology of Africa: From Human Origins to the Emergence of Civilizations. 3.00 Credits.
This course examines Africa's ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrower
Area: Humanities.

AS.130.212. The Archaeology of Death, Burial and The Human Skeleton. 3.00 Credits.
This course will introduce students to the archaeological investigation of past human populations through their mortuary and physical human remains. To this end, major theories and methodologies will be introduced, along with pertinent case studies for discussion. Dean's Teaching Prize Fellowship Course.
Instructor(s): C. Brinker
Area: Humanities.

AS.130.213. Introduction to Ancient Egyptian Art. 3.00 Credits.
This class is a combination of illustrated lecture and discussion, punctuated with visits to museums with Egyptian collections. Participants must be able to join at least one overnight trip to New York and/or Boston (weekend) and be available for two half day visits to Philadelphia and Washington, D.C. or elsewhere (TBA as best for participants), in addition to visiting Baltimore institutions with the class as part of the course. Discussion of sculpture will take place in front of the objects, so attendance is important for the visits.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.215. David and Solomon in History and Legend. 3.00 Credits.
TBD
Instructor(s): A. Knapp
Area: Humanities.

AS.130.249. Sorcerers, Warriors and Femmes Fatales: Intro to Ancient Egyptian Literature. 3.00 Credits.
This course explores the ancient Egyptian literature of the first millennium BCE and the Roman Era: stories of magic, epic battles, animal fables, and even cultic sex hymns.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.130.251. Made for the Gods: Votive Egyptian Objects in the Archaeological Museum. 3.00 Credits.
This course investigates Egyptian votive objects made as gifts to the Gods. Students will learn about Egyptian religious practices and study groups of objects in the Archaeological Museum to learn to identify how they were produced, when, and for what functions. Physical analyses of the objects will be part of the class and facilitated by museum staff.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.252. New Kingdom Egypt: Empire and Cosmopolitanism. 3.00 Credits.
This class investigates the history and art of Egypt empire period when pharaoh ruled over an area reaching from the Sudan to the north of Syria. Tutankhamun, Akhenaten, and Ramesses the Great represent the period, and the class will study how Egypt's interaction outside its borders affected the political, social, and artistic environment at home and abroad.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.255. From Feast to Famine in the Ancient World. 2.00 Credits.
Biological life, on its most basic level, is the quest for sustenance. However, in human societies, food transcends mere sustenance to become a major actor in each society’s structure and beliefs. This dual nature of food as basic necessity and cultural touchstone makes its study of great importance to our understanding of civilization, both past and present. This class will explore the role food has played in Mesopotamian, Egyptian, Mesoamerican, and Andean cultures as evidenced in the archaeological record. Dean’s Teaching Prize Fellowship Course.
Instructor(s): A. Maskevich
Area: Humanities, Social and Behavioral Sciences.
AS.130.258. Ceramic Analysis in Archaeology. 3.00 Credits.
At archaeological sites following the invention of pottery roughly 10,000 BCE, ceramics are the single most frequent and ubiquitous class of artifact that archaeologists uncover. This class, which will be conducted in the Hopkins Archaeological Museum as a combination of lectures, discussions, and hands-on interactions with ancient and modern ceramics, surveys the methods and interpretive techniques that archaeologists use when studying this important category of material culture. Specific topics include manufacturing techniques, craft specialization, typology and chronology, production and exchange, scientific analyses, stylistic and functional analysis, and socio-political organization.
Instructor(s): J. Osborne
Area: Humanities.

AS.130.259. Ancient Science and Technology. 3.00 Credits.
A survey of scientific practices and technological innovations in the ancient world, including astronomy, medicine, law, and divination. Special attention will be devoted to the relationship between magic and science during the periods covered.
Instructor(s): P. Delnero
Area: Humanities, Social and Behavioral Sciences.

AS.130.270. Ancient Demonology. 3.00 Credits.
After identifying the character of demons, ghosts, and zombies in modern literature and popular culture, this class will investigate similar disruptive and threatening creatures in the literature of Ancient Egypt, Mesopotamia, Israel, and Greece, as well as early Christian traditions. By the end of the term, students will be able to address the question, What makes an evil spirit ‘evil?’
Instructor(s): M. Simone
Area: Humanities.

AS.130.300. History Anc Mesopotamia. 3.00 Credits.
A survey of the history of Sumer, Babylonia, and Assyria.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.301. History of Ancient Syria-Palestine. 3.00 Credits.
A survey of the history of Ancient Syria and Cannan, including Ancient Israel.
Instructor(s): P. McCarter
Area: Humanities.

AS.130.302. History: Ancient Syria-Palestine II. 3.00 Credits.
A survey of the history of Ancient Syria and Cannan, including ancient Israel. Taught with AS.134.661. Cross-listed with Jewish Studies.
Instructor(s): P. McCarter
Area: Humanities.

AS.130.303. Seminar Near Eastern History: Egypt. 3.00 Credits.
This class is one of the upper level choices for majors in Near Eastern Studies. It includes Graduate Students. Taught jointly with AS.131.600
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.304. Ancient Cities. 3.00 Credits.
This course is a survey of cities in the ancient world from Uruk, around 3000 BC until the conquest of Babylon in 539 BC. The most important cities from this period will be studied and discussed from a historical, literary, and anthropological perspective. The topics covered include (1) the archaeological and textual evidence for these cities, (2) the depiction of these cities in literary and mythological works, and (3) contemporary theoretical approaches to understanding ancient urbanism.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.312. Ancient Medicine. 3.00 Credits.
A study of medicine in the ancient Near Eastern and Aegean worlds, including an examination of the practices of medicine in these ancient societies but with primary emphasis given to ideas about health and disease. Readings are selected from primary sources in the writings of ancient Egypt, Mesopotamia, Israel, Greece, and Rome. Topics treated include the sources of our knowledge; the nature of medical practitioners, medical treatment, and surgery; beliefs about disease and the etiology of illness; concepts of contagion and ritual purity. Special attention is given to Hippocratic medicine, the synthesis of Galen, and the rise of humoralism.
Instructor(s): P. McCarter
Area: Humanities
Writing Intensive.

AS.130.313. History of Egypt from ca. 1200-30 BCE. 3.00 Credits.
In this class we will study selected historical topics from the end of the New Kingdom (ca. 1200 BCE) to the death of Cleopatra VII (30 BCE).
Instructor(s): R. Jasnow
Area: Humanities
Writing Intensive.

AS.130.323. Cleopatra's Egypt: Ptolemaic-Roman Egypt. 3.00 Credits.
This lecture course is a survey of the history, society, and culture of Graeco-Roman Egypt. We will concentrate on Ptolemaic Egypt (ca. 332-30 B.C.), but will also devote some time to Roman Egypt, especially to the subjects of the decline of paganism and spread of Christianity in Egypt.
Instructor(s): R. Jasnow
Area: Humanities

AS.130.328. Ancient Egypt /Africa. 3.00 Credits.
Recent excavation and research have shed light on several ancient cultures of the Nile and its tributaries. We will look at the available archaeological and textual (all Egyptian) evidence for these societies and their interactions with Egypt between 3500 and 300 B.C. We will also discuss research aims and methods employed now and in the past in Egypt and the Sudan.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.329. Ancient Egyptian Art and Archaeology. 3.00 Credits.
A survey of Egyptian art as seen in the temples, tombs, funerary, and minor arts of Egypt between 3000 and 100 B.C. Slide lectures will provide a survey of art from the Pyramids to Augustus Caesar and will focus on such topics as the principles of Egyptian art; can the term art apply to early Egypt? How were artisans trained and what techniques and materials were utilized in their work? Co-listed (meets with) AS.133.750.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.
**AS.130.330. The Garden of Eden. 3.00 Credits.**
References to the story of the Garden of Eden can be found in every significant issue of our time, from sex to politics, from race to the environment. The course will examine the story itself as well as how it's been interpreted, leading up to today. Enthusiastic participation required. Instructor(s): E. Robbins  
Area: Humanities.

**AS.130.333. Ancient Egypt and Her Neighbors. 3.00 Credits.**
An introduction to ancient Egypt's portrayals of and interactions with foreign lands and peoples, including Syria-Palestine to the east and Nubia to the south. Topics include trade, travel, warfare and diplomacy. Textual, iconographical and archaeological sources will be considered. Instructor(s): A. Arico  
Area: Humanities.

**AS.130.334. Egyptian Funerary Arts in the Archaeological Museum. 3.00 Credits.**
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum's website and present their results for inclusion in the museum cataloguing project. Instructor(s): B. Bryan; S. Balachandran  
Area: Humanities.

**AS.130.335. The Pharaohs: Power and Authority in Ancient Egypt. 3.00 Credits.**
This course will introduce students to the triumphs and struggles of the men (and women) who ruled ancient Egypt, comparing Egyptian kingship to other ancient and modern systems of political power and authority. Instructor(s): K. Bryson  
Area: Humanities.

**AS.130.341. Traditionalism vs. Orthodoxy in the Modern Era: The Case of Judaism. 3.00 Credits.**
During the Modern Era in European history, the Traditionalist Jewish civilization of Europe that had evolved over many centuries went into deep crisis. The new political, social, and intellectual realities which characterized Modernity seriously challenged, overwhelmed, and indeed threatened to destroy the Jewish Traditionalist culture and society. In response, different Traditionalist thinkers and communities evolved a number of strategies for surviving in a modern environment, strategies that unexpectedly transformed Traditionalism into something different, which came to be called Orthodox Judaism. This course explores this process of transformation, which has had an important impact on Jewish life in the modern and post-modern eras. Cross-listed with Jewish Studies. Instructor(s): D. Katz  
Area: Humanities.

**AS.130.343. Dead Sea Scrolls-English. 3.00 Credits.**
A survey of the manuscripts found at Qumran and other sites near the Dead Sea. Instructor(s): P. McCarter  
Area: Humanities.

**AS.130.346. Introduction to the History of Rabbinic Literature. 3.00 Credits.**
Broadly surveying classic rabbinic literature, including the Talmud and its commentaries, the legal codes and the response, this seminar explores the immanent as well as the external factors that shaped the development of this literature, the seminal role of this literature in Jewish self-definition and self-perception, and the role of this literature in pre-modern and modern Jewish culture. Instructor(s): D. Katz  
Area: Humanities.

**AS.130.348. Religious Law Wrestles With Change: The Case of Judaism. 3.00 Credits.**
Description: How does a religious system which defines its ancient laws as God-given and unchangeable apply them to radically different and changing social, political and intellectual situations? This course explores the literature of Questions and Answers (She’elot u-Teshuvot), the Jewish legal responses which have struggled to match Jewish religious law to modern life for fifteen centuries. A sweeping survey of Jewish history as revealed by one of its most impenetrable yet fascinating sources. Cross-listed with Jewish Studies. Instructor(s): D. Katz  
Area: Humanities.

**AS.130.352. History of Hasidism. 3.00 Credits.**
Although it appears to be a relic of pre-modern Judaism, Hasidism is a phenomenon of the modern era of Jewish history. This course surveys the political and social history of the Hasidic movement over the course of the last three centuries. Students will also explore basic features of Hasidic culture and thought in their historical development. Cross-listed with Jewish Studies. Instructor(s): D. Katz  
Area: Humanities.

**AS.130.353. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS. 3.00 Credits.**
This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.131.653. Instructor(s): M. Harrower  
Area: Natural Sciences, Social and Behavioral Sciences.

**AS.130.354. Archaeological Method and Theory. 3.00 Credits.**
Climate change, population growth, war - what questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review major theoretical currents in archaeology including evolutionary, cultural-historical, processual and post-processual approaches and discuss the future of archaeology as a scientific and humanistic discipline. Basic techniques for analyzing major categories of artifacts such as lithics, ceramics, archaeobotanical, and zooarchaeological materials will also be introduced. Instructor(s): M. Harrower  
Area: Humanities, Social and Behavioral Sciences.
AS.130.357. Geographic Information Systems in Archaeology. 3.00 Credits.
Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI's ArcGIS software. Taught with AS.131.657.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.130.359. Reading the Talmud in the Post-Talmudic Era. 3.00 Credits.
Life and Death, Survival and Martyrdom, in the Literature of Post-Talmudic Rabbinic Judaism. Readings in the Original Sources (Knowledge of Hebrew Required). Cross-listed with Jewish Studies.
Instructor(s): D. Katz
Area: Humanities.

AS.130.364. Archaeology of Arabia. 3.00 Credits.
This course examines the archaeology of the Arabian Peninsula from the earliest Paleolithic in the region (c. 1.5 million years ago) through the first few centuries of the Islamic era (c. 1000 AD). We will review basic geology and environmental conditions, examine the development of animal herding and crop cultivating lifeways, and scrutinize the rise of ancient South Arabian complex societies and civilizations. Co-listed with AS.131.664.
Instructor(s): M. Harrower
Area: Humanities.

AS.130.366. Reading the Talmud in Pre-modern Jewish Culture.
Attempting to Cope With Abusive Husbands: Annulment of Marriage in the Literature of Post Talmudic Rabbinic Judaism. 3.00 Credits.
The evolution of Talmudic thinking resulted in laws which made marriage too easy, divorce too difficult. This generated centuries of attempts to grapple with the consequences of this conundrum in real-life situations. This course analyzes the literature produced by these attempts. Students will read texts in original Hebrew. 
Instructor(s): D. Katz
Area: Humanities.

AS.130.367. Jerusalem: The Holy City in History and Archaeology. 3.00 Credits.
Jerusalem has a global significance utterly disproportionate to its size or wealth, and it has been this way since the days when the city was first settled. On the one hand, this is due to Jerusalem’s role as a sacred space for all three of the world’s largest monotheistic religions: Christianity, Islam, and Judaism. On the other, Jerusalem has long been the fulcrum of geopolitical struggles in the Middle East and beyond. This lecture course explores Jerusalem’s political, cultural, and religious trajectory over the past three millennia through the lens of the city’s amazingly rich historical and archaeological records. In so doing, we unravel the mythical and historical threads that combine to create the powerful symbolic resonance of Jerusalem today, discovering en route that, when it comes to Jerusalem, identifying what is “myth” and what is “history” is a complex and contested undertaking.
Instructor(s): J. Osborne
Area: Humanities.

AS.130.368. Nomads, Tyrants and Kings: Water in the Ancient Near East. 3.00 Credits.
This course explores economic and social histories of water in the ancient Near East. It examines water’s diverse roles in ancient Mesopotamian, Egyptian, Levantine and South Arabian agriculture, politics, ritual and religion, including water’s interconnected significance in Judaism, Christianity, and Islam. Taught jointly with AS.131.615.
Instructor(s): M. Harrower
Area: Humanities.

AS.130.369. Law in the Ancient Middle East. 3.00 Credits.
The Middle East offers the earliest and most abundant source material for reconstructing ancient legal systems. From stone monuments like the Code of Hammurabi to clay tablets the size of postage stamps, the cuneiform record provides a window into not just legal thought but actual legal practice in the ancient Middle East. Surveying a span of more than two thousand years, we will explore the law in both its deep structure and its regional and temporal diversity. Specific topics will include homicide and personal injury law, family law, the legal status of women, codes and codification, and ancient Israelite law in its Middle Eastern context. No background is required and all texts are read in translation, but every enrolled student is expected to actively participate in this seminar-style course.
Instructor(s): J. Lauinger
Area: Humanities.

AS.130.371. Ritual and Magic in Ancient Egypt. 3.00 Credits.
This course will serve to introduce students to the study of religion, ritual, and magic through the lens of a specific culture: ancient Egypt. Throughout the course students will be introduced to ancient Egyptian culture and will interact with Egyptian texts and artifacts, including those found in the collections of The Johns Hopkins Archaeological Museum, in order to illustrate key concepts. Dean’s Teaching Fellowship course.
Instructor(s): M. Fraser
Area: Humanities.

AS.130.374. The Archaeology of Imaginary, Entangled, Hybrid Globalizations. 3.00 Credits.
In this course students will read and examine two recent books, Michael Shanks’ (2012) “The Archaeological Imagination”, Ian Hodder’s (2012) “Entangled: An Archaeology of the Relationships between Humans and Things” and critically compare them with readings on archaeologies of world systems, colonialism, hybridity, and globalization. In particular, we will examine how post-colonial social theory can inform and enhance understandings of ancient past and how it might interface with scientific, empirically oriented archaeological field research and history building. Course requirements will include a short weekly written response to the readings - no exams or term paper will be required. (Taught jointly with AS.131.674)
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.130.376. Ancient Ritual. 3.00 Credits.
This course will introduce students to the vast body of rituals that were practiced and performed in antiquity, with a particular emphasis on rituals from ancient Mesopotamia, Egypt, and the Hebrew Bible. In addition to examining rituals from a comparative perspective, anthropological and sociological studies of ritual will be read and discussed to shed light on the social, cultural, and political significance of ritual in the ancient world and beyond.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.377. Creating an Egyptian Temple. 3.00 Credits.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art — particularly wall reliefs — in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.378. Geoarchaeology: Applications of Earth Science to Archaeology. 3.00 Credits.
Geoarchaeology is a multidisciplinary subfield that applies the tools and techniques of earth science to understand ancient humans and their interactions with environments. This course examines basic topics and concepts, including archaeological site formation, paleo-environmental reconstruction, raw materials and resources, soil science, deposition and erosion of wind and water-borne sediments in different environments such as along rivers, lakes and coastlines, radiocarbon and other chronometric dating methods, and ground-based remote sensing, including ground penetrating radar.
Instructor(s): M. Harrower
Area: Natural Sciences, Social and Behavioral Sciences.

AS.130.379. The Development of Useful Things: Technology and Economy in the Ancient World. 3.00 Credits.
This course provides an overview of technological developments in the ancient world, by foregrounding the development of objects (stone tools, pottery, metals) and of non-material technologies (agriculture, animal domestication, writing).
Instructor(s): I. Dumitru
Area: Humanities.

AS.130.380. Elementary Akkadian. 3.00 Credits.
An introduction to the paleography, grammar and lexicon of the Akkadian language, and the reading of simpler texts in that language. Co-listed with AS.132.600.
Instructor(s): J. Lauinger; P. Delnero
Area: Humanities.

AS.130.381. History of Mesopotamia II. 3.00 Credits.
A survey of the history of Sumer, Babylonia, and Assyria.
Instructor(s): J. Lauinger
Area: Humanities.

AS.130.382. Elementary Akkadian II. 3.00 Credits.
An introduction to the paleography, grammar, and lexicon of the Akkadian language, and the reading of simpler texts in that language. Continues AS.130.381.
Instructor(s): J. Lauinger
Area: Humanities.

AS.130.383. Old Kingdom Art. 3.00 Credits.
This course will explore the artistic expression of Egyptian culture from the 3rd through the 6th Dynasties, ca. 2700-2100 B.C. Tombs, temples, statuary, and two-dimensional wall decoration provide a large visual vocabulary of Egyptian concepts. This class will look at these elements, separately and in combination in order to consider the intentions behind the art and evaluate the degree to which religious and ideological symbolism, known from later Egyptian art, should be understood in the early pyramid-building era.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.384. Introduction to Middle Egyptian. 3.00 Credits.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). In the second semester, literary texts and royal inscriptions will be read. Course meets with AS.133.600.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.130.400. Elementary Biblical Hebrew. 3.00 Credits.
Survey of grammar and reading of simple texts. May not be taken on a satisfactory/unsatisfactory basis.
Instructor(s): K. Medill
Area: Humanities.

AS.130.401. Introduction To Middle Egyptian. 3.00 Credits.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). Co-listed with AS.133.601.
Prerequisites: Prereq: AS.130.400 or equivalent.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.130.420. Seminar in Research Methods in Near Eastern Studies: Text and Image in Ancient Near Eastern Art and Texts. 3.00 Credits.
This writing intensive seminar examines how textual and artistic production were used separately and together to engender and communicate social, cultural, and political meaning in ancient Mesopotamia and the rest of the Near East from the 4th millennium to the Hellenistic period. Using a variety of case studies, students will develop skills in specific research skills such as critical reading, analysis, and interpretation. AS.130.420 is required of NES Majors, but is also open to non-majors who have taken at least one 100-level and one 300-level Near Eastern Civilization course, or with the consent of the instructor. Cross-listed with History of Art.
Instructor(s): M. Feldman; P. Delnero
Area: Humanities.

AS.130.440. Elementary Biblical Hebrew. 3.00 Credits.
Introduction to the grammar, vocabulary, and writing system of biblical Hebrew.
Instructor(s): K. Medill
Area: Humanities.

AS.130.441. Elementary Biblical Hebrew. 3.00 Credits.
Survey of grammar and reading of simple texts. (Credit given only on completion of AS.130.440 and AS.130.441). May not be taken on a satisfactory/unsatisfactory basis.
Instructor(s): K. Medill
Area: Humanities.

AS.130.442. Readings - Hebrew Prose. 3.00 Credits.
Reading of biblical Hebrew prose, especially from the Pentateuch, Joshua, Judges, Samuel, and Kings. Cross-listed with Jewish Studies.
Instructor(s): R. Liebermann
Area: Humanities.
AS.130.443. Reading Of Hebrew Prose. 3.00 Credits.
Reading of Biblical Hebrew prose, especially from the Pentateuch, Joshua, Judges, Samuel, and Kings.
Instructor(s): R. Liebermann
Area: Humanities.

AS.130.501. Readings & Research. 3.00 Credits.
Instructor(s): M. Feldman.

AS.130.502. Readings & Research. 0.00 - 3.00 Credits.

AS.130.504. Independent Study. 1.00 - 4.00 Credits.
Instructor(s): B. Bryan; G. Schwartz; P. Delnero; P. McCarter; R. Jasnow.

AS.130.505. Independent Study-Archaeology Fieldwork. 1.00 Credit.
Instructor(s): G. Schwartz.

AS.130.506. Independent Study-Archaeology Fieldwork. 1.00 - 3.00 Credits.
Instructor(s): G. Schwartz.

AS.130.510. Archaeology Major Honors Thesis I. 3.00 Credits.
Prerequisites: AS.131.444, AS.131.454
Instructor(s): E. Anderson; G. Schwartz; M. Harrower
Writing Intensive.

AS.130.511. Archaeology Major Honors Thesis II. 3.00 Credits.
Prerequisites: AS.130.510
Instructor(s): B. Bryan; E. Anderson; G. Schwartz; L. Deleonardis; M. Roller
Writing Intensive.

AS.130.590. Independent Study. 0.00 - 3.00 Credits.
Instructor(s): M. Harrower.

Seminar in Near Eastern History: Egypt. Taught jointly with AS.130.300.
Instructor(s): P. Delnero.

A three-year history cycle required of all graduate students and forming the core of our graduate program. One year each will be devoted to Egyptian history, Mesopotamian history, and Syro-Palestinian history.
Instructor(s): J. Lauinger.

AS.131.613. Archaeology of Africa: From Human Origins to the Emergence of Civilizations.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrower
Area: Humanities.

This course explores economic and social histories of water in the ancient Near East. It examines water’s diverse roles in ancient Mesopotamian, Egyptian, Levantine and South Arabian agriculture, politics, ritual and religion, including water’s interconnected significance in Judaism, Christianity, and Islam. Taught jointly with AS.130.368
Instructor(s): M. Harrower
Area: Humanities.

Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz.

AS.131.635. Seminar: Near East Archaeology.
Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz
Area: Humanities.

AS.131.653. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS.
This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.130.353.
Instructor(s): M. Harrower
Area: Natural Sciences, Social and Behavioral Sciences.

Climate change, population growth, war - what questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review major theoretical currents in archaeology including evolutionary, cultural-historical, processual and post-processual approaches and discuss the future of archaeology as a scientific and humanistic discipline. Basic techniques for analyzing major categories of artifacts such as lithics, ceramics, archaeobotanical, and zooarchaeological materials will also be introduced.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI’s ArcGIS software. Taught with AS.130.357.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.131.664. Archaeology of Arabia.
This course examines the archaeology of the Arabian Peninsula from the earliest Paleolithic in the region (c. 1.5 million years ago) through the first few centuries of the Islamic era (c. 1000 AD). We will review basic geology and environmental conditions, examine the development of animal herding and crop cultivating lifeways, and scrutinize the rise of ancient South Arabian complex societies and civilizations. Co-listed with AS.130.364.
Instructor(s): M. Harrower.
AS.131.674. The Archaeology of Imaginary, Entangled, Hybrid Globalizations.
In this course students will read and examine two recent books, Michael Shanks’ (2012) "The Archaeological Imagination", Ian Hodder’s (2012) "Entangled: An Archaeology of the Relationships between Humans and Things" and critically compare them with readings on archaeologies of world systems, colonialism, hybridity, and globalization. In particular, we will examine how post-colonial social theory can inform and enhance understandings of ancient past and how it might interface with scientific, empirically oriented archaeological field research and history building.
Course requirements will include a short weekly written response to the readings - no exams or term paper will be required. (Taught jointly with AS.130.374)
Instructor(s): M. Harrow
Area: Humanities, Social and Behavioral Sciences.

AS.131.678. Geoarchaeology: Applications of Earth Science to Archaeology.
Geoarchaeology is a multidisciplinary subfield that applies the tools and techniques of earth science to understand ancient humans and their interactions with environments. This course examines basic topics and concepts, including archaeological site formation, paleo-environmental reconstruction, raw materials and resources, soil science, deposition and erosion of wind and water-borne sediments in different environments such as along rivers, lakes and coastlines, radiocarbon and other chronometric dating methods, and ground-based remote sensing, including ground penetrating radar.
Instructor(s): M. Harrow
Area: Natural Sciences, Social and Behavioral Sciences.

AS.131.800. Readings & Research.
Instructor(s): Staff.

AS.131.801. Readings and Research.
Instructor(s): Staff
Area: Humanities.

AS.131.848. Dissertation Research.
Instructor(s): Staff.

Instructor(s): Staff.

AS.132.600. Elementary Akkadian.
An introduction to the paleography, grammar and lexicon of the Akkadian language, and the reading of simpler texts in that language. Co-listed with AS.130.381
Instructor(s): J. Lauinger; P. Delnero.

AS.132.601. Elementary Akkadian II.
An introduction to the paleography, grammar and lexicon of the Akkadian language, and the reading of simpler texts in that language. Undergraduates admitted to this course earn 4.5 credits per semester.
Instructor(s): J. Howard
Area: Humanities.

In this course a selection of intermediate level Akkadian texts from different genres and period will be read, analyzed and discussed. To build on skills learned in Introduction to Akkadian, specific emphasis will be placed on understanding more advanced grammatical forms and learning how to critically use research tools like the Chicago Assyrian Dictionary and von Soden's Akkadisches Handwoerterbuch.
Instructor(s): J. Lauinger.

This course introduces students to letters written in the Akkadian language from a variety of historical periods. Recommended course background: AS.132.600 and AS.132.601.
Instructor(s): J. Lauinger
Area: Humanities.

This writing intensive seminar examines how textual and artistic production were used separately and together to engender and communicate social, cultural, and political meaning in ancient Mesopotamia and the rest of the Near East from the 4th millennium to the Hellenistic period. Using a variety of case studies, students will develop skills in specific research skills such as critical reading, analysis, and interpretation. AS.130.420 is required of NES Majors, but is also open to non-majors who have taken at least one 100-level and one 300-level Near Eastern Civilization course, or with the consent of the instructor.
Cross-listed with History of Art.
Instructor(s): M. Feldman; P. Delnero
Area: Humanities
Writing Intensive.

Students will read a variety of Akkadian texts commonly described as literary in the original cuneiform.
Instructor(s): J. Lauinger.

AS.132.640. Historical Texts.
This course has two primary objectives: To introduce students to texts commonly described as "historical" (e.g., royal inscriptions, chronicles); and to further expose students to the Old Babylonian dialect of the Akkadian language. A secondary objective is to begin to develop familiarity with critical research tools such as the Chicago Assyrian Dictionary and the Akkadisches Handwörterbuch.
Instructor(s): J. Lauinger.

Students read the diplomatic correspondence from Tell el-Amarna in the original cuneiform. Focus is on language and history: the dialect(s) of Akkadian in which the letters are written and the diplomatic history of the Late Bronze Age.
Prerequisites: Prereqs: AS.132.600 or instructor's consent.
Instructor(s): J. Lauinger
Area: Humanities.

AS.132.644. Treaties And Diplomacy.
Reading treaties and related materials in Akkadian.
Instructor(s): J. Lauinger.

AS.132.650. Peripheral Akkadian.
Includes texts from Amarna, Emar, Ugarit, Boghazkoi, Nuzi, Alalakh, and Elam.
Instructor(s): J. Lauinger.

Instructor(s): J. Lauinger.

AS.132.700. Elementary Sumerian.
TBD
Instructor(s): A. Glenn
Area: Humanities.

AS.132.701. Elementary Sumerian.
Instructor(s): P. Delnero
Area: Humanities.
AS.132.710. Advanced Sumerian.
We will read Letter Collection B and related materials in the original cuneiform.
Instructor(s): P. Delnero.

AS.132.711. Advanced Sumerian.
In this course a selection of Sumerian texts from different periods and genres will be read and discussed from a linguistic, philological, historical, and literary perspective.
Instructor(s): P. Delnero.

AS.132.800. Mesopotamian Seminar.
Research and discussion on topics of current interest.
Instructor(s): G. Schwartz; J. Lauinger; M. Feldman; M. Harrower; P. Delnero.

AS.132.801. Mesopotamian Seminar.
Research and discussion on topics of current interest.
Instructor(s): G. Schwartz; J. Lauinger; M. Harrower; P. Delnero
Area: Humanities.

AS.133.600. Introduction to Middle Egyptian.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2135-2000 B.C.). In the second semester, literary texts and royal inscriptions will be read.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.133.601. Introduction To Middle Egyptian (Hieroglyphs).
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2011-1700 B.C.). Co-listed with AS.130.401
Prerequisites: Preqreq: AS.133.600 or equivalent.
Instructor(s): M. Escolano Poveda
Area: Humanities.

AS.133.610. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required.
Instructor(s): B. Bryan; R. Jasnow
Area: Humanities.

AS.133.611. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required.
Instructor(s): B. Bryan; R. Jasnow
Area: Humanities.

AS.133.614. Funerary Texts.
Advanced Middle Egyptian texts course covering Coffin Texts and the Book of the Dead, and other afterlife ritual texts.
Instructor(s): B. Bryan; R. Jasnow
Area: Humanities.

AS.133.616. Funerary Texts.
Advanced Middle Egyptian texts course covering Coffin Texts and the Book of the Dead, and other afterlife ritual texts.
Instructor(s): B. Bryan; R. Jasnow
Area: Humanities.

AS.133.620. Hieratic.
Instructor(s): R. Jasnow.

AS.133.621. Hieratic.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.630. Old Egyptian.
Instructor(s): B. Bryan.

AS.133.631. Old Egyptian.
Instructor(s): B. Bryan.

AS.133.640. Late Egyptian.
Instructor(s): R. Jasnow.

AS.133.641. Late Egyptian Texts.
An introduction to the grammar and texts of Late Egyptian.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.646. Demotic Texts.
Instructor(s): R. Jasnow.

AS.133.647. Demotic Texts.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.648. Intro To Coptic.
Instructor(s): R. Jasnow.

AS.133.649. Advanced Coptic.
In this class we will read Coptic texts of various genres.
Instructor(s): R. Jasnow.

AS.133.653. Introduction to Ptolemaic Hieroglyphs.
An introduction to the grammar and hieroglyphic writing system employed in Graeco-Roman Period Egyptian temple texts.
Instructor(s): R. Jasnow
Area: Humanities.

AS.133.656. Advanced Demotic Texts.
Reading of texts of varying content in Demotic Egyptian.
Instructor(s): R. Jasnow.

AS.133.657. Creating an Egyptian Temple.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art – particularly wall reliefs – in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities.

AS.133.706. Egyptian Funerary Arts in the Archaeological Museum.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum's website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan.

AS.133.750. Seminar in Egyptian Art and Archaeology.
The theme for this course will be archaeology of the Mut precinct in Luxor where Johns Hopkins is excavating. Study of the comparative materials from other sites will be central with the publication of the work approaching.
Instructor(s): B. Bryan.
AS.133.751. Seminar in Egyptian Art and Archaeology: Old Kingdom Art.
This course will explore the artistic expression of Egyptian culture from the 3rd through the 6th Dynasties, ca. 2700-2100 B.C. Tombs, temples, statuary, and two-dimensional wall decoration provide a large visual vocabulary of Egyptian concepts. This class will look at these elements, separately and in combination in order to consider the intentions behind the art and evaluate the degree to which religious and ideological symbolism, known from later Egyptian art, should be understood in the early pyramid-building era.
Instructor(s): B. Bryan.

AS.134.603. Graduate Seminar in Rabbinic Text.
Readings from the Talmud, the Sugya, and the Codes, in the original Hebrew and Aramaic: Emphasis on skills in reading, interpreting, and historical and cultural contextualization.
Instructor(s): D. Katz
Area: Humanities.

AS.134.604. The Book Of Job.
Reading the Hebrew text of the book of Job with attention to philology, textual criticism, and various aspects of interpretation.
Instructor(s): T. Lewis
Area: Humanities.

A rapid reading course aimed at increasing proficiency in reading the Hebrew text of the book of Ezekiel. Various aspects of translation and interpretation will be studied (e.g., grammar, textual criticism, Philology) including literary, historical, and theological questions. Cross-listed with Jewish Studies.
Instructor(s): T. Lewis
Area: Humanities.

AS.134.610. Historical Hebrew Grammar.
Phonology and morphology of Biblical Hebrew.
Instructor(s): P. McCarter.

AS.134.621. Textual Criticism.
An introduction to the ancient witnesses of the biblical text and the principles of textual criticism.
Instructor(s): P. McCarter.

AS.134.630. Qumran (Dead Sea) Texts.
Instructor(s): P. McCarter.

Translation and analysis of selected texts in Biblical Hebrew giving attention to advanced features of grammar and syntax. Topic: “The Book of Judges”
Instructor(s): P. McCarter.

AS.134.652. Seminar in Ancient Israelite Religion.
Topics include history of scholarship, methodology, representations of deity, the aniconic tradition, solar Yahwism, sacred space, blood rituals, passover, royal cult, family religion, divination, prophecy, incantations, etc.
Instructor(s): T. Lewis.

AS.134.656. Comparative Semitics.
Comparative and historical analysis of the Semitic languages in their Afro-Asiatic context.
Instructor(s): P. McCarter.

AS.134.660. History of Ancient Syria/Palestine.
A survey of the history of Ancient Syria and Cannan, including Ancient Israel. In addition to attending the lectures at the scheduled times, graduate students will also meet one hour per week (time TBA) for a discussion session with the instructor.
Instructor(s): P. McCarter.

AS.134.661. History: Ancient Syria-Palestine II.
A survey of the history of Ancient Syria and Cannan, including Ancient Israel.
Instructor(s): P. McCarter
Area: Humanities.

Instructor(s): P. McCarter.

Instructor(s): P. McCarter
Area: Humanities.

AS.134.720. Ugaritic I.
A year-long course studying Ugaritic language and literature. The first semester will focus on grammar and translating a representative selection of mythological texts. The second semester will concentrate on ritual texts. The course will also be epigraphic in nature using both conventional and digital techniques.
Instructor(s): T. Lewis
Area: Humanities.

AS.134.721. Ugaritic II.
A continuation of AS.134.720 with emphasis on the mythological and ritual texts from Ugarit. A digital epigraphy lab will also form part of the course.
Instructor(s): T. Lewis
Area: Humanities.

AS.134.744. Survey Of Aramaic Texts.
Instructor(s): T. Lewis
Area: Humanities.

An advanced course in Aramaic devoted to the study of Old Aramaic inscriptions. We will be translating and analyzing a selection of texts from Northern Syria (e.g. Bar-Rakib; Hadad; Kutammuwa, Nerab, Panamuwa, Sefire, Zakkur), Southern Syria (e.g. Bar-Hadad/Melqart Stela, Hazael, Tel Dan) and Northern Mesopotamia (e.g. Tell Fakhrayyih). Students will be expected to vocalize such texts as a study in historical and comparative linguistics and to clarify their understanding of the morphology and syntax.
Instructor(s): T. Lewis
Area: Humanities.

AS.134.751. Seminar in Egyptian Art and Archaeology: Old Kingdom Art.
Cross Listed Courses

History of Art

AS.010.105. Art of the Ancient Americas. 3.00 Credits.
Surveys the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.234. Lower, Later, Farther Away: Roman Art Beyond the Center. 3.00 Credits.
This course will introduce students to three topics that represent a dramatic shift away from the traditional “center” of the study of Roman art (art created for the wealthy and politically privileged citizens of central Italy between the first century BCE and the first century CE). Students will explore art created by and for the Roman lower classes, as created in late antiquity, and as created in the provinces of the empire. There will be a final paper.
Instructor(s): E. Bevis
Area: Humanities.
AS.010.236. Palaces, Temples and Tombs in Mesopotamia. 3.00 Credits.
Mesopotamia, the "land between the rivers," is considered the cradle of civilization. Its earliest urban centers appeared by 3500 BCE in the region of modern-day Iraq, Iran, and Syria. Along with urbanism came the emergence of temples and palaces as large-scale elite institutions (replete with written records). Their arts manifest some of the earliest complex representations. This course explores the art and architecture within the social, political and cultural context of ancient Sumer, Babylonia and Assyria. It provides an integrated picture of the arts of Mesopotamia from 3500 to 330 BCE with an emphasis on the development of visual narrative and the use of art in the expression of authority and legitimacy.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.300. Houses of the Ancient Mediterranean. 3.00 Credits.
In the ancient world the house was not merely a private space for interacting with family and close friends, but the setting for a diverse array of social rituals and activities. This course will examine the houses of the ancient Mediterranean, from the Bronze Age through Late Antiquity, in order to better understand how they acted as medium through which culture is passed down and transformed. There will be a particular focus on the architecture and décor of such residences and we will draw on methods and readings from the History of Art, Classics, and Archaeology. This course will take advantage of Baltimore's museums and together we will visit the collections of ancient art at the Johns Hopkins Archaeology Museum, the Walters Art Museum, and The Baltimore Museum of Art (BMA). We will also visit the BMA's current installation, "Imaging Home," whose exploration of home as a universal theme is directly related to the goals of this course. There will be a final paper.
Instructor(s): N. Berlin
Area: Humanities.

AS.010.301. Art and Interactions in the Eastern Mediterranean from 2000-500 BCE. 3.00 Credits.
The Mediterranean Sea has always acted as a connector for the many great civilizations that flourished around its shores. From 2000 to 500 BCE, these interactions were particularly dynamic, resulting in a diversity of arts including painting wall frescoes, precious jewelry, and elaborate furnishings and weaponry. This course examines the arts of the interactions among the Egyptians, Near Easterners, and Greeks, considering the role of artistic products in intercultural relations.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.307. Diplomats, Dealers, and Diggers: The Birth of Archaeology and the Rise of Collecting from the 19th c. to Today. 3.00 Credits.
The development of archaeology in the Middle East – its history of explorers, diplomats, missionaries and gentlemen-scholars – profoundly shaped the modern world, from the creation of new museums and the antiquities market to international relations and terrorism.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.314. The Great Debate on Images: from Zurich to Guadalupe. 3.00 Credits.
Images became a central topic of debate at the time of the Protestant Reformation. Images were not only a topic of doctrinal discussion, but also a target for desecration and destruction. The response to Iconoclasm on the Catholic side of this divide was also intense before, during and after the Council of Trent (1547-63), leading to a reconsideration of images' role in an economy of the sacred. But the geography of this debate was not limited to Europe: the evangelization of the New World constituted a new scenario in which previous arguments and doctrinal positions were challenged under completely different circumstances. The Great Image Debate is not only a crucial episode of history, but it is also an argument reflecting on the nature of images and their paradoxical contribution to the Early "modern" world. This course is geared towards students with interests in History, Art History and Anthropology.
Instructor(s): F. Pereda
Area: Humanities
Writing Intensive.

AS.010.315. Art of the Assyrian Empire, 1000-600 BCE. 3.00 Credits.
The Assyrian Empire dominated the ancient world from 1000-612 BCE, stretching from Iran to Egypt and laying the foundation for the later Persian and Macedonian empires. With imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This course provides an integrated picture of the imperial arts of this first great empire, situating it within the broader social and political contexts of the first millennium BCE.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.364. Babylon: Myth and Reality. 3.00 Credits.
"Babylon - the name resonates, from the Biblical whore of Revelations to sci-fi. But what do we really know about the ancient city and its civilization?"
Instructor(s): M. Feldman
Area: Humanities.

AS.010.389. The Stone and the Thread. 3.00 Credits.
This course examines the built environment of the Inka and considers architecture in its social, historical, and cultural contexts. Shared forms and ideas implicit in the fiber arts offer comparative points for analysis and discussion.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.398. Tombs for the Living. 3.00 Credits.
Centering on the tomb as the unit of analysis, this course examines the cultural and material aspects of death and funerary ritual. Draws on case studies from North America, Mesoamerica, and the Andes. Collections study in museums.
Instructor(s): L. Deleonardis
Area: Humanities.
AS.010.137. Freshman Seminar: Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum. 3.00 Credits.

This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.

Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.363. Craft and Craftpersons of the Ancient World: Status, Creativity and Tradition. 3.00 Credits.

This course explores the dynamic work and social roles of craftpersons in early Greece, the eastern Mediterranean and Near East. Readings and discussion will query the identities and contributions of these people—travelers, captives, lauded masters, and even children—through topics including gender, class, and ethnicity. Special focus on late third-early first millennia BCE, local field trips.

Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.366. The Archaeology of Ancient Cyprus: Investigating a Mediterranean Island World in the JHU Museum. 3.00 Credits.

This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Class involves regular analysis of artifacts based in the Archaeological Museum.

Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

History

AS.100.234. The Making of the Muslim Middle East, 600-1100 A.D.. 3.00 Credits.

A survey of the major historical transformations of the region we now call the 'Middle East' (from late antiquity through the 11th century) in relation to the formation and development of Islam and various Muslim empires.

Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.362. Children and Childhood in the Middle Ages. 3.00 Credits.

Seminar on the history of childhood and ideas of childhood around the medieval Mediterranean; themes include child custody; medieval education and punishment; parent-child private letters; child mortality and the arts of bereavement/consolation. Cross-listed with Program in Islamic Studies.

Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.383. Conversion and Apostasy in the Middle Ages. 3.00 Credits.

Compares religious transformation in medieval Europe and the Middle East (ca. 600-1500), including conquest and conversion; conversion narratives; apostasy, martyrdom and other encounters between medieval Jews, Christians, and Muslims.

Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences

AS.100.421. Creating Sacred Space in the Ancient and Medieval World. 3.00 Credits.

What makes a space sacred? How is it different from other spaces? This seminar explores the various means - visual, artifactual, architectural, and performative - of creating sacred space in the ancient and medieval worlds of the Near East and Mediterranean. Possible cases for study include early Sumerian temples, state-sponsored Assyrian temples, votive deposits, Greek sanctuaries, sanctuaries and landscape, early medieval Jewish, Christian, and Islamic cult buildings, cave sanctuaries, pilgrimage sites, icons and sacred space.

Instructor(s): M. Feldman
Area: Humanities
Writing Intensive.

AS.040.366. The Archaeology of Ancient Cyprus: Investigating a Mediterranean Island World in the JHU Museum. 3.00 Credits.

This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Class involves regular analysis of artifacts based in the Archaeological Museum.

Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

Jewish Studies Program

AS.193.301. Reading the Bible and Encountering its World. 3.00 Credits.

The course examines the interactions between travel and biblical interpretation between the seventeenth and twentieth centuries, paying particular attention to the ways in which travelers to the Middle East and then scholars saw its residents as reliefs of an unchanging biblical world, whose practices could be used to interpret scriptural texts from both the Old and New Testaments.

Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.
AS.193.304. Everyday Voices of the Holocaust: Popular Jewish Poetic Expression in the Ghettos and Camps. 3.00 Credits.
The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of multi-lingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multi-cultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed. Emphasis will be put on the differences and similarities between Eastern and Western European Jewry.
Instructor(s): M. Trinh
Area: Social and Behavioral Sciences.

Earth Planetary Sciences
AS.270.205. Introduction to Geographic Information Systems and Geospatial Analysis. 3.00 Credits.
The course provides a broad introduction to the principles and practice of Geographic Information Systems (GIS) and related tools of Geospatial Analysis. Topics will include history of GIS, GIS data structures, data acquisition and merging, database management, spatial analysis, and GIS applications. In addition, students will get hands-on experience working with GIS software.
Instructor(s): X. Chen
Area: Engineering, Natural Sciences.

Program in Museums and Society
AS.389.205. Examining Archaeological Objects. 3.00 Credits.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists' studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

Neuroscience
http://www.neuroscience.jhu.edu/

Neuroscience is the study of the nervous system and how it functions. Neuroscientists study the nervous system from all levels, ranging from molecules interacting with cell membranes to brain systems subserving cognitive functions such as language. Dramatic progress has been made at all levels, and the field continues to grow. On the Homewood campus, researchers studying the nervous system are in the departments of Biology, Biomedical Engineering, Biophysics, Cognitive Science, and Psychological and Brain Sciences and in the Krieger Mind/Brain Institute. Their presence provides the opportunity for an innovative, interdepartmental program which offers a broad overview of the neuroscience field, as well as more advanced training in one of three focus areas.

Cellular and Molecular Neuroscience (CM) focuses on the mechanisms by which information flows within and between cells in the nervous system, and the mechanisms through which the cellular structure of the nervous system develops and is maintained. Topics include the molecular basis of membrane permeability, action potentials, sensory transduction, synaptic transmission, neuronal modulation, mechanisms of drug action, and the molecular basis of genetic disorders of the nervous system.

Systems Neuroscience (ST) seeks to relate brain structure and functioning to behaviors and related physiological processes. Research in this area explores the description and analysis of neural circuits. This includes identifying the brain nuclei and interconnections making up a circuit, identifying and investigating the implicated neurotransmitters, and characterizing the intrinsic and extrinsic factors that modulate the development and adult functioning of the circuit. Topics as diverse as learning and memory, communication, sensory systems, and motivated behaviors (e.g., reproduction, feeding, and aggression) are explored from this perspective.

Cognitive Neuroscience (CG) focuses on how cognitive functions, such as vision or language, are implemented by the brain. Drawing upon a variety of techniques for probing the working brain at cognitive and neural levels, including functional neuroimaging, analysis of cognitive impairments in brain-damaged patients, and electrophysiological techniques, research in cognitive neuroscience seeks to relate mental representations and computations to brain mechanisms and processes.

Neuroscience Program Committee
The Neuroscience Program Committee coordinates course offerings, oversees the program’s interdepartmental courses, reviews and updates the administration of the program, makes decisions about admission to the B.S./M.S. program, approves proposed research programs and mentors for students in the B.S./M.S. mentored research program, and evaluates the final reports and presentations from the research year.

- The neuroscience major consists of two degree programs: a four-year B.S. based primarily on course work and 6 credits of research; and a five-year concurrent B.S./M.S. involving additional course work and a yearlong intensive laboratory experience. (Under special circumstances, a student may be able to complete the B.S./M.S. program in less than five years.) Both programs are designed to provide rigorous preparation for advanced study in either a Ph.D., M.D. or Ph.D./M.D. programs. The concurrent B.S./M.S. program accepts students every spring semester.

Additional information regarding the undergraduate degree and the B.S./M.S. programs is available through our website at http://krieger.jhu.edu/neuroscience. You may also contact our Program Administrator, Hope Fisher, hope.stein@jhu.edu or 410-516-6196.

Requirements for the B.S. Degree
Also see Requirements for a Bachelor’s Degree (p. 10).

General Information
- Students are encouraged to complete an optional introductory course in their freshman year, such as AS.080.105 An Introduction to Neuroscience, AS.050.105 Introduction to Cognitive Neuropsychology, or AS.200.141 Foundations of Brain, Behavior and Cognition.
- Students interested in attending medical school will need to take a second semester of organic chemistry and its corresponding laboratory to meet medical school admission requirements; however, these courses are not major requirements.
- Students are required to select their advanced neuroscience elective courses from one of three approved focus areas: systems neuroscience, cognitive neuroscience, or cellular and molecular neuroscience. Approved courses fulfilling this requirement are found on the neuroscience website (http://krieger.jhu.edu/neuroscience/courses) or in the schedule of classes.
• To apply towards the major, all courses must be taken for a letter grade and a grade of C- or better is required.

Neuroscience Sequence *

AS.080.203  Cognitive Neuroscience (spring) 3
AS.080.250  Neuroscience Laboratory (fall/spring) 3
AS.080.305  The Nervous System I (fall) 3
AS.080.306  The Nervous System II (spring) 3

Mathematics, Statistics, and Science Courses

EN.550.211  Probability and Statistics for the Life Sciences (spring) 4
or EN.550.111 Statistical Analysis I and Statistical Analysis II
& EN.550.112
or EN.550.310 Probability & Statistics for the Physical and Information Sciences & Engineering
or EN.550.311 Probability and Statistics for the Biological Sciences and Engineering

AS.110.106  Calculus I (Biology and Social Sciences) 4
or AS.110.108  Calculus I 4

AS.110.107  Calculus II (For Biological and Social Science) 4
or AS.110.109  Calculus II (For Physical Sciences and Engineering)
& AS.110.113 Honors Single Variable Calculus

AS.030.101 & AS.030.105 Introductory Chemistry I and Introductory Chemistry Lab I

AS.030.102 & AS.030.106 Introductory Chemistry II and Introductory Chemistry Laboratory II
& AS.030.103 Applied Chemical Equilibrium and Reactivity w/lab

AS.030.205  Organic Chemistry I 4

AS.171.101 & AS.171.103 General Physics: Physical Science Major I or General Physics I for Biological Science Majors or General Physics for Physical Sciences Majors (AL)

AS.171.111  General Physics Laboratory I 1

AS.171.102 & AS.171.104 General Physics: Physical Science Majors II or General Physics/Biology Majors II or General Physics for Physical Sciences Majors (AL)

AS.171.112  General Physics Laboratory II 1

One Biology Sequence (Select Option A or Option B)

Option A: Required of the cellular and molecular neuroscience focus area, optional for the systems and cognitive focus areas

AS.020.305  Biochemistry
AS.020.315  Biochemistry Laboratory
AS.020.306  Cell Biology
AS.020.316  Cell Biology Lab

Option B: Allowed for the systems and cognitive focus areas, not permitted for the cellular and molecular neuroscience focus area

AS.020.151  General Biology I
AS.020.152  General Biology II
AS.020.153  General Biology Laboratory I
AS.020.154  General Biology Lab II

Advanced Neuroscience Elective Courses and Focus Area

Nine credits of 300-level or higher approved courses from one of three focus areas: systems neuroscience, cognitive neuroscience, or cellular and molecular neuroscience

Three credits of 300-level or higher approved course outside of focus area selected above

Research **

Six credits of neuroscience research
AS.080.500  Scientific Communication: Neuroscience .5

* These courses are normally completed during the sophomore and junior years. We recommend that students complete these courses in the sequence listed.

** Research must be conducted in one of the neuroscience laboratories participating in the program. Students must register for AS.080.500 Scientific Communication: Neuroscience concurrently with neuroscience research each time they register for research.

Advanced Seminars in Neuroscience (6 credits)

The Advanced Seminar in Neuroscience is offered in the fall and spring terms.

Final Spring Courses (12 credits)

Degree requirements include 12 credits of additional advanced course work (300-level or above). At least three credits must be at 400-level or above. Courses must be related to the study of neuroscience and ideally focused on the student’s concentration of study and area of research. Students may choose courses from the approved list of undergraduate advanced courses. (In addition, up to six additional credits of the Advanced Seminar in Neuroscience, and/or statistics courses, graduate courses and seminars may be taken with the approval of the program director.)

Mentored Research (24 credits)

During the research year, students will complete a total of 24 credits of mentored research. Students must complete nine credits of research in a spring academic term, six in the summer and an additional nine in the fall.

B.S./M.S. Commencement Project (1 credit)

After completing the research year, students must register for a one-credit independent study course intended to track the progress and defense of the student’s final research project.

Honors in the Major

To receive honors in Neuroscience, students must meet the following criteria:

- Earn a GPA of 3.5 or better in major requirements
- Conduct research and give a research presentation
- Receive a recommendation from research mentor
- Additional Neuroscience Research credit(s) beyond the required 6 credits for the major (Effective for students entering Fall 2016)

Requirements for the M.S. Degree

Current JHU undergraduate students who wish to apply for the B.S./M.S. Program in their junior or senior year must meet the following minimum requirements (prior to applying):

- A minimum 3.5 GPA in all required courses for the undergraduate major and cumulative GPA of 3.5,
- Completion of no fewer than three credits of undergraduate research, and
- Completion of all courses required for the JHU B.S. degree in Neuroscience.
Instructor(s): K. Bohn.

Materials.

Behavioral biology will be presented to provide a context for EN.550.211 when possible, examples and direct applications in neuroscience and gap between theoretical statistics and biological thinking. In addition, is to increase success and understanding of EN.550.211 by bridging the expertise in statistics and mathematics. The primary goal of this course a week course is led by a behavioral biology professor with extensive Probability and Statistics in Life Sciences, EN.550.211. This one-hour Credit.

AS.080.105. An Introduction to Neuroscience. 3.00 Credits.
Our knowledge of brain function from the level of single molecules to human behavior continues to expand as something approaching light speed. That knowledge invades our lives every day. And decisions are made based on that knowledge from every corner of life...from physician to politician and every stop in between. This course is meant to provide a fundamental understanding of how the cells and molecules as well as the regions and systems of the brain work to have you see and hear and move and remember. The course is divided into four sections that progress from the cells of the brain and spinal cord to circuits then systems and finally behaviors. Introduction to Neuroscience is designed for any college student who has an interest in the range of disciplines we call neuroscience.
Instructor(s): J. Trageser; L. Gorman
Prerequisites: (AS.080.305 AND AS.080.306) OR AS.200.141 or undergraduates only.

Cognitive Science.

Area: Natural Sciences.

Instructor(s): H. Zhao; S. Hendry
Prerequisites: AS.080.203 OR AS.050.203 OR AS.200.141 or AS.080.105 or 080.203 OR ( AS.020.312[C] AND AS.020.306[C] ) OR AS.080.305 AND AS.080.306

Laboratory. 3.00 Credits.

This course surveys theory and research concerning how the human brain carries out mental processes. The sections of this course correspond with the sections listed for AS.020.203. All sections will meet together on exams day and guest lecture days. Co-listed as AS.050.203 in Cognitive Science.
Instructor(s): B. Rapp; S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

Area: Natural Sciences.

Instructor(s): J. Trageser; L. Gorman
Area: Natural Sciences.

AS.080.260. Bridging the gap between Biology and Statistics. 1.00 Credit.
This course is designed to support the lectures and assignments in Probability and Statistics in Life Sciences, EN.550.211. This one-hour a week course is led by a behavioral biology professor with extensive expertise in statistics and mathematics. The primary goal of this course is to increase success and understanding of EN.550.211 by bridging the gap between theoretical statistics and biological thinking. In addition, when possible, examples and direct applications in neuroscience and behavioral biology will be presented to provide a context for EN.550.211 materials.
Instructor(s): K. Bohn.
AS.080.306. The Nervous System II. 3.00 Credits.
The course uses the functional organization of the somatosensory system as a means to examine mechanisms of neutral development. Generation and maturation of neurons, guidance of axons, formation of synapses and the regressive events that shape the adult nervous system will be examined. At the same time we will explore the structure and function of brain regions that allow us to feel pain and temperature, detect vibration, recognize shape and perceive where we are in space. Finally, the single-neuron events that lead to adaptive changes in function will be explored in the context of central nervous system control of movement and of higher order functions of speech and memory. Students who do not register for Nervous System I offered during the first term should not register for this class. Course open to JHU undergraduates only.
Prerequisites: Prereq: AS.080.305
Instructor(s): H. Zhao; S. Hendry
Area: Natural Sciences.

AS.080.307. Neurobiology of Addiction. 3.00 Credits.
Broadly defined, addiction is a chronic, relapsing brain disease. It is a compulsive, uncontrollable behavior to seek and use a substance, even in the face of negative social consequences or health consequences. But, addiction is also a condition in which an individual overrides in just about anything that is reinforcing...from physical exercise, to video games, to food, and to sex. In this course, we will use current literature to try and understand what is currently known about the underlying neural mechanisms of this very real disorder. Recommended Course Background: AS.080.305 and AS.080.306 or AS.020.312 or AS.020.306 or AS.200.141 and AS.020.306 or permission.
Instructor(s): L. Gorman.

AS.080.308. Neuroeconomics. 3.00 Credits.
Every day decisions often require us to weigh the costs and benefits of engaging in a particular course of action in order to obtain some expected outcome. Unfortunately, we often lack the information necessary to obtain our desired goal with complete certainty. Economists have long been interested in understanding human decision-making under these circumstances. In parallel, neuroscientists have made great strides at describing the underlying neural basis of simple decision-making. However, despite much progress in both fields, our understanding of how the brain makes decisions is incomplete. In order to strengthen and further research in both fields, the interdisciplinary field of Neuroeconomics arose. This course will survey the field of Neuroeconomics focusing on theoretical concepts developed by economists and the role these theories are playing in guiding current experimental neuroscience. Recommended Course Background: AS.080.305 and AS.080.306 or AS.020.312 or AS.020.306 or AS.200.141 and AS.020.306 or permission.
Instructor(s): J. Trageser
Area: Natural Sciences.

AS.080.309. Frontiers in Neuroscience. 1.00 Credit.
Modern neuroscience has advanced enough for us to contemplate some issues we could not address before. In this course, we will examine the recent advances in neuroscience research such as neuroprosthetics, deep brain stimulation (DBS), brain computer interface (BCI), and optogenetics. We will focus on understanding the new technology and its limits, and learn how it may shape the future of science, medicine, and society. We will also explore issues related to carbon-nanotube molecular computing and the latest neuro-imaging techniques in lectures and reading original articles. Recommended Course Background: AS.080.305, AS.080.306 or AS.080.203 or permission of instructor.
Instructor(s): T. Yoshioka.

AS.080.310. Synaptic Function and Plasticity. 3.00 Credits.
The function of the nervous system is based on synaptic transmission between neurons. Synapses are not static structures, but dynamically change with experience. Experience-dependent synaptic plasticity not only allows proper development of the nervous system in tune with the environment, but also is the basis for learning and memory. This course will cover the structure and function of synapses, and how they are altered by experience to encode information.
Prerequisites: Pre-reqs: AS.020.306 OR ( AS.080.304 AND AS.080.306 )
Instructor(s): A. Kirkwood; H. Lee
Area: Natural Sciences.

AS.080.317. Developmental Neurobiology: Signaling in Development and Disease. 3.00 Credits.
An advanced undergraduate level seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease. Recommended Course Background: AS.020.305 and AS.020.306.
Prerequisites: Pre-req: AS.080.306
Instructor(s): R. Kuruvilla
Area: Natural Sciences.

AS.080.320. The Auditory System. 3.00 Credits.
This course will cover the neuroanatomy and neurophysiology of the human auditory system from the ear to the brain. Behavioral, electrophysiological, and neuroimaging methods for assessing peripheral and central auditory function will be discussed. Acquired and developmental disorders of auditory function will be reviewed using clinical case studies.
Prerequisites: AS.080.305 OR AS.080.203 OR AS.050.203 OR AS.200.141 OR AS.020.312 or permission of the instructor.
Instructor(s): D. Boatman
Area: Natural Sciences.

AS.080.322. Cellular and Molecular Biology of Sensation. 3.00 Credits.
Leading scientists in sensory biology from the Johns Hopkins community will present the most current knowledge in the cellular and molecular biology of sensation. A lecture and a student presentation of an exemplar manuscript will be presented each week on a different topic of sensory systems.
Prerequisites: AS.080.304 OR AS.080.305 OR AS.080.306 OR AS.020.306 OR AS.020.305.
Instructor(s): P. Fuchs
Area: Natural Sciences.
AS.080.324. Neuroscience Journal Club. 1.00 Credit.
Classic Journal Club course where the students will read and discuss and review articles on differing topics depending on student interests. Open to Neuroscience and Behavioral Biology sophomores, juniors and seniors. Instructor(s): Staff.

AS.080.325. Neuroscience Journal Club. 1.00 Credit.
Open to Neuroscience and Behavioral Biology Sophomores, Juniors and Seniors. Classic Journal Club course where the students will read and discuss and review articles on differing topics depending on student interests. Instructor(s): Staff.

AS.080.326. Neurobiology and Diseases of the Peripheral Nervous System. 3.00 Credits.
This course will cover neurobiology and disorders of the peripheral nervous system (PNS). A particular emphasis will be on cellular interactions within the PNS and with target tissues. For example, the two principal components of the peripheral nervous system: axons and Schwann cells have intimate and continuous cellular communications that are critical for physiological function of the PNS. The course will teach how these interactions are developed, maintained throughout life, and are impacted by injury and diseases. 
Prerequisites: AS.080.305 AND AS.080.306
Instructor(s): M. Farah
Area: Natural Sciences
Writing Intensive.

AS.080.330. Brain Injury & Recovery. 3.00 Credits.
This course investigates numerous types of brain injuries and explores the responses of the nervous system to these injuries. The course's primary focus is the cellular and molecular mechanisms of brain injury and the recovery of function. Discussions of traumatic brain injury, stroke, spinal cord, and tumors, using historical and recent journal articles, will facilitate students' understanding of the current state of the brain injury field. Cross-listed with Psychological and Brain Sciences and Behavioral Biology.
Prerequisites: ( AS.080.305 AND AS.080.306) OR (AS.020.312 OR AS.020.306) OR Permission of Instructor
Instructor(s): L. Gorman
Area: Natural Sciences
Writing Intensive.

AS.080.333. Neuroimmunology: Writing About the Nervous System. 3.00 Credits.
To write clearly and cogently about the nervous system demands two things in equal measure. One is serious understanding and the other is skill. Neither is a gift since both must be acquired. We will strive to do both in this course by taking an extant document – either a slim text on a restricted subject in neuroscience or a set of class notes – and, through revision and addition of recently published findings, substantially improve that document. Students will be required to read, write and revise extensively – at least two assignments each week.
Instructor(s): S. Hendry
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

AS.080.345. Great Discoveries in Neuroscience. 3.00 Credits.
This course examines the historical and intellectual context of selected, key advances in neuroscience, how they were made and the impact they had on an understanding of the nervous system. Particular attention will be paid to advances in cellular and molecular neuroscience. Among the topics covered will be the discovery of monoamine neurotransmitters and of endocannabinoids, the role of neurotrophins in neural development, and prion-based diseases of the brain.
Prerequisites: Pre-reqs: AS.080.306 OR (AS.020.306 AND AS.020.312)
Instructor(s): J. Baraban
Area: Natural Sciences.

AS.080.348. Neuroeducation. 3.00 Credits.
Can what we know about the brain guide how we teach in our schools? This seminar course is designed to address this question. Various universities throughout the country have “Science of Learning” or “Neuroeducation” initiatives. But, do we know enough about the brain works to make substantial changes in our educational system? That is the question that we will address by looking at these various initiatives and looking at the literature.
Prerequisites: Pre-reqs: AS.080.306 OR AS.200.141
Instructor(s): L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

AS.080.352. Higher Brain Function. 3.00 Credits.
Neuroscience is approaching the time when it can offer a compelling explanation for how the brain works. This course takes advantage of work done in humans and non-human primates to survey concepts in sensory perception, motor command, and memory mechanisms. Lectures are given by faculty whose research explores these issues. Each subject is explored as a three-lecture sequence: 1) a background lecture that lays out the general principles and over-riding questions of the field; 2) an in-depth lecture that covers the most recent scientific literature; and 3) a summary lecture that brings together the major questions and their Resolution. Recommended Course Background: AS.080.305
Instructor(s): S. Hendry
Area: Natural Sciences.

AS.080.355. Visual System. 3.00 Credits.
From outer segments of photoreceptors to the Fusiform Face Area of the cerebral cortex we have come to understand how the visual system works at each of many fundamental levels. This course examines the basis for perception of visible objects at each of these levels. We will use the secondary literature (scientific reviews) to accent the hard-won truths about visual system functional organization and to highlight ongoing controversies. Students will be lead through carefully chosen reviews in a series of lectures and written summaries prepared by faculty. Three exams and a final exam will test students not on their memorization of minutiae but on their understanding of fundamental principles.
Prerequisites: AS.080.306 OR AS.020.306 OR Permission
Instructor(s): S. Hendry
Area: Natural Sciences.

AS.080.357. Developmental Neuroscience. 3.00 Credits.
The developmental neuroscience course will cover principles of neural development. The course will focus on major events in neural development: patterning and growth of the nervous system, neuronal determination, axonal navigation and targeting, neuron survival and death, synapse function, developmental plasticity, and behavioral and cognitive development.
Prerequisites: AS.080.305 AND AS.080.306
Instructor(s): M. Farah.
AS.080.363. Diseases & Disorders of the Nervous System. 3.00 Credits.
Prerequisites: Pre-reqs: ( EN.580.421 AND EN.580.422) OR ( AS.020.305 AND AS.020.306 ) OR AS.080.306 OR By Permission.
Instructor(s): G. McKhann; S. Hendry
Area: Natural Sciences.

AS.080.362. Neurobiology of Hearing. 3.00 Credits.
The course focuses on sound processing, including current research topics in Auditory Neuroscience, including synaptic physiology, neural circuitry, acoustics, physiology, and behavior. Course taught in Salamanca. This course fulfills upper-level Neuroscience electives. Course must be taken for a grade.
Instructor(s): L. Gorman
Area: Natural Sciences
Writing Intensive.

AS.080.364. Methods in Neuroscience and Orgo?. 3.00 Credits.
Who would have thought that organic chemistry would be playing a role in our understanding of the anatomy of the nervous system?! In this course, you will work in both the Organic Chemistry and Neuroscience labs to compare the new CLARITY technique, introduced by Karl Deisseroth, with another technique known as SeeDB, introduced by Takeshi Imai. Both techniques are used to make the brain “invisible” and allow subsequent staining to visually examine neuronal circuits. Students will work independently in teams to determine which technique is more amenable to use by students in the Neuroscience Lab course. Permission Required from Instructor to register.
Instructor(s): C. Falzone; E. Hill; L. D'Souza; L. Gorman
Area: Natural Sciences.

AS.080.366. Neuroscience of Pain. 3.00 Credits.
This course is a systems-oriented course focusing on the basic neural processing of pain signals in both the spinal cord and the brain. Class lectures will cover the anatomical and molecular basis for the transmission and perception of pain signals, basic concepts such as allodynia, hyperalgesia, peripheral and central sensitization, remodeling, the pathophysiology of chronic pain disorders and the cognitive and emotional aspects of pain. We will also discuss the regulation of pain signals by descending systems, and current practices and new advances in the treatment of pain.
Prerequisites: Pre-reqs: AS.080.306 OR AS.020.312 OR AS.020.316 OR AS.200.141 OR INSTRUCTOR'S PERMISSION
Instructor(s): H. Adwanikar
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

AS.080.370. The Cerebellum: Is it just for motor control?. 3.00 Credits.
The cerebellum is traditionally thought to be involved in movement and motor control, and observations of patients with cerebellar damage do in fact show motor deficits. However, since the proliferation of functional MRI, cerebellar activations have been observed in a surprising number of brain activation studies that were designed to investigate the neural correlates of cognitive function. Over the past 2 decades, an increasing number of investigators have tried to characterize the role of the cerebellum in cognitive function. Through lectures and reading discussions this course will survey cerebellar circuitry, neuroimaging and neuromodulatory methods for investigating the cerebellum, and traditional and non-traditional functions of the cerebellum, including cerebellar involvement in cognitive functions such as language, working memory, and executive control.
Prerequisites: Pre-reqs: ( AS.080.306 AND AS.080.203 ) OR AS.050.203
Instructor(s): J. Desmond
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.375. The Neural Control of Movement. 3.00 Credits.
Every day, our brains produce adaptable and complex movements in a constantly changing environment. These motoric abilities are so complex that they are still largely unmatched by current technology. The goal of this course is to provide an understanding of the neural mechanisms underlying movement planning and execution. We will cover the structures and systems that are responsible for feedback and motor control. These include sensory perception, reflex arcs, spinal cord organization, pattern generators, muscle function, locomotion, eye movement, and cognitive aspects of motor control. The roles of cortical motor structures and their interaction with the cerebellum, thalamus, and basal ganglia will be examined in the normally functioning brain as well as in individuals with motor disorders. In addition, we will discuss various theories of motor control using both classical and recent experimental data in order to develop your abilities to review, critique, and report on the scientific motor control literature. By the end of this course you will (1) have an understanding of how muscles and the brain work, how movements are planned and performed, and the computations required to carry out movements and (2) summarize major themes in the motor control literature and assess how new papers contribute to the larger body of work in this field.
Prerequisites: AS.080.305 AND AS.080.306
Instructor(s): E. Emeric
Area: Social and Behavioral Sciences.

AS.080.400. Research Practicum: Language Disorders-Community Based Learning. 2.00 Credits.
This course provides the opportunity to learn about adult aphasias; language disorders which are one of the most common consequence of stroke. You will receive training in Supportive Communication Techniques and work as a communication partner with an individual with aphasia for two hours per week. Three class meetings for orientation and reading assignments will be held on campus; training and practicum will be conducted at a local aphasia support center. Transportation required. A valid driver’s license for zip car use. This is a two (2) credit practicum.
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.401. Research Practicum: KEEN (Kids Enjoying Exercise Now)-Community Based Learning. 1.00 Credit.
KEEN (Kids Enjoy Exercise Now) is a 1-credit S/U practicum, organized by the Undergraduate Neuroscience Program Committee. This practicum provides the opportunity to learn and interact with child “athletes” who have neurological disabilities, including autism, cerebral palsy and Down syndrome through exercise and recreational activities. Students “coaches” will receive a profile for the KEEN athlete that they will be paired with during a session. Students will receive initial training and then select 4 sessions to attend to fulfill the 1-credit requirement. Sessions are held on the first and third Sunday of each month during the semester. Students must attend a mandatory orientation and exit session at the beginning and end of the semester that will be held on campus, sessions will take place at KEEN centers in Maryland. Transportation will be via student carpools using Zipcars, personal vehicles or Hop Vans.
Instructor(s): L. Gorman.
AS.080.402. Teaching Practicum: Making Neuroscience Fun (MNF). 1.00 Credit.
Making Neuroscience Fun (MNF) is a 1-credit S/U practicum and community outreach program which brings age-appropriate interactive presentations about the brain and nervous system to Baltimore city and county elementary school students. MNF is an effort aimed at fostering appreciation for science in general, emphasizing the importance of the brain and the nervous system in everyday life, and enhancing the science curriculum in Baltimore’s City and County schools. Students will receive initial training prior to participating and then will select and present 6, 45-minute presentations. In order to participate, students must be available either 7am-11am or 11am-3pm at least one day per week, Monday-Friday. Students must attend a mandatory orientation, training and exit session at the beginning and end of the semester that will be held on campus, presentations will take place at Baltimore city and county elementary schools. Transportation to the schools will be via student carpools using Zipcars or personal vehicles.
Instructor(s): L. Gorman.

AS.080.404. Research Practicum: HopKids-Children’s Center. 1.00 - 3.00 Credits.
HopKIDS-Children’s Center is a 1-3 credit S/U practicum that provides students the opportunity to learn, play and interact with children receiving treatment in over 20 different specialties including dermatology, endocrine, GI, immunology, urology, plastics and hematology. Students will volunteer in outpatient clinics at the Johns Hopkins Children’s Center where they will encourage and provide play and participate in a variety of activities including art projects, coloring, board games, and reading. Students will gain valuable clinical experience and be exposed to a wide range of children with a variety of diseases/illnesses. This practicum has the option for variable credits, therefore, 1 credit equals 5 shifts, 2 credits equals 10 shifts and 3 credits equals 15 shifts. Shifts are Mondays 1pm-3pm, Tuesdays 10am-12pm, Wednesdays 1pm-3pm and Thursdays 10am-12pm throughout the semester. Students will sign up for shifts on a first-come, first-serve basis after the mandatory orientation, there is a maximum limit of how many students may sign up per day. Students must attend a mandatory orientation and exit session at the beginning and end of the semester that will be held on campus, volunteer shifts will take place at outpatient clinics in the Rubensteins Child Health Building. Transportation will be provided by the JHMI shuttle.
Instructor(s): L. Gorman.

AS.080.411. Advanced Seminar: Neuroscience I. 3.00 Credits.
For students in the first semester of the BA/MS Program. Instructor permission required.
Instructor(s): J. Baraban
Area: Natural Sciences.

AS.080.412. Advanced Seminar: Neuroscience II. 3.00 Credits.
For students in the 2nd semester of the BS/MS Program.
Instructor(s): J. Baraban
Area: Natural Sciences.

AS.080.413. Advanced Seminar: Neuroscience III. 3.00 Credits.
For students in the 3rd semester of the BA/MS Program.
Instructor(s): J. Baraban; L. Gorman
Area: Natural Sciences.

AS.080.414. Advanced Seminar: Neuroscience. 3.00 Credits.
For students in 4th year of the Neuroscience BA/MS Program only. Permission Required.
Instructor(s): J. Baraban
Area: Natural Sciences.

AS.080.500. Scientific Communication: Neuroscience. 0.50 Credit.
Scientific communication is crucial to advancing science. The Scientific Communication section is taken concurrently with Neuroscience Research and consists of a two hour research orientation session held at the beginning of the semester and a two hour exit session held at the end of the semester. The student is also expected to meet with their lab supervisor or attend a lab meeting once a week to understand the research the lab is currently working on and receive feedback on the work they are doing. See special notes section for specific meeting day/time.
Corequisites: Co-reqs: AS.080.534 OR AS.080.544 OR AS.080.554 OR AS.080.564
Instructor(s): H. Adwanipool, J. Trageser, L. Gorman.

AS.080.512. Independent Study. 0.00 - 3.00 Credits.
Instructor(s): L. Gorman.

AS.080.531. Research Neuroscience-Freshmen. 0.50 - 3.00 Credits.
Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): Staff.

AS.080.534. Neuroscience Research- Freshmen. 0.00 - 3.00 Credits.
Corequisites: AS.080.500[C]
Instructor(s): Staff.

AS.080.541. Research Neuroscience - Sophomores. 1.00 - 3.00 Credits.
Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): Staff.

AS.080.544. Neuroscience Research-Sophomores. 0.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.551. Research Neuroscience for Juniors. 1.00 - 3.00 Credits.
Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): Staff.

AS.080.554. Neuroscience Research - Juniors. 0.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.561. Research Neuroscience for Seniors. 1.00 - 3.00 Credits.
Corequisites: AS.080.500 (Scientific Communication)
Instructor(s): Staff.

AS.080.564. Neuroscience Research - Seniors. 0.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.572. Direct Readings/Independent Study. 0.00 - 3.00 Credits.
Instructor(s): J. Baraban; L. Gorman.

AS.080.582. Neuroscience: Internship. 0.00 - 3.00 Credits.
Instructor(s): L. Gorman.

AS.080.590. Independent Study. 1.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): J. Baraban; L. Gorman.

AS.080.592. Research-Freshmen. 1.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.594. Research-Sophomores. 1.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.595. Internship-Summer. 1.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): L. Gorman.
AS.080.596. Research-Juniors-Summer. 1.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.597. Internship: Neuroscience. 1.00 - 3.00 Credits.
Instructor(s): L. Gorman.

AS.080.598. Research-Seniors-Summer. 1.00 - 3.00 Credits.
Corequisites: AS.080.500
Instructor(s): Staff.

AS.080.600. Neuroscience Research: BA/MS Undergraduate.
This course is ONLY for Neuroscience BA/MS students that are in the program during their undergraduate senior year. This course is similar to the course that the BA/MS graduate students take but is for BA/MS Seniors in their 7th semester summer period.
Instructor(s): J. Baraban.

AS.080.601. Neuroeconomics -Graduate Level.
Every day decisions often require us to weigh the costs and benefits of engaging in a particular course of action in order to obtain some expected outcome. Unfortunately, we often lack the information necessary to obtain our desired goal with complete certainty. Economists have long been interested in understanding human decision-making under these circumstances. In parallel, neuroscientists have made great strides at describing the underlying neural basis of simple decision-making. However, despite much progress in both fields, our understanding of how the brain makes decisions is incomplete. In order to strengthen and further research in both fields, the interdisciplinary field of Neuroeconomics arose. This course will survey the field of Neuroeconomics focusing on theoretical concepts developed by economists and the role these theories are playing in guiding current experimental neuroscience. Only graduate students can register for this course. Instructor signature is required.
Prerequisites: (AS.080.305 AND AS.080.306) OR (AS.020.312 AND AS.020.306) OR (AS.200.141 AND AS.020.306) OR Permission
Instructor(s): J. Baraban.

This course provides the opportunity to learn and interact with children recovering from brain, spinal, and musculoskeletal injuries. You will travel to the Kennedy Krieger Institute to volunteer in the Child Life Department where you will participate in a variety of therapeutic activities including playing with the children and helping them achieve goals. Students will gain valuable clinical experience while learning patient empathy. No credits or grade are awarded.
Instructor(s): L. Gorman.

AS.080.620. Theoretical Neuroscience.
Topics of theoretical neuroscience and computational neuroscience will be discussed based on the original literature. Students are expected to actively participate in the discussion and also to present selected material to the class.
Instructor(s): E. Niebur.

AS.080.630. Bodian Seminar Series.
The Bodian Seminar is an interdisciplinary colloquium for discussion of current research into the neural basis of mental processes. Leading researchers, generally from outside the University, are invited to give lectures, which will be announced per e-mail. Undergraduate students who register for this course are asked to study a publication by the speaker, as provided with the announcement, and to prepare a question for each speaker together with a brief discussion of the possible answers. Permission required for undergraduate students.
Instructor(s): V. Stuphorn.

Graduate students and Seniors with instructor permission. The Bodian Seminar is an interdisciplinary colloquium for discussion of current research into the neural basis of mental processes. Leading researchers, generally from outside the University, are invited to give lectures. About 12 lectures are scheduled per semester (see http://www.mb.jhu.edu/seminars.asp). Speakers, titles of lectures, and dates are announced to participants per e-mail (contact Debby Kelly, 410 516-8640). The announcements also include links to one or two recent publications of the speaker. Undergraduate students who register for this course are asked to study these papers and to prepare a question for each speaker together with a brief discussion of the possible answers. Question and discussion have to be in writing and turned in the day before the lecture. Undergraduates must email the instructor for permission (von.der.heyd@jhu.edu) prior to registering for the course.
Instructor(s): V. Stuphorn.

AS.080.660. Commencement Project.
This course is for BA/MS students that have completed their year of research and are now working on their final thesis. In this course, students devote their semester to preparing their final thesis documentation and move forward with their Master’s Thesis Defense which is the last piece to the program. This course is for BA/MS student only and students should only register for this course in their last semester in the program.
Instructor(s): J. Baraban.

AS.080.810. Readings/Systems Neuro I.
This is a graduate-level seminar series on current literature in systems neuroscience. It also serves as a discussion group/journal club for students and faculty at the Krieger Mind/Brain Institute, and is open to the wider systems/cognitive neuroscience community at Homewood and other Hopkins campuses. Each week, a student or faculty member will present a recent article selected in consultation with the course directors. The selected readings will focus on the neural mechanisms of perception, attention, motor behavior, learning and memory. Pass/Fail only. Permission required for undergraduate students.
Instructor(s): E. Niebur; V. Stuphorn.

AS.080.850. Mentored Research: Neuroscience I.
For students in the BA/MS Program first semester. Permission required.
Instructor(s): J. Baraban.

Instructor(s): L. Gorman
Writing Intensive.

AS.080.852. Mentored Research: Neuroscience II.
Permission Required. For students in the BA/MS Program.
Instructor(s): J. Baraban.

AS.080.854. Mentored Research: Neuroscience III.
For students in the BA/MS Program Permission required.
Instructor(s): J. Baraban.
Cross Listed Courses

Biology
AS.020.317. Signaling in Development and Disease. 3.00 Credits.
An advanced undergraduate level seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease. Recommended Course Background: AS.020.305, AS.020.306, and AS.080.306
Instructor(s): R. Kuruvilla
Area: Natural Sciences.

AS.020.371. Emerging Strategies in Understanding Innate Behaviors. 3.00 Credits.
The hypothalamus is the central regulator of a broad range of homeostatic behaviors essential to survival, and plays a key role in controlling emotional and appetitive behaviors. This course offers an overview of both historical and recent work on this vital brain region. Topics covered will include the evolution and development of the hypothalamus, control of circadian rhythms and sleep, regulation of hunger and body temperature, as well as hypothalamic regulation of sexual, defensive, and affiliative behavior.
Prerequisites: AS.020.305 OR AS.020.306 OR AS.080.301 OR AS.080.302
Instructor(s): S. Blackshaw; S. Hattar
Area: Natural Sciences
Writing Intensive.

Cognitive Science
AS.050.102. Language and Mind. 3.00 Credits.
Introductory course dealing with theory, methods, and current research topics in the study of language as a component of the mind. What it is to “know” a language: components of linguistic knowledge (phonetics, phonology, morphology, syntax, semantics) and the course of language acquisition. How linguistic knowledge is put to use: language and the brain and linguistic processing in various domains. This course is restricted to freshmen and sophomores. Cross-listed with Neuroscience and Psychology.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.105. Introduction to Cognitive Neuropsychology. 3.00 Credits.
When the brain is damaged or fails to develop normally, even the most basic cognitive abilities (such as the ability to understand words, or perceive objects) may be disrupted, often in remarkable ways. This course explores a wide range of cognitive deficits, focusing on what these deficits can tell us about how the normal brain works. Topics include brain anatomy and causes of brain damage, reading and spelling deficits, unilateral spatial neglect, hemispheric disconnection, cortical plasticity, and visual perception of location and orientation. Students read primary sources: journal articles that report deficits and discuss their implications.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.312. Cognitive Neuroimaging Methods in High-Level Vision. 3.00 Credits.
This course is an advanced seminar and research practicum course. It will provide the opportunity to learn about fMRI methods used in the field of vision science and for students to have hands-on experience to develop, design and analyze a research study on topics in the cognitive neuroscience field of high-level vision. In the first part of the course students will read recent fMRI journal papers and learn about common fMRI designs and analysis methods; in the second part of the course students will conduct a research study as a group to address a research question developed from readings. Students are expected to write a paper in a journal article format at the end of the course and to present their results in front of the class. Research topics will vary but with special focus on topics in object, scene and space recognition. Cross-listed with Neuroscience and Psychology. instructor’s permission required.
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

When we think about our ability to see, we tend to think about our eyes, but in fact vision happens mostly in the brain. This course explores the remarkable perceptual deficits that occur when the visual regions of the brain are damaged or fail to develop normally, focusing on what these perceptual malfunctions tell us about normal visual perception. Topics include visual system anatomy and physiology; functional specialization in the lower visual system as revealed by cerebral achromatopsia (color blindness resulting from brain damage) and akinetopsia (impaired motion perception); cortical plasticity in the visual system; spatial deficits in perception and action; and the implications of high-level visual deficits, including prosopagnosia (impaired face recognition), Charles Bonnet syndrome (complex visual hallucinations in blind areas of the visual field), blindsight (accurate responding to visual stimuli despite apparent inability to see them), and Anton’s syndrome (denial of blindness).
Prerequisites: AS.050.105 OR AS.050.203 OR AS.080.203 OR AS.050.101 OR AS.200.110 OR AS.200.211 OR instructor’s permission
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.326. Foundations of Cognitive Science. 3.00 Credits.
This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology. Co-listed with AS.050.626.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.
AS.050.332. Developmental Cognitive Neuroscience. 3.00 Credits.
In-depth examination of the current literature on cognitive development in the context of developmental cognitive neuroscience. Please see course prerequisites. Meets with AS.050.632.
Prerequisites: AS.050.101 OR AS.050.339 OR AS.200.132 OR AS.050.105 OR Instructor’s Permission.
Instructor(s): B. Landau
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.339. Cognitive Development. 3.00 Credits.
This is a survey course in developmental psychology, designed for individuals with some basic background in psychology or cognitive science, but little or none in development. The course is strongly theoretically oriented, with emphasis on issues of nature, nurture, and development. We will consider theoretical issues in developmental psychology as well as relevant empirical evidence. The principle focus will be early development, i.e., from conception through middle childhood. The course is organized topically, covering biological and prenatal development, perceptual and cognitive development, the nature and development of intelligence, and language learning. Also listed as AS.050.639. Cross-listed with Neuroscience. Instructor’s approval required.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

Instructor’s permission required. (Also offered as AS.050.312.)
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. (Same as AS.050.326) Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology.
Instructor(s): P. Smolensky
Writing Intensive.

Also offered as AS.050.339. Instructor approval required.
Instructor(s): J. Yarmolinskaya.

Psychological Brain Sciences

AS.200.141. Foundations of Brain, Behavior and Cognition. 3.00 Credits.
Formerly listed as Introduction to Physiopsychology. A survey of neuropsychology relating the organization of behavior to the integrative action of the nervous system. Cross-listed with Behavioral Biology and Neuroscience.
Instructor(s): L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.302. Behavioral Assessment of Animal Models of Cognition and Neuropsychiatric Disorders. 3.00 Credits.
What does a rat exploring its environment tell us about memory? How can a mouse help us better understand schizophrenia? This course will focus on procedures that are routinely used to study behavior in animal models of cognition and neuropsychiatric disorders. The procedures discussed will include assessments that fall into 3 broad functional domains: motor function, affective or emotional states, and cognition. Throughout the course, we will read and discuss original research articles to illustrate and compare some of the measures and results from the various procedures. Postdoc Teaching Fellowship. This is designed to be an upper level course.
Prerequisites: Pre-reqs: AS.200.141 OR (AS.080.305 AND AS.080.306) or permission of the instructor.
Instructor(s): D. Smith
Area: Social and Behavioral Sciences.

AS.200.303. Psychobiology of Drug Addiction. 3.00 Credits.
The goal of this course is to explore the psychobiological bases of drug addiction. The course will begin with a discussion of the evolving concepts and theories of addiction, as well as a review of the methods and animal models relevant for the study of drug addiction. Following this primary introduction, students will learn 1) how drugs of abuse affect neural function and how this relates to their addictive potential, 2) how biological and behavioral phenotypes predispose certain individuals to addiction, and 3) how environmental factors (stress, social context, learning history, drug contingencies, etc.) contribute to the development of addiction. Special focus will be given on the complex interactions between these different factors and levels of analysis. The course will integrate a variety of approaches (molecular biology, system neuroscience, and psychology). Based on this understanding of the psychobiological mechanisms of drug addiction, we will reflect and refine our views of addiction and examine potential ways to prevent and treat the disease.
Prerequisites: Pre-reqs: AS.200.141 OR (AS.080.305 AND AS.080.306) OR (AS.020.312 AND AS.020.306).
Instructor(s): R. Keiflin
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.304. Neuroscience of Decision Making. 3.00 Credits.
This course will survey the neural mechanisms of decision-making. Current experimental research and theory concerning selection, control, and evaluation of actions are examined in humans and animals. Topics will range from simple perceptual judgements to complex social behavior. The course involves a weekly lecture about a specific topic followed by a student presentation of a current research paper. Cross-listed with Neuroscience.
Prerequisites: AS.080.305 OR AS.080.205 OR AS.200.141
Instructor(s): V. Stuphorn
Area: Natural Sciences.
AS.200.308. Neurobiology of Learning and Memory. 3.00 Credits.
This course is an advanced survey of the scientific study of learning and memory. An interdisciplinary approach is used to integrate the state of the field across levels from the cellular-molecular basis of synaptic plasticity to functional circuitry implicated in learning to memory systems in the brain. The course is designed to provide a deep understanding of the outstanding issues and current debates in learning and memory research with a specific emphasis on animal models. This is an interactive lecture/seminar course with active student participation. Recommended Course Background: AS.200.370 or AS.200.141 or AS.080.305/AS.080.306 or AS.020.306.
Instructor(s): M. Yassa
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.344. Behavioral Endocrinology. 3.00 Credits.
An examination of the effects of hormones on behavior in non-human and human animals. Topics will include the effects of hormones on sexual differentiation, reproductive behavior, parental behavior, homeostasis and biological rhythms, regulation of body weight, learning and memory. Cross-listed with Behavioral Biology and Neuroscience. Prerequisites: Prereqs: (AS.200.141 OR AS.080.306) OR (AS.020.151 AND AS.020.152) OR (AS.020.305 AND AS.020.306) or instructor's permission.
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.368. Sleep, Dreams, and Altered States of Consciousness. 3.00 Credits.
Sleep, dreaming, resting and arousal to waking represent very different states of consciousness which differ dramatically both psychologically and physiologically. This course focuses on cognitive, psychological, physiological, biological and genetic aspects characterizing each of these states with some reference to other altered states. The course includes a focus on the major pathologies affecting sleep-wake states. Clinical cases will be considered. These inform about both psychological and biological aspects of these states. The relative biological functions of each state will be evaluated with particular attention to the mystery of why we have and apparently need REM and NREM sleep. Actual physiological recordings of sleep states will be reviewed and the student will learn how these are obtained and how to evaluate these. The circadian rhythms, ontogeny and evolution of these sleep-wake states will also be covered. This will include a review of information learned from non-human animal sleep. The change from sleep to full waking reflects change toward increasing brain organization supporting consciousness. Understanding of the neurobiology of these states will be used to explore some of the more modern and scientific concepts of human self-awareness or consciousness. Recommended Course Background: AS.200.101 OR AS.080.203 OR AS.050.203
Instructor(s): R. Allen
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.370. Functional Human Neuroanatomy. 3.00 Credits.
This course examines the general organizing principles of the anatomy of the human central nervous system and how this anatomical organization relates to function, from the level of neural circuits, to systems, to behavior. Students will learn to identify neuroanatomical structures and pathways in dissections and MRI images through computerized exercises. Readings and lectures will emphasize general structure-function relationships and an understanding of the functional roles of particular structures in sensory, motor, and cognitive systems. Prerequisites: AS.080.250 OR AS.080.305
Instructor(s): S. Courtney-Faruque
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.376. Psychopharmacology. 3.00 Credits.
Designed to provide information about how drugs affect the brain and behavior. The course focuses on biological concepts underlying structures and functions of the brain that relate to mental disorders. An introduction to neurobiology and brain function is presented as it applies to the interaction of various classes of drugs with the individual neurotransmitter systems in the brain. A brief historic review is followed by a discussion of clinical relevance. Cross-listed with Behavioral Biology and Neuroscience. Enrollment limited to juniors and seniors. Prerequisites: AS.200.141 OR (AS.020.312 AND AS.020.306) OR (AS.080.305 AND AS.080.306) or permission required.
Instructor(s): H. Adwanikar
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.801. Research Seminar: Learning and Memory.
This laboratory meeting is for graduate students studying learning and memory mechanisms, alterations with age or neurologic disease, and advanced neuroimaging methods. Meetings will focus on experimental design, presentation of data, analytical techniques. Undergraduates allowed to add the course with permission as Satisfactory/Unsatisfactory only. Recommended Course Background: AS.200.370 or AS.200.141 or AS.080.305/AS.080.306 or AS.020.306.
Instructor(s): M. Yassa.

Biomedical Engineering
EN.580.694. Statistical Connectomics. 3.00 Credits.
This course will cover the basics of an exciting emerging field of statistical connectomics (aka, brain-graphs). It is so new, that we are going to make some of it up in this class! The first week will be introductory lectures that I give. The rest of the semester will be run like a seminar; each week will focus on a different topic. On Tuesdays we will hear about a statistical method that operates on graphs, and on Thursdays we will read about some neuroscience data upon which one could apply these techniques. The final project will consist of implementing a statistical method devised for graphs on a brain-graph problem. Recommended background: coursework in probability, linear algebra, and numerical programming (eg, R, Python, Matlab).
Instructor(s): J. Vogelstein
Area: Engineering.

Philosophy
http://philosophy.jhu.edu/
The Department of Philosophy offers programs and courses at the undergraduate and graduate levels. The courses cover major periods in the history of Western philosophy and many of the main topics of systematic investigation: epistemology, metaphysics, ethics, aesthetics, philosophy of language, mathematical logic, and philosophy of science.

The undergraduate courses are designed to introduce students to the history of philosophy and its place in Western civilization, to teach them how to read philosophical texts, and to help them think about philosophical problems, including those that arise in other disciplines. Students may major in philosophy or use it as a concentration for an area major in Humanistic Studies. They may also study philosophy along with another subject, either by constructing a double major or by taking courses designed to help them develop philosophical perspectives on their own fields of interest.

The graduate program is intended primarily for those planning to teach philosophy and make their own contributions to it. While the acquisition of a broad background in the history and different systematic fields of
philosophy is required, students will have ample opportunity to develop their own special interests.

The Department of Philosophy encourages its students to take advantage of the rich resources of other departments at Johns Hopkins University. As a look at their offerings will show, numerous philosophically important courses are offered by such departments as Political Science (political philosophy), History of Science and Technology (philosophy of science), the Humanities Center (hermeneutic, interpretive, and literary theory), and Cognitive Science.

Philosophy poses such fundamental questions as: What can we know? How should we live? and How do the results of human inquiry, obtained so far, hang together? It is an excellent preparation for professional studies such as law and medicine; it provides perspective on other disciplines such as psychology, mathematics, literature, and political science; and it centers on a set of questions that thinking people cannot avoid. At Hopkins it can be studied in a variety of ways.

A number of our courses are designed to provide broad introductions to the subject. Both AS.150.111 Philosophic Classics and AS.150.112 Philosophical Problems cover a wide range of topics, the former through the study of some of the major texts of Western thought, the latter by more systematic examination of representative issues. Either one will show a student a variety of approaches to philosophical problems. The courses AS.150.201 and AS.150.205 offer historically oriented introductions to the subject, giving the student a basic grasp of the development of philosophy in two of its major periods. Other courses, such as AS.150.118 Introduction to Formal Logic, 150.223 Aesthetics, and AS.150.220 Introduction to Moral Philosophy, are designed for students with an interest in the particular areas they cover. All of these courses are readily available without prior study of philosophy.

The 400-level courses are open to graduate students as well as to undergraduates. Some require no previous course work in philosophy. Others presuppose some familiarity with philosophy, such as would be provided by one of the introductory courses. Still others require more specific preparation. A student with questions about whether he/she has the background for a particular 400-level course should consult either the instructor or the departmental undergraduate studies.

A student who wants to study an area of philosophy not provided for in the regular curriculum or to undertake a special project of writing and research should consult with a faculty member about taking AS.150.540 Directed Study-AS.150.512 Directed Study. An undergraduate who has research should consult with a faculty member about taking AS.150.511 Directed Study. Well-qualified majors may be admitted to a graduate seminar during their senior year. They should consult their major adviser.

If you have any questions or concerns regarding these requirements, please contact the director of undergraduate studies.

Learning Goals
A student who graduates with a BA in philosophy will be able to demonstrate:

• A broad understanding of the work of major figures in the history of philosophy, both ancient (especially Plato and Aristotle) and modern (especially the period of Descartes through Kant)
• Familiarity with the most important topics in a range of areas that are typically regarded as lying at the center of contemporary philosophical thought, including metaphysics, theory of knowledge, philosophy of mind, and philosophy of language
• Familiarity with the most important topics in ethics and political philosophy
• Familiarity with formal logic, including the ability to understand the logical symbolism used in many contemporary philosophical texts
• The capacity to think analytically and creatively about philosophical texts and issues
• The capacity to express philosophical ideas and support them effectively in argument, both in writing and orally.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor's Degree (p. 10).)

Philosophy majors must take 11 departmental courses. A minimum of six courses must be at the 300 level or higher. Of the two general introductory courses, 150.111 Philologic Classics and 150.112 Philosophy Problems, only one may count toward the major, and two total 100-level courses may count toward the major. Majors are required to take the Undergraduate Seminar, preferably in the junior year. Courses in which a grade of D is received may not count toward the major, nor may courses taken satisfactory/unsatisfactory.

Other courses must be distributed by taking at least one course in each of the five following categories:

• Ancient philosophy
• Modern philosophy
• Logic, philosophy of science, or philosophy of mathematics
• Philosophy of mind, theory of knowledge, philosophy of language, or metaphysics
• Ethics, aesthetics, or political philosophy

The first two categories are normally satisfied by taking AS.150.201 Introduction to Greek Philosophy and AS.150.205 Introduction to the History of Modern Philosophy. The student thus has four or five additional electives after satisfying the distribution requirements.

Well-qualified majors may be admitted to a graduate seminar during their senior year. They should consult their major adviser.

### Double Majors

The department encourages linking the study of philosophy with the study of other disciplines. For example, the subject matter and course requirements of the philosophy and psychology departments are such as to make a double major both practical and intriguing. Similarly, knowledge of literature or the history of art is pertinent to the study of aesthetics; a solid understanding of science is valuable for those interested in the philosophy of science; and students of ethics benefit considerably by combining their work with study of political theory and of the political realities in which morality must function. Members of the department are available to assist students in planning double majors tailored to their interests.

### Honors Program in Philosophy

Students with an overall GPA of 3.0 and a Philosophy GPA of 3.5 or higher (or outstanding recommendations from three department members) are eligible for the Senior Honors Thesis Program. In addition to the 11 courses required for the major, successful applicants take AS.150.551 Honors Project, to write a thesis of about 50 pages under the supervision of a faculty member. The thesis must be completed prior to spring vacation of senior year. If the student withdraws prior to completion of a thesis, a satisfactory/unsatisfactory grade will be awarded.

The grade for the thesis will depend on the thesis itself and an oral examination about it, conducted by the thesis adviser and two other faculty members. Graduation Honors will be awarded to those whose work receives an A- or better. For more information about the Honors Program, contact the department’s director of undergraduate studies.

### Minor in Philosophy

Philosophy minors must take seven departmental courses, which should include the following:

- At least one course in the history of philosophy, either ancient or modern.
- At least one course in two of the following areas:
  - Logic, philosophy of science, or philosophy of mathematics
  - Ethics, aesthetics, or political philosophy
  - Philosophy of mind, theory of knowledge, philosophy of language, or metaphysics

#### Minor Restrictions

- Either AS.150.111 Philosophic Classics or AS.150.112 Philosophical Problems, but not both, may count as one of the seven courses. Neither is a required course.

If you have any questions or concerns regarding these updated requirements, please contact the director of undergraduate studies.

Minor in Bioethics
The practice of medicine, the development of public health policies, and advances in the biomedical sciences raise fundamental moral and philosophical issues. The bioethics program is designed to provide students with an understanding of these issues, and the background and the conceptual tools to think about them clearly. The program is a collaboration between the Berman Institute of Bioethics and the Department of Philosophy, and draws on the resources of both.

See Bioethics Program (http://e-catalog.jhu.edu/departments-program-requirements-and-courses/arts-sciences/bioethics) for more details.

BA/MA Program
The department now offers an accelerated BA/MA program. The requirements for the BA and for the MA remain unchanged, but in the combined BA/MA program, two 400-level courses taken as part of the BA can also be used toward the MA. This means that the MA requires only eight additional courses, rather than the 10 required for a free-standing MA. See the Graduate tab for more information.

When The Johns Hopkins University was founded in 1876, it was the first university in the United States designed as a center for research and doctoral education. Among its earliest graduate students were Josiah Royce and John Dewey, C. S. Peirce was an early faculty member. The Department of Philosophy continues this tradition today, preparing graduate students to make original contributions to the field and to pursue careers in college and university teaching.

Usually there are about 15 graduate students taking courses and seminars, and another 15 at various stages in the writing of their dissertations. Because classes are small, we look for students who wish to take advantage of the individual attention available here. The department’s purpose is to provide opportunities for students to develop special interests within a program that also ensures breadth of knowledge. We offer classes, seminars, and directed study in the history of ancient, modern, and contemporary Western philosophy, and in the systematic areas of epistemology, metaphysics, ethics, philosophy of science, philosophy of physics, philosophy of language, philosophy of mind, philosophy of mathematics, mathematical logic, and aesthetics. Courses with relevance to philosophy are frequently offered in other departments, and in certain circumstances these may be used toward the PhD or MA course requirements in philosophy.

The graduate program is designed primarily for those seeking the PhD, but under exceptional circumstances students aiming at the MA may be admitted.

Graduate Requirements
Graduate students are required to take 13 courses, some of which must be selected to meet the departmental distribution requirements. Students also take an examination in a field of special interest to them. During the third year, students work intensively on a substantial paper on a topic in that field. After satisfying these requirements and writing a dissertation prospectus, students concentrate on the doctoral dissertation.

Students are expected to complete examinations and course work within three years. Most students take about two to three years to write their doctoral dissertation.

For complete details of PhD and MA requirements, advising, student evaluation, and other matters relating to the graduate program, view the following:

Philosophy Graduate Program Requirements (http://philosophy.jhu.edu/wp-content/uploads/sites/7/2013/01/Philosophy-Graduate-Program-Requirements-Revised.pdf) (students entering before 2015).

BA/MA Program
The department now offers an accelerated BA/MA program. The requirements for the BA and for the MA remain unchanged, but in the combined BA/MA program, two 400-level courses taken as part of the BA can also be used toward the MA. This means that the MA requires only eight additional courses, rather than the 10 required for a free-standing MA. For full details of the MA program and the BA/MA program, see the Requirements handbook (2015 and after) in the Graduate section here and on the department website.

In order to be admitted to the BA/MA program, you must already be a philosophy major; you can apply in the spring term of your junior year or any time in your senior year. If you meet the qualification for the BA honors thesis (overall GPA of 3.0, philosophy GPA of 3.5), you will automatically be admitted; others may be admitted on a case-by-case basis. Interested students should contact the chair of the department, Professor Richard Bett (http://philosophy.jhu.edu/directory/richard-bett).

Please note that there is no departmental financial aid for BA/MA students. However, BA/MA students whose MA-level studies extend into a fifth year get a 50% discount on their tuition in their fifth year.

All application material and supporting documents should be uploaded through the online application, these include:

- Online application (https://app.applyyourself.com/A1ApplicantLogin/fl_ApplicantLogin.asp?id=jhu-grad)—be sure to select Combined Graduate Student option
- Transcripts: unofficial transcripts must be uploaded through the online application.

PhD Admissions
While an undergraduate major in philosophy is good preparation for graduate study in the department, applications are welcomed from students with other majors whose interests are now turning toward philosophy.

To apply, please read the information below and on the Graduate Admissions website (http://www.grad.jhu.edu/admissions/apply), and complete the application online.

If applying to more than one department, please send complete application materials for each department. All application documents must be provided in English (either the original or translations of the original documents). If you are unable to secure translations to English, we recommend that you contact World Education Services (http://www.wes.org).
All application materials and supporting documents should be uploaded through the online application; these include:

- Online application (https://app.applyyourself.com/?id=ju-grad)
- Application fee
- Statement of Purpose (briefly state your area of interest at the beginning of your Statement of Purpose; upload through the online application)
- Letters of recommendation (at least two): Letters of recommendation should be submitted and uploaded electronically following the instructions in the online application.
- Transcripts: Unofficial transcripts must be uploaded through the online application. Applications will be ready for review with unofficial transcripts, but official transcripts will be required if an offer of admission is made
- GRE scores (mandatory)
- TOEFL or IELTS score (for international applicants)
- Sample of work (the sample should reflect the applicant’s area of interest, and generally does not have to be more than 20 pages in length).

**Application Deadline**
The deadline for applications is January 15 or, if January 15 falls on a weekend or a holiday, the next business day. Admissions decisions will be made by around March 15.

For questions or inquiries about the online application and supporting documents, contact the Graduate Admissions office using the online contact form (http://www.grad.jhu.edu/contact/form). You may also contact Veronica Feldkircher-Reed, the academic program coordinator for the philosophy department, at vfeldki1@jhu.edu or 410-516-7524.

**Financial Aid**
All students admitted to the program receive financial assistance. Support is guaranteed for five years, provided that a student continues to make satisfactory progress toward completion of the PhD. Department fellowships cover tuition and pay a stipend. Outstanding applicants may be nominated for a George Owen Fellowship, which also covers tuition and for which the stipend is higher. All students receive fellowship support for the first two years; no teaching is required.

Third, fourth, and fifth-year students are supported by teaching assistantships, which carry full tuition and a stipend. In practice, the department is often able to offer teaching assistantships to students beyond their fifth year, though this support is not guaranteed.

**Sachs Fellowship Fund**
A generous bequest by a former member of the department, David Sachs, has established the Sachs Fellowship Fund. Sachs Fellowships are dissertation-year fellowships awarded to students who are making substantial progress toward completing their dissertations. For more information, see the Philosophy Graduate Program Requirements (http://philosophy.jhu.edu/wp-content/uploads/sites/7/2013/01/Philosophy-Graduate-Program-Requirements-Revised.pdf) (Attachments 4 and 5).

**Graduate Student Travel Funding**
The department encourages graduate students to present their work at conferences and workshops, and it is committed to helping to make this possible by providing funds for travel and or accommodation to students whose papers are accepted for presentation. Funding for students to participate in special summer schools is also a possibility; however, in such cases the topic must be clearly related to the student’s actual or intended area of specialization.

The funds available to the department for these purposes are limited, and so some guidelines are necessary in order to ensure that the money is distributed in the most equitable and effective way possible. With this in mind, the following guidelines are in now in place:

- For any student who makes one request for funding in a given academic year, the department will do its best to provide funding. If a student requests funding for more than one event in a given academic year, the second request will have lower priority. Similarly, a student who has had numerous trips funded over several years may find further requests given lower priority.
- The amount provided may vary depending on the cost of the trip. However, more expensive trips are more likely to receive only partial funding than less expensive ones. In particular, those involving international travel may receive only partial funding.
- The significance and prestige of the conference, workshop, or summer school in which a student is to participate will be a factor in decisions as to whether, or to what extent, to provide funding.
- A student’s proximity to the job market may result in a funding request being given higher priority than it would otherwise.
- Since conferences and workshops can happen at any time of year, it is not practical to impose any specific deadlines for funding requests. The department will, however, ensure that some funds remain available throughout the year, so that students making requests late in a given year do not lose out simply because of the timing. (This means that students making requests early in the year may sometimes receive less than they have asked for.)

These guidelines may sometimes be in tension with one another. But these will be the major factors to be taken into account in making these decisions.

Students requesting funding should supply documentation concerning the event—a link to a website will often be sufficient—as well as a breakdown of the expected costs of attending. Requests should be sent to the department chair and the director of graduate study.

**William Miller Essay Prize**
The Miller Prize is an essay prize awarded for an essay submitted by an eligible student in the philosophy graduate program. A prize competition is held every year. It is not guaranteed that an award will be made every year; however, provided at least one essay submitted in a given year is judged to be of superior quality, the prize will go to the author of the best essay submitted in that year. Given essays of sufficiently high quality, it is also possible that more than one award could be made in the same year.

**Miller Prize Submission Guidelines**
Entrants must be registered graduate students in philosophy at Johns Hopkins University who are prior to the completion of their eighth semester in the program (i.e., anyone in their first four years). Submissions should be self-contained essays of no more than 10,000 words, not including footnotes. Students may submit at most one essay per year. Papers accepted for publication are not appropriate submissions.

Submissions should be anonymous; your name should not appear anywhere in the paper. The papers should be submitted to Veronica Feldkircher-Reed, either electronically (via email at vfeldki1@jhu.edu) or as a hard copy. If you do the latter, you should include a separate cover
page with your name, the title of the paper, and a word count. If you submit it electronically, do not include a cover page, but include the paper title and word count in the email to which you attach the paper. The cover pages or emails will be kept separately in the office and will not be shown to the selection committee.

The submission deadline for the Miller Prize is the same day the third-year papers are due.

For current faculty and contact information go to http://philosophy.jhu.edu/people/

Faculty
Chair
Richard Bett
Professor (Chair): ancient Greek philosophy, ethics.

Professors
Peter Achinstein
philosophy of science, analytic philosophy.

Eckart Förster
metaphysics, history of philosophy, Kant and German idealism.

Robert Rynasiewicz
logic, philosophy of science, history and philosophy of physics.

Michael Williams
Krieger-Eisenhower Professor: theory of knowledge, philosophy of language, history of modern philosophy, epistemology.

Associate Professors
Hilary Bok
Henry R. Luce Professor in Bioethics and Moral and Political Theory: moral philosophy, bioethics, freedom of the will Kant.

Steven Gross
philosophy of language, philosophy of mind, metaphysics.

Yitzhak Melamed
Early Modern Philosophy, German idealism, metaphysics.

Dean Moyar
German idealism, social and political philosophy, ethics.

Assistant Professors
Justin Bledin
logic, epistemology, philosophy of language.

L. Nandi Theunissen
Peterson Assistant Professor in: ethics.

Emeriti
Stephen Barker

Jerome B. Schneewind

Meredith Williams

Joint/Adjunct Appointments
Jeffrey Bub
Professor (Philosophy, University of Maryland, College Park): philosophy of quantum mechanics.

Paola Marrati
Professor (Humanities Center): contemporary French thought.

Maria Meritt
Assistant Professor (Bloomberg School of Public Health): bioethics.

Lawrence Principe
Professor (History of Science and Technology): history and philosophy of science.

Andrew Siegel
Core Faculty (Berman Institute of Bioethics).

Hent de Vries
Professor (Humanities Center): modern European thought.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.150.111. Philosophic Classics. 3.00 Credits.
The course introduces students to philosophy by critically examining selected texts in the Western philosophical tradition. Philosophers whose ideas will be examined include Plato, Descartes, Kant and Nietzsche.
Instructor(s): A. Abazari
Area: Humanities
Writing Intensive.

AS.150.112. Philosophical Problems. 3.00 Credits.
An introduction to philosophy through several central problems. This year’s topics are free will, death, time, and race.
Instructor(s): S. Gross
Area: Humanities.

AS.150.113. Freshman Seminar: Objectivity. 3.00 Credits.
This course examines the notion of objectivity and challenges to it. Its topics include the status of objective facts and beliefs, the structure of social reality, and rational disagreement. Dean’s Prize Freshman Seminar
Instructor(s): N. Goldberg
Area: Humanities.

AS.150.114. Philosophy of Human Rights. 3.00 Credits.
From domestic debates about abortion and health care to international dialogue about women’s rights, genital mutilation and genocide, human rights claims have become increasingly common, and we’ve come to rely on the discourse of human rights to assess the way human beings are treated by one another and by states. But what are human rights? How are human rights claims justified? Are human rights really objective and universal or are they contingent and relative to particular cultures? Where did the human rights culture begin, and how has it become so important? This course aims to explore these questions by examining foundational human rights documents, historical works on human rights and contemporary philosophical inquiry into their foundations (or lack thereof).
Instructor(s): T. Wilk
Area: Humanities.
AS.150.116. Mortal Questions. 3.00 Credits.
What is the meaning of life? Is the question well-formed? What does living well require? Does death give human life meaning? What does it mean to say that life is 'absurd'? Are we free to do as we choose? What should we make of human nature or the human condition in light of the great and ever more pervasive technological advances of the present epoch? Will we transform our nature? In light of threats of environmental catastrophes spurred by global warming, nuclear war and the like, what do we make of our daily lives and the activities that compose them? Do those equipped with the relevant capacities and apprised of the relevant information bear a moral obligation to the communities of which they are members? Crucially, these questions require us to reflect deeply on our human values. To address these questions, we will read selected works of philosophers ranging in time from Plato to the present — including both analytic and continental philosophers, men and women, the canonized and otherwise.
Instructor(s): D. Lindeman
Area: Humanities
Writing Intensive.

AS.150.118. Introduction to Formal Logic. 3.00 Credits.
An introduction to symbolic logic and probability. In the first two parts of the course we study formal ways of determining whether a conclusion of an argument follows from its premises. Included are truth-functional logic and predicate logic. In the third part we study the basic rules of probability, and learn how to make probability calculations and decisions in life. Co-listed with AS.150.632 (for graduate students) (01-F 11:00-11:50am).
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.119. Existentialism. 3.00 Credits.
Existentialism is a philosophical movement that made a dramatic entry into the 20th century intellectual scene and had a profound and long lasting influence on it. The central themes developed by existentialist thinkers transgressed the boundaries of academic philosophy and found their expression in plays, novels, cinema, poetry, political tracts, etc. Through close reading of the seminal texts by Kierkegaard, Nietzsche, Heidegger, Sartre, and Merleau-Ponty, we will explore the core tenets of the existentialist legacy. The philosophical texts will be supplemented by related works of fiction and films. Freshmen Only.
Instructor(s): G. Lebanidze
Area: Humanities.

AS.150.125. Introduction to Modern Philosophy. 3.00 Credits.
The course will examine four major figures of early modern philosophy: Descartes, Leibniz, Hume, and Kant. Although the most recent of these thinkers died more than 200 years ago, we still refer to them as "modern" philosophers, revealing their great influence on the way we think about ourselves and our place in the world. The course will look at what these philosophers thought about questions such as: What kind of beings are we and how are we related to the world around us? Is knowledge of the world possible and if so what are its sources? Can we answer the question of God’s existence? Is order something we find in the world or impose on it? etc.
Instructor(s): G. Lebanidze
Area: Humanities
Writing Intensive.

AS.150.126. Relativism. 3.00 Credits.
More than any other modern philosophical doctrine, relativism has found currency outside of the academy. Talk of "equally valid" points of view has become a commonplace, even when the matter under discussion is a straightforwardly factual. We will examine many different relativistic doctrines, including the views that people coming from very different backgrounds or with very different beliefs do not have the grounds to criticize one another, and that such individuals cannot so much as understand one another. In the first two-thirds of the course we will evaluate arguments for and against views such as these. Towards the end of the semester we will explore what the fall-out for our everyday lives would be (or should be) if some kind of relativism were true.
Instructor(s): N. Tebben
Area: Humanities.

AS.150.127. Realism and Antirealism in the Philosophy of Science. 3.00 Credits.
Are our best scientific theories approximately true, or useful but false? Does science converge on the truth over time? This course addresses such questions by surveying the scientific realism debate. Dean's Prize Teaching Fellowship course. Freshmen Only.
Instructor(s): J. Hricko
Area: Humanities.

AS.150.128. Cognitive Science & Political Philosophy. 3.00 Credits.
Cognitive Science & Political Philosophy: Is a person born a republican, or are they raised that way? Are democrats Democrats because they have emotional personalities? Is politics the product of evolution, or of culture? Should the brain sciences determine public policy and law? In this course we will consider these questions and many more like them by looking at recent work in philosophy and the brain sciences.
Instructor(s): J. Waterman
Area: Humanities.

AS.150.129. The Theory of Knowledge: Classic and Contemporary Questions. 3.00 Credits.
What is knowledge and how to define it? Does knowing require an ability to produce supporting reasons or is it sufficient that our beliefs track the truth? Which general model better its structure, Foundationalism, Coherentism or Infinitism? Does knowing depend on context? Can we discover empirically what knowledge is? These are key questions we will be discussing in our seminar, inspired by reading texts ranging from classics like Plato, the Stoics, and Sextus Empiricus, to contemporary authors like Gettier, Davidson, Goldman, DeRose, and others. Dean's Prize Freshman Seminar.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.130. Introduction to Philosophy. 3.00 Credits.
A topics-based introduction to the history and methods of philosophical reflection. We will consider several of the most important perennial questions of philosophy, primarily from some of the most significant thinkers in the history of Western philosophy (with the addition of Eastern and contemporary authors). Topics include: What is philosophy? Does God exist? What can we know? What is human nature? How should we live and act?
Instructor(s): S. Ogden
Area: Humanities.
AS.150.131. Introduction to Social Philosophy. 3.00 Credits.
An introduction to social philosophy through critical reading of selected texts of two major figures: Adam Smith and Karl Marx. These two thinkers offered opposing theories of capitalism, which continue to shape our basic understanding of the world. We will address the method and foundations of their theories, as well as the normative concepts that inform their thought (e.g. freedom, human flourishing, alienation, exploitation, etc).
Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.134. Freshman Seminar: Socrates in Context. 3.00 Credits.
A study of Socrates as portrayed by his contemporaries, and of intellectual and political trends to which he may have been reacting.
Authors will include Plato, Xenophon and Aristophanes. Freshmen Only.
Instructor(s): R. Bett
Area: Humanities.

AS.150.136. Philosophy & Science: An Introduction to Both. 3.00 Credits.
Philosophers and scientists raise important questions about the nature of the physical world, the mental world, the relationship between them, and the right methods to use in their investigations of these worlds. The answers they present are very different. Scientists are usually empiricists, and want to answer questions by experiment and observation. Philosophers don’t want to do this, but defend their views a priori. Why? Can both be right? Readings will present philosophical and scientific views about the world and our knowledge of it. They will include selections from major historical and contemporary figures in philosophy and science. This course has no prerequisites in philosophy or science.
Instructor(s): P. Achinstein
Area: Humanities, Natural Sciences.

AS.150.137. Philosophy of Language Seminar: Proper Names and Definite Descriptions. 3.00 Credits.
In talking with each other, we often use proper names like 'Juliet' and definite descriptions like 'The most beautiful fresco in Italy' to pick out persons and objects in our world. But what do these expressions mean exactly? In this seminar, we'll slowly and carefully work through some classic philosophical texts that address this issue. These texts will provide an introduction to the philosophy of language, and to analytic philosophy in general.
Instructor(s): J. Bledin
Area: Humanities
Writing Intensive.

AS.150.144. Freshman Seminar: Skepticism Ancient and Modern. 3.00 Credits.
Can we gain knowledge of reality, or is everything a matter of opinion? Does it matter? Why do we want (or need) knowledge anyway? Questions like this have been the stock in trade of philosophical skeptics throughout the entire history of our Western philosophical tradition. This class will involve close readings of some classic works on the topic of skepticism with a view to understanding some of the main arguments for (and against) skepticism: how they work and how they may have changed over time. Readings include selections from Sextus Empiricus, Descartes, Hume and Wittgenstein.
Instructor(s): M. Williams
Area: Humanities.

AS.150.182. What is Science?. 3.00 Credits.
A philosophical introduction to very basic questions about scientific reasoning, its scope and limits. Is there a universal scientific method? Can science really explain everything, anything? Must everything be proved in science? Is science incompatible with religion? Readings will be from scientists and philosophers who have thought about these issues from Descartes and Newton to the present. No prerequisites either in philosophy or science.
Instructor(s): P. Achinstein
Area: Humanities, Natural Sciences.

AS.150.191. Freshman Seminar: Ethical Topics in Plato. 3.00 Credits.
The class takes a problem-oriented approach to select dialogues in Plato. Central questions will include: the nature of motivation, and in particular, whether it is true that everyone desires the good; and the role of knowledge in leading a good life, in particular, whether it is true that that virtue is knowledge. We will focus on Ion, Apology, Euthyphro, the Meno, and the ethical books of the Republic.
Instructor(s): L. Theunissen
Area: Humanities
Writing Intensive.

AS.150.192. Freshman Seminar: Self and Self-Knowledge. 3.00 Credits.
Instructor(s): M. Williams
Area: Humanities.

AS.150.193. Philosophy of Language Seminar: Proper Names and Definite Descriptions. 3.00 Credits.
In talking with each other, we often use proper names like 'Juliet' and definite descriptions like 'The most beautiful fresco in Italy' to pick out persons and objects in our world. But what do these expressions mean exactly? In this seminar, we'll slowly and carefully work through some classic philosophical texts that address this issue. These texts will provide an introduction to the philosophy of language, and to analytic philosophy in general.
Instructor(s): J. Bledin
Area: Humanities
Writing Intensive.

AS.150.201. Introduction to Greek Philosophy. 3.00 Credits.
A survey of the earlier phase of Greek philosophy. Socrates, Plato, and Aristotle will be discussed, as well as two groups of thinkers who preceded them, usually known as the pre-Socratics and the Sophists.
Instructor(s): R. Bett
Area: Humanities.

AS.150.202. Philosophy of Medicine. 3.00 Credits.
This course explores philosophical issues that are of central importance to medicine. Topics to be covered include: history of medicine, relationship between medicine and science, distinction between health and disease. Dean's Prize Teaching Fellowship.
Instructor(s): B. Miller
Area: Humanities.

AS.150.203. Contemporary Metaphysics. 3.00 Credits.
This course will provide students with a survey of major topics in contemporary metaphysics, including such issues as the identity of objects through change and the metaphysical status of persons. Dean's Teaching Fellowship course.
Instructor(s): J. Brandau
Area: Humanities
Writing Intensive.

AS.150.205. Introduction to the History of Modern Philosophy. 3.00 Credits.
An overview of philosophical thought in the seventeenth and eighteenth centuries. We shall focus on fundamental questions in epistemology (knowledge, how we acquire it, its scope and limits), metaphysics (the ultimate nature of reality, the relation of mind and body, free will), and theology (the existence and nature of God, God's relation to the world, whether knowledge of such things is possible): all questions that arose in dramatic ways as a result of the rise of modern science. The principal philosophers to be discussed are Descartes, Locke, Hume and Kant, though we shall also make the acquaintance of Spinoza, Leibniz and Berkeley.
Instructor(s): M. Williams
Area: Humanities.
AS.150.215. Business Ethics. 3.00 Credits.
What is a responsible business practice? Do corporations have responsibility as moral agents? What is the relation between business and environment? In this course we will investigate the relationship between business practices and ethical thinking by analyzing and assessing philosophical arguments about the moral status of business. We will start by reading philosophical texts that offer an analysis of moral practices, decision-making procedures, and moral theories. In particular, we will read historical text by Aristotle, Hume, Adam Smith, Mill, Marx, and Keynes. Then we will see how these philosophical concepts and theories can be applied to the contemporary world of business. The main goal of this course is to critically evaluate the philosophical foundations and justifications for business and economic systems, and how these applies to specific issues as workplace discrimination, ethics of advertising, environmental destruction and consumer protection.
Instructor(s): H. Bok
Area: Humanities.

AS.150.216. Minds and Machines. 3.00 Credits.
The course is a philosophical introduction to the topic of artificial intelligence. We will examine such questions as whether machines can think and whether we can build robots that have emotions, personalities and a sense of self. In doing so, we will touch upon a closely connected question: is the human mind itself a machine?
Instructor(s): M. Bergamaschi Ganapini
Area: Humanities.

AS.150.217. Neuroethics. 3.00 Credits.
Can electroencephalography show that we lack free will? Can modern neuroimaging show that someone will commit a crime in the future? Is it ethical to use this promethean knowledge to put them in jail before they even commit a crime? In Neuroethics, we'll consider these and other pressing questions emerging at the frontiers of neuroscience and modern moral theory.
Prerequisites: This course is equivalent to AS.150.472
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.219. Introduction to Bioethics. 3.00 Credits.
Introduction to a wide range of moral issues arising in the biomedical fields, e.g. physician-assisted suicide, human cloning, abortion, surrogacy, and human subjects research. Cross-listed with Public Health Studies.
Instructor(s): H. Bok
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.150.220. Introduction to Moral Philosophy. 3.00 Credits.
An introduction to moral philosophy through in-depth and critical reading of selected texts from the history of philosophy. The philosophers whose texts will be discussed include Plato, Aristotle, Kant and Nietzsche.
Instructor(s): H. Bok, L. Theunissen
Area: Humanities.

AS.150.223. Formal Methods of Philosophy. 3.00 Credits.
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with AS.150.434)
Instructor(s): J. Bledin
Area: Humanities.

AS.150.227. Religion and/or Science?. 3.00 Credits.
What is the nature of reality? What is the mind? What is the meaning of life? How ought we to live? In this course, we will explore how some of the better known philosophical systems of India, China and Japan have attempted to answer these most central philosophical questions. We will focus on the following systems: Nyaya, Samkhya-Yoga, Vedanta, Buddhism, Carvaka, Confucianism, Taoism, and Zen.
Instructor(s): B. Miller
Area: Humanities.

AS.150.235. Philosophy of Religion. 3.00 Credits.
Are Religion and Science necessarily in conflict, can they coexist, or do they in fact require each other’s existence? Is scientific method so different from religious thinking? Can science discredit God? Is it possible to be rational and remain religious? In this course, we will explore these and other related questions and examine possible answers. In the process, we will read the texts of both classical and contemporary philosophers and scientists who tackled with these problems.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.236. Contemporary Moral Issues. 3.00 Credits.
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with AS.150.434)
Instructor(s): J. Bledin
Area: Humanities.

AS.150.237. Foundations of Modern Political Philosophy. 3.00 Credits.
This course is an introduction to modern political philosophy through an intensive study of the classic texts. The focus will be on the nature and limits of political authority under modern social conditions. Authors included are Machiavelli, Hobbes, Locke, Rousseau and Mill.
Instructor(s): D. Moyar
Area: Humanities.
AS.150.238. Philosophy, Science Fiction, and Human Nature. 3.00 Credits.
This is an introduction to philosophy through themes in science fiction. Particular emphasis will be on philosophical questions related to what it means to be a human such as personal identity, free will, the nature of mind, and the nature of knowledge.
Instructor(s): J. Simpson
Area: Humanities
Writing Intensive.

AS.150.245. Introduction to Philosophy of Mind. 3.00 Credits.
This is an introduction to the central problems of philosophy of mind: the mind-body problem and the problem of self-knowledge. Of particular interest in contemporary work is the relation of mind and brain and whether, or how, we acquire self-knowledge.
Instructor(s): M. Williams
Area: Humanities.

AS.150.248. Introduction to Metaphysics. 3.00 Credits.
The class is an introduction to contemporary, analytic, metaphysics. Topics to be discussed include: what is metaphysics, the nature of existence, time and temporality, modality and possible worlds, identity and personal identity, persistence, mereology, causation, and universals and abstract entities.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.253. Introduction to Philosophy of Psychology. 3.00 Credits.
Psychology is the study of mind and behavior, and philosophy of psychology is the study of the foundations of psychology. Foundational issues in psychology addressed by philosophy of psychology come in the form of the following questions. What is the nature of mental representation? What is the basic architecture of the mind, and is it innate? Can psychological theories proceed in abstraction from the environment? The purpose of this course is to introduce students to these and related questions and the various answers they've been given.
Instructor(s): D. Lindeman
Area: Social and Behavioral Sciences.

AS.150.259. Introduction to the Theory of Knowledge. 3.00 Credits.
An introduction to the central problems, concepts and theories of philosophical epistemology (theory of knowledge). Topics to be explored will include: what is knowledge (and why do we want it)? Can we get it (skeptics answer “No!”), or is everything in the end a matter of opinion? (skeptics say “Yes!”)? Theories of knowledge and justification: foundationalism versus the coherence theory; externalism versus internalism in epistemology. To what extent is knowledge an appropriate object of theory? Readings from early 20th century through contemporary sources.
Instructor(s): M. Williams
Area: Humanities.

AS.150.300. Prometheus Editorial Workshop. 1.00 Credit.
Prometheus is an international undergraduate philosophy journal published by students at Johns Hopkins University. The purpose of the journal is to promote philosophic discourse of the highest standard by offering students an opportunity to engage in open discussion, participate in the production and publication of an academic journal, and establish a community of aspiring philosophers. Students enrolled in this workshop will act as the staff readers for the journal. For more information, please visit www.prometheus-journal.com. Prerequisite: MUST have taken one philosophy course.
Instructor(s): C. Cummings
Area: Humanities.

AS.150.301. Undergraduate Seminar: Practical Reason. 3.00 Credits.
How does reasoning that results in action differ from reasoning that results in belief? Is all practical reasoning a kind of means-end (instrumental) reasoning, or is there a form of moral reasoning that is presupposed by instrumental reasoning? These questions and more will occupy us as we work our way through the recent philosophical debates about practical reason. Restricted to philosophy majors and minors only.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.304. The Ethics of Human Experimentation. 3.00 Credits.
This course will explore ethical theory, key historical events, and operational requirements of research involving human beings. Weekly discussions will focus on seminal literature and case studies that highlight conceptual and practical challenges related to informed consent; research ethics review; risk/benefit analysis; justice/fairness; globalization of research; participation of vulnerable populations; clinical equipoise; obligations to research participants and communities during studies and after research is completed; and deception in psychological and behavioral research. The course will also explore the emergence and development of the rules governing the protection of human subject research.
Instructor(s): J. Ali
Area: Humanities.

AS.150.305. Global Health & Human Rights: Theoretical Foundations & Practical Implications. 3.00 Credits.
This course systematically examines the human right to health. Topics will include the theoretical foundation(s) of human rights; how human rights compare and contrast to other dominant views of global justice (including Rawlsian versions, cosmopolitanism, and capabilities, among others); and whether (or under what circumstances) health can be properly called a “right”. Special scrutiny will be given to access to essential medicines as a recent example of the invocation of a right to health.
Instructor(s): M. DeCamp
Area: Humanities.

AS.150.309. Introduction to Philosophy of Physics. 3.00 Credits.
This course starts on July 7th and runs until August 1st. This course aims at introducing the student to the basic philosophical issues that lie at the heart of the modern physicist’s conception of nature. To this end, we will look carefully at the foundations of two modern theories of physics, namely, the special theory of relativity and quantum theory. Relativity revolutionized our understanding of space and time, whereas quantum physics shattered our established beliefs about causality and determinism in nature. In the special relativity section of this class, we will cover topics such as the speed of light postulate, conventionality of simultaneity thesis, and the twin paradox. In the foundations of quantum physics, we will probe the measurement problem, Schrodinger’s cat paradox and the uncertainty principle. No previous background in physics is required.
Instructor(s): G. Guralp
Area: Humanities, Natural Sciences.

AS.150.311. Undergraduate Seminar: Philosophy of Ludwig Wittgenstein. 3.00 Credits.
We will read Wittgenstein’s two great works: Tractatus Logico-Philosophicus (1921) and Philosophical Investigations (1953). If you have previously taken AS.150.442 you may not register for AS.150.311. Prerequisites: If you have previously taken AS.150.442 you may not register for AS.150.311.
Instructor(s): M. Williams
Area: Humanities.
AS.150.312. Philosophy and Complexity. 3.00 Credits.
This course aims to engage with philosophical problems that stem from sciences of complexity in an interdisciplinary way. We will pose questions concerning how disciplines such as biology, economics, neuroscience, astrophysics etc. deal with the problem of complexity, and we will look at the basic problems philosophers of science single out in this context. After introducing the general problematic of the course, we will have two main parts under which we examine the philosophy of complex systems. The first part will be devoted to the epistemological aspects of the problem such as models, laws, explanation and evidence, and the second part will examine the metaphysical aspects of emergence and reduction.
Instructor(s): G. Guralp
Area: Humanities

AS.150.315. Philosophy of Human Rights. 3.00 Credits.
From domestic debates about abortion and health care to international dialogue about women’s rights, genital mutilation and genocide human rights claims have become increasingly common, and we’ve come to rely on the discourse of human rights to assess the way human beings are treated by one another and by states. But what are human rights? How are human rights claims justified? Are human rights really objective and universal or are they contingent and relative to particular cultures? Where did the human rights culture begin, and how has it become so important? This course aims to explore these questions by examining foundational human rights documents, historical works on human rights and contemporary philosophical inquiry into their foundations (or lack thereof).
Instructor(s): T. Wilk
Area: Humanities
Writing Intensive.

AS.150.316. Puzzles and Paradoxes. 3.00 Credits.
The course is a survey of puzzles and paradoxes of truth, belief, knowledge, meaning, confirmation, rational action, and vagueness. Specific puzzles and paradoxes include, among others: Russell’s paradox, the Liar paradox, Moore’s paradox, the Skeptical paradox, Newcomb’s paradox, and the Sorites paradox. Besides being fun to think about, these puzzles and paradoxes touch on many areas of philosophy, including philosophy of language, logic, metaphysics, and epistemology. When introducing each puzzle or paradox, attention will be paid to its history and significance. In addition to this exposure to some of the many domains of philosophy, students will gain analytical skills applicable well beyond philosophy.
Instructor(s): D. Lindeman
Area: Humanities
Writing Intensive.

AS.150.317. Undergraduate Seminar for Philosophy Majors: Can Everything Be Explained?. 3.00 Credits.
We will study various philosophical theories about the nature of explanation, reduction, and speculation.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.320. Marx: Critique of Political Economy. 3.00 Credits.
A close reading of Marx’s Capital: Volume One. Specific attention will be given to clarification of Marx’s methodology, the foundational categories of his critique of political economy, the systematic unity of his theory, and the underlying normative concepts which inform his work. No previous course in philosophy or social sciences is required.
Instructor(s): A. Abazari
Area: Humanities, Social and Behavioral Sciences.

AS.150.322. Emotion, Mind & Morality. 3.00 Credits.
In this course, we will investigate a number of important philosophical questions about the normative structure of emotions and their role in moral cognition by surveying some of the classic works in philosophy. We will also read a number of contemporary papers. Finally, we will look at recent work in psychology and cognitive neuroscience on the impact of emotion on reason.
Instructor(s): M. Bergamaschi Ganapini
Area: Humanities
Writing Intensive.

AS.150.323. Undergraduate Seminar: Topics in Meta-Ethics. 3.00 Credits.
This is a seminar on theoretical topics in ethics. We focus on debates over cognitivism and non-cognitivism; realism and anti-realism: reasons internalism and externalism; relativism and pluralism. We read contemporary classics by Sharon Street, T.M. Scanlon, Joseph Raz, Bernard Williams, Allan Gibbard, and others.
Instructor(s): L. Theunissen
Area: Humanities
Writing Intensive.

AS.150.325. Philosophy of Oppression and Resistance. 3.00 Credits.
Human social structures can be oppressive in either explicit or covert forms, even in societies highly committed to just democratic ideals. The course will investigate what it means for an individual, practice, or institution to be oppressive, and will explore the concrete mechanisms which can underlie racialized and gendered forms of oppression in particular. Special attention will be given to the political and moral problems raised by hate speech, pornography, propaganda, ideology, and material inequality. Finally, we will discuss how social agents can resist explicit and covert oppression in a way that is conducive to the realization of just ideals.
Instructor(s): K. Powell
Area: Humanities
Writing Intensive.

AS.150.326. Philosophy of Art: A Historical Introduction. 3.00 Credits.
A reading of a number of important texts from the history of philosophy dealing with topics in the philosophy of art. Particular attention will be given to the German aesthetic tradition, and especially to Hegel’s aesthetics, although the most important ancient Greek contributions will be considered as well. In particular, we will read Plato, Aristotle, Plotinus, Kant, Schiller, early German Romantics, and Hegel, as well as selected secondary literature. No previous coursework in philosophy or history of art is required.
Instructor(s): A. Kabeshkin
Area: Humanities.

AS.150.330. Decisions, Games & Social Choice. 3.00 Credits.
This course is an introduction to decision theory, game theory, and social choice theory with an emphasis on their philosophical underpinnings and philosophical applications. Topics covered include the Prisoner’s Dilemma, Newcomb’s Problem, convention and social contracts, risk, and Arrow’s Theorem.
Instructor(s): J. Bleedin
Area: Humanities.

AS.150.400. Realism & Antirealism in the Philosophy of Science. 3.00 Credits.
Are our best scientific theories approximately true, or useful but false? Does science converge on the truth over time? This course addresses such questions by surveying the scientific realism debate.
Instructor(s): J. Hricko
Area: Humanities, Social and Behavioral Sciences.
AS.150.401. Greek Philosophy: Plato and His Predecessors. 3.00 Credits.
A study of pre-Socratic philosophers, especially those to whom Plato reacted; also an examination of major dialogues of Plato with emphasis upon his principal theses and characteristic methods. Cross-listed with Classics.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.402. Aristotle. 3.00 Credits.
A study of major selected texts of Aristotle.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.403. Hellenistic Philosophy. 3.00 Credits.
A study of later Greek philosophy, stretching roughly from the death of Aristotle to the Roman imperial period. Epicureans, Stoics, and Skeptics will be the main philosophical schools examined.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.404. Alienation. 3.00 Credits.
In this course we will study the topic of alienation both historically and systematically. We will examine the concept’s historical roots at the turn of the 19th century and engage with contemporary discussions by authors working in philosophy of mind, ethics and political philosophy.
Instructor(s): D. Moyar
Area: Humanities
Writing Intensive.

AS.150.405. Arabisch-Islamische Philosophie. 3.00 Credits.
Introduction to major philosophers of the Arabisch-Islamic tradition, including Avicenna, al-Ghazali, and Averroes. Topics addressed include the existence of God, metaphysics (e.g., causality), human freedom and knowledge, revelation and reason.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.406. Kant’s Critique of Practical Reason. 3.00 Credits.
A historical and systematic study of Kant’s ethics and philosophy of religion, with special attention to his Critique of Practical Reason.
Instructor(s): E. Forster
Area: Humanities.

AS.150.407. Enlightenment and Alienation. 3.00 Credits.
Why does the increase in enlightenment not correlate with an increase in morality and happiness? Jean-Jacques Rousseau raised this question in the middle of the 18th century and it remains a pressing question today. The course will examine the issue in Rousseau, Hegel, Marx, and Adorno, as well as in the contemporary work of Richard Moran and Rahel Jaeggi.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.408. Topics in Political Philosophy: Justice and Pluralism. 3.00 Credits.
This course will examine recent liberal political philosophy, with particular emphasis on the work of John Rawls and Jürgen Habermas.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.410. Schelling’s System of Transcendental Idealism. 3.00 Credits.
Schelling’s System of Transcendental Idealism is one of the key texts in the transition from Kant to Hegel. It is also one of Schelling’s clearest and most successful publications, and one of the best introductions to his philosophy. This course offers a close examination of the System of Transcendental Idealism against the background of Kant and Fichte.
Instructor(s): E. Forster
Area: Humanities.

AS.150.411. The Critique of the Power of Judgment. 3.00 Credits.
In this course we will study the topic of alienation both historically and systematically. We will examine the concept’s historical roots at the turn of the 19th century and engage with contemporary discussions by authors working in philosophy of mind, ethics and political philosophy.
Instructor(s): D. Moyar
Area: Humanities
Writing Intensive.

AS.150.412. Kant’s Critique/Judgment. 3.00 Credits.
This course will examine closely and in detail the aesthetic and teleological parts of Kant’s third masterpiece, The Critique of the Power of Judgment.
Instructor(s): E. Forster
Area: Humanities.

AS.150.413. Can Science Explain Everything?. 3.00 Credits.
What is scientific explanation? We will examine various theories about this in order to determine whether and how science can explain everything physical and everything mental (including consciousness, emotions, purposes, and values). In addition to science are non-scientific theories, for example, religious ones, necessary? Do they compete with or complement scientific ones?
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.414. Mathematical Logic I. 3.00 Credits.
The development, first, of sentential logic and, then, of first-order predicate logic. Topics covered include formal languages, effective procedures, truth-functional and Tarski semantics, logical entailment, systems of derivation, deductive soundness and completeness, compactness, theories, formalization of mathematics, sizes of models, and interpretations between theories.
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.415. Mathematical Logic II. 3.00 Credits.
Gödel’s two incompleteness theorems regarding, first the unaxiomatizability of arithmetic and, second, the impossibility of proving the consistency of arithmetic using arithmetic methods (unless arithmetic is inconsistent). Computability and Church’s Thesis.
Prerequisites: Prereq: AS.150.420
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.
AS.150.422. Axiomatic Set Theory. 3.00 Credits.
A development of Zermelo-Fraenkel set theory (ZF), including the axiom of choice (ZFC), a system in which all of mathematics can be formulated (i.e., entails all theorems of mathematics). Although, we’ll do an exposure to transfinite ordinals and cardinals in general so that you can get a sense for how stupendously “large” these can be, the main thrust concerns certain simple, seemingly well-posed conjectures whose status appears problematic. For example, the Continuum Hypothesis (CH) is the conjecture that the cardinality of the real numbers is the first uncountable cardinality, i.e., the first cardinality greater than that of the set of natural numbers. Equivalently, there is no uncountable subset of real numbers strictly smaller in cardinality than the full set of reals. (You’d think that if there were one, you would be able eventually to find such.) Cantor thought that CH is true, but could not prove it. Gödel showed, at least, that if ZFC is consistent, then so is ZFC+CH. However, Paul Cohen later proved that if ZFC is consistent, then so is ZFC + the negation of CH. In fact, CH could fail in astounding many ways. For example, the cardinality of the continuum could be (weakly) inaccessible, i.e., of a cardinality that cannot even be proved to exist in ZFC (although the reals can certainly be proved to exist in ZFC). So, are there further, intuitively true axioms that can be added to ZFC to resolve the cardinality of the continuum, and CH is definitely true or false? Or, as Cohen thought, does CH simply lack a definite truth value?
Instructor(s): R. Rynasiewicz
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.424. Foundations of Probability & Induction. 3.00 Credits.
An examination of various interpretations of probability, including classical and priori, frequency, propensity, subjective, and logical. Also, we will study views about evidence as well as paradoxes of inductive reasoning, including Hume’s skepticism, and the grue and ravens paradoxes. No previous knowledge of probability is required.
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.425. Poetic Thought. 3.00 Credits.
This course will examine essays and poems by Goethe, Hölderlin, and Rilke with an eye toward the ways in which their work addresses issues central to German Idealism and modern German thought. These include the relation of subject to object; the problem of the representation of the whole; the reconciliation of science and art; and the role of consciousness in the construction of the world. Readings to include texts by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer, Henrich, Husserl, Benjamin, and Allemann. Reading knowledge of German is required.
Instructor(s): E. Forster; R. Tobias
Area: Humanities, Natural Sciences.

AS.150.426. Philosophy and Disability. 3.00 Credits.
In this course, we will consider various philosophical issues related to disability. What counts as a disability? What obligations do we have, both as individuals and as a society, to people with disabilities? What counts as respecting people with disabilities, and what counts as unjustifiable discrimination against them?
Prerequisites: AS.150.219 OR AS.150.220
Instructor(s): H. Bok
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.150.427. Aristotelian Philosophical Psychology. 3.00 Credits.
What did philosophy of mind look like before Descartes? It centered on study of the soul (psuche), or philosophical psychology. This course will focus on Aristotle’s view of the soul, its functions, and its relation to matter (hylomorphism), as well as the development of his thought by later ancient and medieval Aristotelians, including Alexander of Aphrodisias, Averroes, and Aquinas. Will conclude with examination of some renewed interest in Aristotle relative to contemporary philosophy of mind.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.428. Spinoza’s Theological Political Treatise. 3.00 Credits.
The course is an in-depth study of Spinoza’s Theological-Political Treatise. Among the topics to be discussed are: Spinoza’s Bible criticism, the nature of religion, philosophy and faith, the nature of the ancient Hebrew State, Spinoza’s theory of the State, the role of religion in Spinoza’s political theory, the freedom to philosophize, the metaphysics of Spinoza’s Theological-Political Treatise, and finally, the reception of the TTP.
Instructor(s): Y. Melamed

AS.150.429. Topics in Logic: Ontology and Knowledge Representation. 3.00 Credits.
Knowledge representation deals with the possible structures by which the content of what is known can be formally represented in such a way that queries can be posed and inferences drawn. Ontology concerns the hierarchical classification of entities from given domains of knowledge together with the relations between various classes, subclasses, or individuals. The main framework in which we will work is that of description logics, which are decidable fragments of varying degrees of first order predicate logic. In ontology development we will examine RDF (Resource Description Framework), its extension to RDFS, and OWL (Web Ontology Language), and use the software Protegé for specific applications. Finally, we will take a look at query languages such as SPARQL (SPARQL Protocol and RDF Query Language).
Instructor(s): R. Rynasiewicz
Area: Humanities.

AS.150.430. Hegel’s Phenomenology of Spirit. 3.00 Credits.
An in-depth study of Hegel’s masterpiece, the Phenomenology of Spirit. We will be concentrating on the first half of the text.
Instructor(s): E. Forster.

AS.150.431. Introduction to Philosophy of Science. 3.00 Credits.
This course introduces students to some major philosophical problems about science, including these three: (1) Is there a universal set of rules constituting the “scientific method” that scientists must always follow in order to be rational? (2) Can science provide knowledge of an “unobservable” world underlying our experiences, and if so how? Or is science confined to speaking about the world of observation? (3) Are there important differences between philosophy and science? We will consider disputes between rationalists (e.g., Descartes) and empiricists (e.g., Newton) on scientific method, historical and contemporary debates between scientific realists and instrumentalists about the reach of science, as well as different viewpoints concerning the relationship between philosophy and science. No particular science or philosophy background is presupposed.
Instructor(s): P. Achinstein; R. Bett
Area: Humanities.
**AS.150.432. Hegel's Phenomenology of Spirit, Part 2. 3.00 Credits.**
This course is a continuation of Hegel's Phenomenology of Spirit, Part One, taught last Spring. We will closely study the second half of the book, compare its methodology with that of the first half, and end with an examination of Hegel's systematic reflections in the Preface.
**Prerequisites:** AS.150.430  
**Instructor(s):** E. Forster  
**Area:** Humanities.

**AS.150.433. Philosophy of Space and Time. 3.00 Credits.**
Is space an entity that exists independently of matter, or is it only an abstraction from spatial relations between bodies? Is there a lapse of time even when nothing changes, or is time only a measure of motion? Are motion and rest contrary states of a body, or are there only changes in the positions of bodies relative to one another? Philosophers and physicists have disputed these questions from antiquity to the present day. We survey the arguments and attempt to find a resolution. But there are further questions. Is there a fact of the matter as to the geometry of space (Euclidean or non-Euclidean), or as to whether spatially separated events occur at the same time? Why does time but not space have a "direction"? Are past, present and future objective features of reality? Are space and time ultimately discrete on small scales? Do space and time, or even just spatio-temporal relations between bodies and events, really exist? Or are they merely emergent features of a fundamental non-spatio-temporal reality?  
**Instructor(s):** R. Rynasiewicz  
**Area:** Humanities, Natural Sciences.

**AS.150.434. Formal Methods of Philosophy. 3.00 Credits.**
During the last century or so, symbolic logic and other formal methods have come to play an essential role in most areas of systematic philosophical inquiry. This course serves as an introduction to these formal prerequisites for more advanced study in a wide variety of contemporary philosophical areas. Topics include the syntax and semantics of sentential and first-order predicate logic, natural deduction, basic set theory, mathematical induction and recursion, probability, modal logic, and non-standard logics. The emphasis is on basic comprehension, not on mathematical virtuosity. (Co-listed/combined with AS.150.223)
**Instructor(s):** J. Bledin  
**Area:** Humanities.

**AS.150.437. KANT'S Opus Postumum. 3.00 Credits.**
Why did Kant, after he had completed the three Critiques, work on a book with the title, Transition from the Metaphysical Foundations of Natural Science to Physics – better known as his Opus postumum? Why did this project eventually come to include ethics and result in a revision of Kant's transcendental philosophy? Questions like these will be answered by means of a close study of Kant's text, and by relating the text to (a) his Metaphysical Foundations of Natural Science and (b) to his ethical writings from the critical period.  
**Instructor(s):** E. Forster  
**Area:** Humanities.

**AS.150.438. Spinoza's Ethics. 3.00 Credits.**
The seminar is an in depth study of Spinoza's major work, The Ethics.  
**Instructor(s):** Y. Melamed  
**Area:** Humanities.

**AS.150.439. Epistemology. 3.00 Credits.**
Is knowledge (or even strong evidence) required, or possible, in science and in philosophy? We will focus on whether standard forms of nondemonstrative reasoning are justified, how if at all one can gain knowledge of the observable and unobservable world, whether and how theories in philosophy can be established, and what to do in science and philosophy when you can't prove or get strong evidence for your theory.  
**Instructor(s):** P. Achinstein  
**Area:** Humanities.

**AS.150.442. The Philosophy of Ludwig Wittgenstein. 3.00 Credits.**
A close reading of Wittgenstein's Uncertainty familiarity with the Philosophical Investigations is required.  
**Instructor(s):** M. Williams  
**Area:** Humanities.

**AS.150.443. Wittgenstein's Philosophy of Mind. 3.00 Credits.**
The seminar will begin with a careful examination of the private language argument in the Philosophical Investigations. Among the additional themes we will examine is his analogy between philosophy of mathematics and his philosophy of psychology, implicit criticisms of the representational theory of mind, the problem of other minds and the role of deception, and the "grammar" of psychological concepts. There are numerous manuscripts concerned with mental and psychological concepts. Two volumes of the Remarks on the Philosophy of Psychology will be ordered for the seminar, though we will not be "working through" them in a systematic way. The Philosophical Investigations and Zettel are essential. Recommended Course Background: Familiarity with Wittgenstein's work.  
**Instructor(s):** M. Williams  
**Area:** Humanities.

**AS.150.444. The Identity of Indiscernibles. 3.00 Credits.**
Can two things (such as bodies, events, moments, thoughts, or geometrical points) have precisely the same qualities? If so, what makes them different from each other? In this class we will explore the debate about the Principle of the Identity of Indiscernibles. Readings will include texts by: Leibniz, Clarke, Max Black, Ayer, Ian Hacking, Robert Adams, and Michael Della Rocca.  
**Instructor(s):** Y. Melamed  
**Area:** Humanities.

**AS.150.446. Hegel's Science of Logic. 3.00 Credits.**
In this course we will focus on the first two parts of Hegel's Science of Logic, and address the following issues (among others). In what sense is Hegel's dialectical logic continuous with the classical metaphysical tradition and in what sense is it a critique of traditional metaphysics? What motivates the project, or what questions does Hegel think his logic can answer that previous logics did not?  
**Instructor(s):** D. Moyar; E. Forster  
**Area:** Humanities.

**AS.150.452. Freedom of Will & Moral Responsibility. 3.00 Credits.**
What are freedom of the will and moral responsibility? Are they compatible with determinism or naturalism? This course will examine various philosophers' answers to these questions.  
**Instructor(s):** H. Bok  
**Area:** Humanities  
**Writing Intensive.**
AS.150.454. The Value of Humanity. 3.00 Credits.
Are human beings distinctively valuable? What makes us valuable? And how should we respond to the value of human beings? The course is divided into four parts. The first part takes up questions about the basis of human value. We consider various proposals, including Kant’s, about the valuable feature or capacity of human beings. Are we valuable in virtue of having a good will, in virtue of being agents, in virtue of being valuers, or something further? The second part takes up questions about the explanation of the value of human beings. Does the proposed feature make us valuable because it instantiates a simple value property, making us valuable in ourselves, or simpliciter? We consider whether the notion of value simpliciter is a notion we fully understand, or need. Does the proposed feature make us valuable because it makes us good-for something or someone? Who or what does it make us good-for? Or again, does the proposed feature make us such that we are objects of an appropriate attitude or practical stance? If so, what is the attitude or stance? The third part of the course takes up normative questions about the appropriate mode of responding to human beings. We consider whether it makes sense to say that human beings are ends-in-themselves, and what it would mean to treat a person as an end-in-itself. We also consider various accounts of respect. A guiding question is whether human beings are the only appropriate objects of respect, or whether we can respect other beings, and even artifacts. The fourth part of the class applies what we have learned so far to related topics: to the question of whether human life or existence is valuable, and conversely, whether death is disvaluable. We consider, albeit briefly, the value of human beings in relation to the value of animals. And we ask about the role of Kantian notions like dignity in applied contexts, so that highly philosophical considerations about value are shown to have real-world bearing.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.455. Ethics And Animals. 3.00 Credits.
Instructor(s): H. Bok
Area: Humanities
Writing Intensive.

AS.150.456. Medieval Philosophy. 3.00 Credits.
Instructor(s): S. Ogden
Area: Humanities.

AS.150.460. Rawls and His Critics. 3.00 Credits.
John Rawls was the most important moral and political thinker of the 20th century. In this course we will look at his two main works, A Theory of Justice and Political Liberalism, along with some of the more influential criticisms of his ideas. Main topics will include the derivation of principles of justice, the role of the good in liberal political theory, and the nature of reasonable pluralism.
Instructor(s): D. Moyar; H. Bok
Area: Humanities.

AS.150.461. Russell, Frege, Wittgenstein: Foundations of Analytic Philosophy. 3.00 Credits.
Russel, Frege, and Wittgenstein (in Tractus) provided much of the philosophical foundation for 20th C. analytic philosophy. Their influence continues to be felt, especially in their conception of philosophical problems and the methods by which they can be solved.
Instructor(s): M. Williams
Area: Humanities.

AS.150.462. Islamic Political Philosophy. 3.00 Credits.
An introduction to the history of Islamic political philosophy, primarily focused on two flashpoints of encounter between the religion of Islam and other philosophical/political systems—an early one with ancient Greek philosophy (especially in the works of Plato and Aristotle), and a period of interface with modern Western secular political thought, from the late 19th century to present. Our goal will be to try to understand some of the varying responses in each period as Muslim thinkers seek authentic engagement with external and internal trends, both religious and philosophical. The focus will be on primary texts from philosophically engaged thinkers (who may or may not consider themselves philosophers).
Instructor(s): S. Ogden
Area: Humanities.

AS.150.465. Genetics, Genomics and Society. 3.00 Credits.
This course will examine the ethical, legal and social implications (ELSI) of human genetics through the lens of significant and field-defining periods and events in the history of the field. We will study the ELSI issues raised by those events, and how the events have shaped and defined the current state of the science and emerging scientific, ethical, policy and public health issues. Juniors and Seniors only.
Instructor(s): D. Mathews
Area: Humanities, Social and Behavioral Sciences.

AS.150.466. Recent Work in Skepticism. 3.00 Credits.
We all take it for granted that perceptual experience yields knowledge of the world around us. But in the first of his Meditations on First Philosophy, Descartes invents a new and puzzling thought experiment. He imagines an Evil Demon with the power to manipulate the total course of his (Descartes’s) experience, so that what he naturally takes to be experience of the world around him is really a kind of perpetual dream: a simulation or virtual reality, as we might say today. Descartes’s problem, which has made its way into popular culture through films like those in the “Matrix” series, remains a source of philosophical puzzlement. While no one believes that skeptical hypotheses like Demon or computer deception are true, it is not easy to say how we can exclude them. Given that the deception is systematic, it seems that any “evidence” I cite could itself be part of the simulation. So how do I (or could I) know (for sure) that I’m not the victim of the Deceiver or the Matrix? We shall examine some of the latest attempts to respond to Descartes’s challenge. Does the “How could I know?” question admit of a theoretical answer, or is the question itself somehow ill-posed? Can we answer it without making significant concessions to skepticism? Exploring such questions should teach us some interesting lessons about knowledge (or the concept of knowledge).
Instructor(s): M. Williams
Area: Humanities.

AS.150.467. Philosophic Logic. 3.00 Credits.
This course is a survey of various topics in philosophical logic. We begin with a review of the model theory of classical first-order logic. In our first unit, we will then move beyond the standard existential and universal quantifiers and consider generalized quantifiers, substitutional quantifiers, and plural quantification. In our second unit, we will investigate the theory of propositional modal logic, considering its syntax, semantics, and proof theory, and some of its applications. In our third unit, we will investigate various formal approaches to defining truth. In our fourth unit, we will get more philosophical and ask: what is logical consequence? In the course of answering this question, we will consider intuitionistic, normative, and informational conceptions of logic.
Instructor(s): J. Bledin
Area: Humanities.
AS.150.468. Global Food Ethics. 3.00 Credits.
This course is an introduction to ethical issues that arise within the contemporary global agrifood system. The overarching goal of the class is to give you the opportunity to think critically about a variety of conflicting views as to how we should produce, distribute, and consume food to achieve food security for over 9.6 billion people by 2050. We will borrow tools from practical ethics and theories of justice to shed light on these pressing issues that determine our common future and the way we personally relate to the food we eat.
Instructor(s): Y. Saghai
Area: Humanities.

AS.150.472. Neuroethics. 3.00 Credits.
Neuroethics: Can electroencephalography show that we lack free will? Can modern neuroimaging show that someone will commit a crime in the future? Is it ethical to use this Promethean knowledge to put them in jail before they even commit a crime? In Neuroethics, we'll consider these and other pressing questions emerging at the frontiers of neuroscience and modern moral theory.
Instructor(s): P. Stojanovic
Area: Humanities.

AS.150.474. Justice and Health. 3.00 Credits.
Course will consider the bearing of theories of justice on health care. Topics will include national health insurance, rationing and cost containment, and what justice requires of researchers in developing countries.
Instructor(s): H. Bok
Area: Humanities.

AS.150.475. Addiction, Depression, and the Self. 3.00 Credits.
An examination of the moral implications and effects of addiction, depression and Pharmacological treatments for depression on our conception of our own agency. Recommended Course Background: AS.150.219, AS.150.220, or permission required.
Instructor(s): H. Bok
Area: Humanities
Writing Intensive.

AS.150.476. Philosophy and Cognitive Science. 3.00 Credits.
This term's topic is perception. Questions will include: How does perception differ from belief, hallucination, imagination? Can what we believe affect what we perceive? What distinguishes the various senses? Is linguistic comprehension a kind of perception?
Instructor(s): S. Gross
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.150.479. The Ethics of Making Babies. 3.00 Credits.
In this class, we will investigate many aspects of the ethics of making babies, asking not only which children we should create and how we should create them, but whether we should make any more people at all. Investigating these questions will take us through large chunks of moral theory, bioethics, and public health ethics. For more information, or to request permission of the instructor (for those who do not meet the prerequisite requirements), email Travis Rieder at trieder@jhu.edu. Recommended Course Background: One course in ethics or bioethics, or permission of the instructor.
Instructor(s): T. Rieder
Area: Humanities.

AS.150.483. Topics in Jewish Philosophy: Hassidism. 3.00 Credits.
Hassidism is the ecstatic religious movement that emerged in East European Jewry in the mid-eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of Dov Ber of Mezrich between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon’s report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset.
Instructor(s): Y. Melamed

AS.150.487. Fundamental Principles of Philosophical Rationalism. 3.00 Credits.
At the center of Leibniz rationalist metaphysics are four interrelated philosophical principles: (1) The Law of Non-Contradiction, (2) The Principle of Sufficient Reason (roughly, the claim that everything must have a reason), (3) The Identity of Indiscernibles (roughly, the claim that there are no two perfectly similar things), and (4) The Predicate in Subject Principle (the claim that in every true proposition the concept of the predicate is somehow contained in the concept of the subject). In this class we will study these four principles, i.e., their modal strength, range, justification, and interrelations both in early modern philosophy (Leibniz, Spinoza, and Clarke), and in contemporary philosophy (Della Rocca, Sam Levey, Dassgupta, Max Black).
Instructor(s): J. Bledin; Y. Melamed
Area: Humanities.

AS.150.488. Enlightenment Moral and Political Theory. 3.00 Credits.
Instructor(s): H. Bok
Area: Humanities
Writing Intensive.

AS.150.490. Animal Minds. 3.00 Credits.
An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-listed 300.411
Instructor(s): M. Williams
Area: Humanities.

AS.150.493. Introduction to Scientific Methods. 3.00 Credits.
We will study various methods for proving scientific claims defended by scientists and philosophers. Included will be rationalism (Descartes), various forms of empiricism (Newton, Mill, Whewell), realism vs. anti-realism, and scientific strategies to follow when you cannot prove your favorite theory. No particular scientific background required.
Instructor(s): P. Achinstein
Area: Humanities, Social and Behavioral Sciences.

AS.150.494. Descartes. 3.00 Credits.
The course is an introduction to the philosophy of Rene Descartes. We will read most of his main philosophical works, and part of his correspondence. The class is open to both undergraduate and graduate students.
Instructor(s): Y. Melamed
Area: Humanities.
AS.150.495. Sex, Drugs, and Bioethics: Medicine and Morality in Modern America. 3.00 Credits.
Alongside rock n’ roll, sex and drugs have classically been seen as sites of moral or ethical transgression, particularly in post-war America. Unlike rock n’ roll, however, sex and drugs have always been bound up with the practice of medicine. This course explores the interaction of medical science with the moral and ethical issues which surround i) reproduction, sexual pleasure, and gender roles and ii) the use of drugs, both therapeutic, enhancing and recreational. Bridging these two sides of the course is the question of medicalisation, and how medical science is used to construct socially normative ideals about sexuality, behavior, emotion and physical capacity, and how in turn those moral norms are used to justify or argue for the development of particular medical practices. The aim of the course is to illuminate the mutually constitutive interplay of medicine and morality in modern America. Topics covered include: abortion, contraception, IVF, sex-selection, gene selection, adolescent sexualities, prostitution, STD surveillance, medicalisation of sexual dysfunction, medicalisation of emotion and behavior, ‘moral enhancement’, ADHD, Performance Enhancing Drugs, cosmetic surgery, neuroenhancement, recreational drugs, the war on drugs, the purpose of medicine.
Instructor(s): D. O'Connor
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.150.496. Topics in the Theory of Value. 3.00 Credits.
We ask a basic question in value theory: what is it for something to be good, or of value? Is it for something to instantiate the simple value property ‘good’? Can goodness be identified with some natural property, perhaps, the property ‘pleasant’, or some dispositional property, perhaps, ‘what we desire to desire’? Is goodness a relation between some object, state of affairs, or activity and a subject, so that the good is benefit? On the other hand, are reasons and not values primitive in value theory, so that we should theorize about the good in terms of appropriate responses to it? We will read classic works by G. E. Moore, Peter Geach, Judith Jarvis Thomson, Connie Rosati, Nicholas Sturgeon, Richard Kraut, Donald Regan, T. M. Scanlon, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.497. Kant and the Early Moderns. 3.00 Credits.
A critical examination of Kant’s dialogue with his Early Modern predecessors (Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume), and of their own respective positions.
Instructor(s): E. Forster; Y. Melamed
Area: Humanities.

AS.150.498. Modal Logic and Its Applications. 3.00 Credits.
In the first part of the course, we’ll investigate the theory of modal logic, considering its syntax, semantics, and proof theory. We’ll then turn to some of its philosophical applications: epistemic logic, counterfactuals, deontic logic, intuitionistic logic, and the metaphysics of time.
Instructor(s): J. Bledin
Area: Humanities, Quantitative and Mathematical Sciences.

AS.150.499. The Principle of Sufficient Reason. 3.00 Credits.
According to the Principle of Sufficient Reason every fact must have a reason, or explanation. In other words: there are no brute facts. If a certain penguin has three dots on its right wing - there must be a reason for this. If there are no penguins with precisely three dots on their right wings - there must be a reason for that as well. In the first half of the course we will read works by the two philosophers who introduced the principle: Spinoza and Leibniz. In the second part, we will read texts by Kant, Maimon, Hegel, Schopenhauer, and some contemporary analytic philosophers, and discuss the plausibility, implications, and justification of the principle.
Instructor(s): Y. Melamed
Area: Humanities.

AS.150.502. Directed Study. 0.00 - 3.00 Credits.
Individual study of special topics, under regular supervision of a faculty member. Special permission is required.
Instructor(s): Staff
Writing Intensive.

AS.150.506. Internship. 1.00 Credit.
Instructor(s): D. Moyar; M. Tumulty.

AS.150.509. Internship. 1.00 Credit.
Instructor(s): Staff.

AS.150.512. Directed Study. 0.00 - 3.00 Credits.
Instructor(s): Staff.

AS.150.551. Honors Project. 3.00 Credits.
See departmental major adviser.
Instructor(s): Staff.

AS.150.552. Honors Project. 0.00 - 3.00 Credits.
Instructor(s): Staff.

AS.150.598. Internship. 1.00 Credit.
Instructor(s): D. Moyar; M. Tumulty.

AS.150.601. Graduate Seminar: Topics in the Theory.
Graduate students from non-Philosophy departments need instructor permission. We ask a very basic question in value theory: what is it for something to be good, or of value? Is it for something to instantiate the simple value property ‘good’? Can goodness be identified with some natural property, perhaps, the property ‘pleasant’, or some dispositional property, perhaps, ‘what we desire to desire’? Is goodness a relation between some object, state of affairs, or activity and a subject, so that the good is benefit? On the other hand, are reasons and not values primitive in value theory, so that we should theorize about the good in terms of appropriate responses to it? We will read classic works by G. E. Moore, Peter Geach, Judith Jarvis Thomson, Connie Rosati, Nicholas Sturgeon, Michael Smith, Richard Kraut, Donald Regan, T. M. Scanlon, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.604. Probability and Evidence.
Leading theories about the meaning of probability, and about the concept of evidence. No previous course in probability is necessary.
Instructor(s): P. Achinstein
Area: Humanities.
AS.150.605. Foundations of Ethics.
The seminar will serve as an advanced, topical introduction to normative theories in ethics, and will include some meta-ethics. Our central question is: what is the foundation, or motivational basis, of ethics? Is it the individual asking what she wants for her life? Is it the determination of rational requirements on action? We think about the relationship between reason, reasons, and motivation. We consider the debate over internalism and externalism about reasons. We work through the distinction between agent-neutral and agent-relative reasons and values. Among others, we will read Thomas Nagel, Phillipa Foot, Shelly Kagan, Samuel Scheffler, Derek Parfit, G. E. M. Anscombe, and Bernard Williams.
Instructor(s): L. Theunissen
Area: Humanities.

Course will focus on ancient skepticism as a way of life, and on the role of epistemological argument in skepticism so conceived. The seminar will end with a brief look at early modern reactions to ancient skepticism.
Instructor(s): M. Williams; R. Bett.

AS.150.607. Graduate Seminar: Knowledge and Perception.
How does perception reveal the world, if it does? Why have philosophical reflections on perception often led to skepticism? For background, we will start with readings from Ayer and Austin (on the sense-datum theory), and Sellars (on the Myth of the Given). We will then spend time on contemporary accounts of perceptual consciousness, with readings from McDowell, Travis and (possibly) others.
Instructor(s): M. Williams
Area: Humanities.

AS.150.608. Graduate Seminar-Speculation: Scientific and Philosophical.
Some say that speculation whether in science or philosophy, should be avoided at all costs (e.g., Descartes, Newton). Others say that speculation is okay as long as it is followed by argument or evidence (e.g., Popper). Still others encourage one to freely speculate in the absence of argument or evidence (e.g., Feyerabend). Are any of these views right? What is speculation, and is it subject to any universal standards? What is evidence, and is it subject to universal standards? Readings will be from authors mentioned above and from quite a few others. We will look at some very general influential philosophical=scientific speculations, such as the claim that nature is simple and that everything is explainable, as well as some more specific ones.
Instructor(s): P. Achinstein
Area: Humanities.

AS.150.609. Graduate Seminar - Philosophy.
An examination of Derek Parfit's "On What Matters".
Instructor(s): H. Bok
Area: Humanities.

AS.150.610. Virtue Ethics.
A study of recent work in virtue ethics.
Instructor(s): H. Bok.

Schelling's Philosophical Investigations into the Nature of Human Freedom counts among his most important works – Heidegger called it "one of the deepest works of Western philosophy." It is also one of the most enigmatic ones. In this course, we will contrast it with Schelling's philosophy of nature and investigate the extent to which his theory of freedom is necessitated by problems in his philosophy of nature.
Instructor(s): E. Forster
Area: Humanities.

AS.150.614. Topics in Meta-Ethics (Graduate Seminar).
This is a seminar on theoretical topics in ethics. We focus on debates over cognitivism and non-cognitivism; realism and anti-realism; reasons internalism and externalism; relativism and skepticism. We read contemporary classics by Sharon Street, T. M. Scanlon, Joseph Raz, Bernard Williams, Allan Gibbard, and others.
Instructor(s): L. Theunissen
Area: Humanities.

AS.150.615. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic. Co-listed with AS.300.653
Instructor(s): H. de Vries; M. Williams
Area: Humanities.

AS.150.618. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives II.
Starting with a brief overview and recapitulation of themes discussed in its Introduction and Division One, this jointly will focus on Division Two of Being and Time and bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams
Area: Humanities.

AS.150.619. Topics in Hegel's Philosophy: The Philosophy of Right.
This course will be a close reading of G.W.F. Hegel's Philosophy of Right. Some of the main topics for discussion will be the relation of law and morality, the dependence of the political philosophy on Hegel's Logic, and the relation of individual and social conceptions of freedom.
Instructor(s): D. Moyar
Area: Humanities.

AS.150.627. Seminar in Epistemology.
Topic: Realism and its Critics Questions circling around issues of "realism" have been prominent in contemporary philosophy. Some philosophers argue for or against realism across the board. Here the fundamental issue is often taken to be semantic: can truth be radically evidence-transcendent, so that a proposition must be true or false even if we will never have evidence one way or another? But there are also more local questions. Do scientific theories that postulate unobservables aim to state literal truths about such theoretical entities (as scientific realists claim), or are they better understood as devices for linking and systematizing observational evidence (as instrumentalists or constructive empiricists argue)? Are there mind-independent moral or aesthetic facts (as moral and aesthetic realists suppose), or are moral and aesthetic judgments better understood in some other way, for example as fundamentally "expressive" rather than "descriptive". Many philosophers continue to hold that such questions raise deep metaphysical issues. But this view has been challenged by metaphysical quietists, who argue that the whole issue of realism versus non- or anti-realism is best avoided. So should we be realists, either in general or selectively? Or is quietism the better option? What is realism anyway? The aim of this seminar is to explore influential arguments that arise in the attempt to answer such questions.
Instructor(s): M. Williams; P. Achinstein
Area: Humanities.
AS.150.630. Seminar In Metaphysics: Mind and Cosmos.
We will begin by reading Thomas Nagel’s new book: Mind and Cosmos. This will be followed by other works to be selected in class.
Instructor(s): P. Achinstein
Area: Humanities, Quantitative and Mathematical Sciences.
Although all three were Copernicans in the broad sense, these great mathematician-philosophers of the 17th century held subtly different positions on the question whether the sun or the earth moves, in large part because they proposed very different analyses of what it is for a body to move. These analyses emerge from quite divergent views on space, time, matter, mind, and scientific-philosophical method in relation to natural theology. The focus of the seminar is on the interaction of these views: Newton’s rejection of Descartes’ Followed by the clash between Newton’s and Leibniz’s.
Instructor(s): R. Rynasiewicz
Area: Humanities.
AS.150.652. Seminar in the Philosophy of Science.
Philosophy of experiment, Bayesianism, severe tests. Readings from Hacking, Galison, Franklin, Mayo, and others. Applications range from physiology to cosmology.
Instructor(s): R. Rynasiewicz
Area: Humanities, Social and Behavioral Sciences.
AS.150.653. Philosophy of Physics Seminar: Non-Locality for the Layperson.
Non-locality arises when measurement outcomes on space-like separated systems are correlated in such a way that no common cause or super-luminal signaling could possibly account for the pattern of the correlations. Such happens in quantum mechanics. Einstein referred to it as “spooky action-at-a-distance.” Schrödinger spoke of the states of the separated quantum systems as “entangled.” Non-locality, rather than the failure of determinism, has come to be regarded as the deeper feature separating quantum from classical physics. However, whether nature is local or non-local can be defined independently of quantum mechanics, and, in principle, reality could be even more non-local than as described by quantum mechanics. This seminar will be a gentle introduction to non-locality, as presented in Jeff Bub’s Bananaworld: Quantum Mechanics for Primates, which presupposes no prior background in quantum theory. But there is more. Pondering super-non-local possibilities suggests that the wave-function need not be ontologically fundamental, thus freeing us from the outrageous conclusion that the world branches upon measurement into parallel realities corresponding to spectrum of possible measurement outcomes. It remains to be seen, however, how one might then avoid lapsing into Quantum Bayesianism, which holds that the wave function merely represents our subjective degrees of belief about what will happen.
Instructor(s): R. Rynasiewicz
Area: Humanities.
“We must do away with all explanation, and description alone must take its place.” This sentence, although written over a century later and in a different context, could serve as a motto for what is perhaps the most important debate about the proper method of Naturphilosophie in German Idealism. In this seminar we will examine the philosophical significance of this debate over the role of explanation in our knowledge of nature. Readings will come from Jacobi, Goethe, Schiller, Kant, Schelling, Hegel, as well as from Pascal, Spinoza, and Newton.
Instructor(s): E. Forster
Area: Humanities.

Instructor(s): R. Rynasiewicz
Area: Humanities.
AS.150.656. Practical Reason in German Idealism.
In this course we will examine the development of idealist theories of practical reason. We will read Kant’s Critique of Practical Reason, Fichte’s System of Ethics, and selections from Hegel’s writings.
Instructor(s): D. Moyar
Area: Humanities.
AS.150.657. Philosophy of Language.
We will investigate one or more specialized topics in formal semantic and pragmatics.
Instructor(s): J. Bledin.
AS.150.658. Topics in the Philosophy of Language.
An examination of recent work in the philosophy of language and/or related work in the philosophy of mind.
Instructor(s): S. Gross.
AS.150.659. Topics in Formal Semantics: Counterfactuals?.
In this seminar, we will investigate the semantics and communicative function of counterfactuals. Among the questions that we will consider are these: What are the compositional semantic values of counterfactual conditionals? What is the context change potential of a counterfactual and what kind of structure must we add to the common ground of a conversation to model its communicative effect? Do counterfactuals recommend a dynamic approach to meaning? Are counterfactual conditionals truth-apt? Do they serve to describe the world? If so, which aspect of reality is a counterfactual sensitive to?
Instructor(s): J. Bledin
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): Staff.

Preparing philosophy graduate students for the impending job market by discussions of, and practicing for, constructing and submitting dossiers, interviews and giving talks both in and outside one's particular field. Open to all philosophy graduate students, regardless of year and field. No degree credits. Offered sporadically.
Instructor(s): P. Achinstein.

AS.150.821. Research Seminar in Language and Mind.
A workshop for current departmental research in language and mind.
Permission required.
Instructor(s): S. Gross
Area: Humanities.

Cross Listed Courses

Psychological Brain Sciences
AS.200.336. Foundations of Mind. 4.00 Credits.
An interdisciplinary investigation into the innateness of concepts: perception, number, language, and morality, physics discussed. Evidence from animals, infants, patients, brains. Students collect data in sections investigating claims from the readings. Cross-listed with Cognitive Science and Philosophy.
Instructor(s): J. Halberda; L. Feigenson
Area: Social and Behavioral Sciences.

German Romance Languages Literatures
What if Rousseau's description of the sentiment de l'existence were to join to the models of consciousness Damasio develops in The Feeling of What Happens? This course explores aspects of consciousness in French literature (Rousseau, Sand, Nerval, Amiel, Flaubert, Valéry, Proust, Sartre) in a dialogue with recent texts in theory, philosophy, neuroscience (e.g. Poulet, Merleau-Ponty, Sartre, Scarry, Noë, Humphrey, Damasio, Sacks).
Instructor(s): E. Ender
Area: Humanities
Writing Intensive.

AS.213.309. Walter Benjamin and His World. 3.00 Credits.
All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.313. Heidegger's Being and Time and Rectify.
This course will introduce students to Heidegger's seminal work as seen through the lens of the TV series Rectify, which considers what it means to be "thrown" into the world and how we construct a meaningful horizon for our experiences. We will explore some of the fundamental concepts in Being and Time, including care, projection, fallenness, affect and time, and being unto death, and consider how these same issues are taken up in Rectify, which as a TV show has to develop its own visual vocabulary to explore the structure and nature of being in the world.
Taught in English
Instructor(s): R. Tobias
Area: Humanities.

AS.213.368. German Political Thought. 3.00 Credits.
This course will introduce students to major figures in German political thought from Martin Luther to Karl Marx and Immanuel Kant to Carl Schmitt. The class will explore such issues as the notion of sovereignty, the relationship between church and state, the theory of parliamentary democracy, and the political and economic ramifications of liberalism. Reading and discussion in English.
Instructor(s): R. Tobias
Area: Humanities.
AS.213.629. The Art of Framing.
Frames and Framings in art and literature are aesthetic means of creating focus. They draw a distinction between interiority and exteriority, foreground and surroundings; they cut out segments from space-time continuum and thus provide basic instruments of orientation, they constitute pictorial representation as well as the compositional structure of literature. From an epistemological perspective one can say that frames create a paradoxical threshold in-between which facilitates both the differentiation and transgression of spheres. It is further remarkable that frames while spectacularly making visible something specific at the same time explore the instances of their own ‘showing’: by implementing frames representation observes itself in the very process of representing. Through constellating systematic and historical readings the seminar will analyze theoretical concepts of frame and framing (Simmel, Genette, Marin, Derrida) and at the same time explore the transformation of frame forms and functions in literature and aesthetic discourse between 1720 and 1830 (Brockes, v. Haller, Wieland, Lessing, Herder, Lichtenberg, Goethe, Moritz, Jean Paul, Schlegel, Brentano, Tieck, Hoffmann). Among the topics to be discussed will be the conceptualization of subject-object relations as an analytical tool to reconstruct how the organizing principles of framing in Enlightenment (point of view, Guckkasten, chain of pictures, landscape/camera obscura) drift into the twilight of epistemological reflection: Around 1800 frame structures (and its doublings/transgressions) present the Produzierende mit dem Produkt and thus articulate the insights of transcendental philosophy, they turn into a medium of Romantic irony.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.666. “To be continued”- Seriality in Literature and Other Media.
Taught in German. By ending with the words “(To be continued)” [(ist fortzusetzen)], Goethe’s Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. – although invented earlier – becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine “Die Gartenlaube”, Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, “The Perils of Pauline” (serial, 1914), “Copycat” (Jon Amiel, 1995), “Twin Peaks” and current US-American TV series.
Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

AS.213.705. Hegel’s Phenomenology of Spirit.
We will study key passages of The Phenomenology of Spirit from a queer-feminist perspective and engage with some of the feminist scholarship on Hegel
Instructor(s): K. Pahl
Area: Humanities

Taught in German. The course analyzes the performative on the basis of the very field that John L. Austin’s speech act theory excludes: literature. What challenges Austin’s speech act theory indeed opens up the question of the performative towards iterability and theatricality and thus calls for the performative as a methodological category of literary criticism. According to Shoshana Felman’s readings of Austin, the performative act can be accentuated as an act of the “speaking body” in which the body is conceived of not as a means of linguistic expression but rather as a spillover of the act of utterance into the statement. How then is the corporeality or materiality of writing asserted in acts of narrating and reading? The course will examine theories of the performative from the perspective of literature and literary criticism as well as analyze literary speech acts (promises, acts, etc.) in detail.
Readings will include: Austin, Derrida, Felman, Freud, Nietzsche, de Man, Hamacher, Goethe, Büchner, Kafka, Henry James, Thomas Mann etc.
Instructor(s): E. Strowick
Area: Humanities.

The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citizen” or “citizen,” as the political subject. The bourgeois and the citizen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias
Area: Humanities.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy. 3.00 Credits.
Dante’s Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante’s understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.
Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

Theatre Arts Studies
AS.225.328. The Existential Drama: Philosophy and Theatre of the Absurd. 3.00 Credits.
Existentialism, a powerful movement in modern drama and theatre, has had a profound influence on contemporary political thought, ethics, and psychology, and has transformed our very notion of how to stage a play. Selected readings and lectures on the philosophy of Kierkegaard, Nietzsche, Camus and Sartre – and discussion of works for the stage by Sartre, Ionesco, Genet, Beckett, Albee, Pinter, Athol Fugard (with Nkani & Nshone), Heiner Müller and the late plays of Caryl Churchill. Opportunities for projects on Dürrenmatt, Frisch, Havel, Witkiewicz, and Mrózek.
Instructor(s): J. Martin
Area: Humanities
Writing Intensive.

Humanities Center
AS.300.228. Brain and Society. 3.00 Credits.
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neuropsychology, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.

AS.300.319. Skepticism and Theology. 3.00 Credits.
This course examines the relation between the history of philosophical theology and the foundations of modern skepticism by focusing on their mutual point of departure: the concept of the human being as an essentially finite being limited in its capacity to know others, the world, and God.
Instructor(s): T. Dika
Area: Humanities
Writing Intensive.

AS.300.327. Introduction to Comparative American Cultures: Obama and Philosophy. 3.00 Credits.
This course will investigate the philosophical as well as theological, juridical and political, and rhetorical and literary backgrounds that have informed and shaped Barack Obama’s writings, speeches, and policy strategies leading up to and during his presidency. While paying minute attention to a few selected controversial debates in domestic and international governance and relations, and while discussing the question of Obama’s legacy in and after the upcoming elections, our primary focus will be on understanding the curious blend of Christian realism, influenced by the theologian Reinhold Niebuhr, the tradition of American civic republicanism and pragmatism, and Obama’s specific brand of post-Civil Rights, if not necessarily post-racial, politics. All these tenets coalesce in a vision and politics that may well be described as one of deep pragmatism. Attention will be paid to Obama’s early appeal to simple ideas and small miracles, each of them yielding the Biblical and sobered injunction of a hope against hope. But extensive consideration of his thought and impact in the assessment of biographers and intellectual historians, legal scholars and political theorists, cultural critics and pundits will add to our attempt to understand and take stock of the Obama phenomenon as well.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.328. Wittgenstein’s Conception of Philosophical Activity. 3.00 Credits.
This course will focus on Wittgenstein’s conception of philosophical activity: a critique of language and a clarification of logic; but what will interest us most is his idea that philosophy is a work on oneself. We will be reading Wittgenstein’s two main works, the Tractatus Logico-Philosophicus and Philosophical Investigations, as well as On Certainty.
Instructor(s): S. El Amin
Area: Humanities.

AS.300.343. Philosophy and Literary Form. 3.00 Credits.
This course examines the difference literary form can make to the shaping of philosophical content. Philosophers have tended to treat literary form as merely ornamental. For this reason, they have often underestimated the philosophical significance not only of certain works of literature but also the literary form of even those works uncontroversially considered to be philosophical. This course explores the philosophical significance of literary forms in both kinds of works. The first half examines how and why Anglo-American philosophers have incorporated the interpretation of individual literary works into their philosophical writing. We will concentrate on three works of literature—Ibsen’s A Doll’s House, James’s The Golden Bowl and Wordsworth’s Prelude—each of which has attracted significant philosophical attention. The second half of the course examines how philosophers have brought literary analysis to bear in order to illuminate the philosophical achievement of certain canonical philosophical texts. We will concentrate on three literary forms—dialogue, meditation and confession—as these forms are instantiated by three works of philosophy: Plato’s Republic, Descartes’s Meditations and Wittgenstein’s Philosophical Investigations.
Instructor(s): K. Boyce
Area: Humanities.
AS.300.348. What is Philosophy?. 3.00 Credits.
This course studies different understandings of the task, scope, and methods of philosophy across its history. It does not aim to offer a comprehensive overview of the discipline, but rather to discuss in depth some of its foundational texts. Authors include: Plato, Aristotle, Descartes, Kant, Heidegger, Wittgenstein.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.399. Cinema and Philosophy. 3.00 Credits.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.

AS.300.411. Animal Minds. 3.00 Credits.
An examination of some of the scientific and philosophical literature on the nature of animal minds and the way(s) in which they differ from the human mind. The most important of these apparent differences are the use of language, the exercise of concepts, and instrumental reasoning, including the use of instruments. Co-list with AS.150.490
Instructor(s): M. Fried; M. Williams
Area: Humanities.

AS.300.422. Luther, Philosophy, Politics: 500 Years After the Reformation. 3.00 Credits.
As historical legend has it, in 1517 the German monk and then professor of theology Martin Luther inaugurated a revolution in thinking, belief and moral practice, known as the Protestant Reformation by nailing his Ninety-Five Theses, under the title Disputation on the Power of Indulgences, to the door of the Castle Church of Wittenberg. Known for his brutal characterization of reason as the devil’s whore, his theology of the hidden god, his catechisms, the doctrine of the two realms, and his condemnation of peasants’ revolts of his days, Luther’s influence has been profound and lasting. We will study some of his most influential theses, treatises, and sermons and will seek to gauge the effect they had on the Western narrative of secularization and modernity, together with their deep influence on post-Reformation and, indeed, recent philosophy and political thought. Readings include: Luther, G.W. F. Hegel, Max Weber, Martin Heidegger, Karl Barth, Erik Petersen, Dietrich Bonhoeffer, Kaj Munk, Ernst Bloch, Philippe Lacoue-Labarthe, Marcel Gauchet, Giorgio Agamben, and others.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.424. Psychoanalysis as a Theory of Thinking. 3.00 Credits.
This course will introduce students to the writings of Wilfred Bion, the British psychoanalyst who expanded Sigmund Freud’s and Melanie Klein’s metapsychology. Bion developed an epistemological theory of thinking, surmising that the mind grows when it is exposed to the truth of one’s emotional experience. In his many writings and lectures, Bion developed a sophisticated theoretical model that conceptualizes the transformation of emotional experience into the capacity for thought. While in his early writings he is inspired by life sciences and mathematics, in his later writings Bion shifts away from the scientific view to an aesthetic/mystical vertex, drawing on poets mystics and philosophers, such as Keats, Milton, Shakespeare, Sophocles, Meister Eckhart, St John of the Cross, Plato, Hume and Kant.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.435. Emmanuel Levinas: Essential Works, Guiding Concepts, Lasting Influence. 3.00 Credits.
This seminar will address the major writings and guiding concepts of Emmanuel Levinas and investigate his increasing critical role as a touchstone and dividing line in the formation of twentieth century and contemporary schools of thought (phenomenology, pragmatism, post-analytic philosophy, literary, feminist, and political theory, anthropology). Additional readings will include Stanley Cavell, Jacques Derrida, Vasily Grossman, Jean-François Lyotard, and Hilary Putnam.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.653. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.657. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives, II.
Starting with a brief overview and recapitulation of themes discussed in its Introduction and Division One, this jointly will focus on Division Two of Being and Time and bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.658. Must We Mean What We Say?.
Starting out from Stanley Cavell’s programmatic book and title, this seminar will revisit his discussion of J.L. Austin, John Searle, Jacques Derrida, and Shoshana Felman, with special emphasis on these authors’ theories of intentionality, seriousness, and sincerity, and with reference to the ancient and modern concepts of tragedy on which they partly rely. In addition to the aforementioned thinkers’ relevant works, reading will include selections from Euripides, Henrik Ibsen, Isaiah Berlin, Emmanuel Levinas, and Jean-Luc Marion.
Instructor(s): H. de Vries.

Center for Africana Studies
AS.362.450. Critical Thinking in Africana Studies. 3.00 Credits.
This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes
Writing Intensive.

Henry A. Rowland Department of Physics and Astronomy
http://physics-astronomy.jhu.edu/

Johns Hopkins is the nation’s first research university. That emphasis on research continues to this day and forms the backbone of the undergraduate and graduate programs in the Department of Physics and Astronomy. The department’s research program is focused into four
areas of excellence: Astrophysics, Condensed Matter Physics, Elementary Particle Physics, and Plasma Physics. For graduate students interested in these fields, the department offers world-class research opportunities in a friendly and supportive setting. For undergraduates, JHU offers exposure to cutting-edge research combined with a level of personal attention that is typically found only in liberal arts colleges. Nearly all physics majors at JHU work on research projects and many begin as freshmen or sophomores.

All research builds upon an established body of knowledge. To be effective researchers, teachers, or professionals, both undergraduate and graduate students must acquire a core knowledge of physics. Our undergraduate and graduate courses are designed to cover the core subjects at the appropriate levels, leading to advanced courses on a variety of specialized topics. As a consequence, students having different backgrounds or different ultimate objectives can select those parts that are most appropriate for them. The selections are made under the guidance of a faculty advisor. The advisor aids the student in making the most efficient use of his or her time and ensures that his or her program contains a reasonable balance among classroom and laboratory, mathematics, seminars, and introduction to research.

http://physics-astronomy.jhu.edu/

Requirements for the B.A. and B.S. Degrees
(See also Requirements for a Bachelor’s Degree (p. 10.).)

The major program is structured so that nearly all students take the same classes during the first two years and must complete the same list of core upper-level courses during their second two years, but permits a variety of choices in upper-level electives. The total number of credits required for the B.A. degree is 120 and the B.S. is 126. By the end of the four years our students share an understanding of classical mechanics, electromagnetism, and quantum mechanics, and have acquired physics lab skills that will support them in graduate school or in a host of other pursuits.

Core Courses

Mechanics I

Advanced Physics Laboratory

Department elective #1

11-12

Department elective #2

10-11

Credits

B.A. Degree

Two (2) additional courses (at least 3 credits each) at the 300-600 level in

the Department of Physics and Astronomy or approved physics-related

courses in other departments. Students who intend to continue Physics

in graduate school are strongly encouraged to take these electives in

Physics and Astronomy, and take both AS.171.301 Electromagnetic

Theory II and AS.171.312 Statistical Physics/Thermodynamics.

B.S. in Physics Degree

Five (5) additional courses (at least 3 credits each) at the 200-600 level in the following departments: Physics and Astronomy, Biology, Biophysics, Chemistry, Cognitive Science, Earth and Planetary Sciences, Mathematics, and/or the School of Engineering (excluding courses listed as 500.xxx, 660.xxx, 551.xxx and 661.xxx). These courses must constitute a coherent and rigorous program of study approved by the Departmental Advisor and Director of Undergraduate Studies no later than the registration period for the fall semester of the senior year. At least four (4) of these courses must be taken in a single department in the Krieger School of Arts and Sciences or within a single department or program in the Whiting School of Engineering (note: called "Department elective" in the above Sample Program of Study). One (1) semester of research may be used as one elective.

Recommendations

An additional two semesters of mathematics are recommended, either

AS.110.405 Analysis I or AS.110.311 Methods of Complex Analysis and one other. It is recommended that Physics majors become proficient in a computer programming language, either independently or through course work. Students are encouraged to broaden their background by taking introductory courses in other natural science or engineering disciplines, such as AS.030.101 Introductory Chemistry I.

Other Departmental Requirements:

A grade of C- or higher is required for a course to be counted towards major requirements. This includes required math courses. An exception for a single course taken in the year before graduation may be granted by the Director of Undergraduate Studies when there are extenuating circumstances.

Honors in the Major:

To receive Honors in Physics, you must have a GPA in your major requirements of a 3.5 or higher.

Senior Thesis

Any student majoring in the department may write a senior thesis, based on original research conducted under the supervision of a member of the faculty. Arrangements for this research will be made on an individual basis. The department views the writing of a senior thesis as an excellent capstone experience to an undergraduate education in physics, and encourages all students to consider it.

Minor in Physics

To earn a minor in Physics, a student must complete four (4) courses (at least 3 credits each) at the 200-level or above, plus AS.172.203 Contemporary Phys Sem

Restrictions: A grade of "C-" or better must be earned in required courses, which may not be taken S/U.

Donald E. Kerr Memorial Prize

In recognition of Dr. Kerr’s work in microwave physics, the department awards the Donald E. Kerr Memorial Prize each year to the most outstanding undergraduate major graduating in physics.

Graduate Programs

Graduate study in physics and astronomy at Hopkins is intended primarily to prepare Ph.D. graduates for careers in teaching and research in physics and astronomy, or in applications such as biophysics, space physics, and industrial research. Entering students may elect to work toward a Ph.D. in physics or a Ph.D. in astronomy and astrophysics. The two programs are similar in structure but have somewhat different course requirements (see below). A wide range of research projects—both theoretical and experimental—are available for graduate students in Astrophysics, Condensed Matter Physics, Particle Physics, and Plasma Spectroscopy.

Admission

To obtain admission, a student is expected to submit evidence that he or she has a good chance to succeed. Such evidence will ordinarily consist of transcripts of previous academic work, Graduate Record Examination scores (including advanced physics), letters of recommendation, and, for international students, a Test of English as a Foreign Language (TOEFL) score.

Requirements for the Ph.D. Degree

The Ph.D. program has strong emphasis on early and active involvement in graduate research. Thus, students are required to have a research advisor and file a research summary every semester they are enrolled in the program, starting with the first one. Furthermore, students must complete the required courses with a grade of B- or better; the coursework is typically done over the first two years. In the beginning of the second year, students complete the research examination, and in the beginning of the third year – the University's Graduate Board Oral examination, both of which are based on completed or proposed research. During the first two years, students are typically involved in introductory research projects, which may or may not be related to their thesis work, and sometimes work with several different advisors, but they must identify (and have an agreement with) a thesis advisor no later than the beginning of their third year in the program, after which point
students focus on their thesis research. The thesis is to be completed by no later than the end of the 6th year, ending with an oral presentation of the thesis to a faculty committee.

**Course Requirements**

**Ph.D. in Physics**

Students must complete the following courses:

- AS.171.603 Electromagnetic Theory
- AS.171.605 Quantum Mechanics
- AS.171.703 Advanced Statistical Mechanics
- AS.172.632 Physics Seminar

**Ph.D. in Astronomy and Astrophysics**

Students must complete the following courses:

- AS.171.611 Stellar Structure & Evolution
- AS.171.612 Interstellar Medium and Astrophysical Fluid Dynamics
- AS.171.613 Radiative Astrophysics
- AS.171.627 Astrophysical Dynamics
- AS.172.633 Language Of Astrophysics

The department offers a wide range of graduate physics, astrophysics, mathematical methods and statistics classes, and while only five are required, the students are encouraged to use the flexibility of the graduate program and the available classes to design programs of study that best prepare them for their chosen area of research. In addition to the required courses listed above, below is the list of the graduate courses that have been taught in recent years:

- AS.171.602 Order of Magnitude Physics
- AS.171.609 and Numerical Methods-Physics
- AS.171.617 Extragalactic Astronomy
- AS.171.618 Observational Astronomy
- AS.171.621 Condensed Matter Physics
- AS.171.625 Experimental Particle Physics
- AS.171.626 Data Analysis: Theory & Practice
- AS.171.628 Practical Scientific Analysis of Big Data
- AS.171.633 Graphics Processor Programming in CUDA
- AS.171.672 Introduction Plasma Physics
- AS.171.699 Planets, Life and the Universe
- AS.171.701 Quantum Field Theory
- AS.171.704 Phase Transitions and Critical Phenomena
- AS.171.713 Magnetic Materials and Spintronics
- AS.171.750 Cosmology
- AS.171.751 Neutron Scattering and Quantum Condensed Matter Physics
- AS.171.755 Fourier Optics and Interferometry in Astronomy
- AS.171.756 Astrophysics of Compact Objects
- AS.171.762 Advanced Condensed Matter
- AS.171.783 Advanced Particle Theory
- AS.171.784 Advanced Quantum Field Theory
- AS.173.608 Advanced Laboratory
- AS.270.661 Planetary Fluid Dynamics

Students in both programs must receive at least a B- in each required course, or they will be required to retake the specific course once more and pass it.

**Advising**

All entering students are assigned to a first-year advisor who works closely with the student through the first two years of graduate study, or until a thesis advisor is found. The first-year advisor advises the student on courses of study, helps familiarize them with the department and provides guidance in finding research opportunities. In the beginning of each fall semester, the department holds a “research jamboree” where incoming students are introduced to the research in the department through a series of brief talks, lab tours, and research group open houses. Thus, the students are familiar, immediately upon their arrival, with the scope of research in the department and can identify prospective research advisors they may wish to work with.

**First and Second-Year Research Requirement**

First-year students must find, by the end of the third week of class in the fall semester, and by the end of the first week of class the second semester, as well as before the summer term begins, a member of the professorial faculty to advise them in some type of research project. The students are required to submit a short written summary of that research experience at the end of the semester. Students may continue with one advisor through all three semesters, or they may choose to cycle through several different research advisors. In some cases, one of these first-year research advisors may become a thesis advisor, but in others, the thesis advisor may change. This research requirement continues until the end of the second year, or until the student finds a thesis advisor.

The nature of these first-year research projects may vary from student to student, from one advisor to another, and from one sub-field of physics to another. In some cases they lead to published research. In other cases, they may be first steps in a longer-term research project. And in some cases, they may comprise reading or independent-study projects to develop background for subsequent research. It is left to the individual advisor to determine what the written summary should entail. These research projects are not research assistantships and are performed in addition to other graduate student responsibilities (teaching and graduate classwork), although they are typically merged with RA-supported research for those students supported by RAs.

**Thesis Research and Defense**

Students are required to find a thesis advisor no later than the beginning of the third year. After the student chooses a thesis advisor, the student forms their Thesis Committee consisting of the advisor and two other faculty members (all Thesis Committees contain at least two full-time faculty from the department). These committees function as extended advisory bodies; students have the opportunity to discuss their progress and problems with several faculty. They also conduct one formal annual review of each student’s progress. Research leading to the dissertation can be carried out not only within the Department of Physics and Astronomy, but with appropriate arrangements, either partly or entirely at other locations if necessitated by the project goals. At the conclusion
of thesis research, the student presents the written dissertation to the faculty committee and defends the thesis in an oral examination.

Requirements for the M.A. Degree

Although the department does not admit students who intend to pursue the master's degree exclusively, students in the department’s Ph.D. program and students in other Ph.D. programs at Johns Hopkins may apply to fulfill the requirements for the M.A. degree in the Department of Physics and Astronomy. Students from other JHU departments must seek approval from their home department and from the Department of Physics and Astronomy before beginning their M.A. studies.

Course Requirements for the M.A.

Students must master the basic undergraduate material covered by the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.171.204</td>
<td>Classical Mechanics II</td>
<td>4</td>
</tr>
<tr>
<td>AS.171.301</td>
<td>Electromagnetic Theory II</td>
<td>4</td>
</tr>
<tr>
<td>AS.171.303</td>
<td>Quantum Mechanics I</td>
<td>8</td>
</tr>
<tr>
<td>AS.171.304</td>
<td>and Quantum Mechanics II</td>
<td></td>
</tr>
<tr>
<td>AS.171.312</td>
<td>Statistical Physics/Thermodynamics</td>
<td>4</td>
</tr>
</tbody>
</table>

Courses taken elsewhere may qualify at the discretion of the Graduate Program Committee.

Students must also complete six one-semester graduate-level (at least three hours/week) courses offered by the Department of Physics and Astronomy. For this purpose, each semester of AS.171.609 - AS.171.610 Numerical Methods-Physics counts as a graduate-level course. In addition, AS.171.801 Independent Research-Graduates-AS.171.802 Independent Research-Graduate may be substituted for any of the above-mentioned graduate or undergraduate courses. The research course must include an essay supervised and approved by a faculty member of the Department of Physics and Astronomy.

The student must receive a grade of B- or above in each of the courses. The graduate-level courses may be retaken once; the undergraduate courses cannot be repeated.

Furthermore, the student must complete at least two semesters of research projects, as described in the requirements for the Ph.D., and complete the departmental research exam. The deadline to fulfill all requirements is the date of the Ph.D. thesis defense.

Facilities

The Department of Physics and Astronomy’s first facility was Rowland’s measuring engine for determining the solar spectrum in the 1880s. Ever since that time the Department has maintained a long and continuous history in instrumentation. In recent decades this has extended to instrumentation for space missions. The Department maintains a Class-1000 clean room for microfabrication and nanofabrication, a high bay lab, professional and student machine shops, and supports a world-renowned Instrument Development Group (IDG) with six full-time engineers and three full-time machinists.

Among the diverse techniques used for studying condensed matter physics are magnetometry/susceptometry, specific heat and transport measurements, atomic force and magnetic force microscopy, X-ray and electron diffraction, terahertz spectroscopy, and neutron scattering at the nearby NIST Center for Neutron Research and at the Spallation Neutron Source, ORNL. A variety of cryostats, He3 refrigerators, and He3-He4 dilution refrigerators together with high temperature ovens, electromagnets, and superconducting magnets allow measurements to be made from 0.05 K to 1100 K and in magnetic fields up to 14 Tesla. Apparatus for the preparation of samples includes two image furnaces for floating zone growth, single-crystal growth vacuum furnaces, box and tube furnaces, arc furnaces, several high vacuum and ultra-high vacuum chambers for thin film fabrication using evaporation, MBE, pulsed laser deposition, sputtering, and focused ion beam (FIB) milling. Also available on campus are cutting-edge transmission electron microscopes and scanning electron microscopes.

In astrophysics, research groups have state-of-the-art laboratories for testing cryogenic transition-edge bolometer detectors with SQUID read-out electronics, and closed-cycle helium cryogenics. Recent instrumentation advances include the design and manufacture of large free-standing polarization grids and novel high-bandwidth smooth-wall feed horns. Current activities include development of microwave and millimeter-wave instruments for far-infrared and microwave astronomy and cosmology.

The research groups in the department have a wide range of state-of-the-art computer facilities including high performance clusters with over a thousand processors and the largest database at a university—over a petabyte. All undergraduate majors and graduate students have access to high performance workstations.

Financial Aid

Students in good standing are normally supported by a combination of fellowships, research assistantships and teaching assistantships. The financial package covers full tuition, individual health insurance, and an academic year salary commensurate with that of other leading research institutions. Teaching assistantship is a common mode of financial support; experience in teaching is a valuable part of the Ph.D. program. A teaching assistantship supports the student during the academic year and is supplemented by a research assistantship during the summer. The assistant is expected to help in the teaching of the general physics course and other introductory and major courses. The typical teaching duties include leading a problem-solving section or laboratory exercises and homework grading. Research assistantships are based on the availability of funding to the research advisor and are arranged directly with him/her. Research assistantships provide an opportunity for deep engagement in ongoing experimental or theoretical research. In addition, the department and the University offer several fellowships on a competitive basis, some covering travel, supplies or research expenses and some covering a semester’s or a year’s worth of the entire financial package. Some students are supported by external fellowships, such as the pre-doctoral fellowship of the National Science Foundation.

All fellows and teaching and research assistants in the Department of Physics and Astronomy register as full-time students and thus fulfill their residence requirements while holding appointments. Loans and work-study arrangements are available from the Office of Financial Aid.

Faculty

Chair

Timothy Heckman
Chair and A. Hermann Pfund Professor
Professors

Charles L. Bennett
Bloomberg Distinguished Professor and Alumni Centennial Professor: experimental astrophysics; cosmology; radio/submillimeter/infrared astronomy; astronomical instrumentation.

Barry J. Blumenfeld
experimental high-energy physics; neutrino physics, hadron colliders.

Collin Broholm
Gerhard H. Dieke Professor (Director, Institute for Quantum Matter): experimental condensed matter physics, using neutron scattering.

Chia-Ling Chien
Jacob L. Hain Professor: experimental condensed matter physics, nanostructured solids.

Andrei V. Gritsan
experimental high-energy physics; colliders.

Marc Kamionkowski

David Kaplan
theoretical particle physics and cosmology.

Julian H. Krolik
theoretical astrophysics, particularly high-energy and relativistic astrophysics.

Robert Leheny
experimental condensed matter physics; disordered materials, soft matter.

Petar Maksimovic
experimental high-energy physics; hadron colliders.

David A. Neufeld
theoretical astrophysics, interstellar medium, astrophysical masers.

Colin A. Norman
theoretical and observational astrophysics.

Daniel H. Reich
experimental condensed matter physics; biological physics.

Adam Riess
Bloomberg Distinguished Professor, Krieger Eisenhowser Professor and Nobel Laureate: observations of physical cosmology, primarily through the use of distance indicators like supernovae; measurements of dark energy and the expansion history of the universe using optical and near-infrared instruments from space and the ground.

Mark O. Robbins
theoretical condensed matter physics; non-equilibrium processes, atomic origins of macroscopic phenomena.

Morris Swartz
experimental high-energy physics; precision tests of and searches for physics beyond the Standard Model.

Alexander Szalay
Bloomberg Distinguished Professor (Director, IDIES): theoretical astrophysics, galaxy formation.

Oleg Tchernyshyov
theoretical condensed matter physics.

Rosemary F. G. Wyse
astrophysics, galaxy formation and evolution (Director, Theoretical Interdisciplinary Physics and Astrophysics Center).

Associate Professors

N. Peter Armitage
experimental condensed matter physics.

Brice Menard
extragalactic astrophysics, cosmology, large surveys.

Assistant Professors

Jared Kaplan
effective field theory, particle physics, and cosmology.

Yi Li
theoretical condensed matter physics.

Tobias Marriage
cosmology and astrophysics.

Kevin Schlaufman
observational and theoretical astrophysics.

Francesca Serra
soft matter physics and liquid crystals.

Ari Turner
theoretical condensed matter physics.

Nadia Zakamska
observational and theoretical astrophysics.

Research Professor

Jonathan A. Bagger
Krieger-Eisenhower Professor: particle theory; theory and phenomenology of supersymmetry, supergravity, and superstrings.

Luciana Bianchi
observational astrophysics, nearby galaxies, stellar populations, hot stars, UV instrumentation.

William P. Blair
experimental astrophysics, supernova remnants; cataclysmic variable stars.

Paul D. Feldman
Academy Professor: experimental astrophysics, spectroscopy, space physics, planetary and cometary atmospheres.

Michael Finkenthal
experimental plasma and atomic physics.

Holland Ford
experimental astrophysics; stellar dynamics, evolution of galaxies, active galactic nuclei, astronomical instrumentation.

Riccardo Giacconi
University Professor and Nobel Laureate: experimental astrophysics, extragalactic astronomy, the early universe.

Richard Conn Henry
Academy Professor (Director, Maryland Space Grant Consortium): astronomy and astrophysics.

Stephan McCandliss
experimental astrophysics; sounding rocket space astronomy in the far UV (Director, Center for Astrophysical Sciences).

H. Warren Moos
the interstellar medium; stellar processes; the solar system; space instrumentation.

Joseph Silk
Homewood Professor: cosmology.

Ethan Vishniac
theoretical astrophysics.

Harold Weaver
ultraviolet, optical, infrared, X-ray, and radio spectroscopy and imaging of comets, planets, and satellites.

Associate Research Professor
Tamas Budavari
observational cosmology, large-scale structure, galaxy clustering; data-intensive parallel computing.

Professors Emeriti
Bruce Barnett
Academy Professor: experimental high energy physics; hadron colliders.

Chih-Yung Chien
experimental high-energy physics; hadron colliders.

Gabor Domokos
theoretical elementary particle physics, astroparticle physics.

Brian R. Judd
Gerhard H. Dieke Professor Emeritus: theoretical atomic and molecular physics, group theory, solid state theory.

Chung W. Kim
theory of elementary particles, nuclear theory, cosmology.

Susan Kovesi-Domokos
theoretical elementary particle physics, astroparticle physics.

Yung Keun Lee
experimental nuclear physics.

Aihud Pevsner
Jacob L. Hain Professor Emeritus: experimental elementary particle physics.

Michael G. Hauser
Adjunct Professor (Space Telescope Science Institute): infrared and submillimeter astronomy; interplanetary and interstellar medium; cosmology.

Ann E. Hornschemeier
Adjunct Associate Professor (NASA Goddard Space Flight Center): studies of x-ray emission from star formation in galaxies at cosmologically interesting distances.

John MacKenty
Adjunct Professor (Space Telescope Science Institute): Astronomy and Astrophysics

Roeland van der Marel
Adjunct Professor (Space Telescope Science Institute): extragalactic observational and theoretical astronomy; galaxy structure, dynamics, and formation; black holes.

Peter McCullough
Adjunct Associate Professor (Space Telescope Science Institute): astronomy.

Predrag Nikolic
Adjunct Associate Professor (George Mason University): theoretical condensed matter physics.

Cedomir Petrovic
Adjunct Professor (Brookhaven National Laboratory): experimental condensed matter physics.

Tyrel McQueen
Associate Professor (Chemistry): solid state and inorganic chemistry/condensed matter physics.

Joint Appointments
Gregory Eyink
Professor (Applied Mathematics and Statistics): mathematical physics, fluid mechanics, turbulence, dynamical systems.

Michael Falk
Associate Professor (Materials Science and Engineering): theoretical and computational research.

Taekjip Ha
Bloomberg Distinguished Professor (Department of Biophysics, Department of Biomedical Engineering, Department of Biophysics and Biophysical Chemistry)

Tyrel McQueen
Associate Professor (Chemistry): solid state and inorganic chemistry/condensed matter physics.

Jack Morava
Professor (Mathematics): algebraic topology, mathematical physics.
Peter C. Searson
Professor (Materials Science and Engineering): electronic, nanophase, and semiconductor materials.

Darrell F. Strobel
Professor (Earth and Planetary Sciences): planetary atmospheres and astrophysics.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses

AS.171.101. General Physics: Physical Science Major I. 4.00 Credits. Lectures on general principles illustrated by experiments provide a thorough introductory study of physics. Conference periods, assigned in the first class, offer more detailed discussion of principles and the solution of problems. Students are required to take General Physics Laboratory concurrently with the course. The first term covers mechanics and thermodynamics. The second term addresses electricity and magnetism, optics, and selected topics in modern physics. Note: Students taking this course and the laboratory 173.111-112 may not take any other course in the summer session and should devote full time to those subjects. First and second terms must be taken in sequence.

Instructor(s): B. Barnett
Area: Engineering, Natural Sciences.

AS.171.102. General Physics: Physical Science Majors II. 4.00 Credits. Second semester of a two-semester sequence in general physics covers mechanics, heat, sound, electricity and magnetism, optics, and atomic physics. Midterm exams for every section are given during the 8 AM section time! Accordingly, students registering for sections at times other than 8 AM must retain availability for 8 AM sections as needed. Recommended Course Background: A grade of C- or better in either Physics I or the first semester of Intro to Mechanics I ( AS.171.101 OR AS.171.103 OR AS.171.105 OR AS.171.107 OR EN.530.103 )

Prerequisites: A grade of C- or better in either Physics 1 or the two-semester sequence of Engineering Mechanics: AS.171.101 OR AS.171.103 OR AS.171.105 OR AS.171.107 OR EN.530.103
Instructor(s): C. Broholm; M. Robbins
Area: Engineering, Natural Sciences.

AS.171.103. General Physics I for Biological Science Majors. 4.00 Credits.

First-semester of two-semester sequence in calculus-based general physics, tailored to students majoring in one of the biological sciences. In this term, the topics covered include the basic principles of classical mechanics and fluids as well as an introduction to wave motion. Recommended Corequisites: (AS.173.111) AND (AS.110.106 or AS.110.108 or AS.110.113). Midterm exams are given at 8am Tuesdays, so students must leave their schedules open at this time in order to be able to take these exams

Instructor(s): C. Broholm
Area: Engineering, Natural Sciences.

AS.171.104. General Physics/Biology Majors II. 4.00 Credits.

This two-semester sequence is designed to present a standard calculus-based physics preparation tailored to students majoring in one of the biological sciences. Topics in electricity & magnetism, optics, and modern physics will be covered in this semester. Midterm exams for every section are given during the 8 AM section time! Accordingly, students registering for sections at times other than 8 AM must retain availability for 8 AM sections as needed. Recommended Course Background: C- or better in AS.171.101 or AS.171.103; Corequisite: AS.110.109, AS.173.112.

Instructor(s): N. Armitage; T. Heckman
Area: Engineering, Natural Sciences.

AS.171.105. Classical Mechanics I. 4.00 Credits.

An in-depth introduction to classical mechanics intended for physics majors/minors and other students with a strong interest in physics. This course treats fewer topics than AS.171.101 and AS.171.103 but with greater mathematical sophistication. It is particularly recommended for students who intend to take AS.171.201-AS.171.202 or AS.171.309-AS.171.310. Recommended Corequisites: AS.173.115 and AS.110.108

Instructor(s): D. Reich
Area: Engineering, Natural Sciences.

AS.171.106. Electricity and Magnetism I. 4.00 Credits.

Classical electricity and magnetism with fewer topics than 171.101-103, but with greater mathematical sophistication. Particularly recommended for students who plan to take AS.171.201-AS.171.202. Recommended Course Background: C- or better in AS.171.105; Corequisite: AS.173.116, AS.110.109

Instructor(s): C. Bennett
Area: Engineering, Natural Sciences.

AS.171.107. General Physics for Physical Sciences Majors (AL). 4.00 Credits.

This two-semester sequence in general physics is identical in subject matter to AS.171.101-AS.171.102, covering mechanics, heat, sound, electricity and magnetism, optics, and modern physics, but differs in instructional format. Rather than being presented via lectures and discussion sections, it is instead taught in an active learning style with most class time given to small group problem-solving guided by instructors. Midterm exams for every section are given during the 8 AM section time! Accordingly, students registering for sections at times other than 8 AM must retain availability for 8 AM sections as needed. Recommended Corequisites: (AS.173.111) AND (AS.110.106 or AS.110.108 or AS.110.113) Priority given to Freshman

Instructor(s): R. Leheny; R. Wyse
Area: Engineering, Natural Sciences.

AS.171.108. General Physics for Physical Science Majors (AL). 4.00 Credits.

This two-semester sequence in general physics is identical in subject matter to AS.171.101-AS.171.102, covering mechanics, heat, sound, electricity and magnetism, optics, and modern physics, but differs in instructional format. Rather than being presented via lectures and discussion sections, it is instead taught in an active learning style with most class time given to small group problem-solving guided by instructors. Priority in registration will be given to freshmen. Recommended Course Background: A grade of C- or better in either Physics I or the first semester of Engineering Mechanics ( AS.171.101 OR AS.171.103 OR AS.171.105 OR AS.171.107 OR EN.530.103 )

Prerequisites: Corequisite: (AS.110.107 OR AS.110.109 OR AS.110.211 OR AS.110.113)

Instructor(s): D. Reich; P. Maksimovic
Area: Engineering, Natural Sciences.
**AS.171.113. Subatomic World. 3.00 Credits.**
Introduction to the concepts of physics of the subatomic world: symmetries, relativity, quanta, neutrinos, particles and fields. The course traces the history of our description of the physical world from the Greeks through Faraday and Maxwell to quantum mechanics in the early 20th century and on through nuclear physics and particle physics. The emphasis is on the ideas of modern physics, not on the mathematics. Intended for non-science majors.
Instructor(s): B. Blumenfeld
Area: Natural Sciences.

**AS.171.118. Stars and the Universe: Cosmic Evolution. 3.00 Credits.**
This course looks at the evolution of the universe from its origin in a cosmic explosion to emergence of life on Earth and possibly other planets throughout the universe. Topics include big-bang cosmology; origin and evolution of galaxies, stars, planets, life, and intelligence; black holes; quasars; and relativity theory. The material is largely descriptive, based on insights from physics, astronomy, geology, chemistry, biology, and anthropology. Course website: http://henry.pha.jhu.edu/stars.html.
Recommended Course Background: High school, algebra, geometry, trigonometry.
Instructor(s): A. Riess
Area: Natural Sciences.

**AS.171.120. Physics of Modern Technologies. 3.00 Credits.**
This course for non-scientists offers accessible non-mathematical explanations of modern technologies: electric power generation and distribution (AC versus DC), florescent lighting, lasers, computers, the internet, GPS, and student suggested topics.
Instructor(s): J. Walker
Area: Natural Sciences.

**AS.171.123. How to build an iPhone: physics in modern life. 3.00 Credits.**
As the famous author Arthur C. Clarke posited, “Any sufficiently advanced technology is indistinguishable from magic.” The goal of this course is to understand the workings of and the science behind modern technologies such as the iPhone, internet, GPS, and others. We will discuss the technology itself, as well as the story of how it came to be and the people involved. Emphasis will be on the ideas behind these technologies, not the mathematics. Intended for both non-science and science majors, every attempt will be made to keep any math at the level of simple algebra.
Instructor(s): C. Morris; L. Pan
Area: Natural Sciences.

**AS.171.125. It’s not magic, it’s physics: Extraordinary Experiments. 3.00 Credits.**
Students will learn key concepts of everyday physics through experimentation. They will design, build, and run experiments themselves. The course will be graded on participation and a graded final presentation.
Instructor(s): M. Valdivia Leiva
Area: Natural Sciences.

**AS.171.127. Freshman Seminar: The Unsolved Mysteries of the Cosmos. 3.00 Credits.**
While our knowledge of the universe has expanded greatly over the past century, there are some very basic problems that stump astronomers to this very day. In this course, we will explore some of the unsolved mysteries that astronomers are actively working on, including the formation of planets to the composition of the universe. This course will be a freshman seminar directed towards non-physical science majors. The focus will be on qualitative questions and phenomena rather than numerical details.
Instructor(s): M. Rahman.

**AS.171.131. Physics and Technology in Society. 3.00 Credits.**
This course presents technology and science issues and how they shape public policy. Students will learn how institutions carry out scientific research while exploring the interactions between the scientific community and policy makers.
Instructor(s): M. Valdivia Leiva
Area: Natural Sciences.

**AS.171.132. Mini-Term I: Now I See! Optical Phenomena Explained. 1.00 Credit.**
Could you explain why rainbows form an arc or how it is possible to bend light to make an object invisible? This course aims to clearly explain some of the most beautiful optical phenomena encountered in nature or in a lab by teaching simple physics principles and using in-class demonstrations. The course is not math intensive and, rather, seeks to help the student gain an appreciation for the basic principles behind these optical effects without becoming lost in complex mathematics. An emphasis will be placed on current research that directly makes use of the physics underlying the phenomena. The ultimate goal of this course is to show students that physics is powerfully beautiful and to build their appreciation for it.
Instructor(s): G. Bosse
Area: Natural Sciences.

**AS.171.133. Black Holes and Other Compact Objects: For Non-Majors. 3.00 Credits.**
This is a lecture and discussion course aimed at undergraduate students who are not physics and astronomy majors. The topic of the lectures will be a basic overview of the qualitative properties of and historical work on compact astrophysical objects (such as black holes, neutron stars, white dwarfs) and related phenomena.
Instructor(s): J. Bankert
Area: Natural Sciences.

**AS.171.201. Special Relativity/Waves. 4.00 Credits.**
Course continues introductory physics sequence (begins with AS.171.105-AS.171.106). Special theory of relativity, forced and damped oscillators, Fourier analysis, wave equation, reflection and transmission, diffraction and interference, dispersion. Meets with AS.171.207.
Prerequisites: Corequisite: AS.110.202 OR AS.110.211; Students must have completed Lab Safety training prior to registering for this class.; (AS.171.106 OR AS.171.108 OR AS.171.102 OR AS.171.104 ) AND Calculus II (AS.110.107 OR AS.110.109 OR AS.110.113)
Instructor(s): N. Zakamska
Area: Engineering, Natural Sciences.

**AS.171.202. Modern Physics. 4.00 Credits.**
Course completes four-semester introductory sequence that includes AS.171.105-AS.171.106 and AS.171.201. Planck’s hypothesis, de Broglie waves, Bohr atom, Schrodinger equation in one dimension, hydrogen atom, Pauli exclusion principle, conductors and semiconductors, nuclear physics, particle physics.
Instructor(s): F. Serra
Area: Natural Sciences.

**AS.171.204. Classical Mechanics II. 4.00 Credits.**
Principles of Newtonian and Lagrangian mechanics; application to central-force motion, rigid body motion, and the theory of small oscillations. Recommended Course Background: AS.110.108 and AS.110.109, AS.110.202, AS.171.201, or AS.171.309. AS.110.201 or equivalent is strongly recommended.
Prerequisites: Pre-req: AS.110.302 or equivalent.
Instructor(s): B. Blumenfeld
Area: Natural Sciences.
AS.171.205. Introduction to Practical Data Science: Beautiful Data. 3.00 Credits.
The class will provide an overview of data science, with an introduction to basic statistical principles, databases, fundamentals of algorithms and data structures, followed by practical problems in data analytics. Recommended Course Background: Familiarity with principles of computing.
Instructor(s): S. Szalay
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.171.207. Special Relativity. 1.00 Credit.
Three-week introduction to special relativity for students who elect to take AS.171.209 in place of AS.171.201.
Prerequisites: Corequisite: AS.110.202 OR AS.110.211; Prerequisite: (AS.171.106 preferred OR AS.171.108 OR AS.171.102 OR AS.171.104) AND (AS.110.107 OR AS.110.109 OR AS.110.113)
Instructor(s): N. Zakamska
Area: Natural Sciences.

AS.171.301. Electromagnetic Theory II. 4.00 Credits.
Static electric and magnetic fields in free space and matter; boundary value problems; electromagnetic induction; Maxwell's equations; and an introduction to electrodynamics.
Prerequisites: Prerequisites: (AS.171.102 OR AS.171.104 OR AS.171.106 OR AS.171.108) AND Calculus III (AS.110.202 OR AS.110.211) AND Linear Algebra (AS.110.201 OR AS.110.212)
Instructor(s): A. Gritsan
Area: Natural Sciences.

AS.171.303. Quantum Mechanics I. 4.00 Credits.
Fundamental aspects of quantum mechanics. Uncertainty relations, Schrodinger equation in one and three dimensions, tunneling, harmonic oscillator, angular momentum, hydrogen atom, spin, Pauli principle, perturbation theory (time-independent and time-dependent), transition probabilities and selection rules, atomic structure, scattering theory. Recommended Course Background: AS.110.302 or AS.110.306.
Prerequisites: (AS.171.202 AND AS.171.204) AND (AS.110.201 OR AS.110.212) AND (AS.110.202 OR AS.110.211)
Instructor(s): C. Chien
Area: Natural Sciences.

AS.171.304. Quantum Mechanics II. 4.00 Credits.
Instructor(s): Y. Li
Area: Natural Sciences.

AS.171.309. Wave Phenomena with Biophysical Application. 4.00 Credits.
Introduction to wave phenomena, primarily through study of biophysical probes that depend on the interaction of electromagnetic radiation with matter. Topics include Fourier Analysis, standing waves; sound and hearing; diffraction and crystallography; geometrical and physical optics – the physics of modern light microscopy; quantum mechanics – how living things absorb light; NMR and MRI. Occasional laboratory exercises are included.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): D. Reich
Area: Natural Sciences.

AS.171.310. Biological Physics. 4.00 Credits.
Introduces topics of classical statistical mechanics. Additional topics include low-Reynolds number hydrodynamics and E&M of ionic solutions, via biologically relevant examples.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.;[AS.171.106 OR AS.171.108 OR AS.171.102 OR AS.171.104] AND (AS.110.107 OR AS.110.109 OR AS.110.113)
Instructor(s): M. Robbins
Area: Natural Sciences.

AS.171.312. Statistical Physics/Thermodynamics. 4.00 Credits.
Undergraduate course that develops the laws and general theorems of thermodynamics from a statistical framework.
Prerequisites: AS.171.202 and Calculus II (AS.110.107 or AS.110.109 or AS.110.113). It is recommended that students have also taken Quantum Mechanics (AS.171.303), Linear Algebra (AS.110.201 or AS.110.212) and Calculus III (AS.110.202 or AS.110.211)
Instructor(s): N. Armitage
Area: Natural Sciences.

AS.171.313. Introduction to Stellar Physics. 3.00 Credits.
Survey of stellar astrophysics. Topics include stellar atmospheres, stellar interiors, nucleosynthesis, stellar evolution, supernovae, white dwarfs, neutron stars, pulsars, black holes, binary stars, accretion disks, protostars, and extrasolar planetary systems. Recommended Course Background: AS.110.108-AS.110.109, AS.171.202
Instructor(s): R. Wyse
Area: Natural Sciences.

AS.171.314. Introduction to Galaxies and Active Galactic Nuclei. 3.00 Credits.
This course will introduce student to the physics of galaxies and their constituents: stars, gas, dust, dark matter and a supermassive black hole in the central regions.
Prerequisites: AS.171.105 AND AS.171.106 AND AS.110.108 AND AS.110.109
Instructor(s): R. Wyse
Area: Natural Sciences.

AS.171.321. Introduction to Space, Science, and Technology. 3.00 Credits.
Topics include space astronomy, remote observing of the earth, space physics, planetary exploration, human space flight, space environment, orbits, propulsion, spacecraft design, attitude control and communication. Crosslisted by Departments of Earth and Planetary Sciences, Materials Science and Engineering and Mechanical Engineering. Recommended Course Background: AS.171.101-AS.171.102 or similar; AS.110.80-AS.110.109.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): J. MacKenty; S. McCandlish
Area: Engineering, Natural Sciences.

AS.171.323. Physics of Human Energy Use. 3.00 Credits.
Course explores the basic nature of energy and heat, the physical principles underlying how we derive energy from various sources (fossil fuels, nuclear power, solar energy, and others), and the physics of energy production’s environmental consequences.
Instructor(s): J. Krolik
Area: Natural Sciences.
AS.171.333. Planets, Life and the Universe. 3.00 Credits.
This multidisciplinary course explores the origins of life, planets’ formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions and planetary protection. Co-listed with AS.020.334, AS.020.616 and AS.270.335
Prerequisites: Students may not register for this class if they have already received credit for AS.020.334 or AS.270.335.
Instructor(s): C. Norman, J. Diruggiero; N. Levin
Area: Engineering, Natural Sciences.

AS.171.405. Condensed Matter Physics. 3.00 Credits.
Undergraduate course covering basic concepts of condensed matter physics: crystal structure, diffraction and reciprocal lattices, electronic and optical properties, band structure, phonons, superconductivity and magnetism. Co-listed with AS.171.621 Recommended Course Background: AS.171.304, AS.110.201-AS.110.202.
Instructor(s): O. Tchernyshyov
Area: Natural Sciences.

AS.171.406. Condensed Matter Physics. 3.00 Credits.
Instructor(s): C. Broholm
Area: Natural Sciences.

AS.171.408. Nuclear and Particle Physics. 3.00 Credits.
Basic properties of nuclei, masses, spins, parity. Nuclear scattering, interaction with electromagnetic radiation, radioactivity, Pions, muons, and elementary particles, including resonances. Recommended Course Background: AS.171.303
Instructor(s): M. Swartz
Area: Natural Sciences.

AS.171.410. Physical Cosmology. 3.00 Credits.
This course provides an overview of modern physical cosmology. Topics covered include: the contents, shape, and history of the universe; the big bang theory; dark matter; dark energy; the cosmic microwave background; Hubble’s law; the Friedmann equation; and inflation. Recommended Course Background: (AS.171.101-AS.171.102), or (AS.171.103-AS.171.104), or (AS.171.105-AS.171.106), or (AS.171.107-AS.171.108), or equivalent.
Instructor(s): C. Bennett
Area: Natural Sciences.

AS.171.411. Light and Optics. 3.00 Credits.
What is light? How does it propagate and interact with matter? How do we use it to transmit information? How does technology make use of light? This course is designed for majors in physics as well as other science and engineering departments.
Prerequisites: AS.171.106
Instructor(s): B. Menard
Area: Engineering, Natural Sciences.

AS.171.413. Magnetic Materials and Spintronics. 3.00 Credits.
Explore magnetic materials, the results of interactions of spin and charge of electrons, and spintronic phenomena, such as interlayer coupling, giant magnetoresistance, spin tunneling, spin transfer torque, spin Hall effect.
Prerequisites: AS.171.202 and AS.171.301
Instructor(s): C. Chien
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.171.416. Numerical Methods for Physicists. 4.00 Credits.
Instructor(s): C. Norman
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.171.426. Practical Scientific Analysis of Big Data. 3.00 Credits.
Students will learn to work with databases, write parallel analysis code with emphasis on Graphics Processing Units (CUDA), and explore new approaches to data processing, namely streaming and robust statistics. Students should have basic knowledge of C/C++ and Introduction Numerical Methods. Co-taught with AS.171.628
Instructor(s): T. Budavari
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.171.472. Introduction to Plasma Physics & Atomic Processes in Hot Plasmas. 3.00 Credits.
Course will be a combination between an introduction to plasma physics and an overview of the basic atomic processes which determine the properties of hot, laboratory and astrophysical plasmas. Undergraduate students may register online for this course and will be assigned 3 credits during the add/drop period. Co-taught with AS.171.672
Instructor(s): M. Finkenthal
Area: Natural Sciences.

AS.171.501. Independent Research- Undergraduate. 3.00 Credits.
Students may register for independent research with a faculty member in the Department of Physics and Astronomy. A research plan should be sent to the Director of Undergraduate Study before the add/drop date that includes project details, the number of hours of effort each week and the number of credits. This course may not be used for one of the two electives required for a BA, but one semester of research may be used as one of four focused electives in a BS program.
Instructor(s): Staff.

AS.171.502. Undergraduate Independent Research. 0.00 - 3.00 Credits.
Research done in senior year in conjunction with experimental equipment of intermediate laboratory or as special project in research group. Credit for independent study given to junior and senior students who act as tutors.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): Staff.

AS.171.503. Senior Thesis. 3.00 Credits.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Physics and Astronomy. This course may only be taken for credit during one semester. However, students are expected to have engaged in their research project during previous semesters through 171.501-502, summer research, etc. This course may not be used as one of the two electives required for a BA, but can be used as one of the four focused electives in a BS program. Open to senior department majors only.
Instructor(s): N. Markovic; R. Wyse; T. Marriage
Writing Intensive.

AS.171.504. Senior Thesis. 0.00 - 3.00 Credits.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Physics and Astronomy. Instructor(s): O. Tchernyshyov; R. Leheny; T. Marriage
Writing Intensive.

AS.171.595. Internship. 1.00 Credit.
Instructor(s): Staff.

AS.171.597. Independent Research. 3.00 Credits.
Instructor(s): Staff.
Using basic physics—order of magnitude estimates, scaling arguments, and similar devices—to understand the gist of complicated natural systems. Examples will be selected from properties of materials, geophysics, weather, astrophysics, cosmology, biomechanics, technology of various sorts, etc. Open to upper-level undergraduates and graduates. Instructor(s): J. Krolik
Area: Natural Sciences.

AS.171.603. Electromagnetic Theory.
Theory of the Maxwell equations, with static and dynamic applications, boundary-value problems, guided and free waves, diffraction, scattering, special relativity, electron theory.
Instructor(s): J. Krolik.

Theory of the Maxwell equations, with static and dynamic applications, boundary-value problems, guided and free waves, diffraction, scattering, special relativity, electron theory.
Instructor(s): G. Domokos.

AS.171.605. Quantum Mechanics.
Review of wave mechanics and the Schrodinger equation, Hilbert space, harmonic oscillator, the WKB approximation, central forces and angular momentum, scattering, electron spin, density matrix, perturbation theory (time-independent and time-dependent), quantized radiation field, absorption and emission of radiation, identical particles, second quantization, Dirac equation.
Instructor(s): M. Kamionkowski.

AS.171.606. Quantum Mechanics.
Review of wave mechanics and the Schrodinger equation, Hilbert space, harmonic oscillator, the WKB approximation, central forces and angular momentum, scattering, electron spin, density matrix, perturbation theory (time-independent and time-dependent), quantized radiation field, absorption and emission of radiation, identical particles, second quantization, Dirac equation. Recommended Course Background: AS.171.303 and AS.171.304
Instructor(s): D. Kaplan.

Topics in applied mathematics used by physicists, covering numerical methods: linear problems, numerical integration, pseudo-random numbers, finding roots of nonlinear equations, function minimization, eigenvalue problems, fast Fourier transforms, solution of both ordinary and partial differential equations. Undergraduate students may register online for this course and will be assigned 3 credits during the add/drop period.
Instructor(s): C. Norman.

AS.171.611. Stellar Structure & Evolution.
Basic physics of stellar structure and evolution will be discussed with emphasis on current research.
Instructor(s): D. Neufeld.

AS.171.612. Interstellar Medium and Astrophysical Fluid Dynamics.
Instructor(s): D. Neufeld.

AS.171.613. Radiative Astrophysics.
A one-term survey of the processes that generate radiation of astrophysical importance. Topics include radiative transfer, the theory of radiation fields, polarization and Stokes parameters, radiation from accelerating charges, bremsstrahlung, synchrotron radiation, thermal dust emission, Compton scattering, properties of plasmas, atomic and molecular quantum transitions, and applications to astrophysical observations.
Instructor(s): T. Marriage.

AS.171.615. Galactic Structure and Stellar Dynamics.
Potential theory; stellar orbits, equilibrium of collisionless systems; stability of collisionless systems; disk dynamics and spiral structure; galactic rotation and the galactic potential; globular cluster evolution.
Instructor(s): B. Menard; N. Zakamska.

AS.171.617. Extragalactic Astronomy.
Establishing the extragalactic distance scale; kinematics of an expanding universe; light element nucleosynthesis; formation of the microwave background. Clusters of galaxies. The Hubble sequence and inventory of internal galactic structures: bulges, disks, star clusters; measurements of distance within the galaxy; stellar kinematics; stellar populations; chemical evolution.
Instructor(s): T. Marriage.

AS.171.618. Observational Astronomy.
How do we observe the Universe at each wavelength and what do we see? This course will present the knowledge required for astronomical observations across the entire spectrum. For each wavelength range (gamma rays, X-rays, UV, visible, IR, radio) we will discuss the type of detector used, the range of possible observations and current open questions. We will also discuss the dominant astronomical and terrestrial sources across the spectrum, and study the differences between ground- and space-based observations.
Instructor(s): B. Menard.

An advanced graduate level course that emphasizes the importance of molecules in astrophysical environments as diverse as interstellar clouds, circumstellar outflows, cometary comae, and active galactic nuclei. Topics will include the chemistry and photochemistry of astrophysical molecules; molecular excitation; astrophysical masers; interstellar molecular clouds; interstellar shock waves; circumstellar outflows; cometary comae; molecular accretion disks.
Instructor(s): D. Neufeld.

This sequence is intended for graduate students in physics and related fields. Topics include: metals and insulators, diffraction and crystallography, phonons, electrons in a periodic potential, transport. Co-listed with AS.171.405
Instructor(s): O. Tchernyshyov.

This sequence is intended for graduate students in physics and related fields. Topics include superconductivity, magnetism, metal-insulator transitions, low dimensional materials, quantized hall effect.
Instructor(s): C. Broholm.
AS.171.625. Experimental Particle Physics.
For graduate students interested in experimental particle physics, or theory students, or students from other specialties. Subjects covered: experimental techniques, including particle beams, targets, electronics, and various particle detectors; and a broad description of high energy physics problems. Undergraduate students may register online for this course and will be assigned 3 credits during the add/drop period.
Instructor(s): M. Swartz.

AS.171.626. Data Analysis: Theory & Practice.
Half theory, half practice with real data: signal/noise estimation, object detection, match filtering, bayesian techniques, principal component analysis, dimensionality reduction, data compression, outlier detection, parameter estimation, pattern recognition, visualization, clustering, tree codes, etc.
Instructor(s): B. Menard; P. Maksimovic.

AS.171.627. Astrophysical Dynamics.
This is a graduate course that covers the fundamentals of galaxy formation, galactic structure and stellar dynamics and includes topics in current research.
Instructor(s): N. Zakamska.

AS.171.628. Practical Scientific Analysis of Big Data.
Students will learn to work with databases, write parallel analysis code with emphasis on Graphics Processing Units (CUDA), and explore new approaches to data processing, namely streaming and robust statistics. Students should have basic knowledge of C/C++ and Introduction Numerical Methods. Co-taught with AS.171.426
Instructor(s): T. Budavari.

AS.171.629. First Year Research.
Instructor(s): B. Menard; P. Maksimovic.

AS.171.630. First Year Research.
Instructor(s): P. Maksimovic.

The course will cover parallel computing on modern general-purpose graphics processors. Graduate students will learn to design and implement scientific problems in C for CUDA, the Compute Unified Device Architecture. Students should have basic knowledge of C/C++. Co-taught with AS.171.426 and AS.171.628.
Instructor(s): T. Budavari.

Many physical phenomena are difficult to model because they involve coupled processes on a wide range of length and time scales. This course will cover recent developments in multiscale methods for such phenomena. One focus will be hierarchical methods for coarse-graining models to fewer degrees of freedom. Atomistic simulations may be used to construct molecular models, phase-field models or continuum models. A second focus will be methods for concurrently simulating different regions of space with different levels of spatial and temporal resolution. For example, interfacial regions or regions of high strain gradient may require different physical models and resolutions. Recommended Course Background: Course in Condensed Matter Physics, Statistical Mechanics, EN.550.695, or permission of the instructor.
Instructor(s): M. Robbins.

AS.171.641. Second Year Research.
Instructor(s): B. Menard; P. Maksimovic.

AS.171.642. Second Year Research.
Instructor(s): P. Maksimovic.

AS.171.644. Exoplanets and Planet Formation.
A graduate-level introduction to the properties of the solar system, the known exoplanet systems, and the astrophysics of planet formation and evolution. Topics also include the fundamentals of star formation, protoplanetary disk structure and evolution, exoplanet detection techniques, and the status of the search for other Earths in the Galaxy. Upper-level undergraduates may enroll with the permission of the instructor.
Instructor(s): K. Schlaufman.

AS.171.646. General Relativity.
An introduction to the physics of general relativity. Principal topics are: physics in curved spacetimes; the Equivalence Principle; the Einstein Field Equations; the post-Newtonian approximation and Solar System tests; the Schwarzschild and Kerr solutions of the Field Equations and properties of black holes; Friedmann solutions and cosmology; and gravitational wave propagation and generation.
Instructor(s): D. Kaplan
Area: Natural Sciences.

Course will be a combination between an introduction to plasma physics and an overview of the basic atomic processes which determine the properties of hot, laboratory and astrophysical plasmas. Undergraduate students may register online for this course and will be assigned 3 credits during the add/drop period. Co-taught with AS.171.472
Instructor(s): M. Finkenthal.

This multidisciplinary course explores the origins of life, planets’ formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions and planetary protection. Graduate students only. Meets with AS.171.333.
Instructor(s): C. Norman.

AS.171.701. Quantum Field Theory.
Introduction to relativistic quantum mechanics and quantum field theory. Canonical quantization; scalar, spinor, and vector fields; scattering theory; renormalization; functional integration; spontaneous symmetry breaking; Standard Model of particle physics.
Instructor(s): J. Kaplan.

AS.171.702. Quantum Field Theory II.
Introduction to relativistic quantum mechanics and quantum field theory. Recommended Course Background: AS.171.605-AS.171.606 or equivalent.
Instructor(s): J. Kaplan.

AS.171.703. Advanced Statistical Mechanics.
Brief review of basic statistical mechanics and thermodynamics. Then hydrodynamic theory is derived from statistical mechanics and classical treatments of phase transitions, including Ginzburg-Landau theory.
Instructor(s): R. Leheny.
Course covers phase transitions and critical phenomena. Building on the ideas of spontaneous symmetry breaking and scale invariance at a critical point we develop Landau's theory of phase transitions and the apparatus of renormalization group using both analytic and numerical techniques for studying interacting systems.
Instructor(s): O. Tchernyshyov.

AS.171.713. Magnetic Materials and Spintronics.
Explore magnetic materials, the results of interactions of spin and charge of electrons, and spintronics phenomena, such as interlayer coupling, giant magnetoresistance, spin tunneling, spin transfer torque, spin Hall effect.
Instructor(s): C. Chien.

AS.171.732. Elementary Particle Physics.
Description TBA
Instructor(s): M. Swartz.

AS.171.750. Cosmology.
Review of special relativity and an introduction to general relativity, Robertson-Walker metric, and Friedmann equation and solutions. Key transitions in the thermal evolution of the universe, including big bang nucleosynthesis, recombination, and reionization. The early universe (inflation), dark energy, dark matter, and the cosmic microwave background. Development of density perturbations, galaxy formation, and large-scale structure.
Instructor(s): C. Bennett.

Introduction to the use of neutron scattering techniques to probe atomic scale structure and dynamics of hard condensed matter. Subjects covered include basic theory of nuclear and magnetic neutron scattering, neutron sources and instrumentation, polarized neutrons, Larmor labeling, structural refinement methods, surfaces and interfaces, group theoretical analysis of magnetic structures, phonons, magnetic excitations, and critical phenomena.
Prerequisites: AS.171.621 OR AS.171.622
Instructor(s): C. Broholm.

AS.171.752. Black Hole Astrophysics.
Black holes are the central engines for a wide variety of astrophysical objects: Galactic X-ray sources, active galactic nuclei, stellar tidal disruptions, and the black hole mergers that are the only directly-detected gravitational wave sources (as of this writing). Although the mass distribution of astrophysical black holes spans at least eight orders of magnitude and their circumstances can vary tremendously, the physical processes relevant to them are often closely related. This class will present the most important of them: relativistic orbits; accretion dynamics, the structure of accretion flows, and their radiation mechanisms; relativistic jet launching; binary black hole dynamics and gravitational wave radiation.
Instructor(s): J. Krolik.

AS.171.755. Fourier Optics and Interferometry in Astronomy.
A course for advanced undergraduate and beginning graduate students covering the principles of optics and image formation using Fourier Transforms, and a discussion of interferometry and other applications both in radio and optical astronomy.
Instructor(s): R. Allen.

AS.171.756. Astrophysics of Compact Objects.
A graduate-level course devoted to the physical understanding of black holes, white dwarfs, neutron stars and associated objects. Many astrophysical observations will be discussed where these objects may be relevant including galactic nuclei, quasars, compact X-ray sources and gamma-ray bursts.
Instructor(s): M. Kamionkowski.

This course is designed for graduate students interested in learning the language, techniques, and problematic of modern quantum many-body theory as applied to condensed matter physics.
Instructor(s): O. Tchernyshyov.

AS.171.783. Advanced Particle Theory.
AS.171.784. Advanced Quantum Field Theory.
The course will focus on scenarios and principles for new particle physics that can be tested at the CERN Large Hadron Collider and other particle experiments.
Instructor(s): D. Kaplan.

AS.172.114. Introduction To Frontier Physics. 1.00 Credit.
Explores modern experimental methods and theoretical ideas in physics.
Instructor(s): R. Henry
Area: Natural Sciences
Writing Intensive.

AS.172.203. Contemporary Phys Sem. 1.00 Credit.
This seminar exposes physics majors to a broad variety of contemporary experimental and theoretical issues in the field. Students read and discuss reviews from the current literature, and are expected to make an oral or written presentation. Recommended Course Background: AS.171.101-AS.171.102, AS.171.103-AS.171.104, or AS.171.105-AS.171.106.
Instructor(s): N. Drichko
Area: Natural Sciences.

AS.172.601. Department Colloquium.
Instructor(s): D. Reich.
Intended for beginning graduate students. Study of the methods and results of modern physics and other topics of interest. Each student will discuss some phase of the subject. Graduate students only.
Instructor(s): Staff.

AS.172.633. Language Of Astrophysics.
Survey of the basic concepts, ideas, and areas of research in astrophysics, discussing general astrophysical topics while highlighting specialized terms often used compared to physics.
Instructor(s): D. Neufeld.

During the Spring 2015 Planets Life and the Universe Seminar, we will read and discuss classic papers and (later in the semester) frontier research on the fundamental issues concerning the Origin of Life on our planet Earth and Exoplanets in general. The recent Kepler mission has now shown that are typical earth-like planets around every typical star in the Universe--giving almost Avagadro's number of earthlike planets in our Universe. The study of Life in the Universe consequently becomes an observational science. The intellectual framework underpinning these endeavors becomes one of the central intellectual issues of our age (possibly any age!). We will have relaxed and enjoyable discussions of these topics on Friday afternoons. At times mathematical and physics based fluency will be useful. Recommended Course Background: AS.171.333/AS.171.699 or AS.020.334/AS.020.616
Instructor(s): Staff.

Nonspecialized seminar in which second-year graduate students discuss subjects of general interest, supplementing the material of the standard courses and including recent advances in physics.
Instructor(s): M. Swartz.

AS.172.722. Hot Topics in Astrophysics.
Instructor(s): C. Norman.

AS.172.731. CAS Research Seminar.
Instructor(s): S. McCandliss.

AS.172.732. CAS Research Seminar.
Instructor(s): S. McCandliss.

Instructor(s): Staff.

AS.172.751. Elementary Particle Physics Seminar.
Instructor(s): A. Gritsan.

AS.172.752. Elementary Particle Physics Seminar.
Instructor(s): P. Maksimovic.

AS.172.753. Advanced Particle Theory Seminar.
Instructor(s): J. Kaplan.

AS.172.754. Advanced Particle Theory Seminar.
Instructor(s): J. Kaplan.

Instructor(s): N. Armitage.

Instructor(s): N. Armitage.

Instructor(s): N. Armitage.

AS.173.111. General Physics Laboratory I. 1.00 Credit.
Experiments performed in the lab provide further illustration of the principles discussed in General Physics. Students are required to take this course concurrently with General Physics unless they already have received credit for the lab. Note: First and second terms must be taken in sequence.
Instructor(s): C. Chien; J. Mumford
Area: Natural Sciences.

AS.173.112. General Physics Laboratory II. 1.00 Credit.
Experiments are chosen from both physical and biological sciences and are designed to give students background in experimental techniques as well as to reinforce physical principles. Recommended Course Background: AS.173.111; Corequisite: AS.171.102 or AS.171.104 or AS.171.108
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Chien; J. Mumford
Area: Natural Sciences.

AS.173.115. Classical Mechanics Laboratory. 1.00 Credit.
Experiments chosen to complement the lecture course Classical Mechanics I, II AS.171.105-AS.171.106 and introduce students to experimental techniques and statistical analysis. Corequisite: AS.171.105.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Chien; J. Mumford
Area: Natural Sciences.

AS.173.116. Electricity and Magnetism Laboratory. 1.00 Credit.
Experiments chosen to complement Electricity and Magnetism AS.171.106 and introduce students to experimental techniques and statistical analysis.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Chien; J. Mumford
Area: Natural Sciences.

AS.173.125. Understanding the World through Physics: An experimental approach. 3.00 Credits.
Students will learn key concepts of everyday physics through experimentation. They will design, build, and run experiments themselves. The course will be graded on participation and a graded final presentation.
Instructor(s): M. Valdivia Leiva
Area: Natural Sciences.

AS.173.308. Advanced Physics Laboratory. 3.00 Credits.
A broad exposure to modern laboratory procedures such as holography, chaos, and atomic, molecular, and particle physics.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): T. Marriage
Area: Natural Sciences
Writing Intensive.
AS.173.311. Mentoring in General Physics Laboratory. 1.00 Credit.
This course provides students who have take General Physics I and II and General Physics Laboratory I and II with the opportunity to mentor new students in General Physics Laboratory I and II. Mentors collaborate General Physics laboratory Teaching Assistants to interact with students to help them to complete laboratory assignments and to master the concepts of General Physics. Mentors must have a strong background in Physics. They are expected to interact with students during one three-hour laboratory section per week and to attend the associated TA training once per week. Permission of the instructor required. S/U only.
Prerequisites: AS.173.111 and AS.173.112; Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Chien
Area: Natural Sciences.

AS.173.312. Mentoring in General Physics Laboratory. 1.00 Credit.
This course provides students who have take General Physics I and II and General Physics Laboratory I and II with the opportunity to mentor new students in General Physics Laboratory I and II. Mentors collaborate General Physics laboratory Teaching Assistants to interact with students to help them to complete laboratory assignments and to master the concepts of General Physics. Mentors must have a strong background in Physics. They are expected to interact with students during one three-hour laboratory section per week and to attend the associated TA training once per week. Permission of the instructor required. S/U only.
Prerequisites: AS.173.111 and AS.173.112; Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Chien
Area: Natural Sciences.

AS.173.608. Advanced Laboratory.
Experiments carried out on cosmic rays, X-ray scattering Mössbauer effect, atomic beams, and optical spectroscopy.
Instructor(s): T. Marriage.

Cross Listed Courses
Chemistry
The course is designed to provide the essential principles and concepts underlying the modern study of the structure and properties of solids in bulk crystals, thin films, and nanoscale objects. Topics include basic crystallography, structure determination by x-ray, neutron, and electron diffraction, fundamental concepts of bonding in solids, lattice dynamics, electronic band structure, magnetism, and strongly correlated electron behavior. Particular emphasis is placed on the impact of the structure, dimensionality, and electron count on electrical and magnetic properties (electric conduction, superconductivity, thermoelectricity, etc). More course info available at <a href=http://occamy.chemistry.jhu.edu>http://occamy.chemistry.jhu.edu</a>. Cross-listed with Physics and Astronomy
Instructor(s): T. Mcqueen.

Applied Mathematics Statistics
EN.550.415. Practical Scientific Analysis of Big Data. 3.00 Credits.
This course explores common issues around computational analysis of massive data. We will learn about numerical inaccuracies in calculations, work with databases, and venture out into parallel computing (multithreading and CUDA). Students will be introduced to streaming algorithms and elements of robust statistics.
Instructor(s): T. Budavari
Area: Natural Sciences, Quantitative and Mathematical Sciences.

EN.550.693. Turbulence Theory. 3.00 Credits.
An advanced introduction to turbulence theory for graduate students in the physical sciences, engineering and mathematics. Both intuitive understanding and exact analysis of the fluid equations will be stressed. Students should have previous familiarity with fluid mechanics.
Instructor(s): G. Eyink.

Political Science
http://politicalscience.jhu.edu

The programs of the Political Science Department are designed to help students attain a deeper understanding of politics and civic life in its various dimensions. The department encourages students to become sophisticated theoretically and to study politics in global and comparative perspective. We divide the curriculum into American Politics, Comparative Politics, Political Theory, and International Relations (and Law and Politics at the graduate level). Students are encouraged to develop expertise in several of these areas.

The department has 22 faculty members. The undergraduate program offers a broad range of courses about politics and government at local, state, national, and international levels. In addition to taking courses on the Homewood campus, students can do independent research under the guidance of a faculty mentor, take courses at the Nitze School of Advanced International Studies (SAIS) in Washington, D.C., and participate in the Aitchison Public Service Undergraduate Fellowship Program at the Johns Hopkins Washington Center.

Intellectual Orientation

In addition to our work within the traditional fields of Political Science, faculty research engages four clusters of activity that cut across the various subfields while speaking to core questions of politics: power and inequality, identities and allegiances, agency and structures, and borders and flows.

Power and Inequality
In many ways, political science is the study of power. This includes the wide array of rules, authority structures, and forms of violence at the local, national, transnational and international levels, as well as how the value, distribution, and accumulation of resources create conditions of security and insecurity among nation states, regions, economic classes, or populations.

Identities and Allegiances
A second cluster of research centers on questions of identity and the various allegiances and attachments organized around them. These include how racial, ethnic, gender, and sexual identities inform citizenship and nationalism, the organization of civil society, or the formation of social movements.

Agency and Structure
A third cross-cutting area of activity in the department explores questions of agency and structures. Agency includes entrepreneurship, innovation and creative action, and the agency of material things. Structures include formal and informal institutions, particularly the rules, roles, and regulations that guide human relations in the public, private, and nonprofit worlds, among states and within them, at the global level and in local communities.
Borders and Flows
A fourth cluster examines borders and flows. Research in this area examines the movement of people, ideas, material objects, and natural forces across space and over time. A focus on borders and flows informs the study of territorial regimes, sovereignty, religious intensities, immigration and diasporas, globalizing capital, information, and ecological politics.

Political Science courses can contribute to two different majors:

**Major in Political Science**
The major in political science described below is designed for students interested in intensive study of the institutions, theory, and problems of politics, government and modern political culture.

**Major in International Studies**
The department contributes to an interdisciplinary program leading to B.A. or B.A./M.A. degrees in International Studies. This program and its requirements are described under International Studies (p. 418).

**Requirements for the B.A. Degree**
(See also Requirements for a Bachelor’s Degree (p. 10).)

The requirements for the political science major listed below apply to those students who entered the University in Fall 2014 and later. Students who entered prior to Fall 2014 should refer to the archived catalog (http://web.jhu.edu/registrar/catalog) based on their year of entry into the institution. All courses applied towards the major must be taken for a letter grade and students must receive a grade of C or higher, including courses taken in the first semester of freshman year. A maximum of four courses may come from transfer credit and only one letter-graded independent study of 3 credits may apply towards the major (unless honors thesis). The Department of Political Science does not award credit for the Advanced Placement Exam in government.

Honors Thesis Program
Seniors also have the opportunity to write a senior research thesis. To be eligible to write this thesis, seniors must have taken at least one (1) research-focused political science course (R) in their junior year (senior year with special permission). Once the student identifies a faculty sponsor who will supervise the project the students will enroll in a three credit independent study during the fall semester of their senior year. If at the end of the fall semester adequate progress has been made and the project warrants further work, the student must enroll in a three credit senior theses colloquium course.

Students who complete a senior thesis and have a final major GPA (including final semester grades) of 3.7 will be awarded departmental honors. All students may write a thesis, regardless of GPA, provided they have a detailed proposal approved by a faculty member at the beginning of the fall semester of their senior year.

All thesis-related courses apply to the total of twelve (12) political science courses required for graduation in the major.

For thesis requirements applicable to students who entered the university prior to Fall 2014, please contact the department.

Graduate Program
The preparation of the next generation of scholars in the field of political science is a key part of the Political Science Department faculty’s commitment to research and advancing the understanding of politics. The doctoral program reflects the distinctive strengths of the department’s cross-cutting intellectual orientations (encompassing the themes of power and inequality, identities and allegiances, agency and
structure, and borders and flows), realized in faculty and PhD student research and teaching. The Johns Hopkins University Political Science Department is known for its strength in theory and in innovative and trans-disciplinary approaches to uncovering new knowledge, and the program of doctoral study draws on these strengths to provide rigorous training. Our program is designed for highly qualified, intellectually curious and creative graduate students who can benefit from learning from and contributing to this community of scholars. Doctoral students develop in-depth knowledge of a major field and a minor field (or two major fields), chosen from American Politics, Comparative Politics, International Relations, Law and Politics, and Political Theory. In addition, doctoral students may complete a certificate in Comparative Racial Politics. Students have opportunities to work closely with faculty and to pursue independent research, and faculty and doctoral students benefit from strong connections with colleagues in other social science and humanities disciplines and opportunities to collaborate with them. The department and Krieger School of Arts and Sciences provide opportunities for developing teaching and other career-related skills. The Johns Hopkins University Homewood campus and Baltimore provide an attractive setting and vibrant neighborhood.

**Admission**

The department admits approximately 9 to 11 new graduate students each year, selecting them from the approximately 200 applications that it receives annually. The deadline for application for admission to graduate study and the award of financial assistance is January 15 (most years). Decisions are made exclusively in late February or early March and announced by March 15. A B.A., B.S., or their equivalent, and results of the Graduate Record Examination are required for application. Students whose native language is not English must take the TOEFL examinations or provide other evidence of fluency in English (such as a degree from an institution in which the language of instruction is English.) A broad background in the liberal arts and sciences is preferred. Further information can be found at [http://grad.jhu.edu/apply/application-process/](http://grad.jhu.edu/apply/application-process/).

**Financial Aid**

The department ordinarily provides financial aid to all students admitted to the graduate program unless they hold fellowships from sources outside the university. Departmental fellowships cover full tuition and an annual stipend. Assuming satisfactory progress toward the Ph.D., students can normally expect to receive funding for five years. All students receiving financial aid are expected to serve as teaching assistants for one semester of each academic year.

**Requirements for the Ph.D. Degree**

The requirements for the Ph.D. are divided between those that must be satisfied by all candidates for that degree and those particular to the student’s major and minor fields.

**Department-wide Requirements**

All candidates for the Ph.D. must satisfy the following requirements:

**Course Requirements**

A minimum of 12 semester courses at the 600-level with a grade of B or better. At least 10 of these must be in the Krieger School’s Department of Political Science.

**Foreign Language Requirement**

All students must demonstrate successful completion of four semesters of college-level foreign language instruction or its equivalent, or pass a translation test administered by an appropriate faculty member. (This requirement is waived for foreign students who are native speakers of a language other than English)

**Comprehensive Examination Requirement**

Students are required, at a minimum, to take comprehensive exams in one major field and one minor field. Students may also elect to take two major exams or a major exam and two minor exams (one of which may be outside the Department of Political Science). Faculty in the field write and evaluate the exams and determine the format. Major field comprehensive exams take place over two days (8 hours per day); minor field exams take place over one day. The fields within the department are: American Politics, Law and Politics, Political Theory, Comparative Politics and International Relations.

Students choosing a second minor outside the Political Science Department must devise a coherent program of study in that discipline, in consultation with their Political Science faculty advisor and with faculty from the other department. Students choosing an external minor must complete a minimum of three courses at the 600 level in the external minor’s discipline, earning a grade of B or better. They must also pass a comprehensive examination prepared and evaluated in consultation with faculty of the Department of Political Science by the instructors in those courses.

**Dissertation**

The dissertation is the capstone of doctoral education, and it must be a substantial work of independent scholarship that contributes to knowledge in the student’s field of study. Preparation of the dissertation will be supervised and must be approved by two members of the faculty, at least one of whom (the dissertation director) must be a member of the Department of Political Science.

**Defense**

The final examination of the dissertation will take the form of a defense conducted under the rules of the Graduate Board of The Johns Hopkins University.

**Field-specific requirements**

Field-specific basic expectations, procedures, and requirements are stated below. These are implemented, interpreted, and adjusted in the light of the intellectual orientations and objectives of individual students. It is of great importance that students work closely with their advisors and with the faculty in their major and minor fields in constructing and pursuing their programs of study.

**American Politics**

Students majoring and minoring in American Politics will work with at least two faculty members to develop a plan of study that includes recommended course work and other preparation needed to pass a comprehensive exam. Students completing a major are expected to demonstrate a breadth of knowledge sufficient for framing a dissertation in the relevant disciplinary literature and teaching undergraduate courses in the field; students who pursue a minor may focus more narrowly on an area of study in which they demonstrate fluency. These may include, but are not limited to, the following areas of faculty interest:

- American Political Institutions (Congress, Courts, and the Executive)
Relations. Choices include but are not restricted to:

- International Relations
- Political Behavior and Public Opinion
- Race and Politics
- Public Policy
- American Political Thought
- Political Parties and Elections

In addition, students majoring in the field are strongly encouraged to take AS.190.602 Introduction to Quantitative Political Science as part of their course of study.

Comparative Politics

All students majoring and minoring in this Comparative Politics will become conversant with major substantive and methodological debates in the field, and be able to comment on the key theoretical literature in several of those debates. They will normally also develop knowledge of at least one world region. Students majoring or minoring in Comparative Politics are required to take AS.190.625 Theories of Comparative Politics and at least one seminar in quantitative or qualitative methods. We expect all students to master the material covered in these courses, as well as others with more specialized topics.

Students will take a comprehensive exam that will test their ability to engage with several areas of theoretical debate in Comparative Politics, and their ability to use comparative examples to support their arguments. Students may focus on (but are not limited to):

- Civil Society
- Institutional Theories
- Transnational Relations, Social Movements, and Contentious Politics
- Political Parties, Interest Groups, Representation, and Political Behavior
- Comparative Political Economy
- Comparative Racial Politics, Nationalism, and Migration and Citizenship
- The Political Economy of Development
- Economic and Political Transitions
- Ideas and Politics

Within the spirit of this division of the overall field, students may propose alternative delineations of thematic subfields.

Students working in specific thematic and substantive subfields within Comparative Politics will be required to demonstrate competence in methodologies and bodies of theory judged by the faculty to be necessary for quality research and teaching in those subfields.

International Relations

All students majoring or minoring in International Relations will be required to be conversant with the major theoretical, substantive, and methodological themes and debates of the field. It is strongly recommended that students take As 190.676 Field Survey of International Relations and a methods course. Students majoring in International Relations will take an examination covering two subfields. The first subfield must be International Politics. The other subfield is to be determined in consultation with faculty teaching International Relations. Choices include but are not restricted to:

- International Law and Diplomacy
- International Relations Theory
- International Security Studies
- Global Political Economy

Students minoring in International Relations will take a comprehensive examination in International Politics.

Political Theory

Students majoring in Political Theory will take a comprehensive examination covering the following two subfields:

- Contemporary Political Theory
- History of Political Thought

Each student preparing for a major comprehensive exam will propose six or seven thinkers in the history of thought, six or seven recent or contemporary thinkers, and three or four issue areas. Examination questions are composed in light of the theorists and issues articulated in the exam prospectus.

The minor comprehensive exam in political theory asks the student to select half the number of thinkers required for the major exam and three issue areas.

Preparation for these examinations will be arranged in consultation with relevant faculty.

Students majoring in political theory will also take at least one minor field from American Politics, Law and Politics, Comparative Politics, or International Relations.

Law and Politics

Law and Politics focuses on American constitutional thought, judicial politics, law and society, and philosophy of law and jurisprudence. Students learn not only about the history and context of American constitutional developments but also about the operation of the judicial branch of government in the past and the present, how courts and judges do their work, and how that work has changed. In addition, students explore how legislation as well as course decisions reflect and influence groups, and professional networks help to shape law’s content and implementation. Students may major or minor in Law and Politics. In either case, students work closely with at least two members of the faculty to develop a plan of study regarding coursework and additional reading to prepare them for comprehensive exams. Majors are expected to demonstrate a breadth of knowledge in the field sufficient for framing a dissertation and for teaching undergraduate courses; minors may focus more narrowly on a particular area of study.

Certificate in Comparative Racial Politics

The graduate certificate program in Comparative Racial Politics is designed to help train graduate students who are developing empirically based and/or theoretically informed scholarship on citizenship, racism and immigration in contemporary societies, whether in a single national society or cross-spatially. There are two required courses: Comparative Racial Politics, and Qualitative Methods. In addition the student must take two electives from this (preliminary) list:

- Nationalism
- Comparative Citizenship and Immigration
- Politics
- Topics in Black Political Thought
• Race and Political Theory
• Civil Society
• States, Regimes and Governmentality
• American Political Development
• Political Economy of Development

Progress Toward the Ph.D.

The time necessary to obtain a Ph.D. in the department varies according to the preparation individual students bring to the program, the scope and complexity of their dissertation topics, and other factors. Students are required to make satisfactory progress, meaning that they must work toward fulfilling the requirements in a timely manner. Students are encouraged to satisfy the department’s foreign language requirement by the time of their first comprehensive exam. Most students take their comprehensive examinations in the third year in the program. Students who have completed all requirements except the dissertation must work to complete their dissertations as quickly as is reasonable given the unique circumstances of their course of study, and they must periodically demonstrate progress on the dissertation.

The Master of Arts degree is offered only to students who have been admitted into the Ph.D. program. For the M.A., the student must complete at least seven one-semester courses at the 600-level with a grade of B or better, and demonstrate an effective reading knowledge of one approved foreign language.

For current faculty and contact information go to http://politicalscience.jhu.edu/directory/

Faculty
Chair
Adam Sheingate
American Politics, Comparative Politics

Professors
Jane Bennett
Political theory, American political thought, ecophilosophy.

William E. Connolly
Krieger-Eisenhower Professor: political theory, international relations.

Steven R. David
Professor and Vice Dean for Undergraduate Education: international relations, security studies, comparative politics.

Benjamin Ginsberg
David Bernstein Professor and Director of the Washington Center for the Study of Government: American government and politics, political development.

Richard Katz
Comparative Politics (parties, elections, European politics), American Politics

Renée Marlin-Bennett
International relations, political economy of information.

Associate Professors
Samuel Chambers
Political theory, feminist and queer theory, cultural politics.

Erin Chung
Charles D. Miller Associate Professor of East Asian Politics and co-director of the Racism, Immigration and Citizenship Program: comparative politics, East Asian politics, international migration, comparative racial politics.

Jennifer L. Culbert
Political theory, jurisprudence.

Daniel H. Deudney
International relations, political theory.

Nicolas Jabko
Comparative politics, international political economy, European politics.

Adam Sheingate
American politics, comparative politics.

Lester Spence
Black politics, race and politics, urban politics, American political behavior and public opinion.

Steven Teles
Social policy, law and public policy, political analysis.

Assistant Professors
Bentley Allan
International relations, science and politics, global governance, global environmental politics.

P. J. Brendese
Political theory, comparative political thought, race and politics.

Sebastian Mazzuca
Political Economy, Comparative Politics, Latin American Politics and Economy

Daniel Schlozman
American politics, political parties, and the welfare state.

Sebastian Schmidt
International Relations, Security Studies

Emily Zackin
Constitutional law, American politics.

Professors Emeriti
Joseph Cooper
Legislative politics, executive-legislative relations, institutional theory.

Matthew A. Crenson
Urban government, American political development.

Richard E. Flathman
Professor Emeritus and George Armstrong Kelly Professor: political theory, legal philosophy.

Joel B. Grossman
Constitutional law, law and politics, American politics.

Margaret Keck
Comparative politics, international relations (Latin American politics, the environment, social movement

Adjunct Faculty
Robert Freedman
Arab-Israeli politics and Russian politics.
Courses

**AS.190.101. Introduction to American Politics. 3.00 Credits.**
This course examines the ideals and operation of the American political system. It seeks to understand how our institutions and politics work, why they work as they do, and what the consequences are for representative government in the United States. Emphasis is placed on the federal government and its electoral, legislative, and executive structures and processes. As useful and appropriate, attention is also given to the federal courts and to the role of the states. The purpose of the course is to understand and confront the character and problems of modern government in the United States in a highly polarized and plebiscitary era.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

**AS.190.106. International Relations in East Asia. 3.00 Credits.**
Intensive analysis of major approaches to international politics (realism, liberalism, Marxism). Topics include: anarchy, geopolitics, states, nations, balance of power, hegemony, empire, democratic peace, regimes, nuclear weapons, European Union.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences.

**AS.190.199. Freshman Seminar: The Politics of Water. 3.00 Credits.**
This freshman seminar will focus on reading just one book, The Human Condition, by Hannah Arendt. Such a narrow focus is justified by the breadth of topics the book itself discusses and the influence these various discussions have had on modern political thought. Among the various topics that will be studied and talked about are the meaning of the distinctions Arendt makes between "public," "private," and "social," as well as between "labor," "work," and "action." In the course of their studies, students will be challenged to think about the relation of philosophy to politics, the significance of the scientific revolution for public life, the character of contemporary society, and what it means to be "free." Also, by focusing on just one book, students will have the opportunity to learn how to do the kind of close reading and textual analysis necessary in college requires. In addition to reading assignments, students will be required to write four short papers.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences
Writing Intensive.

**AS.190.209. International Politics. 3.00 Credits.**
This course examines the ideals and operation of the American political system. It seeks to understand how our institutions and politics work, why they work as they do, and what the consequences are for representative government in the United States. Emphasis is placed on the federal government and its electoral, legislative, and executive structures and processes. As useful and appropriate, attention is also given to the federal courts and to the role of the states. The purpose of the course is to understand and confront the character and problems of modern government in the United States in a highly polarized and plebiscitary era.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences.

**AS.190.109. Politics of East Asia. 3.00 Credits.**
This course examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. We analyze two enduring themes of classic and contemporary scholarship in comparative politics: development and democracy. The purpose is to introduce students to the various schools of thought within comparative politics as well as to the central debates concerning East Asian politics.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

**AS.190.111. Introduction to Global Studies. 3.00 Credits.**
This course surveys scholarly approaches to processes, relations, institutions, and social structures that cross, subvert, or transcend national borders. The course will also introduce students to research tools for global studies. Students who have taken Contemporary International Politics 190.209 or International Politics 190.104 may not register.
Prerequisites: Students who have taken AS.190.209 OR AS.190.104 may not enroll.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

**AS.190.108. Freshmen Seminar: The Human Condition. 3.00 Credits.**
This freshman seminar will focus on reading just one book, The Human Condition, by Hannah Arendt. Such a narrow focus is justified by the breadth of topics the book itself discusses and the influence these various discussions have had on modern political thought. Among the various topics that will be studied and talked about are the meaning of the distinctions Arendt makes between "public," "private," and "social," as well as between "labor," "work," and "action." In the course of their studies, students will be challenged to think about the relation of philosophy to politics, the significance of the scientific revolution for public life, the character of contemporary society, and what it means to be "free." Also, by focusing on just one book, students will have the opportunity to learn how to do the kind of close reading and textual analysis necessary in college requires. In addition to reading assignments, students will be required to write four short papers.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences
Writing Intensive.

For current course information and registration go to [https://sis.jhu.edu/classes/](https://sis.jhu.edu/classes/)
AS.190.205. Capital: The Best Seller. 3.00 Credits.
When Thomas Piketty published _Capital in the Twenty-First Century_, last spring, he made the rounds on talk shows just like a movie star with a new film out, or a rock star with an album about to drop. How is such an “event” possible, and what does it tell us about the book’s subject, capitalism? This class explores the questions Piketty’s book raises. What is capital? How does it come about, how does it function, and what are its effects?
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences

AS.190.206. Global Environmental Politics. 3.00 Credits.
This course will combine empirical, theoretical, and moral perspectives to explain and understand global environmental problems such as climate change and worldwide biodiversity decline. In the first part of the course, we will examine the central social, economic, and political causes of ecological problems. In the second part, we will analyze proposed solutions to these problems at the local, national, and global levels.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.207. Political Freedom, Race and Resistance. 3.00 Credits.
This course examines core questions about the relationship between political power and political freedom. A critical investigation of how resistance to racial inequality has been expressed in political theory and political practice will illuminate and contest the limits and possibilities for political freedom today.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences

AS.190.208. The Politics of Music. 3.00 Credits.
This course will provide a critical examination of the role of music in political and social change. We will be especially concerned with the correspondences between musical innovations and their capacities to inspire and shape social movements as their capacity to address the politics of race and sexuality, radical democratic resistance, etc. We will also explore how music is utilized to advance agendas that are anti-democratic, such as the transnational spread of white supremacist groups, the glorification of violence, and exclusionary nationalism.
Instructor(s): P. Brendese
Area: Humanities, Social and Behavioral Sciences

AS.190.209. Contemporary International Politics. 3.00 Credits.
An introduction to international politics. Emphasis will be on continuity and change in international politics and the causes of war and peace.
The first half of the course will focus on events prior to the end of the Cold War, including the Peloponnesian War, the European balance of power, imperialism, the origins and consequences of WWI and WWII, and the Cold War. The second half will focus on international politics since 1990, including globalization, whether democracies produce peace, the impact of weapons of mass destruction, terrorism, and the prospects for peace in the 21st century. Theories of realism and liberalism will also be considered.
Instructor(s): S. David
Area: Social and Behavioral Sciences

AS.190.210. The American Congress. 3.00 Credits.
An introduction to legislative politics and policymaking in the US, and their place in the political system. Special attention to issues of representation, and the consequences of institutional design.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences

AS.190.217. Introduction to International Relations Theory. 3.00 Credits.
This course is a broad introduction to international relations theory in a format that encompasses lecture and discussion. We will explore mainstream theoretical perspectives and critiques of those perspectives, as well as more recent developments in the field.
Instructor(s): S. Schmidt
Area: Social and Behavioral Sciences

AS.190.220. Global Security Politics. 3.00 Credits.
Contemporary and emerging technologies of nuclear (weapons, terrorism, energy) outer space (missiles, missile defense, asteroids), biosecurity (bioweapons, pandemics, terrorism) and cyber (war, spying, surveillance) and implications for security, international politics, arms control, and political freedom.
Instructor(s): D. Deudney
Area: Social and Behavioral Sciences

AS.190.225. Introduction to International Studies. 3.00 Credits.
Instructor(s): S. Grovogui
Area: Social and Behavioral Sciences

AS.190.226. Global Governance. 3.00 Credits.
Global problems like poverty, financial instability, human rights abuses, and climate change threaten both international order and human well-being. In the absence of a world state, these problems must be addressed by an increasingly complex, transnational network of organizations and social groups. First, we will aim to understand and explain how global problems are governed through detailed case studies of International Organizations and Non-Governmental Organizations such as the United Nations, World Bank, Intergovernmental Panel on Climate Change, Amnesty International and more. Second, we will critically evaluate the successes and failures of these organizations and explore the possibilities for improving democratic governance at the global level.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences

AS.190.227. U.S. Foreign Policy. 3.00 Credits.
This course will provide and analysis of US foreign policy with a focus on the interests, institutions, and ideas underpinning its development. While the course will offer a broader survey, the emphasis will be on important developments during the Cold War, such as the articulation of containment strategies and nuclear deterrence, and the analysis of contemporary foreign policy questions, including the problems of terrorism and failed states. In addition to security issues, attention will also be paid to significant developments in international trade policy.
Instructor(s): S. Schmidt
Area: Social and Behavioral Sciences

AS.190.228. The American Presidency. 3.00 Credits.
This course is an introduction to the study of the presidency. It assumes a basic understanding of the American political system as provided in a course such as Introduction to American Politics or its equivalent. We explore the evolution of the modern presidency, how contemporary presidents operate in the political system, and the sources of successful presidential leadership.
Instructor(s): A. Sheingate
Area: Social and Behavioral Sciences

AS.190.256. Comparative Political Behavior. 3.00 Credits.
An introduction to the study of political behavior, emphasizing electoral behavior in democratic countries.
Instructor(s): R. Katz
Area: Social and Behavioral Sciences
Writing Intensive.
Area: Social and Behavioral Sciences
Instructor(s): P. Brendese

AS.190.284. Classics of Political Theory: Political Freedom. 3.00 Credits.
This course investigates core questions of what constitutes political freedom, what limits on freedom (if any) should be imposed by authority, and the relationship between freedom, responsibility and political judgment. Spanning texts ancient, modern and contemporary, we shall investigate how power inhabits and invigorates practices of freedom and consent. Among the questions we will consider: Can we always tell the difference between consent and coercion? Are morality and freedom incompatible? Is freedom from the past possible? By wrestling with slavery (freedom's opposite) we will confront the terrifying possibility that slavery can be both embodied and psychic. If our minds can be held captive by power, can we ever be certain that we are truly free? The political stakes of these problems will be brought to light through a consideration of issues of religion, gender, sexuality, civil liberties, class and race.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.266. Religion, Economics and Terror. 3.00 Credits.
This course will engage a series of questions about how religion and fear are used as tools of political power that shape human values and desires in an age of neoliberal capitalism.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.280. Political Persuasion. 3.00 Credits.
An introduction to Euro-American political thought, with a focus on the role of language, rhetoric, and Eros within politics. Texts by Plato, Machiavelli, Hobbes, Walt Whitman, and Emma Goldman.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.281. Virtue, Labor, and Power (Classics of Political Thought II). 3.00 Credits.
This is not a class in the history of political thought. Instead, it is an opportunity for a selective, circumscribed, but very focused engagement with some of the most powerful and provocative texts in that history. We will read selections from six thinkers (Socrates, Machiavelli, Locke, Marx, Nietzsche, and Foucault), focusing on three themes (Virtue, Labor, and Power). These texts have all profoundly shaped the way we think about politics, and they are texts that resonate with our own political problematics today.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences.

AS.190.282. Authority and Liberty (Classics of Political Thought III). 3.00 Credits.
Beginning with Plato, and using Nietzsche's history of metaphysics as a guide, this course serves as an introduction to Euro-American political thought by analyzing the philosophical foundations of political authority. In addition to works by Plato and Nietzsche, readings will include works by Kant, Mill, Hart, and Foucault.
Instructor(s): J. Culbert
Area: Social and Behavioral Sciences.

AS.190.283. The Politics of Memory (Classics of Political Thought IV). 3.00 Credits.
Was George Orwell right that those who control the past control the future—and those who control the present control the past? This is a course on the politics of memory: how political power shapes what is available to be remembered, the timing, spaces, and occasions of commemoration, and who is permitted to invoke (or disavow) the past. We will engage a range of highly contested works of ancient, modern and contemporary political theory to investigate how the past might haunt present day politics through memories that are conscious and unconscious. The themes we will take up include: the correspondence between memory and freedom; whether we ever be free given that we are creatures endowed with memory, whether it is sometimes politically necessary (or even possible) for people to forget, and what politics of memory emboldens, or threatens, democracy. There are no prerequisites for this course.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.300. Class Politics. 3.00 Credits.
Focuses on theoretical approaches to global political economy; institutions of governance of the global political economy; flows of goods, services, capital, and information; and transborder problems. Recommended Course Background: AS.190.209
Prerequisites: Not open if you have previously taken AS.190.216
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.301. Global Political Economy. 3.00 Credits.
Examines the intersection of politics and economics in global affairs. Focuses on theoretical approaches to global political economy; institutions of governance of the global political economy; flows of goods, services, capital, and information; and transborder problems. Recommended Course Background: AS.190.209
Prerequisites: Not open if you have previously taken AS.190.216
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.302. How to be a Capitalist. 3.00 Credits.
Everyone usually assumes that they know what capitalism is and how it works. Yet some of us often make very poor choices given the framework of a capitalist system, and many of us continually express shock and outrage over outcomes and results that are perfectly reasonable (and to be expected) given the operation of capitalism. This advanced seminar will engage with readings in political theory and political economy that explore the fundamental logic of capitalism. Previous course in Political Theory or Instructor's Permission.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.304. Constructivism: How Ideas Shape International Relations. 3.00 Credits.
In this course we will explore the power of culture, symbols, and values in global politics. We will achieve a deep understanding of constructivist theories by way of their important contributions to the study of historical change, war and peace, ethnic and religious conflict, international economics, human rights, environmental politics, and global justice movements.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences
Writing Intensive.
AS.190.306. The Political Economy of European Union. 3.00 Credits.
The existence of the European Union has come to profoundly shape the governance of Europe's national economies. In the context of a rapidly changing global economy, the EU has helped its member states to modernize their economies. At the same time, the EU has become the locus of important problems and tensions, as the eurozone crisis vividly illustrates. Going back to the foundation of the European Union, this course will survey developments in the political economy of the EU and put them in theoretical perspective. Instructor(s): N. Jabko
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.307. Race, Politics and Literature. 3.00 Credits.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.308. Democracy and Dictatorship: Theory and Cases. 3.00 Credits.
The course will cover three topics: 1) The conceptualization of political regime, democracy and authoritarianism. We will also consider neighboring concepts of other macro-political structures—government, state, and administration—in order to be able to demarcate what is distinctive about the study of political regimes. 2) The characterization of political regimes in most Western and some non-Western Countries, in history and today. We will centrally focus on the so called "Waves of Democratization," but we will also consider stories with less happy outcomes, that is, processes that lead to the breakdown of democracies and the installation of repressive dictatorships. 3) The explanation(s) of the stability and change of political regimes around the world. Theoretical accounts of regime change come in many flavors—emphasis on economic versus political causes, focus on agents and choices versus structures and constraints, international versus domestic factors, among others. We will consider most of them. Instructor(s): S. Mazzuca
Area: Social and Behavioral Sciences.

AS.190.309. The Political Economy of Order and Prosperity. 3.00 Credits.
The course offers an introduction to the relation between politics and economics in the long run by focusing on the interaction between order and prosperity. A central topic is the effects of macro-political institutions, like types of regime and state, on the capacity of societies to generate wealth and redistribute it. The course will also examine the political impact of economic performance across countries, for instance: how do economic booms and recessions affect democratic governance? The course provides the essential conceptual and theoretical tools for the analysis of political economy processes and outcomes. Instructor(s): S. Mazzuca
Area: Social and Behavioral Sciences.

AS.190.310. Disposable People: Race, Immigration and Biopolitics. 3.00 Credits.
This course will explore theories and practices of race and immigration in order to illuminate the proliferation of populations regarded as disposable in contemporary politics. We will pay special attention to the contestable criteria used to determine eligibility for membership in the human race. We shall also examine how political power influences the relays between citizenship status and those whose lives are worthy of protection, and those who should be allowed to die. Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.311. Dreams of America. 3.00 Credits.
An exploration of recurrent themes and aspirations in American political thought, focused around three (interconnected) versions of the American dream: Tabula Rasa, Upward Mobility, and Landed Independence. Instructor(s): J. Bennett
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.312. Struggles for Democracy: from the French Revolution to the Arab Spring. 3.00 Credits.
This course is a systematic introduction to theories of regime change, which includes episodes of democratic transitions (gradual or revolutionary) and breakdowns, as well as trajectories of regime stability, like the persistence of various types of authoritarian rule and democratic polities. Two thirds of the course will cover theories, which in comparative politics are mostly inductive constructions from historical experiences. The remaining third will be case studies of exemplary events and processes, for instance, the differentiation of political regimes in post-WWI Europe in terms of liberal, fascist, and social-democratic regimes; the convergence towards democracy in Western Europe and Latin America between 1950 and 1990, and the fragility of democracy in Tropical Africa and the Middle East. Instructor(s): S. Mazzuca
Area: Social and Behavioral Sciences.

AS.190.313. Race and Segregated Time. 3.00 Credits.
This course explores how time, and not just space, is segregated along racial lines. We shall examine how racial injustices are experienced as impositions on human time, how resistance to racial inequality has often been figured in temporal terms, and what it means to think in untimely ways that challenge how the extended lifespans of racially dominant groups is contingent upon the foreshortened lifetimes of racial others. Readings will bring political theory into contact with contemporary experiences of race, such as: criminal (in)justice, environmental racism and the proliferation of human disposability. Recommended Course Background: One Political Theory course. Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.314. Political Monsters. 3.00 Credits.
This undergraduate seminar in political theory will explore the politics of fear through the trope of political monsters. We will engage with the genre of horror as a political genre, and ask why our current time period seems to be marked by particular sorts of monsters – zombies, vampires, and others. The course will engage with a variety of texts (political tracts, literary and other fictional projects, theoretical works) along with film and television and other media. The trope of political monsters will be the vehicle through which we explore the politics of democracy, of race, of colonialism, and of capitalism. Instructor(s): P. Brendese; S. Chambers
Area: Social and Behavioral Sciences.

AS.190.315. Politics Of East Asia. 3.00 Credits.
Examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. Topics include state-society relations, late development, nationalism, democratization, political culture, social movements, and globalization. Instructor(s): E. Chung
Area: Social and Behavioral Sciences.
AS.190.323. Introduction to International Law. 3.00 Credits.
A limited survey of international law, its sources, and uses in international relations. It has five basic aims: 1) to explore the place, origins and changing contexts of international law and its instrumentality in international life; 2) to examine the sources of personalities and institutions that influence its development; 3) to survey select international legal dispositions concerning the peaceful resolutions of conflict and the immunities that apply to certain legal subjects; 4) to examine the immunities that apply to certain legal subjects; 5) to examine differing views on the future of international law in light of recent events.
Instructor(s): S. Grovogui
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.324. The Constitution and the Criminal Justice System. 3.00 Credits.
Explores how the Constitution has shaped the theory and practice of the American criminal justice system, including arrests, searches and seizure of evidence, interrogation, prosecution, adjudication and plea bargaining, and sentencing. What is a fair trial? What is due process? What is equality before the law? What are the limits of capital punishment?
Instructor(s): L. Foley
Area: Social and Behavioral Sciences.

AS.190.325. American Constitutional Law. 3.00 Credits.
This course covers enduring debates about the way the Constitution has structured the U.S. government and about which powers the Constitution assigns to the federal government and to the states. We will examine these debates in the context of American political history and thought by studying the writings of prominent participants, and landmark Supreme Court cases.
Instructor(s): E. Zackin
Area: Social and Behavioral Sciences.

AS.190.326. Democracy And Elections. 3.00 Credits.
An examination of most aspects of democratic elections with the exception of the behavior of voters. Topics include the impact of various electoral systems and administrative reforms on the outcome of elections, standards for evaluations of electoral systems, and the impact of the Arrow problem on normative theories of democratic elections.
Instructor(s): R. Katz
Area: Social and Behavioral Sciences.

AS.190.327. Global and Local Politics of Information. 3.00 Credits.
Considers global and comparative politics of information, information technologies, and the Internet. Examines governance of information (ownership of information, rights to information, privacy) and governance of information technologies (domain names, social media websites, etc.). Students who previously took AS.190.327 Politics of Information may not take this course.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.328. Constitutional Law. 3.00 Credits.
This course introduces students to the major debates and issues of postwar Japanese politics. Topics include nationalism, electoral politics, civil society, and immigration.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.329. National Security-Nuclear Age. 3.00 Credits.
This course examines the impact of weapons of mass destruction on international politics with an emphasis on security issues. The first half of the course focuses on the history of nuclear weapons development during the Cold War and theories of deterrence. The second half of the course considers contemporary issues including terrorism, chemical and biological weapons, ballistic missile defense and proliferation.
Requirements include a midterm, final and a ten page paper.
Instructor(s): S. David
Area: Social and Behavioral Sciences.

AS.190.330. Japanese Politics. 3.00 Credits.
This course introduces students to the major debates and issues of postwar Japanese politics. Topics include nationalism, electoral politics, civil society, and immigration.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.331. Comparative Racial Politics. 3.00 Credits.
Students will learn to utilize qualitative, interpretive methods of comparative politics to examine dynamics of racial and/or ethnic politics in the nation-states of Cuba, Brazil, Britain and France, Germany, and the United States. Readings will emphasize the role of the state, political economy, national culture, racist ideologies and anti-racist politics in the formation, maintenance and transformation of conditions of race-based inequalities. Students will also become familiar with theories and concepts of race and ethnicity, and the histories of social movements in the aforementioned societies founded, in part, on racial and/or ethnic identification as a response to inequality. Formerly titled: Race and Racism in Comparative Perspective.
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.

AS.190.332. Research Seminar: Great Constitutional Issues. 3.00 Credits.
An exploration of free speech, privacy, and equality issues through readings, discussion, and student research.
Instructor(s): J. Grossman
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.333. American Constitutional Law. 3.00 Credits.
The second semester of a two semester course. Topics include executive and emergency power, racial and gender equality, and selected free speech and religious freedom issues.
Prerequisites: AS.190.333
Instructor(s): E. Zackin
Area: Social and Behavioral Sciences.

AS.190.334. Constitutional Law. 3.00 Credits.
The second semester of a two semester course. Topics include executive and emergency power, racial and gender equality, and selected free speech and religious freedom issues.
Prerequisites: AS.190.333
Instructor(s): E. Zackin
Area: Social and Behavioral Sciences.

AS.190.335. Imagining Borders. 3.00 Credits.
What is a border and why do borders matter in global politics. What do borders mean under conditions of globalization? An examination of the politics of borders, transborder flows, and networks within and across borders. The readings which come from political science and other disciplines, will include theoretical and case-specific works.
Instructor(s): R. Marlin-Bennett
Area: Social and Behavioral Sciences.

AS.190.336. The Constitution and the Criminal Justice System. 3.00 Credits.
Explores how the Constitution has shaped the theory and practice of the American criminal justice system, including arrests, searches and seizure of evidence, interrogation, prosecution, adjudication and plea bargaining, and sentencing. What is a fair trial? What is due process? What is equality before the law? What are the limits of capital punishment?
Instructor(s): L. Foley
Area: Social and Behavioral Sciences.

AS.190.337. The Constitution and the Criminal Justice System. 3.00 Credits.
Recommended Course Background: AS.190.214
Instructor(s): L. Foley
Area: Social and Behavioral Sciences.

AS.190.338. American Racial Politics. 3.00 Credits.
Recommended Course Background: AS.190.214
Instructor(s): L. Foley
Area: Social and Behavioral Sciences.

AS.190.339. American Racial Politics. 3.00 Credits.
Recommended Course Background: AS.190.214
Instructor(s): L. Foley
Area: Social and Behavioral Sciences.
AS.190.340. Black Politics I. 3.00 Credits.
This course is a survey of the bases and substance of politics among black Americans and the relation of black politics to the American political system up to the end of Jim Crow. The intention is both to provide a general sense of pertinent issues and relations over this period as a way of helping to make sense of the present and to develop criteria for evaluating political scientists’ and others’ claims regarding the status and characteristics of black American political activity.
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.

AS.190.341. Korean Politics. 3.00 Credits.
This course introduces students to the historical and institutional foundations of modern South Korean politics. Topics include nationalism, political economic development, civil society, globalization, and ROK-DPRK relations. (CP)
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.342. Black Politics II. 3.00 Credits.
Recommended Course Background: AS.190.340.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.343. Nationalism. 3.00 Credits.
Despite the clamor over globalization and regionalization in the contemporary world, nationalism remains a central preoccupation for both political actors and students of politics. Though motivated by questions resonant within the discipline of political science (and the field of comparative politics in particular), this course is designed to familiarize students with key texts and debates in the literatures on nationalism in political science, sociology, history and anthropology. The objective of this course is to provide students with a comprehensive overview of major themes, scholarly approaches and forms of nationalist mobilization in national and cross-spatial perspective. Some of the questions to be addressed in this course are a) what are the roots and routes of nationalism? b) who are nationalist political actors, and where do they come from? c) what is nationalism’s relation to race, racism and ethnicity? d) what is the relationship between various forms of nationalism and contemporary considerations of regionalism and globalization?
Instructor(s): M. Hanchard
Area: Social and Behavioral Sciences.

AS.190.344. Seminar In Anti-Semitism. 3.00 Credits.
Jews exercise a good deal of power in contemporary America. They are prominent in a number of key industries, play important roles in the political process, and hold many major national offices. For example, though Jews constitute barely two percent of America’s citizens, about one-third of the nation’s wealthiest 400 individuals are Jewish and more than ten percent of the seats in the U.S. Congress are held by Jews. One recent book declared that, “From the Vatican to the Kremlin, from the White House to Capitol Hill, the world’s movers and shakers view American Jewry as a force to be reckoned with.” Of course, Jews have risen to power in many times and places ranging from the medieval Muslim world and early modern Spain through Germany and the Soviet Union in the 20th century. In nearly every prior instance, though, Jewish power proved to be evanescent. No sooner had the Jews become “a force to be reckoned with” than they found themselves banished to the political margins, forced into exile or worse. Though it may rise to a great height, the power of the Jews seems ultimately to rest on a rather insecure foundation. Cross-listed with Jewish Studies.
Instructor(s): B. Ginsberg
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.345. Politics of Health Policy. 3.00 Credits.
Traces the evolution of the American Health care system, emphasis on the political forces that shape public and private provision of health care in the United States.
Instructor(s): P. Longman
Area: Social and Behavioral Sciences.

AS.190.346. Power and Democracy in the American City. 3.00 Credits.
How do race and class intersect to shape how democracy works in American cities? In this innovative course students will learn about urban citizenship, authority, and activism using Baltimore as a case. The class, co-taught with Baltimore organizers, will use a community based learning approach.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.347. Black Politics: Black Lives Matter. 3.00 Credits.
Over the past two years the #blacklivesmatter movement has transformed the discussion about policing in American cities. In this course we will examine the broad movement against police brutality through the lens of black politics.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.348. Pluralism. 3.00 Credits.
This seminar will explore the theory and politics of pluralism: from European debates over religious tolerance to American debates over constitutional founding; from liberal political philosophy to radical democracy. Authors may include Bentley, Dahl, Locke, Madison, Ranciere, Rawls, Young. Recommended Course Background. Previous course in political theory or permission of instructor.
Instructor(s): S. Chambers
Area: Social and Behavioral Sciences.
AS.190.380. The American Welfare State. 3.00 Credits.
This course analyzes the distinctive US welfare state in historical and comparative perspective. We begin with a survey of the policy context, an historical overview from the poorhouses through the Great Society, and a tour of welfare states across the rich democracies. We then survey developments — and explain the actual workings of policy — across jobs, education, welfare, pensions, and health care. We explore the institutional and political factors behind their divergent trajectories through conservative revival and the age of Obama. Students will write a seminar paper exploring policy development over time in a program or area of their choosing. Enrollment restricted to Social Policy minors only.
Prerequisites: AS.360.380
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.381. Global Environmental Politics. 3.00 Credits.
Instructor(s): B. Allan
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.382. Democracy and Development: Theory and Cases. 3.00 Credits.
Most wealthy countries are democracies. But not all democracies are wealthy—India, Costa Rica, and Mongolia are prominent examples of poor countries with democratic regimes. The course will examine the relation between economic development and political democratization under three big questions. (a) Under what conditions, and through which mechanisms, does economic development promote democracy? (b) If economic development is not possible in the foreseeable future, how do countries achieve stable democratization? (c) Under what conditions, and through which mechanisms, does democracy foster economic development?
Instructor(s): S. Mazzuca
Area: Social and Behavioral Sciences.

AS.190.383. Baltimore Food System Research. 3.00 Credits.
This course examines the political, social, and economic aspects of the Baltimore food system. Through a mixture of in-class study and hands-on research, students learn about the challenges to healthy eating in Baltimore and some recent innovations designed to improve health and nutrition in the city. Visits to a soup kitchen, an urban farm, and local farmers market will inform a collaborative project using various social science research methods learned in class.
Instructor(s): A. Sheingate; M. Crenson
Area: Social and Behavioral Sciences.

AS.190.384. Urban Politics & Policy. 3.00 Credits.
An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross-listed with Africana Studies
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.385. Urban Politics and Policy. 3.00 Credits.
An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross-listed with Africana Studies.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.387. Parties and Elections in America. 3.00 Credits.
Considers how parties and elections structure political conflict, and facilitate (or not) democratic control of government. Topics include campaigns, voting behavior, election administration, money in politics, presidential nomination, and party coalitions.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.391. Time to Kill: Race, Punishment, Death and Desire. 3.00 Credits.
This course examines the role of race in determining who deserves to be punished, the timing and occasions of punitive action and how long punishment should endure. Key to our inquiry is how racialized presumptions about human desire might justify punitive logics of power. The class explores inequalities in the distribution of punishment and death in order to illuminate how race shapes questions of whose time is more valuable, who lives and who dies, and ultimately whose lives count as human.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.392. Introduction to Latin American Politics. 3.00 Credits.
Instructor(s): M. Keck
Area: Social and Behavioral Sciences.

AS.190.393. Theories of Constitutional Interpretation. 3.00 Credits.
In this course, we will read and discuss a variety of arguments about how best to interpret constitutional texts, with particular attention to debates about the U.S. Constitution. The course will also cover debates about the role of ordinary people, legislatures, and judges in determining the content of constitutional law.
Instructor(s): E. Zackin
Area: Social and Behavioral Sciences.

AS.190.394. Comparative Politics of the Middle East and North Africa. 3.00 Credits.
This course examines the domestic, regional, and transnational politics of the Middle East and North Africa. The class is organized into three units. The first examines major armed conflicts— anti-colonial, intra-state, and inter-state—from 1948 through the 1990s. It uses these historical moments as windows onto key issues in Middle Eastern and North African political issues such as external intervention/occupation, human rights, sectarianism, social movements, and memory politics. Unit Two focuses on policy relevant issues such as democratization, minority populations, religion and politics, and gender. In Unit Three, students will explore the politics of the Arab Uprisings through critical reading and discussion of new (post-2011) scholarship on MENA states, organizations, and populations.
Instructor(s): S. Parkinson
Area: Social and Behavioral Sciences.
AS.190.395. Crime and Society. 3.00 Credits.
