Welcome to the 2017-2018 academic catalog for the Johns Hopkins University full-time undergraduate and graduate programs in the Zanvyl Krieger School of Arts and Sciences and the G.W.C. Whiting School of Engineering. This catalog contains information about academic and student life programs and policies. It also includes links to external websites; these are provided as a convenience to the reader and the content contained therein is not part of the catalog.

The University reserves the right to change without notice any programs, policies, requirements, or regulations published in this catalog. The catalog is not to be regarded as a contract.

About the Catalog

The Johns Hopkins University is accredited by The Middle States Association of Colleges and Schools, Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104-2680.

The following Bachelor of Science programs in the Whiting School of Engineering are accredited by the Engineering Accreditation Commission of ABET: Biomedical Engineering, Chemical and Biomolecular Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics, Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering.

The Bachelor of Science program in Computer Science is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

### Notes on the Degrees

1. Candidates for the master's as a terminal degree are accepted, but financial aid generally is not available.
2. Candidates for the master's as a terminal degree may be accepted in special cases, but financial aid generally is not available.
3. Candidates are admitted to the Ph.D. program only, but the M.A. is awarded to students who (a) complete one year of courses, pass an examination in one foreign language, and submit an acceptable master's essay to a member of the faculty or (b) complete two years of courses and pass an examination in two foreign languages.
Candidates for the master’s as a terminal degree are not accepted. However, a student is awarded a master’s degree en route to the Ph.D. after the successful completion of the Graduate Board oral examination.

A master of science in engineering or a master of materials science and engineering are offered.

See department listing.

M.S. available only to Arts and Sciences baccalaureate students.

M.A. only.

B.A. only.

B.A. or B.S. available.

Candidates are admitted to the Ph.D. program only, but the M.A. is awarded to students who complete requirements set by the director of graduate studies.

Applicants must currently be JHU undergraduate.

Within the Department of Biomedical Engineering.

Within the Department of Applied Mathematics and Statistics.

Within the School of Medicine.

Master’s degree awarded by the School of Advanced International Studies.

Master’s degree awarded by the School of Public Health.

Qualified Undergraduates from any AS or EN program are eligible to apply.

Area of Concentration

Minors

Part-time Graduate Programs in Arts and Sciences and Engineering

Advanced Academic Programs

Drawing upon over a century of research and teaching expertise, the Krieger School of Arts and Sciences Advanced Academic Programs offers advanced instruction in scientific fields of current interest and innovative graduate study in the humanities and social sciences. While based on the latest scientific and scholarly knowledge, course work emphasizes the application of such knowledge to practical problems. Classes are designed to provide individual attention, relevant application, and to encourage student contribution.

Courses are offered on a part-time basis at the Homewood campus in Baltimore; the Montgomery County Campus in Rockville, MD; the Arts and Sciences Washington Center in Washington, D.C.; and online. Most degree programs in AAP may be completed partially or fully online.

The School of Arts and Sciences recognizes the intellectual strength and education requirements of working adults and offers master’s degrees through the Advanced Academic Programs. Students can earn their master’s degree in:

- Applied Economics
- Bioinformatics
- Biotechnology
- Biotechnology Enterprise and Entrepreneurship
- Communication
- Energy Policy
- Environmental Sciences and Policy
- Geographic Information Systems
- Government
- Global Security Studies
- Liberal Arts
- Museum Studies
- Public Management
- Regulatory Science
- Science Writing
- Writing

There are also a variety of certificates and concentrations from which to choose, including certificates in:

- Biotechnology Education
- Biotechnology Enterprise
- Geographic Information Systems
- National Security Studies
- Nonprofit Management
- Post-master’s Certificate in Sequence Analysis and Genomics
- Health Science Intensive Concentration
- AAP also has a number of dual MBA programs with the Carey Business School.

Further information, admission details, and catalogs may be obtained by phone (202) 452-1940, email toAAPadmissions@jhu.edu, or by visiting advanced.jhu.edu.

Johns Hopkins Engineering for Professionals

Engineering began at Hopkins in 1913, when university leaders decided to establish a curriculum that focused on professional education but included significant exposure to the liberal arts and scientific inquiry. Fostering interdisciplinary creativity, this unique approach to engineering education was in turn emulated by many engineering schools throughout the United States.

Over the intervening decades, thousands of working engineers and scientists earned engineering degrees at Hopkins through part-time study, achieving professional goals without interrupting their careers. That tradition continues today through the Whiting School’s Engineering for Professionals program, which offers part-time graduate courses in 15 disciplines that address industry trends and the latest advances in engineering and applied science. Classes are scheduled at convenient times during late afternoons and evenings and on Saturdays at campuses throughout the Baltimore-Washington region, including Aberdeen, Baltimore, Elkridge, Laurel, Rockville, Southern Maryland, Washington, D.C., and Crystal City, VA. Courses are also available online. Depending on their academic program, students earn either a master’s
degree or a graduate or postgraduate certificate upon completing their studies.

Further information, applications, and catalogs may be obtained by calling 1-800-548-3647; visiting ep.jhu.edu; or writing to Johns Hopkins Engineering for Professionals, 6810 Deerpath Road, Suite 100, Elkridge, MD 21075. Email inquiries may be sent to jhep@jhu.edu.

**Advanced Degree Programs in Other Hopkins Divisions**

**Carey Business School**

**Master of Business Administration Degrees (full-time)**
- Johns Hopkins Global MBA
- Master of Business Administration/Master of Public Health

**Master of Business Administration Degrees (part-time)**
- Executive MBA
- Flexible MBA

**Master of Science Degrees**
- Enterprise Risk Management (part-time)
- Finance (full- and part-time)
- Health Care Management (part-time)
- Marketing (full- and part-time)
- Real Estate and Infrastructure (full- and part-time)

**Joint and Dual Degrees (part-time)**
- Master of Business Administration/Master of Science in Nursing
- Master of Business Administration/Master of Arts in Communication
- Master of Business Administration/Master of Arts in Government
- Master of Business Administration/Master of Science in Biotechnology
- MBA/Master of Environmental Engineering
- MBA/MS in Environmental Engineering and Science
- MBA/MS in Environmental Planning and Management
- MBA/MS in Design Leadership

**Graduate Certificate Programs**
- Financial Management
- Investments

**School of Education**

**Master of Arts in Teaching**
- Elementary Education
- Secondary Education

**Master of Education**
- Health Professions

**Master of Science in Education**
- Educational Studies
- Reading
- School Administration and Supervision
- Technology for Educators

**Master of Science in Special Education**
- Early Childhood Special Education
- General Special Education Studies
- Mild to Moderate Disabilities (Elementary/Middle, Secondary/Adult, Differentiated and Inclusive Education)
- Severe Disabilities
- Technology in special Education

**Master of Science in Counseling**
- Mental Health Counseling
- School Counseling

**Graduate Certificate Programs in Education**
- Adolescent Literacy Education
- Advanced Methods for Differentiated Instruction and Inclusive Education
- Applied Behavior Analysis* (pending approval)
- Assistive Technology
- Data-based Decision making and Organizational Improvement
- Applied Behavior Analysis* (pending approval)
- Assistive Technology
- Data-based Decision Making and Organizational Improvement
- Early Intervention/Preschool Special Education Specialist
- Earth/Space Science
- Education of Students with Autism and Other Pervasive Developmental Disorders
- Education of Students with Severe Disabilities
- Educational Leadership for Independent Schools
- Effective Teaching of Reading
- Emergent Literacy Education
- English as a Second Language (ESL) Instruction
- Evidence-Based Teaching in the Health Professions*
- Gifted Education
- K-8 Mathematics Lead-Teacher Education
- K-8 Science Lead-Teacher Education
- K-8 STEM (Science, Technology, Engineering, Mathematics) Lead-Teacher Education
- Leadership for School, Family, and Community Collaboration
- Leadership in Technology Integration
- Mental Health Counseling*
- Mind, Brain, and Teaching
- Online Teaching and Learning for Adults
- School Administration and Supervision
- Teacher Leadership: Instructional Leadership in School Settings
- Teaching the Adult Learner
- Urban Education

**Certificate of Advanced Graduate Study**
- Counseling

**Online Doctor of Education (Ed.D.) (pending approval)**
**Doctor of Philosophy in Education (Ph.D.)**
- Division of Public Safety Leadership
- Master of Science in Management
- Master of Science in Intelligence Analysis

**School of Public Health**

**Master of Public Health**
- School wide degree program

**Master of Health Administration**
- Health Policy and Management

**Master of Health Science**
- Biochemistry and Molecular Biology
- Biostatistics
- Environmental Health Sciences
- Epidemiology
- Graduate Training Program in Clinical Investigation
- Health Behavior and Society
- Health Policy and Management

Biomedical Engineering
Program in Molecular Biophysics

**Master of Science**
Applied Health Sciences Informatics
Health Sciences Informatics
Master of Arts
Medical and Biological Illustration
Certificate Program
Certificate in Health Sciences Informatics

**Master of Arts**
Medical and Biological Illustration

**Certificate Program**
Certificate in Health Sciences Informatics

* Open only to students with master's degrees.
UNDERGRADUATE STUDENTS

The policies, procedures, resources, and opportunities included in this section are relevant for undergraduates enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering on the Homewood campus. Please use the links at the left to navigate to your topic of interest.

Admissions and Finances

Every year the Office of Undergraduate Admissions enrolls a freshman class of approximately 1,300 men and women from all over the United States and many countries. In addition to first-year students, transfer students are also welcomed each fall to the Homewood campus from other colleges and universities.

The admissions committee looks for students who will thrive as Johns Hopkins undergraduates. As part of a holistic review process, intellectual interests, academic performance and character, and personal contributions are important components of the application evaluation. A student’s intellectual curiosity, seriousness of purpose, and range of extracurricular activities and leadership are considered as well as scholastic record, aptitude test results, essays, and recommendations.

More information about the undergraduate admissions process can be found at apply.jhu.edu.

Financial Services

Johns Hopkins is dedicated to enrolling the strongest students each year, and it’s our goal to enable students to make their college decision without being limited by their family financial circumstances. The Office of Undergraduate Admissions and the Office of Student Financial Services are dedicated to meeting 100% of calculated financial need for all admitted students.

Financial aid advisers in the Office of Student Financial Services are always available to guide you through the process. Reach them at 410-516-8028 or fin_aid@jhu.edu for more information.

Visit the Office of Student Accounts website (https://studentaffairs.jhu.edu/student-accounts/tuition-fees) for the fall and spring semester tuition refund policy and deadlines.

The tuition refund policy and deadlines for summer courses are posted on the Summer Programs website (http://pages.jh.edu/summer).

Veterans Educational Benefits

Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans, service members, eligible spouses and dependents under the provisions of the various federal laws pertaining to veterans’ educational benefits. Information about veterans’ benefits and enrollment procedures may be obtained at https://studentaffairs.jhu.edu/registrar/veterans/ or the Office of the Registrar, 75 Garland Hall, 410-516-6635.

Initial Enrollment

Once admitted to the university, the student must complete an Application for Program of Education or Training (VA Form 22-1990) from the Department of Veteran Affairs (https://benefits.va.gov/gibill). A copy of the Certificate of Eligibility, along with a copy of the DD-214, is sent to the Veterans Desk, Office of the Registrar, 75 Garland Hall, Johns Hopkins University, Baltimore, Maryland 21218. Additional delivery options can be found at https://studentaffairs.jhu.edu/registrar/veterans/. The student who is transferring from another university or college will need to obtain a Request for Change of Place of Training (VA Form 22-1995) from the Department of Veteran Affairs (https://benefits.va.gov/gibill). The completed form should be submitted to the VA, and a copy sent to the Veterans Desk at the university.

Re-enrollment

Students who received veterans’ benefits at the university the preceding semester and plan to enroll with no change of objective should inform the Veterans Desk at the time of registration that they want to be recertified under the provisions of their original VA Form 22-1990.

Students receiving veterans’ benefits must take courses that lead toward the exact objective (usually a specific degree) on the original VA application. Otherwise, they must submit a Request for Change of Program (VA Form 22-1995). Students utilizing veterans’ benefits must let the registrar know immediately of any change in their program or status that might affect the amount of their VA payment. If they fail to do so, the Department of Veterans Affairs will seek reimbursement from the student for any overpayment.

Standards of Progress

Continuation of VA payments depends on the student’s meeting the university’s academic standards for all students. The student must also meet any standards of progress which may be established by VA regulations.

The College Navigator Tool

Veteran students may go to the College Navigator (http://nces.ed.gov/collegenavigator) to access a school comparison tool.

Academic Policies

The Krieger School of Arts and Sciences and the Whiting School of Engineering offer myriad opportunities for intellectual exploration, academic challenge, and personal growth. To satisfy your academic goals and assure your progress toward graduation, take action and responsibility for the following:

• Seek advice from multiple faculty and other university professionals.
• Meet with your assigned advisor at least once a semester.
• Learn the information contained within this online catalog. Failure to do so does not excuse you from responsibility for the rules and procedures.
• Track your completion of your degree requirements.
• Consult your advising office and your major department about any questions concerning academic policy.

All students are expected to observe the academic policies and practices of the university; personal difficulties, illness, and/or advice contradicting the rules and procedures does not constitute automatic grounds for exemption from these rules or procedures. Written requests for exceptions must be submitted to the student’s academic advising office. After review, a student will be notified whether the exception is approved.

The University reserves the right to change rules, procedures and other information within the catalog as appropriate. This catalog is not to be
 gaat als een contract. Als u vragen heeft, neem dan contact op met uw medische school of adviseur.

**Requirements for a Bachelor's Degree**

De informatie hieronder doet de vereisten voor studenten die aan JHU deel uitmaken dat in de herfst van 2014 of later. Studenten die aan JHU deel uitmaken dat in de herfst van 2014 moeten het archiefcatalogus vinden (http://e-catalog.jhu.edu/archive/2017-18/archive).

Er zijn vijf categorieën van graadvereisten die samen een onderwijsgraad aan Hopkins vormen:

1. **Total degree credit requirement** (varies from 120-129)
2. **Residency requirement** (minimum 100 JHU credits for freshmen)
3. **Distribution requirements**
4. **Writing requirement**
5. **Departmental major requirements** (and minor requirements, if applicable)

Alle goedgekeurde credit points die worden verdiend in exams of bij andere colleges en universiteiten kunnen worden gebruikt om vereisten in gebieden 3-5 aan te vullen: distribution requirements, de writing requirement (volgens de procedures gedefinieerd door het Writers Center [http://krieger.jhu.edu/ewp/writing-requirement]), departementale major en minor vereisten, en het voldoen aan voorwaarden.

De **total degree credit requirement** (vereiste 1) wordt geconsiderd als een variabele graadvereis en varieert tussen 120-129 credits, afgezien van de graad. Dit is niet een eindige som van cursussen om te voldoen aan vereisten van gebieden 3-5. Omdat studenten die de universiteit direct vanuit de havo of vwo moeten deelnemen aan 100 JHU credits (vereiste 2), is er een efficiënte limiet op hoeveel exam credits en transfer credits kan worden gelijke aan de vereisten voor de **total degree credit requirement** (vereiste 1).

Voor een graad die 120 totale credits vereist, is een maximum van 20 goedgekeurde credits van andere bronnen kan worden gelijke aan de vereisten voor de **total degree credit requirement** (vereiste 1), zelfs als meer dan 20 credits van externen bronnen zijn gebruikt om vereisten areas 3-5 aan te vullen.

Voor een student die een graad volgt waarbij de totale graad-credit vereistes 120 is. Deze student kan hebben een totaal van 32 extern credits post worden aangebracht op het transcript: 8 transfer credits van een andere universiteit en 24 AP exam credits. Alle 32 van deze credits kunnen worden toegekend aan vereisten areas 3-5. Desondanks, in het negeren de voorwaarden van de residentie vereiste (vereiste 2), alleen 20 van deze 32 credits zal de residentie vereist. Dit student wilde een graad volgen waarbij de totale graad-credit vereistes 126 is. In dit student verandert als een graad program waarbij de totale graad-credit vereistes 126 is. 26 van deze 32 credits zal de residentie vereist. Dit student verandert als een graad program waarbij de totale graad-credit vereistes 126 is. 26 van deze 32 credits zal de residentie vereist. Deze student verandert als een graad program waarbij de totale graad-credit vereistes 126 is. 26 van deze 32 credits zal de residentie vereist.

**D** Grade Restriction

University policy allows no more than 18 credits from courses with grades of D or D+ to be counted toward the credits required for graduation. Departments may set a lower limit on the number of permissible D or D+ grades for a specific major. Many departments do not accept any D or D+ credits for major requirements.

**Ten-Year Degree Completion Limit**

A student must fulfill all degree requirements for graduation within 10 academic calendar years from the date of matriculation at the university.

**Disability Support Services**

JHU welcomes students with disabilities and values their diverse experiences and perspectives. The Office of Student Disability Services (SDS) coordinates appropriate and reasonable accommodations for qualified students with disabilities in accordance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990 and the ADA Amendments Act of 2008. SDS also works with various offices on campus to ensure that students with disabilities have equal access to university programs, facilities, technology, and websites.

Students who wish to request reasonable accommodations must submit documentation that establishes a disability, details the current functional impact of that disability, and confirms the need for each accommodation requested. Documentation guidelines are available on the SDS website at [http://web.jhu.edu/disabilities/students/admitted/documentation/index.html](http://web.jhu.edu/disabilities/students/admitted/documentation/index.html).

Students seeking accommodations are encouraged to submit their specific requests at least two weeks prior to the start of the semester to ensure that accommodations are provided in a timely manner.

Full-time undergraduate and graduate students in the Krieger School of Arts and Sciences or the Whiting School of Engineering with questions and concerns regarding the registration process, implementation of accommodations and/or identification of other support services, should contact:

**Dr. Brent Mosser**, Director of Disability Support Services

Academic Support and Student Disability Services

bmosser1@jhu.edu

410-516-4720

[web.jhu.edu/disabilities](http://web.jhu.edu/disabilities)

Questions regarding JHU's documentation guidelines or physical and programmatic access at JHU should be directed to:

**Emily Lucio**, Director of ADA Compliance & Disability Services

Office of Institutional Equity

elucio2@jhu.edu

410-516-8075

[web.jhu.edu/administration/jhuoie/disability.html](http://web.jhu.edu/administration/jhuoie/disability.html)

**Degree Credit Totals**

The Bachelor of Arts degree requires 120 credits. The Bachelor of Science degree, whether in Arts and Sciences or Engineering, requires from 120 to 130 credits, depending on the major. No program may require more than 130 credits.

**Residency Requirement for Freshmen**

Students who enter the university from high school must complete at least 100 credits at JHU. This includes courses that are taken after matriculation as a degree-seeking student.
Writing Program requirement is administered by Patricia Kain, Director of the Expository and makes writing an integral part of the course. The writing-intensive then revise. A writing-intensive course guides students’ practice in writing at least one opportunity to receive their instructor’s feedback on a draft and work in written comments or in conference, or both; and students have at pages of finished writing, distributed over multiple assignments, usually the fall and spring semesters only through an approved study abroad program (up to 30 credits)

In addition, credits earned through JHU courses prior to matriculation as a degree-seeking student are applied to the 100-credit residency requirement.

Students who entered JHU prior to Fall 2014 should view the appropriate archived catalog [link](http://e-catalog.jhu.edu/archive/2017-18/archive). All students must complete a minimum of four semesters in residence as a full-time student. Students must be in residence for at least two of the final four semesters, including the final semester prior to graduation.

**Residency Requirement for Transfer Students**

Students who enter the university as transfer students must complete at least 60 credits at JHU. This includes courses that are taken after matriculation as a degree-seeking student:

- in fall, intersession, spring, or summer at JHU
- in other divisions of the university (including Advanced Academic Programs and Engineering for Professionals)
- through the Baltimore Student Exchange Program institutions during the fall and spring semesters only
- through summer and intersession study abroad programs sponsored by Hopkins departments

In addition, all transfer students must complete at least four full-time semesters in residence at JHU. Study abroad programs offered during fall and spring semesters do not count towards this four-semester requirement. Transfer students must be in residence for at least two of their final four semesters, including the final semester prior to graduation.

**Residency Requirement for Peabody Double Degree Students**

Students earning a double-degree at Peabody must complete at least 48 credits on the Homewood campus in either the Krieger School of Arts & Sciences or the Whiting School of Engineering.

**Writing Designation Requirements**

To encourage excellence in writing, across disciplines, the university requires all undergraduates to take a number of writing-intensive courses. A writing-intensive (W) course is one in which students write at least 20 pages of finished writing, distributed over multiple assignments, usually 3 or 4 papers, throughout the semester. Instructors respond to students’ work in written comments or in conference, or both; and students have at least one opportunity to receive their instructor’s feedback on a draft and then revise. A writing-intensive course guides students’ practice in writing and makes writing an integral part of the course. The writing-intensive requirement is administered by Patricia Kain, Director of the Expository Writing Program [link](http://krieger.jhu.edu/ewp).

Writing-intensive courses are indicated by a “W” in the JHU course schedule and an asterisk (*) on a student’s unofficial transcript. Courses taken to satisfy the writing requirement must be taken for a letter grade and passed with a grade of C- or better. Writing-intensive courses taken to satisfy major, minor, or distribution requirements may also count toward the writing requirement.

All students earning a degree from the School of Arts and Sciences must complete at least 12 credits in writing-intensive courses. Candidates for a B.A. degree in the School of Engineering must complete 12 credits (four courses at least 3 credits each) in writing-intensive courses, while candidates for a B.S. degree in Engineering must complete 6 credits (two courses at least 3 credits each) in writing-intensive courses. Please note, this requirement is based upon a student’s degree; students are not required to complete a separate writing requirement for any additional majors.

For information about transferring writing intensive credits to JHU, please see the External Credits [link](http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/external-credit) section of Academic Policies.

**Academic Area Designation Requirements**

The distribution requirement stipulates that students must earn a minimum number of credits in academic areas outside of their primary major. Area designators represent an association between the course and an academic area. Courses with area designators are expected to do more than employ basic techniques, they are to advance knowledge and increase a student’s understanding of the theory. Courses that are teaching a basic skill, and therefore do not expose the student to modes of analysis and scholarship that represent the essence of a given discipline, will not be assigned an area designator. If taught within a Homewood academic department, the department is responsible for assigning area designators to their courses. Courses not offered through Homewood academic departments will be reviewed by the appropriate dean’s office to review proposed designators.

The academic areas in the Hopkins curriculum are humanities (H), natural sciences (N), social and behavioral sciences (S), quantitative and mathematical sciences (Q), and engineering (E).

The area designations of courses (H, S, N, Q, and E) are included in the course information in the departmental pages [link](http://e-catalog.jhu.edu/archive/2017-18/departments-program-requirements-and-courses) of the catalog and in the online schedule of classes. The area designation also appears beside the course title on a student’s academic record. When a course has more than one area designation (HS, EN, EQ, etc.), students may use only one of the designations to satisfy the distribution requirement.

Only courses or other credit-bearing opportunities with area designations may be used to satisfy the distribution requirement. Area designators are not assigned to the following:

- Independent study
- Research
- Internships
- Music performance (unless taken as part of a music minor, in which case the course will be designated H)
- Dance performance
- Foreign language elements courses (see additional foreign language rules [link](http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/registration-policies) )
- Medical tutorials

Area designations can be assigned to courses taken elsewhere, to courses taken in other divisions of the university, or to graduate courses taken by undergraduates. These assignments are made by
the appropriate dean’s office based on the course content and the recommendations of the faculty. The most useful criteria for determining an appropriate area designator will be the course description and a similar JHU departmental offering.

The following courses at the Peabody Conservatory have H designations:

<table>

Distribution Requirement for Arts & Sciences Students

Students must earn:

• At least 9 credits in humanities
• At least 9 credits in social sciences
• At least 9 credits in natural sciences, quantitative, or engineering

These credits fulfilling the distribution requirement may overlap with major or minor requirements and the writing requirement.

In Arts and Sciences, courses taken for the distribution requirement may be taken for a letter grade or for Satisfactory/Unsatisfactory credit. Courses passed with a letter grade of D or better, or passed with a Satisfactory grade, will fulfill the distribution requirement. For any student whose first-semester grades are covered under the current first-semester grading policy, an earned D will satisfy the distribution requirement even though the grade will appear as Unsatisfactory (UCR) on the official record. Satisfactory grades (representing a C- or higher letter grade) earned in a student’s first semester at JHU will satisfy the distribution requirement if they have the correct area designations.

Students who entered JHU prior to Fall 2014 should view the appropriate archived catalog (http://web.jhu.edu/registrar/catalog).

Distribution Requirement for Engineering Students

Students earning a degree in the School of Engineering must complete the following distribution requirement:

• 18 credits (6 courses at least 3 credits each) designated H and/or S. Although language elements courses do not carry an area designator, engineering students may use these courses as substitutes for humanities courses in meeting the distribution requirement.

In Engineering, each department determines whether or not the Satisfactory/Unsatisfactory grading option will be permitted for courses used to satisfy the distribution requirement.

Completing a Major and Minimum Grade Point Average

Every student who earns a bachelor’s degree must satisfy the requirements of a major. A major is a structured curriculum, usually within the confines of a particular academic field. Generally the requirements for a major provide a student with a broad overview of the field through introductory courses, followed by more specialized courses tailored to meet the student’s interests in the field. The requirements for the major may also include courses in other disciplines that provide skills and information of importance to professionals in the major field. Courses required for the major must be taken for a letter grade and students must have a grade point average of at least 2.00 in the courses required for the major, i.e., not including elective courses or courses used only for the distribution requirement. Many majors require a grade of C- or better in required courses.

Departmental Directors of Undergraduate Studies

For every major and minor that is offered at Johns Hopkins, there is a faculty member or their designee who serves as the program’s Director of Undergraduate Studies (DUS). They are available to answer questions about their major(s) and/or minor(s). The directors also assign faculty advisors to students who declare a major or minor.

Declaring a Major in Arts and Sciences

Students who enter the Krieger School of Arts and Sciences from high school are classified as pre-majors during their freshman year. In April, freshmen in Arts and Sciences will meet with an academic advisor to declare their primary major in Arts and Sciences. To declare a major at a later time, see Changing Majors or Advisors section below. Students must declare a major by April 15th of their sophomore year in order to assure that they will complete requirements for graduation in four years.

Declaring a Major in Engineering

Students who enter the Whiting School of Engineering declare a specific engineering major on their application for admission. A student must take direct action to change the major. To change a major, see Changing Majors or Advisors section below.

Students who select the Biomedical Engineering major must be accepted into the program at the time of application for admission. The student’s offer of admission to the university will indicate either:

• acceptance into the BME program
• acceptance into any Engineering or Arts & Sciences major except BME

On a space available basis, BME may accept a limited number of students into the program at the end of the freshman year based on the overall academic credentials of each applicant. However, this option is exercised very infrequently by the BME department.

Students may also select the more general “undecided engineering” category on the admissions application to enter the Whiting School of
Engineering. It is recommended that undecided engineering students select a specific major no later than the end of freshman year.

Special Note for Freshmen
Arts and Sciences freshmen may declare second majors and minors offered through the School of Engineering beginning their freshman year until April 15th of their junior year. Engineering students may declare a second major or minor offered through either the School of Engineering or the School of Arts and Sciences beginning their freshman year until April 15th of their junior year.

Changing Majors or Advisors
Once students have declared a major, they may change their major or their faculty advisor at a later date by obtaining a Change of Major form from the Office of the Registrar or the advising offices, meeting with the appropriate person in the major to be assigned a new faculty advisor, and submitting the form to the Office of the Registrar.

Note that students may declare the BME major only at the time of application for admission to the University or as one of a limited number of students accepted into the program at the end of the freshman year based on the overall academic credentials of each applicant and on space available.

Double Majors
Students who wish to complete the requirements of more than one major are expected to declare the additional major(s) by April 15th of their junior year. Students may add or drop an additional major by completing the appropriate form, available from the Office of the Registrar or from the student's academic advising office. The form must be signed by the director of undergraduate studies for the major before it is submitted to the Office of the Registrar. The DUS will also assign a faculty advisor to the student.

A student with a double major receives the degree (B.A./B.S.) associated with the student's primary major. Completing a second major does not entitle the student to a second degree. The completion of additional majors is recorded on the transcript and diploma. When completing a double major, students need only satisfy the distribution requirement affiliated with the school of their primary major.

Declaring a Minor (optional)
Students who wish to complete the requirements for a minor(s) are expected to declare the minor(s) by April 15th of their junior year. Students may add or drop a minor by completing the appropriate form, available from the Office of the Registrar or from the student's academic advising office. The form must be signed by the director of undergraduate studies for the minor before it is submitted to the Office of the Registrar. The DUS will also assign a faculty advisor to the student. The completion of a minor is recorded on the transcript, but the minor does not appear on the diploma.

Official recognition with notation on the academic record is not given for completion of majors or minors at other divisions of the university or at other colleges.

Restrictions Applying to Double Majors and Minors
Within the Hopkins curriculum, requirements for the completion of undergraduate majors and minors are established by academic departments and approved by the Homewood Academic Council, acting on recommendations from the Curriculum Committees of the Krieger and Whiting Schools. Students who fulfill the necessary prerequisites and satisfy the specified course requirements for a major/minor will be certified as having completed that major/minor. While departments are free to designate the range of courses that may satisfy major/minor requirements for their own academic programs, they may not prohibit the use of course work presented for their department's major/minor from being used to satisfy the requirements of other majors or minors. In other words, students may “double count” coursework that independently meets the requirements of more than one major/minor.

Students are encouraged to choose additional areas of study to complement their major. However, students may not choose a minor with an identical name to their major. For example, a student majoring in Africana Studies may not declare a minor in Africana Studies.

Other prohibited combinations include:
1. Students majoring in Molecular and Cellular Biology may not major in Biology.
2. Students majoring in the Natural Sciences Area may only double major or minor in a program outside of the natural sciences.
3. Students majoring in Medicine, Science and the Humanities may not double major in Natural Sciences Area.
4. Students majoring in Romance Languages may not major or minor in one of the individual Romance Languages (except for the Spanish for the Professions minor).
5. Students majoring in French may not complete either French minor option.

Closely-related majors and minors that are allowed include:
1. Economics majors may complete a Financial Economics minor.
2. Spanish majors and Romance Languages Majors may complete the Spanish for the Professions minor.
3. Computer Science majors may complete a Computer Integrated Surgery minor.

The examples provided above may not be an exhaustive list and students who have questions about combinations of related programs should consult an advisor in their respective advising office.

Student Status
Contact Information
All matriculated students are required to have on record with the university accurate local and permanent contact information at all times and may be subject to a registration hold if this information is missing. This includes local address, local telephone number, and valid JHU e-mail address. Parent or legal guardian emergency contact information also must be on record and updated as necessary. This information should be maintained with the Registrar’s Office by using SIS for Students (https://sis.jhu.edu/sswf).

Student Classification (Year of Study)
Student classification refers to the familiar names for the four undergraduate years: freshman, sophomore, junior, and senior. A student’s classification is generally determined by the academic year in which the student’s cohort began the first year of college. In the first year, students in the cohort are designated freshmen. For students transferring into the university, an official student classification will be assigned by the respective advising office after completion of a final transfer credit evaluation. The number of credits a student has earned does not
determine class standing. A student who graduates after three years would graduate as a junior.

For students who have been on leave and missed two or more semesters, classification will be determined by the student’s academic advising office when the student returns to the university. If, for example, a student was on leave of absence for an entire academic year, the advising office may assign the student to a cohort one year behind the student’s original cohort.

Students are required to register with their cohort, not on the basis of total credits or expected date of graduation. Plans to graduate early are not grounds for registering before a student’s cohort. If a student who intends to graduate early is closed out of a required course for the major, the student may petition the department offering the course for approval to add the course. The decision rests with the department.

**Full-Time Student Status**

Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester. Students who have not completed degree requirements after eight full-time semesters (or four full-time semesters for transfer students) may register for fewer than 12 credits and pay for courses on a per credit basis with approval of the student’s academic advising office. Prior to a ninth semester, a student may not enroll for fewer than 12 credits.

**Personal Leave of Absence**

Students may be granted a term leave of absence for personal reasons with the approval of the academic advising office for the student’s school and with a letter from the student’s parent or guardian acknowledging the request for leave. Written requests for a leave of absence should be submitted to the academic advising office in the student’s school. Leaves of absence are granted for specific periods, generally up to one year, and such leaves are regarded as approved interruptions of a student’s program. No tuition or fees are charged while on leave. During a leave of absence, students may not enroll in another institution for the purpose of transferring credits back to JHU.

Students who fail to return to the university when expected will be considered to have withdrawn from the university.

**Medical Leave of Absence (Physical or Mental Health)**

Students may be granted a term leave of absence for physical or mental health reasons with the approval of the Office of the Dean of Student Life. Mental health leaves of absence require consultation with the Counseling Center. Physical health leaves of absence require consultation with the Student Health and Wellness Center. No tuition or fees are charged while on leave. Further details are available from the Office of the Dean of Student Life (http://studentaffairs.jhu.edu/student-life/support-and-assistance/medical-leave-absence).

**Note for Peabody Double Degree Students**

Peabody double degree students may request a leave of absence from the double degree program, but they cannot be granted a leave of absence from only the Homewood or Peabody portion of the program.

**Withdrawal from the University**

A student who wishes to withdraw from the university with no intent to return should consult with the respective academic advising office in order to submit an official notification. An official notification of withdrawal consists of the following items:

- a letter providing brief reason for withdrawal and effective date
- a letter from parent(s)/guardian(s) acknowledging the student’s withdrawal from JHU

The academic advising office will inform the Office of the Registrar, who will subsequently circulate the notification to other relevant campus offices, such as Student Accounts, Housing, Office of International Services, etc.

An enrolled student who leaves the university without notice, or who fails to register by the end of the second week of the semester, may be considered to have withdrawn from the university.

A student who transfers to another institution is automatically considered to have withdrawn from JHU.

In the rare situation where a withdrawn student wishes to return to the university, the student must submit a written request for readmission to their respective advising office for evaluation. Neither readmission nor transfer of credits is guaranteed. A student must be formally readmitted before registering for courses. Readmitted students do not pay another matriculation fee.

A student who wishes to withdraw from the university on a temporary basis and intends to return in a future semester should see the information under Leave of Absence (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/student-status/#leaveofabsencetext).

**Peabody Double Degree Students**

Information about withdrawing from one or both of a student’s degree programs is available on the Peabody Double Degree page (http://e-catalog.jhu.edu/archive/2017-18/departments-program-requirements-and-courses/multi-school-programs/peabody-double-degree).

**Combined Bachelors/Masters Programs**

Many departments, institutes, and centers offer undergraduates the opportunity to complete some of the requirements for a master’s degree while still completing the requirements for a bachelor’s degree. Some of these programs offer early admission to the graduate school and may enable a student to complete both bachelor’s and master’s degrees in four years. Other programs are considered five-year programs. For information on what offerings are available in a specific department, refer to the departmental entry.

Students in either the School of Arts and Sciences or the School of Engineering must be accepted into a combined program no later than the first semester of their senior year (some departments set an earlier application deadline).

**School of Arts and Sciences**

Students in a combined program are full-time students and are charged full tuition. This category is reserved only for current JHU full-time undergraduate students who are accepted into a combined graduate program. Such students are eligible to become full-time graduate students upon completion of their undergraduate degree requirements.

**School of Engineering**

The registration status of Whiting School of Engineering students who have been admitted into a combined bachelor’s/master’s degree program
will switch from undergraduate to graduate once they obtain clearance from their respective departments and either:

1. complete the requirements for a bachelor’s degree, or
2. complete eight semesters of full-time undergraduate study, whichever comes first. As soon as this occurs, a student is guaranteed health insurance benefits and becomes eligible for a partial tuition waiver and research and teaching assistantships (the graduate program determines the student’s level of support).

Taking a Course as an Alumnus
JHU alumni who completed their bachelor’s degree through the Krieger School of Arts and Sciences or the Whiting School of Engineering may take additional courses in those divisions with permission of the advising office of the school from which they graduated. Students should complete a paper registration form and have it signed in their respective advising office before taking it to the Office of the Registrar for processing. Courses, grades, and credits will appear on a new academic record. Students must follow the rules for earning a second major or a minor after graduating, if applicable.

Finishing a Second Major or a Minor after Graduating
Students who have completed eight or more semesters in college may take an additional course or two after graduation to complete a second major or minor if they have filed an approved plan with their respective advising office before their initial graduation date. The courses, grades, and credits will appear on a new academic record. A notation indicating the additional major or minor will be added to the new academic record, but a new diploma will not be issued. Students must notify their academic advising office when additional courses taken after graduation satisfy another major or minor.

A plan consists of the following:

1. Written approval from the director of undergraduate studies for the additional major/minor.
2. Description of the remaining requirement(s) to be completed. No more than two courses may be needed and these courses must be completed within one year of a student’s initial graduation date.
3. Brief summary of why it is necessary for the student to have their degree conferred before completion of all planned majors or minors.
4. Final approval of a plan must be obtained from the student’s respective advising office.

Students who graduate in fewer than eight semesters may also take courses after graduation as a full-time or part-time student if not completing an additional major or minor. Students who graduate early lose the opportunity to complete additional majors or minors after graduation.

Students should seek assistance of their respective advising office in order to register for a course after graduation.

Second Degrees
Krieger School of Arts and Sciences and Whiting School of Engineering undergraduate-degree alumni who wish to earn a second bachelor’s degree at Hopkins must contact their advising office. Students who receive approval must have already completed the requirements for the first bachelor’s degree and complete an additional 60 credits at Hopkins beyond what they have done for the first degree. Alumni must request permission to pursue a second bachelor’s degree within ten years of the conferral of the first bachelor’s degree. The second bachelor’s degree must be completed within ten years from the starting date of the second bachelor’s degree.

Registration Policies

Advising and Registration Periods
All students are required to meet with an advisor for each declared major prior to registering for the fall and spring semesters. Advisor alert(s) for each declared major are placed on all students’ records in SIS well in advance of the registration period; the alert(s) must be released by the advisor(s) to permit the student to register.

In the School of Arts and Sciences, freshman, first-semester transfer students, and undeclared students meet with their academic advisor beginning six weeks in advance of the registration period. Students with declared majors should contact their faculty advisor to schedule a meeting prior to their registration date.

In the School of Engineering, students meet with their faculty advisors during Engineering Advising Week (early November for spring registration and early April for fall registration).

Undergraduates register for spring semester in November, for Intersession in December, for summer in March, and for fall semester in April. Detailed instructions about registration will be emailed to all students before the registration period each term. If the student has not received this information at least two weeks before the start of classes for a fall or spring term, perhaps because of a change of email address or status in the university, the Office of the Registrar should be contacted immediately.

Schedule Verification
Students are responsible for verifying their official schedules in SIS. Students are encouraged to retain a copy of their schedule for their records. In addition, students are advised to check their schedules after performing online registration changes (adding and dropping courses) to ensure accuracy. It is also recommended that students review their schedule prior to the add, drop and withdrawal deadlines. Changes to a student’s schedule will not be approved after these deadlines have passed. Failure to review and retain a copy of their registration confirmation will not be considered grounds for approving exceptions to these deadlines.

Intersession and Summer Special Registration Information
Summer and intersession opportunities, such as JHU-sponsored study abroad courses and career exploration courses, may have special registration deadlines, fees, and procedures. Please see the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites for additional information.

Intersession is a three-week period in January for students and faculty to participate in a variety of optional credit and noncredit courses and activities that enrich the intellectual and social life of the campus.

For intersession academic exploration courses, the tuition cost of Homewood KSAS and WSE courses is free to undergraduates who were enrolled full-time in the previous fall semester (including approved study abroad); part-time students must pay tuition. All students must pay
relevant fees. Students who are returning from a leave of absence may register for intersession if they pay tuition per credit hour. Students who register for Hopkins intersession courses outside of KSAS/WSE are subject to tuition charges determined by the individual school.

Summer courses at JHU are primarily offered during two five-week terms. Some courses run on alternative schedules and may, therefore, have different deadlines. Courses are sponsored by the same academic departments that oversee the university's full-time degree programs. They are designed to reproduce, as closely as possible, similar courses offered during the spring and fall semesters. Tuition charges, and deadline dates, are published on the Summer Programs (http://pages.jh.edu/summer) website.

Late Registration Fees
Registration in the School of Arts and Sciences and the School of Engineering is not permitted after the end of the second week of the semester, except in extraordinary circumstances as approved by the Assistant Dean for Academic Advising for their respective school. Students must register on time, even when they lack sufficient funds. The university provides many financing alternatives that permit students to register in most financial situations.

Students who for any reason do not complete their registration until after the prescribed registration period will be required to pay a late registration fee according to the following schedule:

- $100 - end of prescribed registration period until the day before the first day of classes of the upcoming semester
- $150 - first day of classes through the end of the first week of classes
- $200 - second week of classes
- $300 - after the second week of classes (special permission only)

For late registration fees in the summer, please see the Summer Programs (http://pages.jh.edu/summer) website.

Adding a Course
During the fall and spring semesters, students may add a course until the end of the second week of classes and pay no fees to add courses. During this time students may add courses without written approval, unless the course is filled or will cause a credit overload. If the course will cause a credit overload, Arts and Sciences students need a signature from the Arts and Sciences Advising Office, while Engineering students need their faculty advisor’s signature and the approval of the Engineering Advising Office. An instructor’s signature is required to add a course that is filled. By the end of the second week of classes, students should have the schedule they want to keep. As an exception to this policy, students may add research credits until the end of the sixth week of the semester.

For fall and spring courses that are scheduled for less than the full semester, the last day to add will vary based upon course length and start date. Please see the Registrar’s Office (https://studentaffairs.jhu.edu/registrar/students/registration) website for details. For intersession and summer deadlines, please refer to the Interesession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When adding courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the add deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Dropping a Course
Courses may be dropped from the student’s record until the end of the sixth week of the semester, provided that the student remains registered for a minimum of 12 credits. For engineering students, faculty advisor approval is required to drop a course after the second week of classes.

For fall and spring courses that are scheduled for less than the full semester, the last day to drop will vary based upon course length and start date. Please see the Registrar’s Office (https://studentaffairs.jhu.edu/registrar/students/registration) website for details. For intersession and summer deadlines, please refer to the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When dropping courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the drop deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Withdrawing from a Course
After the end of the sixth week and until the end of the eleventh week, a student may withdraw from a course with a W on their academic record. A record of the course will remain on the academic record with a W appearing in the grade column to indicate that the student registered and then withdrew from the course. Students are not allowed to withdraw from a course after the end of the eleventh week of the semester. Course withdrawals must be conducted in person at the Office of Registrar using an add/drop form. Engineering students need the signature of their faculty advisor on the add/drop form. Withdrawing from a course may adversely affect a student’s academic standing or financial aid satisfactory academic progress, even with official approval.

For fall and spring courses that are scheduled for less than the full semester, the last day to withdraw will vary based upon course length and start date. Please see the Registrar’s Office (https://studentaffairs.jhu.edu/registrar/students/registration) website for details. For intersession and summer deadlines, please refer to the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When withdrawing from courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the withdrawal deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Full-Time Student Status
Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester. Students who have not completed degree requirements after eight full-time semesters may register for less than 12 credits and pay for courses on a per credit basis with the permission of academic advising.

Fall and Spring Semester Credit Requirements and Limits
Credit is an approximate measure of the work required in a course. For undergraduate courses, the number of credits is normally equal to the
number of hours that the class meets each week. Some laboratory courses are exceptions to this rule, meeting more hours per week than the credits awarded. Graduate-level courses completed by undergraduates are generally awarded the same number of credits as an upper-level undergraduate course (3 credits).

For Arts and Sciences (AS) students, the average course load is 15 credits per semester for eight semesters. For Engineering (EN) students, the standard load is 16-18 credits. AS freshmen are limited to 17 credits, while AS upperclassmen are limited to 18.5 credits. EN freshmen are limited to 18 credits (18.5 if including a foreign language), while EN upperclassmen are limited to 19.5 credits. Students must maintain full-time status by registering for at least 12 credits.

Inter session and Summer Credit Limits
Students may take a maximum of 3 credits during intersession. During the summer, students may take a maximum of 14 credits total, with a limit of 7 credits per session.

Exceptions to These Credit Limits
Arts and Sciences students who wish to take a credit overload must meet one of the following criteria:

- Double degree students who are taking courses at both Peabody and Homewood
- Seniors in their eighth semester
- Upperclassmen who made Dean's List in the prior semester

Credit overloads for arts and sciences students require approval from academic advising.

Exceptions for EN Students
Credit overloads for engineering students are approved on a case-by-case basis. Engineering students who wish to overload need their faculty advisor's signature, then final approval by the Engineering Advising Office. Usually, the student's most recent academic performance is a factor in the decision. First-semester freshman are not granted credit overloads.

Registration and Restrictions
The following content is included on this page:
Registration Alerts (p. 16)

Retaking a Course (p. 16)

Prohibition on Registering for Courses that Meet at the Same Time (p. 16)

Restrictions on Equivalent Courses and Courses Taken Out of Sequence (p. 16)

Policy on Statistics Courses Sequencing (p. 17)

Important Note About Credit and Grades for Language Courses (p. 18)

Instructor's Permission (p. 18)

Auditing a Course (p. 18)

Registration Alerts
Registration alerts may be applied to student records for a variety of reasons, such as outstanding financial obligations, insurance and health clearances, academic standing, and missing emergency contact information. A student whose registration has been placed on hold for a non-academic reason must obtain clearance from the office or offices that placed the hold on registration. In addition, transcripts will not be released for students with unpaid balances.

Students who have three or more incomplete grades from the previous semester may have a hold placed on registration activity. The student must have the approval signature from the advising office of their school to register, add, or drop.

Retaking A Course
Students may retake a course to absolve a grade of C+ or lower. The grade for the second attempt and the associated credits are recorded on the transcript and are calculated into the GPA. The original grade remains along with the notation "R" to indicate the course was retaken. Such R grades do not affect grade point calculations and do not carry credit toward graduation. Only the grade in the retaken course accrues credit and applies to the GPA, even when the retaken grade is lower than the original grade. A student may retake one course without written permission. Taking the same course a third time or retaking another course requires written permission of the student's academic advising office.

A course originally taken for a letter grade must be retaken for a letter grade. A course taken under the Satisfactory/Unsatisfactory grading option must be retaken under the Satisfactory/Unsatisfactory grading option. First semester courses whose grades are covered by S/U notation are considered to have been taken for a letter grade. If a student wants to retake a course from the first semester, the second attempt must also be for a letter grade.

To absolve a grade, the same course must be taken at Hopkins, not another college or university. In situations where the same course is no longer offered, students may be able to absolve a grade in one of two ways:

1. by repeating a course of comparable content and level, or
2. as an independent study

Both of these options require approval of the department and/or instructor responsible for the course, and the student's academic advising office.

Other Restrictions on Absolving a Grade
Grades may not be absolved by retaking a course after graduation.

Grades assigned by the Ethics Board due to an academic ethics violation may not be removed from the academic record by retaking the course.

Prohibition on Registering for Courses that Meet at the Same Time
Registering for two classes that meet at the same time is not permitted except as a temporary measure during the first weeks of the semester when students are still deciding on which classes to take. By the end of the first two weeks of classes, students must resolve time conflicts in their schedules.

Restrictions on Equivalent Courses and Courses Taken Out of Sequence
Courses that are sequential in nature, e.g., elementary, intermediate, and advanced language courses, or the Calculus sequence, must be taken in their proper order. One exception to this policy is that AS.210.301-302 may be taken in reverse order with permission of the department.
Credit will be awarded only once for equivalent courses covering the same material. Examples of equivalent courses are Intermediate French and Advanced Intermediate French, and AP Calc AB and Calculus I. This restriction does not apply to the Expository Writing course which may be taken twice. Be aware that departments may change course numbering or titles without changing the course content. Students who believe that they have registered for an equivalent course should consult with their academic advising office.

The following restrictions apply to overlapping and the sequencing of courses in the Mathematics and Applied Mathematics and Statistics Departments:

- Students who earn credit for AS.110.201 Linear Algebra cannot receive credit for the combined course EN.553.291 Linear Algebra and Differential Equations or for the course AS.110.212 Honors Linear Algebra.
- Students who earn credit for AS.110.405 Analysis I cannot receive credit for AS.110.415 Honors Analysis I.
- Students who earn credit for AS.110.406 Analysis II cannot receive credit for AS.110.416 Honors Analysis II.
- Students who earn credit for AS.110.302 Differential Equations and Applications cannot receive credit for EN.553.291 Linear Algebra and Differential Equations or AS.110.306 Honors Differential Equations.
- Students who earn credit for AS.110.202 Calculus III cannot receive credit for AS.110.211 Honors Multivariable Calculus.
- Students who earn credit for AS.110.311 Methods of Complex Analysis cannot receive credit for AS.110.407 Honors Complex Analysis.
- A student who earns credit in EN.553.291 Linear Algebra and Differential Equations may receive credit for further study of linear algebra or differential equations by enrolling for independent study. Normally students will earn 2 credits for such an independent study, but the number of credits may vary and is to be decided by the faculty sponsor. These students may not earn credit for AS.110.302 Differential Equations and Applications, AS.110.306 Honors Differential Equations, AS.110.201 Linear Algebra, or AS.110.212 Honors Linear Algebra.
- Students who earn credit for EN.553.426 Introduction to Stochastic Processes cannot receive credit for EN.553.427 Stochastic Processes and Applications to Finance.

Courses in the Economics Department with restrictions:

- Students who earn credit for AS.180.301 Microeconomic Theory may not earn credit for AS.180.401 Advanced Microeconomic Theory.
- Students who earn credit for AS.180.334 Econometrics may not earn credit for AS.180.434 Advanced Econometrics.

Policy on Statistics Courses Sequencing

Undergraduate students at the Homewood Schools of Johns Hopkins University enjoy a wide selection of courses on statistics; however, it is not proper for a student to be awarded credit for two courses that cover essentially the same material. Likewise, it is not proper for a student to receive credit for a more basic course after having received credit for a more advance course in the same subject.

Our statistics courses fall into one of the following four categories, listed in increasing level of sophistication:

1. Non-calculus based, basic
2. Non-calculus based, intermediate
3. Calculus based, intermediate
4. Calculus based, advanced

A student may take at most one course (or course sequence) from within one of these categories. A student may not take a course in a lower numbered category after having taken a course in a higher numbered category.

Some departments may require their undergraduate majors to take specific statistics courses; that is their prerogative. This policy simply precludes students from receiving credit for two courses that have much the same content, with possibly different emphases. It does not imply that one course in a category may be substituted for another.

The list below shows how the courses (and course sequences) are allocated to these categories.

For example, a student may take EN.553.111 but then may not subsequently take AS.230.205. A student who has taken EN.553.310 may not also take EN.553.311 or any of the courses in the first two categories.

Category 1: (Non-calculus based, basic course)

- EN.553.111 Statistical Analysis I
- AS.230.205 Introduction to Social Statistics
- AP Statistics

Category 2: (Non-calculus based, intermediate course)

- EN.553.211 Probability and Statistics for the Life Sciences
- EN.553.230 Introduction to Biostatistics
- AS.280.345 Public Health Biostatistics
- AS.200.314 Advanced Statistical Methods-AS.200.315 Advanced Research Design and Analysis

Category 3: (Calculus-based, intermediate course)

- EN.553.310 Probability & Statistics/EN.553.311 Probability and Statistics for the Biological Sciences and Engineering
- EN.560.348 Probability & Statistics for Engineers
- EN.560.435 Probability and Statistics in Civil Engineering (discontinued, last offered Spring 2011)

Category 4: (Calculus-based, advanced course)

- EN.553.420 Introduction to Probability-EN.553.430 Introduction to Statistics

Some courses do not fall into one of the four categories:

- AS.200.207 Research Methods in Experimental Psychology This is not a probability/statistics course and may be taken in combination with any of the other courses listed in this document in any sequence.
- EN.553.413 Applied Statistics and Data Analysis This course is mostly independent of the other probability/statistics courses, but subsumes enough of the non-calculus, basic course material that none of those courses (category 1) may be taken after EN.553.413.
• EN.553.112 Statistical Analysis II may be taken after any category 1, 2, or 3 course. However, the preferable sequence is EN.553.111 Statistical Analysis I + EN.553.112 Statistical Analysis II.

Equivalent Statistics Courses
The courses EN.553.310 Probability & Statistics and EN.553.311 Probability and Statistics for the Biological Sciences and Engineering are considered equivalent to each other and can be used interchangeably. A poor grade in one may be absolved by the opposite course.

Important Note About Credit and Grades for Language Courses
Both semesters of language elements courses in French, German, Greek, Italian, Latin, Portuguese, Spanish, Yiddish, and languages offered in the Near Eastern Studies Department must be completed with passing grades in order to retain credit for both courses. If study of the language is terminated after the first semester, the student will lose the credit for the course. The course and grade will remain on the academic record, but no credit will be awarded and the grade will not affect the grade point average. This change to the record is generally made in the last semester prior to graduation by the student’s academic advising office, but students can also request that the advising office make the change at an earlier point. Students do not have to take both semesters of the first year of languages taught through the Center for Language Education to retain credit from the first semester.

Students must take the language elements (or beginning) courses for a letter grade, with the exception of the Russian Elements course.

Students in the School of Arts and Sciences do not receive an area designation for these elements courses. For students in the School of Engineering, language elements (or beginning) courses can be substituted for humanities courses in meeting the distribution requirement.

Instructor’s Permission
Many graduate (600-level) courses in the School of Arts and Sciences and the School of Engineering offered in the graduate divisions of the university, and some advanced undergraduate courses, require the instructor’s approval. Engineering students also need their faculty advisor’s approval. The Registrar's Office will not enroll a student in such a course without the instructor’s signature. If online enrollment is not available, students must use a paper registration or add/drop form.

Auditing a Course
Undergraduate students may not audit a course. By the end of the add period, a student may only attend or participate in a course if registered for it.

Registering for Independent Academic Work
“Independent academic work” is the collective term used to encompass independent study, research, and academic internships. Independent study means a program of study and reading under the tutelage of a faculty member. Academic credit for independent study is based on work equivalent to class-based courses. Research involves planning and conducting experiments, collection and analysis of data, and the reporting of results. Academic internships are practical work experiences which have an academic component as certified by a member of the faculty.

All forms of independent academic work require early planning with a faculty sponsor. To receive academic credit, the independent academic work must include some activity, exercise or product that can be evaluated by a regular member of the AS/EN faculty whose field of expertise is closely enough related to the work for the faculty sponsor to evaluate the work competently and certify that it merits academic credit.

Academic credit for independent academic work must be sponsored by a full-time member of the Homewood faculty. This is the case whether the work is done on campus or not. The work supervisor and the faculty sponsor may be the same individual. If the faculty sponsor is not the work supervisor, the work supervisor must provide the faculty sponsor with a report on the student's achievements while doing the independent project and the faculty member must certify how much academic credit the project merits.

Students who wish to pursue independent academic work must begin by discussing their ideas with an appropriate faculty sponsor. That discussion must focus on what type of project the student envisions and what possibilities for academic credit the faculty member envisions. If the student and faculty member agree on the type of project and its academic value, then the student should find a suitable research or work environment for the project.

No more than three credits may be earned for independent study or research in one semester or summer (sessions I and II combined); only one credit may be earned for an academic internship during one semester or summer. Additionally, no more than 6 credits of any type of “independent work” may be earned in one academic year (see exception for students graduating in their eighth semester or later [http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/gradation-policies]). The academic year begins in June with the first summer session and ends in May at the conclusion of the spring semester. Independent work done for academic credit must be unpaid. Credits for research and independent study may vary from 1-3 credits and may be graded with either letters grades (A, B, etc.) or Satisfactory/ Unsatisfactory. Credit for an internship is limited to 1 credit, and the grading method is Satisfactory/ Unsatisfactory only.

Students must register for research, independent studies, or internships by the end of the sixth week of the semester. Students must observe the registration and add/drop deadlines in January Intersession and JHU Summer session.

Although academic credit is awarded for independent academic work, area designations are not assigned and the credit may not be used to satisfy the distribution requirement. The use of credit for independent academic work to satisfy the requirements of a major or minor is subject to prior written approval by the appropriate department or program.

Registering for Courses in Other JHU Divisions During the Fall and Spring Semesters
Qualified undergraduates may take courses at other divisions of the university by registering in person with the Homewood Registrar. In addition to the registration or add/drop form, students must submit a Supplemental Registration Form for Interdivisional Registration. Forms are available in the Homewood Registrar's Office in 75 Garland Hall, in the Office of Academic Advising Garland Hall Suite 300, or the Office of Engineering Advising 103 Shaffer Hall. Courses taken at other JHU divisions must be taken for a letter grade, not S/U, unless the course at the host division is offered on an S/U basis only.

Peabody Institute
Performance courses at the Peabody Conservatory may either be as part of a grade and credit, or may be audited. Graded performance courses will
receive 1 credit per semester unless taken for a double degree program. With the approval of a student’s teacher, performances that are audited may appear on a student’s academic record.

Homewood undergraduates who are not enrolled in a music major, minor, or degree program may take only one nonperformance course per semester at the Conservatory or Preparatory. These students may also take one performance course concurrently with the approval of the student’s academic advising office. Students taking lessons for the first time at Peabody must also complete an Extension Application form which is available in the same locations as the Supplemental Registration Form.

Students may take private lessons at Peabody Conservatory with an instructor who is a Conservatory faculty member or a Preparatory faculty member approved by the Deans of the Preparatory and Conservatory. Acceptance is on a space available basis following an audition to demonstrate intermediate or advanced skills. Auditions for Conservatory lessons are held in September. Students will be notified of their audition time by letter from the Conservatory Registrar’s Office. Space in lessons is limited and registration is on a first-come, first-served basis. There is a $190 fee per semester for one half-hour lesson per week ($200 for voice). Students who wish to take additional lessons will be charged for them.

The Peabody schedule and deadlines can differ from those at Homewood. Students taking courses and lessons at the Conservatory must check these dates in the Peabody Master Schedule of Courses.

Students who wish to take beginning level music lessons may enroll through the Preparatory on a non-credit basis.

The Carey Business School and The School of Education

Students may register for approved courses in these two schools on a case-by-case basis. Students are limited to no more than 12 credits in the Carey Business School or 12 credits in the School of Education. In order to register in the Carey Business School or the School of Education, students in Arts and Sciences and Engineering programs should use the Interdivisional Registration Form, available from the Homewood Registrar’s Office, which requires permission of their academic advisor and the appropriate school program director or advisor. Courses must be taken for a grade. Note that the Carey Business School and the School of Education students have priority in registering for these schools’ courses.

School of Medicine and Bloomberg School of Public Health

Except for Public Health Studies majors taking courses at the School of Public Health who require only the Public Health faculty advisor’s approval signature, undergraduates may register for courses in these schools with the approval of the faculty advisor, the course instructor, and the student’s academic advising office. Students must have an adequate background for the courses, and courses must be taken for a grade.

Registering for Courses at Other JHU Divisions During the Summer

Degree-seeking students may be permitted to enroll in other JHU divisions through the interdivisional registration process during the summer terms. Students should register and pay for the course at their home division. The course, along with credits and grade, will appear on the student’s home division transcript. Approval is required from both the home and host divisions to ensure that the interdivisional enrollment is appropriate for the student’s degree. Summer courses in other divisions must be taken for a grade.

Registering for Courses through the Baltimore Student Exchange Program

Undergraduates may take one course per semester (fall/spring only) at one of the several area colleges and universities that comprise the Baltimore Student Exchange Program (BSEP). This program includes the following colleges in the Baltimore area: Community Colleges of Baltimore County, Coppin State University, Goucher College, Loyola University Maryland, Maryland Institute College of Art, Morgan State University, Notre Dame of Maryland University, Towson University, University of Baltimore, University of Maryland Baltimore County, and Stevenson University.

Students who have received Air Force ROTC scholarships will register for the required ROTC courses at the University of Maryland College Park using the cooperative institution registration process described in this section.

Courses that are equivalent to those offered at the Homewood campus may not be taken through BSEP. Students register in person with the Homewood Registrar. Students must submit a registration or add/drop form along with a supplemental registration form for the program. The form is available from the Registrar’s Office, 75 Garland or from the student’s academic advising office. The faculty advisor’s approval signature is required for all courses. An academic advisor from the student’s advising office must also sign the form. Submit completed registration materials to the Homewood Registrar’s Office.

Prior to the start of classes at the host school, visiting students may report to the host school’s registrar for additional assistance (for example, campus maps or ID cards). Visiting students are not required to complete registration forms at the host school, and no academic record is established at the host institution. There is no additional fee or tuition charge for courses taken through the cooperative education program, except when the host school charges a laboratory or materials fee. In that event, the student pays the fee directly to the host institution.

Courses at these schools must be taken for letter grades. Both grades and credits appear on the Hopkins academic record along with an indication of where the courses were taken. The grades are included in calculations of the grade point average.

Cooperative Education in Engineering

Engineering students may participate in government or industry-based cooperative education programs. Students who have received an offer from an employer should contact the Engineering Advising Office at 410-516-7395 or wseadvising@jhu.edu.

ROTC

Enrollment in the Johns Hopkins University Department of Military Science ROTC Program prepares students for full- and part-time careers in the U.S. Army and its Reserve Forces, as well as providing leadership and management skills valuable in any profession. Freshmen interested in finding out about the military profession should enroll in a Military Science course. Contact the professor of military science at 410-516-4685 for enrollment procedures and scholarship information.
Final Examination Schedule for Fall and Spring Semesters
The Registrar establishes the final examination schedule. Official university policy is that students will have no more than two final exams on the same calendar day. In rare cases, the official final exam schedule available on the Registrar’s website, may slot three final exams on one day for a student. Students should contact their advising office for assistance in these instances. Instructors may administer final examinations only at the officially scheduled time, not during class time or during the reading period. Take-home final examinations, and other final exercises (such as papers), that are expected to be prepared for and completed after classes have concluded, are due at the end of scheduled in-class final examination time for the course. All other papers can be due at any deadline during the semester set by the professor, including the reading and final examination periods. Students who are concerned that any of these policies are being violated by their instructors should notify their academic advising office.

The final exam schedule (https://studentaffairs.jhu.edu/registrar/students/course-schedule) is posted on the Office of the Registrar’s website.

Grading Policies
Grades are submitted to the Registrar at the end of the semester. Grades can be viewed online by students using their JHED account and password. Students may designate authorized users to view final course grades in SIS.

Grades and Grade Point Average Points
Each grade corresponds to a numerical grade point equivalent to allow the computation of a grade point average. The grades and their grade point equivalents are as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Performance</th>
<th>GPA Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>Excellent</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>Good</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>Good</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>Satisfactory</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>Satisfactory</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>Passing</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>Passing</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>0.0</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory (C- and above)</td>
<td>N/A</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory (D+ and below)</td>
<td>N/A</td>
</tr>
</tbody>
</table>

Other marks are used in special circumstances as follows:

<table>
<thead>
<tr>
<th>FEV</th>
<th>Failure - ethics violation</th>
</tr>
</thead>
<tbody>
<tr>
<td>I/Grade</td>
<td>Incomplete/Reversion Grade (incomplete grade reverts to this letter grade at deadline unless alternate grade is submitted prior to that deadline)</td>
</tr>
<tr>
<td>MR</td>
<td>Missing grade roster</td>
</tr>
<tr>
<td>MT</td>
<td>Multi-term</td>
</tr>
<tr>
<td>ND</td>
<td>Not officially dropped</td>
</tr>
<tr>
<td>NG</td>
<td>No grade given, course completed</td>
</tr>
<tr>
<td>W</td>
<td>Official withdrawal</td>
</tr>
<tr>
<td>X</td>
<td>No grade reported by instructor</td>
</tr>
</tbody>
</table>

Grade Points and Grade Point Average
To determine the grade point average, multiply the grade point equivalent by the number of credits for the course. Add the products (grade points earned), then divide the total by the number of credits in the computation.

A Sample Calculation of a Grade Point Average

<table>
<thead>
<tr>

<td>38.8</td>
</tr>
<tr>
<td>GPA</td>
<td>= 38.8/13 = 2.98</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Satisfactory/Unsatisfactory Grades
Undergraduates may select one course each semester and summer (across all summer terms) to take for Satisfactory/Unsatisfactory credit at JHU. Students indicate their S/U choice on their add/drop form. Arts and Sciences students need the advising office approval for courses within their major or writing intensive courses. Engineering students need approval from their faculty advisor. Course instructors are unaware of which students in a class are registered for S/U credit. Instructors submit letter grades to the Registrar for all students in their course.

Students must decide whether to take a course on a Satisfactory/Unsatisfactory basis by the end of the eleventh week of the semester. This deadline applies to all courses, even those which may not have any graded work assigned or returned before the end of the eleventh week.

S/U grades have no effect on a student’s grade point average. On the academic transcript, students who earn a grade of C- or above in a S/U course receive Satisfactory credit and a mark of S is entered on the academic record. Students who earn a grade below C- in a S/U course receive no credit and a mark of Unsatisfactory is recorded on the academic record.

Under certain conditions, graduating students in their eighth semester or later may exceed the normal S/U grading limit. See Graduation Policies (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/graduation-policies) for details.

Restrictions on Satisfactory/Unsatisfactory Grading
The S/U option applies only to courses in the fall, spring and summer terms in the School of Arts and Sciences and the School of Engineering. Only one course per semester or summer (across all summer terms) may
Incomplete Grades

Students who are confronted with compelling circumstances beyond their control that interfere with the ability to complete their semester's work during the normal course of a term may request an incomplete grade from the instructor. Approval of such a request is neither automatic nor guaranteed. Procrastination or distraction by other pursuits are not regarded as compelling circumstances, and extensions in these situations are unfair to students who have completed their course requirements within the allotted time.

If the instructor agrees to grant an incomplete grade, the instructor and student must establish a timetable for submitting the unfinished work, but no later than the end of the third week of the following semester. See below for specific information about graduating students. When entering an incomplete grade in SIS, the instructor must also enter a reversion grade. This is the grade that the student will receive if the missing work is not completed. For example, if the student, based on the coursework completed by the end of the semester, would receive a C+ grade without the missing work, then the grade of I/C+ is entered on the transcript. If the incomplete grade is not resolved within the allowed period (the end of the third week of the subsequent semester), the incomplete grade is automatically converted to the reversion grade (a C+ in this example).

Students who are in good academic standing have until the end of the third week of the next semester to finish incomplete work. Exceptions to this deadline require a petition from the instructor and approval from the appropriate advising office before the end of the third week of the following semester. When appealing to change the deadline, faculty members must specify a new date for completion of the work which must be before the end of the current semester. Incomplete grades cannot be held over to another semester in order to complete the missing work by retaking the course. Students and instructors do not have an option in this situation.

Incomplete grades do not affect a student's grade point average, which is based upon the grades that are available for the term. However, students with three or more incomplete grades on their record at the start of a semester may be prevented from making changes to their registration for the semester without the approval of the student's advising office. Students who are on academic probation are not allowed to take incomplete grades in courses without the approval of the student's advising office. Unauthorized incomplete grades will be treated as failures when evaluating the work of students who are on academic probation. Authorized incomplete grades must be resolved no later than the deadline established by the Advising Office if the student is on academic probation.

Special Rules for Graduating Students

Students with incomplete grades in required courses at the date of degree conferment will not graduate. Students with incomplete grades in courses that are not required for degree completion may still graduate. However, the deadline for completion is abbreviated; students must resolve incomplete grades within approximately 30 days after degree conferment when the university closes their undergraduate record. If the work is not finished by the deadline, the reversion grade will be recorded. For the specific deadline relevant to each degree conferral, please consult with Academic Advising or the Office of the Registrar. For more details on incomplete grades and graduation, see Graduation Policies (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/graduation-policies).

Policy on Changing a Grade

Once an instructor has submitted a grade to the Registrar, grade changes can be made only in the case of error in grading, calculation, or transcription. If a student has questions about a grade, s/he should contact the faculty instructor, who has sole authority to assess and assign course grades. If the instructor determines a change is warranted because of error, the change must be submitted to the Registrar's Office by the end of the following semester. Grade changes for graduating seniors must be submitted by the close of their undergraduate record.

Under extenuating circumstances when the student has engaged the services of the case managers in the Office of the Dean of Student Life, the following procedure may be used to withdraw a student from a previously graded course:

• Support for changing a grade to a withdrawal must be submitted by the Office of the Dean of Student Life to either the Arts and Sciences Office of Academic Advising or the Office of Engineering Advising
• Such support must include the last date of attendance and the instructor's approval
• The Registrar’s Office will process the withdrawal and note the academic record upon receipt of approval documentation
• Late withdrawals may adversely affect a student's academic standing or financial aid satisfactory academic progress even with official approval.

Retaking a Course

Policies about retaking a course can be found in the catalog. (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/registration-policies/#restrictionstext)

First-Year Language Courses: Information about Credit and Grades

Policies about first-year language course can be found in the catalog. (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/registration-policies/#restrictionstext)

Dean's List

Students who earn a term grade point average of 3.50 or above in a program of at least 14 credits with at least 12 graded credits will be placed on the Dean's List for academic excellence. An appropriate notation is made on the students' academic record. Letters are sent to parents/guardians by the student's respective academic advising office. The university places notification in your appropriate hometown newspaper, if you elect to follow the directions provided with the letter.

Class Rank

The university does not calculate class rank and therefore, cannot provide this information to students or outside parties.
Transcripts
Information about ordering transcripts is available on the Registrar’s website (https://studentaffairs.jhu.edu/registrar/students/transcripts). Partial transcripts of a student’s record will not be issued.

Transcripts are normally issued only at the request of the student or with his/her written consent. The only exception to this policy is the issuance of transcripts to offices and departments within the university.

Class Attendance and Absences
Although there are no university regulations concerning attendance, students are expected to attend all courses regularly. Students should consult with their instructors and/or teaching assistants when they have missed classes to explain the reasons for their absence and to stay on track in the course. Instructors are encouraged to establish their own policies regarding attendance, and it is the student’s responsibility to know those policies.

In certain courses regular attendance is given special importance. These include foreign language courses and the introductory courses in the Writing Seminars and Expository Writing. Instructors in these courses may lower a student’s grade for unexcused absences.

If a student is absent from classes over a period of several days without explanation, instructors are encouraged to inform the advising office of his/her school. In some cases, withdrawing from a course may be considered; however, the student must withdraw from a course before the end of the eleventh week of the semester and still remain in at least 12 credits.

Absence From Class Due to Illness
The Student Health and Wellness Center does not provide excuses for students who miss individual classes, including required attendance classes or labs. For students who are seen at the Health Center for a serious or extended illness that causes them to miss a number of classes over several days or major academic assignments, such as mid-terms examinations and major presentations, the Health Center will provide verification of the visit to the student directly and alert the Office of the Dean of Student Life. Verification will not be provided retroactively. It is the student’s responsibility to forward the verification to any professors/ instructors who request it.

Since the absence from a final examination is excused only for the most serious of circumstances, the Health Center will provide verification of the visit for those students who are seen at the Center for treatment at the time of their illness only.

Students should be guided by the following:

1. Ask instructors about expectations for class attendance and what procedures they will follow for students who miss class or assignments. Such policies are determined by each instructor and will differ from class to class.
2. In the event of a missed class or inability to complete course work due to illness, contact the instructor to make whatever arrangements are necessary to make up any work.
3. Notify the professor promptly by email. This should be done before the missed class unless it is not possible to do so (for example, if hospitalized or incapacitated). In cases where prior notification is not possible, notify the professor as soon as possible.
4. Misrepresenting personal circumstances to a faculty member, Student Health and Wellness staff, or any university official constitutes academic dishonesty and is grounds for action by the Academic Ethics Board.

Absence for Religious Holidays
Religious holidays are valid reasons to be excused from class. Students who must miss a class or an examination because of a religious holiday must inform the instructor as early in the semester as possible in order to be excused from class or to make up any work that is missed.

Approved Absences
The university encourages students to participate in varsity athletics and other significant extracurricular activities. Students who must miss a class or an examination because of participation in a scheduled in-season varsity athletic event must notify the course instructor as early in the semester as possible. Approved absences are granted at the discretion of the course instructor. When students must miss a scheduled examination, several solutions have been found by instructors. Students have been permitted to take an examination before leaving for the event, or coaches have served as proctors for examinations taken during the athletic event at approximately the same time as the other students in the course. Students have also been allowed to take the examination, or an alternative examination, upon their return from the athletic event.

Academic Standing Policies
Good Academic Standing
Students who maintain a minimum of 12 credits earned and a term GPA of at least 2.0 each semester are considered in good academic standing. In the rare circumstance that a student is given permission prior to the start of the semester to be enrolled in less than 12 credits, that student must complete 100% of the enrolled credits with a term GPA of at least 2.0 to remain in good standing.

Reviewing Academic Standing
Each academic advising office reviews student records at the end of fall and spring semesters to monitor academic standing. Based on this review, students may be placed on academic probation or academically dismissed.

Satisfactory Academic Progress
Satisfactory Academic Progress (SAP) refers to minimal standards for grades and cumulative credits required to receive financial aid. The SAP policy is available at https://finaid.jhu.edu/undergraduate-aid/apply-for-aid/undergraduate-sap/.

Academic Probation
At the end of each fall and spring semester, the academic advising offices review the records of all undergraduate students to evaluate the academic standing of each student. Students who earn less than 12 credits or earn a term GPA below 2.0 are placed on academic probation. A letter informing a student of this status and the terms of academic probation are sent to the student in January (for fall performance) or June (for spring performance).

The terms of academic probation are as follows: Students must complete at least 12 credits with a minimum term GPA of 2.0 in the next enrolled fall or spring semester. Students may also be required to achieve a cumulative GPA of 2.0 or above in order to be removed from academic probation. In making the GPA calculation, incomplete grades (I) may
be calculated as failures (F). In addition, any grade in a satisfactory/unsatisfactory course may be taken into consideration.

Students who do not meet the terms of academic probation will be academically dismissed (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/academic-standing/#academicdismissalreadmissiontext). In some circumstances, a student may be continued on academic probation instead of being dismissed. A student whose term GPA falls below 1.0 or earns less than 6 credits may be dismissed without having been on academic probation the previous semester.

The advising offices send written notification to students who are placed on academic probation. Incomplete or missing grades may prevent timely notification. Students with a term grade point average below 2.0 or who earned less than 12 credits should consult with an academic advisor about their academic standing, even if they have not received the letter from their advising office.

Students on academic probation may be restricted from registering for the maximum course load. Engineering students on academic probation are permitted a maximum of 14 credits during the probation semester.

A student's academic performance during the summer term or intersession will not affect his/her academic standing.

**Academic Dismissal**

A student on academic probation who has not met the terms of probation will be subject to academic dismissal from the university for a minimum of one semester and a summer. A student whose term GPA falls below 1.0 or earns less than 6 credits may be dismissed without having been on academic probation the previous semester.

Students may direct inquiries about the dismissal process to the Academic Review Committee of their respective advising office. Students who hope to return to the university in a future semester are encouraged to work with their academic advisor to develop a plan for their time away.

When a student is dismissed from the university, several university offices are notified and several important consequences follow.

- Registrar’s Office: cancels the student’s registration for the next semester and authorizes a refund of tuition paid for that semester;
- Office of Student Financial Services: suspends financial aid and work-study aid to the student;
- Housing Office: cancels the student's housing contract if the student is in university housing;
- Office of International Services: performs duties as required by U.S. federal regulations regarding persons not eligible to study at the university.

**Readmission after Academic Dismissal**

The terms for readmitting a student who has been dismissed for academic reasons are established by the Academic Review Committee of their respective advising office. Students are readmitted on academic probation and must meet those terms in their returning semester or face dismissal again.

Students who receive prior approval to complete courses at another college or university during the period of dismissal are subject to the university's 12-credit limit on the number of transfer credits that can be applied toward graduation.

**Readmission Requests**

To apply for readmission, a dismissed student must submit a letter to the respective advising office. The letter should include an analysis of what went wrong during the preceding two semesters of enrollment, a description of activities while not in attendance, and an academic plan for completing all degree requirements. Supplemental materials such as transcripts of courses taken elsewhere, letters of reference from work or volunteer supervisor, or letters of support from a mental/physical health care provider may be required. Students are encouraged to contact their academic advisor prior to submitting a readmission letter.

**Readmission and Financial Aid**

Academic dismissal and financial aid suspension are two distinct actions and must be addressed separately. The Financial Aid Satisfactory Academic Progress (SAP) appeal process can be found online (https://finaid.jhu.edu/undergraduate-aid/apply-for-aid/undergraduate-sap). This appeal is in addition to the request for readmission to your advising office.

**Subsequent Academic Dismissals**

A student who is dismissed a second time will be required to separate from the university for a minimum of one year. A third academic dismissal is permanent.

**Eligibility for Financial Aid**

All regular degree-seeking students who are eligible to register are also eligible to apply for financial aid. Only U.S. citizens and eligible non-citizens (e.g., permanent residents) are eligible for Federal Title IV financial aid.

Students should be aware that JHU scholarship and grant funds are awarded for a maximum of eight semesters. Under some circumstances, a ninth semester may be awarded on appeal. Federal and state aid may be available for additional semesters.

Students are required to maintain full-time status by registering for at least 12 credits per semester. In rare circumstances, such as severe illness, a student may be permitted to register for less than 12 credits in a given semester. Even with this permission, less than full-time status may affect some types of financial aid.

**Satisfactory Academic Progress**

Satisfactory Academic Progress (SAP) refers to minimal standards for grades and cumulative credits required to receive financial aid. The SAP policy is available at https://finaid.jhu.edu/undergraduate-aid/apply-for-aid/undergraduate-sap/.

**External Credit Policies**

It is expected that the majority of credits applied towards degree requirements are earned by completion of courses taught at Johns Hopkins University by our faculty. We do recognize that some students may have other sources of college-level credit that could be applicable to some requirements. This section explains the conditions and restrictions regarding credits earned outside of JHU.

For full details about the application of external credits towards degree requirements, please see the Requirements for a Bachelor's Degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree/#text) and the Residency Requirement (http://e-catalog.jhu.edu/archive/2017-18/undergrad-
Exam Credit
The information below describes the requirements for students entering JHU in Fall 2017. Students who entered JHU prior to Fall 2017 should view the appropriate archived catalog (http://e-catalog.jhu.edu/archive/2017-18/archive).

Advanced Placement Exams
To receive credit, Advanced Placement examinations must be taken prior to admission to the university.

If a student enters the university with credit for an advanced placement course and then takes an equivalent course at the university for credit, the advanced placement credits (and lab class waiver, if applicable) will be disallowed. The credits and grade for the Hopkins course will appear on the academic record. The advanced placement exam title remains on the record as well, but the credit value is converted to zero. This policy also applies to IB credit, GCE credit, and other foreign exams.

* Macroeconomics: Students who score a 5 on the Macro AP exam are placed out of AS.180.101 Elements of Macroeconomics and receive University credit. However, it does not count as one of the ten courses required for the economics major (or one of the six courses required for the economics minor).

** Microeconomics: Students who score a 5 on the Micro AP exam, and who pass a diagnostic test administered by Professor Hamilton will place out of AS.180.102 Elements of Microeconomics and receive University credit for it. However, it does not count as one of the ten courses required for the economics major (or one of the six courses for the economics minor). Interested students should make an appointment with Professor Hamilton.

*** Students who are awarded credit for AP Biology are exempt from taking the corresponding lab courses (AS.020.153 General Biology Laboratory I/AS.020.154 General Biology Lab II). The lab courses are waived but no credit is awarded. Students who have credit for AP Biology who take AS.020.151 General Biology I and/or AS.020.153 General Biology Laboratory I will lose the three credits for AS.020.151 General Biology I. Students who have credit for AP Biology who take AS.020.152 General Biology II and/or AS.020.154 General Biology Lab II will lose the three credits for AS.020.152 General Biology II.

**** Students who have credit for AP Chemistry but take either lab semester without the lecture course, will lose four AP credits for the corresponding lecture in addition to the lab. Students who take either lecture class without the lab will lose four AP credits for the corresponding lab in addition to the lecture. Effective fall 2014, students with AP Chemistry credits for AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Laboratory I may not take AS.030.102 Introductory Chemistry II/AS.030.106 Introductory Chemistry Laboratory II without taking AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Laboratory I at JHU (forfeiting four AP credits). Students with a score of 4 and therefore have credits only for AS.030.101 and AS.030.102 should take AS.030.103 in order to not lose AP credits. Alternatively, these students may start in AS.030.101 and AS.030.105, but will forfeit their AP credits. Students with a score of 5 and therefore have credits for AS.030.101/AS.030.105 and AS.030.102/AS.030.106 who take AS.030.103 Applied Chemical Equilibrium and Reactivity w/lab will lose four AP credits for AS.030.102 and AS.030.106. Alternatively, these students may start in AS.030.101/AS.030.105 and forfeit all 8 AP credits.

***** Students may receive credit for Calculus I via only one test. Students who have AP Calculus I credits who take AS.110.106 Calculus I (Biology and Social Sciences) will lose four AP credits for AS.110.108 Calculus I. Students who have AP Calculus II credits who take AS.110.107 Calculus II (For Biological and Social Science) or AS.110.113 Honors Single Variable Calculus will lose four AP credits for AS.110.109 Calculus II (For Physical Sciences and Engineering).
Students who are awarded credit for AP Physics are exempt from taking the corresponding lab courses (AS.171.111 General Physics Laboratory I and AS.173.112 General Physics Laboratory II). The lab courses are waived but no credit is awarded. Students who have credit for AP Physics who take AS.171.101 General Physics-Physical Science Major I or AS.171.103 General Physics I for Biological Science Majors or AS.171.107 General Physics for Physical Sciences Majors (AL) will lose four credits for AS.171.101 General Physics-Physical Science Major I. Students who have credit for AP Physics who take AS.171.102 General Physics-Physical Science Major II or AS.171.104 General Physics/Biology Majors II or AS.171.108 General Physics for Physical Science Majors (AL) will lose four credits for AS.171.101 General Physics-Physical Science Major I. Students who have AP Physics - Mechanics C credit who take EN.530.123 Introduction to Mechanics I will lose four credits for AS.171.101 General Physics-Physical Science Major I. Students who take AS.171.105 Classical Mechanics I or AS.171.106 Electricity and Magnetism I may retain their AP Physics credits.

* The rules regarding credit forfeiture described in the Advanced Placement Exam section above also apply to IB exam credits.

Exam Credits for Foreign Language

Effective Fall 2015, the German and Romance Languages Department will not award any credit for Spanish AP/IB exams. French, German, and Italian will grant six credits for AP scores of 4 or 5 (IB Exams for 6 or 7) only after a student successfully completes two courses in that same language sequence at the intermediate level or higher.

JHU Placement Exams

Some departments may offer placement exams or other evaluations that allow a student to bypass lower-level content in that department, most commonly mathematics and foreign language. No credit is awarded for these departmental exams or evaluations - they are for placement purposes only. In some cases, a waiver of the bypassed course(s) may be noted on the student’s academic record. No academic credit is awarded when a course is waived.

Transfer Credit

Students who entered JHU prior to Fall 2015 should view the appropriate archived catalog (http://e-catalog.jhu.edu/archive).

The following content is included on this page:

Transfer Credit Limits (p. 25)

Transfer Credit Rules (p. 26)

Registering for Courses at Other Colleges and Universities After Matriculation (p. 27)

Policies Unique to Students Admitted to JHU as Transfer Students (p. 27)

Description of Transferable Credit (p. 27)

Transfer of Writing Intensive Credits

Transfer Credit Limits

Students admitted directly from high school

Students who enter the university from high school may transfer up to 12 credits from approved courses taken at other institutions, whether taken before or after matriculation. The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.

Students admitted as transfer students

Students who enter the university as transfer students into the Krieger School of Arts and Sciences may bring in up to 60 transfer credits towards a degree requiring 120 credits. Students earning degrees requiring more than 120 credits in both KSAS and WSE may bring in more than 60 credits; however at least 60 of the total degree credits must be earned in residence as a full-time student at JHU. See the Requirements for a Bachelor's degree section in the catalog (http://e-catalog.jhu.edu/archive) for additional residency requirements. All transfer students may transfer up to an additional 12 credits after matriculation. The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.
Transfer Credit Rules
The following rules apply to both online courses and courses taken in a traditional classroom setting.

To be eligible for transfer credit, an approved course must be taken for a grade at an approved college and completed with a grade of C or better. In the United States, an approved institution is a 2-year or 4-year college or university that is accredited by one of the following regional accrediting agencies:

- Middle States Commission on Higher Education
- New England Association of Schools and Colleges, Commission on Institution of Higher Education
- North Central Association of Colleges and Schools, The Higher Learning Commission
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools, Commission on Colleges
- Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges
- Western Association of Schools and Colleges, Accrediting Commission for Senior Colleges and Universities

Transfer credits from non-US academic institutions must be approved on a case-by-case basis by the academic advising offices in the respective schools. Non-US academic institutions must be degree-granting and recognized and authorized to issue academic records by the appropriate national (or regional) bodies in their home countries.

How the number of semester credits is determined
For courses offered in semester credits at the host institution, courses will be awarded the same number of semester credits at JHU. For example, if a Calculus I course is offered for 5 semester credits at another institution, it will be transferred to JHU as 5 credits, even though our parallel course is a 4-credit course. Credit for courses earned at a school using the quarter system will be converted to a comparable number of semester credits. One quarter credit is equivalent to 2/3 of a semester credit. Other unit systems will be converted to semester credits based on the transcript key provided by the host university. If a key is not available, credits are evaluated such that one year of full-time coursework at the other school is considered proportional to one year of full-time coursework at JHU.

How transfer credits are posted on a JHU transcript
The following information is included for each course transferred to JHU:

- name of college or university where course was taken
- course title
- JHU course equivalent (if any)
- credits awarded

The grades earned in these courses do not appear on the Hopkins record and therefore do not contribute to the grade point average.

Restriction on courses taken without a letter or numerical grade
Ungraded or pass/fail courses taken at another college or university prior to matriculation at JHU, if approved, may receive credit if the host school states in writing that the mark represents a grade of C or better.

Restriction on transferring duplicate content
A transfer course will not be approved when the course content has significant overlap with other courses the student has already completed. Likewise, transfer students may not take courses at JHU with significant overlap with prior course content. In cases where a department requires a student to do this, the transfer credit will be zeroed out on the transcript.

Entering freshman with more than twelve transferable credits
Some students enter the university from high school with additional college course work beyond the 12 credits that may be transferred. If these additional courses are equivalent to subjects that the university accepts for credit by Advanced Placement exams, and if the courses are needed to complete requirements for a major or are prerequisites for higher level courses that the student will take at JHU, then students may request that the department waive the comparable courses at JHU. Waivers do not carry semester credits. Students must contact their academic advising office for detailed information about how to obtain a waiver.

Credits earned at JHU prior to matriculation, including the JHU Pre-College Summer Program
A student who takes JHU courses prior to matriculation as a degree-seeking student (at JHU or elsewhere) may receive credit for those courses completed with grades of C or better, but the grades are not included in the undergraduate record. Because these courses were taken at JHU, they are not subject to the 12-credit transfer rule. Students must request that these courses be transferred to their undergraduate record by contacting their respective advising office. Credits earned through this program may be applied to the 100-credit JHU residency requirement (applicable to freshmen matriculating fall 2014 and later).

Credits earned through study abroad
For the purposes of fulfilling the JHU residence requirements, Homewood-approved study abroad courses posted as HA.xxx.xxx on the transcript are considered in-residence and are excluded in the 100 credit residency requirement for students who enrolled directly from high school as freshmen. Transfer students should refer to the residency requirements section (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree/#residencytext) for applicability of study abroad credits. Students participating in study abroad programs must meet university residence requirements, including the requirement that they be on Homewood campus during their final semester prior to graduation.

Students may transfer a full-year of credit from Homewood Abroad Courses (HA) or up to 30 credits from authorized Study Abroad Transfer Courses (TR) toward their Hopkins undergraduate degrees. Students may apply up to 12 additional transfer credits from pre-approved programs abroad, with a 42-credit transfer credit maximum from all study abroad (HA/TR) and domestic courses combined. Students on Homewood Abroad Courses (HA) will be held to the same course load guidelines that apply to course loads and over loads on the Homewood Campus.

Students may enroll in a combination of semester and/or summer/intercession abroad programs, but students may not enroll in three consecutive fall/spring semesters abroad.

Transfer of credits from international institutions without pre-approval
Students who pursue coursework at an international institution without pre-approval may request these credits be transferred after completion. However, these credits will be reviewed and, if acceptable, will be processed as transfer credits, not study abroad credits. Therefore, these credits are subject to the 12 credit transfer maximum.
Deferred admission
Students who have been accepted to the university may defer admission for up to two years with approval from the director of undergraduate admissions. Freshmen who have deferred admission begin their studies in the fall semester. The purpose of a deferral is to allow students to take time off in order to travel, work, or experience another culture. Deferrals are not granted for the purpose of studying at another institution. Students who wish to pursue academic studies during the deferment period may do so; however, the credits earned during the deferment period will not be applied toward the university’s degree requirements.

Special Note for Students on Disciplinary Suspension from Hopkins
While serving a disciplinary suspension, academic work completed at another institution will not be recognized for credit transfer to JHU.

Registering for Courses at Other Colleges and Universities After Matriculation
Students are required to seek pre-approval to transfer credits from courses completed at other institutions. A form for this purpose is available in the advising offices. Directions regarding appropriate signatures and required supplemental materials (typically a detailed course description and/or a course syllabus) are on the form. Courses must be taken for a letter grade and a grade of C or better is required.

In order to transfer credit for previously-approved summer work done elsewhere, students must arrange for an official transcript to be sent to the Office of the Registrar.

Courses at colleges and universities in the Baltimore Student Exchange Program (BSEP)
See Registering for Courses through BSEP (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/registration-policies/#specialsituationtext) in the Registration Policies section. BSEP does not operate during the summer session; courses taken at these institutions during the summer are considered transfer credit and are subject to the same rules and limits as courses from other colleges and universities.

Concurrent registration at JHU and another institution
Students may take courses at another institution when registered at JHU and have these courses transfer to JHU only if permission is granted before registering for the courses at another institution. During the fall and spring semesters, students must be registered at JHU for a minimum of 12 credits and the addition of courses at another institution may not exceed our maximum credit limit for the term. During summer and intersession, the maximum credits earned may not exceed the standard credit limits for these terms (14 and 3 credits, respectively).

Policies Unique to Students Admitted to JHU as Transfer Students
- Transfer students who completed Advanced Placement or other exams during high school are subject to the same policies as students admitted directly from high school as of the term they matriculate at JHU. We do not transfer exam credits directly from another college or university transcript.
- Students who transfer from the Peabody Conservatory will be granted full credit for performance courses in their major instrument. For performance courses in other instruments, only one credit per semester will be awarded.

Description of Transferable Credit
In order to be transferable, a course does not have to match a currently existing JHU course; however, courses should cover topics that are broadly defined as part of the curriculum at Hopkins. For example, we do not regularly teach a course about horror films. However, since this is a film studies course and we have a major in film and media studies, it’s likely that this course would be eligible for transfer. A course can be transferred as either (1) a direct equivalent to one of our courses or (2) a generic course affiliated with a field of study. A course with an identical name at another institution is not necessarily going to transfer as directly equivalent to the course with the same title at JHU.

A maximum of 6 credits may be granted for courses which are in curriculum areas not covered by the fields of study in the School of Arts and Sciences and the School of Engineering.

Additional Details About Course Eligibility for Transfer:

Section One (p. 27): Common courses not accepted for transfer credit

Section Two (p. 28): Common courses with restrictions for transfer credit

Section Three: (p. 28) Non-domestic studies

Section Four (p. 29): Transferring writing-intensive courses

Section One: Common courses that will not be accepted for transfer credit:

Physical Education or Personal Health and Wellness Courses are not accepted.
- However, a maximum of 6 credits in the fields of nutrition, dietetics, or kinesiology if these courses were part of a curriculum leading to a college degree in the subject.

College Orientation, Study Skills, or Career Development Courses are not accepted.
- However, courses that are in-depth studies of career paths within a field of study may be considered. Psychology courses in career counseling or learning theory may be accepted.

Math Courses Below the Pre-Calculus Level are not accepted.
- However, we do accept most introductory statistics courses. We will accept one course designed to review all necessary background for the study of calculus and to introduce the concept of the rate of change of a function.

Theology Courses are not accepted.
- However, we will consider comparative religion courses or other religion courses that study religion from an academic viewpoint.

Developmental English, English Grammar, or English as a Second Language Courses are not accepted.
- However, we do typically transfer "freshman composition" courses.

Independent Study, Research, or Internship Credits are not accepted.
Trade Skill Courses are not accepted.

- Trade skills courses are defined as being part of an educational program leading to a specific trade such as (but not limited to) automotive repair, culinary arts, day care provider, or airplane pilot.

Computer Software Courses are not accepted.

- However, courses that teach some use of software, Internet design and security, basic programming in html or Java, computer aided-design or introduce field-specific software programs may be considered.

Section Two: Common courses with restrictions for transfer credit

Chemistry

General Chemistry courses intended to serve as a one year sequence for students in the sciences are transferrable. However, because of the variability of these courses, it is often not possible to transfer just one semester of two-semester sequences (or one or two quarters). Syllabi review is required to transfer these courses. Rudimentary introductory chemistry courses intended to prepare students for a year of general chemistry are not transferrable. One-semester chemistry courses intended for non-science majors designed to fulfill general education requirements for non-science student may transfer.

Organic Chemistry Lab

JHU offers a one-semester, three-credit course (AS.030.225 or AS.030.227) that is recognized by medical schools as being equivalent to other institutions’ typical year-long introductory organic lab courses that are frequently 1 credit each. To transfer these lab courses from other institutions, students must take both semesters at the other institution, as one semester alone is not transferable. If the course lecture and lab are taught as a single course unit at the other institution, students must take the full year-long sequence of the course lecture and lab in order to transfer the courses to JHU. Our course AS.030.228 is an intermediate level organic chemistry laboratory course intended for only chemistry majors and typically goes beyond other institutions’ expectations of students from introductory organic chemistry lab.

Physics

General physics courses, typically covering the topics of mechanics, heat, sound, electricity and magnetism, optics, and modern physics intended to serve as one year of physics study for students in the sciences, may be transfered if the course was taught using the principles of calculus. Those courses that do not require calculus knowledge will not transfer. Rudimentary introductory physics courses intended to prepare students for a year of general physics will not transfer. Introductory one-semester physics or astronomy courses intended for non-science majors, for example those offered to help students fulfill general education requirements, may be transferred.

Finance

We accept transfer credits for corporate finance courses that may include, but are not limited to, understanding the design and functioning of financial markets or modeling financial forecasting and decision making. We do not transfer credit for personal finance courses designed to teach the individual consumer about topics such as money management, budgeting, home mortgages, personal tax, individual insurance, or investing.

Graphic Design

In order to be considered for transfer, graphic design courses must be taught as part of the required curriculum for a major leading to a degree at the offering institution and the course content must include design theory and practices. These carry no area designation. Courses that focus solely on software usage will not transfer.

Website Design

In order to be considered for transfer, website design courses must be taught as part of the required curriculum for a major leading to a degree at the offering institution and the course content must include some programming components. Courses that solely focus on usage of productivity software such as word processing, spreadsheet, presentation, database, graphics editing, accounting, statistical processing, or webpage creation will not transfer.

Internet/Social Media

Marketing courses that discuss the effective use of social media concepts and tools, search engine optimization (SEO) or other analytical market analysis techniques, and content creation and management strategies for marketing campaigns will be considered. However, courses teaching effective use of the internet for personal research or educating the lay person about its structural design or usage of social media will not transfer.

Medical Terminology

In order to transfer a course teaching medical terminology, the course must have: 1) an emphasis on etymology from Latin and Greek (as opposed to just learning word parts per se; i.e. the course has to have some direct and explicit treatment of the ancient languages) and 2) a significant historical/cultural component, involving study of the history of medicine (including at least some ancient material).

American Sign Language

If offered for degree credit at the host institution, courses in American Sign Language may transfer. It is at the discretion of a department if the language may be used to fulfill the foreign language requirements of a major or minor.

Section Three: Non-domestic studies

For those attending programs leading to the medical profession

In several countries around the world, students enter higher education programs that lead to a medical degree without the completion of the United States equivalent to a bachelor's degree. We do not transfer credits from these types of programs.

US citizens who studied abroad prior to acceptance as a transfer student to JHU

Like our international students who studied internationally before transferring to Johns Hopkins, courses taken abroad by US citizens either through study abroad programs or direct matriculation at international
Students who wish to have a course evaluated for writing intensive credit, meeting, she may be emailed at kain@jhu.edu.

Courses taught in a language other than English that mimic the typical “freshman composition” or “expository writing” courses found in the United States will transfer. These courses will be reviewed for transfer credit as potential courses in our English Department (home of our Expository Writing Program), not as foreign language courses. They may not be used to meet the JHU writing-intensive requirement.

Current JHU students studying internationally in their home country

Please see study abroad eligibility restrictions (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/study-abroad/#eligibilitytext) for limitations during the academic year.

During the summer, courses may be taken in a student’s home country or country of citizenship. Students follow the procedures for pre-approval (p. 27) of transfer credits. Such courses are subject to the 12-credit transfer rule.

Courses unique to China

We do not transfer three commonly required courses: Introduction to Mao Zedong Thoughts, Ideological and Moral Cultivation and Fundamentals of Law, and Principles of Marxism.

Section Four: Details about transferring writing-intensive credit

Students may transfer up to 6 credits of writing-intensive credit for a course(s) under these conditions:

1. The course must meet University criteria (http://krieger.jhu.edu/ewp/writing-requirement) for a writing intensive course.
2. Students must take the course during the regular academic year, in either fall or spring semester (there is no writing-intensive transfer credit for summer courses).
3. Students must have a grade of B or higher in the course.

Except for courses completed in a study abroad program, review of transfer courses for writing intensive credit is conducted in the student’s respective academic advising office. Study abroad courses are handled by Patricia Kain, Director of the Expository Writing Program. To arrange a meeting, she may be emailed at kain@jhu.edu.

Students who wish to have a course evaluated for writing intensive credit, should:

- Confirm the advising office has an official transcript for the course.
- Gather the necessary materials to apply for transfer of W credit. These materials include a syllabus for the course, a course description from the catalog or official website, and copies of the papers you wrote for the course. If you have the original papers with the instructor’s notes, bring them. All materials must be printed; they will not be reviewed electronically.
- Schedule a 30 minute meeting in advance with the appropriate academic advisor.
  - Arts and Sciences incoming freshmen meet with either Ami Cox or Kathie Sindt.
  - Arts and Sciences incoming transfer students meet either Ami Cox or Kathie Sindt (students should schedule with the advisor who is NOT their assigned academic advisor).
- Engineering incoming freshmen meet with their assigned academic advisor, either Linda Moulton or Denise Shipley.
- Engineering incoming transfer students meet with Linda Moulton.

Study Abroad Policies

The Johns Hopkins University views international education as an integral component of its academic mission. Not only does the university actively encourage enrollment of a diverse international and multicultural student body, but it strives to provide students with educational opportunities throughout the world. More than 33% of Johns Hopkins undergraduates study abroad.

For undergraduates in the Krieger School of Arts and Sciences and the Whiting School of Engineering, Johns Hopkins offers a wide variety of international opportunities ranging from short-term, departmentally sponsored intersession and summer programs to semester and full-year programs at major universities in the United Kingdom, Australia, New Zealand, Europe, Africa, Latin America, Asia and the Middle East.

Johns Hopkins accepts credit for coursework taken abroad toward major and minor requirements as well as toward general graduation requirements. Most students who study abroad graduate on time. What is more, upon successful completion of a program abroad, students may choose to build upon their international experience in graduate or professional school. The advisors in Pre-Professional Advising and the Career Center work with Hopkins students to maximize the benefits of a program abroad.

Study Abroad Programs

Johns Hopkins offers students three options for study abroad: departmental programs, direct enrollment programs and approved/vetted third-party provider programs. Programs managed by Hopkins or third-party providers offer the highest level of on-site support. Exchange programs and direct enrollment are well suited to more independent students who prefer greater autonomy while abroad. We encourage students to consider their personal background and comfort levels when choosing a study abroad option.

Johns Hopkins Departmental Programs

Many academic departments sponsor study abroad programs that directly support major and minor requirements. Whenever possible, qualified students in these majors are encouraged to participate in departmental programs. Credit is approved and may be applied toward major and minor requirements in the sponsoring departments. Hopkins departmental programs vary in terms of the level of support that students receive while abroad. In many cases grades (Homewood Abroad or HA courses) from these programs will post on students’ Hopkins transcript and be included in students’ Hopkins grade point average.

Johns Hopkins Departmental Programs include the following categories:
Eligibility Requirements:

- Students must meet the minimum eligibility requirements of both Johns Hopkins University and the program abroad.
- Johns Hopkins exchange programs
- Johns Hopkins Summer Programs Abroad
- Johns Hopkins Intersession Programs Abroad

Direct Enrollment in a University Abroad

Students may enroll in colleges and universities abroad after consulting with a Study Abroad Advisor. Students apply as visiting, non-degree students and take regularly scheduled classes with national and international students.

Major/minor credits must be pre-approved by the Hopkins Director of Undergraduate Studies for students’ majors or minors prior to participation. In most cases grades (Transfer Courses or TR courses) from the program will not post on the Hopkins transcript or be included in the Hopkins grade point average. Transcripts with grades from a U.S.-accredited School of Record will generally be available through a sponsoring institution if the direct enrollment was facilitated by an approved third-party provider.

Approved/Vetted Third-Party Provider Programs

The Office of Study Abroad and the Faculty Advisory Committee have approved third-party provider programs that offer courses in specific areas, disciplines, or locations where direct enrollment may not be feasible. Sponsored by third-party providers, these programs provide study abroad opportunities for language acquisition, field experience, research opportunities, and disciplinary courses often in less common locations.

Major/minor credits must be pre-approved by the Hopkins Director of Undergraduate Studies for students’ majors or minors prior to participation. Third-party providers offer additional support services, including assistance with applications, housing, registration, visas and onsite support. In most cases grades (TR courses) from the program will not post on students’ Hopkins transcript or be included in Hopkins grade point averages. Transcripts with grades from a U.S.-accredited School of Record will generally be available through the third-party provider.

Non-Approved Programs

Johns Hopkins does not encourage students to participate in non-approved/vetted programs. Students with sound academic rationales for participation on a non-approved program meet with the Director of Study Abroad to petition approval of an alternative program.

Eligibility

Students are required to meet with a study abroad advisor prior to applying to study abroad. All study abroad programs must be approved by the Office of Study Abroad prior to participation in order to transfer credit toward Hopkins degree requirements.

Eligibility for study abroad can vary by type of program. Students must meet the minimum eligibility requirements of both Johns Hopkins University and the program abroad.

Johns Hopkins Eligibility Requirements:

- Term GPA of 3.00 or higher the semester of application
- Students must complete at least 100 credits at the Homewood Campus
- Students must complete their last semester prior to graduation in residence at the Homewood Campus

- Students must be in good academic, disciplinary and financial standing
- Leave of Absence: Students may not apply for study abroad while on Leave of Absence. Students must be enrolled the semester of application to be eligible to study abroad.

Program Eligibility Requirements:

Many programs have additional eligibility requirements. In some cases those requirements will be more stringent than the Hopkins minimum eligibility.

The program specific eligibility requirements might include:

- Language proficiency requirements. Students must demonstrate language proficiency at the college level, either through courses taken at a U.S. college or university, AP credit or university administered placement tests.
- Cumulative GPA of 3.0 or higher (e.g., Oxford requires a GPA of 3.7 or higher)
- One year or more of college-level education
- Course prerequisites: Students must have course prerequisites as determined by the host institution in order to register for classes abroad.

Credit and Residency Requirements for Study Abroad

For the purposes of fulfilling university residency requirements, up to 30 credits from study abroad courses are considered “in-residence” and may be included in the 100-credit university residency requirement (Effective for freshmen beginning in Fall 2014). Students may be awarded a full-year of credit from Homewood Abroad (HA) courses or up to 30 credits from study abroad courses taken through direct enrollment or vetted programs toward their undergraduate degrees.

Students on departmentally-sponsored programs with HA courses are held to the same credit limit guidelines and credit overload policies as if the student was on the Homewood campus. In addition, if these students exceed 30 credits from their abroad courses, they may apply excess study abroad credits to the general 12-credit transfer credit maximum. Total credits from study abroad courses and domestic transfer courses may not exceed 42 credits.

Students may enroll in study abroad in a combination of semester and/or summer/intersession abroad programs, but students may not enroll in three consecutive fall/spring semesters abroad.

Students may participate in summer and intersession programs abroad any term after matriculation.

Students must have completed at least three semesters of coursework on the Homewood campus prior to enrolling in a semester/academic year program abroad. This means students may study abroad for a semester or academic year beginning the second semester of their sophomore through the fall semester of their senior years. An exception to this policy is the Hopkins Oxford St. Anne’s College program which offers a full year abroad for sophomore students.

Study Abroad in Home Country/Country of Citizenship

International students are encouraged to take full advantage of study abroad opportunities by pursuing studies outside the United States and their home countries. Johns Hopkins will not approve study abroad at locations where students have completed secondary education or where
they have lived and/or worked within eight years of matriculation at Johns Hopkins. Students who wish to take courses at universities in their home countries will be asked to petition the Faculty Advisory Committee for Study Abroad. Students must present a strong academic rationale for the program.

**Academic Policies**

**Matriculation Status**

All students on study abroad programs who have completed the mandatory procedures established by Johns Hopkins prior to departure remain enrolled as full-time, matriculated students. This official status is recorded as off-campus matriculated.

**Credits Required for a Semester/Academic Year Abroad**

Students are required to enroll in the equivalent of 15 credits per semester while abroad. Students who wish to take fewer than 15 or more than 18 credits a semester must obtain written permission from the Director of the Office of Study Abroad.

**Credit for Courses Taken Abroad**

Students may earn up to 30 credits for study abroad from any combination of academic terms – semester, academic year, summer and intersession.

Students may transfer a full-year of credit from Homewood Abroad Courses (HA) or up to 30 credits from authorized Study Abroad Transfer Courses (TR) toward their Hopkins undergraduate degrees. Students may apply up to 12 additional transfer credits from pre-approved programs abroad, with a 42-credit transfer credit maximum from all study abroad (HA/TR) and domestic courses combined.

As part of the Hopkins application process, students are required to have pre-approval for transfer of credit for all overseas course work prior to studying abroad. Pre-approval of transfer of credits toward major and/or minor requirements is granted by the Director of Undergraduate Studies in students’ academic departments. Pre-approval of transfer of credit toward distribution requirements is granted by the Director of Study Abroad. Final approval of credit and transfer of courses occurs after students have returned to Hopkins.

Courses must be completed with a grade equivalent of C or better to be eligible for transfer of credit toward a Hopkins degree. Transcripts from the program abroad should be sent to the Director of the Office of Study Abroad for credit evaluation and transfer of credit. The Director will contact students when the official program transcript has been received.

Students should remember to save electronic copies of syllabi, course descriptions, reading lists, assignments, papers, and examinations. Students will need to submit these to the Director of Study Abroad and/or the Director of Undergraduate Studies for their major and minor in order to complete the credit evaluation and transfer of credit.

**Transfer of Credits from International Institutions without Pre-Approval**

Students who pursue coursework at an international institution without pre-approval may request these credits be transferred after completion. However, these credits will be reviewed and, if acceptable, will be processed as transfer credits, not study abroad credits. Therefore, these credits are subject to the 12 credit transfer maximum.

**Grades and Transcripts**

Courses taken at overseas programs are entered onto the official Hopkins transcript along with the name of the host school and location of the study abroad program.

**Grades and Transcripts: Hopkins Departmental Programs**

Grades from most Hopkins Departmental Programs (Hopkins Departmentally Sponsored Semester and Year Programs, Hopkins Summer Abroad and Hopkins Intersession Abroad) are posted on transcripts and are calculated into students’ term and cumulative GPA. These courses will appear on the Hopkins transcript as AS/EN/HA courses with Hopkins course numbers (e.g. HA.100.320 – History of China).

**Grades and Transcripts: Hopkins Approved Programs**

All students on Hopkins Approved Programs (Vetted Programs and Direct Enrollment) must take courses abroad for a grade. Students will not receive credit for pass/fail courses taken abroad. Students must receive the equivalent of a C or higher in order to receive Hopkins credit. Grades from Hopkins Approved Programs do not appear on the Hopkins transcript and will not be calculated into the GPA. These courses will appear on students’ transcripts as TR courses (e.g. TR.100.300 – History of China). Students’ transcripts reflect how credits earned abroad have been awarded toward their Hopkins degree.

**Housing Policy**

Johns Hopkins University vets and approves study abroad programs based on academic quality, cultural immersion, and health/safety practices. Housing is an integral aspect of the abroad experience in that it promotes language and communication skills and provides opportunities for personal growth. In addition, housing organized by program sponsors provides an additional layer of safety and security.

For these reasons, Johns Hopkins University requires the use of program-established housing in home stays, residences, dormitories, or program-provided apartments by all Hopkins students on approved study abroad programs. Furthermore, Johns Hopkins University strongly encourages students to participate in a home stay experience if that option is available. Students who want to make independent housing arrangements should set up an appointment to meet with the Director of Study Abroad to discuss options and petition for approval.

**Study Abroad at Locations Under Department of State/WHO/CDC Travel Warning**

Travel Warnings are issued by the United States Department of State to describe long-term, protracted conditions that make a country dangerous or unstable. A Travel Warning is also issued when the U.S. Government’s ability to assist American citizens is constrained due to the closure of an embassy or consulate or because of a drawdown of its staff. The WHO and CDC post travel warning and alerts in the event of public health crises.

The Johns Hopkins University does not permit undergraduates to study abroad in locations with travel warnings. Despite this warning, if a student believes he or she has a sound academic reason to study at a chosen site, the student may file a petition for individual exemption in order to have their course work recognized for academic credit at Johns Hopkins.

**Financial Structure of Study Abroad**

**Departmental Programs (semester/academic year)**
Students studying abroad on semester and year Johns Hopkins departmental or exchange programs are charged Hopkins tuition. In most cases, an additional fee is assessed to cover services that might include housing, international health insurance, emergency services, and logistical and academic support. Students are billed through the Hopkins Student Accounts Office.

**Departmental Programs (intersession/summer)**

Students studying abroad on a Hopkins departmental summer or intersession program are charged the program fee and billed through Hopkins. Fees vary by program with some including charges for services such as airfare and meals.

**Direct Matriculation and Vetted Programs (semester/intersession/summer)**

Students who study abroad through an external program (direct enrollment at a university abroad or approved provider) are charged the cost of their program as established by the host university or provider and a study abroad and application fee equivalent to 12% of Johns Hopkins tuition. Johns Hopkins is responsible for making direct payments to host universities and providers on behalf of students. Fees will be posted to students’ Hopkins SIS accounts by the Student Accounts Office.

**Additional Costs Associated with Any Program Type**

Students are responsible for all additional costs that are not included in mandatory fees. Additional costs may include: housing, airfare, personal expenses, meals, visas, and other incidental expenses. Some programs may include costs for many of these services as part of their mandatory fees. In those cases Hopkins will include those fees when making direct payment to the provider on behalf of students.

**Billing**

Study Abroad fees will be billed to students SIS accounts by the Student Accounts Office.

The Hopkins Student Accounts Office posts charges in SIS on approximately July 1 for the fall semester, December 1 for intersession, December 1 for the spring semester, and May 1 for summer. Payment arrangements may be made through the Hopkins Student Accounts Office.

The Office of Study Abroad creates a program financial budget worksheet for each student that reflects the estimated cost of attendance for his or her program and details which fees will be posted on students’ JHU account. The financial budget worksheet should be used to assist students and their parents in calculating expenses (the cost of attendance) associated with an academic program abroad. In addition, the Office of Study Abroad provides sample financial worksheets for programs commonly attended by Johns Hopkins students.

**Financial Aid**

Johns Hopkins extends portability of federal, state and institutional financial aid to Johns Hopkins Departmental Study Abroad Programs. Approved Study Abroad Provider Programs and to Direct Enrollment in a University Abroad for the fall semester, spring semester or academic year. Financial aid, including institutional aid may be applied toward the cost of these programs.

For the semester study abroad, the JHU Grant will not increase, even if the study abroad cost is greater than the cost to attend Hopkins. However, the JHU Grant for the semester study abroad may decrease if the study abroad cost is less than the cost of attendance at Hopkins. Students’ financial aid will be credited to their student accounts.

Only loan assistance can cover additional expenses. In most cases, financial aid does not apply to summer and intersession programs. Students may be eligible for external study abroad scholarships.

**Refund Policy**

Students with credit balances may request a refund online (http://pages.jh.edu/~studacct). Refund requests cannot be processed any earlier than 10 days prior to the JHU’s first day of classes.

Students should consider study abroad options carefully prior to making a commitment. Should students withdraw from a study abroad program after having submitted their program acceptance forms or Hopkins acceptance forms, they are responsible for all non-recoverable costs associated with their program. Hopkins will refund recoverable expenses, excluding non-refundable deposits, once we receive a final billing statement from students’ programs. Recoverable expenses are determined by the program provider in consultation with Johns Hopkins. If for any reason study abroad plans change, the Office of Study Abroad should be contacted immediately so we can work out the financial impact of the voluntary withdrawal.

Students involuntarily withdrawn or dismissed from a program for cause will receive no refund, may not be eligible for credit for coursework completed on the program abroad and are responsible for any costs incurred by early dismissal.

Should Hopkins cancel or suspend a study abroad program, we will work with students to either refund recoverable costs or apply fees toward alternate academic programs.

**Conduct and Ethics**

**Conduct**

Students are responsible for their own actions, activities and behavior while participating on a program abroad. Serious consideration of health and personal circumstances should be taken in to account by students when applying for or accepting a place on a program abroad.

Students are obligated to be aware of and comply with local laws and customs while abroad. Respect of local customs includes the conscious awareness of cultural attitudes toward alcohol use and sexual behavior. As representatives of Johns Hopkins in other countries, we ask that students behave in a manner that is respectful of the rights and well-being of others.

Conduct considered unacceptable to Johns Hopkins University includes, but is not limited to, excessive consumption of alcohol; loud and/or abusive behavior; sexual harassment; criminal conduct of any kind, including the purchase, sale, possession or use of drugs other than prescribed medication for legal medicinal purposes. Students’ must notify Johns Hopkins University Office of Study Abroad of any disciplinary or legal issues while abroad.

Students participating in programs abroad are expected to adhere to the Johns Hopkins University Undergraduate Student Code of Conduct (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/student-life-policies), the policies of the program abroad and the terms set forth in the Study Abroad Conditions of Participation agreement.

**Violations of the Code of Conduct, Conditions of Participation and Program Policies**
Students who are alleged to have violated the Hopkins Undergraduate Student Conduct Code, the policies of the program, and/or standards of academic integrity while abroad will be reported to the program director and the JHU Director for Study Abroad. If a violation is determined to have occurred, the program director in collaboration with the JHU Director for Study Abroad will take appropriate disciplinary action, which may include immediate dismissal from the program.

A student dismissed from a program for cause will receive no refund, may not be eligible for credit for coursework completed on the program abroad and is responsible for any costs incurred by early dismissal.

Students must maintain both academic and disciplinary eligibility through the designated start of their study abroad program. Students’ academic and disciplinary records may be reviewed prior to departure. If records indicate a significant decline in GPA, if a cumulative or term GPA falls below JHU or program requirements, or if academic and/or disciplinary sanctions are imposed prior to departure, a student may be involuntarily withdrawn from an approved study abroad program.

**Academic Ethics**

All study abroad students are bound by the Johns Hopkins University Code of Academic ethics both during the application process and while abroad. Students are obliged to refrain from acts which they know, or under circumstances have reason to know, violate the academic integrity of the University. Violations of academic ethics include, but are not limited to: cheating; plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one’s own the same or substantially similar work of another; knowingly furnishing false information to any agent of the University for inclusion in academic records; falsification, forgery, alteration, destruction or misuse of official University documents or seal. All students must sign a Conditions of Participation agreement to adhere to this policy as part of the application process.

**Institutional Research Board**

Students participating in or conducting research abroad must complete the Hopkins IRB process in addition to any institutional review that may be required by the host institution. Failure to comply is a serious breach of research ethics. Students who fail to receive appropriate IRB review of their research will not be able to use the research or data for projects, theses, courses or requirements at Johns Hopkins.

**Graduation Policies**

**Applying to Graduate**

Students who intend to graduate in the next academic year must complete an Application for Graduation as directed by their respective academic advising office. The university confers degrees three times per year and there is one annual commencement ceremony in May.

**Graduating in May**

Most students who enter the university directly from high school graduate in May after eight semesters of full-time enrollment. Full-time enrollment is a minimum of 12 credits. Part-time enrollment is not permitted within a student’s first eight semesters. Because of the requirement that students have full-time status in the semester immediately prior to graduation, students must register for at least 12 credits in the final semester even if all course and credit requirements could be met with fewer than 12 credits.

**Graduating in August**

A small number of students complete their degree during the summer. Students who have completed eight full-time semesters may graduate in the summer if all degree requirements have been satisfied by the degree conferral date (last Friday in August preceding the start of fall semester classes). Students who have not completed eight full-time semesters should see the Graduating Early (p. 34) policies.

**Graduating in December**

A small number of students complete their degree at the end of the fall semester, not including intersession. Students may graduate in December if all degree requirements have been satisfied by the degree conferral date (December 30th or the preceding Friday if the 30th falls on a weekend). Students are required to maintain full-time status (at least 12 credits) in their final semester unless they are in their ninth semester or later.

**Note for students who entered as transfer students**

Transfer students are not subject to the eighth semester restrictions listed above. They must complete at least four full-time semesters at JHU before they are eligible to graduate.

**Completing Graduation Requirements**

Students are responsible for completing the requirements for a bachelor’s degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree). All grades and credits for courses that are required for graduation must be submitted in time to clear students for graduation.

Each student expecting to graduate will receive a final bill from the university. It is university policy that all outstanding accounts must be paid in full before a student’s diploma may be released.

Students who have not completed degree requirements after eight full-time semesters (or four full-time semesters for transfer students) in college may register for less than 12 credits and pay for courses on a per credit basis. With approval of the director of the student’s academic advising office and the major department (in the case of courses required for the major), these students may take courses elsewhere to meet the remaining graduation requirements, but must observe the 12 credit limit on transfer credit. These students also may have part-time status in the semester when they graduate.

Graduating students who are taking courses through the Baltimore Student Exchange Program or in other divisions of the university must make arrangements with their instructors on the first day of class to have final grades submitted to the host registrar and then to the Homewood Registrar by the deadline for submitting grades for graduating students. If such an arrangement cannot be made, students should not register for the course.

Students who graduate in December may remain in university housing and/or continue to participate in student organizations only if they enroll for a minimum of 6 credits during the following spring semester.

A student will not be graduated with unresolved outstanding charges of misconduct or academic ethics violations.

The university does not guarantee the award of a degree. The award of degrees is conditional upon a) satisfaction of all degree and instructional requirements in effect at the time of matriculation as a degree-seeking student (as published in the relevant annual catalog), b) compliance with
the current university and divisional regulations, and c) performance meeting the bona fide expectations of the faculty.

No member of the faculty is obliged to provide students or graduates with an evaluation or letter of recommendation which does not accurately reflect the faculty member’s true opinion and evaluation of the student’s academic performance and conduct.

Graduating Early (less than 8 semesters)
Students are eligible to graduate early at the end of the fall or spring semester if they have completed all requirements for graduation, including the residency requirement (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree/#residencytext). Students graduating early may not use intersession as a final term to complete remaining graduation requirements. Students may not graduate early during the summer except in the circumstances described below:

• Student has at most two incomplete grades in spring semester required courses, or
• Student has one incomplete grade in a spring semester required course and needs one required course in the summer, or
• Student needs one required course in the summer.

These students must meet with their respective advising office to file an August conferral plan prior to the May commencement ceremony. This plan requires proof of summer course registration, if applicable.

Incomplete Grades and Graduation Status
Students with incomplete grades or missing grades in required courses at the date of conferral will not graduate.

Students who have completed at least 8 full-time semesters and have met the residency requirement and who receive one or more incompletes in their last semester in attendance, may complete those incomplete grades and are not required to register for additional coursework unless required for their degree.

Students who have completed less than 8 full-time semesters:

• who receive one or two incomplete grades in required courses during their intended last spring semester should review the Graduating Early (p. 34) policies.
• who receive three or more incomplete grades during their intended last spring semester are required to register for another full-time fall semester (at least 12 credits) in order to complete all degree requirements (including the residency requirement).
• who receive incomplete grades in required course(s) during their intended last fall semester must resolve these incomplete grades no later than the December degree conferral date or register for another full-time spring semester (at least 12 credits) in order to complete all degree requirements (including the residency requirement).

Last Semester Option
In their last semester before graduation, students may request that they be excused from taking the final examination in one or more courses. This option is solely at the discretion of the course instructor. This option is not available to students who are graduating early.

S/U Option in the Last Semester
Students in their final semester, who will have completed at least eight full-time semesters in college when they graduate and who are taking more credits than are needed to complete graduation requirements, may take one or more of the extra courses for S/U credit. Engineering students must have the faculty advisor’s permission, indicated by his/her signature on an add/drop form, to request this option. The faculty advisor’s signature indicates that the student will have completed all degree requirements without this course. In addition, a signature from the Engineering advising office is needed to confirm that the senior has applied for graduation in their eighth (or later) semester. Arts & Sciences students must seek approval from the Academic Advising Office.

Independent Work in the Last Semester
Students in their final semester, who will have completed at least eight full-time semesters in college when they graduate and who are taking more credits than are needed to complete graduation requirements, may take up to 6 credits of independent academic work, either graded or S/U. In addition, the usual limit of no more than 6 credits per year of independent academic work will be waived if the additional credits are for extra credit work done in the final semester.

Graduation Closes the Undergraduate Record
Upon graduation, the undergraduate record is closed. The only permitted changes are the resolution of incomplete grades, missing grades, and grade errors. These changes must be resolved by the first Monday after 30 days have lapsed since the degree conferral date. Students wishing to take additional courses at JHU after graduation should refer to Alumni Enrollment (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/student-status/#alumnienrollmenttext) policies.

General and Departmental Honors at Graduation
Students may receive general honors, departmental honors, or both at graduation. General honors are awarded to students with cumulative grade point averages of 3.50 or better. The final determination is made after all grades have been reported. Departments set their own standards for the award of departmental honors. Students should consult with Director of Undergraduate Studies for their major about the requirements for honors.

General and departmental honors are noted on a student’s academic record following the student’s last undergraduate semester before graduation. In addition, honors are noted in the Commencement program. However, because the program is printed several weeks before the date of Commencement, not all honors are announced in time for inclusion in the program.

Completing an Honors Thesis
Students who are completing an honors thesis for departmental honors must complete the thesis before graduating. Students may not stay on after graduation to complete an honors thesis. Similarly, students graduating at midyear may not register part-time in the spring semester to finish an honors thesis.

Commencement
The university commencement ceremony is held once each year in May.

The student’s academic advising office determines whether a student has completed all requirements and clears the student for graduation and participation in Commencement. Students who graduate in August, December, and May are invited to participate in the commencement ceremony in May following their degree completion. Students who graduate in August may receive permission to walk in the May ceremony preceding degree completion if they file an August conferral plan with
their respective advising office. The diploma and degree will not be awarded until all courses are completed successfully and recorded.

**Student Affairs Resources**

A successful college career is about making sure that what you do to get a degree is enhanced by pursuing interests that complement your studies. Student affairs is dedicated to helping you make your Hopkins experience as life-changing as it is mind-expanding. While our programs start by building community in the place where you live, the residence halls and the surrounding neighborhoods, that work goes a lot further. Whether it is helping you build career skills, work on strategies to succeed in class, embrace a physically and mentally healthy lifestyle, or connect with peers, student affairs has resources available to support you as you explore the many opportunities at JHU. Our dedicated staff members are here to answer your questions and support your journey.

**Student Conduct Code and Non-Academic Policies**

The fundamental purpose of Johns Hopkins University’s regulation of student conduct is to promote and to protect the health, safety, welfare, property, and rights of all members of the University community as well as to promote the orderly operation of the University and to safeguard its property and facilities. As members of the University community, students accept certain responsibilities which support the educational mission and create an environment in which all students are afforded the same opportunity to succeed academically. View the full text of the Student Conduct Code and Non-Academic Policies (https://studentaffairs.jhu.edu/policies/student-code).

This section contains many of the relevant rules and regulations governing undergraduate student nonacademic life on the Homewood Campus. Students are responsible for complying with these policies.

**Student Responsibility**

It is the students’ responsibility to familiarize themselves with the policies of the University and those contained within these policies and procedures. Failure to become acquainted with this information will not excuse any student from responsibility for abiding by the rules and procedures described herein. Personal difficulties, illnesses, or advice contradicting the rules and procedures described herein contained do not constitute automatic grounds for exemption from these policies.

Any waivers to the policies and procedures must be reviewed and approved in advance and are effective only when accepted by the Office of the Dean of Student Life.

The University reserves the right to make changes to these policies and procedures, and other information contained herein as it deems appropriate. Students are urged to consult the Office of the Dean of Student Life and Homewood Student Affairs about any questions that they may have concerning student activities, student life, and student affairs. These standards and procedures are not to be regarded as a contract.

**Undergraduate Academic Ethics Board**

**Constitution of the Krieger School of Arts and Sciences and the Whiting School of Engineering**

**Preamble**

Throughout its history, The Johns Hopkins University has enjoyed a distinguished reputation for academic excellence and integrity. Each member of the University bears a personal responsibility to uphold the ethical standards of the Institution. The Undergraduate Academic Ethics Board has adopted the following procedures for responding in a timely and impartial manner to infractions of the high ethical standards of the academic community. Faculty and undergraduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering are expected to understand their responsibilities as members of the Johns Hopkins University academic community and are bound by these procedures.

**The Undergraduate Academic Ethics Board**

**Section A**

The Undergraduate Academic Ethics Board (hereinafter "The Ethics Board") is a subcommittee of the Academic Council and an independent committee of the Student Council. The Ethics Board is comprised of eight full-time faculty members (four from each school) and a minimum of twelve undergraduate students, as well as a Presiding Official (up to three presiding officials may be trained to fill the role),
who is an undergraduate student. The faculty members are selected by the Vice Deans of Education for KSAS and WSE, respectively, and the undergraduate members are selected by the Student Council’s Committee on Leadership Appointments. Undergraduate members shall serve terms of one academic year or more, beginning on September 1st. A board member may be removed from the Ethics Board if he or she has not met the expectation of the board.

Section B
The Ethics Board is responsible for the maintenance of the academic integrity of the undergraduate programs in the Krieger School of Arts and Sciences and the Whiting School of Engineering and for all matters concerning adherence to this Constitution, including but not limited to: receiving reports of suspected violations, consulting with members of the University community on ways to reduce possible violations, appointing hearing panels, maintaining confidential records, orienting new students to the ethic standards of the community.

Section C
The duties of the Presiding Official are:

1. to plan and oversee all general meetings of the Board
2. to assist in training of the board members selected for the subsequent year
3. to assist in the selection of new board members when requested
4. to provide assistance to the Associate Dean for Student Conduct in his or her duties when requested
5. to oversee all hearings of the Undergraduate Academic Ethics Board and to make procedural decisions

Jurisdiction
The Ethics Board shall have jurisdiction over all undergraduates in the Krieger School of Arts & Sciences and the Whiting School of Engineering. The Ethics Board may assume jurisdiction over a case involving a full time undergraduate in a class in the School of Education and the Carey School of Business.

Violations of Academic Integrity
Undergraduate students enrolled in the Krieger School of Arts and Sciences or the Whiting School of Engineering at the Johns Hopkins University assume a duty to conduct themselves in a manner appropriate to the University’s mission as an institution of higher learning. Students are obliged to refrain from acts which they know, or under circumstances have reason to know, violate the academic integrity of the University. Violations of academic ethics include, but are not limited to:

- cheating;
- plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one’s own the same or substantially similar work of another;
- knowingly furnishing false information to any agent of the University for inclusion in academic records;
- falsification, forgery, alteration, destruction or misuse of official University documents or seal.

Responsibilities of Students and Faculty
Section A
Faculty members are responsible for specifying at the beginning of each semester the basic rules and procedures for any and all coursework, examinations, and other academic exercises. They are also responsible for exercising a reasonable degree of caution while writing, transporting and administering examinations and other graded work. All faculty members and teaching assistants are responsible for taking appropriate actions in accordance with the Constitution in all cases of suspected violations of academic ethics.

Section B
It is the responsibility of each student to report to the professor in charge of the course or to the Ethics Board any suspected violations of academic ethics.

Procedures for Handling Suspected Violations of Academic Integrity
Section A
If a student is suspected of a possible violation of academic ethics, the professor in charge of the course will review the evidence and the facts of the case promptly with the student. If, after speaking with the student(s), the professor believes that a violation of academic ethics has occurred, the professor may (a) settle the case directly with the student with appropriate notification to the Office of the Dean of Student Life (the Professor may also ask the Associate Dean for Student Conduct to serve as a mediator in such instances) or (b) promptly notify the Ethics Board in writing, through the Office of the Dean of Student Life, setting forth the details of the case.

Section B
1. A professor has the authority to settle a case with a student if (a) the current offense does not constitute a second or subsequent offense, and (b) the settlement does not call for a notation on the student’s transcript. It is the responsibility of the professor to check with the Office of the Dean of Student Life to determine whether the student has any prior record of misconduct. If the circumstances surrounding the case do not satisfy the above criteria, then the professor must send the case to the Ethics Board for resolution.
2. If the professor settles a case with the student(s), the penalty or penalties imposed may only be selected from items (b) through (e) listed under the Penalties (p. 38) section. If the professor feels that none of these penalties is appropriate, he/ she must submit the matter to the Ethics Board for resolution.
3. If a case is settled directly between the student and the professor, then the professor must submit the name of the student and the settlement agreed upon to the Office of the Dean of Student Life.

Section C
1. If the student(s) and professor are unable to reach a settlement, then the professor must file a written charge of a violation of academic ethics to the Office of the Dean of Student Life for resolution. Professors should make every effort to take such action within one week of the alleged occurrence of academic misconduct.
2. In the event that a case arises near the end of a semester, the professor must submit a charge (as outlined above) at least one week before the official last day of classes. Any charge received after this date may be held over until the following semester. When possible, hearings could be held during Intersession and summer. For summer hearings, officers and board members may be drawn from the Board for the subsequent academic year at the discretion of the Associate Dean for Student Conduct.

Section D
Upon receipt of a charge of a violation of academic ethics (that constitutes a student's second violation) from a professor or an egregious charge that if found responsible would require the student's
When the Associate Dean for Student Conduct receives a charge of a violation of academic ethics from a professor, he/she shall:

1. file the professor's written charge in the Ethics Board's file in the Office of the Dean of Student Life.
2. collect all pertinent evidence.
3. set a hearing date, time, and location.
4. notify the accused student(s) of the charge and hearing date, time, and location.
5. select members of the Ethics Board to serve on the hearing panel.

Hearing Panels

Section A

When the conditions warrant a hearing, the Associate Dean for Student Conduct shall appoint a hearing panel of unbiased persons to consider the case.

Section B

A hearing panel shall consist of two faculty members and three students and shall ordinarily be selected from the members of the Ethics Board. A Presiding Official shall conduct the proceedings of the hearing panel. He or she is responsible for maintaining records of all procedural decisions.

Section C

If any member of the panel feels they are unable to treat all parties fairly, they should remove themselves from the board, and the Associate Dean for Student Conduct may appoint a hearing panel of faculty or full-time undergraduate students from the Krieger School of Arts and Sciences and the Whiting School of Engineering who are not members of the Ethics Board. Such a circumstance might occur if a panel could not be appointed from among the members of the Ethics Board.

Section D

The professor shall submit all relevant documents to the Associate Dean for Student Conduct at least five business days prior to a hearing. The accused student shall submit all relevant documents to the Associate Dean for Student Conduct at least two business days prior to the hearing. If any evidence is submitted after this date, both parties will be notified of its addition.

Section E

The accused student shall be notified in writing of a charge of a violation of academic ethics at least five business days prior to a hearing. Upon receipt of notification, the accused student(s) shall have the opportunity to inspect all documents under the supervision of the Associate Dean for Student Conduct.

Section F

The hearing panel members shall not be informed of details of the charge(s) before the hearing is convened and shall keep all information confidential.

Section G

The accused student may discuss procedures with the Associate Dean for Student Conduct or a designee but may not approach members of the panel, the accuser, or the accuser's witnesses concerning any matter directly or indirectly related to the hearing.

Section H

1. Students charged with misconduct arising from a single incident or occurrence may have their hearings joined at the discretion of the Associate Dean for Student Conduct. Charges of academic misconduct against a single student arising from several incidents or occurrences may also be heard at one hearing at the discretion of the Associate Dean for Student Conduct.
2. The accused student shall receive written notification of a joinder of charges.
3. When a hearing involves a joinder of charges, the guilt or innocence of each student shall be ruled upon separately. Similarly, joined charges against a single student shall be ruled upon individually.

Section I

1. If an accused student fails to appear for the hearing after having been duly served with notice, or withdraws from a hearing before its conclusion without the written permission of the Associate Dean for Student Conduct, immediate suspension from the University may be imposed. Such a suspension shall continue until the hearing can be concluded with the student present.
2. Students are responsible for appearing as witnesses before a hearing panel as requested by the Ethics Board, and no student may willfully interfere with the processes of the Ethics Board or its hearing panels. A student's failure to appear and tell the truth in response to all relevant questions, or his or her interference with the processes of the Ethics Board or its hearing panels constitutes a violation of academic ethics.

Section J

Those present at a hearing of the Ethics Board are limited to the following: the Presiding Official, panel members, the member of the University bringing charges, the accused student(s), and not more than one representative of the accused student(s). Any witness called by either party may be present only when their testimony is required. The Associate Dean for Student Conduct or other administrative officer may also attend the hearing but cannot decide responsible or not responsible regarding the accused.

Section K

A full and complete record shall be made of the proceedings via digital audio recording. No record of the deliberation shall be made. The hearing panel may, however, prepare a brief written report detailing the reason(s) for the finding of guilt or innocence and any penalties imposed. The Office of the Dean of Student Life will maintain a permanent file of all such reports. If a student is found responsible, they will receive written notification of their sanction(s).

Section L

1. The Presiding Official shall conduct the hearing in an orderly fashion. He/ She shall have the authority to rule on peremptory challenges, exclude testimony and evidence that is repetitious or irrelevant to the charges, and shall make final decisions of all questions of procedure. They may ask the Associate Dean for Student Conduct questions for clarification.
2. The Presiding Official may recess the hearing when it is deemed necessary. During a recess of a hearing, no discussion of the case by panel members, the accused student, the accuser, or witnesses will be permitted.
Section M
The accused student shall be presumed not responsible until found responsible. A determination should be reached during deliberations based solely upon the information presented during the hearing, and not upon any preconceived assumptions.

Section N
Upon calling the hearing to order and introducing the panel, the Presiding Official shall read the charge(s) and ask the accused student to enter a plea of responsible or not responsible.

Section O
If the accused student pleads responsible to the charge(s), the professor shall present testimony which can aid the hearing panel in determining the severity of the offense. The student shall then be given the opportunity to present information to the hearing panel which he/ she wishes to be considered in determining a penalty. The hearing panel may also ask questions of both parties in order to ascertain the severity of the offense.

Section P
1. If the plea is not responsible, the professor shall present testimony and evidence in support of the charges. Evidence may include documents, the professor's own testimony, and that of any witnesses. Before calling a witness, the professor should be prepared to establish that the witness will present evidence relevant to the case at hand. Only the panel may ask questions of the accused or the professor. The Associate Dean for Student Conduct may curtail questioning if it is determined to be irrelevant or repetitious.
2. Following the professor's presentation, the accused student shall present testimony and evidence under the same restrictions.
3. Following the accused student's presentation, the professor and the accused student may recall witnesses if they can establish the need to do so. Such a recall of witnesses shall be subject to the discretion of the Associate Dean for Student Conduct.
4. After testimony from both sides has been heard, the professor and the accused student shall be given the opportunity to present a closing statement and any mitigating circumstances which they feel are appropriate. If the charge being heard constitutes a second or subsequent offense by the student, the student shall have the opportunity to comment on each prior offense individually.
5. Following the closing statements, the professor, the accused student, his/ her representatives, and all witnesses are excused. All parties shall remain available and shall inform the Presiding Official of their whereabouts.

Section Q
1. The panel shall deliberate the charge(s) until each member is ready to vote or the Associate Dean for Student Conduct determines that any further deliberation will not be productive.
2. The accused student, professor, and/ or any witnesses may be recalled for further testimony at any time during the panel's deliberation.
3. The individual decision of each hearing panelist on responsible/not responsible shall be based upon a preponderance of the evidence.
4. Voting of the hearing panel may be by secret ballot or verbally. Majority of votes will determine responsible or not responsible.
5. The accused student will be asked to return, and told of the results of the panel.

Section R
Notice of the outcome of the hearing shall be sent to the student(s), professor, and the Dean of the Krieger School of Arts and Sciences or the Whiting School of Engineering, depending on the school in which the student is enrolled. A copy will also be filed in the Office of the Dean of Student Life.

Penalties
Section A
If a student is found responsible for a violation of academic ethics, whether by direct settlement with the professor, by pleading guilty at a hearing, or by a ruling of a hearing panel, a notification of the violation must be made in the student's file explaining the violation.

Section B
1. One or more of the following penalties may be imposed upon students found responsible for violations of academic ethics:
   a. A notation placed on the student's permanent transcript explaining the violation and punishment.
   b. Retake of the examination, paper or exercise involved.
   c. Score of zero on the examination, paper, or exercise involved.
   d. Lowering of the course grade.
   e. Failure in the course.
   f. Failure in the course with a notation on the transcript that the grade was for a violation of academic ethics.
   g. Failure in the course with suspension from the University.
   h. Failure in the course with suspension from the University and notation on the transcript that the failing grade was for a violation of academic ethics.
   i. Suspension from the University for at least one Semester.
   j. Suspension from the University for at least one Semester with a notation on the transcript that the cause was a violation of academic ethics.
   k. Expulsion from the University with a notation on the transcript that the cause was a violation of academic ethics.
2. Hearing panels shall make every effort to select a penalty appropriate to the severity of the offense, and may take into consideration any mitigating circumstances brought to its attention, as well as any record or absence of prior misconduct. A hearing panel may also impose a penalty that is not enumerated above if to do so would appropriately reflect the severity of the offense.
3. In most cases, the penalty for a second or subsequent finding of guilt must be selected from items (f) through (k) of Section B-1 above.

Section C
The penalty decided upon by the hearing panel must be agreed upon by the majority of the panel.

Section D
A student found responsible for a violation of academic ethics in a course forfeits the right to withdraw from the course or to change a graded course to pass/fail, and any withdrawal from that course or change effected prior to the finding of responsibility shall be voided.

Section E
A student who has committed a violation of academic ethics has the option of making a timely and personal report of the offense to the professor in charge of the course or to the Dean of the respective school. A self-reported violation of academic ethics reported and dealt with under this section shall not constitute a first offense. Self-reporting is
defined as reporting a violation of academic ethics without prompt by an instructor.

Appeals

Section A
A student found responsible for a violation of academic ethics may appeal the decision of the hearing panel to the Vice Dean of Undergraduate Education (or his or her designee) of the Krieger School of Arts and Sciences, the Vice Dean of Undergraduate Education of the Whiting School of Engineering, whichever is applicable. The appeal must by filed within 10 business days from the date of the decision from which the appeal is taken. The appeal must be in the form of a written statement. The Vice Dean is authorized to make a disposition of the appeal based on the written appeal. The Vice Dean must send the accused student a written notification of the disposition of the appeal. The Vice Dean may uphold, overturn, or amend any or all sanctions based on his/her findings. A full written report of the disposition of each appeal shall be made by the Vice Dean and the Dean of the respective school and to the Associate Dean for Student Conduct.

Records

Section A
Records of the Ethics Board are available to members of the Board, faculty, and administrative staff, including the pre-medical and pre-law advisors. Records will only be released if a written request has been made and approved by the Associate Dean for Student Conduct.

Section B
The records of the Undergraduate Academic Ethics Board shall be held in the Office of the Dean of Student Life.

Section C
1. It is strongly encouraged that if formal charges have not been brought against an accused student within three months or within the first month of the fall semester for charges carried over from the previous academic year, then any references to the accusation(s) shall be eliminated from all files into which they had been placed.
2. A case file concerning an accused student shall be retained for seven (7) years after that student graduates or otherwise leaves the University.

Summary of Procedures for Responding to Infractions of the Academic Ethics Code

Violations of Academic Integrity
Violations of academic ethics include, but are not limited to: cheating, plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one's own the same or substantially similar work of another; knowingly furnishing false information to any agent of the University for inclusion in academic records; falsification, forgery, alteration, destruction or misuse of official University documents or seal.

Suspicion of a Violation of Academic Integrity
Faculty members and teaching assistants have a responsibility to act in accordance with the ethics code in all cases of suspected violations of academic ethics. Students have a responsibility to report suspected violations of the ethics code to the professor in charge of the course or to the Ethics Board.

The Associate Dean for Student Conduct in Mattin Suite 210, 410-516-8208, is the liaison for the Ethics Board. If a student is suspected of a violation of academic ethics, the professor in charge of the course must contact the liaison for the Ethics Board to determine whether the student has a record of a previous violation of academic ethics. The professor will review the evidence with the student. If the professor believes that a violation of academic ethics has occurred, the professor may

1. settle the case directly with the student, provided the student does not have a previous violation of academic ethics on file with the Office of the Dean of Student Life (the Associate Dean for Student Conduct may be requested by the professor or student to mediate in such instances)
2. promptly request a hearing by the Ethics Board (by contacting the liaison) and submitting a written charge, describing the details for the case.

Direct Settlement between the Professor and Student
If this is a first offense, the professor may settle the case with the student if the student admits responsibility. Written notification of the violations and the settlement, signed by the professor and countersigned by the student, should be sent to the Associate Dean for Student Conduct. The penalty may be selected from the following: retake the examination, paper or exercise involved; earn a lower grade in the course; or fail the course. If the professor or student feels that none of these penalties is appropriate, the case must be submitted to the Ethics Board for resolution. If this is a student's second violation of academic ethics, the case must be submitted to the Ethics Board.

Ethics Board Hearings
When direct settlement is not possible, due to either a dispute of the charge, a second charge, or a faculty referral, the case is brought before the Ethics Board. A hearing panel of two faculty and three student members is then scheduled. The accused student will be notified of the charge(s) and hearing date, time and location. If the case is reported at the end of the semester, when students and faculty are busy with examinations or have left campus, the case may be held over until the start of the next semester.

The professor submits all relevant documents to the liaison of the Ethics Board prior to the hearing. The accused student is given an opportunity to inspect all documents prior to the hearing under the supervision of an official of the Office of the Dean of Student Life. The student may also bring one representative to the hearing. The representative must be a full-time student presently enrolled in the School of Arts and Sciences or the School of Engineering. A tape of the hearing is made and can be furnished to the accused student for the purpose of preparing an appeal. No recording of the deliberation is made, although a brief written report is prepared detailing the reason(s) for the panel's decision and the penalties imposed.

The hearing panel members are not informed of the details of the charges until the hearing is convened. The accused student may not approach the members of the panel, the accuser, or the accuser's witnesses regarding any matter related to the hearing.

The hearing is conducted in an orderly fashion with testimony taken in turn from the accuser, the accused, and from witnesses. Cross-examination and closing statements are allowed. The decision of the
hearing panel on responsibility shall be based upon a preponderance of the evidence. At least three votes are required for a finding of responsible, otherwise the case is dismissed.

Penalties and Records
If a student is found responsible for a violation of academic ethics, either by direct settlement with the professor, or by a ruling of a hearing panel, a notation explaining the violation must be made in the student's academic advising records. Penalties for a violation that is heard by a Hearing panel may include those available to a professor who reaches a direct settlement with the student, plus others including notations on a transcript and suspension or expulsion from the University. A student found guilty of a violation of academic ethics in a course forfeits the right to withdraw from the course, to change the graded course to satisfactory/unsatisfactory, or to absolve the grade by repeating the course.

Self-Reports of Violations
A student who reports his/her own violation of academic ethics to the professor in charge of the course, or the Dean of the school, is subject to penalties, but the violation is not considered a first offense.

Student Life Policies
Student Activities Alcohol Provisions
Generally, alcohol is not served at events sponsored by University-affiliated student groups. If a student group does desire to sponsor an event at which alcohol will be served, it must receive permission of the Director of Student Activities prior to the event taking place. The conditions under which permission will be granted are as follows:

1. Only beer and/or wine may be served. Kegs and other bulk quantities are not permitted unless they are managed and served by a third-party vendor and approved by University officials.
2. The organization must agree to follow the procedures for assuring that persons attending the event who are underage will not be served (e.g. the employment of a licensed third-party security vendor). In addition, the organization and/or individuals in the organization may be subject to University disciplinary action if underage patrons are served alcoholic beverages.
3. Publicity (posters, etc.) for events at which alcoholic beverages are served must not include any mention of beer/wine. "Refreshments available" or some facsimile thereof will be acceptable. News-Letter ads may publicize beer/wine, but it cannot be the main thrust of the ads.
4. Persons who violate or attempt to violate these regulations (restrictions) will be asked to leave the event and may be subject to university disciplinary action. The Associate Dean for Student Conduct limits the number of events at which alcohol may be served. Organizations that violate the alcohol policy will lose the privilege of serving alcohol at their events and may be subject to University disciplinary action.
5. No alcoholic beverages may be purchased through student organization funds nor may the purchase of alcoholic beverages for members or guests be undertaken or coordinated by any member in the name of or on behalf of the student organization.
6. The sale of alcoholic beverages at Johns Hopkins' student organization events must be through a State of Maryland licensed vendor and must be sold on a "per drink" basis to individuals; "open bar" events are prohibited. Beverages should be sold at reasonable market value and prices should be included in the event contract. Profit sharing is prohibited. Free drink vouchers are prohibited. The distributing of drink tickets/vouchers at student organization events is prohibited.
7. No member of Johns Hopkins' student organizations, collectively or individually, shall purchase for, serve to, or sell alcoholic beverages to anyone under the age of 21. It is the role of the third party vendor to acquire, distribute and monitor the alcohol.
8. Alcohol events hosted on campus by Johns Hopkins' student organizations must comply with University policies regarding the reservation of adequate security and age verification procedures.
9. All recruitment activities hosted by a Johns Hopkins' student organization must be dry, meaning no alcoholic beverages will be served.
10. Johns Hopkins University student organizations may not collect admissions fees (cover charges) in order to defray the cost of alcohol.

Policy on Firearms
The possession, wearing, carrying, transporting, or use of a firearm or pellet weapon is strictly prohibited on University premises. This prohibition also extends to any person who may have acquired a government-issued permit or license. Violation of this regulation will result in a disciplinary action and sanctions up to and including expulsion, in the case of students, or termination of employment, in the case of faculty and staff. Disciplinary action for violations of this regulation will be the responsibility of the divisional student affairs officer, Dean or Director, or the Vice President for Human Resources, as may be appropriate, in accordance with applicable procedures. Any questions regarding this policy, including the granting of exceptions for law enforcement officers and for persons acting under the supervision of authorized University personnel, should be addressed to the appropriate chief campus security officer.

Sexual Misconduct Policy
Effective August 19, 2015, these procedures no longer apply to cases of sexual misconduct, which includes sexual harassment, sexual assault, relationship violence, and stalking. Complaints of sexual misconduct are processed pursuant to The Johns Hopkins University Sexuality Misconduct Policy and Procedures (see http://sexualassault.jhu.edu/policies-laws/).

Open Space Policies
This policy governs any open space on campus, and applies to all Johns Hopkins University students, alumni, employees, and visitors.

• Alcoholic beverages are prohibited in open spaces at all times, except by written permission of the Office of the Dean of Student Life.
• Glass bottles of any kind are prohibited in open spaces after dark.
• All trash must be disposed of in trash cans or removed from open space.
• The operation of any non-University vehicle in open space is strictly prohibited.
• Disorderly conduct, disruptive or mischievous behavior, vandalism, fights, assaults, or any other violation of University policy, the Student Conduct Code, state law or city ordinance is prohibited.
• All persons on open spaces, including Johns Hopkins University students and guests, must comply promptly and completely with the requests of University staff acting in accordance with their duties, including, but not limited to, requests for identification, for noise or activity abatement, dispersal, and for the surrender of beverages for examination and/or confiscation.
• Students are responsible for informing their guests of all University policies and are accountable for the actions of their guests.

• Skateboarding is permitted on paved and bricked paths only. Skateboarding on stairs, benches, railings, and any other than paved or bricked paths is prohibited. Skateboarders are urged to use caution and yield to pedestrians.

While voluntary compliance with open space policy is expected, where violations are found, enforcement staff may, at their discretion, issue a warning, or, without warning require any person or group of people to leave open space for a policy violation and/or for exigent circumstances. Enforcement staff, at their discretion, may confiscate alcoholic beverages from persons in open spaces. Violators of state law or city ordinances may be subject to arrest by Campus Security Officers or Baltimore City Police.

Students who are found in violation of the alcoholic beverage restriction in this policy may be subject to disciplinary action, including up to a $50 fine for a first violation, and may face additional sanctions based upon the nature and circumstances of the misconduct incident. Additional violations of the policy will bring more severe sanctions. In addition to fines, sanctions for misconduct may range from a warning through expulsion.

Students who violate other sections of this policy, or who fail to comply with Campus Security Officers and other staff acting to enforce this policy, may face disciplinary action.

Open Space Policy Enforcement Procedures
Undergraduate students suspected of violating an open space policy may be referred to the Office of the Dean of Student Life and may face disciplinary action. Graduate students may be referred to their academic dean. The Johns Hopkins Office of Campus Safety and Security is working in conjunction with the division of Homewood Student Affairs to ensure enforcement of this policy. Campus Security Officers will patrol open spaces regularly to promote adherence to the open space policy. The following guidelines will be used:

• Alcoholic beverages will be confiscated.

• Beer kegs will be confiscated.

• Glass bottles will be confiscated or their proper disposal directed.

• Individuals who possess alcoholic beverages may be asked for personal identification. Individuals found violating policy or individuals who fail to comply with request of enforcement staff acting in performance of their duties, may be asked for personal identification and/or directed to leave the area.

If proof of identity is not provided:

• the individual may be escorted from University property as a trespasser

• the individual may be detained at the discretion of Campus Security Officers in order to establish his or her identity.

Reports of violations of open space policies will be submitted to the Office of the Dean of Student Life and will include the identity of the person involved. Undergraduate first-time violators may be subject to disciplinary action including, but not limited, a fine of up to $50. Undergraduate violators who have committed a prior offense, or have committed misconduct in open spaces, in addition to an alcohol possession violation, may face additional disciplinary action. Individuals who violate state law or city ordinance on open space may be subject to arrest by Campus Security Officers or Baltimore City police. Trials for arrested persons are conducted in the State Courts of Maryland.

Student Organization Room Reservation Policy
At the conclusion of each semester, registered student organizations may reserve space for the subsequent semester during scheduling period. All groups are limited to reserving one ninety-minute weekly meeting and two special events. Any weekly meeting request not submitted during scheduling period may need to request classroom space at the beginning of the semester. Groups may submit requests for additional event space at the beginning of the semester through the online link listed below. Each student organization will designate two people per academic year who will take responsibility for reserving rooms with Scheduling and Events Services. All space reservations must be submitted 10 business days prior to the event date to Scheduling and Events Services and through Hopkins Group with the office of Student Leadership and Involvement. These are two separate online processes that must be completed. Any group failing to use a confirmed room for two consecutive meetings without cancelling in writing with Scheduling and Events Services, will be notified their remaining reservations are canceled for that semester. In addition, if your group has a non-active status, please resolve those issues before submitting your space request, otherwise your request will not be processed. If your group does not appear on the list of recognized student organizations, please contact the office of Student Leadership and Involvement.

If you have further questions regarding scheduling and space requests, please call 410-516-8209 for further assistance or visit the Scheduling and Events Services website (https://studentaffairs.jhu.edu/community-living/scheduling-event-services). To complete an online space request, please visit eventscheduling.jhu.edu.

Postering Policy
Postering is one of many ways to publicize your group’s events. There are a number of community bulletin boards in the Mattin Center Courtyard and Levering Hall. Academic and other departments may maintain their own bulletin boards. When you post, be sure you know on whose board you are placing the flyer, and follow that group’s rules. These rules and regulations govern posters and other forms of advertising on campus in a fair manner. In addition, posters and other forms of advertising should not disrupt academic classes, programs, or activities and should not damage the property of JHU. Failure to comply with the following guidelines may result in removal of poster, fines, and/or disciplinary measures

1. Posters and flyers may be placed on campus bulletin boards only.
2. Bulletin board flyers should be 8.5” x 11” and not fixed over another flyer. Requests for exceptions for larger flyers or posters must be forwarded to the Office of Student Activities in the Mattin Center.
3. Flyers advertising expired events or not meeting this policy’s criteria, may be removed.
4. Chalk is allowed to promote events on sidewalks only. Any group that uses chalk anywhere other than the sidewalks will receive a bill from Plant Operations charging the group for the clean up. This is not negotiable. Chalking should only be done in areas that can be rain-soaked. Check with the Office of Student Activities for allowable locations.
5. Banners may be hung on approved campus structures. Contact the Office of Student Activities in the Mattin Center for scheduling, approval, and necessary arrangements for hanging banners on campus.
6. Painted mural boards are coordinated by the Office of Student Activities in Mattin 161. Please email studentactivities@jhu.edu for reservations or more information.

Note: The University considers placing posters on glass to be a fire hazard and custodians are instructed to remove any potentially hazardous posters. These restrictions exist in order to improve the appearance of the Hopkins campus and to maximize the usefulness of the bulletin boards.

Check with Residential Life Office before posting in any residential area, designated boards excepted, and check with department offices before posterizing on their boards. Flyers posted in residence halls must include all necessary information; no teasers.

Poster Locations (Subject to Change)

- Levering Hall: Outside Levering Market (Garland and Arellano sides), lower Levering hallway, and Union Desk
- MSE Library: M-Level by pay phones, on B, C, and D levels near elevators
- Remsen: First and third floors
- Residents: A & B, each AMR house, Wolman, McCoy: one board per floor, AMR and Wolman mailrooms, McCoy lobby, and the top steps next to the Snack Bar
- Maryland Hall: First floor
- Shaffer: Next to rooms 3 and 100
- Outside: Outside Levering, and between MSE and the Remsen - Charles Street Gate.

Vending and Solicitation Policy

All vendors who wish to sell their goods in the Levering Union, on the Levering Patio, or on the quadrangles during special events such as Commencement must apply to the Director of Levering Hall & the Mattin Center located in Levering 102. The Director of these facilities retains the right to determine the appropriate vending times, locations, and goods sold. Vendors are required to sign a license agreement with the Director. Vendors will refrain from selling goods displaying the name Johns Hopkins University or the Johns Hopkins University seal or logo. Vendors will be prohibited from selling compact discs, tapes and other items that directly compete with items sold in other establishments on campus. Sales of computer and telecommunications equipment must be coordinated through the Purchasing and Telecommunications departments. Credit card promotions to students are prohibited.

Group Members and Leaders Academic Policy

All undergraduate student organization leaders must maintain a minimum Grade Point Average of 2.0 in order to remain in or to be elected/ selected to a student leader position. All undergraduate student organization members and leaders must be enrolled in at least 6 credit hours.

Fundraising

Any group that solicits funding from outside agencies (i.e. businesses, corporations, foundations) must submit all requests to the Office of Student Activities for review and approval.

University Policy on Automobiles and Parking

Undergraduate resident students are strongly discouraged from bringing cars to campus. The City will not grant residential parking permits to students residing in University housing and students who are residing in University housing are not eligible for University parking permits. Without campus or residential parking access, resident students with cars face ticketing and towing.

Violators are subject to the applicable University and City penalties, which include substantial fines, "Denver boots", and towing fees, which typically amount to several hundred dollars. Students who live more than one mile from campus can purchase a parking access card to park on campus while using University facilities. Owners of two-wheeled motor vehicles must also pay for parking.

The parking rules are in effect Monday through Thursday from 7 a.m. to 8:30 p.m., Friday 7 a.m. to 7 p.m., and on Saturday and Sunday the campus is open. Those who are eligible for paid parking must bring with them the following to show proof of eligibility:

- A valid J-CARD
- Vehicle registration in your name, your parent's name or your spouse's name
- Proof of local address
- Paid registration form (permit to register receipt)

University Policy on Pets

No pets of any kind are permitted in university housing. The University also has the following policy on dogs:

1. While on university property, dogs must be leashed, licensed, and under the control of their owners or handlers at all times.
2. Dogs are not allowed in the common areas of any University building, including classrooms, except when being taken to and from non-public areas. (Guide dogs for the visually impaired are permitted in common areas.)
3. Dogs may not be tied up and left unattended on any campus grounds.
4. Owners or handlers are responsible for the removal of excrement deposited by their animals on University property.

If any infraction of these rules is observed, Campus Security should be notified (410-516-4600), and they will attempt to resolve the problem with the owner. If unsuccessful, or unable to locate the owner, the Municipal Animal Shelter will be notified to impound the dog in accordance with applicable animal control laws. Owners will be responsible for all impoundment fees.

The University strongly encourages students not to bring their pets to school unless they have cleared it with both their landlord and their roommates and are sure they have the means to care for their pets properly. Pets are often abandoned because there is no one to care for them over vacations, or the landlord threatens to evict the owner. If you do own a pet and cannot keep it, contact Animal Rescue (410) 636-1360, the Humane Society (410) 833-8848, or Baltimore SPCA (410) 235-8826 which will do its best to find the animal a new place to live.

Student Technology Policies

The Johns Hopkins University is committed to providing a robust information technology environment to support its students and faculty in the pursuit of their research and instructional objectives. In general, undergraduate and graduate students are afforded the same access to computing and networking resources as are faculty and staff.

Understanding that for the University to maintain an environment of open access to networked computing resources is important, those who use these facilities must comply with the written policies coercing their use as well as the "spirit and intent" of these policies. Appropriate use of the resources includes instruction, independent study, authorizes
research, and the official work of the offices, departments, recognized student organizations, and the agencies of the University. Any activity that intentionally obstructs or hinders the authorized use of campus computing and network resources is prohibited.

For the comprehensive policy go to http://it.jhu.edu/policies/itpolicies.html.

Residence Requirement
The Homewood Schools’ freshman and sophomore residence requirement applies to students engaged in their first two years of full-time undergraduate study. Transfer students entering the university with freshman or sophomore status are subject to this same requirement. Since students cannot complete their residence requirement in the middle of the academic year, transfer freshmen entering the university in January must live in the residence halls their entering semester and the following academic year. Transfer sophomores entering in January fulfill the residence requirement by living in the residence halls their entering semester. Exceptions to this policy are made for individuals living at home in the Baltimore area with parents or guardians.

The benefits of the residence requirement are many. It is designed to provide the students with a variety of services and conveniences. Living on campus supports the academic mission of the university and affords students the opportunity to interact, socialize, and unwind with their classmates.

University Policies
The following university policies are detailed in this section:

• Policy on Alcohol and Drug Abuse and Drug-free Environment (p. 43)
• Policy on Possession of Firearms on University Premises (p. 43)
• Policy on the Privacy Rights of Students (FERPA) (p. 43)
• Notice of Availability of Annual Security and Fire Safety Report (p. 43)
• Equal Opportunity/Nondiscrimination Statement (p. 43)
• Anti-Harassment Policy (p. 43)
• Sexual Misconduct Policy (p. 43)
• Photography and Film Rights Policy (p. 43)

Policy on Alcohol and Drug Abuse and Drug-free Environment
(http://oie.jhu.edu/discrimination-and-harassment/harassment-and-discrimination-complaint-procedures/)
GRADUATE STUDENTS

Johns Hopkins University is proud to offer a rigorous and interdisciplinary graduate education taught by faculty who are academic and research leaders in their fields. Across the nine divisions of the university there are approximately 20,000 full-time and part-time graduate students working in over 180 fields of study. Combined with exceptional university facilities and resources, the endeavors of graduate students have contributed to groundbreaking discoveries, expansive and innovative collaborations, and the advancement of knowledge throughout the university and beyond.

The policies, procedures, resources, and opportunities included in this section are relevant for graduate students enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences (KSAS) and the Whiting School of Engineering (WSE) on the Homewood campus. Please use the links at the left to navigate to your topic of interest.

Student Right to Know Information
The Higher Education Act of 1965, as amended in 2008, includes many student disclosures and reporting requirements by universities. These requirements include statistics and/or information on the following subjects:

1. Retention and graduation rates;
2. Financial assistance available to students and requirements and restrictions imposed on Title IV aid;
3. Crime statistics on campus;
4. Athletic program participation rates and financial support; and
5. Other institutional information including: the cost of attendance, accreditation and academic program data, facilities and services available to disabled students, and withdrawal and refund policies.

For the full Student Right to Know page, please visit: http://homewoodgrad.jhu.edu/student-services/student-right-to-know/

Admissions and Finances

Admissions
Admissions for Full-time Graduate Programs
The Office of Graduate Admissions and Enrollment is available to answer questions about the Krieger and Whiting Schools’ full-time graduate program application process and respond to general admissions inquiries and requests for information. Please visit grad.jhu.edu for a complete list of graduate programs offered by the Krieger School of Arts and Sciences (KSAS) and the Whiting School of Engineering (WSE) and for information regarding the admissions process.

Admissions/Information for Visiting Graduate Students and Volunteers
The schools of Arts and Sciences and Engineering recognize and appreciate the contributions of volunteers and visiting graduate students to its mission of education and research and has policies in place to enable both schools to retain and set forth requirements pertaining to volunteers and visiting graduate students. Interested applicants should visit: http://grad.jhu.edu/apply/visiting-students/ for more information.

Costs of Attendance and Financial Aid

Costs of Attendance
See the Office of Student Financial Services’ website for financial aid information (https://finaid.jhu.edu).

See the Office of Student Accounts’ website for tuition rates and refund schedule (https://studentaffairs.jhu.edu/student-accounts/tuition-fees).

Funding, Financial Aid, and Student Loans
Graduate students should contact their departments for information concerning funding support availability. Information for the Whiting School can be found here as well: https://engineering.jhu.edu/graduate-studies/graduate-financial-aid/. Students who are seeking federal financial aid are required to fill out a new FAFSA form every year if they wish to continue receiving financial aid. For more information on student loans and work-study opportunities, go to the Student Financial Services website (http://www.jhu.edu/finaid/grads.html) or visit their office in Garland Hall.

Fellowships

Diversity Fellowships
Johns Hopkins is a community committed to sharing values of diversity and inclusion in order to achieve and sustain excellence. We firmly believe that we can best promote excellence by recruiting and retaining a diverse group of students, faculty and staff and by creating a climate of respect that is supportive of their success. This climate for diversity, inclusion and excellence is critical to attaining the best research, scholarship, teaching, health care and other strategic goals of the Health System and the University. Taken together these values are recognized and supported fully by the Johns Hopkins Institutions leadership at all levels. Further, we recognize that the responsibility for excellence, diversity and inclusion lies with all of us at the Institutions: leadership, administration, faculty, staff and students.

See https://grad.jhu.edu/apply/diversity/fellowships/.

WSE-Specific Graduate Fellowship Information
The Whiting School of Engineering offers a number of endowed fellowships that provide supplemental financial aid to incoming and current full-time engineering students. Full-time degree seeking graduate students are automatically considered for the fellowships. See the WSE Graduate Fellowship and Grants (https://engineering.jhu.edu/graduate-studies/fellowships-grants) website for more information.

KSAS-Specific Graduate Fellowship Information
The Krieger School of Arts and Sciences offers an incredible array of opportunities for student researchers in the areas of natural science, social science, and humanities. See the KSAS Research Awards and Opportunities (https://krieger.jhu.edu/research) website for more information.

Veterans Educational Benefits
Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans, service members, eligible spouses and dependents under the provisions of the various federal laws pertaining to veterans’ educational benefits. Information about veterans’ benefits and enrollment procedures may be obtained at https://studentaffairs.jhu.edu/registrar/veterans/ or the Office of the Registrar, 75 Garland Hall, 410-516-6635.
Initial Enrollment

Once admitted to the university, the student must complete an Application for Program of Education or Training (VA Form 22-1990) from the Department of Veteran Affairs (https://benefits.va.gov/gibill). A copy of the Certificate of Eligibility, along with a copy of the DD-214, is sent to the Veterans Desk, Office of the Registrar, 75 Garland Hall, Johns Hopkins University, Baltimore, Maryland 21218. Additional delivery options can be found at https://studentaffairs.jhu.edu/registrar/veterans/.

The student who is transferring from another university or college will need to obtain a Request for Change of Place of Training (VA Form 22-1995) from the Department of Veteran Affairs (https://benefits.va.gov/gibill). The completed form should be submitted to the VA, and a copy sent to the Veterans Desk at the university.

Re-enrollment

Students who received veterans’ benefits at the university the preceding semester and plan to enroll with no change of objective should inform the Veterans Desk at the time of registration that they want to be recertified under the provisions of their original VA Form 22-1990.

Students receiving veterans’ benefits must take courses that lead toward the exact objective (usually a specific degree) on the original VA application. Otherwise, they must submit a Request for Change of Program (VA Form 22-1995). Students utilizing veterans’ benefits must let the registrar know immediately of any change in their program or status that might affect the amount of their VA payment. If they fail to do so, the Department of Veterans Affairs will seek reimbursement from the student for any overpayment.

Standards of Progress

Continuation of VA payments depends on the student’s meeting the university’s academic standards for all students. The student must also meet any standards of progress which may be established by VA regulations.

The College Navigator Tool

Veteran students may go to the College Navigator (http://nces.ed.gov/collegenavigator) to access a school comparison tool.

University Policies

The following university policies are detailed in this section:

- Policy on Alcohol and Drug Abuse and Drug-free Environment (p. 45)
- Policy on Possession of Firearms on University Premises (p. 45)
- Policy on the Privacy Rights of Students (FERPA) (p. 45)
- Notice of Availability of Annual Security and Fire Safety Report (p. 45)
- Equal Opportunity/Nondiscrimination Statement (p. 45)
- Anti-Harassment Policy (p. 45)
- Sexual Misconduct Policy (p. 45)
- Photography and Film Rights Policy (p. 45)

Policy on Alcohol and Drug Abuse and Drug-free Environment

(http://web.jhu.edu/administration/jhuoie/equity_compliance/equal_opportunity_statement.html)

Policy on the Privacy Rights of Students

(Full policy: https://www.jhu.edu/assets/uploads/2017/01/ferpa.pdf)

Notice of Availability of Annual Security and Fire Safety Report

In keeping with the mandates of the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act), the University’s Annual Report contains statistics of certain crimes that are reported and that occurred on campus, in certain off-campus buildings or property owned or controlled by the University or an officially recognized student organization, and on public property within or immediately adjacent to and accessible from the campus for the three most recent calendar years. Also included are campus security policies including those related to missing student notifications, alcohol and drug use, sexual assault, relationship violence, and stalking, crime prevention, the reporting of crimes, and fire safety policies and statistics. All Johns Hopkins faculty, staff and students are encouraged to read and print out the report at http://security.jhu.edu/compliance-and-criminal-statistics/index.html, and to report all criminal incidents promptly to your respective security department.

A printed copy of the annual crime report may be obtained from the security offices of Johns Hopkins:

Homewood Campus 410- 516-4631; Peabody Institute 410-234-4600; Medical Institutions 410-614-3473; Applied Physics Laboratory 443-778-7176; School of Advanced International Studies, D.C. 202-663-5808; or from the deans/directors/coordinators for our JHU Campuses and centers at: Baltimore, MD (Harbor East) 410-234-9301; Columbia, MD 410-516-9700; Bologna, Italy 202-663-5700; International +39.051.2917.811; Washington, D.C. Zanvyl Krieger School of Arts and Sciences 202-663-5808; Nanjing, China 202-663-5802; International +86.25.8359.2436; Washington, D.C.-Carey Business School 202-663-5808; Montgomery County, MD 301-294-7011.

Graduate-Specific Policies

- Statement of the Rights and Responsibilities of Ph.D. Students at Johns Hopkins University (p. 46)
• Academic and Research Misconduct Policy (p. 46)
• Assistant Leave Policy (p. 46)
• Grievance Policy (p. 46)
• Jury and Witness Duty (p. 46)
• Homewood Schools (p. 46)
Policy for Graduate Student Probation, Funding Withdrawal, and Dismissal
• Information Technology Policy (p. 47)
• G.W.C. Whiting School of Engineering - Specific Policies (p. 47)
• Zanvyl Krieger School of Arts and Sciences - Specific Policies (p. 47)

Statement of the Rights and Responsibilities of Ph.D. Students at Johns Hopkins University

Ph.D. education is fundamental to the University's teaching and research mission. For an intellectual community of scholars to flourish, it is important to acknowledge the principles that underlie the compact between Ph.D. students, the faculty, and other members of the University community.

It is in this spirit that the Doctor of Philosophy Board, in collaboration with faculty and students from across the University, has articulated a statement of rights and responsibilities for doctoral students at Johns Hopkins. (http://web.jhu.edu/administration/provost/initiatives/phi_board/rights/responsibilities) The principles described in this document are to be realized in policies established by the various Schools of the University; the Schools will also develop mechanisms to monitor and enforce such policies.

Academic and Research Misconduct Policy

The Krieger School of Arts and Sciences (KSAS) and the Whiting School of Engineering (WSE) full-time programs and Engineering for Professionals have established the Academic and Research Misconduct Policy to address instances of misconduct by all graduate students enrolled in full-time, part-time or non-degree (special student) Krieger School of Arts and Sciences and Whiting School of Engineering graduate programs.

Procedures for handling allegations of misconduct by full-time and part-time graduate students are available in the WSE and KSAS Graduate Student Misconduct Policy (http://engineering.jhu.edu/wp-content/uploads/2013/07/Grad-Student-Misconduct-Policy.pdf).

NOTE: effective Fall 2017, there will be a new WSE and KSAS Graduate Student Academic Misconduct Policy. It will supersede the current WSE and KSAS Graduate Student Misconduct Policy above, and any academic misconduct cases for all graduate students that occur after the new policy is implemented will be adjudicated through the new policy.

Assistant Leave Policy

To ensure the personal well-being and productivity of our graduate students, safeguard against excessive demands on graduate students' personal time, and introduce a minimum standard across the two Homewood schools regarding leave, the Deans of KSAS and WSE have established guidelines for Research and Teaching Assistants to be able to take leave. A detailed description of the policy can be found here: http://homewoodgrad.jhu.edu/academics/policies/.

Grievance Policy

The WSE and KSAS created a Grievance Policy. Any faculty member, postdoctoral fellow or graduate student of either school may grieve an adverse action or failure to act, or for a violation of University, School or departmental policy. Typically a complaint or dispute is brought to the attention of a department chair or center director and is resolved through informal discussion. In some circumstances, the Dean is asked to help in the informal resolution of grievances. The formal procedure set forth below is not meant to supplant attempts at resolving complaints through informal means. When at all possible, complaints and disputes should be settled through informal discussion, though there are no circumstances under which a grievance must be settled informally.

Please note that nothing in our policy should be construed to impinge upon the responsibilities of any office and/or regularly constituted body of the University, and should be applied only after every effort has been made to settle disputes informally. Moreover, no action may be taken with respect to a grievance that would conflict with or modify any policy approved by the Board of Trustees of the University, any policy of the University or WSE/KSAS, any federal, state, or local law or regulation, or any contract to which the University is a party.

Jury and Witness Duty

A KSAS or WSE graduate student employed by either school (i.e., a teaching assistant, research assistant paid by the university, research assistant paid by an external grant/fellowship or hourly worker) summoned for jury duty or subpoenaed to testify, is authorized to be absent from his/her work for the actual time required by such service. A graduate student employee must present the summons or subpoena to his/her immediate supervisor before a leave can be issued.

Graduate student employees are eligible for paid leave of absence as a juror or court witness. Federal work study funds, however, cannot be used in these instances -- departments should fund this work using other resources.

Jury duty or duty as a court witness is service and time spent away from a University position as a result of a subpoena issued by a court. Service as a volunteer expert witness or other volunteer court duty is not included in the provisions in this leave of absence.

Homewood Schools Policy for Graduate Student Probation, Funding Withdrawal, and Dismissal

This policy addresses consequences of student underperformance, including funding withdrawal. Students who might lose financial support as a result of the termination of funding from an advisor's sponsor should be given prompt notice, whenever possible.

For comprehensive information see the Graduate Student Probation Funding Withdrawal and Dismissal Policy (http://homewoodgrad.jhu.edu/wp-content/uploads/sites/35/2014/08/Graduate-Student-Probation-Funding-Withdrawal-and-Dismissal-Policy.pdf).
Information Technology Policies
All users of Johns Hopkins University computing resources must comply with the University's information technology policies. For the comprehensive policies go to http://it.jhu.edu/policies/itpolicies.html.

G.W.C. Whiting School of Engineering - Specific Policies
See http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/

Zanvyl Krieger School of Arts and Sciences - Specific Policies
See http://krieger.jhu.edu/research/policies/

Academic Policies
Much of the material contained in this section gives details pertaining to School-wide [Krieger School of Arts and Sciences (KSAS) and/or Whiting School of Engineering (WSE)] or University-wide policies. However, there are graduate student issues and policies that are department specific. In those instances, students are referred directly to their department administrator or department handbook for further information.

A Note about PhD Education:
Ph.D. education is fundamental to the University's teaching and research mission. For an intellectual community of scholars to flourish, it is important to acknowledge the principles that underlie the compact between Ph.D. students, the faculty, and other members of the University community.

It is in this spirit that the Doctor of Philosophy Board, in collaboration with faculty and students from across the University, has articulated a statement of rights and responsibilities for doctoral students at Johns Hopkins. The principles described in this document are to be realized in policies established by the various Schools of the University; the Schools will also develop mechanisms to monitor and enforce such policies. For more information see the Statement of the Rights and Responsibilities of PhD Students (http://web.jhu.edu/administration/provost/initiatives/phd_board/rights_responsibilities).

Student Enrollment Statuses
Graduate students in the full-time Arts and Sciences and Engineering degree programs based at Homewood are initially enrolled as full-time and are given a Resident status. Other registration statuses include: Graduate Study Abroad, Nonresident, Leave of Absence, Part-time and Visiting. Prior to a student changing his or her registration status, approval from the student’s degree program and appropriate office(s) must first be secured.

Credit Hours for WSE Graduate Courses
There is a full-time credit enrollment requirement for WSE graduate students enrolled in Homewood-based fulltime programs.

- All WSE Graduate Students must be enrolled in at least 9 credits to maintain fulltime status (in fall/spring semesters).
- Typically, fulltime WSE PhD students will be enrolled in a combination of WSE classes and/or research for a total of at least 20 WSE credits per semester (fall/spring).

- Typically, fulltime WSE Masters students will be enrolled in a combination of classes and/or research for a total of at least 9-10 credits a semester (fall/spring).

Visit http://homewoodgrad.jhu.edu/academics/wse-graduate-credit-hours/ for more information and for Frequently Asked Questions.

Degree-Seeking Graduate Students, KSAS
Graduate students who are full-time students are charged full tuition. The office of the deans must approve any exceptions.

Degree-Seeking Graduate Students, WSE
Most graduate students enrolled in research-oriented degree programs (M.A., M.S., M.S.E., Ph.D. etc.) in Engineering are full-time students. Fulltime is defined as being enrolled in at least 9 credits in a semester. However, part-time study consistent with residency requirements is common in many engineering departments. Students should consult with individual departments to determine the possibilities for part-time study.

Visiting (Not Degree-Seeking) Students
In some cases, graduate students from other institutions may participate in a visitation or residency at the Homewood Campus. These students are designated as “Visiting.” Although not candidates for a Johns Hopkins advanced degree, visiting graduate students (those not candidates for a Johns Hopkins graduate degree) may be enrolled on a full- or part-time basis with the approval of the chair of the department and the dean of their respective school. Visiting graduate students will be limited to two consecutive terms of either full- or part-time study.

There are two subdivisions of non-degree (visiting) graduate students: 1. visiting graduate student (primarily taking courses) and 2. visiting graduate scholar (primarily pursuing research). Both categories must apply through their intended program of study and through the online application: http://grad.jhu.edu/apply/visiting-students/.

All visiting graduate students/visiting graduate scholars (nondegree) must register in every semester that they are here for the visiting student course (AS/EN 990.890 ‘Graduate Research Practicum’); there is no tuition charge for this course. Failure to register may result in the student’s removal from payroll, loss of health insurance, visa compliance issues, and/or lapses in university services/access.

Part-Time Graduate Students (in a fulltime, Homewood-based graduate program)
New Homewood graduate students starting their full-time program in a part-time status are extremely rare, and are only allowed when a chair of a department or director of a degree program makes a qualified written request to, and receives approval from, their cognizant Dean’s Office of Academic Affairs. Students already matriculating in their degree program who wish to change to a part-time status after completing at least one semester of full-time study may ask for permission of their program and Office of International Services (OIS), when applicable, to change status. Students will generally not be eligible to switch to part-time status if they are working primarily on the Homewood campus or working full-time on research for their degree. Part-time graduate students must still meet their degree residency requirements before they receive an advanced degree (WSE Masters need to have two full-time, resident semesters, KSAS and WSE PhDs, and KSAS Master’s need to have two consecutive full-time, resident semesters).
Part-time has two major components: 1. a student cannot be part-time without prior approval from their department, and from OIS (when applicable), and 2. a part-time student cannot take more than 2 classes in a semester, or they will be automatically put back to full-time status (note that for WSE graduate students, part-time is any credit load below 9 credits (not including 9 credits)).

Costs:

- Part-time tuition charges are by the course in the KSAS.
- WSE graduate students who are part-time in a full-time program are charged a minimum tuition fee up to 3 credits. Any additional credits taken by a WSE graduate student who is part-time in a full-time program will be charged by the credit. Student accounts has the most current tuition information on its site. (https://studentaffairs.jhu.edu/student-accounts/tuition-fees)

Health Insurance: Part-time students are eligible to purchase the student health plan, but generally at their own cost.

Payroll: Generally, students who are part-time cannot be on student payroll. There may be exceptions for final semester international students in certain circumstances. Please consult with the Office of Student Employment Services (http://studentaffairs.jhu.edu/studentemployment) for more information.

International students: Visa-holders (F-1, J-1, etc.) wishing to change their enrollment status to part-time must first meet with OIS to determine eligibility. There are two separate steps to switch an international to part-time status: 1. the student must secure permission from OIS to apply for part-time status (this is a USCIS form, and not an university registration/enrollment form), and then 2. the student needs to make sure their department has contacted the registrar’s office on their behalf to make the official switch to part-time status. International students cannot switch to part-time without completing both steps. Something to note: international students cannot be part-time unless they are in their final semester of their degree program.

Combined Bachelor's/Master's Students

The term 'Combined Bachelor's/Master's Student' can be misleading. This status is reserved only for JHU undergraduate students who have been accepted concurrently into a WSE (mostly) or KSAS (on occasion) Homewood-based fulltime graduate program while still completing their undergraduate requirements. For more information, visit the Combined Bachelor's/Master's degree (http://engineering.jhu.edu/academics/combined-bachelors-masters) homepage. That said, most Combined Bachelor’s/Master’s undergraduate students have to switch over to graduate status at some point. In order for a student's status to change from "undergraduate" to "graduate", a Change of Classification Form for Combined Students must be completed. For students whose status change is due to completion of eight semesters of full-time undergraduate student at JHU (or the equivalent for transfer students), it is the responsibility of the Academic Staff in the student's chosen graduate program to sign the form and forward it to the Office of the Registrar. For students whose status change is due to completion of undergraduate degree requirements prior to the eighth semester of full-time undergraduate study at JHU (or the equivalent for transfer students), it is the responsibility of the Academic Staff in the student's undergraduate program to sign the form first. It then goes to the student’s graduate program before it is received by the Office of the Registrar.

Postdoctoral Fellow Appointments

Postdoctoral fellows are at the university to undertake a research program in cooperation with a member of the faculty. All appointments are arranged through the individual departments. Proof of successful PhD completion and eligibility for employment will be required before any appointment may begin.

Residency Requirements

Every full-time WSE Master's student must register as a full-time Resident graduate student for at least two semesters or satisfy an equivalent requirement approved by the appropriate department. (Combined bachelor's-master's degree students are exempt, as are those who enter a WSE master's degree program after two or fewer semesters following completion of a JHU undergraduate degree.)

Every full-time KSAS Master's student must register for a minimum of two consecutive semesters as a full-time, Resident graduate student.

Every full-time PhD Student (WSE and KSAS) must register for a minimum of two consecutive semesters as a full-time, Resident graduate student.

Graduate Study Abroad (KSAS only)

The status of Graduate Study Abroad is usually limited to those students in the Humanities Center and the departments of Anthropology, and German & Romance Languages and Literatures, who are required as a part of their regular degree program to complete a semester or more of full-time study at a foreign university. While in the case of the History of Art Department study abroad is not a general requirement, many of its graduate students do go abroad to conduct dissertation research. The category of Graduate Study Abroad is considered a full-time status. The use of this category for situations other than those noted above requires the approval of your department chair of the Homewood Graduate Board.

A student on Graduate Study Abroad is required to pay 10% of the full-time tuition rate for each semester abroad. The KSAS Dean’s Office will pay the remaining 90% tuition balance.

Students are encouraged to contact the Student Insurance Coordinator in the Registrar's Office prior to leaving campus to find out details regarding your health insurance coverage while abroad. Graduate Study Abroad students should discuss all plans with their department/advisor in advance. Additionally, international students should always consult with OIS before making any travel plans or status changes.

See the Graduate Study Abroad Application (http://homewoodgrad.jhu.edu/academics/graduate-board/policies-and-forms) for more information.

Graduate Study Away (WSE only)

The Graduate Study Away status applies to degree-seeking WSE master’s and doctoral students engaged in graduate education at a different institution (coursework and/or research) with departmental/advisor approval. This status is considered a subcategory of the nonresident status. As such, WSE study away/abroad students will be required to pay 10 percent of the full-time tuition rate for each semester away/abroad. As this is not a full-time resident status, health insurance benefits are not guaranteed. Graduate Study Away students should discuss this with their department/advisor in advance. Additionally, international students should always consult with the OIS before making any travel plans or status changes. See the Graduate Study Away/Abroad Application (http://homewoodgrad.jhu.edu/wp-content/uploads/sites/35/2016/01/
Nonresident Status

Nonresident status is a full-time status typically reserved for students who have completed all required coursework and exams (Internal and GBO, as per degree requirements), as per degree requirements and are working on their thesis or dissertation. The nonresident student’s advisor/department is not obliged to cover the cost of tuition or of the University issued health insurance for Nonresident students, but nonresident students are eligible for the University-sponsored health insurance plan and may pay the cost themselves if there is no available support from the student’s department/advisor.

Eligibility

KSAS graduate students may be eligible for Nonresident Status if they:

- Have completed all coursework and requirements for the graduate degree other than the presentation and defense of the master’s essay or doctoral dissertation
- Have reached the end of their departmental support period or have exhausted support from grants and cannot be fully supported by the department.
- Work 19.9 hours per week or fewer during the academic year if employed by Johns Hopkins University in any capacity (intersession or summer employment can be full-time, however). If working, students must be on salary (not stipend) and paid hourly. NOTE: Research or teaching assistants expected to work more than 19.9 hours per week do not qualify for Nonresident status.

WSE full-time program PhD and Master’s Students are only eligible to apply for one of the three WSE PhD/Master’s Nonresident Statuses if they have no outstanding coursework or exams (internal and preliminary GBOs for example) to complete:

Note that nonresidency is a full-time status intended for students who are primarily not on campus. None of the categories below allow for on-campus employment (which includes, but is not limited to, TA positions, etc.).

- (1) NR WSE PhD/Master’s dissertation/thesis/capstone/project completion: Student is very nearly finished—just has some writing up to do and defend—but needs to leave campus to start work. Expectation is one semester, but two may be allowed. Student pays NR tuition, receives no stipend or health insurance support.
- (2) NR WSE PhD/Master’s study away: Student (with or without advisor) has opportunity to be actively engaged in PhD work but at a non-JHU facility. Student remains fully supported by PI/department/host facility (NR tuition, stipend, health insurance provided for student).
- (3) NR WSE PhD/Master’s internship/co-op: Student voluntarily takes time to pursue other pursuits that may be only tangentially relevant to their degree. The expectation is that they will return to campus in a residential capacity to complete their degree. Student pays NR tuition, receives no stipend or health insurance support. Time in this status is typically one year, but can be renewed for a second year.

Tuition

Students on Nonresident status are charged 10% of full-time tuition per semester.

Restrictions

Nonresident students are permitted access to campus, faculty advising and JHU services, however, they are not permitted to enroll in any courses, with one exception under certain and specific circumstances, international students who file for Curricular Practical Training F1 (CPT1) through the OIS may register for a course entitled “Research and Teaching Practicum” (KSAS) or “Engineering Research Practicum” (WSE).

The maximum amount of time that a student may retain Nonresident Status is four semesters for KSAS master’s students and ten semesters for KSAS doctoral students, and 1-2 semesters for WSE doctoral students and master’s students (see WSE-specific nonresident statuses for PhDs and Master’s students above). Upon reaching this limit, the student will be required to register for either part-time status (WSE only, as appropriate) or full-time Resident status until degree completion.

Application Procedures

Students are required to complete and sign an Application for Nonresident Status indicating that they meet the requirements as stated above. The form should be signed by the department, the OIS (if applicable), and either the WSE Vice Dean for Education (or WSE designee), or the KSAS Vice Dean for Graduate Education (or KSAS designee).

Students should apply for Nonresident status well in advance of the first semester for which it is desired. When requesting a change of status for the current term, such petitions should be submitted no later than the end of the second week of the semester.

Leave of Absence

A Leave of Absence (LOA) is an approved absence from the University during which time students are not charged tuition nor are they required to register. Time spent on an LOA is regarded as an approved break in study and is not counted toward the total time-to-degree. If a student fails to register without obtaining an approved LOA the student will be considered withdrawn from their degree program.

Students are encouraged to contact the Student Insurance Coordinator in the Registrar’s Office prior to applying for an LOA to find out details regarding health insurance coverage while on LOA.

International students must contact the OIS before filing for LOA.

Eligibility

All KSAS and WSE full-time and part-time program graduate students are eligible for LOA if one of the following conditions prevents them from continuing with their graduate studies:

- A documented physical or mental medical condition.
- Compulsory military service.
- Personal or immediate family hardship.
- NOTE: Financial difficulty alone is not a valid reason for requesting an LOA.

LOA Tuition and Financial Support

Students on LOA are not charged tuition for the semesters they are granted the leave; the period of leave is simply regarded as an approved interruption of the degree program; however, the University cannot guarantee that financial support will be available when students resume their studies. After taking an LOA, students must re-apply for tuition assistance, research assistantships, fellowships and/or teaching assistantships. Such matters are left to the discretion of the department.
Before applying for a LOA, students should consult their department for information regarding funding opportunities upon return from LOA.

**LOA Restrictions**
Graduate students may apply up to four semesters of LOA (summer terms are not counted) when medical conditions, compulsory military service, or personal or family hardship prevents them from continuing their graduate studies.

Continued approval is based on the reason(s) for the request. Additional information may be requested by the department, or either the WSE Vice Dean for Education (or WSE designee), or the KSAS Vice Dean for Graduate Education, Centers and Programs (or KSAS designee).

Students on LOA are not to use any University student services or facilities (e.g., computing labs, library, labs, athletic facilities, etc.) and may not be enrolled at another University.

Students on LOA who wish to continue working at Johns Hopkins are not eligible to be paid through the Student Payroll Office and must therefore be hired through the appropriate divisional Human Resources Department.

No progress toward degree completion or coursework can be made while on an LOA.

Students on LOA do not have access to the Student Health Insurance Plan. The only exception is for a student on a MLOA (medical leave of absence). Students should consult with their cognizant Dean’s Office of Academic Affairs (Renee Eastwood, KSAS; Christine Kavanagh, WSE) for more information.

**Application Procedures**
To be awarded a LOA, students are required to complete and sign an LOA Application form and to provide a letter stating the reason for their application. The form must be signed by the student’s department, the OIS (if applicable), and either the WSE Vice Dean for Education (or WSE designee), or the KSAS Vice Dean for Graduate Education (or KSAS designee).

Students wishing to return from an LOA must complete an Application to Return from LOA form.

The departure of a student from one of the Homewood Schools without prior arrangement of Nonresident status or a Leave of Absence will be deemed a permanent withdrawal from the student’s program. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the University. If readmitted, they do not pay a second application fee, but must satisfy the residency requirement for the degree following readmission (even if previously satisfied) and pay all outstanding fees.

**Special Note: LOAs and Academic Probation**
If a student needs to take an LOA while they are on an Academic Probation, their probation is paused for the duration of the approved LOA period. Upon the student’s return from their LOA, their probation is reactivated with the same terms, but the clock for the probation is reset from the date of return to the longer of (1) the minimum time period dictated by the policy for the appropriate category as noted on the student’s original probation letter (such as research, coursework, etc.) and (2) the remainder of the student’s probationary period as noted in the student’s original probation letter.

**Satisfactory Progress
Homewood Schools Graduate Student Academic Review Policy**
This policy applies to all full-time WSE and KSAS doctoral students and master’s students conducting thesis research. Each graduate program is required to publish its own policies and standards with respect to academic standing. At the end of each semester, all full-time Homewood graduate programs are expected to review the academic records of their graduate students to evaluate academic progress.

Once per academic year, all full-time Homewood graduate programs are required to provide a written review to: (a) all doctoral students, and (b) all master’s students conducting thesis research.

Departments should include mention of funding continuation, as appropriate; as well as include a substantive discussion about the student’s professional development goals and ways to develop strategies to achieve those goals. This review must include the opportunity for the student to offer self-evaluation.

WSE has established a Guide to Effective Annual Reviews (https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/#accordion-panel-10) to assist both advisors and students make these annual reviews a useful tool in the development of each student.

Students who fail to attain a program’s minimum level of performance may be placed on academic probation or dismissed using the procedures outlined in the Homewood Schools Policy for Graduate Student Probation, Dismissal, and Funding Withdrawal. In making these decisions, particularly that of dismissal, the program will take into consideration extenuating circumstances beyond the student’s control.

**Probation/Dismissal/Withdrawal**

**Academic Probation**
Whenever it is determined that a graduate student has failed to meet minimum academic, research, and/or TA requirements, that student may be placed on academic probation. This change in status requires a formal letter and a meeting between the student and either his/her faculty advisor, chair, and/or departmental director of graduate studies. The letter should clearly outline the student’s academic shortcomings, indicate the corrective measures necessary to remain in the program and state the length of the student’s probationary period. Any funding ramifications for the student should be included as well. Following the conclusion of the stated probationary period, the program must inform the student of his/her status based upon whether the student has met the requirements as stated in the probation letter.

Typical probation outcomes include:

1. removal of the student from probation
2. extension of the probationary period, or
3. dismissal of the student.

While on probation, students maintain their active, enrolled student status and are expected to continue in their obligations, courses, and research, as appropriate. Whatever funding support in place at the start of probation (if any) remains in place during the probation period.

Please see the full policy (http://homewoodgrad.jhu.edu/wp-content/uploads/sites/35/2014/08/Graduate-Student-Probation-Funding-Withdrawal-and-Dismissal-Policy.pdf) for more information on process, appeals, etc.
Academic Dismissal

Dismissal After Probation
This must be done with a formal letter citing the reason for dismissal and requires a meeting between the student and his/her faculty advisor or the departmental director of graduate studies. Academic dismissal will be noted on the student’s transcript at the request of the program and with the approval of the cognizant Dean. A student may appeal this decision.

Dismissal Without Probation
A student may be dismissed without a formal probation period under three circumstances:

1. if he/she meets the conditions for dismissal based on coursework as stated by the academic program in its department handbook or on its website;
2. if he/she fails an oral or written examination for which successful completion is necessary to continue in the program (as stated in the program’s degree requirements), or if he/she fails to meet any condition resulting from a qualifying or GBO exam; or
3. if he/she is found to have committed academic or research misconduct and expulsion is the outcome of the deliberations as outlined in the Homewood Procedures for Handling Allegations of Misconduct by Full-Time and Part-Time Graduate Students, the KSAS Policy on Integrity in Research or the WSE Procedures for Dealing with Issues of Research Misconduct. Under these circumstances, programs are expected to follow the same procedures for Dismissal After Probation. In addition, students are also subject to immediate dismissal on non-academic grounds in accordance with the Homewood Procedures for Handling Allegations of Misconduct by Full-Time and Part-Time Graduate Students as well as all applicable policies at the university policies page (https://www.jhu.edu/university-policies).

Academic Dismissal Consequences
When a student is dismissed from the University, several consequences follow:

- The Office of the Registrar cancels the student’s registration for the next semester and authorizes a refund of tuition paid for that semester. Note: this does not necessarily mean that the student receives a refund. For example, if the student has been funded by the department, the department would be eligible for the refunded funds. Also, any refund amount is subject to the refund schedule published by Student Accounts.
- Notation of dismissal may be placed on the student’s transcript at the request of the program and with the approval of the cognizant Dean.
- The Office of Student Financial Services suspends financial aid to the student and work-study aid.
- The Office of International Services performs duties as required by U.S. federal regulations regarding persons not eligible to study at the University.
- The Student loses access to university services, property, and nonpublic spaces.

Readmission Following Dismissal
The terms for readmitting a student who has been dismissed for academic reasons are established by individual departments. The readmission process should be described in the dismissal letter, if deemed appropriate. Students who have been dismissed should discuss the readmission process with their advisor. Procedural instructions for this policy can be found at http://homewoodgrad.jhu.edu/academics/policies/. The terms for readmitting a student who has been dismissed for reasons other than academic/research/TA performance are decided by the student’s cognizant Dean’s Office of Academic Affairs.

Voluntary Withdrawal
Students wishing to withdraw from the University must file written notice with their Department. A Termination/Withdrawal Form (http://homewoodgrad.jhu.edu/academics/graduate-board/policies-and-forms) must be generated by the departmental academic staff. Graduate students are encouraged to consult the chair of their department prior to submitting their written notice. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the university. If readmitted, they do not pay a second application fee, but must satisfy the residency requirement for the degree following readmission (even if previously satisfied) and pay all outstanding fees. Once a student withdraws from the University, their student transcript is closed – changes to their academic record will not be permitted. International students must consult with OIS to ascertain their visa obligations before withdrawing from the University. The same ramifications as listed under ‘Academic Dismissal Consequences’ apply.

Withdrawal by Lack of Registration
Students who are not registered by the end of the sixth week of a given semester and do not respond to any correspondences by either their department, advisor, Office of Academic Affairs, and/or Homewood Registrar’s Office will have been deemed to have withdrawn themselves from the university and will be processed as Withdrawals. It is important to note that paying tuition is not the same as registering for classes.

Any outstanding fees will be followed up with the student/their department by the Office of Student Accounts. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the university. If readmitted, they do not pay a second application fee, but must satisfy the residency requirement for the degree following readmission (even if previously satisfied) and pay all outstanding fees. Once a student withdraws from the University, their student transcript is closed – changes to their academic record will not be permitted. International students must consult with OIS to ascertain their visa obligations before withdrawing from the University. The same ramifications as listed under ‘Academic Dismissal Consequences’ apply.

Registration
All students must complete registration at the beginning of each term in accordance with instruction issued by the registrar before they can attend classes or use university facilities. Detailed instructions about registration will be provided to all students before the registration period each term. If the student has not been notified at least two weeks before the start of classes for any fall or spring term, the Registrar’s Office should be contacted immediately.

Students who for any reason do not complete their registration until after the prescribed registration period are required to pay a late registration service fee. The late registration fee schedule is posted every semester on the registrar’s website under Term Dates & Deadlines. Graduate students must obtain permission from the chair of their department to register after the second week of classes.

Visit https://studentaffairs.jhu.edu/registrar/students/graduate-registration/ for more information.
Students will not be allowed to register if there are unpaid bills from a previous term. The student is required to pay tuition or make financial arrangements with the Student Accounts Office before registering for a given term.

Withdrawal by Lack of Registration

Students who are not registered by the end of the sixth week of a given semester and do not respond to any correspondences by either their department, advisor, Office of Academic Affairs, and/or Homewood Registrar's Office will have been deemed to have withdrawn themselves from the university and will be processed as Withdrawals. It is important to note that paying tuition is not the same as registering for classes. For more information, please see the Student Enrollment Statuses tab under Academic Policies.

Grades

Grading basis for graduate courses deliberately includes both letter grades and P/F grades. Instructors should have the widest discretion possible in grading graduate students' work; therefore both grading bases are available in SIS to the instructor for any course at the graduate level. While policies in most departments vary, most graduate students receive letter grades or Pass/Fail grades for their coursework. Students should consult their department chairs and instructors to determine their grading requirements.

Registrar deadlines and policies concerning grade changes are as follows:

Letter Grades (A through F)
Changing letter grades of "A" through "F" to a "Passing" grade is not permissible at any time.

All other grade change requests (e.g., "B" to "A") are acceptable within one year only. Change requests beyond one year can only be changed as a result of clerical error, and must be accompanied by a written explanation/justification from the course instructor.

Incomplete Grades (I)
The grade of "Incomplete" (denoted by an "I" on the transcript) is reserved for instances in which it is expected that a course's work will be completed in one semester, but for reasons beyond the student's control, the work cannot be completed within that timeframe.

Dropping an "Incomplete" grade from the transcript is not permissible at any time.

Changing an "Incomplete" grade to a final grade ("A" through "F", "Pass") may be done by the instructor within one year without Dean's Office approval. After one year, grade change requests must be sent via a grade change form to the student's cognizant Dean's Office of Graduate Academic Affairs (Renee Eastwood, KSAS/Christine Kavanagh, WSE) for review and approval.

In-Progress Grades (IP)
Reserved for classes in which it is expected that the assigned work will require more that one semester to be completed, but the class itself will meet for only one semester, such as graduate seminar courses.

Dropping an "In-Progress" grade is permissible only with the approval of the instructor and the Dean's Office.

Changing an "In-Progress" grade to a final grade ("A" through "F", "Pass") is acceptable at any time before the student's departure with the instructor's approval.

Missing Grades (MR, X)
A "Missing" grade (denoted by an "MR" or an "X" on the transcript) appears if the instructor has not submitted a grade within the defined grading period for the semester.

An instructor may submit a Grade Change form directly to the Office of the Registrar to change a "Missing" grade to a final grade.

Dropping a "Missing" grade from the transcript is not permissible, nor is changing it to an "Audit."

Audit (AU)
When a graduate student enrolls in a course with "audit" status, he/she must reach an understanding with the instructor as to what is required to earn the "Audit. If the student does not meet those expectations (e.g., fails to attend class), the instructor must notify the Registrar's Office in order for the student to be retroactively dropped from the course. The course will not appear on the student's transcript.

Changing a course registration from "Audit" (student receives no letter grade) to "Credit" (student receives letter grade), or from "Credit" to "Audit" is permissible during the Office of the Registrar's official deadlines for each semester. Registration changes beyond this deadline are not permissible.

Changing a final grade ("A" through "F", "Pass"), "Incomplete" grade, "In-Progress" grade or "Missing" grade to "Audit" is not permissible at any time.

The following ASEN Graduate Courses cannot be taken for AU (Audit):

- Graduate Research
- Dissertation Research
- Master's Thesis
- Master's Essay
- Independent Study

These courses can only be taken as P/F or a letter grade, at the instructor's purview.

Add/Drop
Prior to the beginning of classes: Returning graduate students may make changes to their registration in-person or online through the SIS system. The SIS system is available for use up to ten weeks prior to the first day of classes.

First six weeks of classes: Graduate students may add or drop classes online (as long as the electronic Advisor Hold has been released) or in-person at the Office of the Registrar. All in-person adds and drops must have a signature from the faculty advisor or department chair. Any drops within the first six weeks of classes will not be noted on the transcript.

Note: the instructor's signature must be included on any course add form submitted past the 6 week drop/add deadline. Detailed instructions for how to add or drop classes online are available on the Registrar's website. A calendar with specific dates for adding/dropping courses is also available on their website.
After the 6th week of classes, graduate students have until the end of the 11th week of classes to withdraw from a course with the signatures of the instructor, department chair, and the student's respective Dean's Office personnel (either the Assistant Dean for Graduate and Postdoctoral Academic Affairs for Whiting School of Engineering or the Director of Graduate and Postdoctoral Academic Affairs in the Krieger School of Arts and Sciences). All withdrawals will be noted with a "W" on the student's transcript.

Registration Holds
A registration hold will be placed for students who have not obtained clearance from the Office of International Services, Student Accounts, Student Health Insurance or Student Health and Wellness Offices. Students should meet with the office that placed the hold so that the hold can be removed. Students who have an advisor's hold on their registration must get their advisor's signature on their registration form and then submit that form to the Registrar's Office in person in order for the hold to be lifted.

Transferring Courses

WSE Master's degrees (M.A., M.S., M.S.E) and PhDs
For WSE graduate students who earned an undergraduate degree outside of the Whiting School of Engineering or the Krieger School of Arts and Sciences, no coursework completed before the undergraduate degree was conferred can be applied to a WSE graduate degree, regardless of whether that course was applied to the undergraduate degree.

WSE graduate students may transfer in up to two graduate-level courses from another institution which were completed after the undergraduate degree was conferred. The student must obtain approval from the WSE master's/PHD program faculty advisor to do so, and a transcript from any relevant academic institution must be included with conferral completion paperwork submitted to the Academic Affairs office. EXCEPTION: WSE master's students in a department #approved study abroad program can transfer in additional coursework (i.e., beyond two courses), but in total, at least half of the courses/credits applied to the WSE master's degree must be taken/earned at Johns Hopkins. Individual graduate programs reserve the right to enforce stricter policies.

Double Counting Courses

WSE Master's degrees (M.A., M.S., M.S.E) and PhDs
The WSE has established the following policies on double-counting coursework for all students in the full-time (Homewood) programs and the part-time Engineering for Professionals programs. If an individual program adopts double-counting policies more strict than these, the program's policies override the school-wide policies. Students are encouraged to refer to individual program policies.

Bachelor's Master's Double Counting
Coursework applied to a bachelor's degree:
Students either in a WSE combined (bachelor's/master's) program or seeking a WSE master's degree after having earned a WSE or Krieger School of Arts and Sciences bachelor's degree may double-count two courses (400-level or higher) to both programs with the permission of the master's faculty advisor. WSE master's degree candidates may not double-count courses applied to a bachelor's degree earned at a different institution. Individual graduate programs reserve the right to enforce stricter policies.

Coursework not applied to a bachelor's degree:
For students who are either in a WSE combined bachelor's/master's degree program or have already earned a Whiting School of Engineering or Krieger School of Arts and Sciences bachelor's degree and are seeking a WSE master's degree, any graduate-level coursework (as defined by the WSE graduate program) not applied to the undergraduate degree may be applied to the graduate degree, regardless of when that course was taken (i.e., before or after the undergraduate degree has been conferred) with the permission of the master's faculty advisor.

For students who earned an undergraduate degree outside of the Whiting School of Engineering or the Krieger School of Arts and Sciences, no coursework completed before the undergraduate degree was conferred can be applied to a WSE master's degree, regardless of whether that course was applied to the undergraduate degree.

Master's-Master's Double Counting
Coursework applied to a master's degree:
Students pursuing (1) a WSE master's and a master's from any JHU school simultaneously, (2) a WSE master's after having earned a master's from any JHU school, or (3) a WSE master's degree after having earned a master's degree from another institution, may double-count either two semester-length courses or three quarter-length courses across two master's programs, as long as the courses are equivalent to the 400-level or higher in WSE full-time graduate programs. The student must receive approval from both master's degree program faculty advisors if both sets of degree requirements will be completed at the same time. For a student to double-count coursework from two master's degrees whose requirements are met at different times, the student must obtain only the approval of the faculty advisor in the program to be finished second. Individual graduate programs reserve the right to enforce stricter policies.

Timing and Ramifications for Current Students:
This policy will be applied to all students entering a WSE master's program in Fall 2007 and beyond. Any student who has entered a WSE master's program before then will be exempt from this policy and should follow the course arrangement made with his/her advisor, provided it is in compliance with departmental, school and university requirements.

Declaration of Double-Counted Course:
WSE master's students wishing to double-count courses must submit these courses to the WSE master's program for approval. If it is learned that a student has double-counted a course for the WSE master's degree without permission of the WSE master's program, this program reserves the right to revoke the degree.

Double-Counting Across Three or More Programs
With bachelor's/master's and master's/master's double-counting, across any number of degree programs, a student can reduce the number of master's courses required by up to two (with approval of the programs involved). Beyond that, the remaining courses must be unique to the degree program. With a ten-course master's degree program, for example, eight of those courses must be unique to the program and not applied to a different degree at any level. A student can double-count any number of undergraduate courses to the various master's degrees (but at most, two to each master's program) and he/she can double-count the same course across any number of degrees pursued (again, with the approval of the programs involved).

Research and Scientific Writing Courses
Through the Center for Leadership Education graduate students may enroll in writing courses designed to assist with dissertation and grant writing. Students may enroll for this course at no additional charge. The course is offered in the fall and spring semesters however, space is limited. For additional information go to web.jhu.edu/Leadership.
Transcripts
Transcripts may be requested from the Registrar's Office. A request for one copy is normally processed within two to three working days of receipt of the request. Requests for multiple transcripts require additional time. Standard delivery of transcripts is made by U.S. Mail first-class. Transcripts may also be requested online at https://studentaffairs.jhu.edu/Registrar/students/transcripts/. Partial transcripts of a student's record will not be issued.

Summer and Intersession Courses
Summer Courses: While most summer courses offered at the Homewood Campus are undergraduate level courses, graduate students may enroll in these courses with permission from their department chair and the course instructor. No financial assistance is available for graduate students who wish to take summer courses. In special cases, graduate students may also take courses at the Peabody Conservatory. In such cases, students should contact the Registrar's Office for registration instructions.

Graduate students may register for the course Summer Independent Research (990.892) with the approval of their department chair. There is no charge for this course as independent research projects conducted during the summer are not graded and carry no academic weight. An NG ("no grade given") will appear on the student's transcript.

Intersession Courses: Graduate students are also eligible to enroll in Intersession Courses. Grades are generally given on an P/F scale. Some students use this period to participate in research, independent study or internships. A list of Intersession offerings is published in late November or early December. A special form, available in the Registrar's Office, is used for Intersession registration. Students should register before winter break. Students who register for research, independent study, or an internship during Intersession must have the approval signature of their faculty sponsor and academic advising office. This opportunity is offered tuition-free.

Course Re-Take Policy
At the discretion of the Homewood graduate program, a graduate student may retake a course, but the grade from the initial effort will remain on the transcript. This applies whether the initial effort occurred while the student was an undergraduate student or a graduate student.

Transcripts are normally issued only at the request of the student or with his/her consent. The only exception to this policy is the issuance of transcripts to offices and departments within the university.

Official transcripts of work at other institutions that the student has presented for admission or evaluation of credit become the property of the university and cannot be copied or reissued. If a transcript of this work is needed, the student must get it directly from the issuing institution.

Graduate Degree General Requirements
Doctor of Philosophy (KSAS and WSE)
- A minimum of two consecutive semesters as a full-time, resident graduate student.
- Completion of registration in the semester during which degree requirements are met (note: students completing in a Summer term generally should have been registered for the summer graduate research course, but it is allowable if the last official semester of registration is the prior adjacent Spring semester).
- Certification by a department or program committee that all school, departmental, program, and/or committee requirements have been fulfilled.
- A dissertation approved by at least two referees appointed by the department or program committee and submitted to the Commercial Binding Office.
- Successful completion of a Graduate Board Oral examination. As determined by the department or program committee, this is classified as either a preliminary or a final examination.
- Though time-to-degree is determined by the department and may not exceed 12 years, continuation in the program will be based/contingent upon satisfactory academic progress after eight years of enrollment.

Note that a PhD student in the research/writing phase of their degree program will not be able to remain in good standing with their academic and research progress if they do not have an advisor. A student who is unable to secure a research advisor within 4 months may be placed on probation or terminated from the PhD program. Students should consult with their departmental Academic Staff and/or Director of Graduate Studies for guidance.

KSAS Master's Degrees (M.A., M.F.A., M.S.)
- A minimum of two consecutive semesters as a full-time, resident graduate student.
- Completion of registration in the semester during which requirements are met.
- Certification by a department or program committee that all requirements have been fulfilled.
- A thesis approved by at least one referee and submitted to the Commercial Binding Office when the department requires a thesis.
- Meets the requirements of the school's time-to-degree policy. (http://homewoodgrad.jhu.edu/academics/graduate-board/degree-requirements)

WSE Master’s Degrees (M.A., M.S., M.S.E., M.S.E.M.)
- Every student must register as a full-time graduate student for at least two semesters or satisfy an equivalent requirement approved by the appropriate department. (Combined bachelor's-master's degree students are exempt, as are those who enter a WSE master's degree program after two or fewer semesters following completion of a JHU undergraduate degree.)
- Every student must be registered in the semester during which degree requirements are met; this includes students who have no courses remaining in which to enroll but must resolve coursework for which an "Incomplete" grade was assigned.
- Every student must provide certification by a department or program committee that all departmental or committee requirements have been fulfilled.
- If the student is submitting a formal essay to the MSE Library to help complete master's degree requirements, the essay must be approved by at least one reader. (See the Homewood Academic Council Faculty Status table, under “Thesis Supervision of Graduate Students,” to determine who may serve as the reader/advisor. Additional readers, if required by program, need only program approval.)
- All courses applied to the master's degree must be at the 300-level or higher. At their discretion, individual graduate programs may institute a higher course level as the minimum for their own students.
- Every student must earn the master's degree within five consecutive academic years (10 semesters). Only semesters during which a
student has a university-approved leave of absence are exempt from the 10-semester limit; otherwise, all semesters from the beginning of the student's graduate studies—whether the student is resident or not—count toward the 10-semester limit.

- Every student must complete training on academic ethics.
- Every student must complete training on the responsible and ethical conduct of research, if applicable. (Please see the WSE Policy on the Responsible Conduct of Research.)

**Time to Degree (TTD)**
The time-to-degree (TTD) limit for degree candidates is typically determined by a specific program. However, Johns Hopkins University's general policy requires that TTD not exceed twelve years for Ph.D. candidates, and five years for Whiting School and Krieger School terminal master's candidates. TTD count begins with the first semester of registration as a matriculated student. Time spent on an approved LOA will not be counted toward the graduate student's TTD. Students unable to complete degree requirements within the required time limit are required to withdraw from the University. Full TTD policies for the Krieger and Whiting Schools can be found at grad.jhu.edu/student-life/policies.

**Co-tutelle de Thèse**
It is the University's current policy that Johns Hopkins will recognize dissertation research and subsequent dissertation submission for the purposes of a degree from Johns Hopkins alone. It will sign no agreement that supports the concept of a student submitting the same work to different universities to receive two distinct degrees.

The University, however, wants to promote international exchange and in this spirit the Graduate Board has agreed to accommodate students with a desire to include faculty from a foreign university to participate in their research and defense process. Upon submission and review of a current curriculum vitae, the Graduate Board will allow one advisor to be a faculty member of the foreign university and in certain cases will allow the committee to be expanded to include other faculty from the foreign university as long as the majority represent Johns Hopkins. The university will provide no funds to cover expenses. Funding for travel would be up to the department or the foreign university.

All proposed co-tutelle agreements are to be submitted to the Graduate Board for review.

**Commencement and Degree Conferral**
The University Commencement Ceremony is held once per academic year, traditionally in May. Students who have not satisfied all graduation requirements by the deadlines determined by the Graduate Board or the WSE Office of Academic Affairs are not eligible to participate in the graduation ceremony. Students who complete the degree requirements prior to the ceremony in May can request an official statement of completion from the Office of the Registrar or the Homewood Graduate Board Office.

There are three official conferral dates for the University (December, May, August), but only one formal commencement ceremony each year.

Visit the registrar's graduation website for deadlines and official conferral dates.

The conferral date is printed on diplomas.

**Application for Graduation**
All graduate students must complete an Application to Graduate in order to generate degree conferral and receive a diploma. The application is distributed by the Office of the Registrar. Students should consult with their Graduate Coordinator, the Homewood Graduate Board's website and the WSE Office of Academic Affairs' website respectively to find out about the current deadlines. The dates of these deadlines change each academic year.

In addition to submitting the general application to graduate, engineering students preparing to graduate from a master's or doctoral program must complete paperwork indicating the courses they intend to apply to their degree. This paperwork is distributed by each department's Graduate Coordinator and once completed should be returned to them.

**Degree Completion Deadlines and Information**
The Graduate Board and the WSE Office of Academic Affairs (for WSE master's students) issues deadlines for submission of theses and essays in the spring semester for the following academic year. These deadlines must be met for a student to be listed as a degree candidate. Students can access the calendar of deadlines on the Homewood Graduate Board's website (http://homewoodgrad.jhu.edu/academics/graduate-board/deadlines) (for PhDs), the website of the WSE Office of Academic Affairs (http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate) (for WSE Masters), or by contacting their department administrator.

- Students who complete their master's essay or doctoral dissertation after the end of a semester but before the first day of class of the next semester do not have to register for that next semester. (They will have to file for graduation in that semester, however, and will not be eligible for student payroll once they are not a registered student).
- Graduate students completing a final degree during the first eight weeks of the fall semester or the first four weeks of the spring semester will generate a tuition reimbursement for that semester to whatever entity covered the cost - the student, the department, the advisor, etc. This applies only to students for whom completion of a master's project, master's essay, master's journal submission or doctoral thesis is the sole remaining degree requirement at the start of the final semester.
- If a student completes a Tuition Deferral Form indicating an expectation to complete the degree within a specific grace period, no payment is required to register for that semester. If the grace period deadline is not met, however, that semester's tuition charge will be added to the student's account.
- Note that students who complete in the Grace Period for either the fall or spring semesters (or finish in the summer term), and are registered in the semester/term in which they completed are eligible to stay on student payroll until the degree conferral date.

**Grades towards Degree Completion**
Grades for courses that are required for graduation must be turned in by the grade submission deadline. Graduating students who are taking courses at cooperative schools or other divisions of the University must make arrangements with their instructors on the first day of class to have final grades submitted to the host school's Registrar and then to the Homewood Registrar by the Homewood grade-submission deadline. If such an arrangement cannot be made, students should withdraw from the course.
Graduation Closes the Graduate Record
Upon graduation, the graduate’s record is closed. No changes thereafter can be made to the graduate’s transcript.

Completing Graduation Requirements
Departmental graduation requirements vary; therefore, students are encouraged to speak with their departmental administrator to learn details of their requirements

Graduate Board
The Homewood Graduate Board is responsible for the administration of policies and procedures for the award Doctor of Philosophy, Ph.D. of the Schools of Arts and Sciences and Engineering, and for Masters degrees in the School of Arts and Sciences.

The Graduate Board oversees:

- Graduate Board Oral Exams for ASEN Ph.D. students: with the approval of the department chair, a Graduate Board oral examination may be scheduled at any time during the academic year. Requests for a Graduate Board oral examination must be submitted to the Graduate Board a minimum of three weeks before the examination is to take place.
- Dissertation/Thesis Instructions: The student is responsible for obtaining and observing the detailed instructions concerning submission of their dissertation/thesis from their departmental office, the Homewood Graduate Board Office (grad.jhu.edu/academics/gradboard/policies/candidacy/).
  - Initial Ph.D. Degree confirmation
  - Dissertation submissions
  - Recommendations for conferral to the Doctor of Philosophy Board
  - See the Deadlines for Degree Completion (https://homewoodgrad.jhu.edu/academics/graduate-board/deadlines) website for more information.

Doctor of Philosophy Board
The Doctor of Philosophy Board advises the Provost about University-wide issues pertaining to the Ph.D. It approves new degree programs and sets guidelines and policies that affect all Ph.D. students. The Board respects the strong tradition of local autonomy of the Schools and seeks to enhance the visibility and prominence of Ph.D. education across the University.

The Homewood Graduate Board submits its list of approved KSAS and WSE PhD conferrals to the Doctor of Philosophy Board for final university approval. No PhD degree is officially conferred until after the Doctor of Philosophy has approved and recommended conferral to the President of the University, and the President approves.

WSE Master’s Degree Completion
All Whiting School of Engineering master’s students must complete the following steps for the degree to be conferred and to generate a diploma:

- An Application to Graduate must be submitted to the Office of the Registrar (Garland Hall) either online or on paper, depending upon status;
- Department-specific certification forms must be submitted to and approved by the department graduate coordinator, and then those forms must then be submitted to the WSE Office of Academic Affairs by the deadlines listed below;
- If a formal master’s essay is used to complete degree requirements, the student must submit a properly-formatted essay to the MSE Library Electronic Theses and Dissertations system by 4:00 p.m. on the date listed on the WSE website; the emailed submission receipt (generated by the library) must be included in paperwork forwarded to the WSE Office of Academic Affairs.

Visit: http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/ for deadlines and additional policies.

Dissertation and Thesis/Essay Submission
ETD (Electronic Theses and Dissertations)
An electronic thesis or dissertation (ETD) is a digital version of a dissertation that is available to the public via the Internet. Universities and colleges in the United States and abroad have been moving toward this type of publication for the past decade. In the Fall 2013, Johns Hopkins launched its own ETD portal and process.

All thesis and dissertation submissions must be through the ETD process and portal. See the ETD page for more information, deadlines, and instructions.

The student is responsible for obtaining and observing the detailed instructions concerning submission of their dissertation/thesis from their departmental office, the Homewood Graduate Board Office (http://homewoodgrad.jhu.edu/academics/graduate-board/degree-candidacy) and ETD guidelines (http://guides.library.jhu.edu/etd) of the Johns Hopkins Libraries and Museums. Students may also contact the ETD coordinator at dissertations@jhu.edu.

After submitting their dissertation to the ETD Submittal Tool (http://etd.library.jhu.edu), the library will check the dissertation for proper formatting and either approve it or contact the student to make required changes. After the ETD is approved the student will receive an approval confirmation from the system. Students are required to forward this approval email to their departmental academic staff and cc either the Assistant Dean for Graduate and Postdoctoral Academic Affairs in WSE (Christine Kavanagh) or the Director of Graduate and Postdoctoral Academic Affairs in KSAS (Renee Eastwood) as appropriate, with the following items:

- The title of their dissertation typed in the body of the email in title case format with correct spelling and punctuation.
- The degree type and program/department
- A single PDF of the dissertation title page and abstract

The degree requirements are not complete unless the final ETD is submitted to the library by the published deadline and the above information and attachments are provided by the student to the Graduate Board Office via the email to the department and the cognizant Assistant Dean or Director of Graduate and Postdoctoral Academic Affairs.

Student Life
Johns Hopkins is an active and supportive community, filled with students of different viewpoints, different cultures, and different backgrounds. The thing that brings them all together is their desire to be here and to celebrate everything Johns Hopkins has to offer. The following section details campus resources specifically relevant to the graduate student experience.
J-Card
The J-Card is the multi-use identification card used for Johns Hopkins students, faculty and staff. It is issued to students after registering for the first time. The Office of ID Card Services is located on the lower level of Garland Hall.

The card features typical identification information such as the person's name, photograph, classification (student, faculty or staff) and a randomly generated ID number.

The J-Card acts as the individual's library card for the Sheridan Library network. It allows the student to enter the MSE Library beyond Q-Level, to reserve and borrow books and to pay for photocopies or document printing on library printers.

Students must show their J-Card in order to gain access to any campus computer lab. Additionally, student employees need to present their J-Card to pick up their paychecks from the Student Payroll Office.

The J-Card is also used for identification if a student has purchased a campus dining plan. J-Cash can be used at a number of restaurants and vending machines, on and off-campus. Money can be added to any J-Card account by mail or in person at the Student Accounts Office, located at 31 Garland Hall. For a full list of locations where J-Cash can be used, visit their website: http://studentaffairs.jhu.edu/jcard/.

Lost or stolen J-Cards should be reported to the Office of ID Card Services by calling (410) 516-5121 (weekdays 8:30 A.M. to 5 P.M.) or the Office of Security by calling (410) 516-4600 (all other times). The account will be temporarily suspended and a new J-Card will need to be issued for a nominal fee.

Bookstore
The University’s bookstore is located at the Barnes & Noble in Charles Commons on Saint Paul Street. Students can purchase textbooks and supplies at this location. Please visit their store website (http://johns-hopkins.bncollege.com/webapp/wcs/stores/servlet/BNCBHomePage?storeId=18053&catalogId=10001&langId=-1) for hours of operation and other pertinent information.

Computer Access
Computers available to all faculty, staff, and students are located in several public computer labs and kiosks across the Homewood Campus. Labs in Krieger Hall and the Milton S. Eisenhower Library feature extensive software allowing users to print, access email and the Internet and perform other general tasks as well as more advanced computing required for coursework and research. Computer kiosk locations in Krieger, the Mattin Center, Hodson Hall, Levering Hall and throughout the MSE library are more limited.

The largest of all the Homewood labs is the Krieger Academic Computing Lab, located in 160 Krieger Hall. To gain access to the lab, students must swipe their J-Card at the locked gate. A lab consultant can be contacted during working hours by calling (410) 516-4242 or emailing consult@jhu.edu.

Security, Shuttles and Transportation
Security
The Johns Hopkins University Campus Safety and Security Office is dedicated to establishing and maintaining a safe and secure environment in which to work and visit. The Homewood Communication Center operates 24-hours a day seven days a week at the Homewood Campus. In keeping with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, the Campus Safety and Security Office publishes crime reports and security bulletins. These may be found on their Campus Safety and Security Website (http://www.jhu.edu/security).

Campus Security and local emergency services including Baltimore City Police, Fire or Ambulance can be summoned through Homewood’s Communication Center from any campus phone by dialing 6-7777. The universal 911 number may also be used to reach Homewood’s Communication Center from any on-campus phone. From off-campus, dial (410) 516-4600 to reach security. Crime and safety concerns may be reported to Campus Safety and Security by calling on-campus emergency numbers, (410) 516-7777 or 911. Additional services include the following:

- Anonymous Tip Hotline
- Crime Prevention Tips
- Escorts
- Lost and Found
- Property Registration
- Rape Aggression Defense (RAD)

Visit the Campus Safety and Security website for more information.

Shuttles and Transportation
Homewood Parking and Transportation provides several services to faculty, staff and students. The primary services include:

- Homewood - Peabody - JHMI Shuttle
- Keswick - Homewood - Eastern - JHMI Shuttle
- Blue Jay Shuttle
- Carey Business School - Homewood (evening) Shuttle
- Disabled Services

Visit their website (http://www.parking.jhu.edu/transportation.html) for schedules, locations and more information.

Student Employment
Student Employment Services is the human resources and employment center for full-time Homewood students who work for or wish to work for the University during their enrollment at Hopkins. Student Employment processes all student paychecks and maintains employment records and supporting documents. The office also supports a web based job search program which students can access through the Student Employment Services website. Students on Nonresident status must keep in mind that they can be paid at an hourly rate only and the number of hours worked on campus may not exceed 19.9 per week.

A student job fair, hosted by Student Employment, is held annually in September. Students have the opportunity to meet and interview with a variety of on- and off-campus employers at the fair. All tax forms and any other required paperwork must be filed with the Student Employment office before students are eligible to receive their first paycheck from the University. Volunteer opportunities and community-service information can also be found at this office.

Federal Work Study: Graduate students who meet certain financial-aid requirements have the option of applying for Federal Work Study (FWS) positions. FWS is a federally funded program that allocates funds to the University to pay a portion of the student’s salary. Approximately one-third of Hopkins students receive FWS funding. Eligibility for FWS positions is based on both the Free Application for Federal Student Aid (FAFSA) and the JHU Application for Financial Aid. The Office of Student
Financial Services determines eligibility based on federal regulations. An FWS award is valid for one academic year. Students must reapply each year. The maximum FWS award is $2,000. Awards may be less, depending on the type and amount of other financial assistance a given student receives. FWS employees are limited to 20 hours of work per week.

Jobs posted on the Student Employment Services website indicate whether the position is FWS or non-FWS. Job fairs and student-employment orientations also offer opportunities for students seeking FWS employment. Positions are available both on and off-campus and encompass a wide variety of skills and interests, including lab work, web design, research, and many more. Students in FWS positions are not prevented from working other paying jobs.

For more information about Student Employment or to view current job postings and policies, please visit their website (http://www.jhu.edu/studentemployment/student-information/handbook/tax-information/).

Travel Resources
As graduate students prepare to go overseas for research or to attend a conference it is helpful to consider administrative, health, and safety issues before leaving the country. Graduate students are also urged to complete the Johns Hopkins Travel Registry. Though this service is optional, travel registration can facilitate faster support in the event of an overseas emergency.

For more information and resources, visit http://homewoodgrad.jhu.edu/student-services/travel-resources/.

Career Center
The Career Center (http://studentaffairs.jhu.edu/careers) has services ranging from resume and curriculum vitae development to on-campus recruiting. As graduate students begin thinking about professional opportunities to pursue with their degree, the Career Center can help explore how skills, values, interests, and personality fit into this decision-making process.

Disabilities
Johns Hopkins University does not discriminate on the basis of gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, veteran status or other legally protected characteristic in any student program, activity administered by the University, admission or employment.

A person with a disability is defined by the Rehabilitation Act of 1973 and by the Americans with Disabilities Act of 1990 as an individual who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.

Student Disability Services Office (SDS)
The SDS Office assists the University in compliance with the provisions of the Americans with Disabilities Act of 1990 (ADA), ADA Amendments Act (2008) and Section 504 of the Rehabilitation Act of 1973 for full-time undergraduate and graduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering.

Johns Hopkins University
Student Disability Services
3400 North Charles Street
385 Garland Hall
Baltimore, MD 21218
Phone: (410) 516-4720

For more information and to contact the SDS Office, please visit their website (http://studentdisabilityservices@jhu.edu).

Tax Information
Student earnings are NOT automatically exempt from tax withholding, including Federal Work-Study earnings. All students are encouraged to complete/submit Tax Withholding Exemption Forms. For more information, please visit: http://studentaffairs.jhu.edu/studentemployment/student-information/handbook/tax-information/.

The JHU Tax Office (http://www.controller.jhu.edu/depts/tax/about_tax.html) is available for general questions and to point students to tax resources.

Please note that the Tax Office is unable to advise specifically on or prepare tax returns for JHU affiliates.

Parking on Campus
Parking is available for graduate students on campus at the San Martin and Decker Garages at monthly rates. Graduate students receiving a paycheck from the University are eligible for payroll deduction to pay for parking. Hang tags for free evening and weekend parking along academic buildings are also available. Hang tags can be purchased for a nominal fee which are valid for a maximum of 3 years. Go to the Parking Office located in the South Garage (under Mason Hall and the Decker Quad), with your J-Card, to pick up your hang tag.

In addition to these spaces, there are a number of metered and timed parking zones around campus. Check the ordinances governing these roadside spaces. Many have two-hour time limits.

Orientation and Welcome Events for New Graduate Students
There are many resources available to assist new students in their acclimation to the Johns Hopkins Community. Orientation and Welcome Events information can be found at http://grad.jhu.edu/student-life/orientation/, and resources on getting settled in Baltimore as a new graduate student can be found here: http://grad.jhu.edu/admitted-students/living-in-baltimore/

Recreation Center
Membership to the O’Connor Recreation Center is open to all faculty, staff, and students of the university. This includes Johns Hopkins University-Homewood, Peabody, School of Medicine, School of Public Health, School of Nursing, School of Education, Carey Business School, Bayview Medical Center, Johns Hopkins Hospital, School of Advanced International Study (SAIS), Johns Hopkins Medical Institutions, and the Applied Physics Lab (APL).

Gym
• Fitness and weight rooms
• Climbing wall
• Fields
• Tennis courts
• Pool (indoor)
• Experiential education
• Fitness classes (yoga, yogalates, pilates, step aerobics, cardio kickboxing, muscle classes and dance-based classes) (There may be a fee involved for classes)
• Website: http://web.jhu.edu/recreation/ or (410) 516-5229

http://studentaffairs.jhu.edu/disabilities/
Campus Ministries

Johns Hopkins University Campus Ministries promotes and supports spiritual development, theological reflections, religious tolerance and social awareness among students, faculty and staff within the university community. At its heart, Campus Ministries is a prophetic and pastoral presence which seeks to enhance the spiritual and ethical educational experience of the whole person mind, body and soul.

Visit https://studentaffairs.jhu.edu/campus-ministries/ or call (410) 516-1880 for more information.

Community Engagement

The Center for Social Concern emphasizes the value of service with others. Volunteers and community members enter into an educational process where both benefit from the interaction, and reciprocal learning is the common ground for all of our initiatives. Our programs and efforts are striving to create a strong community in and around the Johns Hopkins campus.

Visit https://studentaffairs.jhu.edu/socialconcern/ or call (410) 516-4777 for more information.

Housing

Johns Hopkins University does not offer graduate student housing. Prior to or upon arrival, graduate students should secure their own independent housing.

The Baltimore City neighborhood immediately surrounding the Homewood campus is called Charles Village. In addition, there are lots of other proximal areas in which students may consider living including Hampden, Waverly, Roland Park, Guilford, Remington, Mt. Vernon and others.

Incoming graduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering who need housing accommodations while looking for a place to live can contact the Community Living Office for information on temporary housing.

Visit http://studentaffairs.jhu.edu/community-living/ or call (410) 516-8597 for more information.

Dining Services

An assortment of entrees, snacks, coffee beverages and other fare is available at a variety of on-campus locations that are open during all three meals and snack-times. Homewood’s dining services can accommodate students with dietary restrictions whether that would be kosher, vegetarian, vegan or some other requirement. All locations accept J-Cards and cash, and some take credit cards.

Off-Campus Dining: There are many restaurants surrounding the campus and in adjacent neighborhoods. For the “insider’s guide” to these venues, please contact the Graduate Representative Organization (GRO), which publishes information and student reviews on these and other Baltimore eateries.

Meal Plans: Graduate students may opt to enroll in a meal plan. Meal plans on the Homewood campus are based on a block meal system, designed for both convenience and flexibility. Each block counts as one meal. Blocks expire at the end of each semester. Added to blocks, points allow students to purchase food at the Levering Food Court, and Blue Jay Café. Points have a dollar-for-dollar value and roll over from the fall to the spring, expiring at the end of the spring semester.

Additional information on specific plans, kosher or other dining options is available through the Community Living Office at http://studentaffairs.jhu.edu/community-living/dining-programs/.

Weather Emergencies

When there is an alteration or curtailment of the operating schedule of the University or a designated unit, an official announcement will be made on the University Emergency Telephone Hotline. As conditions may vary in the geographic areas where Johns Hopkins has campuses, there may be times when the Required Attendance Policy is invoked for some campuses and not others. In addition, conditions may be different on campus than they are in the area where a student lives. In times of bad weather, students should call the University Emergency Telephone Hotline to check on the status of the campus where they work.

- Baltimore - (410) 516-7781
- Outside Baltimore - (800) 548-9004

Each year the University publishes a list of radio and television stations that will be requested to announce operation changes. Because there can be mistakes in the message broadcast, students can verify the message by calling the University Emergency Telephone Hotline. Students may also check the JHU emergency resources website.

Graduate Student Organizations and Advocacy

There are a variety of graduate student organizations on campus, ranging from cultural, athletic, academic and social. For a sample of what is available to graduate students, please visit http://homewoodgrad.jhu.edu/life-at-hopkins/graduate-student-organizations/.

For additional academic, cultural, athletic and social groups/organizations/clubs, please visit https://studentaffairs.jhu.edu/gro/events/list-of-groups/.

Every group/organization/club is different, and some may only be open to undergraduate students or to students from a certain campus, where others may not be bound by similar parameters. For more information, graduate students are encouraged to directly contact any group/organization/club in which they are interested. There are also several offices and student groups on the Homewood Campus that advocate for graduate students on issues both academic and pertaining to student life.

Graduate Representative Organization

The Johns Hopkins University Graduate Representative Organization (GRO) works with specific divisions to represent graduate student interests (health insurance subsidies, compensation) to various levels of the JHU administration. The GRO organizes graduate student orientation, social events, sports activities, funds campus groups, and much, much more. Indeed, the GRO is proud to have earned the National Association of Graduate-Professional Students’ (NAGPS) 2000 – 2001 Outstanding Graduate Student Association award, its highest honor.

The GRO is made up of graduate student representatives from every department at Homewood. This group of representatives, the GRO General Council, elects an Executive Board for an annual term. Together, the Council and Executive Board are responsible for programming, advocating, and facilitating communication for graduate students on the Homewood Campus. The GRO also holds occasional programs with the student government on the Medical Campus.

Visit the GRO at https://studentaffairs.jhu.edu/gro/.

Baltimore, the largest city in Maryland, is the center of a metropolitan area of 1.5 million people. Baltimore is a vital city long known for its
ethnic neighborhoods where each wave of immigration to the United States has added to its character. People of many different backgrounds give the city a melting pot vitality that is reflected in the wide variety of restaurants, shops, and festivals. Information about Living in Baltimore is located at http://grad.jhu.edu/admitted-students/living-in-baltimore/.

**Krieger School of Arts and Sciences Contacts**
Matthew Roller
Vice Dean of Graduate Education, and Centers and Programs
410-516-8211

Wyman N600

Renee Eastwood  (Can assist with both student life and academic issues in the KSAS)
Director of Graduate and Postdoctoral Academic Affairs
410-516-8477
rseitz5@jhu.edu
Wyman N600

**Whiting School of Engineering Contacts**
Edward R. Scheinerman
Vice Dean of Graduate Education
410-516-7210
ers@jhu.edu
2 West, Wyman Park Building

Christine Kavanagh  (Can assist with both student life issues and academic issues in the WSE)
Assistant Dean for Graduate and Postdoctoral Academic Affairs
410-516-5938
christinekavanagh@jhu.edu
2 West, Wyman Park Building

**The Office of Institutional Equity**
**Disability Services and Compliance**
The Director of ADA Compliance and Disability Services in the Office of Institutional Equity serves as the central point of contact for information on physical and programmatic access, specific accommodations, resolution of complaints and problems, faculty and staff concerns, and identification of available services. In addition, the office can provide training, consultation, and information regarding disability issues.

Contact: Brent Mosser, Director (410) 516-8075,
studentdisabilityservices@jhu.edu

Graduate students in the Krieger and Whiting Schools can also visit the Disabilities page: http://studentaffairs.jhu.edu/disabilities/.

**Discrimination/Compliance**
- Sexual Harassment
- Training
- Meditation

The Office of Institutional Equity Compliance and Education is responsible for the investigation and resolution of discrimination complaints received from faculty, staff, and students at Johns Hopkins University. OIE also provides mediation services for University related issues, as well as, education/training on sexual harassment.

Visit http://oie.jhu.edu/ or call (410) 516-8075 for more information. Information is also available at http://homewoodgrad.jhu.edu/student-services/sexual-assault-and-awareness/.

**Health and Wellness**
**Health Insurance (CHP- Cigna)**
It is University policy that all full-time students in the Schools of Arts and Sciences and Engineering maintain adequate health insurance coverage to provide protection against unexpected accidents and illnesses. As a full-time student, you must either purchase the University plan or sign a waiver indicating you have health insurance coverage comparable to the University plan (International Students are required to purchase the University plan). Details about the student health plan offered by the University can be found on the registrar's website. (http://web.jhu.edu/registrar/students/health) Note that most students are auto enrolled into coverage, and are responsible for following up with the Office of the Registrar's Health Insurance Desk if they want to make any changes or have any questions about enrollment in the plan.

**Health and Wellness Center**
The Johns Hopkins University Student Health and Wellness Center exists to affirm the clear role of health and wellness in advancing academics. Its primary mission is to maintain and contribute to a healthy and safe learning environment for the student community in the Schools of Arts and Sciences and Engineering.

Visit https://studentaffairs.jhu.edu/student-health/ or call (410) 516-8270 for more information.

**Counseling Center**
The Johns Hopkins University Counseling Center serves full-time undergraduate and graduate students from the schools of Arts and Sciences, Engineering, Nursing, and the Peabody Institute. All of these students are encouraged to utilize the services offered by the Counseling Center. All services are confidential and free of charge.

The Counseling Center offers the following services:
- Counseling
- Groups
- Consultation
- Referral
- Career Decision-Making

Visit https://studentaffairs.jhu.edu/counselingcenter/ or call (410) 516-8278 for more information.

**International Graduate Students**
The Office of International Services (OIS) assists Hopkins' international community with visa status and with the challenges of making a transition from one setting to another.

The OIS staff are prepared to help with daily issues students face in adapting to an academically and culturally different environment. This office should be considered by international students as their primary source for important information regarding their status in the United States.

OIS staff members can answer questions and advise students on immigration regulations, financial concerns, health matters, housing, employment possibilities and other issues relating to an international student's period of stay in the U.S.

**International Bridge Program**
Studying in a foreign country can be both challenging and exciting. International students often experience a period of cultural adjustment...
when they first arrive to the United States and specifically Johns Hopkins University.

The International Student Bridge Program (http://ois.jhu.edu/News_and_Events/Presentations/International_Bridge_Program) is designed to better support this transition process for new international graduate students through monthly informational seminars and presentations on practical subjects—such as adjusting to graduate school in the US, taxes, credit in the United States, career preparations and enhancing communication and networking skills.
DEPARTMENTS, PROGRAM REQUIREMENTS, AND COURSES

Course Identification
Courses listed in the catalog are those the departments plan to offer, however, not every course is available during a given year. Necessarily, some courses will be canceled and other courses scheduled. The schedules of graduate and undergraduate courses for a given term are published before the end of the preceding term. In the course listings that follow, the credits shown are for one semester only. Effective Summer 2016, graduate level courses (courses numbered 600 and above) in the School of Engineering are assigned credits. Credit hours are not assigned to graduate level courses in the School of Arts and Sciences; many departments indicate instead the hours of class time per week.

A code number, indicating the department or program; a course number, indicating level; and sometimes a code letter, indicating area, for purposes of the distribution requirements, identify courses.

**Honors**

Students who wish to do honors in Africana Studies are required to take a two-semester research seminar, in which they will prepare an honors thesis in consultation with a faculty advisor in the student’s particular area of interest and the faculty coordinator of the undergraduate research seminar. The research seminar will provide guidance on research design, methodology, and analysis and presentation of findings, and give students an opportunity to discuss one another’s projects, share experiences, and receive constructive comments from their peers as well as the faculty coordinator.

In selecting research topics and collecting materials, students are encouraged to explore resources outside those immediately available.
Center for Africana Studies

on campus. With its rich collection of museums and archives, large and historic African-American communities, and growing populations of recent migrants from Africa, the Baltimore-Washington area offers many opportunities for research in Africana Studies. Students who wish to undertake research in Africa or in African American or African diasporic communities beyond the local area will be encouraged to take advantage of summer research grants and/or study abroad opportunities available at Hopkins. The center will work with other departments and programs at Hopkins on behalf of students who wish to combine their research in Africana Studies with work in another field or ongoing program, such as the joint Minority Health Program recently established by the School of Public Health and Morgan State University.

Undergraduate Minor Requirements

Students who wish to minor in Africana Studies must complete a minimum of 18 credits, including two core courses and electives. Three of the electives must be upper-level courses. All course must be taken for a letter grade and be completed with a grade of C- or better.

Core Courses (Select two of the following) 6

| AS.362.104 | Introduction to the African Diaspora |
| AS.362.112 | Introduction to Africana Studies |
| AS.100.121 | History of Africa to 1880 |
| AS.100.122 | History of Africa (since 1880) |
| AS.100.123 | Introduction to African History: Diversity, Mobility, Innovation |

Electives

| Three credits at any level of Africana Studies courses | 3 |
| Nine credits of 300-level or higher Africana Studies courses | 9 |

Total Credits 18

Courses

AS.362.104. Introduction to the African Diaspora. 3.0 Credits.
This course will begin in Africa before Atlantic slave trade, move to cover that trade into Brazil, the Caribbean and South Carolina. Comparisons of slave systems with Africa, Brazil, some parts of the Caribbean and Carolina (later South Carolina).
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.

AS.362.109. Introduction to African American Literature- Part II. 3.0 Credits.
This course will offer students an introduction to the central novels, plays, short stories, essays and poetry that have constituted African American Literature from 1930-1980. By focusing on representative works that span each of the major periods from the Harlem Renaissance to the Black Arts Movement, we will continue to consider the question of race and representation. How does one represent the race? And, for whom should black authors write – a white audience in order to change their minds about black people, or to black people for their pleasure and edification? Over the course of the semester, we will trace the various ways early- to late-20th century black writers sometimes borrowed from earlier literary traditions and, at other times, developed new ones. In addition, we will hone in on the major debates and central texts that have come to define African American Literature and explore how it has long served as a creative, political, and intellectual enterprise.
Instructor(s): S. Mott
Area: Humanities, Social and Behavioral Sciences.
AS.362.110. Colonial Encounters: Artistic Responses. 3.0 Credits.
This course disrupts conventional ways of seeing, reading, and examining artistic texts. When we read a novel or study a work of art, especially that produced by white people, we tend to treat it as representative of the nation, talk about its aesthetic genius, or discuss it as reflecting its social/historical moment. Black artistic production, on the other hand, is most often treated as “protest,” as that which simply responds to a national narrative. But what would happen if we treated the experience of black people and other people of color as universal? What would happen if we treated colonialism as the dominant social and intellectual problem of our age?
Instructor(s): S. Mott
Area: Humanities, Social and Behavioral Sciences.

AS.362.111. Introduction to African American Studies. 3.0 Credits.
Introduction to Africana Studies is designed to introduce you to the core concepts, theories, and thinkers of the black diaspora by means of a “keyword” approach. Each week we will focus on one keyword and the way it both shapes and is shaped by the African diaspora from the Trans-Atlantic Slave Trade to the middle of the twentieth century. I argue that much of the modern project, the assembly of institutions, ideas, interests, and identities, is a product of the brutal encounter between Europe, the Americas, and Africa. It is my hope that by the end of this course we will know more about how this encounter helped to construct modernity, and we will also know a bit more about how this encounter helped shape responses to it.
Instructor(s): K. McDonald
Area: Humanities, Social and Behavioral Sciences.

AS.362.112. Introduction to Africana Studies. 3.0 Credits.
Introduction to Africana Studies is designed to introduce you to the core concepts, theories, and thinkers of the black diaspora by means of a keyword approach. Each week we will focus on one keyword and the way it both shapes and is shaped by the African diaspora from the Trans-Atlantic Slave Trade to the middle of the twentieth century. I argue that much of the modern project, the assembly of institutions, ideas, interests, and identities, is a product of the brutal encounter between Europe, the Americas, and Africa. It is my hope that by the end of this course we will know more about how this encounter helped to construct modernity, and we will also know a bit more about how this encounter helped shape responses to it.
Instructor(s): L. Spence
Area: Humanities, Social and Behavioral Sciences.

AS.362.113. History of Africa (since 1880). 3.0 Credits.
An introduction to the African past since 1880.
Prerequisites: Students are not allowed to take both 100.122 and 362.122.
Instructor(s): K. Gallon
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.123. Introduction to African American Literature (Part 1). 3.0 Credits.
In "Introduction to African American Literature," we will examine some of the major debates and central texts of African American literature from the 18th century to the turn of the 20th century. We will focus on the relationship between race and representation and the growing complexities around those representations. In addition to addressing questions of race, we will also consider how gender, sexuality, and class intersected with racial identity and representation in the creation, production, and selling of African American literature. This course is designed to give you a broad sweep of the African American literary landscape, turning our attention to poetry, novels, short stories, plays, and essays. In addition, this course will provide you with the opportunity to explore the diverse nature of black literature and encourage the reading of African American literature with a fine critical understanding and aesthetic appreciation.
Instructor(s): S. Mott
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.175. Freshman Seminar: Remembering the Black Power Movement. 3.0 Credits.
This course explores trends, developments, contradictions, and dilemmas related to the Black Power Movement. The objective of studying this historical movement is not to engage in nostalgia, but to think through and learn the lessons of this historic social movement. An active participant in the Black Power Movement as a university undergraduate and graduate student, I do not approach this subject merely as a set of interesting intellectual issues and dynamics that can be explored with complete dispassion and objectivity. Rather, I seek to examine critically some of the contradictions and dilemmas that I, too, was caught up in, seeking to come to grips with and clarify my own participation and activities. We study these historical events with the expectation of making a positive contribution to the future.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.180. History of Black Americans. 3.0 Credits.
This survey course addresses the making and historical experiences of African Americans from the emancipation of slaves in the later nineteenth century to the conclusion of the twentieth century.
Instructor(s): J. Ashton
Writing Intensive.

AS.362.200. Race and Power in American Cinema. 3.0 Credits.
This course will examine changing norms of racial representation in American cinema and consider those images in relation to the operations of the film industry and to specific moments in U.S. history that informed cinematic representations of race. In particular, we will be analyzing film as a social practice that creates meanings that inform both everyday practices and deliberations over many of the most important issues and debates in American society. Ultimately, the goal is to gain a better appreciation for how the stories films tell us shape our personal and collective identities and inform our understanding of political life.
Instructor(s): A. Culver
Area: Humanities, Social and Behavioral Sciences.
AS.362.202. Colonial Encounters and Literary Responses. 3.0 Credits.
This course considers how black writers of the diaspora engaged the history and realities of colonialism and imperialism. While some novelists wrote specifically about the colonial encounter and its consequences, others chose to critique the enterprise by rewriting – from the perspective of the colonized – the literary tradition of the colonizing nation. Focusing on works by African, Caribbean, and American writers alongside the British tradition to which they respond, we will look at how diasporic writers thought about and constructed ideas about the world, the self, and the racial Other.
Instructor(s): S. Mott
Area: Humanities, Social and Behavioral Sciences.

AS.362.203. Crossing the Literary Color Line. 3.0 Credits.
"Crossing the Literary Colorline" will focus on white American writers who took up the subject of black life and African American writers who wrote white-life novels. We will examine how writers of the interwar period crossed the literary color line in an attempt to imagine a different kind of reality – one predicated on inter-racialism and democracy. Some of the questions we will consider include those around authenticity, political motivation, cross class/racial alliances, minstrelsy, and citizenship. Not only will we become more familiar with the mid-twentieth century literary terrain and how writers creatively grappled with volatile and sometimes taboo subject matter, we will question and engage how America's racial landscape always affected the literary process.
Instructor(s): S. Mott
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.204. Women in African History. 3.0 Credits.
Selected readings written by or about notable African women from the 17th century to the present. Themes explored include slavery, power and religion, economics, health and politics.
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.

AS.362.208. From Nok to Nsukka: Approaches to the Art of Nigeria. 3.0 Credits.
This course provides an introduction to art traditions within Nigeria's borders; it also explores historiography and the impact of modern nation-building on art history and the development of museum exhibitions.
Instructor(s): K. Gunsch
Area: Humanities.

AS.362.210. African American Women's History. 3.0 Credits.
This course will explore the diversity of African-American women's lives and the development of women, work, and culture from the colonial era through the late twentieth century. Using primary and secondary sources the class will explore the social, political, religious, and economic factors that produced change and transformation in the lives of African American women.
Instructor(s): A. Coleman
Area: Humanities.

AS.362.220. America, Post-Civil Rights. 3.0 Credits.
This course will explore the role of the 1964 Civil Rights Act and mid-twentieth century reform movements in transforming American politics, economy, and culture since the late 1960s.
Instructor(s): N. Connolly
Area: Humanities
Writing Intensive.

AS.362.221. African American Poetry and Poetics. 3.0 Credits.
This seminar explores the literary and political influences of poetry written and published by African Americans from the 18th century to the present (from Phyllis Wheatley to Terrance Hayes).
Instructor(s): H. Robbins
Area: Humanities
Writing Intensive.

AS.362.241. Seeing the Unspoken: Baltimore, #BLM, and Kara Walker. 3.0 Credits.
The advent of smartphone technology, social media platforms, and the 24-hour cable news cycle has made violent images of Black death and dying ubiquitous. The public consumes these images unemittingly and social movements have used these images to highlight the vulnerable character of Black life globally. However, questions remain as to whether these images work as tools of populist politicization or as sources of entertainment for viewers unsympathetic to the various politics expressed by the Black Lives Matter movement. This course seeks to explore this uncomfortable reality through the artistic renderings of Kara Walker, an acclaimed mixed media artist whose provocative explorations of race, sexuality, and violence offer one lens by which explore this political phenomenon. Additionally, students will spend the semester creating multimedia archival projects that explore these images and their political impact on Baltimore. In doing so, students will explore the politics bound within, pressed upon, and interpreted from the Black body.
Instructor(s): B. Carter
Area: Humanities, Social and Behavioral Sciences.

AS.362.304. Reading and Writing Black Poetry. 3.0 Credits.
This course is an exploration of twenty-first century black poetry and poetics. Readings include Paul Laurence Dunbar, Langston Hughes, Gwendolyn Brooks, Amiri Baraka, Sonia Sanchez, Nikki Giovanni, Lucille Clifton, Rita Dove, Natasha Trethewey, Terrance Hayes, Claudia Rankine, and Danez Smith. Texts will be mined for theme as well as formal technique as a basis for poetic experimentation.
Instructor(s): A. Gunn
Area: Humanities
Writing Intensive.

AS.362.325. The Role of "Place" in Racial Ethnic Health Disparities. 3.0 Credits.
This course will introduce students to racial/ethnic health disparities, the need to examine the role of "place", give different definitions of "place", how the characteristics of where people live affects individual's health, and how this leads to racial/ethnic health disparities. The course will first examine large-scale measures of place, then down to smaller scale measures. Students will discuss various theories generally associated with racial/ethnic health disparities, as well as, the extension of "place" theories to this topic. Students will apply this knowledge through various assignments and activities about racial/ethnic health disparities of interest. These activities include class discussions, group assignments and development of interventions and solution-focused policy recommendations. This course is being offered for sophomores, juniors and seniors who have completed a statistic course or who have received permission from the instructor.
Prerequisites: Students may receive credit for AS.280.411 or AS.362.325, but not both.
Instructor(s): C. Bell
Area: Humanities.
AS.362.332. #Digital Blackness. 3.0 Credits.
#BlackLivesMatter, #SayHerName, #ICan'tBreathe #IfIDieInPoliceCustody #BlackOutDay are just some of the many hashtags that black people have recently created and used on Twitter to protest police brutality and reclaim their full humanity. Over the past two decades Black people have utilized a variety of digital spaces and media to reconfigure the terms and terrain of debates and discussions on what it means to be Black in the United States and larger world. This course is an interdisciplinary investigation into the relationship between historical and contemporary cultural, social and political expressions of Blackness and the digital. More specifically, lectures, readings and class discussions will deconstruct the cultural, political economy and social construction of Blackness in the digital in an effort to uncover the ways that meanings of race more broadly and Blackness more narrowly influences and shapes Black Americans’ present social status and struggles for social justice. This course is designed to provide a “hybrid” experience, including both face-to-face (F2F) and online class meetings.
Instructor(s): K. Gallon
Area: Humanities.

AS.362.340. Power and Racism. 3.0 Credits.
This course investigates the impact of white supremacy and anti-black racism, as a global system of power, on the political development of the United States of America.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences
Writing Intensive.

AS.362.344. Education Politics in Urban America. 3.0 Credits.
This seminar analyzes trends, developments, and future challenges related to the politics of urban public schooling with a concentration on community political dynamics and the struggle for equal educational opportunity and quality education. The course emphasizes the impact of socioeconomic class inequality, racial/ethnic conflict, and gender politics on the changing character of public school reform since the 1954 Supreme Court decision of Brown v. Board of Education. Cross-listed with Africana Studies.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences
Writing Intensive.

AS.362.371. Public Health Crisis in Africa. 3.0 Credits.
This course examines the historical and current public health crises in Africa. Topics covered include infectious diseases and viral outbreaks, water and food access, sanitation, education, behavioral health, gender equality, health care and health care access, as well as the link between culture, economics and health. Introduction to Epidemiology is recommended but not required.
Instructor(s): M. Smart
Area: Humanities, Social and Behavioral Sciences.

AS.362.374. Black Cinema. 3.0 Credits.
Close examination of films directed by African American filmmakers as well as a focus on historical and cultural representation of African Americans in American film.
Instructor(s): H. Robbins; L. DeLibero
Area: Humanities.

AS.362.401. Comparative Slavery in the Americas. 3.0 Credits.
This course examines the development of slavery and racial thought in Latin America and the Atlantic World from the fifteenth century until its demise in the middle and late nineteenth century. Readings in social and cultural history are intended to focus on the life and labor of slaves, while readings from economic and legal history evaluate slavery as an institution. Intellectual histories are also assigned in an attempt to map the development of slavery as an institution typified by racial caste. The primary goal of this course is to give students a background in the major historical debates that have shaped the production of the history of slavery, including questions of identity (creolization vs. “African survivals”), slave agency and control, and economic vs. racial causes of slavery and the slave trade. All of these topics will be examined through the overarching theme of the course, which is the Tannenbaum thesis: namely, to what extent slavery was experienced differently in Latin America, Anglo-America, and in Africa itself.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.440. Oppression and Revolt. 3.0 Credits.
This seminar examines the history, theory, and practice of oppression and rebellion in Africa, the Caribbean, and the United States of America. The seminar will focus on popular struggles for liberation against systems of slavery, colonialism, sexism, and racism.
Instructor(s): F. Hayes
Area: Humanities
Writing Intensive.

AS.362.450. Critical Thinking in Africana Studies. 3.0 Credits.
This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes
Writing Intensive.

AS.362.501. Independent Study. 0.0 - 3.0 Credits.
This course is available to students who wish to pursue selected, special work that may not be included in the Center’s other courses.
Instructor(s): F. Hayes; F. Knight; M. Shell-Weiss; S. Berry.

AS.362.510. Directed Research in Africana Studies. 3.0 Credits.
Instructor(s): F. Hayes; F. Knight; P. Romero
Writing Intensive.

AS.362.590. Independent Study for Africana Studies. 3.0 Credits.
Writing Intensive.

AS.362.590. Independent Study for Africana Studies. 3.0 Credits.
Instructor(s): L. Spence
Writing Intensive.
AS.362.595. Summer Internship. 1.0 Credit.

Cross Listed Courses

History of Art
AS.010.254. Art and Architecture of Early Christian and Medieval North Africa. 3.0 Credits.
Survey of Early Christian and medieval art and architecture in North Africa, with an emphasis on indigenous developments and cultural exchange in the Mediterranean world, 4th to 13th century. Dean's Teaching Fellowship course.
Instructor(s): N. Dennis
Area: Humanities

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas. 3.0 Credits.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the "global South." This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of "global modernism."
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

English
AS.060.124. Politics, History and Autobiography. 3.0 Credits.
Students will write a mini-autobiography in the form of seven 3000 word essays, work shopped in class. Readings include A Small Place by Jamaica Kincaid and Brothers and Keepers by John Edgar Wideman.
Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.

AS.060.129. Writing Africa Now. 3.0 Credits.
This course surveys post-2000 literary and cultural production from sub-Saharan Africa. Topics will include debates over genre and fiction's relevance to African experience, legacies of canonical writing about independence, urban Africa as violent or "tragic" landscape, and problems of scale and geographical context. Readings by authors such as Adichie, Wainaina, Duiker, and Vladislavic, and students will be introduced to the main print and online arteries of African intellectual discussion. This class is for non-majors and does not count towards the English major or minor.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.223. African American Literature from 1900 to Present. 3.0 Credits.
A survey of the major and minor texts written by African Americans during the twentieth century, beginning with Charles Chesnutt's The Marrow of Tradition and concluding with Toni Morrison's Beloved.
Instructor(s): L. Jackson
Area: Humanities

AS.060.340. The Literature of Atlantic Slavery. 3.0 Credits.
This seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban anti-slavery novels, slave narratives, and "classics" of American literature like Melville's Benito Cereno. We will consider how the institution of Atlantic slavery was variously represented, justified, and criticized, discovering in the process the deep structures of modern slavery discourse. Texts may include: Aphra Behn, "Oroonoko"; John Woolman's "Journal"; Robert Wedderburn, "The Horrors of Slavery and Other Writings"; Gertrudis Gomez de Avellaneda, "Sab"; Frederick Douglass, "My Bondage and My Freedom"; Herman Melville, "Benito Cereno"; Harriet Beecher Stowe, "Dred"; Antonio Castro Alves, "The Slaves".
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.349. Clint Eastwood, Race, and the American Western. 3.0 Credits.
Drawing from the body of work reflecting the Hollywood gunfighter and outlaw folk-hero Clint Eastwood, the course will investigate American cinematic representations of slavery (and more specifically its absence), the Civil War and racial formation along the United States' southwestern frontier in films produced from the 1950s through the contemporary period. A focus on the cultural icon Clint Eastwood enables a close examination of American cinematic fantasies of the frontier, frontier violence and the desire to escape or erase the tensions of race and slavery that have deeply permeated the American cultural consciousness, particularly the creation of American masculine ideals. The course will also take decided note of the national shift from liberal "Great Society Programs" of the 1960s to the conservative "neoliberal" social and cultural ideals in the 1980s and 1990s. Our purpose is to consider the organization and reformulation of hegemonic power by way of the complex morality play the western film evokes, typically considering the interstitial geographies between civilization and savagery, belonging and alienation, and metropolitan and colonial outpost. We will privilege in our discussions the contested frontiers of racial dominion. The curriculum is complicated by several significant points of departure from the traditional category of the Hollywood-based American western: a film to frame the question of colonialism and resistance, as well as examples of black cinematic efforts re-drawing boundaries of the racial frontier. (Are they formed at the Caribbean, the easternmost littoral? The postindustrial city? Do they correspond to the romance of organized crime and its fantasy of empire?)
Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.
AS.060.353. World Literature in Theory and Practice. 3.0 Credits.
This course takes stock of how the current hot topic of “world literature” has evolved from Immanuel Wallerstein’s work on world-systems theory over the course of the last three decades. We will read work by a wide range of literary critics engaged with the topic of world literature, including Franco Moretti, Pascale Casanova, David Damrosch, Emily Apter, and Alex Beecroft, as well as major “world” novels by Herman Melville, Amitav Ghosh, and Chimamanda Adichie. Students will also be introduced to critical approaches that offer a conceptual alternative to the world literature framework, for example, Edward Said’s ideas on worldliness and contrapuntalism, Gaston Bachelard’s phenomenology of the home, Fredric Jameson’s concept of cognitive mapping, and Eric Hayot’s work on literary “world-creation.” We will ask just how broadly the field can be defined before it loses its critical cohesion. In other words, does world literature exist?
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.356. Gordimer and Coetzee: Politics and Form. 3.0 Credits.
A comparative study of major works by the South African Nobel Laureates Nadine Gordimer and J.M. Coetzee. Special attention to critical essays by both writers about each other, as well as about issues of shared historical and literary concern. Topics will include the role of the public intellectual in apartheid-era South Africa, competing scales of literary reception and evaluation (e.g. national, international, and universal), and the relationship between politics, form, and genre.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.357. Melville. 3.0 Credits.
This course examines the powerful short stories and criticism that he published in the 1930s and 40s—was steeped in African American history, literature, music, and folklore, he also thought of himself as part of the great tradition of American, European, and classical literature, from Homer through Joyce. He quickly set to work on a second novel dealing with the assassination of a racist senator during the height of the Civil Rights movement, but he came to the end of his life in 1994 without having completed the novel to his own satisfaction. This massive book, which appeared posthumously in a very abbreviated form as Juneteenth and more recently in the much longer Three Days before the Shooting, reveals the work of a master while at the same time it leaves critics and readers with an exceptional puzzle: What would his final intention have been? Why was he unable to complete the novel? How does it speak to the key issues of African American identity, freedom, and the American ideal that Ellison grappled with all his life? At the same time that he worked on his second novel, Ellison became one of the most prolific and important essayists of the twentieth century, and wrote brilliantly about American race relations from the era of segregation through the twentieth century. Even as he was celebrated by the literary establishment, however, Ellison at times found himself as odds with younger black writers and thinkers who felt that public activism, not just artistic greatness, was required of the African American writer. Using Ellison as a lens through which to see the course of American race relations from slavery to the present, the course will include study of all of Ellison’s major work: the short stories collected in “Flying Home”, “Invisible Man”, the essays collected in “Shadow and Act” and “Going to the Territory”, as well as others; and “Three Days before the Shooting”.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.358. American-ness and Blackness. 3.0 Credits.
This course examines the complex, often contradictory ways that young black writers and thinkers explored American identity, freedom, and the American ideal that Ellison grappled with all his life? At the same time that he worked on his second novel, Ellison became one of the most prolific and important essayists of the twentieth century, and wrote brilliantly about American race relations from the era of segregation through the twentieth century. Even as he was celebrated by the literary establishment, however, Ellison at times found himself as odds with younger black writers and thinkers who felt that public activism, not just artistic greatness, was required of the African American writer. Using Ellison as a lens through which to see the course of American race relations from slavery to the present, the course will include study of all of Ellison’s major work: the short stories collected in “Flying Home”, “Invisible Man”, the essays collected in “Shadow and Act” and “Going to the Territory”, as well as others; and “Three Days before the Shooting”.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.359. American Empire. 3.0 Credits.
This course examines the transnational visions of Black Empire as articulated and framed by black thinkers, writers, and visual artists around the world, roughly between 1850 and 1950. We will consider how both individuals and groups (such as the United Negro Improvement Association) responded to imperialist maneuvers through discourses of Ethiopianism, Pan-Africanism, and anti-colonialism, and how these discourses interacted with one another in surprising ways, ways that reveal the black world’s simultaneous attraction to and rejection of the imperial model in the nineteenth and twentieth centuries. Our reading will include novels, poems, essays, and critical texts— at least two of which share a title with this course—by W. E. B. Du Bois, Pauline E. Hopkins, Sutton E. Griggs, J. A. Rogers, Langston Hughes, George S. Schuyler, Claude McKay, Brent Hayes Edwards, Paul Gilroy, Wilson Jeremiah Moses, Michelle Ann Stephens, and others.
Instructor(s): N. Nurhussein
Area: Humanities
Writing Intensive.

Film and Media Studies
AS.061.328. Gangster Films. 3.0 Credits.
The bad guy as hero from Little Caesar to Goodfellas. Film screenings Thu 7:30-10:00 PM, Sun 7:00-9:30 PM. Lab fee: $40.
Instructor(s): L. Bucknell
Area: Humanities.
AS.061.369. The 1930s in Jazz, Film, and Poetry. 3.0 Credits.
The 1930s in Jazz, Film, and Poetry will focus on three art forms, jazz, film, and poetry, both separately and in conversation with each other during a decade of political, economic, technological, and cultural upheaval. A decade after the invention of amplifiers and public address systems, advances in sound recording and synchronized sound revolutionized film and recording arts. Jazz musicians, filmmakers, and poets collaborated on innovative and radical projects, often funded by the New Deal Federal Writers Project. Team-taught by faculty in Film and Media Studies, the Department of Jazz (Peabody), and the Center for Africana Studies, this course will bring together students from Peabody and the Krieger School of Arts & Sciences to engage with issues of art, culture, and politics during a turbulent decade.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): H. Robbins
Area: Humanities.

Anthropology
AS.070.202. Economic Anthropology. 3.0 Credits.
How do the abstract principles of economics play out in a diversity of times and places? This course surveys anthropological research on the social organization of labor, the political institutions that underlie wealth and property, and the cultural meanings of money and commodities. Through these topics, we will look at enduring debates about the rationality of markets and the nature of capitalism.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.222. Africa in the 21st Century. 3.0 Credits.
Rapid urbanization has created new needs, occupations, entertainments, etc., outside the “formal sector”. We use anthropological studies, African literature, film and the press on-line to understand making a living.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.233. Africa as Laboratory. 3.0 Credits.
Africa, as anthropologists have noted, has long been a “laboratory of the future.” By tracing the intersections of technology and politics, this class considers the various experiments in oppression and liberation that have unfolded within it. Following a broad historical arc, we begin with colonial medicine, racial science, and urban planning; move to national infrastructures and postcolonial resource extractions; and finally consider contemporary African engagements with consumer technology.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.241. African Cities. 3.0 Credits.
Over the past two decades, African cities have absorbed rapid population increase without accompanying economic growth. Students will review the major challenges of this mode of urbanization and explore the vibrant ways residents have sought to meet them. Following anthropology’s commitment to lived experience, we will track these issues through the twists and turns of everyday life, and consider what they may say about urbanity more broadly in the 21st century. Topics include livelihood, the built environment, conflict and membership, and popular culture.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.294. Political Anthropology of Africa. 3.0 Credits.
The course will explore classical and contemporary ethnographies of the political in Africa, examining how their authors address issues of power, hierarchy and symbol. We will study various articulations of state, ethnicity and community that are analyzed by observing relations between power and resistance or between law, economy and violence through war, custom and ritual. The seminar will also address the way in which Africa has been constituted as a key source of the sub-field of political anthropology through colonial trajectories, postcolonial detours and the political imagination of the past and the future.
Instructor(s): J. Obbario
Area: Humanities, Social and Behavioral Sciences.

This seminar will address contemporary questions of state and citizenship in the light of colonial and imperial dynamics at the beginning of the twenty-first century: transnational and national sovereignty in relation to local configurations of law, capital and political violence; processes of subsumption, extraction and financialization. Authors include Negri, Arrighi, Harvey, Chakrabarty, Mbembe, Mamdani, Chatterjee, Coronil, Dussel.
Instructor(s): J. Obbario
Area: Humanities, Social and Behavioral Sciences.

History
AS.100.109. Making America: Slavery, Violence, and the Coming of the Civil War. 3.0 Credits.
An examination of violence - primarily racial and political - in the decades between the American Revolution and Civil War (1789 to 1861).
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.121. History of Africa to 1880. 3.0 Credits.
A history of Africa from human evolution to the mid-nineteenth century focusing on key themes in social, economic, and political history.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.122. Introduction to History of Africa (since 1880). 3.0 Credits.
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.123. Introduction to African History: Diversity, Mobility, Innovation. 3.0 Credits.
An introduction to African history with emphasis on diversity, mobility, and innovation. Considers both early and modern times.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.202. Conflict and Co-Existence: The Early Modern Mediterranean. 3.0 Credits.
This course explores the dynamic and fluid world of the early modern Mediterranean (1453-1650), where Christians, Jews, and Muslims met, fought, traded with, and enslaved each other.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.203. Freshman Seminar: From Columbus to Calypso: The Caribbean and the Wider World. 3.0 Credits.
This course examines the history of the Caribbean and how five hundred years of colonization, slavery, piracy, rebellion, and revolution have shaped the politics and culture of the islands today.
Instructor(s): L. MacDonald
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.205. Freshman Seminar: Health, Healing, and Medicine in Africa. 3.0 Credits.
A freshman seminar introducing students to the history of health, healing, and forms of medical practice in Africa over the last two centuries.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.206. Freshman Seminar: Law, Society, and Power in America, 1500-1877. 3.0 Credits.
This course examines the relationship between law, governance, and social structures in America between the start of European settlement and the era of the Civil War. Topics will include Native American and European land claims, the regulation of family life, economic and commercial disputes, and the legal regimes of race and slavery. Throughout, we will consider both the aims of governing officials and how ordinary men and women maneuvered within the legal system. Freshman only.
Instructor(s): S. Damiano
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.211. Freshman Seminar: American Slavery. 3.0 Credits.
This seminar explores the history of American slavery, tracing developments over time and across space, probing the impact of this iniquitous and dynamic institution on societies and individuals, and examining a variety of sources that historians use to construct their narratives. Freshman only
Instructor(s): P. Morgan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.251. From Columbus to Calypso: The Caribbean and the Wider World. 3.0 Credits.
This course examines the history of the Caribbean and how five hundred years of colonization, slavery, piracy, rebellion, and revolution have shaped the politics and culture of the islands today.
Instructor(s): L. MacDonald
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.255. The Haitian Revolution in World History. 3.0 Credits.
This introductory seminar examines the revolution that transformed the slave colony of Saint-Domingue into the first black republic and second independent nation in the Americas, and its repercussions around the world. Non-Majors welcome.
Instructor(s): N. Marvin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.282. Race & Power in Modern South Africa. 3.0 Credits.
South African history from 1800 to the present, with focus on the rise and fall of the apartheid racial state
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.311. National Pastimes: Sports, Culture, and American History. 3.0 Credits.
National Pastimes examines the development of sports in the United States over the course of the 20th century with a particular interest in the relationship between sports and politics as well as issues of race, gender, sexuality and class.
Instructor(s): A. Davis
Area: Humanities, Social and Behavioral Sciences.

AS.100.316. American Foreign Policy in the Age of Human Rights. 3.0 Credits.
American Foreign Policy in the Age of Human Rights examines competing narratives about the origins of modern international human rights, and explores how those narratives historically informed American foreign policy from the American Revolution up to the present, with an emphasis on the twentieth century.
Instructor(s): K. Sohasky
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.320. Writing U.S. Empire. 3.0 Credits.
Attends to the composition and interpretive problems raised by studying the history of American imperialism, 1880s-1930s.
Instructor(s): N. Connolly
Writing Intensive.

AS.100.321. From Ferguson to Cape Town: The Global Black Freedom Struggle since Slavery. 3.0 Credits.
This seminar underscores the global and historical dimensions of the black freedom struggle through a series of case studies spanning North America, Africa and Latin America. Major themes addresses include race, diaspora, and movement(s) from slavery to the present.
Instructor(s): J. Levy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.343. Diaspora, Nation, Race, and Politics. 3.0 Credits.
For millions of people across the globe, political fate in the 20th century was defined at the intersection of diaspora, race, and nation — and this may be true in the 21st century as well. This course, a collaborative effort involving a historian and a political scientist, explores the parallels and divergences in the deployment of these terms in nationalist and transnational mobilization, literature and aesthetics, and group identity formation in Eastern Europe, Africa and the New World of the Americas. Set against the backdrop of the fall of significant empires in the late 19th and early 20th centuries, we will explore themes of migration, human rights, the nation-state system, and racism through history, political sociology, and political and social theory. We will pay particular attention to the theoretically exemplary Jewish and Black experiences of diaspora, race, and nation, engaging both with how those experiences were specially shaped by the imposition of national and racial logics and with Black and Jewish politics and thought in relation to those categories. Readings include Max Weber, W. E. B. Du Bois, Booker T. Washington, Theodor Herzl, Hannah Arendt, Benedict Anderson, Rogers Brubaker, Andrew Zimmerman, Michele Mitchell, David Scott.
Instructor(s): K. Moss; M. Hanchard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.358. Black Code Studies: Black History and Digital Media. 3.0 Credits.
This course explores doing histories of people of African descent in an age of digital and social media. The focus will be on African-descended communities in the United States, but content will range across time space. Examples include: West African digital art communities; the use of slave trade databases to write Caribbean history; and the use of social media in social justice organizing from Paris to Baltimore. Students will explore questions of blackness, race, ethnicity, sex and sexuality, violence and justice while creating digital content using platforms like Wordpress, Omeka, Twitter, and Tumblr. Students will be evaluated on their acquisition of African American and Afro-Diasporic history; their knowledge of digital and social media platforms; and their ability to creatively and accurately relate the histories of blackness and black people to their representation and discussion online.
Instructor(s): J. Johnson
Area: Humanities, Social and Behavioral Sciences.

AS.100.382. Early Modern African Atlantic. 3.0 Credits.
This course examines the history of West and Central Africa and its diasporic people and cultures during the early modern period (c. 1400-1750) in disparate parts of the Atlantic world, including Europe, Latin America, the Caribbean, and Anglo-America. Themes include: West and Central African political and religious cultures; trans-Atlantic slavery; African Christianity; and the question of cultural survivals.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.385. Mobility and Encounter in the Medieval Indian Ocean. 3.0 Credits.
This seminar discusses forms of mobility and exchange: trade and travel, conquest and religious transformation, diasporas and migration, the spread of practices and technologies across the Indian Ocean from the 8th to 16th centuries.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.399. Decolonization and Citizenship in Africa, 1945-2015. 3.0 Credits.
Critically explores issues of decolonization and citizenship in Africa from WWII to the present. Emphasis on political inclusion and exclusion, and violence, fostered by nationalist movements and postcolonial African governments.
Instructor(s): P. Larson
Area: Humanities
Writing Intensive.

AS.100.403. Law & Custom in Colonial Africa. 3.0 Credits.
Examines how colonial rule transformed African legal systems, while Africans used European law for political resistance and personal gain. Research project based on colonial South African court records.
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences.

AS.100.411. Readings in the History of Public Health in the 20th and 21st Centuries. 3.0 Credits.
The students will read major and some minor works in the history of global public health and will each develop their own concept of how and why the major institutions, professions, and practices associated with public health have evolved over the past long century. To help the students focus on their ideas, they will write three essays on particular aspects of the history.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.439. Cuban Revolution and the Contemporary Caribbean. 3.0 Credits.
A lecture course dealing with the development of the Cuban Revolution and the tortuous history of the Caribbean during the 19th and 20th centuries.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.445. African Fiction as History. 3.0 Credits.
An exploration of Modern African history through the African historical novel.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.486. Jim Crow in America. 3.0 Credits.
Explores the history of legalized racial segregation in the United States from the nineteenth and twentieth centuries.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.709. Modern Latin America.
This course will examine selected themes in Modern Latin American history such as legacies of the colonial administrations, the plural societies, political cultures, slavery, and other forms of servitude; religious impact, independence movements, globalization and narco trafficking. Reading knowledge of Spanish required. Reading knowledge of Spanish.
Graduate Students only
Instructor(s): F. Knight

Near Eastern Studies

AS.130.203. Archaeology of Africa: From Human Origins to the Emergence of Civilizations. 3.0 Credits.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrower
Area: Humanities.

AS.130.400. Introduction To Middle Egyptian. 3.0 Credits.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). In the second semester, literary texts and royal inscriptions will be read. Course meets with AS.133.600.
Instructor(s): L. Zhang
Area: Humanities.
AS.131.613. Archaeology of Africa: From Human Origins to the Emergence of Civilizations.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrow
Area: Humanities.

AS.133.611. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required.
Instructor(s): B. Bryan; R. Jasnow
Area: Humanities.

History of Science Technology
AS.140.163. Jungle Doctors: Medical Missions in Africa from David Livingstone to Paul Farmer. 3.0 Credits.
Freshman seminar using a variety of primary and secondary sources, students will explore the motivations and activities of expatriates practicing medicine in Africa from the 19th century to the present.
Instructor(s): J. Cummiskey
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.379. Health and the City: Urban Public Health In Historical Perspective. 3.0 Credits.
This course examines the history of cities as spaces of public health concern since the nineteenth century, and seeks to understand how social, political, and economic contexts have shaped urban public health interventions.
Instructor(s): E. Anders
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

Philosophy
AS.150.404. The Idea of Power. 3.0 Credits.
The Idea of Power surveys seminal texts in the history of political thought on the nature, promise, and dangers of political and social power; it also critically engages contemporary texts on race and gender power relations.
Instructor(s): C. Lebron
Area: Humanities.

Economics
AS.180.252. Economics of Discrimination. 3.0 Credits.
This course examines labor market discrimination by gender, race and ethnicity in the United States. What does the empirical evidence show, and how can we explain it? How much of the difference in observed outcomes is driven by differences in productivity characteristics and how much is due to discrimination? How have economists theorized about discrimination and what methodologies can be employed to test those theories? What has been the impact of public policy in this area; how do large corporations and educational institutions respond; and what can we learn from landmark lawsuits? The course will reinforce skills relevant to all fields of applied economics, including critical evaluation of the theoretical and empirical literature, the reasoned application of statistical techniques, and analysis of current policy issues.
Prerequisites: AS.180.102
Instructor(s): B. Morgan
Area: Social and Behavioral Sciences Writing Intensive.

AS.180.355. Economics of Poverty/Inequality. 3.0 Credits.
This course focuses on the economics of poverty and inequality. It covers the measurement of poverty and inequality, facts and trends over time, the causes of poverty and inequality with a focus on those related to earnings and the labor market, and public policy toward poverty and inequality, covering both taxation and government expenditure and programs. By the nature of the material, the course is fairly statistical and quantitative. Students should have an intermediate understanding of microeconomic concepts. Basic knowledge of regression analysis is also helpful.
Prerequisites: AS.180.301
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

Political Science
AS.190.284. Classics of Political Theory: Political Freedom. 3.0 Credits.
This course investigates core questions of what constitutes political freedom, what limits on freedom (if any) should be imposed by authority, and the relationship between freedom, responsibility and political judgment. Spanning texts ancient, modern and contemporary, we shall investigate how power inhabits and invigorates practices of freedom and consent. Among the questions we will consider: Can we always tell the difference between consent and coercion? Are morality and freedom incompatible? Is freedom from the past possible? By wrestling with slavery (freedom’s opposite) we will confront the terrifying possibility that slavery can be both embodied and psychic. If our minds can be held captive by power, can we ever be certain that we are truly free? The political stakes of these problems will be brought to light through a consideration of issues of religion, gender, sexuality, civil liberties, class and race.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.311. Disposable People: Race, Immigration and Biopolitics. 3.0 Credits.
This course will explore theories and practices of race and immigration in order to illuminate the proliferation of populations regarded as disposable in contemporary politics. We will pay special attention to the contestable criteria used to determine eligibility for membership in the human race. We shall also examine how political power influences the relays between citizenship status and those whose lives are worthy of protection, and those who should be allowed to die.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.339. American Racial Politics. 3.0 Credits.
Recommended Course Background: AS.190.214
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.340. Black Politics I. 3.0 Credits.
This course is a survey of the bases and substance of politics among black Americans and the relation of black politics to the American political system up to the end of Jim Crow. The intention is both to provide a general sense of pertinent issues and relations over this period as a way of helping to make sense of the present and to develop criteria for evaluating political scientists’ and others’ claims regarding the status and characteristics of black American political activity.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.342. Black Politics II. 3.0 Credits.
Recommended Course Background: AS.190.340.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.
AS.190.360. Power and Democracy in the American City. 3.0 Credits.
How do race and class intersect to shape how democracy works in American cities? In this innovative course students will learn about urban citizenship, authority, and activism using Baltimore as a case. The class, co-taught with Baltimore organizers, will use a community based learning approach.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.380. The American Welfare State. 3.0 Credits.
This course analyzes the distinctive US welfare state in historical and comparative perspective. We begin with a survey of the policy context, an historical overview from the poorhouses through the Great Society, and a tour of welfare states across the rich democracies. We then survey developments – and explain the actual workings of policy – across jobs, education, welfare, pensions, and health care. We explore the institutional and political factors behind their divergent trajectories through conservative revital and the age of Obama. Students will write a seminar paper exploring policy development over time in a program or area of their choosing. Enrollment restricted to Social Policy minors only.
Prerequisites: Students may take AS.190.380 or AS.360.380, but not both.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.384. Urban Politics & Policy. 3.0 Credits.
An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross-listed with Africana Studies
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.385. Urban Politics and Policy. 3.0 Credits.
An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross-listed with Africana Studies.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.391. Time to Kill: Race, Punishment, Death and Desire. 3.0 Credits.
This course examines the role of race in determining who deserves to be punished, the timing and occasions of punitive action and how long punishment should endure. Key to our inquiry is how racialized presumptions about human desire might justify punitive logics of power. The class explores inequalities in the distribution of punishment and death in order to illuminate how race shapes questions of whose time is more valuable, who lives and who dies, and ultimately whose lives count as human.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.191.389. The Politics of Race and Ethnicity in the Postcolonial Society. 3.0 Credits.
The postcolonial society offers a unique terrain for the study of comparative racial politics, providing a setting for which racial and ethnic politics often take place between predominately non-white groups. In this course, students will examine contemporary understandings of the concepts of race and ethnicity and how they are deployed politically in the postcolonial society, enabling students to make deeper explications about the relationship between race, ethnicity and national inclusion as global phenomena that are the persistent and widespread legacies of colonialism, nationalism and white supremacy. Specifically, students will become familiar with the processes of colonization and decolonization—as well as postcolonial theories of resistance—that structure group politics today, drawing upon theoretical sources from Africa, Asia and the Caribbean. These theoretical and historical tools will be used to study racial and ethnic politics across a range of postcolonial cases, including Indonesia, Mauritius, Fiji, Trinidad, Colombia and Brazil.
Instructor(s): E. Thornton.

German Romance Languages Literatures
AS.210.391. Advanced Portuguese Language & Literature I. 3.0 Credits.
This third-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. All classes are conducted in Portuguese. Prereq: 210.278 or placement test. Permission required
Prerequisites: AS.210.278 or equivalent score on placement test or instructor approval.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.211.319. ¡Salsa! The Afro-Antillean Song. 3.0 Credits.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instills vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. Concepts learned in this course will be directly applicable to careers linked to intercultural and international relations while also apply to multiple careers in media, music industry and dance. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Instructor(s): M. Ramos
Area: Humanities.
AS.211.341. Power and Resistance in French Political Thought. 3.0 Credits.
Even as a strong, divine-right monarchy emerged in France, following the Renaissance wars of religion, rebellious French thinkers never stopped questioning the foundations of power. They focused critically not only on the claims of authority issuing from the top, but also on the submissiveness of the governed and the reach of propaganda. This course examines how power shapes minds and bodies, from absolutism to the Revolution, to democratic laïcité. Readings include works by La Boétie, Montaigne, Loyseau, Bayle, Rousseau, Saint-Just, Maistre, Tocqueville, Foucault, Lefort, Rancière and the Assemblée Nationale. Readings and discussion in English.
Instructor(s): E. Russo
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization. 3.0 Credits.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor's permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities Writing Intensive.

AS.215.458. Cuba and its Culture Since the Revolution. 3.0 Credits.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

Writing Seminars

AS.220.438. Readings in Poetry: Of Late: Poetry & Social Justice. 3.0 Credits.
In this Community-Based Learning course, students will explore poetry of social and political engagement in partnership with high-school age writers from Writers in Baltimore Schools. Participants will put learning into practice by organizing community conversation, reflection, and collaboration. Participation in some events outside of class time will be required.
Instructor(s): D. Malech
Area: Humanities.

AS.220.439. Readings in Fiction: Caribbean Voices. 3.0 Credits.
Caribbean history is reflected in the literature of emigration and collapse of empire. We'll study novels by Naipaul, Rhys, and other 20th century authors.
Instructor(s): W. Biddle
Area: Humanities Writing Intensive.

Sociology

AS.230.205. Introduction to Social Statistics. 4.0 Credits.
This course will introduce students to the application of statistical techniques commonly used in sociological analysis. Topics include measures of central tendency and dispersion, probability theory, confidence intervals, chi-square, anova, and regression analysis. Hands-on computer experience with statistical software and analysis of data from various fields of social research. Special Note: Required for IS GSCD track students.
Prerequisites: Statistics Sequence restriction: students who have completed any of these courses may not register: EN.553.211 OR EN.553.230 OR EN.553.310 OR EN.553.311 OR EN.553.413 OR EN.553.420 OR EN.553.420 OR EN.553.420 OR EN.560.435 OR AS.280.345 OR AS.200.314 OR AS.200.315 OR EN.560.348; Statistics Sequence Restriction: Students who have completed EN.553.111 OR EN.550.113 may not enroll.
Instructor(s): S. Karatasi
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.208. Introduction to Race and Ethnicity. 3.0 Credits.
This course offers an historical overview of race and ethnicity in American society, and the processes that have led to ethnic and racial boundaries. We explore the social dynamics of racial/ethnic hostility and racial/ethnic protest movements. In addition, we examine how race and ethnicity have been used to justify segregation, domination and genocide, but also to create a sense of community, shared responsibility and belonging. Cross-listed with Africana Studies.
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences.

AS.230.244. Race and Ethnicity in American Society. 3.0 Credits.
Race and ethnicity have played a prominent role in American society and continue to do so, as demonstrated by interracial and interethnic gaps in economic and educational achievement, residence, political power, family structure, crime, and health. Using a sociological framework, we will explore the historical significance of race and its development as a social construction, assess the causes and consequences of intergroup inequalities and explore potential solutions.
Instructor(s): M. Greif
Area: Social and Behavioral Sciences.

AS.230.265. Research Tools for Global Sociology and Development. 3.0 Credits.
This course will introduce students to a range of software programs that are critical for conducting social scientific research in the 21st century. Students will develop competency in the use of computer programs for statistical analysis, database management, the creation of maps and timelines, and the presentation of research reports. The course uses examples from ongoing social science faculty research projects at Johns Hopkins on global inequality and international development. Required for GSCD track students. Course previously titled "Research Tools and Technologies for the Social Sciences.
Instructor(s): S. Upadhyay
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.
AS.230.313. Space, Place, Poverty & Public Housing. 3.0 Credits.
Is a neighborhood just a grouping of individuals living in the same place, or do neighborhoods have collective meanings and impacts on children and families? We will capitalize on research methodologies used to define and describe neighborhoods and their effects on economic and educational outcomes. These include case studies, census data, surveys, quasi/experimental data. Focus is on how research measures neighborhood effects and incorporates community level processes into models of social causation (e.g., social capital/control, community efficacy, civic engagement). Also examined: patterns in residential mobility, segregation, and preferences within black and white populations; development of housing policy in the U.S.; programs to determine how neighborhoods affect issues of social importance. Statistics and public policy background is helpful but not required.
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.316. African American Family. 3.0 Credits.
This course is an examination of sociological theories and studies of African-American families and an overview of the major issues confronting African-American family life. The contemporary conditions of black families are explored, as well as the historical events that have influenced the family patterns we currently observe. Special attention will be given to social policies that have evolved as a result of the prominence of any one perspective at a given point in time.
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences

AS.230.332. Race, Racism & Racial Privilege. 3.0 Credits.
This course will examine the concepts of race, racism, racial privilege in contemporary America, and the West in general. Examples from other countries will be integrated as well. Historical contexts such as the colonialism, the Civil War and Reconstruction, the Civil Rights movement, and the post Civil Rights era will help to provide an understanding of the social, political, economic, and cultural forces processes that have constructed and shaped the concepts of race and the racialized subject over time.
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.357. Baltimore and Beyond. 3.0 Credits.
This course uses the city of Baltimore as a lens through which to explore issues of urban inequality. We will focus on Baltimore’s history of racial segregation and concentrated poverty, and its effect on the social and economic well-being of the city and its residents, with attention to education, employment, health and crime. Students will learn how to employ Census data, GIS approaches, and sociological research to inform questions about population change, inequality and the distribution of resources across the city and metropolitan region. Students will also work on one or more policy relevant studies based in Baltimore, including; a project on abandoned and vacant housing, a desegregation intervention, and a longitudinal study of inner city youth. Finally, students will become familiar with Baltimore City’s programs and policy approaches to addressing the city’s most pressing problems, and will design innovative and effective and innovative solutions as part of their course assignments. Enrollment restricted to Social Policy minors only.
Prerequisites: Students that took AS.360.357 may not take AS.230.357
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.374. Poverty and Public Policy. 3.0 Credits.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Enrollment restricted to Social Policy minors only.
Prerequisites: Students that took AS.360.372 may not take AS.230.374.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.377. Colonialism and Anti-Colonialism. 3.0 Credits.
This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences

AS.230.381. Sociology of the Middle East and North Africa. 3.0 Credits.
This course takes a sociological approach to the contemporary Middle East and North Africa. Topics include urbanization and demographic change; rentier welfare states and the global political economy of oil; women in higher education and the labor force; the 2011 Arab Spring; conflict in Syria, Libya, and Yemen; Amazigh (Berber) identity in northwest Africa; Israel-Palestine; “Dubai, Inc.” and the sociology of migrant labor; neoliberal Islamic politics in Turkey; cinema and everyday life in Iran; conservative monarchy in Morocco and Saudi Arabia; and the role of the United States in the MENA region. Students will give presentations, write memos, and submit two papers. One aim of the course is to turn students into clear, polished academic writers and thinkers.
Instructor(s): R. Calder
Area: Social and Behavioral Sciences
Writing Intensive.
AS.230.383. Courts, Housing, and the City: A Research Seminar on Social Justice in Baltimore. 3.0 Credits.
This course will join an existing survey of the Housing Court in Baltimore City by the Public Justice Center (PJC) of Maryland to examine the role and process of evictions in the Baltimore civil litigation system. The course will examine the history of housing in Baltimore and the changing role of the courts in housing rights and law from the mid-20th century to the present. Working with the PJC’s Human Right to Housing Project, students will be expected to participate in the survey collection process by attending Rent Court and participating in the data collection process, followed by cleaning and analysis of the data. Counts as American Politics/Sociology of the United States for GSCD Track.
Prerequisites: AS.230.205 AND AS.230.265 or permission of instructor
Instructor(s): D. Pasciuti
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.385. Schooling, Racial Inequality and Public Policy in America. 3.0 Credits.
After examining alternative explanations for why individuals obtain different amounts and types of educational training, the course focuses on how an individual’s family background and race affect his or her trajectory through the educational system. The course covers the specific challenges that have confronted urban schooling in America since the 1960s, including the classic literature on the effects of school and community resources on student achievement as well as the development and later evaluation of school desegregation policies. The course also considers case studies of current policy debates in the US, such as housing segregation and school resegregation, voucher programs for school choice, and the motivation for and consequences of the establishment of state-mandated testing requirements. Throughout the course, emphasis is placed upon the alternative modes of inquiry and writing which opposing scholars, policymakers, and journalists use to address these contentious topics.
Instructor(s): S. Morgan
Area: Social and Behavioral Sciences
Writing Intensive.

Public Health Studies
AS.280.120. Lectures on Public Health and Wellbeing in Baltimore. 1.0 Credit.
An introduction to Urban Health with Baltimore as a case study: wellbeing, nutrition, education, violence and city-wide geographic variation. Lectures by JH Faculty, local government/service providers and advocates.
Instructor(s): P. Leaf
Area: Social and Behavioral Sciences.

Humanities Center
AS.300.327. Introduction to Comparative American Cultures: Obama and Philosophy. 3.0 Credits.
This course will investigate the philosophical as well as theological, juridical and political, and rhetorical and literary backgrounds that have informed and shaped Barack Obama’s writings, speeches, and policy strategies leading up to and during his presidency. While paying minute attention to a few selected controversial debates in domestic and international governance and relations, and while discussing the question of Obama’s legacy in and after the upcoming elections, our primary focus will be on understanding the curious blend of Christian realism, influenced by the theologian Reinhold Niebuhr, the tradition of American civic republicanism and pragmatism, and Obama’s specific brand of post-Civil Rights, if not necessarily post-racial, politics. All these tenets coalesce in a vision and politics that may well be described as one of “deep” pragmatism. Attention will be paid to Obama’s early appeal to “simple ideas” and “small miracles,” each of them yielding the Biblical and sobered injunction of a “hope against hope.” But extensive consideration of his thought and impact in the assessment of biographers and intellectual historians, legal scholars and political theorists, cultural critics and pundits will add to our attempt to understand and take stock of the Obama phenomenon as well.
Instructor(s): H. de Vries
Area: Humanities.

East Asian Studies
AS.310.308. The Frontier in Late Imperial China. 3.0 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of “China”. Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China’s northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

Interdepartmental
AS.360.372. Poverty and Public Policy. 3.0 Credits.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Permission of instructor required.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences
Writing Intensive.
Program in Latin American Studies

AS.361.207. Afro-Latin American Biography. 3.0 Credits.
In this course, we will examine biographical accounts of men and women of African descent in Latin America and in the broader Black Atlantic. These individuals include conquistadors and slaves, saints and sinners, revolutionaries and ordinary people. In their life stories, we will not only examine questions of race, gender, and religiosity that were central to the construction of identity in the early modern Atlantic world, but also the nature of the sources that allow us to tell their stories.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.361.350. Mestizaje and Race in Latin America. 3.0 Credits.
The course problematizes how race and mestizaje became socio-political realities and forms of lived experience in Latin America, shaping such things as governmental practices, spatial configurations, interpersonal relations, and political mobilizations. PLAS Teaching Fellowship.
Instructor(s): A. Reyes Kipp
Area: Humanities, Social and Behavioral Sciences.

Study of Women, Gender, Sexuality

AS.363.417. Internship/Practicum: Critical Theory and the Possibility of Social Justice. 4.0 Credits.
This course combines a weekly seminar with 4 hours per week in a Baltimore social justice organization, coordinated by the JHU Center for Social Concern. Class discussions draw on readings in ethnography and feminist, queer and critical race studies to address topics such as; race, class and gender inequality, neoliberal development, health, institutional violence and politically engaged research.
Instructor(s): A. Krauss
Area: Humanities, Social and Behavioral Sciences.

Program in Museums and Society

AS.389.377. Black Artists in American Art Museums: Correcting the Canon. 3.0 Credits.
Students are invited to examine critically the history of Black artists exhibiting within American museums. With the help of BMA staff, class will develop interpretation for an installation to accompany a major retrospective of artist Jack Whitten that considers the "canon" of art history as a site of ongoing negotiation between taste-makers, artists, dealers, and critics, as well as art institutions that include the market and the museum. Students will take advantage of archives at the BMA, the Library of Congress and Howard University. Students will help select the artworks and themes for the show; research individual participants in the social networks that facilitated the success of some artists over others; and research the biographies of individual artworks - some that have entered the canon and some that should. M&S Practicum. CBL Course. Cross-listed with Africana Studies.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.378. Collections Remix: Black at Hopkins. 3.0 Credits.
We turn a critical eye on our university’s material culture and memory under the guidance of local experts on collecting and interpreting materials that represent the African-American experience. Students will develop a strategic plan to guide future collecting on campus and will stage creative interventions with or around objects to reveal hidden stories and rethink existing interpretation. M&S Practicum. CBL course.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

Anthropology

http://anthropology.jhu.edu/

The Anthropology Department specializes in socio-cultural anthropology: the study of social and cultural forms of human life using ethnographic, historical, and comparative methods. Faculty in our department are engaged in research that addresses topics considered traditional such as the study of ethnicity, language, religion, family and kinship, or medical pluralism, and also new and emergent issues such as those relating to childhood, technological imaginaries, biomedicine, ecology, state, violence, and popular economies. In all cases, the acute awareness of shifting contexts in which institutions are embedded and the impact of global, regional, and national politics on social life is built into the methodology and the theory engaged by faculty and students. Faculty in our department have research expertise in the Americas, South Asia, the Middle East, and sub-Saharan Africa. Our research is oriented toward the investigation of a number of cross-cutting themes of trans-regional concern rather than a comprehensive coverage of global cultural areas.

The department's distinctive orientation to anthropology can be characterized in terms of its orientation to non-European anthropological and philosophical traditions, alongside the dominant anthropologies which have been seen as definitive of the discipline in the past. In terms of specific topics, faculty in our department are engaged in research on violence, social suffering and theories of everyday life; the material and moral force of the state; money and value; environments; new kinship; anthropology of religion and secularism; anthropology of medicine; media and visual anthropology; health and well-being; and anthropology of language.

The department offers a B.A. program and a Ph.D. program. The B.A. prepares students either to continue to various employment opportunities or degree in anthropology (and related fields) or to develop anthropological skills and imagination as complementary to pre-professional training, such as medicine, engineering, and international relations. Undergraduate course work offers an introduction to the basic methodologies and theories of contemporary anthropology through discussion and directed research on these and other topical issues. Student advising helps interested students to develop concentrations, through sequences of complementary courses tailored to their own interests, including electives outside the department. In addition, majors have the option to pursue an honors program.

Undergraduate majors in anthropology are required to do ten courses, four of which are required courses and an additional four must be taken at 300-level or higher, in addition to a language requirement. Students wishing to write an honors thesis are also required to do two additional courses in which they work on their dissertation topics. Minors are required to take seven courses, four of which are required courses.

The core curriculum for majors develops a step-wise sequence from the freshman seminar to the senior honors option. We offer an elective 100-level Freshman Seminar that introduces anthropological approaches to a broad range of contemporary issues. Here, we hope to develop curiosity in anthropology as a way of knowing the world, and to encourage critical reflection by students on their own life experiences. Our 100-level introductory course, Invitation to Anthropology, is geared toward freshmen and sophomores. The objective of this course is twofold: to offer anthropological knowledge and analytic skills to a broad range of students, and to prepare potential majors for further training in social theory and fieldwork methods. Following from this introductory course, our 200-level Ethnographies course furthers student understanding of
essential themes through close attention to classic and contemporary ethnographic works in the discipline. The 300-level Methods course is an additional requirement for majors, deepening students’ capacity to link theory and method, preparing students to carry out research, and guiding students in the writing up and presentation of original research. Building on these foundations, the 400-level Logic of Anthropological Inquiry course, also required of majors, is a thematic capstone course that demands an extended engagement with classic debates and encourages integrative thinking across the range of anthropology courses taken. Majors in anthropology may decide to pursue an honors thesis based on an extended research project. They should discuss their interest in writing a thesis with their faculty advisor in their sophomore year and before the summer of their junior year. Drawing from their previous course preparation and working closely with a faculty advisor, such students spend one summer conducting field research, one semester conducting secondary literature review, and the final semester writing their honors thesis.

Outside of the core curriculum, both majors and minors may take a wide variety of courses. Thematic courses are highly varied and reflect faculty interests, usually including (in any one year) courses in religion and philosophy; medical, legal, economic and linguistic anthropology; and study of diverse areas of the world. Courses on the state, law, and money offer a critical and comparative approach for students aiming toward political, economic, and legal careers. Courses in medical anthropology serve pre-med and public health students. Philosophical and theoretical courses are attractive to humanities students. We see teaching and research as integrally linked, and invite undergraduate students to envisage research as they take introductory and advanced courses in anthropology.

The training of graduate students focuses on providing students with a vocabulary and grammar to engage in anthropological reasoning in socio-cultural anthropology and with skills in research methods. The department emphasizes training in anthropological theory in relation to new developments in other disciplines within the social sciences; understanding of regions in terms of cross-cutting questions rather than geographical questions alone; and the capability to place a problem within a broad history of anthropology that is engaged through multiple national and regional traditions.

Our faculty brings into the classroom an extraordinary range of personal and professional experiences. We are proud to have one of the most diverse faculties in the discipline worldwide, both in terms of gender and ethnic or national origins. Their collective fieldwork experience spans the world, including the Americas, the Middle East, sub-Saharan Africa, and South Asia.

**Facilities**

In addition to the regular departmental colloquium where invited speakers from Hopkins and other campuses around the world present their ongoing research, the department holds one or two special symposia every year, including one organized by graduate students. The department also invites a distinguished scholar each year to present the Sidney W. Mintz Lecture. The purpose of the Mintz lectures is to integrate scholarly and social concerns, focusing on questions of political and economic inequality, racism, gender, and ethnic differences from an interdisciplinary perspective. Previous lectures have subsequently been published in Current Anthropology.

The Baltimore-Washington area is unusually rich in library, archival, and museum resources relating to anthropology. In addition to the excellent collection in the Milton S. Eisenhower Library, the William H. Welch Medical Library, and other libraries at Johns Hopkins, major anthropological holdings are available at the Smithsonian Institution, the Library of Congress, and the other specialized libraries and museums in nearby Washington, D.C. Students can use the Smithsonian Institution’s ethnological and library collection through a cooperative arrangement.

**Financial Aid**

Undergraduate majors and non-majors are eligible to apply for a Provost’s Undergraduate Research Award to support special research and write-up projects in their senior year.

Graduate fellowships and teaching assistantships are available, and most students admitted receive support. Stipends are currently offered at $29,000 per year plus fellowships that cover tuition and health insurance. Some additional funds are usually available on a competitive basis for summer field research (including travel grants from the Institute for Global Studies, the Program for the Study of Women, Gender, and Sexuality, and the Program for Latin American Studies), and for special language-learning needs. Write-up students may apply for a Dean’s Teaching Fellowship.

**Undergraduate Programs**

Courses in the department are open to all students in the university, regardless of their majors. Although there are no formal prerequisites, students with no previous courses in Anthropology are encouraged to consider courses at the 100- or 200-level. Freshman seminars are designed to introduce students to different perspectives within anthropology through close examination of a contemporary issue.

**Requirements for the B.A. Degree**

(Also see Requirements for a Bachelor’s Degree [http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree])

To fulfill B.A. degree requirements with an anthropology major, students must complete a total of 30 credits (10 courses) in Anthropology and foreign language through the intermediate level. Only with permission of the director of undergraduate studies may students use one class taken at another institution towards the major. Students must take completed course materials to the director of undergraduate studies to discuss this exception. Majors must receive a grade of C or better in all major requirements and no major requirements may be taken satisfactory/unsatisfactory. Complete major requirements are:

**Anthropology Electives**

- Two 100-400 level courses in the Anthropology Department: 6 credits
- Four 300- or 400-level courses in the Anthropology Department: 12 credits

**Foreign Language**

- Foreign language through the second semester of the intermediate level

* One cross-listed course taught outside the Anthropology Department may apply towards the major. With permission, one independent study may apply towards the major.
** Students pursuing honors in the major may apply the senior essay courses towards their required electives.

**Honors Thesis in Anthropology**

Students with at least a 3.5 GPA (major GPA) by their junior year are encouraged to write a senior thesis by registering for the two-semester Senior Essay (AS.070.561 Senior Essay-Fall and AS.070.562 Senior Essay - Spring) under the guidance of a faculty advisor.

Total Credits: 44

**Minor in Anthropology**

A minor in anthropology is available to undergraduate students in any major. One independent study may apply towards minor requirements. Minors must receive a grade of C or better in all minor requirements and all course must be taken for a letter grade (no satisfactory/unsatisfactory grading). One cross-listed course taught outside the Anthropology Department may apply towards the minor; all other courses must be taken in the department. Only with permission of the director of undergraduate studies may students use one class taken at another institution towards the minor. Students must take completed course materials to the director of undergraduate studies to discuss this exception. If one of these is accepted, the student may not take a cross-listed course.

Requirements for the minor are:

**Graduate Program**

**Ph.D. in Anthropology**

The graduate program in anthropology leads to the Ph.D. degree. By admitting a small cohort each year, the Department of Anthropology encourages close working relationships between students and faculty and the opportunity for students to develop their anthropological interests in ways that are uniquely suited to them to become researchers, scholars, and teachers. We also encourage and help develop students wishing to pursue non-academic research careers in keeping with the needs of the contemporary world.

**Requirements for the Ph.D. Degree**

Students will usually spend three years in residence, one year or more conducting field research, and a final year completing the dissertation. Requirements include:

- A total of twelve courses to be completed in the first three years. The first of these courses is Proseminar and is a requirement for incoming students.

- Students will sit a three-hour exam near the end of their first year. Incoming graduate students will be provided with a reading list at the start of the summer before the academic year to initiate their self-directed growth as anthropologists and to help them prepare for the exam.

- Students are expected to conduct exploratory fieldwork during the first summer. They are to write a proposal for this fieldwork and discuss their work upon return in a departmental methodology workshop. This workshop accompanies the Methods course, which is a requirement for students in their second year.

- For the comprehensive exams, students are required to write two essays (one conceptual and one on their study area). These essays will ideally also help develop their dissertation research proposal. The essays should preferably be completed by the end of the second year. A course called Regions has been developed to assist students in writing the essays.

- Students are also encouraged to take the Proposal Writing course offered and to apply for fieldwork grants from external agencies.

- A student should be able to demonstrate a reading knowledge of at least one foreign language relevant to his/her field of study before completing the comprehensive exams.

- A Post-Field course will be offered to those returning from the field to help them begin writing their dissertation, along with relevant professionalization workshops as needed. Post-field students are required to give a seminar on their research in the departmental colloquia series.

For further information about graduate study in anthropology, contact the academic program administrator in the Department of Anthropology or visit the departmental website at http://anthropology.jhu.edu.
Interdisciplinary Ph.D. Degrees
Students may petition the department and the graduate board to create joint Ph.D. courses of study. Past cases have included Anthropology/Public Health and Anthropology/Intellectual History (in the Humanities Center).

For current faculty and contact information go to http://anthropology.jhu.edu/people/

Faculty
Chair
Deborah Poole
Professor and Chair: visuality and representation; race and ethnicity; violence, liberalism, and the state; law and judicial reform; Latin America (Peru, Mexico).

Professors
Veena Das
Krieger-Eisenhower Professor: Feminist movements, gender studies, sectarian violence, Medical Anthropology, post-Colonial and post-Structural theory; South Asia, Europe

Niloofar Haeri
Professor: Islamic prayers and experiences of religiosity, gender, ritual and language, public appearance and notions of modesty among Jews, Christians and Muslims, social history of moral values in Iran since early 20th century; language ideology, vernacularization and modernity. Egypt, Iran and the Middle East

Associate Professors
Clara Han
Associate Professor: Anthropologies of health, well-being, and care; violence; poverty; moral community; subjectivity; law, specifically in relation to incarceration; kinship; and science and technology; Latin America, specifically Chile, and the United States

Naveeda Khan
Associate Professor and Director of Graduate Studies: Bangladesh: riparian society, engineered landscapes and the theology of ecological consciousness and climate change; Pakistan: Islam and everyday life; urban anthropology; religion and theology; law and literature; techniques and technologies of perception; US and South Asia: temporality and emergent rationalities.

Juan Obarrio
Assistant Professor: political, law and temporality, theology in relation to state and the economy, memory and subjectivity, magic, violence, value, experimental writing. Southern Africa, Latin America.

Anand Pandian
Associate Professor and Director of Undergraduate Studies: philosophical anthropology / postcolonial and posthumanist ecology / sensory ethnography / experimental writing / anthropological methods / Baltimore / India / Earth

Assistant Professors
Alessandro Angelini
Assistant Professor: Politics and aesthetics of urban maps, models, and simulations. He uses ethnographic and historical data to show that different representations of the city inflect debates over how we imagine and manage it. South America, specifically Brazil, Rio de Janeiro.

Michael Degani
Assistant Professor: Africa, Economic Anthropology, Energy, Infrastructure, Urbanism

Tom Özden-Schilling
Assistant Professor: First Nations, political ecology, cartography, science and technology studies, expertise, forestry, climate change, media. Canada, specifically, British Columbia.

Professor Emeritus
Jane I. Guyer
Social and economic anthropology, money and culture, household and gender; West Africa

Joint Appointments
Erica Schoenberger
Professor (Environmental Health and Engineering): Economic Geography, Regional Development

Dimitrios Yatromanolakis
Associate Professor (Department of Classics): research centers upon both technical and more cross-disciplinary fields: archeaic and classical Greek literature and performance cultures, sociocultural history, vase-painting and vase-inscriptions; Greek papyrology and epigraphy; and historical and comparative anthropology.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.070.104. Special Opportunities in Undergraduate Learning: Anthropology of Sound. 1.0 Credit.
This course explores recent discussions on the possibilities of sound to challenge and expand conventional methods used in the humanities, contemporary social research, and the natural sciences. Drawing from a range of philosophical, historical, psychoanalytic, linguistic, anthropological, artistic, and scientific sources; students will discuss the ways sound has been historically experienced, represented, produced, classified, cancelled, and circulated in different parts of the world. These topics will be examined through reading assignments, listening sessions, and weekly sound recording assignments.
Instructor(s): G. Valdivia Corrales
Area: Humanities, Social and Behavioral Sciences.

AS.070.106. Brains/Minds: An Anthropological Critique. 3.0 Credits.
Are our minds the products of our physical brains? Can biological mechanisms of the brain explain the diversity of our mental lives? This course will explore the strange ways in which contemporary neurosciences influence and change our conceptions of mind, selfhood and interpersonal relations. We will examine the psychobiological accounts of behavior and their anthropological critique thereby tracking the hopes and anxieties that accompany and surround the contemporary transformation of ideas and techniques in modern psychobiology.
Instructor(s): B. Polat
Area: Humanities
Writing Intensive.

AS.070.113. Freshman Seminar. 2.0 Credits.
Various topics.
Instructor(s): T. Ozden-schilling
Area: Humanities, Social and Behavioral Sciences.
AS.070.122. Climate Change in Everyday Life. 3.0 Credits.
Climate change is the average of weather over long periods of time. It is usually studied by means of global simulation models. More recently human activity affecting the climate has also begun to be studied and with it the effects of climate change on the human body, activity and society. In this course we will draw upon film, scientific reportage, ethnography, literature and philosophy to explore the human embodiment of climate change within everyday life.
Instructor(s): N. Khan; R. Tobias
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.129. Introduction to the Anthropology of the Middle East. 3.0 Credits.
This course introduces the students to some of the main themes and debates shaping the anthropology of the Middle East. It will begin by critically analyzing the definition of the 'Middle East' and of the 'Orient' and by presenting an overview of the 'zones of theory' which characterized the discipline at its inception. It will then explore the contemporary re-articulations of such themes and the emergence of new themes and debates, such as the secular/religious divide, the modernity debate, the anthropology of Islam and the ethical turn, gender and feminism, neoliberalism, consumerism, cosmopolitism, migration and mediation. The objective is to convey the main lines of anthropological inquiry within each theme, and to show their relevance to the understanding of contemporary Middle Eastern societies.
Instructor(s): P. Abenante
Area: Humanities, Social and Behavioral Sciences.

AS.070.132. Invitation to Anthropology. 3.0 Credits.
In this course students will be introduced to anthropological modes of asking questions about the changing world through an openness to the new and through returning to classics in the anthropological canon. The specific topics to be explored are: new modes of mapping, visualization and scenario building, the interface between technology and experience, global governance structures, and, the possibility of a new planetary ethos in the face of climate change.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.133. Studying the HIV/AIDS Epidemic. 3.0 Credits.
This course will introduce students to the study of the HIV/AIDS epidemic as scholars in the social science and humanities have undertaken it. The readings will include ethnographies of the disease in the non-west and short theoretical readings to complicate notions of health, pleasure, healing and cure. Furthermore, by focusing on the various regions of Africa, the course hopes to demonstrate the manner in which the social and cultural landscape change the experience of the epidemic.
Instructor(s): V. Saria
Area: Humanities, Social and Behavioral Sciences.

AS.070.134. Chemical Pollution and Social Life. 3.0 Credits.
The present is marked by a ubiquitous exposure to different sorts of toxic chemicals: from disasters that affect entire communities to the built environments in which we live and work, from the traces of pesticides in our food to the worldwide disrupting effects of oil production. Drawing from social theory, ethnography, environmental history, policy documents, newspaper articles, commercial ads, and documentaries, this course will introduce anthropology as a way of thinking through the interactions between processes of chemical pollution and social worlds.
Instructor(s): J. Moreno Garcia
Area: Humanities, Social and Behavioral Sciences.

AS.070.138. Thinking Through Pain. 3.0 Credits.
Despite being a common experience, pain remains a mystery for both medicine and the humanities. Can it be described? Measured? Eliminated? Is it the same for everyone? This course explores some of the ways in which pain is represented, interpreted and addressed in contemporary clinical and social settings, combining ethnographic and testimonial literature with fiction and film to illuminate key ethical and political issues at stake in defining and treating pain.
Instructor(s): P. Madariaga Villegas
Area: Humanities, Social and Behavioral Sciences.

AS.070.139. Markets and Morals. 3.0 Credits.
This course studies forms of exchange as they are imagined and experienced across diverse political and religious settings. The aim is to understand the cultural rationalities and moral dimensions of economic ideas and activities, such as gifts, commodities, sacrifice, investment, credit, debt and value.
Instructor(s): A. Saraf
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.144. Anthropology and Visual Media. 3.0 Credits.
This course examines the production of visual media within anthropology. We look at the particular ways in which visual media such as film, television, and photography shape anthropological practice.
Instructor(s): C. Venkataramani
Area: Humanities, Social and Behavioral Sciences.

AS.070.154. Maps and Mapping. 3.0 Credits.
This course explores maps as cultural documents and ethnographic sites. Students will learn how cultural understandings of space, time, and the visible world shape cartographic conventions. Through mapping exercises we will explore how ethnographer can use maps to theorize the nature of political, cultural, and economic life.
Instructor(s): D. Poole; V. Procupez
Area: Humanities, Social and Behavioral Sciences.

AS.070.179. Child Adoption and Family Making. 3.0 Credits.
The course takes child adoption as a starting point to critically explore how kinship and family are connected to legal practices, technological innovations, and broader historical, political, and socio-economic processes. Dean's Prize Freshman Seminar
Instructor(s): A. Reyes Kipp
Area: Humanities, Social and Behavioral Sciences.

AS.070.189. Islamic Critique: Ethical and Political Reasoning. 3.0 Credits.
This course investigates the concepts and practices of critique available in contemporary Muslim societies. Focusing on moral and political dimensions of critique, we examine genealogies and exchanges among Islamic traditions and those of the European Enlightenment. Dean's Prize Freshman Seminar.
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.202. Economic Anthropology. 3.0 Credits.
How do the abstract principles of economics play out in a diversity of times and places? This course surveys anthropological research on the social organization of labor, the political institutions that underlie wealth and property, and the cultural meanings of money and commodities. Through these topics, we will look at enduring debates about the rationality of markets and the nature of capitalism.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.203. Healing: Politics and Poetics. 3.0 Credits.
Metaphors of health and illness; individual and social. The body in pain and the body politic. Ethnographies of historical memory vis-à-vis medicine, epidemics, sacredness, shamanism, terror, humanitarianism, truth and reconciliation.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.204. An introduction to Islamic Intellectual History. 3.0 Credits.
This course will study the vibrant world of the Seljuks, an Islamic empire that flourished between 1037 and 1157 AD, from Khorasan across Baghdad to Hijaz and Anatolia. As an exploration in intellectual history, we will attempt to understand the social world of the Seljuk Turks through political, religious, and literary texts. We will first read a political treatise, Siyasatnamâ (The Book of Government), written by Nizâm al-Mûlîk (1018-1092), the formidable minister of the Seljuk Empire, who oversaw the reign of three successive sultans during the second half of the eleventh century and created a strong bureaucratic state for the Seljuks. During his administration, he commissioned the development of madrasas, colleges dedicated to the teaching of Islamic law, theology, literature, and history. The most famous of these madrasas was the Baghdad Nizamiyya where Al-Ghazâlî (1058-1111) taught from 1190 and 1194. We will read Al-Ghazâlî’s Deliverance from Error in order to explore the state of religious learning at the peak of the Islamic Golden Age. Having discussed the political and religious foundations of Islamic orthodoxy in the eleventh century, next we turn to the rise of heterodox movements that challenged the authority of the Seljuk state. We will briefly examine the history of the Ismaili branch of Shia Islam, focusing on the politico-religious ideas of its most potent representative, Hassan-i Sabbâh (1050s-1124). Finally, we will end our class with the Ruba’îyat of Omar Khayyâm (1048-1131), the prominent poet and polymath of the eleventh century.
Instructor(s): B. Polat
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.205. Post-Soviet Russia: An Anthropological Perspective. 3.0 Credits.
This course is designed to introduce students to anthropology’s contribution to ongoing conversations about Russia’s political and economic system, social life, as well as Russia’s place in the world since the fall of the Soviet Union. Students will be encouraged to think beyond easy distinctions between socialism and post-socialism, Putin’s Russia and the West, often starkly and unreﬂexively established by commentators and in the media. Topics will include post-socialist transition, memory, violence and war, gender and sexuality.
Instructor(s): G. Hervouër-Zeiber
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.211. The Production of European Culture. 3.0 Credits.
This course is an introduction to the anthropological study of “cultural production” in Europe, from literature and performance to museums and public art.
Instructor(s): A. Brandel
Area: Humanities, Social and Behavioral Sciences.

AS.070.222. Africa in the 21st Century. 3.0 Credits.
Rapid urbanization has created new needs, occupations, entertainments, etc., outside the “formal sector”. We use anthropological studies, African literature, film and the press on-line to understand making a living.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.224. Plastic. 3.0 Credits.
Plastic is a ubiquitous substance in the contemporary world. Ideas about the plasticity or malleability of human nature are also pervasive. Drawing on anthropology, history of science, environmental studies, art, design, films and other media, this course will examine the plastic dreams and nightmares that haunt our lives today.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.226. Chemical Pollution and Social Life. 3.0 Credits.
The present is marked by a ubiquitous exposure to different sorts of toxic chemicals: from disasters that affect entire communities to the built environments in which we live and work, from the traces of pesticides in our food to the worldwide disrupting effects of oil production. Drawing from social theory, ethnography, environmental history, policy documents, newspaper articles, commercial ads, and documentaries, this course will introduce anthropology as a way of thinking through the interactions between processes of chemical pollution and social worlds.
Instructor(s): J. Moreno Garcia
Area: Humanities, Social and Behavioral Sciences.

AS.070.228. Photography and Writing: Crafting an Anthropological Text. 3.0 Credits.
This course explores resonances between photography and anthropological writing. Students will be introduced to basic techniques in photographic composition. How do photography and anthropology share techniques of rendering people, places, and things? Other topics include the role of sensation, reflection, and creativity in depicting a scene, as well as care and ethics. Students will develop an individual project that folds photographic sensibilities into the writing process.
Instructor(s): M. Sehdev
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.230. From Jihad to Revolution: The Political Struggles of Women in the Middle East. 3.0 Credits.
The course explores the role of women as political prisoners, combatants and activists in the modern history of the Middle East using a multidisciplinary approach. It explores the history of women’s engagement in political struggles in the Middle East over the long durée starting with anti-colonial movements in the 20th century up until the recent uprisings known as the “Arab Spring”. The course is geared towards the examination of the ways in which politics, in a broad sense, is gendered in the Middle East by examining how the social and political construction of women as political subjects influence the nature and practice of political life, as well as the ways in which sexual difference has served as a basis for social and political organization.
Instructor(s): F. Halbouni
Area: Humanities, Social and Behavioral Sciences.
AS.070.231. Housing Matters. 3.0 Credits.
This course will collectively craft an anthropological critique of housing, both as a social concern and as an object of public policy and urban planning. As a key component of the structure and functioning of cities, housing is instrumental to urban governmentality, segregation, and citizenship, as well as to cultures of consumption and class formation, identities, solidarities and the imagination of alternative social orders. We will examine how the material and social effects of housing shape the politics of difference, rights, markets and property relations, consumption and activism in the US urban context, as well as social experiences in other regions of the world.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.233. Africa as Laboratory. 3.0 Credits.
Africa, as anthropologists have noted, has long been a “laboratory of the future.” By tracing the intersections of technology and politics, this class considers the various experiments in oppression and liberation that have unfolded within it. Following a broad historical arc, we begin with colonial medicine, racial science, and urban planning; move to national infrastructures and postcolonial resource extractions; and finally consider contemporary African engagements with consumer technology.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.235. Anthropology of Christianity. 3.0 Credits.
This course introduces students to the study of Christianity from the Anthropological perspective. Among the themes discussed are: Christian conversion, theology, practice, and knowledge in a range of national contexts. The course considers broad trends in global Christianity, including the retreat of traditional Catholicism and the surge of charismatic forms of Christianity, such as Pentecostalism and Charismatic Catholicism.
Instructor(s): J. Richlin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.241. African Cities. 3.0 Credits.
Over the past two decades, African cities have absorbed rapid population increase without accompanying economic growth. Students will review the major challenges of this mode of urbanization and explore the vibrant ways residents have sought to meet them. Following anthropology’s commitment to lived experience, we will track these issues through the twists and turns of everyday life, and consider what they may say about urbanity more broadly in the 21st century. Topics include livelihood, the built environment, conflict and membership, and popular culture.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.259. Gift and Sacrifice. 3.0 Credits.
How do gifts become the foundation of society? How does the fetish take control over a person? What is the meaning of the ritual sacrifice of living beings and things? The course will explore classical and contemporary anthropological explorations of circulation, exchange, of power, dread and desire.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.262. Cuban Intellectuals, Cinema, and the State. 3.0 Credits.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.

AS.070.264. What is Scientific Experimentation?. 2.0 Credits.
How do scientists design and conduct experiments? In what ways experimental results advance our understanding of scientific theories? In this introductory course, we will discuss how experimentation contributes to scientific knowledge making. Reading a number of key articles, we will explore the ways in which an experimental model is developed in behavioral neuroscience. We will discuss how neurobiologists interpret psychological concepts and theories by drawing on animal experimentation.
Instructor(s): B. Polat
Area: Humanities, Natural Sciences.

AS.070.273. Ethnographies. 3.0 Credits.
What does it mean to translate the field onto the page? This course explores the craft of ethnography and its relationship to anthropological knowledge. Reading a series of classic and contemporary works, and engaging in our own writing experiments, we attend to the knotty problem of rendering lived experience, attending to narrative, voice, structure, and the relationship between description and analysis.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.275. Reproduction, Kinship, and the State. 3.0 Credits.
What makes a relative? How are reproductive futures made and unmade? This course takes reproduction as site to examine the interplay of kinship relationships and the state. We will take topics including adoption, gay parenting, the medical and social aspects of childbirth, and reproductive technologies to explore how reproductive futures are unevenly distributed, endured, aspired to, and re-made.
Instructor(s): C. Han; C. Sufrin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.277. Contested Indigeneity. 3.0 Credits.
This course will introduce students to the diversity of indigenous peoples and their situations globally, as well as to their agency and innovation in grappling with challenges across a range of social systems, political contexts, and ecological conditions. Cross-list: PLAS
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.278. “Cutting (out) the Middleman”? . 3.0 Credits.
Middleman are popularly conceived as a person who acts as an interface between two parties, usually for a fee. The figure of the middleman, however, is seen in a negative light as an exploitative element. Rather than assume the middleman to be a given entity, this course takes a detour into ethnography, fiction and film to rethink how specific social milieus shape practices, politics and networks of mediation that exceed the physical figure itself. This course will thus, cut the middleman "out" of everyday life and draw mediation into our field of vision.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.
AS.070.279. Ecological Anthropology. 3.0 Credits.
This course explores questions of nature, ecology, and environment from an anthropological perspective, drawing on case studies from around the globe. Topics will include human and animal relations, forest and marine livelihoods, industrial development and activist politics, as well as the urban ecology of Baltimore.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.281. Home and Belonging. 3.0 Credits.
In this course we will examine different conceptions and experiences of "home" through studies of domesticity, kinship and household in diverse cultural settings. Reading anthropological analysis of urban built environment and locality, we will explore the notions of home and homeland, as realms of care, intimacy and belonging yet also as sites of subjection, discrimination and gender/racial inequality.
Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.285. Understanding Aid: Anthropological Perspectives for Technology-Based Interventions. 3.0 Credits.
This course combines anthropological perspectives with the discussion and examination of technology-based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.
Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.286. Crafting Community Development Projects in Baltimore. 3.0 Credits.
Students will craft community development project proposals in the areas of education, health, community building or economic development. This hands-on course will focus on Baltimore City as it introduces students to the theory and practice behind community development projects, and their application to the arts. Students will conduct their work in groups and elaborate their project proposal in the city of Baltimore.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.

AS.070.290. Modern South Asia: Bangladesh/Pakistan. 3.0 Credits.
Bangladesh and Pakistan, two major regional players in South Asia, originate in the 1947 Partition of India and shared nationhood between 1947 and 1971, ending with the War of Independence in 1971 in which Bangladesh separated from Pakistan. Since that time the two nations have been on different paths that have sometimes mirrored each other. This course brings together contemporary works of national histories, social movements and cultural production to consider the politics of self-differentiation and the points of convergences.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.293. Anthropology of Material Worlds. 3.0 Credits.
This course explores how anthropologists study material forms and objects in relationship to social, political and cultural life. Topics to be considered include, totemism, art, engineering, garbage, display, collection, and the fetish.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.294. Political Anthropology of Africa. 3.0 Credits.
The course will explore classical and contemporary ethnographies of the political in Africa, examining how their authors address issues of power, hierarchy and symbol. We will study various articulations of state, ethnicity and community that are analyzed by observing relations between power and resistance or between law, economy and violence through war, custom and ritual. The seminar will also address the way in which Africa has been constituted as a key source of the sub-field of political anthropology through colonial trajectories, postcolonial detours and the political imagination of the past and the future.
Instructor(s): J. Obairio
Area: Humanities, Social and Behavioral Sciences.

AS.070.297. Discover Hopkins: Medicine, Sports, and Culture. 1.0 Credit.
This course examines how medicine is practiced in different cultures around the world. In particular, we draw on theories and concepts from medical anthropology to study how these differences reveal alternative perspectives on the body, its health and its capabilities. To sharpen our inquiries into cultural differences surrounding bodily health, we look comparatively at the anthropology of sports and bodily performance. In looking at how concepts including illness, wellness, and injury differ across cultures, we consider, for example, how the bodily experience of pain not only varies according to societal beliefs and behaviors, but also changes as one pursues the limits of athletic performance. In addition to introducing how cultural anthropology engages with medicine and sports performance, this course enriches scientific interest in medicine by teaching students techniques of critical reasoning that powerfully investigate both how medicine is practiced and the cultural phenomenon of bodily health. Prior study in anthropology is not required. We anticipate talks from two current medical residents who were undergraduate majors in anthropology, a high-level athlete, and a field trip to speak with physicians at the Maryland Medical Center.
Instructor(s): T. Thornton
Area: Social and Behavioral Sciences.

AS.070.300. The Global Artwork. 3.0 Credits.
This course is about art practice in a postcolonial context, where the techniques and pictorial concepts formed by a European history of art are confronted by other traditions of representation, beset by different kinds of political struggles, and posed against the background of religious traditions other than that of Christianity. What problems of history, difference and the self arise in this context, and what forms of art practice emerge to address these problems? In what ways do these forms of art practice draw upon religious traditions, and how do we think about the displacement of religious traditions in modern art? In this course, we will explore these questions by examining the modern art of the Middle East, South Asia, and China, in conjunction with readings from anthropology, art history, comparative literature, philosophy and religious studies.
Instructor(s): S. Al-Bahloly
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.303. The Romantic Legacy of Anthropology. 3.0 Credits.
The word “romantic” has long carried negative connotations within anthropology meaning the tendency to idealize, exoticize, or seek out the irrational. Instead, through a focus on the themes of science, nature, art, intuition, systematicity and creativity, we suggest that romantic philosophy has offered and continues to offer much of interest for contemporary anthropology. Drawing on readings in philosophy, anthropology, science and literature, we explore the long suppressed romantic legacy of anthropology.

Instructor(s): A. Brandel; N. Khan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.307. Markets and Morals. 3.0 Credits.
This course studies markets across diverse religious and political settings to explore the cultural rationalities and moral dimensions of economic activities such as exchange, circulation, investment, credit, debt and value.

Instructor(s): A. Saraf
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.308. Norms and Emotions: Anthropology of Psychiatric Knowledge. 3.0 Credits.
This course will introduce students to anthropological understandings of therapeutic and scientific practices in contemporary psychiatry. Through a selection of seminal readings in anthropology and history, we will explore the integral relationship between psychiatric knowledge and social and economic contexts. The course material will expose students to diverse approaches in the scholarship, which explore the role that psychiatric knowledge plays in the administration of social life and in shaping present cultural understandings of self and interpersonal relationships.

Instructor(s): B. Polat
Area: Humanities, Social and Behavioral Sciences.

AS.070.313. The Anthropology of Belief: Religious Experience, Publics, and Personhood. 3.0 Credits.
The aim of this course is to enable you to ask intelligent questions about the ways individuals are called upon as “religious”, and more specifically, to allow you to engage in a reflection on the publics of which they are a part, and the means by which they come to cultivate a sense of personhood. Closely reading theory, ethnography, and literature in relation to each other, we will try to develop a nuanced understanding of the many ways in which human beings have imagined and conducted themselves as religious persons. How do ideas of imagination, habit, desire, and the senses play into our understanding of cultures of faith?

Instructor(s): M. Wilson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.317. Methods. 3.0 Credits.
This course aims to teach basic fieldwork skills: Choosing and entering a community; establishing contacts; learning to listen and to ask questions and locating archival material that might be relevant. It is a hands-on course that increases student familiarity with various neighborhoods such as the Arts District in Baltimore. Recommended Course Background: two or more prior courses in anthropology (not cross-listed courses). Course is a requirement for anthropology major.

Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.319. Logic of Anthropological Inquiry. 3.0 Credits.
Anthropology combines theory and methods from the sciences and the humanities. We take a close look at those logics as shown in ethnography as a mode of inquiry and as a genre of writing. This will count as a required course for Anthropology majors but open to all undergraduates.

Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.320. Anthropology of Time. 3.0 Credits.
The course is a cross-cultural exploration of ideas of time and temporality found in ethnographic, philosophical and literary sources: Anthropological perspectives on relations among past, present and future; Ritual, imagination and social practice in the contexts of religion, development, finance, catastrophe, crisis, democracy, revolution; Analysis of representations of time and the Other in anthropological works and media reports; the contemporary and the untimely.

Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.327. Poverty's Life: Anthropology of Health & Economy. 3.0 Credits.
Medicine, economics, and ethics have profoundly shaped debates on poverty. This course analyzes these debates and tracks the relationships between body, economy, and the everyday. How can anthropological reasoning and methods inform approaches to health and economic scarcity and insecurity?

Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.331. Anthropology of Poetry and Prayer. 3.0 Credits.
What kind of activity is prayer? Are we talking to God(s), to our ancestors, to ourselves? What do poetry and prayer share? The course will explore these and similar questions with particular attention to questions of repetition, memory, meaning and presence.

Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.333. Theologies of Political Life. 3.0 Credits.
This course explores the relationship between modern political forms and theological traditions. Looking at developments both in the West and the postcolonial world, we will examine the multiple ways in which theological traditions have continued to inform how political life is conceived and pursued. In particular, we will focus on the relation between liberalism and the Christian tradition; the turn to messianism in critical theory; the transformation of the shari'a into a legal form; and its imbrication in anti-colonial politics.

Instructor(s): S. Al-Bahloly
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.335. Anthropology of Science and Medicine. 3.0 Credits.
This course will introduce students to a number of key concepts and
technologies in science-based medicine on human life, social relations, and
normal, and pathology are experienced and defined; and how disease
consideration today, occupying our literary imagination,
films and photography—how they are mobilized to

AS.070.337. Digital Media, Democracy, and Control. 3.0 Credits.
This course examines how digital technologies enable new publics that
Anthropologists have used their expertise in public debates, legal cases,
and case studies, following of our professional association, shows how
and medicine.
Instructor(s): B. Polat
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.340. The Elementary Forms of American Religious Life. 3.0 Credits.
In the United States, the nation that in its infancy so famously erected a
“wall between Church and State,” religion remains a persistent, and
insistently public concern today, occupying our literary imagination,
film arts, and philosophy.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.343. On Seeing: Between Religion and Art. 3.0 Credits.
This course reflects on what it is to see, by examining how different
religion, and the legacy of that critique in modernism; and to the development of
new technologies like photography and film—and it will draw on readings from
anthropology, art history, critical theory and religious studies.
Instructor(s): S. Al-Bahloly
Area: Humanities, Social and Behavioral Sciences.
AS.070.346. Cinema and Ethnography. 3.0 Credits.
Films, like ethnographies, stage encounters with foreign worlds. We
will investigate this parallel by examining, side-by-side, cinematic and
anthropologists to the critique of images during the Protestant Reformation and the
Christianity and Hinduism; to concepts of vision in the Islamic tradition; and to the critique
of images during the Protestant Reformation and the
Anthropologists have used their expertise in public debates, legal cases,

Instructor(s): B. Polat
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.335. Anthropology of Science and Medicine. 3.0 Credits.
This course will introduce students to a number of key concepts and
methods in anthropology of science and medicine. Providing a general
introduction and a systematic survey of the scholarship, the course
seeks to shed light on the medico-scientific problems of modern life from
the viewpoint of social-scientific inquiry. Through seminal publications
within the field, we will explore the effects of scientific research and
science-based medicine on human life, social relations, and cultural
understandings of self. We will also discuss the ways in which cultural
norms and values inform and shape the recent developments in science
and medicine.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.348. Anthropology of Mental Illness. 3.0 Credits.
This course explores how the institutions of the family, state, and
neighborhood respond to and shape mental illness; how the normal,
abnormal, and pathology are experienced and defined; and how disease
categories circulate in social worlds.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.
AS.070.352. Evolution, Ecology, Becoming. 3.0 Credits.
The concept of evolution is central to social theory. Originating in
the question of the species, it has moved into questions of human
ecology, cultural forms and modes of thought. While it remains a deeply
contested, often criticized concept, particularly in its neo-Darwinian
manifestation, it orients anthropological thinking in ways that are as yet
to be examined. Reaching into the archives of anthropology and other
cognate disciplines, this course will examine the writings of Lyell, Darwin,
and medicine.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.
AS.070.357. An Anthropology of the City. 3.0 Credits.
Strangers, neighbors, proximities, contagion, segregation. How do these
notions track with notions of the city? In this course, we will explore the
city through both anthropological literature and primary materials across
different world regions. We will focus specifically on themes of dying and
death, proximity, and stranger sociability. Particular attention will be paid
to studies of poverty.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.366. Speculative Anthropology. 3.0 Credits.
Anthropology has always been a speculative enterprise, an attempt
to think beyond some familiar idea of the human. We will explore this
speculative dimension by looking at crossovers between anthropology
and contemporary art, science fiction, philosophy, and environmental
politics. Working with texts, films, drawings and other media, we will
examine the experimental and imaginative nature of anthropology.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.377. Ethnographic Writing. 3.0 Credits.
We will closely examine the narrative form and force of a few major
works of anthropological writing, and pursue experiments of our own in
ethnographic description and expression. Co-listed with AS.070.603.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.380. Honors Thesis Writing. 3.0 Credits.
Weekly seminar and supervision for senior anthropology majors researching and composing their honors thesis. Highly Recommended for all senior anthropology majors in the honors program.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.385. From Sexual Nature to Sexual Politics. 3.0 Credits.
This course traces anthropological concern with questions of sexuality. Students will explore anthropological notions of primitive promiscuity, cultural configurations of the correspondence between sex, procreation, and birth, and ideas about sexual rites of passage. The course will end with a discussion of sexual politics in Euro-America and public concern over HIV/AIDS. The course draws on the work of Freud, Malinowski, Meade, Herdt, Povinelli, Rubin, Bersani and Halperin. Cross-listed with Women Gender Studies
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.405. Urban Ecologies. 3.0 Credits.
Description: This course will explore the city from the vantage point of nature/culture relations and political imagination. It will engage a range of topics including the built environment, urban infrastructure, (de)industrialization and the ways in which urban space shapes and is shaped by power relations, racial dynamics, housing markets, domesticity and the body. As part of the coursework, students will carry out small guided research projects in Baltimore City.
Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.407. The Anthropology of Design. 3.0 Credits.
From casinos to canoes, algorithms to animal traps, our worlds are bursting with intentional objects. The word design has come to evoke the prestige of such objects, and their power to shape our collective habits and sensations. This course explores the anthropology of designed artifacts and their complex social trajectories. Beginning with philosophical investigations into the relationship between materials, form, and craft, we will proceed through ethnographic case studies of design as expert discourse and ordinary practice. Ultimately we will consider the affinities between the ethnography and design as opened-ended and not entirely predictable engagements with the world.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.418. The Comparative Tradition in Anthropology. 3.0 Credits.
Anthropology is often imagined as the study of a particular place and people. But comparative methods date back to the beginnings of the discipline, efforts that are echoed in recent works of global and ambitious scope. In this seminar, we examine the theory and practice of comparison in anthropology, drawn in historical as well as contemporary studies on themes such as art, economy, science, and belief
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.419. Logic of Anthropological Inquiry. 3.0 Credits.
Anthropology is an endeavor to think with the empirical richness of the world at hand, a field science with both literary and philosophical pretensions. This course grapples with the nature of anthropological inquiry, reading classic works in the discipline as well as contemporary efforts to reimagine its foundations. Required for anthropology majors.
Prerequisites: Prereqs: AS.070.273 OR AS.070.317
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.420. Anthropology of Death and Dying. 3.0 Credits.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences

AS.070.422. Infrastructure. 3.0 Credits.
This course surveys ethnographies of built networks such as roads, power grids, and water pipelines as sites of cultural meaning, political struggle, and social interaction. We will consider the kinds of collective existence they make possible today, and their relationship to anthropological thought.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.426. Kinship: Old and New. 3.0 Credits.
We will track the transformations in kinship theory in relation to wider changes in legal theory, biomedicine, and the relation between state and family. In particular we will ask how the concepts of sovereignty, gift, exchange, human and non-human milieus affect notions of relations. Cross-listed with AS.070.639
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.430. Violence and Non-Violence: Anthropological Explorations. 3.0 Credits.
What are the conceptual challenges in thinking about violence and non-violence are categories of thought and practice? We will examine these issues through ethnographies of war, collective violence, and domestic violence.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.431. Senses of the State. 3.0 Credits.
This course examines ethnographic approaches to the study of state power and organization. How does a "traditional" ethnographic focus on locality and place help us to theorize the scalar qualities of the "global" neoliberal state? How do anthropologists study the temporal, material and sensory domains through which people make sense of the state as a bureaucratic, governmental and sovereign presence in their lives?
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.445. Health, Disease, Poverty: New Ethnographies from India. 3.0 Credits.
We will study the multiple dimensions of health and disease in the context of poverty and vulnerability in India. The course will focus on institutions and experiences, and ask how the lives of patients and healers connect in local worlds. We will end with some recent controversies on reforming health care in India.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.485. About Time. 3.0 Credits.
This course will explore time from an anthropological perspective. What is time? An object, a dimension, a sensation? Can we "have" time? What is the relation between power and the control of time? Through readings and discussions of classical and current anthropological theories and ethnographies, we will analyze the meaning, experience and textures of time in different cultural settings. Case studies will explore the US, the West and the Global South, with special emphasis on conceptions of the future: expectations, anticipations, preemption, emergence, possibility. We will study imaginations of temporality and futurity in relation to fields such as politics, custom, finance, security, labor, climate change and so on, looking into the role that emotions play in relation to time.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.493. Precarity. 3.0 Credits.
How do we understand and engage precariousness and vulnerability in the contemporary world? This seminar explores the notion of precarity in anthropology and social theory. We will explore this notion genealogically asking such questions as: what are the forms of politics arising in relation to new transformations of labor? What are the regional debates in which the notion of precarity has arisen? We will then explore how anthropology has responded to ongoing destruction of whole forms of life, through war, settler colonialism, displacement, and poverty.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.503. Independent Study. 3.0 Credits.
Instructor(s): Staff.

AS.070.504. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.070.505. Directed Research-Fall. 3.0 Credits.

AS.070.506. Directed Research. 0.0 - 3.0 Credits.
Instructor(s): C. Han; J. Obarrio; M. Degani; N. Haeri; V. Das.

AS.070.507. Directed Readings. 3.0 Credits.
Instructor(s): Staff.

AS.070.508. Directed Readings. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.070.551. Internship-Fall. 1.0 Credit.
Instructor(s): J. Guyer; N. Haeri.

AS.070.552. Internship - Spring. 1.0 Credit.
Instructor(s): D. Poole; J. Guyer; V. Das.

AS.070.561. Senior Essay-Fall. 3.0 Credits.
Instructor(s): Staff.

AS.070.562. Senior Essay - Spring. 3.0 Credits.
Instructor(s): Staff.

AS.070.594. Internship-Anthropology. 1.0 Credit.
Instructor(s): D. Poole; M. Degani; N. Khan.

AS.070.595. Directed Research. 3.0 Credits.
Instructor(s): J. Obarrio; V. Das.

AS.070.596. Independent Study. 3.0 Credits.
Instructor(s): Staff.

We will pursue anthropological openings into the ecology of mind and world, focusing closely on texts by Levi-Strauss, Bateson, Gibson, Ingold, Viveiros de Castro, Descola, and Latour.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.603. Ethnographic Writing.
We will closely examine the narrative form and force of a few major works of anthropological writing, and pursue experiments of our own in ethnographic description and expression. Co-listed with AS.070.377.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.604. The Place of History in Anthropology.
Open to Senior Undergraduate Students with Instructor Permission.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.605. Anthropology and the Everyday.
Analysis of the everyday groans under the theoretical weight of concepts such "modernity," "governmentality," "capitalism," "globalization" and more recently "security." What might a sharper focus on the everyday yield in terms of its own analytical frameworks and empirical descriptions? We read some contemporary greats (Foucault, Derrida, Cavell, de Certeau, Lefebvre). Simultaneously we look at how each has been received within ethnography by reading anthropologists in engagement with them (Mahmood, Ivy, Das, Siegel, Harvey). We ask what critical stakes anthropology maintains in relation to the everyday.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.606. Professionalization.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.608. First Year Proposal Writing.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

What are the conceptual challenges in thinking about violence and non-violence as categories of thought and practice? We will examine these issues through ethnographies of war, collective violence, and domestic violence.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.
The concept of evolution is central to social theory. Originating in
the question of the species, it has moved into questions of human
ecology, cultural forms and modes of thought. While it remains a deeply
contested, often criticized concept, particularly in its neo-Darwinian
manifestation, it orients anthropological thinking in ways that are as yet
to be examined. Reaching into the archives of anthropology and other
cognate disciplines, this course will examine the writings of Lyell, Darwin,
Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed
with AS.070.352
Instructor(s): A. Goodfellow, N. Khan
Area: Humanities, Social and Behavioral Sciences.

This seminar will address contemporary questions of state and
citizenship in the light of colonial and imperial dynamics at the beginning
of the twenty-first century: transnational and national sovereignty in
relation to local configurations of law, capital and political violence;
processes of subsumption, extraction and financialization. Authors
include Negri, Anighi, Harvey, Chakrabarty, Mbembe, Mamdani, Chatterjee,
Corinol, Dussel.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.612. Self, Narrative, and Autobiography.
This seminar takes insight from the idea that the "I" is not simply a
pronoun. We will read texts on the self, the fragment, and narrative in
anthropology, along with texts that make available different pictures of
the self.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

AS.070.615. The Comparative Tradition in Anthropology.
Anthropology is often imagined as the study of a particular place and
people. But comparative methods date back to the beginnings of the
discipline, efforts that are echoed in recent works of global and ambitious
scope. In this seminar, we examine the theory and practice of comparison
in anthropology, drawing on historical as well as contemporary studies on
themes such as art, economy, science, and belief.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.616. Proseminar.
This course will consist of close reading of anthropological and
philosophical texts to trace some important aspects of the underlying
presuppositions of social theory. We will try to see how regions generate
both data and theory; and also see how some abiding concerns around
the relation between structural formations and formations of subjects are
expressed in classical and current anthropological thought.
Instructor(s): D. Yatromanolakis; V. Das.

The seminar will offer a forum for students to reflect on preliminary field
research and think further about problems of ethnographic method. We
will proceed in the manner of a workshop for ongoing projects. Open to
anthropology graduate students only.
Instructor(s): C. Han.

AS.070.620. Space and Place.
This course explores how concepts of emplacement, location, space,
place, and belonging shape—and are shaped by—cultural formations
and political imaginations. Readings and class discussions include
ethnographies and theoretical texts on planning and struggles over
territory, aspirations regarding land and the environment, nature/
culture distinctions, housing and the right to the city by authors such as
Lefebvre, Massey, Harvey, Foucault, Ingold, Virilio, Bachelard, Tsing,
Escobar, and others
Instructor(s): V. Procupez.

AS.070.621. An Ontological Turn?.
Recent years have seen a number of ambitious and controversial efforts
to find, in ontology, a means of surpassing the inherited humanism,
culturalism, and essentialism of anthropology. This course will critically
examine this proposition of a fundamental "turn" in our thinking,
 juxtaposing recent work on matters of perspectivism, materialism,
relationality, and divinity with earlier attempts in anthropology to grasp
being and becoming otherwise.
Instructor(s): A. Pandian.

AS.070.622. Infrastructure.
This course surveys ethnographies of built networks such as roads,
power grids, and water pipelines as sites of cultural meaning,
political struggle, and social interaction. We will consider the kinds of
collective existence they make possible today, and their relationship to
anthropological thought.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

AS.070.630. Senses of the State.
This course examines how anthropologists study the temporal, material
and sensory domains through which people make sense of the state as a
bureaucratic, governmental and sovereign presence in their lives.
Instructor(s): D. Poole.

AS.070.634. The End of Nature?.
The End of Nature? We have been hearing critiques of the concept
of nature as too pristine since at least Donna Haraway’s Cyborg
Manifesto and Bruno Latour’s We Have Never Been Modern. The call
has been for a mode of ecological thinking without the encumbrance
of nature. Through an examination of some of the tracks that nature
has left within the anthropological archives and kindred debates within
philosophy, this course attempts a revivification of nature for our present.
Readings include Mauss, Rappaport, Levi-Strauss, Bateson, Emerson and
Whitehead.
Instructor(s): N. Khan.

We will track the transformations in kinship theory in relation to wider
changes in legal theory, biomedicine, and the relation between state and
family. In particular, we will ask how the concepts of sovereignty, gift,
exchange, human and non-human milieus affect notions of relations.
Open to undergraduate anthropology majors with instructors approval.
Co-listed with AS.070.426
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.
AS.070.642. Anthropology of Design.
From casinos to canoes, algorithms to animal traps, our worlds are bursting with intentional objects. The word design has come to evoke the prestige of such objects, and their power to shape our collective habits and sensations. This course explores the anthropology of designed artifacts and their complex social trajectories. Beginning with philosophical investigations into the relationship between materials, form, and craft, we will proceed through ethnographic case studies of design as expert discourse and ordinary practice. Ultimately we will consider the affinities between the ethnography and design as opened and not entirely predictable engagements with the world.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.650. Post-fieldwork.
Open to Anthropology graduate students only.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.659. Proposal Writing.
The seminar will offer a forum for students to discuss research projects, prepare grant proposals and think further about issues of ethnographic methodology and writing. Open to Anthropology graduate students only.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.671. Political Anthropology.
This course explores anthropological debates regarding politics and the political. Through readings drawn from both recent and "classic" ethnographies of the political, we will trace how anthropologist have engaged issues of hierarchy, differentiation, power, suasion, command, collectivity, and voice in their accounts of social and cultural worlds.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences

AS.070.655. Before the Law.
Foundations of law and the political in classical political anthropology and postmodern philosophy. Kinship, custom, magic, sacrifice and war as prepolitical realms. State of nature, exception, and force of law; biopolitics, micropolitics and segmentarity. Readings: Africanist ethnography, Clastres, Sahlins, Deleuze, Derrida, Agamben, Benjamin, Kafka.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.677. Anthropology of Death and Dying.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.680. Reading Course in the History of Anthropology: Revolutions and Recuperations.
This course provides a selective, disciplinary overview of anthropological theory as both a plural field of knowledge and as a distinctive mode of formulating questions about history, society and life.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences.

How do different ways of harnessing energy shape life and environment? This course delves into the social, political, even philosophical properties of oil, coal, sunlight sugar, and other sources that fuel human activity. Through these topics, we will consider the cultural meaning of concepts such as charge and expenditure, work and waste.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.682. Readings in Anthropology.
In this course we will engage classical texts from the anthropological archives and explore debates and contemporary salience.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.685. About Time.
This course will explore time from an anthropological perspective. What is time? An object, a dimension, a sensation? Can we “have” time? What is the relation between power and the control of time? Through readings and discussions of classical and current anthropological theories and ethnographies, we will analyze the meaning, experience and textures of time in different cultural settings. Case studies will explore the US, the West and the Global South, with special emphasis on conceptions of the future: expectations, anticipations, preemption, emergence, possibility. We will study imaginations of temporality and futurity in relation to fields such as politics, custom, finance, security, labor, climate change and so on, looking into the role that emotions play in relation to time.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.693. Precarity.
How do we understand and engage precariousness and vulnerability in the contemporary world? This seminar explores the notion of precarity in anthropology and social theory. We will explore this notion genealogically asking such questions as: what are the forms of politics arising in relation to new transformations of labor? What are the regional debates in which the notion of precarity has arisen? We will then explore how anthropology has responded to ongoing destruction of whole forms of life, through war, settler colonialism, displacement, and poverty.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.698. Defining Region.
This course is open to anthropology graduate students only and is to be run on a workshop model. It is to help those students writing their regional essay for the comprehensive exams to acquire expertise in regional debates and literature relevant to their field research. Our understanding of regions is one of cross-cutting concepts and questions rather than geographical framings alone. After identifying a concept or question, each student will create an annotated bibliography, trace the shape of arguments as they emerge within the readings, create an outline and work toward a draft of the final essay.
Instructor(s): D. Poole, V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.710. Law and Political Theology.
The course will explore relations between law and sacredness in political theory and anthropology, regarding both Islam and Christianity. Colonial subjection and subjectivity. Benjamin, Kafka, Agamben, Nancy, Asad and recent anthropology of legal regimes and religion.
Instructor(s): J. Obarrio.
AS.070.712. Risk.  
This class explores ecologies of risk as they play out in law, environmental governance, and the fiscal and regulatory regimes that govern politics and life in neoliberal societies.  
Instructor(s): D. Poole.

AS.070.719. Suspicious Interlocutors Part II: Psychoanalysis and Anthropology.  
This course is a continuation of Anthropology AS.070.718, offered in Spring 2013. Students will continue the previously begun investigation of the conversation between anthropology and psychoanalysis, which proves long-standing and often as contentious as it is complementary. The course will tack back and forth between ethnographic materials inspired and informed by psychoanalytic insights, and the use of ethnographic sources and anthropological materials in psychoanalytic writings. Students will engage works from such scholars as Freud, Lacan, Cavell, Klein, Derrida, Siegel, Das, Reynolds, Levi-Strauss, Seremetakis.  
Instructor(s): A. Goodfellow  
Area: Humanities, Social and Behavioral Sciences.

This seminar will closely engage key works in science and technology studies and the anthropology of science and medicine, focusing specifically on complexity, experiment, error, and translation. We will pay particular attention to how anthropological questions can be brought to bear on science and medicine by fostering close discussion between graduate student research and course readings.  
Instructor(s): C. Han.

AS.070.801. Dissertation Research.

Instructor(s): J. Obarrio.

AS.130.387. The Poetics of Biblical Prose and Verse.  
3.0 Credits.  
An exploration of how ancient Israelite techniques of literary textual and inter-textual patterning contributes to cohesion and meaning in biblical prose and verse. Attention will be given to the distinguishing characteristics of Hebrew verse in relation to prose, and to a range of different kinds of prose in Israelite literature. These poetics will be exemplified in close readings of selected texts from the Hebrew Bible in English.  
Instructor(s): D. Gropp  
Area: Humanities.

3.0 Credits.  
The course gives an introduction to computational models of the mammalian visual cortex. It covers topics in low-, mid-, and high-level vision. It briefly discusses the relevant evidence from anatomy, electrophysiology, imaging (e.g., fMRI), and psychophysics. It concentrates on mathematical modelling of these phenomena taking into account recent progress in probabilistic models of computer vision and developments in machine learning, such as deep networks. [Applications or Analysis]. Programming experience (Python preferred).  
Instructor(s): A. Yuille  
Area: Quantitative and Mathematical Sciences.

Cross Listed Courses

History of Art
3.0 Credits.  
Survey of Early Christian and medieval art and architecture in North Africa, with an emphasis on indigenous developments and cultural exchange in the Mediterranean world, 4th to 13th century. Dean’s Teaching Fellowship course.  
Instructor(s): N. Dennis  
Area: Humanities.

3.0 Credits.  
Through examining collecting, patronage, colonial exhibitions, and museums, this course examines how South Asia has been constructed in practices of display. Themes: politics of representation, spectacle, ethnography, and economies of desire related to colonialism and the rise of modernity. Cross-list with Anthropology, Museums and Society and Political Science.  
Instructor(s): R. Brown  
Area: Humanities  
Writing Intensive.

AS.010.603. The Active Body: On Display and in Performance.  
An examination of two recent developments in art history and museum studies: the recognition of the object as active and agentic and a growing critical engagement with the body of the artist and performance art. The seminar will unsettle these two themes with the history of living humans on display, from nineteenth-century exhibitions to present-day craftsperson, thinking through bodies, objects, and performance through disciplinary engagements from anthropology, political theory, art history, and museum studies. Open to motivated undergraduates.  
Instructor(s): R. Brown  
Area: Humanities.
AS.010.607. The Epistemology of Photography.
This seminar will ask how photography produces ways of knowing: how does photography’s reality-effect shape its dissemination and absorption? Is photography’s emergence during the colonial era coincidental or catalytic? How is memory (re)constituted in a photography-saturated world? What kinds of histories does photography encourage and discourage? Is a photograph an object? We will read across disciplines (literature, anthropology, history, history of art, political science, theory) to investigate the epistemology of photography and the photograph.
Instructor(s): R. Brown.

AS.100.355. Islam between History and Anthropology. 3.0 Credits.
Co-taught by an anthropologist and a historian, this course will explore recent scholarly debates about—and critiques of—the representations of Islam and Muslim societies.
Instructor(s): N. Khan; T. Shepard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.365. Culture & Society in the High Middle Ages. 3.0 Credits.
This course will treat the flourishing of culture and society in the High Middle Ages (11-14th centuries). Topics covered include the emergence of feudal society and literature, the economic, social and cultural revival of Europe in the 11th and 12th centuries, the Renaissance of the twelfth century and the growth of scholasticism and the University, and the development of feudal monarchies in England and France.
Instructor(s): G. Spiegel
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Political Science
AS.191.344. Belonging to Nature in the Anthropocene. 3.0 Credits.
This course explores debates in contemporary environmental political thought concerning humanity’s relationship to nature in the Anthropocene. The Anthropocene refers to the era in which “human” activity becomes a force of “nature”—when the impact of human activity on natural processes manifests itself in the stuff of the Earth. For many of us, these planetary transformations are hardly noticeable in day-to-day life, but they are dramatic: we are living through the Earth’s sixth mass extinction. What is our relationship to these transformations? Do we have the power to stop them, or at least to minimize their harmful effects? Course readings and films introduce multiple visions of the human/nature relationship and examine the responses they recommend to these and other questions. The political stakes of these visions are brought to light as we consider: How do visions of the human/nature relationship shape and structure core political concepts like freedom, agency, responsibility, and progress? What do they suggest about the strategies most likely to motivate action amid the uncertainty of the Anthropocene? How do these visions subtly (and not so subtly) relegate some to the realm of “nature” so that others can be classified as “human”?
Instructor(s): S. Erev
Writing Intensive.

German Romance Languages Literatures
AS.211.174. Media of Propaganda. 3.0 Credits.
Today, promoting a particular political or personal point of view is not viewed as “propaganda,” but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term “propaganda” will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current Facebook nation.
Instructor(s): B. Wegenstein
Area: Humanities.

History
AS.130.376. Ancient Ritual. 3.0 Credits.
This course will introduce students to the vast body of rituals that were practiced and performed in antiquity, with a particular emphasis on rituals from ancient Mesopotamia, Egypt, and the Hebrew Bible. In addition to examining rituals from a comparative perspective, anthropological and sociological studies of ritual will be read and discussed to shed light on the social, cultural, and political significance of ritual in the ancient world and beyond.
Instructor(s): P. Delnero
Area: Humanities.

Near Eastern Studies
AS.131.635. Seminar: Near East Archaeology.
Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz
Area: Humanities.

AS.140.346. History of Chinese Medicine. 3.0 Credits.
Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.211.337. Migration in Jewish Literature and Film. 3.0 Credits.
Migration in all its forms has played a major role in shaping Jewish identity throughout history. From the Biblical exodus from Egypt through the beginnings of the diaspora under the Romans to the massive European Jewish immigration to America in the late 19th and early 20th centuries to the founding of the state of Israel, the migrations of Jews have also had a major place in Jewish literature. Going all the way back to the Bible, but focusing on the 20th century, this course will explore the ways in which literature and film represent the experience of migration, whether negative (compelled by expulsion or violence); positive (lured by economic or social opportunity); or somewhere in-between. We will examine poetry, plays, prose and film in Yiddish, German, Hebrew, and English (all in translation) on aspects of Jewish migration including the social and political factors motivating migration from the countryside to the shtetl (town) to the city and from Central and Eastern Europe to the Americas, Palestine, and Israel. Issues under discussion will include: adaptation and assimilation; minority rights; what is the relationship of old and new or major and minor languages and literatures?; what is the place of tradition and heritage in a diasporic context? We will also consider the resonances between contemporary debates on migration and historical examples of these issues as they are reflected in literature and film.
Instructor(s): S. Spinner
Area: Humanities
Writing Intensive.

AS.213.635. Anthropology and Modernism.
This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of "culture."
Instructor(s): S. Spinner
Area: Humanities.

Sociology
AS.230.367. Islamic Finance. 3.0 Credits.
Today, Islamic finance is a global industry comprising nearly $2 trillion in assets, with hubs from Kuala Lumpur to Dubai to London. But half a century ago, nothing called "Islamic finance" existed. So where did Islamic finance come from? Why is it growing so fast? And what does it mean for finance to be Islamic? We discuss the ban on riba in the Quran and hadith, finance in early and medieval Islamic societies, petrodollars and the birth of Islamic banking in the 1970s, the rise of Islamic capital markets since 2000, contemporary shariah-compliant financial structures, and the constitution of piety through financial practice.
Instructor(s): R. Calder
Area: Social and Behavioral Sciences.

Humanities Center
AS.300.330. Trauma in Theory, Film, and Fiction. 3.0 Credits.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald ("The Emigrants"), Lanzmann ("Shoah"), Spiegelman ("In the Shadow of No Towers"), McCarthy ("Remainder"), and others.
Instructor(s): M. Fried
Area: Humanities, Social and Behavioral Sciences.

East Asian Studies
AS.310.104. Pacific Crossings: East Asia and the US from the 19th Century to the Present. 3.0 Credits.
This course examines the connections between US and East Asian history from the 19th century to the present day. We will explore how cultural exchange and confrontation shaped humanitarian, nationalist, and socialist projects in the US, China, Korea, and Japan. Readings include memoirs, travelogues, essays, and novels that provide a window into transpacific history.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.108. Introduction to Chinese Fiction and Drama. 3.0 Credits.
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.303. A World Upturned: Cultures of Catastrophe in Japan. 3.0 Credits.
Focusing on earthquake science and earthquake lore, radioactive mutation and nuclear decimation, this course will consider the relationship between technological culture and large-scale cataclysm. In addition to treating a broad array of written, graphic, and filmic representations of Japan's past and potential catastrophes, we will also be keeping a close and careful eye on present developments in Japan's 2011 earthquake/tsunami/nuclear disaster.
Instructor(s): R. Sayre
Area: Humanities, Social and Behavioral Sciences.

AS.310.304. The Architectonics of Tokyo: The Anthropology of City Life in Japan and Abroad. 3.0 Credits.
In this advanced undergraduate seminar on urban life and the anthropology of aesthetics, we will develop tools with which to think about and write about city life in Japan and abroad. 'Architectonic' is a philosophical term referring to the ability to pull otherwise autonomous ideas together into a single coherent whole. In this course we will employ methodologies culled from class readings, lectures, web-based resources, and class discussions to collectively construct a digital patchwork of writings and images that will serve as the classes' own quasi-coherent whole, or 'architectonic' of city life in Tokyo.
Instructor(s): R. Sayre
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.310.309. Monsters, Demons, and Ghosts: Folklore and Festival in Japan. 3.0 Credits.
This course examines popular narratives and festivals from historical through contemporary Japan. Rather than traditional sources (canonical works, philosophical doctrines, and high art), it focuses on non-elite modes of expression: oral histories, epic tales, local legends, stories of the supernatural, music, religious festivals, manga, anime, and film. Through analyses of these mediums, students explore the underlying belief structures that have shaped ideas concerning death and the afterlife, moral ethics, and the spiritual realm in Japan. The course also tackles issues concerning the intellectual construct of the ‘folk’ and folk religion. Who are the folk? How does this concept relate to regional versus national identity, civilized versus so-called primitive populations, premodern versus modern categories? Students will engage these questions through active discussions in the classroom, in-class writing exercises, mini-presentations, and two papers.
Instructor(s): C. Carter
Area: Humanities
Writing Intensive.

Program in Latin American Studies

AS.361.331. Drug wars, violence and illicit lifeworlds in Latin America. 3.0 Credits.
Drawing on ethnographic and historical sources, this course will introduce anthropology as an invitation for students to re-conceptualize and deepen their understanding of the so-called “War on Drugs” as a cultural, social and political formation in Latin America.
Instructor(s): J. Moreno Garcia
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.361.350. Mestizaje and Race in Latin America. 3.0 Credits.
The course problematizes how race and mestizaje became socio-political realities and forms of lived experience in Latin America, shaping such things as governmental practices, spatial configurations, interpersonal relations, and political mobilizations. PLAS Teaching Fellowship.
Instructor(s): A. Reyes Kipp
Area: Humanities, Social and Behavioral Sciences.

AS.363.300. Thirty Years of AIDS: Fatigue, Failure and Fantasies. 3.0 Credits.
This course is designed to study the emergence of the concept of "AIDS Fatigue" that is being used to describe the current moment of this epidemic. Cross-listed with Anthropology.
Instructor(s): V. Saria
Writing Intensive.

AS.363.350. Gender, Sexuality, and Religion: Muslim (In)Visibilities. 3.0 Credits.
"Muslim (In)Visibilities" focuses on gender and sexuality through Orientalism. It considers representations of Muslim bodies within popular Western discourses and what such (m)visibilities are productive of.
Instructor(s): M. Banahi
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.363.417. Internship/Practicum: Critical Theory and the Possibility of Social Justice. 4.0 Credits.
This course combines a weekly seminar with 4 hours per week in a Baltimore social justice organization, coordinated by the JHU Center for Social Concern. Class discussions draw on readings in ethnography and feminist, queer and critical race studies to address topics such as; race, class and gender inequality, neoliberal development, health, institutional violence and politically engaged research.
Instructor(s): A. Krauss
Area: Humanities, Social and Behavioral Sciences.

Program in Museums and Society

AS.389.302. The Virtual Museum. 3.0 Credits.
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.
Instructor(s): J. Kingsley
Area: Humanities.

AS.389.335. Recreating Ancient Greek Ceramics. 4.0 Credits.
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.440. Who Owns Culture?. 3.0 Credits.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.450. Readings in Material Culture. 3.0 Credits.
Objects, things, "stuff"- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

AS.389.650. Readings in Material Culture. 3.0 Credits.
Objects, things, "stuff"- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.
Environmental Health and Engineering
EN.570.285. Understanding Aid: Anthropological Perspectives for Technology-Based Interventions. 3.0 Credits.
This course combines anthropological perspectives with the discussion and examination of technology-based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.
Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences.

Archaeology
http://krieger.jhu.edu/archaeology/
The major in archaeology is an interdepartmental program that introduces students to archaeological theory, the analysis of archaeological materials, and the results of archaeological research in prehistoric and early historic periods in the Old and New Worlds. Archaeology studies human societies through examination of their material culture (physical remains), considering such issues as human subsistence, interaction with climate and physical environment, patterns of settlement, political and economic organization, and religious activity and thought. The field allows for the study of the entirety of human experience from its beginnings to the present day, in every region of the world and across all social strata.

Requirements for the B.A. Degree
Requirements for the major include 13 courses (39 credits). These can be selected from a diversity of offerings available from different departments. In addition, students must take a core of three courses consisting of Introduction to Archaeology, World Prehistory, and Archaeological Method and Theory. Except for some field experiences, majors must complete all courses required for the major for a letter grade and receive a grade of C- or higher.

Core Courses
AS.130.110 Introduction To Archaeology 3
AS.130.177 World Prehistory: An Anthropological Perspective 3
AS.130.354/AS.131.654 Archaeological Method and Theory 3
Any Anthropology course numbered AS.070.1xx-4xx 3
Six archaeology courses, both regionally specific and/or methodologically/theoretically advanced 18
Three courses, to be decided in conjunction with the student’s advisor, pertinent to the archaeological issues the student has focused on 9

Sample Program of Study
In addition to the example plan as shown below, students are required to complete significant archaeological field experience. This is commonly done during the summer(s) after sophomore and/or junior year(s).

Freshman
Fall Credits Spring Credits
AS.130.110 Introduction To Archaeology 3 AS.130.177 World Prehistory: An Anthropological Perspective 3

Sophomore
Fall Credits Spring Credits
Any Anthropology course numbered AS.070.1xx-4xx 3 AS.130.354 Archaeological Method and Theory 3
Archaeology elective #1 3 Archaeology elective #2 3

Junior
Fall Credits Spring Credits
Archaeology elective #3 3 Archaeology elective #4 3
Additional course #1 3 Additional course #2 3

Senior
Fall Credits Spring Credits
Archaeology elective #5 3 Archaeology elective #6 3
Additional course #3 3

Total Credits: 39

Honors Program
Archaeology majors have the option of writing an honors thesis under the supervision of a faculty member. The thesis is based on an original research problem developed in conjunction with that faculty member. Successful completion of the thesis (B+ or higher) will result in the conferring of a BA with honors.

Students entering Fall 2014 and later must pass 6 credits (2 semesters: 130.510 and 130.511) of honors thesis to earn honors in the Archaeology Major. These credits are in addition to and exceed the number of credits needed for the major.

Students who are interested in pursuing an honors thesis should begin to discuss possibilities with a faculty advisor as early as possible and no later than during the second semester of Junior year. A proposal for the thesis must be approved by the faculty advisor before the student registers for the courses and no later than the end of the second semester of the Junior year.

The student will work closely with the faculty advisor, setting a timeline for completing research and submitting drafts of the thesis. A full draft of the thesis is due by the end of March of the Senior year; if the student wants to be listed as receiving honors on the commencement program.
The final version of the thesis must be handed in by the last day of classes.

Program Learning Goals for the Archaeology Major
1. Acquire the basic skills for understanding theory, interpretation, and methods in archaeology.
2. Develop an ability to analyze archaeological data through the reading and interpretation of archaeological publications and study of primary data.
3. Conduct analyses and interpretations of material culture in precise, well-organized, and persuasive language, both orally and in writing.
4. Acquire interdisciplinary knowledge of different past human cultures.
5. Gain significant knowledge of the material culture of at least one region or thematic issue.
6. Acquire on-site experience and expertise in archaeological method through fieldwork.

For current course information and registration go to https://isis.jhu.edu/classes/

Cross Listed Courses

Anthropology
AS.070.132. Invitation to Anthropology. 3.0 Credits.
In this course students will be introduced to anthropological modes of asking questions about the changing world through an openness to the new and through returning to classics in the anthropological canon. The specific topics to be explored are: new modes of mapping, visualization and scenario building, the interface between technology and experience, global governance structures, and, the possibility of a new planetary ethos in the face of climate change.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.040.111. Ancient Greek Civilization. 3.0 Credits.
The course will introduce students to major aspects of the ancient Greek civilization, with special emphasis placed upon culture, society, archaeology, literature, and philosophy.
Instructor(s): J. Smith
Area: Humanities.

AS.040.218. Celebration and Performance in Early Greece. 3.0 Credits.
Surviving imagery suggests that persons in Minoan and Mycenaean societies engaged in various celebratory performances, including processions, feasts, and ecstatic dance. This course explores archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.221. Art and Archaeology of Early Greece. 3.0 Credits.
This course explores the origins and rise of Greek civilization from the Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing on major archaeological sites, sanctuaries, material culture, and artistic production.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.320. Myth In Classical Art. 3.0 Credits.
This course traces the representation of the principal gods and heroes of Greek myth in the visual arts (sculpture and vase-painting), as well as later reflections in Roman painting.
Instructor(s): A. Shapiro
Area: Humanities.

Environmental Health and Engineering
EN.570.406. Environmental History. 3.0 Credits.
Environmental history explores the interactions between social change and environmental transformation, or the ways in which societies modify landscapes and are themselves affected by geological, climatological and changing ecological conditions. Topics include the relationship between climate change and human evolution, the environmental impacts of market-based commodity production and regional economic specialization; the relationship between urbanization and environmental change; how warfare affects and is affected by environmental conditions.
Instructor(s): E. Schoenberger
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

EN.570.423. Principles of Geomorphology. 4.0 Credits.
Analysis of the factors responsible for the form of the landscape. The concept of the cycle of erosion is discussed primarily in terms of the principles that govern the processes of erosion. Climate, conditions of soil formation, and the distribution of vegetation are considered as they relate to the development of landforms. Recommended Course Background: AS.270.220 or permission required.
Instructor(s): P. Wilcock
Area: Natural Sciences.

History
AS.100.470. Monuments and Memory In Asian History. 3.0 Credits.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

History of Art
AS.010.105. Art of the Ancient Americas. 3.0 Credits.
Survey the art of Olmec, West Mexico, Teotihuacan, Maya, and Aztec.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.334. Problems in Art of the Ancient Americas. 3.0 Credits.
Following a historical narrative that traces the formation of princely collections in the sixteenth century, to the establishment of national museums in the nineteenth, this course surveys the acts of collecting, preserving, interpreting, and appropriating ancient American art. Draws on case studies from North America, Mesoamerica, and the Andes. Collections study in museums.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.365. Art of the Ancient Andes. 3.0 Credits.
The ancient visual arts of Andean South America and their respective cultural contexts form the basis of this course. In conjunction with the Baltimore Museum of Art and the Johns Hopkins Archaeological Museum students will have access to collections for study.
Instructor(s): L. Deleonardis
Area: Humanities.
AS.010.398. Tombs for the Living. 3.0 Credits.
Centering on the tomb as the unit of analysis, this course examines the cultural and material aspects of death and funerary ritual. Draws on case studies from North America, Mesoamerica, and the Andes. Collections study in museums.
Instructor(s): L. DeLeonardis
Area: Humanities.

AS.010.407. Ancient Americas Metallurgy. 3.0 Credits.
Centering on a series of case studies, this course addresses the technology, aesthetics, and social significance of metals. We trace the development of metals from 1500 BCE in Chile and Peru, to the 16th century in Colombia and central Mexico, pausing to examine its forms and meanings in various cultural contexts, and the ideas that inform its value. In conjunction with the Baltimore Museum of Art (BMA), the Walters Art Museum (WAM), and the Johns Hopkins Archaeology Museum (JHUAM), students will have access to ancient metal works for study.
Instructor(s): L. DeLeonardis
Area: Humanities.

Near Eastern Studies

AS.130.101. Ancient Near Eastern Civilizations. 3.0 Credits.
Review of important issues in ancient Near Eastern history and culture from the Neolithic era to the Persian period. Included will be an examination of the Neolithic agricultural revolution, the emergence of cities, states and writing, and formation of empires. Cultures such as Sumer and Akkad, Egypt, the Hittites, Israelites, Assyrians, Babylonians, and Persians will be discussed.
Instructor(s): G. Schwartz
Area: Humanities.

AS.130.102. From the Neanderthals to the Neolithic. 3.0 Credits.
Emphasizing theories about human biological and cultural development, this course consists of an in-depth survey of Neanderthal morphology and culture, a brief discussion of evolutionary theory and our fossil ancestors, and concludes with an exploration of the mechanisms and results of the shift from hunting and gathering to farming. (Course formerly known as Introduction: Human Prehistory.) Cross-listed with Anthropology.
Instructor(s): S. McCarter
Area: Humanities.

AS.130.110. Introduction To Archaeology. 3.0 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): E. Anderson
Area: Humanities, Social and Behavioral Sciences.

AS.130.135. Pyramids, Temples and Tombs. 3.0 Credits.
Introduction to the monuments and culture of Egypt from 3500 B.C. to 100 A.D. From the pyramids at Giza to Hellenistic Alexandria, this course surveys in slide illustrated lectures the remains of one of the world’s greatest early cultures.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.177. World Prehistory: An Anthropological Perspective. 3.0 Credits.
How and why did our nomadic hunting and gathering ancestors become farmers? What led agricultural societies to build cities, develop writing, religious institutions, wage war, and trade for exotic goods? This course surveys prehistory and ancient history from the origins of human culture to the emergence civilization. Although prehistory and ancient history yield evidence of tremendous cultural diversity this course emphasizes common elements of past human experience, culture, and culture change. These include the origins of modern humans and their adjustment to a variety of post-ice age environments, shifts from hunting and gathering to agricultural lifeways, and the initial development of the world’s earliest cities and civilizations.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.

AS.130.328. Ancient Egypt /Africa. 3.0 Credits.
Recent excavation and research have shed light on several ancient cultures of the Nile and its tributaries. We will look at the available archaeological and textual (all Egyptian) evidence for these societies and their interactions with Egypt between 3500 and 300 B.C. We will also discuss research aims and methods employed now and in the past in Egypt and the Sudan.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.334. Egyptian Funerary Arts in the Archaeological Museum. 3.0 Credits.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum’s website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan; S. Balachandran
Area: Humanities.

AS.130.353. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS. 3.0 Credits.
This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.131.653.
Instructor(s): M. Harrower
Area: Natural Sciences, Social and Behavioral Sciences.

AS.130.354. Archaeological Method and Theory. 3.0 Credits.
Climate change, population growth, war - what questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review major theoretical currents in archaeology including evolutionary, cultural-historical, processual and post-processual approaches and discuss the future of archaeology as a scientific and humanistic discipline. Basic techniques for analyzing major categories of artifacts such as lithics, ceramics, archaeobotanical, and zooarchaeological materials will also be introduced.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.
AS.130.357. Geographic Information Systems in Archaeology. 3.0 Credits.
Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI’s ArcGIS software. Taught with AS.131.657.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.131.800. Readings & Research.
Instructor(s): Staff.

AS.389.205. Examining Archaeological Objects. 3.0 Credits.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.340. Critical Issues in Art Conservation. 3.0 Credits.
The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-listed with History of Art and Anthropology.
Instructor(s): S. Balachandran
Area: Humanities.

Graduate Courses that may be taken with permission of the instructor:

Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz

AS.131.635. Seminar: Near East Archaeology.
Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz
Area: Humanities.

Climate change, population growth, war - what questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review major theoretical currents in archaeology including evolutionary, cultural-historical, processual and post-processual approaches and discuss the future of archaeology as a scientific and humanistic discipline. Basic techniques for analyzing major categories of artifacts such as lithics, ceramics, archaeobotanical, and zooarchaeological materials will also be introduced.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.
The David S. Olton Behavioral Biology Program seeks to establish a greater understanding of the relations of brain and behavior through an interdisciplinary program of study. Students in the Behavioral Biology Program examine the complex interplay between environment and behavior, and the processes and mechanisms that underlie behavior. One goal of the program is for students to learn how to integrate scientific discoveries from the wide array of scientific fields of inquiry that contribute to the study of behavioral biology, from molecular biology to sociology.

The interdisciplinary characteristics of the Behavioral Biology Program provide an excellent preparation for post-graduate work. For those interested in the health professions, behavioral biology can be integrated into a premedical curriculum that will provide a broad, humanistic perspective. For those who wish to pursue scientific careers in psychopharmacology, behavioral neuroscience, and physiological psychology, the program provides excellent preparation. Students interested in the fields of organismal or integrative biology should also consider this major.

Many students ask about the similarities and differences between the behavioral biology major and the neuroscience major. Both of these programs are interdepartmental, and a majority of professors teach courses that are listed for both majors. Behavioral Biology majors can explore many aspects of the biology of behavior, including the neural mechanisms of behavior (which obviously overlaps with the neuroscience major), but also biomechanical, evolutionary, ecological, and social aspects of behavior. The behavioral biology major also has fairly liberal course requirements which provide students with an opportunity to explore more choices in their liberal arts education. Students majoring in neuroscience focus directly on the brain and on neural function/mechanisms. Generally speaking, the systems Neuroscience focus area in the neuroscience major has the most overlap with behavioral biology.

The core program of the behavioral biology major provides background and breadth in

1. The life sciences (e.g., biology and neuroscience)
2. The natural sciences (e.g., chemistry and physics) and mathematics (e.g., calculus and statistics)
3. The social and behavioral sciences (e.g. psychology and anthropology)

The exact courses to be taken are determined by the student in conjunction with the faculty adviser. A grade of C- or better is required for courses fulfilling major requirements and courses may not be taken satisfactory/unsatisfactory. Hopkins undergraduates may enter the Behavioral Biology Program at any time, provided all requirements can be completed before graduation. Additional information regarding the Behavioral Biology Program is available through Hope Fisher at hope.stein@jhu.edu or 410-516-6196.

The requirements of the major have changed effective for students entering the University Fall 2017 and later. Students who entered previously should refer to their archived catalog year.

**Requirements for the B.A. Degree**

Also see Requirements for a Bachelor's Degree. (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree) Requirements for the behavioral biology major are as follows:

<table>

**Biology Sequence**

Students must also have 2 of the following biology options. Students can use any combination of the following:

| AS.020.151 General Biology I | 4 |
| & AS.020.153 and General Biology Laboratory I (see footnote about AP Biology credits) | 4 |

The requirements may be satisfied by a 4-year college biology course or the equivalent. Students who have taken more than the required number of courses in any of the fields of study indicated need not complete the remaining requirements.

**Behavioral Biology Program**

http://krieger.jhu.edu/behavioralbiology

The interdisciplinary characteristics of the Behavioral Biology Program provide an excellent preparation for post-graduate work. For those interested in the fields of organismal or integrative biology should also consider this major.

Many students ask about the similarities and differences between the behavioral biology major and the neuroscience major. Both of these programs are interdepartmental, and a majority of professors teach courses that are listed for both majors. Behavioral Biology majors can explore many aspects of the biology of behavior, including the neural mechanisms of behavior (which obviously overlaps with the neuroscience major), but also biomechanical, evolutionary, ecological, and social aspects of behavior. The behavioral biology major also has fairly liberal course requirements which provide students with an opportunity to explore more choices in their liberal arts education. AS.290.101 Human Origins 3
AS.200.141 Foundations of Brain, Behavior and Cognition 3
AS.200.208 Animal Behavior 3
AS.080.250 Neuroscience Laboratory 3
AS.290.490 Senior Seminar: Behavioral Biology 1
Behavioral Biology Elective Courses**
Nine credits of advanced bio-behavioral science courses (BEHB-BIOBEH) 9
Six credits of intermediate/advanced social/developmental/cognitive sciences courses (BEHB-SOCSCI) 6
Research or Internship Requirement
AS.290.500 Connections in Behavioral Biology
Behavioral biology research or internship (one semester)

* For students with AP Biology credit, they may use only one course and its lab from those credits towards this requirement. Therefore, these students must take at least one biology course and its lab at JHU. Students who elect to take General Biology I or II with its lab will lose the corresponding AP credits. Students should also refer to AP credit policies for additional details around the use of AP Biology credits.
** Students should refer to the program website (http://krieger.jhu.edu/behavioralbiology/courses) or the schedule of classes to identify elective choices.

1 Neuroscience Lab can be taken anytime after 200.141
2 Senior Seminar can be taken either fall or spring of senior year.

Honors in the Major
To receive honors in behavioral biology, students must have met the following criteria:
1. Earn a GPA of 3.5 or better in major requirements
2. Conduct research and give a research presentation
3. Receive a recommendation from research mentor

For current faculty and contact information go to http://krieger.jhu.edu/behavioralbiology/faculty_directory/

Courses
AS.290.101. Human Origins. 3.0 Credits.
This course examines the origins of human structure, function and behavior from an evolutionary perspective. It includes study of the evolution, behavior and behavioral ecology of nonhuman primates, hominid evolution (including the paleontological and archaeological records), and the origins of human cognition, social behavior and culture. Cross-listed with Psychological and Brain Sciences
Instructor(s): P. Holland
Area: Natural Sciences, Social and Behavioral Sciences.

AS.290.301. Stress and the Brain. 3.0 Credits.
The purpose of this course is to explore the phenomenon of stress by investigating the neural, endocrine and molecular mechanisms involved. By reviewing both animal and human research, this course will consider disorders of the stress control system and the adverse impact of stress on human physical and mental health. Topics in this class will include, but are not limited to I) disorders such as PTSD, anxiety, major depression; II) interactions between stress and neurodegenerative disorders; III) stress-immune-inflammatory interactions; IV) the role of stress in obesity, hypertension, and other metabolic syndromes; V) stress effects on reproduction. Students will finish this course with a greater understanding for the fundamental neuroendocrine responses to stress and its consequent and/or associated adverse effects on human health.
Prerequisites: AS.020.306 OR (AS.050.203 OR 080.203) OR AS.200.141 OR (AS.080.305 AND AS.080.306)
Instructor(s): F. Madison
Area: Natural Sciences.

AS.290.303. Brain, Communication & Evolution. 3.0 Credits.
The study of animal communication involves the study of neural and hormonal mechanisms mediating the production of communication signals and the evolutionary function of the different signals animals produce to communicate with one another. In this course, information from both of these approaches to the study of behavior will be integrated to provide a comprehensive examination of the causes and functions of different animal communication systems. Topics will include both a consideration of the mechanisms of signal production and of signal perception. The course will review the basic features of communication and features of signaling systems. We will also discuss neural and endocrine functioning and the fundamentals of evolutionary theory relevant to the study of animal communication. Finally, this course will include a field component where students will quantify different aspects of communicative behaviors including song, mating, and parental behavior in several species.
Prerequisites: (AS.200.208 OR AS.200.141) AND ( AS.171.102 OR AS.171.104)
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

AS.290.420. Human Sexual Orientation. 3.0 Credits.
This course will examine the historical and current theories of sexual orientation and sexual variation development by examining the biological, psychological and social contributing factors that influence the development of sexual orientations and variations along with treatment and modification of problematic sexual behaviors. Please note that the use of electronic devices is not permitted during this class, in order to promote the full interactive potential of this engaging seminar-style offering. Students may enroll in both AS.200.204 and AS.290.420, but cannot do so in the same semester. Enrollment is limited to Senior Majors & Minors in Behavioral Biology, Biology, Cognitive Science; Medicine, Science & the Humanities; Molecular & Cellular Bio; Neuroscience; Psychology; Public Health; Sociology; Study of Women, Gender, & Sexuality.
Corequisites: Students may enroll in both AS.200.204 and AS.290.420, but cannot do so in the same semester.
Instructor(s): C. Kraft
Area: Social and Behavioral Sciences
Writing Intensive.

AS.290.490. Senior Seminar: Behavioral Biology. 1.0 Credit.
Great ideas in Behavioral Biology. Discussion of classic and cutting edge articles in the original literature. Student presentations and reaction papers. Capstone course for senior Behavioral Biology majors.
Prerequisites: (AS.290.101 AND AS.290.208 AND AS.200.141 AND AS.080.250) or Instructor permission.
Instructor(s): C. Moss; P. Holland
Area: Social and Behavioral Sciences.

A small group of students will meet two times in the semester to share experiences and information on research, internship and volunteer activities in Behavioral Biology. This course is designed to 1) help Behavioral Biology majors obtain real world experiences that can lead to opportunities after graduation, 2) provide an informal setting to develop oral and written communication skills, and 3) build community among students in the major. Students will make oral presentations to the group about activities they wish to pursue or have already completed. Students will also write a short paper/news piece or prepare a webpage on an internship, research or volunteer experience.
Corequisites: Co-reqs: AS.290.501 OR AS.290.503 OR AS.290.505 OR AS.290.507 OR AS.290.590
Instructor(s): C. Moss.

AS.290.501. Research-Freshmen. 3.0 Credits.
Corequisites: Co-req: AS.290.500
Instructor(s): Staff.

AS.290.502. Research-Freshmen. 1.0 - 3.0 Credits.
Instructor(s): Staff.

AS.290.503. Research-Sophomores. 3.0 Credits.
Corequisites: Co-req: AS.290.500
Instructor(s): Staff.

AS.290.504. Research-Sophomores. 1.0 - 3.0 Credits.
Instructor(s): Staff.

AS.290.505. Research-Juniors. 3.0 Credits.
Corequisites: Co-req: AS.290.500
Instructor(s): Staff.

AS.290.506. Research-Juniors. 1.0 - 3.0 Credits.
Instructor(s): Staff.
AS.290.507. Research-Seniors. 3.0 Credits.
Corequisites: Co-req: AS.290.500
Instructor(s): Staff.

AS.290.508. Research-Seniors. 1.0 - 3.0 Credits.
Instructor(s): Staff.

AS.290.519. Independent Study. 3.0 Credits.
Instructor(s): L. Gorman.

AS.290.520. Independent Study. 1.0 - 3.0 Credits.
Instructor(s): C. Moss; K. Bohn; L. Gorman.

AS.290.590. Behavioral Biology Internship. 1.0 - 3.0 Credits.
Corequisites: Co-req: AS.290.500
Instructor(s): L. Gorman.

AS.290.594. Behavioral Biology Internship. 1.0 Credit.
Instructor(s): C. Moss; P. Holland.

AS.290.596. Behavioral Biology Internship. 1.0 - 3.0 Credits.
Instructor(s): L. Gorman.

AS.290.597. Research - Summer. 3.0 Credits.
Instructor(s): C. Moss; E. Fortune; F. Madison; K. Bohn; L. Gorman.

Cross Listed Courses

Biology

AS.020.151. General Biology I. 3.0 Credits.
This course is an introduction to biology from an evolutionary, molecular and cellular perspective. Specific topics and themes include evolutionary theory, the structure and function of biological molecules, mechanisms of harvesting energy, cell division, classical genetics and gene expression. This section will involve in-class problem solving and the use of assigned pre-class videos and questions.
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.152. General Biology II. 3.0 Credits.
This course builds on the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology.
Prerequisites: Prereq: AS.020.151
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.153. General Biology Laboratory I. 1.0 Credit.
This course reinforces the topics covered in AS.020.151. Students participate in a semester-long project, identifying bacteria from Homewood campus soils using molecular biology techniques. Other laboratory exercises cover aspects of evolution, genomics and biochemistry. Cross-listed with Behavioral Biology. Student must have enrolled in AS.020.151 either this term or in past terms. Students who have credit for AP Biology but take General Biology Lab I will lose four credits of AP Biology credit. Cross-listed with Behavioral Biology.
Prerequisites: AS.020.151
Instructor(s): R. Pearlman
Area: Natural Sciences.

Anthropology

AS.070.352. Evolution, Ecology, Becoming. 3.0 Credits.
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.610
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.352
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

Neuroscience

AS.080.330. Brain Injury & Recovery. 3.0 Credits.
This course investigates numerous types of brain injuries and explores the responses of the nervous system to these injuries. The course's primary focus is the cellular and molecular mechanisms of brain injury and the recovery of function. Discussions of traumatic brain injury, stroke, spinal cord, and tumors, using historical and recent journal articles, will facilitate students' understanding of the current state of the brain injury field. Cross-listed with Psychological and Brain Sciences and Behavioral Biology.
Prerequisites: ( AS.080.305 AND AS.080.306) OR (AS.020.312 OR AS.020.306) OR (200.141 and 020.306) OR Permission of Instructor
Instructor(s): L. Gorman
Area: Natural Sciences
Writing Intensive.

Psychological Brain Sciences

AS.200.141. Foundations of Brain, Behavior and Cognition. 3.0 Credits.
A survey of neuropsychology relating the organization of behavior to the integrative action of the nervous system. Cross-listed with Behavioral Biology and Neuroscience.
Instructor(s): L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.208. Animal Behavior. 3.0 Credits.
Examines basic principles of animal behavior (orientation, migration, communication, reproduction, parent-offspring relations, ontogeny of behavior and social organization). Evolution and adaptive significance of behavior will be emphasized.
Prerequisites: Prereqs: AS.020.151
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.
**AS.200.319. Sensing & Action in Predator/Prey Encounters. 3.0 Credits.**
Receiving and responding to environmental stimuli are fundamental components in a wide variety of behaviors, including the critically important behaviors of finding prey and avoiding predation. In this course, we will examine both invertebrate and vertebrate systems to understand how organisms use sensory systems to detect prey and predators, and how motor systems guide appropriate actions. We will begin by examining predator/prey interactions mediated through vision, followed by olfaction, audition and electrolocation. The course will then cover escape and predatory behaviors for a wide variety of organisms, both vertebrate and invertebrates. For each topic, we will first discuss sensing behaviors, the neural machinery of sensory systems, and how sensory signals are used to guide species-specific escape and attack behaviors at the levels of the central and peripheral nervous systems. Restricted to Juniors & Seniors with Recommended Course Background: AS.080.305 / Nervous System I AND AS.080.306 / Nervous System II OR AS.200.141 / Foundations of Brain, Behavior & Cognition.
Instructor(s): M. Wohlgemuth
Area: Natural Sciences, Social and Behavioral Sciences.

**AS.200.328. Theory & Methods in Clinical Psychology. 3.0 Credits.**
A critical examination of the methods of observation, description, reasoning, inference, measurement and intervention that underlie the clinical practice of psychology and psychiatry. Enrollment limited to Behavioral Biology, Cognitive Science, Neuroscience, Psychology, and Public Health majors or by instructor approval. Recommended: Junior & Senior
Prerequisites: AS.200.212
Instructor(s): D. Edwin
Area: Social and Behavioral Sciences
Writing Intensive.

**AS.200.343. Motivation. 3.0 Credits.**
Current biological, behavioral, and cognitive research and theory concerning the motivation of behavior are examined. Both human and non-human animal research is reviewed. Topics include the role of genetics, arousal, biological regulatory systems, incentives, expectancies, attributions, social processes and self-actualization in the general behavior. Recommended Course Background: AS.200.101 and AS.200.146 or instructor permission.
Instructor(s): H. Petri
Area: Social and Behavioral Sciences.

**AS.200.344. Behavioral Endocrinology. 3.0 Credits.**
An examination of the effects of hormones on behavior in non-human and human animals. Topics will include the effects of hormones on sexual differentiation, reproductive behavior, parental behavior, homeostasis and biological rhythms, regulation of body weight, learning and memory. Cross-listed with Behavioral Biology and Neuroscience.
Prerequisites: Prereqs: ( AS.200.141 OR AS.080.306 ) OR (AS.020.151 AND AS.020.152) OR ( AS.020.305 AND AS.020.306 ) or instructor's permission
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

**AS.200.366. Neuroscience of Motivation: Sex, Drugs and the Brain. 3.0 Credits.**
This course is designed to address the growing literature on the neurobiology of motivational behaviors, integrating studies from invertebrates to birds, rodents, primates and humans. The course will begin with a century old, yet ongoing, discussion on how researchers define 'motivation'. Following this primary introduction, we will discuss the brain circuitry that underlies emotion, reward, and motivation, so that students attain the necessary foundations for understanding the neurobiology of motivated behavior. In particular, we will proceed with an in-depth exploration of an inherently motivated and naturally rewarding social interaction, sexual behavior, which will be discussed at multiple levels. Subsequent lectures will address literature on how humans activate the same brain reward systems artificially by using drugs of abuse. Drawing on these theoretical and empirical foundations, we will then explore the possible involvement of these motivational systems on distinctly human pleasures such as religious experience, visual arts, and music.
Prerequisites: AS.200.141 AND AS.080.105 OR ( AS.080.305 AND AS.080.306 ) OR Permission required.
Instructor(s): O. Iyilikci
Area: Natural Sciences, Social and Behavioral Sciences.

**AS.200.367. Episodic Memory in Human and Nonhuman Animals. 3.0 Credits.**
Episodic memory, or autobiographical memory, has been said to be a capacity that is uniquely human. Consisting of the what, when, and where components of our experiences, episodic memory is what makes each of us who we are. This course will explore each of these components individually—the psychology and neural underpinnings of each component—before discussing them in combination as episodic memory. Finally, we will visit one of the greatest ongoing debates in the memory literature: whether or not this ability is truly "uniquely human" or if our nonhuman animal counterparts also have this capacity. Throughout the course, we will draw on evidence from empirical articles based on studies in a variety of species including rodents, primates, and birds.
Prerequisites: AS.200.101 OR AS.200.141 OR AS.080.105 OR (AS.080.305 AND AS.080.306 ) OR Permission required.
Instructor(s): J. Asem
Area: Natural Sciences, Social and Behavioral Sciences.

**AS.200.370. Functional Human Neuroanatomy. 3.0 Credits.**
This course examines the general organizing principles of the anatomy of the human central nervous system and how this anatomical organization relates to function, from the level of neural circuits, to systems, to behavior. Students will learn to identify neuroanatomical structures and pathways in dissections and MRI images through computerized exercises. Readings and lectures will emphasize general structure-function relationships and an understanding of the functional roles of particular structures in sensory, motor, and cognitive systems.
Prerequisites: AS.080.250 OR AS.080.305
Instructor(s): S. Courtney-Faruqee
Area: Natural Sciences, Social and Behavioral Sciences.
AS.200.376. Psychopharmacology. 3.0 Credits.
Designed to provide information about how drugs affect the brain and behavior. The course focuses on biological concepts underlying structures and functions of the brain that relate to mental disorders. An introduction to neurobiology and brain function is presented as it applies to the interaction of various classes of drugs with the individual neurotransmitter systems in the brain. A brief historic review is followed by a discussion of clinical relevance. Cross-listed with Behavioral Biology and Neuroscience. Enrollment limited to juniors and seniors.
Prerequisites: AS.200.141 OR (AS.020.312 AND AS.020.306) OR (AS.080.305 AND AS.080.306) or permission required.
Instructor(s): H. Adwanikar
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.386. Animal Cognition. 3.0 Credits.
Examine relations between brain, mind, and behavior in nonhuman animals, focusing on topics such as learning, memory, attention, decision-making, navigation, communication, and awareness. We will take a variety of approaches, including behavioral, computational, evolutionary, neurobiological, and psychological perspectives.
Prerequisites: AS.200.141 OR AS.200.208 OR AS.290.101 or Instructor permission.
Instructor(s): P. Holland
Area: Social and Behavioral Sciences.

Bioethics Program
http://www.bioethicsinstitute.org/

The practice of medicine, the development of public health policies, and advances in the biomedical sciences raise fundamental moral and philosophical issues. The bioethics program is designed to provide students with an understanding of these issues, and the background and the conceptual tools to think about them clearly. The program is a collaboration between the Johns Hopkins Berman Institute of Bioethics and the Department of Philosophy, and draws on the resources of both.

Requirements for the Minor
Eight Courses
AS.150.219 Introduction to Bioethics 3
AS.150.220 Introduction to Moral Philosophy 3
Select one of the following: 8
AS.020.151 General Biology I
& AS.020.152 and General Biology II
AS.020.305 Biochemistry
& AS.020.306 and Cell Biology
EN.580.421 Systems Bioengineering I
& EN.580.422 and Systems Bioengineering II
At least two upper-level (300- or 400-level) seminars offered by the bioethics program (AS.150.3xx+ with POS-Tag PHIL-BIOETH) 6
Two additional bioethics seminars not counted in fulfillment of the previous requirement approved by the program's advisory committee. 6

Total Credits 26

* Pre-approved courses fulfilling this requirement will have the POS-Tag PHIL-BIOETH in their course description.

All courses must be taken for letter grades and receive a grade of C- or higher.

For more information, please contact Professor Hilary Bok.

For current faculty and contact information go to https://bioethics.jhu.edu/people/faculty/

Biology
http://www.bio.jhu.edu

The Department of Biology offers a broad program of undergraduate, graduate, and postgraduate study in the biological sciences. Included among the areas in which instruction and research opportunities are available are biochemistry and biophysics, cell biology, molecular biology, microbiology, developmental biology, genetics, neuroscience, and immunology.

Undergraduate Programs
The Biology Department offers two degree options for undergraduate students, a Bachelor of Arts degree for biology majors and a Bachelor of Science degree for molecular and cellular biology majors.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor's Degree. (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree) )

The B.A. degree in biology is designed to provide students with a thorough grounding in modern biology, with special emphasis on the molecular aspects of the discipline.

All courses required for the biology major must be taken for a letter grade (not S/U) and be passed with a grade of C- or better with one exception. The department will accept one passing grade below C- in the senior year provided that the average for all formal lecture and laboratory courses is at least 2.0. http://bio.jhu.edu/undergraduate/ba-requirements/

Mathematics
AS.110.106 Calculus I (Biology and Social Sciences) 4
or AS.110.108 Calculus I

AS.110.107 Calculus II (For Biological and Social Science) 4
or AS.110.109 Calculus II (For Physical Sciences and Engineering)

or AS.110.113 Honors Single Variable Calculus

Physics
AS.171.101 General Physics: Physical Science Major 4
or AS.171.103 General Physics I for Biological Science Majors
or AS.171.107 General Physics for Physical Sciences Majors (AL)

### B.S. Degree in Molecular and Cellular Biology

The Biology Department offers a B.S. degree in molecular and cellular biology. The B.S. program is designed to provide a rigorous preparation for advanced study in the biomedical sciences. The program is tailored not only to students planning to enter Ph.D. programs or obtain employment in the biotechnology industry but also for premedical students.

All courses required for the molecular and cellular biology major must be taken for a letter grade (not S/U) and be passed with a grade of C- or better with one exception. The department will accept one passing grade below C- in senior year provided that the average for all formal lecture and laboratory courses is at least 2.0.

http://bio.jhu.edu/undergraduate/bs-requirements/

#### Requirements

Same as BA except:

- 6 credits of research required
- 2 additional electives (2 total electives must be AS.020.xxx courses)
- General Biology is not required
The B.S. degree in molecular and cellular biology requires, in addition to the requirements for the B.A. degree in biology, at least two additional upper level elective courses totaling five additional credits or more (for a total of at least 13 credits) from the elective list, and two of those electives must be at least 3 credit hours and have an 020 number. The B.S. degree also requires six credits of research supervised or sponsored by a faculty member in Biology. The supervised research will include participation in group meetings and writing a summary of accomplished work at the end of the year. General Biology I and II are not required for the B.S. degree.

**Honors in Biology**

Students completing either a biology major or molecular and cellular biology major are eligible to receive their degree with honors. [http://www.advising.jhu.edu/honors.php](http://www.advising.jhu.edu/honors.php)

The B.A. in biology with honors requires, in addition to the regular requirements for the B.A. in biology, a 3.5 GPA for natural sciences and quantitative studies courses, two semesters of research, a presentation of a poster describing the independent research, and a recommendation from the research sponsor.

The research requirement must be completed under the direction of a faculty member in a department associated with the Johns Hopkins University or the Johns Hopkins Medical Institutions. If the student’s research director for independent research is not a member of the Department of Biology, a Biology faculty member must serve as a sponsor and approve the recommendation from the research director.

**B.A./M.S. Degree in Molecular and Cellular Biology**

The Biology Department offers a B.A./M.S. (or B.S./M.S. if the student has completed the requirements for the B.S. degree) degree in molecular and cellular biology. The B.A./M.S. (or B.S./M.S.) degree provides Hopkins biology majors with advanced training in preparation for careers in science and medicine. Please see the Graduate Tab for details.

**Graduate Programs**

**Requirements for the M.S. Degree in Molecular and Cellular Biology**

The Biology Department offers a B.A./M.S. (or B.S./M.S. if the student has completed the requirements for the B.S. degree) degree in molecular and cellular biology open only to Johns Hopkins University undergraduate majors.

Students in the program must complete all requirements for the B.A. (or B.S.) degree. In addition, students enrolled in the combined bachelor’s/master’s program must complete the following requirements.

Four additional advanced or specialized courses, at least two of which are at the 600-level or above.

**AS.020.400 Advanced Seminar: Molecular and Cellular Biology**

**AS.020.402 Seminar: Molecular & Cellular Biology**

**AS.020.551 Mentored Research**

**AS.020.553 Mentored Research**

**AS.020.554 Mentored Research Program in Cellular and Molecular Biology**

Final report and presentation

*Teaching***
Eligible courses are listed on the Biology Department website.

The Mentored Research Program culminates in the preparation of a written report of the research project in the form of a thesis. The written report and an oral presentation of the work are evaluated by a Thesis Committee. Passing performance, as judged by the committee, is required for the M.S. degree.

Teaching is an integral component of the master’s degree. The teaching requirement is fulfilled as a teaching assistant for the General Biology and General Biology Laboratory courses (or other Biology lecture and lab courses) for two semesters.

Students admitted to the B.A./M.S. program will be awarded the M.S. degree if they complete the above-described requirements, receive a grade of B or better in all courses during the one year duration of the program, and achieve passing performance on the final written report and oral presentation of the research project completed during the research year as judged by the Thesis Committee.

**Admission**

Admission to the B.A./M.S. Molecular and Cellular Biology program is selective. Hopkins biology majors and MCB majors who have achieved a minimum overall grade point average of 3.2, as well as a minimum natural science grade-point average of 3.0, and have had at least two semesters of previous research experience may apply for admission during the junior or senior years. Students with a GPA below the minimum requirement will be considered under special circumstances if a strong commitment to research is demonstrated. Students interested in applying to the master’s program should attend an information session prior to application. Admission decisions are made by the MCB Program Committee, on the basis of:

1. the student’s academic record,
2. a written proposal for a project to be completed in the Mentored Research Program,
3. letters of support and recommendation, and
4. an interview with the student if required. The committee reserves the right to require interviews for individual students for further clarification of application materials.

**Requirements for the Ph.D. Degree in Cellular, Molecular, Developmental Biology and Biophysics (CMDB Program)**

A program of study leading to the Ph.D. degree is open to students who are candidates for, or who already have, the bachelor’s or master’s degree in the biological or physical sciences. To be admitted, the applicant should have had either a thorough training in the fundamentals of biology and both organic chemistry and general physics, or a broad training in the physical sciences and mathematics. Special attention is given to the applicant’s quality of scholarship and his or her promise as an investigator.

In addition to the general university requirements for an advanced degree (see Academic Information for Graduate Students [http://catalog.jhu.edu/archive/2017-18/grad-students/academic-policies/#graduationanddegereecompletionscontext]), doctoral candidates must meet the following departmental requirements:

- Four core courses and four 600- and 700-level electives.
- At least one year of laboratory teaching during the period of graduate residence.
- A high level of achievement in a comprehensive written proposal and oral examination covering proficiency in the field of the student’s research interest and various areas of biology and related fields.
- A dissertation based on a program of independent research, a public seminar followed by an oral examination by the thesis committee.

All graduate students are required to complete the four core courses during the first year. In addition, students are required to complete four elective courses before graduation chosen from the list below of 600-level electives and 700-level seminars offered each semester. At least two out of the four courses must be 600-level.

**Teaching Opportunities**

Since most biology Ph.D.’s will teach at some time during their careers, experience in teaching is considered an essential part of the Ph.D. program. The minimum teaching requirement is three contact hours a week for one year in the laboratory sections of undergraduate courses. Further teaching experience is gained through the preparation and presentation of reports in seminars and journal clubs. The department stresses organization of material and clarity of presentation.

**Facilities**

The lecture rooms, teaching laboratories, and research facilities of the Biology Research Complex (consisting of Seeley G. Mudd Hall and Undergraduate Teaching Laboratories) offer a thoroughly modern research facility for molecular biology.

**Financial Aid**

The department has fellowship funds for the support of graduate students. Awards are granted for tuition and living expenses. Laboratory fees and research expenses are paid by the department.

**Carnegie Institution for Science, Department of Embryology**

The Carnegie Institution’s Department of Embryology is located on the Homewood campus, close to the Biology research complex. Members of this group hold part-time appointments in the Department of Biology and participate in the training of graduate students. With the approval of both the department and the Carnegie staff, a number of graduate students in biology conduct thesis research in the Carnegie laboratory. The interests of the Carnegie staff include developmental and molecular biology.

For current faculty and contact information go to [http://www.bio.jhu.edu/Directory/TenuredPlusTenureTrack.aspx](http://www.bio.jhu.edu/Directory/TenuredPlusTenureTrack.aspx)

**Faculty**

**Chair**

Vincent J. Hilser
Professor: thermodynamics, protein structure and dynamics, molecular recognition, protein folding.

**Professors**

Karen Beemon
retroviral RNA processing and transport; avian leukemia virus tumorigenesis.

Kyle W. Cunningham
calcium transport and signaling mechanisms in yeast.

Ernesto Freire

Edward M. Hedgecock
developmental genetics of the nervous system of Caenorhabditis elegans.

M. Andrew Hoyt
genetics of chromosome segregation and signal transduction in yeast.

Evangelos N. Moudrianakis
assembly and dynamics of nucleoproteins and chromosomes, bacterial, and chloroplast bioenergetics.

Joel F. Schildbach
Vice Dean for Undergraduate Studies: structural biology of bacterial conjugation.

Robert Schleif
protein-DNA interactions and regulation of gene activity.

Trina Schroer
microtubule-based motors, organelle transport.

Mark Van Doren
gonad development and the formation of sexual dimorphism in the soma and germline.

Beverly R. Wendland
James B. Knapp Dean, Arts and Sciences: molecular mechanisms of endocytosis in yeast

Haiqing Zhao
cellular and molecular mechanisms underlying the development and function of olfactory sensory neurons.

**Associate Professors**

Xin Chen
understanding how genes are expressed in an ordered way to regulate germ cell differentiation; epigenetic mechanisms that participate in regulation.

John Kim
Co-Director of Graduate Studies; deciphering the epigenetic mechanisms of small RNA-mediated gene regulation and their collaboration with RNA binding proteins.

Rejji Kuruvilla
Co-Director of Graduate Studies: local retrograde signaling by target-derived neurotrophins in neuronal development.

James Taylor

Professors Emeriti

Maurice J. Bessman
biochemistry and enzymology, synthesis of nucleic acid derivatives, biochemical basis of spontaneous mutations.

Ludwig Brand
fluorescence studies of protein and membrane dynamics.

Michael Edidin
immunology, membrane organization and dynamics, immunology.

Douglas Fambrough
membrane proteins, targeting, structure, function, and regulation, Na, K-ATPase, Ca-ATPase.

Richard E. McCarty

Allen Shearn
developmental genetics, imaginal disk development in Drosophila studied in lethal and temperature-sensitive mutants.

**Research Professor**

Ru Chih Huang
William D. McElroy Research Professor: gene regulation and chromosomal structure and function, principles of cancer biology and control of cancer and viral growth.

Yuan Chuan Lee
glycoproteins, glycolipids, carbohydrate receptors, and cell-surface substances.

J. Michael McCaffery
Integrated Imaging Center Director

**Academy Professor**

Ludwig Brand
fluorescence studies of protein and membrane dynamics.
Yuan Chuan Lee
glycoproteins, glycolipids, carbohydrate receptors, and cell-surface substances.

**Lecturers**
Anna Coppola
Christov Roberson
Richard Shingles

**Associate Research Professor**
Jocelyn DiRuggiero
genomic diversity, DNA repair mechanisms and environmental stress responses in extremophiles.

**Senior Lecturer**
Robert Horner
Carolyn Norris
Kathryn Tifft Oshinnaiye
Rebecca Pearlman

**Bloomberg Distinguished Professors**
Rachel Green
Professor (Biochemistry)
Carol Greider
Professor (Cell Biology)
Taekjip Ha
Professor (Biophysics)
Ulrich Mueller
Professor (Neuroscience)

Michael Schatz
Associate Professor (Computer Science)

**Adjunct**
Alex Bortvin
Assistant Professor: genetic and epigenetic controls of germ cell development and function in vertebrates.

Donald D. Brown
Professor Emeritus: gene expression in development.

Orna Cohen-Fix
Adjunct Professor (NIH); nuclear structure and its effect on nuclear function.

Victor G. Corces
Professor (Emory): control of gene expression, molecular mechanisms of mutagenesis by transposable elements.

Chen-Ming Fan
Professor: molecular and cellular interactions that contribute to vertebrate embryogenesis.

Steven Farber
Associate Professor: real-time imaging of lipid metabolism in live zebrafish; identification of genes which regulate cholesterol absorption using biochemical and genetic strategies.

Joseph G. Gall
Professor: chromosome structure and functions, nucleic acids in development.

Marnie Halpern
Professor: zebra fish development.

Audrey Huang
Lecturer.

Michael Lichten
Adjunct Professor (NIH): genetic recombination and chromosome structural changes that occur during meiosis and DNA damage repair, using budding yeast as a model system.

George Scangos
Professor.

Allan Spradling
Professor: molecular genetics of Drosophila.

Yixian Zheng
Professor and Interim Director of Carnegie Institution for Science: cell division, cell morphogenesis, and cell fate specification.

**Associate Teaching Professor**
Emily Fisher
Director of Undergraduate Studies

For current course information and registration go to https://sis.jhu.edu/classes/

**Courses**

**AS.020.104. Freshman Seminar: From Genes to DNA and Back. 1.5 Credits.**
A course consisting of introductory lectures followed by student presentations in the form of seminars. The issues we usually analyze are: How did we arrive at the concept of the “gene”? What are the early observations that gave substance to this concept? How did we arrive at the “one gene, one enzyme” dogma? What is the chemical nature of the gene? Is DNA enough for regulated gene expression? Is it “all in our genes”? What is genetic plasticity and epigenetics? What about genomics and proteomics? In the course of our analyses we bring together observations, and experimental results and ideas not only from biological sciences (Genetics, Cell and Developmental Biology and Genetics) but also from Physics, Sociology, Politics and Philosophy. We do all this in order to clarify how observations turn to ideas, then dogmas and even biases that distort the true meaning of objective Sciences.

Freshmen Only.

Instructor(s): E. Moudrianakis

Area: Natural Sciences.

**AS.020.106. Freshman Seminar: Tuberculosis. 1.0 Credit.**
Mycobacterium tuberculosis is an extremely successful intracellular bacterial pathogen able to manipulate phagocytic cells and its own metabolism to survive within a host. The molecular mechanisms of this survival and resistance to antibiotics will be studied. Freshmen only.

Instructor(s): R. Horner

Area: Natural Sciences.
AS.020.111. Freshman Seminar: The 'Nobels' in Medicine and Chemistry. 2.0 Credits.
Key events in our understanding of the life sciences will be traced with the aid of Nobel awards.
Instructor(s): L. Brand
Area: Natural Sciences.

AS.020.115. Bioenergetics. 2.0 Credits.
This course is a combination of lectures, student presentations and group discussions that address fundamental principles and also contemporary issues examining the way all forms of Life on Earth are ultimately dependent on sunlight to satisfy their food and energy requirements. We examine the steps from the capture of Physical energy (photons), to the development of electrochemical potentials and finally, to their utilization by cellular organelles towards the synthesis of the chemical "currency" that fuels all biological processes (biosynthesis, cell communication, movements, etc.). Special emphasis will be on current developments in biotechnologies that utilize microbial populations to supply us with fuels and also to clean up environmental hazards. The course will also consider ways to extract lessons from Nature's successful designs and harmonious adaptations so that we, in the long run, can utilize them towards a minimization of our negative impact on the environment. Note: Freshmen and Sophomores only, with good foundations in any two of the following: Physics, Chemistry, Biology, Biophysics.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.120. Introduction to Laboratory Research. 1.0 Credit.
This course will introduce students to a variety of biochemical and molecular biological laboratory techniques. These will include DNA analysis by restriction enzyme mapping, amplification of DNA segments by PCR, lipid analysis by chromatography. Additionally, students will visit a variety of biological laboratories to observe actual research projects. * Prerequisites: High school biology and chemistry.
Instructor(s): Staff
Area: Natural Sciences.

AS.020.126. Techniques in Molecular Biology. 1.0 Credit.
This course is designed to supplement the scientific classroom experience of students by providing hands on experience with the essential core molecular biology techniques of bacterial DNA cloning, DNA analysis, and protein analysis. Students will be able to understand and explain how these methodologies work scientifically and will develop the basic laboratory skills necessary for the successful completion of the assays.
Instructor(s): J. Gordy.

AS.020.127. Concepts in Cancer Research I: Pre-Diagnosis. 1.0 Credit.
This course will introduce current topics in cancer research with a focus on the current state of knowledge regarding pre-diagnosis concepts in cancer research. We will first provide students with the context in which to interpret the latest findings in cancer research by giving a brief overview of cancer biology and descriptive epidemiology of the most common cancers in the United States. We will then discuss the current state of knowledge regarding cancer etiology and primary prevention strategies, providing specific examples from research currently being conducted at the National Cancer Institute along with other emerging research in the field of cancer prevention. Finally, we will introduce students to concepts and research in cancer screening. We will employ multiple formats to promote student learning and to introduce different tools for research. These may include lectures, case studies, in-class discussions, online discussions, and select film and Internet resources.
Instructor(s): M. Patel; S. Nash.

AS.020.128. Concepts Cancer Research II:Diagnosis through Recovery. 1.0 Credit.
This course will introduce current topics in cancer research with a focus on "life after cancer," including research questions about medical and psychosocial issues at diagnosis, during treatment and throughout recovery for patients that have been diagnosed with cancer. Health recommendations for cancer survivors will be discussed. Throughout the course, we will hear from researchers at the National Cancer Institute (and other research entities) who represent a variety of disciplines, applied in many settings (e.g., laboratory, clinics and communities). We will also use multi-media to promote active learning and to introduce tools for research. These may include lectures, case studies, in-class discussion, online discussion, and select film (including clips from the recent PBS documentary "Cancer: The Emperor of All Maladies") and internet resources. Active participation and peer learning will enhance the value of this course for students.
Instructor(s): S. Bluethmann.

AS.020.129. Discover Hopkins: Introduction to Biology & Medicine. 1.0 Credit.
Introduction to Biology & Medicine: from Textbook to Application. Biology is the study of life dynamics, and medicine is the application of biology to enhance human health. With a particular emphasis on imaging approaches from the scale of the cell to that of the whole body, this course explores how biology research is designed to improve our knowledge and health. The goal is to show students the possible ways of using information learned in textbooks as a starting point to explore new application frontiers and careers in academic research, industrial/biotech development, and medicine. Course is highly interactive and includes lectures, readings, field trips, and guest lectures by professors involved in the scientific advancements. Grades determined by class participation, attendance, quizzes, and oral presentation.
Instructor(s): D. Georgess; N. Neumann.

AS.020.131. Bacterial Evolution Project Lab. 2.0 Credits.
In this project-based laboratory course, students will conduct research into mechanisms of bacterial adaptation to conjugative plasmids. In the wet-lab portion of the course, students will learn standard laboratory techniques for bacterial culture and DNA extraction and will carry out experiments to assess phenotypic differences between different laboratory-evolved bacterial populations. In the computational portion of the course, students will learn how to analyze whole-genome sequencing data and will identify mutations present in laboratory-evolved bacteria. This project-based course is part of a larger research project investigating co-evolution of conjugative plasmids and their bacterial hosts. Students will be exposed to fundamental questions concerning the mechanisms of evolution and will learn about current research in the rapidly expanding field of Experimental Evolution. No previous experience with bacterial culture, genomics, or computer programming is required.
Instructor(s): K. Cox
Area: Natural Sciences.
AS.020.132. Biology, Policy, and the Media. 3.0 Credits.
We live in the age of information. Through various forms of media we are constantly being inundated by data—whether or not we are aware of it. This information includes science as the media presents it to us. We will examine different topics in biology that are discussed in different forms of media. We will also look at how scientific research, and the way that it is reported to the layperson, is used to inform policy decisions. Some of the biological topics that we will discuss include human diseases and their treatment, stem cells and cloning, and genetically modified organisms. All of these topics have a significant effect on how we live our lives. The choices that we make based on the science we see affects our decisions when it comes to medical care, what we choose to eat, the manner in which we interact with our environment, and how we vote to enact science policy.
Instructor(s): J. Winger; R. Gupta
Area: Natural Sciences.

AS.020.135. Phage Hunting. 2.0 Credits.
This is an introductory course open to all freshman regardless of intended major. No science background is required. This is the first semester of a year-long research-based project lab course in which students will participate in a nation-wide program in collaboration with undergraduates at other colleges. Students will isolate and characterize novel bacteriophages (viruses that infect bacteria) from the environment using modern molecular biological techniques. The course includes two lab meetings per week. Continues in the spring. Each semester provides 2 credit hours of Natural Sciences (N) distribution credits and/or counts 2 hours toward the research requirement for the Molecular and Cellular Biology degree. No textbook is required. Freshmen only
Instructor(s): E. Fisher; J. Schildbach
Area: Natural Sciences.

AS.020.136. Phage Hunting II. 2.0 Credits.
This is an introductory course open to all freshman regardless of intended major. No science background is required. This is the second semester of a year-long research-based project lab course in which students will participate in a nation-wide program in collaboration with undergraduates at other colleges. In the spring semester, students will annotate the genome of a bacteriophage isolated and characterized by a student in AS.020.135, in preparation for submission to a database and eventual publication. The course includes two lab meetings per week. Provides 2 credit hours of Natural Sciences (N) distribution credits and/or counts 2 hours toward the research requirement for the Molecular and Cellular Biology degree. No textbook is required. Freshmen only.
Enrollment by permission of the instructor only.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): E. Fisher; M. Mefford
Area: Natural Sciences.

AS.020.137. Techniques of Phage Isolation and Characterization. 1.0 Credit.
In this small-section introductory research lab course, students are introduced to basic microbiological techniques as they isolate and characterize a bacteriophage, a virus that infects bacteria, from an environmental sample. One meeting per week. No textbook required. Modeled after the Phage Hunting project lab course, but with a focus on benchwork. Students cannot receive credit for both AS.020.135 and AS.020.137.
Instructor(s): J. Schildbach
Area: Natural Sciences.

AS.020.140. Emerging Infectious Diseases. 3.0 Credits.
This class will investigate the infectious agents and evolutionary drivers of disease emergence and its consequences on public health. Additionally, the class will address epidemiological characteristics in settings of demographics, as well as surveillance mechanisms used to control disease emergence. We will focus on the underlying infectious diseases, factors governing microbial emergence, resistance, and endemics. Instruction format will include a combination of lectures, open discussions and student presentations to encourage broad participation.
Instructor(s): M. Malhotra; S. Winans
Area: Natural Sciences.

AS.020.151. General Biology I. 3.0 Credits.
This course is an introduction to biology from an evolutionary, molecular and cellular perspective. Specific topics and themes include evolutionary theory, the structure and function of biological molecules, mechanisms of harvesting energy, cell division, classical genetics and gene expression. This section will involve in-class problem solving and the use of assigned pre-class videos and questions.
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.152. General Biology II. 3.0 Credits.
This course builds on the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology.
Prerequisites: Prereq: AS.020.151
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.153. General Biology Laboratory I. 1.0 Credit.
This course reinforces the topics covered in AS.020.151. Students participate in a semester-long project, identifying bacteria from Homewood campus soils using molecular biology techniques. Other laboratory exercises cover aspects of evolution, genomics and biochemistry. Cross-listed with Behavioral Biology. Student must have enrolled in AS.020.151 either this term or in past terms. Students who have credit for AP Biology but take General Biology Lab I will lose four credits of AP Biology credit. Cross-listed with Behavioral Biology.
Prerequisites: AS.020.151
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.154. General Biology Lab II. 1.0 Credit.
This course reinforces the topics covered in AS.020.152. Laboratory exercises explore subjects ranging from evolution to anatomy and physiology. Students participate in a project using molecular biology techniques to determine whether specific foods are made from genetically engineered plants. Cross-listed with Behavioral Biology. Students who have credit for AP Biology but take General Biology Lab II will lose all four credits of their overall credit for AP Biology.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.161. Current Events in Biology I. 1.0 Credit.
In this lively and collaborative course, students discuss current events and controversies in biology ranging from bioterrorism to the health of the Chesapeake Bay.
Instructor(s): R. Pearlman
Area: Natural Sciences.
AS.020.162. Current Events in Biology II. 1.0 Credit.
Students will discuss current events and controversies in biology, ranging from genetic engineering to nanotechnology in medicine.
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.205. Introduction to Biological Molecules. 3.0 Credits.
This course presents an overview to biochemistry and molecular biology, especially focusing on biotechnology and medicine. Students will have classroom and laboratory experience and group presentations.
Prerequisite: High school level Chemistry and Biology (both with a grade of A).
Instructor(s): R. Shingles
Area: Natural Sciences.

AS.020.214. Self Organizing Patterns in Nature. 1.5 Credits.
The manifestations of all biological structures and related functions are the end effect of the formation and maintenance of complex molecular and cellular patterns. These patterns (macromolecules, cellular organelles, cells, and tissues) are assembled from their constituent parts under fundamental rules not too dissimilar to those that govern the formation of snowflakes or the dewdrops on a spider web. This course (lectures and student presentations) attempts to describe these common rules and to explain the formation and function of significant biological assemblies.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.227. Human Physiology. 3.0 Credits.
This is an introduction to Human Physiology. It will cover an overview of the subject that is appropriate for undergraduates and will be of interest to those planning to pursue medical or health related careers. While there is no formal prerequisite, a basic understanding of chemistry and biology at the undergraduate level will be helpful.
Instructor(s): T. Woolf
Area: Natural Sciences.

AS.020.229. Introduction to Immunology. 2.0 Credits.
This course is designed to introduce students to the cells, major receptors and signals critical for understanding more advanced concepts in immunology. They should leave with a basic understanding of the players and events leading to an effective immune defense against pathogens. They should also begin to recognize disease consequences of certain immune malfunctions. Recommended Course Background: Biology
Instructor(s): A. Geis
Area: Natural Sciences.

AS.020.244. The Biology of Cancer. 2.0 Credits.
This course runs from June 30 - July 11. This course provides an overview of cancer and its diagnosis and treatment. Lectures, demonstrations, and discussions will explore the roles that genetic errors, growth factors, oncogenes, tumor suppressors, genetic caretakers, cell survival and death, angiogenesis, and metastasis play in cancer development. Covered topics also include cancer diagnosis, cancer prevention, genetic testing, treatment and patient self-advocacy. Course will include several guest experts to discuss topics of interest.
Instructor(s): M. Safford.

AS.020.303. Genetics. 3.0 Credits.
Presentation of the principles of heredity and variation, and their application to evolution and development; physico-chemical nature of the gene; problems of recombination; gene action.
Prerequisites: AS.020.330: Students may receive credit for AS.020.330 or AS.020.303, but not both.
Instructor(s): E. Fisher; K. Cunningham; M. Hoyt
Area: Natural Sciences.

AS.020.305. Biochemistry. 4.0 Credits.
The molecules responsible for the life processes of animals, plants, and microbes will be examined. The structures, biosynthesis, degradation, and interconversion of the major cellular constituents including carbohydrates, lipids, proteins, and nucleic acids will illustrate the similarity of the biomolecules and metabolic processes involved in diverse forms of life. Sophomores, Juniors, and Seniors Only.
Prerequisites: Prereq or Co-req: AS.030.206 OR AS.030.212 OR EN.540.202.
Instructor(s): A. Coppola; C. Kaiser; J. Schildbach; K. Tiff Oshinnaiye; V. Hilser
Area: Natural Sciences.

AS.020.306. Cell Biology. 4.0 Credits.
How the molecules of living systems are organized into organelles, cells, tissues, and organisms will be explored, as well as how the activities of all of these are orchestrated and regulated to produce "life"—a phenomenon greater than the sum of its parts. Considerable emphasis is placed on experimental approaches to answering these questions. Topics covered include biological membranes, cytoskeletal elements, cell locomotion, membrane and protein traffic, the nucleus, second messengers, signal transduction, cell growth, the cell cycle, the extracellular matrix, cell contacts and adhesion, intercellular communication, epithelial structure and function, and the cell biology of early development and organ function. Sophomores, juniors, and seniors only. Recommended Course Background: (AS.020.151 or AS.020.305) or equivalent knowledge of biomolecules or AS.020.303.
Prerequisites: Cell Biology restriction: students who have completed EN.540.307 may not enroll..
Instructor(s): E. Fisher; K. Tiff Oshinnaiye; T. Schroer
Area: Natural Sciences.

AS.020.307. Enzymes, Metabolism and Metabolic Disorders. 3.0 Credits.
This course will cover basic and advanced concepts in enzymology and metabolic processes while focusing on how these processes contribute to human health and diseases. This course is composed of lectures, discussion sessions, and student presentations.
Instructor(s): Y. Lee
Area: Natural Sciences.

AS.020.312. Introduction to the Human Brain. 3.0 Credits.
This course explores the outstanding problem of biology: how knowledge is represented in the brain. Relating insights from cognitive psychology and systems neuroscience with formal theories of learning and memory, topics include (1) anatomical and functional relations of cerebral cortex, basal ganglia, limbic system, thalamus, cerebellum, and spinal cord; (2) cortical anatomy and physiology including laminar/columnar organization, intrinsic cortical circuit, hierarchies of cortical areas; (3) activity-dependent synaptic mechanisms; (4) functional brain imaging; (5) logicist and connectist theories of cognition; and (6) relation of mental representations and natural language.
Instructor(s): E. Hedgecock
Area: Natural Sciences.
AS.020.315. Biochemistry Laboratory. 2.0 Credits.
This course will reinforce the topics presented in Biochemistry
AS.020.305 or AS.250.307 through laboratory exercises which use
quantitative measurement to study cellular components and processes.
Topics include pH, proteins, carbohydrates, lipids, nucleic acids, and
enzymes Sections 5-8 are for BIOLOGY AND MOLECULAR & CELLULAR
BIOLOGY MAJORS ONLY.
Prerequisites: Students must have completed Lab Safety training prior to
registering for this class.;Pre/Co-requisite AS.020.305 OR AS.250.307
OR AS.250.315
Instructor(s): J. Schildbach; R. Horner
Area: Natural Sciences.

AS.020.316. Cell Biology Lab. 2.0 Credits.
This course will reinforce the topics presented in AS.020.306 Cell
Biology through laboratory exercises which use visible and fluorescence
microscopy to study chromosomes, cell organelles, cell surface
receptors, contractile proteins, and microfilaments.
Prerequisites: Students must have completed Lab Safety training prior to
registering for this class.;Prerequisite or Corequisite: AS.020.306. OR
Corequisites: EN.540.202 cannot be taken concurrently with AS.020.316.
Instructor(s): R. Horner
Area: Natural Sciences.

AS.020.317. Signaling in Development and Disease. 3.0 Credits.
An advanced undergraduate level seminar on current topics on signal
transduction mechanisms underlying neuronal morphology, development
and function. The proper functioning of the nervous system relies on
the establishment of precise neuronal circuits through a developmental
program including proliferation, neuronal migration, axonal growth, and
neuronal survival. This course pertains to the extracellular cues and
downstream neuronal signaling pathways that coordinate these key
events during neuronal development. The course will also cover the
role of aberrant signaling mechanisms in neuronal degeneration and
disease. Recommended Course Background: AS.020.305, AS.020.306,
and AS.080.306
Instructor(s): R. Kuruvilla
Area: Natural Sciences.

AS.020.328. Genomics: Theory and Practice. 2.0 Credits.
This course is designed to introduce the students to all facets of
genomics and provide a hands-on approach to genomics research. The
core of the course will be to introduce a biological problem that requires a
genomics solution, design experiments, conduct them, obtain sequencing
data and analyze them. In addition to this, lectures will also cover the
current topics in and future of genomics. This course is conceived as an
interactive one and student participation is required.
Prerequisites: AS.020.305 OR AS.020.303
Instructor(s): V. Balagopal
Area: Natural Sciences.

AS.020.329. Microbiology. 3.0 Credits.
This course explores the physiology and genetics of microorganisms
within an evolutionary and ecological framework. Concepts in
microbiology will be supported by molecular studies of microbial
evolution and microbial communities including that of the human
microbiome. Recommended Course Background: AS.020.305
Instructor(s): E. Fisher; J. Diruggiero
Area: Natural Sciences.

AS.020.330. Human Genetics. 2.0 Credits.
Will examine the growing impact of human genetics on the biological
sciences, on law and medicine, and on our understanding of human
origins. Topics include structure and evolution of human genome, genetic
and physical mapping of human chromosomes, molecular genetics of
inherited diseases and forensic genetics.
Prerequisites: Pre-reqs: AS.020.303 OR AS.020.330
Instructor(s): E. Hedgecock
Area: Natural Sciences, Social and Behavioral Sciences.

AS.020.332. Photosynthesis by Land and Aquatic Organisms. 2.0 Credits.
This course analyzes the fundamental process of photosynthesis, the
process on which all life on Earth depends for its existence. We begin
from the level of the structural organization of the photosynthetic
machinery and progress to the essentials of the photophysics of light
capture by the primary pigments. Next we follow the conversion of
photon flow to electron flow through the electron transport chain,
and finally we study the formation of chemical gradients that serve
as temporary "energy stores" utilized in the synthesis of the essential
chemicals that are consumed to drive carbon dioxide and nitrogen
fixation and yield biomass. Finally, we compare the specializations of
land and aquatic photosynthetic systems that serve the two different
ecosystems. Recommended Course Background: AS.020.305 or
AS.020.306 or special permission by the instructor.
Instructor(s): E. Moudrianakis; R. Horner
Area: Natural Sciences.

AS.020.335. Bioenergetics. 2.0 Credits.
This course is a combination of lectures, student presentations and group
discussions that address fundamental principles and also contemporary
issues examining the way all forms of Life on Earth are ultimately
dependent on sunlight to satisfy their food and energy requirements. We
examine the steps from the capture of Physical energy (photons), to the
development of electrochemical potentials and finally, to their utilization
by cellular organelles towards the synthesis of the chemical "currency"
that fuels all biological processes (biosynthesis, cell communication,
movements, etc.). Special emphasis will be on current developments
in biotechnologies that utilize microbial populations to supply us with
fuels and also to clean up environmental hazards. The course will also
consider ways to extract lessons from Nature's successful designs and
harmonious adaptations so that we, in the long run, can utilize them
towards a minimization of our negative impact on the environment.
Note for Juniors and Seniors: in addition to attending the lectures they
are expected to analyze assigned relevant research articles and submit
reports of their analyses and conclusions. Admission, by approval of
instructor.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.
AS.020.337. Stem Cells & the Biology of Aging & Disease. 2.0 Credits.
This will be a team-taught lecture course that focuses on the properties of stem cells, their possible role in cancer (breast and prostate), stem cell aging, and the potential utilization of stem cells for therapy. Topics will include: mechanisms of stem cell renewal, stem cell potency, the impact of the stem cell niche, stem cells and the hematopoietic system, stem cells and the neural system, stem cells in the male and female gonads, induced pluripotent stem cells and cellular reprogramming, stem cell changes with aging, and ethical and policy issues in stem cell research and use. Most lectures will be research-oriented. Students will be expected to read and critically analyze current literature, with an emphasis on the experimental bases from which our current understandings derive.
Prerequisites: AS.020.305 (Biochemistry) or AS.020.306 (Cell Biology) or EN.580.221 (Molecules and Cells) or EN.540.307 (Cell Biology for Engineers) or permission of instructor.
Instructor(s): B. Zirkin
Area: Natural Sciences.

AS.020.340. Genetics Laboratory. 2.0 Credits.
This laboratory explores the genetics of living organisms, and students in each section will therefore be required to return to lab on succeeding days to observe and record the results of their experiments. Recommended Course Background: AS.020.316
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Norris
Area: Natural Sciences.

AS.020.344. Virology. 3.0 Credits.
This course will cover basic principles of viral replication and pathogenesis, as well as the host response to viral infection. It will then focus on several viruses of interest, including HIV-1, Influenza, Human Papilloma Virus, Hepatitis C, Ebola Virus, and Zika Virus.
Prerequisites: AS.020.305 OR AS.250.315
Instructor(s): K. Beemon
Area: Natural Sciences.

AS.020.346. Immunobiology. 3.0 Credits.
A course for upper level undergraduates that introduces the molecules, cells, systems and biology of the immune system.
Prerequisites: AS.020.305 OR AS.030.316 OR AS.250.316
Instructor(s): J. Schildbach
Area: Natural Sciences.

AS.020.347. AIDS. 3.0 Credits.
AIDS is the world's deadliest infectious disease. This course will cover the biology of human immunodeficiency virus (HIV, the infectious agent that causes AIDS), the effects of HIV on the immune system, the pharmacology of the anti-viral agents that are used to suppress HIV infection, and the ongoing quest for an HIV vaccine. Because HIV drugs cannot cure HIV-infected individuals and no HIV vaccine yet exists, we will also study the long-term consequences of HIV infection including opportunistic infections, comorbid conditions, and the HIV-related cancers Kaposi's Sarcoma and AIDS-Related lymphoma. Recommended Course Background: AS.020.306
Instructor(s): T. Schroer
Area: Natural Sciences.

AS.020.350. Introduction to Clinical Medicine. 2.0 Credits.
Perm. Req'd. Post-Bac Students Only
Instructor(s): E. Ruiz; M. Brady; W. Merritt; W. Ziai
Area: Natural Sciences.

AS.020.351. Cancer Biology. 3.0 Credits.
While the "war on cancer" has produced modest victories with respect to clinical outcomes, our knowledge of the cellular mechanisms of cancer is now vast and represents one of the most significant scientific achievements of the past 40 years. Key aspects of cancer biology will be covered with a combination of textbook and original literature readings. Topics will include cancer cell characteristics, oncogenes, tumor suppressor genes, apoptosis, metastasis and immuno-surveillance of cancer cells. Application of our knowledge to the rational treatment of cancer will also be discussed.
Prerequisites: Cell Biology 020.306 or permission of instructor
Instructor(s): M. Hoyt
Area: Natural Sciences.

AS.020.355. Fundamentals of Genome Informatics. 3.0 Credits.
This course will cover fundamental methods used in the analysis of genomic sequencing data, with a particular focus on recent developments in comparative and functional genomic assays. In particular, we will cover approaches for 1) genomic sequencing and assembly, including resequencing and personal genomes, 2) comparing genomes and modeling genome evolution, 3) identifying functional elements using both functional genomics and computational models. While the course will focus on particular problems in genomics, we will emphasize core algorithmic concepts that generalize to the analysis of other types of biological data.
Prerequisites: General Biology 020.151-152 and (Calculus I 110.106 or Calculus I 110.108)
Instructor(s): J. Taylor
Area: Natural Sciences.

AS.020.360. Gene Regulation During Development and Disease. 3.0 Credits.
This course examines how regulation of gene expression impacts development and disease. The course will focus on the mechanisms controlling transcriptional, post-transcriptional, translational, and post-translational regulation. For each topic, one class will be a lecture/discussion of key concepts and experimental approaches followed by a class with student-led presentations of related publications. Recommended Course Background: AS.020.303 and AS.020.305.
Instructor(s): R. Johnston
Area: Natural Sciences.

AS.020.362. Single Molecule Approaches to Biology. 3.0 Credits.
This course examines how recently developed single-molecule methods have enhanced our understanding of cellular processes. The ability to observe and manipulate individual biological macromolecules has revolutionized our understanding of the machines and processes that enable life. The course will provide an overview of single-molecule approaches and discuss relevant publications that exemplify how these methodologies are applied to biological problems. For each approach, key concepts will be introduced in a lecture/discussion, followed by a student-led presentation of a related publication. Recommended coursework: Physics II
Prerequisites: AS.020.305 OR AS.250.316
Instructor(s): C. Kaiser
Area: Natural Sciences.
AS.020.363. Developmental Biology. 3.0 Credits.
This class will explore the development of animals from a single fertilized egg into a fully formed organism. We will emphasize experimental methods to understand the molecular mechanisms controlling development.

Prerequisites: AS.020.306 AND (AS.020.330 OR AS.020.303)
Instructor(s): C. Norris; C. Roberson; M. Van Doren
Area: Natural Sciences.

AS.020.365. Intro To Human Skeleton. 3.0 Credits.
This course will provide a basic understanding of human skeletal biology, including bone composition and bone growth, recognition of skeletal elements, functional anatomy of different skeletal systems, comparative anatomy, and forensic anthropology (sexing and aging, body size reconstruction, bone pathology). Lectures will be combined with hands-on experience with bone models and real bone specimens.
Instructor(s): C. Ruff
Area: Natural Sciences.

AS.020.366. Primate Adaptation and Evolution. 3.0 Credits.
A close look at our closest relatives, the primates. Topics include: evolutionary theory, primate evolution, primate behavior and ecology, human evolution, and modern human variation.
Instructor(s): J. Perry
Area: Natural Sciences.

AS.020.367. Develop Biology Lab. 2.0 Credits.
This laboratory is designed to give students exposure to the different techniques and organisms used in Developmental Biology research. Our primary goal in this course is to help you learn to think like a scientist and gain a better understanding of how scientists study development. With that goal in mind, students design and execute an independent project during the second half of the semester. The independent projects will culminate with a poster session in which the project and its outcome will be shared with the other students. Please be aware that because we are working with live developing embryos, you will sometimes be required to return to lab between scheduled class times.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Norris.

AS.020.367. Comparative Animal Physiology. 3.0 Credits.
This class examines animal physiology from an evolutionary and comparative viewpoint. The goal is to examine the commonalities, as well as unique differences, in how various animal organisms address the necessary life functions. Topics will include metabolism, neural systems, respiration, muscle systems, water and salt homeostasis, thermal regulation, and reproduction.
Prerequisites: AS.020.305
Instructor(s): A. Coppola
Area: Natural Sciences.

AS.020.369. Evolution. 3.0 Credits.
This course takes a broad look at the impact of natural selection and other evolutionary forces on evolution. Emphasis is placed on what we can learn from genome sequences about the history of life, as well as current evolutionary pressures. Recommended Course Background: AS.020.306, AS.020.330, or permission required
Instructor(s): C. Norris
Area: Natural Sciences.

AS.020.380. Eukaryotic Molecular Biology. 3.0 Credits.
The course will present analysis of the structural basis of the genome organization in an eukaryotic nucleus and the utilization of its genomic content. We start with the analysis of the fluctuations of the structure of the double helix in response to its cellular microenvironment that yield DNA structural and functional polymorphism. Next we will deal with the mechanics of its compaction into chromatin and the differentiation of the chromatin structure at the level of the nucleosome via histone variants and posttranslational modifications and chromatin-based epigenetics. We will next move to chromosomal territories, chromosomal imprinting and chromosome inactivation. Finally, the lectures will address mechanisms of DNA replication and the nature of telomeres; the role of transcription factors in the regulated expression of the genome. It will conclude with analysis of the events of RNA processing and export to the cytoplasm. Paradigms of the role of chromatin differentiation to certain human diseases will be presented.
Prerequisites: AS.020.305 OR AS.020.306; AS.020.303 with approval of the instructor only.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.385. Epigenetics. 3.0 Credits.
Course description: This course emphasizes epigenetic regulatory mechanisms including DNA methylation, histone modifications, histone variants, non-coding RNA regulation, and chromatin remodeling, etc. We will discuss the broad impact of epigenetic regulation in various biological events, ranging from stem cell activity, small RNAs' and long non-coding RNAs' function, to transgenerational epigenetic inheritance and human diseases. We will mainly use recent literatures to discuss various topics. There are both students' presentation and writing components for this course. Students will be assigned a series of papers for their presentation and faculty will meet with student presenters ahead of the time to go through the presentation content.
Prerequisites: AS.020.303 OR AS.020.330
Instructor(s): J. Kim; X. Chen
Area: Natural Sciences.

AS.020.401. Advanced Seminar: Molecular and Cellular Biology. 3.0 Credits.
This is a weekly seminar designed for graduate students enrolled in the B.A./M.S. and Ph.D. programs. The seminar involves student presentations of research and discussion of topics of current interest in the field. BA/MS candidates only.
Instructor(s): K. Tiffit Oshinnaiye
Area: Natural Sciences.

AS.020.402. Seminar: Molecular & Cellular Biology. 3.0 Credits.
This is a weekly seminar designed for students enrolled in the BA/MS program. The seminar involves student presentations of research and discussion of topics of current interest in the field. BA/MS students only.
Instructor(s): K. Tiffit Oshinnaiye
Area: Natural Sciences.
AS.020.415. Advanced Biomedical Research. 3.0 Credits.
This course for advanced undergraduates includes classroom instruction in interdisciplinary research approaches and lab work on an independent research project in the lab of a Bloomberg Distinguished Professor. Lectures will focus on cross-cutting techniques such as data visualization, statistical inference, and scientific computing. In addition to two 50-minute classes per week, students will commit to working approximately 3 hours per week in the lab of one of the professors. The student and professor will work together to schedule the research project. Students will present their work at a symposium at the end of the semester. This course can be used as 1 credit of independent research for the MCB major requirement.
Instructor(s): M. Schatz
Area: Natural Sciences.

AS.020.420. Build-a-Genome. 4.0 Credits.
In this combination lecture/laboratory "Synthetic Biology" course students will learn how to make DNA building blocks used in an international project to build the world’s first synthetic eukaryotic genome, Saccharomyces cerevisiae v. 2.0. Please study the wiki www.syntheticyeast.org for more details about the project. Following a biotechnology boot-camp, students will have 24/7 access to computational and wet-lab resources and will be expected to spend 15-20 hours per week on this course. Advanced students will be expected to contribute to the computational and biotech infrastructure. Co-listed with EN.580.420, AS.020.451 and EN.540.420. Successful completion of this course provides 3 credit hours toward the supervised research requirement for Molecular and Cellular Biology majors, or 2 credit hours toward the upper level elective requirement for Biology or Molecular and Cellular Biology majors. Must understand fundamentals of DNA structure, DNA electrophoresis, and analysis, Polymerase Chain Reaction (PCR) and must be either a) Experienced with molecular biology lab work or b) Adept at programming with a biological twist.
Instructor(s): J. Bader; K. Zeller
Area: Natural Sciences.

AS.020.431. JHU Oxford: Advanced Biochemistry & Molecular Biology. 4.0 Credits.
Open to JHU Oxford participants only.
Instructor(s): J. Schildbach
Area: Natural Sciences.

AS.020.441. Mentoring in General Biology. 1.0 Credit.
This course provides students who have taken General Biology I & II the opportunity to mentor new students in General Biology I & II. Mentors collaborate with faculty on how to lead effective sessions, help student teams complete team assignments, and generally help students understand difficult concepts and principles in biology. Mentors must have a firm command of the topics covered in biology and must meet with both faculty and students through the course of the semester. To become a mentor, students must have successfully completed AS.020.151/AS.020.152, must apply using the form on the Biology Department website, and must be accepted by the instructors. The deadline to apply is April 1st. S/U only. Perm. Req’d
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.442. Mentoring in General Biology. 1.0 Credit.
This course provides students who have taken General Biology I & II the opportunity to mentor new students in General Biology I & II. Mentors collaborate with faculty on how to lead effective sessions, help student teams complete team assignments, and generally help students understand difficult concepts and principles in biology. Mentors must have a firm command of the topics covered in biology and must meet with both faculty and students through the course of the semester. To become a mentor, students must have successfully completed AS.020.151/AS.020.152, must apply using the form on the Biology Department website, and must be accepted by the instructors. The deadline to apply is April 8th. Recommended Course Background: AS.020.151/AS.020.152
Instructor(s): R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.451. Build-a-Genome Mentor. 4.0 Credits.
In this combination lecture/laboratory, "Synthetic Biology" course students will learn how to make DNA building blocks used in an international project to build the world’s first synthetic eukaryotic genome, Saccharomyces cerevisiae v. 2.0. Please study the wiki www.syntheticyeast.org for more details about the project. Following a biotechnology boot-camp, students will have 24/7 access to computational and wet-lab resources and will be expected to spend 15-20 hours per week on this course. Advanced students will be expected to contribute to the computational and biotech infrastructure. Must understand fundamentals of DNA structure, DNA electrophoresis, and analysis, Polymerase Chain Reaction (PCR) and must be either a) Experienced with molecular biology lab work or b) Adept at programming with a biological twist.
Instructor(s): J. Bader; K. Zeller
Area: Natural Sciences.

AS.020.501. Introduction Independent Study. 3.0 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Freshmen and Sophomores only. Perm. Req’d.
Instructor(s): Staff.

AS.020.502. Introduction Independent Study. 0.0 - 3.0 Credits.
Instructor(s): B. Kondo; K. Cunningham; R. Horner.

AS.020.503. Introduction To Research. 3.0 Credits.
Perm. Req’d. Freshmen and Sophomores only
Instructor(s): Staff.

AS.020.504. Introduction to Research. 0.0 - 3.0 Credits.
Perm. Req’d. Freshmen or Sophomores only
Instructor(s): Staff.

AS.020.505. Internship - Biology. 0.0 - 3.0 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Consent of adviser required.
Instructor(s): C. Roberson; H. Zhao.

AS.020.506. Internship - Biology. 1.0 Credit.
Instructor(s): Staff.

AS.020.511. Independent Study. 3.0 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Perm. Req’d.
Instructor(s): Staff.

AS.020.512. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.
AS.020.513. Research Problems. 3.0 Credits.
Planning and conducting original laboratory investigations on biological problems, collection and analysis of data, reporting of results. Juniors and Seniors Only. Recommended Course Background: Permission of full-time faculty member in Biology dept.
Instructor(s): Staff.

AS.020.514. Research Problems. 0.0 - 3.0 Credits.
Perm. Req'd. Juniors and Seniors only
Instructor(s): Staff.

AS.020.551. Mentored Research. 9.0 Credits.
This courses provide BA/MS students with intensive research experience for a full academic year. Students in the program work under the direction of a research mentor on an original research project, produce a written report in the form of a thesis, and make a presentation of the work to the Biology Department. BA/MS or BS/MS candidates only.
Instructor(s): R. Horner.

AS.020.553. Mentored Research. 9.0 Credits.
BA/MS candidates only.
Instructor(s): H. Zhao; K. Beemon; M. Bessman; R. Horner.

AS.020.554. Mentored Research Program in Cellular and Molecular Biology. 3.0 Credits.
BA/MS Candidates Only
Instructor(s): R. Horner.

AS.020.591. Summer Research Experience. 0.0 - 3.0 Credits.
Instructor(s): J. Schildbach.

AS.020.594. Internship - Summer. 1.0 Credit.
Instructor(s): Staff.

AS.020.597. Research. 3.0 Credits.
Instructor(s): Staff.

AS.020.599. Independent Study. 3.0 Credits.
Instructor(s): C. Norris; M. Bessman; R. Horner; T. Schroer.

This course involves 30 minute sessions with each member of the training faculty. It is designed to acquaint incoming graduate students with the research topics and research philosophy of each laboratory. This should help students choose future rotations. More generally the course provides a range of perspectives on the future of specific fields and strategies for success in science. First year Biology Graduate students only
Instructor(s): Staff.

AS.020.607. Quantitative Biology Bootcamp.
Quantitative and computational methods have become essential to modern biological research. The goal of this course is to provide an introduction to basic skills that will enable students to employ these methods. Students will learn how to work in a command line shell and use software to perform analyses of large biological datasets. Students will learn basic programming using the Python language. Throughout the course students will apply the skills learned to practical analysis problems emphasizing parsing and working with biological data formats, exploratory data analysis and visualization, and numerical and statistical methods. This course is only open to first-year students in the CMDB program and will be held from September 2nd through September 5th, 2014.
Instructor(s): F. Tan; J. Taylor.

AS.020.612. Introduction to the Human Brain.
This course explores the outstanding problem of biology: how knowledge is represented in the brain. Relating insights from cognitive psychology and systems neuroscience with formal theories of learning and memory, topics include (1) anatomical and functional relations of cerebral cortex, basal ganglia, limbic system, thalamus, cerebellum, and spinal cord; (2) cortical anatomy and physiology including laminar/columnar organization, intrinsic cortical circuit, hierarchies of cortical areas; (3) activity-dependent synaptic mechanism; (4) functional brain imaging; (5) logicist and connectivist theories of cognition; and (6) relation of mental representations and natural language. Co-listed with AS.020.312.
Instructor(s): E. Hedgecock.

AS.020.613. Biology Science Writing.
Students will learn how to write abstracts and grant proposals, organize scientific manuscripts and thesis dissertations by writing and rewriting about their own research and editing other students’ work. Focus will be on structure, substance, accessibility, and clarity of writing. Biology Graduate students only. Permission Req'd.
Instructor(s): A. Huang.

AS.020.614. Signaling in Development and Disease.
A seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease.
Instructor(s): R. Kuruvilla
Area: Natural Sciences.

AS.020.616. Planets, Life and the Universe.
This multidisciplinary course explores the origins of life, planets’ formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions and planetary protection. Grad Students Only. Co-listed with AS.020.334, AS.171.333 and AS.270.335
Instructor(s): J. Diruggiero; N. Levin
Area: Natural Sciences.

AS.020.617. Quantitative Biology Lab I.
This computer lab is designed for first year CMDB graduate students to enhance their quantitative skills for fall core courses. This course will cover quantitative and computational analysis of biological datasets, emphasizing molecular biology. In a hands on lab setting, students will carry learn to perform essential analyses including assembly of genomes, detection of DNA methylation, analysis of transcription factor binding and motifs, detecting genome variation, measuring expression of genes, and understanding genome evolution.
Instructor(s): J. Taylor.

AS.020.618. Quantitative Biology Lab II.
This computer lab is a continuation of the fall quantitative biology lab for CMDB graduate students. This semester will cover quantitative and computational modeling of selected topics from biophysics, cellular biology, and developmental biology
Instructor(s): E. Roberts.
AS.020.620. Stem Cells.
This course consists of introductory lectures given by faculty members, followed by student presentations in the form of seminars. The introductory part will cover the basic knowledge about stem cells, such as: What features make cells qualified as stem cells? What are the unique cellular and molecular properties of stem cells? How do stem cells maintain their identities? What are the mechanisms underlying stem cell differentiation and reprogramming? What are the therapeutic applications of stem cells? The student seminar will be based on selected literatures by the faculty. A summary mini-review paper is required for a chosen topic at the end of the semester.
Instructor(s): X. Chen.

AS.020.629. Microbiology.
This course explores the physiology and genetics of microorganisms within an evolutionary and ecological framework. Concepts will be supported by primary literature exploring microbial evolution and microbial communities including that of the human microbiome.
Instructor(s): J. Diruggiero.

AS.020.630. Human Genetics.
Area: Natural Sciences, Social and Behavioral Sciences.
This course examines modern concepts in genetics and molecular biology. The course focuses on the mechanisms controlling replication, recombination, transcriptional, posttranscriptional, translational, and posttranslational regulation. Lectures will have three parts: a student-led paper presentation, a discussion about the concepts surrounding a topic, and a discussion of modern techniques to experimentally probe the topic.
Instructor(s): J. Kim; R. Johnston.

AS.020.637. Genomes & Development.
Instructor permission required for undergraduate students
Area: Natural Sciences.
This course covers gametogenesis, embryogenesis, post-embryonic development, genetic analysis, developmental genetics, model developmental systems, and cell determination. Biology graduate students only except with written permission from the instructor.
Instructor(s): K. Beemon

Area: Natural Sciences.
Instructor(s): K. Beemon

AS.020.644. RNA.
Area: Natural Sciences.
Instructor permission required for undergraduate students

AS.020.650. Eukaryotic Molecular Biology.
The course will present analysis of the structural basis of the genome organization in an eukaryotic nucleus and the utilization of its genomic content. We start with the analysis of the fluctuations of the structure of the double helix in response to its cellular microenvironment that yield DNA structural and functional polymorphism. Next we will deal with the mechanics of its compaction into chromatin and the differentiation of the chromatin structure at the level of the nucleosome via histone variants and posttranslational modifications and chromatin-based epigenetics. We will next move to chromosomal territories, chromosomal imprinting and chromosome inactivation. Finally, the lectures will address mechanisms of DNA replication and the nature of telomeres; the role of transcription factors in the regulated expression of the genome. It will conclude with analysis of the events of RNA processing and export to the cytoplasm. Paradigms of the role of chromatin differentiation to certain human diseases will be presented.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.664. Advanced Graduate Biophysical Chemistry.
Area: Natural Sciences.
Instructor(s): E. Freire; E. Roberts.

AS.020.668. Advanced Graduate Biophysical Chemistry.
Area: Natural Sciences.
Instructor(s): K. Fleming; V. Hilser.

AS.020.669. Advanced Graduate Biophysical Chemistry.
Area: Natural Sciences.
Instructor(s): K. Fleming; V. Hilser.

AS.020.674. Graduate Biophysical Chemistry.
Area: Natural Sciences.
Instructor(s): K. Fleming; V. Hilser.
AS.020.679. Advanced Biological Microscopy.
This course is intended to build upon the basic skills students acquired in the previous course. Students will be required to work on actual ongoing research projects. The course will emphasize the integration and use of various light and electron microscopic techniques and their application to various research related questions. The course will have primarily a practical "hands-on" component; but will also include theoretical considerations as students will read, analyze, and discuss current journal articles.
Instructor(s): J. McCaffery
Area: Natural Sciences.

The creation and implementation of new approaches to the drug discovery and development process is a very active area of research. Currently, only one compound out of 5,000 that enter preclinical studies becomes a drug. Moreover, the development process is time consuming, lasting more than ten years on average. The rate of failure is extremely high. It has become evident that this field is in urgent need of revolutionary changes. This course will cover drug discovery issues ranging from the identification of hits to their optimization as drug candidates. Current as well as novel and proposed approaches aimed at accelerating discovery, potency optimization, selectivity, pharmacokinetics and other drug properties will be discussed. Grad students only.
Instructor(s): E. Freire
Area: Natural Sciences.

All aspects of cell biology are reviewed and updated in this intensive course through critical evaluation and discussion of the current scientific literature. Topics include protein trafficking, membrane dynamics, cytoskeleton, signal transduction, cell cycle control, cell physiology, and the integration of these processes in neurons. Recommended Course Background: AS.020.306
Instructor(s): S. Farber.

AS.020.687. Foundations & Applications of Molecular Biology.
An advanced course for graduate students in the biological sciences, although undergraduates are welcome, that stresses fundamental principles and analysis. It is generally focused on gene and protein structure and function.
Instructor(s): R. Schleif
Area: Natural Sciences.

AS.020.699. CMDB Responsible Conduct in Research.
This course involves discussions of ethical conduct and the responsible practice of scientific research. Department signature only; restricted to graduate students in Biology PhD students only.
Instructor(s): Staff.

AS.020.731. Critical Thinking in Biology.
In this course, students will critically analyze modern and seminal primary research papers in molecular, cellular and developmental biology. This analysis will emphasize the logic and experimental design of a selected set of outstanding research publications from diverse fields. Graduate students enrolled will develop the skills needed to efficiently understand and critique the rapidly expanding literature and growing diversity of biological research methods. In preparation for each class, all course participants will be expected to read and thoroughly critique the assigned paper(s). All students will submit a short, critical analysis of each paper in advance of the class session in which the paper(s) will be covered. A student will lead each discussion (once per semester, dependent upon enrollment). Recommended Course Background: AS.020.637, AS.020.668, AS.020.674, and AS.020.686
Instructor(s): D. Zappulla; R. Johnston.

AS.020.735. Seminar: Membrane Trafficking.
The Membrane Trafficking seminar course consists of several weeks of lectures and discussions led by the professors discussing key background concepts in the field of membrane trafficking. Class meetings during the final weeks of the course are seminars on current topics in membrane trafficking, led by the students. Over the course of the semester, students will learn about the methods and logic of experiment design, model building and hypothesis testing, gain exposure to and skills in reading and summarizing scientific literature, and get experience with preparing and delivering an effective oral presentation.
Instructor(s): B. Wendland; J. McCaffery
Area: Natural Sciences.

AS.020.739. Topics in Biochemistry.
The course is open to graduate students and advanced undergraduates.
- Undergraduates with instructor's permission - "Topics in Biochemistry" deals with minireviews taken from the Journal of Biological Chemistry. Students select a topic of their choice from the "Compendium of Minireviews" for the current year, and present it before the class for discussion.
Instructor(s): M. Bessman.

AS.020.753. Logic and Methods in Modern Biology.
The purpose of this course is to gain experience in critical thinking about the logic and methods used in modern biological research. The main approach will be the critical reading, presentation, and discussion of primary research papers, and the preparation and presentation of a research proposal. It is held once a week on the NIH Bethesda campus.
Grad students only.
Prerequisites: AS.020.637 AND AS.020.668 AND AS.020.674
Instructor(s): M. Lichten; O. Cohen-Fix
Area: Natural Sciences.

AS.020.801. Research – Biological Problems.
Independent research for the Ph.D. dissertation. Biology Ph.D. students only.
Instructor(s): V. Hilser.

AS.020.802. Research-Biological Problems.
Biology Graduate students only.
Instructor(s): Staff.

AS.020.823. Introduction to Biology Research.
First year Biology Graduate Students only
Instructor(s): Staff.

AS.020.824. Introduction to Biology Research.
First year Biology Graduate Students only
Instructor(s): Staff.
AS.020.825. Introduction to Research.
Open to first year Biology graduate students only. 
Instructor(s): Staff.

AS.020.826. Introduction to Biology Research.
Open to first year Biology graduate students only. 
Instructor(s): Staff.

Cross Listed Courses

Neuroscience
AS.080.305. Neuroscience: Cellular and Systems I. 3.0 Credits.
(Formerly Nervous Systems I) Neuroscience: Cellular and Systems I is a fully integrated, two-semester course that surveys the cellular and molecular biology of neurons as well as the structure and function of the nervous system. Students must register for Neuroscience: Cellular and Systems II offered in the second term. Course open to JHU undergraduates only.
Prerequisites: AS.080.203 OR AS.050.203 OR AS.200.141 or 080.105 or Permission
Instructor(s): H. Zhao; S. Hendry
Area: Natural Sciences.

Computer Science
EN.601.448. Computational Genomics: Data Analysis. 3.0 Credits.
Genomic data has the potential to reveal causes of disease, novel drug targets, and relationships among genes and pathways in our cells. However, identifying meaningful patterns from high-dimensional genomic data has required development of new computational tools. This course will cover current approaches in computational analysis of genomic data with a focus on statistical methods and machine learning. Topics will include disease association, prediction tasks, clustering and dimensionality reduction, data integration, and network reconstruction. There will be some programming and a project component. [Applications] Recommended Course Background: EN.601.226 or other programming experience, probability and statistics, linear algebra or calculus. Students may receive credit for EN.601.448 or EN.601.748, but not both.
Prerequisites: Students may receive credit for EN.601.448 or EN.601.748, but not both.
Instructor(s): A. Battle
Area: Engineering.

EN.601.749. Computational Genomics: Applied Comparative Genomics. 3.0 Credits.
The goal of this course is to study the leading computational and quantitative approaches for comparing and analyzing genomes starting from raw sequencing data. The course will focus on human genomics and human medical applications, but the techniques will be broadly applicable across the tree of life. The topics will include genome assembly & comparative genomics, variant identification & analysis, gene expression & regulation, personal genome analysis, and cancer genomics. The grading will be based on assignments, a midterm & final exam, class presentations, and a significant class project. [Applications] Expected course background: familiarity with UNIX scripting and/or programming. Instructor(s): M. Schatz.

Biophysics
http://biophysics.jhu.edu/
The Department of Biophysics offers programs leading to the B.A., M.A., and Ph.D. degrees. Biophysics is appropriate for students who wish to develop and integrate their interests in the physical and biological sciences.

Research interests in the Department cover experimental and computational, molecular and cellular structure, function, and biology, membrane biology, and biomolecular energetics. The teaching and research activities of the faculty bring its students in contact with biophysical scientists throughout the university. Regardless of their choice of research area, students are exposed to a wide range of problems of biological interest. For more information, and for the most up-to-date list of course offerings and requirements, consult the department web page at biophysics.jhu.edu.

Research Activities of Primary Faculty

Mucosal Protection and Reproductive Health (Dr. Cone)
The Mucosal Protection Laboratory is developing methods women can use for protection against both pregnancy and sexually transmitted diseases, including AIDS. Basic research projects include investigating the ability of mucosal antibodies and vaginal acidity (lactic acid) to inactivate viral and bacterial pathogens, and how normal vaginal lactobacilli suppress the array of anaerobic bacteria that causes BV (bacterial vaginosis). BV is the most common vaginal infection (one in three women at any given time) and women with this little-recognized infection are at markedly increased risk of sexually transmitted infections, miscarriage, and premature birth. Research and development of microbicides for preventing BV and sexually transmitted diseases is being sponsored by NIH in collaboration with ReProtect, Inc., through a research agreement with Johns Hopkins University. Research on nanoparticles for enhanced delivery of drugs to mucosal surfaces is being done in collaboration with Dr. Justin Hanes, Director of Nanomedicine at the Johns Hopkins School of Medicine.

Protein Engineering and pH Sensing (Dr. Garcia-Moreno)
To understand how biological macromolecules work, or to design and engineer new ones, it is necessary to understand in detail the relationship between structure and energetics. We study this problem in our lab by analysis of the connection between structure, thermodynamic stability, and dynamics of proteins with a combination of computational and experimental methods. The approach depends heavily on the application of NMR spectroscopy, X-ray crystallography, and equilibrium thermodynamics. The experiments contribute the physical insight needed to guide the development of computational methods for structure-based
energy calculations, as well as the data required to benchmark these methods. We are focused on problems of protein electrostatics because electrostatic energy is the most useful metric for correlating structure with function in all the most important energy transduction processes in biological systems. We focus on the engineering of proteins with pH sensing.

Protein Folding (Dr. Rose)
A globular protein will spontaneously self-assemble its components into a highly organized three-dimensional structure under appropriate physiological conditions in a process called protein folding. Our principal goal is to understand protein folding, using an approach involving simulation, modeling, and analysis. In the classical model of folding, an unfolded protein visits an astronomical number of possible conformations. In contrast, we recently reevaluated this popular model and found that the unfolded state is far less heterogeneous than previously thought. This realization has prompted us to pursue a novel strategy to predict folding.

Biophysics of RNA (Dr. Woodson)
The control of cell growth and type depends on the ability of RNA to fold into complex three-dimensional structures. RNA catalysts are good models for studying the physical principles of RNA folding, and the assembly of protein-RNA complexes such as the ribosome. Changes in RNA three-dimensional structure are monitored by fluorescence spectroscopy, "X-ray footprinting," and neutron scattering. Bacterial and yeast expression systems are used to study intracellular folding of RNA.

Protein Folding, Notch Signaling (Dr. Barrick)
The folding of proteins into their complex native structures is critical for proper function in biological systems. This spontaneous process of self-assembly is directed by physical chemistry, although the rules are not understood. We are using repeat-proteins, linear proteins with simple architectures, to dissect the energy distribution, sequence-stability relationship, and kinetic routes for folding. In addition, we are studying the molecular mechanisms of Notch signaling, a eukaryotic transmembrane signal transduction pathway. The transmission of information across the membranes of cells is essential for cell differentiation and homeostasis; signaling errors result in disease states including cancer. We are focusing on interactions between proteins involved in Notch signaling using modern biophysical methods. Thermodynamics of association and allosteric effects are determined by spectroscopic, ultracentrifugation, and calorimetric methods. Atomic structure information is being obtained by NMR spectroscopy. The ultimate goal is to determine the thermodynamic partition function for a signal transduction system and interpret it in terms of atomic structure.

NMR Spectroscopy (Dr. Lecomte)
Many proteins require stable association with an organic compound for proper functioning. One example of such “cofactor” is the heme group, a versatile iron-containing molecule capable of catalyzing a broad range of chemical reactions. The reactivity of the heme group is precisely controlled by interactions with contacting amino acids. Structural fluctuations within the protein are also essential to the fine-tuning of the chemistry. We are studying how the primary structure of cytochromes and hemoglobins codes for heme binding and the motions that facilitate function. The method of choice is nuclear magnetic resonance spectroscopy, which we use to obtain detailed structural and dynamic representations of proteins with and without bound heme. The ultimate goal is to understand the evolution of chemical properties in heme proteins and how to alter them.

Structural and Energetic Principles of Membrane Proteins (Dr. K. Fleming)
Membrane proteins must fold to unique native conformations and must interact in specific ways to form complexes essential for life. Currently, the chemical principles underlying these processes are poorly understood. Thermodynamic and kinetic studies on membrane proteins with diverse folds and oligomeric states are carried out with the goal of discovering the physical basis of stability and specificity for membrane proteins. Our research results in a quantitative understanding of sequence-structure-function relationships that can ultimately be used to describe membrane protein populations in both normal and disease states, to design novel membrane proteins, and to develop therapeutics that modulate membrane protein functions in desirable ways.

Chromatin Remodeling (Dr. Bowman)
Chromatin, the physical packaging of eukaryotic chromosomes, plays a major role in determining the patterns of gene silencing and expression across the genome. Chromatin remodelers are multicomponent protein machines that establish and maintain various chromatin environments through the assembly, movement, and eviction of nucleosomes. At present, the molecular mechanisms by which chromatin remodelers alter chromatin structure are not understood. Our long-term goal is to gain a molecular understanding of the remodeling process and in particular how remodeling is coupled to the transcriptional machinery. Our strategy is to couple structure determination with functional studies to determine how different components of a chromatin remodeler cooperate and interact with the nucleosome substrate.

Physical Systems Biology (Dr. Roberts)
The laboratory is devoted to understanding and modeling the behavior of cells as complex systems. We are using tools from the general area of biological physics: potential- and probability-based computational modeling along with limited applications of single-cell, single-molecule experimental techniques (split roughly 80% theoretical/computational and 20% experimental). We term this approach “Physical Systems Biology” and it lies at the interface of biology, computer science, and physics. While this approach absolutely requires in-depth characterization of particular components, an equally critical step is then stepping back to consolidate the knowledge gained into a model of the entire cellular system. Incorporating many varied types of biological data into a genuine in silico model for the cell is the long-range goal of the laboratory.

Theoretical Biophysics (Dr. Johnson)
Protein interaction networks capture the cooperation required by proteins to carry out complex functions in the cell. The ability of proteins to assemble to form transient or permanent complexes and transmit signals or nutrients depends on their concentrations, their binding partners, and their spatial and temporal dynamics in the cell. Using computation and theory, we are building models to accurately simulate these multi-protein assembly processes, such as those occurring in endocytosis, that are critical to cell survival. We complement these detailed simulations with coarse-grained models to extend to larger protein interaction networks and characterize the role of network topology on protein binding specificity and dynamics.

Single Molecule Biophysics (Dr. Ha)
Our research is focused on pushing the limits of single-molecule detection methods to study complex biological systems. We develop state-of-the-art biophysical techniques (e.g., multicolor fluorescence, super-resolution imaging, combined force and fluorescence spectroscopy, vesicular encapsulation, single-molecule pull-down) and apply them to study diverse protein–nucleic acid and protein-protein complexes, and
mechanical perturbation and response of these systems both in vitro and in vivo.

**Quantitative analysis of gene expression in single molecule and single cell (Dr. Myong)**

Our research is focused on dissecting biological pathways that control and modulate gene expression profiles that are pertinent to human diseases. We develop single molecule and single cell platforms to examine potential rate-limiting steps that contribute to modulating transcription and translation. In particular, we investigate RNA interference pathway and G-quadruplex DNA mediated promoter activity. In collaboration, we are also studying telomeric DNA processing and chromatin remodeling. Together, we seek to shed light on molecular orchestration and mechanism that govern the Central Dogma of Biology.

**Facilities**

The department shares state-of-the-art equipment for X-ray diffraction analysis, NMR spectroscopy, solution biophysical studies, and numerically intensive computer simulations with other biophysics units and departments within the University. In addition, the Department houses a full complement of equipment for molecular biological and biochemical work, and for various kinds of spectroscopy.

**Undergraduate Program**

The undergraduate major in biophysics is intended for the student interested in advanced study of biophysics or the related fields of biochemistry, quantitative or computational biology, quantitative or computational biology, molecular biology, physiology, pharmacology, and neurobiology. The biophysics major fulfills all typical science premedical requirements with the exception of Organic Chemistry Lab (AS.030.225 Introductory Organic Chemistry Laboratory or AS.030.227 Chemical Chirality: An Introduction in Organic Chem. Lab, Techniques). The student majoring in biophysics, with the advice of a member of the department, chooses a program of study that will include foundation courses in biology, chemistry, and physics followed by advanced studies in modern biophysics, and independent research. The biophysics major requires that students earn a grade of "C" or greater for all courses required in the major. A student who earns a grade of "C-" or below must repeat the course and earn a better grade.

For additional information on academic requirements and department events for majors, check the undergraduate website (http://biophysics.jhu.edu/undergraduate/requirements).

**Requirements for the B.A. Degree**

(See also Requirements for a Bachelor’s Degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree).)

**Major requirements are:**

**Chemistry**

A Note on Writing Courses

The Krieger School of Arts & Sciences requires 12 credits of writing-intensive coursework. Although many humanities and social science courses have a writing designation, a few courses within the major also fulfill the requirement. Current examples include:

AS.250.383 Molecular Biophysics Laboratory
AS.250.401 Advanced Seminar in Structural and Physical Virology
AS.250.403 Bioenergetics: Origins, Evolution and Logic of Living Systems
AS.250.411 Advanced Seminar in Structural Biology of Chromatin
AS.250.421 Advanced Seminar in Membrane Protein Structure, Function & Pharmacology

Fulfilling some of the writing requirement with one or more biophysics courses requires advanced planning because not all of these courses are offered every year.

Honors in Biophysics
The Jenkins Biophysics department offers outstanding students the opportunity to earn departmental honors in Biophysics. This honors distinction appears on the student’s transcript upon graduation. If the honors requirements are approved prior to early April, an “Honors” distinction will additionally appear in the commencement program.

The requirements for departmental honors in biophysics are two-fold:

- The student must maintain an overall GPA of 3.5 or greater
- The student must write and receive approval of an Honors paper that is based on their 6 credits of required research.

Generally, the Honors paper must be submitted no later than March 1 of the senior year to meet the commencement deadline. Details on the format of the Honors paper can be found on the departmental website. Schedule a meeting with your Jenkins faculty adviser if you are interested in seeking departmental honors.

Ete Z. Szüts Undergraduate Research Travel Award
This award, named in honor of a Ph.D. graduate student from this department, will provide funds for up to 80 percent of the transportation costs of undergraduate research students in biophysics to attend a scholarly meeting. Recipients must be sponsored by a member of the departmental faculty who will be at the same meeting. Schedule a meeting with your Jenkins faculty adviser if you are interested in the Szüts Travel Award.

H. Keffler Hartline Award for Excellence in Undergraduate Research in Biophysics
This award honors a senior Biophysics Major for excellence in undergraduate research in Biophysics. Recipients are selected by Biophysics Faculty.

Detlev W. Bronk Award for Outstanding Scholarship in Biophysics
This award honors a senior Biophysics major for outstanding achievements in academics in Biophysics. Recipients are selected by Biophysics Faculty.

Graduate Programs
Fifth-Year Master’s Degree
The T. C. Jenkins Department of Biophysics offers outstanding undergraduate biophysics majors the opportunity to advance their education through a combined, 5-year B.A., M.A. program. Candidates for this program must be current biophysics undergraduates with a departmental GPA of 3.5 or greater and a strong research history. All bachelor’s requirements must be completed before matriculating into the Master’s program.

Students in this program will be required to take courses such as:

Total Credits 9

These courses account for about half of the student’s time. The remaining effort is spent on a substantial research project. A Master’s thesis describing the research being carried out is also required.

Doctoral Programs
The Thomas C. Jenkins Department of Biophysics offers two Ph.D. programs (PMB and CMDB, see below). The annual application deadline is January 15.

Program in Molecular Biophysics
The Program in Molecular Biophysics (PMB), which began in 1990, brings together Johns Hopkins faculty at the Homewood and Medical School campuses. Its goal is to prepare students to deal with interdisciplinary problems in molecular biophysics and structural biology. For more information, see PMB Web page at pmb.jhu.edu.

Admission
All applicants must have a B.S. or a B.A. degree. Applications from students in any branch of science are welcome; however, we are particularly eager to attract applicants with undergraduate majors in physics, chemistry, mathematics, or relevant areas of engineering. There are no required undergraduate courses. Instead, applications are examined for general strength of scientific background. The Graduate Record Examination, including a subject test, is required.

Please use the Johns Hopkins University online application, selecting biophysics under the School of Arts & Sciences. Supplementary materials (letters of recommendation, GRE scores, statement, etc.) should be sent directly to:

Program in Molecular Biophysics
Johns Hopkins University
101 Jenkins Hall
3400 N. Charles Street
Baltimore, MD 21218

Requirements for the Ph.D.
Programs are developed individually for each student, and due account is taken of previous training.

The following courses are required:

At the School of Medicine: ME.100.705 Computer Modeling of Biological Macromolecules and ME.330.709 Organic Mechanisms in Biology
Students must demonstrate strength in the following four areas: biological sciences, chemistry, mathematics, and physics. Typically, incoming students already have strength in at least two of these areas from undergraduate training. Deficiencies will be remedied through additional course work or self-study. Students must pass a proficiency exam in biological sciences at the end of their first year. In the mathematics and physics areas, students will be required to have calculus through the study of several variables, and one year of calculus-based physics, respectively. In the chemistry area, students are required to have basic chemistry, organic chemistry, and physical chemistry. In biological sciences, students are required to have knowledge of biochemistry and cell and molecular biology.

Additional academic requirements include completion of three 12-week laboratory rotations, a one-hour seminar on a current topic of biophysical research, and passing the Graduate Board Oral Preliminary Examination, to be given near the end of the second year. Responsible Conduct of Research instruction is required throughout the duration of graduate studies.

Completion of an original investigation and presentation of a dissertation are required. The dissertation must be accepted by the program and be considered worthy of publication by the referees. Students must then pass an oral examination on their dissertation and related topics.

The Program in Cell, Molecular Developmental Biology and Biophysics

The Program in Cell, Molecular Developmental Biology and Biophysics (CMDB) gives students a strong background in modern biology and physical biochemistry. This combination prepares students to study complex biological phenomena using quantitative physical methods. The training faculty reside in the T. C. Jenkins Department of Biophysics, the Biology Department, and the Carnegie Institution Department of Embryology, all located on the Johns Hopkins Homewood campus. Students take core graduate courses in cell, molecular, and developmental biology, and in biophysics, and complete four eight-week rotations their first year. Other requirements include the Graduate Board Oral Preliminary Examination, given before the end of the second year, and successful defense of the dissertation.

For more information about CMDB, please check its website (cmdb.jhu.edu). Interested applicants can apply online via the program website or by U. S. mail to:

Ms. Joan Miller (joan@jhu.edu)
Graduate Admissions Coordinator
CMDB Program
Department of Biology

Financial Aid

Two National Institutes of Health training grants currently provide stipend and tuition support: one is for students who enroll in PMB and the other is for those who enter CMDB. Students supported by these training grants must be U.S. citizens or permanent residents. In addition, several research assistantships funded by grants and contracts awarded to faculty by outside agencies may be available to qualified students. University fellowships providing remission of tuition are also available. Graduate students in biophysics are eligible for and encouraged to apply for various nationally administered fellowships, such as National Science Foundation fellowships. Information on these and other support mechanisms can be obtained through the fellowship advisor at the applicant’s college or from the National Research Council:

Attn: Fellowships
1000 Thomas Jefferson St.
Washington, D.C., 20007.

It is anticipated that financial support covering normal living costs and tuition will be made available to accepted students. Support for foreign students is extremely limited.

For current faculty and contact information go to http://biophysics.jhu.edu/people/

Faculty

Faculty

Doug Barrick
Thomas C. Jenkins Professor: energetic and structural basis of Notch signal transduction, protein energetics, repeat protein folding.

Gregory Bowman
Associate Professor: biophysical and biochemical characterization of chromatin-remodeling proteins; X-ray crystallography.

Richard Cone
Professor: mucosal protective mechanisms, contraception and prevention of sexually transmitted diseases, cellular and molecular mechanics.

Bertrand Garcia-Moreno E.
Professor (Chair): experimental and computational studies of protein energetics and electrostatics.

Karen G. Fleming
Professor: energetics and folding of membrane proteins.

Taekjip Ha
Bloomberg Professor: single molecule biophysics, Fluorescence imaging and spectroscopy, mechanobiology

Margaret Johnson
Assistant Professor: computational and theoretical studies of protein-protein interactions; protein assembly and dynamics.

Juliette T. J. Lecomte
Professor: structure and dynamics of proteins in solution; NMR spectroscopy.

Sua Myong
Associate Professor: quantitative analysis of gene expression in single molecule and single cell

Elijah Roberts
Assistant Professor: development and application of in-silico cell models.

George Rose
Krieger-Eisenhower Professor, Research Professor, Professor Emeritus: modeling and simulation of protein folding and protein structure.

Sarah A. Woodson
Thomas C. Jenkins Professor: folding and assembly of RNA and RNA-protein complexes.

Research/Teaching Faculty

Ana Damjanovic
Associate Research Scientist: computational studies of protein structure, dynamics and function.

Carolyn Fitch
Senior Lecturer: computational and experimental studies on protein structure, function, and energetics.

Patrick Fleming
Senior Lecturer: computational studies of protein folding, structure and solvation.

Secondary Appointments, Biology
Ernesto Freire
Professor: biophysical chemistry, thermodynamics of macromolecular assemblies in membranes protein-lipid interactions, microcalorimetry.

Vincent J. Hilser
Professor: conformational fluctuations in function, disease, and evolution.

Christian Kaiser
Assistant Professor: Single-molecule biochemistry studies of the machines and processes in protein translation, translocation, and folding

Evangelos Moudrianakis
Professor: mechanisms of enzyme action, especially of chloroplast and mitochondrial coupling factors. Human chromosome structure and function, self-assembly of chromosomal components.

Robert Schleif
Professor: protein-DNA interactions and regulation of gene activity.

Secondary Appointments, Chemistry
Christopher Falzone
Teaching Professor: NMR spectroscopy of proteins.

Craig A. Townsend
Professor: organic and bioorganic chemistry, biosynthesis of natural products, stereochemical and mechanistic studies of enzyme action, application of spectroscopic techniques to the solutions of biological problems.

Secondary Appointments, Advanced Academic Programs
Alexandra Tan
Program Director, Advanced Academic Programs and Lecturer, Biophysics

Joint Appointments
Brian Camley
Assistant Professor (Physics & Astronomy): theoretical and computational studies of single and collective cell motility, soft matter in cell biology

P. C. Huang
Professor (Biochemistry and Molecular Biology): organization and regulation of stress inducible genes and their gene products.

Affiliations with the School of Medicine
L. Mario Amzel
Professor: X-ray diffraction studies of biological macromolecules; enzymes involved in oxidate reductions and phosphorylation; experimental and modeling studies of binding proteins.

James M. Berger
Professor: structural and mechanistic biochemistry of protein/nucleic acid machines and assemblies.

Dominique Frueh
Assistant Professor: NMR studies of protein dynamic modulations and conformations in active enzymatic systems.

Albert Lau
Assistant Professor: characterization of receptor-ligand interactions and macromolecular conformational transitions using computational and crystallographic approaches.

Jungsan Sohn
Assistant Professor: structure and function of biological stress sensors.

Herschel Wade
Assistant Professor: structural, functional, and energetic treatments of ligand-activated molecular switches.

Cynthia Wolberger
Professor: three-dimensional structure of protein-DNA complexes, X-ray crystallography.

Bin Wu
Assistant Professor: single molecule imaging, RNA biology, and gene expression

Jie Xiao
Assistant Professor: dynamics of molecular process at single molecule and single cell level.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses

AS.250.106. Introduction to Biomedical Research and Careers I. 1.0 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Freshmen and non-science majors Co-listed with AS50.300 and AS.250.306
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.131. Freshman Seminar in Biophysics. 1.0 Credit.
Introduction of contemporary biophysics research topics through presentations, discussion and hands-on exercise. Freshmen and sophomores only. S/U grading only.
Instructor(s): K. Fleming; R. Cone
Area: Natural Sciences.

AS.250.205. Introduction to Computing. 3.0 Credits.
This course is useful for many disciplines not only the life sciences. It will introduce students to basic computing concepts and tools useful in many applications. Students learn to work in the Unix environment, to write shells scripts, and to make use of powerful Unix commands (e.g grep, awk, and sed). They will learn to program using the Python programming language, graphing software, and a package for numerical and statistical computing, such as Mathematica or MATLAB. At the end of the semester students will complete a project coupling all components of the semester together. Brief lectures followed by extensive hands-on computer laboratories with examples from many disciplines. No prerequisites. Course offered every semester.
Instructor(s): A. Damjanovic; M. Procopio
Area: Natural Sciences.
AS.250.253. Protein Engineering and Biochemistry Lab. 3.0 Credits.
Entry-level project laboratory. Protein engineering and biotechnology techniques used to modify proteins to give them new structural or physical properties. Students introduced to standard biochemistry laboratory practice and protein science; perform experiments in site-directed mutagenesis, protein purification and structural and physical characterization of biological macromolecules. No prerequisites.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Fitch; J. Sorenson
Area: Natural Sciences.

AS.250.265. Introduction to Bioinformatics. 3.0 Credits.
Lectures and computer labs introduce bioinformatics concepts, algorithms and databases. Computer based exercises cover sequence comparisons, database searching, gene expression analysis, and phylogenetic relationships. Emphasis on algorithms and a critical interpretation of information obtained. Instructor permission required. Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.300. Introduction to Biomedical Research and Careers II. 1.0 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Sophomores, juniors and seniors. Science Majors; Co-listed with AS.250.106 and AS.250.306.
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.301. Laboratory in Molecular Evolution: Using ancestral. 3.0 Credits.
The availability of genomic sequences from a vast number of species has enabled the reconstruction of ancestral proteins. In this course we will reconstruct the genes of ancestral proteins and study the physical properties of proteins coded for by “extinct” genes. To examine the evolutionary mechanisms whereby modern proteins obtained their remarkable physical and functional properties, we will focus on understanding how the physical properties of proteins evolved hand-in-hand with changing environmental conditions such as pH, temperature, pressure, ionic strength, oxidative stress, etc.
Instructor(s): A. Robinson.

AS.250.302. Modeling the Living Cell. 4.0 Credits.
Introduction to physical and mathematical models used to represent biophysical systems and phenomena. Students will learn algorithms for implementing models computationally and perform basic implementations. We will discuss the types of approximations made to develop useful models of complex biological systems, and the comparison of model predictions with experiment.
Instructor(s): M. Johnson
Area: Natural Sciences.

AS.250.306. Introduction to Biomedical Research and Careers III. 1.0 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. For those who have already taken AS.250.106 or AS.250.300. Co-listed with AS.250.106 & AS.250.300.
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.310. Exploring Protein Biophysics using Nuclear Magnetic Resonance (NMR) Spectroscopy. 3.0 Credits.
NMR is a spectroscopic technique which provides unique, atomic level insights into the inner workings of biomolecules in aqueous solution. A wide variety of biophysical properties can be studied by NMR. For example, we can use the technique to determine three dimensional structure of biological macromolecules such as proteins and nucleic acids, probe their dynamical properties in solution, study their interaction with other molecules and understand how physico-chemical properties (such electrostatics and redox chemistry) affects and modulates structure-function relationships. NMR exploits the exquisite sensitivity of magnetic properties of atomic nuclei to their local electronic (and therefore, chemical) environment. As a result, biophysical properties can be studied at atomic resolution. That is to say, we can deconstruct global properties of a molecule in terms of detailed, atomic level information.
In addition, interactions between nuclei can be exploited to enhance the information content of NMR spectra via multi-dimensional (2D and 3D) spectroscopy. Since these properties can be studied in solution, NMR methods serve as an effective complement to X-Ray crystallography, which also provides detailed, atomic level information in the solid state.
In this course, we will learn about the basics of NMR spectroscopy, acquire 1D and 2D NMR spectra and use various NMR experiments to characterize and probe biophysical properties of proteins at an atomic level. Juniors and Seniors Only.
Prerequisites: ((AS.030.101 AND AS.030.105) OR (AS.030.103 AND AS.030.204)) AND (AS.030.370 OR AS.250.372) AND (AS.020.305 OR AS.030.315 OR AS.250.315) AND AS.030.205
Instructor(s): A. Majumdar.

AS.250.313. Molecular and Cellular System Biology. 4.0 Credits.
This course covers the principles of biological networks, with an emphasis on computational analysis. Networks ranging from simple biochemical pathways to genome-scale metabolic, regulatory, and signaling networks will be studied. Topics include dynamic modeling of biochemical pathways, steady-state analysis of cellular metabolic networks, inference of gene regulatory networks using –omics data, and systems biology approaches to studying signal transduction. Recommended Course Background: Calculus (AS.110.106 and AS.110.107), Biochemistry (AS.250.315 or AS.020.305 or equivalent), Computational Biology (AS.250.353) or Introduction to Bioinformatics (AS.250.265) or prior exposure to programming.
Instructor(s): E. Roberts.

AS.250.314. Research in Protein Design and Evolution. 3.0 Credits.
Instructor(s): B. Garcia-Moreno; J. Lecomte
Writing Intensive.
AS.250.315. Biochemistry I. 4.0 Credits.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Lecture and computer laboratory. This class is the first semester of a two semester course in biochemistry. Topics in Biochemistry I include chemical and physical properties of biomolecules and energetic principles of catabolic pathways. Computer labs include extensive use of molecular graphics and modelling of reaction kinetics and pathway flux. Co-listed with AS.030.315
Prerequisites: If you have completed AS.250.307 you may not register for AS.250.315.
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.250.316. Biochemistry II. 3.0 Credits.
Biochemical anabolism, nucleic acid structure, molecular basis of transcription, translation and regulation, signal transduction with an emphasis on physical concepts and chemical mechanisms. Format will include lectures and class discussion of readings from the literature.
Prerequisites: (AS.250.315 OR AS.030.315 OR AS.020.305 ) AND (AS.030.206 OR AS.030.212 ) or permission of the instructor.
Instructor(s): S. Rokita; S. Woodson.

AS.250.320. Macromolecular Binding. 3.0 Credits.
All biological processes require the interactions of macromolecules with each other or with ligands that activate or inhibit their activities in a controlled manner. This course will discuss theoretical principles, logic, approaches and practical considerations used to study these binding processes from a quantitative perspective. Topics will include thermodynamics, single and multiple binding equilibria, linkage relationships, cooperativity, allostery, and macromolecular assembly. Some biophysical methods used in the study of binding reactions will be discussed. Computer simulation and analysis of binding curves will be used to analyze binding data, and binding schemes and examples from the scientific literature will be reviewed and discussed. Recommended Course Background: AS.250.372 Biophysical Chemistry
Prerequisites: AS.250.315 OR AS.020.305
Instructor(s): K. Fleming
Writing Intensive.

AS.250.335. Single Molecule & Cell Biophysics. 3.0 Credits.
This elective course offers an introduction to the field of single molecule and single cell biophysics to second and third year undergraduate students in biophysics. We will examine technologies such as single molecule fluorescence, force measurements and single cell fluorescence detections that enable high precision molecular visualizations in vitro and in cells. In addition, we will cover topics of genome engineering, cell mechanics and optogenetics toward the end of the semester. Each student is expected to read two articles assigned for each week and submit a written summary. All students will take turns presenting the assigned articles to class.
Instructor(s): S. Myong; T. Ha.

AS.250.345. Cellular and Molecular Physiology. 3.0 Credits.
How cells and molecules function as parts of whole organisms. Topics include speeds of diffusion, motor proteins, and animal motility; bacterial size, shape, and chemotaxis; sensory and neuronal mechanisms; osmosis; mucosal protective mechanisms; cellular and organismic circulation and respiration. Discussion section to be arranged 1 hour per week.
Instructor(s): R. Cone
Area: Natural Sciences.

AS.250.351. Reproductive Physiology. 2.0 Credits.
Focuses on reproductive physiology and biochemical and molecular regulation of the female and male reproductive tracts. Topics include the hypothalamus and pituitary, peptide and steroid hormone action, epididymis and male accessory sex organs, female reproductive tract, menstrual cycle, ovulation and gamete transport, fertilization and fertility enhancement, sexually transmitted diseases, and male and female contraceptive methods. Introductory lectures on each topic followed by research-oriented lectures and readings from current literature.
Instructor(s): B. Zirkin
Area: Natural Sciences.

AS.250.353. Computational Biology. 3.0 Credits.
This course introduces several computational approaches to the study of biological macromolecules. Students will learn to use computational tools to carry out and analyze molecular simulations and how to work in a UNIX networked environment. A major goal is to understand molecular systems as ensembles. No programming experience is required. A previous biochemistry course is strongly recommended.
Prerequisites: (AS.030.101 AND AS.030.102) or AS.030.103.
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.250.372. Biophysical Chemistry. 4.0 Credits.
Course covers classical and statistical thermodynamics, spanning from simple to complex systems. Major topics include the first and second law, gases, liquids, chemical mixtures and reactions, conformational transitions in peptides and proteins, ligand binding, and allostery. Methods for thermodynamic analysis will be discussed, including calorimetry and spectroscopy. Students will develop and apply different thermodynamic potentials, learn about different types of ensembles and partition functions. Students will learn to use Mathematica and will use it for data fitting and for statistical and mathematical analysis. Background: Calculus, Organic Chemistry, and Introductory Physics.
Instructor(s): D. Barrick
Area: Natural Sciences.

AS.250.381. Spectroscopy and Its Application in Biophysical Reactions. 3.0 Credits.
Continues Biophysical Chemistry (AS.250.372). Fundamentals of quantum mechanics underlying various spectroscopies (absorbance, circular dichroism, fluorescence, NMR); application to characterization of enzymes and nucleic acids.
Instructor(s): J. Lecomte
Area: Natural Sciences.
AS.250.383. Molecular Biophysics Laboratory. 3.0 Credits.
An advanced inquiry based laboratory course covering experimental
biophysical techniques to introduce fundamental physical
principles governing the structure/function relationship of biological
macromolecules. Students will investigate a "model protein",
staphylococcal nuclease, the "hydrogen atom" of biophysics. Using
a vast library of variants, the effect of small changes in protein
sequence will be explored. A variety of techniques will be used to
probe the equilibrium thermodynamics and kinetics of this system;
chromatography, spectroscopy (UV-Vis, fluorescence, circular dichroism,
nuclear magnetic resonance), calorimetry, analytical centrifugation, X-
ray crystallography and computational methods as needed for analysis.
These methods coupled with perturbations to the molecular environment
(ligands, co-solvents, and temperature) will help to elucidate protein
function.
Prerequisites: Students must have completed Lab Safety training prior to
registering for this class.;AS.250.372
Instructor(s): C. Fitch
Writing Intensive.

AS.250.401. Advanced Seminar in Structural and Physical Virology. 3.0
Credits.
Illustrated fundamental contributions from biophysics and quantitative
and physico-chemical approaches to study of complex biological
systems. Focus on the physical and structural basis of viral infectivity,
emphasizing replication cycles and evolution and structural biology of
human pathogens such as HIV and influenza. AS.250.372 - Introduction
to Biophysical Chemistry useful. Recommended Course Background:
AS.030.205 and (AS.020.305 or AS.250.307)
Instructor(s): B. Garcia-Moreno
Area: Natural Sciences
Writing Intensive.

Systems. 3.0 Credits.
The trait shared by all living systems is the capacity to perform
energy transduction. This biophysics/biochemistry course examines
the physico-chemical and structural basis of biological energy
transduction. Emphasis is on understanding the molecular and cellular
logic of the flow of energy in living systems. The course explores the
connection between fundamental physical requirements for energy
transduction and the organization, evolution and possibly even the
origins of biological molecules, cells, and organisms. Implications for
planet earth's energy balance and for the design of synthetic organisms
and of artificial energy transducing machines will be discussed, time
permitting. Recommended Course Background: One semester of
Biochemistry. Recommended Course Background: One semester of
Biochemistry
Instructor(s): B. Garcia-Moreno
Writing Intensive.

AS.250.411. Advanced Seminar in Structural Biology of Chromatin. 3.0
Credits.
Focus is on structural and physical aspects of DNA processes in cells,
such as nucleosomal packaging, DNA helicases, RNA polymerase,
and RNA inhibition machinery. Topics are meant to illustrate how the
structural and chemical aspects of how proteins and nucleic acids are
studied to understand current biological questions. Recommended
Course Background: Biochemistry I (AS.250.315) and Biochemistry II
(AS.250.316) or Biochemistry (AS.020.305) and Intro to Biophys Chem
(AS.250.372)
Instructor(s): G. Bowman
Area: Natural Sciences
Writing Intensive.

AS.250.421. Advanced Seminar in Membrane Protein Structure, Function
& Pharmacology. 3.0 Credits.
Topics are meant to illustrate the physical basis of membranes
and membrane proteins towards understanding their functions and
pharmacological importance including aspects of drug design as it
relates to membranes. Contemporary issues in the field will be covered
using primary literature articles, structural manipulations in pymol, and
computational binding simulations. Recommended Course Background:
AS.030.205, AS.250.307, and AS.250.372
Instructor(s): K. Fleming
Writing Intensive.

AS.250.514. Research in Protein Design and Evolution. 3.0 Credits.
Instructor(s): B. Garcia-Moreno; J. Lecomte
Writing Intensive.

AS.250.519. Independent Study. 3.0 Credits.
Instructor(s): K. Fleming; S. Myong
Writing Intensive.

AS.250.520. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): B. Garcia-Moreno; D. Barrick; R. Cone
Writing Intensive.

AS.250.521. Research Problems. 3.0 Credits.
Instructor(s): Staff.

AS.250.522. Research Problems. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.250.531. Laboratory - Biophysics. 3.0 Credits.
Introduction to Independent research in Biophysics emphasizing basic
laboratory techniques. Individual study arranged with faculty mentor.
Permission from Faculty Sponsor.
Instructor(s): Staff.

AS.250.574. Research Problems. 2.0 Credits.
Instructor(s): K. Fleming; S. Woodson.

AS.250.595. Internship. 1.0 Credit.
Instructor(s): K. Fleming; R. Huang.

AS.250.596. Laboratory - Biophysics. 3.0 Credits.
Instructor(s): D. Barrick; R. Cone; S. Myong; S. Woodson.

AS.250.597. Research. 3.0 Credits.
Instructor(s): Staff.

AS.250.599. Independent Study. 3.0 Credits.
Instructor(s): D. Barrick.

Graduate students only. Students and invited speakers present current
topics in the field.
Instructor(s): J. Lecomte.
Student and invited speakers present current biophysics topics. Permission required. Graduate student only.
Instructor(s): J. Lecomte.

AS.250.622. Statistics and Data Analysis.
Basics of statistics and data analysis
Instructor(s): D. Barrick.

AS.250.623. Molecular Dynamics.
Basics of molecular dynamics
Instructor(s): A. Damjanovic.

AS.250.624. NMR Spectroscopy.
Basics of NMR spectroscopy
Instructor(s): A. Majumdar.

Basic Principles of Single Molecule Measurements
Instructor(s): T. Ha.

Graduate level seminar on physiology, immunology, and epidemiology of mucosal protection. Permission required.
Instructor(s): R. Cone.

AS.250.649. Introduction to Computing in Biology.
Four week, intensive introductory course on the use of computers for applications in biology. The course will cover fundamentals of UNIX, PYTHON and Mathematica. Brief daily lectures followed by extensive hands-on experience in the computer laboratory. Examples from the world of biology are used to teach a large variety of concepts and computational techniques useful to examine a broad range of topics in biology.
Instructor(s): G. Bowman.

Departmental Majors Only.
Instructor(s): B. Garcia-Moreno.

AS.250.689. Physical Chemistry of Biological Macromolecules.
Introduction to the principles of thermodynamics and kinetics as applied to the study of the relationship between structure, energy dynamics, and biological function of proteins and nucleic acids. Topics include of classical, chemical, and statistical thermodynamics, kinetics, theory of ligand binding, and conformational equilibria.
Instructor(s): B. Garcia-Moreno.

AS.250.690. Methods in Molecular Biophysics.
Introduction to methods employed in study of energetics, structure and function of biological macromolecules. Topics include optical spectroscopy, transport methods, NMR, X-ray crystallography. Theoretical understanding and knowledge through problem solving and literature discussion emphasized.
Prerequisites: AS.250.685 AND AS.250.689
Instructor(s): J. Lecomte.

AS.250.801. Dissertation Research.
Instructor(s): Staff.

Instructor(s): B. Garcia-Moreno.

Cross Listed Courses

Biology
AS.020.674. Graduate Biophysical Chemistry.
This course will provide an overview of protein and nucleic acid structure, fundamentals of thermodynamics and kinetics, ligand binding, folding and stability of macromolecules, and the principles of biophysical methods such as fluorescence spectroscopy, NMR, and X-ray crystallography. Biology PhD students only. Monday Discussion Session is optional. Recommended Course Background: AS.020.305, AS.020.306
Instructor(s): E. Freire; E. Roberts.

Biomedical Engineering
EN.580.446. Physical Epigenetics. 3.0 Credits.
Epigenetics describes information heritable during cell division other than DNA sequence per se. Recent advances show the critical role of epigenetics in controlling gene expression, embryonic development, and common human diseases such as cancer. This course will introduce fundamental epigenetic principles with a focus on mechanisms, modeling, and physical principles, relationship to genetics, and application to understanding human disease mechanisms. Recommended Course Background: EN.580.221 Molecules and Cells or equivalent (molecular and cell biology), college level calculus and calculus-based general physics.
Instructor(s): A. Feinberg; T. Ha
Area: Engineering, Natural Sciences.

Chemistry
https://chemistry.jhu.edu/

The Department of Chemistry, in conjunction with other departments of the university, offers a broad education and the opportunity to do research in chemistry and related fields. The great diversity of the field of chemistry, ranging between physics and biology, is reflected in the research interests of the faculty. Undergraduate chemistry majors usually go on to graduate study in chemistry, chemical engineering, biology, oceanography, geochemistry, biophysics, environmental sciences, or medicine, while others enter the chemical industry. The Ph.D. in chemistry leads to professional careers in colleges and universities, research institutes, industry, and government laboratories.

Facilities

The department is well-equipped with instrumentation, both shared and in individual faculty research laboratories, to perform modern chemical research. The Departmental Instrumentation Facility houses the following pieces of major instrumentation:

- Bruker Avance 400 MHz FT-NMR spectrometers (2), one located in the Instrumentation Facility in Remsen Hall and the other on the first floor of the new chemistry building.
- Bruker Avance 300 MHz FT-NMR spectrometer.
- Bruker Avance III 400 MHz FT-NMR spectrometer and Fourier 300 FT-NMR spectrometer with an automatic sample changer are located in the undergraduate teaching laboratory.
- VG70S magnetic sector mass spectrometer, with EI, and CI ionization.
- VG70SE magnetic sector mass spectrometer, with FAB ionization.
- Finnigan LCQ ion trap mass spectrometer with electrospray ionization (APCI available as an option).
• Finnigan LC Duo ion trap mass spectrometer with electrospray ionization (for inorganic and organometallic use).
• Finnigan LCQ Fleet ion trap Mass Spectrometer with ESI ionization and HPLC inlet.
• Bruker Autoflex III Maldi-ToF-ToF Mass spectrometer with Maldi ionization and collision cell.
• Shimadzu QP2010SE GC-MS with EI ionization.
• Waters Acquity / Xevo G2 UPLC-Q-ToF MS with ESI and APCI ionisation.
• Bruker EMX EPR spectrometer equipped with a liquid helium cryostat and variable temperature controller.
• Thermo Nicolet Nexus 670 FT-IR spectrophotometer with a Nicolet Golden Gate ATR accessory.
• Jasco P-1010 polarimeter.
• Xcalibur3 X-ray diffractometer with CCD area detector (located on the second floor of the new chemistry building).
• Protein Technologies Symphony Quartet Peptide Synthesizer.
• SuperNova X-ray diffractometer (dual hi-flux micro-focus Mo and Cu sources ) with Atlas CCD area detector (located on the second floor of the new chemistry building).

NMR spectrometers suitable for studies of biological macromolecules are located in the Biomolecular NMR Center, located in an underground facility in front of the new chemistry building. The instruments include 500, 600, and 800 MHz FT-NMR spectrometers.

A variety of different mass spectral techniques are available in the expanding Mass Spectrometry Facility. High-resolution mass spectra of submitted samples are obtained on a service basis by a staff member using two magnetic sector instruments equipped with EI, CI, and FAB ionization methods. MALDI-TOF, GC/MS, and electrospray instruments are also available and operated by students and researchers following training by the facility staff.

The X-ray Diffractometer Facility is operated by a staff member. The instruments are suitable for detailed molecular-level structural characterization of new organic or inorganic compounds.

The department has an established in-house peptide synthesis facility. This facility is equipped with a four-channel peptide synthesizer from Protein Technologies, an Agilent HPLC equipped with both a diode array and a fluorescence detector, and a lyophilizer.

The department shares with the Physics and Astronomy Department the use of the Physical Sciences Machine Shop, located in the Bloomberg Center. Electronics construction and repair is handled by a staff member in the Departmental Instrumentation Facility.

**Undergraduate Program**

Programs for undergraduate majors can be tailored to individual interests so that a major in chemistry is excellent preparation not only for further work in chemistry, but also for any field that rests on a chemical foundation. It is a good choice for a premedical student interested in medical research.

**Requirements for the B.A. Degree**

(Also see Requirements for a Bachelor's Degree. [http://catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree])**

Majors must complete all courses required for the major for a letter grade and receive a grade of C- or higher. Requirements of the chemistry major are:

**Honors in Chemistry**

To recognize exceptional performance, both in formal course work and in research, chemistry majors can receive a degree with honors. Honors in Chemistry may be achieved by one of two paths: 1: A student with a GPA of 3.75 or higher in (N) and (Q) courses or 2: A student with a 3.5 GPA in (N) and (Q) courses and with at least 2 semesters of research with a Chemistry faculty member or an approved advisor. These students must write a summary of their research and fill out the Honors Clearance form and the GPA checksheet (see: http://www.advising.jhu.edu/honors.php ). Turn in these forms to the Director of Undergraduate Studies.

**Graduate Programs**

Each student's background and interests determine the course of study. The normal program leads to the Ph.D. degree. A student is not usually accepted for a terminal M.A. degree.

**Requirements for the M.A. and Ph.D. Degrees**

Normally, the minimum course requirement for both the M.A. and the Ph.D. degrees is six one-semester graduate courses in chemistry and related sciences. Exceptionally well-prepared students may ask for a reduction of these requirements.

Requirements for the Ph.D. degree include a research dissertation worthy of publication, and a knowledge of chemistry and related material as demonstrated in an oral examination. Each student must teach for at least one year.

Requirements for the M.A. degree, in addition to completion of formal course work and research, include a satisfactory performance on an oral examination.

**Financial Aid and Admissions**

Fellowships, research appointments, and teaching assistantships are available for graduate students. There are no fixed admission requirements. Undergraduate majors in chemistry, biology, earth sciences, mathematics, or physics may apply, as well as well-qualified individuals who will have received a B.A. degree.
For further information about graduate study in chemistry visit the Chemistry Department website at www.chemistry.jhu.edu.

For current faculty and contact information go to https://chemistry.jhu.edu/people/

**Faculty**

**Chair**

David R. Yarkony
D. Mead Johnson Professor: theoretical chemistry—electronic structure theory, multi-configuration self-consistent-field methods, excited state chemistry, electronic energy transfer in chemical reactions, spin-forbidden processes, and electronically nonadiabatic processes.

**Professors**

E. Emmet Reid Professor: experimental chemical physics—photoelectron spectroscopy of negative ions, structure and dynamics of gas phase, weakly bound molecular clusters.

Paul J. Dagdigan
Arthur D. Chambers Professor: experimental chemical physics—dynamics of gas-phase chemical reactions, collisional energy transfer, molecular electronic spectroscopy, laser-induced fluorescence and ionization.

D. Howard Fairbrother
Physical chemistry—the structure of chemically protective surfaces, chemistry of adhesives, environmental surface chemistry.

David Goldberg
Inorganic and bioinorganic chemistry—structure/function relationships in heme proteins, artificial enzyme design, biomimetic molybdenum and tungsten coordination compounds, redox active ligands, synthesis of tetrapyrrolic macrocycles (phthalo-cyanine and porphyrin-based systems) for small-molecule activation and materials applications.

Marc M. Greenberg
Organic and bioorganic chemistry—application of chemical, biochemical, and biological techniques to studies on DNA damage and repair, independent generation and study of reactive intermediates, development and application of methods for modified oligonucleotide synthesis, design of mechanistically inspired enzyme inhibitors radiosensitizing agents, and sensors.

Rigoberto Hernandez
Theoretical and computational chemistry—statistical mechanics of chemical systems; molecular dynamics in complex environments; nonequilibrium dynamics of polymers, proteins, surfaces, colloids; transition state theory of driven chemical reactions; adaptive steered molecular dynamics of proteins; sustainable nanotechnology.

Kenneth D. Karlin
Ira Remsen Professor: inorganic and bioinorganic chemistry—synthetically derived structural, spectroscopic and functional models for copper and iron proteins, copper-dioxygen reversible binding and metal-mediated substrate oxidation, O2-reduction with copper cluster compounds, porphyrin-iron and copper chemistry relevant to heme-copper oxidases, metal-catalyzed ester and amide hydrolysis, metal complex protein and DNA interactions.

Thomas Lectka
Organic chemistry—the design and synthesis of theoretically interesting nonnatural products with applications in bioorganic and physical organic chemistry, materials science and supramolecular chemistry, novel approaches to asymmetric catalysis, theoretical organic chemistry.

Steven Rokita
Organic and bioorganic chemistry, sequence and conformation specific reactions of nucleic acids; enzyme-mediated activation of substrates and coenzymes; aromatic substitution and quinone methide generation in bioorganic chemistry, biological dehalogenation.

Harris J. Silverstone
Theoretical chemistry—development of mathematical techniques for applying quantum mechanics to chemical problems, high-order perturbation theory, semiclassical methods, divergent expansions, photoionization, LoSurdo-Stark effect, magnetic resonance spectral simulation, hyperasymptotics.

John P. Toscano
Organic chemistry—organic chemistry, fundamental chemistry and biochemistry of nitroxyl (HNO) including the design of new precursors to HNO, new analytical tools for its detection, and the characterization of HNO-induced protein modifications-time-resolved IR spectroscopy of organic reactive intermediates.

John D. Tovar
Organic chemistry —organic electronics, conjugated and conducting polymers, electrochemistry, nanostructured materials, polymer chemistry bioinspired self—assembly, and supramolecular chemistry.

Craig A. Townsend
Alsoph H. Corwin Professor: organic and bioorganic chemistry—biosynthesis and chemistry of natural products, stereo-chemical and mechanistic studies of enzyme action, small molecule/DNA interactions, application of spectroscopic techniques to the solution of biological problems.

**Associate Professors**

Arthur Bragg
Experimental physical chemistry—chemical dynamics and charge/energy transfer in condensed-phase systems, ultrafast spectroscopy.

Tyrel McQueen
Solid state inorganic chemistry—electronically and magnetically active materials—condensed matter physics.

Joel R. Tolman
Biophysical chemistry—protein-protein interactions, protein dynamics and structure, NMR methodology.

**Assistant Professors**

Lan Cheng
Theoretical chemistry—electronic structure theory for treating relativistic and electron-correlation effects, relativistic theory for magnetic properties, computational chemistry and spectroscopy for heavy-element compounds.

Thomas Kempa
Materials chemistry—solid-state materials chemistry and experimental physical chemistry.

Rebekka S. Klausen
Organic and materials chemistry—the design and synthesis of well-defined organosilicon and organic materials, electronic characterization of novel materials.

V. Sara Thoi
Inorganic chemistry—coordination chemistry, materials synthesis, electron and ion transport, photochemistry, and electrocatalysis.

Research and Teaching Professors
Jaime Combariza
Research Professor.
Christopher Falzone
Teaching Professor.
Jane Greco
Associate Teaching Professor.
Louise Pasternack
Teaching Professor.
Mark Pederson
Research Professor.

Adjunct, Emeritus, and Joint Appointments
David E. Draper
Professor Emeritus.
David Gracias
Assistant Professor (Chemical and Biomolecular Engineering).
Howard E. Katz
Professor (Materials Science and Engineering).
Brown L. Murr
Professor Emeritus.
Alex Nickon
Vernon Krieble Professor Emeritus.
Douglas Poland
Professor Emeritus.
Gary Posner
Professor Emeritus.
Lawrence M. Principe
Professor (joint appointment in History of Science and Technology).
Dean W. Robinson
Professor Emeritus.

Lecturers
Larissa D’Souza
Senior Lecturer.
Eric Hill
Lecturer.
David Klein
Senior Lecturer (Summer Programs).
Sunita Thyagarajan
Lecturer.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses

AS.030.101. Introductory Chemistry I. 3.0 Credits.
The fundamental principles of chemistry, including atomic and molecular structure, bonding, elementary thermodynamics, equilibrium, acids and bases, electrochemistry, kinetics, and transition metal chemistry are introduced in this course. To be taken with Introductory Chemistry Laboratory unless lab has been previously completed. Note: Students taking this course and the laboratory 030.105-106 may not take any other course in the summer sessions and should devote full time to these subjects. High school physics and calculus are strongly recommended as prerequisites. First and second terms must be taken in sequence. Pre-College enrollment requires instructor permission.
Instructor(s): D. Goldberg; S. Thyagarajan
Area: Natural Sciences.

AS.030.102. Introductory Chemistry II. 3.0 Credits.
The fundamental principles of chemistry, including atomic and molecular structure, bonding, elementary thermodynamics, equilibrium, acids and bases, electrochemistry, kinetics, and transition metal chemistry are introduced in this course. To be taken with Introductory Chemistry Laboratory unless lab has been previously completed. Note: Students taking this course and the laboratory 030.105-106 may not take any other course in the summer sessions and should devote full time to these subjects. High school physics and calculus are strongly recommended as prerequisites. First and second terms must be taken in sequence.
Prerequisites: Pre-req: AS.030.101 or equivalent
Instructor(s): J. Greco
Area: Natural Sciences.

AS.030.103. Applied Chemical Equilibrium and Reactivity w/lab. 4.0 Credits.
This course is designed for freshmen who have scored a 4 or 5 on the AP Chemistry Exam or who have scored a 6 or 7 HL IB Chemistry Exam. This course will review an advanced introductory chemistry sequence in a single semester. Chemical equilibrium, reactivity and bonding will be covered. These topics will be explored through laboratory experiments and problem solving, and discussing these principles in the context of current research. For details on chemistry placement and exam credit policies, please see http://www.advising.jhu.edu/placement_chemistry.php Students enrolled in AS.030.103 may not enroll in AS.030.105
Prerequisites: Students may not take AS.030.103 if they have completed EN.510.101 OR AS.030.105
Instructor(s): T. Mcqueen
Area: Natural Sciences.

AS.030.105. Introductory Chemistry Laboratory I. 1.0 Credit.
Laboratory work includes some quantitative analysis and the measurement of physical properties. Open only to those who are registered for or have successfully completed Introductory Chemistry 030.101.
Prerequisites: Students enrolled in AS.030.105 may not enroll in AS.030.115, AS.030.103, or AS.030.107.; Students must have completed or be enrolled in AS.030.101 OR EN.510.101 to register for AS.030.105.
Instructor(s): L. Pasternack; S. Thyagarajan
Area: Natural Sciences.
**AS.030.106. Introductory Chemistry Laboratory II. 1.0 Credit.**
Laboratory work includes some quantitative analysis and the measurement of physical properties. Open only to those who are registered for or have completed Introductory Chemistry II (AS.030.102). Permission required for pre-college students.

**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class.;AS.030.107 OR ( AS.030.105 AND ( AS.030.101 OR EN.510.101 ) )

_Instructor(s): L. Pasternack_
_Area: Natural Sciences._

**AS.030.107. Chemical Principles w/lab: An Integrated Studio Course. 4.0 Credits.**
An introduction to the fundamental principles of chemistry. The main topics to be covered are fundamental chemical reactions, stoichiometry and the balancing of chemical equations, solutions, gas laws, chemical equilibrium, acids and bases, and elementary chemical thermodynamics. Laboratory experiments and laboratory techniques will be incorporated into the course. Course will be run in three 2 hour blocks per week some of which will be used for lab. This course is equivalent to AS.030.101 and AS.030.105.

**Prerequisites:** This course is equivalent to AS.030.101 and AS.030.105.;Students enrolled in AS.030.107 may not enroll in AS.030.101, AS.030.105, AS.030.115, or AS.030.103.

_Instructor(s): J. Greco_
_Area: Natural Sciences._

**AS.030.110. Mini-term: Introduction to Bioorganic Chemistry. 1.0 Credit.**
Meets M-F June 22nd - July 2nd. This interdisciplinary course is an introductory-level class to relate biological phenomena with basic principles of chemistry. Organic chemistry or biochemistry in college is one of the most stressful classes to some students and sometimes they are pushed by assignments and tests during the entire semester without having a chance to enjoy fun side of chemistry. This course will introduce some basic concepts of chemistry and organic chemistry and applications of those concepts into biological systems, in more enjoyable way with a smaller group of students than regular courses. The course aims biology-majors to get a molecular view and chemistry-majors to have fun to find how their chemical knowledge can be used to explain biological process. Also other students will learn about both and have an idea what interdisciplinary science is.

_Instructor(s): H. Chung_
_Area: Engineering, Natural Sciences._

**AS.030.112. Chemistry with Problem Solving I.**
This course is for students who have had moderate or limited exposure to the subject. Special emphasis is placed on scientific problem-solving skills. There are two discussion sections per week, including one devoted exclusively to interactive quantitative problem solving. A typical student may have taken a year of descriptive chemistry as a high school sophomore, but has not been exposed to the problem-solving mathematical approach used in university-level science courses. Taken concurrently with AS.030.101 and AS.030.102.

**Prerequisites:** AS.030.101 OR AS.030.102

_Instructor(s): E. Hill._

**AS.030.113. Chemistry with Problem Solving II.**
This course is for students who have had moderate or limited exposure to the subject. Special emphasis is placed on scientific problem-solving skills. There are two discussion sections per week, including one devoted exclusively to interactive quantitative problem solving. A typical student may have taken a year of descriptive chemistry as a high school sophomore, but has not been exposed to the problem-solving mathematical approach used in university-level science courses. Taken concurrently with AS.030.101 and AS.030.102.

_Instructor(s): E. Hill; S. Thyagarajan._

**AS.030.114. Freshman Seminar: The Making of a Chemist. 3.0 Credits.**
Students will be introduced to professional culture and practice in academic and industrial chemical research laboratories. Through reading and analysis of a few series of seminal papers from the 1800’s to the present leading to Nobel Prizes in Chemistry or Physics, students will learn how scientific inquiry and writing has evolved over time. Through discussion and practice, students will learn how to communicate chemistry in social media, scientific publications, scientific talks, and public lectures.

_Instructor(s): R. Hernandez_
_Area: Natural Sciences_
_Writing Intensive._

**AS.030.116. Freshman Seminar: Ontological Chemistry. 3.0 Credits.**
The focus of ontological chemistry is the process through which chemists are trained from their start in college through their careers in academia, industry or the government. Students will be introduced to professional culture and practice in all of these settings. Through reading and analysis of a few series of seminal papers from the 1800’s to the present leading to Nobel Prizes in Chemistry or Physics, students will learn how scientific inquiry and writing has evolved over time. Through discussion and practice, students will learn how to communicate chemistry in multiple platforms.

**Corequisites:** AS.030.101

_Instructor(s): R. Hernandez_
_Writing Intensive._

**AS.030.117. Chemistry in Art and Archaeology. 3.0 Credits.**
From tracing trading routes to dating artifacts, explore the central science, chemistry, as it relates to the study of antiquities. Gain a general overview of non-destructive and destructive techniques for studying artifacts. Gain practical knowledge on how to implement quantitative and qualitative instrumentation in a laboratory and museum setting including. Visit a working museum laboratory to discuss the unique joys and challenges of archaeometry. Study recent advances with primary source analytical chemistry material and assess practical future implementation of new techniques. Learn to tune communication style based upon an audience within and without your main discipline.

_Instructor(s): M. Gallagher._
AS.030.173. Powering Tomorrow: The Chemistry Behind Alternative Energy. 3.0 Credits.
One of the most important scientific challenges society faces today is supply of green and sustainable energy. This course will highlight the contributions of chemists in current and emerging technologies of alternative energy. A general overview of solar energy, biomass conversion, nuclear power and other approaches will be presented. The underlying chemical principles of these areas, such as water oxidation, carbon dioxide reduction and generation of liquid fuels will be examined. The current sources of energy used in today’s world and their impact on the environment will also be discussed. In class sessions, students will be expected to be actively involved in the discussion of lectures and assigned readings.
Prerequisites: Corequisite: AS.030.101 or AP 4 or 5.
Instructor(s): C. Rolle
Area: Natural Sciences.

AS.030.202. How Enzymes Work. 3.0 Credits.
This course will introduce core concepts in protein-catalyzed chemistry and is intended to provide a molecular level context for students interested in learning about biochemistry and bioengineering. Topics include protein structure, origins of enzyme catalysis, and types of enzyme reactions. These concepts will be expanded upon through a survey on the basic mechanisms of a selection of enzymes important to health, energy, and the environment. The emphasis will be on how enzymes perform chemical transformation, and their roles in medicinal and industrial applications.
Instructor(s): H. Kuo
Area: Natural Sciences.

AS.030.204. Chemical Structure and Bonding w/Lab. 4.0 Credits.
An introduction to the synthesis, structure, and reactivity of inorganic compounds. Modern approaches to chemical bonding, including molecular orbital, ligand field, and crystal field theories, will be applied to understanding the physical and chemical properties of inorganic materials. Other topics to be discussed include magnetic properties, electronic spectra, magnetic resonance spectra, and reaction kinetics. The integrated laboratory will cover basic synthetic, measurement, and calculation methods of inorganic chemistry.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): T. Mcqueen; V. Thoi
Area: Natural Sciences
Writing Intensive.

AS.030.205. Introductory Organic Chemistry I. 4.0 Credits.
The fundamental chemistry of the compounds of carbon. Methods of structure determination and synthesis. The mechanisms of typical organic reactions and the relations between physical and chemical properties and structures.
Prerequisites: AS.030.102 OR AS.030.103 OR EN.510.101 OR AS.030.204
Instructor(s): C. Falzone; C. Townsend; J. Tovar
Area: Natural Sciences.

AS.030.206. Organic Chemistry II. 4.0 Credits.
Continuation of AS.030.205 Organic Chemistry II with biochemistry topics. This course is a continuation of Organic Chemistry I starting with carbonyl chemistry and organometallic reactions. Synthetic strategies and retro-synthetic analysis are emphasized. The second half of the course focuses on biochemical topics including biological pericyclic reactions, carbohydrates, amino acids, proteins, nucleic acids, RNA, DNA, catalysis, and lipids. The organic chemistry of key metabolic steps will also be covered. Students may not simultaneously enroll for AS.030.212 and AS.030.206.
Prerequisites: Pre-req: AS.030.205
Corequisites: Students may not simultaneously enroll for AS.030.212 and AS.030.206.
Instructor(s): E. Hill
Area: Natural Sciences.

AS.030.207. Problem Solving Methodology in Organic Chemistry I. 2.0 Credits.
This course will focus on the skills and strategies often utilized for solving problems in organic chemistry. In a seminar-style format, we will focus on a variety of strategies and techniques that students are otherwise expected to discover independently. This optional course is designed to help students succeed in Organic Chemistry I. The course is graded on a pass/fail basis, and is designed to be fun (believe it or not). Students work together in groups to solve challenging problems, focusing on the strategies necessary to solve each problem. This course is not required in order to succeed in Organic Chemistry I, but students in the past have found it to be helpful in guiding their study efforts for Organic Chemistry I.
Corequisites: Co-req: AS.030.205
Instructor(s): C. Falzone
Area: Natural Sciences.

AS.030.208. Problem Solving Methodology in Organic Chemistry II. 2.0 Credits.
This course will focus on the skills and strategies often utilized for solving problems in organic chemistry. In a seminar-style format, we will focus on a variety of strategies and techniques that students are otherwise expected to discover independently. This optional course is designed to help students succeed in Organic Chemistry II. The course is graded on a pass/fail basis, and is designed to be fun (believe it or not). Students work together in groups to solve challenging problems, focusing on the strategies necessary to solve each problem. This course is not required in order to succeed in Organic Chemistry II, but students in the past have found it to be helpful in guiding their study efforts for Organic Chemistry II.
Corequisites: Co-req: AS.030.206
Instructor(s): E. Hill
Area: Natural Sciences.
**AS.030.212. Honors Organic Chemistry II with Applications in Biological and Materials Chemistry. 4.0 Credits.**
Second semester undergraduate organic chemistry from an advanced prospective with connections to modern biological and materials chemistry. The standard topics of second semester organic chemistry (e.g. reactivity of aromatic and carbonyl containing molecules) will be covered with an emphasis on reaction mechanism to facilitate learning about reactivity and enriched with modern examples. In addition, the important role that organic chemistry plays in modern biological (e.g. nucleic acids and proteins) and materials science (e.g. living polymerization and the use of organic chemistry to control macroscopic properties) will be covered. Students may not simultaneously enroll for AS.030.212 and AS.030.206. Prereq: Must receive a B or better in the first semester (AS.030.205).
**Prerequisites:** Must receive a B or better in the first semester (AS.030.205)
**Instructor(s): M. Greenberg**
**Area:** Natural Sciences.

**AS.030.213. Metalloproteins and Their Role in Human Disease. 3.0 Credits.**
Many metal ions are essential elements for human life and health. Non-redox metals serve as charge carriers and are important in osmotic balance as well as proper protein folding and structure. Redox active transition metals, such as iron and copper are important in electron transfer, oxygen transportation, respiration, and neurotransmitter homeostasis. This course is designed to introduce students to the important biological roles of metal-protein interactions and possible diseases that may occur from their malfunction
**Prerequisites:** Introductory Chemistry I-II - AS.030.101 AND AS.030.102
**Instructor(s): D. Quist**

**AS.030.225. Introductory Organic Chemistry Laboratory. 3.0 Credits.**
Laboratory work includes fundamental laboratory techniques and preparation of representative organic compounds. Open only to those who are registered for or have completed Introductory Organic Chemistry. Note: This one-semester course is offered each term. Introductory Organic Chemistry I/II requires one semester of the laboratory.
**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class. ( ( EN.510.101 OR ( AS.030.101 AND AS.030.102 ) OR AS.030.107 ) AND ( AS.030.105 AND AS.030.106 ) ) OR AS.030.103 permission of instructor for freshmen AS.030.205
**Corequisites:** Students may not simultaneously enroll for AS.030.225 and AS.030.227
**Instructor(s): J. Greco; L. D'Souza**
**Area:** Natural Sciences.

**AS.030.227. Chemical Chirality: An Introduction in Organic Chem. Lab. Techniques. 3.0 Credits.**
Techniques for the organic chemistry laboratory including methods of purification, isolation, synthesis, and analysis will be explored through a project focused on chemical chirality. Freshmen only. Students may not simultaneously enroll for AS.030.225 and AS.030.227
**Prerequisites:** AS.030.206 OR AS.030.212;AS.030.205
**Corequisites:** Students may not simultaneously enroll for AS.030.225 and AS.030.227
**Instructor(s): E. Hill**
**Area:** Natural Sciences.

**AS.030.228. Intermediate Organic Chemistry Laboratory. 3.0 Credits.**
Lab skills already acquired in AS.030.225 will be further developed for synthesis, isolation, purification, and identification of organic compounds. Spectroscopic techniques, applications will be emphasized. Recommended Course Background: AS.030.225
**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class.
**Instructor(s): R. Klausen**
**Area:** Natural Sciences.

**AS.030.270. Metals & Their Impact on Industry, Drug Development & Society. 3.0 Credits.**
This is a seminar-based course that is broken up into three modules. The beginning of the course will focus on a basic introduction to the periodic table, in particular the transition metals. After a basic knowledge is formed the first theme will focus on the use of metals in the medical field, for example as MRI imaging agents or heavy metal poisoning. The second portion of the course will move away from the body and focus on how metals have impacted society. For example, we will look at the influence of metals in cars, the production of plastics and household chemicals. The final section will focus on how metals have influenced world power such as the invention of the atomic bomb. This course is designed to provide an overall understand of how chemistry and metals influence our lives every day.
**Instructor(s): E. Joslin**
**Area:** Natural Sciences.

**AS.030.301. Physical Chemistry I. 3.0 Credits.**
The laws of thermodynamics, their statistical foundation, and their application to chemical phenomena. Students should have knowledge of general physics, general chemistry, and calculus (two semesters recommended). Freshmen by permission only.
**Prerequisites:** AS.030.305
**Instructor(s): D. Draper**
**Area:** Natural Sciences.

**AS.030.302. Physical Chemistry II. 3.0 Credits.**
Introduction to quantum mechanics, its application to simple problems for which classical mechanics fails. Topics: Harmonic oscillator, hydrogen atom, very approximate treatments of atoms and molecules, and theoretical basis for spectroscopy. Recommended Course Background: AS.030.301
**Instructor(s): L. Cheng**
**Area:** Natural Sciences.

**AS.030.303. Magic Bullets: How Drugs Really Work. 1.0 Credit.**
This course will be an overview of the basic science behind frequently administered drugs. Medicines such as antibiotics, antivirals, cancer drugs, painkillers, and cardiovascular drugs will be covered. The course will focus on how these molecules cause a desirable effect in the body. Those with minimal background in chemistry/biology are encouraged to enroll.
**Instructor(s): D. Marous**
**Area:** Natural Sciences.
AS.030.305. Physical Chemistry Instrumentation Laboratory I. 3.0 Credits.
This course is designed to illustrate the principles of physical chemistry and to introduce the student to techniques and instruments used in modern chemical research. Chemistry majors are expected to take this course sequence of courses, rather than AS.030.307. Chemistry majors only.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): A. Bragg
Area: Natural Sciences
Writing Intensive.

AS.030.306. Physical Chemistry Instrumentation Laboratory II. 3.0 Credits.
Designed to illustrate the principles of physical chemistry, introduce the student to spectroscopic techniques and instruments used in modern chemical research. Chemistry majors are expected to take this course rather than 030.307.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): J. Tolman
Area: Natural Sciences.

AS.030.307. Experiments in Physical Chemistry for Engineers. 3.0 Credits.
This is a one-semester course which selects experiments that are most relevant to chemical engineering. Chemical Engineering majors only. Recommended Course Background: AS.030.301-AS.030.302 or equivalent.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): D. Fairbrother
Area: Natural Sciences.

AS.030.315. Biochemistry I. 4.0 Credits.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Lecture and computer laboratory. This class is the first semester of a two semester course in biochemistry. Topics in Biochemistry I include chemical and physical properties of biomolecules and energetic principles of catabolic pathways. Computer labs include extensive use of molecular graphics and modelling of reaction kinetics and pathway flux. Co-listed with AS.250.315
Prerequisites: AS.030.206 OR AS.030.212
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.030.316. Biochemistry II. 3.0 Credits.
Biochemical anabolism, nucleic acid structure, molecular basis of transcription, translation and regulation, signal transduction with an emphasis on physical concepts and chemical mechanisms. Format will include lectures and class discussion of readings from the literature.
Prerequisites: AS.030.315 OR AS.250.315 OR AS.020.305
Instructor(s): S. Rokita; S. Woodson
Area: Natural Sciences.

Students gain a critical understanding of societal energy sources in scientific, economic, and political contexts. Past, present, and future energy sources are discussed in terms of their scope and limitations. Emphasis on the fundamental details of each energy technology and incisive evaluation of policy regarding energy consumption and its environmental consequences. Topics include global warming and climate change, fossil fuels, alternative energies, and energy security and productivity.
Instructor(s): E. Brigham
Area: Natural Sciences.

AS.030.345. Chemical Applications of Group Theory. 3.0 Credits.
The theory of the representations of finite and continuous groups will be applied to problems in chemistry.
Instructor(s): D. Yarkony
Area: Natural Sciences.

AS.030.356. Advanced Inorganic Lab. 3.0 Credits.
Laboratory designed to illustrate the principles and practice of inorganic chemistry through the synthesis and characterization of transition metal and organometallic compounds. Methods used include vacuum and inert atmosphere techniques. Instrumental approaches and modern spectroscopic techniques are applied to the characterization of compounds generated. It is strongly recommended that students have taken or are taking one of the following courses: AS.030.204, AS.030.442, AS.030.449, or AS.030.472.
Prerequisites: AS.030.228
Instructor(s): J. Greco
Area: Natural Sciences.

AS.030.370. Physical Chemistry I with Biophysical Applications. 4.0 Credits.
Course provides working understanding of physical chemistry of the cell, emphasizing problem solving. Topics include classical and statistical thermodynamics, thermodynamics of proteins and nucleic acids, protein folding, calorimetry, ligand binding thermodynamics, linkage, cooperativity and anticooperativity, allosteric models, lattice statistics, helix-coil transition, and polymer theory. When appropriate, students visit the laboratory to set up data collection and learn to analyze the resulting data computationally, using nonlinear least-squares methods.
Prerequisites: Prereqs: ( AS.171.101 OR AS.171.103 OR AS.171.107 ) AND ( AS.171.102 OR AS.171.104 OR AS.171.108 ) AND ( AS.030.103 OR AS.030.102 ) AND ( AS.110.106 OR AS.110.108 ) AND ( AS.110.107 OR AS.110.109 )
Instructor(s): D. Barrick
Area: Natural Sciences.

AS.030.371. Chemistry for Connoisseurs. 3.0 Credits.
This course will survey the structural and physical properties of chemicals often considered as part of the "finer things in life" including topical discussions of the chemistries of food, drink, art, cosmetics and clothing, among others. Despite the pretentious name, the general theme of the course is to put chemical identities onto the things we interact with on a daily basis but most likely take for granted at a molecular level. Current event topics in consumer chemistry will also be covered (melamine in milk, "shoe rubber" in bread, etc.). Students will have the chance to research and present topics of interest, and there will be field trips. Open to Freshmen and Sophomores ONLY.
Prerequisites: One semester of college-level organic chemistry (AS.030.205 or equivalent).
Instructor(s): J. Tovar
Area: Natural Sciences.
AS.030.400. A Survey of Medicinally and Environmentally Important Metallo-enzymes and their Mechanisms. 3.0 Credits.
Metallo-proteins are responsible for many physiological processes ranging from DNA biosynthesis, to detoxification, to respiration. The beginning of the course will review core concepts in protein chemistry including protein structures and dynamics, principles of catalysis and end enzyme kinetics, and tools to probe enzyme mechanisms. These concepts will be expanded upon in the second half of the course through focus on the molecular mechanisms of redox-active metallo-enzymes. A survey of the structure and function relationships within these enzymes will be offered with select examples of heme, iron, and copper-containing proteins that are important to drug development, energy production, and environmental sustainability.
**Prerequisites:** AS.030.206[ OR AS.030.212
Instructor(s): H. Kuo
Area: Natural Sciences.

AS.030.402. Experimental Methods in Physical Chemistry. 3.0 Credits.
This course introduces the student to experimental methodologies used in gas phase physical chemistry. Topics to be covered include vacuum technology, charged particle optics, lasers, mass spectrometry, data acquisition, detectors, measurement of temperature and pressure, and design and fabrication of scientific apparatus. These topics will be tied together with examples of specific experimental studies.
Instructor(s): K. Bowen
Area: Natural Sciences.

AS.030.403. Optoelectronic Materials and Devices: Synthesis, Spectroscopy, and Applications. 3.0 Credits.
This course provides an introduction to the vast chemistry and physics of solid-state materials. The course begins with a fundamental description of bonding in crystalline solids and calculation of electronic band structure. We then extend our discussion to methods for the synthesis of low-dimensional materials and hierarchical structures, including quantum dots (0D), nanowires (1D), graphene and graphene analogs (2D), and thin-film superlattices. An in-depth discussion of spectroscopic and characterization techniques for solid-state materials will follow and focus on some of the foundational studies of quantum devices and cooperative phenomena. At this stage we will describe recent advances in electron-microscopy (e.g. aberration-corrected and energy filtered TEM, atom-probe tomography) that are revolutionizing the structural, compositional, and electronic characterization of materials. The course will conclude with a survey of contemporary topics in solid-state and nanomaterials science, including functional devices and circuits, assembly, energy conversion and catalysis, and biological sensing. Recommended Course Background: AS.030.301 and AS.030.402 are preferred, but instructor approval may be granted in lieu of these courses.
Instructor(s): T. Kempa
Area: Natural Sciences.

AS.030.404. Electrochemical Systems for Energy Conversion and Storage. 3.0 Credits.
This course will be focused on the fundamentals and applications of electrochemical methods in catalysis, charge transport, and energy conversion and storage. Topics that will be covered are basic electrochemical techniques, homogenous and heterogeneous (photo)electrocatalysis, fuel cells, and charge storage devices. The class will conclude with a group report and presentation on a recent development in the field of energy catalysis, conversion, and storage. Course topics include: 1) Fundamentals of electrochemistry, 2) Potential sweep methods and current-controlled techniques, 3) Impedance analysis, 4) Electrochemistry coupled with other characterization methods, 5) Electrocatalysis and photoelectrochemical catalysis, 6) Basics in fuel cells and current technologies (alkaline, polymer exchange membrane, solid oxide...), 7) Basics in batteries and current technologies (Pb acid, Li-based, other metals...) Recommended Course Background: AS.030.204 or AS.030.449 or AS.030.472, or instructor approval for graduate students
Instructor(s): V. Thoi
Area: Natural Sciences.

AS.030.405. Introduction to Computational Chemistry. 3.0 Credits.
This course provides an introduction to the state-of-the-art computational chemistry. The course integrates the basics about molecular electronic structure theories and the corresponding computational aspects and practice in chemical applications. The discussions of theories cover the modern quantum-chemical methods, ranging from mean-field methods (Hartree-Fock method and density-functional theory) to post mean-field methods for treating electron-correlation effects (configuration interaction and coupled cluster). Demonstrative calculations and computer lab practice are designed to deal with the computation of energetic properties (e.g., heat of formation, bond dissociation energy, reaction activation energy, etc) and structural properties (geometry, vibrational frequencies, etc) of representative molecular systems using standard quantum chemistry program package (the Gaussian program, most probably). The class will conclude with a report and presentation on a piece of recent computational work pertinent to the student’s research interests.
Instructor(s): L. Cheng.

AS.030.407. Modeling Matter at Nanoscales: An Introduction to Theoretical and Computational Approaches. 3.0 Credits.
The course allows students to become familiar with the essentials of concepts for modeling the structure of matter at nanoscales and the depending properties, as well as the way that they relate with measurements at human scales. Concepts on modeling, computer representation of nanosystems, origin of interactions between bodies at nanoscales and the different ways of finding the corresponding potential energy surfaces, including both classical and quantum mechanical procedures and described and even detailed when relevant. Applications can be on life materials, or other nanoscopic environments. It is designed for advanced undergraduate and graduate students in Chemistry, Physics, Biology, Pharmacy and Biochemistry, as well as physicians and engineers. Attendants must handle an essential ground in Mathematics, General Physics, Chemistry and related matters.
Instructor(s): L. Montero-Cabrera.
AS.030.420. Transforming Pharmaceutical and Materials Industries: Metal-Catalyzed Cross Coupling Reactions. 3.0 Credits.
Pharmaceutical and Material Industries have immensely benefited since the advent of metal-catalyzed cross-coupling bond forming methods. Most undergraduate organic chemistry courses do not emphasize the potential of these reactions. This course will discuss the synthesis of a variety of commercially available drugs and materials currently synthesized via transition metal-catalyzed cross-coupling methods.
Prerequisites: AS.030.205 AND AS.030.206
Instructor(s): S. Surampudi
Area: Natural Sciences.

AS.030.421. Uses of Coordination Chemistry in Medicine. 3.0 Credits.
This course will introduce basic concepts of Medicinal Inorganic Chemistry and the variety of roles that metals play in contemporary medicine and their applications to both diagnosis and therapy. Students with potential future interests in chemistry, biochemistry, cell biology, pharmacology, and/or toxicology will find this course of great value. This interdisciplinary course is an excellent choice for undergraduates who aim to learn both sides of the coin, chemistry as an academic subject and medicine as an application; study of the combination, in addition to providing knowledge in new subject matter, may also equip students with insights which can aid the evaluation of their future professional career directions. This course begins with an introduction to coordination chemistry as a primary basis for the subsequent topics on diagnosis and therapy including the roles of metal-based drugs in modern medicine and the future development of clinically efficacious metal-complexes. Deans Teaching Fellowship Course.
Prerequisites: AS.030.101 AND AS.030.102 OR equivalent
Instructor(s): S. Hematian
Area: Natural Sciences.

AS.030.441. Spectroscopic Methods of Organic Structure Determination. 3.0 Credits.
The course provides fundamental theoretical background for and emphasizes practical application of ultraviolet/visible and infrared spectroscopy, proton and carbon-13 nuclear magnetic resonance and mass spectrometry to the structure proof of organic compounds.
Instructor(s): C. Falzone
Area: Natural Sciences.

AS.030.442. Organometallic Chemistry. 3.0 Credits.
An introduction to organometallic chemistry beginning with structure, bonding, and reactivity and continuing into applications to fine chemical synthesis and catalysis. Recommended Course Background: AS.030.449 or equivalent. Level: Upper level Undergraduate AND Graduate Students
Instructor(s): S. Thiyagarajan
Area: Natural Sciences.

AS.030.446. Mathematica as a Tool for Chemists. 3.0 Credits.
A systematic, hands-on introduction to Mathematica. Covers Mathematica's basic "language," analytic and numerical calculations, data manipulation, graphical representation, interactivity, programming, and document production. Prerequisite: Calculus (including power series)
Instructor(s): H. Silverstone
Area: Natural Sciences.

AS.030.449. Chemistry of Inorganic Compounds. 3.0 Credits.
Physical and chemical properties of inorganic, coordination and organometallic compounds are discussed in terms of molecular orbital, ligand field and crystal field theories. Emphasis on structure and reactivity of these inorganic compounds. Other topics: magnetic properties, electronic spectra, magnetic resonance spectra, reaction kinetics.
Instructor(s): V. Thoi
Area: Natural Sciences.

AS.030.451. Spectroscopy. 3.0 Credits.
Spectroscopy and structure of molecules starting from rotational, vibrational and electronic spectra of diatomic molecules and extending to polyatomic molecules as time permits. Recommended Course Background: AS.030.302 or permission of instructor.
Instructor(s): P. Dagdigian
Area: Natural Sciences.

AS.030.452. Materials & Surface. 3.0 Credits.
The chemistry associated with surfaces and interfaces as well as a molecular level understanding of their essential roles in many technological fields. The first half of this course addresses various analytical techniques used to study surfaces including X-ray, photoelectron spectroscopy, and scanning tunneling microscopy. The second half of this course uses a number of case studies to illustrate the application of surface analytical techniques in contemporary research.
Instructor(s): D. Fairbrother
Area: Natural Sciences.

AS.030.453. Intermediate Quantum Chemistry. 3.0 Credits.
The principles of quantum mechanics are developed and applied to chemical problems.
Prerequisites: (AS.030.301 OR AS.030.370 OR AS.250.372) AND AS.030.302
Instructor(s): H. Silverstone
Area: Natural Sciences.

AS.030.472. Advanced Inorganic & Organometallic Reactions Mechanisms. 3.0 Credits.
The beginning of the course will focus on the basics of organometallic chemistry such as molecular orbital theory, agostic bonding, electronic structure and coordination geometries. These topics would then be followed with common reactions in organometallic chemistry such as ligand substitution, oxidation addition, and reductive elimination. The final set of topics will cover the basic "tools of the trade" which will encompass kinetics, dynamic NMR spectroscopy, kinetic isotope effects and mechanistic studies.
Prerequisites: Prerequisite: AS.030.206 OR AS.030.212
Instructor(s): E. Joslin
Area: Natural Sciences.

AS.030.501. Independent Research in Physical Chemistry I. 3.0 Credits.
Research under the direction of members of the physical chemistry faculty.
Instructor(s): D. Fairbrother; D. Yarkony.

AS.030.502. Independent Research in Physical Chemistry. 0.0 - 3.0 Credits.
Research under the direction of members of the physical chemistry faculty.
Instructor(s): D. Draper; D. Fairbrother; G. Meyer; K. Bowen.

AS.030.503. Independent Research in Inorganic Chemistry I. 3.0 Credits.
Research under the direction of members of the inorganic chemistry faculty.
Instructor(s): D. Goldberg; J. Roth; K. Karlin; T. Lectka.
AS.030.504. Independent Research in Inorganic Chemistry. 0.0 - 3.0 Credits.
Research under the direction of members of the inorganic chemistry faculty.
Instructor(s): D. Goldberg; G. Meyer; J. Roth; K. Karlin; V. Thoi.

AS.030.505. Independent Research in Organic Chemistry I. 3.0 Credits.
Research under the direction of members of the organic chemistry faculty.
Instructor(s): Staff.

AS.030.506. Independent Research in Organic Chemistry I. 0.0 - 3.0 Credits.
Research under the direction of members of the organic chemistry faculty.
Instructor(s): Staff.

AS.030.507. Independent Research in Biochemistry. 3.0 Credits.
Research under the direction of members of the biochemistry faculty.
Instructor(s): Staff.

AS.030.509. Independent Research in Biochemistry II. 3.0 Credits.
Research under the direction of members of the biochemistry faculty.
Recommended Course Background: AS.030.507-AS.030.508 and permission of instructor.
Instructor(s): C. Townsend; J. Tolman.

AS.030.510. Independent Research in Biochemistry II. 0.0 - 3.0 Credits.
Research under the direction of members of the biochemistry faculty.
Recommended Course Background: AS.030.507-AS.030.508 and permission of instructor.
Instructor(s): C. Falzone; C. Townsend; J. Tolman.

AS.030.511. Independent Research in Materials Chemistry. 0.0 - 3.0 Credits.
Instructor(s): T. Mcqueen.

AS.030.512. Independent Research in Materials Chemistry. 0.0 - 3.0 Credits.
Research under the direction of the materials chemistry faculty.
Instructor(s): T. Mcqueen.

AS.030.521. Independent Research in Inorganic Chemistry II. 3.0 Credits.
Research under the direction of the inorganic chemistry faculty.
Recommended Course Background: AS.030.503-AS.030.504 and permission of instructor.
Instructor(s): C. Falzone; D. Goldberg; J. Roth; K. Karlin.

AS.030.522. Independent Research in Inorganic Chemistry II. 0.0 - 3.0 Credits.
Research under the direction of the inorganic chemistry faculty.
Recommended Course Background: AS.030.503-AS.030.504 and permission of instructor.
Instructor(s): D. Goldberg; G. Meyer; J. Roth.

AS.030.523. Independent Research in Physical Chemistry II. 3.0 Credits.
Research under the direction of the physical chemistry faculty.
Recommended Course Background: AS.030.501-AS.030.502 and permission of instructor.
Instructor(s): D. Fairbrother; K. Bowen.

AS.030.524. Independent Research in Physical Chemistry II. 0.0 - 3.0 Credits.
Research under the direction of the physical chemistry faculty.
Recommended Course Background: AS.030.501-AS.030.502 and permission of instructor.
Instructor(s): D. Fairbrother.

AS.030.525. Independent Research in Organic Chemistry II. 3.0 Credits.
Research under the direction of the organic chemistry faculty.
Recommended Course Background: AS.030.505-AS.030.506 and permission of instructor.
Instructor(s): J. Toscano; M. Greenberg; T. Lectka.

AS.030.526. Independent Research in Organic Chemistry II. 0.0 - 3.0 Credits.
Instructor(s): J. Toscano; M. Greenberg; T. Lectka.

AS.030.527. Independent Study. 3.0 Credits.
Instructor(s): D. Fairbrother.

AS.030.528. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): D. Goldberg.

AS.030.530. Independent Research in Inorganic and Materials Chemistry. 1.0 - 3.0 Credits.
Research under the direction of members of the Inorganic Chemistry faculty.
Instructor(s): V. Thoi.

Research under the direction of members of the Physical Chemistry faculty.
Instructor(s): T. Kempa.

AS.030.551. Internship-Chemistry. 1.0 Credit.
Instructor(s): Staff.

AS.030.552. Internship - Chemistry. 1.0 Credit.
Instructor(s): Staff.

AS.030.592. Research-Inorganic Chemistry I. 3.0 Credits.
Instructor(s): G. Meyer; M. Greenberg.

AS.030.593. Research-Organic Chemistry I. 3.0 Credits.
Instructor(s): M. Greenberg; T. Lectka.

AS.030.597. Research - Summer. 3.0 Credits.
Instructor(s): Staff.

An introduction to statistical mechanics of cooperative phenomena using lattice gases and polymers as the main models. Covered topics: phase transitions and critical phenomena, scaling laws, and the use of statistical mechanics to describe time dependent phenomena.
Instructor(s): D. Yarkony.

AS.030.610. Chemical Kinetics.
The molecular mechanism of elementary physical and chemical rate processes will be studied. Topics such as elastic scattering, collisional vibrational and rotational energy transfer, chemically reactive collisions, and the theory of unimolecular decay will be covered.
Instructor(s): K. Bowen.

AS.030.613. Chemistry-Biology Interface Program Forum I.
Chemistry-Biology Interface (CBI) program students and faculty will meet weekly in a forum that will host presentations from CBI faculty and students as well as invited guest speakers. These meetings will serve as a valuable opportunity for students to develop presentation skills and interact with CBI students and faculty. Enrollment is required for first- and second-year CBI students, and is recommended for advanced-year graduate students.
Instructor(s): S. Rokita.
AS.030.614. Chemical-Biology Program Interface Forum II.
Chemistry-Biology Interface (CBI) program students and faculty will meet weekly in a forum that will host presentations from CBI faculty and students as well as invited guest speakers. These meetings will serve as a valuable opportunity for students to develop presentation skills and interact with CBI students and faculty. Enrollment is required for first and second year CBI students, and is recommended for advanced year graduate students.
Instructor(s): S. Rokita.

AS.030.615. Special Topics in Bioinorganic Chemistry.
Instructor(s): D. Goldberg.

AS.030.617. Special Topics in Inorganic Chemistry.
Topics from the recent primary literature in inorganic chemistry will be discussed, via instructor lectures and presentations by the graduate-undergraduate students enrolled in the course. Topics covered may range from bioinorganic to organometallic to environmental inorganic chemistry.
Instructor(s): K. Karlin.

AS.030.619. Chemical Biology I.
Parts I and II constitute the core course of the Chemistry-Biology Interface (CBI) Program. An introduction to the structure, synthesis, reactivity, and function of biological macromolecules (proteins, nucleic acids, carbohydrates, and lipids) will be provided using the principles of organic and inorganic chemistry. Discussion will incorporate a broad survey of molecular recognition and mechanistic considerations, and the tools of molecular and cellular biology that are utilized in research at the interface of chemistry with biology and medicine. Recommended Course Background: AS.030.206 or equivalent.
Instructor(s): S. Rokita.

AS.030.620. Chemical Biology II.
Selected topics of current importance in chemical biology are covered. They include protein engineering and proteomics, cell signaling, protein-nucleic acid interactions (e.g. replication, transcription, DNA repair), catalytic RNA and the ribosome, biosynthesis of natural products, mechanisms of drug action, combinatorial chemistry and chemical genetics, and in vitro selection. Recommended Course Background: AS.030.619 or permission required.
Instructor(s): S. Rokita.

AS.030.621. Literature-Organic Chemistry.
Instructor(s): L. Cheng.

AS.030.622. Seminar: Literature of Chemistry.
Seminars are presented by advanced graduate students on topics from current chemical journals. Most first-year graduate students are expected to attend for credit. Undergraduates may take the course on a satisfactory/unsatisfactory basis.
Instructor(s): L. Cheng.

AS.030.625. Advanced Mechanistic Organic Chemistry I.
The course covers the application of techniques in physical chemistry to the study of organic reaction mechanisms. Topics include chemical bonding and structure, stereochemistry, conformational effects, molecular orbital theory, methods to determine reaction mechanisms, reactive intermediates, and photochemistry. Recommended Course Background: AS.030.205-AS.030.206
Instructor(s): M. Greenberg.

AS.030.626. Advanced Mechanistic Organic Chemistry II.
This course covers advanced organic reactions and their mechanisms. Emphasis is given both to methods of postulating mechanisms for rationalizing reaction results and to the use of mechanistic thinking for designing reactions and reagents. This course is intended to be taken in sequence with AS.030.425. Recommended Course Background: AS.030.205-AS.030.206
Instructor(s): J. Tovar.

AS.030.634. Topics in Bioorganic Chemistry.
Selected topics in modern bioorganic chemistry will be treated in greater depth emphasizing natural products chemistry, biosynthetic reaction mechanisms and drug design. Carbohydrates, lipids, polyketides, polypeptides, terpenes and alkaloids will be discussed. Specific examples of drug design will be introduced throughout and methods of synthesis, combinatorial synthesis and genetics will be described.
Instructor(s): C. Townsend.

AS.030.635. Methods Nuclear Magnetism/Resonance.
Instructor(s): J. Tolman.

AS.030.652. A Theoretical and Experimental Approach to X-ray Crystallography.
The X-ray course will provide a complete approach to X-ray structure determination (mostly concerned with small molecules) and its uses in Chemistry. The first segment of this course will cover all theoretical aspects of X-ray crystallography, i.e. crystals and crystallization, the nature of X-rays, the diffraction phenomenon of X-rays by crystals, symmetry and space groups, crystal structure analysis. Additionally, the course will provide laboratory experience for the students, involving hands-on instrumentation, experimental methodology to X-ray structure determination, structure solution/refinement, data analyses and publishing data. The course is aimed for graduate students with a strong interest in organic/inorganic chemistry, materials sciences, and physics. Undergraduate students with a major in chemistry are also encouraged to participate.
Instructor(s): M. Siegler
Area: Natural Sciences.

AS.030.677. Advanced Organic Synthesis I.
The reactions and principles involved in the synthesis of simple and complex organic compounds. Discussion of famous natural product syntheses and practice in developing rational designs for organic syntheses. Problems in the design of syntheses and in the use of chemical literature.
Instructor(s): R. Klausen.

AS.030.678. Advanced Organic Synthesis II.
Advanced discussion of organic stereochemistry & its application to problems in asymmetric reactions and catalysis will be presented. Emphasis will be placed on the latest reports in the literature, especially with respect to the development of new catalytic, asymmetric processes.
Instructor(s): T. Lectka.

Instructor(s): M. Greenberg.
The course is designed to provide the essential principles and concepts underlying the modern study of the structure and properties of solids in bulk crystals, thin films, and nanoscale objects. Topics include basic crystallography, structure determination by x-ray, neutron, and electron diffraction, fundamental concepts of bonding in solids, lattice dynamics, electronic band structure, magnetism, and strongly correlated electron behavior. Particular emphasis is placed on the impact of the structure, dimensionality, and electron count on electrical and magnetic properties (electric conduction, superconductivity, thermoelectricity, etc). More course info available at <a href="http://occamy.chemistry.jhu.edu">http://occamy.chemistry.jhu.edu</a>. Cross-listed with Physics and Astronomy Instructor(s): T. Mcqueen.

In this course we will survey common time-resolved spectroscopic methods used to interrogate the dynamic and static properties of chemical systems. We will explore theoretical treatments both of key molecular processes (e.g. radiative and non-radiative transitions, solvation, coherence dephasing) and the spectroscopic tools used to interrogate them. Furthermore, we will survey the technical developments that are now allowing us to capture events that occur on ever faster timescales (currently down to the attosecond regime) and across the electromagnetic spectrum (from X-rays to Terahertz). Previous or concurrent concentrated study of Quantum Mechanics (graduate level or from a physics course) would be helpful, but not strictly required. Recommended Course Background: AS.030.301-AS.030.302 Instructor(s): A. Bragg.

AS.030.801. Independent Study.
Instructor(s): Staff.

Open to AS Chemistry Graduate Students only. Instructor(s): G. Meyer.

Biophysics
AS.250.310. Exploring Protein Biophysics using Nuclear Magnetic Resonance (NMR) Spectroscopy. 3.0 Credits.
NMR is a spectroscopic technique which provides unique, atomic level insights into the inner workings of biomolecules in aqueous solution. A wide variety of biophysical properties can be studied by NMR. For example, we can use the technique to determine three dimensional structure of biological macromolecules such as proteins and nucleic acids, probe their dynamical properties in solution, study their interaction with other molecules and understand how physico-chemical properties (such electrostatics and redox chemistry) affects and modulates structure-function relationships. NMR exploits the exquisite sensitivity of magnetic properties of atomic nuclei to their local electronic (and therefore, chemical) environment. As a result, biophysical properties can be studied at atomic resolution. That is to say, we can deconstruct global properties of a molecule in terms of detailed, atomic level information. In addition, interactions between nuclei can be exploited to enhance the information content of NMR spectra via multi-dimensional (2D and 3D) spectroscopy. Since these properties can be studied in solution, NMR methods serve as an effective complement to X-Ray crystallography, which also provides detailed, atomic level information in the solid state. In this course, we will learn about the basics of NMR spectroscopy, acquire 1D and 2D NMR spectra and use various NMR experiments to characterize and probe biophysical properties of proteins at an atomic level. Juniors and Seniors Only.
Prerequisites: ((AS.030.101 AND AS.030.105) OR (AS.030.103 AND AS.030.204)) AND (AS.030.370 OR AS.250.372) AND (AS.020.305 OR AS.030.315 OR AS.250.315) AND AS.030.205 Instructor(s): A. Majumdar.

Classics

http://classics.jhu.edu

Classics has long been at the heart of humanistic studies at Johns Hopkins University: the very first person appointed to the faculty of the newly founded University in 1876 was Basil L. Gildersleeve (http://archive.magazine.jhu.edu/2009/08/to-understand-ourselves), a professor of Greek. Gildersleeve adopted the most effective model of scholarship at the time—the German seminar, which combined teaching with research—as the basis for training students at Hopkins. This revolutionary structure was central to the new model of the “research university” that Johns Hopkins University pioneered.

Today, the Department of Classics at Johns Hopkins seeks to maintain and enhance this tradition of leadership and innovation. Members of the current faculty are highly interdisciplinary. We combine philological, historical, iconographical, and comparative methods in our investigations of the cultures, broadly conceived, of ancient Greece and Rome, with additional expertise in Reception Studies (aka “The Classical Tradition”) and in the post-classical use of Greek and Latin.

The graduate program reflects these characteristics. It is founded upon intensive study of ancient Greek and Latin language and literature, but also requires rigorous work in such fields as ancient history, art, archaeology, and philosophy, while allowing considerable flexibility to accommodate individual interests. The program aims to produce broad, versatile scholars who have a holistic view of the ancient cultures and of the evidence by which those cultures are comprehended.
The classics department enjoys close ties with several local and regional institutions whose missions include the study of the ancient world, including the Walters Art Museum, with its world-class collection of antiquities and manuscripts; the Baltimore Museum of Art, with its Roman mosaics; and the Center for Hellenic Studies in Washington, D.C. Internationally, it is a member of the American School of Classical Studies in Athens, the American Academy in Rome, and the Intercollegiate Center for Classical Studies in Rome.

The department's main scholarly resource is the Milton S. Eisenhower Library, which has broad and deep holdings in the various fields of classical antiquity. The department also has a significant collection of Greek, Roman, and Etruscan antiquities, housed in the Johns Hopkins Archaeological Collection (shared with the Department of Near Eastern Studies), and a small reference library in its Gilman Hall seminar room.

### Undergraduate Programs

The department offers undergraduate courses in Greek and Latin languages and literature, ancient history, classical art and archaeology, Greek and Roman civilizations, history of sexuality and gender, ancient philosophy, mythology, and anthropological approaches to the classics. These courses are open to all students in the university, regardless of their academic year or major field of interest.

### Requirements for the B.A. Degree

(See also Requirements for a Bachelor's Degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree). )

The B.A. program in classics is highly flexible, accommodating a variety of interests in and approaches to the ancient world. Possible areas of emphasis include language and literature, ancient philosophy, art and archaeology, and ancient history.

### Classics Major

Certain courses taken in other departments may count toward the major, with the approval of the director of undergraduate studies (DUS). Advanced undergraduates may participate in graduate seminars, with the approval of the DUS and the professor. With assistance from their faculty advisors, students are required to build an intellectually substantial and coherent curriculum and must take all courses for a letter grade and earn a C or better in major requirements. Students are strongly encouraged to complete a course in ancient Greek civilization (usually AS.040.111 (http://e-catalog.jhu.edu/archive/2017-18/departments-program-requirements-and-courses/arts-sciences/classics) ) and a course in Roman civilization (usually AS.040.112 (http://e-catalog.jhu.edu/archive/2017-18/departments-program-requirements-and-courses/arts-sciences/classics) or AS.040.104 (http://e-catalog.jhu.edu/archive/2017-18/departments-program-requirements-and-courses/arts-sciences/classics) ).

#### Major Requirements

**Greek or Latin Language Courses**

- Two Greek or Latin language courses at any level 6-8
- Two Greek or Latin language courses at the 200-level or above 6-8

**Language Proficiency in French, German, or Italian**

Proficiency demonstrated through the second semester of intermediate level via course completion or waiver by exam

### Classics Courses

Eight courses offered through the Classics Department or cross-listed in Classics 24

A student with previous Latin or Greek experience may begin at the intermediate or advanced level if approved by the faculty member overseeing the course in which the student wishes to enroll. In such cases, the normal prerequisites are waived. (NB: The student must still take four language courses according to the requirements given above, but a maximum of two waived courses may be counted toward the eight “Classics courses,” making it possible for students with experience in Latin or Greek to meet requirements more quickly.)

### Sample Program

A typical program might include the following sequence of courses:

#### Freshman

<table>
<thead>
<tr>

<td>3</td>
<td>Classics elective #8</td>
<td>3</td>
</tr>
</tbody>
</table>

Classics elective #7 3

6 3

Total Credits: 51

* Students with no experience in French, German, or Italian should expect to take 4 courses in one of those languages to satisfy the modern language requirement for the major.

** Greek courses may be substituted for Latin courses, and vice versa, according to the interests and goals of the student. This sample program assumes no previous language experience; students who know some Latin and/or Greek may begin at a higher level with faculty approval.
Many Classics majors study abroad during the junior year; for these students, the four-year plan may vary in shape depending on the courses offered by the study abroad program chosen.

Students intending to pursue graduate study in classics will need to do substantially more work in Greek and Latin than what the major minimally requires: most graduate programs expect successful applicants to have studied one language for at least three years and the other for at least two. Therefore, students interested in graduate work should be engaged in a language-intensive curriculum by the end of the sophomore year.

The Classics Department awards the Evangelia Davos Prize each year to the classics major or minor whose work in Greek studies is outstanding.

Honors Program in Classics
Classics majors have the opportunity to graduate with honors by writing an honors thesis (15,000-20,000 words) in close consultation with a faculty member. Three credits of “honors thesis research” are awarded in the spring semester of the senior year. (These credits may not be used to fulfill the basic requirements for the Classics BA, which must be met independently of any honors thesis work.)

Entrance to the Classics Honors program is contingent on outstanding performance in previous Classics courses. Students wishing to pursue an honors thesis are expected to consult with the Director of Undergraduate Studies by March 15 of the junior year to allow for adequate advising, planning, and identification of an appropriate honors thesis advisor.

A typical timeline for honors thesis research is as follows: research begins in the summer before the senior year (or earlier); further research and writing continues through the fall, with a draft of the thesis submitted early in the spring semester and a final version submitted in April.

Study Abroad
The Department of Classics is a member of the Intercollegiate Center for Classical Studies in Rome and can provide information on other year-long, semester-long, or summer programs in Greece and Italy (e.g., the College Year in Athens and the summer session of the American School of Classical Studies at Athens). Interested students, especially classics majors and minors, are encouraged to consider these options for studying overseas.

Classics Minor
The requirements for the minor in classics are extremely flexible. Courses are selected, in consultation with the DUS, to meet the needs and interests of the student. Minors may wish to pursue the study of one ancient language, or create a curriculum that meshes with their other academic pursuits. All courses must be taken for letter grades and receive a grade of C or higher.

Minor Requirements

Classics Courses
6 courses offered through the Classics Department or cross-listed in Classics

B.A./M.A. Degree
The department offers a masters degree for current Hopkins undergraduate students. Details may be found on the Graduate tab.

Graduate Programs
Requirements for the B.A./M.A. Degree
Admission to the B.A./M.A. program is restricted to current Johns Hopkins University undergraduate classics majors and is based on outstanding performance in previous classics courses.

Students considering a five-year program are expected to declare their interest during the spring semester of their junior year. Prior to application, students must consult with the director of undergraduate studies, their faculty adviser, and the department administrator. A formal graduate application must be submitted no later than November 15 of the fall semester of the senior year in order for admission to the program in the spring of the senior year, thus meeting the requirement for concurrent status. In the senior (fourth) year, students are to devise a program of study that would best prepare them to do advanced work in their final (fifth) year, in particular addressing any weakness in one or the other classical language. All requirements for the B.A. must be completed by the end of the fourth year.

In the MA (fifth) year, students must complete the following:

Two graduate seminars in the Classics Department
Four semesters (12 credits) of Latin and/or Greek, at least six credits of which must be at the advanced level
A thesis of 20,000 to 25,000 words representing original research. The thesis will be supervised by a member of the Classics Department faculty and graded by the supervisor and a second reader from Classics or an outside department.

Exceptionally well-prepared students may apply for the B.A./M.A. program in the spring of their junior year, with prior approval from the director of undergraduate studies and the department chair. In this case it is possible to complete the bachelor’s/master’s degree in four years, provided all B.A. requirements are fulfilled by the end of the third year. These students are expected to express their interest to the department by the fall term of their junior (third) year; they must then submit an application no later than March 15 in the following semester.

The B.A. and M.A. degrees are conferred concurrently at the end of the M.A. year. Please note that the department does not award degrees during the summer; students are expected to complete the degree requirements in conformance with the university Graduate Board spring deadlines. Specific departmental and Graduate Board deadlines are communicated to the student in due course.

Requirements for the Ph.D. Degree
To receive a Ph.D. in classics from Johns Hopkins University, students must complete successfully a range of seminar work and examinations and then write a substantial dissertation. The Graduate Program in Classics is designed to be completed in five years, of which the first three are dedicated to seminar work and examinations, and the last two to the dissertation. Assuming satisfactory progress toward the Ph.D., all students admitted to the program receive five years of living expenses and tuition remission, in order to make it possible to complete the program in a timely manner. This support takes the form of a fellowship for the first two years, and teaching for at least two of the remaining years. The department may also offer teaching opportunities in the summer, as well as funded summer travel for program-related purposes. All students, upon reaching dissertation level, are encouraged to apply for outside funding to spend a year abroad. If outside funding is obtained, the Johns Hopkins fellowship may be held in reserve for
an additional year. A detailed outline of the Ph.D. program, including a prospectus of all seminars and exams, can be found on the Classics Department website (http://classics.jhu.edu).

Application information may be obtained from the Graduate Admissions website or by contacting the department chair, Department of Classics, Johns Hopkins University, 113 Gilman Hall, 3400 North Charles Street, Baltimore, MD 21218. Telephone: 410-516-7556; Fax: 410-516-4848; email: classics@jhu.edu. The application deadline is on or about January 15. For the precise date, please refer to the Graduate Admissions website (http://grad.jhu.edu).

For current faculty and contact information go to http://classics.jhu.edu/people/

**Faculty**

**Chair**
Shane Butler
Professor of Classics and Nancy H. and Robert E. Hall Professor in the Humanities: Latin Literature (Ancient, Medieval, Renaissance), media history and theory, classical reception

**Professors**
Richard Bett
Professor (Philosophy and Classics): ancient philosophy, ethics

Silvia Montiglio
Basil L. Gildersleeve Professor of Classics (Director of Graduate Studies): Greek literature and culture, the ancient novel and narrative, philosophy

Matthew Roller
Professor. Latin literature, Roman social and cultural history, Roman material culture, Graeco-Roman philosophy

**Associate Professor**
Dimitrios Yatromanolakis
Associate Professor: Greek literature, Greek social and cultural history, theory and anthropology of Greek music, papyrology, epigraphy, performance cultures of Greece and Rome

**Assistant Professors**
Emily Anderson
Assistant Professor: Aegean Bronze Age art and archaeology, material culture, sociocultural interaction, identity, glyptic

Joshua M. Smith
Assistant Professor (Director of Undergraduate Studies): Greek language and literature, ancient scholarship, history of literary criticism

**Affiliated Faculty**
Sanchita Balachandran
Curator, JHU Archaeological Collection, and Lecturer (Near Eastern Studies): Art and archaeological conservation

Richard Jasnow
Professor (Near Eastern Studies): Egyptology

Eugenio Refini
Assistant Professor of Italian Studies (German and Romance Languages and Literatures): Renaissance poetics, rhetoric, and drama; the Classical tradition; Latin and vernacular humanism; the intersections of music and literature

**Professors Emeriti**
Marcel Detienne
Basil L. Gildersleeve Professor of Classics Emeritus: Greek, social history, cultural history, mythology, anthropology and classics

H. Alan Shapiro
Academy Professor and W. H. Collins Vickers Professor of Archaeology Emeritus: Greek and Roman art and archaeology, Greek mythology and religion

For current course information and registration go to https://sis.jhu.edu/classes/

**Courses**

**AS.040.103. The Roman Empire. 3.0 Credits.**
This introductory course examines the history, society, and culture of the Roman state in the Imperial age (ca. 31 BCE-ca. 500 CE), during which it underwent a traumatic transition from an oligarchic to a monarchic form of government, attained its greatest territorial expanse, produced its most famous art, architecture, and literature, experienced vast cultural and religious changes, and finally was transformed into an entirely different (“late antique”) form of society. All readings in English.

Instructor(s): M. Roller
Area: Humanities.

**AS.040.104. The Roman Republic: History, Culture, and Afterlife. 3.0 Credits.**
This introductory level course examines the history, society, and culture of the Roman state in the Republican period (509-31 BCE), during which it expanded from a small city-state to a Mediterranean empire. We also consider the Republic’s importance for American revolutionaries in the 18th century. All readings in English.

Instructor(s): M. Roller
Area: Humanities.

**AS.040.105. Elementary Ancient Greek. 4.0 Credits.**
This course provides a comprehensive, intensive introduction to the study of ancient Greek. During the first semester, the focus will be on morphology and vocabulary. Credit is given only upon completion of a year’s work. Cannot be taken Satisfactory/Unsatisfactory.

Instructor(s): D. Yatromanolakis.

**AS.040.106. Elementary Ancient Greek. 4.0 Credits.**
Course provides comprehensive, intensive introduction to the study of ancient Greek. The first semester’s focus is morphology and vocabulary; the second semester’s emphasis is syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.

Instructor(s): L. Hutchinson.

**AS.040.107. Elementary Latin. 3.5 Credits.**
This course provides a comprehensive, intensive introduction to the study of Latin for new students, as well as a systematic review for those students with a background in Latin. Emphasis during the first semester will be on morphology and vocabulary. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.

Instructor(s): J. Lenzi; J. Meyer.
AS.040.108. Elementary Latin. 3.5 Credits.
Course provides comprehensive, intensive introduction to the study of Latin for new students as well as systematic review for students with background in Latin. The first semester’s emphasis is on morphology and vocabulary; the second semester’s focus is on syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Instructor(s): D. Piana; R. Franklin
Area: Humanities.

AS.040.111. Ancient Greek Civilization. 3.0 Credits.
The course will introduce students to major aspects of the ancient Greek civilization, with special emphasis placed upon culture, society, archaeology, literature, and philosophy.
Instructor(s): J. Smith
Area: Humanities.

AS.040.121. Ancient Greek Mythology: Art, Narratives, and Modern Mythmaking. 3.0 Credits.
This course focuses on major and often intricate myths and mythical patterns of thought as they are reflected in compelling ancient visual and textual narratives. Being one of the greatest treasure troves of the ancient world, these myths will further be considered in light of their rich reception in the medieval and modern world (including their reception in the modern fields of anthropology and philosophy).
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.126. Religion, Music and Society in Ancient Greece. 3.0 Credits.
Emphasis on ancient Greek ritual and mythology; on ancient music, religion, and society; and on cultural institutions such as symposia (drinking parties) and festivals.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.133. Heroes: the Ancient Greek Way. 3.0 Credits.
The purpose of this course is to introduce students to Ancient Greek literature by reading and discussing its most important and famous texts, from the Iliad and the Odyssey to tragedy to philosophy. Knowledge of Greek is not required.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.134. Love, War, and Glory: The Gods and Heroes of Greek Mythology. 3.0 Credits.
Greek myths fascinate us as adventurous narratives, yet they always sound enigmatic and require interpretation. This course will combine the pleasure of reading stories and the concern for their understanding. Readings in ancient and modern texts. The course may not be taken S/U.
This course meets Hopkins’ requirements for a major in classics.
Instructor(s): D. Piana
Area: Humanities.

AS.040.135. The Grandeur That Was Rome. 3.0 Credits.
At the peak of its power, the Roman empire extended from Scotland to Syria, incorporating numerous cultures, attitudes, and lifestyles. This course examines Roman social practices, political institutions, and religion from the empire’s humble beginnings through its final period, using a wide variety of materials including drama, poetry, history, and oratory. This course may not be taken S/U and meets the Hopkins requirements for a major in classics.
Instructor(s): M. Mueller
Area: Humanities.

AS.040.137. Freshman Seminar: Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum. 3.0 Credits.
This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.142. Spartacus, Caesar, and Cleopatra: Notorious Characters from Roman History and Hollywood Cinema. 3.0 Credits.
Since the invention of cinema, the ancient world has been an important vehicle for both lavish visual spectacles and the exploration of contemporary social issues. This course analyzes the depiction of the infamous figures of the late republic in both ancient sources and modern media, to examine how ancient Rome and contemporary America have used these characters to contemplate race, class, gender, and imperialism.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.146. Classics and Comics: Ancient Writers and Modern Visual Culture. 3.0 Credits.
Course analyzing the adaptation of ancient Greek and Roman literature and visual culture in modern comic books, graphic novels, and manga.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.148. Ancient Israel and Ancient Greece in Opera and on Film. 3.0 Credits.
Some of the most breathtaking (early and later) operas and films have been in intense dialogue with ancient societies, narratives, and cultural concepts. Contemporary hit movies center on diverse aspects of ancient narratives: the beginning of the world, violent wars, politics, erotic themes, and intricate existential questions. The course will introduce students to a comparative examination of the variety of approaches to ancient Israel and ancient Greece in the spectacular worlds of opera and cinema. The course will focus on major texts and archaeological material related to antiquity; works of world cinema will be analyzed.
Instructor(s): D. Yatromanolakis
Area: Humanities.
AS.040.150. Island Archeology: Land and Sea in Ancient Crete, Cyprus and the Cyclades. 3.0 Credits.
Islands present highly distinctive contexts for social life. We examine three island worlds of the ancient eastern Mediterranean. These are places where water had a unique and powerful meaning and boat travel was part of daily life, where palaces flourished and contact with other societies implied voyages of great distance. Class combines close study of material and visual culture with consideration of island-specific interpretive paradigms; trips to Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.152. Medical Terminology. 3.0 Credits.
This course investigates the Greek and Latin roots of modern medical terminology, with additional focus on the history of ancient medicine and its role in the development of that terminology.
Instructor(s): J. Smith
Area: Humanities.

AS.040.160. Special Opportunities in Undergraduate Learning: Constructing an Empire: An Introduction to the Art & Archaeology of Ancient Rome. 1.0 Credit.
Have you ever imagined what it would be like to stroll down the colonnaded streets of ancient Rome, visiting the monuments, palaces and temples of the ancient gods? Have you ever wondered what the luxurious villas looked like from within, or what it would be like to attend a play in an ancient theatre or the gladiatorial games in the Colosseum? This course is designed to introduce students to the material culture of the ancient Roman world by exploring the architecture, sculpture, painting, and mosaics of Rome and its environs. We will also take a field trip to the gallery of Roman art in the Walters Art Museum in order to better understand the Roman Empire through the visual arts.
Instructor(s): A. Tabeling.

AS.040.201. Digging Up the Gods: The Archaeology of Roman Sanctuaries. 3.0 Credits.
This course will explore the major sites of Ancient Italy, such as Rome, Ostia, and Pompeii, from temples to dedications, and their role in religion and society. Cross-listed with History of Art.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.205. Intermediate Ancient Greek. 3.0 Credits.
Reading ability in classical Greek is developed through a study of various authors.
Prerequisites: AS.040.105 AND AS.040.106 OR Equivalent
Instructor(s): J. Smith
Area: Humanities.

AS.040.206. Intermediate Ancient Greek. 3.0 Credits.
Reading ability in classical Greek is developed through a study of various authors, primarily Plato (fall) and Homer (spring).
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.207. Intermediate Latin. 3.0 Credits.
Although emphasis is still placed on development of rapid comprehension, readings and discussions introduce student to study of Latin literature, principally through texts of various authors.
Prerequisites: AS.040.107 AND AS.040.108 OR Equivalent
Instructor(s): M. Asuni; T. Smith
Area: Humanities.

AS.040.208. Intermediate Latin. 3.0 Credits.
Reading ability in Latin is developed through the study of various authors, primarily Cicero (fall) and Vergil (spring).
Instructor(s): J. Meyer
Area: Humanities.

AS.040.218. Celebration and Performance in Early Greece. 3.0 Credits.
Surviving imagery suggests that persons in Minoan and Mycenaean societies engaged in various celebratory performances, including processions, feasts, and ecstatic dance. This course explores archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.221. Art and Archaeology of Early Greece. 3.0 Credits.
This course explores the origins and rise of Greek civilization from the Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing on major archaeological sites, sanctuaries, material culture, and artistic production.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.233. The Ancient Greek and Roman Novels. 3.0 Credits.
The ancient Greeks are credited with inventing democracy, philosophy, drama, and science. They also invented the novel. In this class, we will read a large sample of Greek and Roman novels: stories of love, adventures, and magic.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions. 3.0 Credits.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.236. From Apollo to Dionysus: Ritual, Performance, and the Genesis of Tragedy. 3.0 Credits.
This course explores the origins and development of what is often regarded as the most exemplary form of western art—Classical Athenian Tragedy. Focusing on the ritual, performative, and civic contexts of Greek song culture, it ultimately seeks to pose the question ‘what makes Athens unique?’ To this end, the courses is centered on an examination of texts in tandem with material culture (monumental architecture, temples, dedications, statuary, vase painting). Issues of identity, religion, politics, and athletics will be discussed. Dean’s Teaching Fellowship course.
Prerequisites: Prereq: AS.040.111
Instructor(s): T. Smith
Area: Humanities Writing Intensive.

AS.040.237. Myth and Metamorphosis. 3.0 Credits.
Beginning with close study of the poem itself, this course will examine the unequalled influence of Ovid’s Metamorphoses on subsequent literature and art, including theater and film.
Instructor(s): M. Butler
Area: Humanities.
AS.040.238. Freshman Seminar: Magic and Miracles from Antiquity to the Renaissance. 3.0 Credits.
This freshman seminar will explore concepts of magic and miracles and their different forms from ancient Greece and Rome and early Christianity through the Middle Ages up to the Renaissance. Dean's Prize Teaching Fellowship Course.
Instructor(s): M. Mueller
Area: Humanities
Writing Intensive.

AS.040.305. Advanced Ancient Greek. 3.0 Credits.
Reading of prose or verse authors, depending on the needs of students.
Co-listed with AS.040.705.
Prerequisites: AS.040.205 AND AS.040.206 OR Equivalent
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.306. Advanced Ancient Greek. 3.0 Credits.
Reading of prose or verse authors, depending on the needs of students.
Co-listed with AS.040.702.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.307. Advanced Latin Prose. 3.0 Credits.
This course aims to increase proficiency and improve comprehension of the Latin language. Intensive reading of Latin texts, with attention to grammar, idiom, translation, etc. Specific offerings vary. Co-listed with AS.040.707.
Instructor(s): M. Butler
Area: Humanities.

AS.040.308. Advanced Latin Poetry. 3.0 Credits.
The aim of this course is to increase proficiency and improve comprehension of the Latin language. Intensive reading of Latin texts, with close attention to matters of grammar, idiom, and translation. Co-listed with AS.040.710.
Prerequisites: AS.040.207 AND AS.040.208 OR Equivalent
Instructor(s): M. Butler
Area: Humanities.

AS.040.320. Myth in Classical Art. 3.0 Credits.
This course traces the representation of the principal gods and heroes of Greek myth in the visual arts (sculpture and vase-painting), as well as later reflections in Roman painting.
Instructor(s): A. Shapiro
Area: Humanities.

AS.040.348. Worlds of Homer. 3.0 Credits.
Through texts, art, and archaeological remains, this course examines the various worlds of Homer—those recalled in the Iliad and Odyssey, those within which the epics were composed, and those born of the poet's unique creative work. Class will make museum visits. Ancient texts read in translation.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.363. Craft and Craftpersons of the Ancient World: Status, Creativity and Tradition. 3.0 Credits.
This course explores the dynamic work and social roles of craftpersons in early Greece, the eastern Mediterranean and Near East. Readings and discussion will query the identities and contributions of these people—travelers, captives, lauded masters, and even children—through topics including gender, class, and ethnicity. Special focus on late third-early first millennia BCE; local field trips.
Instructor(s): E. Anderson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.040.366. The Archaeology of Ancient Cyprus: Investigating a Mediterranean Island World in the JHU Museum. 3.0 Credits.
This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Course topics will include the island's unique position between the Aegean and Near East and how this has impacted both Cyprus' ancient past and the way in which it has been conceived in the modern world. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.367. Memory and Oblivion: Rewriting the Past in Ancient Rome. 3.0 Credits.
This course examines concepts of memory and forgetting through Roman memory sanctions, which aimed to revise or even erase the past. Textual, archaeological, and iconographical sources will be considered. Dean's Teaching Fellowship course.
Instructor(s): L. Garofalo
Area: Humanities
Writing Intensive.

AS.040.369. The Battle for the 5th Century BC: Athens, Persia, Sparta. 3.0 Credits.
This course explores the achievements and conflicting interactions of Athens, Persia, and Sparta during the 5th century BC, a period whose cultural richness lies at the roots of Western Civilization.
Instructor(s): J. Lamont
Area: Humanities
Writing Intensive.

AS.040.370. Ovid and the Consequences. 3.0 Credits.
Beginning with close study of the poem itself, this course will examine the unequalled influence of Ovid's Metamorphoses on subsequent literature and art, including theater and film.
Instructor(s): M. Butler
Area: Humanities.

AS.040.373. Propaganda and the Art of Visual Politics during the Roman Empire. 3.0 Credits.
We will examine visual expressions of propaganda in the city of Rome, considering how emperors used public art to promote their political agendas and their ideological vision of power. Dean's Teaching Fellowship course.
Instructor(s): A. Tabeling
Area: Humanities.
AS.040.407. Survey of Latin Literature I: Beginnings to the Augustan Age. 3.0 Credits.
This intensive Latin survey is designed for very advanced undergraduate students—normally those who have completed two semesters of Advanced Latin (AS.040.307/308)—and PhD students preparing for their Latin translation exam. In this course, the first half of a year-long sequence, we will read substantial texts of major Republican and some Augustan authors. The weekly pace is designed to inculcate greater speed and accuracy in Latin reading, and provide significant coverage of various kinds of texts. Recommended background: AS.040.307-308 or equivalent
Prerequisites: AS.040.307 AND AS.040.308 or permission of instructor.
Instructor(s): M. Roller
Area: Humanities.

AS.040.410. Junior-Senior Capstone: Food and Dining in the Ancient World. 3.0 Credits.
This junior-senior capstone course examines the culture of food and drink, and its associated social practices and values, in the ancient Greek and Roman worlds. The evidence examined will include texts, images, and archaeological remains.
Instructor(s): M. Roller
Area: Humanities.

AS.040.412. Junior-Senior Capstone: The Ancient Senses. 3.0 Credits.
This course offers immersion in the rapidly expanding interdisciplinary field of sense studies, with an emphasis on the questions posed thereby to classicists and the humanities generally. It should be useful both to students of antiquity with an interest in the senses and to others who want to explore the role of antiquity in shaping sensory theories.
Instructor(s): M. Butler
Area: Humanities.

AS.040.414. Junior-Senior Seminar: The Art of Ancient Tragedy. 3.0 Credits.
This seminar explores the form and function of tragedy in the ancient Greek and Roman worlds. As a Junior-Senior Seminar, this course includes instruction in core research methods within Classics and culminates in an individualized research project. Classics majors only
Instructor(s): J. Smith
Area: Humanities.

AS.040.501. Independent Study. 3.0 Credits.
Instructor(s): Staff.

AS.040.502. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.040.519. Honors Research. 3.0 Credits.
Instructor(s): Staff.

AS.040.520. Honors Research. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.040.599. Independent Study. 3.0 Credits.
Instructor(s): C. Celenza; M. Roller.

AS.040.601. Italian Renaissance Humanism and Modern Humanities.
This course will reflect on certain key moments in the development of Latinate and Italian Renaissance humanism and will also include reading and discussion of certain recent landmark contributions to the history of the modern humanities.
Instructor(s): C. Celenza.

AS.040.602. Heliodorus.
We shall read and discuss the writing of Heliodorus in the original Greek.
Instructor(s): S. Montiglio.

AS.040.604. Heliodorus II.
We will read the second half of Heliodorus’ Aethiopica in the original Greek and integrate the reading with secondary literature.
Instructor(s): S. Montiglio.

AS.040.606. Topics in Classical Reception.
An exploration of recurring themes and recent trends in the reception of classical antiquity.
Instructor(s): M. Butler.

AS.040.615. Ovid’s Metamorphoses.
In this seminar, we will study Ovid’s Metamorphoses, paying special attention to the text’s generic playfulness and the author’s poetics of illusion. We will also survey recent critical trends in Ovidian studies.
Instructor(s): M. Butler.

AS.040.616. Latin Literature Beyond Hermeneutics.
This seminar will examine various works from the perspective of recent efforts to move beyond language and interpretation, including histories and theories of material texts, sensation, and aesthetic pleasure.
Instructor(s): M. Butler.

AS.040.618. Around the Gracchi: Current Views on Late Republican Culture, Politics, and Economics.
This seminar explores and appraises the recent revolution in our understanding of the culture, politics, and economics of the late Roman Republic, with a thematic focus on how we now understand the Gracchi as historical actors and as cultural phenomena.
Instructor(s): M. Roller.

AS.040.621. Proseminar to Classical Archaeology.
An introduction to research methods and current topics of discussion in the scholarship on Greek and Roman art and archaeology.
Instructor(s): A. Shapiro.

AS.040.638. Ancient Literary Criticism.
This course covers essential Greek and Latin texts (e.g. Plato, Aristotle, Horace, Plutarch) and the commentary tradition (e.g. scholia to Homer and other important authors). Focus is on poetic texts, with some prose.
Instructor(s): J. Smith.

AS.040.653. Ovid, Maker of Images.
In this seminar, we will read excerpts from Ovid’s “Metamorphoses” and consider the reception of these episodes in the visual arts from antiquity to the 21st century.
Instructor(s): H. Valladares.

AS.040.655. Attic Hero Cults.
This seminar will combine the evidence of literary and epigraphical sources with archaeological material (votive reliefs, vase iconography) to explore the central role of hero cult in the religious life of ancient Athens. Cross-listed with History of Art
Instructor(s): A. Shapiro.

AS.040.657. Apollonius of Rhodes.
We shall read and discuss significant portions of Apollonius of Rhodes’ Argonautica in the original Greek.
Instructor(s): S. Montiglio.
We shall read Musaeus' "Hero and Leander" and collateral texts, including Ovid's two letters "authored" by the two protagonists and several sections from the ancient novels, which have influenced Musaeus. If students are interested and time allows, we will read some modern re-writings of this wonderful love story.
Instructor(s): S. Montiglio.

AS.040.665. Survey of Greek Literature.
An intensive survey of Greek poetic and prose texts, which emphasizes reading for comprehension and speed. Texts range from Homer to Lucian.
Instructor(s): J. Smith
Area: Humanities.

This seminar focuses on early Greek hexameter poetry, especially Hesiod, in the context of ancient Greek performance culture and ancient reception. Students will be introduced to current research on comparative mythology and religion.
Instructor(s): D. Yatromanolakis.

AS.040.671. Greek Portraiture and Society.
This seminar will explore the development of Greek portrait sculpture from the Early Classical through the Hellenistic periods and the contexts of its display in Greek cities.
Instructor(s): A. Shapiro.

AS.040.687. Proseminar in Classical Philology.
An overview of research areas in Classics, with a focus on such disciplines as epigraphy, papyrology, palaeography, as well as various forms of critical theory.
Instructor(s): D. Yatromanolakis.

AS.040.691. Roman Reciprocities.
This seminar investigates Roman reciprocity and social exchange with a focus on the early empire, in light of both classical anthropological theory and recent work on reciprocity by Classicists and others. Substantial Latin readings from Seneca's De Beneficiis and such poetic praise texts as the Laus Pisonis and Panegyricus Messalae.
Instructor(s): M. Roller.

AS.040.693. The Pre-Socratics and Early Plato.
This seminar will focus on the earliest phases of European philosophy. Topics that will be examined include: scholarly approaches to the fragments of major thinkers such as Herakleitos and Empedokles; the concept of "fragment," the transition from the pre-Socratics to early Plato; the later reception of Herakleitos and Pythagoras in European thought.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.696. Apuleius, "The Golden Ass".
We shall read and discuss significant portions of Apuleius' The Golden Ass in the original Greek.
Instructor(s): S. Montiglio.

AS.040.702. Reading Ancient Greek Poetry.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.306.
Instructor(s): S. Montiglio.

AS.040.705. Reading Ancient Greek Prose.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.305.
Recommended Course Background: AS.040.205-AS.040.206.
Instructor(s): S. Montiglio
Area: Humanities.

This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.307.
Instructor(s): M. Butler.

AS.040.710. Reading Latin Poetry.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.308.
Recommended Course Background: AS.040.207-AS.040.208.
Instructor(s): M. Butler
Area: Humanities.

AS.040.714. Survey of Latin Literature.
This seminar surveys Latin authors and texts represented on the Ph.D. reading list. Intensive, accelerated reading aims to familiarize students with the different authors and their styles, to improve reading speed and accuracy, and prepare students to tackle the remaining works on the reading list by themselves.
Instructor(s): M. Roller.

AS.040.716. Petrarch (1304-74) and the Beginnings of Renaissance Latin.
This course will provide close readings of certain Latin texts by Petrarch, with attention to his letters and to other prose works.
Instructor(s): C. Celenza.

AS.040.801. Independent Study.
Instructor(s): Staff.

AS.040.802. Independent Study.
Instructor(s): Staff.

Instructor(s): D. Yatromanolakis.

AS.040.809. Exam Preparation.
Study in preparation for a comprehensive oral exam, required to become a PhD candidate, and consisting of three fields in classics and related areas.
Instructor(s): S. Montiglio.

AS.040.810. Exam Preparation.
Study in preparation for a comprehensive oral exam, required to become a PhD candidate, and consisting of three fields in classics and related areas
Instructor(s): S. Montiglio.

No Audits.
Instructor(s): Staff.

AS.040.815. Dissertation Research.
No Audits.

Cross Listed Courses

History of Art

AS.010.205. The Painted Worlds of Early Greece: Fantasy, Form and Action. 3.0 Credits.
This course explores the creation and role of early Aegean wall painting. Found primarily in palaces, villas and ritual spaces, these paintings interacted with architecture to create micro-worlds for social activities taking place in their midst. Their subjects range—from mythological to documentary, from ornamental to instructive. They depict dance and battle, fantastical beasts and daily life. We examine their complex relationship to lived reality as well as the activities that surrounded them, from their crafting, to performance of rituals, to their role in “international” relations.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.010.208. The Disappearing Wall: Roman Frescoes in Context. 3.0 Credits.
The course introduces ancient Roman wall painting from Pompeii and Rome as images painted on “disappearing walls.” We will analyze these and other murals in historical, archaeological and museum contexts.
Instructor(s): S. O’Connell
Area: Humanities
Writing Intensive.

AS.010.222. At the Crossroads of the Mediterranean: The Art and Archaeology of Ancient Sicily. 3.0 Credits.
Sicily, with its natural resources and strategic position in the Mediterranean Sea, was a place of intense cultural exchange in the ancient world. For over a millennium the successive Phoenician, Carthaginian, Athenian, and Roman Empires fought for control of the island. This course will examine the history, art, and archaeology of Sicily from the Iron Age through Late Antiquity, in order to understand the ways in which the local inhabitants sought to articulate identities for themselves within this complex situation. There will be a particular focus on the Classical Greek, Hellenistic, and Roman periods of Sicily in order to better understand how these different cultures interacted within the larger Mediterranean. We will draw on methods and readings from the History of Art, Classics, and Archaeology. This course will take advantage of Baltimore’s museums and together we will visit the collections of ancient art at the Johns Hopkins Archaeology Museum (JHUAM), the Walters Art Museum, and The Baltimore Museum of Art (BMA). There will be a final paper.
Instructor(s): N. Berlin
Area: Humanities.

AS.010.300. Houses of the Ancient Mediterranean. 3.0 Credits.
In the ancient world the house was not merely a private space for interacting with family and close friends, but the setting for a diverse array of social rituals and activities. This course will examine the houses of the ancient Mediterranean, from the Bronze Age through Late Antiquity, in order to better understand how they acted as medium through which culture is passed down and transformed. There will be a particular focus on the architecture and décor of such residences and we will draw on methods and readings from the History of Art, Classics, and Archaeology. This course will take advantage of Baltimore’s museums and together we will visit the collections of ancient art at the Johns Hopkins Archaeology Museum, the Walters Art Museum, and The Baltimore Museum of Art (BMA). We will also visit the BMA’s current installation, “Imagining Home,” whose exploration of home as a universal theme is directly related to the goals of this course. There will be a final paper.
Instructor(s): N. Berlin
Area: Humanities.

AS.010.303. Flavian Art, AD 69-96. 3.0 Credits.
This course investigates Roman art and architecture during the Flavian age, in Rome and in the provinces of the empire. With the Flavians, the capital of the empire enjoyed a period of intense building activity: the great projects of Vespasian and Domitian radically transformed its image. Methodologically the focus will be on the integration of diverse sources (archaeological evidence, architecture, sculpture, mosaic, painting, epigraphy and literary sources) to reconstruct the built environment of Rome and other towns (Pompeii, Herculaneum, etc).
Instructor(s): P. Tucci
Area: Humanities.

AS.010.308. Art and Architecture in Republican Rome. 3.0 Credits.
The course investigates the influence of the Hellenistic world on Roman artists, architects and patrons during the Republican age (509-31 BC).
Instructor(s): P. Tucci
Area: Humanities.

AS.010.313. The Archaeology of the City of Rome. 3.0 Credits.
The course covers many aspects of the archaeology of Rome relying on recent research and employing the latest methodologies. The classes are organized thematically and cover art and architecture from the foundation of the city to late antiquity. There will be a final paper.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.321. Pompeii: The Art and Architecture of a Roman Town. 3.0 Credits.
Pompeii, buried by the eruption of Mons Vesuvius in AD 79, offers the best evidence of everyday life in the Roman world. The course examines its public buildings and houses, as well as the main villas outside the city walls. A final paper will be required.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.323. Art of the Roman Empire. 3.0 Credits.
This course explores Roman art and architecture in the imperial age (late 1st century BC - 4th century AD) with an emphasis on individual monuments and their decorative elements.
Instructor(s): P. Tucci
Area: Humanities.
AS.010.324. Art and Architecture in the Augustan Age. 3.0 Credits.
Investigates Roman art and architecture during the Augustan age (31 BC – AD 14). Augustus’ cultural program influenced many aspects of Roman life, leading to the creation of a new visual language that transformed Roman society. Methodologically, the focus will be on the integration of diverse sources to reconstruct and discuss the images and the built environment of the Augustan age.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.412. Houses, villas, and towns in Latium and Campania. 3.0 Credits.
The course combines an analysis of Roman houses and villas with a discussion of cultural, social and environmental factors, along with the wider political and social meanings of urban planning. There will be a final paper.
Instructor(s): P. Tucci
Area: Humanities.

AS.010.421. Creating Sacred Space in the Ancient and Medieval World. 3.0 Credits.
What makes a space sacred? How is it different from other spaces? This seminar explores the various means - visual, artifactual, architectural, and performative - of creating sacred space in the ancient and medieval worlds of the Near East and Mediterranean. Possible cases for study include early Sumerian temples, state-sponsored Assyrian temples, votive deposits, Greek sanctuaries, sanctuaries and landscape, early medieval Jewish, Christian, and Islamic cult buildings, cave sanctuaries, pilgrimage sites, icons and sacred space.
Instructor(s): M. Feldman
Area: Humanities
Writing Intensive.

AS.010.471. Roman Painting and Sculpture. 3.0 Credits.
This seminar explores Roman wall painting and sculpture tracing their origins, chronological development, subjects, social context, and techniques, and highlighting their influence on European artists from the Middle Ages to the Neoclassical period.
Instructor(s): P. Tucci
Area: Humanities.

The course explores the significance of the Severan marble plan of Rome and its potential to shed new light on the building program of Septimius Severus and Caracalla.
Instructor(s): P. Tucci.

AS.010.655. Religion in Roman Art.
This course explores the relationships between Roman art and religion through a survey of key topics and issues, from the archaic period to late antiquity, providing an introduction into how to use both textual and material evidence as sources for understanding Roman art and society.
Instructor(s): P. Tucci.

Near Eastern Studies
AS.130.110. Introduction To Archaeology. 3.0 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): E. Anderson
Area: Humanities, Social and Behavioral Sciences.

AS.130.258. Ceramic Analysis in Archaeology. 3.0 Credits.
At archaeological sites following the invention of pottery roughly 10,000 BCE, ceramics are the single most frequent and ubiquitous class of artefact that archaeologists uncover. This class, which will be conducted in the Hopkins Archaeological Museum as a combination of lectures, discussions, and hands-on interactions with ancient and modern ceramics, surveys the methods and interpretive techniques that archaeologists use when studying this important category of material culture. Specific topics include manufacturing techniques, craft specialization, typology and chronology, production and exchange, scientific analyses, stylistic and functional analysis, and socio-political organization.
Instructor(s): J. Osborne
Area: Humanities.

Medicine, Science and the Humanities
AS.145.101. Death and Dying in Art, Literature, and Philosophy: Introduction to Medical Humanities. 3.0 Credits.
This team-taught course offers an introduction to the new concentration in medicine, science, and humanities by approaching the topic of death and dying from historical, anthropological, philosophical, theological, literary and art historical perspectives.
Instructor(s): B. Wegenstein; C. Wiener; E. Ender; J. Smith
Area: Humanities
Writing Intensive.

Philosophy
AS.150.134. Freshman Seminar: Socrates in Context. 3.0 Credits.
A study of Socrates as portrayed by his contemporaries, and of intellectual and political trends to which he may have been reacting. Authors will include Plato, Xenophon and Aristophanes. Freshmen Only.
Instructor(s): R. Bett
Area: Humanities.

AS.150.201. Introduction To Greek Philosophy. 3.0 Credits.
A survey of the earlier phase of Greek philosophy. Socrates, Plato, and Aristotle will be discussed, as well as two groups of thinkers who preceded them, usually known as the pre-Socratics and the Sophists.
Instructor(s): R. Bett
Area: Humanities.

AS.150.401. Greek Philosophy: Plato and His Predecessors. 3.0 Credits.
A study of pre-Socratic philosophers, especially those to whom Plato reacted; also an examination of major dialogues of Plato with emphasis upon his principal theses and characteristic methods. Cross-listed with Classics.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.402. Aristotle. 3.0 Credits.
A study of major selected texts of Aristotle.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.403. Hellenistic Philosophy. 3.0 Credits.
A study of later Greek philosophy, stretching roughly from the death of Aristotle to the Roman imperial period. Epicureans, Stoics, and Skeptics will be the main philosophical schools examined.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.
**German Romance Languages Literatures**

AS.211.475. Inside the Writer's Laboratory. 3.0 Credits.

How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the "laboratory" of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.

Instructor(s): S. Miglietti  
Area: Humanities

Writing Intensive.

AS.214.347. Petrarch and the Beginnings of the Renaissance. 3.0 Credits.

This course will focus on the life, work, and thought of Francesco Petrarca, or "Petrarch." Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.

Instructor(s): C. Celenza  
Area: Humanities

Writing Intensive.

AS.214.377. Gendered Voices. 3.0 Credits.

The course will explore the notion of 'voice' in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the 'voice' in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa's The Siren and Italo Calvino's A King Listens.

Instructor(s): E. Refini  
Area: Humanities

Writing Intensive.

AS.214.390. Machiavelli: A Renaissance Master. 3.0 Credits.

Who was Niccolò Machiavelli? The author of the Italian Renaissance's most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli's major works and to the intellectual, social, and political contexts that shaped his thinking.

Instructor(s): C. Celenza  
Area: Humanities

Writing Intensive.

AS.214.437. The Intellectual World of the Italian Renaissance. 3.0 Credits.

This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the "lost" Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin -- not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance "humanists," inspired by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural renewal. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their "native" tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.

Instructor(s): C. Celenza  
Area: Humanities

Writing Intensive.

AS.214.445. Boccaccio's Decameron and the Multiplicity of Story-Telling. 3.0 Credits.

Boccaccio's Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio's masterpiece on its own terms and in relation to the development of story-telling, from gossipy "news" (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints' lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and filmic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian. Those students should enroll in section 2 which will be awarded 4 credits.

Instructor(s): W. Stephens  
Area: Humanities

Writing Intensive.
AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3.0 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Pa.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.637. The Intellectual World of the Italian Renaissance.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin — not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspired by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.655. Translating Knowledge: Brunetto’s Tresor and Dante’s Convivio.
By focusing on Brunetto Latini’s Tresor and Dante Alighieri’s Convivio, the seminar will examine the notion of “encyclopedic knowledge” in the Middle Ages. The two works — both examples of “translation” — call traditional ideas of knowledge into question. The seminar will study the Convivio as a response to the Tresor and will situate Dante’s project within a wider discussion of vernacular translation as a key tool for the dissemination of the classical tradition in the Middle Ages.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.716. Translation and Vernacular Readership in Italy, 1250-1500.
Translation is usually acknowledged as instrumental to the rise of vernacular readership in medieval and early modern Europe. By reconsidering seminal contributions such as Erich Auebarch’s, this seminar will explore the textual and cultural implications of the translative process that played a major role in the medieval reception of antiquity. Special attention will be given to translation theory and its history.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.
AS.214.748. Vico and the Old Science. Giambattista Vico’s Principi di scienza nuova d’intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an “ideal” and “eternal” model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square “sacred history” (the presumed historical accuracy of the Bible) with “profane” or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this “old science” stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

Interdepartmental
AS.360.133. Freshman Seminar: Great Books at Hopkins. 3.0 Credits. Freshman Seminar: Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University’s rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2016 include Homer, Plato, Boccaccio, Diderot, Shelley, Nietzsche, Nabokov, Douglass, and Woolf.
Instructor(s): A. Daniel; E. Patton; S. Weiss; W. Egginton
Area: Humanities
Writing Intensive.

AS.360.134. Great Books at Hopkins II: The Sciences. 3.0 Credits. GREAT Books at Hopkins II: The Sciences will combine readings from philosophy and literature with foundational texts from several scientific disciplines. Readings for this spring will explore links between traditional theories of economics and genetics in the context of literary developments, and will include: Xenophon’s Deconomica, Mendel’s “Experiments on Plant Hybridization,” Marx’s Communist Manifesto, Darwin’s Voyage of the Beagle, Swift’s A Modest Proposal, Wharton’s House of Mirth, and Joyce’s Finnegans Wake.
Instructor(s): E. Patton; M. Roller
Area: Humanities
Writing Intensive.

Study of Women, Gender, Sexuality
AS.363.410. Worshiped Goddesses, Worshiping Women: Femininity, Religion, and Mythology in Ancient Greece. 3.0 Credits. This course examines the Greek goddesses and heroines and the ways in which women worshipped them in antiquity, using an interdisciplinary approach, incorporating literary, iconographical, and archaeological evidence.
Instructor(s): S. Stern.

Program in Museums and Society
AS.389.205. Examining Archaeological Objects. 3.0 Credits. This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.335. Recreating Ancient Greek Ceramics. 4.0 Credits. This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

Cognitive Science
http://www.cogsci.jhu.edu
Cognitive science is the study of the human mind and brain, focusing on how the mind represents and manipulates knowledge and how mental representations and processes are realized in the brain. Conceiving of the mind as an abstract computing device instantiated in the brain, cognitive scientists endeavor to understand the mental computations underlying cognitive functioning and how these computations are implemented by neural tissue. Cognitive science has emerged at the interface of several disciplines. Central among these are cognitive psychology, linguistics, and portions of computer science and artificial intelligence; other important components derive from work in the neurosciences, philosophy, and anthropology. This diverse ancestry has brought into cognitive science several different perspectives and methodologies. Cognitive scientists endeavor to unite such varieties of perspectives around the central goal of characterizing the structure of human intellectual functioning. It is this common object of inquiry that integrates traditionally separate disciplines into the unified field of cognitive science.

Programs in cognitive science at Johns Hopkins University reflect the interdisciplinary nature of the subject, requiring the student to approach the study of the mind/brain from several different investigative perspectives. Programs in cognitive science draw on courses offered by several other departments as well.

Facilities
The department is located in Krieger Hall. Laboratory and office space is provided for graduate students. The department’s research facilities are provided by the following laboratories:

- Language and Cognition Lab (Landau)
- Language Acquisition Lab (Legendre)
- Computational Psycholinguistics Lab (Linzen)
- Cognitive Neuroscience Lab (McCloskey)
- Cognitive and Brain Sciences Lab (Rapp)
- Semantics Lab (Rawlins)
- Computational Linguistics Lab (Smolensky)
• Phonetics/Phonology Lab (Wilson)
• Computational Cognition, Vision, and Learning Group (Yuille)
• Integrated Experimental/Theoretical Grammar Research (IGERT) Lab and Library

Department members also conduct research in the F.M. Kirby Center for Functional Brain Imaging at the Kennedy Krieger Institute and in other laboratories at Johns Hopkins School of Medicine.

Undergraduate Programs

Our cognitive science undergraduate program reflects the interdisciplinary nature of the field, allowing students to approach the study of the mind and brain from multiple perspectives. Students gain broad knowledge of the field as a whole, plus a greater depth of the understanding in two of the sub-disciplines within the field. Training emphasizes not only learning about the principal theories and evidence, but also development of the conceptual and practical skills needed for understanding and conducting theoretical and empirical work in the field.

Our department offers a B.A. in Cognitive Science as well as a Linguistics Minor (p. 159).

B.A. in Cognitive Science

Also see Requirements for a Bachelor's Degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree).

Cognitive Science Major Requirements

The required courses for cognitive science majors are divided into five general areas, as described below. The program is structured so as to ensure some exposure to each of the five areas. In addition, it provides in-depth training in two of the areas, deemed focal areas, chosen by the student. Majors in cognitive science thus acquire a broad perspective which will enable them to situate particular research disciplines within the overall study of the mind/brain.

Areas of Focus: Students must take courses in all five focal areas; however, two focal areas must be chosen in which a greater selection of courses is required. Courses offered by our department and other affiliated departments (e.g., Departments of Psychological and Brain Sciences, Philosophy, Computer Science, Neuroscience, etc.) may be used to satisfy the requirements for these areas of concentration. Examples of courses that satisfy the requirements for each area can be found on our website. (http://cogsci.jhu.edu/undergraduate/cognitive-science-major) However, please note that courses change over time, and some courses are not offered every year. The Director of Undergraduate Studies (http://www.advising.jhu.edu/directors.php) can answer questions about which courses qualify for each focal area.

• Cognitive Psychology/Neuropsychology
• Linguistics
• Computational Approaches to Cognition
• Neuroscience
• Philosophy of Mind

B.A. Coursework

Introductory Course

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.050.101</td>
<td>Cognition</td>
</tr>
</tbody>
</table>

Two Focal Areas, see areas above

Three courses in each of the two selected focal areas.

At least one course in each area must be at the 300-600 level, not including research, readings, or practica.

Three Non-Focal Areas

One course at any level from each of the three non-focal areas.

Additional Upper-Level Courses

Nine credits at the 300-600 level, chosen from any focal areas or other cognitive science offerings.**

Math Requirement (Option A or B)

Math Option A: Any two of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.110.106</td>
<td>Calculus I (Biology and Social Sciences) or AS.110.108</td>
</tr>
<tr>
<td>AS.110.107</td>
<td>Calculus II (For Biological and Social Science) or AS.110.109</td>
</tr>
</tbody>
</table>

Math Option B: Statistics Sequence, all three of the following courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
</table>
| EN.553.111 | Statistical Analysis I | annihilates Director of Undergraduate Studies (http://www.advising.jhu.edu/directors.php) can answer questions about which courses qualify for each focal area. **

Foreign Language Requirement

One foreign language through the intermediate level OR two foreign languages at the elementary level.

* Up to three credits of cognitive science research or practica may apply to this requirement.

** If cognitive psychology/neuropsychology is a focal area, the statistics sequence is required and should be completed by the end of the sophomore year, if possible.

Additional Cognitive Science Major Information

• Departmental requirements may not be taken Satisfactory/Unsatisfactory, with the exception of research and practica.
• A grade of C- or better must be earned in all major requirements.

Sample Program

The below sample program that demonstrates how a student with the focal areas (p. 158) of Cognitive Psychology/Neuropsychology and Linguistics might complete the Cognitive Science major requirements in four years. In this scenario, the student has not placed out of any foreign language requirements. Each student's path through the program will have variation depending on the two focal areas they choose to pursue within the major.
**Departmental Honors**

To receive Honors in Cognitive Science, graduating seniors must have a major GPA of 3.5 or higher and complete an Honors Clearance (http://www.advising.jhu.edu/honors.php) with the department’s Director of Undergraduate Studies (http://www.advising.jhu.edu/directors.php)’s approval. Only courses directly applied to a student’s cognitive science major, including math and foreign language requirements, will be included in the major GPA calculation. All other elective courses should be excluded from the major GPA calculation. If the GPA requirement is met, the departmental honors will appear on the student’s transcript and will be indicated in that year’s Commencement program.

**Excellence in Cognitive Science Award**

Each year at Commencement, a cognitive science graduating senior with a stellar academic and research record. The department’s faculty make nominations and the Director of Undergraduate Studies announces the winner. This honor is accompanied by a $500 award.

**Minor in Linguistics**

A minor in linguistics is available to undergraduates majoring in any department, except for cognitive science majors who choose linguistics as a focal area. Students intending to minor in linguistics should declare their intention, preferably by the beginning of junior year. A grade of C- or better must be earned in all minor requirements.

**Linguistics Minor Requirements**

**Foreign Language**

One foreign language through the intermediate level OR two foreign languages at the elementary level.

**Linguistics Courses**

Six courses in linguistics that fall under the linguistics focal area.

Four of the required six linguistics courses must be at the 300-level or above, excluding research and readings.

**Graduate Programs**

(For precise and up-to-date information on these M.A. and Ph.D. graduate programs, visit www.cogsci.jhu.edu/graduate.)

**MA Requirements for Admission**

This intensive, one-year M.A. program is intended to appeal to students who have undergraduate degrees in linguistics, psychology, computer science, neuroscience, and other sub-disciplines of cognitive science. Prominent in this program is the emphasis of faculty mentorship of the students during the application period and throughout the duration of the program. There are two distinct tracks in the M.A. program: Course Track and Research Track. Besides traditional required admissions materials, the Research Track is the only track that has a coursework prerequisite: three credits of undergraduate research or equivalent. Please visit the link at the beginning of this section to find more detailed information on the program and specific admissions requirements.

**MA Degree Requirements**

Completion of this M.A. program strengthens the qualifications of students who will be applying for Ph.D. programs and also provides career opportunities in areas including science writing, research coordinator, human factors IT, and community college teaching, among others.

**Course Track:** Students in this track must complete 12 courses with a grade of B- or better. See the course requirements below. Additionally,
MA students are expected to take a research ethics course (AS.360.625 Responsible Conduct of Research). See the coursework requirements below. As the capstone event for a student’s completion of the program, he/she must produce a portfolio of accomplishments from the program (e.g., course assignments, seminar papers) overseen by the faculty adviser, prepare a reading list and set of discussion questions, and present what has been learned from the year of study at an Oral Presentation supervised by two faculty members.

**MA Course Track Coursework**

Courses: seven courses, 600 or above  
Lab or Research Seminars: two courses, 800-level  
Directed Reading or Research: three total courses, one during Intersession  
AS.360.625 Responsible Conduct of Research  
Capstone: Portfolio and Oral Exam

* Up to three courses may be substituted by 300/400-level courses with a mentor’s written permission.

**Research Track:** Students in this track must complete 12 courses. Students must work on full-time research overseen by their faculty adviser and must complete maintain a B- or better in all coursework. Additionally, MA students are expected to take a research ethics course (AS.360.625 Responsible Conduct of Research). See the course requirements below. At the end of the program, a student in the research track must produce and defend research paper that is approved by the faculty adviser.

**MA Research Track Coursework**

Formal Methods or Statistics course (one of the following):  
AS.050.670 Mathematical Models of Language  
AS.050.671 Bayesian Inference  
AS.050.672 Foundations of Neural Network Theory  
AS.200.314 Advanced Statistical Methods (or equivalent)  
Lab or Research Seminar: two courses, 800-level  
Additional Courses: three courses, 600-level or above  
Directed Research: six courses, one during Intersession  
AS.360.625 Responsible Conduct of Research  
Capstone: Research Paper and Oral Defense

**Financial Support**

No regular funding is provided to students in the M.A. Research and Course Tracks, though a 50% reduction in tuition is offered to students with JHU undergraduate degrees. Students will be encouraged to seek funding from both internal and external sources.

**Doctoral Program**

**PhD Requirements for Admission**

A program of study leading to the Ph.D. degree is open to students with a bachelor's or master’s degree in cognitive science or one of the several areas that contribute to it. Prospective doctoral students would be well advised to take courses in cognitive psychology, linguistics, and computer science. Some preparation in the foundations of contemporary neuroscience is also an asset, as is training in the philosophical issues surrounding the study of mind and consciousness. However, there are no fixed prerequisites (in the form of specific required courses) for admission to the doctoral program. The Department of Cognitive Science invites inquiries from students who are prepared in any of the related fields and who are interested in extending their work to the broader study of the mind/brain.

**PhD Degree Requirements**

The Department of Cognitive Science's Ph.D. requirements consist of coursework, foreign language competence, teaching experience, and research papers. The requirements are designed to meet the following goals:

- **Depth:** Students become expert in their primary area of research interest and also are prepared so that they will be competitive for academic positions in one of the traditional disciplines. Students take 8 - 10 advanced courses that the student, in conjunction with his/her advisory committee, determines to be important for achieving expertise in a chosen research area and marketplace competitiveness in one of the traditional areas: cognitive psychology/neuropsychology, computer science or linguistics.

- **Breadth:** Students develop the ability to understand, appreciate and critically evaluate work in the various sub-disciplines of cognitive science by taking a selection of courses, two each in the areas of cognitive psychology/neuropsychology, computation and linguistics and one each in philosophy and cognitive neuroscience. Students may place out of breadth courses based on undergraduate coursework and (for certain courses) based on examination. It is not uncommon for a student to place out of two breadth requirements.

- **Integration:** Students learn to integrate theory and method across sub-disciplines through specially-designed integrative courses and regular seminars involving the entire department.

**Breadth**

**Cognitive Neuroscience**

One course

**Philosophy**

One course in philosophy of mind/language/science

**Cognitive Psychology/Neuropsychology**

- AS.200.314 Advanced Statistical Methods (To be completed early in the program, preferably the first semester))
- AS.050.639 Cognitive Development (or an approved course or seminar on a topic outside the area of language)
- or AS.050.315 Cognitive Neuropsychology of Visual Perception: The Malfunctioning Visual Brain

**Computation**

- AS.050.672 Foundations of Neural Network Theory
- AS.050.671 Bayesian Inference (OR the equivalent, e.g., computational linguistics, OR a Programming course such as C++, Java, etc.)

**Language**

- AS.050.670 Mathematical Models of Language
- AS.050.625 Phonology I
- or AS.050.620 Syntax I

**Integration**

- AS.050.626 Foundations of Cognitive Science

Departmental Seminar (Course topics change each time this is offered. All students and faculty in the program attend these class meetings. Only during one semester do students write a paper and direct a topic for credit.)

**Depth: Area of Focus**
Approximately 8 to 10 courses, selected in conjunction with the student's advisory committee, to achieve depth in a chosen research area and marketplace competitiveness: computer science, psychology/neuropsychology, or linguistics.

</tr>
</tbody>
</table>

### Research Papers & Dissertation

Emphasis is placed on producing two research papers prior to writing a dissertation. These two research papers are typically presented at conferences and often lead to separate journal publications. Students are encouraged to incorporate the two research papers into their dissertation.

**Research Papers & Dissertation**

- First Research Paper*: completion of which marks achievement of an M.A. within the Ph.D. program
- Second Research Paper*: completion of which signals readiness to discuss a career path with an adviser
- Dissertation Proposal detailing a significant research project and the methods to be used
- Graduate Board Oral Exam defending a Ph.D. Dissertation that presents an original contribution to some area(s) of cognitive science in a format approaching publication standards

*The two research papers must each employ a different research methodology within cognitive science, e.g., theoretical linguistics and psychology, supervised by two appropriate faculty members.

### Financial Support

The department provides competitive levels of funding for Ph.D. students covering tuition and living expenses. Research expenses, including some support for travel to present papers at scholarly meetings, are also provided. If a student maintains an academic good standing, funding is extended up to five years of total support. Students are encouraged to apply for external graduate fellowship opportunities (NSF, NIH, DoD, etc.). As funded entities, our graduate students are expected to engage in full-time research during the summer months and the January intersession in addition to their regular coursework, TA responsibilities, and participation in academic departmental talks and events.

For current faculty and contact information go to http://cogsci.jhu.edu/people

### Faculty

#### Chair

Brenda Rapp

Professor: cognitive neuropsychology, spelling, spoken language production, spatial frames of reference, reading and neural bases of recovery of function

#### Professors

Barbara Landau

Dick and Lydia Todd Faculty Development Professor: language acquisition, cognitive development, spatial representation, acquisition of the lexicon.

Géraldine Legendre

syntax, optimality theory, Romance and Balkan morphology and syntax, acquisition of syntax.

Michael McCloskey

Cognitive neuropsychology, vision, spatial and lexical representation, foundations of cognitive science

Paul Smolensky

Krieger-Eisenhower Professor of Cognitive Science: grammatical theory, neural networks, optimality theory.

Alan Yuille

Bloomberg Distinguished Professor: computational models of vision, mathematical models of cognition, and artificial intelligence and neural networks.

#### Associate Professors

Kyle Rawlins

natural language semantics and pragmatics, the syntax/semantics interface, syntax.

Colin Wilson

theoretical phonology, experimental phonology, computational cognitive science.

#### Assistant Professor

Tal Linzen

computational psycholinguistics

#### Professor Emeritus

Luigi Burzio

theoretical phonology, morphology, and syntax, Romance linguistics.

#### Secondary Appointments

Marina Bedny

Assistant Professor (Psychological and Brain Sciences): brain development and plasticity, cognitive neuroscience, concepts.

Howard Egeth

Professor (Psychological and Brain Sciences): perception, attention, cognition, psychology, law.

Lisa Feigenson

Professor (Psychological and Brain Sciences): cognitive development, numerical cognition.

Jonathan Flombaum

Associate Professor (Psychological and Brain Sciences): Visual perception, attention, cognition.

Steven Gross

Associate Professor (Philosophy): philosophy of language, philosophy of mind, metaphysics.

Justin Halberda

Professor (Psychological and Brain Sciences): cognitive development, reasoning, language acquisition.

#### Joint Appointments

Dana Boatman
Professor (Neurology and Otolaryngology, School of Medicine): speech perception, auditory processing disorders, auditory neurophysiology.

John Desmond
Professor (Neurology, School of Medicine): neuroimaging, transcranial magnetic stimulation methods to investigate neural correlates of behavior.

Jason Eisner
Professor (Computer Science, Whiting School of Engineering): computational linguistics (syntax and phonology), natural language processing, statistical machine learning, programming language design.

Barry Gordon
Professor of Therapeutic Cognitive Neuroscience (Neurology, School of Medicine): cognitive neurology, cognitive neuroscience, language, aphasia, memory, amnesia and memory disorders, autism, computational models of cognition, and cognitive disorders.

Argye Hillis-Trupe
Professor (Neurology, School of Medicine): language impairments in acute stroke, hemi-spatial neglect after stroke, relationship between cognitive impairments and regions of hypoperfused brain.

Nazbanou "Bonnie" Nozari
Assistant Professor (Neurology, School of Medicine): monitoring and metacognitive processes over language, selective attention in language production, computational models of language production, aphasia.

Kyrana Tsapkini
Assistant Professor (Neurology, School of Medicine): language–combining cognitive science, psychology, neural science approaches.

Benjamin Van Durme
Assistant Research Professor (Computer Science, Whiting School of Engineering; Senior Research Scientist, Human Language Technology Center of Excellence): natural language processing, specifically semantics; streaming/randomized algorithms.

For current course information and registration go to https://sis.jhu.edu/
classes/

Courses

AS.050.101. Cognition. 3.0 Credits.
Introductory course exploring the study of human mental processes within the field of cognitive science. Drawing upon cognitive psychology, cognitive neuropsychology, cognitive neuroscience, linguistics, and artificial intelligence, the course examines theory, methods, and major findings in work on vision, reasoning, and language.
Instructor(s): T. Linzen
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.102. Language and Mind. 3.0 Credits.
Introductory course dealing with theory, methods, and current research topics in the study of language as a component of the mind. What it is to "know" a language: components of linguistic knowledge (phonetics, phonology, morphology, syntax, semantics) and the course of language acquisition. How linguistic knowledge is put to use: language and the brain and linguistic processing in various domains. Cross-listed with Neuroscience and Psychology.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.105. Introduction to Cognitive Neuropsychology. 3.0 Credits.
When the brain is damaged or fails to develop normally, even the most basic cognitive abilities (such as the ability to understand words, or perceive objects) may be disrupted, often in remarkable ways. This course explores a wide range of cognitive deficits, focusing on what these deficits can tell us about how the normal brain works. Topics include brain anatomy and causes of brain damage, reading and spelling deficits, unilateral spatial neglect, hemispheric disconnection, cortical plasticity, and visual perception of location and orientation. Students read primary sources: journal articles that report deficits and discuss their implications.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.107. Language and Advertising. 3.0 Credits.
Advertising pervades our culture; interactions with advertising are an unavoidable fact of modern life. This class uses tools from linguistics and cognitive science to analyze these interactions, and understand the impact of advertising on its viewers. A central theme is to treat ads as communicative acts, and explore the consequences -- what can theories of communication (from linguistics, psychology, and philosophy) tell us about ads? How do ads use central features of human cognition to accomplish their aims? Do ads manipulate, and if so, how successfully? The theories of communication we explore include Gricean pragmatics, theories of speech acts, linguistic theories of presuppositions, and more. Students will collect, analyze, and discuss advertisements in all mediums.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.128. Freshmen Seminar: Born to Talk: Language in the Human Mind. 3.0 Credits.
Human infants learn their native language in less than 5 years with no direct teaching from adults. This mysterious fact is the basis of the modern study of language as a cognitive and computational system. In this seminar we will review major findings about how children learn the sound system, words, and grammar of their first language, focusing on how the evidence reveals the role of biological structures and environmental influences on language development. Weekly readings will include summary texts, original research articles, and coverage of language science in the popular media. Although language development is a topic of real importance to parents, educators, and policy-makers, it is often difficult to disseminate findings in a way that the public can understand. In weekly writing assignments, students will practice "translating" scientific reasoning for a general audience.
Freshman Seminar
Instructor(s): S. Lewis
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.203. Cognitive Neuroscience: Exploring the Living Brain. 3.0 Credits.
This course surveys theory and research concerning how mental processes are carried out by the human brain. Currently a wide range of methods of probing the functioning brain are yielding insights into the nature of the relation between mental and neural events. Emphasis will be placed on developing an understanding of both the physiological bases of the techniques and the issues involved in relating measures of brain activity to cognitive functioning. Methods surveyed include electrophysiological recording techniques such as EEG, ERP, single/multiple unit recording and MEG; functional imaging techniques such as PET and fMRI; and methods that involve lesioning or disrupting neural activity such as cortical stimulation, animal lesion studies, and the study of brain-damaged individuals. (Co-listed as AS.080.203 in Neuroscience.)
Instructor(s): Staff
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.206. Bilingualism. 3.0 Credits.
Do children get confused when they grow up exposed to more than one language? Is it possible to forget one’s native language? Are the first and second language processed in different areas of the brain? How does brain damage impact the different languages of a polyglot? Does knowing a second language affect non-linguistic cognitive processing? This course will address questions such as these through an exploration of mental and neural processes underlying bilingual and multilingual language processing.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.235. Theory of Mind and the Development of Language. 1.0 Credit.
The course offers an overview of recent research on language and social cognition. It focuses on Theory of Mind (ToM) and the development of language. Theory of Mind is the ability to attribute mental states to oneself and others and to understand that others have beliefs, desires, and intentions that are different from one’s own. The development of human language is closely related to the development of ToM.
Instructor(s): A. Tamm
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.240. World of Language. 3.0 Credits.
This hands-on course exposes students to the fascinating variety – and uniformity – to be found among the world’s 6000 languages through group lectures on a variety of topics as well as actual linguistic fieldwork conducted in small groups with a native speaker of a language unknown to the participants. This course is a good preparation for upper-division linguistics courses.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.312. Cognitive Neuroimaging Methods in High-Level Vision. 3.0 Credits.
This course is an advanced seminar and research practicum course. It will provide the opportunity to learn about fMRI methods used in the field of vision science and for students to have hands-on experience to develop, design and analyze a research study on topics in the cognitive neuroscience field of high-level vision. In the first part of the course students will read recent fMRI journal papers and learn about common fMRI designs and analysis methods; in the second part of the course students will conduct a research study as a group to address a research question developed from readings. Students are expected to write a paper in a journal article format at the end of the course and to present their results in front of the class. Research topics will vary but with special focus on topics in object, scene and space recognition. Cross-listed with Neuroscience and Psychology. instructor’s permission required.
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

When we think about our ability to see, we tend to think about our eyes, but in fact vision happens mostly in the brain. This course explores the remarkable perceptual deficits that occur when the visual regions of the brain are damaged or fail to develop normally, focusing on what these perceptual malfunctions tell us about normal visual perception. Topics include visual system anatomy and physiology; functional specialization in the lower visual system as revealed by cerebral achromatopsia (color blindness resulting from brain damage) and akinetopsia (impaired motion perception); cortical plasticity in the visual system; spatial deficits in perception and action; and the implications of high-level visual deficits, including prosopagnosia (impaired face recognition), Charles Bonnet syndrome (complex visual hallucinations in blind areas of the visual field), blindsight (accurate responding to visual stimuli despite apparent inability to see them), and Anton’s syndrome (denial of blindness).
Prerequisites: AS.050.105 OR AS.050.203 OR AS.080.203 OR AS.050.101 OR AS.200.110 OR AS.200.211 or instructor’s permission.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.317. Semantics I. 3.0 Credits.
This is an introduction to the study of meaning in natural language. We address the conceptual and empirical issues in semantic theory and introduce some formal machinery that has been developed to deal with such problems. After discussing foundational questions, we turn to formal semantics and pragmatics, as well as their interfaces with syntax and the lexicon. Specific topics include presupposition, type-driven composition, quantification, lexical aspect, argument structure, and lexical representations of meaning.
Prerequisites: AS.050.107 OR AS.050.102 or instructor’s permission.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.318. Practicum in Language Disorders- Community Based Learning. 2.0 Credits.
This course provides the opportunity to learn about adult aphasias, language disorders which are one of the most common consequences of stroke. You will receive training in supportive communication techniques and work as a communication partner with an individual with aphasia for two hours per week. Three class meetings for orientation and reading assignments will be held on campus; training and practicum will be conducted at a local aphasia support center. Transportation required. Colisted with Neuroscience (AS.080.400). Additional information can be found on http://krieger.jhu.edu/neuroscience/academics/practicums/practicum-in-language-disorders, the Department of Neuroscience's Website. Find out more on the practicum site at http://www.scalebaltimore.org, SCALE Baltimore. Prerequisites: AS.050.105 OR AS.050.203 OR AS.080.203 OR AS.050.311 or instructor's permission.
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.319. Visual Cognition. 3.0 Credits.
Vision is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd. While we take the visual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The goal of this course is to introduce students to the field of visual cognition, including existing theoretical frameworks and recent research findings. We will explore questions such as: How do we see the visual world? Do we see and remember correctly what's in the physical world? How many items can we keep track of and remember at a time? How is the visual system structured and what are the neural mechanisms underlying visual perception? Meets with AS.050.619. Prerequisites: AS.200.101 OR AS.050.101 OR AS.080.203 OR AS.050.203
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.320. Syntax I. 3.0 Credits.
Introduces the basic methods and means of analysis used in contemporary syntax investigations, practicing with data from different languages. Also offered as AS.050.620. Prerequisites: AS.050.102 OR AS.050.240 or equivalent/see instructor.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.321. Syntax II. 3.0 Credits.
Building on AS.050.320, this course addresses and compares conceptions of syntactic theory that have emerged in the 1980s and 1990s. Discussion focuses on both the substantive and formal properties of the fundamental principles of syntactic theory, as well as the cross-linguistic evidence that has motivated them. When possible, connections will be made to other areas of linguistic inquiry such as processing, acquisition, and computation. The particular choice of topics and conceptions will vary from year to year but may include (1) the contrast between the Principles and Parameters view where syntactic theory is composed of a set of inviolable principles whose form admits a certain amount of cross-linguistic variation, and the Optimality Theory view where the principles are invariant though viable, and cross-linguistic variation is determined by the relative importance of satisfying the various principles; (2) the role of structure building operations in grammar, and the differences between characterizations of well-formedness in terms of sequences of derivational steps and representational well-formedness requirements. Meets with AS.050.621 Prerequisites: AS.050.320[C] or instructor's permission.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.322. Semantics II. 3.0 Credits.
This course extends the material in AS.050.317 to cover advanced but central topics in semantic and pragmatic theory, focusing on intensional semantics (especially possible world semantics and situation semantics). Empirical domains of interest in this class include modality, tense, grammatical aspect, conditionals, attitude and speech reports, questions, and free choice phenomena. Three core theoretical issues addressed in this class are the nature of a compositional account of the above intensional phenomena, the representations of possibilities involved, and the role of the syntax/semantics/pragmatics interface in such an account. Meets with AS.050.622 Prerequisites: AS.050.317[C] or instructor's permission
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.325. Phonology I. 3.0 Credits.
An introduction to the basic principles underlying the mental representation and manipulation of language sounds and their relation to human perception and vocal articulation: how units of sound are both decomposable into elementary features and combined to form larger structures like syllables and words. The role of rules and constraints in a formal theory of phonological competence and in accounting for the range of variation among the world's languages. Also offered as AS.050.625.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.326. Foundations of Cognitive Science. 3.0 Credits.
This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology. Co-listed with AS.050.626.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences Writing Intensive.
AS.050.332. Developmental Cognitive Neuroscienc. 3.0 Credits.
In-depth examination of the current literature on cognitive development in the context of developmental cognitive neuroscience. Please see course prerequisites. Meets with AS.050.632.
Prerequisites: AS.050.101 OR AS.050.339 OR AS.200.132 OR AS.050.105 OR Instructor's Permission.
Instructor(s): B. Landau
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.333. Psycholinguistics. 3.0 Credits.
This course provides a broad survey of current research on language processing in adult native speakers and language learners. Topics include speech perception, word recognition, and sentence production and comprehension. We will discuss the nature of representations that are being constructed in real-time language use, as well as how the mental procedures for constructing linguistic representations could be studied by various behavioral and physiological measures. Also offered as AS.050.633.
Prerequisites: AS.050.102 OR AS.050.240 OR AS.050.317 OR AS.050.320 OR AS.050.325 or instructor’s permission.
Instructor(s): E. Atkinson
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

AS.050.339. Cognitive Development. 3.0 Credits.
This is a survey course in developmental psychology designed for individuals with some basic background in psychology or cognitive science, but little or none in development. The course is strongly theoretically oriented, with emphasis on issues of nature, and development psychology as well as relevant empirical evidence. The principle focus will be early development, i.e., from conception through middle childhood. The course is organized topically, covering biological and prenatal development, perceptual and cognitive development, the nature and development of intelligence, and language learning. Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

Magnetic Resonance Imaging (MRI) is currently the most popular neuroimaging technique for studying how the brain represents mental operations. MRI serves as an incredibly versatile window into how the brain is structured and functionally operates. In this class we explore this versatility by surveying different applications of MRI data including both structural and functional MRI techniques. This course will be a mixture of lecture and in-class practical exercises in a computer lab environment. Each student will be familiarized with basic software associated with MRI data processing, and will be exposed to both traditional and advanced methods of fMRI data design and analysis.
Prerequisites: (AS.050.203 OR AS.080.203 OR AS.050.101) AND (EN.553.111 OR EN.553.211 OR AS.230.205 or EN.550.113 OR EN.553.230 OR EN.553.310 OR EN.553.311 OR EN.553.420 OR EN.553.413 OR AS.280.345 OR AS.200.314 OR EN.560.348)
Instructor(s): J. Purcell
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.344. Writing Matters: Written Language and the Brain. 3.0 Credits.
Written language is undoubtedly one of humanity’s greatest inventions, providing the basis for most all other human innovations. What are the capacities of the human mind that enable written language? How does literacy change the brain? Do differences in writing systems affect how humans learn and process written language? These and other questions will be addressed by examining evidence from experimental studies of individuals with typical written language processing, as well as neuropsychological studies of brain-injured individuals. Throughout the course you will build and revise a cognitive architecture, a theory of how humans process written language, based on the current understanding of the cognitive and neural bases of literacy.
Prerequisites: AS.050.101 OR AS.050.105 OR AS.050.203 OR AS.080.203 OR AS.200.141 or instructor’s permission.
Instructor(s): R. Wiley
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.345. Cognitive and Neural Basis of Executive Control. 3.0 Credits.
This course discusses the concept of executive control, a general class of functions that support more specialized cognitive operations such as language and problem solving, and their neural underpinnings. Discussion will include classification of executive functions, relationship to working memory, domain-generality or specificity of executive control functions, and experimental, neural, and computational approaches to exploring components of executive control, with a special emphasis on the role of cognitive control in the processing of language. The goal of this course is two-fold: to teach students the basic knowledge regarding cognitive and neural mechanisms of executive control, and more importantly to encourage them to put that knowledge to use by asking them to think critically about the readings, to participate in interactive discussions with questions they bring in each week based on the readings assigned for that week, and finally to propose one well thought-out question at the end of the semester and to write a short proposal on how to explore that question. As such, the course puts little emphasis on memorization and a strong emphasis on analytical abilities and integration.
Prerequisites: AS.200.207[C] OR AS.050.333[C] OR EN.553.111[C]
Instructor(s): N. Nozari
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.370. Mathematical Models of Language. 3.0 Credits.
This course will be devoted to the study of formal systems that have proven useful in the cognitive science of language. We will discuss a wide range of mathematical structures and techniques and demonstrate their applications in theories of grammatical competence and performance. A major goal of this course is bringing students to a point where they can evaluate the strengths and weaknesses of existing formal theories of cognitive capacities, as well as profitably engage in such formalization, constructing precise and coherent definitions and rigorous proofs. Also offered as AS.050.670.
Prerequisites: AS.050.101[C] OR AS.050.102[C] OR AS.050.128[C]
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.371. Bayesian Inference. 3.0 Credits.
This course introduces techniques for computational modeling of aspects of human cognition, including perception, categorization, and induction. Possible topics include maximum likelihood and Bayesian inference, structured statistical models (including hierarchical and graphical models), nonparametric models. The course emphasizes the close connections among data analysis, theory development, and modeling, with examples drawn from language and vision. Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.372. Foundations of Neural Network Theory. 4.0 Credits.
Introduction to continuous mathematics for cognitive science, with applications to biological and cognitive network models: real and complex numbers, differential and integral multi-variable calculus, linear algebra, dynamical systems, numerical optimization. Meets with AS.050.672.
Prerequisites: AS.110.106 OR AS.110.108
Instructor(s): P. Smolensky
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.050.373. Neural-Network Modeling of Learning, Language and Cognition. 3.0 Credits.
Connectionism is an approach to Artificial Intelligence computation inspired by how the brain, a network of neurons, works. A connectionist model (or artificial neural network) is a collection of simple processing units that are massively interconnected with each other, and that represents knowledge in its connection pattern. Each processing unit has highly limited computational power but the collection of units as a whole has great computational power (as strong as the Turing machine). Connectionist models have been used to study diverse aspects of human cognition: attention, pattern recognition, memory, categorization, language processing, learning, and decision making. In this seminar, students will learn important concepts, principles, algorithms, and practical skills in connectionist modeling by actually doing connectionist modeling. Students will first play with toy problems to learn various types of connectionist modeling techniques, and will then carry out a team research project. In addition to practical skills, students will learn to be explicit about their assumptions and reasoning when making their (conceptual or implemented) models and to make new observable predictions that can be tested in experiments. Recommended Course Background: Experience with some programming language. Exceptions can be made by seeking instructor’s permission.
Instructor(s): P. Cho
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.050.375. Probabilistic Models of the Visual Cortex. 3.0 Credits.
The course gives an introduction to computational models of the mammalian visual cortex. It covers topics in low-, mid-, and high-level vision. It briefly discusses the relevant evidence from anatomy, electrophysiology, imaging (e.g., fMRI), and psychophysics. It concentrates on mathematical modeling of these phenomena taking into account recent progress in probabilistic models of computer vision and developments in machine learning, such as deep networks. Co-listed with Computer Science as EN.601.485.
Prerequisites: AS.110.106 OR AS.110.108
Instructor(s): A. Yuille
Area: Quantitative and Mathematical Sciences.

AS.050.501. Readings in Cognitive Science/Freshmen. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.502. Readings in Cognitive Science-Freshmen. 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.503. Research in Cognitive Science/Freshmen. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.504. Research Cognitive Science-Freshmen. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.505. Readings in Cognitive Science/Sophomores. 1.0 - 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.506. Readings Cognitive Science-Sophomores. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.507. Research in Cognitive Science/Sophomores. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.508. Research Cognitive Science - Sophomores. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.509. Cognitive Science Internship. 1.0 Credit.
Research current topics in cognitive science.
Instructor(s): B. Rapp.

AS.050.511. Readings in Cognitive Science/Juniors. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.512. Readings Cognitive Science-Juniors. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.513. Research in Cognitive Science/Juniors. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.514. Research Cognitive Science - Juniors. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.515. Readings in Cognitive Science/Seniors. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.516. Readings Cognitive Science - Senior. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.517. Research in Cognitive Science/Seniors. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.518. Research Cognitive Science - Seniors. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.599. Research-Cognitive Science. 0.0 - 3.0 Credits.
Instructor(s): Staff.

Instructor’s permission required. (Also offered as AS.050.312.)
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.617. Semantics I.
Also offered as AS.050.317. See description.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

Vision is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd. While we take the visual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The goal of this course is to introduce students to the field of visual cognition, including existing theoretical frameworks and recent research findings. We will explore questions such as: How do we see the visual world? Do we see and remember correctly what's in the physical world? How many items can we keep track of and remember at a time? How is the visual system structured and what are the neural mechanisms underlying visual perception? Meets with AS.050.319. Recommended Course Background: AS.200.101, AS.050.101, or AS.080.203/AS.050.203
Instructor(s): S. Park.

AS.050.620. Syntax I.
Also offered as AS.050.320.
Instructor(s): G. Legendre

AS.050.621. Syntax II.
Co-taught with AS.050.321. See description.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.622. Semantics 2.
Co-taught with AS.050.322. See description.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.625. Phonology I.
Also offered as AS.050.325. See description.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. (Same as AS.050.326) Recommended Course Background: at least one course at the 300-level or higher in cognitive science, computer science, neuroscience, philosophy, or psychology.
Instructor(s): P. Smolensky
Writing Intensive.

AS.050.671. Bayesian Inference.
Also offered as AS.050.371.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.672. Foundations of Neural Network Theory.
Also offered as AS.050.372. See description.
Instructor(s): P. Smolensky.

The course gives an introduction to computational models of the mammalian visual cortex. It covers topics in low-, mid-, and high-level vision. It briefly discusses the relevant evidence from anatomy, electrophysiology, imaging (e.g., fMRI), and psychophysics. It concentrates on mathematical modelling of these phenomena taking into account recent progress in probabilistic models of computer vision and developments in machine learning, such as deep networks. Also offered as AS.050.375. Co-listed with Computer Science as EN.601.485.
Instructor(s): A. Yuille.

Directed readings on current topics in cognitive science. Instructor approval required.
Instructor(s): Staff.

AS.050.800. Directed Readings.
Guided independent readings in special fields of cognitive science.
Instructor(s): P. Smolensky.

Participants in this graduate seminar will read and discuss current research articles in cognitive neuropsychology of vision or language, and present their own research.
Instructor(s): M. McCloskey.

Permission required. Current issues and ongoing research on human cognition are discussed.
Instructor(s): B. Rapp.

A specialized research seminar for individuals researching language acquisition, cognitive development and the interface between language and cognition. Students must actively carry out empirical or theoretical research in these areas. Permission required.
Instructor(s): B. Landau.

AS.050.814. Research Seminar in Computer Vision.
This course covers advanced topics in computational vision. It discusses and reviews recent progress and technical advances in visual topics such as object recognition, scene understanding, and image parsing.
Instructor(s): A. Yuille.

Instructor(s): K. Rawlins.
Participants in this graduate seminar will read and discuss current research articles in language development and present their own research. Permission required.
Instructor(s): G. Legendre.

Discussion of current computational and experimental research on human language processing.
Instructor(s): T. Linzen.

Topics in phonological, morphological, syntactic, and/or semantic theory. Discussion of the current literature and specifically of the relevance of linguistic results for the study of the mind. Permission required.
Instructor(s): A. Omaki; G. Legendre; K. Rawlins.

A critical analysis of current issues and debates in theoretical syntax. Discussion of on-going research.
Instructor(s): G. Legendre.

AS.050.823. Research Seminar in Phonology.
Permission required.
Instructor(s): C. Wilson.

AS.050.825. Research Seminar in Optimality Theory.
A specialized research seminar on constraint based theories of human language, including Optimality Theory, Harmonic Grammar, and Maximum Entropy models.
Instructor(s): G. Legendre.

Readings and research presentations on varying topics in mathematics, computation, and formal linguistics with bearing on cognitive science.
Instructor(s): C. Wilson.

AS.050.827. Research Seminar in Language Acquisition.
Focus is on current research in acquisition of syntax.
Instructor(s): A. Omaki; G. Legendre.

This seminar will read on-going and recent papers on the cognitive neuroscience research of vision. Permission required.
Instructor(s): S. Park.

Topics range from mathematical analysis of neural networks to computational studies of linguistic structure. Focus is ongoing research and current literature.
Instructor(s): P. Smolensky.

AS.050.832. Research in Language Processes.
Current Topics in Human Language Processing, with discussion of recent developments in theory and experimental study. Permission required.
Instructor(s): A. Omaki.

Current topics in any area of cognitive science, including language and vision, with discussion of recent developments in theory, experimental study, and computational modeling.
Instructor(s): Staff.

AS.050.849. Teaching Practicum.
Permission required. Essential for Teaching Assistants.
Instructor(s): Staff.

Independent study. Intended for graduate students who have completed all degree requirements except for their dissertation but must remain or return to residency status in order to fulfill other obligations. Advisor or department approval required
Instructor(s): Staff.

Cross Listed Courses
Neuroscience
AS.080.203. Cognitive Neuroscience. 3.0 Credits.
This course surveys theory and research concerning how the human brain carries out mental processes. The sections of this course correspond with the sections listed for AS.020.203. All sections will meet together on exams day and guest lecture days. Co-listed as AS.050.203 in Cognitive Science.
Instructor(s): Staff
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.320. The Auditory System. 3.0 Credits.
This course will cover the neuroanatomy and neurophysiology of the human auditory system from the ear to the brain. Behavioral, electrophysiological, and neuroimaging methods for assessing peripheral and central auditory function will be discussed. Acquired and developmental disorders of auditory function will be reviewed using clinical case studies.
Prerequisites: AS.080.305 OR AS.080.203 OR AS.050.203 OR AS.200.141 OR AS.020.312 or permission of the instructor.
Instructor(s): D. Boatman
Area: Natural Sciences.

Psychological Brain Sciences
AS.200.336. Foundations of Mind. 4.0 Credits.
An interdisciplinary investigation into the innateness of concepts: perception, number, language, and morality, physics discussed. Evidence from animals, infants, patients, brains. Students collect data in sections investigating claims from the readings. Cross-listed with Cognitive Science and Philosophy.
Instructor(s): J. Halberda; L. Feigenson
Area: Social and Behavioral Sciences.

AS.200.367. Episodic Memory in Human and Nonhuman Animals. 3.0 Credits.
Episodic memory, or autobiographical memory, has been said to be a capacity that is uniquely human. Consisting of the what, when, and where components of our experiences, episodic memory is what makes each of us who we are. This course will explore each of these components individually—the psychology and neural underpinnings of each component—before discussing them in combination as episodic memory. Finally, we will visit one of the greatest ongoing debates in the memory literature: whether or not this ability is truly "uniquely human" or if our nonhuman animal counterparts also have this capacity. Throughout the course, we will draw on evidence from empirical articles based on studies in a variety of species including rodents, primates, and birds.
Prerequisites: AS.200.101 OR AS.200.141 OR AS.080.105 OR ( AS.080.305 AND AS.080.306) OR Permission required.
Instructor(s): J. Asem
Area: Natural Sciences, Social and Behavioral Sciences.
Music

AS.376.371. Introduction to Music Cognition. 3.0 Credits.

This course explores selected topics in the nature of event representations from the perspective of cognitive science, computer science, linguistics, and philosophy. These fields have developed a rich array of scientific theories about the representation of events, and how humans make inferences about them—such theories could be applied to current research topics and tasks in computational semantics such as inference from text, automated summarization, veridicality assessment, and so on. In addition to classic articles dealing with formal semantic theories, the course considers available machine-readable corpora, ontologies, and related resources that bear on event structure, such as WordNet, PropBank, FrameNet, etc.

The course is aimed to marry theory with practice: students with either a computational or linguistic background are encouraged to participate.

[Applications]

Instructor(s): M. Lopez-Gonzalez
Area: Natural Sciences, Social and Behavioral Sciences.

AS.376.372. Topics in Music Cognition. 3.0 Credits.

The Department of Earth and Planetary Sciences offers programs of study and research in a wide range of disciplines including the atmosphere, biosphere, oceans, geochemistry, geology and geophysics, and planets. The undergraduate program in Earth and Planetary Sciences is flexible and lets the student, in consultation with a faculty adviser, devise a program that is challenging, individual, and rigorous. The graduate program develops skills in research through independent investigation under the general guidance of one or more members of the faculty, backed up by relevant course work. The department gives particular emphasis to the integration of experimental investigation, theoretical calculation, and quantitative field observations.

Music

The Department also offers an interdisciplinary undergraduate program in Global Environmental Change and Sustainability (GECS), which involves faculty from a range of departments across the university. GECS major and minor introduce students to Earth system science and the ways in which humans interact with and affect the Earth. GECS is solution-focused and trains students to help solve the environmental and sustainability problems facing society today using the powerful tools of science and policy. Undergraduate degrees are typically specialized within traditional disciplines, but a primary goal of this program is to develop the ability of students to think outside of those boxes. Students learn theory, research, and practical applications of the natural and social sciences in their coursework, while also examining the relationship between humans and the environment through the lens of the humanities.

Facilities

The Department of Earth and Planetary Sciences is housed in Olin Hall, a modern building dedicated to the Earth sciences, nestled on a wooded knoll on the western edge of campus. Its facilities include state-of-the-art instrumentation, a departmental library, and modern computer equipment. There are laboratories for crystallography, evolutionary biology/ecology, stable isotope geochemistry, materials science, and fluid and solid mechanics. Olin Hall also contains equipment for modern petrographic work (including a computer-controlled image analysis system), darkroom facilities, and a laboratory for sectioning rocks. There is also a substantial collection of rocks, minerals, and fossils. Facilities are available for a wide spectrum of fluid mechanical experiments, including thermal convection and solidification.

A JEDL 8600 electron microprobe in Olin Hall is available to all members of the department. Crystallographic facilities include a modern specimen preparation laboratory for transmission electron microscopy and single-crystal X-ray diffraction studies. The transmission electron microscopy laboratory houses state-of-the-art instruments capable of both high-resolution imaging at the atomic scale and microanalysis at the nanometer scale.

The department contains several computer laboratories containing clusters of workstations and personal computers, together with printers and scanners. These computers are used for numerical simulations, graphics applications, data manipulation, and word processing.

Field studies and excursions form an integral part of the program of instruction and research in geology and are closely integrated with the laboratory and course work. Situated at the fall line between the Coastal Plain and the Piedmont and only an hour’s ride from the Blue Ridge and Appalachian, Baltimore is an excellent location for a department with a field-oriented program in geology. The department has a permanent field station for geological research, Camp Singewald, in the Bear Pond Mountains of Washington County, Maryland, and a vehicle for field use.

Supporting facilities on campus include the Milton S. Eisenhower Library, the Space Telescope Science Institute, and the Homewood High-Performance Computing Center. In addition, the JHU Applied Physics Laboratory, the facilities of the Smithsonian Institution and the Geophysical Laboratory and the Department of Terrestrial Magnetism of the Carnegie Institution of Washington are available by special arrangement for students qualified to use them. For students whose research requires substantial computation, special arrangements can be made to use the supercomputers at the NASA Goddard Space Flight Center and the National Center for Atmospheric Research.

Undergraduate Programs

The Department of Earth and Planetary Sciences offers programs of study for majors and minors in Earth and Planetary Sciences (EPS) and in Global Environmental Change and Sustainability (GECS). The EPS major focuses on the study of the physical, chemical, and biological
processes that shape the Earth and the other planets. It is designed primarily for scientists who wish to have careers researching the science of the Earth and planets, although it is also suitable for students planning careers in the health professions. The interdisciplinary GECS major and minor introduce students to Earth system science and the ways in which humans interact with and affect the Earth. GECS is solution-focused and trains students to help solve the environmental and sustainability problems facing society today using the powerful tools of science and policy.

In addition to major requirements, students are required to complete the university requirements for the B.A. degree. See Requirements for a Bachelor's Degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree).

Earth and Planetary Sciences (EPS) Major

The EPS major is for undergraduates interested in the study of the physical, chemical, and biological processes that shape the Earth and the other planets, drawing on the disciplines of geology, geochemistry, hydrology, ecology, geobiology, oceanography, and atmospheric science.

The student can design a specific plan of appropriate courses in consultation with the coordinator for undergraduate programs in the department. Depending on the student’s background, it may be appropriate initially to take a freshman seminar or 100-level course designed for the non-major. Those who wish to be majors may proceed directly to courses at the 200- and, in many cases, the 300-level. Our courses provide a broad educational base in the Earth and planetary, and the environmental earth sciences, and enable exploration of a set of electives at the 300-level, depending on the area of interest.

The department required a total of 9 credits at the 100- or 200-level and a total of 12 credits at the 300-level within the department. All courses must be taken for a letter grade and students must receive a grade of C- or better to apply the course towards the major. Courses should be selected to reflect an Earth and Planetary Sciences emphasis and require the following:

Core EPS Courses

<table>
<thead>
<tr>
<th>Course Code</th>

<td>Introductory Programming in Java</td>
<td>3</td>
</tr>
</tbody>
</table>

Honors in EPS Major

To receive honors in Earth and Planetary Sciences, students must meet the following criteria:

• Have taken a challenging set of courses during the four years of study
• Have a GPA in your major requirements of a 3.5 or higher.
• Complete a senior thesis (AS.270.495 Senior Thesis and AS.270.496 Senior Thesis) at a level judged to be sufficiently high by the faculty of the Department of Earth and Planetary Sciences.
• Present the results of the thesis orally in the Department of Earth and Planetary Sciences.

Global Environmental Change and Sustainability (GECS) Major

The Bachelor of Arts in Global Environmental Change and Sustainability is an interdisciplinary major that introduces students to Earth system science and the ways in which humans interact with the environment. It equips students to use a variety of tools, such as policy, science, communication, and individual and societal behavior change to solve environmental and sustainability problems.

All GECS majors must complete 7 environmental core courses, 5 foundations courses, a senior capstone course, and an applied experience involving either research or an internship. Additionally, students choose either the Environmental Science concentration or the Social Science concentration to determine their remaining course requirements. Both concentrations include additional core courses and a suite of electives selected to form an adviser-approved focus area. The GECS major with an Environmental Science concentration requires a total of 71-77.5 credits to complete, and the major with a Social Science concentration requires a total of 65-66.5 credits. All courses must be taken for a letter grade and students must receive a grade of C- or better to apply the course towards the minor.

The GECS senior capstone seminar involves the planning and execution of a tangible, group sustainability project on or off-campus. All GECS majors must enroll in the capstone course in the fall semester of their senior year. The applied experience can be completed during any semester including summers and involves at least 80 hours of supervised, hands-on experience working with environmental or sustainability issues through a research project, internship, or study abroad program with a research or internship component. A synthesizing assignment reflecting on the experience is also required. The goal of the applied experience requirement is to ensure that students have practical experience in a research, workplace, or community setting that will help prepare them for the next step in their education and career. Consult the GECS advising guide on the program’s website for additional information: http://krieger.jhu.edu/gecs/requirements-major/

Total Credits: 5

In addition to the above coursework, students must choose either the Environmental Science or Social Science concentration and complete the associated requirements.

Environmental Science Concentration

To fulfill the requirements for the Environmental Science concentration, students must complete the courses listed under the Environmental Science Core as well as a set of adviser-approved electives related to a focus area.

Environmental Science Core

<table>

If AS.030.103 was not taken:
Lab Experiences: 3 approved science lab courses are required, either as separate 1-2-credit lab courses or as part of 4-5-credit lecture courses that include a lab section. Approved labs include but are not limited to:

- AS.020.153 General Biology Laboratory I
- AS.020.154 General Biology Lab II
- AS.030.105 Introductory Chemistry Laboratory I
- AS.030.106 Introductory Chemistry Laboratory II
- AS.171.111 General Physics Laboratory I
- AS.171.112 General Physics Laboratory II
- AS.270.221 The Dynamic Earth Laboratory
- AS.270.337 Freshwater Systems Lab

Focus Area
Each student should work with their adviser to choose a coherent suite of elective courses totaling at least 15 credits (12 of which are at the 300-level or above). These courses should be related to a focus area of relevance to the student’s individual interests and career plans. The focus area can center around a particular environmental or sustainability topic or a particular disciplinary lens through which a variety of environmental issues can be viewed. Suggested topical focus areas include but are not limited to: poverty and development; policy and governance; ecology and conservation; and environmental health. Consult the GECS advising guide on the program’s website for additional information: http://krieger.jhu.edu/gecs/requirements/major/

With adviser approval, choose 12 credits of coursework related to a focus area, at least 9 credits of which are at the 300-level or above.

Total Credits 12

Honors in the GECS Major
To qualify for honors in the GECS major, a student must:

- Earn a cumulative GPA of 3.5 in the courses taken to fulfill the major requirements, as determined at the end of the second-to-last semester of the student’s enrollment.
- Complete 3 or more credits of independent research or complete a two-course senior thesis.
- Earn a rating of good or excellent on the final product of the research project, as determined by the faculty research adviser.
- Present the results of the research orally in an appropriate JHU department.

**Total Credits: 64**

**GECS Minor**

The GECS minor is designed to allow students majoring in other disciplines to develop some expertise in environmental issues and sustainability. It consists of 18 credits of environmental or sustainability-related courses, including two introductory core courses. At least 6 credits must be at the 300-level or above. Students are encouraged to select electives from relevant courses in both the social and natural sciences but can tailor their coursework to fit their particular interests and career goals. Appropriate courses can be identified by a GECS POS tag or approval for other courses can be sought from the GECS Director of Undergraduate Studies (DUS). All courses must be taken for a letter grade, and students must receive a grade of C- or better to apply the course to the minor.

| AS.270.103 Introduction to Global Environmental Change | 3 |
| AS.271.107 Introduction to Sustainability               | 3 |

Take 12 credits of appropriate elective courses, at least 6 credits of which are at the 300-level or above. Appropriate courses can be identified by a GECS POS tag or be approved by the GECS DUS.

**Total Credits: 18**

**B.A./M.S. Option for Johns Hopkins GECS Majors**

Undergraduates majoring in Global Environmental Change and Sustainability (GECS) may apply for accelerated status toward an M.S. in Environmental Science and Policy (ESP) through the JHU Krieger School of Arts & Sciences’ Advanced Academic Programs. These students should declare their intention to pursue the M.S. during their junior year or early in their senior year to their adviser and to the Director of the ESP Program, Jerry Burgess (jerry.burgess@jhu.edu). GECS students may apply up to three courses taken as undergraduates toward the M.S. in Environmental Science and Policy thereby leaving only seven more courses to complete the M.S. following receipt of their bachelor’s degree.

**Application**

GECS students may apply for the B.A./M.S. anytime during the senior year or up to one year following the conferral of their B.A. The application procedure is the same as that of other AAP applicants and details are found online at: http://advanced.jhu.edu/. Students admitted to the B.A./M.S. program will be assigned a graduate adviser but will also continue to be advised by their GECS adviser for all matters concerning the bachelor’s degree.
Course Requirements For B.A./M.S.

GECS students will receive two separate degrees, so the requirements of both degrees must be fulfilled. Students may not earn the M.S. degree without completion of the B.A., however, students who do not complete the M.S. retain their B.A. GECS students pursuing the M.S. may opt for either the general ESP degree or a concentration. Up to three courses completed while an undergraduate can count toward the ten courses required for the M.S. The following courses can be used to satisfy the corresponding core course requirements for the M.S. in Environmental Science and Policy.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.270.308</td>
<td>Population/Community Ecology</td>
<td>3</td>
</tr>
<tr>
<td>AS.271.403</td>
<td>Environmental Policymaking and Policy Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>

(Note that the Environmental Policymaking and Policy Analysis course is a combined GECS undergraduate and ESP masters class.)

If a student wishes to apply a third course to both their GECS B.A. and their ESP M.S., the course must be approved by the graduate adviser and must be at the 300- to 600- level with content germane to environmental science and policy.

Graduate Programs

Requirements for Admission

Applicants must submit transcripts, Graduate Record Examination scores (aptitude exam only), and supporting letters to show their ability to do advanced study. The applicant should have his/her GRE scores, verbal and quantitative aptitude, sent to the department before the January 15 deadline for filing applications for admission.

The department expects applicants for advanced degrees to have completed undergraduate training in the basic sciences and mathematics. Normally this includes mathematics through at least integral calculus and a year's course each in physics, chemistry, and biology. Further undergraduate study in one or more of these subjects or in mathematics is highly desirable for all programs in the Earth sciences; additional mathematics is essential for geophysics, atmospheric sciences, and dynamical oceanography. Extensive undergraduate work in Earth sciences is not a requirement for admission. If students lack formal training in this area or have deficiencies in the other related sciences, they may be admitted but will have to allow additional time in the graduate program to make up for deficiencies in their preparation.

Requirements for Advanced Degrees

Candidates for the Ph.D. must take courses and meet requirements specified by their advisory committee; must pass a comprehensive examination before a departmental committee and an oral examination specified by their advisory committee; must pass a comprehensive examination before a departmental committee and an oral examination required.

For further information about graduate study in the Earth and planetary sciences contact the Chair, Department of Earth and Planetary Sciences.

Fields of Graduate Study and Research

The department offers numerous graduate fields: sedimentology, geochemistry and petrology, paleobiology, solid Earth geophysics, oceanography, atmospheric sciences, and planetary astrophysics. Descriptions of these fields and their various programs are given below.

Petrology

Modern research in petrology requires a flexible approach combining multiple techniques in geochemistry. geochronology and experimental petrology, thermodynamics and diffusion, and careful petrographic and field observation. The Department offers courses that provide a thorough background in these areas and a detailed review of research to date. In addition to the facilities available on campus, those at the Geophysical Laboratory and the Department of Terrestrial Magnetism of the Carnegie Institution of Washington, the Smithsonian Institution, the University of Maryland, and the U.S. Geological Survey in Reston are available to students and faculty through cooperative agreement.

The program in mineral igneous-petrology is concerned with the chemistry and physics of the origin and evolution of magma. All aspects of the generation, extraction, ascension, cooling, kinetics of crystallization, convection, differentiation, eruption, and flow are considered in detail. The results of high temperature melting experiments as well as detailed chemical analysis are applied to these problems. A nontraditional approach to petrological problems is emphasized through an analytical treatment of volcanological field work. Students are encouraged to take thermodynamics, fluid mechanics, and heat transfer.

The program in metamorphic petrology emphasizes linkages between petrogenesis and its drivers, considering the full range of time and length scales for metamorphism. Learning begins in the field and follows on to the microscope and laboratory, applying concepts in equilibrium mechanics and thermodynamics, geochronology and diffusion geospeedometry to quantify conditions and durations for metamorphism. Petrological observations and interpretations are placed in the context of Earth processes, from mineral to mountain belt and seismic cycle to supercontinent cycle.

Geochemistry

The program in geochemistry at Johns Hopkins includes isotope geochemistry - including radiogenic and stable isotope geochemistry - as well as aqueous geochemistry. Stable isotope geochemistry (C, O, Sr) is integrated with biostratigraphy, sedimentology, and geochronology to reconstruct ancient oceans and to address the coevolution of life and the environment. Complementing this, radiogenic isotope geochemistry (U/Pb dating on zircon) is used to construct age models, constrain rates of change in sedimentary sequences, and to study changing sedimentary provinces. Collaborations with other stable isotope and geochronology laboratories allows for the broad application of different geochemical techniques and systems to address Earth history questions.

Aqueous geochemistry focuses on the role of water in the evolution of Earth through deep time, particularly the linkages between water in the deep Earth and the near-surface environment. It involves quantitative geochemical modeling of the chemistry of water-rock interactions from Earth's surface into the upper mantle. Students participate in research involving the interpretation of experimental studies of water-rock interactions in terms of fundamental properties of aqueous inorganic and organic species over extreme ranges of pressure and temperature. Developing a thermodynamic characterization of the behavior of fluids
at elevated pressures and temperatures enables exciting research into topics such as the origins of diamonds, the development and evolution of the continents and the potential roles of abiogenic hydrocarbons in Earth's deep carbon cycle. Collaborations with experimental laboratories enable a wide range of training in combined theoretical and experimental studies of the role of fluids in the history of Earth and other planets.

**Sedimentology Systems**
The teaching and research program in sedimentary systems is dedicated to understanding interactions between sediments, organisms, climate and tectonics in the Earth's past. This program combines sedimentology, paleontology, geochronology, and geochemistry to study Earth history from sedimentary archives. Field and laboratory observations are equally essential to this kind of research, and students are expected to become proficient in both. Through course work and research students should develop literacy in a combination of disciplines, which may include but are not limited to stratigraphy, geochemistry, paleontology, ecology, geomorphology, geochronology, soil science, and meteorology. Interdisciplinary interactions are encouraged within the Earth and Planetary Science department and with members of other departments at Hopkins, such as the Department of Environmental Health and Engineering in the School of Engineering and the Center for Functional Anatomy and Evolution in the Medical School.

**Geobiology and Paleoclimatology**
Research emphases within this discipline include soil ecology, soil formation, biogeochemistry, plant-soil-animal interactions, biogeochemical cycling, paleoecology, and paleoclimatology. Methods of stable isotope geochemistry are used to investigate changes in the cycling of C, H, N, and O through Earth history. Students are invited to participate in ongoing collaborations with the Baltimore Ecosystem Study (Long-Term Ecological Research Site), Smithsonian Environmental Research Center, or to design an original research project under the advisement of our faculty. Instrumentation in the Department of Earth and Planetary Sciences includes stable isotope mass spectrometry, scanning electron microscopy, microprobe and transmission electron microscopy; fieldwork is ongoing at several international sites.

All Ph.D. students are expected to have a background in physics, chemistry, calculus, general biology, and sedimentary geology. Deficiencies can be made up in the first semesters at Hopkins. Students take a core program of statistics, Earth history, stable isotope geochemistry, and ecology. In conjunction with the Department of Environmental Health and Engineering, Earth and Planetary Sciences offers course work opportunities in Aquatic Chemistry, Plant and Animal Ecology, Geobiology, Analytical Environmental Chemistry, and Sedimentary Geochemistry.

**Oceans, Atmospheres, and Climate Dynamics**
The oceans, atmospheres, and climate dynamics program focuses on the study of physical processes in the oceans and atmosphere, the interaction between the ocean, atmosphere and land surface, and their role in climate. The philosophy underlying the department's program is a rigorous and thorough background in the physics of fluids and radiation, and their applications to climate and environmental problems, applied mathematics, laboratory experiments, and observations. Problems in radiative transfer and the dynamics of atmospheres and oceans are attacked by theory, laboratory or numerical experiments, and field observations. Johns Hopkins is a member of the University Corporation for Atmospheric Research.

The best preparation for graduate study in this program is an undergraduate degree in physics, applied mathematics, mechanical engineering, or another parent science such as chemistry or geology/geochemistry. Prior course work in fluid dynamics, while highly desirable, is not mandatory to pursue graduate study in this area. It is essential to have a broad background in the parent sciences, specialization in one of them, and at least three years of undergraduate mathematics.

Research in physical oceanography focuses on the processes that maintain the global ocean circulation and the oceans' role in climate and global biogeochemical cycling. In particular, attention is on the role of waves, eddies, and small-scale mixing in controlling the oceans' part in Earth's heat balance. We also study advection, stirring, and mixing processes in the interior ocean and their roles in dispersing atmospheric trace gases and nutrients.

Research in atmospheric dynamics focuses on large-scale dynamics, the transport of trace constituents, and understanding the composition of the global atmosphere (e.g., distributions of stratospheric ozone and tropospheric water vapor). Current interests include stratospheric vortex dynamics, troposphere-stratosphere couplings, transport and mixing processes, and global modeling of chemical constituents.

Research on climate and radiation includes study of the global climate system and its response to radiative forcing due to changes in greenhouse gases and solar luminosity, the feedback effects of water vapor and clouds, and the radiative and hydrological effects of aerosols. These studies involve global and regional scale modeling, and the analysis and interpretation of satellite observations.

Research on climate also includes studies on the interplay between atmospheric variability and surface processes, including hydrological states and fluxes, human modification of the landscape, and ecosystem activities. This research employs satellite image analysis, numerical modeling, and field observation to build a process-based understanding of the ways in which climate shapes landscape and vice versa. Particular emphasis is devoted to the impact of climate variability on fresh water resources.

A new program of research, combining physical oceanography and atmospheric science, focuses on the role of ocean-atmosphere interactions in the climate of the North Atlantic region. The task is to isolate and understand the predictable mechanisms that govern mid-latitude climate oscillations lasting several years.

A new program of research in global biogeochemical cycling, focuses on applying and developing large-scale computational models that can be combined with observations remotely sensed data to characterize cycling of key elements (including carbon, nitrogen, and oxygen) in the earth system. Opportunities exist to link this work to the observational geochemistry work done in the department as well as to stimulate key periods and transitions in Earth History.

**Solid Earth Geophysics**
Solid Earth geophysics is the study of our planet's interior. Our overarching goals are to understand the formation, structure, composition, and dynamics of the Earth as a whole, and their relationship to geological and surface environmental processes today, in the past, and in the future.

Modern geophysics requires an integrated approach that combines geology, solid and fluid mechanics, seismology, gravity, magnetism, and planetology. Students following the geophysics program are therefore encouraged to take advanced mathematics (including numerical modeling), classical physics, solid and fluid mechanics, as well as a
broad range of EPS course work that includes geology, geochemistry, geophysics, and planetary science.

Some examples of broad-based geophysics research topics in EPS include study of Earth's magnetic field, the surface expression of Earth's "geodynamo," which is powered by fluid flow in the Earth's metallic core. Similarly, earthquakes arise from tectonic forces that are ultimately produced by large-scale motions of the Earth's rocky interior, which moves at rates of a few cm per year. Much of earth's surface topography, the presence of Earth's ocean basins, and several physical and geochemical aspects of Earth's surface environment, are a direct consequence of plate tectonics, which governs the internal dynamics of our planet. Volcanism and magma dynamics are other examples of fundamental processes that shape the Earth and its environment, a study that integrates geology, solid and fluid mechanics, and geochemistry.

Professors Olson and Marsh specialize in study of Earth's interior and its influence on the surface environment, and Professor Strobel specializes in the study of the other planets, with emphasis on their atmospheres and magnetospheres.

**Planetary Science**

The program in Planetary Science emphasizes the study of atmospheres, solid surfaces, and interiors of planetary bodies in a broader context. This includes a range of fundamental problems in atmospheric chemistry, dynamics, physics, radiation and geology and their role in the origin, evolution, and present state of planets and small bodies. The properties of these objects are investigated using a combination of observation (ground-based telescopes and robotic spacecraft), laboratory experimentation, theoretical modelling, and Earth-analogue field studies. The program requires an interdisciplinary focus, drawing from a wide variety of fields including astronomy, geology, physics, and chemistry. Research often includes data from active planetary exploration missions. EPS faculty include members of the Cassini mission to the Saturn system, New Horizons mission to the Pluto system, and Mars Science Laboratory Rover teams, along with a number of proposed future missions to Europa, Venus, and other bodies.

Students are encouraged to take courses in astrophysics, chemistry, physics, applied mathematics, computer science, and engineering to gain the comprehensive background necessary for interdisciplinary research. The best undergraduate preparation is a broad background in physics, applied mathematics, chemistry, or earth science. Advanced undergraduate courses in these fields (including differential equations, linear algebra, classical mechanics, electricity and magnetism, thermodynamics, organic, and physical chemistry) are strongly recommended. The EPS Planetary Science research program is closely coordinated with the Space Department of the JHU Applied Physics Laboratory (APL), and students may be co-advised by APL researchers. Students in the department additionally benefit from the local availability of outside institutions including the Space Telescope Science Institute (co-located on the JHU campus), NASA Goddard Space Flight Center, the Carnegie Institution for Science, and the Smithsonian Institution.

**Financial Aid**

The university makes available to the department a number of Gilman Fellowships, which provide for complete payment of tuition, together with Johns Hopkins' fellowships and graduate assistantships that carry a nine-month stipend. Graduate assistantships cannot require more than 10 hours a week of service to the department, and all recipients of financial aid carry a full program of study. In addition, a number of special and endowed fellowships pay as much or more. In many areas of study, summer support is also available.

Applications for admission to graduate study and financial aid (including all supporting documents and GRE scores) should be submitted to the department before January 15.

For current faculty and contact information go to http://eps.jhu.edu/people/

**Faculty**

**Chair**

Thomas W. N. Haine

physical oceanography.

**Professors**

Peter L. Olson
geosynthetic fluid dynamics.

Darrell F. Strobel
planetary atmospheres and astrophysics.

Dimitri Sverjensky
molecular surface geochemistry and environmental geochemistry.

Darryn W. Waugh
atmospheric dynamics.

**Associate Professor**

Anand Gnanadesikan
biogeochemical oceanography, geophysical fluid dynamics.

**Assistant Professors**

Sarah Horst
atmospheric chemistry, planetary atmospheres.

Kevin Lewis
planetary geology and geophysics.

Emmy Smith
sedimentary geology, biostratigraphy and Earth history.

Daniel Viete
metamorphic petrology, structural geology and tectonics.

Benjamin Zaitchik
climate dynamics, surface hydrology.

**Professors Emeriti**

John M. Ferry
metamorphic geology.

George W. Fisher
global earth systems and religious ethics.

Bruce D. Marsh
igneous petrology and geophysics.

David R. Veblen
crystallography.

**Research/Teaching Faculty**

Rebecca Kelly
Associate Teaching Professor: global change and sustainability.

Alexios Monopolis
Senior Lecturer: global change and sustainability.

Richard Stolarski
Research Professor: atmospheric chemistry.

Katalin Szlavecz
Research Professor: soil ecology.

**Joint Appointments**

Joselyne DiRuggiero
Associate Research Professor, Biology.

Ciaran Harman
Assistant Professor, Environmental Health and Engineering.

Michael Harrower
Assistant Professor, Near Eastern Studies.

Kevin J. Hemker
Professor, Mechanical Engineering.

Takeru Igusa
Professor, Civil Engineering.

K.T. Ramesh
Professor, Mechanical Engineering.

Kenneth Rose
Professor, Functional Anatomy and Evolution.

For current course information and registration go to https://sis.jhu.edu/classes/

**Courses**

**AS.270.102. Freshman Seminar: Conversations with the Earth. 3.0 Credits.**
A discussion of topics on Earth's origin, evolution, and habitability. Students will be introduced to the role that scientific thinking and process play in research and our understanding of Earth systems. We will cover a broad foundation of knowledge of Earth sciences, including solid earth, atmospheric, and oceanic systems, as well as topics concerning the origin of life, evolution, ecosystems, and mass extinctions. And we will discuss the relation of these systems to societal concerns such as climate change, energy resources, mineral and ore needs in industry, and nuclear waste storage and risk assessment. We are returning to the original seminar format for this class, with a limit of 15 students. We are looking for students who are willing to engage in frequent class discussion with instructors and classmates to ensure they acquire a broad understanding of the subject matter. This will be a 3 credit course with homework to be completed each week and a term paper submitted at the end of the semester.
Instructor(s): A. Charrier De Assis
Area: Natural Sciences.

**AS.270.103. Introduction to Global Environmental Change. 3.0 Credits.**
A broad survey of the Earth as a planet, with emphasis on the processes that control global changes. Topics include: the structure, formation, and evolution of the Earth, the atmosphere, oceans, continents, and biosphere. Special attention is given to present-day issues, such as global climate change, natural hazards, air pollution, resource depletion, human population growth, habitat destruction, and loss of biodiversity. Open to all undergraduates.
Instructor(s): D. Waugh; K. Szlavecz
Area: Natural Sciences.

**AS.270.110. Freshman Seminar: Sustainable + Non-Sustainable Resources. 1.0 Credit.**
An introduction to the important resources involved in the origin and production of oil, natural gas, coal, cement, metals and geothermal fluids.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

**AS.270.111. Freshman Seminar: The Story of Earth. 1.0 Credit.**
The four and a half billion year story of Earth's global changes focusing on the co-evolution of Earth and Life.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

**AS.270.112. The Changing Arctic Environment: Problem or Opportunity?. 3.0 Credits.**
The Arctic is warming three times faster than the global-mean rate. In this course we will be studying this phenomenon and its consequences by looking at the interconnected parts of the Arctic climate system (ocean, atmosphere, and ice), how they are changing, and which socio-economic opportunities and environmental challenges arise from these changes.
Instructor(s): R. Gelderloos
Area: Natural Sciences.

**AS.270.113. Freshman Seminar: Environmental Poisons. 1.0 Credit.**
An exploration of the occurrence and potential effects of poisons in the environment, from naturally occurring ones such as arsenic to those that may be introduced by mankind such as nuclear waste.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

**AS.270.114. Guided Tour: The Planets. 3.0 Credits.**
An introduction to planetary science and planetary exploration primarily for non-science majors. A survey of concepts from astronomy, chemistry, geology, and physics applied to the study of the solar system.
Instructor(s): K. Lewis; S. Horst; S. Stanley
Area: Natural Sciences.

**AS.270.116. Freshman Seminar: An Introduction to Climate Change. 3.0 Credits.**
This course introduces the main physical components of the Earth's climate systems and their documented and forecasted changes. The first part of the course presents evidences of climate change in Earth's history, and introduces the main natural and anthropogenic drivers of climate change. The second part of the course focuses on future climates, and includes modules about climate modeling, building of emission scenarios, geoengineering, emission reductions and adaptability. The course is highly interdisciplinary, exploring the relationships among climate science, policy, ecology, economy and ethics. Freshmen Only. No prerequisites required.
Instructor(s): V. Aquila
Area: Natural Sciences.

**AS.270.205. Introduction to Geographic Information Systems and Geospatial Analysis. 3.0 Credits.**
The course provides a broad introduction to the principles and practice of Geographic Information Systems (GIS) and related tools of Geospatial Analysis. Topics will include history of GIS, GIS data structures, data acquisition and merging, database management, spatial analysis, and GIS applications. In addition, students will get hands-on experience working with GIS software.
Instructor(s): X. Chen
Area: Engineering, Natural Sciences.
AS.270.220. The Dynamic Earth: An Introduction to Geology. 3.0 Credits.
Basic concepts in geology, including plate tectonics; Earth's internal structure; geologic time; minerals; formation of igneous, sedimentary, and metamorphic rocks; development of faults, folds and earthquakes; geomagnetism. Corequisite (for EPS Majors): AS.270.221; optional for others.
Prerequisites: Prerequisite or Corequisite: AS.030.101 OR (AS.171.101 AND AS.171.102) or equivalent. AS.270.221 is a corequisite for EPS majors.
Instructor(s): D. Viete; E. Smith
Area: Natural Sciences.

AS.270.221. The Dynamic Earth Laboratory. 2.0 Credits.
This course is a hands-on learning experience for introductory geological concepts and techniques using geological tools, such as mineral/rock samples, microscopes, and maps. Field trips are its essential part.
Prerequisites: Corequisite: AS.270.220; Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): D. Viete; E. Smith
Area: Natural Sciences.

AS.270.222. Earth Materials. 4.0 Credits.
An introduction to the properties, occurrence, and origin of the basic constituents of the Earth, including minerals and rocks. Introductory training in the recognition of minerals and rocks in the laboratory and field.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): A. Charrier De Assis
Area: Natural Sciences.

AS.270.224. Oceans & Atmospheres. 3.0 Credits.
A broad survey of the Earth's oceans and atmospheres, and their role in the environment and climate. Topics covered include waves, tides, ocean and atmosphere circulation, weather systems, tornadoes and hurricanes, El Niño, and climate change. For science and engineering majors
Instructor(s): A. Gnanadesikan; T. Haine
Area: Natural Sciences.

AS.270.232. Aqueous Geochemistry. 3.0 Credits.
Thermodynamic basis for calculation of equilibria involving minerals and aqueous species at both low and high temperatures and pressures. Theoretical calculation of surface geochemical processes including adsorption and dissolution kinetics.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.233. Earth History. 3.0 Credits.
This course will explore the evolution of life in the context of environmental, ecological, and geological changes to the Earth surface system. The goal of the class is to provide students with an understanding of how geological and paleontological records provide insight into the origin(s) of life, oxygenation of the atmosphere, the evolution of multicellularity, evolutionary radiations and extinctions, and modern global change.
Prerequisites: AS.270.103 OR AS.270.220 OR AS.270.224; or permission of the instructor.
Instructor(s): M. Gomes
Area: Natural Sciences.

AS.270.235. Energy Resources in the Modern World. 3.0 Credits.
This in-depth survey will inform students on the non-renewable and renewable energy resources of the world and the future prospects. Topics include petroleum, natural gas, coal, nuclear, hydropower, geothermal, solar, wind, biomass, and ocean energy. Global production, distribution, usage, and impacts of these resources will be discussed.
Instructor(s): J. Burgess
Area: Natural Sciences.

AS.270.237. Geoscience Modelling. 4.0 Credits.
An introduction to modern ways to interpret observations in the context of a conceptual model. Topics include model building, hypothesis testing, and inverse methods. Practical examples from geophysics, engineering, and medical physics will be featured.
Instructor(s): T. Haine
Area: Natural Sciences.

AS.270.238. Population/Community Ecology. 3.0 Credits.
This course explores the distribution and abundance of organisms and their interactions. Topics include dynamics and regulation of populations, population interactions (competition, predation, mutualism, parasitism, herbivory), biodiversity, organization of equilibrium and non-equilibrium communities, energy flow, and nutrient cycles in ecosystems. Field trip included. Permission of instructor.
Prerequisites: AS.270.103 or permission of instructor
Instructor(s): K. Szlavecz
Area: Natural Sciences.

AS.270.301. Physical Geology. 3.0 Credits.
A survey of the interactions between geological and biological processes at and near the Earth's surface, covering topics such as biogeochemistry and nutrient cycles, soil chemistry, biomarkers, archives of paleobiology, and the evolution of life, with an emphasis on terrestrial systems.
Recommended Course Background: AS.270.220
Instructor(s): N. Levin
Area: Natural Sciences.

AS.270.302. Geobiology. 3.0 Credits.
A survey of the interactions between geological and biological processes and the evolution of Earth. The course will focus primarily on the adaptive radiation of mammals (including our own order primates) that followed the extinction of the dinosaurs, exploring the origins and relationships of the major groups of mammals as well as the anatomical and ecological reasons for their success. Lectures will be supplemented with relevant fossils and recent specimens.
Instructor(s): S. Cooke
Area: Natural Sciences.

AS.270.303. Mammalian Evolution. 3.0 Credits.
Instructor(s): B. Passey
Area: Natural Sciences.
AS.270.315. Natural Catastrophes. 3.0 Credits.
A survey of naturally occurring catastrophic phenomena, with emphasis on the underlying physical processes. Topics include hurricanes, tornadoes, lightning, earthquakes, tsunamis, landslides, and volcanic eruptions and climate change. Intended for students in science and engineering.
Instructor(s): A. Charrier De Assis
Area: Natural Sciences.

AS.270.316. Planets. 3.0 Credits.
This course will serve as an introduction to planetary science at a more advanced level than AS.270.114. Topics covered will include formation of the solar system, planetary interiors, surfaces and atmospheres, solar system exploration, and extrasolar planets. Recommended Course Background: AS.270.220 and AS.270.224.
Instructor(s): S. Horst
Area: Natural Sciences.

AS.270.317. Conservation Biology. 3.0 Credits.
In this course, students examine the meaning and implications of biodiversity with a focus on disciplines associated with conservation biology, wildlife conservation and management, including taxonomy, genetics, small population biology, chemical and restoration ecology, and marine biology. This includes exploring how conservation biology differs from other natural sciences in theory and in application. Students learn the major threats to biodiversity and what natural and social science methods and alternatives are used to mitigate, stop, or reverse these threats. The course also includes the economic and cultural tradeoffs associated with each conservation measure at the global, national, regional, and local levels. One required field trip.
Instructor(s): J. Burgess
Area: Natural Sciences.

AS.270.318. Remote Sensing of the Environment. 4.0 Credits.
This course is an introduction to the use of remote sensing technology to study Earth's physical and biochemical processes. Topics covered include remote sensing of the atmosphere, land and oceans, as well as remote sensing as a tool for policy makers. Also offered as 270.618
Instructor(s): B. Zaitchik; K. Lewis
Area: Natural Sciences.

AS.270.320. Seminar in Planetary Science. 1.0 Credit.
Major problems of current interest in planetary science are critically discussed in depth.
Instructor(s): S. Horst
Area: Natural Sciences.

AS.270.325. Introductory Oceanography. 3.0 Credits.
This class is an introduction to a wide range of physical, chemical, and biological phenomena in the world’s oceans. Underlying basic principles are exposed wherever possible. Topics covered include: seawater, waves, tides, ocean circulation, chemical oceanography, biogeochemical ocean processes, and remote sensing of the oceans. Recommended Course Background: freshman Physics, Chemistry, Calculus through ordinary differential equations.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.330. Atmospheric Chemistry. 3.0 Credits.
This course will examine the structure and composition of the atmosphere and the processes that determine how the composition has changed in the past and might change in the future. Emphasis will be on the chemistry of the stratospheric ozone layer. The chemistry of the troposphere and air pollution will also be covered. Prerequisites: AS.110.106 Calculus I and AS.110.109 Calculus II
Instructor(s): R. Stolarski
Area: Natural Sciences.

AS.270.332. Soil Ecology. 3.0 Credits.
The course introduces basic aspects of cycles and flows in the soil ecosystem, and provides students with an overview of the higher groups of soil organisms. Laboratory and field surveying methods are also covered.
Instructor(s): K. Szlavecz
Area: Natural Sciences.

AS.270.336. Freshwater Systems. 3.0 Credits.
A study of streams, lakes, and groundwater with a focus on aspects of water quality, hydrology, geomorphology, and aquatic ecology that are relevant to human impacts on freshwater systems. US environmental policies and water resource management agencies will also be examined in the context of issues such as dams, cattle grazing, climate change, and water allocation.
Prerequisites: AS.270.103 or permission of the instructor.
Instructor(s): R. Kelly
Area: Natural Sciences.

AS.270.337. Freshwater Systems Lab. 1.0 Credit.
A hands-on investigation of the water quality, hydrology, geomorphology, and aquatic ecology of streams and other freshwater bodies. Includes field trips to water-related facilities such as drinking water and wastewater treatment plants.
Instructor(s): R. Kelly
Area: Natural Sciences.

AS.270.350. Sedimentary Geology. 4.0 Credits.
Introduction to sedimentary processes and sedimentary rocks. Focus is placed on linking physical observations to earth surface processes. Fundamental tools for interpreting the sedimentary rock record, such as depositional models, geochronology, and chemostratigraphy are reviewed. Weekend field trips. Graduate and advanced undergraduate level. Recommended Course Background: AS.270.220 or instructor permission.
Instructor(s): K. Lewis; N. Bridges
Area: Natural Sciences.

AS.270.366. Spacecraft Instrumentation Project. 3.0 Credits.
Co-Listed with EN.530.366
Instructor(s): S. Horst
Area: Engineering, Natural Sciences.
AS.270.369. Geochem Earth/Environment. 3.0 Credits.
An introduction to all aspects of Geochemistry: theoretical, experimental, and observational, including the application of geochemistry to issues such as the migration of toxic metals and nuclear waste.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.377. Climates Of The Past. 3.0 Credits.
Earth's climate history through study of forcing mechanisms, climate proxies, and paleoclimate modeling. Presentation of climate-sensitive archives will be followed by discussion of geochemical principles, climates through time, recent advances and emerging problems. For upper-level undergraduate and graduate students in the natural sciences. Recommended Course Background: AS.270.220 or instructor permission.
Instructor(s): L. Hinnov
Area: Natural Sciences.

AS.270.378. Present and Future Climate. 3.0 Credits.
Intended for majors who are interested in the science that underlies the current debate on global warming, the focus is on recent observations one can glean from model simulations. Meets with AS.270.641.
Recommended Course Background: AS.110.108-AS.110.109 and AS.171.101-AS.171.102
Prerequisites: Student may not receive credit for both AS.270.378 and AS.270.641.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.270.395. Planetary Physics and Chemistry. 3.0 Credits.
The fundamental principles governing the dynamic processes within and around the planets are treated in some detail. Core equations are developed and used to analyze nebula condensation, planetary accretion, convection in mantles and atmospheres, radiative and conductive heat transport, seismic waves, hurricanes, volcanism, and meteorite impacts, among others. Emphasis is on fundamentals and problem solving.
Prerequisites: AS.030.101; AS.171.101-102 or 103-104 or 105-106.
Instructor(s): D. Strobel
Area: Natural Sciences.

AS.270.396. Special Topics in Planetary Exploration. 3.0 Credits.
A selection of planetary research topics investigated by Prof. Strobel spanning the past 45 years covering the progress that has been made and remaining problems that still need to be addressed. The majority of topics will involve the outer solar system and the science discoveries made by the Voyager, Cassini-Huygens, and New Horizons Missions as well as observations by Earth orbiting satellites – IUE, HUT, HST, FUSE.
Instructor(s): D. Strobel
Area: Natural Sciences.

AS.270.400. The Carbon Cycle: Past, Present and Future. 3.0 Credits.
This course will explore how the carbon cycle shapes environmental conditions and influences other biogeochemical cycles through an investigation of the modern carbon cycle, major carbon cycle perturbations in the geological record, and projections of future global change. The majority of the class will be structured as a reading seminar, but students will also develop an understanding of how to use quantitative models to evaluate patterns of change associated with both modern and ancient carbon cycle perturbations with implications for predicting future environmental changes. Recommended Prerequisites: AS.270.103 or AS.270.220 or AS.270.224
Instructor(s): E. Smith; M. Gomes
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.270.401. Metamorphic Geology. 3.0 Credits.
Introduction to metamorphic geology and the concepts on which it is built. Ideas and techniques that underpin metamorphic petrology are introduced in the context of the development and evolution of metamorphic geology as a discipline. Focus is on utility of metamorphic geology in understanding crustal processes and the nature of plate tectonics. One-day, weekend field trips to explore the Baltimore Gneiss Domes. Recommended course background: AS.270.220 and AS.270.221, or instructor permission.
Prerequisites: AS.270.220 AND AS.270.221
Instructor(s): D. Viete
Area: Natural Sciences.

AS.270.404. Planetary Interiors. 3.0 Credits.
This course investigates the physical processes occurring in planetary interiors. Topics include formation and differentiation of planetary bodies, planetary structure, thermal evolution, convection, and dynamo generation of magnetic fields. Standard remote sensing methods used to investigate planetary interiors and results from recent planetary satellite missions will also be discussed. Recommended: Knowledge of vector calculus, PDEs and introductory physics.
Instructor(s): S. Stanley
Area: Natural Sciences.

AS.270.405. Modeling the Hydrological Cycle. 3.0 Credits.
Survey of modeling techniques for hydrological monitoring, analysis and prediction, including applied exercises with commonly used models. Topics include the terrestrial water balance, rivers and floods, groundwater, atmospheric transport, and precipitation processes. Focus is on numerical methods applicable at the large watershed to global scale.
Instructor(s): A. Dezfuli; B. Zaitchik.

AS.270.410. Planetary Surface Processes. 3.0 Credits.
This course explores processes that influence the evolution of planetary surfaces, including impact cratering, tectonics, volcanism, weathering, and sediment transport. These processes manifest themselves as structural deformation of planetary crusts due to loading by volcanoes, formation of craters by asteroid impacts, modification of surfaces by flowing landslides, rivers and glaciers, and the accumulation and transport of sand in dune fields on various planets. Emphasis is on the relationship to similar Earth processes, and the integrated geologic histories of the terrestrial planets, satellites, and asteroids. The focus will be on developing a physical understanding of these processes to interpret the surface characteristics and evolution of planets, satellites, asteroids, and comets from both qualitative assessments and quantitative measurements obtained from spacecraft data. A key component of the class will be the interpretation of these observations from recent and current planetary missions to the Moon, Mars, and other terrestrial bodies. Recommended Course Background: A sound knowledge of Calculus and Introductory Physics, and some prior knowledge of Earth and/or Planetary Science.
Instructor(s): K. Lewis
Area: Natural Sciences.
AS.270.423. Planetary Atmospheres. 3.0 Credits.
Instructor(s): S. Horst
Area: Natural Sciences.

AS.270.425. Earth and Planetary Fluids. 3.0 Credits.
An introductory course on the properties, flow, and transport characteristics of fluids throughout the Earth and planets. Topics covered include: constitutive relationships, fluid rheology, hydrostatics, dimensional analysis, low Reynolds number flow, porous media, waves, stratified and rotating fluids, plus heat, mass, and tracer transport. Illustrative examples and problems are drawn from the atmosphere, ocean, crust, mantle, and core of the Earth and other Planets. Open to graduate and advanced undergraduate students. Recommended Course Background: Basic Physics, Calculus, and familiarity with ordinary differential equations.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.431. Tectonics Seminar. 3.0 Credits.
Introduction to plate tectonics and its "framework" role in understanding the Earth. Kay papers will be discussed in a weekly seminar class. Focus will be on early works that helped establish the theory, in addition to recent breakthrough contributions that have led to modifications and improvements to the theory of plate tectonics.
Instructor(s): D. Viete.

AS.270.495. Senior Thesis. 3.0 Credits.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Earth and Planetary Sciences. Open to Sr. departmental majors only. Required for department honors.
Instructor(s): A. Gnanadesikan; T. Haine
Area: Natural Sciences
Writing Intensive.

AS.270.496. Senior Thesis. 4.0 Credits.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Earth and Planetary Sciences. Open to Sr. departmental majors only. Required for department honors.
Instructor(s): A. Gnanadesikan; B. Passey; T. Haine
Writing Intensive.

AS.270.501. Independent Study. 3.0 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses.
Instructor(s): B. Marsh; B. Zaitchik; C. Parker; K. Szlavecz.

AS.270.502. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.270.503. Independent Research. 3.0 Credits.
Instructor(s): G. Ball; K. Lewis.

AS.270.504. Independent Research. 0.0 - 3.0 Credits.
Research under the direction of members of the Earth & Planetary Sciences Faculty.
Instructor(s): B. Zaitchik; K. Szlavecz.

AS.270.507. Internship. 1.0 Credit.
Instructor(s): C. Parker.

AS.270.595. Internship. 1.0 Credit.
Instructor(s): C. Parker; D. Sverjensky; D. Veblen; D. Waugh.

AS.270.599. Independent Study. 3.0 Credits.
Instructor(s): Staff.

AS.270.603. Geochemistry Seminar.
A variety of topics of current interest involving mineral-fluid interactions will be reviewed.
Instructor(s): D. Sverjensky.

AS.270.605. EPS Colloquium.
A weekly seminar series in which graduate students present their latest research results and attend Departmental seminars. This course is required for all graduate students in the Department of Earth and Planetary Sciences.
Instructor(s): Staff.

AS.270.606. EPS Colloquium.
A weekly seminar series in which graduate students present their latest research results and attend Departmental seminars. This course is required for all graduate students in the Department of Earth and Planetary Sciences.
Instructor(s): T. Wright.

AS.270.611. Global Atmospheric Dynamics.
This course will examine the fluid dynamics that determine large-scale atmospheric circulation and variability using Ian James' "Introduction to Circulating Atmospheres." Topics covered will include the dynamics of Hadley cells, mid-latitude jets, baroclinic instability, monsoon circulations, and low-frequency variability of the circulation.
Instructor(s): A. Gnanadesikan.

Transitioning from graduate school to a postdoc to a "permanent" job in the natural sciences requires a set of essential skills that are not covered as a formal component of most Ph.D. programs. This seminar will be a weekly discussion of career issues relevant to new scientists. Topics will include elements of good presentations, conferences, scientific writing and peer-review, employment trends, job interviews, and grant proposals. The class will conclude with a mock grant proposal review panel, conducted by the students. This seminar is aimed at graduate and advanced undergraduate students in the natural sciences planning careers in academia or industry.
Instructor(s): J. Roberts.

AS.270.615. Inversion Modeling & Data Assimilation.
This graduate class will introduce modern inverse modeling and data assimilation techniques. These powerful methods are used in atmospheric science, oceanography, and geophysics and are growing more widespread. Topics will include: singular value decomposition, Green's function inversions, Kalman filtering, and variational data assimilation. The class will include lectures on concepts and theory, and practical experience in the computer laboratory. Permission of Instructor Required
Instructor(s): T. Haine.
AS.270.616. Geodesy, Gravity, and Tides.
Introduces physical geodesy problems, and the interpretation of geoid and gravity anomalies on Earth and other planets. Covers potential theory, measurement techniques from surface and spacecraft, planetary rotation, and tides. Recommended: AS.110.301 or EN.553.291 (or equivalent)
Prerequisites: (AS.110.202 OR AS.110.211 or equivalent) AND (AS.171.101 OR AS.171.105 or equivalent)
Instructor(s): J. Roberts
Area: Natural Sciences.

Also offered as 270.318
Instructor(s): B. Zaitchik; K. Lewis
Area: Natural Sciences.

AS.270.619. Regional Climate Analysis.
This seminar style course will address advanced topics in regional climate, including dynamic mesoscale models, climate change downscaling, seasonal forecasts, and statistical methods. Students will review relevant literature and collaborate to address modeling and analysis challenges.
Instructor(s): B. Zaitchik
Area: Natural Sciences.

AS.270.620. Seminar in Geophysical Turbulence and Transport.
Turbulence plays an important role in setting the structure of both atmospheres and oceans by transporting heat and momentum. It also plays a key role in mobilizing chemical species such as nutrients and aerosols that play key roles in the Earth System. This seminar will cover how we measure and model turbulence and its effects. For the Fall of 2015 the course will center around Planetary Boundary Layers, including topics such as scaling theories, large eddies in boundary layers and their simulation, and interactions with small-scale topographic features.
Instructor(s): A. Gnanadesikan.

Discussion of the physical principles that underlie earth remote sensing. Topics to include radiative transfer in Earth's atmosphere, operating principles of active and passive remote sensing systems, and advanced methods for image analysis.
Instructor(s): B. Zaitchik.

AS.270.626. Ocean General Circulation.
The aim of this course is to achieve conceptual understanding of the large scale low frequency ocean general circulation. The role of the ocean circulation in earth's climate is emphasized throughout.
Instructor(s): T. Haine.

Discussion of current research topics in soil ecology and biogeochemistry.
Instructor(s): K. Szlavecz.

AS.270.628. Field Seminar.
Weekend field trip to explore regional geology. Students are required to prepare short presentations on field trip stops in advance of weekend trip. Attendance at organizational meetings is required. Open to E & PS graduate students and upper level E & PS undergraduate majors and minors. Two meetings to be scheduled prior to trip. Trip dates are 4/15-4/17/2016. Consult instructors for details.
Instructor(s): K. Lewis.

AS.270.629. Tracer Transport in Geophysical Flows.
This course examines the transport of substances in geophysical flows. Topics covered include fundamental transport processes, transport in simple flows, and use of chemical tracers to infer transport properties. These concepts will be illustrated by case studies in a variety of geophysical flows, including the flow in atmospheres, oceans, lakes, and groundwater.
Instructor(s): D. Waugh.

AS.270.630. Physics and Chemistry of Aerosols.
This course will cover fundamentals of aerosol physics and chemistry. Topics covered will include aerodynamics and diffusion of aerosol particles, condensation and evaporation, particle size distributions, optics of small particles, characterization of particle composition, and the diversity of aerosols found in planetary atmospheres. Recommended Course Background: Basic Physics and Chemistry. Calculus.
Instructor(s): S. Horst.

AS.270.631. Tectonics Seminar.
Introduction to plate tectonics and its "framework" role in understanding the Earth. Kay papers will be discussed in a weekly seminar class. Focus will be on early works that helped establish the theory; in addition to recent breakthrough contributions that have led to modifications and improvements to the theory of plate tectonics.
Instructor(s): D. Viete
Area: Natural Sciences.

AS.270.633. Advanced Topics in Isotopic Geochemistry.
Consent of instructor required In depth exploration of selected systems in stable isotope geochemistry, and examination of the physical basis of stable isotope fractionation. Topics vary annually.
Instructor(s): N. Levin
Area: Natural Sciences.

AS.270.641. Present and Future Climate.
Meets with AS.270.378.
Prerequisites: Student may not receive credit for both AS.270.378 and AS.270.641.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.270.642. Surface Geochemistry.
Instructor(s): D. Sverjensky.

AS.270.644. Physics of Climate Variability.
This course is an advanced-level review of the ways in which climate varies on time scales of seasons to decades, including El Nino, the Pacific Decadal Oscillation, the Indian Ocean Dipole Mode, the North Atlantic Oscillation and others. Topics covered will include, depending on class's interest: 1) Methods for isolating climate modes. (2) Key dynamic and thermodynamic processes involved in causing such fluctuations, including atmospheric and oceanic wave propagation, air-sea interaction and changes in the thermohaline circulation. (3) Impacts of climate modes on biogeochemical cycling, including some that are used by paleoclimatologists to reconstruct past variability. Geophysical understanding and links to fundamental mechanisms are emphasized. Format will consist of a mix of lectures and paper discussions.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.645. Earth System Modeling.
Introduces students to using comprehensive Earth System Models. Students will learn about how such models are structured and configure experiments with such a model, based on their interests.
Instructor(s): A. Gnanadesikan.
AS.270.647. Earth's Interior.
Mechanical processes in Earth's core and mantle with applications to plate tectonics, the thermal and chemical evolution of the Earth, and generation of Earth's magnetic field.
Instructor(s): P. Olson.

AS.270.654. Environmental Data Analysis.
Environmental data is often messy-contaminated with noise, fundamental nonlinear, potentially stationary. This course will build on Menke's Environmental Data Analysis with Matlab to examine methods of analyzing environmental data that don't lead us to confuse noise with signal. Topics covered will include significance testing, spectral estimation, nonparametric methods, multivariate data analysis. Applications will be tailored to the student interest.
Instructor(s): A. Gnanadesikan.

AS.270.661. Planetary Fluid Dynamics.
Recommended Course Background: AS.270.646 or equivalent.
Instructor(s): D. Strobel
Area: Natural Sciences.

Instructor(s): S. Horst.

Instructor(s): K. Szlavecz
Area: Natural Sciences.

AS.270.680. Seminar in Regional Field Geology.
Introduction to the regional geology and geological history of Maryland and surrounding areas. Key papers on regional bedrock geology and Phanerozoic tectons are reviewed in weekly seminar classes during Weeks 1–8. Two three-day field trips are then made on weekends of April 7–9 and April 21–23. Fieldwork will be designed—with student input—to test ideas and models from the literature. Techniques in sedimentary, metamorphic and structural field geology are introduced and developed in the field. Recommended course background: AS.270.220 and AS.270.221, or instructor permission.
Instructor(s): K. Lewis
Area: Natural Sciences.

AS.270.696. Special Topics in Planetary Exploration.
A selection of planetary research topics investigated by Prof. Strobel spanning the past 45 years covering the progress that has been made and remaining problems that still need to be addressed. The majority of topics will involve the outer solar system and the science discoveries made by the Voyager, Cassini-Huygens, and New Horizons Missions as well as observations by Earth orbiting satellites – IUE, HUT, HST, FUSE.
Instructor(s): D. Strobel
Area: Natural Sciences.

AS.271.120. Environmental Photojournalism. 3.0 Credits.
Environmental cognition, consciousness and communication are produced, reproduced, interpreted and remembered with the support of visual representations and, in particular, photography. Images increasingly structure our experience of nature, environmental problems, human-environmental relations, and ecological awareness. Students will review critical literature focusing on visual representation theory, the relationship between images and social change, and the history and typology of environmental photography. An understanding of modern environmental history, environmental issues and sustainability is required. Students will identify and investigate environmental issues facing Baltimore, participate in photographic critiques, and develop a final documentary project focusing on a specific environmental narrative. The class is designed with an emphasis on independent research and practice, interdisciplinary analysis, and application.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.271.301. Climate Change Adaptation in the Developing World. 3.0 Credits.
This course considers the way in which people and their livelihoods are adapting to climate change in sensitive regions of the developing world. The course will include an overview of climate systems and climate change science, although it will emphasize vulnerability assessment from an ecosystem and livelihood perspective. Using a case-study approach, the focus will be on key economic sectors of agriculture, water resources, forest systems and tourism. A focus of the course is how to develop an informed approach to climate change adaptation that can drive both national policy and international development and donor efforts to create sustainable responses that serve both the local country and global needs. Students will consider adaptive capacity in specific countries, evaluate the feasibility and sustainability of current adaptation strategies, differentiate national and international efforts and effects of adaptation, learn key tools for climate change assessment, review and critique climate data sources for developing countries, and compare climate change adaptation to the developed world. GECS Majors Only. Prerequisites: Intro to Sustainability, Intro to Global Environmental Change, or Climate Change: Science and Policy.
Prerequisites: AS.270.107 OR AS.271.107
Instructor(s): A. Monopolis; C. Parker
Area: Social and Behavioral Sciences.

AS.271.302. Exploring Nature. 3.0 Credits.
This course integrates environmental literature and nature writing with weekly outdoor excursions. Students will survey a range of authors that have written about nature and environmental issues. Field trips to Baltimore's parks and green spaces will encourage students to discover their own sense of place and environmental worldview through careful exploration, observation and reflection. Using a journal, students will reflect on their experiences, perspectives and insights.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.271.304. Sustainable Food Systems. 3.0 Credits.
Where does your food come from? What impact does food production have on the environment and human societies? How can food systems become more sustainable as the human population increases?
This seminar-style course examines the past, present, and future of agriculture, including topics such as the foodways of indigenous people, modern "factory farming" versus organic agriculture, genetically modified foods, and the interplay among science, economics, policy, and agriculture. Involves hands-on experiences.
Instructor(s): R. Kelly
Area: Social and Behavioral Sciences.

AS.271.309. Designing Sustainable Wellness. 3.0 Credits.
This course examines the convergence of social and environmental sustainability within the built environment. The built environment refers to the space, structures and systems humans generate for living, working and playing. This includes everything from homes and office buildings, to neighborhoods and cities, to green spaces and parks. It also includes hard infrastructure, such as energy, transportation and water systems, and soft infrastructure, such as formal human services (e.g. health, education, recreation). More recently, the term has expanded to include conditions related to public health, such as walkability, bikability, and access to healthy foods. This course will examine the conceptual frameworks that support the creation of built environments, assess their impact on environmental and social well-being, and re-imagine methodologies and designs that may better promote “sustainable wellness” or, socio-ecological sustainability, in the future. Through case studies and a final design-based project, students will learn and apply the fundamental principles behind socio-ecologically sustainable design. The course is designed with an emphasis on interdisciplinary analysis and systems thinking. The course is geared towards GECS majors, in addition to students interested in psychology, design, architecture and urban planning.
Instructor(s): A. Monopolis
Area: Engineering, Social and Behavioral Sciences.

AS.271.360. Climate Change: Science & Policy. 3.0 Credits.
Prereq: 270.103 or permission of instructor. This course will investigate the policy and scientific debate over global warming. It will review the current state of scientific knowledge about climate change, examine the potential impacts and implications of climate change, explore our options for responding to climate change, and discuss the present political debate over global warming.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.271.401. Environmental Ethics. 3.0 Credits.
Environmental Ethics is a philosophical discipline that examines the moral relationship between humans and the natural environment. For individuals and societies, it can help structure our experience of nature, environmental problems, human-environmental relations, and ecological awareness. Beginning with a comprehensive analysis of their own values, students will explore complex ethical questions, philosophical paradigms and real-life case studies through readings, films and seminar discussions. Traditional ethical theories, including consequentialism, deontology, and virtue ethics will be examined and applied. Environmental moral worldviews, ranging from anthropocentric to ecocentric perspectives, will be critically evaluated. Organized debates will help students strengthen their ability to deconstruct and assess ethical arguments and to communicate viewpoints rooted in ethical principles. Students will apply ethical reasoning skills to an examination of contemporary environmental issues including, among others, biodiversity conservation, environmental justice, climate change, and overpopulation. Students will also develop, defend and apply their own personal environmental ethical framework. A basic understanding of modern environmental history and contemporary environmental issues is required. Prior experience with philosophy and ethics is not required.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.271.402. Water, Energy, and Food. 3.0 Credits.
The water, energy and food (WEF) nexus is a topic of growing interest in the research and policy communities. This course will survey WEF concepts and principles, introduce tools of analysis, and engage students in case studies of critical WEF issues in the United States and internationally.
Instructor(s): B. Zaitchik.

AS.271.403. Environmental Policymaking and Policy Analysis. 3.0 Credits.
This course provides students with a broad introduction to US environmental policymaking and policy analysis. Included are a historical perspective as well as an analysis of future policymaking strategies. Students examine the political and legal framework, become familiar with precedent-setting statutes such as NEPA, RCRA, and the Clean Air and Clean Water Acts, and study models for environmental policy analysis. Cost benefit studies, the limits of science in policymaking, and the impact of environmental policies on society are important aspects of this course. A comparison of national and international policymaking is designed to provide students with the proper perspective. This course is taught in conjunction with an identical graduate course. All students will be expected to perform at a graduate level.
Instructor(s): H. Serassio; R. Solomon
Area: Social and Behavioral Sciences.

AS.271.404. GIS Workshop. 1.0 Credit.
An accompaniment to the GECS Senior Capstone Seminar for students whose research project involves a GIS component. Designed to enable beginner to advanced GIS users to acquire the data and skills needed to accomplish their research goals.
Corequisites: AS.271.506
Instructor(s): R. Kelly
Area: Natural Sciences.

AS.271.501. Independent Study. 3.0 Credits.
Instructor(s): A. Monopolis.

AS.271.502. Independent Study. 1.0 - 3.0 Credits.
Instructor(s): A. Monopolis.
East Asian Studies

http://krieger.jhu.edu/east-asian/

The East Asian Studies major is interdisciplinary and interdepartmental. Its primary purpose is to introduce undergraduates to the knowledge, language skills, and research methods they will need to enter various academic and professional paths relating to China, Japan, and Korea. Majors in East Asian Studies engage in intensive Chinese, Japanese and/or Korean language study through the Center for Language Education and work with faculty on such topics as China in the global economy, nationalism in East Asia, Korean identity and culture, modern Japanese history and politics, Chinese urban history, and women in East Asia. Students are encouraged to pursue original research projects in East Asia with the support of intersession and summer travel grants, stipends for conference presentations, a senior thesis honors option, and seminars that bring together research scholars, faculty, graduate students and undergraduates in a manner that is distinctly Hopkins. Alumni of the program are making their mark around the world in business and finance, academia, law, international development, medicine and public health, engineering, media, public service, and the arts.

Hopkins in Tokyo

In fall 2012, a full-year undergraduate exchange program began with the University of Tokyo, and it is off to a great start. This new study abroad program was designed with Hopkins' East Asian Studies majors and Japanese language students in mind. As with other departmental study abroad programs at Hopkins, students' credits and grades will be transferred between the two universities. This is a direct exchange program between our universities, rather than a program run by Hopkins. For each Hopkins student who attends the University of Tokyo, one University of Tokyo student will attend Hopkins. Each Hopkins student has a Japanese student as his/her personal tutor. The tutors assist students in both academic matters and in daily life.

Limited to 1-3 students per year, admission to the University of Tokyo program is competitive. Students must have completed 4 semesters of college-level Japanese or the equivalent, have a term GPA of 3.0 or above, and submit two faculty references, one of which should be from a Japanese language instructor. For more information and application instructions, visit krieger.jhu.edu/east-asian/study-abroad/hopkins-in-tokyo/

Hopkins Waseda University: Global Leadership Program

The aim of the Global Leadership Program (GLP) is to identify students of promise in multiple fields of study and promote their development as leaders in a world of ever-changing demands and opportunities. 10-15 Fellows from top-ranked U.S. universities will join another 10-15 Waseda Fellows in this U.S.-Japan "Zemi", a unique Japanese-style collaborative seminar and small-group pedagogical method. Students will take classes and conduct join research projects. This program is for the academic year and does not require prior knowledge of Japanese language. Admission to the program is limited to two JHU students per year and is competitive. For more information and application instructions, visit http://krieger.jhu.edu/east-asian/study-abroad/waseda-university-exchange-program/.

Requirements for the B.A. Degree

(See also Requirements of a Bachelor's Degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree).)

The curriculum of the East Asian Studies major consists of a balanced mixture of language and area studies. Students select from among three discipline-based focus areas - history, political science, or sociology - or create an individualized focus area. In addition to solid language training and content courses about the region, EAS majors receive training in the methods and theory of the particular academic discipline they select as a focus area. If they choose, East Asian Studies majors may double major in International Studies, as the requirements of each of the three focus areas overlap with those of
International Studies. The individualized focus area requires consultation and approval of the director of undergraduate studies.

**Requirements for the B.A. Degree**

**One East Asian Survey Course**

<table>

3 East Asian Studies course at any level 3

Additional language study (optional) 3

Additional language study (optional) 3

3  3

**Total Credits: 49**

**Honors**

* Honors in the major may be earned by maintaining a GPA of 3.7 in the major and writing a senior honors thesis by taking a two-semester seminar, AS.310.431 Senior Thesis Seminar: East Asian Studies and AS.310.432 Senior Thesis Seminar: East Asian Studies. The thesis seminar is a total of six credits and may count toward two of the required EAS courses.

**Other Departmental Requirements**

No major requirements may be taken satisfactory/unsatisfactory. All courses required for the major must be passed with a grade of C- or higher. The University encourages students enrolled in this program to take advantage of foreign study options. Courses and programs must be pre-approved by the student’s East Asian Studies advisor. Transfer credit policy: Up to six classes may be transferred from study abroad programs or other schools upon approval of the major advisor.

For current faculty and contact information go to http://krieger.jhu.edu/east-asian/directory/

**Courses**

**AS.310.103. Modern Japan - 1800 to the Present. 3.0 Credits.**
An introduction to the history of Japan from the 18th century to the present. In lectures and discussion we will draw upon a combination of primary source materials (political documents, memoirs, oral histories, journalism, fiction, film) and scholarly writings in order to gain insight into the complex and tumultuous process by which Japan became an industrialized society, a modern nation-state, and a world power.
Instructor(s): A. Bronson  
Area: Humanities, Social and Behavioral Sciences.

**AS.310.104. Pacific Crossings: East Asia and the US from the 19th Century to the Present. 3.0 Credits.**
This course examines the connections between US and East Asian history from the 19th century to the present day. We will explore how cultural exchange and confrontation shaped humanitarian, nationalist, and socialist projects in the US, China, Korea, and Japan. Readings include memoirs, travelogues, essays, and novels that provide a window into transpacific history.
Instructor(s): A. Bronson  
Area: Humanities, Social and Behavioral Sciences  
Writing Intensive.

**AS.310.108. Introduction to Chinese Fiction and Drama. 3.0 Credits.**
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.
Instructor(s): F. Joo  
Area: Humanities.

**AS.310.114. Introduction to East Asian Religions. 3.0 Credits.**
This survey course explores the ideas and practices of various East Asian religious traditions. It covers not only major religious teachings – Confucianism, Buddhism, Daoism, and Shinto – but also touches upon other folkloric traditions, such as shamanism, in order to understand the rich diversity of East Asian religions. Using a variety of methodologies such as art history, literature, history, and anthropology and materials such as paintings, tales, and historical documents, students will be introduced to the doctrines and practices of major religious traditions, as well as themes relating to family, gender, the nation state building, and imperialism.
Instructor(s): F. Joo  
Area: Humanities.
AS.310.115. Ghost Tales from China and Japan, 14th-19th Centuries. 3.0 Credits.
We cannot express our own experience of death – only imagine life after death. How did people in the past conceptualize the world of the dead? Ghost tales will teach us what we imagine as the experience of death and life after death. This course aims to introduce students to a variety of ghost stories in Late Imperial China and Tokugawa Japan and connect their literary imagination of the dead to the cultural, socio-historical, and religious context of each society as well as to the broad East Asian tradition of supernatural narratives. While we also touch upon earlier traditions on narrating the dead, most of the stories in class readings are from the Ming (1368-1644) and Qing (1644-1911) dynasties of China, and the Tokugawa period (1600-1868) of Japan. Key issues include family, gender, sexuality, body, medicine and many more. Although we will also take a look at visual and theatrical representations of the dead, we will primarily focus on literary texts about ghostly phenomena. Film screenings required. All readings are in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.116. Romantic Love in Chinese Literature. 3.0 Credits.
This course aims to introduce students to a variety of literary texts featuring romantic love from the 9th to the mid-20th centuries in China. The target materials cover a wide range of literary products from Bo Juyi’s court poem to the modern Shanghai novella by the woman writer Zhang Ailing (Eileen Chang). As we read romance in a variety of narrative forms such as fiction, drama, and poetry, we will examine changing ideas about marriage, love, sexuality, family, emotion, and morality within the literary discourse as well as in society. Thus, students are expected to connect various literary texts about romance to their socio-historical, literary, and political surroundings. At the same time, we will discuss the shifting significance of romance for writers and reading public and consider how literary texts formed ideas about romance in society. The course is organized chronologically and thematically. Reading assignments are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.117. Love and Illusion in Japanese Literature. 3.0 Credits.
This course aims to introduce students to a variety of literary texts featuring love and illusion from the 12th to the 21st century Japan. We will explore how enchantment and disenchantment play in the literary imagination of romantic love within Japanese literary history. The target texts cover a wide range of literary products from medieval noh drama to the modern novelist Izumi Kyoka’s gothic tales and further to a contemporary Murakami Haruki’s novella. By reading a variety of narrative forms such as diary literature, drama, epic, poetry, and modern fiction, we will examine changing ideas about marriage, love, sexuality, religion, and modernity within the literary discourse.
Instructor(s): F. Joo
Area: Humanities.

AS.310.118. Japanese Popular Culture. 3.0 Credits.
This course will examine Japanese popular culture as a way to discuss contemporary Japanese society. We will investigate a wide range of cultural products – from literature, anime and manga to theater, music, fashion and food – and question how these items are created, circulated, and consumed in Japanese society as well as by individuals. Since many Japanese cultural products also quickly move beyond the national borders in the age of globalization, we will also discuss the global consumption of Japanese popular culture. Topics include gender, sexuality, family, fan community, global capitalism, mass media, race and power. Film screenings and group projects are required. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.204. Rural Development in Asia. 3.0 Credits.
We will examine the transformation of the Asian countryside from the beginning of the twentieth century up until the present by looking at agrarian structure, economic and social development, collectivization and decollectivization, rural industrialization, agribusiness, sustainable agriculture, and rural unrest. Course materials combine theoretical readings with empirical case studies. While theoretical readings examine global processes involving Asia and elsewhere, case studies cover several Asian countries, with an emphasis on China and India.
Instructor(s): B. Gurel
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.214. Empire and Hierarchy in East Asia. 3.0 Credits.
This course investigates the spectrum of unequal political authority in international politics. Empire, as one pole of hierarchical politics, persists in today’s multilateral, rule-based order. We will examine the theoretical foundations of hierarchy and empire in the study of international politics in East Asia. In addition, we will look at why empires arose at particular junctures, and contemporary directions in the debate on empire.
Instructor(s): J. Wang
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.303. A World Upturned: Cultures of Catastrophe in Japan. 3.0 Credits.
Focusing on earthquake science and earthquake lore, radioactive mutation and nuclear decimation, this course will consider the relationship between technological culture and large-scale cataclysm. In addition to treating a broad array of written, graphic, and filmic representations of Japan’s past and potential catastrophes, we will also be keeping a close and careful eye on present developments in Japan’s 2011 earthquake/tsunami/nuclear disaster.
Instructor(s): R. Sayre
Area: Humanities, Social and Behavioral Sciences.
AS.310.304. The Architectonics of Tokyo: The Anthropology of City Life in Japan and Abroad. 3.0 Credits.
In this advanced undergraduate seminar on urban life and the anthropology of aesthetics, we will develop tools with which to think and write about city life in Japan and abroad. ‘Architectonic’ is a philosophical term referring to the ability to pull otherwise autonomous ideas together into a single coherent whole. In this course we will employ methodologies culled from class readings, lectures, web-based resources, and class discussions to collectively construct a digital patchwork of writings and images that will serve as the classes’ own quasi-coherent whole, or ‘architectonic’ of city life in Tokyo.
Instructor(s): R. Sayre
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.305. Southeast Asia and US Security Strategy. 3.0 Credits.
This survey course is designed to introduce students to Southeast Asia – the ten member countries of the Association of Southeast Asian Nations (ASEAN) plus Australia and New Zealand. Southeast Asia is an integral part of the broader region of East Asia and a geographic bridge to the Indian subcontinent (South Asia). Southeast Asia has been one of the great success stories in the saga of modernization and development of post-colonial Afro-Asia over the last six decades. Its resulting economic importance is matched by its strategic significance given the presence of imbedded jihadist networks and the emergence of China as a regional great power and aspirant superpower. Nevertheless, the region has been largely overlooked by senior foreign policy and defense officials in Washington. This course will equip students to fill that void by examining the region from the perspective of national security strategy – broadly understood in its multiple dimensions. Students will be challenged to formulate some element of a viable U.S. national security strategy for the region.
Instructor(s): M. Ott
Area: Social and Behavioral Sciences.

AS.310.306. Domestic Politics of Contemporary China. 3.0 Credits.
This course introduces students to China’s contemporary political history and current political system. It helps students develop a critical understanding of China’s governance institutions and processes, political economy, and state-society relations. The course focuses primarily on China’s domestic politics but also covers China’s changing role in Asia and the world.
Instructor(s): Y. Yang
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.307. Governance and Politics in China. 3.0 Credits.
A dramatic rise of popular protests in China today has spurred lively discussions about the causes, dynamics, and impact of these protests. This course will provide students with an opportunity to understand these issues by discussing the social, institutional and cultural background of protests, major forms of protest, social groups involved, government responses, and social implications of various kinds of protests. The first part of the course will explore significant socio-economic changes since 1978 and the effects of these changes on China’s social structure and stratification. This part will also examine changes in governance and political systems in the reform era and review important theories of contentious politics. The second part will examine protests by distinct social groups, including peasants, workers, homeowners, and ethnic minority groups, pro-democratic activists, among others. This part will identify similarities and differences in the demands and actions of different groups, introduce the major forms of popular resistance, and explore how the state deals with them accordingly. The course will conclude with discussion of the outcomes of social protests in China and make a cross-national comparison between protests in China and other authoritarian states. By taking China as an example, this course will enhance students’ knowledge about forms of popular contention and government responses in an authoritarian regime as well as help students develop analytical and critical thinking skills with regard to contentious politics.
Instructor(s): Y. Li
Area: Social and Behavioral Sciences
Writing Intensive.

AS.310.308. The Frontier in Late Imperial China. 3.0 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of "China". Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China’s northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

AS.310.309. Monsters, Demons, and Ghosts: Folklore and Festival in Japan. 3.0 Credits.
This course examines popular narratives and festivals from historical through contemporary Japan. Rather than traditional sources (canonical works, philosophical doctrines, and high art), it focuses on non-elite modes of expression: oral histories, epic tales, local legends, stories of the supernatural, music, religious festivals, manga, anime, and film. Through analyses of these mediums, students explore the underlying belief structures that have shaped ideas concerning death and the afterlife, moral ethics, and the spiritual realm in Japan. The course also tackles issues concerning the intellectual construct of the ‘folk’ and folk religion. Who are the folk? How does this concept relate to regional versus national identity, civilized versus so-called primitive populations, premodern versus modern categories? Students will engage these questions through active discussions in the classroom, in-class writing exercises, mini-presentations, and two papers.
Instructor(s): C. Carter
Area: Humanities
Writing Intensive.
**AS.310.310. Women and Gender in East Asian Religions. 3.0 Credits.**

This course examines the complexities of gender and the role that women have played in the religions of China, Korea, and Japan. It explores two main types of content: 1) religious discourse on women and gender through doctrines, scriptures, narratives, myths, and legends; and 2) the practices, beliefs, and lives of real women through historical cases, including those of nuns, laity, sovereigns and family members. Organized in chronological order, the course begins with early sources across East Asia and finishes in contemporary times. Readings and assignments emphasize the analysis of primary sources, complemented by secondary works for historical and cultural context. Students will end the course with a research paper focused on a topic of their choice.

Instructor(s): C. Carter

Writing Intensive.

**AS.310.315. First Year Classical Chinese, First Semester. 3.0 Credits.**

Readings in prose and poetic texts of the pre-Qin period. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in western languages that treat the culture and writers of the Ancient period. Biweekly quizzes included. A final translation project required.

Recommended Course Background: 2 years mandarin or the equivalent.

Instructor(s): F. Joo

Area: Humanities.

**AS.310.316. First Year Classical Chinese: Language and Literature of the Ancient Period. 3.0 Credits.**

Readings in prose and poetic texts of the Zhou and Han Dynasties. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in western languages that treat the culture and writers of the Ancient period. Quizzes and Tests (Midterm and Final) will cover both language and cultural data.

A short paper also required.

Instructor(s): V. Cass

Area: Humanities.

**AS.310.352. Current Issues in US-Asia Relations: A Practitioner's View. 3.0 Credits.**

We will examine how major political events, players, norms and institutions have shaped US-Asia relations in the modern era.

Instructor(s): W. Konishi

Area: Social and Behavioral Sciences

Writing Intensive.

**AS.310.431. Senior Thesis Seminar: East Asian Studies. 3.0 Credits.**

Students may earn honors in the East Asian Studies major by maintaining a 3.7 average in the major and completing a senior thesis by taking the year-long AS.310.431 & AS.310.432 Senior Thesis Seminar: East Asian Studies. Students are required to secure the mentorship of an adviser among the EAS faculty before asking for permission to enroll in the course.

Instructor(s): T. Meyer-Fong

Area: Humanities, Social and Behavioral Sciences

Writing Intensive.

**AS.310.432. Senior Thesis Seminar: East Asian Studies. 3.0 Credits.**

This course is the continuation of Senior Thesis Course AS.360.431 for students completing their thesis in the East Asian Studies program.

Instructor(s): H. Kuo

Area: Social and Behavioral Sciences

Writing Intensive.

**AS.310.501. Independent Study - East Asia. 1.0 - 3.0 Credits.**

Students carry out an independent research project involving East Asia.

Instructor(s): J. Andreas.

**AS.310.592. Summer Internship. 1.0 Credit.**

Instructor(s): W. Rowe.

**AS.310.600. Advanced Topics in East Asian Studies.**

This interdisciplinary seminar gives graduate students in East Asian Studies opportunities to present and receive comments on their dissertation chapters, prospectuses, conference papers, and/or potential publications.

Instructor(s): E. Chung

Area: Humanities, Social and Behavioral Sciences.

**Cross Listed Courses**

**History of Art**

**AS.010.103. Introduction to the Art of Asia. 3.0 Credits.**

A survey of the art and architecture of Asia, from the ancient world to the present and including the Indian subcontinent, China, Japan, Korea, and Southeast Asia.

Instructor(s): M. Gent

Area: Humanities.

**AS.010.211. Monuments of Asia. 3.0 Credits.**

An examination of selected architectural monuments from across Asia, including the Indian subcontinent, Southeast Asia, China, Japan, and Korea. Ancient to contemporary.

Instructor(s): R. Brown

Area: Humanities.

**AS.010.225. Image within the Image: Self-referential Pictures in European and Asian Art. 3.0 Credits.**

Prominent in both the Eastern and Western visual traditions are pictures that display a certain kinds of pictorial objects – canvases, statuettes, screens, hanging scrolls, altarpieces, and prints – within their compositions. These pictures within pictures call our attention to several interesting epistemological questions. For instance, what are images and how do they work? In which context, to what purpose, and by whom are they created and used? How should we study them? This course is designed to find our own answers and formulate further questions from a new and distinctive angle: by examining the appearance of “images within images” across the East/West divide, and across the time periods ranging from the ancient to the modern era. What kinds of differences, and what kind of similarities, are to be found in the way cultures that are spatially and temporally remote from one another conceived the image? René Magritte’s Human Condition dated to 1933, for example, plays the idea with being inside and outside simultaneously, an ambiguity that can also be found in the eighteenth-century portrait of the Qianlong Emperor (r. 1735-1799) entitled “One or Two?” In Chinese mythology, multiple stories exist that may be compared to the ancient myth of Pygmalion: a representation of a beautiful woman suddenly becomes animated, acquiring real presence and enters into a relation with a male figure. Discussing such similarities or common ideas behind images from different cultures will help us delve deeper into the questions of how we perceive images and why we create and give meaning to them. There will be a final paper.

Instructor(s): Y. Han

Area: Humanities.
AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas. 3.0 Credits.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the “global South.” This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of “global modernism.” Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.353. Key Moments in East Asian Politics & Visual Culture. 3.0 Credits.
Examines key political moments in China, Japan, and Korea from 1850 to the present, focusing on the way visual imagery shapes these events. Includes: Japanese occupation of Korea, Hiroshima and Nagasaki bombings, 1989 Tiananmen square protests, North Korean propaganda. Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.411. A Continued History of Chinese Painting, 1400-1800. 3.0 Credits.
This course examines Chinese painting between 1400 and 1800, a time when this art emerged as both a practice and a means of cultural analysis within Chinese society. Changes in both representational modes and the forms of art-historical consciousness, as reflected in the art criticism of Chinese literati, will be emphasized. Other topics include the shaping of lived environments through interior display, garden-building, and new visions of urban space. Instructor(s): L. Liu.

History

AS.100.219. Chinese Cultural Revolution. 3.0 Credits.
The Cultural Revolution was Mao Zedong’s last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revolution decade and since. Previously offered as AS.100.219. Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.236. Chinese Cultural Revolution. 3.0 Credits.
The Cultural Revolution was Mao Zedong’s last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revolution decade and since. Previously offered as AS.100.219. Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.243. China: Neolithic to Song. 3.0 Credits.
This class offers a broad overview of changes in China from Neolithic times through the Song Dynasty (roughly from 5000 BCE through the 13th century CE) and will include discussion of art, material culture, and literature as well as politics and society. Close readings of primary sources in discussion sections and extensive use of visual material in lectures will help students gain firsthand perspective on the materials covered. Not open to students who have previously taken AS.100.208. Cross listed with East Asian Studies
Prerequisites: If you have completed AS.100.208 you may not enroll in AS.100.243.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

AS.100.248. Japan in the World. 3.0 Credits.
This course is an introduction to Japan's history from 1800 to the present with emphasis on the influences of an increasing global circulation of ideas and people. Topics include the emperor system, family and gender, imperialism, World War II, the postwar economy, and global J-pop. Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

AS.100.250. National Identity in 20th Century China & Japan. 3.0 Credits.
Using primary sources, including literature and film, we will explore the changing ways in which ideologues, intellectuals, and ordinary citizens defined national identity in 20th century China and Japan. Cross-listed with WGS and East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.327. Early Modern China. 3.0 Credits.
The history of China from the 16th to the late 19th centuries. Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.347. Early Modern China. 3.0 Credits.
The history of China from the 16th to the late 19th centuries. Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.348. 20th-Century China. 3.0 Credits.
The history of China from the last years of the Qing Empire to the post-Mao reforms.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.381. Religion, Medicine, and the Mind in Japan. 3.0 Credits.
This seminar explores the relationship between religion and medicine in treating disorders of the mind and soul throughout Japanese history. We will consider such topics as animal spirit possession, Buddhism, family-based care, psychotherapy, gender, and social withdrawal. Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.385. Mobility and Encounter in the Medieval Indian Ocean. 3.0 Credits.
This seminar discusses forms of mobility and exchange—trade and travel, conquest and religious transformation, diasporas and migration, the spread of practices and technologies—across the Indian Ocean from the 8th to 16th centuries.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.398. Images of Postwar Japan. 3.0 Credits.
This seminar explores Japan's changing place in the world in the decades following World War II, with an emphasis on analyzing visual media such as photographs, films, advertisements, and comic books. Topics include relations with the U.S. and other countries in East Asia, particularly the two Koreas; the atomic bombings of Hiroshima and Nagasaki; and the global contexts for an expanding Japanese consumerism in the late 20th century.
Instructor(s): H. Kim.
Area: Humanities, Social and Behavioral Sciences

AS.100.424. Women & Modern Chinese History. 3.0 Credits.
This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women's experiences for their own political and social agendas. Cross listed with East Asian Studies.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.479. Problems in Chinese Urban History. 3.0 Credits.
Reading and discussion of works in Western languages on the role of cities in Chinese society, from the Tang dynasty (628-906 A.D.) to the present.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.482. Historiography Mod China. 3.0 Credits.
A survey of assumptions and approaches in the study of modern Chinese history, as written by Chinese, Japanese, and Western historians.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

A reading seminar on the interconnected histories and historiographies of Japan and Korea in the nineteenth and twentieth centuries.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

AS.100.614. Seminar in Modern Chinese History.
A seminar covering major milestones in research on late imperial and modern Chinese history, primarily in English. Open to undergraduates with the permission of the instructor.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.733. Reading Qing Documents.
Open to advanced undergraduates with at least one semester of Classical Chinese. This course has several objectives. First and foremost, it is a hands on document reading class designed to familiarize students with the skills, sources, and reference materials necessary to conduct research in Qing history. To that end, we will spend much of our time reading documents. At the same time, we will engage in problem solving exercises designed to develop and enhance basic research skills. Finally, several important archive-based secondary works in the secondary literature are available on reserve for your reference. These works demonstrate the ways in which historians have recently applied archival skills (and materials).
Instructor(s): T. Meyer-Fong.

History of Science Technology

AS.140.146. History of Public Health in East Asia. 3.0 Credits.
This course examines the history of disease, epidemics, and public health responses in East Asia from the 17th-20th centuries. This public health history emphasizes the interactions, connections, and comparisons among China, Japan, Korea, and Taiwan.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.147. Chinese Medicine: Tradition and Modernity. 3.0 Credits.
Examine Chinese Medicine's practical application as a therapy of increasing global popularity. While also examining its theoretical frameworks from antiquity to the present, healing methods such as acupuncture and herbal medicine are highlighted.
Instructor(s): J. Flowers
Area: Humanities, Social and Behavioral Sciences.

AS.140.305. From the Compass to Androids: History of Science, Technology, and Medicine in Asia. 3.0 Credits.
The course explores the history and cultural context of science, medicine, and technology in East Asia, from the ancient Chinese science to the latest scientific and technological developments in Japan.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences.
AS.140.346. History of Chinese Medicine. 3.0 Credits.
Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.357. Science Fiction Movies in the East and West. 3.0 Credits.
What is a science fiction (SF) movie? How did SF movies and developments in science and technology influence each other during the twentieth century? What is the use of SF movies for societies? And why are SF movies much more popular in some countries than in others? By watching and analyzing classic and contemporary SF movies from the US, the Soviet Union, Japan, China, and other countries, we will search for answers to these questions. Special emphasis will be given to analyzing how historical, political, and cultural environments in different countries have influenced the production and acceptance of SF movies.
Instructor(s): D. Kim
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.398. Godzilla and Fukushima: Japanese Environment in History and Films. 3.0 Credits.
Juxtaposing Japanese environmental history and its reflection in popular media, the course will explore the intersection between technology, environment, and culture. The course will be accompanied by relevant movie screenings.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.665. History of Science and Technology in Asia.
Graduate level discussion of major historiography of science and technology in East Asia.
Instructor(s): Y. Frumer.

Political Science

AS.190.320. Politics Of East Asia. 3.0 Credits.
Examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. Topics include state-society relations, late development, nationalism, democratization, political culture, social movements, and globalization.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.330. Japanese Politics. 3.0 Credits.
This course introduces students to the major debates and issues of postwar Japanese politics. Topics include nationalism, electoral politics, civil society, and immigration.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.341. Korean Politics. 3.0 Credits.
This course introduces students to the historical and institutional foundations of modern South Korean politics. Topics include nationalism, political economic development, civil society, globalization, and ROK-DPRK relations. (CP)
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.427. Political Economy of Japan and Korea. 3.0 Credits.
This upper-level seminar examines some of the major debates and issues of postwar Japanese and South Korean political economy. Topics include nationalism, gender politics, civil society, immigration, and US-Japan-South Korea trilateral relations.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.442. Civil Society. 3.0 Credits.
This course explores classic and contemporary debates on the concept of civil society and critically examines its analytical value in light of recent developments. Topics include the relationship between civil society, the state, and markets, the role of civil society in development and democratization, social capital, and global civil society. This course is open to graduate students from any discipline. Advanced undergraduate students must obtain permission from the instructor and are expected to keep up with graduate students during class discussions.
Instructor(s): E. Chung
Writing Intensive.

AS.190.612. Comparative Citizenship and Immigration Politics.
Graduate students only. Examines the contemporary political dynamics of migration, citizenship, and race concentrating on North America, Europe and East Asia. We will focus on how citizenship and immigration policies shape immigrant political identities, claims, and strategies as well as how immigrants impact public debates and policies in receiving societies.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

Sociology

AS.230.166. Chinese Migration in Modern World History 1500’s-2000’s. 3.0 Credits.
This interdisciplinary course applies theories of economic sociology to examine the effects of Chinese overseas migration on modern world economy from the sixteenth century to the contemporary era. It examines the contribution of overseas Chinese to the development of capitalism in the following junctures: the East-West economic integration in the pre-modern era, China’s modern transformation after the Opium War (1839-1842), the making of US national economy in the early twentieth century, as well as the postwar economic miracles in the Pacific Rim, among others. Special Note: Fulfills History requirement for GSCD track students.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.
AS.230.175. Chinese Revolutions. 3.0 Credits.
This course introduces the origins, operation and impacts of five major revolutions in modern China between 1850 and 1950. These include the Taiping Rebellion, the republican revolutions, federalist and southern automatic movements, labor strikes as well as peasant rebellions. It draws on the existing historiography that examines China’s transition from an empire to a republic, impacts of western and Japanese influences to China, as well as the continuity and change of Chinese social organizations. Cross list with International Studies and East Asian Studies. Fulfills IS History requirement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.217. Chinese Overseas in Global History. 3.0 Credits.
This course examines the topics of Chinese overseas migration after the long sixteenth century. It investigates the following themes: First, the making of Chinese maritime frontier in the longterm trade and migration across the South China Sea and beyond; Second, economic functions of Chinese overseas networks in the East-West integration from the early modern era to the ongoing wave of globalization; Third, politics of identity and heritage in Chinese overseas communities. Course may not be taken by students that previously took AS.230.166.
Prerequisites: Course may not be taken by students that previously took AS.230.166.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.228. Colonialism in Asia and Its Contested Legacies. 3.0 Credits.
This seminar examines the theories and historiography of colonialism in Asia, with special focus on the development of British Straits Settlements and Hong Kong as well as Japanese Taiwan. We will review the competing discourses about the impact of colonial dominations in these areas from the 1800s to the present-day. In the beginning of the era, the British built up the economic linkage between Hong Kong and Penang, Malacca as well as Singapore to sustain its dominance throughout the “Far East.” In the middle of the period, the expanding Japanese empire developed Taiwan as a footstep to compete with the British interests in South China and Southeast Asia. Hong Kong and the Straits Settlements, especially Singapore, became the contested terrain where two colonial powers vied for their influences in the region. The competition was not only about trade, but about the construction of a new East Asian regional order after the end of the Chinese hegemony. In the end of the period, the intervention of the US power in postwar Asia facilitated the retreat of the colonial establishments, British and Japanese ones included. The course that compares the colonial establishments and discourses on colonial legacies among the three areas points out that colonialism constituted an inalienable part of Asian history.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.275. Revolution, Reform and Social Inequality in China. 3.0 Credits.
This course explores various aspects of social inequality in China during the Mao Zedong and the post-Mao reform eras. We will examine inequality within villages, the rural/urban divide, urban inequality, education and health policies, and gender and ethnic inequality. Each of these issue areas will be tackled analytically, but the aim is also to understand what it was/is like to live in China during and after the Mao era. Formerly offered as AS.230.321.
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.285. Maritime East Asia. 3.0 Credits.
This course examines the transnational connections among merchants and migrants in the waters of East and Southeast Asia from a historical and comparative perspective. We will explore how diplomatic ties, long-distance trade and migration contributed to the making of cosmopolitan cities such as Quanzhou (Zayton), Malacca, Fort Zeelandia (Formosa), Batavia, Manila, Singapore and Hong Kong in the region from the tenth century onwards. The course will close with an examination of how the transnational connections are relevant to understand interstate competition in Asia’s long twentieth century. Key subjects to be introduced include tribute trade system, trading diasporas, Euro-Chinese co-colonialism, pan-Asianism, as well as history and historiography of maritime silk road.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.336. Family, Gender and Sexuality in China. 3.0 Credits.
This course examines social changes in China since the beginning of the People’s Republic (1949) through the lenses of family, gender and sexuality. The first half of the course focuses on understanding family institutions, women’s status, gender relations and sexualities in connection with major historical transitions between 1949 and the present. The second half includes readings and discussions around several thematic topics regarding family, gender and sexuality in contemporary China in the broader context of politics, economy, and social norms.
Instructor(s): Y. Dong
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.372. Social Protest in Contemporary China. 3.0 Credits.
This class introduces popular resistance in post-1978 China, examining its socioeconomic, political, and cultural background, various types of protests by multiple social groups, and outcomes of protests. Cross listed with Dean's Teaching Fellowship.
Instructor(s): Y. Li
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.377. Colonialism and Anti-Colonialism. 3.0 Credits.
This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.
AS.230.415. Social Problems in Contemporary China. 3.0 Credits.
In this course we will examine contemporary Chinese society, looking at economic development, rural transformation, urbanization and migration, labor relations, changes in class structure and family organization, health care, environmental problems, governance, and popular protest. The course is designed for both graduate and undergraduate students. Undergraduates must have already completed a course about China at Hopkins. Cross-listed with East Asian Studies.
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.435. The China Boom. 3.0 Credits.
This course addresses the origins, global impacts, and demise of China's economic ascendance as a world economic and political powerhouse at the turn of the twenty-first century. The course will cover the historical origins of the China boom and impacts of the boom on global political and economic order. It will also address the social-political imbalances within China that contribute to the global financial crisis and recent slowdown of the Chinese economy. Particular topics include late imperial and Maoist legacies' relation to contemporary economic growth, stages of China's capitalist development, China's outward investment in the developing world, formation and limits of US-China economic symbiosis, and China's participation in global governance, among others.
Instructor(s): H. Hung
Area: Social and Behavioral Sciences
Writing Intensive.

Study of Women, Gender, Sexuality
AS.363.328. Beyond the Global West: Gender/Sexuality, Post-colonialism & Global Capitalism: Feminist Inquiries from Asian Perspectives. 3.0 Credits.
This course examines gender and sexuality issues in both East and South Asian Societies and situates subject matters in the broader contexts of post-colonialism, state formation, revolution and global capitalism.
Instructor(s): Y. Dong
Area: Humanities
Writing Intensive.

Center for Language Education
AS.373.111. First Year Heritage Chinese. 3.0 Credits.
This course is designed for students who have no prior exposure to Chinese. The objective of the course is to help students build a solid foundation of the four basic skills—listening, speaking, reading, and writing in an interactive and communicative learning environment. The emphasis is on correct pronunciation, accurate tones and mastery of basic grammatical structures. Note: Students with existing demonstrable skills in spoken Chinese should take AS.373.111-112. No Satisfactory/Unsatisfactory. Students may choose to attend either lecture at 12pm or 3pm on TTh. Cross-listed with East Asian Studies.
Instructor(s): J. Chen; L. Yin; N. Zhao; Y. Chiang.

AS.373.115. First Year Chinese. 4.5 Credits.
This course is designed primarily for students who have no prior exposure to Chinese. The objective of the course is to help students build a solid foundation of the four basic skills—listening, speaking, reading, and writing in an interactive and communicative learning environment. The emphasis is on correct pronunciation, accurate tones and mastery of basic grammatical structures. Note: Students with existing demonstrable skills in spoken Chinese should take AS.373.111-112. No Satisfactory/Unsatisfactory. Students may choose to attend either lecture at 12pm or 3pm on TTh. Cross-listed with East Asian Studies.
Instructor(s): J. Chen; L. Yin; N. Zhao; Y. Chiang.

AS.373.116. First Year Chinese II. 4.5 Credits.
Introductory course in Modern Standard Chinese. Goals: mastery of elements of pronunciation and control of basic vocabulary of 800-900 words and most basic grammatical patterns. Students work first with Pin-Yin system, then with simplified version of written Chinese characters. Continuation of AS.373.115. Note: Student with existing demonstrable skills in spoken Chinese should take AS.373.111-112. Recommended Course Background: AS.373.115 or permission required.
Prerequisites: Prereg: AS.373.115 or equivalent.
Instructor(s): J. Chen; L. Yin; N. Zhao; Y. Chiang.

AS.373.211. Second Year Heritage Chinese. 3.5 Credits.
This course is designed for students who finished AS.373.112 with C+ and above (or equivalent). Students in this course possess native-like abilities in comprehension and speaking. The course focuses on reading and writing. Cross-listed with East Asian Studies.
Prerequisites: AS.373.112 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

AS.373.212. Second Year Heritage Chinese II. 3.0 Credits.
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Continuation of AS.373.211. Recommended Course Background: AS.373.211 or permission required.
Prerequisites: Prereg: AS.373.211 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

AS.373.215. Second Year Chinese. 4.5 Credits.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Cross-listed with East Asian Studies.
Prerequisites: AS.373.116 or equivalent.
Instructor(s): A. Chen; J. Yin
Area: Humanities.
AS.373.216. Second Year Chinese II. 4.5 Credits.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Recommended Course Background: AS.373.215 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.215 or equivalent.
Instructor(s): A. Chen, J. Yin
Area: Humanities.

AS.373.313. Third Year Heritage Chinese II. 3.0 Credits.
This course is designed for those who have already taken AS.373.212 or equivalent. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be introduced on a regular basis. Recommended Course Background: AS.373.313 or Permission Required. Lab required.
Prerequisites: AS.373.313 or equivalent
Instructor(s): J. Yin
Area: Humanities.

AS.373.314. Third Year Heritage Chinese II. 3.0 Credits.
This course is a continuation of AS.373.313. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be included on a regular basis. Recommended Course Background: AS.373.313 or Permission Required.
Prerequisites: AS.373.313 or equivalent
Instructor(s): J. Yin
Area: Humanities.

AS.373.315. Third Year Chinese. 3.5 Credits.
This two-semester course consolidates and further expands students’ knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible and written assignments will be given. Cross-listed with East Asian Studies
Prerequisites: AS.373.216 or instructor permission
Instructor(s): A. Chen
Area: Humanities.

AS.373.316. Third Year Chinese II. 3.5 Credits.
This two-semester course consolidates and further expands students’ knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible, and written assignments will be given. Continuation of AS.373.315. Recommended Course Background: AS.373.315 or permission required.
Prerequisites: Prereq: AS.373.315 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

AS.373.415. Fourth Year Chinese. 3.0 Credits.
This course is designed for students who finished AS.373.316 with a C+ or above (or equivalent). Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students are supposed to be able to understand most of the readings with the aid of a dictionary, so that class discussion is not focused primarily on detailed explanation of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings’ content. Cross-listed with East Asian Studies
Prerequisites: AS.373.316 or instructor permission
Instructor(s): L. Yin
Area: Humanities.

AS.373.416. Fourth Year Chinese II. 3.0 Credits.
Continuation of AS.373.415. Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students should understand most of the readings with the aid of a dictionary, so that class discussion need not focus primarily on detailed explanations of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings’ content. Recommended Course Background: AS.373.415 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.415 or equivalent.
Instructor(s): L. Yin
Area: Humanities.

AS.373.451. Topics in Chinese Media. 3.0 Credits.
The main focus of this course is to expand the student’s knowledge of four essential skills in Chinese language and to deepen the student’s knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students’ reading comprehension, maintain conversation skills through class discussion, increase understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Recommended Course Background: Completion of four years of Chinese language or permission required.
Instructor(s): N. Zhao
Area: Humanities.

AS.373.491. 5th Year Chinese. 3.0 Credits.
Fifth Year Chinese is designed for students who finished fourth year regular or third year heritage Chinese course at JHU or its equivalent and wish to achieve a higher advanced proficiency level in Chinese. The goal of the course is to help students further develop their listening, speaking, reading and writing skills cohesively and to enhance students’ understanding of Chinese culture and society through language learning.
Prerequisites: AS.373.416 or AS.373.314 or equivalent
Instructor(s): N. Zhao.

AS.378.115. First Year Japanese. 4.5 Credits.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the year, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 150 kanji in context. Knowledge of grammar will be expanded significantly in AS.373.215. No Satisfactory/Unsatisfactory. Student may choose to attend either lecture at 10:30 am or 12 pm on TTh. Cross-listed with East Asian Studies
Instructor(s): M. Johnson; S. Katagiri.
AS.378.116. First Year Japanese II. 4.5 Credits.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesdays/Fridays. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the fall term, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 60 kanji in context. Knowledge of grammar will be expanded significantly in 2nd year Japanese. May not be taken Satisfactory/Unsatisfactory. Recommended Course Background: AS.378.115
Prerequisites: Prereq: AS.378.115 or equivalent.
Instructor(s): M. Johnson; S. Katagiri.

AS.378.215. Second Year Japanese. 4.5 Credits.
Training in spoken and written language, increasing their knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Recommended Course Background: AS.378.115 and AS.378.116 or equivalent.
Prerequisites: AS.378.116 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.216. Second Year Japanese II. 4.5 Credits.
Continuation of Beginning Japanese and Intermediate Japanese I. Training in spoken and written language, increasing students' knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Lab required. Recommended Course Background: AS.378.215 or equivalent.
Prerequisites: Prereq: AS.378.215 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.315. Third Year Japanese. 3.0 Credits.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Cross-listed with East Asian Studies
Prerequisites: AS.378.215 AND AS.378.216 or instructor permission
Instructor(s): M. Nakao
Area: Humanities.

AS.378.316. Third Year Japanese II. 3.0 Credits.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Lab required. Continuation of AS.378.315. Recommended Course Background: AS.378.315 or equivalent.
Prerequisites: Prereq: AS.378.315 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.396. Fundamentals of Japanese Grammar. 2.0 Credits.
This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It is also appropriate for graduate students who need to be able to read materials written in Japanese. Recommended Course Background: AS.378.115-116 or equivalent.
Instructor(s): M. Johnson
Area: Humanities.

AS.378.415. Fourth Year Japanese. 3.0 Credits.
By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Recommended Course Background: AS.378.315 and AS.378.316 or equivalent.
Prerequisites: AS.378.316 or equivalent.
Instructor(s): M. Nakao; S. Katagiri
Area: Humanities.

AS.378.416. Fourth Year Japanese II. 3.0 Credits.
By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Lab required. Recommended Course Background: AS.378.415
Prerequisites: Prereq: AS.378.415 or equivalent.
Instructor(s): M. Nakao; S. Katagiri
Area: Humanities.

This course is designed for graduate students (particularly in East Asian Studies) and undergraduate students whose proficiency level is higher than 4th-year Japanese as offered at Johns Hopkins University or equivalent and those who plan to pursue studies utilizing written Japanese materials. Students will learn effective methods for reading Japanese materials, varying from works of literature to modern academic articles on topics of students' interest.
Instructor(s): M. Johnson
Area: Humanities.

AS.380.101. First Year Korean. 4.5 Credits.
Introduces the Korean alphabet, hangul. Covers basic elements of the Korean language, high-frequency words and phrases, including cultural aspects. Focuses on oral fluency reaching Limited Proficiency where one can handle simple daily conversations. No Satisfactory/ Unsatisfactory. Cross-listed with East Asian Studies
Instructor(s): J. Song; S. Lee.

AS.380.102. First Year Korean II. 3.0 Credits.
Focuses on improving speaking fluency to Limited Proficiency so that one can handle simple daily conversations with confidence. It provides basic high-frequency structures and covers Korean holidays. Continuation of AS.380.101. Recommended Course Background: AS.380.101 or permission required.
Prerequisites: Prereq: AS.380.101 or equivalent.
Instructor(s): J. Song; S. Lee.

AS.380.201. Second Year Korean. 4.0 Credits.
Aims for improving oral proficiency and confident control of grammar with vocabulary building and correct spelling intended. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness. Project due on Korean cities. Existing demonstrable skills in spoken Korean preferred.
Prerequisites: AS.380.101 AND AS.380.102 or instructor permission
Instructor(s): S. Lee
Area: Humanities.
AS.380.202. Second Year Korean II. 3.0 Credits.
Aims for improving writing skills with correct spelling. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness, including discussion on family tree. Continuation of AS.380.201. Recommended Course Background: AS.380.201 or equivalent.
Prerequisites: Prereq: AS.380.201 or equivalent.
Instructor(s): S. Lee
Area: Humanities.

AS.380.301. Third Year Korean. 3.0 Credits.
Prerequisites: AS.380.202 or equivalent.
Instructor(s): S. Lee
Area: Humanities.

AS.380.302. Third Year Korean II. 3.0 Credits.
Emphasizes reading literacy in classic and modern Korean prose. By reading Korean newspapers and professional articles in one’s major, it enables one to be well-versed and truly literate. Continuation of AS.380.301. Cross-listed with East Asian Studies.
Prerequisites: Prereq: AS.380.301 or equivalent.
Instructor(s): S. Lee
Area: Humanities.

Economics
http://www.econ.jhu.edu/

The Department of Economics offers programs designed to improve the understanding of important economic problems and to provide the tools needed for the critical analysis of these problems and for dealing with them in practice.

On the undergraduate level, the department provides both for those who want to become professional economists and for those interested in a specialty related to economics, such as business, law, government, history, health care management, or environmental engineering. Still other students are simply interested in improving their understanding of society or making informed assessments of economic policies as citizens or making wise decisions about personal finances.

On the graduate level, the department provides advanced training for students preparing for careers as professional economists. The program encompasses such fields as macroeconomics, microeconomic theory, econometrics, labor economics, international economics, industrial organization, economic development, and finance, with an emphasis on the application of economic theory and quantitative methods. Because of the small number of graduate students admitted, they can work closely with faculty in graduate courses and seminars, and have easy and informal access to faculty members.

Undergraduate Programs
The introductory courses AS.180.101 Elements of Macroeconomics and AS.180.102 Elements of Microeconomics are open to all students. Courses at the 200-level have Elements of Economics (AS.180.101 and AS.180.102) as prerequisites.

AS.180.301 Microeconomic Theory (or AS.180.401 see below) and AS.180.302 Macroeconomic Theory courses have AS.180.101 and AS.180.102 as well as Calculus I (AS.110.106 or equivalent) as prerequisites. All 300-level courses above 301 and 302 have Microeconomic and/or Macroeconomic Theory (AS.180.301, AS.180.302) as prerequisites (or, with permission of the instructor, corequisites), as well as Elements of Economics and Calculus. Some 300-level courses have additional prerequisites; see individual course listings. Independent study is available, subject to the consent of the department and of the faculty member with whom the student wants to work.

Subject to the consent of the instructor, graduate courses at the 600-level are open to qualified undergraduates. The 600-level courses for which advanced undergraduates are most likely to be qualified are AS.180.601 Consumer & Producer Theory and AS.180.603 Macroeconomic Theory I.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor’s Degree. (http://catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree )

For both the economics major and minor, a minimum grade of C- or better is required for all courses meeting the requirements and courses may not be taken satisfactory/unsatisfactory. Courses from study abroad or taken at other universities may count towards requirements only if they are approved by the department’s director of undergraduate studies. Internships, independent studies, and intersessions courses do not apply towards major or minor requirements. Summer courses at universities other than Johns Hopkins DO NOT count toward the major or minor, except with prior approval of the Director of Undergraduate Studies for Economics.

Major Requirements:

Additional Notes for Students

- EN.553.111 (http://e-catalog.jhu.edu/archive/2017-18/departments-departmental-requirements-and-courses/arts-sciences/economics) Statistical Analysis I or equivalent (any of the Statistics courses listed above) is a prerequisite for Econometrics AS.180.334. You can use either AS.180.334 or AS.180.434 to satisfy the requirement for the economics major.
- The Senior Honors Thesis sequence (AS.180.521 (http://e-catalog.jhu.edu/archive/2017-18/departments-departmental-requirements-and-courses/arts-sciences/economics) Research in Economics and AS.180.522 (http://e-catalog.jhu.edu/archive/2017-18/departments-departmental-requirements-and-courses/arts-sciences/economics) Senior Thesis) cannot be used to satisfy any of the requirements for the major.

** Honors Program in Economics

Departmental honors are awarded to those students who satisfy the following requirements:

- All economics courses applied to the major have been taken in the department.
- AS.180.521 Research in Economics and AS.180.522 Senior Thesis. The thesis may not be counted as one of the five economics electives.
- A grade point average of at least 3.5 for all economics courses.

Minor in Economics

Students with a major in another department may be awarded a minor in economics with satisfactory work in the following courses:

<table>

<tr>
<td>Four economics courses at the 200- or 300-level (not including 180.203)</td>
<td>12</td>
</tr>
</tbody>
</table>
The CFE offers an undergraduate minor, producing expertise in finance within the context of a top-notch liberal arts education. The minor will equip students with a thorough foundation in the workings of financial markets and their role in the broader economy, providing a foundation for careers in finance, business, academics, and government. The Center is working toward offering a financial economics major and a Ph.D. in financial economics.

The Minor in Financial Economics

The main objective of the minor is to provide students with training in the conceptual framework, guiding concepts, and technical tools of modern finance. The broader goal is to provide insights into the large and the small—the macro and micro—of how this framework helps us understand the workings of the economy. The minor in financial economics includes four required courses and two elective courses chosen from the list below.

**Required Courses**

<tr>
<td>or EN.660.203</td>
<td>Financial Accounting</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**: 18

The minor is open to all majors. A minimum grade of C- or better is required for all courses and they may not be taken satisfactory/unsatisfactory. One cannot take both the economics and financial economics minor. For economics majors, there is a restriction on double-counting: the two elective courses counting toward the minor cannot also count toward the economics major.

**Graduate Programs**

**Requirements for Admission**

The admission of each applicant is decided by the Department as a whole and rests upon his/her academic record (especially economics and mathematics courses), GRE test scores, recommendations of scholars and instructors, and other pertinent information including a match between the research interests of the applicant and the faculty. To apply for admission, applicants are required to upload unofficial transcripts of all previous college and university study to their online application. Failure to upload unofficial transcripts will result in an inability to complete and submit the online application. In addition, we require at least two letters of recommendation. These recommendation letters should come from individuals who can comment on your scholarly skills. All applicants must submit scores from the Graduate Record Examination. Admitted students nearly always have very high quantitative GRE scores. Foreign applicants, who have not earned a degree in a university where English is the sole language of instruction, must take the TOEFL to satisfy the department that they are fluent in English. The department requires the TOEFL with a minimum score of 100 (internet based), 600 (paper based) or 250 (computer based), or IELTS with a bandscore of 7 in place of the TOEFL.

Students should have a knowledge of economic theory and statistics and a strong background in mathematics including differential and integral calculus and linear algebra. Almost all of our students enter with at least two semesters of calculus and linear algebra. In admissions decisions, we like applicants to have taken other mathematics courses as well, including more advanced calculus, differential equations, probability, and real analysis. We especially welcome applications from under-represented minorities, as diversity is important in our graduate program.

**Requirements for the M.A. Degree**

The department does not admit students from outside Johns Hopkins University who intend to work only for an M.A. However, it does offer this degree as an intermediate step toward the Ph.D. or as a final degree to some of those who do not complete their doctoral work.

Beyond the general university requirements, the department requires for the master's degree either two years of satisfactory graduate course work or one year of satisfactory graduate course work and an acceptable master's essay.

**Requirements for the Ph.D. Degree**

**Basic Course Work.** Students take two years of course work. The first year is comprised of two semesters each of microeconomic theory, macroeconomic theory, and mathematical methods, and one-semester courses in statistics and econometrics. In the second year, students take electives—four in the fall semester and three in the spring semester. Students may also take relevant courses in related departments, such as Mathematics, Applied Mathematics and Statistics, Political Science, Public Health, Sociology and Anthropology.

**Comprehensive Exam.** This exam is administered by the department and consists of two written examinations designed to test the candidate's knowledge of both microeconomics and macroeconomics. The written examinations are taken before the beginning of the third term.
Research Paper. A research paper is submitted at the end of the fourth term.

Dissertation. This should be an original investigation worthy of publication, prepared under the supervision of three members of the faculty. A dissertation proposal is due during the sixth term. The candidate must submit the dissertation in final typed form at least three weeks before the date of the Graduate Board Oral Examination. The committee that administers the examination includes faculty from outside the department. Though it is feasible to finish in four years, it is typical to complete the Ph.D. in five or six years.

Financial Aid
The department offers a Departmental Fellowship to all enrolled students. This fellowship covers full tuition costs plus an annual stipend of $29,000 and full student health insurance coverage. During a student’s first year of study, this fellowship support is provided with no teaching assistantship duties. Beginning in the second year of study, students who are performing satisfactorily, will again receive the same Departmental Fellowship coverage as in their first year. In addition, during years 2, 3, 4 and 5, this will involve a teaching or research assistantship assignment. The department guarantees financial support for a minimum of five years of graduate study, conditional on satisfactory performance and potentially a sixth year as well depending on student performance and the availability of funds.

Carl Christ Fellowship
In the academic year 1989–90, the department established the Carl Christ Fellowship fund to honor one of its faculty members for his distinguished service and achievements. The proceeds of the fund are used to support outstanding graduate students at the dissertation stage of their research.

For further information about graduate study in economics, contact the director of graduate admissions, Department of Economics at econadmissions@jhu.edu.

Faculty
Chair
Laurence M. Ball
Research Interest: Macroeconomics

Professors
Christopher Carroll
Research Interests: Macroeconomics, Public Finance

Gregory Duffee
Carl Christ Professor of Economics. Research Interest: Finance

Jon Faust
Louis J. Maccini Professor of Economics. Director of the Center for Financial Economics. Research Interests: Econometrics, Macroeconomics, Financial Economics

Mark Gersovitz
Research Interests: Economic Development, Public Finance

Bruce Hamilton

Yingyao Hu
Research Interests: Econometrics, Empirical Industrial Organization, Labor Economics

Olivier Jeanne
Research Interests: International Macroeconomics, Monetary Policy

Edi Karni
Scott and Barbara Black Professor of Economics. Research Interests: Economics of Uncertainty and Information, Decision Theory, Microeconomic Theory

M. Ali Khan
Abram Hutzler Professor of Political Economy. Research Interests: Mathematical Economics, Economic theory, History of Economic Thought, International and Development Economics

Robert Moffitt

John K. H. Quah
Research Interest: Microeconomic Theory

Richard Spady
Research Interests: Econometrics, Industrial Organization.

Jonathan Wright
Research Interests: Time Series Econometrics, Empirical Macroeconomics, Finance

Assistant Professors
Ying Chen
Research Interests: Game Theory, Information Economics, Political Economy

Anton Korinek
Research Interests: Game Theory, Information Economics, Political Economy

Elena Krasnokutskaya
Research Interests: Industrial Organization, Applied Microeconomics, Applied Econometrics

Nicholas Papageorge
Broadus Mitchell Assistant Professor. Research Interests: Health, Labor and the Economics of Innovation

Yuya Takahashi
Research Interests: Empirical Industrial Organization, Labor Economics

Professors Emeriti
Louis Maccini
Research Interests: Macroeconomic Theory, Money, Econometrics

H. Peyton Young
Research Interests: Game Theory, Evolutionary Economics, Microeconomic Theory

Fellows
Robert Barbera
Co-Director of the Center for Financial Economics. Research Interests: Real Interest Rate/Real Growth Linkages, Global Energy Supply/Demand Issues

Barclay Knapp
Research Interests: Managerial Economics, Business Strategy
Lecturers
Somasree Dasgupta
Research Interests: International Trade, Economic Growth, Macroeconomics

Kevin Heerdt
Research Interests: Derivatives, Corporate Governance, Role of Speculation, Alternative Investment Industry, The Financial Industry

Muhammad Husain
Research Interests: Microeconomic Theory, Labor Economics, Econometrics

Barbara Morgan
Research Interests: Labor Economics, Public Policy

Ludmila Poliakova
Research Interests: Macroeconomics, Development Economics

Joint Appointments
David Bishai
Professor (Bloomberg School of Public Health) Research Interest: Health Economics.

Itay Fainmesser
Assistant Professor (Carey School of Business) Research Interest: Business Economics

Steve H. Hanke
Professor (Department of Environmental Health and Engineering) Research Interests: Applied Economics, Microeconomics, Macroeconomics, Finance.

Pravin Krishna
Professor (SAIS) Research Interest: International Trade

Jian Ni
Associate Professor (Carey Business School) Research Interests: Pricing Strategy, Industrial Organization, Healthcare

Mitsukuni Nishida
Assistant Professor (Carey Business School) Research Interest: Industrial Organization

Alessandro Rebucci
Assistant Professor (Carey Business School) Research Interests: Financial Institutions, International Finance, Macroeconomics, International Real Estate

Emilia Simeonova
Assistant Professor (Carey Business School) Research Interests: Health Economics, Children's Health, Development Economics

Shubhranshu Singh
Assistant Professor (Carey Business School) Research Interests: Marketing Strategy, Marketing Management

Carlos Vegh
Fred H. Sanderson Professor of International Economics (SAIS) Research Interest: International Economics

Courses
AS.180.101. Elements of Macroeconomics. 3.0 Credits.
An introduction to the economic system and economic analysis, with emphasis on total national income and output, employment, the price level and inflation, money, the government budget, the national debt, and interest rates. The role of public policy. Applications of economic analysis to government and personal decisions. Prerequisite: basic facility with graphs and algebra.
Instructor(s): R. Barbera
Area: Social and Behavioral Sciences.

AS.180.102. Elements of Microeconomics. 3.0 Credits.
An introduction to the economic system and economic analysis with emphasis on demand and supply, relative prices, the allocation of resources, and the distribution of goods and services; theory of consumer behavior, theory of the firm, and competition and monopoly, including the application of microeconomic analysis to contemporary problems. Prerequisite: basic facility with graphs and algebra. *Students who are looking to register for AS.180.102 and need to take the course should attend the first day of class and see Dr. Hamilton immediately afterwards*
Instructor(s): J. Li; Y. Gong
Area: Social and Behavioral Sciences.

AS.180.171. Topics in Political Economy. 3.0 Credits.
Societies make their key economic decisions under the constraints imposed by their political institutions. This course studies the interaction between economics and politics in public policy design, with topics ranging from fiscal policy to international development. Some recurring questions include why inefficient policies get enacted and how different political institutions give rise to different policy outcomes.
Instructor(s): L. Karakas
Area: Social and Behavioral Sciences.

AS.180.201. Behavioral Finance. 3.0 Credits.
In recent years, the assumptions of traditional finance models that market participants are generally rational and prices of securities accurately reflect all available information came under challenge. The field of behavioral finance argues that financial markets are best understood with models in which at least some agents are not fully rational. In this course, we will examine behavioral finance models and their practical applications. This course is based on Harvard Business School cases. Recommended Course Background: AS.180.102
Instructor(s): A. Scherbina.

AS.180.203. Faculty Research in Economics. 1.0 Credit.
This course will consist of a series of informal lectures by various professors in the Department of Economics. Each lecture will consist of a description of a professional research project which he/she has undertaken over the course of his/her profession career. S/U grading only.
Prerequisites: Preqs: AS.180.101 AND AS.180.102
Instructor(s): B. Hamilton.

For current course information and registration go to https://sis.jhu.edu/classes/
AS.180.217. Game Theory in Social Sciences. 3.0 Credits.
Game Theory is the study of multiple person decision problems in which the well-being of a decision maker depends not only on his own actions but also on those of others. Such problems arise frequently in economics, political science, business, military science and many other areas. In this course, we will learn how to model different social situations as games and how to use solution concepts to understand players' behavior. We will consider various examples from different fields and will play several games in class. The emphasis of the class is on the conceptual analysis and applications and we will keep the level of mathematical technicalities at the minimum -- high school algebra and one term of calculus will be sufficient. Students who took AS.180.117 are not eligible to take AS.180.217.
Prerequisites: Students may not have previously taken AS.180.117 or instructor permission
Instructor(s): Y. Chen
Area: Social and Behavioral Sciences.

AS.180.219. History of Economics: Modes of Analysis. 3.0 Credits.
This course examines the long arc of the history of economics. We will cover readings from Aristotle, Hume, Smith, Ricardo, and Marx, as well as from the Scholastics, Mercantilists, and Physiocrats. Themes will include economic values, the question of whether and when economics became a science, the market in relation to gender, and the interaction between economic theorizing and other cultural, social, and political currents of an age.
Prerequisites: AS.180.102
Instructor(s): N. Johnson
Area: Social and Behavioral Sciences Writing Intensive.

AS.180.228. Economic Development. 3.0 Credits.
A comprehensive survey of economic behavior by households, farms and firms in poor countries and the role of and for governments. Discussions include measurement of income levels, economy-wide equilibrium, sources of growth, agriculture and industry, international trade and investment, savings, population, fertility, education, health, income distribution and public finances. Applies economic theory rigorously to interpret and evaluate the economic experience of poor countries. Diagnostic test on Elements of Economics is required in the second week. Grading based on 3 exams and one paper.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences.

AS.180.238. Rethinking Economics After the Great Recession. 3.0 Credits.
The financial crisis that began in the United States in 2007 threw virtually the entire world into recession. This class will look at the causes of the crisis and at how it unfolded. It will look into the conventional wisdom of economists, circa 2006, and why that wisdom proved to be so wrong. It will examine the financial innovations that contributed to the crisis, at the reasons financial regulators were blindsided, and at the reforms enacted after the crisis.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): F. Norris
Area: Social and Behavioral Sciences Writing Intensive.

AS.180.241. International Trade. 3.0 Credits.
Theory of comparative advantage and the international division of labor. the determinants and pattern of trade, factor price equalization, factor mobility, gains from trade and distribution of income, and theory and practice or tariffs and other trade restrictions. Recommended Course Background: AS.180.101.
Prerequisites: AS.180.102.
Instructor(s): S. Dasgupta
Area: Social and Behavioral Sciences.

AS.180.242. International Monetary Economics. 3.0 Credits.
This course presents International Monetary Economics theory and applies it towards gaining an understanding of recent events and current policy issues. The theory presented in this course covers a broad range of topics including exchange rate determination, monetary and fiscal policy in an open economy, balance of payments crises, the choice of exchange rate systems, and international debt. The insights provided by these theoretical frameworks will enable us to discuss topics such as the current global financial crisis, global financial imbalances, the Chinese exchange rate regime, and proposed changes in the international financial architecture.
Instructor(s): S. Bahk
Area: Social and Behavioral Sciences.

AS.180.252. Economics of Discrimination. 3.0 Credits.
This course examines labor market discrimination by gender, race and ethnicity in the United States. What does the empirical evidence show, and how can we explain it? How much of the difference in observed outcomes is driven by differences in productivity characteristics and how much is due to discrimination? How have economists theorized about discrimination and what methodologies can be employed to test those theories? What has been the impact of public policy in this area; how do large corporations and educational institutions respond; and what can we learn from landmark lawsuits? The course will reinforce skills relevant to all fields of applied economics, including critical evaluation of the theoretical and empirical literature, the reasoned application of statistical techniques, and analysis of current policy issues.
Prerequisites: AS.180.102
Instructor(s): B. Morgan
Area: Social and Behavioral Sciences Writing Intensive.

AS.180.261. Monetary Analysis. 3.0 Credits.
This course analyzes the financial and monetary system of the U.S. economy and the design and implementation of U.S. monetary policy. Among other topics, we will examine the role of banks in the economy, the term structure of interest rates, the stock market, the supply of money, the role of the Federal Reserve in the economy, the objectives of monetary policy in the United States and current monetary policy practice.
Prerequisites: AS.180.101 and AS.180.102
Instructor(s): L. Poliakova; S. Dasgupta
Area: Social and Behavioral Sciences.
AS.180.263. Corporate Finance. 3.0 Credits.
This course is an introduction to the financial management of a
corporation. Students study the following broad questions. How should
a firm decide whether to invest in a new project? How much debt
and equity should a firm use to finance its activities? How should a
firm pay its investors? How do taxes affect a firm's investment and
financing decisions? What determines the value of a firm? The emphasis
throughout the course is on the economic principles that underlie
answers to these questions.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): G. Duffee
Area: Social and Behavioral Sciences.

AS.180.266. Financial Markets and Institutions. 3.0 Credits.
Understanding design and functioning of financial markets and
institutions, connecting theoretical foundations and real-world
applications and cases. Basic principles of asymmetric information
problems, management of risk. Money, bond, and equity markets;
investment banking, security brokers, and venture capital firms; structure,
competition, and regulation of commercial banks. Importance of
electronic technology on financial systems.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): J. Faust
Area: Social and Behavioral Sciences.

AS.180.267. Topics in International Trade and Development. 3.0 Credits.
Global considerations are increasingly shaping economic outcomes
for countries, companies, cities and citizens around the world. This
course will explore various topics at the nexus of international trade
and economic development using models of international trade,
empirical research, and case studies. Topics include: macroeconomic
growth accounting, changing patterns and order in world trade, trade
and inequality, the political economy of trade policy, multinational
corporations, trade and growth, trade and industrial policy, trade versus
aid, trade and the environment, trade linkages and financial crises.
Prerequisites: AS.180.241
Instructor(s): I. Kondo
Area: Social and Behavioral Sciences.

AS.180.268. Seminar on Financial Regulation. 3.0 Credits.
This course examines regulation of the financial system in the United
States and its effects on the economy. It considers proposals for reform
and the ongoing implementation of the Dodd-Frank Act of 2010. A major
part of the course will be student research projects and class discussion
of the projects.
Prerequisites: AS.180.261
Instructor(s): L. Ball
Area: Social and Behavioral Sciences.

AS.180.269. Economics of Health. 3.0 Credits.
The precursors to modern hedge funds began more than 50 years
ago, but in the 1990s the hedge fund, or alternative investments,
industry began a period of rapid growth and evolution. With growth
came controversy. Some argue that hedge funds, by allowing immense
amounts of capital to be rapidly and freely deployed, play a vital role
in pushing prices toward the efficient markets ideal. Others claim that
hedge funds may accentuate speculative price dynamics, threatening
the stability of the financial sector. While many hedge funds claim to
offer outstanding returns to investors, data suggest that many clients
end up paying high fees for unspectacular results. This course examines
these and other controversies, while tracing the history of the alternative
investments industry over the last 25 years.
Prerequisites: AS.180.101 AND AS.180.102 AND (AS.180.266 OR
AS.180.263 OR AS.180.367)
Instructor(s): K. Heerdt
Area: Social and Behavioral Sciences.

AS.180.269. Economics Of Health. 3.0 Credits.
Application of economic concepts and analysis to the health services
system. Review of empirical studies of demand for health services,
behavior of providers, and relationship of health services to population
health levels. Discussion of current policy issues relating to financing and
resource allocation.
Prerequisites: AS.180.102
Instructor(s): D. Bishai
Area: Social and Behavioral Sciences.

AS.180.270. Macroeconomic Theory. 4.5 Credits.
This course is an introduction to the modern theory of allocation of resources,
starting with the theories of the individual consumer and producer, and
progressing to analysis of systems of interacting individuals, first in the
theory of exchange, then to systems which include production as well.
Prerequisites: Corequisite/Prerequisite: AS.180.101 180.101 must be
taken EITHER BEFORE (prerequisite) enrolling in 180.301 or AT THE
SAME TIME (corequisite).
Prerequisites: AS.180.102 AND (AS.110.106
OR AS.110.107 OR AS.110.108 OR AS.110.109 OR equivalent)
Instructor(s): M. Husain
Area: Social and Behavioral Sciences.

AS.180.271. Microeconomic Theory. 4.5 Credits.
The course provides a treatment of macroeconomic theory including
a static analysis of the determination of output, employment, the price
level, the rate of interest, and a dynamic analysis of growth, inflation, and
business cycles. In addition, the use and effectiveness of monetary and
fiscal policy to bring about full employment, price stability, and steady
economic growth will be discussed.
Prerequisites: Coreq for AS.180.302: AS.180.102[C];AS.180.101 and
Calculus 1 or equivalent
Instructor(s): A. Korinek
Area: Social and Behavioral Sciences.
AS.180.303. Topics in International Macroeconomics and Finance. 3.0 Credits.
The course will review selected topics in international macroeconomics and finance. The topics for the Fall of 2015 include: financial globalization; international portfolio diversification; the problems posed by “sudden stops” in capital flows to emerging markets; global imbalances and global demand rebalancing; how different exchange rate regimes have fared in the global financial crisis; sovereign default in the light of the Argentine experience; and the ongoing Russian currency and financial crisis. The course involves mathematical modeling as well as data analysis.
Prerequisites: Pre-reqs: AS.180.101 AND AS.180.102 AND AS.180.302
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

AS.180.308. Financial Regulations in the US. 3.0 Credits.
This course begins with the time of the great Framers and adopts a historical approach to U.S. financial regulations. By examining all major crises and the respective policy responses, the course will provide a narrative on the evolution of the regulatory landscape in America. Students will also be exposed to influential academic papers that address the essentiality (and even the redundancies and failures) of key aspects of financial regulations, including deposit insurance, bank capital and liquidity requirements, and supervisory rules. Dean's Teaching Fellowship course. Recommended courses: AS.180.261 and AS.180.266
Instructor(s): H. Nguyen
Area: Social and Behavioral Sciences.

AS.180.309. Economics of Uncertainty and Information. 3.0 Credits.
In this course we'll discuss the theory of decision making in the face of risk, the theory of risk aversion and its applications to financial and insurance markets. Building on the theory of individual decision making under risk, we will study the economic implications of asymmetric information, the type of market failures produced by adverse selection and moral hazard problems, and the models that were advanced to analyze these problems, including incentive contracts, screening and signaling equilibria.
Prerequisites: AS.180.301
Instructor(s): E. Karni.

AS.180.310. Economics Of Antitrust. 3.0 Credits.
This course explores the economic rationale for, and consequence of, antitrust laws. In addition to economic analysis we will study landmark antitrust cases.
Prerequisites: AS.180.301
Instructor(s): B. Hamilton
Area: Social and Behavioral Sciences Writing Intensive.

AS.180.312. Evaluating Public Policy: Experimental and Quasi-Experimental Research Design in Social Science. 3.0 Credits.
The purpose of the course is to show how experimental, quasi-experimental and non-experimental methods can be used to advance scientific knowledge about topics in economics. It will teach students the empirical techniques required to analyze experimental and non-experimental data to draw causal inference. The course will begin with a primer on the use of experimental methods in economics, specifically in the context of evaluating welfare programs and labor market policies. Students will then proceed to learn the empirical methods that can be employed to establish cause and effect, both when data is obtained through a randomized control trial (experimental data), or when randomization occurs naturally (quasi-experimental data). The tools and topics that are covered will not only be relevant to economics students, but will also be of interest to students from other social science departments.
Prerequisites: AS.180.301 AND (EN.553.420 OR EN.553.310 OR EN.553.112 OR EN.550.113 OR EN.553.211 OR EN.553.311 OR EN.553.430 OR EN.550.435 OR EN.553.111 OR AS.280.345)
Instructor(s): S. Qayyum
Area: Social and Behavioral Sciences Writing Intensive.

AS.180.317. Economics of Fixed Income Instruments. 3.0 Credits.
Students study economic principles and state-of-the-art mathematical models used to value fixed income securities and their derivatives. The course emphasizes advanced practical applications as well as theory. Students will develop their own computer code to price fixed-income instruments and evaluate their risks. Students must be familiar with both statistics and differential equations.
Prerequisites: AS.180.301 AND (EN.553.111 OR EN.553.112 OR EN.553.310 OR EN.553.311 OR EN.553.312 OR EN.553.310 OR EN.553.430 OR EN.553.291 or permission of the instructor)
Instructor(s): G. Duffee
Area: Social and Behavioral Sciences.

AS.180.321. The Economics of Growing-Up. 3.0 Credits.
The goal of this course is to use economic models to investigate life events such as going to school, getting married, and having children. The course will focus on individual behavior and outcomes in six important stages of the life cycle: early childhood, schooling, adolescence, marriage and divorce, child bearing years, and retirement. While the course is designed to introduce students to a variety of economic theory and empirical techniques, the material is designed to prepare upper level students to write a proposal on an original research question.
Prerequisites: AS.180.301
Instructor(s): G. Pauley
Area: Social and Behavioral Sciences.

AS.180.328. Economics of Auctions. 3.0 Credits.
A successfully designed auction depends on the idiosyncrasies of the market being studied. Students will learn the core auction formats and some classic theoretical results that provide a benchmark for even the most recent auctions research. Additionally, students will learn simple empirical strategies that allow these models (and the behavior they predict) to be married with real world data. Students will develop the tools needed for analyzing and conducting auctions research.
Prerequisites: AS.180.301
Instructor(s): J. Balat
Area: Social and Behavioral Sciences.
AS.180.334. Econometrics. 3.0 Credits.
Introduction to the methods of estimation in economic research. The first part of the course develops the primary method employed in economic research, the method of least squares. This is followed by an investigation of the performance of the method in a variety of important situations. The development of a way to handle many of the situations in which ordinary least squares is not useful, the method of instrumental variables, concludes the course.
Prerequisites: Pre-req: AS.180.301; (EN.553.420 OR EN.553.310 OR AS.280.345 OR EN.553.112 OR EN.550.113 OR EN.553.211 OR EN.553.311 OR EN.553.430 OR EN.550.435 OR EN.560.435 OR EN.553.111)
Instructor(s): M. Husain
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.336. Macroeconomic Strategies. 3.0 Credits.
Will sketch out a strategy for anticipating economic turning points. Business cycle basics, monetary policy/financial market/real economy interactions will be reviewed. Long-term growth issues will be explored.
Prerequisites: AS.180.101 AND AS.180.102 AND AS.180.302 or Perm. Req'd.
Instructor(s): R. Barbera
Area: Social and Behavioral Sciences.

AS.180.345. Rationality: Meaning and Measurement. 3.0 Credits.
Economists generally work with a number of classic models of how people behave in different contexts. These models (such as utility maximization and expected utility maximization) are widely used because they are tractable and elegant, but are also accurate models of human behavior? In this course, we will examine the axiomatic foundations of these models, explore their implications for choice behavior, and discuss the empirical and experimental strategies economists have developed to test these models.
Prerequisites: AS.180.301
Instructor(s): K. Quah
Area: Social and Behavioral Sciences.

AS.180.350. Economics of Social Networks. 3.0 Credits.
A detailed analysis of why certain social networks are likely to emerge and what the structure of these networks means for a wide range of social and economic interactions.
Prerequisites: AS.180.301
Instructor(s): M. Smirnov
Area: Social and Behavioral Sciences.

AS.180.351. Labor Economics. 3.0 Credits.
The course discusses various issues in labor markets from the perspective of economic theory. We first study the major forces at work that shape labor market behavior, firms' labor demand and workers' labor supply. Then we discuss the equilibrium behavior of employment and wages. Using these tools, we also cover various applied topics in labor economics, such as minimum wage regulations, male-female wage differentials, human capital investment, worker mobility, and unemployment.
Prerequisites: AS.180.301
Instructor(s): M. Husain
Area: Social and Behavioral Sciences.

AS.180.354. Econometrics of Unobservables. 3.0 Credits.
Empirical data may not contain all the variables suggested by economic theories. This course introduces methodologies to identify and estimate economic models containing unobservables. Recommended Course Background: AS.180.301 and AS.180.334.
Instructor(s): Y. Hu
Area: Social and Behavioral Sciences.

AS.180.355. Economics of Poverty/Inequality. 3.0 Credits.
This course focuses on the economics of poverty and inequality. It covers the measurement of poverty and inequality, facts and trends over time, the causes of poverty and inequality with a focus on those related to earnings and the labor market, and public policy toward poverty and inequality, covering both taxation and government expenditure and programs. By the nature of the material, the course is fairly statistical and quantitative. Students should have an intermediate understanding of microeconomic concepts. Basic knowledge of regression analysis is also helpful.
Prerequisites: AS.180.301
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

AS.180.356. Big Data. 3.0 Credits.
This course introduces state-of-the-art econometric methods to analyze big data. Topics include statistical learning, linear regression, classification, resampling methods, linear model selection and regularization, nonlinear model selection and regularization, tree-based methods, and support vector machines. Recommended: AS.110.201
Prerequisites: AS.180.334
Instructor(s): Y. Sasaki
Area: Social and Behavioral Sciences.

AS.180.363. Sex, Drugs and Dynamic Optimization: The Economics of Risky Behavior. 3.0 Credits.
We apply the tools of economic analysis to understand behaviors that are enjoyable today, but may have negative consequences in the future.
Prerequisites: AS.180.301 AND AS.180.302 AND AS.180.334 or permission of the instructor
Instructor(s): N. Papageorge
Area: Social and Behavioral Sciences.

AS.180.367. Investment-Portfolio Management. 3.0 Credits.
Prerequisites: AS.180.301 AND (EN.553.111 OR EN.553.112 OR EN.553.310 OR EN.553.311 OR EN.553.420 OR EN.553.430)
Instructor(s): J. Wright
Area: Social and Behavioral Sciences.

AS.180.368. Managerial Economic and Business Strategies. 3.0 Credits.
Seminar on quantitative concepts, decision-making, and strategy in business organizations. Overall context is ‘value’ – how it is measured and maximized long term. Microeconomic theory of the firm, competitive analysis, corporate finance.
Prerequisites: Prereqs: AS.180.301 AND (EN.553.111 OR AS.180.367 OR AS.180.263 ) or permission of the instructor.
Instructor(s): J. Knapp
Area: Social and Behavioral Sciences.
AS.180.371. Industrial Organization. 3.0 Credits.
Investigation of firm behavior in markets characterized by imperfect competition. Imperfect competition lies in between monopoly and perfect competition and characterizes most major industries in modern capitalist economies. Central issues to be covered in the course include what determines the intensity of competition? What determines the extent of entry and exit? How is it that some firms consistently dominate their industries?

Prerequisites: Prereq: AS.180.301
Instructor(s): E. Krasnokutskaya
Area: Social and Behavioral Sciences.

AS.180.372. Finance and Macroeconomy. 1.0 Credit.
This class is conducted as a round table discussion on current topics at the intersection of finance, monetary policy, and macroeconomics. Students will be expected to read assigned material, participate in the discussion, and take a final exam.

Prerequisites: AS.180.101 AND (AS.180.263 OR AS.180.367) or by instructor permission.
Instructor(s): J. Faust
Area: Social and Behavioral Sciences.

AS.180.373. Corporate Restructuring. 3.0 Credits.
The objective of this course is to familiarize students with financial, legal and strategic issues associated with corporate restructuring process. Main focus of the course is on the restructuring of financially distressed firms. The course surveys a variety of restructuring methods (out-of-court workouts, exchange offers, prepackaged bankruptcies, Chapter 11 bankruptcies, insolvency practices in other countries) available to troubled firms. A small portion of the course is concerned with restructuring employee contracts and equity claims (equity carve-outs, spin-offs, tracking stock). AS.180.263 Corporate Finance recommended.

Prerequisites: AS.180.301
Instructor(s): H. Eraslan
Area: Social and Behavioral Sciences.

AS.180.371. Evolution and Economics. 3.0 Credits.
This course provides an introduction to evolutionary theory and its applications to modern economics. We start by introducing formal models of the driving forces of evolution: mutation, selection, and survival of the fittest. Next we investigate how these forces have shaped human preferences and behaviors that are typically taken as given in economic models. Finally, we discuss the evolution of social systems like the economy we live in.

Instructor(s): A. Korinek
Area: Social and Behavioral Sciences.

AS.180.372. Finance and Macroeconomy. 1.0 Credit.
This class is conducted as a round table discussion on current topics at the intersection of finance, monetary policy, and macroeconomics. Students will be expected to read assigned material, participate in the discussion, and take a final exam.

Prerequisites: AS.180.101 AND (AS.180.263 OR AS.180.367) or by instructor permission.
Instructor(s): J. Faust
Area: Social and Behavioral Sciences.

AS.180.373. Corporate Restructuring. 3.0 Credits.

AS.180.434. Advanced Econometrics). 3.0 Credits.
This is a faster-paced and more intensive version of Econometrics 180.334. You can use either 180.334 or 180.434 to satisfy the requirement for the economics major. This course is suitable for those students who prefer a more technical treatment of econometric methodologies. Both 180.334 and 180.434 will be offered during the same time slot, so the logistics of switching from 180.334 to 180.434 should be seamless, should you decide to make the switch. NOTE: you may not take both 180.334 and 180.434.
**Prerequisites:** Students may only receive credit for either AS.180.334 or AS.180.434; AS.180.301, one semester of linear algebra, one semester of calculus, AS.280.345 or EN.553.211 or EN.553.111 or EN.553.310 or EN.553.311 or EN.553.420 or EN.560.435.
Instructor(s): E. Krasnokutskaya
Area: Social and Behavioral Sciences.
AS.180.501. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.
AS.180.502. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.
AS.180.521. Research in Economics. 2.0 Credits.
The assignment in this course is to complete the initial stages of research for the Senior Honors Thesis in Economics. Students will work independently under the supervision of a research/thesis advisor. The contact (in spring of Junior year) should be the course instructor listed for this course. He/she will coordinate registration and grade-reporting, and will also be available to discuss research ideas and to help put students in touch with possible thesis advisors. Open to Senior and Junior Economics majors. Note: This course can not be counted as one of the five elective economics courses required for the Economics major.
Instructor(s): M. Gersovitz.
AS.180.522. Senior Thesis. 3.0 Credits.
Students enrolled in this course will complete the Senior Honors Thesis under the supervision of a thesis advisor (who will have been chosen by the student prior to registration for AS.180.521). The formal course instructor will be in charge of overseeing registration and submitting grades. He/she will also be available for discussions of progress or problems on the thesis. Please note that your thesis advisor can be any faculty member in the Department of Economics, and need not be the same person as the course instructor. (This course cannot be counted as one of the 5 elective economics courses required for the Economics Major.)
**Prerequisites:** AS.180.521
Instructor(s): M. Gersovitz; N. Papageorge
Writing Intensive.
AS.180.595. Economic Internship. 1.0 Credit.
Instructor(s): L. Ball.
AS.180.597. Research. 3.0 Credits.
Instructor(s): N. Papageorge.
AS.180.599. Independent Study. 3.0 Credits.
Instructor(s): N. Papageorge; T. Woutersen.
The mathematical theory of general static equilibrium. The course will emphasize the formal mathematical expression of economic ideas and the ability to give a loose economic intuition a coherent logical meaning. Different mathematical structures in general equilibrium theory will be isolated and discussed. The text will be Debreu's book "Theory of Value". Recommended Course Background: AS.110.106, AS.180.301, and AS.180.302 or permission of the instructor.
Instructor(s): M. Khan
Area: Social and Behavioral Sciences.
The course will cover decision theories relevant to economics and their related analytical tools. We aim to discuss the following topics: standard theories of firm and consumer behavior; decision making under risk; revealed preference analysis; monotone comparative statics; bounded rationality.
Instructor(s): K. Quah.
First term: a systematic presentation of microeconomic theory both its partial equilibrium and general equilibrium aspects. Topics covered will include preferences and utility, exchange, production, theory of the firm, capital and interest, competition and monopoly, stability of equilibrium, and welfare economics. Second term: a more intensive discussion of selected topics, emphasizing recent contributions.
Instructor(s): E. Karni; Y. Chen.
AS.180.603. Macroeconomic Theory I.
A comprehensive treatment of macroeconomic theory, including static analysis of aggregate output employment, the rate of interest, and the price level; aggregative theory of investment, consumption, demand and supply of money; empirical work on aggregative relationships.
Instructor(s): C. Carroll.
First term: a comprehensive treatment of macroeconomic theory, including static analysis of aggregate output employment, the rate of interest, and the price level; aggregative theory of investment, consumption, demand and supply of money; empirical work on aggregative relationships. Second term: the macrodynamic theory of growth, cycles, unemployment and inflation, and selected subjects.
Instructor(s): A. Korinek.
AS.180.605. Advanced Macroeconomics I.
Topics of recent research in macro-economics. Content will vary from year to year. Likely topics include implicit contract theory, search theory and unemployment, disequilibrium macroeconomic models, monetary policy and the control of inflation, contract-based rational expectations models, imperfect competition in macrodynamic models, business cycle models, empirical tests of rational expectations models, theories of investment behavior, and debt neutrality. Open to 2nd year Grad Students and up.
Instructor(s): L. Ball.
AS.180.606. Advanced Macroeconomics II.
Topics of recent research in macroeconomics. Prof. Ball’s course covers nominal rigidities, dynamic-consistency theories of inflation, inflation inertia and the costs of disinflation, monetary policy, costs and benefits of price stability, benefits of output stabilization, alternative policy rules, measuring inflation, unemployment, efficiency-wage theories, the behavior of the NAIRU, macro in middle-income countries, high inflation and stabilization, currency crises. Prof. Carroll’s course analyzes implications of the buffer-stock and habit formation theories of consumption for comovement of aggregate variables and asset pricing. The models are applied to study the phenomena of declining U.S. saving rate, the dynamic relationship between saving rates and growth, and the equity premium puzzle.
Prerequisites: Prereq: AS.180.603
Instructor(s): L. Ball.

AS.180.607. Macroeconomics I.
The course is an attempt to provide a framework for discussing the techniques that are used in macroeconomic analysis. Generally the bias that it has is one of looking at these from the perspective of someone analyzing macroeconomic data for policy analysis. Consequently, many of the applications considered are drawn from the type of research conducted in central banks and finance ministries. Its emphasis is therefore upon the issues raised by the analysis of time series of macro-economic data. Today there is an emerging literature that looks at micro-economic data as well as conducting cross-country studies. We will tend to ignore that material as the methods used in such research are essentially those of micro-econometrics, although sometimes with adjustments made to reflect the nature of macro-economic time series.
Prerequisites: AS.180.633
Instructor(s): J. Faust.

AS.180.608. Macroeconometrics I.
This course will cover a range of topics in time series econometrics and empirical macroeconomics and finance that arise in current research and policy analysis. Key topics include GMM estimation, filtering, forecasting, structural VARs, and modeling stock and bond returns. It assumes a knowledge of the basics of time series econometrics. Both theoretical and empirical work will be included. Bayesian simulation methods that are very important in current research methods will be emphasized. This course should be taken by people with an interest in either empirical macro or empirical finance and may be helpful in searching for a dissertation topic.
Instructor(s): J. Faust.

AS.180.611. Economics of Uncertainty.
This course offers a review of subjective expected utility theory of decision making under uncertainty and choice based subjective probabilities. It also explores the motivation for the recent developments of non-expected utility theories under risk and under uncertainty. It examines the role of completeness and awareness in these theories as well as the theories of menu choice and random choice behavior.
Instructor(s): E. Karni
Area: Social and Behavioral Sciences.

This course traces the extent to which modern economic theory, particularly as it pertains to pure competition in market and non-market games under the rationality postulate, is grounded in the language of probability and measure theory. Special attention will be paid to the formal expression of ideas such as economic and numerical negligibility, on the other hand, and diffuseness and conditional independence of information, on the other. Towards this end, the course will develop rigorous formulations of basic ideas of (conceptual rather than computational) probability and apply them: first, to develop the fundamental theorems of welfare economics, including the core theorems; and second, to large anonymous and non-anonymous games as well as to finite-agent games with private information. The course will be self-contained from the technical point of view but will presuppose a level of mathematical maturity that ought typically to be achieved by taking courses such as AS.180.615 and AS.180.601.
Instructor(s): M. Khan.

A course in mathematics for economists not planning to work in quantitative areas, or for those whose mathematics background is weak. The emphasis is on optimization theory; also included are topics in advanced calculus and linear algebra.
Instructor(s): E. Karni.

This course concerns dynamic optimization in both continuous and discrete time. More specifically, it develops Pontryagin’s maximum principle and the Euler-Lagrange conditions in the calculus of variations, on the one hand, and the basic tools of deterministic dynamic programming, on the other. The course will be self-contained from the technical point of view but will presuppose a level of mathematical maturity that ought typically to be achieved by taking a course such as AS.180.600.
Instructor(s): M. Khan.

AS.180.618. Game Theory.
This course is an introduction to cooperative and non-cooperative games. Its focus is non-cooperative game theory with applications in economics. Topics include foundations of solution concepts, refinements of Nash equilibrium, repeated games, games with incomplete information, differential games, and experimental testing of hypotheses.
Prerequisites: AS.180.601
Instructor(s): H. Eraslan.

AS.180.622. Game Theory.
The topics covered include solutions concepts such as dominance, rationalizability, Nash equilibrium, correlated equilibrium, subgame perfect equilibrium and Perfect Bayesian equilibrium. We will discuss both static and dynamic games and games of complete and incomplete information.
Corequisites: AS.180.623
Instructor(s): Y. Chen
Area: Social and Behavioral Sciences.

AS.180.623. Economics of Information.
The course introduces the economic issues associated asymmetric information and analyses the institutions and mechanisms designed to mitigate the resulting inefficiencies. Topics include: Adverse selection; moral hazard; incentive contracts; and mechanism design.
Prerequisites: AS.180.600 AND AS.180.601
Corequisites: AS.180.622
Instructor(s): E. Karni
Area: Social and Behavioral Sciences
Writing Intensive.
AS.180.626. Computational Methods.
This class will introduce students to the computational tools that are used to get things done in scientific research. Such tools include, but are not limited to, unix bash shell scripting, LaTeX/Beamer, virtual machines, git and github, tools for parallel computation, cloud services, and others. Brief treatments of special-purpose tools (like Mathematica for symbolic math) will conclude this part of the class. After this introduction, the course will involve an intensive introduction to the use of the Python language for scientific computation purposes, including a discussion of why Python dominates other choices like Matlab and Julia. The final third of the course will apply the tools in a practical application to a specific problem identified jointly between the instructor and the student. There is no required text; readings will be assigned in class. (The characteristic that distinguishes this class from alternatives is that this class will not teach specific algorithms nor frontier computational techniques; rather, it aims to expose students to a broad set of tools that they will use regularly thereafter).
Prerequisites: AS.180.616 or equivalent
Instructor(s): C. Carroll
Area: Social and Behavioral Sciences.

AS.180.632. Topics in Applied Microeconometrics.
This course teaches methods for using micro-data to recover structural parameters of microeconomic models. We cover static models, but focus largely on single-agent dynamic programming, including “full solution” methods along with innovations that permit circumvention of daunting computational tasks. Additional topics will be partially based on students’ interests, but will likely include: general equilibrium models, static and dynamic games, matching models, unobserved heterogeneity, structural methods with experimental data and biased expectations. The goal is to teach students to use structural methods in their own research, and so we will delve into the nuts and bolts of structural work, examining how researchers actually get from raw data to results. This includes: how the sub-sample for analysis is chosen, how the model is specified, how the programming problem is solved, which moments are generated, how these are matched to the analogous moments in the data and, importantly, how identification is established.
Instructor(s): N. Papageorge

Mathematical models of economic behavior and the use of statistical methods for testing economic theories and estimating economic parameters. Subject matter will vary from year to year; statistical methods, such as linear regression, multivariate analysis, and identification, estimation and testing in simultaneous equation models, will be stressed.
Prerequisites: AS.180.636 and AS.180.601
Instructor(s): Y. Hu

AS.180.636. Statistical Inference.
Theory and applications of statistical inference. Topics include probability and sampling, distribution theory, estimation, hypothesis testing, and simple regression analysis. Statistical applications will be drawn from economics. Limited to graduate students in Economics except by permission of the chair. Recommended Course Background: AS.110.201, AS.110.302
Instructor(s): Staff.

AS.180.637. Microeconometrics I.
This is an advanced graduate course on major econometric techniques and models that are used in empirical microeconomics. The first half of the course introduces econometric theories of nonlinear extremal estimation, nonparametric estimation, and semiparametric estimation. The second half of the course illustrates applications of these theories to limited dependent variable models, selection models, and endogenous treatment models with unobserved heterogeneity.
Prerequisites: AS.180.601 AND AS.180.602 AND AS.180.633 AND AS.180.636
Instructor(s): Y. Takahashi

AS.180.638. Microeconometrics II.
This course is the second in the micro-econometrics sequence in the Economics Department. It will introduce a selection of models and techniques that are useful when a researcher wants to estimate a structural model, i.e. a model derived from economic theory. Structural models that try to incorporate restrictions derived from economic theory are used in empirical IO, but also in quantitative marketing research, labor economics and other fields that consider individual decision making. No attempt will be made to be comprehensive. Instead we will focus on a few areas that have been well-researched in recent years: dynamic discrete choice, microeconomic models with latent variables, program evaluation, the empirical analysis of auctions and non-separable models. Some topics will be included only if time permits. The models and methods developed for these areas are relevant for other cases. The emphasis is on the interaction between economic theory and econometrics. Basic issues are specification and (nonparametric) identification, computational problems and the use of simulation, semi-parametric estimation to avoid functional form and distributional assumptions that cannot be derived from economic theory.
Prerequisites: AS.180.601 AND AS.180.602
Instructor(s): Y. Hu

AS.180.640. Topics in Economic Theory.
In this course we will discuss a variety of topics in Economic Theory that are either not covered or only partially covered in the regular courses. Topics may include Individual and Social Choice Theory, Auctions Theory, Medical Decision Making. For each subject there will be introductory lectures followed by readings and students’ presentations of recent contributions.
Prerequisites: AS.180.601 AND AS.180.602
Instructor(s): E. Kami
Area: Social and Behavioral Sciences.

This is a graduate course in international trade. It will develop basic analytical tools and frameworks used in the general equilibrium analysis of international trade. Recent research topics will be discussed in the second half of the course.
Prerequisites: AS.180.601 AND AS.180.603
Instructor(s): P. Krishna

AS.180.642. International Monetary Economics.
A link between the balance of payments and asset accumulation/decumulation, microeconomics of international finance and open-economy macroeconomics. The section on open-economy macroeconomics covers approaches to balance-of-payments adjustments, theories of exchange rate determination and monetary, fiscal, and exchange-market policies under fixed and flexible rate regimes.
Instructor(s): O. Jeanne.
AS.180.643. Topics of Game Theory.
This course covers topics such as repeated games, dynamic games, bargaining and strategic communication.
Prerequisites: AS.180.622
Instructor(s): Y. Chen
Area: Social and Behavioral Sciences.

AS.180.646. Revealed Preference and Comparative Statics.
The overall theme of this course is the observable implications of optimizing choice. We will cover the theory of monotone comparative statics and supermodular games. We also discuss results in the revealed preference literature, such as Afriat’s Theorem, that deal with the consistency of data with different canonical models. The course is useful to students doing research in pure or applied theory, where comparative statics tools/insights are often needed for model building. It could also be interesting to those with an empirical focus who would like to know more about revealed preference approaches to testing models and drawing inferences from them.
Instructor(s): K. Quah
Area: Social and Behavioral Sciences.

AS.180.651. Labor Economics I.
Theories of the allocation of time and supply of labor, human capital, demand for labor, market equilibrium, and income distribution. As time allows, other topics, such as unemployment, unions, and compensating differences are discussed. Corequisite: AS.180.601
Instructor(s): R. Moffitt.

The course covers a set of numerical methods that are used to compute and estimate economic models, such as solution methods for nonlinear equation systems, numerical integration, approximation, and optimization. As examples, we discuss dynamic models and their applications in IO and labor economics, including dynamic discrete choice, dynamic games, two-step methods (CCP-based methods), and general equilibrium models.
Instructor(s): Y. Takahashi.

AS.180.662. Asset Pricing.
This course is an introduction and guide to the most important issues in asset pricing. It begins with classic concepts such as the Capital Asset Pricing Model and the Arbitrage Pricing Theory and continues through continuous-time dynamic no-arbitrage models. It covers both basic theory and classic empirical research. Recommended Course Background: AS.180.604, AS.180.633, AS.180.636 or instructor’s permission.
Instructor(s): G. Duffee.

AS.180.671. Industrial Organization.
This course covers methods in applied empirical Industrial Organization. The focus will be on the use of econometric analysis and data both for descriptive and measurement purposes, and to test the predictions of economic theories. The course will cover demand estimation, cost and production function estimation, and estimation of auction models.
Prerequisites: AS.180.601
Instructor(s): J. Balat.

AS.180.672. Industrial Organization.
First term: This course covers methods in applied empirical Industrial Organization. The focus will be on the use of econometric analysis and data both for descriptive and measurement purposes, and to test the predictions of economic theories. The course will cover demand estimation, cost and production function estimation, and estimation of auction models. Second term: The emphasis in this course is on empirical analysis of firm behavior. The first part of the course focuses on models of the internal organization of the firm. The second part considers empirical analysis of firm behavior in markets, with an emphasis on the “new industrial economics.”
Instructor(s): E. Krasnokutskaya.

AS.180.673. Advanced Economics of Labor.
This course is for graduate students at the 3rd year and above who wish to participate in a semester in-depth readings and discussion topics in labor economics and in econometric methods typically used in labor economics and in many other applied microeconomics fields. Students will have to participate in discussions of materials in each class. The topics covered in each semester are partly a function of student interest and their dissertation topics.
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

Advanced econometric techniques are often essential to innovative empirical work, but finding and implementing the right methods for a particular problem poses formidable challenges. This course/seminar aims to address these challenges by combining lectures and discussions of foundational econometric methods in areas of student interest (whether those interests be specific for thesis work or more speculative) with examples of implementation, including software development, in more of a ‘workshop’ environment. The emphasis will be on drawing on the resources of econometric theory to address specific empirical issues while at the same time developing implementation skills.
Instructor(s): R. Spady.

This course is for students working on the dissertation for the Ph.D. in Economics. It is graded pass-fail
Instructor(s): J. Wright
Area: Social and Behavioral Sciences.

The goal of this workshop is to foster active discussion of a research topic among the students and faculty with the ultimate objective of producing new research. The topic and the papers are to be discussed with the input of the participants based on their research interests. Each week one or two participants will lead the discussion. All the participants will be expected to read and think about the papers to be discussed before the presentation Economics Graduate Students Only.
Prerequisites: AS.180.602
Instructor(s): H. Eraslan.

This is a weekly seminar series that brings in speakers from other universities to present their research in the field of applied microeconomics. Graduate Students only.
Instructor(s): Staff
Writing Intensive.
This is a seminar series devoted to the presentation of research in microeconomic theory, typically by speakers from outside the department. Graduate students only.
Instructor(s): Staff.

This course features lectures by economists from other universities. They present research findings at the frontier of the field. Graduate students only.
Instructor(s): Staff.

The purpose of this seminar is to train students to do research in economics. This course is for second year graduate students in the Ph.D program in Economics. Graduates Students Only.
Instructor(s): E. Karni.

AS.180.698. Research/Teaching Practicums.
The purpose of the Ph.D. program in economics is to train students to teach and to do research in economics. This course is for graduate students in the Ph.D. program in economics to obtain graduate credit for work off campus that provides training and the development of skills in teaching and/or research. Before the practicum is begun, the graduate student must identify a sponsoring faculty member or seek permission from the student’s faculty adviser. The faculty member or adviser must sign a form that certifies that graduate credit will be granted, verifies the nature of the work to be performed by the student, and explains how the practicum helps to fulfill a degree requirement. Once completed, the sponsoring faculty member or adviser submits a grade of pass or fail for the student. The course may be used for curricular practical training. Economic majors /Graduate students only.

Cross Listed Courses

Sociology
AS.230.374. Poverty and Public Policy. 3.0 Credits.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Enrollment restricted to Social Policy minors only.
Prerequisites: Students that took AS.360.372 may not take AS.230.374.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences Writing Intensive.

Interdepartmental
AS.360.247. Introduction to Social Policy: Baltimore and Beyond. 3.0 Credits.
This course will introduce students to basic concepts in economics, political science and sociology relevant to the study of social problems and the programs designed to remedy them. It will address the many inequalities in access to education and health care, unequal treatment in the criminal justice system, disparities in income and wealth, and differential access to political power. The focus will be on designing effective policies at the national and local level to address these pressing issues. This course is open to all students, but will be required for the new Social Policy Minor. The course is also recommended for students who are interested in law school, medical school, programs in public health, and graduate school in related social science fields. This course does not count as one of the required courses for the Economics major or minor, but it is required for the Social Policy Minor. Cross list with Sociology, Economics and Political Science. Freshman, Sophomore and Juniors only.
Instructor(s): B. Morgan; K. Edin; V. Weaver
Area: Social and Behavioral Sciences Writing Intensive.

AS.360.372. Poverty and Public Policy. 3.0 Credits.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Permission of instructor required.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences Writing Intensive.

AS.360.380. Making America Social Policy. 3.0 Credits.
This course analyzes the distinctive US welfare state in historical and comparative perspective. We begin with a survey of the policy context, an historical overview from the poorhouses through the Great Society, and a tour of welfare states across the rich democracies. We then survey developments — and explain the actual workings of policy — across jobs, education, welfare, pensions, and health care. We explore the institutional and political factors behind their divergent trajectories through conservative revival and the age of Obama. Students will write a seminar paper exploring policy development over time in a program or area of their choosing. Enrollment restricted to Social Policy minors only.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences Writing Intensive.
AS.360.528. Problems in Applied Economics. 2.0 Credits.
This course focuses on a monetary approach to national income determination and the balance of payments. Money and banking, as well as commodity and financial markets, are dealt with under both central banking, as well as alternative monetary regimes. Particular emphasis is placed on currency board systems. Students learn how to properly conduct substantive economic research, utilizing primary data sources, statistical techniques and lessons from economic history. Findings are presented in the form of either memoranda or working papers of publishable quality. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. Advanced excel programming skills are required and students are expected to be pre-screened for research at the Library of Congress in Washington, D.C.. Bloomberg certification is a requisite.
Prerequisites: EN.660.203
Instructor(s): S. Hanke
Writing Intensive.

Environmental Health and Engineering
EN.570.428. Problems in Applied Economics. 3.0 Credits.
This course focuses on a monetary approach to national income determination and the balance of payments. Money and banking, as well as commodity and financial markets, are dealt with under both central banking, as well as alternative monetary regimes. Particular emphasis is placed on currency board systems. Students learn how to properly conduct substantive economic research, utilizing primary data sources, statistical techniques and lessons from economic history. Instructor(s): S. Hanke
Area: Social and Behavioral Sciences
Writing Intensive.

EN.570.470. Applied Economics & Finance. 3.0 Credits.
This course focuses on company valuations, using the proprietary Hanke-Guttridge Discounted Free Cash Flow Model. Students use the model and primary data from financial statements filed with the Securities and Exchange Commission to calculate the value of publically-traded companies. Using Monte Carlo simulations, students also generate forecast scenarios, project likely share-price ranges and assess potential gains/losses. Stress is placed on using these simulations to diagnose the subjective market expectations contained in current objective market prices, and the robustness of these expectations. During the weekly seminar, students' company valuations are reviewed and critiqued. A heavy emphasis is placed on research and writing. Work products are expected to be of publishable quality.
Prerequisites: EN.660.203 AND (EN.570.428 OR AS.360.528)
Instructor(s): S. Hanke
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences
Writing Intensive.

EN.570.504. Financial Market Research. 3.0 Credits.
This course investigates the workings of financial, foreign exchange, and commodity futures markets. Research is focused on price behavior, speculation, and hedging in these markets. Extensive research and writing of publishable quality are required. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. An approved research proposal is a prerequisite.
Instructor(s): S. Hanke
Writing Intensive.

English
http://english.jhu.edu/
The Department of English offers separate undergraduate and graduate programs, each designed to suit the needs of its particular student body. The undergraduate program, in the context of university requirements and elective courses, provides the basis for a liberal education and prepares students for graduate work or professional schools, such as medicine and law, as well as professional teaching and literary scholarship. The graduate program prepares advanced students for professional teaching careers in English literature.

Facilities
Besides the Sheridan Libraries, Hopkins students have easy access to the 12 million volumes and innumerable historical manuscripts of the Library of Congress, as well as the library at Dumbarton Oaks, the Folger Library, the Freer Library, the library of the National Gallery, and many other specialized public collections. Students learn about advances in research and criticism and confer with leading American and European scholars and critics through participation in the activities of the Tudor and Stuart Club, the ELH Colloquium, and the department's other programming.

Undergraduate Programs
Requirements for the B.A. Degree
(Also see Requirements for a Bachelor’s Degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree).)
In addition to demonstrating foreign language proficiency in at least one classical or modern foreign language, the English major requires students complete general courses in the humanities and social science, a required course in literary study (AS.060.107 Introduction to Literary Study), and nine additional English courses, of which at least three must be literature before 1800. Within the nine additional English courses, at least two and no more than four courses must be designated as lecture courses. Students may identify lecture courses by the presence of the POS-Tag ENGL-LEC in a course description in the schedule of classes. Pre-1800 literature courses are identified by the POS-Tag ENGL-PR1800. Additional details include:

• Only two courses towards the nine required English courses for the major may be taken outside of the department and those must be cross-listed with the English department.
• Only two independent studies or senior essay courses may apply towards the major.
• Students must earn a grade of C- or better in all major requirements and courses may not be taken satisfactory/unsatisfactory.
• Up to two courses taken through approved study abroad programs may be applied towards the major with approval of the director of undergraduate studies.

Major Requirements:
Two courses in the humanities or social sciences 6
Foreign language proficiency through the intermediate level 0-17
AS.060.107 Introduction to Literary Study * 3
Nine Additional English Courses (divided as follows): **
One non-lecture course in pre-1800 literature 3
Two courses in pre-1800 literature 6
Six 200 to 400-level English courses 18
Total Credits 36-53

* Should be taken no later than sophomore year.
** Students are required to take at least two lectures courses and up to four lecture courses may apply towards this requirement.

Advising for Students
All students, whether their goals are professional or not, should choose courses in consultation with their major advisor to suit their individual needs and satisfy departmental requirements. Students planning to enter graduate school in English should study a second foreign language. Students who have not yet been assigned to a major advisor may discuss departmental requirements and curriculum planning with the director of undergraduate studies.

Sample Program

Freshman
Fall Credits Spring Credits
Intro Course in Humanities or Social Sciences 3 AS.060.107 Introduction to Literary Study 3
Intro Course in Humanities or Social Sciences 3 English Elective at 200-level (ENGL-LEC) 3
Total Credits: 6

Sophomore
Fall Credits Spring Credits
Foreign language 4 Foreign Language 4
Pre-1800 Course at 200-level 3 English Elective at 300-level 3
Total Credits: 7

Junior
Fall Credits Spring Credits
Foreign language 3 Foreign Language 3
Pre-1800 Course at 300-level 3 English Elective at 300-level 3
English Elective at 200-level (ENGL-LEC) 3
Total Credits: 9

Senior
Fall Credits Spring Credits
English Elective at 300-level 3 Pre-1800 Course at 200- or 300-level 3
English Elective at 300-level 6
Total Credits: 50

Honors in English
Departmental honors are awarded to undergraduate English majors who achieve a cumulative average of 3.6 or higher for all English courses taken to satisfy the major requirements. For more information about Honors in English, contact the director of undergraduate studies in English.

Senior Essay Option
Majors with a cumulative G.P.A. of 3.8 in English courses by the end of the fall semester of their junior year may apply to write a senior essay in the fall of their senior year. For further information and deadlines, contact the director of undergraduate studies in English.

English Minor
Students who wish to graduate with a minor in English must take AS.060.107 Introduction to Literary Study, generally within one year of declaring the minor. Six additional English courses are required, of which at least two and no more than three must be lecture courses. At least one of the six courses must be a pre-1800 course. Students must earn a grade of C- or better in all minor requirements and courses may not be taken satisfactory/unsatisfactory.

Minor Requirements:
AS.060.107 Introduction to Literary Study 3
One course in pre-1800 literature 3
Five additional English courses 15
Total Credits 21

Graduate Program
The Department of English offers advanced programs and guided research leading to the Ph.D. degree in English and American literature in the following major literary fields: the Renaissance, the 18th century, the Romantic period, the Victorian period, American literature, and 20th-century literature.

The department accepts only full-time students working toward the Ph.D.; there is no autonomous M.A. program. Because of its small size and the close association between faculty and students, the department is able to offer an intensive program leading to the Ph.D. in five years.

Requirements for the Ph.D. Degree
Students are required to enroll in three graduate courses in each of the semesters of their first year of study and two in each of the semesters of their second year. By the end of the third year, students will have completed 10 graduate seminars, an oral examination in two fields, and examinations in one or two foreign languages. Fourth-year students will receive dissertation fellowships.

Teaching experience is regarded as an important part of the graduate program, and graduate students are required to teach in the department's literature and expository writing courses during their second, third, and fifth years at Hopkins.

For further information about graduate study, contact the graduate coordinator at the Department of English or go to http://english.jhu.edu/graduate/.

For current faculty and contact information go to http://english.jhu.edu/people/
Faculty
Chair
Christopher Nealon
American literature, aesthetic theory, poetry and poetics, the history of sexuality

Professors
Sharon Achinstein
Sir William Osler Professor of English: Early modern literature, poetry and poetics, gender

Chris Cannon
Bloomberg Distinguished Professor: Medieval literature, philosophy

Mary Favret
British Romanticism, late 18th-early 19th-century English literature, war studies, gender and genre, literature and violence

Lawrence Jackson
Bloomberg Distinguished Professor; African American Literature, Literary History, Biography, American History

Douglas Mao
British, Irish, and U.S. poetry and fiction since 1860; interdisciplinary study of modernism.

Andrew Miller
Literature and moral philosophy; nineteenth century British literature; literary theory

Christopher Nealon
American literature, aesthetic theory, poetry and poetics, the history of sexuality

Eric Sundquist
Andrew W. Mellon Professor of the Humanities: American literature and culture, including African American and Jewish American; literature of the Holocaust.

Mark Thompson
19th- and 20th-century African-American literature, 20th-century German Idealism, French philosophy and aesthetics, theory.

Associate professors
Andrew Daniel
Early modern literature, critical theory, aesthetics.

Jared Hickman
American literature, intellectual and cultural history of Atlantic (anti) slavery, religion and radical politics, critical race studies.

Nadia Nurhussein
African American literature, late 19th- and early 20th-century American literature, Poetry and Poetics

Assistant professors
Jeanne-Marie Jackson
Theory of the novel, literature and philosophy, sub-Saharan African literature, Russian realism, global regionalisms.

Jesse Rosenthal
American literature, aesthetic theory, poetry and poetics, the history of sexuality.

Professors emeriti
Sharon Cameron

Frances Ferguson
Literature, aesthetic theory, and moral/legal philosophy in the 18th and early 19th centuries.

Neil Hertz
Professor Emeritus (Humanities): Romantic literature and critical theory.

Ronald Paulson

Research professor
Larzer Ziff
Caroline Donovan Professor Emeritus of English Literature: American literature.

Joint appointments
John T. Irwin
Professor (Writing Seminars): American literature.

Lecturers
Aliza Watters
Lecturer: Expository Writing Program

Anne-Elizabeth Murdy Brodsky
Lecturer: Expository Writing Program.

Williams Evans
Senior Lecturer: Expository Writing Program.

Patricia Kain
Senior Lecturer and Director: Expository Writing Program.

George Oppel
Lecturer: Expository Writing Program.

Marisa O'Connor
Lecturer: Expository Writing Program.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.060.100. Introduction to Expository Writing. 3.0 Credits.
Introduction to "Expos" is designed to introduce less experienced writers to the elements of academic argument. Students learn to recognize "The Fundamental Structure of Academic Argument" as they learn to read and summarize academic essays, and then they apply the fundamental structure in academic essays of their own. Classes are small, no more than 10 students, and are organized around three major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each "Intro" course teaches students to avoid plagiarism and document sources correctly. "Intro" courses do not specialize in a particular topic or theme and are available to freshmen only.
Instructor(s): A. Brodsky; M. O'Connor; P. Kain; W. Evans
Area: Humanities
Writing Intensive.
AS.060.102. The Novel and the American Family. 3.0 Credits.
While America and the "American Dream" promise the possibility of unlimited individual development, the American family has often resisted this promise and cramped America's style. In this course we will explore works by Philip Roth, Eudora Welty, Alice Walker, and Jonathan Franzen that dramatize this tension in devastating and hilarious ways. Against the backdrop of post-WWII America, these writers struggle with issues of race, sex, and the erosion of tradition, shedding light on the challenging relation between the individual and the family.
Instructor(s): R. Day
Area: Humanities
Writing Intensive.

AS.060.103. Novels After 9-11. 3.0 Credits.
This course explores various novels written in English in the wake of the tragedy of 9-11, from various perspectives around the globe. It asks how the form of the novel responded to the events of that date and its aftermath, and in doing so, considers the role of art in shaping our understanding of global events, violence, and the forces that produce them. This course offers a greater appreciation of the novel and its role in history, as well as a framework for comparing different perspectives on a major historical event. It should improve your skills as a reader of fiction and analyst and judge of what you read. In the course of the semester you will: 1) Survey how novels from a variety of positions and perspectives represent and understand the events of 9-11. 2) Learn to analyze the form of the novel, its various elements, and its role in culture and history. 3) Read and evaluate reviews of major novels, from different contexts. 4) Learn to write an intelligent and informed review of a novel.
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.104. Counterfactual Literature and Film. 3.0 Credits.
This course will concern the imagination of our unled lives—the lives we might have led but have not. Robert Frost's "The Road Not Taken" is the most familiar instance of this preoccupation, but Frost is only one of many artists for whom unled lives have been an ongoing concern—Thomas Hardy, Henry James, Virginia Woolf, Philip Larkin, Ian McEwan, and Sharon Olds are among the many others. Why are people so interested in what has not happened to them? And why should writers and film-makers in particular be so interested in these non-events?
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.107. Introduction to Literary Study. 3.0 Credits.
This course serves as an introduction to the basic methods of and critical approaches to the study of literature. Some sections may have further individual topic descriptions; please check in ISIS when searching for courses.
Instructor(s): E. Sundquist; J. Hickman; J. Jackson; M. Thompson
Area: Humanities
Writing Intensive.

AS.060.108. Time Travel. 3.0 Credits.
Why is time travel such a consistent and perplexing in literature and film over the last 150 years? Why is modernity so concerned with peering backwards or forwards? This course will examine the history of time-travel fiction, from its beginning in utopian fiction through its box-office dominance in the 1980s, and into today. Writers will likely include Mark Twain, Edward Bellamy, Harold Steele Mackay, Ray Bradbury, Robert Heinlein, and Philip K. Dick. Movies will include *The Terminator*, *Back to the Future*, and *Primer*.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.110. The African American Novel. 3.0 Credits.
This course will survey classic novels by African-American writers. From slavery to freedom, from subjection to the qualified triumph of integration, we'll examine several examples of black writers writing about what it means to be "black" in America, and what it means to be "white" from a "black" perspective.
Instructor(s): D. Tye
Area: Humanities
Writing Intensive.

AS.060.111. How Not to Be Afraid of Poetry. 3.0 Credits.
What is poetry? And why don't we like it? This course will explore what makes poetry turn ordinary language into something extraordinary, into shapes and sounds so that sometimes we find it difficult to understand and sometimes we find it gives us great delight. This seminar will open up a range of poetry written in English, including some of the greatest writers of the English language. This course is designed for the students without a strong background in reading poetry but who have the desire to gain it; the main emphasis is exploration of the world and words of poetry and developing an appreciation and analytical understanding of the ways poetry can express, advocate, record, and move. Assignments will include reading poems, becoming an expert about a single poet, attending public poetry readings, creating poems, and writing short weekly assignments about poems. You will be expected to be an active member in classroom discussion and activities.
Pre 1800 course.
Instructor(s): A. Achinstein
Area: Humanities
Writing Intensive.

AS.060.112. Major Authors: Dickens and Film. 3.0 Credits.
From the earliest moments of cinema, Charles Dickens' writing has proven extraordinarily stimulating for film-makers. Why might this be? What does it tell us about Dickens—and what does it tell us about the pleasures and demands of both fiction and film? To address these complex questions we'll read a handful of Dickens' works (most likely Oliver Twist, Great Expectations, Christmas Carol and Little Dorrit), watch their adaptations, and read a small set of critical essays. Requirements are likely to include two papers, response papers, and a class presentation.
Instructor(s): A. Miller
Area: Humanities.
AS.060.113. Expository Writing. 3.0 Credits.

"Expos" is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply "The Fundamental Structure of Academic Argument" in academic essays of their own. Classes are capped at 15 students and organized around three major essay assignments. Each course guides students' practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each "Expos" course teaches students to document sources correctly and provides its own topic or theme to engage students' writing and thinking. Please see the following list of individual course descriptions to decide which sections of "Expos" will most interest you. "Expos" courses are available to freshmen, sophomores, and juniors, and to seniors by special permission. Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.060.114. Expository Writing. 3.0 Credits.

"Expos" is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students' practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each "Expos" course teaches students to document sources correctly and provides its own topic or theme to engage students' writing and thinking. Please see the following list of individual course descriptions to decide which sections of "Expos" will most interest you. "Expos" courses are available to freshmen, sophomores, and juniors, and to seniors by special permission from the English Department. Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.060.116. Reading Muslims in Global Fiction and Film. 3.0 Credits.

This course will explore representations of complex, fully-developed Muslim characters in fictions detailing experiences from the Balkans, the Indian Ocean, Britain, and the United States. These may include novels by Abdulrazak Gurnah, Ohan Pamuk, and Leila Aboulela, as well as films like A Separation (2011). In studying the way each text represents Muslims and their relationships to their faith, the class will analyze themes of belonging and identity politics, imagined relationships to geographies, and representations of individuality alongside rituals of belief. It will look at how race, socio-economic status, gender, and citizenship contribute to these representations, when and how these texts are read as political acts, and what contributions such fiction has made to aesthetics. Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

AS.060.123. Freshman Seminar: Prophecy After Science. 3.0 Credits.

This course explores the history of prophecy from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom. We will focus on the influence of prophecy on the rise of science (and vice-versa). Readings will include texts by William Shakespeare, Francis Bacon, Mary Shelley, and Philip K. Dick. Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.124. Politics, History and Autobiography. 3.0 Credits.

Students will write a mini-autobiography in the form of seven 3000 word essays, work shopped in class. Readings include A Small Place by Jamaica Kincaid and Brothers and Keepers by John Edgar Wideman. Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.

AS.060.127. Muslim Science Fiction. 3.0 Credits.

This course will explore the wondrous and mysterious world of Islamic Sci-Fi. Writers of Muslim Sci-Fi have asserted a long tradition of speculative fiction and fantasy dating back to the 13th century. We will look into this literary history, beginning with earlier texts like The Arabian Nights, al-Qizwini’s alien story Awaj bin Anfaq and Roquia Hussain’s Sultana’s Dream all the way through to modern texts like G. Willow Wilson’s Alif the Unseen and Saladin Ahmed’s Throne of the Crescent Moon. We will ask how this genre, as opposed to realism, might enable these writers to productively tackle themes of history, science, belief, and the politics of belonging and difference. We will pair our Muslim readings with more canonical science fiction works, such as Mary Shelley’s Frankenstein, H.G. Wells’ The Time Machine, and more recently, Kazuo Ishiguro’s Never Let Me Go, to think through the relationship of the SF writer to a particular cultural moment. We will also look at writers of afrofuturism and magical realism, like Octavia Butler and Gabriel García Márquez, to think about how other writers of color have employed fantasy and the fantastical, and to what ends. Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

AS.060.129. Writing Africa Now. 3.0 Credits.

This course surveys post-2000 literary and cultural production from sub-Saharan Africa. Topics will include debates over genre and fiction’s relevance to African experience, legacies of canonical writing about independence, urban Africa as violent or “tragic” landscape, and problems of scale and geographical context. Readings by authors such as Adichie, Wainaina, Duiker, and Vladislavic, and students will be introduced to the main print and online arteries of African intellectual discussion. This class is for non-majors and does not count towards the English major or minor. Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.
AS.060.139. Expository Writing: The Narrative Essay. 3.0 Credits.

Telling stories is one of the first and most important ways that human beings try to make sense of the world and their experience of it. The narrative art informs fiction and nonfiction alike, is central to the writing of history, anthropology, crime reports and laboratory reports, sports stories and political documentaries. What happened? The answer may be imagined or factual, but it will almost certainly be narrative. This course focuses on the narrative essay, a nonfiction prose form that answers the question of "what happened" in a variety of contexts and aims to make sense not only of what happened but how and why. We will begin by summarizing narrative essays, will move to analyzing them, and in the second half of the course you will write two narrative essays of your own, the first based on a choice of topics and sources, the second of your own design. Authors may include James Baldwin, Annie Dillard, Chang Rae Lee, Danielle Ofr, George Orwell, Richard Rodriguez, Richard Selzer, and Abraham Verghese. You will learn the power of narrative to inform and persuade as you test that power in your own writing.

Instructor(s): P. Kain
Area: Humanities
Writing Intensive.

AS.060.141. Nineteenth Century Narrative and Early Film. 3.0 Credits.

This course will situate the birth of the movies within the context of 19th century fiction and visual technology. Filmmakers are likely to include Georges Melies, Sergei Eisenstein, D. W. Griffiths, Charlie Chaplin, Buster Keaton, King Vidor, and Rouben Mamoulian; novelists are likely to include Charles Dickens (Christmas Carol or Oliver Twist), Robert Louis Stevenson (Jekyll and Hyde), and perhaps Virginia Woolf (Mrs. Dalloway).

Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.145. Literature, Science, and Technology. 3.0 Credits.

This course will consider a range of reactions to scientific discoveries in literature, from electricity in the nineteenth century to bioengineering today. We'll pay special attention to the utopian hope, doomsaying despair, and radical reconceptions of reality technological breakthroughs seemed and seem to provide. Authors will include Mary Shelley, Wells, LeGuin, Ishiguro.

Instructor(s): E. Tempesta
Area: Humanities
Writing Intensive.

AS.060.146. Detective Fiction. 3.0 Credits.

This course will look at the history of English-language detective fiction through the nineteenth and twentieth centuries. We will pay special attention to the way clues and suspense operate, the role of the reader in figuring out the mystery, and the complicated relationship of the detective with official authority. Authors will likely include some selection of Wilkie Collins, Edgar Allan Poe, Arthur Conan Doyle, Agatha Christie, Dashiell Hammet, and Raymond Chandler. This class is for non-majors.

Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.149. Freshman Seminar: Work and Worth in American Literature. 3.0 Credits.

"No man needs sympathy because he has to work, because he has a burden to carry," Theodore Roosevelt proclaimed in his "Square Deal" speech of 1903. "Far and away the best prize that life offers is the chance to work hard at work worth doing." Hard work is at the heart of the American dream, but with unemployment rates at historic highs and the global economy proceeding at a rapid clip, Roosevelt's words resound in new questions in a new world: What work is worth doing? Who gets the chance to do it? And what happens when people find themselves doing work that isn't worth doing? In this course we will consider the meaning and consequences of work, from the heroic to the tragic, through a selection of American literature from the last days of slavery to the present. This course will consider work in all its forms, from the plantation to the boardroom, to help us develop the tools to interpret the varieties and values of labor in modern society.

Instructor(s): E. Tempesta
Area: Humanities
Writing Intensive.

AS.060.150. Freshman Seminar: Milton's Paradise Lost: Contexts and Conversation. 3.0 Credits.

This course undertakes an in-depth study of what is arguably the greatest long poem in the English tradition, John Milton's Paradise Lost. The poem, first published in 1667, is Milton's take on the Judeo-Christian story of the Fall found in the Bible. Paradise Lost does not merely re-tell the biblical account, however. By expanding three chapters of Genesis into a twelve-book epic meant to rival its classical forbears—most importantly Virgil's Aeneid—Milton's poem makes room for new readings of an old story. This course encourages students to find their own new readings of the Genesis story by considering the historical contexts of the poem's production as well as the conversations Paradise Lost continues to provoke to this day. In addition to reading and discussing the poem, students will become familiar with ongoing sites of critical debate, such as the representations of Satan and of Eve. To help negotiate these conversations, students will complete a guided research project that makes use of the materials available through the library's Department of Special Collections, housed in Brody Learning Commons. In addition to early editions of Paradise Lost, this treasure trove of rare books offers a wide variety of materials which may deepen an encounter with Milton's poem, from biblical illustrations to gardening manuals to marriage advice. Students will use the collection to ask questions such as: "How does Milton's representation of Satan differ from earlier traditions of imagining the devil?" and "Does Milton's approach to Eve reinforce or revise conventional ideas about women?" Sufficient class time will be dedicated to introducing students to Special Collections so as to facilitate their individual work over the course of the semester.

Writing Intensive.
AS.060.151. American Literature, Race, and Civil Rights. 3.0 Credits.
The course will explore the role played by literature in advancing and reflecting upon the African American pursuit of freedom and civil rights over the course of the twentieth century, from the era of harsh segregation through the post-Civil Rights era. Although we will focus primarily on fiction, we will also consider essays, autobiography, and poetry. Writers to be considered, mostly black but some white, may include James Weldon Johnson, Ralph Ellison, Richard Wright, Ann Petry, James Baldwin, William Faulkner, Harper Lee, William Melvin Kelley, Malcolm X, Amiri Baraka, Toni Morrison, and Paule Marshall. This class is for non-majors.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.154. Zombies. 3.0 Credits.
Why is the zombie figure so prominent in modern literary and cinematic texts? What particular anxieties does this figure of mindless violence disclose? Why does the zombie genre so often lend itself to political allegory? How do we make historical sense of this figure's original association with Afro-Atlantic religions like Haitian voodoo? This course is designed for non-majors interested in developing critical reading and writing skills by investigating this surprisingly rich topic. Texts, literary and cinematic, may include: firsthand accounts of the Atlantic slave trade, Mary Shelley's "Frankenstein", Edgar Allan Poe's short stories, Rudolph Fisher's "The Conjure-Man Dies", "The Invasion of the Body Snatchers" (dir. Don Siegel), "The Serpent and the Rainbow" (dir. Wes Craven), "Pontypool" (dir. Bruce McDonald), and "Zombieland" (dir. Ruben Fleischer).
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.155. Expository Writing: Introduction to the Research Paper - Controversies in Adolescence. 3.0 Credits.
"Introduction to the Research Paper" is designed to introduce more experienced student writers to the fundamental skills of the research process. These include asking research questions, evaluating the usefulness of sources to answer them, synthesizing sources, reading sources critically, and developing arguments that deliver an original thesis. Students will work with a research librarian at the Eisenhower Library, with whom they will learn to navigate traditional databases as well as new media sources. The Research Paper is topic-based and divided into three linked units of instruction. The course culminates with a paper of 10-12 pages that draws upon the cumulative skills of the semester. Each course is capped at ten students and available only to those who have taken "Expository Writing" (060.113/114)
Instructor(s): A. Watters
Area: Humanities
Writing Intensive.

AS.060.157. J.R.R. Tolkien and the Contemporary Fantasy Epic. 3.0 Credits.
J.R.R. Tolkien's "The Lord of The Rings" trilogy can honestly be said to have initiated a new genre: a novel-based epic narrative set in a fantasy world. Since Tolkien's works were first published in the 1940's, there has been a massive flowering in similar works, as later authors expanded and developed the notion of the multi-volume fantasy narrative. However, these later texts are also, importantly, creative responses to the models Tolkien developed. In this course, we are going to study this genre, identify its history and formal features, and consider the nature of fantasy fiction more generally. What do authors hope to achieve by setting plots and characters in a completely imagined world? What narrative possibilities does such a decision enable, and what possibilities does it foreclose? Does the fantasy genre mask certain ideologies, and how can we uncover them? Authors will include Tolkien, Robert Jordan, George R.R. Martin, and Steven King, and may also include selections from Brandon Sanderson, David Eddings, Patrick Rothfuss, Ursula K. LeGuin, and Elizabeth Moon. This course is for non-majors. (Limit 18)
Instructor(s): P. Fessenbecker
Area: Humanities
Writing Intensive.

AS.060.159. James Joyce's Ulysses. 3.0 Credits.
As a class, we will read James Joyce's Ulysses in its entirety. Readings will be supplemented with appropriate secondary sources, but the focus will be the novel. No prior knowledge of Joyce is necessary
Instructor(s): J. Hoffmann
Area: Humanities.

AS.060.164. The Marriage Plot: From Jane Austen to Bridesmaids. 3.0 Credits.
No device has been more essential to the modern novel than that of marriage. In this course we will examine the history of the marriage plot in literature and film, beginning with Jane Austen's Pride and Prejudice and concluding with the 2011 film Bridesmaids. We will have occasion to inquire into the significance of marriage to the form of the novel as well as the ways in which the marriage plot has been appropriated, adapted, and deconstructed in nineteenth-century novels and contemporary novels alike. This class will also include a digital component as we will all collaborate to create a growing database of tropes common to marriage plots.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.171. Russian Classics & Their Afterlives. 3.0 Credits.
The idea of the "Russian Soul" has long been a source of captivation to English-language writers. How has their imagination of the dense nineteenth-century works for which Russian literature is best known evolved in the era of globalization? This course reads three major Russian novels in tandem with recent works that invoke them: Tolstoy's Anna Karenina with Nilo Cruz's 2003 Pulitzer Prize-winning play Anna in the Tropics; Dostoevsky's Demons with J.M. Coetsee's 1994 novel Master of Petersburg; and Turgenev's Fathers and Sons with Tom Stoppard's 2002 Coast of Utopia trilogy. We will attend both to the aspects of Russian writing that find perennial appeal, and to the nuances of Russian intellectual history that get lost in the clamor to claim it as universal.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.
AS.060.176. The Russian Novel: Tolstoy and Dostoyevsky. 3.0 Credits.
If there is no God, how can I be a captain?" We'll examine this and other religious, philosophical, and historical questions in Tolstoy's and Dostoevsky's titanic novels. Readings (in translation) include War and Peace and The Brothers Karamazov. No prerequisites. Substantial reading; 6-8 page paper, 10 page paper; weekly exercises and quizzes. Freshman/sophomore seminar. This class is for non-majors.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.180. Introduction to the Gothic. 3.0 Credits.
Intended as a survey of American and British Gothic fiction (with some excursions into poetry, film, and television), this course will introduce students to the genre of the Gothic and some of its key terms via a selection of major works of Gothic literature from the 19th and 20th Centuries, as well as some of its more popular incarnations (True Blood, the Twilight series). By the end of the course students should have a better understanding of why the Gothic mode continues to play such an important role in our cultural imagination and be better equipped to think and write critically about any manifestation of Gothic terror, from In Cold Blood to True Blood. Students will write short (1-2 page) weekly response papers along with one longer 5-7 page paper.
Instructor(s): A. Zecca; E. Steedley
Area: Humanities.

AS.060.202. What is Tragedy?. 3.0 Credits.
This course is an introduction to tragedy. What is a tragedy? How has the genre been defined and redefined over its long and varied existence? And why do authors and audiences keep returning to these spectacles of pity and fear? To consider these questions, we'll examine plays including Sophocles' Oedipus Rex, Shakespeare's Hamlet, Racine's Phèdre and Beckett's Endgame, ending with the Coen Brothers' film No Country for Old Men.
Instructor(s): W. Miller
Area: Humanities.

AS.060.203. Bible as Literature. 3.0 Credits.
This course looks at the ways in which the bible has and can be read as literature.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.204. Satan in Literature. 3.0 Credits.
This course will examine the ways in which Satan has been used in literature, from political revolution in Milton's Paradise Lost to irreverence of tradition in Salman Rushdie's The Satanic Verses, this class will examine the ways in which Satan has been used in literature to represent a variety of moral, political and social forces, from Ancient, Medieval, Renaissance and Modern eras.
Instructor(s): J. Chilton
Area: Humanities.

AS.060.205. Feminist Fiction: Violence, Sex and Gender. 3.0 Credits.
This course will start with passages from Lysistrata and the Book of Judges, and have as a running concern the overlapping structures of violence, race and gender. Novels will include the following pairs: Jane Eyre and Wide Sargasso Sea, The Bluest Eye and Bastard Out of Carolina, The Handmaid's Tale and Octavia Butler's novella Bloodchild.
Instructor(s): M. Favret
Area: Humanities.

AS.060.206. Friends and Enemies in Jane Austen. 3.0 Credits.
Jane Austen's novels are often treated as forms of escape from our complicated world to a simpler, more rational time. Arguably, however, her novels originally helped readers navigate profound social problems, particularly the difficulty of knowing friends from enemies. In this course, we will consider depictions of friendship and enmity in four of Austen's major novels. We will compare these novels to four recent films inspired by her works.
Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.207. Shakespeare. 3.0 Credits.
Reading the major comedies, histories and tragedies alongside the narrative poem "Venus and Adonis" and the sonnets, this survey course considers Shakespeare's hybrid career as poet and playwright. Pre 1800 course.
Instructor(s): A. Daniel; J. Hickman
Area: Humanities.

AS.060.208. British Literature I. 3.0 Credits.
British Literature I is a survey of English writing on the isle of Britain from the seventh to the seventeenth centuries. It traces the formal experimentation in poetry and prose, and in narrative, lyric, and drama, through which that writing eventually became pre-eminent in Britain. It will also attend to the social and cultural circumstances—in the court, in church, and in the evolving public and private spheres—that shaped the many genres that emerged in this rich 1000 years and developed a definition of 'literature' itself . Author's read include Chaucer, Langland, Kempe, Spenser, Shakespeare, Lanyer, Donne Herbert, Marvel, and Milton. Through lectures, class discussion, written responses, and longer essay assignments, students will master the fundamentals of English literary history as well as the techniques of critical reading and writing.
Instructor(s): Staff
Area: Humanities.

This course provides a framework for grasping the dazzling variety and explosive innovation of literature in English during the last quarter-millennium. Attending both to textual details and to historical contexts, we will see how Wordsworth, Austen, Keats, Tennyson, Dickens, Wilde, Woolf, Rushdie, and other writers extend and undo tradition, illuminate their times and places as well as our own, and conspire to bring to us the intense experience distinctive to great literary art.
Instructor(s): A. Guevarez; D. Mao
Area: Humanities.

AS.060.211. British Literature I. 3.0 Credits.
What is British Literature? Beginning in the fourteenth century and concluding in the eighteenth century, this survey course examines the time period in which the notion of vernacular English literature, the corporate body of "Great Britain" as a national framework, and, with it, "British-ness" as an imaginary, synthetic identity, were all created. Participants will read a representative group of Geoffrey Chaucer’s "The Canterbury Tales" , Book I of Edmund Spenser’s "The Faerie Queene", the entirety of John Milton’s "Paradise Lost", and Alexander Pope's "The Rape of the Lock." The course is designed as an introductory level lecture course and is open to all students curious about the beginnings of the English literary canon. It is recommended that students follow this course with its sequel, Professor Mao’s "British Literature II;" which will be offered the following semester. Pre-1800 course.
Instructor(s): A. Daniel
Area: Humanities.
AS.060.212. British Literature II: 18th Century to the Present. 3.0 Credits.
A survey of major authors such as Wordsworth, Keats, Austen, Tennyson, Dickens, Wilde, Woolf, Joyce, and Rushdie. Substantial attention to formal conventions as well as stylistic innovation, to aesthetic value as well as social meaning.
Instructor(s): D. Mao
Area: Humanities.

AS.060.213. The Novel and Globalization. 3.0 Credits.
Novels have long been classified by the national origin of their author, and, for the most part, the great works of the nineteenth and twentieth centuries take place primarily in one country. In the postcolonial era of the 1980s and 90s, many prominent writers explored the process of diasporic movement from one country to another. Recently, though, there has been a lot of talk about a new kind of “rootless” novel that jumps between many locales around the globe. This course reads some of the prime examples of this genre in relation to its immigrant predecessors, identifying its key formal and thematic attributes (such as perspectival and geographical range, multi-stranded plots, and an acute consciousness of linguistic and generic hybridization). We will discuss the trade-offs inherent in developing many places rather than one in terms of style and character development, as well as the political and even ethical implications of abandoning the concept of “home.” Primary works by Abdulrazak Gurnah, Caryl Phillips, David Mitchell, Taiye Selasi, Chimamanda Adichie, and Imraan Coovadia.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.214. Jane Austen. 3.0 Credits.
An in-depth study of Austen's writing, from her juvenilia through her posthumously published novels, with an occasional glance to movie adaptations. The course will focus on persistent questions about Austen's relationship to feminism, and issues of gender and sexuality, as well as issues of style and technique.
Instructor(s): M. Favret
Area: Humanities.

AS.060.219. American Literature to 1865. 3.0 Credits.
A survey course of American literature from contact to the Civil War.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.220. What is the Great American Novel?. 3.0 Credits.
This course will investigate the curiously persistent idea of the "Great American Novel" (GAN) through a close engagement with three exemplary candidates for the title that span American literary history (Moby-Dick, Song of Solomon, and Freedom). Students will also read several critical essays to provide both a history of the concept as well as criteria for what might make an American novel "great." Through analyses of the individual novels, students will be encouraged to reflect on the persistence, efficacy, and validity of the GAN.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.222. African American Literature from 1900 to Present. 3.0 Credits.
A survey of the major and minor texts written by African Americans during the twentieth century, beginning with Charles Chesnutt's The Marrow of Tradition and concluding with Toni Morrison's Beloved.
Instructor(s): L. Jackson
Area: Humanities.

AS.060.224. The Modern Novel. 3.0 Credits.
This course covers the British novel from the late nineteenth century to the present, with a particular focus on the decades around World War I. We'll balance attention to formal innovations and experiments with consideration of social and historical context, exploring issues such as gender, empire, psychology, the city, and war. Our goal will be to understand what makes these novels "modern" and sets them apart from their predecessors; to this end, we'll examine how many important authors also wrote extensively on the craft and aims of fiction. Readings will include representative selections by authors such as Henry James, James Joyce, Ford Madox Ford, E.M. Forster, Virginia Woolf, Jean Rhys, and Ian McEwan.
Instructor(s): A. Grener
Area: Humanities.

AS.060.229. The Antihero: Heathcliff to Walter White. 3.0 Credits.
Although it’s common to think of literature a source of ethical wisdom, literary history is actually full of proud, often cynical, figures who lack respect for conventional norms and compel attention by their sheer force of will. This course constructs an abbreviated history of the anti-hero by exploring works of art that both privilege and criticize anti-heroic villains—including Heathcliff (from Wuthering Heights), Mr. Hyde (from Dr. Jekyll and Mr. Hyde), and Walter White (from Breaking Bad).
Instructor(s): M. Flaherty
Area: Humanities.

AS.060.231. Novels Into Film. 3.0 Credits.
What does it take to turn a novel into film? How different are the demands and possibilities of these two forms? Why do some novels repeatedly attract filmmakers? And how should we evaluate films that adapt novels? Beginning with the novel Frankenstein and its various film progeny, we will look at a series of pairings between novels and films. These may include Austen's Pride and Prejudice, Dickens' Great Expectations, Tarkington's The Magnificent Ambersons, Stoker's Dracula and McEwan's Atonement along with various critical readings about the genre of the novel and the medium of film.
Instructor(s): M. Favret
Area: Humanities.

AS.060.255. The Bible as Literature. 3.0 Credits.
This course looks at the Bible's influence on literature by examining the use and impact of the most common biblical stories on canonical literary works. Pre 1800 Course
Instructor(s): M. Thompson
Area: Humanities.

AS.060.262. Literature and Knowledge. 3.0 Credits.
Can poems, plays, and imaginary narratives teach us something about the real world? Or do their fictional status make them unreliable as sources of knowledge? This course explores these questions by examining classical and contemporary discussions of the topic in conjunction with major works of literature. Primary sources include works by Shakespeare, Jane Austen, and William Golding, while the criticism will be represented among others by Aristotle, Dr. Johnson, and Martha Nussbaum.
Instructor(s): R. Maioli dos Santos
Area: Humanities.
AS.060.265. Nineteenth Century British Novel. 3.0 Credits.
Reading major novelists from the nineteenth century including Austen, C. Brontë, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.302. Theology of the Narrative. 3.0 Credits.
Everything happens for a reason: “I guess it wasn’t meant to be.” People often impose a narrative logic on life events by reference—however attenuated—to a transcendent order of meaning. This course asks two basic questions: How do theological concepts such as God’s omniscience, Providence, predestination, and prophecy get translated into particular narrative structures? How does narrative experimentation function as a critique of traditional theological viewpoints, particularly around the question of how divine agency is related to the existence of evil? Course texts may include: The Book of Job, Denis Diderot, Jacques the Fatalist; Olaudah Equiano, Interesting Narrative; Herman Melville, Moby-Dick; James Agee and Walker Evans, Let Us Now Praise Famous Men; James Baldwin, Go Tell It on the Mountain; Marilynne Robinson, Gilead and Home; Scarlett Thomas, Our Tragic Universe; Terrence Malick, dir., The Tree of Life.
Prerequisites: AS.060.107 Intro to Literary Study, English Lecture Course, or Instructor approval.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.304. Large Novels. 3.0 Credits.
This course will look at novels that are not only large in size, but which also think about the meaning and methods of trying to capture huge segments of the world into a piece of art. How much can be fit into a novel? What is gained and what is lost? How large is too large? We will read Charles Dickens’s “Bleak House”, Lev Tolstoy’s “War and Peace”, and Thomas Pynchon’s “Gravity’s Rainbow”.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.307. Training Writing Consln. 1.0 Credit.
A one credit course for those undergrads who have been nominated as Writing Center tutors. Permission required.
Instructor(s): A. Sheeran
Area: Humanities
Writing Intensive.

AS.060.308. The Novelty of the Novel. 3.0 Credits.
The English novel has been traditionally regarded as having originated in the eighteenth century, with the works of Defoe, Richardson, and Fielding. This view of the novel’s origins owes much to the influence of Ian Watt’s The Rise of the Novel (1957). Watt claims that the prose fiction written by these three authors is defined and distinguished from other varieties by its “formal realism” – a set of procedures that made the novel much more lifelike than picaresque tales, courtly novellas, or the romance. Watt’s view of the canon is now taken to be too restrictive, but his thesis concerning what was novel about the novel remains influential. In this course students will engage with two aspects of Watt’s argument that have been criticized by later critics but still retain some of their original force: the idea that eighteenth-century prose fiction marks a break with the past and that the tradition emerging at that point has English origins. We will be testing these two theses by reading and contrasting older and newer forms of prose fiction from England, France, and Spain, comparing their formal procedures, and discussing how satisfactorily Watt accounts for them. We will also be reading critiques and defenses of Watt by critics including Michael McKeon, J. Paul Hunter, Margaret Anne Doody, and Nicholas Seager. Primary sources will include excerpts from Roger Boyle’s romance Parthenissa (1651) alongside Defoe’s Moll Flanders (1722); the picaresque tale Lazarillo de Tormes (1554) together with Fielding’s road epic Joseph Andrews (1742); and the conjugal drama of Madame de Lafayette’s La Princesse de Clèves (1678) together with Richardson’s treatment of a similar topic in Pamela (1740). As we read the primary sources we will be also reading the relevant chapters of The Rise of the Novel. By gaining a first-hand view of the actual changes in prose fiction students will be able to appreciate the force of Watt’s thesis as well as its limitations. Toward the end of the course they will also engage with the provocative final chapter of Watt’s book, which claims that the problems raised by formal realism as practiced by Richardson and Fielding are finally resolved in the work of Jane Austen. Sense and Sensibility should provide the testing ground for this thesis. Pre 1800 course.
Instructor(s): R. Maioli dos Santos
Area: Humanities
Writing Intensive.

AS.060.309. Home and Wanderlust in Modernist Literature. 3.0 Credits.
This course will examine forms of wanderlust and tensions between rootedness in one’s own culture and a cosmopolitan orientation in Henry James, Joyce, Tagore, Hemingway, Isak Dinesen, and Hualing Nieh. Dean’s Teaching Fellowship course.
Instructor(s): N. Zhang
Area: Humanities
Writing Intensive.

AS.060.310. Work and Worth in American Literature. 3.0 Credits.
This course will engage contemporary discussions of economics, labor, and vocation with representations of people at work in the writings of Douglass, Melville, Hurston, Steinbeck, Frost, Yates, Springsteen, and others. Dean’s Teaching Fellowship Course
Instructor(s): E. Tempesta
Area: Humanities
Writing Intensive.
AS.060.312. Literature of the Gray Zone: The Holocaust and Its Shadow. 3.0 Credits.
Primo Levi's well-known essay "The Gray Zone" describes complex states of complicity and moral erosion between the categories of "victims," "perpetrators," and "bystanders" during and after the Holocaust. Literature written at the time or in the immediate aftermath, whether memoir, commentary, or fiction, contains many illustrative examples, but even more have arisen at one or another remove from the events, as later generations have confronted an atrocity frequently taken to be historically and morally unique. How did the Holocaust become a touchstone for both extremities of human behavior and problems of representation? When did the Holocaust become available to literature or to the once unthinkable strategies of satire, post-modernism, and even pornography, and can these strategies be considered examples of "the gray zone"? The course will deal with the testimonies of perpetrators such as Rudolf Höss (commandant of Auschwitz) and historical documents setting forth plans for genocide; with memoirs of prisoners such as Filip Müller forced into participation in the Holocaust; and more particularly with literary depictions of life in "the gray zone." The sequence of readings will be organized mainly around literary texts, but these will be paired, sometimes in two-week sequences, with historical and critical materials that take up the problem of complicity through various perspectives: the role of Jewish leaders during the Holocaust; attempts to fictionalize extremities of evil (e.g., Hitler); the aestheticizing of atrocity; the moral responsibility of bystanders; and the extension of genocidal paradigms to other dimensions such as slavery and animal rights. Texts to be studied (mostly, though not exclusively, written first in English) may include: Primo Levi, The Drowned and the Saved; Rudolph Hoess, Commandant of Auschwitz; Tadeusz Borowski, This Way to the Gas; Ladies and Gentlemen; George Steiner, The Portage to San Cristobal of A. H.; Leslie Epstein King of the Jews; Sylvia Plath, selected poems; Philip Roth, The Plot against America; D. M. Thomas, The White Hotel or Pictures At an Exhibition; Caryl Phillips, The Nature of Blood; and J. M. Coetzee Elizabeth Costello.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.313. Edmund Spenser. 3.0 Credits.
After a diagnostic introduction to his early poetry, this reading intensive seminar will concentrate upon Edmund Spenser's masterpiece, The Faerie Queene (1590/1596), which we will read in its entirety. Over the course of its sprawling Six Books and its concluding Mutability Cantos, The Faerie Queene marshals an enormous cast of characters (knights, ladies, magicians, giants, monsters) in order to allegorically represent the virtues of Holiness, Temperance, Chastity, Friendship, Justice and Courtesy. Through this framework, his text models the ethical regulation of the body, the aesthetic construction of gender, the politics of national myth-making, and the ongoing processes of colonial violence in which Spenser was himself complicit. But across its vast yet incomplete expanse, Spenser's text is always centrally concerned with the task of reading. Accordingly, students should emerge from their encounter with this demanding but rewarding poem with a deeper understanding of the task of interpretation itself. As a group we will collectively traverse the surface of the text, and work together to construct a functional account of allegory's effects. You will be asked to respond to the challenge of Spenser's work in class discussion, weekly short responses, and three analytic papers.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.

AS.060.314. Social Media Fictions. 3.0 Credits.
Writers around the world are now searching for ways to incorporate new modes of social interaction - e.g. Facebook, Twitter, text messaging, and Skype - into their print work. This course explores the various techniques they have adopted for this purpose, with an eye to critically evaluating their implications for narrative structure and its "reality effect." From Teju Cole's very public experiments with the Twitter novel to a Zimbabwean writer's attempt to capture plot turns through SMS, we will discuss the ways in which narrative is helped or hindered by the ubiquity of social media. Writers studied will include Tendai Huchu, Zadie Smith, Jonathan Franzen, and Eben Venter.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.315. Poetry by Other Means. 3.0 Credits.
In this course, we explore the makings of a new genre: the poet's novel. Reaching back to the modernist works of Gertrude Stein and Djuna Barnes to look for its resources and its models, searching for antecedents in the queer avant-gardes of the 1970s, and finally delving into the key poets' novels of just the last five or ten years—including works written by Eileen Myles, Juliana Spahr, Ben Lerner, and Bhanu Kapil—we will collectively develop an account of its yet-uncharted territory and some of its attractions. Our work will open onto a series of questions about both the category of poetry and the significance of narrative, while following thematic threads of friendship, gender and sexuality, self-reflection, feeling, crisis, and utopia. Deans Teaching Fellowship course.
Instructor(s): C. Westcott
Area: Humanities
Writing Intensive.

AS.060.316. Mapping the Global Metropolis. 3.0 Credits.
Cities have long taken on a central role in literature, but much of our reading about urban space is confined to a few Western hubs. And while the city has traditionally been a space for fictional characters to develop into national subjects, much of the most innovative contemporary writing sees the city as a character of its own. This course will address the representational challenges of globalization through fiction and genre-bending memoir about contemporary metropolises that act as its microcosms: Johannesburg, Lagos, Delhi, London, and New York. We will read primary works by Ivan Vladislavic, Chris Abani, Aravind Adiga, Zadie Smith, and Teju Cole, as well as supplementary excerpts from books including Capital, by Rana Dasgupta, Mike Davis' Planet of Slums, Atiq Quayson's Oxford Street, Accra, and Loren Kruger's Imagining the Edgy City. Finally, the course will include theoretical readings about globalization and representation, such as Fredric Jameson's essay on "Cognitive Mapping" and Arjun Appadurai’s seminal book Modernity at Large.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.317. Time Well Wasted: Reading Fiction in the 18th Century. 3.0 Credits.
Is reading fiction just escapism? Or can novels speak to us about real life? We will discuss this question by reading classic works by Defoe, Swift, Fielding, and Sterne. Dean's Teaching Fellowship Course. Pre 1800 course.
Instructor(s): R. Maioli dos Santos
Area: Humanities
Writing Intensive.
AS.060.319. Values and Gender in Nineteenth-Century British Literature. 3.0 Credits.
The course considers how nineteenth-century British authors—including Ruskin, Gaskell, Eliot, and Wilde—engage and oppose various sets of values in their representations of gender.
Instructor(s): M. Flaherty
Area: Humanities
Writing Intensive.

AS.060.320. Icons of Feminism. 3.0 Credits.
This course looks at four crucial figures who have haunted feminist thought and responses to feminism over the centuries. Sappho, known as the first female poet, remains an enigmatic icon of feminine desire and creativity; Antigone, the daughter of Oedipus and the heroine of Sophocles's play Antigone, still inspires feminist analyses of women's relationship to law, the state and civil society; and Joan of Arc, the militant maid of Orleans, troubles thinking about women and violence as well as women, religion and spirituality. The last figure is Mary Wollstonecraft, often cited as the first modern feminist. The course will examine literary works written about these iconic figures, as well as contemporary feminist writing about their influence and viability as models for the future of feminism.
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.321. Victorian Poetry. 3.0 Credits.
In this class, we're going to briefly survey the major poets of the Victorian era: Alfred, Lord Tennyson, Robert and Elizabeth Barrett Browning. Dante Gabriel Rossetti and his sister Christina, Matthew Arnold, George Meredith, and others. Moreover, we'll try to situate them in the social, political, and intellectual contexts that gave rise to their works, and investigate the questions that stimulated them and which their works address: we will, for instance, follow Arnold in thinking about the place of religion in the modern world, Meredith in thinking about the nature of moral egoism, and Elizabeth Barrett Browning in recovering the voices of oppressed classes. We'll also try to address the various formal innovations of poetry in the Victorian era, attending to—for example—Tennyson's complex re-imagination of the verse of the Arthurian legends and Robert Browning's development of sophisticated forms of irony. Specific poems to be studied include Tennyson's "Ulysses" and "The Lady of Shalott," George Meredith's "Modern Love," and Christina Rossetti's "Goblin Market."
Instructor(s): P. Fessenbecker
Area: Humanities
Writing Intensive.

AS.060.322. Indian Ocean. 3.0 Credits.
This course will explore the development of a cosmopolitan ethos in postwar fiction from the Indian Ocean region, with particular focus on South Africa, South Asia, and the Malay Archipelago. Authors will include Aravind Adiga, Premoedya Ananta Toer, Lloyd Fernando, Tan Twan Eng, and J.M. Coetzee.
Instructor(s): J. Haley
Area: Humanities
Writing Intensive.

AS.060.324. Modern Literature and the Land. 3.0 Credits.
This course will examine literary representations of ecological change and environmental crisis. As a class, we will read four novels written in the early twentieth century, a period of unprecedented technological development. Needless to say, environmental upheaval was not unique to the modern period. Earlier writers marveled at the railroad's influence on the landscape, while Victorian novelists grappled with the baleful ecological consequences of industrializing cities. Nevertheless there are key differences with the authors examined in this course: D.H. Lawrence, William Faulkner, Zora Neale Hurston, and Claude McKay. Whereas railroads united countries, and factories reorganized cities, the disruptions of the early twentieth century affected the entire planet. The telegraph and telephone, steam ships and airplanes knitted nations into a global network. In response, writers worked to register the local effects of these global events, translating planetary change into concrete examples of people adapting to a transforming landscape. In this course, we will reflect on the specific ways that humans influence the environment – how people bend the land to their will in light of specific historical conditions – and more important, how nature responds to those forces.
Dean's Teaching Fellowship Course.
Instructor(s): J. Hoffmann
Area: Humanities
Writing Intensive.

AS.060.325. George Eliot. 3.0 Credits.
In this course we will read the major novels (and some essays) by George Eliot, one of the most intellectually engaging of British novelists. Her fiction explores ethical, social, and aesthetic issues concerning sexual politics, the limits of morality, the demands of family, the desperation of skepticism, and the capacities of the novel form. Students should leave the course with a heightened sense of the powers of the novel and the seriousness of its ambitions. Texts are likely to include Adam Bede and The Mill on the Floss, but our focus will be on her two last and most ambitious novels, Middlemarch and Daniel Deronda.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.327. Best Sellers in the Early Nineteenth Century: Sir Walter Scott, Lord Byron, and Jane Austen. 3.0 Credits.
Sir Walter Scott and Lord Byron were the best-selling authors of their day by a significant margin. In this course, we'll attempt to come to terms with their unprecedented success, which was felt within the business of the publishing industry as much as it was in the minds of their fellow writers. Readings include Scott's poems set in Scotland's legendary past, Byron's scandalous and heroic poems (including his masterpiece, Don Juan), as well as a novel by their less-popular contemporary, Jane Austen, whose formally elegant novels must be understood as drawing on and competing with the works of her age's most dominant literary figures. Additionally, we'll place a strong emphasis on understanding how the workings of the publishing industry affected not only the habits of reading, but also of writing, during this crucial period in literary history. Secondary readings will help to situate the authors and primary texts in their historical and literary context, and provide practical tools for literary analysis. Assignments will include reading quizzes, response papers, and three longer papers. Required Texts: Walter Scott, The Poetical Works of Walter Scott (Wildside Press) Walter Scott, Waverley (Broadview) Lord Byron, The Major Works (Oxford) Jane Austen, Persuasion (Oxford)
Instructor(s): N. Bujak
Area: Humanities
Writing Intensive.
AS.060.328. Restoration and 18th Century Literature. 3.0 Credits.
This course is a survey of the major authors and genres in English from 1660-1800. Topics include the rise of the novel, politics and satire, gender and women writers, landscape and ecological consciousness, philosophy, science and literature.

Prerequisites: AS.060.107
Instructor(s): J. Kramnick
Area: Humanities
Writing Intensive.

AS.060.329. Prophecy after Science. 3.0 Credits.
Prophets and their prophecies are everywhere: whether preached by evangelical visionaries of Rapture, opined by primetime sports forecasters, or sold at hourly rates by countless fortunetellers and astrologers. Our dizzying era, predicated economically, technologically, and politically on objective methods of prediction, comfortably accommodates and even welcomes pre-scientific, prophetic modes of futurity. We look up our horoscopes on our smartphones. How did we come to balance these futures so blithely? Do we – and should we – think of these modes as continuous or separate, complementary or conflicting? This course explores the history of prophecy, from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom, with a focus on the effect of the rise of science in shaping the course of prophetic writings. The majority of texts in this course come from the literature of 1600-1800 – centuries that witnessed the emergence of our modern scientific disciplines, and the recasting of prophecy in terms of the human imagination.

Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.330. Poetry and Perfect Worlds. 3.0 Credits.
A seminar exploring poetic representations of ideal realms. Beginning with classical pastorals, we will move on to medieval and Renaissance arcadian, Romantic geographies, modernist utopias, and the ecopoetics and necropastoral of the twenty-first century. We will consider in detail what makes a place Edenic or utopian and how the fabrication of an imaginary world relates to the construction of a poetic text. Writers studied may include Theocritus, Virgil, Chaucer, Spenser, Milton, Shelley, Tennyson, T. S. Eliot, W. H. Auden, Lisa Robertson, and Juliana Spahr.

Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.331. James Joyce. 3.0 Credits.
A seminar covering the oeuvre of James Joyce, including but not limited to Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and parts of Finnegans Wake. Selected readings in other writers and in relevant historiography; some attention to Joyce criticism.

Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.332. Jewish American Fiction. 3.0 Credits.
This course will consider the development of Jewish American fiction over the past century through an examination of major authors and topics, with particular attention to novels whose historical trajectories reach geographically back and forth from America to Europe, and temporally back and forth across the Holocaust, the century’s defining event. These novels thus frequently have multiple settings and treat familial, communal, and intellectual life, along with topics such as emigration, anti-Semitism, and religious belief, over a span of several generations. The list includes authors whose works first appeared in Yiddish (Lamed Shapiro and Isaac Bashevis Singer) and authors whose sensibilities are decidedly American, but all write with attention to the tenuous assimilation, dislocation, trauma, and linguistic complexity that often marked twentieth-century Jewish life, no less in the United States at times than in Europe. Works studied will include: Dara Horn, In the Image; Rebecca Goldstein, Mazel; Bernard Malamud, The Fixer; Lamed Shapiro, The Cross and Other Jewish Stories; Isaac Bashevis Singer, Shosha; Cynthia Ozick, The Shawl; Nicole Krauss, A History of Love; Jerzy Kosinski, Steps; Philip Roth, Nemesis; Shalom Auslander, Hope: A Tragedy: A Novel

Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.333. Restoration and 18th Century Literature. 3.0 Credits.
This course is a survey of the major authors and genres in English from 1660-1800. Topics include the rise of the novel, politics and satire, gender and women writers, landscape and ecological consciousness, philosophy, science and literature.

Prerequisites: AS.060.107
Instructor(s): J. Kramnick
Area: Humanities
Writing Intensive.

AS.060.334. Victorian Modernity. 3.0 Credits.
This course will study the idea of modernity, a term that has been of continuing use in trying to understand ourselves and our society. We will focus on the major works of prose and poetry that attempted to come to terms with modernity in Victorian Britain. Texts are likely to include non-fiction prose by Mill, Arnold, Darwin, Nightingale, and Pater; Eliot's novel Middlemarch; and poetry by Elizabeth Barrett and Robert Browning, Tennyson, Emily Bronte, Christina Rosetti, Hopkins, and Hardy.

Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.335. James Joyce. 3.0 Credits.
A seminar covering the oeuvre of James Joyce, including but not limited to Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and parts of Finnegans Wake. Selected readings in other writers and in relevant historiography; some attention to Joyce criticism.

Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.336. Jewish American Fiction. 3.0 Credits.
This course will consider the development of Jewish American fiction over the past century through an examination of major authors and topics, with particular attention to novels whose historical trajectories reach geographically back and forth from America to Europe, and temporally back and forth across the Holocaust, the century's defining event. These novels thus frequently have multiple settings and treat familial, communal, and intellectual life, along with topics such as emigration, anti-Semitism, and religious belief, over a span of several generations. The list includes authors whose works first appeared in Yiddish (Lamed Shapiro and Isaac Bashevis Singer) and authors whose sensibilities are decidedly American, but all write with attention to the tenuous assimilation, dislocation, trauma, and linguistic complexity that often marked twentieth-century Jewish life, no less in the United States at times than in Europe. **AS.060.338. Literary Scenes. 3.0 Credits.**
From Paris in the 1920s to San Francisco in the 1960s and beyond, this course will cover literature produced within major and minor literary "scenes" of the 20th Century. Authors include Hemingway, Stein, Woolf, Ginsberg, Kerouac, and others. Dean's Teaching Fellowship course.
Instructor(s): A. Zecca
Area: Humanities
Writing Intensive.

**AS.060.339. Lunatics, Lovers, Poets: Obsessive Minds in Romantic and Victorian Verse. 3.0 Credits.**
Focusing on the long nineteenth century, we will examine how major Anglo-American poets treat the complex relationship between madness, passion, and genius. Additional readings in philosophy and psychoanalysis. Dean's Teaching Fellowship course.
Instructor(s): J. Hann
Area: Humanities
Writing Intensive.

**AS.060.340. The Literature of Atlantic Slavery. 3.0 Credits.**
This seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban antislavery novels, slave narratives, and "classics" of American literature like Melville's Benito Cereno. We will consider how the institution of Atlantic slavery was variously represented, justified, and criticized, discovering in the process the deep structures of modern slavery discourse. Texts may include: Aphra Behn, "Oroonoko"; John Woolman's "Journal"; Robert Wedderburn, "The Horrors of Slavery and Other Writings"; Gertrudis Gomez de Avellaneda, "Sab"; Frederick Douglass, "My Bondage and My Freedom"; Herman Melville, "Benito Cereno"; Harriet Beecher Stowe, "Dred"; Antonio Castro Alves, "The Slaves".
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

**AS.060.341. Milton. 3.0 Credits.**
This class will study Milton's poetry and prose across the whole of his writing career, with special attention to Paradise Lost, the great epic poem retelling the story of the fall of humankind. We will consider Milton's literary background, his contemporary political and social milieu, as well as critical debates that surrounding the poet, who was accused of being 'of the devil's party.' Pre-1800 course.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

**AS.060.342. Contemporary Novel of Ideas. 3.0 Credits.**
The novel of ideas is often traced to 18th century French or 19th century Russian writing, but it has come broadly to signify works of robust philosophical contemplation. The inherently slippery term seems to indicate a work in which "form" is subsidiary to "content," or at least, in which narrative structures adapt to prioritize thought rather than style, image, or even character. But how, exactly, and about what, do novels "think?" In large part, the novel of ideas is now conflated with a rote and recognizable brand of social realism. This course asks what might qualify as a novel of ideas today, both in terms of the novel's changing relation to geographical space (and thereby the formal spaces in which philosophy might lurk), and of the particular "ideas" it critiques or puts forth. We will read novelists including J.M. Coetzee, Marlene van Niekerk, Jonathan Franzen, Teju Cole, and Ronan Bennett within a longer literary-philosophical tradition, with reference to works such as Candide, War and Peace, Thus Spoke Zarathustra, and Kierkegaard's Diary of a Seducer.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

**AS.060.343. Milton and Liberty: Public and Private. 3.0 Credits.**
This course examines John Milton's commitment to liberty in its many varieties, both public and private, as articulated in his early prose writings and as imagined in his poetic works. Dean's Teaching Fellowship Course. Pre 1800 course.
Instructor(s): R. Buckham
Area: Humanities
Writing Intensive.

**AS.060.344. The American Renaissance in Technicolor. 3.0 Credits.**
The American Renaissance" refers to the boom in U.S. literary production between the 1830s and the 1860s that gave us the American writers who have achieved the greatest stature in the popular mind—Emerson, Thoreau, Hawthorne, Melville, Whitman. This work was in large part animated by literary nationalism—by the self-conscious effort to produce a distinctively "American" literature that could take its rightful place on the world stage. As such, questions about the meaning of American history and the nature of American identity were central to this work both as implicit impetus and explicit theme. Importantly, these questions were being asked during the heyday of "Manifest Destiny"—of Euro-American westward expansion, which displaced Native peoples and Hispanic settlers and perpetuated the enslavement of African Americans. The goal of this course is to read some of the major works of the period's canonical Euro-American male writers in conjunction with works by African, Native, Latino, and female American writers in order to gain a fuller picture of literary and cultural history during this formative moment. Texts may include: Ralph Waldo Emerson's essays and anti-slavery lectures; the anonymous historical romance of the Aztec conquest, Xicotencatl; William Apeess, A Son of the Forest, "Eulogy on King Philip"; Frederick Douglass, My Bondage and My Freedom; Henry David Thoreau, Walden, "Slavery in Massachusetts"; "Plea for Captain John Brown"; Harriet Beecher Stowe, Uncle Tom's Cabin; Herman Melville, "Hawthorne and His Mosses"; Benito Cereno, Moby-Dick; Nathaniel Hawthorne, tales and sketches, The Blithedale Romance; Walt Whitman, Leaves of Grass (1855 edition).
Prerequisites: AS.060.107 or English department lecture, or instructor permission.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.
AS.060.345. Mapping Victorian England. 3.0 Credits.
The landscape of England changed dramatically during the course of the nineteenth-century, from the unprecedented expansion of the British Empire and the rapid growth of cities and urban environments, to the increasing psychological investment in more confined spaces like the home. In this course, we’ll explore how Victorian literature “maps” these various spaces and, perhaps more importantly, the connections between them. The bulk of our reading will be novels by authors such as Charles Dickens, Elizabeth Gaskell, George Eliot, Anthony Trollope, Thomas Hardy, and Rudyard Kipling, though we’ll also turn to poems, non-fiction prose, and short theoretical readings to enrich our understanding of how Victorian writers attempted to represent the spatial, social, and economic geography of their nation. In addition to examining the “horizontal” connections drawn by these novels—between, for example, the country and the city, the colonies and the capital, the home and the nation as a whole—we’ll also explore how these novelists draw on intellectual developments like the emerging Darwinian worldview and incorporate what we might call “vertical” mapping to understand how the past shapes the present. Throughout, we’ll pay careful attention to how these writers represent the specificity of place and investigate the influence of environment on character and personal development.
Instructor(s): A. Grener
Area: Humanities
Writing Intensive.

AS.060.346. The American Romance. 3.0 Credits.
Reviewers in the nineteenth century noted that narrative fiction on either side of the Atlantic seemed to be moving in different directions—the social-realist panoramas of Charles Dickens and George Eliot were confronted by the metaphysical puzzle-boxes, allegorical curios, and sentimental interfaces of Edgar Allan Poe, Nathaniel Hawthorne, Herman Melville, Lydia Maria Child, and Harriet Beecher Stowe. In the period, this divergence was often characterized by reference to a generic or modal distinction between the novel—the very name of which advertised its modernity—and the romance, which was associated with medieval literary traditions. British novelists sensibly confined themselves to representing and anatomizing that which was probable in contemporary social reality, whereas American romancers insisted on violating verisimilitude via flights of fancy (e.g., deathless black cats and white whales), whether out of political activism, aestheticist indulgence, or esoteric exploration. The twofold objective of this course is, first and foremost, simply to engross ourselves with a series of compellingly weird narrative fictions by American writers that self-identify as—and self-consciously theorize—modern romance—a reward in itself; and, second, to trace the history of the romance/novel distinction from early nineteenth-century reviews to contemporary criticism, discovering in the process the cultural work this distinction—and its elision—has been made to do. Primary texts may include: Lydia Maria Child, Hobomok; Catharine Maria Sedgwick, Hope Leslie; Edgar Allan Poe, tales, Narrative of Arthur Gordon Pym; Nathaniel Hawthorne, tales, The House of Seven Gables, The Blithedale Romance; Herman Melville, Mardi; Harriet Beecher Stowe, The Minister’s Wooing.
Prerequisites: Pre-req: AS.060.107 or permission of the instructor.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.347. American Bibles. 3.0 Credits.
This course will examine texts drawn from across the Americas—from Mather’s Magnalia Christi Americana to Melville’s Moby-Dick to Euclides da Cunha’s Os Sertões (Rebellion in the Backlands) to Kushner’s Angels in America—that are fundamentally biblical in their inspirations, aspirations, proportions, and allusions. We will consider these texts’ attempts, in the face of globalizing and secularizing forces like Atlantic slavery and German higher criticism, to affirm, undermine, appropriate, and redirect the authority of the ur-canonical text. Recommended Course Background: AS.060.107 or lecture course in English department.
Prerequisites: AS.060.107 or a lecture course in the English department.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.348. Virginia Woolf and Bloomsbury. 3.0 Credits.
An exploration of the achievements and investments of one of the most influential coteries in the history of Britain. In addition to delving into key fictions by Virginia Woolf, we will examine novels by Leonard Woolf and E. M. Forster, art criticism by Roger Fry and Clive Bell, biographical essays by Lytton Strachey, economic writings by John Maynard Keynes, and poetry by T. S. Eliot.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.349. Clint Eastwood, Race, and the American Western. 3.0 Credits.
Drawing from the body of work reflecting the Hollywood gunfighter and outlaw folk-hero Clint Eastwood, the course will investigate American cinematic representations of slavery (and more specifically its absence), the Civil War and racial formation along the United States’ southwestern frontier in films produced from the 1950s through the contemporary period. A focus on the cultural icon Clint Eastwood enables a close examination of American cinematic fantasies of the frontier, frontier violence and the desire to escape or erase the tensions of race and slavery that have deeply permeated the American cultural consciousness, particularly the creation of American masculine ideals. The course will also take decided note of the national shift from liberal “Great Society Programs” of the 1960s to the conservative “neoliberal” social and cultural ideals in the 1980s and 1990s. Our purpose is to consider the organization and reformation of hegemonic power by way of the complex morality play the western film evokes, typically considering the interstitial geographies between civilization and savagery, belonging and alienation, and metropolitan and colonial outpost. We will privilege in our discussions the contested frontiers of racial dominion. The curriculum is complicated by several significant points of departure from the traditional category of the Hollywood-based American western: a film to frame the question of colonialism and resistance, as well as examples of black cinematic efforts re-drawing boundaries of the racial frontier. (Are they formed at the Caribbean, the easternmost littoral? The postindustrial city? Do they correspond to the romance of organized crime and its fantasy of empire?)
Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.
AS.060.350. Literature by Other Means: Experimental and Conceptual Fiction and Poetry. 3.0 Credits.
This course will introduce students to experimental, conceptual, and constraint-generated literature. In some cases, the texts we will read were created through the application of some particular premise, constraint, or rule-governed system. In other cases, practices of appropriation, creative re-use, or sampling were involved in the generation of textual material (sometimes subjected to editing and transformation, sometimes presented “as is”). What happens to literary meaning, genre identification, and the author/reader contract under these conditions? Can an experiment be evaluated as a success or failure as literature? What’s so “conceptual” about this practice, anyway? And why are the results-often typecast as difficult or resistant to understanding- frequently so funny? In search of answers, we will read widely in experimental and conceptual literature and in the manifestos and critical analyses that surround this work, and we will look at the overlap between experimental and avant-garde literary movements and concurrent processes of “dematerialization” in play within the related domain of the visual arts. Finally, we will consider the importance of digital tools, search engines, and databases in the construction of experimental literature at the present time. Possible authors/texts include Raymond Queneau “Exercises in Style”, Raymond Roussel “How I Wrote Certain of My Books”, Georges Perec “A Void”, Harry Matthews “Oulipo Compendium”, Walter Abish “Alphabetical Africa”, Marjorie Perloff “Unoriginal Genius”, William S. Burroughs “The Cut-Up Method”, Charles Bernstein, “The L=A=N=G=U=A=G=E Book”, Vanessa Place “Notes on Conceptualisms”, Kenneth Goldsmith “The Weather”, Gary Sullivan “The Flarf Files”, Aaron Kunin “The Sore Throat”, Christian Bok “Eunoia”, and David Trinidad and D. A. Powell’s “By Myself, An Autobiography”.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.

AS.060.351. Theory of the Novel. 3.0 Credits.
We all know a novel when we see one, but it’s surprisingly hard to say just what one is. This seminar will introduce the theory of the novel by reading a number of novels along with the works of central thinkers about the novel. We will look at the connection of the rise of the novel form with historical and cultural changes and investigate key stylistic elements. Novelist will likely include Miguel de Cervantes, Johann Wolfgang von Goethe, Jane Austen, Gustave Flaubert, and Virginia Woolf.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.352. John Keats’ Guide to City Living. 3.0 Credits.
This course will take John Keats’ poems and letter as a guide to London in the 1810’s; from the anatomy theaters of the hospitals where he trained, to the raucous parties and poetry slams of his radical literary friends; from museums and theaters to brothels and sickrooms. Keats’ intensely sensual poems are at once bookish and attuned to his environment: they provide lessons on how to abide in a large urban center. For his writing is intensely urban, even when it ventures far from the gloom of the metropolis. Reading the letters he wrote to his brother on the (then-) frontier in Kentucky, we can find yet another key to how he shaped London. We will look at maps of the city, see where the new housing developments were being constructed as old buildings were torn down, visit the jail where his friend, Leigh Hunt, was incarcerated for ridiculing the Prince Regent, see the theater posters and pamphlets Keats saw, as well as the parks and squares he could not enter. The goal for this course is to learn about Keats’ work, but also to try to reconstruct how his city looked and sounded and felt and what, finally, it meant to the poet. Ideally, the course will collectively create a digitized map of Keats’s London that serves as well as a guide to his poems.
Prerequisites: Pre-req: AS.060.107
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.353. World Literature in Theory and Practice. 3.0 Credits.
This course takes stock of how the current hot topic of “world literature” has evolved from Immanuel Wallerstein’s work on world-systems theory over the course of the last three decades. We will read work by a wide range of literary critics engaged with the topic of world literature, including Franco Moretti, Pascale Casanova, David Damrosch, Emily Apter, and Alex Beecroft, as well as major “world” novels by Herman Melville, Amitav Ghosh, and Chimamanda Adichie. Students will also be introduced to critical approaches that offer a conceptual alternative to the world literature framework, for example, Edward Said’s ideas on worldliness and contrapuntalism, Gaston Bachelard’s phenomenology of the home, Fredric Jameson’s concept of cognitive mapping, and Eric Hayot’s work on literary “world-creation.” We will ask just how broadly the field can be defined before it loses its critical cohesion. In other words, does world literature exist?
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.355. Eighteenth Century British Literature. 3.0 Credits.
This course surveys major authors, genres, and literary movements from 1690-1800. Topics to be discussed include the gendered division of labor, ecological consciousness, British imperialism, the rise of capitalism, and the relation between literary and material labor. We will be reading a variety of texts in poetry, prose, drama, and the novel from authors including Alexander Pope, Daniel Defoe, Jonathan Swift, Eliza Haywood, Stephen Duck, Mary Collier, Mary Leaper, Samuel Richardson, Thomas Gray, Oliver Goldsmith, William Wordsworth, Anna Laetitia Barbauld, and William Blake. Texts will be supplemented with historical, philosophical, and theoretical materials where appropriate. A pre-1800 course.
Instructor(s): K. O’Brien
Area: Humanities
Writing Intensive.
AS.060.355. Gordimer and Coetzee: Politics and Form. 3.0 Credits.
A comparative study of major works by the South African Nobel Laureates Nadine Gordimer and J.M. Coetzee. Special attention to critical essays by both writers about each other, as well as about issues of shared historical and literary concern. Topics will include the role of the public intellectual in apartheid-era South Africa, competing scales of literary reception and evaluation (e.g. national, international, and universal), and the relationship between politics, form, and genre.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.357. The Novels of Jane Austen. 3.0 Credits.
An intensive study of Austen’s six major novels, read in their literary and historical context.
Instructor(s): J. Kramnick
Area: Humanities
Writing Intensive.

AS.060.358. Prophecy and Enlightenment. 3.0 Credits.
This class considers the relationship between prophecy and enlightenment. These two knowledge regimes, the revelatory and the rational, are often assumed to be opposed, with rationality triumphing over revelation in the seventeenth and eighteenth centuries. In recent years, notably post-9/11, we have seen a resurgence of this view from a variety of perspectives, whether that of the new atheism or that of historians of enlightenment. We will turn to a number of important primary texts associated with major enlightenment thinkers in order to interrogate more closely the opposition of prophecy and enlightenment at the point of its supposed origin. Doing so should help at once to clarify and complicate the important contemporary narrative pitting science against religion and vice versa. Later in the semester, we will turn to a number of twentieth-century thinkers who bring quite different perspectives to the role of revelation in the history of reason. Pre-1800s course.
Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.359. Posthumanist Literature. 3.0 Credits.
Much of the attention surrounding posthumanism has centered upon a late twentieth-century archive of speculative fiction. This 300-level course would take a longer view, tracing a prehistory of literary and critical discourses that challenge the distinction between humanity and its nonhuman others from the late enlightenment to the present day. Students will begin with sections from Jonathan Swift’s Gulliver’s Travels and A Modest Proposal, then progress through texts that link the humanist themes of exploration and conquest to problems of consumption and divergent forms of life, including Herman Melville’s Typee and Thomas M. Disch’s The Genocides. Next they will turn to the link between the bildungsroman, human enhancement, and the concept of "bare life." Readings in this section include Neal Stephenson’s The Diamond Age, Philip K. Dick’s Do Androids Dream of Electric Sheep, Franz Kafka’s "The Hunger Artist," and Primo Levi’s If This Is a Man. We will then consider the link between "monstrosity," hetero-normativity, and sexual abjection. Readings include Mary Shelley’s Frankenstein, James Baldwin’s Another Country, and Margaret Atwood’s Handmaiden’s Tale. The course will conclude with two units on posthuman ethics. The first of these, on the concept of "singularity," will include J.G. Ballard’s The Drowned World and William Gibson’s Neuromancer. Finally, students will consider what Donna Harraway has termed "companion species," with readings to include Franz Kafka’s The Metamorphosis and J.M. Coetzee’s Elizabeth Costello. Critical readings will include selections from Katherine Hayles, How We Became Posthuman; Donna Haraway, “A Cyborg Manifesto”; Friedrich Nietzsche, Human, All too Human; Michel Foucault, The History of Sexuality, vol. I; Giorgio Agamben, The Coming Community and Homo Sacer; Jean Jacques Rousseau, Émile; H.G. Wells, Anticipations and Mankind in the Making; Nick Bostrom, Human Enhancement and Global Catastrophic Risks; Alan Weisman, The World Without Us; Peter Singer, Animal Liberation; J.M. Coetzee, The Lives of Animals; and introductory essays by Andy Miah and Neil Badminton.
Instructor(s): J. Haley
Area: Humanities
Writing Intensive.

AS.060.362. Art and the Arab Spring. 3.0 Credits.
Much has been made of the political ramifications of the Arab Spring: the potential move towards democratic representation, the realization of minority and gender rights, the economic liberalization of markets, the jockeying by world powers to assert influence in the region, and the revitalization of dissident movements. This course will turn its attention to the role of artistic representation in the Arab Spring in order to complicate these political discussions. We will explore widely, considering works of prose, poetry, film, music, performance art, and visual art, from photography to graffiti. We will think through how these mediums are used and to what end, whether as evidence of atrocities, as inspiration and mobilization of dissent, as satirical commentary, or to revitalize appreciation for artistic expression. We will also think about the impact of social media on distribution possibilities and implied audience and track how certain art forms invoke and are invoked by liberal or conservative discourses in complex ways.
Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.
AS.060.363. Henry James. 3.0 Credits.
This seminar will focus on the novels and short fiction of one of the most brilliant craftsmen of prose and plot ever to write in English. Extensive attention will be devoted to the intricacies of James's language; to his transatlantic situation; to his relationship to other authors; and to his place in the history of literature, criticism, and theory. In a few instances, we will read his work in relation to writing by his brother, the pioneering philosopher and psychologist William James.
Instructor(s): D. Mao
Writing Intensive.

AS.060.365. Literature and Modern Philosophy. 3.0 Credits.
Does literature have moral value? How might we begin to answer such a question? This course will survey major attempts by both writers and philosophers to understand the relation between morality and literature, especially fiction. Course will be taught by incoming professor Andrew Miller.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.366. Ellison. 3.0 Credits.
After his landmark novel "Invisible Man" appeared in 1952 and won the National Book Award, Ralph Ellison was one of the most highly regarded and influential American writers. Although his writing—beginning with the powerful short stories and criticism that he published in the 1930s and 40s—was steeped in African American history, literature, music, and folklore, he also thought of himself as part of the great tradition of American, European, and classical literature, from Homer through Joyce. He quickly set to work on a second novel dealing with the assassination of a racist senator during the height of the Civil Rights movement, but he came to the end of his life in 1994 without having completed the novel to his own satisfaction. This massive book, which appeared posthumously in a very abbreviated form as Juneteenth and more recently in the much longer Three Days before the Shooting, reveals the work of a master while at the same time it leaves critics and readers with an exceptional puzzle: What would his final intention have been? Why was he unable to complete the novel? How does it speak to the key issues of African American identity freedom, and the American ideal that Ellison grappled with all his life? At the same time that he worked on his second novel, Ellison became one of the most prolific and important essayists of the twentieth century; and wrote brilliantly about American race relations from the era of segregation through the twentieth century. Even as he was celebrated by the literary establishment, however, Ellison at times found himself as odds with younger black writers and thinkers who felt that public activism, not just artistic greatness, was required of the African American writer. Using Ellison as a lens through which to see the course of American race relations from slavery to the present, the course will include study of all of Ellison's major work: the short stories collected in "Flying Home"; "Invisible Man"; the essays collected in "Shadow and Act" and "Going to the Territory", as well as others; and "Three Days before the Shooting".

Writing Intensive.

AS.060.370. The Nineteenth Century Novel. 3.0 Credits.
In this course we will read some of the most significant—and enjoyable—of nineteenth-century novels, focusing on the questions they presented for their first readers and present for readers today. Our focus will be on the technical means by which the novelists achieve their effects. How do they convey the thoughts and feelings of their characters, for instance? How do they represent the interactions between their characters within broader social environments? How do these novels represent history? How do they represent different genders? By means of what literary devices do they do all this? Our aims in the course will be to understand the fiction of the period and to see how the devices used by these authors to conceive their psychological, ethical and political worlds continue to inform our conception of our world.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.373. Literary Theory. 3.0 Credits.
Two great arguments structure literary criticism and theory: what makes something literature, and what makes something good literature? These arguments will surely never end; but to participate in them can be a great pleasure, and it can sharpen your appreciation of literary writing across the ages. This course will introduce you to the long conversation that has come to be called "literary theory," with the aim of helping you learn to love not only reading literature, but describing it. Our readings will range from Plato and Aristotle to Kant, Hegel, and Scheiermacher, on to Marx, Freud, and Nietzsche, and finally to a range of recent thinkers.

AS.060.376. Staging Church and State in Early Modern England. 3.0
Credits.

Freedom of religion and the separation of church and state are among
the fundamental principles of modern western government, and yet they
are frequently misunderstood. Why would people believe they have a
mandate from God to grant freedom of worship to religious minorities?

Perhaps the most influential moment in modern letters, the Romantic
period not only straddled the age of democratic revolutions, abolition,
mass media and industrialization, it ushered in the modern concept
of Literature and its social role. Among the most pressing issues of
Romantic poetry were those related to representing, speaking for
and speaking to an imaginary creature called The People, not wholly
commensurate with that other imaginary creature, The Nation or its
Citizens. So for instance, the Ballad revival of the period brought into print
the ancient songs of “the folk,” but the movement was riddled with fakes
and forgeries. Rising literacy inspired working class poets, women and
ethnic minorities to reshape the English language through poetry. Yet at
the same moment, literary gentlemen began to produce their own version
of a marginalized and dispossessed “people.” All these efforts can be set
against a State effort to introduce the first national census, to account
for all subjects of the crown. A struggle over who “counts” in the realm
of literature clashed with fights over political institutions and the new
science of political economy.

AS.060.381. 2500 Years of Tragicomedy. 3.0 Credits.
Spanning an arc from ancient Greek drama to the bleeding edge of contemporary literature, this course gathers together representative examples of a hybrid dramatic mode which has been derided by philosophers and dramatic theorists but beloved by audiences for millennia: tragicomedy. Variously understood as a comic play with dark elements or a dark play with a happy outcome, tragicomedy raises challenging questions about the nature of genre taxonomy, and the slippery relationship between authorial “tone,” artistic intention, and emotional temperament. As such, tragicomedies offer a particularly revealing insight into both the history of drama and philosophical questions about the nature of spectatorial pleasure. Grounding ourselves with a reading of Aristotle’s Poetics and a consideration of Plautus’ “Amphitryon”, we will read a broad swathe of plays divided evenly between a first half which focuses upon the ancient and early modern period and a second half focusing on the last century, possibly including: Euripides “Alcestis”, Christopher Marlowe “The Jew of Malta”, Anonymous, “Arden of Faversham”, William Shakespeare “Hamlet” and “All’s Well That Ends Well”, John Fletcher “The Faithful Shepherdess”, John Dryden “The Maidens Queen”, Samuel Beckett “Endgame”, Tom Stoppard “Rosencrantz and Guildenstern Are Dead”, Harold Pinter “The Caretaker”, Joe Orton, “The Erpingham Camp”, Young Jean Lee “The Shipment.” Pre-1800 course.

AS.060.383. Contemporary Russian Novel in English. 3.0 Credits.
Russia is back in the headlines, and its resurgence seems unlikely to waver anytime soon. But while many students are familiar with nineteenth-century novelists like Tolstoy and Dostoevsky, more recent Russian writing is often a mystery. This course approaches contemporary Russian through the careers of its two major living novelists, Vladimir Sorokin and Ludmila Ulitskaya, both of whose work spans the late Soviet period (1980s and 90s) through today. In addition to questions of genre, translation, and contemporary Russian literary culture’s relation to Soviet models, we will consider how Sorokin and Ulitskaya have brokered Russia’s intellectual standing on a world stage. Works studied will include Ulitskaya’s Sonechka, The Funeral Party, and Daniel Stein, Interpreter, and Sorokin’s The Queue, Day of the Oprichnik, and The Blizzard.

AS.060.387. Black Empire. 3.0 Credits.
This course examines the transnational visions of Black Empire as articulated and framed by black thinkers, writers, and visual artists around the world, roughly between 1850 and 1950. We will consider how both individuals and groups (such as the United Negro Improvement Association) responded to imperialist maneuvers through discourses of Ethiopiaism, Pan-Africanism, and anti-colonialism, and how these discourses interacted with one another in surprising ways, ways that reveal the black world’s simultaneous attraction to and rejection of the imperial model in the nineteenth and twentieth centuries. Our reading will include novels, poems, essays, and critical texts—at least two of which share a title with this course—by W. E. B. Du Bois, Pauline E. Hopkins, Sutton E. Griggs, J. A. Rogers, Langston Hughes, George S. Schuyler, Claude McKay, Brent Hayes Edwards, Paul Gilroy, Wilson Jeremiah Moses, Michelle Ann Stephens, and others.

AS.060.391. Early American Literature. 3.0 Credits.
This course is an introduction to literatures drawn from across the Americas, although primarily the British North American colonies that would eventually become the United States, from first contact in 1492 up through the American wars of independence. Our readings are roughly organized according to chronology and genre. We will think about the adapted and emergent generic forms through which “the New World” was ongoingly invented, including genres like the Indian captivity narrative and the slave narrative that arguably make their debut in world literary history in the Americas during this time frame. We will conclude by attending to the rather late emergence of the novel in American literary history, reading four novels that appeared in the early US national period. The objective of the course is simply to contextualize and analyze a wide array of texts, each of which richly rewards the engaged reader, in order to trace the origins of American literatures. Course texts may include contact narratives (Columbus, Caminha, Smith, Hennepin); conquest narratives (Mather, Las Casas, Poma de Ayala); Indian captivity narratives (Cabeza de Vaca, Rowlandson, Staden); slave narratives (Gronniosaw, Jea, Cugoano); revolutionary polemics (Paine, Bolívar); and the earliest American novels: William Hill Brown, The Power of Sympathy; Hannah Webster Foster, The Coquette; Leonora Sansay, Secret History or, the Horrors of Santo Domingo; Charles Brockden Brown, Arthur Mervyn. Fulfills the pre-1800 requirement.
Instructor(s): J. Hickman

Writing Intensive.

AS.060.392. Reading Ayn Rand. 3.0 Credits.
This course will investigate Ayn Rand, both as a novelist and as an enormously influential thinker. Special attention will be paid to the Soviet and American contexts that produced Rand’s work, as well as her place in a lineage of conservative thought, and the influence she has had on American politics. The approach of this course will be critical, but, I hope, fair. Readings will likely include Anthem and Atlas Shrugged, as well as selections from Rand’s philosophical works: Capitalism: The Unknown Ideal and The Virtue of Selfishness.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.393. Geoffrey Chaucer: Ribaldry, Romance and Radical Religion. 3.0 Credits.
Geoffrey Chaucer is sometimes called the ‘father of English literature’, but the deftness with which he captured the variety of the human condition, in poetic forms that were each, in themselves, startlingly new, was in so many ways an inheritance too rich for literary tradition to absorb. One reason to return to Chaucer’s writing now is to see how funny (and even obscene) verse narrative can be, and how compelling a fourteenth-century love story remains. It is also to open a window onto a culture entirely different from our own but in which the power of language (the role of free speech), the freedom of the individual, the status of women, violent tensions between cultures and ethnicities and the role of religion in civil society were not only topical, but made the more so by Chaucer’s powerful political vision and thought. Chaucer is timeless because he wrote so well that he always rewards reading (and the Middle English in which he wrote is very easy to master) but he is always worth reading because reading him is at once so eye-opening and such a pleasure, a way of stretching one’s sense of the present by understanding (really understanding) a particular moment in the past. This class will pursue such understanding by paying particular attention to Chaucer’s masterpieces, Troilus and Criseyde and The Canterbury Tales. But we will begin with a quick and easy workshop on Chaucer’s language, and try to define, along the way, some of the more interesting aspects of his style. Our goal will be to learn to enjoy Chaucer’s poetry by reading it carefully enough to take the full measure of what exactly it was about. Recommended Course Background: AS.060.208

AS.060.394. Class Fictions. 3.0 Credits.
This seminar investigates one of the central concerns of nineteenth-century fiction: social and economic class. Why did raising oneself from humble beginnings and falling into poverty, become such familiar stories? And why are they still so familiar today? We will look at how a number of writers approached the topic of class mobility, each with a unique blend of excitement and anxiety. Authors will likely include Jane Austen, Honoré de Balzac (in translation), Charles Dickens, and William Dean Howells. In order to understand our topic better, we will also look at a selection of theoretical work on the nature of class.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.
AS.060.395. Global Tales of Transformation. 3.0 Credits.
A traveling salesman turns into a giant cockroach, an American adman switches bodies with his wife, a Brazilian philosopher may or may not be reincarnated as his beloved dog, and a British scientist creates half-animal humanoids on a secluded island. These are just a few examples of the fantastical, allegorical, comical, dreamlike, grotesque, and bizarre stories that were produced throughout the world during the modernist period. Modernism has often been associated with social and political change; colonial rule was waning, cosmopolitanism emerging, and new modes of production were affecting social organization. In literature, modernist authors broke from the realist style and turned instead to myths, folktales, and new forms of expression. In this class, we will consider a range of cultural and historical conditions that inform these stories of transformation. Do these stories reveal anxieties about dehumanization in an increasingly high-pressure workplace or do they reveal fantasies about idleness? Are they nostalgic for a local folkloric tradition in an age of cosmopolitanism or are they creating a kind of mythic universalism? How do these character transformations allow for reassessments of identity in terms of gender construction, sexuality, or in terms of human and animal relations? Authors include: Edgar Allan Poe, Nickolai Gogol, Franz Kafka, H. G. Wells, Virginia Woolf, Rebecca West, Machado de Assis, T. S. Eliot, Charlotte Gilman Perkins, Thorne Smith, and James Joyce. Throughout the semester, the primary texts will be supplemented with secondary reading and critical interpretations. Primary Texts: Machado de Assis, "Philosopher or Dog" T. S. Eliot, "The Wasteland" Charlotte Gilman Perkins, "Herland" Nikolai Gogol, "The Nose Franz Kafka, "The Metamorphosis" Ovid, selections from "Metamorphoses" Edgar Allan Poe, selections Thorne Smith, "Turnabout" H. G. Wells, "Island of Dr. Moreau" Rebecca West, "The Return of the Soldier" Virginia Woolf, "Orlando"

AS.060.509. Senior Essay. 3.0 Credits.
The English Department offers qualified majors the option of writing a senior essay. This is to be a one-semester project undertaken in the fall of the senior year, resulting in an essay of 30-35 pages. The senior essay counts as a three-credit course which can be applied toward the requirements for the major. Each project will be assigned both an advisor and a second reader. In addition, students writing essays will meet as a group with the Director of Undergraduate Study once or twice in the course of the project. The senior essay option is open to all students with a cumulative GPA of 3.8 or higher in English Department courses at the end of the fall term of their junior year. Project descriptions (generally of one to two pages) and a preliminary bibliography should be submitted to a prospective advisor selected by the student from the core faculty. All proposals must be received at least two weeks prior to the beginning of registration period during the spring term of the junior year. Students should meet with the prospective advisor to discuss the project in general terms before submitting a formal proposal. The advisor will determine whether the proposed project is feasible and worthwhile. Individual faculty need not direct more than one approved senior essay per academic year. Acceptance of a proposal will therefore depend on faculty availability as well as on the strength of the proposal itself. When completed, the senior essay will be judged and graded by the advisor in consultation with the second reader. The senior essay will not be part of the Department’s honors program, which will continue to be based solely on a cumulative GPA of 3.6 in English Department courses.

AS.060.598. Internship - English. 1.0 Credit.
Instructor(s): Staff.

AS.060.606. Renaissance Comedy.
Why is comedy so easy to enjoy and so hard to think about? Is “the comic” a genre, a mode, an affective state, a social practice, or none/all of the above? What does comedy have to do with the body? What does it have to do with social location? What historical accidents, psychological barriers and cultural taboos must be re-considered in order to address these questions? Starting from classic texts in genre theory and psychoanalysis, this course try to put Aristotle and Freud into dialogue with recent early modern critical scholarship on affect, drama and the body. Possible texts/authors include: Aristotle’s Poetics; Sigmund Freud, Jokes and Their relation to the Unconscious; Rosalie Colie The Resources of Kind; Gail Kern Paster, The Body Embarrassed: Drama and the Disciplines of Shame in Early Modern England; Will Stockton, Playing Dirty: Sexuality and Waste in Early Modern Comedy; Julia Kristeva, Powers of Horror. An Essay on Abjection; Alenka Zupancic, The Odd One In: On Comedy, and others. The historical spine of the course will be a weekly sequence of classical and early modern comic plays by Plautus, Terence, Aristophanes, Peele, Lyly, Shakespeare, Jonson, Beaumont, Wycherley, Etheredge, and Behn.
Instructor(s): A. Daniel
Area: Humanities.
AS.060.607. Lives and Afterlives of Anti-Humanism.
This seminar will offer a preliminary history of the 20th-century critique of "humanism" — a critique that has continued to take new forms, long after we might imagine humanism to have been laid to rest. Beginning with Heidegger and Karl Schmitt, we will spend time with Sartre, Althusser, the phenomenologists, and key post-structuralists, before moving on to the current variety of post- and anti-humanisms in philosophy (object-oriented ontology, speculative realism), and cultural and critical theory (eco-criticism and queer theory). Why has it been important to critique "humanism"? What is the ongoing appeal of making that critique? Instructor(s): C. Nealon Area: Humanities.

AS.060.608. The Idea of Tradition.
The idea of tradition — of a body from texts from the past that helps explain the genealogy of the present — is central to literary criticism, and indeed to all of the humanities. But where did we get the idea that the present could be understood best through texts from the past? Can we imagine a humanities without it? This course will look at the development of the idea of tradition in the eighteenth and nineteenth centuries. We will pay particular attention to the connections between the developing ideas of tradition and the changing forms of literary expression in those periods—particularly the developmental novel. Novelists will likely include Goethe, Scott, Austen, Eliot and James. In terms of theory we will pay particular attention to questions of historicity and presentism in historiography, hermeneutics and Marxist theory. Theorist will likely include Vico, Shaftesbury, Dilthey, Lukacs, Heidegger, Adorno, Horkeheimer, Gadamer, Jauss, Kosseleck, and T.S. Eliot. Instructor(s): J. Rosenthal Area: Humanities Writing Intensive.

AS.060.609. Extreme Criticism.
"How far can I go?" It is a question (memorably posed by Neil Hertz) of what we might call interpretive tact: what will your readers or listeners accept? How far can you take them with you as you enter into the interpretive possibilities that have come to matter to you, that you believe to be true, meaningful, important, interesting . . . ? When, eyes slowly unfocusing, do they start drifting away? That most of the critics we read are determinedly tactful is an occasionally dismaying thought. This seminar, by contrast, will engage the issue of interpretive tact by reading critics who might be thought to violate it. I'd like to think about the issue with a collection of interested students. Among the potentially tactless works we might discuss are Stanley Cavell's essay on King Lear, Laura Kipnis's Against Love: A Polemic T.J. Clark's The Sight of Death, Michael Fried's Flaubert's "Gueuloir," Avita Ronnell's Telephone Book (or perhaps her less extreme Stupidity), Roland Barthes' S/Z, Garrett Stewart's Reading Voices, Franco Morretti's Distant Reading, Lauren Berlant's Desire/Love, William Empson's Seven Types of Ambiguity, Lee Edelman's No Future, Barbara Johnson's "Bringing Out D. A. Miller" I'd be open to other suggestions by seminar members. Instructor(s): A. Miller Area: Humanities Writing Intensive.

AS.060.610. What is Reading?.
What is reading? The question is not meant metaphorically. "We take for granted," Mark Taylor writes, "our capacities to invent and interpret, and devote ourselves to exercising those capacities and publishing the results." Yet, he continues, "it is the capacities themselves that need explaining. Reading is not giving a reading . . . Giving readings is important and could be done better if we understood reading. . . . The most amazing phenomenon our profession confronts, and the one for which we have the least explanation, is that a reader can make sense of a text, and that there are certain regularities across the individual senses made of a given text" (Taylor 19). This seminar aims to bring us close to understanding the "most amazing phenomenon our profession confronts," drawing on recent work in cognitive psychology, history of the book, disability studies, and theories of media new and old. We will consider debates about modes of reading as different as paleography, Braille, and scanion, and reckon with the possibility of non-human reading. I hope to invite in faculty from Cognitive Science and Informatics, Disabilities Studies, Classics and Library Science to explain what they mean when they talk about reading. But the final goal of the seminar is to help us identify the importance of literary studies in that conversation. To what extent does the literary object teach us about reading?
Instructor(s): M. Favret Area: Humanities Writing Intensive.

AS.060.611. Early/Modern/Violence.
This course looks at the intertwining of the categories of secular and religious in the English literature of violence in the early modern period. Literary representations of, and meditations upon, violence will be considered in Spenser, Nashe, Marlowe, Milton and Behn. Early modern thinkers will include humanists, theologians and philosophers (Augustine, Ficino, Calvin, Hobbes, Spinoza, Locke). We will consider such topics as: How religion is (or is not) a 'transhistorical' category; how the Enlightenment's critique of religion was founded on the experience of the 'wars of religion'; the creation of religious Others; the connection between religion and the rise of the modern state; the war-peace distinction; the friend-enemy distinction; how the sacredness of human life is understood; the links between violence and humanitarianism (indeed, what is the human?); torture; 'violence' as a transhistorical category; the pairing of violence to justice. There will be engagement with contemporary thought of Arendt, Derrida, Benjamin, Zizek, Anidjar, Asad, Tilly, Virilio, Schmidt, Girard, Scarry, Taylor and others.
Instructor(s): S. Achinstein Area: Humanities.

AS.060.612. Poetry and Poetics After the Linguistic Turn.
This course is a survey of recent critical work on English-language poetry, mostly North American. Much of the work is by younger scholars. I have chosen to highlight this recent body of writing because I think that, taken together, it signals a shift away from what since the 1980s had been the dominant model for "reading" poetry, which was under the sign of "Theory." Readings will include work by Jasper Bernes, Joel Nickels, Nadia Nurhussein, Margaret Ronda, Daniel Tiffany, and others.
Instructor(s): C. Nealon Area: Humanities Writing Intensive.
AS.060.613. American Movement.
This seminar will examine representations of people in motion in U.S. writing from 1900 to the present. Migration, international and intranational, will be central to our study, but we will also consider other forms of travel, transits of authorial and readerly attention, the policing and pleasures of vagrancy, and predicaments of stasis in both primary texts and critical/theoretical work around mobility. Our syllabus is still in process, but authors and directors studied may include Henry James, Anzia Yezierska, Claude McKay, Gertrude Stein, Muriel Rukeyser, John Steinbeck, John Ford, Simone de Beauvoir, Victor Villaseñor, Juliana Spahr, and Jayne Anne Phillips.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

The field now known as “global Anglophone literature” has emerged from a complicated and rapidly advancing disciplinary lineage. A host of past and present recodings — including postcolonial, Commonwealth, Third World, global, transnational, world, and the Global South — provide a record of the wider profession’s anxieties in relation to non-Western literary traditions. This course prepares graduate students to be able to articulate some of the subtle differences in approach that this nexus of closely related terms may obscure, from the heyday of postcolonial theory in the 1980s and 90s to contemporary subfields like Indian Ocean studies. In addition to key critical texts by theorists including Edward Said, Gayatri Spivak, Franco Moretti, Peter Hallward, and Emily Apter, students will be introduced to some outstanding recent methodologies and critiques from the adjacent body of work on comparative literature.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.615. The Literary and the Secular.
Embedded in many theses of secularization is an implicit process of tropologization—the sign that secularization is underway is precisely when sacred forms and contents begin to circulate as figures unmoored from their original devotional contexts and thereby become subject to everything from blasphemous parody to heterodox elaboration to blasé immanetization, in a word, to the whims of the literary imagination. This seminar will examine theories of secularization that reflect and respond upon this tacit linkage of the secular and the literary and also trace crucial developments in the literary and intellectual history of Atlantic Romanticism (with a special focus on the distinctive genre of the American romance) that might offer alternative views of undeniable transformations perhaps ineffectively referred to the rubric of “secularization.” Secondary texts may include T.E. Hulme, “Romanticism and Classicism”; Carl Schmitt, Political Theology; Hans Blumenberg, The Legitimacy of the Modern Age; M.H. Abrams, Natural Supernaturalism; Charles Taylor, A Secular Age; Roberto Calasso, Literature and the Gods; Michael Kaufmann, “The Religious, the Secular, and Literary Studies”; Colin Jager, Unquiet Things: Secularism in the Romantic Age. Primary texts may include selected poetry of William Blake, Percy Shelley, Friedrich Hölderlin, and others; canonical theoretical definitions of the “romantic” from the Schlegels, Coleridge, etc.; Joseph Smith, The Book of Mormon; Edgar Allan Poe, Arthur Gordon Pym; Nathaniel Hawthorne, prefaces, selected tales, The House of Seven Gables, The Marble Faun; Herman Melville, Mardi; Harriet Beecher Stowe, Dred; Martin Delany, Blake or, the Huts of America.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.616. Milton.
A seminar covering the career of John Milton, including all his major poetry and much of his prose. There will be attention to the history of printing, publication and concepts of reading and writing, as well as to current issues and topics within early modern studies that bear on Milton (e.g. materialism, secularization, ‘surface’ reading, political theology, quantitative vs hermeneutic methods, actor-network theory). As such, the course will also be an introduction to various methods in early modern studies.
Instructor(s): M. Thompson; S. Achinstein
Area: Humanities.

AS.060.618. Modernism and Authenticity.
Could modernism as we know it have emerged absent anxiety about what it means really to live, really to feel, really to think? We will explore this question through a range of texts—long and short, fictional and non-fictional, poetic and in prose—by authors such as Friedrich Nietzsche, Oscar Wilde, Gabriele D’Annunzio, W. B. Yeats, T. E. Hulme, E. M. Forster, Mina Loy, T. S. Eliot, F. T. Marinetti, Gertrude Stein, Virginia Woolf, William Carlos Williams, Nella Larsen, Wallace Thurman, Walter Benjamin, Theodor Adorno, and Lionel Trilling. Topics to be considered will include decadent imposture, the attenuation of experience, enchanted and disenchanted violence, and technology-driven alienation.
Instructor(s): D. Mao
Area: Humanities.

AS.060.619. The Time is Out of Joint: Shakespearean Temporalities.
This course is designed to serve a double purpose: first, we shall read and analyze a substantial body of Shakespearean drama and poetry for its resources as a means for thinking about time, temporality, and historical change. Concurrently, we shall read and respond to debates in recent early modern literary scholarship about secularity, modernity and the problem of “presentism” as a critical orientation towards the past. If a previous critical generation enlisted Shakespeare into service as an exemplar of an incipient modernity based upon a tacit assumption of a secular bias, has that assumption been complicated by recent evidence and fresh readings? How might we rethink the relationship between religious discourse and academic periodization? In the process of answering these questions, it is hoped that a plurality of other Shakespeares—whether medieval, untimely, recusant Catholic, crypto-atheist, queer, anachronistic, or “presentist”—might emerge. In addition to Shakespeare, possible critical and secondary authors include Augustine, Henri Bergson, Johannes Fabian, Jan Kott, Madhavi Menon, Elizabeth Freeman, Kathleen Davis, Agnes Heller, Paul Kottman, Eric Mallin, Hugh Grady and Stanley Cavell.
Instructor(s): A. Daniel
Area: Humanities.

This course offers a critical and historical introduction to the Frankfurt School.
Instructor(s): M. Thompson
Area: Humanities.
**AS.060.621. The Cultures of the Sonnet in the English Renaissance.**
This is a course on lyric theory in the Renaissance and as such is a good introduction to early modern literary study. We will take up the early modern form of the sonnet as a test case for the interaction between vernacularity and globalization. We will consider early modern topics including “invention,” “imitation,” and rhetoric, as well as explore formal concerns that are intertwined with political, social, cultural and economic experiences of early modernity. Along with the consideration of the emergence of literatures in new languages and nationalist differentiation, we will also consider mechanization (whether in print or literary trope) that produced both early modern literature and political life in an international system. We will consider such topics as sequence; modes of address; vernacularity and linguistic nationalism; the themes of love v. empire; the social role of the sonnet; the nature and materiality of writing; patronage and circulation; the question of private, occasional, and public poetry; the place of sonnets in manuscript collections; the histories of books; poetic subjectivity and objective thought; and we will also read a good many sonnets, largely in English, through close attention to language, media and transmission histories. Some contemporary literary theory on the sonnet will be introduced, as well as sonnets in European languages other than English, depending on the students’ interests and proclivities. Students will be expected to work in the manuscript and print collections of the Bodleian library to prepare a class report on their chosen topics. The class puts the sonnet in relation to other forms in Renaissance literature and thus should serve as a good survey of the period and its issues.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

**AS.060.622. Perspective.**
Perspective, or point of view, is a seemingly inescapable term in critical work on fiction. In this course we will study this concept as it has been developed in literary studies and, contrastively, in art history and film studies. We’ll enter two overlapping areas of study, one theoretical, one critical. The first concerns the concept of perspective as developed in literary theory, art theory, and film theory; the second concerns a set of fictions, paintings, and films Our aims will be to develop a more adequate understanding of the concept and to assess the implications of our current usage of it.
Instructor(s): A. Miller
Area: Humanities

**AS.060.623. Cross-Period Literary Study.**
This seminar will be an experiment in training graduate students to develop an awareness of scholarship outside their own historical period, so as to re-think contemporary questions of periodization and modernity, as well as genre and form. The course will be organized around literary-critical readings from recent scholarship from the classical period to the 21st century, and around visits from scholars, especially junior scholars, working in those periods.
Instructor(s): C. Nealon
Area: Humanities.

**AS.060.624. Romanticism and the Ends of Affect.**
This seminar will consider both what affect studies have learned from Romanticism and the limits –practical, ethical, intellectual—of reading Romantic poetry within the framework that has been constructed by affect studies over the past two decades. It will provide a general survey of scholarship on affect, of criticism attending to the self-consciously affecting literary experiments of the age, and to primary works by a select number of romantic writers, most probably Wordsworth and Coleridge’s Lyrical ballads, Joanna Baillie’s Plays and the letters and poems of John Keats.
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

**AS.060.625. Reading for Race at the Movies and on TV, in the years 2015-16.**
2015-16 was a radical, decisive two-year period for many things, including film by and about African-Americans. This course seeks to understand this phenomenon through current events, wider aesthetic and historical trends, and the body of critical work devoted to reading filmic representations of cultural and political ideologies. 2015-16 films and TV shows under consideration will include: Moonlight; Creed; Hidden Figures; Fences; Birth of a Nation; Straight Outta Compton; OJ: Made in America; Atlanta; Black-ish; This Is Us; Luke Cage; The People v. OJ Simpson.
Instructor(s): M. Thompson.

**AS.060.627. Poetry and Performance.**
This course will be devoted to the histories and theories of 19th-, 20th-, and 21st-century poetry and performance, beginning with William Wordsworth’s and Samuel Taylor Coleridge’s Lyrical Ballads. Upon hearing the poets read, William Hazlitt remarked that “[t]here is a chaunt in the recitation both of Coleridge and Wordsworth, which acts as a spell upon the hearer, and disarms the judgment.” This early instance of reception history will provide the backdrop for our discussion throughout the semester. Besides Wordsworth and Coleridge, our reading list will include verse, theory, and criticism by Robert Browning, Walt Whitman, T.S. Eliot, James Weldon Johnson, Langston Hughes, William Carlos Williams, Charles Olson, Allen Ginsberg, Norman Pritchard, Amiri Baraka, Tracie Morris, Christian Bök, Lisa Gitelman, Frederich Kittler, Peter Middleton, John M. Picker, Susan Stewart, and others.
Instructor(s): N. Nurhussein
Area: Humanities
Writing Intensive.

**AS.060.629. Poetry and Poetics after The 'Linguistic Turn'.**
This seminar will canvas a few of the many developments in English-language poetry, and in poetic theory, that have emerged since the heyday of post-structuralism, on the one hand, and “language”-driven poetry, on the other. The readings will include recent critical work by Joel Nickels, Ruth Jennison, Oren Izenberg, Maria Damon, and others; the poetry will be a combination of recent volumes by contemporary writers, and individual poems.
Instructor(s): C. Nealon
Area: Humanities.
**AS.060.630. Mapping Frederick Douglass’s Escape: An Historic Maryland Odyssey.**
This course provides an in-depth portrait of the historic Marylander Frederick Douglass, born near Hillsboro in Talbot County, Maryland around 1818, and who successfully escaped slavery in Baltimore in September 1838. We will read Douglass’s three autobiographies and other writings, as well as two biographies of Douglass to understand his importance in American life over time. The course includes three “living classroom” components. At the Douglass/Meyers Museum at Fells Point, Baltimore, students will learn 19th century techniques to build a sailing vessel as Douglass did when he worked in the shipyards. Students will tour the Anacostia, DC Frederick Douglass Museum. The course culminates with a sailing trip from Baltimore’s Fells Point to historic St. Michael’s, kayaking along the Tuckahoe and Miles Rivers, and overnight camping on the grounds of a former plantation on Maryland’s Eastern Shore.
Instructor(s): L. Jackson
Area: Humanities.

**AS.060.631. Tyranny in Early Modern Literature.**
In the Epistle to the Romans, Paul writes: “Let every soul be subject unto the higher powers: for there is no power but of God: and the powers that be, are ordained of God.” In the wake of such a declaration, what constitutes tyranny? When is resistance to tyranny justified? What forms of recourse are compatible with the Christian obedience enjoined by Paul? How did early modern literature offer a means of leverage, redress and coping with the depredations of “the powers that be”? In search of provisional answers to these questions, this course tracks the representation and rhetorical evaluation of the tyrant figure at the intersection of political philosophy and literature. Political writings by Aristotle, Plato, Marsilius of Padua, Dante, Jean Bodin, James I, John Milton and Hanna Arendt are placed in dialogue with historical and theoretical writing by Greg Walker, Stanley Cavell, Mary Nyquist and Terri Snyder on tyranny, slavery, resistance theory and biopolitics. Literary texts, principally drama and prose romances, will include The Wakefield Master’s “Herod the Great”, Sir Philip Sidney’s “The New Arcadia”, Christopher Marlowe’s “Tamburlaine”, Robert Greene’s “Planetomachia”, William Shakespeare’s “Richard III” and “The Winter’s Tale”, Ben Jonson’s “Sejanus His Fall”, and Elizabeth Cary’s “The Tragedy of Mariam, Fair Queen of Jewry”.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.

**AS.060.647. Capitalism for Humanists.**
Recent global crises of capital accumulation have obliged both scholarly and journalistic accounts of capitalism to become more sophisticated and comprehensive. This course will be an introduction to some of those accounts. We will approach the problem of describing capital and its dynamics from several angles: conversations about combined and uneven development, about the racialization of enslaved and “surplus” populations; about the forms of social reproduction (often gendered) proximate to the wage; about technological change,robotification, and its implications for the production of capitalist value; about theories of the value-form itself. One aim of this course will be to think about how a better understanding of capital — its history and its mechanics — can make us better scholars of literature, so we will also devote ourselves to assessing the resources and the limits of earlier literary-critical accounts of literature’s relationship to capital accumulation.
Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.

**AS.060.649. African-American Literature.**
This course serves as an advanced introduction to the texts, issues and criticism surrounding African-American literature. In it, we will read works from the field’s major genres: the slave narrative; the novel; poetry; autobiography; the essay; and literary criticism. Authors under consideration will include: Wheatley; Du Bois; Douglass; Jacobs; Hurston; Hughes; Wright; Baldwin; Morrison.
Instructor(s): M. Thompson
Area: Humanities.

**AS.060.651. Form and Matter.**
This course takes a look at revived interest in formalism and materialism in critical theory as it bears on the literature of the long eighteenth century: topics include formalism and close reading from the new criticism to the present, object oriented ontologies and eighteenth-century materialisms, cognitive criticism and phenomenology.
Instructor(s): J. Kramnick
Area: Humanities.

**AS.060.663. Sacred Spaces and the Novel, 1853-1926.**
This course offers both a survey of late nineteenth- and early twentieth-century prose fiction of Britain and its empire and an examination of recent scholarship on literature’s relation to religion and the geographies of modernity. We’ll begin with three Victorian novels inhabiting the convergence between historical imagination and religious inquiry (Charles Kingsley, George Eliot, Walter Pater), move on to three turn-of-the-century narratives in which the momentum of the quest confronts sacred implacability (Olive Schreiner, Joseph Conrad, Rudyard Kipling), and conclude with three novels of the 1920s propelled by pagan ecstasy (E. M. Forster, D. H. Lawrence, Sylvia Townsend Warner). Primary readings will be accompanied by critical and theoretical texts from György Lukács, René Girard, Fredric Jameson, David Harvey, Leela Gandhi, and others.
Instructor(s): D. Mao
Area: Humanities.

**AS.060.665. Whitman and Dickinson.**
An examination of the formal, conceptual, and philosophical innovations in the work of the two major nineteenth-century American poets. We’ll consider the premises behind Whitman’s poetry of wholes (nothing left out) and Dickinson’s poetry of fragments. How does Whitman reconcile the need for formal universals with the emotional attachment to substantive particulars? How does Dickinson find a language for the off-the-map quality of private experience?
Instructor(s): S. Cameron.
This course takes its cue from a basic etymological kinship between "discovery" and apocalypse (??????????, literally "un-covering"). How are world-building and world-ending related? What pathways join the literary and philosophical construction of new worlds with theological and theoretical scenarios of revelation, extinction, and doom? In search of answers, this course reads Renaissance narratives of cosmogony, proto-science fiction and utopian discovery alongside contemporary theories of "worlding", environmental futurity, climate change, and planetary precarity. After commencing with Lucian and Plutarch, we will read a comprehensive sequence of early modern fictions in which utopias, new worlds and/or new planets are visited or "discovered": Thomas More, Utopia; Robert Greene, Planetomachia; Tommaso Campanella, The City of the Sun; Johannes Kepler, Somnium (The Dream); Francis Bacon, New Atlantis; Margaret Cavendish, The Description of a New World, Called the Blazing World; Aphra Behn's translation of Fontenelle's Conversations on the Plurality of Worlds. These early modern texts will be read alongside works in primary philosophy and contemporary eco-theory that constellate key concepts: earth, planet, and world. Texts include Martin Heidegger, Being and Time; Jacques Derrida, "Of An Apocalyptic Tone Recently Adopted In Philosophy"; Timothy Morton, Hyperobjects: Philosophy and Ecology After the End of the World; Jeffrey Cohen, Prismatic Ecology: Ecotheory Beyond Green; Ray Brassier, "The Truth of Extinction" (from Nihil Unbound); Gayatri Chakravorty Spivak, "Planetaryity" (from Death of A Discipline).
Instructor(s): A. Daniel
Area: Humanities.

AS.060.673. Migrant Modernism.
Responding to literary scholarship's continuing concern with the exile, the refugee, the cosmopolitan, and the networks and flows of modernity, this seminar examines the migrant origins and later migrations of English-language modernism. Readings in Ezra Pound, T. S. Eliot, Gertrude Stein, Mike Gold, Claude McKay, Jean Rhys, George Lamming and other writers will be complemented by relevant critical and theoretical texts.
Instructor(s): D. Mao
Area: Humanities.

AS.060.676. Facts and Fiction.
We will examine the vexed place of facts in literature and literary criticism. What are the historical and ideological preconditions for focusing on the study of people that never existed, and events that never occurred? And how did literary criticism privilege an analysis of meaning of works or literary moments, as opposed to verifiable, and reproducible facts? What does all of this tell us about the recent rise of quantitative literary analysis, and the strong resistance it has encountered? This discussion will include an examination of how different disciplines define notions like "fact," "argument," and "evidence"—in order to better understand our own discipline's principles. In addition to a selection of eighteenth- and nineteenth-century novels yet to be determined, readings will include Émile Zola, Martin Heidegger, Wolfgang Iser, Hans-Robert Jauss, Hans-Georg Gadamer, Bertolt Brecht, Georg Lukács, Fredric Jameson, Theodor Adorno, Karl Popper, Mary Poovey and Franco Moretti.
Instructor(s): J. Rosenthal
Area: Humanities.

This seminar will offer an in-depth examination of the theory and practice of the nineteenth-century realist novel in three traditions: American, British, and French. Our aim will be to understand the central theories and controversies surrounding realism, as well as to interrogate the centrality of realism to novel theory and narrative theory. Authors will likely include Jane Austen, Charles Dickens, George Eliot, Honoré de Balzac, Gustave Flaubert, Frank Norris, and William Dean Howells. Theorists and critics will likely include Erich Auerbach, M. M. Bakhtin, Roland Barthes, Leo Bersani, Bertolt Brecht, Richard Chase, René Girard, Howells, Roman Jakobson, Henry James, Fredric Jameson, Harry Levin, G. H. Lewes, Georg Lukács, Boris Tomashovsky, Ian Watt, and Émile Zola.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.682. The 21st Century University.
This seminar will focus on the changing contours of the American university in an era of economic instability and crisis. With a look back at the formative relationship between monopoly capitalism and the university in the 19th century, we will investigate the effect on the university of the unraveling of American economic power, with attention to the rise of administrative power and the loss of faculty governance, to the pressures of financialization, and to the contradictory situation into which the university is placed by student activism that calls its founding premises into question. We will also ask what intellectual life looks like under conditions of adjunctification and de-politicization. Reading will include selections from Gerald Graff, Professing English, Christopher Newfield's Ivy and Industry and Unmaking The Public University, Benjamin Genberg's The Fall of The Faculty, Stefano Harney's and Fred Moten's Undercommons, and [the x's] The University Against Itself, as well as material produced by student and faculty activists in the university struggles of the last 5 to 10 years.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.692. The Enlightenment, Aesthetics and Race.
This course examines the philosophical interplay between Enlightenment aesthetics and the construction of the concept of race. We will read texts in aesthetics and on human difference by Rousseau, Voltaire, Condorcet, Kant, Herder, Jefferson, Burke, Hume and others, in an attempt to see the points at which reflections on art and notions of human biological hierarchy intersect. Particular attention will be paid to the idea of the sublime as it pertains to early anthropological thought.
Instructor(s): M. Thompson
Area: Humanities.

Cross Listed Courses

History
AS.100.257. From Voice to Parchment: Media and Communication before the Printing Press, 800-1440. 3.0 Credits.
Epic traditions, call to Crusade, public curses, music of the troubadours: this course examines oral tradition and music—the "viral media" of pre-modern Europe—while tracing the impact of new recording technologies: early musical notation, manuscripts, and book production.
Instructor(s): J. Phillips
Area: Humanities, Social and Behavioral Sciences.

History of Science Technology
AS.140.674. Science and Medicine in Early Modern Atlantic World
Culture.
How were changes in scientific and medical ideas reflected in cultural products of the early modern Atlantic world? We will study these ideas as they appeared in literary genres such as poetry, utopias, natural histories and travel narratives. Likewise, we will examine the visual culture of the Atlantic space for clues about changing conceptions about the natural world. Our expedition will encompass Anglophone, French and Hispanic regions, and will pay careful attention to hybrid cultural products that reflect the interaction between indigenous cultures and the (changing) European understanding of the natural world.
Instructor(s): M. Portuondo.

Jewish Studies Program
AS.193.304. Everyday Voices of the Holocaust: Popular Jewish Poetic Expression in the Ghettos and Camps. 3.0 Credits.
The course aims to encourage knowledge of a relatively unknown mass phenomenon - poetic creativity by Jews under Nazi Rule, in the Ghettos and Camps. The study of multi-lingual texts, written by non-professional writers, will enable to better understand the complexity of immediate Jewish reaction to Holocaust reality, in its multi-cultural contexts. Texts from selected ghettos and camps, originally written in Yiddish, Polish, German and Hebrew will be read in English translation and analyzed. Emphasis will be put on the differences and similarities between Eastern and Western European Jewry.
Instructor(s): M. Trinh
Area: Social and Behavioral Sciences.

German Romance Languages Literatures
AS.211.295. Staging History: Theater and Society in the Courts of Europe. 3.0 Credits.
During the 17th century, the growth of the play-going public of London, Madrid, and Paris transformed theater into an exceptional channel for cultural expression. This course combines the study of theater history, including the spaces, audiences, actors, and playwrights, with the literary analysis of major plays by Christopher Marlowe, Ben Jonson, Lope de Vega, Pierre Corneille, and Madame de Villedieu. The main objective of this course is to examine and discuss early modern drama in light of contemporary life at court.
Instructor(s): F. Gomez Martos
Area: Humanities.

AS.211.361. Narratives of Dissent in Israeli Society and Culture. 3.0 Credits.
In this course we will study and analyze the notion of dissent in Israeli society and culture on its various literary and artistic forms. We will examine the emergence and the formation of various political and social protest movements, such as the Israeli Black Panthers, Israeli feminism and the 2011 Social Justice protest. We will discuss at length the history and the nature of dissent in the military and in relation to Israeli wars and will track changes in these relations. Significant portion of the course will be dedicated to the literary, cinematic and artistic aspects of Israeli dissent and their influence on Israeli discourse. We will explore the nature and role of specific genres and media such as the Israeli satire, Israeli television, newspaper op-ed and the recent emergence of social media. Students wishing to work in English exclusively for 3 credits should enroll in section one. Students who are fluent in Hebrew and are wishing to attend an additional hour-long Hebrew discussion session per week with Professor Cohen (time TBD in consultation with enrolled students) for 4 credits should enroll in section two.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.211.445. Rogues, Tricksters, and Saints: Boccaccio’s Decameron. 3.0 Credits.
Boccaccio’s Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio’s masterpiece on its own terms and in relation to the development of story-telling, from gossipy “news” (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints’ lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and cinematic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian.
Prerequisites: Students may not have taken AS.214.445.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.211.475. Inside the Writer’s Laboratory. 3.0 Credits.
How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the “laboratory” of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.
AS.211.479. Dante's Journey through the Afterlife. 3.0 Credits.
Dante's Divine Comedy presents a complete picture of the medieval world-view in all its aspects: physical (the structure of the cosmos), historical (the major actors from Adam to Dante himself) and moral (a complete system of right and wrong). Dante shows how the Christian religion portrayed itself, other religions, the nature of God, humans, angels and devils, and human society. We will explore these topics both from the viewpoint of Dante's own time, and in terms of its relevance to our own societal and cultural concerns. Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.212.205. Winter Is Coming: Writing and Rewriting French Dark Ages. 3.0 Credits.
This course will not aim at drawing the exhaustive literary landscape of French Middle Ages, neither will it be a Comparative Literature or History class. It may be considered a gateway to French Medieval literature, given that the Modern Fantasy has obviously improved the last decades, the latter being built as a rewriting of Medieval themes and Western European folklore. Looking at texts originally written in Old French, including prose and poetry, but also at the French Medieval iconography, we will try to understand the old roots of the Modern and so popular (but sacrificing) Fantasy Literature. Basic French will be required. Instructor(s): M. Alhinho
Area: Humanities.

AS.212.478. Guillaume de Machaut: exploring medieval authorship in the digital age. 3.0 Credits.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. The course aims to give students a thorough grounding in Machaut's literary and musical works, while also introducing them to digital tools to view and analyze original illustrated musical manuscripts of his work. Critical analysis of Machaut's work will be assessed not only through more traditional essay writing, but also through the creation of a multimedia digital edition of a section of his oeuvre using Omeka exhibition software. The course is designed so that no prior knowledge of musical notation or medieval French is necessary. Instructor(s): T. Rose-Steel
Area: Humanities
Writing Intensive.

AS.213.318. The Making of Modern Gender. 3.0 Credits.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender. Instructor(s): K. Pahl
Area: Humanities
Writing Intensive.

AS.213.321. Bodies and Pleasures. 3.0 Credits.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women's writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Arnim, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson. Instructor(s): K. Pahl
Area: Humanities.

AS.213.616. The Aesthetic Discourse of Modernity.
When, in 1985, Jürgen Habermas published his lectures on The Aesthetic Discourse of Modernity, he pursued a double aim. He offered a critique of French Theory while at the same time providing a foundation for a normative category of modernity in the tradition of Hegel. Curiously there is one subject he does not touch on, though it seems necessary for a sufficient understanding of modernity: the realm of art and literature. This course will develop a critique of Habermas' normative notion of modernity through re-readings of texts by Nietzsche, Benjamin, Horkheimer/Adorno, Derrida, Bataille and Foucault to elaborate an alternative category of aesthetic modernity. Taught in English. Reading knowledge of German and French is not required, but recommended. Instructor(s): A. Geisenganslueke
Area: Humanities.

AS.213.666. "To be continued"- Seriality in Literature and Other Media.
Taught in English. By ending with the words "(To be continued)" ["(Ist fortzusetzen)"], Goethe's Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. – although invented earlier – becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine "Die Gartenlaube", Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, "The Perils of Pauline" (serial, 1914), "Copycat" (Jon Amiel, 1995), "Twin Peaks" and current US-American TV series. Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.
AS.213.725. Proto-, Modern, and Post-: Locating the –ism in Modernism. 3.0 Credits.
All discussions in English. This graduate seminar will seek to disentangle
the interrelationship among “proto-modernism,” “modernism,” and “post-
modernism” from the straightjacket of periodization and taxonomy
by focusing instead on questions of temporality and phenomenology.
When is the time of modernity? What precedes modernism? How is post-
modernism a continuation of modernism and a break with modernity?
What follows the “post” or precedes the “proto”? How does literature
establish a dialogue not just across linguistic borders but temporal
ones as well? And when do these processes repeat themselves due
to historical and political factors? By way of complicating all of these
questions we will be considering writers from “across” the 20th century,
including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-
Bloom, Henry Dumas, Moyshe Kulbak, Machado de Assis, Mendele
Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and
Robert Walser.
Instructor(s): M. Caplan.

AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music
Through the Ages. 3.0 Credits.
How do music and words interact? Do words have a priority on music or
vice versa? Does music need words to be understood and interpreted?
Are words filled with meaning by music? A variety of readings and
musical examples will be discussed, including genres as diverse as
medieval songs, madrigals, Romantic Lieder, the American
musical, and contemporary pop music. The seminar will include field
trips to the Baltimore Museum of Art, the Meyerhoff Symphony Hall,
the Peabody Institute, and the Evergreen Museum and Library. Students will
also have the opportunity to attend a live HD broadcast of Mozart’s Don
Giovanni from the Metropolitan Opera. No musical skills required; strong
doses of curiosity most welcome.

Area: Humanities

AS.214.333. Shakespeare on the Opera Stage. 3.0 Credits.
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth
to Leonard Bernstein’s West Side Story, the works of William Shakespeare
have been an extraordinary source of inspiration for musical theatre.
By exploring operatic adaptations of Shakespeare in different periods and
costumes, this course will examine the ways in which composers
and librettists have interpreted and reshaped the plays. The course,
primarily focused on the 19th century Italian reception of Shakespeare
and, in particular, on operas by Rossini and Verdi, will also consider the
phenomenon within a broad transnational perspective up to include
contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3.0
Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what
we see and experience: what is reality, what is illusion; what’s natural
and what’s supernatural? What’s human and what’s more, or less, than
human? During the Renaissance, ideas about the nature of reality were
bound up with questions and issues very different from those of our time.
With the exact sciences still being invented, the nature of the world was
much less hard and fast for Renaissance people than it is for the modern
educated person. The literary masterpieces of the Italian Renaissance
provide vivid illustrations of the early modern sense of wonder. Foremost
among these are the theatrical comedies which Italian authors revived in
imitation of the ancients, and the romances, especially Ariosto’s Orlando
furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and
other works influenced ideas about magical and marvelous phenomena
across Europe for centuries to come. Works will be read and discussed
in English. Italian majors and graduate students (who should enroll in
section 2) will attend a weekly supplemental discussion in Italian and
compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy. 3.0 Credits.
Dante’s Divina commedia is the greatest long poem of the Middle Ages;
some say the greatest poem of all time. We will study the Commedia
critically to find: (1) What it reveals about the worldview of late-medieval
Europe; (2) how it works as poetry; (3) its relation to the intellectual
cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its
presentation of political and social issues; (5) its influence on intellectual
history, in Italy and elsewhere; (6) the challenges it presents to modern
readers and translators; (7) what it reveals about Dante’s understanding
of cosmology, world history and culture. We will read and discuss
the Commedia in English, but students will be expected to familiarize
themselves with key Italian terms and concepts. Students taking section
02 (for 4 credits) will spend an additional hour working in Italian at a time
to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.639. The Sound of Poetry: Early Modern Approaches to Poetics,
Rhetoric, and Music.
Although naturally and historically intertwined, music and poetry
tended to be described in the early modern period as competing rather
than interacting. By looking at both literary and theoretical texts, the
seminar aims to explore the ways in which this controversial relation is
revealed by the interplay of poetics, rhetoric, and music theory. Reading
materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus,
Quintilian) and their early modern interpretations. Special attention will
be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni,
whose works will be also discussed in the light of the contemporary
development of musical genres (e.g. madrigals, opera). No musical skills
required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.726. Proto-, Modern, and Post-: Locating the –ism in Modernism. 3.0
Credits.
All discussions in English. This graduate seminar will seek to disentangle
the interrelationship among “proto-modernism,” “modernism,” and “post-
modernism” from the straightjacket of periodization and taxonomy
by focusing instead on questions of temporality and phenomenology.
When is the time of modernity? What precedes modernism? How is post-
modernism a continuation of modernism and a break with modernity?
What follows the “post” or precedes the “proto”? How does literature
establish a dialogue not just across linguistic borders but temporal
ones as well? And when do these processes repeat themselves due
to historical and political factors? By way of complicating all of these
questions we will be considering writers from “across” the 20th century,
including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-
Bloom, Henry Dumas, Moyshe Kulbak, Machado de Assis, Mendele
Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and
Robert Walser.
Instructor(s): M. Caplan.

AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music
Through the Ages. 3.0 Credits.
How do music and words interact? Do words have a priority on music or
vice versa? Does music need words to be understood and interpreted?
Are words filled with meaning by music? A variety of readings and
musical examples will be discussed, including genres as diverse as
medieval songs, madrigals, Romantic Lieder, the American
musical, and contemporary pop music. The seminar will include field
trips to the Baltimore Museum of Art, the Meyerhoff Symphony Hall,
the Peabody Institute, and the Evergreen Museum and Library. Students will
also have the opportunity to attend a live HD broadcast of Mozart’s Don
Giovanni from the Metropolitan Opera. No musical skills required; strong
doses of curiosity most welcome.

AS.214.640. Film Theory.
The seminar deals with film theory in its history and its current trends. We will examine structuralist, post-structuralist, feminist, Marxist, psycho-analytic and other theoretical approaches to understanding and interpreting the cinematic medium. We will look at several different genres of contemporary films from Italy, France, Spain, and Latin American Film, from auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist and one filmmaker to class during the semester.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today "literary criticism." From the Bible to Dante's Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author's intention? To what extent is the commentator appropriating the author's prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

Giambattista Vico's Principi di scienza nuova d'intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an "ideal" and "eternal" model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square "sacred history" (the presumed historical accuracy of the Bible) with "profane" or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this "old science" stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens

Writing Intensive.

AS.215.353. Women Writing in Latin America: Prose and Poetry by Sor Juana, Mistral, Lisoba, Pizarnik, Castellanos, and other poets. 3.0 Credits.
The first objective of the course is to train students in close reading and analysis of literary texts. The second objective is to read prose and poetry by some of the canonical texts in the Latin American tradition written by women. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.361. A multidisciplinary Introduction to the Study of Latin America. 3.0 Credits.
The course brings together knowledges drawn from the fields of geography, history, anthropology, literature and art in order to provide access to the complexity of "Latin America". Students may opt do the reading in the original Spanish or Portuguese and also write in either language.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.452. Che Guevara and Magical Realism. 3.0 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara's life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che's great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.489. Poetry in Latin America: A multilingual survey from 1200 to the present.. 3.0 Credits.
The course focuses on a presentation of the multiple traditions of poetry writing that make up the Latin American tradition from the Mexico poets at about 1200 to current writers in Latin America. Original poetry in Nahuatl, Maya-Quiche, Spanish and Portuguese will be read along side translations into English. Attention will be paid to translation theory.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.650. Mexico and the Invention of America.
Departing from O'Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavigero, Humboldt, Dussel and Alzandua will conform part of the readings. Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.
This course will focus on the art of writing poetry, the art of reading poetry and the poetics of each of the poets whose work is the textual matter of the course.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

AS.300.113. Freshmen Seminar: Drama and Gender in Shakespeare’s England. 3.0 Credits.
In this seminar we will read male and female authored plays and discuss how they reflect contemporary social expectations in Tudor and Stuart England. Authors include William Shakespeare; Mary Sidney, Countess of Pembroke; Christopher Marlowe; Elizabeth Cary; Ben Jonson; and Mary Sidney, Lady Wroth.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.211. Great Poems of the Americas. 3.0 Credits.
This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot’s The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire’s Notebook of a Return to the Native Land, Vicente Huidobro’s playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of “the Americas” as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we’ll examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.
Instructor(s): R. Galvin
Area: Humanities.

AS.300.283. Nineteenth-Century Science Fiction: Ecology, Utopia, and Catastrophe. 3.0 Credits.
This course will introduce students to some of the key texts of science fiction as the genre emerged during the nineteenth century. We will consider the intellectual contexts for the form’s development in Britain, France, and the United States, as well as its emerging narrative conventions. In particular, we will consider how early sci-fi writers used non-realistic modes to dramatize problems and discoveries were at once real and yet hard to fathom within the parameters of everyday cognition: deep geological time, alternative social arrangements, post-human landscapes. Texts may include H.G. Wells’ The Time Machine, Charlotte Perkins Gilman’s Herland, Samuel Butler’s Erewhon, Edward Bulwer Lytton’s The Coming Race, William Morris’ News from Nowhere, and Jules Verne’s 20,000 Leagues Under the Sea.
Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.

AS.300.302. Making Modern Poetry. 3.0 Credits.
Making Modern Poetry will explore the intersection and conversation between literature, art history, and graphic design by examining the rapid global development of poetry, art, and print from 1890 to 1930. We will read canonical modernist poets such as T.S. Eliot and Ezra Pound as well as those less familiar, like Mina Loy and César Moro, considering texts comparatively across national borders and through their relations to other arts. All readings will be in English.
Instructor(s): B. Gillespie
Area: Humanities
Writing Intensive.
AS.300.321. Rise of the Modern Short Story. 3.0 Credits.
A comparative tour of examples of short stories from three continents that emerged from earlier narrative forms in the 19th and 20th centuries. Attention will be given to new structural, rhetorical, and thematic concerns including the development of new sub-genres, e.g. fictions of detection, case histories, portraits of the artist, and the adaptation of several stories to newer media [at least 2 of the longer narratives translated to film will be screened]. A detailed syllabus of our readings will be available later in the summer; because there is no anthology that quite fits our needs, all the texts or translations, as well as critical and contextual notes will be supplied in digital forms. Note: there will also be an optional hour for questions & discussion TBA.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.323. Shakespeare and Ibsen. 3.0 Credits.
William Shakespeare and Henrik Ibsen are the two most frequently performed playwrights in history, and both have been credited with reinventing drama. Shakespeare for the Elizabethan stage and Ibsen for the modern. In this course we will pair together plays by each author – those that stand in an explicit relation of influence as well as those that share a significant set of concerns – in order to investigate how each takes up and transform key problems in the literary, political, and philosophical tradition for their own historical moment. Plays to be studied: by Shakespeare, A Midsummer Night’s Dream, Hamlet, Othello, King Lear, The Tempest, A Winter’s Tale; by Ibsen, St. John’s Night, Hedda Gabler, Rosmersholm, The Wild Duck, The Master Builder, When We Dead Awaken.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.329. Literature of the Everyday. 3.0 Credits.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read closely a set of novels by Flaubert, Mann, Dickens, Zola, Tolstoy, and Woolf from the period between 1850 and 1950 in which the development of realism reaches its climax. These novels explore the nature of work, family, the body, consciousness, and the changing relation between individual and tradition in modernity. We will situate these novels in their social, historical, and literary contexts, and establish a set of terms for the formal study of the novel as a genre (plot, character, setting, narrative, etc).
Instructor(s): Y. Ong
Area: Humanities
Writing Intensive.

AS.300.330. Trauma in Theory, Film, and Fiction. 3.0 Credits.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (“The Emigrants”), Lanzmann (“Shoah”), Spiegelman (“In the Shadow of No Towers”), McCarthy (“Remainder”), and others.
Instructor(s): M. Fried
Area: Humanities, Social and Behavioral Sciences.

AS.300.335. Victorian Literature as World Literature. 3.0 Credits.
What does it mean to read literature in a global context? How are literary texts that we think of as products of distinct national cultures plugged into larger global systems – even if they seem unaware of it? In this course we’ll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker’s Dracula (1897) and Charles Dickens’s Great Expectations (1861). We will retrace how these books exercised cultural influence beyond the borders of Great Britain; how networks of trade, tourism, and imperial power brought authors from different cultures into contact with one another; and how Victorian texts have become a part of our culture in unexpected ways. Other primary texts may include Arthur Conan Doyle’s The Sign of Four (1890), the poetry of Romesh Chander Dutt, and first-hand accounts of Oscar Wilde’s 1882 American lecture tour; critical readings will cover postcolonial theory, media theory, and histories of colonialism and urbanization.
Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.

AS.300.346. Forms of Moral Community: The Contemporary World Novel. 3.0 Credits.
Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, Beauvoir and Barthes on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it means to acknowledge another person’s humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community? Cross listed with English.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change. 3.0 Credits.
In contemporary discussions of climate change, it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class, we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the prospects of our ecological future today. Authors to be studied: George Lillo, Balzac, Dickens, Marx and Engels, Ibsen, Weber, Brecht, Arthur Miller, Steinbeck, Pope Francis, and contemporary fiction, politics and philosophy on climate change.
Instructor(s): L. Lisi
Area: Humanities.
**AS.300.363. Reading Judith Shakespeare: poetry and drama by women writers in Elizabethan England (ca 1558-1650). 3.0 Credits.**
Virginia Woolf's account of the thwarted career of Shakespeare's hypothetical sister, Judith (in A Room of One's Own) frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lanyer, Mary Wroth, and others. Students will create fictional biographies of "Judith Shakespeare" and her literary accomplishments. Cross listed with English, Theater Arts, Writing Seminars, and WGS.
Instructor(s): E. Patton  
Area: Humanities  
Writing Intensive.

**AS.300.371. The Modernist Novel: James, Woolf, and Joyce. 3.0 Credits.**
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century – Henry James, Virginia Woolf, and James Joyce – who explored and exploded narrative techniques for depicting what Woolf called the "luminous halo" of life.
Selected works include: "The Beast in the Jungle," The Portrait of a Lady, Jacob's Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong  
Area: Humanities.

**AS.300.609. Vollendungsroman: The Novel of Age.**
This seminar explores the Vollendungsroman, or novel of age, as a twentieth- and twenty-first-century counterpart to the late eighteenth- and nineteenth-century Bildungsroman that Moretti and others view as the symbolic form of modernity. We will examine how Vollendungsroman broach the relation between subjectivity and "age" (not only in the sense of individual maturity, but also in the sense of historical epoch); how they bring into question traditional conceptions of growth, authority, interiority, body-soul, authenticity, and reconciliation; how they represent alternatives to the modes of moral response and being valorized in the Bildungsroman; and how, in and through their very form, they meditate upon the philosophical significance of the classic phase of the novel.
Selected novels by Goethe, Austen, Brontë, Joyce, Woolf, Coetzee, Ishiguro, and McEwan. Open to qualified undergraduates.
Instructor(s): Y. Ong  
Area: Humanities.

**Program in Museums and Society**
**AS.389.343. Edgar Allan Poe and His Afterlives. 3.0 Credits.**
We will investigate the creative development and iconic afterlife of a canonical American author, Edgar Allan Poe, as a case-study in literary legacy and cultural heritage. What is the lifespan of a literary work, and how do works "stay alive" for later generations? Students will examine rare Poe materials and create a digital exhibition of Poe archives.
Instructor(s): G. Dean  
Area: Humanities, Social and Behavioral Sciences.

**AS.389.355. Literary Culture in the Nineteenth-Century Library. 3.0 Credits.**
What did people actually read in the nineteenth century? What can we learn from their books and magazines? In this class, we read nineteenth-century English and American literary works and examine nineteenth-century literary objects from the collection of the George Peabody Library, to better understand the cultural and material environments within which literary works circulated. Featured writers likely to include Edgar Allan Poe, Charles Dickens, Harriet Beecher Stowe, Emily Dickinson, Mark Twain, Stephen Crane. Several field trips to the Peabody Library throughout the semester.
Instructor(s): G. Dean  
Area: Humanities  
Writing Intensive.

**AS.389.359. Literary Archive. 3.0 Credits.**
This course invites students to grapple with the theory and practice of building literary archives in 19th- and 20th-century American culture. For the final project students will work collaboratively to build a digital archive and exhibit of selected materials from the JHU rare book and manuscript collections. Meets in Special Collections. Cross-listed with English. M&S practicum course.
Instructor(s): G. Dean  
Area: Humanities.

**Film and Media Studies**
http://krieger.jhu.edu/film-media/index.html

The Film and Media Studies Program offers a comprehensive education in all aspects of the art, theory, and history of the moving image. We offer courses in both critical studies and filmmaking—including narrative, documentary, experimental film, animation and screenwriting—within a rigorous curriculum designed to foster critical understanding and historical knowledge. Student filmmakers and scholars explore the relationship of film and media to modern cultures, literatures, art, history, and philosophy in a new 20,000 square foot facility that offers an enhanced learning environment as well as all the tools available to professional filmmakers: a large sound stage, a recording studio,
computer labs, editing suites, a screening room, classrooms, and state-of-the-art equipment.

Our faculty, comprised of scholars and renowned filmmakers, is known for their dedication to teaching and to promoting a highly collaborative and nurturing environment. Our small size allows us to offer undergraduates an unusual amount of hands-on experience, intensive mentoring, and significant individual attention.

The majority of our students go on to attend graduate film school or to work in the film and media industries directly after graduation. Among our graduates are directors, screenwriters, producers, editors, actors, cinematographers, financial and marketing executives, film scholars and curators, entertainment lawyers, agents, digital technicians, and web designers. Our rapidly growing network of alumni provides graduates with essential support and mentoring, opening doors to a wide range of opportunities in the film and media industry. In addition, our undergraduates avail themselves of generous filmmaking grants and funding opportunities from a range of resources available only to FMS majors and minors.

**Requirements for the B.A. Degree**

(See also Requirements for a Bachelor’s Degree [http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree].)

These requirements apply to students entering the Film and Media Studies Program in Fall 2016 and beyond.

In addition to core required courses, each student must complete either a critical studies or production track for the major. All courses applied toward the major must be taken for a letter grade and a grade of C- or better must be earned. The following courses are required for completion of the film and media studies major:

Screenwriting courses cannot be applied for this requirement
Four (4) 300- or 400-level critical studies film courses (POS tag FILM-CRITST). A maximum of one class outside of Film and Media studies can count toward this requirement. Students are strongly encouraged to take one course focusing on cinema outside the United States. Screenwriting courses cannot be applied for this requirement. MI.061 classes cannot count toward this requirement.

*Credits from other institutions, whether inside or outside the US, will not be accepted toward completion of the minor.

### Production Track

1. **AS.061.140** Introduction to Cinema, 1892-1941
2. **AS.061.141** Introduction to Cinema, 1941-present
3. One (1) 200-level critical studies film course (POS tag FILM-CRITST). Screenwriting courses cannot be applied for this requirement
4. Three (3) 300- or 400-level critical studies film courses (POS tag FILM-CRITST). A maximum of one class outside of Film and Media studies can count toward this requirement. Students are strongly encouraged to take one course focusing on cinema outside the United States. One screenwriting course can be applied to this requirement. MI.061 classes cannot count toward this requirement

One (1) introductory production course:

1. **AS.061.145** Introduction to Digital Video Production: Visual Language
2. **AS.061.150** Introduction to Film Production
3. **AS.061.152** Introduction to Digital Video Production

One (1) intermediate film production course (061.2xx with POS tag FILM-PROD)

One (1) advanced film production course:

1. **AS.061.301** Advanced Film Production: The mongrel film
2. **AS.061.356** Narrative Productions
3. **AS.061.413** Lost & Found Film

### Sample Program

A typical program might include the following sequence of courses. Students are strongly encouraged to meet with their faculty adviser before each registration period to make sure they are on track to meet all requirements.

**Total Credits: 48**
For current faculty and contact information go to http://krieger.jhu.edu/film-media/directory/

**Faculty**

**Director**
Linda DeLibero
(Film and Media Studies): American film, film history, cultural criticism

**Lecturers**
Lucy Bucknell
Senior Lecturer: literature and film, film genres, screenwriting, American film

John Mann
Senior Lecturer: film production, documentary film theory, experimental film

Laura Mason
Senior Lecturer (Film and Media Studies; History): history and film, cultural history and media, French film

Matthew Porterfield
Lecturer: film production, screenwriting

Jimmy Joe Roche
Adjunct Lecturer: digital video production

Meredith Ward
Lecturer: film theory, media studies, popular culture theory, film history

Karen Yasinsky
Lecturer: stop-motion and drawing animation, experimental film and video, visual theory

**Affiliated Faculty**
Roberto Busó-García
Lecturer

Anne Eakin Moss
Assistant Professor, Humanities Center

Hollis Robbins
Chair, Peabody Department of Humanities

Suzanne Roos
Senior Lecturer, Coordinator, Intermediate French

**Professor Emeritus**
Richard A. Macksey
Professor, Humanities Center

For current course information and registration go to https://sis.jhu.edu/classes/

**Courses**

**AS.061.140. Introduction to Cinema, 1892-1941. 3.0 Credits.**
This course explores the fundamentals of film analysis and encourages students to embark on an exploration of the first half of our first century of movies. It teaches the basic elements of film form, as well as their use in films across the globe from the turn of the twentieth century through the start of World War II. Movements discussed include the silent comedy of Charles Chaplin, Buster Keaton, and Harold Lloyd, moody German Expressionism, the playful anarchy of Surrealism, the fundamentals of editing with Soviet Montage, the beauty of French poetic realism, the rule-breaking of Pre-Production Code cinema, the work of the young Alfred Hitchcock, and, of course, highlights of classical Hollywood filmmaking.
Lab fee: $50
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

**AS.061.141. Introduction to Cinema, 1941-present. 3.0 Credits.**
Introduction to Cinema provides an overview of American and international cinema from the post World War II era to the present. Through lectures and discussion, weekly screenings, and intensive visual analysis of individual films, we will explore the aesthetic, cultural, political, and economic forces that have shaped the art and industry of film over the past 70 years. Regular quizzes, writing assignments, class participation required. Mandatory film screenings.
Instructor(s): L. Bucknell
Area: Humanities.

**AS.061.145. Introduction to Digital Video Production: Visual Language. 3.0 Credits.**
This course is a study of the visual language used to create a moving picture. Through screenings and discussion of films, videos, and related readings, students will develop a visual critical facility and will demonstrate this facility in weekly response papers to screenings and a final independent video project. The course will focus on image construction, including composition, framing, movement inside the frame and use of light. Students will learn to be attentive to rhythm and tempo in picture editing and sound. In-class video assignments included, which students will work on in small groups of three. Lab fee: $50
Instructor(s): K. Yasinsky
Area: Humanities.

**AS.061.147. Introduction to Latin American Cinema. 3.0 Credits.**
An introductory overview of the evolution of narrative feature filmmaking in Latin America, with an emphasis on comparing and contrasting myriad technical approaches to visual storytelling in different countries and eras. We address form and content, issues of identity, and politics and aesthetics. We will also discuss the influence, effect and dialogue between the films, their historical contexts and among each other. Filmmakers discussed include Cuaron, Martel, Silva, Alonso, Del Toro, Gutiérrez Alea, Reygadas, Salles, Subiela, Babenco, Sorín and Buñuel, among others. Co-listed with Program in Latin American Studies
Instructor(s): R. Buso-garcia.
Area: Humanities.

**AS.061.148. Storytelling for Film and Fiction. 3.0 Credits.**
Through the analysis of narrative films, short fiction, myths, fairy tales, and ghost stories, and through the workshop of their own creative writing, students will explore the art and science of “a good story well told.” This course is an essential primer for upper-level screenwriting.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.
AS.061.149. Movies We Love. 3.0 Credits.
Designed for non-majors, this course introduces students to some of the world’s great films. Through lectures and screenings scheduled at the Charles Theater or on Homewood campus, faculty from Film and Media Studies and other disciplines will present films they find uniquely significant and explore what makes them great. Lectures will take place in the state-of-the-art screening room at the new Film Center in Station North, a five-minute ride from Homewood on the JHU Shuttle.
Instructor(s): L. DeLibero; L. Mason
Area: Humanities.

AS.061.150. Introduction to Film Production. 3.0 Credits.
This course introduces students to basic considerations of shooting 16mm film. Through lectures and practice, the course approaches the basics of light meter readings, basic camera operations and shot composition. The course also highlights specific readings from classical film theory to augment weekly shooting exercises. Each week students, working in groups, shoot film exercises, providing a general overview of film production. For the final project, each group shoots and edits (physical edits) a short (3-5 minutes) film on 16mm black and white reversal film stock. Lab fee: $200
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.152. Introduction to Digital Video Production. 3.0 Credits.
This course introduces students to the world of digital filmmaking. Through screenings, production assignments, and in-class labs, students will develop proficiency in digital cameras, sound recording devices, and software. Students will work individually and in groups to produce several video projects. For their final projects students will pitch an idea and develop a more complex film. Lab fee: $100
Instructor(s): J. Roche
Area: Humanities.

AS.061.157. Lights, Camera, Action: Hidden Worlds. 1.0 Credit.
This mini-course will explore how cinema makes the invisible visible; how image and sound can reveal not only cultures and practices “invisible” to the mainstream, but also nuance and dimension in a world we only imagine we already see and hear. The camera is itself, in Pater’s words, the “sudden light [that] transfigures a trivial thing.” Fiction, nonfiction, and experimental films will be considered. In-class screenings and an emphasis on discussion over lecture. Four short written responses. Perfect attendance required.
Instructor(s): J. Mann; L. Bucknell
Area: Humanities.

AS.061.158. Lights, Camera, Action: David Lynch. 1.0 Credit.
An introduction to the basics of film analysis, through the work of contemporary American film and television director David Lynch. Though essentially cinematic, Lynch’s mysterious, dreamlike style, as evidenced by movies like Wild at Heart, Blue Velvet, Mulholland Drive, and Twin Peaks: Fire Walk With Me, invites a multitude of entry points for discourse. Short weekly written responses, in-class screenings, and emphasis on discussion over lecture. No prior experience in film studies required.
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.159. Lights, Camera, Action: Hitchcock. 1.0 Credit.
An introduction to the basics of film analysis, focusing on the work of the “Master of Suspense,” Alfred Hitchcock. Short weekly written responses, in-class screenings, and emphasis on discussion over lecture. No prior experience in film studies required. This one-credit course will meet on Sept. 21, Sept. 28, Oct. 5, and Oct. 12 and will be graded pass/fail.
Instructor(s): L. Bucknell; L. DeLibero
Area: Humanities.

AS.061.160. Introduction to Short Film Making. 3.0 Credits.
In this introductory course, students will create short films using digital camera equipment, sound recording devices and the film editing software program, PremierePro. We will watch a variety of films in class; hold readings and discussions based on assigned text, take technical workshops on sound, lighting and hold a short workshop on 16mm film. We will study the history of filmmaking, with a strong focus on the avant-garde and experimental genres. We will also learn about current movements and trends that have developed throughout the world and have the opportunity to meet with Baltimore filmmakers in class. Students will finish the course with a greater understanding of the lineage of cinema and will have learned a range of techniques to create, experiment and develop their own language of visual storytelling. We will discuss, engage, explore and most of all have fun! No prior experience with film or video required.
Instructor(s): M. Rorison
Area: Humanities.

AS.061.161. Introduction to Short Film Making. 3.0 Credits.
In this introductory course, students will create short films using digital camera equipment, sound recording devices and the film editing software program, PremierePro. We will watch a variety of films in class; hold readings and discussions based on assigned text, take technical workshops on sound, lighting and hold a short workshop on 16mm film. We will study the history of filmmaking, with a strong focus on the avant-garde and experimental genres. We will also learn about current movements and trends that have developed throughout the world and have the opportunity to meet with Baltimore filmmakers in class. Students will finish the course with a greater understanding of the lineage of cinema and will have learned a range of techniques to create, experiment and develop their own language of visual storytelling. We will discuss, engage, explore and most of all have fun! No prior experience with film or video required.
Instructor(s): M. Rorison
Area: Humanities.

AS.061.163. Lights, Camera, Action: Screwball Comedy. 1.0 Credit.
An introduction to the basics of film analysis through a sampling of Hollywood screwball comedies from the thirties. In-class screenings and short written assignments. Emphasis on discussion over lecture. No prior experience in film studies required. This 1-credit course will meet September 17, 24, October 1 and 8, and be graded pass/fail. Perfect attendance is required.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.164. Lights, Camera, Action: Woody Allen. 1.0 Credit.
An introduction to the basics of film analysis, focusing on the work of the highly individual independent filmmaker Woody Allen. Short weekly written responses, in-class screenings, and emphasis on discussion over lecture. No prior experience in film studies required. This one-credit course will meet on Sept. 18, Sept. 25, Oct. 2, and Oct. 9 and will be graded pass/fail.
Instructor(s): L. Bucknell

AS.061.165. Lights, Camera, Action: Horror. 1.0 Credit.
An introduction to the basics of film analysis through a sampling of classic horror. In-class screenings and short written assignments. Emphasis on discussion over lecture. No prior experience in film studies required. This 1-credit course will meet September 16, 23, 30, & October 7, and be graded pass/fail. Perfect attendance is required.
Instructor(s): L. Bucknell.
AS.061.201. Intermediate Video Production: Sound Art for Filmmakers. 3.0 Credits.

David Lynch once said “Films are 50 percent visual and 50 percent sound. Sometimes sound even overplays the visual.” This course is dedicated to challenging young filmmakers to conceptualize sound as sculpture and mine the evocative potential of sonic arts. Students will learn and create with a variety of modular synthesizers, digital recorders, and samplers. We will listen to a diverse spectrum of audio content such as musique concrète, plunderphonics, sound collage, and sound design for radio and cinema. Throughout the semester students will create several “imageless films.” In the final month of the semester, students will choose one sound project to refine and incorporate moving image. $100 Lab Fee.

Prerequisites: AS.061.150 OR AS.061.152
Instructor(s): J. Roche
Area: Humanities.

AS.061.202. Intermediate Film Production: Personal Essay Film. 3.0 Credits.

In this course students will consider variations of the personal essay film, wherein filmmakers explore their own experiences, both real and imagined. These films constitute dialogues between filmmaker and world using subjective approaches, including but not limited to first person narration. Students will make a short (4-6 minutes) 16mm film from original and possibly archival footage; their own filmic essays based upon personal experiences. We will look at the works of several essay filmmakers including Ross McElwee, Jean Luc Godard, Chris Marker, and Su Friedrich.

Prerequisites: AS.061.150[C]
Instructor(s): J. Mann
Area: Humanities.

AS.061.203. American Contemporary Classics. 3.0 Credits.

An introduction to the basics of film analysis through the close examination of notable American films from 1980 to the present, including works by Woody Allen, the Coen Brothers, Courtney Hunt, Spike Lee, and Martin Scorsese. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with a revision.

Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.204. Intermediate Digital Film Production. 3.0 Credits.

This course is designed to further the filmmaking skills students have begun to develop in previous production courses. Students will acquire a more robust proficiency in directing, editing, and cinematography. During the first part of the semester, students will be presented with several “challenges” designed to allow them to hone their creative vision while also solving problems behind the camera and in editing. The second half of the course will allow each student time to produce a 6 - 12min digital film project that is either narrative, documentary, or experimental.

Prerequisites: AS.061.145 OR AS.061.150 OR AS.061.152
Instructor(s): J. Roche
Area: Humanities.

AS.061.205. Introduction to Dramatic Writing: Film. 3.0 Credits.

In this course we will explore the basic principles of visual storytelling in narrative film as they apply to the design and execution of a screenplay. During the course of the semester, each student will work on different writing exercises while they search for their specific story and the best way to approach it. We will study different narrative tools and methods of screenwriting by analyzing films to ascertain how they work or fail to do so at script level. Through in-class critiques, group discussions and one-on-one sessions, students will apply these techniques to their own work as they undergo the process of designing, breaking down, outlining and writing a screenplay for a short film. In-class analysis and debate on the strengths and challenges posed by the students’ work will help shape the thematic emphasis of the second half of the course.

Instructor(s): R. Wolfson
Area: Humanities
Writing Intensive.

AS.061.211. Intermediate Film Production: First Person/Third Person Essay Film. 3.0 Credits.

Each student shoots an essay film (16mm color and/or black and white) written either in first person or third person, or perhaps, both. The third person essay incorporates the ideas of various authors while the first person film is written chiefly from personal experience. Each film should run between 4-8 minutes. Lab Fee: $200. This course satisfies the Intermediate Film Production requirement.

Prerequisites: AS.061.150
Instructor(s): J. Mann
Area: Humanities.

AS.061.212. Assembling an Idea: The Documentary Process. 3.0 Credits.

A compelling documentary begins with a compelling idea. (The term “documentary” for our purposes, resists categorization.) But by the time that documentary is completed, the initial idea has likely gone through a radical and rigorous exploration. The initial idea may emerge from a sudden thought, a chance encounter. It is the moment when a constellation begins to form. The final driving idea behind a documentary may bear little resemblance to that first thought. We will begin with each of your ideas, perhaps, little more than a vague feeling. The painter, Paul Klee, wrote that “drawing is taking a line for a walk.” In this course we will take each of your ideas for a walk, imagining why and how the idea might be realized. The why and the how will involve imaginative thinking, seeking additional ideas that coalesce with that first thought. In this way we begin to assemble the constellation that is your idea. To some degree we are less concerned with the initial idea than the subsequent ideas it suggests. The process may involve archival image research, readings, your own writing, listening to music and sounds, and sometimes, just letting your idea wander off on its own. Our goal is to experience the growth of an idea into an articulated intention. That intention is then expressed through a plan incorporating visual style, sound design, and, if appropriate, text. There is no production requirement for this course. There is no requirement of film or video experience. You are required to bring with you an idea that has found you. The point of all of this is for each of you to engage, on a deep and thoughtful level, with an idea that has asked for your help.

Instructor(s): J. Mann.
AS.061.226. Special Topics: Writing About Film. 3.0 Credits.
A workshop that focuses on writing critical and analytical essays about movies recent and classic. Students will write progressively longer and more complex essays—submitting working drafts and making revisions—and participate in critiques and discussions of one another's writings. Fulfills Film and Media Studies expository writing requirement. Lab Fee: $50
Instructor(s): L. Mason
Area: Humanities
Writing Intensive.

AS.061.229. French New Wave. 3.0 Credits.
An exploration of the major films and directors of the French New Wave that is also designed to help students consolidate their skills in the analysis of film. The course will examine the origins of the French New Wave, looking at the directors as critics and as passionate film fans, along with the institutional and historical context of the films. It will also ask how the French New Wave changed the process of filmmaking, and transformed the way we think about the work of the director—inspiring more vocations in filmmaking than any other movement in cinema history. Film screenings T 7:30-10:00PM. $40 lab fee.
Prerequisites: AS.061.140 OR AS.061.141 OR PERMISSION OF INSTRUCTOR
Instructor(s): S. Roos.

AS.061.231. In Others' Words: Documentary as Collage. 3.0 Credits.
"In Others Words" explores an enigmatic relationship between images and words. Each student creates a short, 16mm film incorporating their filmed images with texts written by others (fiction and non-fiction). Guided by the notion of collage, these films become a new form of documentary, bringing together seemingly disparate elements to reconfigure our ways of seeing. Drawing from the photo-text works of Wright Morris and C.D.Wright's poetry, the course adheres to Paul Virilio's suggestion: "sometimes the best way to see better is to look differently." This is not about B roll. $125 lab fee.
Prerequisites: AS.061.150 OR AS.061.140 OR AS.061.151 OR AS.061.152
Instructor(s): M. Porterfield.

AS.061.232. Intermediate Video: Dreams, Psychosis, and Altered States in Cinema. 3.0 Credits.
In this production course, students will create multiple video projects that reflect the representation of dreams, psychosis, and altered states in cinema. We will screen and deconstruct a variety of feature films, video artworks, and music videos to understand the mechanics and language of subjective realism as a narrative form. We will trace this stylistic lineage from its roots in art house cinema to its rise as an accepted Hollywood modality. We will also explore editing and software techniques that will further students' ability to create stunning works of strange beauty. Basic proficiency with digital cameras and editing is required. This class fulfills the intermediate film production requirement.
Instructor(s): J. Roche
Area: Humanities.
**AS.061.239. Film in the Age of Trump. 3.0 Credits.**
As the unprecedented ascendency of Donald Trump has changed the world in record time, so has it changed the way we look at the world. Along with the attendant political and social implications, the rise of Trump has engendered altered perspectives on art and entertainment, posing questions about the power of film in an age of protest. This course will explore how films speak to us differently in this time of political and social upheaval. Through weekly screenings and discussion, a range of JHU faculty will look with fresh eyes at both classic and recent films—from Casablanca to Selma—whose narratives take on new meaning in the age of Trump. In addition, a series of renowned contemporary filmmakers will share their recent work and address how film and filmmaking have changed since the 2016 election. Course requirements are attendance, participation, and 3-4 short response papers. Screening and discussion will take place Wednesdays in the beautifully restored Parkway Film Center, a historic 1915 movie theater that opens in Station North in spring, 2017. $50 lab fee.
Instructor(s): L. Bucknell
Area: Humanities

**AS.061.242. Teens On Screen. 3.0 Credits.**
This course will explore changing representations of adolescence in films from the 1950s to today across a range of mainstream Hollywood, independent, and international films. We'll examine how this dynamic and misunderstood genre shapes and reshapes perceptions of youth, and we'll discuss the frank and sometimes explosive ways teen films address difficult questions of race, class and sexual identity, often in the guise of “pure” entertainment. Recommended Course Background: Introduction to Cinema I or Introduction to Cinema II, or permission of instructor.
Instructor(s): L. DeLibero
Area: Humanities

**AS.061.244. Film Genres. 3.0 Credits.**
$40 lab fee A survey of American genres: the Western, the Gangster Film, Science Fiction, Horror, Comedy, Melodrama, and others. Twice-weekly screenings. Short film responses and a final paper, 10pp.
Instructor(s): L. Bucknell
Area: Humanities

**AS.061.245. Introduction to Film Theory. 3.0 Credits.**
This course offers an introduction to the major paradigms of film theory, with work ranging from Sergei Eisenstein to Andre Bazin. Frequent film screenings are designed to help illustrate film theory concepts. Designed around one operative question, “What is cinema?” the course explores the varied and divergent answers provided by the great thinkers of the cinema in the past century. Students are expected to enter the course ready to engage in discussion. Film screenings W 7:30-10:00 PM.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

**AS.061.248. American Masterpieces. 3.0 Credits.**
An introduction to Hollywood cinema and the basics of film analysis through the close reading of selected 20th century American classics including Citizen Kane, On the Waterfront, Annie Hall, and others. Emphasis on discussion over lecture. Several short film responses and an essay with optional revision.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

**AS.061.249. Film History: Sound and Scores. 3.0 Credits.**
This course will explore the history of film sound from the silent film era to the present day, examining the narrative and aesthetic purpose as well as the functionality of film music. The course will trace the history and development of film music and the process of film scoring through reading, lecture, and film viewing to explore how music and its relationship to film has changed over the last century. Class includes discussion and evaluation of different compositional styles and their purposes. $40 lab fee.
Instructor(s): H. Robbins; T. Dolby.

**AS.061.252. School Daze. 3.0 Credits.**
Teen angst and togas in comedies of American youth from The Graduate to Animal House to Lost in Translation. Course will provide an introduction to the basics of film analysis with an emphasis on discussion over lecture. Several short film responses and an essay with optional revision. No prior experience in the subject required.
Instructor(s): L. Bucknell; L. DeLibero
Area: Humanities
Writing Intensive.

**AS.061.254. Watching the Detectives. 3.0 Credits.**
Films of surveillance and detection from the Humphrey Bogart/Howard Hawks classic The Big Sleep, to Polanski's Chinatown with Jack Nicholson, and David Simon's HBO series The Wire. The course will offer an introduction to the basics of film analysis. No prior experience in film studies required. In-class screenings and emphasis on discussion over lecture. Each student will write regular film responses, give an oral presentation, and write a short essay, 8-10pp., with an optional revision.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

**AS.061.263. Poetry and the Moving Image. 3.0 Credits.**
Using P. Adams Sitney's text: The Cinema of Poetry, this course will explore the relationship between poetry and the moving image. When experimental film began to define itself in the 1950s and 60s the terms cine-poem and film-poem were ubiquitous as identifying avant-garde cinema. Poetic structures in the moving image will be studied in relation to language, images and formation of meaning. Students will independently research a poet who greatly inspired and influenced a filmmaker/moving image artist and write on that filmmaker's work. One moving image project will be undertaken and completed during the semester as well. Weekly assignments will include screenings, reading, writing, and or video work.
Instructor(s): K. Yasinsky
Area: Humanities

**AS.061.264. Acting in Film. 3.0 Credits.**
This class is intended for all students of film with the goal of providing them with the experience of acting in film, in both dramatic and comedic roles. The ability of the students as actors is not the focus. Instead they will understand how the writer, director and cinematographer can influence, inhibit or enhance performance. The students will explore practical methods used on set, different approaches to acting and working with directors, writers and crew. It will also include discussions of professional performances and screenings. Students must have strong verbal skills and be prepared to actively and regularly engage in acting exercises, including improvisation and reading aloud.
Instructor(s): K. Beller
Area: Humanities.
AS.061.270. Writing for the Screen. 3.0 Credits.
An Introduction to dramatic writing for film. Weekly film screenings. Several short, written exercises in story, scene, and character design, and a final complete script for a short film. AS.061.148 Storytelling for Film and Fiction or Introduction to Film and Poetry strongly recommended. This course is the equivalent to AS.061.205 Introduction to Dramatic Writing.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.271. 'Inside Station North' TV/Webcast Show. 3.0 Credits.
Students will create a series of short episodes for a TV magazine show about the Station North Arts District surrounding the Film Centre. The pilot for this series was made by students of JHU and MICA in Spring 2016. You will be part of a small crew interviewing its resident artists and musicians, and covering local performances and events. You will get hand-on experience with background research, writing, liaison, shoot planning, operation of camera and sound equipment, and editing. You will also be involved in the marketing of the show, and broadcasting it via the internet or with the help of networks and distribution partners. A number of guest instructors from different professional fields will be on hand to help during classes. [NOTE: much of the activity around this class takes place outside of Friday class hours. There is online correspondence all week about research, planning and editing. You will need to have most of your Fridays completely free, and shoots may run late into the evening. You will need to organize some of your own transportation and food and drink. There are JHU and MICA shuttles to and from Station North; it is a relatively safe neighborhood, and you will generally be in a group, but you need to be aware of the risk of walking around late at night with valuable equipment!] Lab fee: $100
Prerequisites: AS.061.140 OR ( AS.061.141 AND AS.061.152)
Instructor(s): T. Dolby
Area: Humanities
Writing Intensive.

AS.061.301. Advanced Film Production: The mongrel film. 3.0 Credits.
In this course, each student is responsible for the design and production of a short 16mm film. The film may be shot on color and/or black and white negative stock. The format is Super 16mm. The film may include sync and/or non-sync sound. The idea behind the "mongrel" film is for the student to incorporate a variety of genres within this project. These may include stylistic elements typically associated with documentaries, experimental, narrative, animation, and lost and found films. $125 Lab fee
Prerequisites: AS.061.150 AND AS.061.202
Instructor(s): J. Mann
Area: Humanities.

AS.061.307. In the City. 3.0 Credits.
Glittering or gritty, rich with opportunity or "pestilential to the morals, the health, and the liberties of man": the city in popular film from the silent era to the present. Lab fee: $40
Prerequisites: AS.061.140 AND AS.061.141 or instructor permission
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.313. Story and Character Design: for the Screenplay. 3.0 Credits.
A workshop devoted to developing dimensional characters and compelling, original stories. Weekly screenings, short written exercises, and a longer final project. Weekly screenings M 7:30-10 PM.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.314. Screenwriting: Introduction to Scene. 3.0 Credits.
As painter Robert Henri wrote in his book The Art Spirit, “The repeated study of beginnings cannot be overestimated.” In the first half of the semester, students will be presented with prompts from a variety of media (photography, literature, popular music, et al.) intended to stimulate the imagination and spark original ideas. These ideas will be cultivated and mined for their visual information, with emphasis on all the details that might appear in their filmic representation. In the second half of the semester, students will develop one scenario and carry it through the traditional workflow: outline, treatment, and screenplay. At the end of the semester, students will have prepared short scripts ready for pre-production. $50 Lab Fee. Lab fee: $40
Instructor(s): M. Porterfield
Area: Humanities
Writing Intensive.

AS.061.316. Characters for the Screenplay. 3.0 Credits.
A workshop devoted to creating complex characters for the screen. Students will examine memorable film characters from the silent era to the present, with attention to how these characters are revealed through both the drama and the mise en scene. Weekly screenings. Short critical and creative written exercises and a longer, creative final project.
Prerequisites: AS.061.148 OR AS.061.270 OR AS.061.205
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.323. Masculinities. 3.0 Credits.
Prereq: One Core Course Or Permission From tap dancer to gangster, assassin to anguished teen, versions of the male in film from the silent era to the present. Cross-listed with Studies of Women, Gender, and Sexuality
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.325. The Westerns of Ford, Leone, & Peckinpah. 3.0 Credits.
A study of three masters – John Ford, Sergio Leone, and Sam Peckinpah – their impact on the genre and on each other. Lab fee: $40
Prerequisites: AS.061.140 or AS.061.141 or Permission
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.328. Gangster Films. 3.0 Credits.
The bad guy as hero from Little Caesar to Goodfellas. Film screenings Th 7:30-10:00 PM, Sun 7:00-9:30 PM. Lab fee: $40.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.335. Monster Films. 3.0 Credits.
$40 and one core course or permission required. Monstrous others and monstrous selves in classic 20th century horror.
Prerequisites: AS.061.140 OR AS.061.141 or permission of instructor is required.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.341. The Wilderness Within and Without. 3.0 Credits.
Savage landscapes and savage states of mind in films by Ford, Herzog, Boorman, Weir, and others. Lab fee: $50 Counts toward 300 or 400-level critical studies requirement.
Instructor(s): L. Bucknell
Area: Humanities.
AS.061.343. Deadwood and American Justice. 3.0 Credits.
The course aims at generating well-grounded discussion on issues of justice and social fairness in the wilderness of American westward colonization and spoliation. Issues such as the rule of foul language, chattel sex work, grassroots democracy, gun justice, and other basic elements of the American ethos of conquest and populist sovereignty.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): E. Gonzalez
Writing Intensive.

AS.061.344. The Viewers in the Dark: One Hundred Years of Cinephilia, from Lumiere to Tsai Ming-Liang. 3.0 Credits.
The movies have attracted a devoted following in their first hundred and twenty years. Here, we discuss the act of moviegoing itself, exploring the ways that film fans have traditionally considered themselves in relation to the silver screen, the movie house, and film culture, from the silent era, with its first moments of illuminated wonder at moving pictures, through early cine-clubs in the 1920s and the enthusiastic movements of film critics-turned-filmmakers with the French New Wave in the 1960s, up through the video store boom and bust. How does the way we literally engage with cinema affect the way that we love movies? With our culture now engaging with the rise of the home theater, we consider where we have come from as moviegoers as part of a genealogy of watchers in the dark, and how theorists have positioned themselves as regards the activity. This course also involves a practicum to enable students to think through questions of moviegoing in acts of moviegoing itself, and reflection on the experience. Thinking through how we have felt and thought about movies, we come to some conclusions about both the nature of film art and its most loyal spectator, the cinephile.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.356. Narrative Productions. 6.0 Credits.
This course is designed to immerse students in the creative and practical challenges of narrative production. It is our hope that you will emerge with a greater understanding of the professional structure of a film crew, as well as with an understanding of the collaborative creativity necessary to make a narrative short. We will work hard, but if you are interested in video, film and filmmaking, we guarantee you will learn a great deal. In this course students will be divided into teams, each of which will produce a short narrative film based upon a script written by a fellow student. All films will be fully student produced. Students will fill all principal roles: scripting, casting, producing, directing, designing, shooting, sound recording, and editing. Throughout the course, instructors will expose students to relevant films and film professionals in order to illuminate the key creative roles necessary in the making of any film. Instructors will serve a guiding role in the production of student projects, offering technical information and advice. Students will be evaluated not only on the films they produce, but also on their ability to create and contribute to the collaborative art of filmmaking. Lab fee: $100
Prerequisites: Prereq: AS.061.152
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.358. Directing Actors. 3.0 Credits.
This class, intended for students of film, will explore the theory, practice, and ethics of directing actors for the screen. Texts, screenings, production, and performance exercises will be combined over the course of the semester. The goal of this workshop is to inspire young directors and enhance their ability to communicate with their cast with confidence and empathy.
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.361. Documentary Film Theory. 3.0 Credits.
Counts toward 300 or 400-level critical studies requirement.
Instructor(s): J. Mann
Area: Humanities.

AS.061.364. The Films of Alfred Hitchcock. 3.0 Credits.
Close examinations of Hitchcock’s films from the Lodger to Frenzy. $40 lab fee.
Instructor(s): L. DeLibero
Area: Humanities
Writing Intensive.

AS.061.369. The 1930s in Jazz, Film, and Poetry. 3.0 Credits.
The 1930s in Jazz, Film, and Poetry will focus on three art forms, jazz, film, and poetry, both separately and in conversation with each other during a decade of political, economic, technological, and cultural upheaval. A decade after the invention of amplifiers and public address systems, advances in sound recording and synchronized sound revolutionized film and recording arts. Jazz musicians, filmmakers, and poets collaborated on innovative and radical projects, often funded by the New Deal Federal Writers Project. Team-taught by faculty in Film and Media Studies, the Department of Jazz (Peabody), and the Center for Africana Studies, this course will bring together students from Peabody and the Krieger School of Arts & Sciences to engage with issues of art, culture, and politics during a turbulent decade.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): H. Robbins
Area: Humanities.
AS.061.370. Theorizing Popular Culture. 3.0 Credits.
This course examines popular culture's role in everyday life, tracing its path from its origins to the present. It explores the aesthetics, politics and theory of cinema, television, popular music and internet culture, as well as the study of subcultures and fandom. The endpoint of the experience is to draw students into a more complex and conscious relationship to the mediascape that surrounds them. It also encourages the cultivation of an active practice of cultural critique. Students will debate issues central to a long history of dealing in popular culture, including the potential "dumbing down" of mass culture, the use of artistic formulas in the creation of popular works, the celebration of the popular in the notion of "popular art," representations of race, gender, and sexuality in media, power and the question of the popular, and the basis of taste in media. It will apply it to a range of media as diverse as films, television programs, the punk and "pop" movements, and internet phenomena. A background in writing on media is encouraged. Lab fee: $40
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

AS.061.371. Unrealities: The Fantastic in Film & Fiction. 3.0 Credits.
The fantastic, the absurd, the blackly comic in films by Cocteau, Hitchcock, and others; and in the short fiction of Barthelme, Cortázar, Hrabal, and others. Several short creative exercises and a longer final project.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.372. French Crime Films, Thrillers, and Noirs. 3.0 Credits.
An exploration of French films about crime with a particular focus on the reciprocal relations between French and American cinema: how did the French tradition of poetic realism influence the American film noir—and why is our name for the genre one invented by French critics? How did French directors respond to American genre movies, and to the films of Hitchcock? Screenings will include films by Melville, Godard, Clément, Clouzot, Audiard, and Haneke.
Instructor(s): S. Roos.

AS.061.373. Intermediate Dramatic Writing: Film. 3.0 Credits.
This course will explore different approaches towards understanding the fabric of story as it pertains to film. Students will be exposed to key challenges in conceiving, structuring and executing a compelling, memorable and vibrant feature-length screenplay. By studying key examples, we will discuss possible solutions to these issues. In every class, students will share their work in progress and will help each other find approaches or solutions to their specific challenges and issues. We will analyze films with screenplays that effectively play with the form to create lasting, thought-provoking and affecting stories. Through in-class critiques, group discussions and one-on-one sessions, students will apply new tools and approaches to their own work as they undergo the process of designing, breaking down, outlining and writing a full step outline, a beat sheet and the first ten pages of a feature length screenplay. As the semester progresses, in-class analysis and debate on the strengths and challenges posed by the students' work will shape the thematic emphasis of each class.
Prerequisites: AS.220.204 OR AS.061.205 OR AS.061.270
Instructor(s): R. Buso-garcia
Area: Humanities
Writing Intensive.

AS.061.374. Kubrick/Malick: The Poetics of Space. 3.0 Credits.
Beyond their balding pates, their notorious reclusiveness, and the relative paucity of their output, Stanley Kubrick and Terrence Malick share a mastery of cinematic space. This course will closely examine selected films from their work, with particular emphasis on their visionary manipulation of the epic vastness and lyrical intimacies of screen space. With this primary concern in mind, we will consider the directors' engagement with philosophies of history and time, their experiments with narrative and generic conventions, and their enduring fascination with the relationship between the human and natural worlds. Sunday 7:00pm-9:30pm weekly film screenings. $40 lab fee.
Prerequisites: AS.061.140 OR AS.061.141 OR PERMISSION OF THE INSTRUCTOR.
Instructor(s): L. DeLibero
Writing Intensive.

AS.061.375. Surrealism and Film. 3.0 Credits.
We will define Surrealism through primary texts, including those of Andre Breton, Antonin Artaud and Rene Daumal and other works that defined and influenced the movement in the early part of the 20th century. Using an understanding of the practice of surrealism found in the readings, as well as in surrealist games and automatic writing, we'll study a diverse group of filmmakers influenced by the practice, including Luis Buñuel, Joseph Cornell, Raul Ruiz and contemporary artists such as David Lynch. Assignments include weekly papers and one final creative project. Weekly film screenings Thursday 7:30-10:00 PM. $50 lab fee. Media, Online
Instructor(s): K. Yasinsky.

AS.061.376. Arts and Culture Journalism: Interactive Media, Online Publishing. 3.0 Credits.
Students will participate in the ongoing creation of BmoreArt.com, an online arts and culture publication that serves the Baltimore community. In conjunction with visiting professionals, students will investigate the Baltimore cultural community and create different types of editorial content using interactive media including film, video, sound, and writing. Students will produce creative content utilizing their individual areas of expertise - such as visual art, art history, music, literary arts, film, and theater - while working together as a professional organization. A strong emphasis will be placed on the student's collaborative participation and creative experimentation. Students with differing backgrounds in media will approach this project from unique perspectives, which will be valued and cultivated. Students with previous experience in journalism are welcome. An introductory writing or film course is suggested as a prerequisite.
Instructor(s): C. Ober
Area: Humanities
Writing Intensive.

AS.061.378. Automatic Animation. 3.0 Credits.
A hand-made, 2-D animation course based on ideas of automatism. Students will create their own animated movie during the semester. Readings will included Dada and Surrealist texts, poetry and theory of poets including Eisenstein, Breton, Desnos, P. Adams Sitney and Lyn Hejinian. Weekly film screenings will include animations and experimental films using automatism for image and/or structural generation. Sounds ideas will be discussed and pursued related to the ideas explored throughout the semester. $125 lab fee.
Instructor(s): K. Yasinsky.
AS.061.379. Audio for Video. 3.0 Credits.
This 3-credit, 300-level class covers all creative and technical aspects of working in Logic X and ProTools to create professional soundtracks for film, video, commercials and games. It will enable filmmakers, composers and recording arts students to learn how to import and synchronize QuickTime video; 'spot' a clip; create tempo maps and click tracks, and blend the three key elements of film sound—dialog, music and effects. Classes will be mainly taught with students at individual workstations, though some classes will be held on the soundstage (for mixing and live recording techniques) as well as in the recording studio (dubbing and mixing.) Prerequisites: at least one production course (Intro to Film/Video Production, or Recording Arts); plus fluency in either Logic, ProTools, Final Cut or Premier.
Prerequisites: AS.061.150(C), AS.061.152(C), or other introductory film production course; fluency in either Logi, ProTools, Final Cut or Premier.
Instructor(s): T. Dolby

AS.061.380. French Cinema of Immigration, Cultural Identity, and Difference. 3.0 Credits.
An exploration of a series of contemporary French films that bear witness to the contemporary reality—crucial to current politics and to the French presidential elections of 2017--of France as a multi-ethnic society and ask essential questions about cultural identity. Is cultural and ethnic identity something that you are born into or is it a role that you elect or perform? How should individuals living today understand their relation to historical injustices? Are there things that we can learn only through relationships with people from other cultures? Screenings include works of Abbadélaïf Kechiche, Jacques Audiard, Michael Haneke, Mathieu Kassovitz, Claire Denis, the Dardenennes. Recommended Course Background: AS.061.140, AS.061.141, or an expository writing course.
Instructor(s): S. Roos
Area: Humanities.

AS.061.381. Sound on Film. 3.0 Credits.
This 3-credit upper-level course will offer undergraduates from both JHU and MICA an unprecedented opportunity to collaborate on all aspects of designing soundtracks for film. Utilizing a combination of pre-existing and in-progress pieces, student filmmakers will create soundtracks, from the initial phases of concept, ‘spotting’, and ‘tempering’ through to composition and scoring in the final stages of recording, sound syncing and mixing. Students will work in small teams in a lab setting to create their soundtracks, exploring a variety of scenarios, following the post-production process typical of today’s film industry. Lab work will be supplemented by guest lecturer presentations on various aspects—practical, theoretical, and historical—of applying sound to film. Guests may include sound designers and engineers, composers, editors, and filmmakers working in live action, animation, and documentaries. At weekly screenings of classic and contemporary cinematic masterpieces students will analyze the evolving art and craft of the film soundtrack, applying the principals in their lab exercises. Lab fee: $50
Instructor(s): T. Dolby
Area: Humanities.

AS.061.388. Cinema Workshop - Cannes Film Festival. 3.0 Credits.
This workshop provides students with access to professional events at the Cannes Film Festival, including screenings, non-competitive programs, tributes, master classes and directors’ showcases. Students are expected to participate in festival events and take an active role in organized discussions, critiques and dialogues. Written and oral assignments. Special Application: Open to JHU Cannes Program participants only.
Instructor(s): L. Mason
Area: Humanities.

AS.061.389. Women Making Movies (Europe). 3.0 Credits.
This course introduces students to some of the most exciting female directors of the 20th century, asking how gender shaped the production and reception of their films. Do particular directors attribute any significance to the fact of being a woman? Does a director’s gender shape her choice of subject or how she represents it? Does wider knowledge of works directed by women change our sense of the canon and authorship? Covers non-U.S. films, strongly encouraged for FMS majors and minors. Cross-listed with WGS. No pre-requisite.
Instructor(s): L. Mason
Area: Humanities.

AS.061.391. Love and Film. 3.0 Credits.
In this course, we explore different understandings of "love" and the way that film has dealt with the concept as a medium. We explore a variety of approaches to the question of "love" - from the agapic to the familial to the romantic - through a series of interdisciplinary readings ranging from philosophy to anthropology. We will also equally explore the question of how film has engaged with the question of love as a concept, and what depictions of human affection - from the general to the personal - it has offered us. Screenings are required for this course. $40 Lab fee. Cross-listed with Study of Women, Gender and Sexuality.
Instructor(s): M. Ward
Area: Humanities.

AS.061.393. Violent Attractions. 3.0 Credits.
Violence, ritualized and anarchic, celebrated and deplored in popular film from silent era melodrama and slapstick comedy to contemporary sports, crime, and combat films. Twice-weekly screenings; oral presentation; two essays, 6 & 12 pp. Lecture Wednesday 4:30-7pm, Screenings Monday/Tuesday 7:30-10pm. Lab fee: $40
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.396. Modern Paris on Film. 3.0 Credits.
This course uses French film to examine the history of twentieth-century Paris. We will consider how filmmakers interpreted the social, political, and technological transformations that shaped Paris in the modern era, treating movies as expressions of change and means by which filmmakers comment on it. Taught in English. Film screenings Monday/Thursday 7:30-10:00 PM. $40 lab fee
Instructor(s): L. Mason
Area: Humanities.

AS.061.397. French Masculinities. 3.0 Credits.
Examines changing ideals of masculinity in France after 1960 as they offered us. Screenings are required for this course. $40 Lab fee. Cross-listed with Study of Women, Gender and Sexuality.
Instructor(s): L. Mason
Area: Humanities.

AS.061.399. Stop-Motion Puppet Animation. 3.0 Credits.
Students will create their own stop-motion models (puppets) based on a wire armature model. In small groups, students will design and create a simple set and make a short stop-motion movie using a DSLR camera. The question of "why animate" will be explored in student projects and responses to screenings. We will study the history of stop-motion pupil animation from Starewicz to Svankmajer to Nick Park.
Prerequisites: AS.061.140 OR AS.061.141 OR AS.061.150
Instructor(s): K. Yasinsky
Area: Humanities.
AS.061.403. Sound on Film II. 3.0 Credits.
This course continues the explorations in sound and music for film begun in AS.061.381. This 3-credit upper-level course, sponsored by the Film and Media Studies Program at JHU and the program in Recording Arts and Sciences at the Peabody Institute, offers undergraduates and faculty/staff from both institutions an unprecedented opportunity to collaborate on all aspects of designing soundtracks for film. Classic and contemporary film scores are screened and analyzed. Then, using their own short films, students from the Film and Media Studies program work with Peabody students to create soundtracks, from the initial phases of 'spotting', composition and scoring, through the interim stages of studio recording and sound syncing, and on to final mixing of music with dialog and sound effects using industry-standard Digidesign ProTools. Students work in small teams in a lab setting to create their soundtracks, exploring a variety of scenarios, including the implications of image-driven music vs music-driven images, and the various uses of acoustic and electronic sound. The course also touches on the logistics of music budget, licensing and copyright. Lab work is supplemented by guest lectures and faculty presentations on various aspects - practical and theoretical - of applying sound to film. Guest lecturers may include sound designers and engineers, composers, editors, and filmmakers working in live action, documentary or animated film. Screenings are provided on Sundays from 7:30-10:00 PM. In order to be admitted to the course, students must have completed at least one 5-10 minute short film to be used for scoring a soundtrack during the semester. $40 lab fee.
Instructor(s): T. Dolby.

AS.061.404. Advanced Dramatic Writing: Film. 3.0 Credits.
Intensive workshop course where students will write both a first draft and a full revision of a feature length screenplay. Classes will be designed and centered on the specific challenges of the students' works-in-progress, with an emphasis on exploring and discussing different narrative approaches and solutions that will enhance their writing and revision processes. Select films will be screened and analyzed as they pertain to the students' scripts. Students will aim to have a polished draft of their screenplay to be submitted to industry-recognized screenwriting labs at the end of the semester.
Instructor(s): R. Buso-garcia
Writing Intensive.

AS.061.405. Deep Listening: Sound Studies in Film and Media. 3.0 Credits.
This course explores the sonic elements of film and media studies, and encourages a form of deep and attentive listening in students. Analyzing film, television, music, sound art, and the newer platforms for sound media, it teaches students the tools for sound analysis as well as the basics of sound theory. This course is designed to allow a deeper sonic appreciation of the media created that is created with the ears in mind, even more than the eyes. In this way, it works to "fill in" what is often missing from an education in media studies - a focus on the other sense of the audio-visual media we experience every day. Lab fee: $50 Counts toward 300 or 400-level critical studies requirement.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Ward
Area: Humanities.

AS.061.406. Animating Cartoons. 3.0 Credits.
A hand-drawn animation class focusing on the production of a character driven animation. The history of character animations will be studied through screenings and readings, and each student will produce an animation from their original cartoon or comic, or, work on a re-interpretation of an old cartoon animation using rotoscoping. Including in-class animation exercises. Lab fee: $50
Prerequisites: AS.061.219 OR AS.061.378 OR AS.371.140 OR permission of instructor
Instructor(s): K. Yasinsky.

AS.061.413. Lost & Found Film. 3.0 Credits.
This course explores various elements of film production and filmic expression through a somewhat nebulous field typically described as lost films. Lost films (or as they are sometimes called, "orphan" films) can be generally described as films that have, for a variety of reasons, fallen out of the public view. They frequently come from educational, scientific, medical, or industrial films from the 1950s and 1960s. Using these films as source materials, lost film filmmakers explore and expose cultural conventions, visual icons, and historical value materials. Each week, students are responsible for re-editing sources found on an internet archive site. The assignments follow thematic concerns related to film editing. Students complete a final project (4-8 minutes). All editing for the course is accomplished with non-linear software, generally Adobe Premiere or Final Cut.
Instructor(s): J. Mann
Area: Humanities.

AS.061.421. History and Film. 3.0 Credits.
How do films inform, shape, or fundamentally alter our sense of the past? What are the strengths and limitations of cine-history? This course pairs traditional and avant-garde fiction films and documentaries with essays about history, historiography, memory and the political uses of the past to investigate fast-changing relationships between image and text, film and history. Lab fee: $50 Counts toward 300 or 400-level critical studies requirement.
Instructor(s): L. Mason
Area: Humanities
Writing Intensive.

AS.061.440. Senior Capstone Project: Production. 3.0 Credits.
Permission Required. Production track students complete an independent film project.
Prerequisites: AS.061.240, AS.061.301, AND AS.061.304
Instructor(s): J. Mann; M. Porterfield; M. Ward
Area: Humanities.

AS.061.441. Senior Capstone Project: Critical Studies. 3.0 Credits.
Critical studies track students complete an independent research project.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.443. Sen Proj-Digital Vid Prd. 3.0 Credits.
Instructor(s): J. Mann; J. Roche; M. Porterfield
Area: Humanities.

AS.061.501. Independent Study - Film. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.061.502. Independent Study:Film & Media. 3.0 Credits.
For students who wish to explore an aspect of film studies not covered by existing courses. The course may be used for research or directed readings/viewings and should include one lengthy essay or several short ones as well as regular meetings with the adviser. Permanently required:
Lab Fee: $100 (if production related)
Instructor(s): Staff.
Cross Listed Courses

English

AS.060.379. Stage and Screen. 3.0 Credits.
Shakespeare's King Lear has a paradoxical reputation in that it is arguably the greatest drama in English, yet it cannot be performed on stage, at least not without sacrificing its dramatic power. What happens when this notoriously unstageable play is turned into a film, as in Akira Kurosawa's epic masterpiece Ran? Does Kurosawa compensate for the limitations of the stage? What is gained or lost when the drama takes place in Japanese instead of Shakespeare's blank verse? This course will examine the ways that playwrights, theatre producers, and filmmakers manage the dramatic possibilities of text, stage, and cinema. Alongside their cinematic counterparts, we will read tragedies by Shakespeare, Marlowe, and Goethe, eighteenth-century comedies, and modernist dramas, and as a class, we will discuss the often fraught transition between literary text and dramatic spectacle. How do filmmakers convey psychological states through camera techniques and editing that are unavailable to producers of live performances? What dramatic effects can be achieved in the intimate setting of a theatre that are impossible at a twenty-screen cineplex, or on your couch while streaming Netflix? Along with addressing these questions, the course is intended to cultivate active, informed viewership in conjunction with close readings of the plays themselves. Authors likely to be included: Shakespeare - Romeo and Juliet, Hamlet, King Lear; Marlowe - Doctor Faustus; Goethe - Faust; Wycherley - The Country Wife; Congreve - The Way of the World; Samuel Beckett, Tennessee Williams, Arthur Miller, Rabindranath Tagore, Henrik Ibsen. Visual media will include recordings of performances and adaptations by Lawrence Olivier, Kurosawa, Satyajit Ray, Andrei Tarkovsky, Jan Svankmäjer, and Dangerous Liaisons, starring Glenn Close and John Malkovich, plus the broadway musical, Damn Yankees!
Instructor(s): J. Hoffmann
Area: Humanities
Writing Intensive.

Anthropology

AS.070.262. Cuban Intellectuals, Cinema, and the State. 3.0 Credits.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.

AS.070.337. Digital Media, Democracy, and Control. 3.0 Credits.
This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.346. Cinema and Ethnography. 3.0 Credits.
Films, like ethnographies, stage encounters with foreign worlds. We will investigate this parallel by examining, side-by-side, cinematic and anthropological representations of subjects like environmental conflict, urban poverty, religious pilgrimage and media culture.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.
History
AS.100.499. Film and Propaganda in Nazi Germany. 3.0 Credits.
By examining a range of cinematic works—from explicitly ideological pseudo-documentaries to entertainment films—this course will explore the transmission of propaganda into the everyday culture of Nazi Germany.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

German Romance Languages Literatures
AS.211.174. Media of Propaganda. 3.0 Credits.
Today, promoting a particular political or personal point of view is not viewed as "propaganda," but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term "propaganda" will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.330. Curating Media Artists in Residence at JHU. 3.0 Credits.
Curating Media Artists in Residence at JHU: students will be closely involved with JHU’s Center for Advanced Media Studies (CAMS), and the Baltimore Museum of Art (curator Kristen Hileman) in preparing technical aspects of the BMA Black Box exhibit of the 16mm film, Captain Gervasio’s Family, by the internationally acclaimed artist duo Tamar Guimarães and Kasper Akhøj. This black and white silent film is a portrait of a Spiritist community in Palmela, a small town in Brazil, where half of the inhabitants are believed to be psychic mediums. In addition, students will be involved in helping curate an artist talk and panel on the topic of “Documenting the Spiritual” with the Stanford anthropologist Tanya Luhrman, and other experts on religious practices from Brazilian shamanism to various religious and spiritual practices from our own Baltimore communities. Further, students will have the unique opportunity to see some raw footage from the artists’ latest documentary film project, part fieldwork and part staging, that engages with the Palmelian psychic mediums’ cosmological perspectives. Says Tamar Guimarães: “If Captain Gervasio’s Family tied the medium’s journey into the after-life’s boundless and phantasmal modernity to cinematic spectrality—where cinema, the ultimate modern medium is also the ashen-grey world of the haunted and the ghostly, the new film will insist on the mediums’ technological inventions. Please note that the class time will be flexibly adapted to the needs of the artists’ residency. If you have a very full calendar in the Spring it is best advised not to take this class.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.412. Temps et recit dans le cinema francais. 3.0 Credits.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.

AS.213.305. Contemporary German Film. 3.0 Credits.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarck’s The Lives of Others (Academy Award for Best Foreign Language Film, 2005), Caroline Link’s Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s Head-Over (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s Goodbye, Lenin! (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School" or “Nouvelle Vague Allemande”. Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 — discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.1.430. "What is an Image?" - Technology, Art and Visual Culture around 1900. 3.0 Credits.
Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Instructor(s): J. Schade
Area: Humanities.

AS.213.349. Weimar Cinema: The Golden Age of German Film. 3.0 Credits.
Taught in German. German cinema of the 1920s is regarded as one of the "golden ages" of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception; Expressionism in film; technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): E. Strowick.
AS.213.361. The Holocaust in Film and Literature. 3.0 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.214.689. Flânerie and Female Authorship in Contemporary Italian Cinema.
This course examines the prolific production of Italian women filmmakers inscribing their work into a national cinematic tradition. The most prominent visual leitmotif in films by directors such as Marina Spada, Francesca Comencini, Alice Rohrwacher and others, is that of the wandering woman contemplating the cityscape. What does the act of walking signify in these works? How do these filmmakers embrace and transform Italy’s cinematic tradition? After highlighting the figure of the city-walker in post-war classics by Roberto Rossellini and Vittorio De Sica, we shall discuss from a gender perspective films such as Fellini’s Nights of Cabiria, Pasolini’s Mamma Roma, and Antonioni’s La Notte, which feature female city-walkers who stroll throughout urban peripheries created during the country’s rush toward modernity. Then, we shall analyze the work of women directors who recurrently employ the narrative strategy of flânerie to construct female narratives of displacement and liminality. We shall question how and to what extent this contemporary cinematic production is indebted to the masters of neorealism and the auteurs from the sixties. Critical and theoretical readings will include essays by Michel de Certeau, Siegfried Kracauer, Janet Wolff, Elizabeth Wilson, Anne Friedberg, Giuliana Bruno, and others.
Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.

AS.215.451. El Cine de Pedro Almodovar. 3.0 Credits.
El arte cinematográfico del gran cineasta español será estudiado a través de su obra, vista en partes selectas, obras enteras y dentro del marco escénico provisto por otras películas del cine español. Recomendado.
Course Background: AS.210.326 or demonstrated proficiency in the language.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism. 3.0 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.216.307. Reflective Mirrors: Israeli and Palestinian Cinema. 3.0 Credits.
Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.398. Zionism: Literature, Film, Thought. 3.0 Credits.
This course studies the relation between Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the history of Zionism and its influence on Israeli culture. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films. Students wishing to do additional work in Hebrew should enroll in section 2 where students will meet for an additional hour at a time TBD and will earn 4 credits for the course.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.412. The Divine in Literature and Cinema. 3.0 Credits.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.
Writing Intensive.
Area: Humanities
Instructor(s): R. Buso-garcia
screenplay Chinatown will be used as a basic text. Each student will adapt and visualize a portion of his/her "screenplay-in-progress" to the class for discussion. The elements of foreshadowing, the element of surprise, text and subtext, act structure, and visual storytelling will intensively focus on character development, creating "believable" cinematic dialogue, plot development, conflict, pacing, dramatic foreshadowing, the element of surprise, text and subtext, and visual storytelling. Several classic films will be analyzed and discussed (PSYCHO, BLADE RUNNER). Students will learn professional screenplay format and write an 8-12 page screenplay that will be read in class and critiqued.

AS.220.204. Introduction to Dramatic Writing: Film. 3.0 Credits.
Screenwriting workshop. This course will look at the screenplay as both a literary text and blue-print for production. Several classic screenplays will be analyzed. Students will then embark on their own scripts. We will intensively focus on character development, creating "believable" cinematic dialogue, plot development, conflict, pacing, dramatic foreshadowing, the element of surprise, text and subtext, and visual storytelling. Several classic films will be analyzed and discussed (PSYCHO, CHINATOWN, BLADE RUNNER). Students will learn professional screenplay format and write an 8-12 page screenplay that will be read in class and critiqued.

Instructor(s): M. Lapadula
Area: Humanities
Writing Intensive.

Writing Seminars
AS.220.337. Intermediate Dramatic Writing: Film. 3.0 Credits.
An intensive workshop focusing on methodology: enhancing original characterization, plot development, conflict, story, pacing, dramatic foreshadowing, the element of surprise, text and subtext, act structure, and visual storytelling. Each student is expected to present sections of his/her "screenplay-in-progress" to the class for discussion. The screenplay Chinatown will be used as a basic text.

Instructor(s): R. Buso-garcia
Area: Humanities
Writing Intensive.

AS.220.406. Readings in Fiction: Hard-Boiled Fiction and Film Noir. 3.0 Credits.
Students read six novels by Hammett, Chandler, Cain, Burnett, and Woolrich and view seven films made from these novels by Huston, Hawks, Wilder, Dmytryk, Richards, Walsh, and Farrow. Cross-listed with Film and Media Studies.
Instructor(s): J. Irwin
Area: Humanities
Writing Intensive.

Humanities Center
AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies. 3.0 Credits.
Comedy and musical comedy film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare films of the era in a variety of genres (musical, epic, Western, drama), examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.353. Present Mirth: Stages of Comedy. 3.0 Credits.
A comparative survey of presentational comedies from Aristophanes to Beckett on stage and screen, with some attention to the vexed question of theories of comedy [no laughing matter].
Instructor(s): O. Mehrghan; R. Macksey
Area: Humanities.

AS.300.366. Russian Avant-Garde Cinema. 3.0 Credits.
Russian cinema was born out of the intense artistic experimentation of the fin-de-siècle avant-garde and developed in a climate of dramatic political and cultural change in the twenties and thirties. While subject to draconian censorship in the Soviet period, it nonetheless engaged in active dialogue with the film industries of Western Europe and America and had a lasting impact on world cinema. This course examines the extraordinary flourishing of avant-garde cinema in the Soviet Union in the 1920s and 30s including films by Eisenstein, Vertov, Pudovkin, and Dovzhenko, their theoretical writings, and their far-reaching influence on film and film theory. All readings in English, films subtitled in English.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.399. Cinema and Philosophy. 3.0 Credits.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): P. Marrati
Area: Humanities.

Center for Africana Studies
AS.362.374. Black Cinema. 3.0 Credits.
Close examination of films directed by African American filmmakers as well as a focus on historical and cultural representation of African Americans in American film.
Instructor(s): H. Robbins; L. DeLibero
Area: Humanities.
Art
AS.371.303. Documentary Photography. 3.0 Credits.
In this hands-on course, we will explore different genres of documentary photography, including the fine art document, photojournalism, social documentary photography, the photo essay and photography of propaganda. Students will create a semester-long photo-documentary project on a subject of their choice. They will put theory into practice on field trips, visiting some of Baltimore’s unique neighborhoods. Digital SLRs will be provided. Attendance at first class is mandatory.
Instructor(s): P. Berger
Area: Humanities.

German and Romance Languages and Literatures
http://grll.jhu.edu/

The Department of German and Romance Languages and Literatures offers graduate and undergraduate courses in the languages, literatures, and cultures of France, Germany, Italy, Portugal, Latin America, and Spain. The language program includes a wide range of courses from introductory through conversation and composition to civilization. The literature program treats all periods of literature from both historical and critical-theoretical perspectives. These courses emphasize the close reading of texts and modern theories of literary criticism, particularly those based on contemporary philosophy, psychoanalysis, anthropology, and linguistics. In addition, an active program of visiting professors and lecturers complements the core program offered by the faculty-in-residence.

Facilities
The Milton S. Eisenhower Library has collections that provide an ample basis for advanced research in the German and Romance languages and literatures. With the Peabody Library of The Johns Hopkins University in Baltimore and the Library of Congress and other libraries in nearby Washington, a variety of excellent research resources are available to students and faculty.

Undergraduate Programs
A major in the department prepares students for teaching language at the elementary level or for graduate work leading to advanced degrees in French, German, Italian, Latin American, Portuguese, or Spanish studies, or in comparative literature. It also provides excellent background for work in fields such as philosophy, history, international affairs, business, law, or medicine. Opportunities are available to study abroad. Students are encouraged to take advantage of these opportunities.

Requirements for the B.A.
Also see Requirements for a Bachelor’s Degree (http://e-catalog.jhu.edu/archive/2017-18/undergrad-students/academic-policies/requirements-for-a-bachelors-degree).

Currently, the B.A. degree is offered in French, German, Italian, Romance Languages, or Spanish. A candidate for the B.A. degree in the Department of German and Romance Languages and Literatures should have a good command of the spoken language of his or her specialization, and a general familiarity with the literature written in that language. Each major requires a minimum of 24 hours (or eight courses) beyond the first two years of language instruction; please see specific details for each individual major below. The department also recommends that majors take courses in other literatures, history, philosophy, and anthropology.

The student who has had four years of German or a Romance language in high school or two years of German or a Romance language in college normally begins the major with Conversation and Composition (provided they have results commensurate with that level on the placement test) and (where offered) the undergraduate survey of literature. It is recommended that any student majoring in German or a Romance language spend at least one semester of junior year taking university courses in the country of study. Study abroad credit transfer is arranged by the student in consultation with the director of undergraduate studies and/or the relevant undergraduate language program director, and the Office of Study Abroad. In the senior year, a major may be permitted to take courses in the department at the graduate level.

A minor in German or one of the Romance languages is available to undergraduate students in any major. Like the various majors, the minors allow students to develop competence in German or a Romance language while receiving grounding in the culture and literature of that language. Five or six courses in the department beyond the first two years of language study are required for each minor option (see below for details).

French
French Major
The requirements below are for students starting at Hopkins in 2016/17 and later. Current juniors and seniors should refer to archived catalog versions.

All major requirements must be completed with a grade of C or better and may not be taken satisfactory/unsatisfactory. Requirements are:

Elective Courses *
12

Up to one (1) course listed under 210.3xx/4xx may be counted towards the major.

Up to one (1) course listed as 211 “French” may be counted towards the major.

At least one (1) course listed under 212.4xx is required for the major.

Any remaining electives must be 212.3xx/4xx.

Total Credits 30

* No more than one course may be taught in English.

Meeting each semester with the appointed faculty advisor is essential to ensuring a coherent and adequate course of study. Advising holds for
majors and minors will only be released once the choice of coursework for the next semester has been discussed in full with the faculty advisor. As a rule of thumb, majors should make every effort to diversify their course choices in terms of period and approach.

**Note about courses taken in study abroad programs:**

A maximum of two upper-level courses can count toward the minimum requirements for the major under the AS212 prefix. Other courses can count only as additional transfer credits or as the equivalent of either Introduction à la littérature I or Introduction à la littérature II or, in exceptional cases, La France Contemporaine.

Any study abroad course that a student wishes to substitute for a JHU course must be pre-approved by the French Study Abroad Advisor before departure and re-approved by the French Study Abroad Advisor upon return and upon submission of ALL materials from the course. Because courses for which pre-approval is granted before departure may not in fact be offered, or be offered in a substantially different form, students must keep in close contact with the French Study Abroad Advisor during the initial weeks of the stay to ensure pre-approval for the final academic program.

For further information about study abroad credits, please see the study abroad page on the GRLL website (http://grll.jhu.edu/french/study-abroad).

**Honors in French**

Honors in French will be granted to majors who entered before Fall 2016 whose course work for the French major is completed at a GPA of 3.7 or higher.

For students entering in Fall 2016 or later, qualified majors meeting minimal GPA requirements (3.7 in all French classes) are eligible to complete a four-credit capstone thesis bearing Honors in French. This includes the 1-credit "Thesis Prep" and the 3-credit "Senior Thesis." Note that these courses, usually taken in the Senior year, are in addition to the 10 required three-credit courses.

**Sample 4-year plan**

Students with previous exposure to French must take a web-based language placement test to determine the appropriate course level in which to enroll (Elements, Intermediate, Advanced, or an introductory upper-level course offering in French).

The plan below is conceived as a guideline for students starting with no previous skills or high school coursework in the French language. Beginning the three-tier language sequence in the Fall of the first year of matriculation is strongly recommended so that all major requirements (10 courses, taken at the Advanced 300-level and higher, for a total of 30 credits) can be completed by the senior year. The calendar of study may be accelerated by participation in a summer or semester-long Study Abroad-approved program in a French-speaking country. Note that of the ten courses required for the French major, only one may be a course taught in English (indicated under both the the 211 and 212 prefixes with a GRLL-ENGL pos tag).

**French Minor**

All minor requirements must be completed with a grade of C or better and may not be taken satisfactory/unsatisfactory. Please see the French Study Abroad page on the GRLL department website for restrictions on study abroad courses for minor credit. Students are expected to consult with either the Director of Undergraduate Studies or the appointed French faculty advisor to review all elective course selections.

German

German Major

Students are encouraged to declare their intent to major or minor in German in their sophomore year and to make an advising appointment with the Director of Undergraduate Studies to discuss their academic plans, including options for a study abroad semester or year.

Students must complete a minimum of 27 credit hours in German beyond AS.210.262 Intermediate German II.

Majors are required to complete the Advanced German sequence (AS.210.361 Advanced German I: Cultural Topics of the Modern German-speaking World and AS.210.362 Advanced German II: Contemporary Issues in the German Speaking World, which counts for 6 credits and is a prerequisite for upper level 213.xxx seminars taught in German. Of the remaining 21 credit hours, majors choose courses designated as 210.3xx; 211.xxx (with POS-TAG GRLL-GERM) and 213.xxx. A minimum of 12 credits must be completed in German literature, culture and thought in courses designated as 213.xxx. No more than 6 credit hours of translation courses may be used to fulfill major requirements. All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

The department strongly advises its majors to gain a knowledge of a second foreign language.

Major requirements are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.210.361</td>
<td>Advanced German I: Cultural Topics of the Modern German-speaking World</td>
</tr>
<tr>
<td>AS.210.362</td>
<td>Advanced German II: Contemporary Issues in the German Speaking World</td>
</tr>
<tr>
<td>12 credits of AS.213.xxx courses</td>
<td>12</td>
</tr>
<tr>
<td>9 credits of additional German courses *</td>
<td>9</td>
</tr>
<tr>
<td>Total Credits</td>
<td>27</td>
</tr>
</tbody>
</table>

* Additional German language above the advanced level and literature, culture and thought courses apply.

Honors in German

The Department of German offers an Honors Program for highly qualified undergraduates. Students must have a minimum GPA of 3.5 to qualify for the program. Students will work on a project in German literature and thought under the guidance of a faculty advisor. The program is completed by a senior essay more comprehensive in scope than a seminar paper. Students interested in the honors program should meet with the Director of Undergraduate Studies no later than the spring semester of their junior year to discuss the requirements and outline the research project to be conducted the following year.

Sample 4-year plan:

The following 4-year plan presents a sample guideline for students starting with no prior knowledge in German. Beyond the completion of the Advanced German sequence, German major requirements stipulate a specific number of credit hours of language (210) and literature, culture, and thought (213) courses but not the completion of particular courses. Hence, the selection of courses suggested below is just a suggestion; students are free to choose other courses and vary the sequence as long as they complete the total number of credit hours and do not exceed the maximum number of credits for courses taught in English. Students with prior knowledge in German must take the departmental placement exam before registering for a German class. It is recommended that they discuss specific arrangements for the completion of their requirements with the DUS.

German Minor

Students are encouraged to declare their intent to major or minor in German in their sophomore year and to make an advising appointment with the Director of Undergraduate Studies to discuss their academic plans, including options for a study abroad semester or year.

Students must complete a minimum of 18 credit hours in German beyond Elementary German (210.161-162) and Intermediate German (210.261-262).

Minors are required to complete the Advanced German sequence (210.361-362), which counts for 6 credits and is a prerequisite for upper-level 213.xxx seminars taught in German. Of the remaining twelve (12) credits, minors choose courses designated as 210.3xx; 211.xxx (with approval) and 213.xxx. A minimum of three (3) credits must be completed in German literature, culture and thought courses designated as 213.xxx. No more than three (3) credits of translation courses may be used to fulfill minor requirements. All minor requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.
German B.A./M.A. Degree

The department offers highly qualified Hopkins undergraduate students the option to complete a combined degree in five years. Please see the Graduate tab for details.

**Italian Major**

Language courses through Intermediate Italian I and II (AS.210.251-252) or equivalent placement as well as Advanced Italian I and II (AS.210.351-352). Two courses (6 credits) from the "Italian Journeys" series, including "Medieval and Early Modern" (AS.214.362) and "Modern and Contemporary" (AS.214.363). Four courses (or the equivalent of 12 credits) from the Italian Culture series (AS.211.200-499) and the Italian Literature series (AS. 214.200-499). May also include one course in Italian film/history/art history (as long as it is approved by the DUS) and one independent study in the senior year (taken after completing an Italian Literature series course). At least two of the four courses (or the equivalent of 6 credits) must be conducted in Italian. All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

**Required Core Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.210.351 Advanced Italian I</td>
<td>3</td>
</tr>
<tr>
<td>AS.210.352 Advanced Italian II</td>

<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two AS.211.2xx-4xx or AS.214.2xx-4xx taught in Italian</td>
<td>6</td>
</tr>
<tr>
<td>Two AS.211.2xx-4xx (related to Italian) or AS.214.2xx-4xx taught in English or Italian</td>
<td>6</td>
</tr>
</tbody>
</table>

* Please note that the Italian program offers 1-credit courses in Italian culture (211.xxx) taught in English that can be freely combined as long as the total number of credits taken satisfies the general requirements.

**Honors in Italian**

Students have the opportunity to earn honors in the major by successfully completing an honors senior essay. Italian majors who select this option may enroll, during either fall or spring semester of their senior year, in a for-credit independent study dedicated to the preparation of the honors senior essay.

**Sample 4-year plan:**

The plan is conceived as a guideline for students starting with no previous skills in Italian language. The sequence of language courses is strongly recommended in order to complete all the requirements for the major by senior year. It is conceivable, though, to postpone Italian Elements to sophomore year. The sequence of courses below is just a suggestion; the sequence can be arranged otherwise as long as (1) the student majoring in Italian takes two courses from the "Italian Journeys" series; and (2) at least two of the remaining four courses are taught in Italian. One independent study in the senior year is acceptable towards the completion of the requirements and is required to graduate with honors in Italian. Students with previous skills in Italian are recommended to take a language placement test and discuss with the DUS specific arrangements for the completion of their requirements.
America. Today, there are more than 200 million native Portuguese
speakers throughout the world from Angola to Brazil and from Portugal
to the distant island nation of East Timor in the Pacific. The Portuguese
program in the Department of German and Romance Languages and
Literatures offers not only the three levels of language training, but
also a growing number of courses on literature as well as the culture
and civilization of Brazil. We do not currently offer a major or minor in
Portuguese but Portuguese may be used as the third language in the
three-language option of the Romance Languages major.

Romance Languages Major
The Department offers a Romance Languages major in two different
configurations: a dual-language option, where the student specializes
in two Romance languages, and a three-language option, where the
student specializes in three Romance languages. Students interested
in pursuing a Romance Languages major should get in touch with the
Directors of Undergraduate Studies for each language. Students majoring
in Romance Languages will be assigned an advisor for each relevant
language, including a primary advisor in their main field of specialization.

All major requirements must be completed with a grade of C- or better
and may not be taken satisfactory/unsatisfactory

**Required of All Romance Languages Majors**

**Three Language Options**
Students must complete the requirements of two languages (French,
Italian, or Spanish) as described in the Languages 1 and 2 section and
also complete the requirements of an additional language (French,
Italian, Portuguese, or Spanish) as described in the Language 3 section.
Students must also take the capstone course, AS.211.400 Topics in Romance Literatures.
Languages 1 and 2

French
AS.210.301 Advanced French I: Achieving Accuracy 3
AS.210.302 Advanced French II: Reaching Fluency 3
AS.212.333 Introduction à la littérature française 3
or AS.212.334 Introduction à la littérature française II
Two French courses from the AS.212.3xx-4xx series, at least one of which must be at the 400 level 6
Total Credits 15

Spanish
AS.210.311 Advanced Spanish I 3
AS.210.312 Advanced Spanish II 3
AS.215.231 Introduction to Literature in Spanish 3
Two Spanish courses from the AS.211.3xx-4xx series 6
Total Credits 15

Italian
AS.210.351 Advanced Italian I 3
AS.210.352 Advanced Italian II 3
AS.214.362 Italian Journeys: Medieval and Early Modern 3
or AS.214.363 Italian Journeys: Modern and Contemporary
Two Italian courses from the AS.211.3xx-4xx or AS.214.3xx-4xx series) 6
Total Credits 15

Language 3
The student must satisfy their third language requirement as described below:

French
AS.210.301 Advanced French I: Achieving Accuracy 3
AS.210.302 Advanced French II: Reaching Fluency 3
AS.212.333 Introduction à la littérature française 3
or AS.212.334 Introduction à la littérature française II
One French course from the AS.212.3xx-4xx series 3
Total Credits 12

Spanish
AS.210.311 Advanced Spanish I 3
or one course from the AS.215.3xx-4xx series if AS.210.311 waived with placement score
AS.210.312 Advanced Spanish II 3
or AS.210.317 Adv Spanish Composition
or one course from the AS. 215.3xx-4xx series if AS.210.312 waived with placement score
AS.215.231 Introduction to Literature in Spanish 3
Five Additional Electives
Choose one from the following list: 3
AS.210.413 Curso de Perfeccionamiento
AS.211.380 Modern Latin American Culture
AS.211.390 Modern Spanish Culture
With department approval, one course about Latin America or Spain taken in another department (or AS.215.2xx-4xx course)
Four courses from the 215.2xx-4xx series, distributed between the cultures and literatures of Spain and Latin America. 12
Total Credits 24

* Prerequisites through AS.210.312 may be satisfied by taking a placement examination. Native speakers should consult with the department. Any language requirement waived by exam must be documented on the transcript before the end of the sophomore year.

Spanish Study Abroad
It is strongly recommended that majors spend one semester abroad and/or attend summer or intersession programs. Currently, the department offers a fall program in Madrid, Spain, as well as the Argentina and Peru programs. The Program in Latin American Studies. Students are expected to consult with the Director of Undergraduate Studies, their department advisor, and the Office of Study Abroad prior to studying abroad. With the approval of the Director of Undergraduate Studies, up to two (2) Spanish courses taken abroad in non-JHU programs or at another institution may be used toward the major.

Sample 4-year plan
This plan assumes the student is starting at the beginning level of the language.

#### Spanish Minors

Students may choose one of these two specialized minors: Spanish for the Professions or Spanish Language and Hispanic Cultures. It is also recommended that Spanish minors study abroad for a semester, a summer, or an intersession. With the approval of the Director of the Spanish Language Program, only two Spanish language courses taken abroad (in programs other than Johns Hopkins programs) or at another accredited institution may be applied toward the minor, and only one additional Spanish language course will be approved for credit (but this course will not count toward the minor). For both minors, all minor requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

or any course, taught in Spanish, from the AS.211.3xx, AS.211.4xx, or AS.215.200-400 Spanish Literature series

One course from the AS.215.2xx-4xx series

Total Credits: 18

* If a waiver was provided for Advanced Spanish I, students must take one Spanish course from the following: AS.210.316 Conversational Spanish, AS.210.4xx or AS.211.xxx or AS.215.2xx-4xx series.

** If a waiver was provided for Advanced Spanish II, students must take one Spanish course from the following: AS.210.317 Advanced Spanish Composition or AS.215.2xx-4xx series.

#### Study Abroad in Madrid, Spain

The Department offers the following courses as part of the study abroad program in Madrid, Spain (Universidad Carlos 3):

**215.340 Modern Spanish Literature**

This course covers some representative Spanish literary works of the 20th century, and is divided into four sections: pre-Civil War texts (1900–1939), post-Civil War texts (1939–1975), the literature of the Transition (1975–1982), and contemporary literature (1982–2008). Ramón de Valle-Inclán, Miguel de Unamuno, Federico García Lorca, Antonio Bueno Vallejo and Adelaida García Morales are some of the authors whose work will be studied. Three exams and a short research paper in addition to class attendance and participation are required.

**215.342 Twentieth-century Latin American Literature**

The object of this course is to familiarize students with representative literary works of authors such as Horacio Quiroga, Juan Rulfo, Ernesto Sábato, Jorge Luis Borges, Pablo Neruda and Gabriel García Márqués, among others. Discussions of literary historical tendencies, esthetic conceptions and narrative techniques will be based on close reading of assigned works. Two exams and two papers in addition to class attendance and participation are required.

**215.412 Spanish Theater**

This course will cover the development of the history of Spanish theater: authors, esthetic tendencies and historical and cultural contexts. From the early period, the reading of Calderón de la Barca's *La vida es sueño* introduces the student to Golden Age Spanish Theater, which will be discussed in the context of the *corales de comedias*, Spanish society and...
German B.A./M.A. Degree

The department offers highly qualified students the option to complete a combined degree in five years. To receive the B.A./M.A. degree, the student must complete advanced courses in German literature and pass the departmental written and oral master's examinations. Students interested in this option should make an appointment with the Director of Undergraduate Studies no later than the spring of their junior year to discuss the options available to them.

Graduate Ph.D. Requirements

In addition to general university requirements for the Ph.D., the following regulations apply to graduate students in the Department of German and Romance Languages and Literatures:

To be accepted into the Ph.D. program, students must demonstrate by an exceptionally strong academic record that they are capable of proceeding in two other foreign languages besides English, depending on the specialization. (See below for further information.) A dissertation proposal, presented to the faculty and students in their section, is required before official admittance to candidacy for the Ph.D. for French, Italian and Spanish graduate students.

German

In addition to fulfilling the general university requirements for advanced degrees, candidates for the M.A. must demonstrate fluency in spoken German, be able to write German reasonably well, have a good knowledge of the history of German language and literature, be familiar with the general cultural background, and have read extensively in German literature, particularly in the periods after 1700. During their first two years at Hopkins, candidates for the M.A. degree must pass two topical examinations. After the M.A., two major qualifying papers are required under the supervision of two advisors, chosen by the candidate, before work on the dissertation can be undertaken.

Italian

In addition to the major language, the student must demonstrate proficiency in two other foreign languages. The student must take a minimum of four semesters of graduate courses. After this period, normally in the third year, the student will take examinations which, if completed successfully, will lead to candidacy for the Ph.D.

Spanish

In addition to the major language, the student must demonstrate proficiency in two other foreign languages. The student must take a minimum of four semesters of graduate courses. After this period, normally in the third year, the student will take four field examinations which, if completed successfully, will lead to candidacy for the Ph.D.

Graduate Study Abroad

The Department encourages and expects graduate students to do research abroad during their program of study. In the French section, an exchange program with the École Normale Superieure offers the opportunity for graduate students to study in Paris, where they are encouraged to participate to research programs at ENS, EHESS, and other Universities; an exchange program with University Paris-Diderot-Paris 7 offers the opportunity for graduate or post-graduate students in French to study and teach in Paris; and the University of Geneva offers a fellowship each year for a grad student in the French section. Ph.D. students in the French section are also encouraged to apply for the Chateaubriand scholarship offered by the Embassy of France. Exchange programs with the FU Berlin (Friedrich Schlegel Graduate School of Literary Studies), the University of Hamburg, and the Humboldt University, offer the opportunity for graduate students in the German section to study in Germany. In addition, the German section offers Max Kade travel grants for research in a German-speaking country. Italian graduate students can
take advantage of a wealth of formal and informal contacts with Italian scholars, archives, and institutes. Spanish students may elect to make their fourth year a non-teaching year. After presenting a research proposal to their advisor, with the approval of that advisor and the head of section, they may elect to go abroad for a semester or the entire academic year in order to conduct research essential to their dissertation.

Financial Aid
The department has a number of fellowships for graduate students. Awards include university fellowships, which carry stipends and teaching fellowships currently set at $28,500 per academic year for teaching one section of an undergraduate language course each semester, in addition to remission of tuition fees. All graduate students are expected to do four years of apprentice teaching of elementary and intermediate level undergraduate courses as part of their professional preparation. The amount of classroom teaching required is usually three to four hours a week. Students are admitted for five years, fully funded, subject to annual review to assure satisfactory progress. In addition, stipends (equivalent to that year's teaching fellowship) are available for study abroad during the third or fourth year.

Fourth- and fifth-year graduate students may also compete for Dean's Teaching Fellowships, which provide opportunities for the design and teaching of undergraduate courses in literature, cultural studies, or intellectual history.

Graduate students conducting research in Italian studies compete each year for two Charles S. Singleton Travel Grants for study in Italy. This program is administered by the department and is open to graduate students from other departments.

Application Procedures
Prospective graduate students may visit the departmental website at http://grll.jhu.edu for further information on programs and faculty. All questions regarding the programs offered by the department should be emailed to grll@jhu.edu. Prospective students are encouraged to apply online through the secure Graduate Admissions website (https://app.applyyourself.com/?id=jhu-grad).

For current faculty and contact information go to http://grll.jhu.edu/directory/

Faculty
Acting Chair
Walter Stephens

Professors
Wilda Anderson
The literature of the French Enlightenment; the relationship between science and literature; the French Revolution and its aftermath

Sara Castro-Klarén
Colonial cultures and literatures; theory; women's writing; modern Latin American cultures and literatures

William Egginton
Decker Professor in the Humanities Director, Alexander Grass Humanities Institute Spanish and Latin American literatures, comparative European literature and thought

Courses

AS.210.101. French Elements I. 4.0 Credits.
Provides a multi-faceted approach to teaching language and culture to the novice French student. The first semester emphasizes listening and speaking, while laying the foundation in grammar structures, reading, and writing. This course is designed for true beginners: Students with any previous background must take the placement test (http://www.advising.jhu.edu/placement_french.php) and receive below 30 (or below 200 on Webcape). Must complete both semesters successfully in order to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis.
Instructor(s): C. Guillemard.

AS.210.102. French Elements II. 4.0 Credits.
The second semester of this intensive course for beginners provides students with the tools to read a play (Antigone by Jean Anouilh), to polish a written autobiography, and to develop their oral skills. A variety of cultural material help students acquire grammatical structures and expand their vocabulary. May not be taken on a Satisfactory/Unsatisfactory basis. Pre-requisites: AS.210.101 or AS.210.103. New students must take the placement (http://www.advising.jhu.edu/placement_french.php) and contact the instructor: cguille1@jhu.edu.
Instructor(s): C. Guillemard.

AS.210.103. Learner Managed French Elements I. 3.0 Credits.
This beginner course is specifically designed for students who have had some exposure to French. They must take the mandatory placement test: http://www.advising.jhu.edu/placement_french.php, and receive between 30 and 49. They will cover the first semester of French Elements at a pace suited for "false beginners" with major online components to supplement class instruction. Must complete the year with 210.102 or 210.104 to obtain credit. May not be taken on a Satisfactory/Unsatisfactory basis.
Instructor(s): B. Anderson.

AS.210.104. Learner Managed French Elements II. 3.0 Credits.
Continuation of the refresher course AS.210.103, offered for three credits and letter grade. Recommended for self-motivated students who have some knowledge of French and wish to continue their review of the language intensively. Major online component supplements in-class instruction.
Prerequisites: AS.210.101 OR AS.210.103 or appropriate test score
Instructor(s): B. Anderson.

AS.210.111. Spanish Elements I. 4.0 Credits.
This is an introductory Spanish language course. On completion of this course, the students will have acquired the basic communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Greetings, University Life, Family and Leisure. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements 1 is the foundation for all consecutive Spanish courses. A placement exam is required to ensure the appropriate level. Students wishing to retain credits for Spanish Elements I must complete Spanish Elements II with a passing grade. Your enrollment in Spanish Elements I will not be considered for approval until you have emailed the Spanish Language Director.
Instructor(s): Staff.

AS.210.112. Spanish Elements II. 4.0 Credits.
This introductory Spanish language course is a continuation of the content covered in Spanish Elements I. On completion of this course, the students will have further developed the communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Food, Sports, Shopping, Travel, and Health. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements II prepares the students for Intermediate Spanish. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after 4th class session. Prerequisite: AS.210.111 or appropriate placement exam score.
Prerequisites: AS.210.111 or appropriate webcape score
Instructor(s): Staff.

AS.210.150. Program Abroad: Preliminary Portuguese. 3.0 Credits.
Summer Abroad Program. First semester college-level Portuguese. Students will develop basic listening, speaking, reading and writing skills. Some cultural readings are included. This course is intended for program participants with little or no prior Portuguese language instruction. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.151. Italian Elements I. 4.0 Credits.
This is a four-credit course, and Italian Elements II (AS.210.152) must be completed in the Spring to receive credit. The aim of the course is to provide students with basic listening, reading, writing, speaking and interactional skills in the language. All classes are conducted in Italian; oral participation is strongly encouraged from the beginning. Students wishing to retain credits for Italian Elements I must complete Italian Elements II with a passing grade. No Satisfactory/Unsatisfactory option.
Instructor(s): Staff.
Area: Humanities.

AS.210.152. Italian Elements II. 4.0 Credits.
Course helps students develop basic listening, reading, writing, speaking, and interactional skills in Italian. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.151 or Placement Exam Part 1.
Instructor(s): Staff.

AS.210.161. German Elements I. 3.0 Credits.
Four skills introduction to German language and culture. Develops proficiency in speaking, writing, reading, and listening through the use of basic texts, multi-media, and communicative language activities. Online tools required. Both semesters must be completed with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. Tuesday section is a mandatory hour; choose your section based on the MWF time. Conflicts with Tuesday hour can be resolved after start of semester. Language Program Director: Deborah Mifflin. Students wishing to retain credits for German Elements I must complete German Elements II with a passing grade.
Instructor(s): D. Mifflin.

AS.210.162. German Elements II. 4.0 Credits.
Continuation to the introduction to the German language and a development of reading, speaking, writing & listening through the use of basic texts and communicative activities. The culture of the German-language countries is also incorporated into the curriculum. May not be taken on a Satisfactory/Unsatisfactory basis. Choose your section based on the MWF time. Tuesday section is mandatory hour; conflicts with Tuesday hour can be resolved after start of semester. Language Program Director: Deborah Mifflin. Students wishing to retain credits for German Elements I must complete German Elements II with a passing grade.
Instructor(s): D. Mifflin.

AS.210.163. Elementary Yiddish I. 3.0 Credits.
Year-long course. Includes the four language skills, reading, writing, listening, and speaking, and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Students wishing to retain credits for Yiddish Elements I must complete Yiddish Elements II with a passing grade.
Instructor(s): B. Lang.

AS.210.164. Elementary Yiddish II. 3.0 Credits.
Year-long course that includes the four language skills—reading, writing, listening, and speaking—and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission.
Instructor(s): B. Lang
Area: Humanities.

AS.210.171. Accelerated Italian Elements I for Advanced Spanish Speakers. 4.0 Credits.
Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students completing both semesters with a grade of A- or higher will be able to place into Advanced Italian I (AS.210.351)
Instructor(s): A. Zannirato
Area: Humanities.

AS.210.172. Italian Elements II for Advanced Spanish Speakers. 4.0 Credits.
Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students successfully completing the course with a grade of A- or higher will be able to place into Advanced Italian I (AS210.351)
Prerequisites: AS.210.171 with a grade of A- or higher.
Instructor(s): A. Zannirato
Area: Humanities.

AS.210.177. Portuguese Elements I. 4.0 Credits.
This one-year course introduces students to the basic skills in reading, writing, and speaking the language. Emphasis is placed on oral communication with extensive training in written and listening skills. Class participation is encouraged from the very beginning. All classes are conducted in Portuguese. Students must complete both semesters with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. No previous knowledge of Portuguese is required.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.178. Portuguese Elements II. 4.0 Credits.
This course expands students knowledge of the basic language skills: reading, writing, listening, speaking. It uses a multifaceted approach to immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa. The focus of the course is on oral communication with, however, extensive training in grammar. The course is conducted entirely in Portuguese. Lab work required. Students must complete both semesters with passing grades to receive credit.
Prerequisites: AS.210.177 or equivalent score on placement test or instructor approval.
Instructor(s): Staff.

AS.210.201. Intermediate French I. 3.0 Credits.
This course develops skills in speaking, listening comprehension, reading, and writing. Systematic review of language structures with strong focus on oral communication and acquisition of vocabulary; extensive practice in writing and speaking; readings and films from French-speaking countries. Recommended Course Background: AS.210.102 or AS.210.104 or score between 65 and 89 on Placement test I.
Prerequisites: Students who have taken AS.210.203 [ High Intermediate French ] are ineligible to register for AS.210.201
Instructor(s): Staff
Area: Humanities.
Focus on oral communication; develops skills in oral and written expression, listening comprehension, and reading, with extensive study of films and readings from French-speaking countries. Online component via Blackboard. Continuation of AS.210.201. Recommended course background: AS.210.201 or AS.210.203.
Instructor(s): S. Roos
Area: Humanities.

AS.210.208. Intermediate French II Through Acting. 3.0 Credits.
This 5-week intensive course will cover the material of Intermediate French II. Through examining excerpts of popular French theater plays (by Camus, Sartre, Feydeau, Ionesco, and others), this class proposes to 1) improve French speaking and writing skills (pronunciation, intonation, vocabulary, syntax, argumentative reasoning, creative writing) 2) understand the linguistic nuances and socio-cultural practices expressed in the texts 3) learn the basic tools of acting (body language, vocal projection, physical expressivity, emotional expression, stage direction, improvisation, etc.). The course will include watching filmed representations of plays, as well as a performance at the end of the term. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based exercises.
Prerequisites: AS.210.201 OR AS.210.205 or appropriate placement.
Instructor(s): K. Haklin
Area: Humanities.

AS.210.209. The Sounds of French. 3.0 Credits.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of "word games" (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. May be taken concurrently with AS.210.205 or AS.210.305.
Instructor(s): Staff
Area: Humanities.

This 5-week intensive course will cover the material of Intermediate French I with an emphasis on listening comprehension and speaking: an attractive selection of classic and contemporary French movies (Les Intouchables, Manon des Sources, La Vie en rose, Sugar Cane Alley, among others) will enhance students’ acquisition of the language and will deepen their understanding of French and francophone cultures. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based grammar followed by group discussion on the movies. Creative role-play activities will develop students’ fluency.
Prerequisites: AS.210.102 or appropriate placement; placement exam link available at grll.jhu.edu
Instructor(s): C. Guillemaud
Area: Humanities.

AS.210.211. Intermediate Spanish I. 3.0 Credits.
Intermediate Spanish I is a comprehensive study of Spanish designed for students who have attained an advanced elementary level in the language. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish I will prepare students for the next level of Spanish (Intermediate Spanish II). There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after the third class session.
Prerequisites: AS.210.112 or appropriate webcape score
Instructor(s): Staff
Area: Humanities.

AS.210.212. Intermediate Spanish II. 3.0 Credits.
Intermediate Spanish II is a comprehensive study of Spanish designed for students who have attained a mid-intermediate level in the language or who have completed Spanish 212. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish II will prepare students for the next level of Spanish (Advanced Spanish I). There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.
Prerequisites: AS.210.211 or appropriate webcape score
Instructor(s): Staff
Area: Humanities.

AS.210.250. Program Abroad: Objective Portuguese - Level II. 3.0 Credits.
Summer Abroad Program. Third semester college-level Portuguese. Students develop basic listening, speaking, reading and writing skills. Cultural readings included. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.177 & 210.178. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.251. Intermediate Italian I. 3.0 Credits.
Taught in Italian. Course continues building on the four essential skills for communication presented in Italian Elements courses (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken Satisfactory/Unsatisfactory.
Prerequisites: AS.210.152 or placement exam
Instructor(s): Staff
Area: Humanities.
AS.210.252. Intermediate Italian II. 3.5 Credits.
Taught in Italian. Course continues building on the four essential skills for communication presented in Intermediate Italian I (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken Satisfactory/Unsatisfactory.
Prerequisites: AS.210.251 or appropriate placement exam scores (Parts I II).
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.210.261. Intermediate German I. 3.0 Credits.
Taught in German. This course continues the same four-skills approach (speaking, writing, reading, and listening) from the first-year sequence, introducing and practicing more advanced topics and structures. Expansion and extension through topical readings and discussion and multi-media materials. Online tools required. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.162 or placement by exam.
Instructor(s): Staff
Area: Humanities.

AS.210.262. Intermediate German II. 3.0 Credits.
Taught in German. This course is designed to continue the four skills (reading, writing, speaking and listening) approach to learning German. Readings and discussions are topically based and include fairy tales, poems, art and film, as well as readings on contemporary themes such as Germany’s green movement. Students will also review and deepen their understanding of the grammatical concepts of German.
Prerequisites: AS.210.261 or placement exam.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.265. Individualized Yiddish Practicum. 3.0 Credits.
This course will allow students at any stage of Yiddish language acquisition to hone their skills in reading, writing, listening and speaking. The program will be individualized for each student according to his or her needs while at the same time providing joint activities in which all can participate.
Instructor(s): B. Lang
Area: Humanities.

AS.210.266. German Conversation. 1.0 Credit.
This course is designed for intermediate and above students who wish to improve their conversational and oral presentational language skills. The syllabus aims to provide useful, relevant language and necessary discourse structures to hold conversations and presentations on varied topics of an everyday, as well as academic nature. Students will practice German to build confidence, develop fluency, and improve pronunciation and accuracy. Short texts, audio and films will provide the basis for discussion. Students’ fields of study and interests will be incorporated into the syllabus and tasks will be matched to the ability level of the students enrolled. Recommended Course Background: AS.210.262 or two years of college German or equivalent. May be taken concurrently with other courses in German. May be taken Pass/Fail. Not for major or minor credit.

AS.210.277. Intermediate Portuguese I. 3.0 Credits.
More advanced training in the skills of the language with emphasis on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. Lab work required. May not be taken on a Satisfactory/Unsatisfactory basis. Prereq: AS.210.178, or placement test.
Prerequisites: AS.210.178 or equivalent score on placement test or instructor approval.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.278. Intermed/Adv Portuguese. 3.0 Credits.
This course is conducted entirely in Portuguese. Emphasis is placed on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. Lab work required.
Prerequisites: Prerequisite: AS.210.177 AND AS.210.178 or equivalent score on placement test or instructor approval.
Instructor(s): V. Rodrigues
Area: Humanities.

AS.210.288. Portuguese: Conversation through Film & Music. 3.0 Credits.
Enjoy lunchtime improving your Portuguese conversational and speaking skills through colorful Brazilian media. This course is designed for highly motivated undergraduate and graduate students who want to SPEAK Portuguese. Conversation sessions provide intensive work on communication skills through discussion on issues raised in films, news media & music. Grammar will be reviewed as needed outside of class with tutors or TA, freeing class time for more communicative activities. May not be taken on a Satisfactory / Unsatisfactory basis. Prereq: one semester of Portuguese (AS.210.177), two semesters of Spanish or Placement test.
Instructor(s): Staff
Area: Humanities.

AS.210.301. Advanced French I: Achieving Accuracy. 3.0 Credits.
Students in AS.210.301 will focus primarily on written expression, learning to 'decipher' classic and contemporary French texts, in order to expand their vocabulary and communicate their ideas in writing with clarity and accuracy. (A primary focus on oral expression is provided in AS.210.302; the two advanced-level courses may be taken in either order or simultaneously.) Language Program Director: Kristin Cook-Gailloud
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.210.302. Advanced French II: Reaching Fluency. 3.0 Credits.
Students in 210.302 will focus primarily on oral expression through individual and group work on contemporary media (music, film, current events) in order to expand their vocabulary and become fluent in conversation across social-cultural contexts. (A primary focus on written expression is provided in 210.301; the two advanced-level courses may be taken in either order or simultaneously.)
Instructor(s): A. Wuensch
Area: Humanities
Writing Intensive.
AS.210.306. Medical French. 3.0 Credits.
This interactive course is designed to provide students with specific linguistic tools used in medical and public health fields, as well as a comprehensive understanding of health care systems in the French and francophone world. Through a wide range of media (newspaper articles, scenes from TV series, excerpts of historical and literary texts) and group discussions, we will focus on topics such as physical and mental health, consultation and diagnosis, hospitalization, specialized fields (epidemiology, neurology, psychiatry, etc.) and deontology.
Prerequisites: Prereq: AS.210.201 OR AS.210.202 or equivalent or permission (kacg@jhu.edu)
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.210.309. The Sounds of French. 3.0 Credits.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of "word games" (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. Recommended Course Background: AS.340.101-AS.340.102 or equivalent; AS.210.301 (may be taken concurrently).
Instructor(s): B. Anderson
Area: Humanities.

AS.210.311. Advanced Spanish I. 3.0 Credits.
This course is thorough review of the Spanish language focused on the development of students' communicative abilities and their knowledge of Hispanic cultures. Students will both expand their knowledge of the basic structures of Spanish, with special emphasis on more difficult grammatical and vocabulary aspects, and further improve on oral and written skills. Students will increase their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired more complex language tools to become proficient in Spanish and its use in various professional contexts. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 or AS.210.312 or appropriate webcape score
Instructor(s): Staff
Area: Humanities.

AS.210.312. Advanced Spanish II. 3.0 Credits.
This course is thorough review of the Spanish language focused on the development of students' communicative abilities and their knowledge of Hispanic cultures. Students will both expand their knowledge of the basic structures of Spanish, with special emphasis on more difficult grammatical and vocabulary aspects, and further improve on oral and written skills. Students will increase their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired more complex language tools to become proficient in Spanish and its use in various professional contexts. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 or appropriate webcape score
Instructor(s): Staff
Area: Humanities.

AS.210.313. Medical Spanish. 3.0 Credits.
Medical Spanish is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in medicine and health-related fields in Spanish-speaking environments. The student will be able to participate in conversations on topics such as contrasting health systems, body structures, disorders and conditions, consulting your doctor, physical and mental health, first-aid, hospitalization and surgery on completion of this course. In completing the course's final project students will apply, synthesize, and reflect on what has been learned in the class by creating a professional dossier individualized to their professional interests. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 or AS.210.312 or appropriate webcape score
Instructor(s): Staff
Area: Humanities.

AS.210.314. Spanish for International Commerce. 3.0 Credits.
Spanish for international business is an overview of business topics in an international Spanish-speaking context with an emphasis on deep review of grammar and vocabulary acquisition. On completion of this course the student will have developed the ability to read and critically discuss business and government relations in Latin America and will have examine entrepreneurship, finance, marketing, business ethics, human resources and commerce in the Spanish speaking world. In completing the course's final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own professional interests. Concepts learned in this course will be directly applicable to careers linked to international relations and will apply to various careers in business. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session. Language Program Director: Loreto Sanchez-Serrano
Prerequisites: AS.210.311 or appropriate webcape score
Instructor(s): Staff
Area: Humanities.
AS.210.315. Spanish for International Relations. 3.0 Credits.
Spanish for international relations is an advanced examination of grammar and an analysis of international relations’ topics in Spanish. By completion of this course the student will have developed the ability to read, critically discuss and demonstrate mastery of political and socio-economic issues in Spanish-speaking environments. Potential topics include a survey of the professions in international relations, NGOs in Latin America, intellectual property, cultural diplomacy, remesas, regional coalitions and treaties, and the environment. Class presentations and final projects will allow students to apply, synthesize, and reflect on what has been learned in the class by participating in a global simulation that will include a written exercise individualized to their professional interests. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session. 
Prerequisites: AS.210.311 or appropriate webcape score 
Instructor(s): M. Ramos 
Area: Humanities.

AS.210.316. Conversational Spanish. 3.0 Credits.
Conversational Spanish surveys high-interest themes, discusses short films by contemporary Hispanic filmmakers and offers a thorough review of grammar. The student will be able to participate in conversations on topics such as personality traits, social media, political power, art and lifestyles on completion of this course. Conversational skills mastered during the course apply to all careers interconnected by Spanish. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session. 
Prerequisites: AS.210.311 or appropriate webcape score 
Instructor(s): Staff 
Area: Humanities.

AS.210.317. Adv Spanish Composition. 3.0 Credits.
This third-year course is a hands-on and process-oriented introduction to discussion and compositional analysis. On completion of this course, students will have improved their Spanish writing skills in various types of compositions they might be expected to write in academic settings and in real-life formats such as film reviews, letters to the editor, cover letters, etc. The course also focuses on refinement of grammar and vocabulary use. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th. 
Prerequisites: AS.210.312 or appropriate webcape score 
Instructor(s): Staff 
Area: Humanities 
Writing Intensive.
AS.210.361. Advanced German I: Cultural Topics of the Modern German-speaking World. 3.0 Credits.
Taught in German. Topically, this course focuses on defining moments in cultural history in German speaking countries in the 2nd half of the 20th century. Films, texts and other media provide a basis for discussing events in post-war Germany from 1945 to 1989. A review and expansion of advanced grammatical concepts and vocabulary underlies the course. Focus on improving expression in writing and speaking. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.262 or AS.210.361 or AS.210.362 or permission of instructor.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.210.362. Advanced German II: Contemporary Issues in the German Speaking World. 3.0 Credits.
Taught in German. Topically, this course focuses on contemporary issues such as national identity, multiculturalism and the lingering social consequences of major 20th century historical events. Readings include literary and journalistic texts, as well as radio broadcasts, internet sites, music and film. Students read a full-length novel. Emphasis is placed on improving mastery of German grammar, development of self-editing skills and practice in spoken German for academic use. Introduction/Review of advanced grammar.
Prerequisites: AS.210.361 or equivalent score on placement test.
Instructor(s): D. Mifflin
Area: Humanities
Writing Intensive.

AS.210.363. Business German. 3.0 Credits.
Taught in German. Course is designed to familiarize students with the vocabulary and standards for doing business in Germany. Taking a cultural approach, students read texts and engage in discussion that elucidate the works of business, commerce & industry in Germany, the world's third largest economy. Emphasis is placed on vocabulary expansion and writing as it relates to business.
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362.
Area: Humanities.

AS.210.365. German for Science and Engineering. 3.0 Credits.
Taught in German. This course is designed to provide language training in German tailored to students of science & engineering. Germany has long been a world leader in engineering, most notably in chemical and mechanical engineering. Over the past decades, Germany also has taken a lead in environmental sciences and information technology. In addition, Germany is now becoming an increasingly attractive place to pursue degrees in the technical fields. This course will provide practice and expansion in all language skill areas: analysis of texts, hands-on-activities, preparation of presentations, and discussion of topics. Specific areas of interest to the course members will be taken into consideration for the selection of materials. [Does not replace 210.362 as prerequisite for upper level courses or as major requirement.]
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362 OR EQUIVALENT OR PLACEMENT EXAM
Area: Humanities.

AS.210.367. Advanced Yiddish. 3.0 Credits.
This course will provide students who have completed at least two years of Yiddish with the opportunity to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing. Instructor(s): B. Lang
Area: Humanities.

AS.210.368. Advanced Yiddish II. 3.0 Credits.
Continuation of Advanced Yiddish I (AS.210.367). Students will continue to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Prerequisites: AS.210.367
Instructor(s): B. Lang
Area: Humanities.

AS.210.369. Yiddish Texts I. 3.0 Credits.
This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing).
Prerequisites: AS.210.368 or permission of instructor.
Instructor(s): B. Lang
Area: Humanities.

AS.210.370. Yiddish Texts II. 3.0 Credits.
Continuation of Yiddish Texts I. This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing). Recommended Course Background: Yiddish Texts I or permission of the instructor.
Instructor(s): B. Lang
Area: Humanities.

AS.210.371. From the yidishe gas to the Yiddish Farm: Yiddish Identity and Yiddish Community. 3.0 Credits.
In premodern Ashkenaz, the vernacular Yiddish was an important factor maintaining a distinct Jewish communal identity. With the advent of modernity, and the abandoning of Yiddish by some Jews as their daily language, the choice to speak Yiddish and to use it as a vehicle of modern cultural production became a distinct strand in the web of new Jewish identities. In this course, students will develop a sociolinguistic understanding both of the place of Yiddish in premodern Jewish society, and ways in which the language was – and is – seen as essential to living a Jewish life in the modern world. Since this is an advanced language course, readings, discussion and written work will be in Yiddish. Grammar will be reviewed as necessary, according to the needs of the students.
Instructor(s): B. Lang
Area: Humanities, Social and Behavioral Sciences.
AS.210.375. Avant-garde movements: The MODERNISM in Portuguese speaking countries. 3.0 Credits.

This course surveys the avant-garde movements in Portuguese speaking countries, giving special attention to Portugal and Brazil. In the first half of the past century, Brazilian and Portuguese writers started a movement that later was considered as a revolution in the literary world. Analysis and discussion of the movement, on both sides of the Atlantic, will offer the opportunity to contemplate authors including, but not limited to Fernando Pessoa, Almada Negreiros, Sá-Carneiro, Branquinho da Fonseca, Gaspar Simões, Casais Monteiro, José Régio, and on the Brazilian side Mario de Andrade, Oswald de Andrade, Manuel Bandeira, Menotti del Picchia, and much later, Graciliano Ramos, Rachel de Queiroz, José Lins do Rego and obviously Jorge Amado. It explores the impact the Lusophone Modernism had in other avant-garde movements. Readings in Portuguese; the class is taught in Portuguese. THERE IS NO FINAL EXAM. May not be taken on a Satisfactory / Unsatisfactory basis. Prereq: one semester of Portuguese communicative activities. There is no final exam. May not be taken on a Satisfactory / Unsatisfactory basis. Pre-requisites: 210.391 or Placement test.

Instructor(s): F. De Azeredo Cerqueira
Area: Humanities

AS.210.391. Advanced Portuguese Language & Literature I. 3.0 Credits.

This third-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. All classes are conducted in Portuguese. Prereq: 210.278 or placement test. Permission required

Prerequisites: AS.210.278 or equivalent score on placement test or instructor approval.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.210.392. Advanced Portuguese: Language and Literature II. 3.0 Credits.

This course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read several works by major Brazilian, Portuguese, and/or Afro-Portuguese writers, followed by intensive writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. The course is conducted entirely in Portuguese. No satisfactory/unsatisfactory. Pre-requisites: 210.391 or placement test.

Prerequisites: AS.210.391 or equivalent score on placement test or instructor approval.
Instructor(s): V. Rodrigues
Area: Humanities
Writing Intensive.

AS.210.394. Portuguese for the professions. 3.0 Credits.

Enjoy lunchtime while preparing for your future career. Portuguese for the professions is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in a Portuguese speaking environment. It focuses on the development of advanced communication skills according to students' individualized professional interests through conversations, readings, discussions, writings and media. The course also highlights cultural nuances of the professional Portuguese-speaking world. Grammar will be reviewed as needed in class, but most of it will be done outside of class with tutors or a TA, freeing class time for more communicative activities. There is no final exam. May not be taken on a Satisfactory / Unsatisfactory basis. Prereq: one semester of Portuguese (AS.210.177). Two semesters of Spanish or Placement test.

Instructor(s): F. De Azeredo Cerqueira
Area: Humanities

AS.210.405. Teaching French in Public School-Community Based Learning. 3.0 Credits.

A Community-Based Learning (CBL) language course for upperclass students that: 1) establishes a mutually beneficial relationship between JHU students, a neighboring Elementary School, and their common community; 2) combines academic components (linguistic, pedagogical and social) with the experiential work with the community partner as a way to reinforce learning. Students participate in weekly meetings in French on campus to prepare for their classes and teach twice a week to 2nd, 3rd, or 4th graders at the Elementary school. Recommended course background: AS.210.301 or AS.210.302.

Instructor(s): C. Guillemard
Area: Humanities.

AS.210.409. Le monde francophone. 3.0 Credits.

This course examines both sociolinguistic and cultural aspects of the French-speaking world and the relationship between la francophonie and France itself. We focus on five regions—Sub-Saharan Africa (Cameroun and Senegal), Northern Africa (Morocco and Algeria), the Caribbean (Martinique and Haiti), North America (Quebec), and Europe (Belgium)—and consider language features unique to those regional varieties, the status of French as opposed to other indigenous languages and creoles, the demographics of their speakers, and the representation of their culture in media (particularly in short stories, poetry, song, and film). A semester-long research project on one of these main areas will allow students to combine their study of the French-speaking world with other disciplines of interest to them.

Instructor(s): B. Anderson
Area: Humanities.

AS.210.411. Translation for the Professions. 3.0 Credits.

Spanish Translation for the Professions surveys the field of contemporary translation theory and provides practice of translation from English to Spanish. Translation exercises may include comparing and contrasting texts of literature, medicine, health, law, technology, politics, and journalism. Students will identify and differentiate terminology specific to these various fields and will focus on practicing correct uses of the grammatical structures relevant to the translation of both English and Spanish. In the course’s final projects students will apply, synthesize, and reflect on what has been learned in the class by completing a translation exercise individualized to their professional interests. Strategies of communication mastered in this course will help students of Spanish throughout their careers, in that achievement of the course objectives will help students discern, translate, and evaluate the usefulness of translations in different professional settings. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.

Prerequisites: AS.210.313 or AS.210.314 or AS.210.315
Instructor(s): Staff
Area: Humanities
Writing Intensive.
AS.210.412. Spanish Language Practicum Online. 3.0 Credits.
This fourth-year course involves a specially designed project related to the student's minor concentration. On completion of this course, the student will be able to use the Spanish language in real-world contexts. The student-designed project may be related to each student’s current employment context or developed in agencies or organizations that complement student's research and experimental background while contributing to the improvement of his/her language proficiency. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after first week of class.
Prerequisites: AS.210.411
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.

AS.210.413. Curso de Perfeccionamiento. 3.0 Credits.
This forth-year course is an in-depth examination of the Spanish grammar, including a wider range of idiomatic expressions and usages than students might have previously encountered. On completion of this course, students will be able to achieve the ACTFL Advanced-Mid to high level in oral and written expression as well as in reading and listening skills. The course will also help to prepare students for the DELE Intermediate or Superior levels, offered by the Instituto Cervantes. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session.
Prerequisites: (AS.210.312 OR AS.210.317) AND (AS.210.314 OR AS.210.315)
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.

AS.210.417. Eloquent French. 3.0 Credits.
This highly interactive, writing intensive course places emphasis on: 1) providing students with linguistic tools that will help them reach a high level of written proficiency (advanced lexical, stylistic and idiomatic expressions, linking words used to develop and enrich complex sentences, stylistic and grammatical differences between French and English); 2) enhancing students’ analytical skills by introducing them to the French method of Explication de textes; 3) teaching students to develop an academic style of writing by studying the different components of the dissertation française (introduction, problématique, argumentation, conclusion, utilisation de sources); 4) teaching students to develop their own style of writing. To that effect, we will study excerpts of French literary texts that deal with themes likely to enhance their own creative writing (lieux imaginaires, mémoire et autobiographie, création d’un personnage de roman, for example).
Instructor(s): K. Cook-Gailloud
Area: Humanities
Writing Intensive.

AS.210.450. Program Abroad: Objective Portuguese - Level IV. 3.0 Credits.
Summer Abroad Program. Emphasis on the development of communication skills: the ability to comprehend both written and spoken texts, adn t o speak, read, and write in Portuguese with native-live proficiency. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.451. Corso di Perfezionamento. 0.0 - 3.0 Credits.
This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to: 1) understand a wide range of demanding, longer texts, and recognize implicit meaning; 2) produce clear, well-constructed, detailed texts on complex subjects; 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option.
Recommended Course Background: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Prerequisites: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Instructor(s): A. Zannirato
Writing Intensive.

AS.210.501. French Independent Study/Language. 3.0 Credits.
Instructor(s): Staff.

AS.210.502. French Indep Stdy-Lang. 0.0 - 3.0 Credits.
Instructor(s): K. Cook-Gailloud.

AS.210.531. Independent study of Spanish. 3.0 - 4.0 Credits.
This course is geared towards the student's independent completion of requirements for courses in Spanish. You may complete 210.111-112 Spanish Elements, 210.211-212 Intermediate Spanish or 210.311 Advanced Spanish through this independent study. Students are responsible for completing all work assigned for his/her individual level. Please see individual course description for more information. Independent study of Spanish is taught online.
Instructor(s): E. Gonzalez
Writing Intensive.

AS.210.541. Italian Independent Study-Language. 0.0 - 3.0 Credits.
Prerequisites: AS.210.252 or higher or placement exam score Parts I and II.
Instructor(s): A. Zannirato.

AS.210.551. Portuguese Independent Study. 3.0 Credits.
Instructor(s): F. De Azeredo Cerqueira; S. Castro-Klaren.

AS.210.561. German Independent Study - Language. 3.0 Credits.
Instructor(s): D. Mifflin.

AS.210.592. French Independent Study-Summer. 3.0 Credits.

The goal of this course is 1) to familiarize students with different theoretical and practical approaches of language teaching and learning and 2) to understand how these approaches can be used to create a rich learning environment. Participants are expected to engage actively in classroom discussions based on assigned readings, as well as observe classes taught by other instructors in their department. Required for all in-coming teaching assistants in the French section.
Instructor(s): K. Cook-Gailloud
Area: Humanities.
AS.210.615. Adquisición del español como segunda lengua.
This course will aim to clarify for future teachers the important aspect of the Spanish language syntax, related to cultural aspects, second language acquisition, issues of technology and assessment to prepare them for the task they will face in their own language classes. The course will include a review of several topics of Spanish grammar, concepts of second language acquisition and applied linguistics. The course also will help to prepare students for the DELE Superior level offered by the Instituto Cervantes if they opt to take it.
Instructor(s): L. Sanchez
Area: Humanities.

This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts and recognize implicit meaning, 2) produce clear, well-constructed, detailed texts on complex subjects, 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option. Students should have a satisfactory GTA language diagnostic exam score.
Instructor(s): A. Zannirato
Writing Intensive.

AS.210.661. Reading and Translating German for Academic Purposes.
Taught in English. This is the first semester of a year-long course designed for graduate students in other fields who wish to gain a reading knowledge of the German language. Seniors who intend to do graduate study in other disciplines are also welcome. Instruction includes an introduction to German vocabulary and grammatical structures as well as discussion of relevant translation practices. The goal of the course is for students to gain confidence in reading a variety of texts, including those in their own fields of study. No knowledge of German is assumed. Seniors & Graduate students only.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.662. Reading & Translating German for Academic Purposes II.
Taught in English. Seniors & Graduate students only. This course is designed for graduate students in other departments who wish to gain reading knowledge of the German language and translation practice from German to English. This course is a continuation of the Fall semester. Focus on advanced grammatical structures and vocabulary. For certification or credit.
Prerequisites: AS.210.661 or permission of instructor.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.700. German Language Teaching Practicum I.
Provides methodological and practical support and oversight for graduate student instructors teaching Deutsch als Fremdsprache in the American university context. Two-semester sequence, includes orientation during the week before semester begins. Required for German Graduate Teaching Assistants in the first year of their teaching in the program.
Instructor(s): D. Mifflin.

AS.210.701. German Language Teaching Practicum II.
Required for German Graduate Teaching Assistants in the first year of their teaching in the program. Second semester of a two-semester sequence.
Instructor(s): D. Mifflin.

AS.211.102. The Cosmic Imagination: How Literature Changes Our Understanding of the Universe. 3.0 Credits.
Since time immemorial humankind has looked to the skies for clues as to our origins, our destiny, and the nature of existence itself. In some ways, one of the hallmarks of western science has been a story of viewing the cosmos in ever-greater clarity and detail. Yet the very nature of the universe—its massive size, the distance and obscurity of its farthest reaches—requires the active intervention of our imaginations to picture it, no matter how powerful the technologies we use. In this course we will look at how western cultures from the middle ages to the present have deployed the literary and philosophical imagination to try to grasp the ungraspable, and how those attempts in some cases helped prepare intellectuals and scientists to make very real advances in understanding the universe.
Prerequisites: Students may not take and receive credit for AS.145.102 and AS.211.102.
Instructor(s): W. Egginton
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.211.104. Freshman Seminar: Weimar on the Pacific: German Exile Culture in the United States. 3.0 Credits.
Freshmen seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.

AS.211.166. Casanova’s Variations. 3.0 Credits.
Bored and exiled in the pine forests of rural Bohemia, far from the cities and the women he had loved and left, the ageing Giacomo Casanova (1725-1798) spent his final years writing his memoirs. The Venice he grew up in no longer existed. The Paris he loved was riddled with Revolution. Writing was, he said, “the only remedy I could think of to keep me from going mad or dying of grief” (Willsher). Through a close reading of Histoire de ma vie (Story of my life) this course will explore different understandings of “moral order”, “literary engagement” and “resistance”. The question of how film adaptations have contributed to shape these concepts will also be taken into consideration. Readings and discussions will be in English but majors in Italian, French, Romance Languages will have access to readings in original languages.
Instructor(s): G. Furci
Area: Humanities.
AS.211.174. Media of Propaganda. 3.0 Credits.
Today, promoting a particular political or personal point of view is not viewed as "propaganda" but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term "propaganda" will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.

Area: Humanities.

AS.211.202. Freshman Seminar: A Thousand Years of Jewish Culture. 3.0 Credits.
This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Lang
Area: Humanities.

AS.211.207. Waves of Feminism through Film and Media. 3.0 Credits.
This course will examine the movements known as second- and third-wave feminism as expressed in film and other media since the 1950s. Second-wave feminism—defined in part by the French philosopher Simone de Beauvoir but driven by social and economic factors in the US and the post-war, industrialized west—departed from the practical exigencies of suffrage that drove the first wave before it and became concerned with defending the identity of women from being defined in terms of patriarchal norms. From popularized images of working women in US television series to the formalist experimentation of the France's New-Wave in cinema, the media of the sixties and seventies absorbed and explored many of second-wave feminism's central themes and critiques. Largely a critique of the perceived Euro-centrism of the second wave, third-wave feminism, coined in the early nineties, focused on the experience of women of color and those from the developing world who did not share the relatively privileged backgrounds of their predecessors. The second part of the course will examine how film and media since the nineties has incorporated and reflected this new inclusiveness, and strive to tell stories of women from a broad spectrum of backgrounds. We will take advantage of the visit to Hopkins by acclaimed media artist Sharon Hayes to examine how her own media practice has been shaped by successive waves of feminist thought and has in turn affected feminism. Other works will include the films of Agnès Varda and Shirin Neshat.

Area: Humanities.

AS.211.222. Italian Cinema: The classics, the forgotten and the emergent.. 3.0 Credits.
This course traces the history of Italian cinema, from the silent era to the new millennium, highlighting its main trends and genres, and reflecting on the major transformations modern and contemporary Italian society experienced over the twentieth and twentieth-first centuries. We shall examine iconic films such as Vittorio De Sica's Bicycle Thieves, Federico Fellini's La Dolce Vita, Michelangelo Antonioni's L'Avventura, and Pier Paolo Pasolini's Mamma Roma, that received international recognition and influenced other national cinematic productions, but we shall also look at the works of less famous, or independent filmmakers who received less critical attention. We shall start with the films of the pioneer woman filmmaker Elvira Notari, and end with the documentary films of migrant filmmakers, such as Dagmawi Yimer. While this class takes an historical approach, it also includes a theoretical component and introduces students to the specificity of the cinematic language, examining films in relation to the mise-en-scène, frame composition, camera movements, editing, and sound.
Instructor(s): L. Di Bianco
Area: Humanities.

AS.211.238. Made in Italy: Italian Style in Context. 1.0 Credit.
This one-credit course will seek to contextualize and critique the emergence of cultural commodities within the Italian experience, and their export to the rest of the world. Discussions will concentrate, among other topics, on Italian fashion through the analysis of texts and visual arts, including films. The course is taught in English. No knowledge of Italian is required, but those who can read in Italian will have an opportunity to do so. Everyone will learn some Italian words and expressions. This class may be combined with AS.211.248 [Eataly: an exploration of Italian food culture] and AS.211.258 [Italy Off the Beaten Path] to count toward the Major or the Minor in Italian.
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.211.248. Eataly: an exploration of Italian food cultures. 1.0 Credit.
Italian cuisine is often recognized as one of the finest in the world. This one-credit course will offer an exploration of Italian food cultures past and present. Discussion topics will include the Slow Food Movement, the tension between local and global, and the representation of food in literature, film, and the media. The course is taught in English. No knowledge of Italian is required, but those who can read in Italian will have an opportunity to do so. Everyone will learn some Italian words and expressions. This class may be combined with AS.211.238 [Made in Italy: Italian Style in Context] and AS.211.258 [Italy Off the Beaten Path] to count toward the Major or the Minor in Italian.
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.211.258. Italy Off the Beaten Path. 1.0 Credit.
For centuries, Italy has attracted countless visitors in search of culture and beauty. This one-credit course is an invitation to a journey from South to North across some of the most stunning - and perhaps lesser-known - treasures of Italian cities, regions, and communities. The course is taught in English. No knowledge of Italian is required, but those who can read in Italian will have an opportunity to do so. Everyone will learn some Italian words and expressions. This class may be combined with AS.211.238 [Made in Italy: Italian Style in Context] and AS.211.248 [Eataly: an exploration of Italian food culture] to count toward the Major and the Minor in Italian.
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.
AS.211.265. Panorama of German Thought. 3.0 Credits.
A unique aspect of the German intellectual tradition is the attention it pays to the role of the subject in constructing the world. While this tendency is associated in particular with Kant who turned philosophy back to the study of the subject's faculties, it also features prominently in the work of thinkers as varied as Freud, Panofsky, and Einstein, who founded new disciplines (i.e., psychoanalysis, iconology, and quantum mechanics). This course will examine the crucial role that German thought has played in the development not only of modern philosophy but also of modern science and the humanities. Students will become acquainted with an intellectual tradition that is as concerned with what we know as how we know it.
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.211.272. Freshman Seminar: Music at a Glance, the History of Brazilian Music. 1.0 Credit.
Brazilian music has long been exported and enjoyed all over the world. This one-credit course will consider the social evolution of various Brazilian musical genres such as Samba, Bossa Nova and Hip-Hop. Through an interdisciplinary approach, the role of music in Brazilian social and political movements will be discussed. The course is taught in English. No knowledge of Portuguese is required, but those who can read in Portuguese will have an opportunity to do so. Everyone will learn some Portuguese words and expressions. This class may be combined with AS.211.273 [Afro-Brazilian Religions: Hidden Believers] to count toward the Minor in Portuguese.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities

AS.211.273. Freshman Seminar: Afro-Brazilian Religions: Hidden Believers. 1.0 Credit.
Brazilians have been described as a deeply spiritual people with a penchant for the mystical and the supernatural. This one-credit course will examine this attitude, which pervades the society as a whole, independently of class, creed, or color. The course will also explore the roots of this complex fusion of religions combining traditions from its indigenous people, slaves brought from Africa, and in Kardec's spiritism introduced to Brazil in the first decades of the 20th century. This religious syncretism has permeated the society and is now deeply ingrained in the psyche of Brazilians. The course is taught in English. No knowledge of Portuguese is required, but those who can read in Portuguese will have an opportunity to do so. Everyone will learn some Portuguese words and expressions. This class may be combined with AS.211.274 [Soccer in Brazil: opium of the masses] and AS.211.273 [Afro-Brazilian Religions: Hidden Believers] to count toward the Minor in Portuguese.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities

AS.211.274. Freshman Seminar: Soccer in Brazil: opium of the masses. 1.0 Credit.
The Italian filmmaker Pier Paolo Pasolini (1922-1975) famously claimed that "there are two types of football, prose and poetry. European teams are prose, tough, premeditated, systematic, collective. Latin American ones are poetry, ductile, spontaneous, individual, erotic." Futebol offers a unique perspective on politics, race and citizenship in Brazil. This course seeks to understand Brazilian culture through the national pastime of futebol. In addition to the main textbooks chosen for the class, by reading a variety of texts from newspapers, academic journals, crônicas, fiction and film, students will be able to find their own approach to understanding the phenomenon of futebol within the social and political traditions of Brazil. The course is taught in English. No knowledge of Portuguese is required, but those who can read in Portuguese will have an opportunity to do so. Everyone will learn some Portuguese words and expressions. This class may be combined with AS.211.273 [Afro-Brazilian Religions: Hidden Believers] and AS.211.272 [Music at a Glance: History of Brazilian Music] to count toward the Minor in Portuguese.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.211.284. German and Romance Languages and Literatures

AS.211.295. Staging History: Theater and Society in the Courts of Europe. 3.0 Credits.
During the 17th century, the growth of the play-going public of London, Madrid, and Paris transformed theater into an exceptional channel for cultural expression. This course combines the study of theater history, including the spaces, audiences, actors, and playwrights, with the literary analysis of major plays by Christopher Marlowe, Ben Jonson, Lope de Vega, Pierre Corneille, and Madame de Villedieu. The main objective of this course is to examine and discuss early modern drama in light of contemporary life at court.
Instructor(s): F. Gomez Martos
Area: Humanities.

AS.211.304. Paris Souterrain: Paris Underground. 3.0 Credits.
This course will track uses of “the underground” in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.211.402 OR HA.211.402
Instructor(s): R. Powers
Area: Humanities.

AS.211.312. Acting French: learning about French language and culture through theater. 3.0 Credits.
Performing a play in a foreign language not only improves language skills, but develops the ability to express oneself through the body and to communicate both efficiently and elegantly. Using excerpts from popular French stage plays by Camus, Sartre, Feydeau, Ionesco, Pagnol and Rostand among others, this course aims to help students to 1) improve French pronunciation, intonation, syntax, and vocabulary; 2) appreciate and understand linguistic nuance and socio-cultural practices; 3) learn fundamentals of acting that carry over into everyday communication, from body language and vocal projection to the expression of emotion and improvisation. Students will view filmed representations of select plays as well as present an end-of-semester staging. Recommended course background: AS.210.201.
Instructor(s): K. Cook-Gailloud; M. Alhinho
Area: Humanities.
AS.211.318. Women in Pre-Modern French Literature. 3.0 Credits.
This course will examine the changes in the relationship of women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d’Épinay and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.211.319. ¡Salsa! The Afro-Antillean Song. 3.0 Credits.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instils vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. Concepts learned in this course will be directly applicable to careers linked to intercultural and international relations while also apply to multiple careers in media, music industry and dance. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Instructor(s): M. Ramos
Area: Humanities.

AS.211.327. Italian Eco-cinema: Inconvenient Truths from 1945 to 2015. 3.0 Credits.
For centuries Italy, i.e. the Bel Paese, has been acclaimed for its natural beauty. However, during the country’s rapid transformation from an agrarian to an industrial society, its natural wonders came under threat. Starting from the early post-war period to the current post-modern era, politically committed filmmakers have been unveiling Italy’s “inconvenient truths.” This class takes an eco-critical approach to Italian cinema, examining its ethics and aesthetics. We shall start with the works of iconic filmmakers such as Roberto Rossellini, Pier Paolo Pasolini, and Michelangelo Antonioni, and move to more contemporary films such as Matteo Garrone’s Gomorrah, Alice Rohrwacher’s The Wonders, and other feature and documentary films that embody the philosophies of the Slow Food and environmentalist movements.
Instructor(s): L. Di Bianco
Area: Humanities.

AS.211.330. Curating Media Artists in Residence at JHU. 3.0 Credits.
Curating Media Artists in Residence at JHU: students will be closely involved with JHU’s Center for Advanced Media Studies (CAMS), and the Baltimore Museum of Art (curator Kristen Hileman) in preparing technical aspects of the BMA Black Box exhibit of the 16mm film, Captain Gervásio’s Family, by the internationally acclaimed artist duo Tamar Guimarães and Kasper Akhøj. This black and white silent film is a portrait of a Spiritist community in Palmela, a small town in Brazil, where half of the inhabitants are believed to be psychic mediums. In addition, students will be involved in helping curate an artist talk and panel on the topic of “Documenting the Spiritual,” with the Stanford anthropologist Tanya Luhman, and other experts on religious practices from Brazilian shamanism to various religious and spiritual practices from our own Baltimore communities. Further, students will have the unique opportunity to see some raw footage from the artists’ latest documentary film project, part fieldwork and part staging, that engages with the Palmelian psychic mediums’ cosmovolontological perspectives. Says Tamar Guimarães: “If Captain Gervásio’s Family tied the medium’s journey into the after-life’s boundless and phantasmal modernity to cinematic spectrality— where cinema, the ultimate modern medium is also the ashen-grey world of the haunted and the ghostly, the new film will insist on the mediums’ technological inventions. Please note that the class time will be flexibly adapted to the needs of the artists’ residency. If you have a very full calendar in the Spring it is best advised not to take this class.
Instructor(s): B. Wegenstein
Area: Humanities.
AS.211.341. Power and Resistance in French Political Thought. 3.0 Credits.
Even as a strong, divine-right monarchy emerged in France, following the Renaissance wars of religion, rebellious French thinkers never stopped questioning the foundations of power. They focused critically not only on the claims of authority issuing from the top, but also on the submissiveness of the governed and the reach of propaganda. This course examines how power shapes minds and bodies, from absolutism to the Revolution, to democratic laïcité. Readings include works by La Boétie, Montaigne, Loyseau, Bayle, Rousseau, Saint-Just, Maistre, Tocqueville, Foucault, Lefort, Rancière and the Assemblée Nationale. Readings and discussion in English.
Instructor(s): E. Russo
Area: Humanities.

AS.211.348. Holocaust Consciousness — An Intercultural and Interdisciplinary Approach Through Media Studies and Psychology. 3.0 Credits.
This course approaches Holocaust consciousness in the U.S. and Europe within a psychological and media-theoretical frame-work. It is also part of a larger research project between the Center for Advanced Media Studies at JHU and the Sigmund Freud University in Vienna. During the semester students will be tele-conferencing during five to six class sessions with students in the same course held at the Sigmund Freud University and taught by Professors Nora Ruck and Markus Brunner. Together we will examine Holocaust consciousness in the U.S. and Europe, and such phenomena as trauma, inter-generational transmission, and projection of the trauma of the victims’ and/or the perpetrators’ as primary materials we will be using war memoirs and documentary films (from the films of the “Bilderverbot” to today’s family ethnographies). Students will be teamed in small, inter-cultural groups to address both U.S. and a European perspectives on these materials. An excursion to the U.S. Holocaust Memorial Museum in Washington D.C. will also be part of the course.
Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.

AS.211.350. Gritemos para no olvidar: A Survey of Heavy Metal Music and Culture in Latin America. 3.0 Credits.
Deans Teaching Fellowship: This course will explore the influence of Heavy Metal on culture in Latin America. It will offer a general survey of the history of Heavy Metal — both inside and outside of Latin America — and will discuss texts, movies, music videos, recorded interviews, pictures and websites in relation to their social, political and cultural contexts in Latin America
Instructor(s): C. Pack
Area: Humanities.

AS.211.353. ¡Máscaras mexicanas!. 3.0 Credits.
Although masks are now global symbols of Mexican culture, the origins and evolution of the mask in Mexico are often shrouded in mystery. This course explores masked representations and stories of masking across a wide variety of media, including movies, comics, novels, plays, and wrestling performances. The question of the mask in Mexico is examined in different historical, literary, social, and religious contexts, with particular focus given to the masks of saints, gods, wrestlers, bandits, and superheroes. This course provides students with a basic understanding of Mexican history from the 19th to the 21st century, as well as different ways to engage theoretically with one of Mexico’s most iconic cultural emblems. Class taught in Spanish. Writing intensive. Recommend Course Background: As.210.311 or equivalent.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

AS.211.358. Writing the Great War: French Literature and World War I. 3.0 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.

AS.211.361. Narratives of Dissent in Israeli Society and Culture. 3.0 Credits.
In this course we will study and analyze the notion of dissent in Israeli society and culture on its various literary and artistic forms. We will examine the emergence and the formation of various political and social protest movements, such as the Israeli Black Panthers, Israeli feminism and the 2011 Social Justice protest. We will discuss at length the history and the nature of dissent in the military and in relation to Israeli wars and will track changes in these relations. Significant portion of the course will be dedicated to the literary, cinematic and artistic aspects of Israeli dissent and their influence on Israeli discourse. We will explore the nature and role of specific genres and media such as the Israeli satire, Israeli television, newspaper op-ed and the recent emergence of social media.
Students wishing to work in English exclusively for 3 credits should enroll in section one. Students who are fluent in Hebrew and are wishing to attend an additional hour-long Hebrew discussion session per week with Professor Cohen (time TBD in consultation with enrolled students) for 4 credits should enroll in section two.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.211.363. The Italian-American Experience: From the Margins to the Mainstream. 3.0 Credits.
This course explores the many depictions, descriptions, and definitions of Italian-American ethnicity and identity in various media, from the narratives and poetry of the first Italian immigrants in the nineteenth century to the wildly popular, stereotype-promoting American films and television shows of today. Through literature, film, poetry, language, music, genre studies, and study of religious and cultural traditions, we will investigate how Italian-Americans express their identity to others.
Instructor(s): A. Falcone
Area: Humanities.
AS.211.364. Drama Queens: Opera, Gender, and the Poetics of Excess. 3.0 Credits.
What is a drama queen? According to the Oxford English Dictionary, a drama queen is “a person who is prone to exaggeratedly dramatic behaviour” and “a person who thrives on being the centre of attention.” While drama queens exist among us, the world of opera is certainly one of their ideal environments. Echoing back to their tragic fates, the powerful voices of Dido, Medea, Violetta, and Tosca never ceased to affect their empathetic public. In fact, excess and overreactions are two main features of the operatic experience both on stage and in the audience. By focusing on the ways in which operatic characters are brought to life, the course explores the social, political, and gender dynamics that inform the melodramatic imagination. Students will have the opportunity to attend live HD broadcasts of Verdi’s La Traviata and Tchaikovsky’s Eugene Onegin from the Metropolitan Opera. No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.211.366. Cuisine and Culture in Latin American Film. 3.0 Credits.
This course is a comprehensive study of presentations of food in Latin American Film. Cuisines are cultural symbols that bind together people in ritual and into a community. The goal of this class is to interpret how food habits function beyond providing calories and sustenance. Films from Latin America will be used as an entrée to discussing topics of food as medicine, family/community, and gender and as links to the history of Latin America. Students will be able to identify and differentiate between tropes of, as well as approaches to, food in film, and theories of food production, distribution and consumption in Latin America. Assignments will include a weekly film viewing, along with primary theoretical readings (in Spanish) around food and culture. Several presentations and a final project will focus on continuing research into food representations in films selected by individual students in which you will be able to apply what you have learned during this course to analyze additional works, thereby gaining a deeper understanding of Latin American cultures and values.
Prerequisites: Advanced Spanish I (210.311), or appropriate placement exam score
Instructor(s): J. Lirot
Area: Humanities.

AS.211.367. La Nouvelle Vague. 3.0 Credits.
Exploration des films les plus importants et des principaux cinéastes de la Nouvelle Vague française; introduction à l’analyse et à l’appréciation des films. Conducted in French. Recommended Course Background: AS.210.301 or permission of the instructor. Recommended screenings Tuesday 7:30pm. $40 lab fee.
Instructor(s): S. Roos
Area: Humanities.

AS.211.368. Program Abroad: Italië: Politics, Culture, and Society. 3.0 Credits.
Course in Italian culture offered on the JHU summer program in Bologna. Open to students on the JHU Bologna Summer Program only. Permission required.
Instructor(s): E. Refini; S. Morgan
Area: Humanities.

AS.211.371. Kafka and the Kafkaesque. 3.0 Credits.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilarious comical. The related term “kafkaesque” refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka’s poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka’s prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka’s impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka’s oeuvre while developing skills in critical analysis and literary close reading.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

AS.211.377. Transatlantic Mafias: Organized Crime in Mexico and Italy. 3.0 Credits.
Both Mexico and Italy deal with criminal organizations which daily challenge the state and its institutions yet at the same time maintain an episodic and illegal collaboration with them. This course intends to show, understand and discuss how mafias, in their many incarnations, interact with contemporary societies.
Instructor(s): M. Cantarello
Area: Humanities
Writing Intensive.

AS.211.380. Modern Latin American Culture. 3.0 Credits.
Taught in Spanish. This course will explore the fundamental aspects of Latin American culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.312
Area: Humanities.

AS.211.390. Modern Spanish Culture. 3.0 Credits.
This course will explore the fundamental aspects of Spanish culture from the nineteenth to the twenty-first centuries. The course will offer a general survey of the history of Spain and will discuss texts, movies, songs, pictures, and paintings in relation to their social, political, and cultural contexts. This course will be of particular interest for students planning on spending a semester abroad in Spain—specially for those students going to the JHU Fall Semester in Madrid, at Carlos III University. Taught in Spanish. Recommended Course Background: AS.210.311 or appropriate Webcape score. NOTE: THIS COURSE IS NOW AS.215.390 as of 3/27/17
Prerequisites: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.
AS.211.394. Brazilian Culture & Civilization. 3.0 Credits.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor's permission required)

Writing Intensive.

AS.211.397. Program Abroad: Brazilian Culture & Civilization. 3.0 Credits.
Summer Abroad Program. Intensive language and culture program offered in Rio de Janeiro, Brazil. The Culture and Civilization course strengthens students’ language skills while deepening their understanding of Brazilian history and culture. Pre-req: 1 semester of Portuguese or 1 year of Spanish. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.211.400. Topics in Romance Literatures. 3.0 Credits.
This course provides an introduction to Romance Literatures from their origins to the present day. Topics and texts discussed vary year-to-year (e.g. the idea of progress in modern Europe; literature and war; poetry and music in medieval and Renaissance Europe). Special attention will be given to how Romance literatures and cultures have evolved in dialogue with each other throughout the centuries. The main language of teaching and discussion will be English, but students will be encouraged to read the materials in the original language compatibly with their skills. The course is a requirement for the Romance Languages and Literatures major.
Area: Humanities
Writing Intensive.

AS.211.401. La France Contemporaine. 3.0 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites, and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301 or AS.210.302 or permission of instructor.
Instructor(s): A. Wuensch
Area: Humanities.

AS.211.402. La France Contemporaine II. 3.0 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor.
Instructor(s): A. Wuensch; B. Anderson

AS.211.410. Toward Modernity: France 1848-1885. 3.0 Credits.
The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.211.412. Temps et recit dans le cinema francais. 3.0 Credits.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.

AS.211.420. Real French: From Slang to Sophistication. 3.0 Credits.
This class will teach the realities of the French language, ranging from slang to the most sophisticated forms of expression. We will study excerpts of films, literary works, essays, political speeches, etc., in order to examine which level of speech is at work. Course also provides students with linguistic tools that will help them reach the highest level of written proficiency, as well as develop their personal stylistic voice.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.211.431. Desecrating the Sacred Heart: Science, Religion and Art in Fin-de-Siècle France. 3.0 Credits.
This interactive course analyzes the stakes underlying the construction of Paris’ controversial Sacré-Coeur Basilica in Montmartre. In the light of heated 19th-century debates on moral authority that opposed religious believers and partisans of a secular state inspired by a scientific ethos, we will consider how the advocates of both sides use specific rhetorical techniques in the public domain (newspaper articles, caricatures, speeches) and artistic devices (paintings, literary writings) to convince their audience of the validity of their claims. The course will open out onto contemporary debates that show similar ethical conflicts.
Instructor(s): K. Cook-Gailloud.
AS.211.445. Rogues, Tricksters, and Saints: Boccacio's Decameron. 3.0 Credits.

Boccacio's Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccacio's masterpiece on its own terms and in relation to the development of story-telling, from gossipy "news" (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints' lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and cinematic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian.

Prerequisites: Students may not have taken AS.214.445.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.211.449. America Through French Eyes: French Travellers to America. 3.0 Credits.

From early colonial efforts in the sixteenth century through the time of the great political revolutions and down to the present, America has exercised a deep fascination on the French. This course will look at French representations of America in art, literature and political thought across the centuries. Through a range of materials including travel accounts, essays, novels, maps, paintings and film, we will investigate how French perceptions of America have shifted over time, often in response to changes in French society and culture. All texts will be read in translation. Course work will include visits to JHU's Special Collections and the Walters Art Museum downtown
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century. 3.0 Credits.

2016 marks the bicentennial of Rossini's irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart's The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais' controversial "Figaro trilogy", stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretentions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano's The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick's Barry Lyndon (1975) and Milos Forman's Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.211.475. Inside the Writer's Laboratory. 3.0 Credits.

How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the "laboratory" of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.211.479. Dante's Journey through the Afterlife. 3.0 Credits.

Dante's Divine Comedy presents a complete picture of the medieval world-view in all its aspects: physical (the structure of the cosmos), historical (the major actors from Adam to Dante himself) and moral (a complete system of right and wrong). Dante shows how the Christian religion portrayed itself, other religions, the nature of God, humans, angels and devils, and human society. We will explore these topics both from the viewpoint of Dante's own time, and in terms of its relevance to our own societal and cultural concerns.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.211.500. Independent Study-Portuguese Culture. 0.0 - 3.0 Credits.
Instructor(s): F. De Azeredo Cerqueira.

AS.211.501. Independent Study-French Culture. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.211.666. Graduate practicum: Mapping the Scholarly Landscape I (Research Skills).

Texts have lives. From handwritten manuscript to digital format, the various incarnations of the literary text have implications for literary scholarship. This course examines the many lives of a literary text and the issues of access, retrieval, and research. From online resources to the core printed reference works, this course acquaints graduate students with the range of scholarly apparatus in the field of literary studies. The course will be conducted in 6 two-hour sessions on Sept 15,29, Oct 13, 27 Nov 10 and Dec 1.
Instructor(s): T. Rose-Steel
Area: Humanities.

AS.211.711. Adapting Myths for the Screen.

In this course we will look at examples of adaptations of sacred narratives for the screen from Pasolini's adaptations of the gospels to Disney's adaptations of Grimm, and the recent boom of 21st century fairy-tale films; we will be reading Jack Zipes' The Enchanted Screen, and Fairy-tale Films Beyond Disney, ed. Jack Zipes, and Sacred Narratives: Readings in the Theory of Myth, ed. Alan Dundes, among others.
Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.
AS.212.791. Film Theory and Critical Methods.
Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas. Cannot be taken if student took any of AS.212.791, AS.213.791, AS.214.791, or AS.215.791
Prerequisites: Cannot be taken if student took any of AS.212.791, AS.213.791, AS.214.791, or AS.215.791
Instructor(s): D. Schilling
Area: Humanities.

Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.212.127. Freshman Seminar: 18th Century Theater and Performance. 3.0 Credits.
An introduction to 18th century theater and performance. Using philosophical and critical texts by Aristotle, Chapelain, Diderot, and others, we will examine a series of plays and other works for theatrical performance. Course has a performance requirement. Taught in English.
Dean's Prize Freshman Seminar
Instructor(s): O. Sabee
Area: Humanities.

AS.212.150. Freshman Seminar: Before the Selfie. Autobiography and Self-Portraiture in Text and Photography. 3.0 Credits.
What strategies do contemporary writers and artists use to project a public image of a private self? How do emergent technologies impact the representation of the autobiographical self in relation to community? Focused on the history and present-day uses of literary and photographic self-portraiture in France since the Second World War, this course explores themes of Jewish identity, gay and queer subjectivity, and feminist critique by asking how we view others picturing themselves, illuminating our understanding of the construction of selfhood. Course taught in English, based on works translation from the French.
Instructor(s): A. Rogobete
Area: Humanities.

AS.212.170. Freshman Seminar: Writing the Great War. French Literature and World War I. 3.0 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in English
Instructor(s): C. Benaglia
Area: Humanities.

AS.212.205. Winter Is Coming: Writing and Rewriting French Dark Ages. 3.0 Credits.
This course will not aim at drawing the exhaustive literary landscape of French Middle Ages, neither will it be a Comparative Literature or History class. It may be considered a gateway to French Medieval literature, given that the Modern Fantasy has obviously improved the last decades, the latter being built as a rewriting of Medieval themes and Western European folklore. Looking at texts originally written in Old French, including prose and poetry, but also at the French Medieval iconography, we will try to understand the old roots of the Modern and so popular (but sacrificing) Fantasy Literature. Basic French will be required.
Instructor(s): M. Alhinho
Area: Humanities.

AS.212.304. Paris Souterrain: Paris Underground. 3.0 Credits.
This course will track uses of “the underground” in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.212.334 OR HA.212.334
Instructor(s): R. Powers
Area: Humanities.

AS.212.318. Women in Pre-Modern French Literature. 3.0 Credits.
This course will examine the relationships in the women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d’Epiney and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.326. Listening In: The Sounds of French Poetry. 3.0 Credits.
The sounds and rhythms of French language poetry have evolved sharply over time. How can listening to the musicality of poems enhance our understanding of poetic meaning? To attune the ear, develop poetic voice and a heightened sensibility to the visual and aural experience of poems, students will listen to, record, recite and translate poetry. Readings will range from classical works such as Racine’s Phèdre and Molière’s Tartuffe to poets such as Baudelaire, Hugo, Mallarmé, and Tzara. Recommended Course Background: AS.212.333 or AS.212.334
Instructor(s): J. Whitaker
Area: Humanities
Writing Intensive.

AS.212.331. Paris 1900: the Great World Exhibition and the Beginning of Modernism. 3.0 Credits.
Held in Paris, the 1900 World’s Fair introduced to the modern world such striking innovations as subways, moving images on giant screens, escalators, colossal electrical shows, and the first painting by Pablo Picasso to be shown on French soil. Focused on key cultural and socio-political events surrounding this momentous turn-of-the-century display of wealth and power, this course examines the paradoxes of a modernizing French nation which even as it promoted individual rights alongside technology and economic growth was headed towards world conflict. Students will perform original research by exploring the rare book collection at JHU as well as the substantial digital archives now documenting the period.
Instructor(s): K. Cook-Gailloud
Area: Humanities.
AS.212.333. Introduction à la littérature française. 3.0 Credits.
Introduction à la Littérature française I and II propose reading and discussion of texts of various genres from the Middle Ages to the 21st century. This sequence is intended as an introduction to the methods, questions, and techniques of textual analysis through intensive reading, discussion, and production of written texts. Introduction à la littérature française I covers some of the greatest classics of French literature and thought from the Middle Ages to the Revolution. The two semesters may be taken in either order. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Recommended Course Background: AS.210.301-AS.210.302 or at least one semester of AS.210.301-AS.210.302 with a grade of A and written permission of the instructor. For more info see http://grll.jhu.edu/french/undergraduate/courses/
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): S. Miglietti; W. Anderson
Area: Humanities
Writing Intensive.

AS.212.334. Introduction à la littérature française II. 3.0 Credits.
Readings and discussion of texts of various genres from the Middle Ages to the 20th century. The two semesters (212.333 and 212.334) may be taken in either order. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Introduction à la littérature française II covers the time period from the Revolution to the present.
Prerequisites: AS.210.301 OR AS.210.302 or at least one semester of AS.210.301 or AS.210.302 with a grade of A and written permission of the instructor.
Instructor(s): E. Russo; J. Neefs
Area: Humanities
Writing Intensive.

AS.212.336. The Violence of the Stage. 3.0 Credits.
Modern French drama since World War II has been a privileged space for public representations of violence. Featuring works by playwrights from Sartre to Réza and from Beckett to Mouawad, this course examines the meanings and functions of violence in performance (murder, terrorism), as well as different possibilities for theatrical staging and film adaptation.
Recommended Course Background: AS.212.334
Instructor(s): G. Briex
Area: Humanities.

AS.212.339. Constructing Poe: How 19th Century France created an icon. 3.0 Credits.
Just who was Edgar Allan Poe, and who is he today? This course explores how and why a multitude of 19th-century French writers constructed Poe as an author. Through selected works from Hugo, Baudelaire, Mallarmé, and Verne, to be read alongside Poe's original texts, we will study the means by which these figures projected uniquely French versions of this mysterious American writer the better to stake out their own literary revolutions. By exploring versification, translation, adaptation, and the role of the proper name, we will examine the broad literary history that underlies contemporary understandings of Poe. No knowledge of French is required.
Instructor(s): A. Alexander
Area: Humanities
Writing Intensive.

AS.212.340. Topics in French Cinema: Immigration, identité, différence culturelle. 3.0 Credits.
An exploration of immigration, identity, and cultural differences through the lens of recent French and Francophone films. Focus on discussion and analyses of film sequences in class and on oral presentations. Students will have the opportunity to progress in vocabulary, oral expression, and in critical analysis. Films studied include works of Kassowitz, the Dardennes, Kechiche, Haneke, and Audiard. Conducted in French. Recommended course background: completion of AS. 210.301 or equivalent score on Placement test.
Instructor(s): S. Roos
Area: Humanities.

AS.212.341. Power and Resistance: Approaches to French Political Thought. 3.0 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.342. Topics in French Cinema: Le crime dans le cinéma. 3.0 Credits.
Focus on French crime films, thrillers, and films noirs. Films studied will include movies by Jean-Pierre Melville, Dassin, Godard, Chabrol; French responses to US genre movies and to Hitchcock, and contemporary versions of the crime film in France (Jacques Audiard, Michael Haneke). Strong focus on discussion and analyses of film sequences in class and on oral presentations. Additional assignments will involve vocabulary and grammar study. Recommended Background: 210.301 or 210.302 or equivalent score on placement test
Instructor(s): S. Roos
Area: Humanities.

AS.212.343. La France Contemporaine. 3.0 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites, and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture.
Recommended Course Background: AS.210.301 or AS.210.302 or permission of instructor.
Prerequisites: Students may not have taken AS.211.401.
Instructor(s): A. Wuensch
Area: Humanities.
AS.212.358. Writing the Great War: French Literature and World War I. 3.0 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.

AS.212.362. Ecrire l’héroïsme au féminin [Writing Heroism in the Feminine]. 3.0 Credits.
How can we define a heroine? What distinguishes heroines from mere female protagonists? Who are the main heroines to have marked the French literary tradition? This course examines how writers have transformed the notion of heroism inherited from Ancient Greece and Rome to lend it different and distinctly gendered shapes in the figure of the female hero: bravery, scandal, crime, sacrifice, nationalism. Focus will be placed on the evolution of the concept from the 17th century to the end of the 20th century in novels and plays by Racine, Madame de Lafayette, Prevost, Balzac, Maupassant, Anouilh, Wittig, and Condé. Recommended Course Background: AS.212.333 or AS.212.334.
Instructor(s): L. Cariou
Area: Humanities.

AS.212.364. Not Another Fashion Victim: Shopping, Style, and Consumer Culture in Paris. 3.0 Credits.
Paris has long been considered a world center for fashion. This course examines the development of style and of consumer culture in the French capital since the 19th century. Readings from key historical and literary texts will lay the groundwork for understanding modern-day consumption and theories of fashion, taste, and social distinction. We will consider visual and print sources related to Parisian fashion (paintings, fashion plates, magazines) as well as films. Taught in English, but French minor/major credit possible by completing written work in French and by attending a weekly discussion section conducted in French. Students interested in the 4-credit French option should enroll in section 2. All others should enroll in section 1.
Instructor(s): K. Haklin
Area: Humanities.

AS.212.365. Twisted Roots: Writing “Creole” in the French Caribbean. 3.0 Credits.
This course examines rootedness and hybridity in contemporary literary and critical works from the French Caribbean, exploring the act of writing “Creole” as illustrative of innovative thought-constructs. French students will read and write in French and should register for section 02; other students will read translations and should register for section 01. Discussions will be conducted in English.
Instructor(s): R. Loescher
Area: Humanities.

AS.212.366. Avant la Révolution: littérature et critique sociale en France (1500-1789). 3.0 Credits.
This course will explore some key moments in the literature and thought of pre-revolutionary France, focusing on the ways that Renaissance and Enlightenment authors used literature to create alternative spaces from which to critique and rethink the worlds in which they lived. Readings will include Rabelais, Montaigne, Fontenelle, Montesquieu, Voltaire, Diderot, and Rousseau. Assessed work will include an oral presentation and a research paper on a topic of your choice. Throughout the course you will acquire finer critical and analytical skills, polish your oral and written French, and familiarize yourself with advanced research methods in the human sciences. Recommended course background: at least one semester of Introduction à la littérature française (I or II). For more info see http://grll.jhu.edu/french/undergraduate/courses/
Prerequisites: Pre-reqs: AS.212.333 OR AS.212.334
Instructor(s): S. Miglietti
Area: Humanities Writing Intensive.

AS.212.383. Ecrire l’ailleurs : littérature, voyage, utopie. 3.0 Credits.
Distant places have always exerted a particular fascination on the human mind. Many classics of European literature feature journeys to foreign lands, whether real or imaginary: from More’s Utopia and Ariosto’s Moon, to Bacon’s New Atlantis and Swift’s Lilliput. Through a range of examples from early modern France, we will explore the complex relationship between travel and the literary imagination. Topics to discuss include: the style, status, and models of travel literature; cultural encounter, Otherness, and self-representation; imaginary places and social critique. Readings will include fictional texts like Cyranò’s Estats et empires de la Lune, genuine travel reports such as Champlain’s Voyage au Canada, and works that skilfully mix fiction and reality, as in Montesquieu’s Lettres persanes.
Instructor(s): S. Miglietti
Area: Humanities Writing Intensive.

AS.212.410. Toward Modernity: France 1848-1885. 3.0 Credits.
The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We’ll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré. Co-listed with AS.211.410
Instructor(s): J. Neefs
Area: Humanities Writing Intensive.

AS.212.412. Temps et recits dans le cinema francais. 3.0 Credits.
In what ways does the narrative cinema condense, expand, fracture, reverse, or otherwise complicate our perception of time? What formal and stylistic means allow filmmakers to manipulate spectators’ desire for narrative coherence and closure? Based on a range of films drawn from the silent era, the classic cinema of the 1930s to 1950s (costume dramas, literary adaptations, thrillers), and the freely inspired works of the French New Wave and its inheritors, this course will provide students with the critical concepts and vocabulary needed to speak in French about film as an aesthetic object. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities.
AS.212.417. Texts of/on the Terror from the French Revolution. 3.0 Credits.
Taught in French. During the first half of the semester we will take advantage of the renewed interest in scholarship on the Terror to deal with some of the most famous examples of Revolutionary rhetoric, focusing especially on the trial of Louis XVI and the late speeches of Robespierre. During the second half of the semester we will read literary works produced during the Terror and accounts of the Terror from authors such as Balzac, Dumas, and Michelet. We will be asking questions such as: What was the Reign of Terror and to what extent was its project dependent on public discourse? Why and how does the nature of public oratory change? What happens to definitions of “the literary” and of authorship in a terroristic context?
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.421. Textes et Performances: le théâtre français du 17e au 19e siècle. 3.0 Credits.
Le théâtre français, des classiques aux romantiques. There will be a performance component to this course. Recommended co-registration with 210.312. Acting French. For more information, see http://www.wilda.org/Courses/CourseVault/Undergrad/18thTheaterUG/SyllabusTheater.html
Instructor(s): W. Anderson
Area: Humanities.

AS.212.429. Thesis Prep. 1.0 Credit.
Preparation of the thesis topic, a comprehensive annotated bibliography, and abstract prior to the writing of the Senior Thesis (AS.212.430). Meetings are by individual appointments with the chosen French faculty mentor. Normally 212.429 is taken in the Fall semester of the senior year.
Prerequisites: AS.210.417|AS.212.333 AND AS.212.334
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson
Area: Humanities

AS.212.430. Senior Thesis. 3.0 Credits.
An in-depth and closely supervised initiation to research and thinking, oral and written expression, which leads to the composition of a senior thesis in French. Recommended Course Background: AS.212.429.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson
Area: Humanities
Writing Intensive.

AS.212.432. The Dreyfus Affair: Lying for Truth. 3.0 Credits.
In 1894 French military captain Alfred Dreyfus was found guilty of a crime of treason he did not commit. The true reasons for his arrest are still under debate today: was this a sheer act of antisemitism? Why did the army create false proof against a men they knew was innocent? What was the role of the press in propagating the Affair? This course proposes to approach the Dreyfus Affair in all its complex forms, while encouraging students to carry out original and innovative research based on a wide range of resources (caricatures and articles in the press, pamphlets, paintings, films, music, photographs, court transcripts, government archives, private letters, and hopefully more).
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.212.442. Souvenirs de la France occupée 1940-1944 [Memories of Occupied France, 1940-1944]. 3.0 Credits.
How have writers and filmmakers active in France since World War II shaped the collective memory of German occupation, deportation, and liberation, both forging and contesting myths of the French nation through the wartime experience of resistance and collaboration? In what ways do distinct modes of written and audiovisual expression (fiction, testimony, documentary) conjoin with individual or group perspectives to color our understanding of France’s “dark years”? See full description here: http://grl.jhu.edu/french/undergraduate/courses/
Prerequisites: AS.212.334 OR ( AS.211.401 AND AS.211.402 )
Instructor(s): D. Schilling
Area: Humanities.

AS.212.449. France, terre des migrations [French Histories of Migration].
3.0 Credits.
Comme le Canada ou les Etats-Unis, la France est une grande terre d'immigration qui depuis le 19e siècle a accueilli sur son sol des populations du monde entier. En examinant témoignages, textes de fiction et films documentaires, nous suivrons les expériences contrastées de diverses vagues de migrants chassés par la faim, le chômage ou les persécutions. Quels mécanismes ont favorisé ou freiné l'intégration économique, sociale et civique de ces migrants qui ont rejoint la République française? Que veut dire "être immigré" aujourd'hui?
Prerequisites: AS.211.401
Instructor(s): D. Schilling
Area: Humanities.

AS.212.466. The Pleasures of Tragedy. 3.0 Credits.
Why do we experience pleasure in watching representations of bad things happening to people on stage? Are the emotions aroused by tragedy ethical or immoral? These are just some of tragedy's many paradoxes, which have been explored by philosophers over time, from Plato to Augustine, to Rousseau, to Hume. This course proposes to explore some of the enigmas and conundrums raised by a genre which everybody agrees cannot be defined by common formal and thematic features, but which we all feel able to recognize when we see it. Is there an essence of tragedy that endures from 5th century Greece to today? Or are the things that make us call a play tragedy radically different according to time and place? How is tragedy related to philosophy, religion and politics? Tragedy has been declared in turn “dead” (killed by Christian notions of redemption, by political utopianism, by philosophical optimism, by the dissolution of language, etc.) and renewed, regenerated (through the sense of the absurd, postmodern immanence, irredeemable violence) – and indeed, there has been a flourishing of the genre in France in the late XXth century. Through readings of a selection of plays, both ancient and modern, and theoretical works, we'll examine the metamorphosis of the tragic hero and heroine, the issues of gender, moral responsibility and the management of the spectator’s emotions. Readings from Sophocles, Aristotle, Corneille, Racine, Hegel, Kierkegaard, Anouilh, Sartre, Césaire, Koltès, Gably. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.
AS.212.469. Limit-Experience, Limit-Texts. 3.0 Credits.
Why tell stories? What power do writers wield against the disorder of life? How do literary narratives measure up to experiences that usher us beyond the limits of the imaginable? In this course we will examine modern and contemporary works in French that engage with such limit states and situations as combat, imprisonment, madness, terminal illness, and corporeal transformation. Authors to be considered include Carrère, Chevillard, Darrieussecq, Deluze, Duras, Guibert, and Volodine.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.470. Censorship in Language and Practice. From the Ancien Regime to Democracy. 3.0 Credits.
An exploration of the boundaries of acceptability when speaking about religion, government, sexuality and gender. Students will learn about the political, theological and legal basis of blasphemy and punishable behavior, and how they have changed from the time of divine-right monarchy to contemporary laicité. Selected readings ranging from the clandestine culture of free-thinkers and rakes in the 17th century, to the trials and causes célèbres of the Enlightenment, to modern-day democratic polemics.
Prerequisites: AS.210.302
Instructor(s): E. Russo
Area: Humanities.

AS.212.476. Into the Wild: Environmental Imagination across the Ages. 3.0 Credits.
How have people over the centuries construed their relationship to the natural environment? What literary and artistic traditions have shaped Western attitudes to nature, and how have these traditions and attitudes changed over time? "Into the Wild" will explore these questions through a range of textual and visual sources, including works in both verse and prose (e.g. pastoral and Romantic poetry, early exploration accounts, scientific treatises and works of science-fiction, short-stories and novels), paintings, engravings, music, and film. Course work includes visits to JHU's Special Collections and to the Baltimore Museum of Art. Recommended background: AS.212.333 or AS.212.334 either previously or concurrent
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.212.478. Guillaume de Machaut: exploring medieval authorship in the digital age. 3.0 Credits.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. The course aims to give students a thorough grounding in Machaut's literary and musical works, while also introducing them to digital tools to view and analyze original illustrated musical manuscripts of his work. Critical analysis of Machaut's work will be assessed not only through more traditional essay writing, but also through the creation of a multimedia digital edition of a section of his oeuvre using Omeka exhibition software. The course is designed so that no prior knowledge of musical notation or medieval French is necessary.
Instructor(s): T. Rose-Steel
Area: Humanities
Writing Intensive.

AS.212.481. The 18th-Century French Novel. 3.0 Credits.
Key novels will be studied from a variety of approaches. Authors to include Marivaux, Montesquieu, Prévost, Diderot, Crébillon, Rousseau, and Voltaire. Recommended Course Background: AS.212.333 and AS.212.334 or AS.212.333 and permission of the instructor.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.501. French Independent Study. 3.0 Credits.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

AS.212.502. French Indep Study-Lit. 3.0 Credits.
Instructor(s): E. Gonzalez; J. Neefs.

AS.212.596. Independent Study - Spanish. 3.0 Credits.
Instructor(s): E. Gonzalez.

AS.212.598. Internship. 1.0 Credit.

AS.212.604. Around Baudelaire.
Topics in Baudelaire's art and thought, and in that of various contemporaries (Courbet, Manet, Wagner) and successors (Mallarmé, Proust, Benjamin, Starobinski, Bonnefoy, Roubaud, Deguy). Readings and discussion will be mainly in French.
Instructor(s): J. Neefs; M. Fried.

The development of the drame bourgeois and the theater criticism of the French Enlightenment. Authors to be studied include Racine, Le Sage, Marivaux, Voltaire, Diderot and Beaumarchais. For more information, please see http://www.wilda.org/Courses/CourseVault/Grad/Theater/Syllabus.html
Instructor(s): W. Anderson.

AS.212.618. The Encyclopédie.
In its attempt to realize fully the potential of a group description of knowledge, the Encyclopédie of Diderot and d’Alembert displays the program of the philosophies in a particularly intense and idiosyncratic form. This intellectual conversation will be studied through the investigation of several different subjects treated in the Encyclopédie; for example, the theory of the encyclopedia itself, history, natural history, literature, medicine, and theories of language.
Instructor(s): W. Anderson.

AS.212.632. Utopias.
Reflecting on the genre of the Utopia which from the late 17th century through the late 19th century alludes to diverse ideological constructions, such as the Golden Age, the “Pays de Cocagne”, fantastic worlds, primitive societies, the state of nature, “robinsonnades”, science fiction.
Instructor(s): W. Anderson.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.
AS.212.644. Libitinage: entre révolte et fantasme.
The prerevolutionary libertine novel, starring at its center the character of the libertine, is one of the most iconically associated with the French novel and with notions of transgressive “Frenchness,” intended both for national use and for export. In the wake of the pioneering work of René Pintard (Le Libitinage érudit dans la première moitié du 17e siècle, 1943) libertinage was emancipated from the fictional realm and promoted to a category of intellectual and cultural history. Yet recent critics have contested the use of this label, arguing that the historical individuals who were so called were a heterogeneous collection who had nothing in common apart from their marginality, which was in turn stigmatized or valorized. The purpose of this course is to examine critically the relationship between fictional and historical libertines, the many overlaps between the “transgressive” and the “erudite” communities, the role they played in the emergence of the “radical” Enlightenment and scientific materialism, their subversive use of language, the fluctuation between protective strategies of equivocation and the audacity of parrésia. Readings from trial documents, pamphlets, correspondence, novels and essays, by G. C. Vanini, François Garasse, Antonio Rocco, Théophile de Viau, Descartes, Cyrano de Bergerac, Dassoucy, Bayle, Boyer d’Argens, Voltaire, Sade, Diderot, Laclos.
Instructor(s): E. Russo.

AS.212.678. Guillaume de Machaut: exploring medieval authorship in the digital age.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. Students will learn to use digital tools to view and analyze original illustrated musical manuscripts of Machaut’s work.
Instructor(s): T. Rose-Steel.

What if Rousseau’s description of the sentiment de l’existence were to join to the models of consciousness Damasio develops in The Feeling of What Happens? This course explores aspects of consciousness in French literature (Rousseau, Sand, Nerval, Amiel, Flaubert, Valéry, Proust, Sartre) in a dialogue with recent texts in theory, philosophy, neuroscience (e.g. Poulet, Merleau-Ponty, Sartre, Scarry, Noé, Humphrey, Damasio, Sacks). 
Instructor(s): E. Ender
Area: Humanities
Writing Intensive.

AS.212.692. Research Methods.
Texts have lives. From handwritten manuscript to digital format, the various incarnations of the literary text have implications for literary scholarship. This course examines the many lives of a literary text and the issues of access, retrieval, and research. From online resources to the core printed reference works, this course acquaints graduate students with the range of scholarly apparatus in the field of literary studies.
Instructor(s): T. Rose-Steel.

AS.212.696. Literature Confronts Science: Zola.
Zola worked with the theories of heredity of his time in the Rougon-Macquart novels. But he also attempted to use his understanding of biology and thermodynamics to reform the theory of the novel in general. This course will examine these two different effects of science on literature and try to see what leads an author to undertake such a project. For a more extended description, please see http://www.wilda.org/Courses/CourseVault/Grad/Zola/Syllabus.html. Advanced undergraduates with sufficient background may register for this course with permission of the instructor.
Instructor(s): W. Anderson.

AS.212.699. Cultures of Criticism from the Classics to Foucault.
From fault-finding to the crossover of aesthetic and political judgment, criticism never loses sight of its medical cognates critical and crisis. This course examines the emergence and the transformations of critical judgment in the arts, culture and politics, from the early days of its collusion with French monarchical propaganda, to the critical genealogies of the Enlightenment, to the postrevolutionary critique of history, to Foucault’s critique of practices of veridiction. Works by Perrault, Bayle, Diderot, Rousseau, Tocqueville, Cassirer, Koselleck, Derrida, Barthes, Bourdieu, Foucault. Taught in English; most texts available in translation, but knowledge of French recommended.
Instructor(s): E. Russo
Area: Humanities.

AS.212.705. Fictions d’espace: geopoetique du roman de langue francaise.
En quoi consiste et par quels moyens se construit l’espace dans les fictions litteraires ? Quelles fonctions y jouent les toponymes, les descriptions de lieux ou les trajectoires des personnages ? Quels contrats l’ecrivain peut-il passer avec son lectorat à l’égard du statut des espaces traversés et décrits, qu’ils se fondent sur le « réel » ou qu’ils soient fabriqués de toutes pièces ? Seront abordées dans cette introduction à la géopoétique narrative des œuvres de Balzac, Maupassant, Giono, Gracq, Duras, Chamoiseau, Sony et Echenoz entre autres.
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

AS.212.707. French Documentary Filmmaking.
Overview of the history of French documentary filmmaking featuring works by Cavalier, Depardon, Epstein, Malle, Marker, Painlevé, Philibert, Resnais, Rouch, Simon, Varda, and Vautier. Emphasis will be placed on the rhetorical functions of editing and on the relation forged among filmmakers, their subjects, and the public. Extensive weekly viewing is required.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.719. Enlightenment and Revolution.
Writing Equality: the French Revolution. Enlightenment authors whose work is relevant to the Revolution (Montesquieu, Rousseau, Condorcet, etc.), Revolutionary authors and orators, and 19th-century authors like Balzac and Stendhal or historians like Tocqueville and Michelet who use literary topos to come to terms with the Revolution.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.
Victor Hugo as a prominent figure in the Nineteenth Century France and in Europe, and in French Literature. Poetry, Novels, Theater, Essays, outstanding political involvement, we will examine all aspects of Hugo’s works and poetics, as action in History and Modern politics. Close reading of poems from Les Contemplations and La Légende des siècles, of Le Dernier jour d’un condamné and Les Travailleurs de la Mer, of Hernani, and of Châtiments and some political discourses.
Instructor(s): J. Neefs
Area: Humanities.

What is personal memory? This course offers both an in-depth journey through Proust’s Recherche and a way of tracing major scientific questions about the formation of memory in connection with autobiography and medical history. The process of human remembering – with its counterpart, forgetting – has emerged over the last thirty years as an extraordinarily rich field of investigation as well as of creative endeavors in the arts. Poised between literature and science, this course offers both an in-depth introduction to Proust’s ground breaking modern work on human time, A la recherche du temps perdu, and an investigation into a modern history of memory (a history that unfolds in the nineteenth and early twentieth century, and has made a surprising return in our contemporary understanding of remembrance). That Proust’s petite madeleine should have turned, in recent years, into the magical token of autobiographical recollection and provided, at the same time, an immensely productive clinical and neuro-scientific model of how memory works serves as our point of departure. That human memory is an experience and not merely a biological function – its existence depending on language – will be our running thread. Proust’s book, filled with immensely learned and complex descriptions of mnemonic processes, serves as our case-study. Proust’s investigations into remembering reveal fascinating aspects of the 19th century advances into the psychology and nosography of memory. These will in turn prompt us to read his work in light of present controversies in scientific research, as for example on the construction of memory, on “body-memory,” the interface between cognition and emotion, and the mind/brain debate. As it prompts many questions on the relation between fiction and experience, this journey through major themes of Proust’s quest for memory will invite a broader reflection on the relation between literary and philosophical investigations. Requirements: Short oral presentation and final research paper. Taught in English, reading knowledge of French desirable but not required. Most readings are available in English. Required for this course are vol. I, V, VI of In Search of Lost Time in the 2003 Modern Library edition (ISBN 978-0-375-75154 – 1 and 4 and 7). For a copy of the syllabus, with a list of main recommended readings, available in mid-June, please write to e.ender@jhu.edu
Instructor(s): E. Ender
Area: Humanities.

Throughout his life Rousseau presented himself by turns as the citizen of a Republic, a stateless outcast, the resident of a vanishing homeland of the heart, and the focal point of an international conspiracy. He invented new foundations for political communities that could never be implemented or were severely misunderstood during the revolutionary Terror. The families he portrayed were both patriarchal and defiantly anti-normative. He affirmed his desire to belong and insisted on his irreducible difference; he extolled friendship and engineered breakups. Through readings of Rousseau’s major political, autobiographical and fictional works we shall examine how and why communities, personal identity and citizenship are alternately built and destroyed. Course open to undergraduates.
Instructor(s): E. Russo.

AS.212.743. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l’ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, À l’ombre des jeunes filles en fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor. Recommended course background: At least 2 212.3xx courses
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.750. Récits de la marge : voix périphériques et subcultures.
Examen de romans et récits modernes et contemporains où la marge (géographique, ethno-sociale, sexuée) apparaît comme un lieu de parole spécifique. L’histoire longue de la figure du ‘zonard’ et du ‘jeune de banlieue’ permettra d’interroger les processus de légitimation littéraire et l’émergence de subcultures qui suscitent des postures esthétiques novatrices. Textes de Begag, R. Camus, Charef, Chraïbi, Clébert, Collard, Djaidani, Queneau...
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

From exoticist features of the 1920s and 1930s and political works of the 1960s, to family sagas and personal essays looking back on a conflicted past from the standpoint of the new century, Algeria has featured prominently in the French cinematographic imaginary. The independent North African nation has likewise produced compelling narratives that address the colonial legacy, the armed struggle for independence and its aftermath. Addressing from both sides of the Mediterranean an entangled political and cultural history, this course places in critical context conflicting screen representations as well as the institutions, individuals, and publics associated with them. The course will be taught in English, however most course materials will be in French. Undergraduates may take with permission of the instructor and completion of AS.212.333 and AS.212.334. Graduate students need not have completed the prerequisite courses.
Instructor(s): D. Schilling
Area: Humanities.
AS.212.768. Norms and Forms of Academic Communication.
How to write a book review, an article, a conference paper; how to choose the appropriate journal for publication.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.774. Classiques de la Renaissance.
In this seminar we will read two great classics of Renaissance France: Montaigne’s Essais (1580, 1588, 1595), a hodge-podge of erudite and powerfully introspective pieces of short prose; and Aubigné’s epic poem Les Tragiques (1616), written in response to the ravages of the civil war that torn France apart in the late sixteenth century. In addition to being two masterpieces of French prose and poetry respectively, Montaigne’s Essais and Aubigné’s Tragiques share a number of common features, such as rich intertextual ties with ancient literary models (from Plutarch, Virgil and Seneca to the Bible) and a complex genetic history resulting from multiple waves of textual revision, both in manuscript and in print. A close reading of these works will therefore allow us to address broader issues in literary theory and practice advanced techniques for textual analysis. Open to advanced undergrads
Instructor(s): S. Miglietti
Area: Humanities.

AS.212.781. L’entre-deux-guerres en toutes lettres [French Literature Between the Wars].
French literary culture between the wars (1919-1939) promoted the novel as a forum for social comment and formal experimentation alike. Questioning the psychological biases of the ‘roman d’analyse’ and reacting to the collective tragedy of the Great War, interwar writers updated the French language as well as narrative ‘technique’ in light of emergent theories (psychoanalysis, Marxism, phenomenology). Readings from Aragon, Breton, Céline, Cocteau, Colette, Dabit, Malraux, Némirovsky, Queneau, and Simenon.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.783. Diderot, Power and Representation.
A reading of some of Diderot’s major works in light of his struggle to break out of imposed and self-imposed hierarchies of style and manner, and to reframe or reform radically the relationship between ethics, politics, sexuality, gender and the arts. Special emphasis on Diderot’s self-representation as arbiter of taste, mediator and mentor.
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.

AS.212.784. Founding Myths: Literature, Historicity, and the Nation.
National identities often coalesce around historical events that acquire the status of “founding myths”. In this seminar, we will draw upon French history to discuss how literature and art (including cinema) can contribute to forging and crystallizing a series of identity-making myths. Cases to consider include the burning of Joan of Arc in 1431, the massacres of St Bartholomew’s Day (1572), and the beheading of Louis XVI in 1793. By analyzing representations of these and other historical moments through a wide range of media, we will seek to penetrate the complex relationship between literature, fiction, and historicity in making national identity—a relationship that proves particularly problematic in the case of violent and divisive events such as those mentioned above. Among the authors studied will be Villon, De Thou, D’Aubigné, Marlowe, Shakespeare, Voltaire, Michelet, Dumas, Hugo, Brecht, Anouilh, Camus.
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.212.791. Film Theory and Critical Methods.
Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.212.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’s Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.212.801. French Independent Study.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

AS.212.802. French Dissertation Research.
Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

Instructor(s): D. Schilling; E. Russo; J. Neefs; S. Miglietti; W. Anderson.

AS.213.104. Freshman Seminar: Weimar on the Pacific: German Exile Culture in the United States. 3.0 Credits.
Freshmen Seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.
AS.213.205. Outlaws, Outcasts, Outsiders. 3.0 Credits.
This course offers an introduction to the close reading of German-language literature in the original. We read and discuss significant works written between 1800 and the present that focus on individuals whose experiences give rise to novel forms of selfhood. Authors may include Tieck, Kleist, Büchner, Drost-Hülshoff, Heine, Keller, Storm, Kafka, Walser, Roth, and Bachmann. We will ask how narrative form can represent breakdowns in the established ways of sense-making. Attention will be paid to writers’ divergent responses to the artistic, ethical, and political challenges of modernity. Readings, discussion, and writing assignments in German. Recommended Course Background: AS.210.362 or equivalent
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.251. Freshman Seminar: Friedrich Nietzsche. 3.0 Credits.
Nietzsche's writings continue to inform contemporary thinking about morality, psychology, art, culture, and politics. He started out as a daring scholar of Greek antiquity, went on first to advocate and then to repudiate a grand project of cultural renewal, and eventually transformed his authorial persona into the site of an unprecedented theoretical experiment in which the most cherished ideals of Western culture were turned against themselves. In discussing his works we will focus on such themes as the struggle to affirm life in the face of the challenge of nihilism, modernity, cultural decadence, selfhood and individualism, the status of nature, and the effort to overcome metaphysical thinking. Close attention will be paid to the strategies of writing through which Nietzsche negotiates the conflict between intellectual integrity and aesthetic appeal, truth and illusion.
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.265. Panorama of German Thought. 3.0 Credits.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.270. Die Erfindung der Moderne. 3.0 Credits.
Taught in German. An introduction to key conceptions of modernity elaborated in the German-language cultural context. We consider the rise of historical awareness and the question of whether history has a purpose, modernity’s difference from ancient and medieval times, secularization and the crisis of meaning, the role of intellectual reflection and subjectivity, the relation between cultural production, political power, and economic processes. Excerpts in the original German from works by Kant, Schiller, Novalis, Hegel, Heine, Marx, Nietzsche, Weber, Benjamin, Heidegger
Prerequisites: AS.210.362 or placement exam.
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.303. Mini-Term: Feminist and Queer Theory: Past and Present. 2.0 Credits.
This course familiarizes participants with central texts in contemporary feminist and queer theory. We will read, discuss and engage with selections by Judith Butler, Gayatri Spivak, Jack Halberstam, Maria Lugones and Claudia Rankine. Many of these theorists, directly or indirectly, refer to philosophic concepts such as those addressed by the German Jewish thinker Walter Benjamin. We will therefore also examine a few philosophic echoes of these contemporary feminist and queer voices in 20th century German philosophy.
Instructor(s): E. Strowick; M. Nitis
Area: Humanities.

AS.213.304. German Aesthetic Thought. 3.0 Credits.
Central to modernity is the idea that certain perceptual experiences are worth having for their own sake, even if they do not directly serve any moral, political or cognitive aims. Aesthetics emerged in the eighteenth century as a theory of such experiences, and among them especially of the beautiful and the sublime. It soon became increasingly concerned with questions regarding the significance of art as a privileged realm of human production and experience. In the German-language intellectual lineage that begins with Kant, aesthetics moved from the margins of theoretical attention to its very center, where it could engage with some of the most pressing dilemmas of modernity. We read excerpts from relevant theoretical texts (Kant, Schiller, the early Romantics, Hegel) as well as texts that perform model cases of aesthetic reflection in relation to concrete works of art (Lessing, Kierkegaard, Nietzsche, Benjamin, Adorno).
Instructor(s): M. Dornbach
Area: Humanities.
AS.213.305. Contemporary German Film. 3.0 Credits.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarck’s The Lives of Others (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s Head-On (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s Goodbye, Lenin! (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or “Nouvelle Vague Allemande”. Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 – discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.308. Schweigen in der Familie. 3.0 Credits.
We will study the psychic afterlives of involvements in WW1, National Socialism and the state security service of the GDR. In particular, we will focus on (auto-)biographical and documentary-film examinations of perpetrators in the family. Within the family, these stories are often shrouded in silence but nevertheless handed down across generations in powerful, less-than-explicit, and often distorted ways. Drawing on philosophy and psychoanalysis, we will discuss how the need for silence meets the need to hear and to talk. Recommended Course Background: AS.210.362.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.309. Walter Benjamin and His World. 3.0 Credits.
All readings and class discussions in English. This course will provide an introduction to the thought, writing, and world of Walter Benjamin—one of the most interesting and influential German writers of the early 20th century. Although he died in exile having published only a single book in his lifetime, in the past three decades his ideas and preoccupations have changed the way we think about Cultural Studies, Media Studies, Literary Studies, German thought, Jewish mysticism, and the philosophy of history. We will be examining some of his major writings in tandem with precursors such as Charles Baudelaire and Louis Aragon; contemporaries such as Theodor Adorno and Gershom Scholem; and the legacy of his work among contemporary theorists, critics, and artists.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.310. Classic German Theater. 3.0 Credits.
Taught in German. In this seminar we will read some of the most important plays of German literature, by Lessing, Goethe, Schiller, Kleist, and Büchner. We will explore questions about the role of the theater toward the education of mankind in the spirit of the enlightenment.
We will examine how tragedy is reconfigured around the context of the bourgeois family. We will study historical practices of stage production as well as modern filmic and theatrical productions. Finally, we will prepare an informal staging of a play.
Prerequisites: AS.210.361
Instructor(s): K. Pahl

AS.213.312. Contemporary German Literature (1970 to the present). 3.0 Credits.
The seminar examines the way cultural and historical topics are presented in contemporary German literature. The selected texts originate in different national contexts (Swiss, Austrian, German, German-Turkish, German-Japanese) and deal with questions concerning the representation of national, cultural, and individual identity. We will explore how the texts (de)construct these identities through narrative structures and will contextualize these structures with respect to recent theories of (trans)cultural identities. Authors include: Eugen Omringer, Yoko Tawada, Terézia Mora, Thomas Hürlimann, Martin Suter, Christoph Schlingensief, Max Frisch, Günter Grass, Thomas Bernhard, Maxim Biller, and Thomas Meinecke. Taught in German.
Prerequisites: AS.210.362
Instructor(s): A. Krauss
Area: Humanities.

AS.213.313. Heidegger's "Being and Time" and "Rectify. 3.0 Credits.
This course will introduce students to Heidegger’s seminal work as seen through the lens of the TV series Rectify, which considers what it means to be “thrown” into the world and how we construct a meaningful horizon for our experiences. We will explore some of the fundamental concepts in Being and Time, including care, projection, fallleness, affect and time, and being-unto-death, and consider how these same issues are taken up in Rectify, which as a TV show has to develop its own visual vocabulary to explore the structure and nature of being in the world. Taught in English
Instructor(s): R. Tobias
Area: Humanities.

AS.213.318. The Making of Modern Gender. 3.0 Credits.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.
Instructor(s): K. Pahl
Area: Humanities.
This course provides students with an introduction to foundational texts in the history of political thought. We will explore major concepts such as reason, right, and freedom. Students can expect to gain familiarity with works that have proven immensely influential in modern Europe and beyond, but will also be expected to consider ways in which such thinking has relevance for today's world. Participation in discussions, and two short papers dealing directly with the ideas of two different thinkers will be required.
Area: Humanities.

AS.213.321. Bodies and Pleasures. 3.0 Credits.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women's writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Arnim, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.322. Museums and Jews, Jews in Museums. 3.0 Credits.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.324. What is Jewish Culture?. 3.0 Credits.
We talk about Jewish literature, music, and art—but can a book, or a song, or a painting be Jewish? We will examine the premises of this question and the many answers that have been formulated in response to it focusing on modern European (and some American) culture. Jewishness as it relates to human identity has been conceived of as related to religion, ethnicity, race, nation, language, geography, and politics. But these keywords have also been used to engage with the question of the Jewish identity not of a person, but of a cultural product. To understand the implications of calling, say, a book Jewish, we will examine the history of the concept of culture and its emergence in the context of the formation of modern Jewish identity. We will examine theoretical and literary texts originally written in German, Yiddish, Hebrew, and English, as well as painting, photography, film, and architecture from Europe, Israel and the Americas. We will aim to arrive at an understanding of the ways that the idea of culture intersects with the formation of Jewish identity in modernity. All readings will be in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.329. Berlin Ost-Ost-West. 3.0 Credits.
Today's Berlin is a nerve center with strong impulses from Russia, Ukraine, Turkey, Vietnam, India, and other Eastern countries. Through contemporary literature and film, we will explore Berlin's role in a globalized world: how Berliners resist, embrace, or simply describe the influx of people from Eastern countries; how West-Berliners have re-oriented themselves after the fall of the wall; how the majority adapts to the minorities; and how some migrant authors rework the German language by experimenting with translanguaging. By way of literary and filmic analysis, we will inquire if borders or limits can play a productive role; how the history of the divided city figures in the imaginary of immigrant authors; and how, for example, Turkish-German or Russian-German writers inscribe the tensions between East- and West-Berlin into a larger discourse on global East-West relations.
Recommended Course Background: AS.210.362
Instructor(s): K. Pahl.

AS.213.330. “What is an Image?” - Technology, Art and Visual Culture around 1900. 3.0 Credits.
Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Instructor(s): J. Schade
Area: Humanities.

AS.213.331. Detective Fiction in its Nascence. 3.0 Credits.
Although Edgar Allan Poe is often called the father of detective fiction, this assumption is not entirely correct. Sixty years before Poe published his “Murders in the Rue Morgue,” Schiller wrote the novella “Der Verbrecher aus verlorenen Ehre,” which was decisive for the development of the genre in Germany. Schiller’s novella carried the subtitle, “Eine wahre Geschichte,” which underscored the tension between “true” events and “probable” circumstances which is characteristic of detective fiction in general. In this course we will examine the competing notions of truth (Wahrheit) and probability (Wahrscheinlichkeit) at play in German detective fiction from the eighteenth to nineteenth century. We will explore why the romantics emphasized truth as a defining feature of literature and how the realists replaced this notion with verisimilitude.
Authors to include: Schiller, Kleist, Tieck, Hoffmann, Droste-Hülshoff, Fontane, Storm, Paul Heyse, Richard Alewyn. Reading and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.
AS.213.336. Dancing About Architecture: Jewish Humor and the Construction of Cultural Discourse. 3.0 Credits.
Are all Jews funny, or only the ones from New York? This course will be an advanced-undergraduate examination of literary, theatrical, cinematic, and televised representations of Jewish culture focusing on the construction of cultural discourse through comedy. Taking as a point of departure Sigmund Freud's Jokes and Their Relation to the Unconscious, we will consider the joke as a mode of narration and cultural coding with specific resonances for the Jewish encounter with modernity. Among the topics to be addressed in this course will be the origins of modern Jewish humor in traditional modes of storytelling and study; the problems of anxiety and otherness articulated and neutralized through humor; the significance of Jews in creating popular culture through the mass media (particularly though not exclusively in the United States) as well as the role of these mediums in transmitting and translating Jewish references to the general culture; the status of the Yiddish language as a vehicle for satire and a vehicle of resistance between tradition and modernity; the uses and abuses of Jewish stereotypes and the relationship of Jewish humor to anti-Semitism; the connections between Jewish humor and other modes of minority discourse; and the question of translation of Jewish humor both from Yiddish into other languages and from the Jewish "in-group" to a "post-ethnic" audience. Authors and performers to be examined will include Avrom Goldfaden, Sholem Aleichem, Franz Kafka, Dzigan and Szumacher, Lenny Bruce, the Marx Brothers, Mel Brooks, Phillip Roth, Woody Allen, Larry David, Sarah Silverman, and the Coen Brothers. All readings and discussions conducted in English.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.345. Healing and Health Beyond Theology. 3.0 Credits.
Nietzsche argues in The Gay Science that to bring about a new day we need a new health—"great health," as he calls it, that enables us to surmount the sickness of our age and transcend ourselves. However much of an iconoclast Nietzsche considered himself to be, his idea of "great health" fits squarely within a theological tradition that claims that the condition for becoming a member of the ecclesia is faith, which cleanses the individual of sin and restores him to his original state. This course will examine the theological inheritance that has and continues to shape the notion of sickness and health dominant even in secular contexts, where well-being would seem to be regarded as a condition of the body rather than of the spirit. Reading to include works by Nietzsche, Kierkegaard, Augustine, Tillich, Heidegger, Scholem, Tolstoy, Büchner, Flaubert, and Kafka. Taught in English.
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.213.348. Picturing Jews: Representing Jewish Identity in Modern Art, Film & Literature. 3.0 Credits.
This course will consider the different ways Jewish identity has been represented in the 19th and 20th centuries, focusing primarily on Central and Eastern Europe. Race, nationalism, religion, language, geography, politics—all helped shape different ways of understanding just what it meant to be a Jew, and all found expression in art and literature by both Jews and non-Jews. Looking at texts originally written in German, Yiddish, and Hebrew, including prose, poetry, journalism and drama, as well as painting, photography, graphic design, architecture, and film we will gain an understanding of the range of ways that Jewish identity could be understood and expressed as well as of the ideological stakes and historical contexts of such representations. Writers and artists examined will include Chagall, Kafka, Sholem Aleichem, and Bialik. All readings will be in translation.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.349. Weimar Cinema: The Golden Age of German Film. 3.0 Credits.
Taught in German. German cinema of the 1920s is regarded as one of the "golden ages" of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception; Expressionism in film; technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): E. Strowick.

AS.213.350. Wie wir begehren. 3.0 Credits.
Taught in German. Human desire and sexuality proves vital concern in German-speaking countries: from the invention by German sexologists of much of the terminology still in use today to the so-called sexual revolution in the late sixties to new perspectives on the topic today. We will study film, fiction and non-fiction. Recommended Background: AS.210.362
Instructor(s): K. Pahl
Area: Humanities.

AS.213.354. Introduction to German Poetry. 3.0 Credits.
This class will introduce students to German poetry from the eighteenth to the twentieth century. We will read selected poems by Goethe, Eichendorff, Mörike, George, Hofmannsthal, Rilke, Trakl, Celan, and Bachmann. In addition we will read several theoretical essays by poets and literary critics alike which examine the lyric form and the curious world that poetry constructs. Readings and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.
AS.213.358. German Pop Culture. 3.0 Credits.
Taught in German. The term “pop(ular) culture” designates cultural products and practices that are disseminated as ‘mass culture.’ Pop culture is accessible to many and deals with objects and materials that circulate in the everyday life of a society; it functions, one might say, as a cultural archive of the present. In contrast to high culture, pop culture enjoys an ambiguous reputation: It represents the cultural mainstream, functions as an easily consumable commodity and promotes the marketing of dominant ideologies, in the view of critical theory. However, more recent debates within cultural studies discuss pop culture as a site of social-symbolic conflicts and subversive forms of reception. Against this background, the seminar examines pop-culture phenomena in Germany after 1950, including the cult object: soccer, popular film and TV (“Tatort”), German pop music and hits (from “Hitparade” to “Rosenstolz” and beyond), recent pop literature after 1990 (Sibylle Berg, Rainald Götz, Thomas Meinecke). At the center of the analyses are questions related to the historical and political situation of pop culture, its specific aesthetic processes, and the (critique of) ideology performed by these processes.
Prerequisites: AS.210.361[C] AND AS.210.362[C]
Instructor(s): A. Krauss
Area: Humanities.

AS.213.359. Kleist. 3.0 Credits.
Heinrich von Kleist was one of the most intriguing literary figures of the early nineteenth century in Germany. Neither Classicist nor Romanticist, he developed a unique style that combines such different elements as complex psychological, drastic imagery, and philosophical precision. His novellas, plays, and nonfiction prose explore questions of gender, colonialism, the tragic, and innocence and double dealing. Among the texts we will read together are “The Betrothal in St. Domingo” (Kleist’s literary response to the Haitian revolution), “Penthesilea” (the play about lovers who can find each other only in war ends in a splatter scene), and “Marquise of O” (the story of a woman whose father rejects her because she finds herself pregnant, and yet she has no memory of the sexual intercourse that must have led to her current situation). Language of Instruction: German
Prerequisites: Pre-req: AS.210.362
Instructor(s): K. Pahl
Area: Humanities.

AS.213.361. The Holocaust in Film and Literature. 3.0 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.369. Dada’s Ideologies: Literature, Art, & Politics. 3.0 Credits.
This course will examine the literary and political theories implied in, and encountered by, Dadaist works and praxes. Particular attention will be paid to Dadaist confrontations with the growth of modern mass media, the politics of World War I, and consumerist capitalism in the wake of Taylorism and Fordism. Readings include major Dadaists as well as Althusser, Benjamin, Debord, Gramsci, Irigaray, Lukács, Marx, Saussure, among others.
Instructor(s): J. Pelcher
Area: Humanities.

AS.213.371. Kafka and the Kafkaesque. 3.0 Credits.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term “kafkaesque” refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka’s poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka’s prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka’s impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka’s oeuvre while developing skills in critical analysis and literary close reading.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.375. Landscapes in Crisis: Perspectives of Modern Subjectivity. 3.0 Credits.
In crisis, groups and individuals face economical, environmental, physical or political necessities creating a critical status that ultimately hints towards a loss of something valuable: health, freedom, security, wealth, … One might say, in a crisis, the outlook is grim. This seminar will focus on the one who is looking – the subject that produces the outlook and that we consider a critical thinker. The critical thinker is a rather new phenomenon, it is strongly tied to a freedom of thought that allegedly allows us to paint and frame our own worldview. We will work with the emergence and variations of landscape from 14th century painting to late 20th century film, with an emphasis on historical turning points such as the French Revolution, the two world wars and the fall of the ‘iron curtain’ that led to today’s world order. Writers, directors and painters will include, among others: Peter Brueghel the Older, Jean Jacques Rousseau, Edgar Allan Poe, John Dos Passos, Peter Weiss, Michel Foucault, Werner Herzog, Wim Wenders. All media and discussions in English.
Instructor(s): M. Heim
Area: Humanities.
AS.213.376. Art in Literature. 3.0 Credits.
Discussion in German. Since the Enlightenment, works of art have played a prominent role in literary texts, providing an occasion for texts to reflect on their status as art and to explore the possibilities and challenges unique to aesthetics. In this course we will examine novellas and poems that refer to paintings or other works of art to illuminate the nature of art and to reflect on phenomena that have no place in any other discourse. Readings to include works by Lessing, Eichendorff, Storm, Mörike, Adrian, Freud, and Hofmannsthal.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): R. Tobias
Area: Humanities.

AS.213.383. Jewish Travel Literature. 3.0 Credits.
Exile; Diaspora; Wandering; Refugee; Immigrant—these are all keywords that have been closely associated with Jews and the Jewish experience. What binds them all is movement, whether individual or communal, voluntary or involuntary. This course will examine the connection between movement and Jewish culture and history through the various forms of Jewish travel writing. In looking at depictions of travel both fictional and historical from the Middle Ages to the 20th century we will revisit and interrogate many of these keywords to understand the ways they have been deployed to understand Jewish identity in literature and beyond. A central point of consideration will be the role of travel in shaping conceptions of Jewish identity as well as Jewish literature in the modern period. We will examine novels, short stories, reportage, and travelogues describing real and imagined journeys from and to Asia, the Middle East, Europe, and America. All readings will be in English translation, primarily from sources in Yiddish, Hebrew, and German.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.387. Major City, Minor Literature? Berlin in German-Jewish and Yiddish Literature. 3.0 Credits.
Between the two World Wars, a period of intense artistic and intellectual vitality, Berlin was an international center for theater, visual arts, and literature. Many important Yiddish-language writers were drawn to Berlin and, together with their German-language counterparts, produced a body of literature that explores issues of modernity and identity. By comparing works in Yiddish and German, we will learn about inter-War Berlin's cultural diversity and richness, while also gaining insight into the particular issues of writing about Jewish identity in the 1920s, and the implications of writing in a minor language (Yiddish). We will read works by authors including Joseph Roth and Alfred Döblin in German, and Moyshe Kulbak and Dovid Bergelson in Yiddish. All texts will be in translation. Some questions we will explore include: • What is a minority/minor language or literature? • How did German and Yiddish interact in cultural and social spheres? • Can texts in different languages comprise a single body of literature? • What did it mean to be German and what did it mean to be Jewish? • Are assimilation and hybridity useful concepts? • Is there such a thing as Jewish modernism? • How did literature of the period respond to the rise of the Nazi party and the intensification of antisemitism?
Instructor(s): S. Spinner
Area: Humanities.
This course will explore the aesthetic-political practices of literatures and manifestos grouped under the term historical avant-garde. According to the most general understanding, avant-garde is considered the critique of bourgeois culture and 'traditional' art concepts, with this critique being related to a fundamental crisis of bourgeois society. The seminar aims at developing a more specific perspective by discussing the following aspects of avant-garde poetics: the self-reflection of aesthetic discourse in regard to the definition and hierarchization of styles and genres; a theory of language that draws on rhythm and materiality; an aesthetics of production which questions the notion of authorship and 'organic work' and stresses instead the constitutive role of repetition, (inter-)medial variation, and chance; the critical intervention in the concept of aesthetic autonomy and its institutions of reception; the "aporias of the avant-garde" (Enzensberger) inherent in its concept of radical innovation and exceptionality. In order to highlight the theoretical implications of avant-garde poetics we will analyze its literary strategies with respect to contemporary debates on modern technologies of art reproduction (Benjamin), the psychoanalytic reframing of the subject, and the advent of literary structuralism/formalism (Jakobson). In addition to that, we will discuss classics of avant-garde scholarship (e.g. Peter Bürger).
Authors include: Paul Scheerbart, Hugo Ball, Tristan Tzara, Hans Arp, Carl Einstein, Else Lasker-Schüler, the 'Sturm-Kreis', and Arno Holz.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

AS.213.613. Hermeneutics around 1800 (from Hamann to Büchner).
With Schleiermacher, hermeneutics defined itself as a universal theory of understanding which no longer focuses only on biblical and juridical exegeses but on linguistic utterances in general. It thus became the matrix for subsequent Geisteswissenschaften and paved the way for various critical approaches which even today remain highly influential. The course examines the genesis of modern hermeneutics through the lens of its philological and philosophical precursors, contemporary commentators and literary authors. Key issues will be the underlying concepts of textuality and language, historicity and the subject.
Authors include: Chladenius, Meier, Hamann, Herder, Kant, Schlegel, Schleiermacher, Goethe, Rahel Levin Varnhagen, Jean Paul, Büchner.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

Kleist's novella "Michael Kohlhaas" (1811) is as much a political parable as it is a meditation on the power of art. In it the Prussian partisan considers the right of resistance as expressed in the struggles of Kohlhaas, whose battle against the House of Saxony would have been recognized by contemporary readers as an allegory for the Prussian struggle against Napoleon's occupying army. Kant's short treatise "Über den Gemeinspruch: Das mag in der Theorie richtig sein, taugt aber nicht in der Praxis" (1793) had revived the debate about whether a revolt could ever be justified, given that justice depends on the existence of a state. But "Michael Kohlhaas" is also concerned with another kind of revolt that is arguably more arbitrary, in that it does not serve any end. It is the revolt of art, which overturns existing norms and conventions by establishing a new law: the law of art or what could be called poetic justice. Kleist's text makes a case for the autonomy of art in the literal sense. Art is self-legislating, a law unto itself, and this feature points as much to the potential as to the danger of art. Readings to include works by Kleist, Martin Luther, Pufendorf, Breitinger, Kant, Goethe, Tieck, and Adorno.
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.213.616. The Aesthetic Discourse of Modernity.
When, in 1985, Jürgen Habermas published his lectures on The Aesthetic Discourse of Modernity, he pursued a double aim. He offered a critique of French Theory while at the same time providing a foundation for a normative category of modernity in the tradition of Hegel. Curiously there is one subject he does not touch on, though it seems necessary for a sufficient understanding of modernity: the realm of art and literature. This course will develop a critique of Habermas' normative notion of modernity through re-readings of texts by Nietzsche, Benjamin, Horkheimer/Adorno, Derrida, Bataille and Foucault to elaborate an alternative category of aesthetic modernity. Taught in English. Reading knowledge of German and French is not required, but recommended.
Instructor(s): A. Geisenhanslueke
Area: Humanities.

The seminar will investigate when and in which ways theatrical space was interpreted as a shelter for the fleeing. Starting with Greek tragedy and ending with Elfriede Jelinek’s postdramatic text “Die Schutzfliehenden” we will discuss the relations between the institutions of theater and drama and political concepts of Asylum from a historical perspective. We will proceed on the basis of the idea that the stage offers temporary protection where refugees stop their journey, argue their case and expect a decision. Reading Aeschylus, Euripides, Goethe, Brecht and Jelinek, we will analyze different theatrical set ups and procedures in which the precarious state of the fleeing is and has been negotiated on stage. We will also deal with recent theater projects which open the stage to refugees und give them a platform outside immigration offices. Reading Benjamin and Florens Christian Rang we will also discuss how the relationship of Asylum and theater is reflected in modern theory of tragedy.
Instructor(s): E. Vogel
Area: Humanities.
The seminar will explore to what extent Hegel can be read as contributing to a feminist philosophy. We will focus on Hegelian openings onto the emotional in Phenomenology of Spirit. In addition, we will study feminist philosophers who have drawn on or offered critical readings of Hegel (Irigaray, Butler, Cavarero, Malabou, and others). Co-listed with AS.190.633
Instructor(s): J. Bennett; K. Pahl
Area: Humanities
Writing Intensive.

AS.213.635. Anthropology and Modernism.
This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of "culture." Instructor(s): E. Strowick
Area: Humanities.

AS.213.650. Poetic Thought.
This course will examine essays and poems by Goethe, Hölderlin, and Rilke with an eye toward the ways in which their work addresses issues central to German Idealism and modern German thought. These include the relation of subject to object; the problem of the representation of the whole; the reconciliation of science and art; and the role of consciousness in the construction of the world. Readings to include texts by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer, Henrich, Husserl, Benjamin, Szondi, and Allemann.
Instructor(s): E. Forster; R. Tobias
Area: Humanities.

AS.213.656. Thinking of the Environment.
Few concepts are more anthropocentric than the environment. Although the term is usually invoked to describe what is other than the human being, it places the human at the center of the universe by defining nature as the world surrounding him. This course will examine several literary and philosophical texts from Novalis to Celan that approach nature as a sphere alien to thought, which can never be known except through the rhetorical device of prosopopoeia, which gives face to what is inhuman. Readings to include works by Novalis, Schlegel, Tieck, Stifter, Rilke, and Celan.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.664. Dirt.
Near the outset of Büchner's "Lenz," the protagonist seeks to impress himself into the earth, "[E]r dehnte sich aus und lag über der Erde, er wühlte sich in das All hinein, es war eine Lust, die ihm wehe tat." This course will examine the desire to merge with the surface of the earth and to become a planetary body, at once utterly material and utterly ethereal. The earth's crust will emerge as the interface between cosmic forces and human existence, the atmosphere and the pedosphere. We will consider how history, biography, and geological time intersect in dirt, or what William Bryant Logan has recently called the "ecstatic skin of the earth," in texts by Goethe, Alexander von Humboldt, Novalis, Nietzsche, Büchner, Walser, Rilke, Kafka, and Sebald.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.666. "To be continued" - Seriality in Literature and Other Media.
Taught in German. By ending with the words "(To be continued)" ["(ist fortzusetzen)"], Goethe's Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. -- although invented earlier -- becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine "Die Gartenlaube", Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, "The Perils of Pauline" (serial, 1914), "Copycat" (Jon Amiel, 1995), "Twin Peaks" and current US-American TV series.
Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

AS.213.668. Kleist.
This seminar will explore the narrative, dramatic, theoretical and quasi-journalistic work of Heinrich von Kleist along two lines of inquiry. We will read his literary experiments as reactions to the major shift in the sex-gender system and the new deployment of sexuality in the eighteenth century. We will discuss his unique role in the production, communication and interpretation of feeling across narrative and theater.
Instructor(s): K. Pahl.

AS.213.670. Theories of the Human in German Modernity.
Fifty years ago Michel Foucault advanced the influential argument that modern thought foundered on the circular undertaking to ground the possibility of human knowledge in actual knowledge of the human being. We survey various conceptions of the human developed in German modernity with a view to Foucault's diagnosis. Against the background of pre-modern and early modern conceptions of the human, we focus on the tradition of anthropological thinking inaugurated by Herder, including spin-offs of German idealism in the writings of the later Schelling, Schopenhauer, and Marx. We consider the rivalry between twentieth-century philosophical anthropology (Plessner) and Heideggerian fundamental ontology, Hans Jonas' phenomenology of the human, as well as recent disputes regarding the significance of the human standpoint.
Instructor(s): M. Dombach
Area: Humanities.

AS.213.673. Adorno's Aesthetic Theory.
The posthumously published Aesthetic Theory is arguably Adorno's most important work. In it he traces the development of autonomous art and locates art's critical potential in its freedom from all notions of utility or purpose that derive from other spheres of life that are themselves corrupted by instrumental reason. We will examine Adorno's analysis of art's unique capacity to challenge conventions and produce new, if ephemeral, configurations. Discussion to focus on such concepts as illusion (Schein), mimesis, non-identity, myth, and truth content.
Instructor(s): R. Tobias.
Modernity gives rise to various forms of suspicion, including modern forms of resentment and practices of self-discipline (a suspicion of oneself), as well as an epistemology of suspicion as it is developed in the modern human sciences. The course starts out with an analysis of the detective genre and of the specific transformations it undergoes in modern German literature. In a next step, we will examine literary representations of suspicion within a broader cultural-historical frame: Nietzsche's analysis of resentment serves as one point of reference; another is what Carlo Ginzburg has called the paradigm of clues. The modern human sciences, since the last third of the 19th century, have relied on a method that produces knowledge by way of interpreting clues. While suspicion in the human sciences is related to the production of truth, literature uses suspicion as a way to produce aesthetic and logical undecidabilities. We will analyze literary representations of suspicion with respect to the narrative structure (unreliable narration) and the mediality of suspicion. Finally, the course emphasizes the methodological relevance of suspicion: As a practice of deciphering, interpreting, and reading traces, suspicion calls for being reformulated literary-theoretically. Readings will include: Heinrich von Kleist, E.T.A. Hoffmann, Nietzsche, Theodor Fontane, Freud, Kafka, Thomas Mann, Heimito von Doderer, Peter Handke etc. Taught in German
Instructor(s): E. Strowick
Area: Humanities.

Though every conventional description of modernist aesthetics dates its origins to the era preceding World War I—in some versions several decades before 1914—there has always been an understanding of the War's "catalytic" influence on the aesthetic of chaos, madness, violence, and despair that comes to characterize at least one major strain of modernistic art. Taking the after-effects of the First World War as well as the Russian Revolution(s) as its point of origin, this graduate-level seminar will consider such writers as Sigmund Freud, Walter Benjamin, Sh. Y. Agnon, Sh. Ansky, Guillaume Apollinaire, Isaac Babel, Georges Perec, Erich Maria Remarque, Joseph Roth, Virginia Woolf, and Stefan Zweig. All readings and discussions available in English.
Instructor(s): M. Caplan
Area: Humanities
Writing Intensive.

AS.213.685. Theories of Translation (1530/1930).
Taught in German. It is one of the topoi of literary studies that translation presupposes interpretation and is thus bound to certain discursive premises. To investigate specifically how this connection between translation and interpretation has developed historically and is embedded in concerns of philosophy of language, the seminar reconstructs concepts (politics) of translation from Luther to Benjamin and Buber-Rosenzweig. One of the focal points is the emergence of a modern theory of representation between 1730 and 1820 (Gottsched, Venzky, Hamann, Herder, Schleiermacher), the effects of which are staged with the aid of different Shakespeare translations (Wieland, Lenz, Schlegel). Finally, by including more recent theories of translation from the milieu of deconstruction/post-structuralism, the seminar seeks to reconsider interpretation from the standpoint of translation, and translation from that of interpretation.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

AS.213.689. Creativity.
Modernity requires creativity of the artist. But what does this mean? Creativity has been thought of as a gift, but also as a technique or an attitude that can be developed. It thus moves between the mysterious, the mechanical, and the relational. While creativity was of little importance for the normative poetics (Regelpoetik) of the Baroque, the Enlightenment demanded an emancipation from external rules, which led to the apotheosis of human creativity in the idea of the genius. Countering overly idealistic notions of autonomy and human artistic agency, others cultivated practices that acknowledge and even amplify the role of chance. This seminar will focus on the eighteenth and early nineteenth centuries and invite contributions on more recent poetics from its participants. Particular emphasis will be placed on interrogating the roles of the imagination, phantasy, and visualization in the creative process.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.701. The Frankfurt School.
Founded in the interwar years, the Frankfurt School gave rise to an array of reflections on modernity, emancipation, and ideology that have continued to inform critical theory and are now eliciting renewed interest. In this seminar we focus on various models developed by Frankfurt School theorists for approaching cultural phenomena. Following a brief review of Hegelian and Marxian legacies at work in the Frankfurt School, we consider relevant works by Walter Benjamin, Siegfried Kracauer, Max Horkheimer, and Theodor W. Adorno.
Instructor(s): M. Dornbach.

AS.213.705. Hegel's Phenomenology of Spirit.
We will study key passages of The Phenomenology of Spirit from a queer-feminist perspective and engage with some of the feminist scholarship on Hegel
Instructor(s): K. Pahl
Area: Humanities.

AS.213.706. Literature, Museums, Mimesis.
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities
Writing Intensive.
AS.213.718. Wirkliche Wirklichkeit: Eccentric Realism.
Taught in German. Categories such as the uncanny, motion, or seriality are not easily associated with German Realism. The course takes a fresh look at texts by Theodor Fontane, Adalbert Stifter, and Theodor Storm in order to explore the thesis of the modernity of Realism. We will analyze framing techniques, temporal structures (e.g. boredom or belatedness) as well as the interrelation between realist poetical and other discourses and media by which realist texts produce reality as perceived reality. The aesthetics and epistemology of Realism will further be discussed with respect to Erich Auerbach’s “Mimesis” and Roland Barthes’ “reality effect.”
Instructor(s): E. Strowick
Area: Humanities.

AS.213.725. Proto-, Modern, and Post-: Locating the –ism in Modernism.
All discussions in English. This graduate seminar will seek to disentangle the interrelationship among “proto-modernism,” “modernism,” and “post-modernism” from the straightjacket of periodization and taxonomy by focusing instead on questions of temporality and phenomenology. When is the time of modernity? What precedes modernism? How is post-modernism a continuation of modernism and a break with modernity? What follows the “post” or precedes the “proto”? How does literature establish a dialogue not just across linguistic borders but temporal ones as well? And when do these processes repeat themselves due to historical and political factors? By way of complicating all of these questions we will be considering writers from “across” the 20th century, including Walter Abish, Thomas Bernhard, André Breton, Orly Castel-Bloom, Henry Dumas, Moshe Kulebak, Machado de Assis, Mendele Moykher-Sforim, Joseph Roth, Anton Shammas, Gertrude Stein, and Robert Walser.
Instructor(s): M. Caplan.

AS.213.741. Literature, Psychoanalysis, and Unassimilable Experience.
This course will consider experiences at the juncture between memory and forgetting, history and oblivion, narration and music. Such liminal experiences are frequently interpreted in psychoanalytic theory as trauma, though there is no reason that a purely negative definition should prevail. The suspension of the self and the concomitant immersion in the sensible world could just as well be regarded as an ecstatic experience. This course will examine the notions of immediacy, singularity, power, and sensuality in psychoanalytic theory (Freud, Lacan, Klein, Malabou) and beyond. Kleist’s “Die heilige Cäcilie” and Kafka’s “Josefine, die Sängerin” will serve as touchstones for our exploration of the ecstasy that literature at once produces and reproduces as a verbal representation and musical medium.
Instructor(s): K. Pahl; R. Tobias
Area: Humanities.

The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citoyen” or “citizen,” as the political subject. The bourgeois and the citizen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias
Area: Humanities.

The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhtin, Hamburger, Sartre, Beauvoir, Ricoeur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaebert.
Instructor(s): R. Tobias; Y. Ong
Area: Humanities.

AS.213.757. Rilke.
The concept of the “Weltinnerenraum” has long dominated Rilke scholarship as a result of its two-fold sense as both the Innenraum der Welt und der Weltraum des Inneren. In this it captures the seeming autonomy of the world of things, characteristic of the New Poems, as well as the exploration of the cosmic dimensions the self, characteristic of the late work. This course will concentrate on the Duino Elegies and Sonnets to Orpheus with emphasis on the transformation of both world (or nature) and consciousness into song. In addition to Rilke’s poetry, we will also read texts by Husserl, Heidegger, and Merleau-Ponty. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.
AS.213.760. Break and Continuity: German Thought around the French Revolution.
The turn of the eighteenth century saw the political revolution of 1789 as well as interrelated revolutions in thought, symbolic system, value system, family structure, gender relations, etc. We will explore the discourse of revolution in its oscillation between two conceptions – as break and as return (to the golden age of Greek Antiquity, to a prelapsarian state). From providence to chance event, and between break with and continuity of the old order, German thinkers considered the revolution. We will read Kant, Rousseau, Hölderlin, Hegel, Goethe, Kleist, and others.
Instructor(s): A. Krauss.

This seminar addresses German-speaking exile literature from 1933 to 1950. On the basis of historical and political contextualization, readings and discussions will focus on literary theoretical and discourse analytical questions. In contrast to Nazi ideology and its totalitarian claim to constitute "Germanness", numerous émigrés intended to represent the "other" Germany from outside its national borders. This politicization of exile discourse which made 'direct' critical involvement with the regime appear imperative had a lasting effect on literature written in exile. The leitmotif of our analysis will be the question to what extent exile literature developed its critical reflection towards a specific aesthetics of exile; an aesthetics that articulates the reference to the historical-political situation, to Nazi Germany, expulsion, loss of language, dislocation and cultural transfer in form of a critique of representation. We will discuss topics such as the conceptualization of (German) tradition/transference, languages of (non-) identity, theories of (anti-)mimesis, discourse politics and aesthetics, or Avant-garde and exile. Authors include: Thomas Mann, Irmgard Keun, Else Lasker-Schüler, Hannah Arendt, Adorno, Benjamin, Brecht, Lukács, Anna Seghers.
Instructor(s): K. Pahl.

Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.213.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors' work, i.e., the "road beyond neorealism" for Fellini, and Almodóvar's queerness as expressed in his "true-and-false testimonies." We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius’ Satyricon, about the worshiping of the most important female deity in late antiquity, Isis, in light of Fellini's Satyricon; and Thierry Jonquet's novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar's The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, an unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.213.800. Independent Study-German.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias; S. Spinner.

AS.213.811. Advanced Reading in German Literature.
Students will read works in German from a variety of authors. Sessions with faculty will be arranged on an individual basis, as needed.
Instructor(s): K. Pahl; R. Tobias
Area: Humanities.

Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias; S. Spinner.

AS.213.813. German Qualifying Paper Preparation.
Instructor(s): A. Krauss; E. Strowick; K. Pahl; M. Caplan; R. Tobias.

AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music Through the Ages. 3.0 Credits.
How do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? A variety of readings and musical examples will be discussed, including genres as diverse as medieval songs, madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. The seminar will include field trips to the Baltimore Museum of Art, the Meyerhoff Symphony Hall, the Peabody Institute, and the Evergreen Museum and Library. Students will also have the opportunity to attend a live HD broadcast of Mozart's Don Giovanni from the Metropolitan Opera. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities.
AS.214.171. Freshman Seminar: Witchcraft and Demonology in Renaissance Europe. 3.0 Credits.
Who were the witches? Why were they persecuted for hundreds of years? Why were women identified as the witches par excellence? How many witches were put to death? (Answer: 30,000, between about 1400 and 1800.) What traits did European witchcraft share with witch-mythologies in other societies? After the witch-hunts ended, how did “The Witch” go from being “monstrous” to being “admirable” and even “sexy”? Answers are found in history and anthropology, but also in literature, folklore, music, and the visual arts. After an introduction to ancient and medieval witchcraft, we will study European witch-persecution between 1400 and 1800. The second half of the course will concentrate on artistic representations of witches in media ranging from manuscripts to movies, concentrating on Italy, France, Spain, and Germany.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.176. Freshman Seminar: Warrior Women from Ancient Times to Game of Thrones. 3.0 Credits.
Dean's Teaching Fellowship This course will trace the origins of the warrior woman from ancient times through today’s pop culture and reflect on the multiplicity of its social, cultural, and political ramifications.
Instructor(s): J. Gomez
Area: Humanities.

AS.214.261. The World of Dante. 3.0 Credits.
An Introduction to the Divine Comedy
Instructor(s): P. Forni
Area: Humanities
Writing Intensive.

AS.214.278. Italian Film. 3.0 Credits.
This undergraduate seminar is an overview of 100 years of Italian film history covering such pivotal moments as the early Futurist films, the creation of Cinecittà, the Italian Neorealist film movement, the legendary Commedia all’italiana films, as well as a discussion of classic Italian auteurs such as Fellini, Pasolini, Wertmüller, Bertolucci, and such contemporaries as Garrone and Sorrentino.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.301. Survey of Italian Literature. 3.0 Credits.
Un viaggio dal Rinascimento alla modernità, per incontrare il genio italiano e conoscere la nostra umanità. Through readings from the most celebrated texts by Italian authors, we will travel from the early renaissance to the 20th century to encounter the struggles and triumphs of the human conscience, and the highest achievements of Italian culture. The course will explore poetry, short story, theatre, epic, and novel, with an introduction to Italian opera. Students will have the opportunity to read Dante Alighieri, Baldassarre Castiglione, Galileo Galilei, Giacomo Leopardi, Giorgio Bassani, and many others in original language, and to discover how these works are relevant in our own life and times. Taught in Italian. Recommended course background: Italian AS.210.252; may be taken concurrently with Advanced Italian II.
Prerequisites: Not open to students who have taken AS.214.302.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.302. The Agony and the Ecstasy from Dante to the Romantics. 3.0 Credits.
By exploring texts and topics in Italian literature and culture from the Middle Ages to modernity, this course will address the themes of suffering and triumph as they are expressed through several great authors, many of whom were fundamental to the development of the Western European tradition. These authors will include Dante, Petrarch, Boccaccio, Machiavelli, Ariosto, Tasso, Foscolo, Leopardi, and Manzoni. The course will also explore the relationship between these works and other forms of culture, such as painting and music. The course is taught in English with special sessions in Italian for Italian majors and minors, so as to count towards the Italian Major/Minor requirements.
Prerequisites: Not open to students who have taken AS.214.301.
Area: Humanities
Writing Intensive.

AS.214.324. Futurism and the birth of Avant-garde. 3.0 Credits.
The course will explore Futurism, the first great avant-garde movement in modern European history, and its vast and mostly unknown literary production. We will analyze Futurism in its social, literary, and historical background, as well as in its artistic contributions to Italian and European culture. We will focus on Filippo Tommaso Marinetti (1876 - 1944), founder of the movement and cornerstone of all its diverse souls and manifestations, and analyzing his manifestos, poetry, novels, tales and plays, we will shed light on the peculiarity of a movement that acted as the initial spark, and has given shape to the following literary and artistic avant-gardes of the XX Century. The final project for the course can be either a paper or a translation project. Reading knowledge of Italian is suggested.
Instructor(s): L. Bacchini
Area: Humanities.

AS.214.333. Shakespeare on the Opera Stage. 3.0 Credits.
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Instructor(s): T. Tower
Area: Humanities
Writing Intensive.
AS.214.346. The Short Story in Italy Across the Centuries. 3.0 Credits.
The genre of the short story was in many ways invented by the Italians. During the later Middle Ages, preachers adopted the short tale, cultivated by fireside storytellers for ages, to add interest to the morals of their sermons. By the late thirteenth century, Italian writers were collecting such stories for entertainment as well as edification. Boccaccio's Decameron (1352) was the first classic collection and inspired other collections throughout the Renaissance. It and other Italian collections inspired writers in many genres and countries, including Shakespeare and other dramatists. In modern times, short stories have become one of the predominant genres of world literature. This seminar surveys Italian short fiction from the fourteenth through the twenty-first century. Emphasis is on the representation of Italian culture and history through storytelling, including in film. Course will have two full sections, one taught in Italian for majors, the other taught in English, with no prerequisites, for non-majors. Limited to fifteen students per section.
Instructor(s): P. Forni; W. Stephens
Area: Humanities
Writing Intensive.

AS.214.347. Petrarch and the Beginnings of the Renaissance. 3.0 Credits.
This course will focus on the life, work, and thought of Francesco Petrarch, or "Petrarch." Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.361. Rome as Told by its Narrators. 3.0 Credits.
The course is intended for students who would like to learn about Rome through its history, literature, arts, and film. We shall explore the city and its culture analyzing the work of several authors. The main goal of that itinerary is to offer a whole experience of Rome through time. The Eternal City is also a place where the whole of Italy is reflected in its beauty and complexity.
Instructor(s): T. Katinis
Area: Humanities.

AS.214.362. Italian Journeys: Medieval and Early Modern. 3.0 Credits.
Italy's history as a unified country is fairly recent, but the very idea of "Italy" is a very old one. Indeed, many "Italies" have existed throughout the centuries, thus contributing - not without conflicts - to one of the richest cultures in the world. By exploring texts and topics from the Middle Ages to modernity, this course will address the cultural history and geography of Italy, focusing on both its centers (Rome, Florence, Venice, etc.) and its peripheries. A veritable journey through Italy, the course will address authors that were fundamental to the development of the Western European tradition (e.g. Dante, Petrarch, Boccaccio, Machiavelli, Ariosto, Tasso). The course will also explore the relationship between these works and other forms of culture, such as painting, music, cinema. The course is taught in English with sessions in Italian for Italian Majors and Minors so that the course will count towards their requirements.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.363. Italian Journeys: Modern and Contemporary. 3.0 Credits.
This class examines classic pieces of Italian Literature from the 19th and 20th centuries. The course focuses on the tradition of the novel and its engagement with social and political themes (from the question of Italy's national unity and the relationship between history and literature in Alessandro Manzoni, to the relationship between science and literature in Italo Calvino), as well as on the lyrical tradition and the reflection of Italian poets on our human condition and quest for happiness (from Giacomo Leopardi to Eugenio Montale). The course will also explore contemporary poetic production and the connection between modern Italian literature and other arts such as film and music. This class is taught in English.
Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.

AS.214.366. Food and Culture in Italy. 3.0 Credits.
Throughout Italy's history, food traditions have been central to the formation of Italian identities, both national and regional. In this course we will study Italy's food traditions and explore the ways in which food has become a major theme of Italian literature, film, and music, from the Renaissance to the present day. The class will be conducted in Italian. Students must have completed Intermediate Italian II (AS.210.252) or equivalent.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.374. Being Italian: Autobiography and Identity in Literature and Media. 3.0 Credits.
What does it mean to be Italian rather than French, American, or anything else? What's the difference between being Tuscan, Milanese, or Sicilian? Between being Christian, Jewish, Muslim, or "other"? How does the reality of Being Italian differ from the clichés that prejudice, commercialism, or mass media fads help to spread? Considering these questions can be important whether you want to use your Italian in business, in academia, or for sheer pleasure, whether you want to watch films, read books, or see the sights.
Prerequisites: AS.210.251 AND AS.210.252
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.376. Warrior Women from Ancient Times to Game of Thrones. 3.0 Credits.
This course will trace the origins of the warrior woman from ancient times through today's pop culture and reflect on the multiplicity of its social, cultural, and political ramifications.
Instructor(s): J. Gomez
Area: Humanities.
AS.214.377. Gendered Voices. 3.0 Credits.
The course will explore the notion of 'voice' in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the 'voice' in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa's The Siren and Italo Calvino's A King Listens.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.390. Machiavelli: A Renaissance Master. 3.0 Credits.
Who was Niccolò Machiavelli? The author of the Italian Renaissance's most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli's major works and to the intellectual, social, and political contexts that shaped his thinking.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.393. Italian Opera and the Art of Adaptation. 3.0 Credits.
Italian opera, from its very inception, has developed in close dialogue with other art forms. The pioneering operas of Peri and Monteverdi based on the figure of Orpheus are part of a larger cultural movement that saw Renaissance philosophers (Marsilio Ficino), visual artists (Bronzino) and humanists (Angelo Poliziano) resurrect and transform the ancient Orpheus myth. The subsequent evolution of opera was influenced by (and influenced) innovations in stage comedy, the novel, and other art forms. In this course, we will explore these connections between the development of opera and other facets of Italian culture. No knowledge of Italian is required. The course will be taught in English; an additional Italian language discussion section will be offered for majors.
Instructor(s): J. Coleman
Area: Humanities

AS.214.437. The Intellectual World of the Italian Renaissance. 3.0 Credits.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the "lost" Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance "humanists," inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their "native" tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.445. Boccaccio's Decameron and the Multiplicity of Story-Telling. 3.0 Credits.
Boccaccio's Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio's masterpiece on its own terms and in relation to the development of story-telling, from gossipy "news" (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints' lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and filmic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian. Those students should enroll in section 2 which will be awarded 4 credits.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.
AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3.0 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality; what is illusion; what's natural and what's supernatural? What's human and what's more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto's Orlando furioso (1532) and Tasso's Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy. 3.0 Credits.
Dante's Divine commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante's understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens

Instructor(s): B. Wegenstein; E. Refini; L. Di Bianco; P. Forni; W. Stephens.

AS.214.562. Italian Independent Study. 0.0 - 3.0 Credits.
Instructor(s): B. Wegenstein; C. Celenza; E. Refini; P. Forni; W. Stephens.

AS.214.597. Italian Literature Internship - Summer. 3.0 Credits.
Instructor(s): J. Coleman; P. Forni.

The course aims to outline the musical reception of Michelangelo's poems from the 16th to the 21st century. Moving from a critical introduction to Michelangelo's Rime, the course will address Michelangelo's own ideas on music and the few musical settings of his poems by contemporary composers. The course will turn then to the Post-Romantic renaissance of Michelangelo's myth as the context within which the main bulk of musical settings of the artist's poems was produced. What did composers such as Wolf, Britten, Dallapiccola, Shostakovich and Reimann find in Michelangelo's poetry? Through a close reading of the poems chosen by the composers, the course will explore the biographical, philosophical and socio-historical implications suggested by the different musical settings. No training in music performance or theory is required.

Writing Intensive.

AS.214.637. The Intellectual World of the Italian Renaissance.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the "lost" Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin — not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance "humanists," inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their "native" tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.
AS.214.640. Film Theory.
The seminar deals with film theory in its history and its current trends. We will examine structuralist, post-structuralist, feminist, Marxist, psycho-analytic and other theoretical approaches to understanding and interpreting the cinematic medium. We will look at several different genres of contemporary films from Italy, France, Spain, and Latin American Film, from auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist and one filmmaker to class during the semester.
Instructor(s): B. Wegenstein
Area: Humanities

AS.214.655. Translating Knowledge: Brunetto’s Tresor and Dante’s Convivio.
By focusing on Brunetto Latini’s Tresor and Dante Alighieri’s Convivio, the seminar will examine the notion of “encyclopedic knowledge” in the Middle Ages. The two works — both examples of “translation” — call traditional ideas of knowledge into question. The seminar will study the Convivio as a response to the Tresor and will situate Dante’s project within a wider discussion of vernacular translation as a key tool for the dissemination of the classical tradition in the Middle Ages.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.658. Dante’s Inferno: A Reading for Teaching.
How to Teach the Divine Comedy to American Undergraduates.
Instructor(s): P. Forni.

In this course we will study representative works by the major figures of Italy’s humanist movement, considering the significance of the movement as a whole and the many currents that scholars have identified within it. Topics and authors we will explore include early Paduan humanism (Lovato, Mussato), Florentine civic humanism (Salutati, Bruni), the birth of philology (Poliziano, Valla), vernacular humanism (Alberti, Landino), and the relationship between humanistic studies and Christian religion (Ficino, Sannazaro, Erasmus). The class will be taught in English. The ability to read Italian is required. Some knowledge of Latin is desirable but is not required.
Instructor(s): J. Coleman
Area: Humanities
Writing Intensive.

AS.214.660. Primo Levi Today: Seventy Years After the First Publication of If This Is a Man (Survivor in Auschwitz).
How have genocides been represented by people with different backgrounds and sexual identifications? How do written testimonies challenge or reinforce the hegemonic accounts of wars and genocides? How is the relationship between the “personal” and the “public/national” theorized in literary texts dealing with wars and other forms of political violence? What concepts or frameworks (Queer; Postcolonial; Community Studies) offer new approaches to the analysis of testimonial statements on collective traumatic events? This course aims at exploring these questions, using Primo Levi’s work as an anchoring point. Readings and discussions will be in Italian. COURSE IS OPEN TO UPPER LEVEL UNDERGRADUATES
Instructor(s): G. Furci
Area: Humanities
Writing Intensive.

AS.214.672. Tasso, the Epic & Tradition.
Students will achieve deep familiarity with Tasso's Gerusalemme liberata and Aminta; read selections from Gerusalemme conquistata, Il mondo creato, Tasso's Dialogues, and his literary-theoretical treatises; survey important texts of Tasso criticism, and sample Tasso's legacy in poetry and figurative arts.
Instructor(s): W. Stephens.

This course will be taught from September 2 through October 14, 2015. The course aims to analyze the development of Foscolo’s poetry in the years between the eighteenth and nineteenth centuries (1798-1807), namely the development from the sonnets and the odes to the poem I Sepolcri, starting off from the most common models of the famous contemporary poets (Parini, Monti, Alfieri, Pindemonte) to arrive at a new understanding of "lyric poetry". Furthermore, the lectures will focus on the discussions and controversy that arose with regards to the Sepolcri (with Pindemonte and others) immediately after publication, when the novelty of the poem aroused bewilderment and perplexity in many critics, readers and poets. The analysis of the anti-Foscolo writings that appeared at this time - and the replies of Foscolo himself - will show how most of the readers of that time, still tied to a static view of literary genres, were negatively affected by the audacity in the mixture of the various registers that characterize the poem (epic, lyric, elegy, satire, tragedy) held responsible both for the lack of formal and stylistic unity of the poem, and its complete obscurity. The class will be taught in Italian.
Instructor(s): F. Bausi
Area: Humanities

AS.214.675. Ariosto’s Orlando Furioso.
Ludovico Ariosto (1474-1533) was one of the major poetic innovators of the European Renaissance. He is best known for Orlando Furioso, the long epic-romance that also bears traces of his innovations in other genres, especially theatrical comedy in the vernacular. Orlando Furioso is an encyclopedia of Renaissance genres and topics that was influential throughout European literature. Written as a continuation of Boiardo’s Orlando innamorato created two variants of a genre that led from Ariosto’s Orlando furioso through Folengo’s Baldus to inspire Rabelais’s Gargantua and Pantagruel, Cervantes’ Don Quixote, and, eventually, the European novel. The course concentrates on the works of Pulci, Boiardo, and Folengo, combining close analysis of their linguistic and narrative fabric with examples of their influence on later comic masterpieces.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.676. The Renaissance Comic Romance.
In the second half of the fifteenth century, Italian poets transformed the medieval adventure stories of Charlemagne’s and Arthur’s knights. Luigi Pulci’s earthy, bourgeois Morgante and Matteo Maria Boiardo’s romantic, courtly Orlando innamorato created two variants of a genre that led from Ariosto’s Orlando furioso through Folengo’s Baldus to inspire Rabelais’s Gargantua and Pantagruel, Cervantes’ Don Quixote, and, eventually, the European novel. The course concentrates on the works of Pulci, Boiardo, and Folengo, combining close analysis of their linguistic and narrative fabric with examples of their influence on later comic masterpieces.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

This course will be taught from September 2 through October 14, 2015. The course aims to analyze the development of Foscolo’s poetry in the years between the eighteenth and nineteenth centuries (1798-1807), namely the development from the sonnets and the odes to the poem I Sepolcri, starting off from the most common models of the famous contemporary poets (Parini, Monti, Alfieri, Pindemonte) to arrive at a new understanding of "lyric poetry". Furthermore, the lectures will focus on the discussions and controversy that arose with regards to the Sepolcri (with Pindemonte and others) immediately after publication, when the novelty of the poem aroused bewilderment and perplexity in many critics, readers and poets. AS.214.678. Ariosto’s Orlando Furioso.
Ludovico Ariosto (1474-1533) was one of the major poetic innovators of the European Renaissance. He is best known for Orlando Furioso, the long epic-romance that also bears traces of his innovations in other genres, especially theatrical comedy in the vernacular. Orlando Furioso is an encyclopedia of Renaissance genres and topics that was influential throughout European literature. Written as a continuation of Boiardo’s Orlando innamorato (left unfinished in 1494), Ariosto’s poem overshadowed his competitors, including Giangiorgio Trissino and the Tassos, father and son. From L’Italia liberata dai goti and L’Amadigi to Gerusalemme conquistata (leaving aside the many poems now forgotten), only Gerusalemme liberata achieved anything comparable to the popularity and critical acclaim won by the Furioso. Aside from three complete redactions printed in 1516, 1521, and 1532, Ariosto left at his death five unfinished cantos that were never integrated into the poem, and that would have altered it considerably. Reading ability in Italian required.
Instructor(s): W. Stephens.
AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.

The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.

Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.689. Flânerie and Female Authorship in Contemporary Italian Cinema.

This course examines the prolific production of Italian women filmmakers inscribing their work into a national cinematic tradition. The most prominent visual leitmotif in films by directors such as Marina Spada, Francesca Comencini, Alice Rohrwacher and others, is that of the wandering woman contemplating the cityscape. What does the act of walking signify in these works? How do these filmmakers embrace and transform Italy’s cinematic tradition? After highlighting the figure of the city-walker in post-war classics by Roberto Rossellini and Vittorio De Sica, we shall discuss from a gender perspective films such as Fellini’s Nights of Cabiria, Pasolini’s Mamma Roma, and Antonioni’s La Notte, which feature female city-walkers who stroll through urban peripheries created during the country’s rush toward modernity. Then, we shall analyze the work of women directors who recurrently employ the narrative strategy of flânerie to construct female narratives of displacement and liminality. We shall question how and to what extent this contemporary cinematic production is indebted to the masters of neorealism and the auteurs from the sixties. Critical and theoretical readings will include essays by Michel de Certeau, Siegfried Kracauer, Janet Wolff, Elizabeth Wilson, Anne Friedberg, Giuliana Bruno, and others.

Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.

The metaphor of the theatre of the world is a long-lasting one: from antiquity to our own days through the Middle Ages, the Renaissance, and the Baroque, the idea of the world as a stage has been the core of both dramatic writings and discourses on drama. By considering the metaphor and its meanings in a broad chronological perspective, the seminar aims to identify key moments in its evolution. In particular, it will focus on the ways in which – within the production of early modern morality plays – the metaphor of the theatrum mundi regained its literal meaning by being represented on stage. Along with a selection of allegorical plays and relevant visual materials, we will consider theoretical sources including classical and Christian authors, neo-platonic writings and medieval exegesis, Renaissance thinkers such as Pico della Mirandola and modern philosophers such as Walter Benjamin.

Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

This course explores the history and evolution of documentary filmmaking in Italy through the study of non-fictional works dealing with different social, political, and personal matters from the post-war period to the last decade. We shall screen the works of Vittorio De Seta, Ernesto De Martino, Alberto Grifi, Cecilia Mangini, Annabella Miscuglio, as well as the works of iconic directors such as Michelangelo Antonioni, Luchino Visconti, Pier Paolo Pasolini, and Ermanno Olmi, considering their fiction and non-fiction films in dialectal relationship to one another. Moreover, this course devotes particular attention to late, contemporary female production (e.g. Alina Marazzi, Costanza Quattriglio, and Eleonora Danco) that, through the use of found footage and hybrid modes, blurs the boundaries between fiction and non-fiction, the real and the surreal. Critical and theoretical readings include Marco Bertozzi’s Storia del documentario italiano, Bill Nichols’ Representing Reality, and others.

Instructor(s): L. Di Bianco
Area: Humanities.

AS.214.711. Dissolving Margins: Space and Female Subjectivity in the Work of Elena Ferrante.

Elena Ferrante is Italy’s most acclaimed contemporary novelist, although her true identity remains unknown. Having been translated into multiple languages and published in 39 countries, with over a million of copies sold in the United States alone, her ‘Neapolitan Quartet’ triggered what has been called “Ferrante Fever.” This course investigates the reasons behind this global, literary phenomenon while exploring themes such as female subjectivity and the interplay with space and society, the question of female authorship, women’s participation in, or exclusion from, history, and the internal violence of a rapidly changing society. We shall read Ferrante’s entire oeuvre: Troubling Love (1999) The Days of the Abandonment (2002), and The Lost Daughter (2006), the Neapolitan Quartet (2012-2014), as well the collection of letters and essays Frantumaglia. (2016). Theoretical readings will include essays by Julia Kristeva, Luce Irigaray, Steve Pile, and others.

Instructor(s): L. Di Bianco
Area: Humanities.

AS.214.716. Translation and Vernacular Readership in Italy, 1250-1500.

Translation is usually acknowledged as instrumental to the rise of vernacular readership in medieval and early modern Europe. By reconsidering seminal contributions such as Erich Auebarch’s, this seminar will explore the textual and cultural implications of the transgressive process that played a major role in the medieval reception of antiquity. Special attention will be given to translation theory and its history.

Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

This seminal text of the late Middle Ages will be a point of departure for discussing the role of literature in forging the socio-political convictions of Western Civilization.

Instructor(s): P. Forni
Area: Humanities
Writing Intensive.
Giambattista Vico's Principi di sciencia nuova d'intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an "ideal" and "eternal" model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square "sacred history" (the presumed historical accuracy of the Bible) with "profane" or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this "old science" stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin

Area: Humanities
Writing Intensive.

AS.214.753. Tasso the Madman.
In late sixteenth-century Europe, Tasso's name was a synonym for madness. The Elizabethan stage hosted a play on "Tasso's Melancholy"; Montaigne belatedly recalled observing the "mad poet" in prison. Biographers and dramatists spread the myth into the nineteenth century, but Tasso's dialogues and letters tell a more complex and nuanced story of suffering and struggle, life and work.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.769. The Orpheus Myth and the Arts in Early Modern Italy.
The revival of the Orpheus myth in Early Modern Italy shaped some of the period's most important developments in literature, music, and the visual arts: as the first Italian secular play, Angelo Poliziano's Orfeo marked a new beginning for Italian theater in the late fifteenth century. Just over a century later, the composers and librettists who created Italian opera (Peri, Rinuccini, Monteverdi, Striggio, and others) made the Orpheus myth the most characteristic theme of this new art form. In this course we will study these and other Early Modern works based on the Orpheus myth, as well as their classical antecedents (including texts by Virgil, Ovid, Boethius). We will explore the literary, musical, and artistic repercussions of the rediscovery and reinterpretation of ancient Greek Orphic poetry by intellectuals and poets of Lorenzo de' Medici's circle, including Marsilio Ficino, Cristoforo Landino, and Giovanni Pico della Mirandola. Discussions will be conducted in English. Some knowledge of Italian is desirable, but advanced Italian is not a prerequisite.
Instructor(s): J. Coleman.

Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.214.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors' work, i.e., the "road beyond neorealism" for Fellini, and Almodóvar's queerness as expressed in his "true-and-false testimonies." We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius' Satyricon, about the worshiping of the most important female deity in late antiquity, Isis, in light of Fellini's Satyricon; and Thierry Jonquet's novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar's The Skin I Live In (2011). We will be reading Karen Pinkus' Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini's Rome, as well as Almodóvar's columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.214.851. Italian Foreign Language Teaching Practicum I.
Required for first-year Italian Graduate Students. Must take Italian Foreign Language Teaching Practicum II (AS.214.852) to receive credit for this course. This course will not have a scheduled meeting time.
Instructor(s): A. Zannirato
Area: Humanities
Writing Intensive.

Instructor(s): B. Wegenstein; E. Refini; L. Di Bianco; P. Forni; W. Stephens.

AS.215.123. Freshman Seminar: The Politics of Spanish Painting. 3.0 Credits.
How are paintings political? What would it mean for a painting to make a political intervention? Can a painting’s subject, composition, and style entail political arguments and claims? Understanding painting as a repository for social, economic, and political relations, this course will examine the works of major Spanish painters from Diego Velázquez to Joan Miró. We will pay special attention to the ways in which each painter developed a particular “political vision” of Iberia and the world. Paintings will be paired with texts ranging from art history and criticism to literature, history, and political philosophy.
Instructor(s): Staff
Area: Humanities.
AS.215.207. Freshman Seminar: Comics & Short Stories in Latin America. 3.0 Credits.
Comics and short stories are literary forms that succeed by at once embracing and defying their apparent limitations. This course provides a comparative understanding of the evolution of the two forms in Latin America by bringing together the works of legendary comic artists like Quino (Argentina), Rius (Mexico), and Los Bros Hernandez (USA) with short form masterpieces by authors including Jorge Luis Borges, Julio Cortázar, Elena Garro, and Rosario Castellanos. Students will learn critical strategies for approaching and evaluating marginalized and alternative literatures and will deepen their understanding of the histories and cultures of Latin America in the 20th and 21st centuries. Class taught in English.
Instructor(s): C. Ray
Area: Humanities.
AS.215.231. Introduction to Literature in Spanish. 3.0 Credits.
The main objective of this course is to examine and discuss specific authors and topics in literature in Spanish from the Middle Ages to the 20th century. The course is designed to cover a selection of Hispanic texts from Spain and Latin America. Literary genres to be studied will include narratives, poetry, and drama. The bulk of each class session will be dedicated to the discussion of the assigned readings. This course is taught in Spanish. This course is required for the major in Spanish.
Instructor(s): Staff
Area: Humanities.
AS.215.243. Freshman Seminar: The Middle Ages in Film. 3.0 Credits.
The Middle Ages and medieval themes are ubiquitous in popular movies of our times. This course studies the Middle Ages as they have been portrayed in film, with a focus on Spain. Course materials include studies on the imaginative uses of the Middle Ages as well as films like The Cid, Tirante el Blanco, Ladyhawke, and Destiny, among others.
Instructor(s): N. Altschul
Area: Humanities.
AS.215.253. Borges on Islam, Judaism and Christianity. 3.0 Credits.
This class offers an introduction to the life and works of world-renowned Argentine author Jorge Luis Borges. It offers students an opportunity to make an in-depth examination of several of his most notable essays, short stories, and a few of his poems. The class is centered on texts which refer directly or indirectly to the relationship between national identity and religion. Questions will arise, such as: are literary portrayals of Islam related to politics? Do all Argentina Jews are Argentinean? Why is this? If we are the West, what is the Orient? Students should have taken Spanish 201.
Instructor(s): M. Ruhlmann
Area: Humanities.
AS.215.265. ELECTRIC APOCALYPSE: Rock in Latin America. 3.0 Credits.
Rap, Metal, Punk Rock, and the other children of Rock and Roll are a global phenomena, and can serve as a site wherein hegemonic ideological culture is contested and resisted. These musical vocabularies manage to noisily articulate the voice of otherwise silent resistance by cultivating a peculiar and often paradoxical relationship with violence. This course will take Tristan Garcia’s dialectic of “electric adolescence” as a point of departure for analysis of the relationship between music, violence, and social critique in Latin America.
Prerequisites: AS.210.212
Instructor(s): C. Ray
Area: Humanities.
AS.215.271. Life and Death: Philosophy in Spain. 3.0 Credits.
If there is an essence of Modern Spanish philosophy, the debate which raged between Miguel de Unamuno and José Ortega y Gasset provoked each thinker to realize that essence in profoundly divergent ways. And yet, what connects the two figures is a shared fascination with the rigorous investigation of their social reality and the mystery of the self. This course will examine the works and lives of Unamuno and Ortega y Gasset and, with the aid of Kierkegaard and Nietzsche, strive to understand their confrontation with eternity and mortality.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.
AS.215.312. The Great Latin American novel according to Carlos Fuentes. 3.0 Credits.
An investigation into the historical development of the great Latin American novel according to Carlos Fuentes new book on the subject. Course includes reading novels by machado de Assis, Garcia Marquez, Carlos Fuentes, Vargas Llosa, Cortazar and Piglia
Instructor(s): S. Castro-Klaren
Area: Humanities.
The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncaglio and Silva Passuni.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.
AS.215.336. Don Quijote. 3.0 Credits.
A close reading and discussion primarily in Spanish of Cervantes’ masterpiece, with concentration on its major themes and contributions to the formation of the modern novel. We will use A. Murillo’s edition of the novel, Editorial Castalia.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): H. Sieber
Area: Humanities.
AS.215.337. Teatro Espanol del Siglo del Oro. 3.0 Credits.
Close reading of various Spanish authors, among them Lope de Vega, Calderon de la Barca, Moreto, and Zorilla. Students should have taken courses beyond intermediate level or advanced Spanish. This class will be conducted primarily in Spanish as a seminar and will require active participation and discussion. Papers will be written in Spanish.
Undergraduate Seminar.
Instructor(s): H. Sieber
Area: Humanities.
AS.215.338. Introduccion a la literatura argentina. 3.0 Credits.
La literatura se enmarca en la realidad social y es una ventana hacia la cultura. En esta introducción consideraremos diferentes temas de especial importancia en la cultura y literatura argentina, como la separación entre la ciudad (puerto, civilización, contacto europeo) y el campo (provincias, barbarie, tradicionalismo rural) que empiçe con el texto fundacional de Domingo F. Sarmiento, Facundo. Observaremos asimismo que esta influyente dicotomía que se establece con la independencia política es modificada con la llegada masiva de inmigrantes a fin de siglo y finalmente pierde su fuerza con la dictadura militar de los años ’70 y con el desencanto neoliberal que estalla con la crisis del 2001.
Instructor(s): N. Altschul
Area: Humanities.
AS.215.343. Nación criolla: cultura y literatura en el siglo XIX. 3.0 Credits.
The course examines the formation of new identities of Hispanic-Americans and the search for a past that is legitimate, especially in the Cono Sur (Chile, Argentina, Uruguay). We will consider in particular the relationships with the Spanish-speaking and with the Spanish-speaking American territories in texts, criticism, and literary figures of the 19th century, e.g. Domingo Faustino Sarmiento, Andrés Bello, Simón Bolívar, Esteban Echeverría, and José Victorino Lastarria.
Instructor(s): N. Altschul
Area: Humanities

AS.215.345. Children & Adolescents in Latin America. 3.0 Credits.
Through the close reading of primary texts written by or about adolescents, this course examines youth participation in Latin American art and society from the mid 20th century. Students wishing to complete the writing portions of the course in Spanish or Portuguese should enroll in section 2 which will award 4 credits instead of the usual 3.
Instructor(s): L. Reynolds
Area: Humanities

AS.215.350. Mexico: An interdisciplinary approach to the construction of our image and understanding of Mexico. 3.0 Credits.
The course studies the accounts of the Mexica on the journey and foundation of Tenochtitlan. Later we move on to the clash of cultures with the Spanish conquest (1521). After studying the art of the colonial period, the course focuses on the Mexican Revolution of 1910 and ends with a consideration of the image of the nation in murals and writers such as Octavio Paz, Carlos Fuentes and Elena Garro. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.353. Women Writing in Latin America: Prose and Poetry by Sor Juana, Mistral, Lisoba, Pizarnik, Castellanos, and other poets. 3.0 Credits.
The first objective of the course is to train students in close reading and analysis of literary texts. The second objective is to read prose and poetry by some of the canonical texts in the Latin American tradition written by women. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.361. A multidisciplinary introduction to the Study of Latin America. 3.0 Credits.
The course brings together knowledges drawn from the fields of geography, history, anthropology, literature and art in order to provide access to the complexity of "Latin America". Students may opt do the reading in the original Spanish or Portuguese and also write in either language.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.363. Film and Franquismo: Repression and Resistance in Spanish Cinema. 3.0 Credits.
This course will examine the cinema of Spain that was produced from the onset of the Spanish Civil War in 1936 until the death of dictator Francisco Franco in 1975. The films we will analyze include partisan documentaries, government propaganda shorts, escapist musicals, wry comedies, neo-realist thrillers, iconoclastic dramas, and meditations on national and personal trauma. In addition, we will contextualize our analyses by reading seminal works of Spanish cultural history, social criticism and film theory. This course is taught in English.
Instructor(s): C. Kozey
Area: Humanities.

AS.215.375. Cinema in Spain and Latin America. 3.0 Credits.
We will study and discuss a selection of recent films from Spain, Argentina, Peru, Mexico and Cuba. We will concentrate on hot political and social issues in these countries as reflected in each film. Issues under discussion will be: the formal study and vocabulary of film and cinema in Spanish; gender and sexuality; national memory and trauma; trends in commercial filmmaking at the local and global levels; the imprint of social media networks. Taught in Spanish. Advanced Spanish is a prerequisite. The course counts as credit for the Major and Minor in Spanish and may apply as the equivalent to Intro to Literature in Spanish.
AS.215.231.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.380. Modern Latin American Culture. 3.0 Credits.
Taught in Spanish. This course will explore the fundamental aspects of Latin American culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.312; Students may earn credit for AS.211.380 or AS.215.380, but not both.
Instructor(s): Staff
Area: Humanities.

AS.215.388. Narrating Mexico: Novel and History. 3.0 Credits.
The 200 years since the eruption of Mexican Independence present a panorama of struggle, strife, and literary creation. This course explores how Mexican literature formulates, contests and conditions portrayals of the national reality of Mexico. Taught in Spanish. Recommended Course Background: Advanced Spanish I or another Spanish survey course.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

AS.215.390. Modern Spanish Culture. 3.0 Credits.
This course will explore the fundamental aspects of Spanish culture from the nineteenth to the twenty-first centuries. The course will offer a general survey of the history of Spain and will discuss texts, movies, songs, pictures, and paintings in relation to their social, political, and cultural contexts. This course will be of particular interest for students planning on spending a semester abroad in Spain—specially for those students going to the JHU Fall Semester in Madrid, at Carlos III University. Taught in Spanish. Recommended Course Background: AS.210.311 or appropriate Webcape score. AS.215.390 was formerly numbered AS.211.390
Prerequisites: Students may not have previously completed AS.211.390.
Instructor(s): Staff
Area: Humanities.
AS.215.403. Cine en Común. 3.0 Credits.
Eleven commercial films in Spanish closely examined through screenings, class discussion, and short papers. Besides basic film appreciation, the course intends to develop a common critical vocabulary between Spanish and English to discuss movies in plain language and in terms relevant to social issues
Prerequisites: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.404. Cuba Between Heresy and Revolution. 3.0 Credits.
We will examine the Stalinist and Leninist refashioned doctrines of Fidel Castro and Ernesto Che Guevara; Cuba's Devil's Pact with Obama; the decline to near breakdown of Cuba-Venezuela Alba dual nation Chavismo; and the startling implications that all of it poses to the rise of sharn populism in America. We will press hard into the fabric of Cuba's battered daily lives, mostly in greater Havana, but also in Miami. Among others, the work of filmmaker Fernando Perez, the fiction of Leonardo Padura, and Mariel exodus artists will inform our discussions. Our shared hypothesis: that post-revolutionary national sovereignty, coupled with Cuban exile irredentism, may have engendered the island's dual nation status, tied to Miami's so-called Cuban enclave. As a result, a theologico-political confessional crisis continues into infinity in terms of plural and bipolar heresies supported by US electoral mapping and lobbying, and in some minds having Cuba become the Fifty-First US state.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.411. Folly & Insanity in Spanish Culture: Origins of Modern Madness in the Literature of Spain. 3.0 Credits.
What is human madness? Taking into account Foucault’s famous dictum, "There can be no madness without society," this course returns to the earliest constructions of madness in the early modern period and moves forward into modernity through a close reading of literary, philosophical and scientific texts published in Spain. Readings include Cervantes, Leon Hebreo, Huarte de San Juan, Lope de Vega, Calderon, Galdos, Freud, and others. Earlier representations of mental disquiet will be compared with the latest advances in psychology and neuroscience published in the JHU Gazette and the HUB. Recommended Course Background: AS.210.312
Instructor(s): G. Ponce
Area: Humanities
Writing Intensive.

AS.215.415. Horror in Spanish Literature. 3.0 Credits.
While our modern conception of "horror" owes much to English literature of the 19th century, it has an under-appreciated precedent in the literature of the Spanish Golden Age. In this course we will read tales of witches, monsters, and the living dead from an age that pre-dates ours by 400 years, but whose darkest fears are surprisingly familiar.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.215.422. Amor y romanticismo en una novela y tres películas. 3.0 Credits.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.440. The Picaresque Novel in Spain. 3.0 Credits.
Close reading of the Lazarillo de Tormes, Guzman de Alfarrache, Miguel de Cervantes, and others. Taught in Spanish.
Prerequisites: AS.210.312
Instructor(s): G. Gonzalez
Area: Humanities.

AS.215.443. Hispanic Literatures and the Arts. 3.0 Credits.
Literary works from different genres (fiction, drama, poetry) by authors from Spain and Latin America are studied and illustrated in reference to the plastic and visual arts and cinema, indigenous, popular, and religious cultures. Cross-listed with PLAS
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.445. El Cine de Pedro Almodovar. 3.0 Credits.
El arte cinematográfico del gran cineasta español será estudiado a través de su obra, vista en partes selectas, obras enteras y dentro del marco escénico provisto por otras películas del cine español. Recommended Course Background: AS.210.326 or demonstrated proficiency in the language.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism. 3.0 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara's life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che's great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.455. Amor y romanticismo en una novela y tres películas. 3.0 Credits.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.458. Cuba and its Culture Since the Revolution. 3.0 Credits.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities.
AS.215.463. Borges: His Fiction and Critical Essays. 3.0 Credits.
This course will deal with close readings of Borges ficciones and critical essays in order to determine how his thinking on the problem of writing and thinking is fictionalized in his stories.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.464. Senior Seminar: El Caribe como problema. 3.0 Credits.
Recommended for Spanish majors and anyone fluent in the language. The course explores through diverse media the Hispanic and Afro-Descendant Caribbean/Antillean societies, from the early Spanish conquest to the current crises in Caribbean Venezuela, Colombia, Mexico, and Florida. Taught in Spanish
Prerequisites: AS.210.311 OR AS.210.312 or equivalent test score.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.476. El "moro" de al-Andalus al Siglo de Oro y América. 3.0 Credits.
Este curso examina la figura del "moro" en el medioevo, la modernidad temprana, y las colonias americanas desde la conquista islámica de 711 hasta la expulsión de los moriscos en 1614. Temas incluyen identidades híbridas, "arabizadas" y transculturales de conquistados y conquistadores; los comienzos andalusíes de la picarreca; el estilo mudéjar en España y las colonias americanas; y los festivales de "moros y cristianos" en la América colonial entre otros. Las lecturas incluyen selecciones del Mio Cid, el Conde Lucanor, las Guerras civiles de Granada, "Ozmin y Daraja," "El Abencerraje," la "Conquista de Jerusalén" de Tlaxcala 1539, y episodios de Don Quijote.
Prerequisites: Prereq: AS.210.311
Instructor(s): N. Altschul
Area: Humanities.

AS.215.477. La Habana Miami: One World and Two Cities. 3.0 Credits.
A tale of two cities approach to the exceptional bond between two nations in the age of migration. The arts, the blogosphere, cinema and the vast unknown.
Prerequisites: Pre-req: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.484. Orientalismo al Sur. 3.0 Credits.
Taught in Spanish. This curso examina la presencia del Islam y el concepto del “oriente” en el Cono Sur, especialmente Argentina. Leeremos obras de los siglos 19 y 20 que representan al oriente, y discutiremos los significados y cambios que la llegada de inmigrantes “islámicos” produjo en la cultura literaria de esta zona de América Latina. Tendremos en cuenta de forma particular que el problema del “oriente” en España y sus colonias es un problema “interno”. Debido a que la península ibérica tuvo una importante presencia musulmana durante toda la edad media (711-1609), en los círculos europeos España fue considerada “islámica” u “oriental” también durante los tiempos modernos. Es así que el Oriente llega a América con la conquista de los españoles “islamizados.” Cross-listed with PLAS
Instructor(s): N. Altschul
Writing Intensive.

AS.215.489. Poetry in Latin America: A multilingual survey from 1200 to the present. 3.0 Credits.
The course focuses on a presentation of the multiple traditions of poetry writing that make up the Latin American tradition from the Mexica poets at about 1200 to current writers in Latin America. Original poetry in Nahuatl, Maya-Quiche, Spanish and Portuguese will be read along side translations into English. Attention will be paid to translation theory.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.491. Muslim, Jewish & Christian Literatures of Medieval Spain. 3.0 Credits.
Desde el 711 hasta el 1609 de la era cristiana, la península ibérica fue una sociedad multi-lingüística con zonas y ciudades pobladas y/o administradas por miembros de las tres religiones abrahámicas monoteístas. Este curso presenta un panorama de las literaturas hispano-musulmanas, hispano-judías e hispano-cristianas haciendo especial hincapié en el contexto histórico de la península. Los textos en árabe y hebreo serán leídos en traducción inglesa o castellana, dependiendo de su accesibilidad. Taught in Spanish
Instructor(s): N. Altschul
Area: Humanities.

AS.215.525. Spanish Independent Study. 1.0 - 3.0 Credits.
Instructor(s): E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

AS.215.526. Spanish Independent Study. 0.0 - 3.0 Credits.
Instructor(s): E. Gonzalez; H. Sieber; N. Altschul; S. Castro-Klaren; W. Egginton.

AS.215.527. Spanish Internship. 1.0 Credit.
Instructor(s): E. Gonzalez.

The course focuses on presentations of a variety of traditions of poetry writing that make up the Latin American tradition from the Mexica poets at about 1200 to current writers in Latin America. Original poetry in Nahuatl, Maya-Quiche, Spanish and Portuguese will be read along side translations into English. Attention will be paid to translation theory.
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.639. Don Quijote de la Mancha.
The novel will be the focus of the entire seminar. Recent trends in Cervantes criticism, textual issues related to the novel's publication, biographical, cultural, and social history, and patronage in the Courts of Philip II and III will be topics of discussion and research. The goal is a wide-ranging appreciation and understanding of the novel's original contexts.
Instructor(s): H. Sieber.

Four authorships deeply embedded in translation and the work of Eros and Thanatos will be studied: J. L. Borges (Pierre Menard), J. Derrida (fragments from La carte postale), Xavier Marías (Corazón tan blanco), and André Neuman (El viajero del siglo).
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive.
AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.
Departing form narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.
Instructor(s): S. Castro-Klaren

From neuroscience to political theories, we will examine early modern and late modern works in literature and critical thought in which dreams and dreaming intersect with power under diverse political regimes and modalities.
Instructor(s): E. Gonzalez
Area: Humanities

AS.215.650. Mexico and the Invention of America.
Departing from O’Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero, Humboldt, Dussel and Alzandua will conform part of the readings. Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

This course will focus on the art of writing poetry, the art of reading poetry and the poetics of each of the poets whose work is the textual matter of the course.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez

AS.215.667. Cities in Motion, Worlds Adrift.
We will explore the comparative phenomenology of the city in historical reference to literary, cinematic, and TV serial values. Modalities of segregation and diviseness will dominate our inquiry. Undergrads by request and with approval of instructor.
Instructor(s): E. Gonzalez
Area: Humanities

AS.215.695. New and Old Disputations of/for the New World.
This course will focus on readings of original texts—chronicles, reports, treatises, and polemics— and critical commentary on the issues central to the disputation for control and deployment of the meanings of the "new" world and its status in the realm of coloniality. Besides selections from the Inca Garcilaso de la Vega, Guaman Poma, and Ixtlilxochitl, we will read from Jose de Acosta and Bernabe Cofo. Antonello Gerbi’s Disputa Del Nuevo Mundola and Walter Mignolo’s The Darker Side of the Renaissance, along with Enrique Dussel’s El Encubrimiento Del Otro and Charles Man’s 1491 will constitute the totality of readings and problematic of the seminar.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.710. Medievalisms.
This course examines variegated constructions and redeployments of "the middle ages" in postmedieval times. Topics include historical revivals, the national philologies, literary, and filmic reconstructions, postcolonial medievalisms, and theories of temporality, among others. Readings in English and Spanish.
Instructor(s): N. Altschul.

From telegrams to tweets, the twentieth-century media revolution appears unique; but the magnitude of the revolution is not unprecedented. Another media revolution preceded ours by about 400 years, and coincided with the dawn of modern Europe. This course will examine examples of inflationary media—media whose deployment affects not just the content being transmitted, but also a culture’s entire understanding of reality—from both ages, with special attention to those deployed in the context of emergent early modern nation states like Spain, but with an eye to better understanding the effects and potentials of analogous media practices today.
Instructor(s): W. Egginton.

AS.215.713. What Are Humanities?.
They are one of three established divisions of knowledge. Almost half the departments at our own university are categorized under that division. We all feel we know what the "humanities" are, but how? Is the best answer we have to that question a paraphrase of Justice Potter Stewart’s definition of pornography, "I know them when I see them"? In this seminar we will examine the question of what the humanities are through the close reading of a series of key texts spanning the period from the Renaissance to the twentieth century. In many ways our readings will be necessarily proleptic, since the very category we are interrogating postdates many of the sources we will be analyzing. Our guiding question, however, will be how the specific division of knowledge under which we now organize our disciplines came into being, and what presuppositions that organization implies. The course will be conducted in English but will include, to the extent possible, readings in the original language. Graduate students should be prepared to work in the original language if it is one that they already master (which may include Latin, Spanish, Italian, French, or German) and with translations when not. Readings may include selections by Desiderius Erasmus, Lorenzo Valla, Juan Luis Vives, Juan Ginés de Sepúlveda, Francisco de Vitoria, Bartolomé de las Casas, Denis Diderot, Johann Wolfgang von Goethe, Immanuel Kant, Martin Heidegger, Maurice Merleau-Ponty, and Jean-Paul Sartre.
Instructor(s): W. Egginton
Area: Humanities.
AS.215.735. The Boom Revisited. Visions by Carlos Fuentes, Garcia Marquez, Diane Goodrich and the MLA.
Now that Carlos Fuentes has written his history of the Latin American novel, that a biography of Garcia Marquez is out and several retrospective studies on the making and impact of the "boom" are circulating, it is time to reconsider the boom as a force in the making of the cannon and a paradigm for narrative interpretation. Besides three long critical studies and the MLA's "how to teach the boom," the seminar will consider in detail three key novels: La muerte de Artemio Cruz, Cien años de soledad, and La casa verde.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

A close reading of Cervantes' short stories, with concentration on their literary tradition and their relationship to some of his other works. We will also investigate Spanish court society, politics, and history between 1598 & 1621 and critical bibliography.
Instructor(s): H. Sieber.

The course engages close readings of Borges critical essays and some of his fiction in order to establish the points of interpellation that Postmodern theory takes from or shares with Borges's meditation on the problem of writing.
Instructor(s): S. Castro-Klaren.

AS.215.753. Latin American Premodern.
Focusing on the idea that Iberian colonization was premodern in character, this course examines the association of Spanish and Portuguese America with topics like feudality, the orient, despotism, and medieval cultural lifestyles. Among others, theoretical discussions include the medieval-modern divide, (neo)medievalism, settler postcolonial theory and comparative colonialisms, modernization and dependency theories; texts include, among others, Argentinians Domingo Sarmiento and José Ingenieros, Brazilians Euclides da Cunha and Gilberto Freire, Peruvian José Carlos Mariátegui, and Cuban Alejo Carpentier.
Instructor(s): N. Altschul.

AS.215.763. Vargas Llosa and Garcia Marquez: Intertextual crossing and World Literature.
The objective of the course is to read critically key works by these two writers in the context of their self stipulated intertexts—Flaubert and Faulkner, respectively—and the place such intertextual readings in the contexts of the recent discussions on "world literature".
Instructor(s): S. Castro-Klaren.

AS.215.778. Topics in Baroque and Neobaroque Literature.
This seminar will look at theories and source texts comprising the cultural production known as the Baroque and Neobaroque, categories that extend to and include some twentieth-century and contemporary aesthetic practices. Although the focus of the seminar will be largely literary and theoretical, we will look at some examples of visual culture as well. Students will prepare several presentations and a final research paper. Presentations in the second portion of the course should be prepared in reference to a primary corpus you intend to write about, and the final paper on.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—open up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas.
Instructor(s): B. Wegenstein; D. Schilling.

AS.215.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors' work, i.e., the "road beyond neorealism" for Fellini, and Almodóvar's queerness as expressed in his "true-and-false testimoies." We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius' Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini's Satyricon; and Thierry Jonquet's novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar's The Skin I Live In (2011). We will be reading Karen Pinkus' Montesi Scandal, an unrealized screenplay about the birth of the Paparazzi in Fellini's Rome, as well as Almodóvar's columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.215.826. Spanish Independent Study.
Instructor(s): E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

Instructor(s): E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

AS.216.300. Contemporary Israeli Poetry. 3.0 Credits.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, Dalia Rabikovitch, Erez Biton, Roni Somek, Dan Pagis, Yona Wallach, Yair Horwitz, Maya Bejerano, and Yitzhak Laor. Against the background of the poetry of these famous poets we will study recent developments and trends in Israeli poetry, including less known figures such as Mois Benarroch, Shva Salhoov and Almog Behar. Through close reading of the poems, the course will trace the unique style and aesthetic of each poet, and will aim at presenting a wide picture of contemporary Hebrew poetry.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.
AS.216.307. Reflective Mirrors: Israeli and Palestinian Cinema. 3.0 Credits.
Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.342. The Holocaust in Israeli Society and Culture. 3.0 Credits.
This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.
Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.216.370. Israel Through Prose. 3.0 Credits.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled.-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.373. War in Israeli Arts and Culture. 3.0 Credits.
In this course we will study the various representations of what functions as one of Israel's most unifying and yet dividing forces: war. By analyzing literary and cinematic works as well as visual art and popular culture we will attempt to understand the role of war in shaping Israeli society, culture and politics. Topics such as commemoration and mourning, dissent and protest, trauma and memory and the changing image of the soldier will stand at the center of the course. Students with a knowledge of Hebrew wishing to do extra work in Hebrew should enroll in section 2 and the fourth hour will be scheduled at a time convenient to the enrollees and instructor.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities

AS.216.398. Zionism: Literature, Film, Thought. 3.0 Credits.
This course studies the relation between Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the history of Zionism and its influence on Israeli culture. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films. Students wishing to do additional work in Hebrew should enroll in section 2 where students will meet for an additional hour at a time TBD and will earn 4 credits for the course.
Prerequisites: Students may receive credit for AS.216.398 or AS.300.398, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.
**Cross Listed Courses**

### History of Art

**AS.010.204. Italian Art in the Middle Ages. 3.0 Credits.**
This course explores key monuments of medieval art and architecture in Italy from c. 400 until 1350. We will concentrate on historical, functional, and aesthetic aspects that lead to the creation of single monuments and art works. Emphasis is given to the analysis of “sacred space” by means of architecture, painted, and sculptural decoration, as well as ritual performances. Another focus is laid on the emergence on the political dimension of art for the creation of civic identity as well as in the context of the late medieval courts. We raise questions about the importance of materiality and science for the creation of medieval art works.
Instructor(s): N. Zchomelidse  
Area: Humanities.

**AS.010.216. 20th Century Italian Art. 3.0 Credits.**
This course will be a critical survey of the major artistic movements in Italy during the 20th century, from Futurism to Arte Povera. Often seen as a secondary location of artistic production, the class will situate the artists working in Italy within a broader historical and global context.
Instructor(s): K. Larson  
Area: Humanities.

**AS.010.312. Surrealism. 3.0 Credits.**
Topics include: art and the unconscious; “psychic automatism” and its implications for theories of medium, genre, and composition; objects, journals, and exhibitions. Visits to Special Collections and the BMA. Students will curate and install an exhibition of Surrealist journals from MSEL Special Collections, to open in April 2014.
Instructor(s): M. Warnock  
Area: Humanities  
Writing Intensive.

**AS.010.326. Monsters, Madmen, and Matadors: Goya between Truth and Fantasy. 3.0 Credits.**
With over 1,800 works attributed to him, Francisco de Goya (1746-1828) was constantly inventing, experimenting, and pushing the limits of the representable. This course will begin by examining Goya’s printed oeuvre as one possible itinerary for studying his life and work. The second half of the course will consider alternative narratives for Goya’s career based on genre and theme. Topics will include portraiture, madness, religious painting, and the discovery of Goya by later generations of artists, authors, and filmmakers. The course includes several visits to the print room at the Baltimore Museum of Art. There will be a final paper.
Instructor(s): A. Letvin  
Area: Humanities.

**AS.010.328. Freshman Seminar: Magic and Miracles from Antiquity to the Renaissance. 3.0 Credits.**
This freshman seminar will explore concepts of magic and miracles and their different forms from ancient Greece and Rome and early Christianity through the Middle Ages up to the Renaissance. Dean’s Prize Teaching Fellowship Course.
Instructor(s): M. Mueller  
Area: Humanities  
Writing Intensive.

**AS.010.430. Trans-Mediterranean Visual Culture and the Spanish Empire. 3.0 Credits.**
This course focuses on the visual culture and the artistic interconnections among the territories under the global hegemony of the Spanish Empire. Students explore the so-called Spanish Golden Age through the lens of the circulation of ideas, artworks and artists as a practice that significantly shaped Early Modernity. We will navigate and discuss the mutual artistic exchanges between Spain, its American Colonies, its Italian territories (Milan, Naples and Sicily), and its allies (Genoa and Florence), as part of an extraordinarily extended network of political and cultural relationships, across the Mediterranean and beyond. The syllabus includes topics such as: the reception of the Renaissance in Columbus’ mudéjar [Moorish] Seville; traveling Iberian artists in search of Michelangelo’s model; El Greco’s Mediterranean; Titian’s influence on Velázquez’s artistic practice; the visual response to the miraculous catholic images in Latin America, such as the Virgin of Guadalupe, and to the canonization of Rosa of Lima, the first saint of the New World. There will be a final paper.
Instructor(s): F. Loffredo  
Area: Humanities.

**AS.010.434. Italian Art, Politics, and Religion in the time of Dante, c. 1250-1400. 3.0 Credits.**
This seminar will investigates the interrelationship between art, politics, and religion on the Italian peninsula during the later Middle Ages. We will focus on the major cities as patrons of the arts (visual and poetic), e.g. Florence, Siena, Padua, Milan, Naples, Venice, Rome, in order to understand how the elite used art to further their political and religious agendas. Select topics include: the rise of the Mendicant orders; the importance of Dante’s Divine Comedy on manuscript production; artistic competition among communes; the rise of the individual artist; humanism and the arts.
Instructor(s): C. Lakey  
Area: Humanities.

**AS.010.707. Therapies of Art and Literature in Early Modern Europe.**
This course examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch’s neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian “wisdom” genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, innovating therapies that were at once sacramental and philosophical, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.
Instructor(s): M. Merback  

### Classics

**AS.040.238. Freshman Seminar: Magic and Miracles from Antiquity to the Renaissance. 3.0 Credits.**
This freshman seminar will explore concepts of magic and miracles and their different forms from ancient Greece and Rome and early Christianity through the Middle Ages up to the Renaissance. Dean's Prize Teaching Fellowship Course.
Instructor(s): M. Mueller  
Area: Humanities  
Writing Intensive.
AS.040.601. Italian Renaissance Humanism and Modern Humanities.
This course will reflect on certain key moments in the development of Latinate and Italian Renaissance humanism and will also include reading and discussion of certain recent landmark contributions to the history of the modern humanities.
Instructor(s): C. Celenza.

AS.040.606. Topics in Classical Reception.
An exploration of recurring themes and recent trends in the reception of classical antiquity.
Instructor(s): M. Butler.

AS.040.716. Petrarch (1304-74) and the Beginnings of Renaissance Latin.
This course will provide close readings of certain Latin texts by Petrarch, with attention to his letters and to other prose works.
Instructor(s): C. Celenza.

Film and Media Studies
This course provides students an introduction to the discipline of sound studies and its relationship to three eras of historical forms of technological media. Structured around a problematic of emitter, medium, and receiver, it explores how sound was encoded by its creators as a structure of meaning in early media cultures; how it emerged as a means of aesthetic creation with the rise and dominance of the cinematic medium; and last, how it reaches the infatuated individual listener in the new era of mobile earbud audio. Theorizing our relationship to media through the study of sound and listening, we find new histories to be explored, as well as new media aesthetics to be negotiated. Through engagement with thinkers such as economist Jacques Attali, auditory and cultural historians Emily Thompson and Jonathan Sterne, film sound theorists Michel Chion and Rick Altman, and sound studies scholar Michael Bull, we construct how technologically mediated listening allows us to understand the historical and theoretical components of sound's media aesthetics. Recommended Course Background: AS.061.245 for undergraduates or JHU graduate student status (open to all JHU graduate students).
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

Anthropology
AS.070.262. Cuban Intellectuals, Cinema, and the State. 3.0 Credits.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.

History
AS.100.602. The French Revolution.
This seminar introduces graduate students to the rich historiography of the French Revolution. Topics include: revolutionary origins, political culture and radicalization, friendship and emotion, family and gender, the search for stability after the Terror, Napoleon's Brumaire coup.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.

History of Science Technology
AS.140.674. Science and Medicine in Early Modern Atlantic World Culture.
How were changes in scientific and medical ideas reflected in cultural products of the early modern Atlantic world? We will study these ideas as they appeared in literary genres such as poetry, utopias, natural histories and travel narratives. Likewise, we will examine the visual culture of the Atlantic space for clues about changing conceptions about the natural world. Our expedition will encompass Anglophone, French and Hispanic regions, and will pay careful attention to hybrid cultural products that reflect the interaction between indigenous cultures and the (changing) European understanding of the natural world.
Instructor(s): M. Portuondo.

Medicine, Science and the Humanities
AS.145.330. Insomnia in Modern Literature, Philosophy, and Film. 3.0 Credits.
Insomnia, while being defined and treated as a sleep disorder in the field of medical discourse, has attracted other kinds of interest, too. Philosophers and writers have been intrigued by insomnia since antiquity. From their perspectives, the capability of being sleepless not only distinguishes humankind from animals but testifies to human awareness in its ceaseless striving for wisdom and truth. Insomnia appears as vigilance, an exalted state of mind well suited for philosophic reflection, intense scrutiny of the world, and sudden inspiration. Yet these moments of sustained productivity are inextricably bound to insomnia’s “dark” side, the fact that sleeplessness tortures the body and exhausts the mind, haunts the weary wakeful and makes him meditate on insomnia. Thus sleeplessness turns into an obsession with the potential to transform thinking into endless introspection, self-absorbed melancholy, if not misanthropic sarcasm. This course will examine representations of insomnia in modern philosophy, literature and film. We will analyze to what extent interpretations of sleeplessness in the humanities differ from those in medical and scientific discourse. Particular emphasis will be placed on the relationship between insomnia, subjectivity, thinking, and writing. Authors and films to be considered will include among others Emanuel Lévinas, Emir Kusturica, Franz Kafka, Samuel Beckett, Ernest Hemingway, F. Scott Fitzgerald, Djuna Barnes, Gabriel García Márquez and Insomnia (2002; Christopher Nolan).
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

Philosophy
AS.150.483. Topics in Jewish Philosophy: Heresy. 3.0 Credits.
Hassidism is the ecstatic religious movement that emerged in East European Jewry in the mid eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of Dov Ber of Mezrich between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon's report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset.
Instructor(s): Y. Melamed.
Political Science
AS.191.344. Belonging to Nature in the Anthropocene. 3.0 Credits.
This course explores debates in contemporary environmental political thought concerning humanity's relationship to nature in the Anthropocene. The Anthropocene refers to the era in which "human" activity becomes a force of "nature"—when the impact of human activity on natural processes manifests itself in the stuff of the Earth. For many of us, these planetary transformations are hardly noticeable in day-to-day life, but they are dramatic: we are living through the Earth's sixth mass extinction. What is our relationship to these transformations? Do we have the power to stop them, or at least to minimize their harmful effects? Course readings and films introduce multiple visions of the human/nature relationship and examine the responses they recommend to these and other questions. The political stakes of these visions are brought to light as we consider: How do visions of the human/nature relationship shape and texture core political concepts like freedom, agency, responsibility, and progress? What do they suggest about the strategies most likely to motivate action amid the uncertainty of the Anthropocene? How do these visions subtly (and not so subtly) relegate some to the realm of "nature" so that others can be classified as "human"?
Instructor(s): O. Ophir
Area: Humanities

AS.300.427. Reading Freud. 3.0 Credits.
Sigmund Freud was one of the most influential thinkers of the 20th century. Psychoanalysis, which was his theory of mind, a research method, and a therapeutic technique, offered concepts that pervade Western culture and the humanities. In this seminar which is designed for students from all fields of knowledge, we will closely and chronologically examine key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities

AS.300.419. 1966 before and after: French theory. 3.0 Credits.
The "Languages of Criticism" conference held at Hopkins marked a watershed moment in the history of literary studies and redefined, for many scholars and intellectuals, the nature of humanistic inquiries. This course involves the close study of key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities

AS.191.344. Belonging to Nature in the Anthropocene. 3.0 Credits.
In contemporary discussions of climate change, it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class, we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the prospects of our ecological future today. Authors to be studied: George Lillo, Balzac, Dickens, Marx and Engels, Ibsen, Weber, Brecht, Arthur Miller, Steinbeck, Pope Francis, and contemporary fiction, politics and philosophy on climate change.
Instructor(s): L. Lisi
Area: Humanities

AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change. 3.0 Credits.
In contemporary discussions of climate change, it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class, we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the prospects of our ecological future today. AS.300.379. Israeli Film and Literature. 3.0 Credits.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli cinema and literature. The course will follow both a thematic and chronological path in order to study the ways in which Israeli cinema and literature reflect political, ideological, social, and cultural aspects of contemporary Israel. In this context, we will read well-known works by several major authors and will watch major Israeli films from the 1940s to these days. We will also use a comparative approach to study the different artistic means of both mediums and to evaluate their successes in representing the various tensions of Israeli society and culture.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities

AS.300.311. Great Poems of the Americas. 3.0 Credits.
This course investigates the long poem or post-epic in 20th- and 21st-century North and Latin America. The epic has been rearticulated in sequences and series, verse novels, lyric cycles, and collage poems: from T.S. Eliot’s The Waste Land, the encyclopedic Cantos of Ezra Pound, and the sweeping Canto General of Pablo Neruda to works by Derek Walcott and Gwendolyn Brooks and fragmented series by Gertrude Stein, Hart Crane, and César Vallejo. We will examine Aimé Césaire’s Notebook of a Return to the Native Land, Vicente Huidobro’s playful Altazor, and very recent epic poems from Canadian women poets such as Anne Carson, Lisa Robertson, and M. NourbeSe Philip. As we test the term post-epic against these texts, we will consider whether it may be applied equally to the heroic tale and the open field poem. How do poets interpret the idea of “the Americas” as lands and nations in these works, and in what tangled ways do their poetics develop through dialogue across linguistic and geographical distances? To situate the long poem in history, we’ll examine developments in poetic form alongside modernization and globalization, and technological and socio-political changes. We will draw on theories of poetry and poetics as well as critical theory, taking a comparative, Hemispheric Studies approach to literature.
Instructor(s): R. Galvin
Area: Humanities

AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change. 3.0 Credits.
In contemporary discussions of climate change, it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. Area: Humanities
**Interdepartmental**  
AS.360.133. Freshman Seminar: Great Books at Hopkins. 3.0 Credits.  
Freshman Seminar: Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University’s rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2016 include Homer, Plato, Boccaccio, Diderot, Shelley, Nietzsche, Nabokov, Douglass, and Woolf.  
Instructor(s): A. Daniel; E. Patton; S. Weiss; W. Egginton  
Area: Humanities  
Writing Intensive.

**Program in Latin American Studies**  
AS.361.130. Introduction to Latin American Studies. 3.0 Credits.  
The goal of this course is to provide an overview of Latin America, analyzing political and cultural aspects, chronologically organized. We will begin studying the origins of the multi–ethnic societies, starting with the ancient civilizations and their transformation under colonization. It is important to understand the survival of cultural traits among indigenous peasants today in the countries that were the cradle of ancient civilizations: Mexico, Guatemala and the Andean countries. In the republican era the course will focus on the classical Caribbean dictators in the first half of the 20th century and their reflection in the literature, comparing the historical reality with the magic representation in the work of Garcia Marquez. The course will scrutinize the most important revolutions in the continent: the Mexican, Cuban and Bolivian revolutions and the geopolitics of USA in the Americas. Weekly lectures related to the assigned reading will focus on specific periods, topics and regions. After each lecture, we will review the material, connecting specific details from the readings with the more theoretical aspects provided in my lecture. The course has a website where the PowerPoint presentations will be posted. Students are encouraged to post their questions, comments and suggestions on the web after their readings. Students will be given a study guide for each lecture, which will be the basis for the exams. Our perspective on Latin America will be enhanced by a selection of few films related to the topics.  
Instructor(s): Staff  
Area: Humanities, Social and Behavioral Sciences.

**Music**  
AS.376.305. Operatic Technologies. 3.0 Credits.  
Operatic Technologies offers an introduction to opera via a series of case studies about the materials used to produce it. With a particular focus on the Italian case, we will trace issues such as how auditoriums have historically been illuminated; orchestras directed; machines used to create and sustain illusion and operas simulcast. Students will leave this course with a clear sense of how the look and feel of the operatic experience has changed over time; how technological practices established in the past continue to determine productions now, and how the cinema can be considered an extension of opera. Our course includes a visit to the cinema to see a Metropolitan Opera simulcast. Ability to read music is not required.  
Instructor(s): L. Protano Biggs  
Area: Humanities  
Writing Intensive.

**Center for Language Education**  
AS.384.115. First Year Hebrew. 4.0 Credits.  
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.  
Instructor(s): Z. Cohen  
AS.384.116. First Year Hebrew II. 3.0 Credits.  
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies.  
Prerequisites: AS.384.115  
Instructor(s): Z. Cohen  
AS.384.215. Second Year Hebrew. 3.5 Credits.  
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar, and enhance fluency in reading, writing and comprehension. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.  
Prerequisites: AS.384.116 or equivalent.  
Instructor(s): Z. Cohen  
Area: Humanities.  
AS.384.216. Second Year Hebrew II. 3.0 Credits.  
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.  
Prerequisites: AS.384.215  
Instructor(s): Z. Cohen  
Area: Humanities.  
AS.384.315. Third Year Hebrew. 4.0 Credits.  
Designed to maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.  
Prerequisites: AS.384.216 or equivalent.  
Instructor(s): Z. Cohen  
Area: Humanities.  
AS.384.316. Third Year Hebrew II. 3.0 Credits.  
Designed to: maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Recommended Course Background: AS.384.315 or permission required. Cross-listed with Jewish Studies.  
Prerequisites: AS.384.315  
Instructor(s): Z. Cohen  
Area: Humanities.  
In 1857 Baltimore’s historic George Peabody Library was born, one of America’s first public libraries. This course studies its history, rare book collections, and foundational role in Baltimore’s cultural history.  
Instructor(s): E. Havens  
Area: Humanities, Social and Behavioral Sciences  
Writing Intensive.
The Department of History offers students the opportunity to work intensively in the classroom and with individual faculty to discover the richness and complexity of history. Undergraduates begin with general courses, but progress quickly to courses that explore topics in depth and provide experience in researching, analyzing, and writing about the past. Graduate students work independently with faculty advisors on reading and research in their fields of interest, while department seminars bring them together to discuss their research, forging a collegial intellectual culture. The department emphasizes European history, United States history, and the histories of Africa, Latin America, and China. Faculty and students participate in a variety of interdisciplinary programs, including Africana Studies, East Asian Studies, Latin American Studies, Judaic Studies, Museums and Society, the Program for the Study of Women, Gender & Sexuality, and the new joint curricular initiative with African and Afrolatina Studies.

The Krieger School classifies history as both a social scientific and humanistic discipline. This accords very well with the wide range of explanatory and interpretive approaches to the past that now prevail in the discipline of history. One of the history program's goals is to introduce students to these varied approaches. Although the department offers strong preparation for students who seek to specialize in a particular cultural or geographic region, history at Johns Hopkins is primarily issue and topic oriented. It also puts a premium on developing the capacity to reason comparatively and on deepening the student's understanding of global connections among cultures in the past and in contemporary life.

The department offers undergraduate courses that range from large introductory classes to small, focused seminars that encourage intensive interaction with individual professors and with other students. Beyond the introductory level, most of our courses are writing intensive and promote in all students critical reading skills and the ability to formulate effective written arguments. Through its core curriculum, the major also cultivates skills specific to the historian, especially research and writing based upon the systematic analysis of primary documents.

The program's overall aim is to deepen the critical habits of mind that arise from the study of time and change. These capacities are the hallmarks of liberal learning, but they are also the foundation for success in post-graduate studies and careers of many kinds, including business, law, and public affairs.

**Major in History**

- Students must earn a "C-" or higher grade in all courses used to satisfy major requirements, and may not count courses that are graded as satisfactory/unsatisfactory.
- For students who choose to focus on one geographical area (Europe, United States, Latin America, Africa, Asia), two courses must be taken outside the student's area of focus.
- Except for courses used to satisfy the foreign language proficiency requirement, no more than four courses offered outside the History department (AS.100.xxx) may be used to satisfy major requirements (e.g.: cross-listed, transfer, and study abroad courses). No more than two of these four courses may be offered outside the Krieger School of Arts and Sciences (usually summer transfer credit and/or study abroad courses).

**Foreign Language Requirement**
Foreign language proficiency through the intermediate level 1 0-18
Total Credits 42-60

1 Foreign language proficiency may be demonstrated by coursework or by special examination, but a language requirement waived by exam must be documented on the student's transcript.

2 Students must have a cumulative GPA of 3.25 and a cumulative GPA in history of 3.5 or higher by December of their junior year to be eligible for the senior thesis option to graduate with honors in history.

Cognate Courses The History Department encourages interdisciplinary work in cognate fields of learning. History minors are therefore strongly advised to take additional courses in any department, including the History Department, that relate to the student's major discipline in a historical way.

Sample Program of Study for History Majors
A sample path toward degree completion might include the following sequence of courses. Many alternative paths will also work. Please consult with your department advisor regarding alternative paths.

Honors Program in History (BA)
The history department strongly encourages all eligible history majors to pursue the honors track in history. The track culminates in the senior thesis, a yearlong, “capstone” research project completed under the direct supervision of an individual faculty advisor. Like all capstone projects, the senior thesis is intellectually challenging and its completion almost always brings with it a tremendous sense of accomplishment. It also hones the talented young historian’s capacity to sustain a cogent argument based on primary evidence in the long form essay. These skills and the completion of a sustained independent project are also important practical assets when seeking a job or a post-graduate education.

A general cumulative GPA of 3.25 and a cumulative GPA in history of 3.5 are prerequisites for undertaking the senior thesis, and to obtain honors students will normally be expected to complete the thesis with a grade of A- or better. All thesis writers must also enroll in both the AS.100.507 Senior Thesis (fall, 3 credits) and AS.100.508 Senior Thesis (spring, 3 credits) and AS.100.494 Senior Honors Seminar (fall, 1 credit) and AS.100.495 Senior Honors Seminar (spring, 1 credit) - enrollment is by instructor’s permission and will be granted only to students who have obtained a commitment from a faculty thesis advisor. This commitment should normally be obtained no later than April 30th of the junior year.

For questions about the honors track in history or finding a thesis advisor, consult your departmental advisor or the current Director of Undergraduate Studies.

Minor in History

The minor in history offers to students majoring in other programs of study an opportunity to pursue a serious interest in history.

- Students must earn a “C-” or higher grade in all courses used to satisfy minor requirements and may not be taken satisfactory/unsatisfactory.
- No more than one course offered outside the History department (AS.100.xxx) may be used to satisfy minor requirements (e.g.: cross-listed, transfer, and study abroad courses).

MINOR REQUIREMENTS

Introductory Courses (select one option): 6
Two introductory history courses (AS.100.1xx)
-or-
One introductory history course (AS.100.1xx) + one "Freshman Seminar" (AS.100.200-229)

Elective Courses
One 200-level or higher history course 3
Three 300-level or higher history courses 9
Total Credits 18

Cognate Courses The History Department encourages interdisciplinary work in cognate fields of learning. History minors are therefore strongly advised to take additional courses in any department, including the History Department, that relate to the student’s major discipline in a historical way.

B.A.- M.A. Programs in History
The department offers two B.A. – M.A options for current Hopkins undergraduate students. Details can be found on the Graduate tab.

Graduate Programs
The graduate program prepares professionally motivated students for careers as research scholars and college and university teachers. Hence it is designed for candidates who want to proceed directly to the Ph.D. degree, who have developed historical interests, and who are prepared to work independently. Within the areas of European history, American history, and the histories of Africa, Latin America, and China, the department emphasizes social/economic and intellectual/cultural history. Although diplomatic and political history are not emphasized, attention is given to the social, economic, and cultural bases of politics.

The program is organized around seminars rather than courses, credits, or grades. AS.100.781 The Seminar-AS.100.782 The Seminar and satellite seminars in European, American, and Comparative World History bring together students, faculty, and invited scholars from outside the university to discuss their research work. These departmental seminars create a lively intellectual community in which graduate students quickly become contributing members. The combination of flexibility, independence, and scholarly collegiality offered by the Hopkins program gives it a distinctive character.

Students select four fields (one major and three minor) and make their own arrangements with professors for a study program leading to comprehensive examinations at the end of the second year. Those arrangements may include taking a seminar in the field. One, and exceptionally two, minor field may be taken outside the Department of History. Students have maximum flexibility in the construction of individual plans of study, as well as the opportunity to work closely with several professors.

Admission and Financial Aid
In judging applications, the department puts particularly heavy emphasis on the quality of the student’s historical interests and prior research experience. Each applicant must submit a sample of written work. Applicants must also take the general aptitude portions of the Graduate Record Examination. Ordinarily no candidate for admission is accepted whose record does not indicate an ability to read at least one foreign language.

The department accepts only those students who plan to work in the specific fields of the faculty, and each student is admitted only with the approval of a particular professor. Applicants should indicate the proposed field of specialization at the time of application. With the concurrence of a new faculty advisor, students may, of course, later change their major professor.

The department normally provides full fellowship support for all admitted students including both tuition and a stipend. Students are encouraged to apply for external support if eligible.

Four-year B.A. - M.A. Program in History
The B.A. – M.A Program is an accelerated program that allows the undergraduate to complete a BA and an MA in history in four years. It is designed for students who demonstrate exceptional scholarly ability and assumes that the student will complete most other requirements for graduation by the end of the junior year. Minimum prerequisites for admission include a GPA of 3.8 or higher, completion of language requirements through the intermediate level by the end of the junior year, and the securing of a faculty sponsor in the department of history in advance of application. Students seeking admission into the BA-MA program shall submit a formal application to the regular graduate program in history, the application deadline is December 15 of the junior year.

The program of study during the senior year includes 6-7 credits of graduate reading and research seminars or independent study each semester, mastery of the scholarship in the student’s area of research concentration as demonstrated by the successful completion of a graduate field examination in that area of concentration; and, in lieu of the senior thesis, the completion of a major scholarly research essay equivalent in quality to those completed by first year graduate students in the regular doctoral program. For questions and further details about the program, contact Toby Ditz, Director of Undergraduate Studies, toby.ditz@jhu.edu, or Megan Zeller, mzeller4@jhu.edu, Graduate Coordinator, Department of History, who can also provide details about application procedures.

Five-year Barcelona B.A. - M.A. Program
Hopkins Barcelona
5-year BA/MA in World History Program
This program provides a select group of undergraduates the opportunity to pursue an integrated, consecutive 5-year dual-degree BA/MA between JHU and Universitat Pompeu Fabra (UPF) in Barcelona that will lead to the MA in world history from UPF. JHU students will spend either the fall or spring of their junior year at UPF, earning credits toward their UPF MA requirements. They will receive their Hopkins BA at the end of four years, and then pursue the UPF MA degree in their fifth year of study.

Further information is available through the Office of Study Abroad . View poster .

Requirements for the Ph.D. Degree
Students are required to have a reading knowledge of those foreign languages that are necessary for the satisfactory completion of their program of graduate study. Students in European history must have a reading knowledge of at least two languages, and students in medieval history must also have a reading knowledge of Latin. Students of Chinese history are expected to have reading knowledge of modern and classical Chinese and in most cases should also have reading knowledge of Japanese and/or a European language. Students in the Latin American area must have a reading knowledge of two of the following, depending upon their particular specialties: French, Spanish, Portuguese, or Dutch. In African history, students must have a reading knowledge of three languages including English and French. Depending upon their fields of specialization, students in African history may have other language needs. Students are expected to pass a written examination in one language within a month after entering the department, and they are required to do so before the end of the first year.

Each student is required to take a seminar under his/her major professor and to participate in at least one departmental seminar each semester.
The student's knowledge of four fields will be tested by written and oral examinations before the end of the second year of graduate study.

The student must write and defend a dissertation that is a major piece of historical research and interpretation based on primary sources and representing a contribution to historical knowledge. Its content, form, and style must be adequate to make it suitable for publication.

Normally, each student is required to perform some supervised teaching or research duties at some point during the graduate program, most often as a teaching fellow during the second and fourth years.

**Interdisciplinary Ph.D. Degree**

The departments of History and Anthropology offer an interdisciplinary doctoral degree. For details concerning this degree students should contact either department.

**M.A. Degree**

The master of arts degree is automatically awarded to each doctoral candidate following the passing of field examinations and the completion of the language requirements. In special circumstances, a student may be permitted to take an M.A. degree after one full year of graduate study. In such cases students will be required to demonstrate by examination an ability to read at least one foreign language, write a satisfactory research essay, and satisfy the director of their research that they have a mastery of the field of history that forms its background. The essay must be submitted to the Graduate Board.

For current faculty and contact information go to http://history.jhu.edu/people

**Faculty**

**Chair**

Michael A. Kwass
Department Chair: Early modern France.

**Professors**

Jeffrey Brooks
Director of Undergraduate Studies: Russian and Soviet history, with an emphasis on culture and society, the press, and popular culture.

Toby L. Ditz
Early American, Atlantic World, cultural history, history of women and gender.

Francois Furstenberg

Peter Jelavich
Modern European cultural and intellectual history.

Michael A. Kwass
Department Chair: Early modern France.

Pier M. Larson
African history with specialization in East Africa, Madagascar, the Indian Ocean, and the history of slavery and the slave trade in the Atlantic world.

John Marshall
Early modern Europe, with emphasis on British and intellectual history.

Gabrielle Spiegel
Krieger-Eisenhower Professor: medieval history, with special interest in historiography and linguistic analysis.

Ronald G. Walters
Social and cultural history of the United States with special interest in radicalism, reform, race, and popular culture.

**Associate Professors**

Angus Burgin
Director of Graduate Studies: 20th-century United States, political history, intellectual history, and the history of capitalism.

Nathan Connolly
Herbert Baxter Adams Associate Professor of History: Twentieth-century America, racism, capitalism, urban and suburban history, and African diaspora.

Pawel Maciejko
Early modern history, Jewish history, intellectual history, and East-Central Europe.

Kenneth Moss
Jewish history, modern Russian, and East European history.

**Assistant Professors**

Tamer el-Leithy
Social/cultural history of the medieval Middle East and Mediterranean, and history of religious difference.

Katie Hindmarsh-Watson
Modern Britain and the British Empire, urban space, gender and sexuality, and labor and technology.

Jessica Marie Johnson
Women, gender, and sexuality in the African diaspora, histories of slavery and the slave trade, and digital history and new media.

Hayang “Yumi” Kim
19th- and 20th-century Japan and Korea, medicine and religion, folk culture, colonialism, and history of women and gender.

Erin Rowe
Early modern Spanish monarchy, the Mediterranean, saints and sanctity, and women and gender.

Elizabeth Thornberry

East Asia, cultural and social history, race, gender, and nationalism in 20th-century Asia, the Cultural Revolution, contemporary Chinese popular culture, and urban life in China.

Philip D. Morgan
Harry C. Black professor: Early American history, with subsidiary interests in African-American history and the study of the Atlantic world.

Gabriel Paquette
Iberian history, colonial Latin America, and political and intellectual history.

William T. Rowe
John and Diane Cooke Professor of Chinese History: modern East Asia, especially socioeconomic, urban history.

Todd Shepard
20th-century France and the French Empire.
History of gender, sexuality, empire, and law in Southern Africa and across the continent.

**Senior Lecturer**
Laura Mason
French Revolution, democracy and violence, cultural history and media, history and film, and French film.

**Professors Emeriti**
Sara S. Berry
Robert Forster
Louis Galambos
Richard Goldthwaite
Jack P. Greene
Andrew W. Mellon Professor of the Humanities Emeritus.
Michael Johnson
Richard L. Kagan
Franklin W. Knight
Leonard and Helen R. Stulman Professor of History.
Vernon Lidtke
John G. A. Pocock
Harry C. Black Professor Emeritus.
Orest Ranum
Mary Ryan
Mack Walker
Willie Lee Rose
Dorothy Ross
Arthur O. Lovejoy Professor Emerita.
Nancy Struwever
Judith Walkowitz

For current course information and registration go to https://sis.jhu.edu/classes/

**Courses**

**AS.100.102. The Medieval World. 3.0 Credits.**
This course will explore selected topics in the political, economic, social, and intellectual history of Western Europe in the period between the fall of the Roman Empire and the thirteenth century. Special emphasis will be given to understanding the ways in which medieval society functioned as a pioneer civilization, compelled to reorganize itself after the almost total collapse of the ancient world, and to the interplay between material and cultural forces in the processes of social organization.
Instructor(s): G. Spiegel
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.100.103. Early Modern Europe & the Wider World. 3.0 Credits.**
This course surveys the history of Europe and its interactions with Africa, the Americas, and Asia during the early modern period (c. 1400-1800). Topics include: the Renaissance, the Reformation, International Relations and Warfare, Colonialism, the Enlightenment, and the Age of Revolutions.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.

**AS.100.104. Modern Europe and the Wider World. 3.0 Credits.**
European history since the French Revolution. Topics include: revolutions and democratization, industrialization, nationalism, imperialism, two World Wars, fascism, decolonization, Soviet communism, and formation of the European Union.
Instructor(s): T. Shepard
Area: Humanities, Social and Behavioral Sciences.

**AS.100.109. Making America: Slavery, Violence, and the Coming of the Civil War. 3.0 Credits.**
An examination of violence - primarily racial and political - in the decades between the American Revolution and Civil War (1789 to 1861).
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.100.110. Making America: Politics and Society since the Great Depression. 3.0 Credits.**
This course explores the interplay between economic growth and instability, diversity and conformity, war and protest, and liberalism and conservatism in modern American politics and society. Previously offered as AS.100.182, "The United States since 1929."
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences.

**AS.100.111. Making America: The History of Black Americans, I. 3.0 Credits.**
This course explores the history of African descended people in North America since the seventeenth century to the early twentieth century.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences.

**AS.100.112. Making America: Mastery & Freedom, 1609-1789. 3.0 Credits.**
Early America from the arrival of Europeans to the US constitution. Covers transatlantic empires and their rivalries; formation of Anglo-American settler societies based on slavery and patriarchal households; conflict with Native Americans; the revolutionary era and its tensions between republican principles of freedom and independence and persisting, even deepening, gender and racial inequalities.
Instructor(s): T. Ditz
Area: Humanities, Social and Behavioral Sciences.

**AS.100.113. Making America: Race, Radicalism, and Reform. 3.0 Credits.**
Beginning with the end of Reconstruction and continuing through the present day, this course will examine the complicated ways in which Americans attempted to come to terms with racial, ethnic, cultural, and other forms of diversity.
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences.

**AS.100.114. Making America: U.S. History in the Age of Atlantic Revolution. 3.0 Credits.**
Transnational approaches to U.S. history, c. 1760-1830, with a particular emphasis on the impact of the French and Haitian Revolutions.
Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences.
AS.100.117. History of Brazil. 3.0 Credits.
Instructor(s): G. Paquette
Area: Humanities.

AS.100.121. History of Africa to 1880. 3.0 Credits.
A history of Africa from human evolution to the mid-nineteenth century focusing on key themes in social, economic, and political history.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.122. Introduction to History of Africa (since 1880). 3.0 Credits.
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.123. Introduction to African History: Diversity, Mobility, Innovation. 3.0 Credits.
An introduction to African history with emphasis on diversity, mobility, and innovation. Considers both early and modern times.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.129. Introduction to Modern Jewish History. 3.0 Credits.
Jewish history 1750-present in Europe, the Near East, the US, Israel; the challenges of modernity and new forms of Jewish life and conflict from Enlightenment and emancipation, Hasidism, Reform and Orthodox Judaism to capitalism and socialism; empire, nationalism and Zionism; the Holocaust. Extensive attention to US Jewry and State of Israel.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.132. Introduction to Health, Healing, and Medicine in Africa. 3.0 Credits.
A freshman seminar introducing students to the history of health, healing, and forms of medical practice in Africa over the last two centuries.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.133. Undergraduate Seminar in History. 3.0 Credits.
The first semester of the two-semester sequence required for majors, this course introduces students to the theory and practice of history. Following a survey of approaches to the study of the past and an introduction to research methods, students undertake original research and write an extended essay. Intended for history majors and prospective majors.
Instructor(s): K. Hindmarch-Watson; W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.134. Undergraduate Seminar in History. 3.0 Credits.
The second semester of the two-semester sequence required for majors, this course further introduces students to the theory and practice of history. Students write an essay based on original research.
Prerequisites: AS.100.133
Instructor(s): M. Kwass; W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.201. Freshman Seminar: Prostitution in a Global Perspective, 1750-2012. 3.0 Credits.
This course examines topics such as the ‘medical model’ of prostitution regulation, the rise of international anti-prostitution, and the responses of modern nationalists to sex work in a global context.
Instructor(s): S. Stewart
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.202. Conflict and Co-Existence: The Early Modern Mediterranean. 3.0 Credits.
This course explores the dynamic and fluid world of the early modern Mediterranean (1453-1650), where Christians, Jews, and Muslims met, fought, traded with, and enslaved each other.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.203. Freshman Seminar: From Columbus to Calypso: The Caribbean and the Wider World. 3.0 Credits.
This course examines the history of the Caribbean and how five hundred years of colonization, slavery, piracy, rebellion, and revolution have shaped the politics and culture of the islands today.
Instructor(s): L. MacDonald
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.204. Freshman Seminar: Abraham Lincoln and his America. 3.0 Credits.
Freshman seminar that explores the life and times of Abraham Lincoln though contemporary sources and texts by historians.
Instructor(s): M. Johnson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.205. Freshman Seminar: Law, Society, and Power in America, 1500-1877. 3.0 Credits.
A freshman seminar introducing students to the history of law, governance, and social structures in America between the start of European settlement and the era of the Civil War. Topics will include Native American and European land claims, the regulation of family life, economic and commercial disputes, and the legal regimes of race and slavery. Throughout, we will consider both the aims of governing officials and how ordinary men and women maneuvered within the legal system. Freshman only.
Instructor(s): S. Damiano
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.206. Freshman Seminar: Law, Society, and Power in America, 1500-1877. 3.0 Credits.
This course examines the relationship between law, governance, and social structures in America between the start of European settlement and the era of the Civil War. Topics will include Native American and European land claims, the regulation of family life, economic and commercial disputes, and the legal regimes of race and slavery. Throughout, we will consider both the aims of governing officials and how ordinary men and women maneuvered within the legal system. Freshman only.
Instructor(s): S. Damiano
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.207. Freshman Seminar: Americans in Paris, 1787-1971. 3.0 Credits.
This freshman seminar focuses on the often life-changing experiences of American travelers and expatriates in Paris as a way of thinking about travel and what gives cities particular identities.
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.209. Fresh Sem: Mexico and the World from Cortés to Cartels. 3.0 Credits.
This introductory course examines Mexico's political, economic, and cultural role in global history from the time of Spanish conquest until the twenty-first century.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.210. Freshman Seminar: Real Pirates of the Caribbean. 3.0 Credits.
This freshman seminar explores the rise of economic crimes, including piracy, smuggling, and counterfeiting, in the 17th- and 18th-century British North America and Caribbean, and their portrayal in popular culture. Freshmen Only.
Instructor(s): K. Smoak
Area: Humanities, Social and Behavioral Sciences

AS.100.219. Chinese Cultural Revolution. 3.0 Credits.
The Chinese Cultural Revolution was Mao Zedong's last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revolution decade and since.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences

AS.100.220. Freshman Seminar: Politics, Information, and the State in Early Modern China and Japan. 3.0 Credits.
This introductory seminar examines culture and politics in early modern East Asia (ca. 1500-1900) by looking at changing modes of communication and attitudes about state control of information and ideology. Freshmen Only.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.221. Freshman Seminar: The Medieval City. 3.0 Credits.
This course focuses on the development and growth of medieval cities in western Europe. Students will explore the various functions of cities, uses of urban space, and challenges they faced.
Instructor(s): N. Daniels
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.223. History of Modern Germany. 3.0 Credits.
This course will offer a concise introduction to the political, social, and cultural history of Germany from the founding of the Empire in 1871 until the present.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences

AS.100.230. Bones, Blood, and Ecstasy: Religious Culture in Western Christendom, 1100-1700. 3.0 Credits.
Explores religious culture in medieval and early modern Europe, with an emphasis on spiritual beliefs and practices, relics, miracles, pilgrimage, and saint-making. Emphasis on reading and discussing written sources and visual culture.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.233. History of Modern Germany. 3.0 Credits.
This course will examine England under Tudor rule (including Henry VIII, Edward VI, Mary I, and Elizabeth I) and the intellectual and cultural movements of the Reformation and the Renaissance.
Instructor(s): J. Walker
Area: Humanities, Social and Behavioral Sciences

AS.100.234. The Making of the Muslim Middle East, 600-1100 A.D.. 3.0 Credits.
A survey of the major historical transformations of the region we now call the 'Middle East' (from late antiquity through the 11th century) in relation to the formation and development of Islam and various Muslim empires.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences

AS.100.235. Freshman Seminar: Politics, Society and Economics in the Renaissance. 3.0 Credits.
This course will focus on the long-distance trade of both foodstuffs and cloth in order to investigate urbanization and the development of national monarchies in western Europe from the outbreak of the Black Death (1347) to the eve of the Reformation (1517).
Instructor(s): H. Stein
Area: Humanities, Social and Behavioral Sciences
AS.100.236. Chinese Cultural Revolution. 3.0 Credits.
The Cultural Revolution was Mao Zedong’s last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revolution decade and since. Previously offered as AS.100.219.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.247. Remaking Gender in 20th Century America. 3.0 Credits.
The last century saw the radical transformation of the meaning of manhood and womanhood. We will trace these changes on multiple levels in public and private life.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.248. Japan in the World. 3.0 Credits.
This course is an introduction to Japan’s history from 1800 to the present with emphasis on the influences of an increasing global circulation of ideas and people. Topics include the emperor system, family and gender, imperialism, World War II, the postwar economy, and global J-pop.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

AS.100.249. Baltimore as Historical Site. 3.0 Credits.
The city of Baltimore will serve as a laboratory in which to study American History. We will explore the urban landscape on foot as well as through written sources.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences.

AS.100.251. From Columbus to Calypso: The Caribbean and the Wider World. 3.0 Credits.
This course examines the history of the Caribbean and how five hundred years of colonization, slavery, piracy, rebellion, and revolution have shaped the politics and culture of the islands today.
Instructor(s): L. MacDonald
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.252. Invisible Borders: Exchanges and Migrations in the Modern Mediterranean. 3.0 Credits.
This course explores the patterns of movement formed and transgressed by empire, trade, sex tourism, cultural exchange, war, and nationalism, starting from the nineteenth century to the present-day refugee crisis.
Instructor(s): S. Rahman
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.254. Modern Mexico from the Alamo to El Chapo. 3.0 Credits.
In this course we will use popular depictions of Mexico’s heroes and villains, tragedies and triumphs to delve into both the nation’s history and the importance of thinking historically.
Instructor(s): C. Lurtz
Area: Humanities, Social and Behavioral Sciences.

AS.100.255. The Haitian Revolution in World History. 3.0 Credits.
This introductory seminar examines the revolution that transformed the slave colony of Saint-Domingue into the first black republic and second independent nation in the Americas, and its repercussions around the world. Non-Majors welcome.
Instructor(s): N. Marvin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.256. Prostitution in a Global Perspective, 1750-2012. 3.0 Credits.
This course examines topics such as the ‘medical model’ of prostitution regulation, the rise of international anti-prostitution, and the responses of modern nationalists to sex work in a global context.
Instructor(s): S. Stewart
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.257. From Voice to Parchment: Media and Communication before the Printing Press, 800-1440. 3.0 Credits.
Epic traditions, call to Crusade, public curses, music of the troubadours: this course examines oral tradition and music—the “viral media” of pre-modern Europe—while tracing the impact of new recording technologies: early musical notation, manuscripts, and book production.
Instructor(s): J. Phillips
Area: Humanities, Social and Behavioral Sciences.
AS.100.265. The Medieval City. 3.0 Credits.
This course focuses on the development and growth of medieval cities in western Europe. Students will explore the various functions of cities, uses of urban space, and challenges they faced.
Instructor(s): N. Daniels
Area: Humanities, Social and Behavioral Sciences.

AS.100.279. Europe since 1945. 3.0 Credits.
This lecture course examines the political, social, and cultural history of postwar Europe with emphasis on the Cold War and the formation of the European Union.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.307. Latin American Independence. 3.0 Credits.
This seminar examines the breakdown of the Spanish and Portuguese empires and the emergence of new states in Latin America in the nineteenth century. Topics include: war, revolution, slavery, liberalism, and monarchism.
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.308. Introduction to the History of Jewish Mysticism. 3.0 Credits.
The course will familiarize the student with the history of the main phenomena of Jewish mysticism from the ancient times to the present.
Instructor(s): P. Maciejko
Area: Humanities, Social and Behavioral Sciences.

AS.100.309. American Social Thought since 1865. 3.0 Credits.
This course explores the intellectual development of the modern United States through readings in philosophy, literature, law, economics, politics, and social theory.
Prerequisites: Cannot enroll if you have taken AS.100.400, same course.
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.310. The French Revolution. 3.0 Credits.
Political, social and cultural history of one of the great turning-points in European history. Previously offered as AS.100.204.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.

AS.100.311. National Pastimes: Sports, Culture, and American History. 3.0 Credits.
National Pastimes examines the development of sports in the United States over the course of the 20th century with a particular interest in the relationship between sports and politics as well as issues of race, gender, sexuality and class.
Instructor(s): A. Davis
Area: Humanities, Social and Behavioral Sciences.

AS.100.314. The Enlightenment. 3.0 Credits.
This course examines the Enlightenment, an intellectual movement that swept Europe in the eighteenth century to shape the modern world.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.316. American Foreign Policy in the Age of Human Rights. 3.0 Credits.
American Foreign Policy in the Age of Human Rights examines competing narratives about the origins of modern international human rights, and explores how those narratives historically informed American foreign policy from the American Revolution up to the present, with an emphasis on the twentieth century.
Instructor(s): K. Sohasky
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.318. The Age of Revolutions. 3.0 Credits.
This seminar focuses on the political, social, and economic thought animating the revolutions which transformed Europe and the Americas, c. 1760 - 1850.
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.319. The Tudors: Reforming England 1485-1603. 3.0 Credits.
This course will examine Tudor England, including the reigns of Henry VIII, Edward VI, Mary I, and Elizabeth I, and the intellectual and cultural movements of the Reformation and the Renaissance.
Instructor(s): J. Keene
Area: Humanities, Social and Behavioral Sciences.

AS.100.320. Writing U.S. Empire. 3.0 Credits.
Attends to the composition and interpretive problems raised by studying the history of American imperialism, 1880s-1930s.
Instructor(s): N. Connolly
Writing Intensive.

AS.100.321. From Ferguson to Cape Town: The Global Black Freedom Struggle since Slavery. 3.0 Credits.
This seminar underscores the global and historical dimensions of the black freedom struggle through a series of case studies spanning North America, Africa and Latin America. Major themes addresses include race, diaspora, and movement(s) from slavery to the present.
Instructor(s): J. Levy
Area: Humanities, Social and Behavioral Sciences

AS.100.322. New World Encounters: Europeans, Natives, Africans. The Makings of Creole Society in Spanish America, 15th - 18th centuries. 3.0 Credits.
This course is designed to introduce students to the complex relationships that were established between the different cultures that inhabited colonial Latin America, from 1492 to the 18th century. Dean's Teaching Fellowship course.
Instructor(s): G. Garcia Montufar
Area: Humanities, Social and Behavioral Sciences.

AS.100.324. Dostoevsky's Russia. 3.0 Credits.
Dostoevsky and the culture of his era but also echoes of his ideas of Russia, religion, ethnicity, freedom, authority, and gender from 1917 until today. Short papers, quizzes.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.325. Images of War in the 20th Century. 3.0 Credits.
This course examines the changing face of war in photographs, propaganda posters, comics, and film from World War I to the "war on terror.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences.

AS.100.327. Gender and Sexuality in Reformation and Counter-Reformation Europe. 3.0 Credits.
This course will discuss the centrality of gender, sexuality, and gendered rhetoric to the genesis and development of the Protestant Reformation and Catholic Counter-Reformation in Europe.
Instructor(s): J. Keene
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.328. Caged America: Policing, Confinement, and Criminality in the "Land of the Free. 3.0 Credits.
This course focuses on the evolution of law enforcement practices, the history of federal and state prison systems, and the ways in which Americans have understood and reacted to crime.
Instructor(s): M. Shahan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.330. National Identity in 20th Century China & Japan. 3.0 Credits.
Using primary sources, including literature and film, we will explore the changing ways in which ideologues, intellectuals, and ordinary citizens defined national identity in 20th century China and Japan. Cross-listed with WGS and East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.333. Global Public Health Since World War II. 3.0 Credits.
Globalization has dramatically reshaped the world economy, providing great advantages to some but leaving poor nations to struggle with hunger, disease and death on a daily basis. This course explores the impact of globalization on public health in the developed and the developing nations since 1945. Cross-listed with Public Health Studies
Instructor(s): B. Morgan; L. Galambos
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.335. The American West. 3.0 Credits.
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.337. Historical Perspectives on Humans and Animals in the Atlantic World and the Early United States, 1500-1860. 3.0 Credits.
Relationships between humans and animals offer a fascinating window into the American past. Readings, written assignments, and discussions will explore environmental, cultural, and scientific approaches to the history of hunting, the domestication of animals and animal ethics in the Atlantic world and the early United States.
Instructor(s): C. Gherini
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.338. Displacement: A History of U.S. Cities from Urban Renewal to Gentrification. 3.0 Credits.
This course explores historical conflicts over urban planning and public health. Working with the Baltimore City Archives, we will piece together histories of Baltimore residents displaced by urban renewal and the social contexts in which they lived. Tours of Baltimore will consider whether recent strategies have addressed the legacies of racism and classism in urban development.
Instructor(s): M. Speller
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.340. Russian Imagination. 3.0 Credits.
Culture, Politics, and Society in Russia's great age of creativity, 1850s to 1950s.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.342. Colonial Lives: Individuals in the Atlantic World, 1600-1850. 3.0 Credits.
This course traces the emergence of an Atlantic world, 1600-1850, through the lens of biography. Major themes include European colonization, cross-cultural encounters, slavery and trade, imperial warfare, and political revolutions. Prior experience in an introductory history course strongly recommended.
Instructor(s): W. Brown
Area: Humanities, Social and Behavioral Sciences.

AS.100.343. Diaspora, Nation, Race, and Politics. 3.0 Credits.
For millions of people across the globe, political fate in the 20th century was defined at the intersection of diaspora, race, and nation — and this may be true in the 21st century as well. This course, a collaborative effort involving a historian and a political scientist, explores the parallels and divergences in the deployment of these terms in nationalist and transnational mobilization, literature and aesthetics, and group identity formation in Eastern Europe, Africa and the New World of the Americas. Set against the backdrop of the fall of significant empires in the late 19th and early 20th centuries, we will explore themes of migration, human rights, the nation-state system, and racism through history, political sociology, and political and social theory. We will pay particular attention to the theoretically exemplary Jewish and Black experiences of diaspora, race, and nation, engaging both with how those experiences were specially shaped by the imposition of national and racial logics and with Black and Jewish politics and thought in relation to those categories. Readings include Max Weber, W. E. B. Du Bois, Booker T. Washington, Theodor Herzl, Hannah Arendt, Benedict Anderson, Rogers Brubaker, Andrew Zimmerman, Michele Mitchell, David Scott.
Instructor(s): K. Moss; M. Hanchard
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.344. The Holocaust. 3.0 Credits.
This course expands the knowledge of the Holocaust by including experiences of Eastern European Jewry and by discussing recent historiographic debates in the field such as ‘ordinary men’, perpetrators, and collaboration. Prior experience in an introductory European history or Jewish studies course strongly recommended.
Instructor(s): L. Tchernyshyov
Area: Humanities, Social and Behavioral Sciences.

AS.100.345. Religion, Secularity, and Nationhood in Modern Jewish Identity Politics. 3.0 Credits.
How have ethnonational, religious, and secular forms of self-definition played out in Jewish life over the past hundred years, and what sorts of relationships are taking shape between them now? Particular foci include: religious revival in Israel and the fate of Zionism’s ostensibly secular nationalist project in comparative perspective (Ravitzky, Walzer, Friedland); the surprising flourishing of kabbalistic/mystical thought in contemporary Jewish life (Garb); varieties of secular and religious visions of Jewish collective identity (Ohana, Lustick); new and resurgent forms of Judaism in the US; religion and gender (Fader), among other topics. Time at end of semester for independent reading and research.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.346. Soviet-American Cold War. 3.0 Credits.
The focus will be on Soviet-American interactions, Cold-War Cultures, and the impact on both societies.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.347. Early Modern China. 3.0 Credits.
The history of China from the 16th to the late 19th centuries.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.348. 20th-Century China. 3.0 Credits.
The history of China from the last years of the Qing Empire to the post-Mao reforms.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.350. Capital before Capitalism: Economic Debates in the British Empire, 1600-1800. 3.0 Credits.
This course explores the events, ideas, and debates that shaped economic thought in early modern Britain and its empire before the advent of Capitalism.
Instructor(s): C. Consolino
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.351. God, Self, Nation and Revolution in East European Jewish Life and Thought, 1860-1939. 3.0 Credits.
The divided Jewish community of modern Eastern Europe defined many of the key modern forms of Jewish identity, politics, culture, and religion and forged bewildering array of syntheses, hybrids, and even negations of Jewishness in relation to the unprecedented political, cultural, and social dilemmas of life in Eastern Europe. Focus on key texts of Jewish religious and secular thought created in Imperial Russia and interwar Poland.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.352. Age Of Pasternak. 3.0 Credits.
This course concerns Russian literature and the arts, including ballet, from the 1910s to the 1950s. Two short papers, journals, two quizzes, and no midterm or final.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.353. Youth and Youth Movements during 20th Century: Germany, Britain, and the U.S. 3.0 Credits.
Through texts, music, and films, this course examines the rise of "youth" as a social and cultural category in a variety of forms, ranging from spontaneous (such as Rock’n’Roll and Techno) to state-organized (Hitler Youth).
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.354. History of Israel, 1948-1970. 3.0 Credits.
The political, social, and culture history of the State of Israel and its inhabitants during its pivotal first two decades, as reconstructed in recent historiography.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.355. Islam between History and Anthropology. 3.0 Credits.
Co-taught by an anthropologist and a historian, this course will explore recent scholarly debates about—and critiques of—the representations of Islam and Muslim societies.
Instructor(s): N. Khan; T. Shepard
Area: Humanities, Social and Behavioral Sciences Writing Intensive.
AS.100.357. Panic and Liberation: The Politics of Sex in 20th Century Europe. 3.0 Credits.
This course examines the 20th century history of sexual attitudes, desires, behaviors, identities, communities, and movements in Western Europe (most notably, Germany, France, and the United Kingdom).
Instructor(s): T. Shepard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.358. Black Code Studies: Black History and Digital Media. 3.0 Credits.
This course explores doing histories of people of African descent in an age of digital and social media. The focus will be on African-descended communities in the United States, but content will range across time space. Examples include: West African digital art communities; the use of slave trade databases to write Caribbean history; and the use of social media in social justice organizing from Paris to Baltimore. Students will explore questions of blackness, race, ethnicity, sex and sexuality, violence and justice while creating digital content using platforms like Wordpress, Omeka, Twitter, and Tumblr. Students will be evaluated on their acquisition of African American and Afro-Diasporic history; their knowledge of digital and social media platforms; and their ability to creatively and accurately relate the histories of blackness and black people to their representation and discussion online.
Instructor(s): J. Johnson
Area: Humanities, Social and Behavioral Sciences.

AS.100.360. The Modern British World: Imperial Encounters, Regimes, and Resistance, from the American Revolution to the present. 3.0 Credits.
The Modern British World introduces some of the major events, themes, and controversies that led to Britain's global dominance and ultimate decline as an imperial power. This course focuses on varying forms of imperial governance, the interrelationships between metropole and colony, and the formation of British and colonial national identities.
Instructor(s): K. Hindmarch-Watson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.361. Age of Tolstoy. 3.0 Credits.
Tolstoy and his era, 1820s to 1910s. Topics include state and politics, empire, the Russian identity, and forms of cultural expression. Students consider "War and Peace" and other masterworks.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.362. Children and Childhood in the Middle Ages. 3.0 Credits.
Seminar on the history of childhood and ideas of childhood around the medieval Mediterranean; themes include child custody; medieval education and punishment; parent-child private letters; child mortality and the arts of bereavement/consolation. Cross-listed with Program in Islamic Studies.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.363. The Development of the Sabbatian Movement. 3.0 Credits.
This course examines the development of Sabbatianism, the most important messianic movement in the history of Judaism. We shall discuss the messianic claims of Sabbatai Tsevi, the spread of religious fervor among the Jews of Middle East, Europe, and North Africa, rabbinic opposition to the movement, and shall compare it to similar phenomena in Islam and Christianity. Special attention will be paid to reading of primary Sabbatian sources in English translation.
Instructor(s): P. Maciejko
Area: Humanities, Social and Behavioral Sciences.

AS.100.365. Culture & Society in the High Middle Ages. 3.0 Credits.
This course will treat the flourishing of culture and society in the High Middle Ages (11-14th centuries). Topics covered include the emergence of feudal society and literature, the economic, social and cultural revival of Europe in the 11th and 12th centuries, the Renaissance of the twelfth century and the growth of scholasticism and the University, and the development of feudal monarchies in England and France.
Instructor(s): G. Spiegel
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.366. History of Colombia 1800-present. 3.0 Credits.
This seminar examines the key moments in the history of Colombia from its independence in 1810 and the construction of a Liberal Republic. The course will concentrate on the crucial political events that have defined Colombia up until the present.
Instructor(s): E. Vargas
Area: Humanities, Social and Behavioral Sciences.

AS.100.367. Sex and Society in Early Modern Europe. 3.0 Credits.
This course will examine how early modern views on the body, gender, and sexuality shaped beliefs about the abilities and rights of women and men.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.374. Conquest, Conversion, and Language Change in the Middle Ages. 3.0 Credits.
Examines cases of imperial conquest and attendant religious transformation (Christianization; Islamization) and language change in the medieval Mediterranean (Europe and Middle East), e.g. transition from Latin to vernacular languages in Europe; Arabization; translation movements.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.379. Age of Religious Wars: Reformation Europe, 1500-1650. 3.0 Credits.
Offers an in-depth examination of a volatile time in European history, when the rupture of unity in the Christian Church led to wide scale political upheaval, violence, rioting, and persecution.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.380. In Turner's Footsteps: History and Historiography of the American Frontier. 3.0 Credits.
This course explores the intellectual world of Hopkins graduate Frederick Jackson Turner, reading the scholarship of his day alongside more recent work on Native Americans, settlers, geography and politics in early America.
Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.381. Religion, Medicine, and the Mind in Japan. 3.0 Credits.
This seminar explores the relationship between religion and medicine in treating disorders of the mind and soul throughout Japanese history. We will consider such topics as animal spirit possession, Buddhism, family-based care, psychotherapy, gender, and social withdrawal.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.382. Early Modern African Atlantic. 3.0 Credits.
This course examines the history of West and Central Africa and its diasporic people and cultures during the early modern period (c. 1400-1750) in disparate parts of the Atlantic world, including Europe, Latin America, the Caribbean, and Anglo-America. Themes include: West and Central African political and religious cultures; trans-Atlantic slavery; African Christianity; and the question of cultural survivals.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.383. Conversion and Apostasy in the Middle Ages. 3.0 Credits.
Compares religious transformation in medieval Europe and the Middle East (ca. 600-1500), including conquest and conversion; conversion narratives; apostasy, martyrdom and other encounters between medieval Jews, Christians, and Muslims.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.385. Mobility and Encounter in the Medieval Indian Ocean. 3.0 Credits.
This seminar discusses forms of mobility and exchange- trade and travel, conquest and religious transformation, diasporas and migration, the spread of practices and technologies- across the Indian Ocean from the 8th to 16th centuries.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.387. Everyday Life in the Medieval Middle East. 3.0 Credits.
In this seminar, students will explore the daily lives of non-elites in medieval Egypt (i.e. average folk, not kings in palaces)—including their food and cooking; clothes (and government edicts regulating fashion); the houses they inhabited; their marriage patterns, divorce rates, and child custody battles; and the burden of taxes on the working poor (e.g. urban craftsmen). We will examine and discuss artifacts and documents, including surviving hats (stuffed with recycled documents), private letters, marriage contracts (and the clauses women inserted into them), petitions for charity, and court records.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.388. European Intellectual History from Adam Smith To Nietzsche. 3.0 Credits.
A survey of major thinkers who supported or opposed capitalism and democracy.
Instructor(s): P. Jelavich
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.396. Landscapes of the American South: Slavery, Law, and Culture, 1770-1900. 3.0 Credits.
Focusing on the legal and social history of the American South, this course attempts to answer how national identity was complicated by questions concerning race and slavery from the founding forward. Dean's Teaching Fellowship course.
Instructor(s): S. Cerato
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.397. U.S. Histories Male and Female. 3.0 Credits.
This seminar will be devoted to exploring gender differences as they have been expressed in a sequence of autobiographies and autobiographical fiction set in a shifting social and historical context.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.398. Images of Postwar Japan. 3.0 Credits.
This seminar explores Japan's changing place in the world in the decades following World War II, with an emphasis on analyzing visual media such as photographs, films, advertisements, and comic books. Topics include relations with the U.S. and other countries in East Asia, particularly the two Koreas; the atomic bombings of Hiroshima and Nagasaki; and the global contexts for an expanding Japanese consumerism in the late 20th century.
Instructor(s): H. Kim.

AS.100.399. Decolonization and Citizenship in Africa, 1945-2015. 3.0 Credits.
Critically explores issues of decolonization and citizenship in Africa from WWII to the present. Emphasis on political inclusion and exclusion, and violence, fostered by nationalist movements and postcolonial African governments.
Instructor(s): P. Larson
Area: Humanities
Writing Intensive.

AS.100.403. Law & Custom in Colonial Africa. 3.0 Credits.
Examines how colonial rule transformed African legal systems, while Africans used European law for political resistance and personal gain. Research project based on colonial South African court records.
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences.
AS.100.404. John Locke. 3.0 Credits.
Seminar style course in which John Locke's major works will be read intensively, together with some of his contemporaries' works, and select scholarly interpretations.
Instructor(s): J. Marshall
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.405. European Socialist Thought. 3.0 Credits.
Examination of socialist, social-democratic, communist, and anarchist theorists, including Proudhon, Marx, Engels, Bakunin, Bernstein, Lenin, Luxemburg, and Sorel.
Instructor(s): P. Jelavich
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.406. American Business in the Age of the Modern Corporation. 3.0 Credits.
This course will focus on business organizations, their performance, and sociopolitical relations in the 20th century. Each of the students will be expected to reach conclusions about that history and will be required to sharpen those conclusions by writing three, interrelated essays.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.409. Fascism: History and Interpretation. 3.0 Credits.
This course investigates the history and historiography of fascism, with emphases on definitions of fascism and on fascist political culture in a comparative framework. AS.100.104 recommended but not required. Dean's Teaching Fellowship course.
Instructor(s): A. Bisno
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.410. Subversive Humor in US and Modern Europe. 3.0 Credits.
Varieties of subversive laughter in historical context: 1850s through 1970s in fiction, cartoons, comics, children's literature, and art. Also open to graduate students.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.411. Readings in the History of Public Health in the 20th and 21st Centuries. 3.0 Credits.
The students will read major and some minor works in the history of global public health and will each develop their own concept of how and why the major institutions, professions, and practices associated with public health have evolved over the past long century. To help the students focus on their ideas, they will write three essays on particular aspects of the history.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.412. Jewish History in British Mandatory Palestine 1917-1947. 3.0 Credits.
Recent historical writing on Jewish politics, culture, and society in British Mandatory Palestine, 1917-1947. Significant attention will also be paid to work on Palestinian Arab society and politics and to Jewish-Arab-British relations.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.413. London 1580-1830: The History of Britain's capital city. 3.0 Credits.
Seminar-style class analyzing the social, cultural, gender, religious, economic, and political history of London from Shakespeare's time through revolutions, plague, fire, and commercial, colonial, and industrial expansion.
Instructor(s): J. Marshall
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.414. Love, Death, and the Afterlife in the Medieval West. 3.0 Credits.
Romantic love, it is often claimed, is an invention of the High Middle Ages. The vocabulary of sexual desire that is still current in the twenty-first century was authored in the twelfth and thirteenth, by troubadours, court poets, writers like Dante, even by crusaders returning from the eastern Mediterranean. How did this devout society come to elevate the experience of sensual love? This seminar draws on primary sources such as medieval songs, folktales, the "epic rap battles" of the thirteenth century, along with the writings of Boccaccio, Saint Augustine and others, to understand the unexpected connections between love, death, and the afterlife from late antiquity to the fourteenth century. Requirements include short weekly written responses, active participation in seminar discussions, and a longer final essay.
Instructor(s): J. Phillips
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.415. Papyrus, Parchment, and Paper. 3.0 Credits.
The diffusion of writing technologies before the industrial age, especially around the Mediterranean; the preservation of lightweight, portable texts; modern discoveries (Oxyrhynchus, Dead Sea Scrolls, Nag Hammadi, Cairo Geniza).
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.416. Urban Space and City People. 3.0 Credits.
Readings and research in urban history focused on the United States since the 18th century with special attention to gender and race.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.417. Capitalism, Socialism, and Democracy. 3.0 Credits.
This course explores the ideas of Joseph A. Schumpeter, the father of entrepreneurial studies. Each student will develop a perspective on the history of capitalism and socialism.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.420. George Washington and his World. 3.0 Credits.
This research-intensive course explores eighteenth-century America through George Washington's papers. Although Washington is not the most representative person, he is an exceptionally well-documented one; we use his papers to focus on life in Virginia, North America, and the Atlantic World. Workshop-style research and writing prepare students for the craft of history.
Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.422. Society & Social Change in 18th Century China. 3.0 Credits.
What did Chinese local society look like under the Qing Empire, and how did it change over the early modern era?
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.424. Women & Modern Chinese History. 3.0 Credits.
This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women's experiences for their own political and social agendas. Cross-listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.425. Early Medieval Europe: West and East. 3.0 Credits.
An exploration of Modern African history through the African historical novel.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.426. Popular Culture in Early Modern Europe. 3.0 Credits.
Witchcraft, magic, carnivals, riots, folk tales, gender roles; fertility cults and violence especially in Britain, Germany, France, and Italy.
Instructor(s): J. Marshall
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.427. Late Imperial China: History and Fantasy. 3.0 Credits.
Students in this seminar will look at the ways in which Chinese and Western scholars, novelists, film-makers, and artists have represented China's Late Imperial period. We will look at the way foreigners have imagined China, and the ways in which Chinese writers past and present have fancifully, nostalgically, and inventively rendered their personal and national pasts. The course will explore issues of historical, geographical, and literary imagination. Cross-listed with East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.437. Late Imperial China: History and Fantasy. 3.0 Credits.
Reading and discussion of works in Western languages on the role of cities in Chinese society, from the Tang dynasty (628-906 A.D.) to the present.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.439. Cuban Revolution and the Contemporary Caribbean. 3.0 Credits.
A lecture course dealing with the development of the Cuban Revolution and the tortuous history of the Caribbean during the 19th and 20th centuries.
Instructor(s): F. Knight
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.442. The Intellectual History of Capitalism, 1900 to present. 3.0 Credits.
This course examines shifting understandings of the philosophical foundations, political implications, and social effects of the market economy since the early twentieth century.
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.445. African Fiction as History. 3.0 Credits.
An exploration of Modern African history through the African historical novel.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.447. Christian-Jewish Polemics in the Middle Ages and the Construction of the Enemy. 3.0 Credits.
The four great public Christian-Jewish disputations of the high middle ages: Paris, Barcelona, Majorca, Tortosa. Original Hebrew and Latin sources in English translation; questions of the changing motives for anti-Judaism and the formation of a persecuting society.
Instructor(s): P. Capelli
Area: Humanities, Social and Behavioral Sciences.

AS.100.448. The Early Caribbean and the Atlantic World Seminar. 3.0 Credits.
The Caribbean was the key focal point of overseas European expansion in the early modern world. Its centrality, importance, and significance will be explored.
Instructor(s): P. Morgan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.494. Senior Honors Seminar. 1.0 Credit.
A two-semester coordinating seminar for history majors writing senior honors theses. Admission is granted by instructor only after the student has selected a faculty thesis advisor. AS.100.494 is to be taken concurrently with AS.100.507 Senior Thesis.
Prerequisites: AS.100.494 is to be taken concurrently with AS.100.507 Senior Thesis.
Instructor(s): J. Brooks
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.495. Senior Honors Seminar. 1.0 Credit.
The Senior Honors Seminar is a coordinating seminar for senior history majors who are writing senior honors theses and wish to graduate with departmental honors. To be taken concurrently with AS.100.508, Senior Thesis.
Corequisites: Co-requisite: AS.100.508
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.497. Year of Revolt: 1968 in Europe. 3.0 Credits.
This course will examine the dramatic events of 1968 in Western and Eastern Europe during 1968—a year of social and political revolts, generational conflicts, and cultural activism—as well as their long-term consequences.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.498. History of the Family & Gender in the United States. 3.0 Credits.
Topics include: history of emotions; politics of sexuality and marriage; impact of race, ethnicity, and class on family life; women and gender inequality. Primarily colonial era through the early twentieth century, with some attention to contemporary politics of family, gender, and sexuality.
Instructor(s): T. Ditz
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.499. Film and Propaganda in Nazi Germany. 3.0 Credits.
By examining a range of cinematic works—from explicitly ideological pseudo-documentaries to entertainment films—this course will explore the transmission of propaganda into the everyday culture of Nazi Germany.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.501. Internship. 1.0 Credit.
Instructor(s): J. Brooks; M. Johnson; T. Shepard.

AS.100.502. Internship. 1.0 Credit.
Instructor(s): Staff.

AS.100.507. Senior Thesis. 3.0 Credits.
Two semesters. Senior thesis writers will undertake research in primary materials that will explore a significant historical issue or problem. The DUS (Burgin) will confirm admission as soon as the student has selected a faculty thesis advisor; the outside deadline for confirmation is May 1.
AS.100.507 is to be taken concurrently with AS.100.494 Senior Honors Seminar.
Instructor(s): J. Brooks
Writing Intensive.

AS.100.508. Senior Thesis. 3.0 Credits.
This seminar is required for senior history majors who are writing senior honors theses and wish to graduate with departmental honors.
Prerequisites: Pre-requisite: AS.100.507
Instructor(s): A. Burgin; S. Berry
Writing Intensive.

AS.100.535. Independent Study. 1.0 - 3.0 Credits.
Instructor(s): Staff.

AS.100.536. Independent Study. 1.0 - 3.0 Credits.
Instructor(s): Staff
Writing Intensive.

AS.100.594. Internship - Summer. 1.0 Credit.
Instructor(s): A. Burgin; E. Rowe; K. Moss; M. Ryan.

AS.100.599. Independent Study. 3.0 Credits.
Instructor(s): G. Paquette; H. Balz; K. Moss.

AS.100.602. The French Revolution.
This seminar introduces graduate students to the rich historiography of the French Revolution. Topics include: revolutionary origins, political culture and radicalization, friendship and emotion, family and gender, the search for stability after the Terror, Napoleon's Brumaire coup.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.

Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences.

AS.100.604. Readings in the Early U.S. Republic/Nineteenth Century.
Readings in the Early U.S. Republic/Nineteenth Century
Instructor(s): F. Furstenberg.

AS.100.605. Modern Britain & the British Empire.
This is a graduate reading seminar covering Modern Britain and the British Empire, with particular focus on urban space, labor, gender, and comparing political ideologies.
Instructor(s): K. Hindmarch-Watson
Area: Humanities, Social and Behavioral Sciences.

AS.100.606. South African History and Historiography.
Reading seminar in the history and historiography of South Africa from the late precolonial period through the present.
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences.

AS.100.607. Consumer Revolution in Global Perspective.
First semester of year-long seminar examining transformations in European consumption from 1650 to 1800. Topics include cultural theory; fashion, gender, and social identity; capitalism, retail, and credit; Enlightenment and the public sphere; political economy; overseas empire; globalization; and the Atlantic revolutions.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.

AS.100.608. The Consumer Revolution in Global Perspective.
Examines the transformations in European consumption from 1650 to 1800 in a global perspective. Topics include gender, social status, credit, commerce, political economy, empire, and revolution.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.
AS.100.611. Kabbalah and the Enlightenment: Reading 'The Manuscript Found in Saragossa.'
The course will discuss the European Enlightenment's attitude to the Jewish esoteric lore. As a lens to discuss this topic, we shall use Jan Potocki's novel "The Manuscript Found in Saragossa". Instructor(s): P. Maciejko
Area: Humanities, Social and Behavioral Sciences.

AS.100.612. Everyday Life in Medieval Cairo.
Introduction to sources and methods available to social historians of the medieval Middle East, including close readings of documents (private letters, legal deeds, etc.) and discussing their production and survival. Grad Students only.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

A reading seminar on the interconnected histories and historiographies of Japan and Korea in the nineteenth and twentieth centuries. Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

AS.100.614. Seminar in Modern Chinese History.
A seminar covering major milestones in research on late imperial and modern Chinese history, primarily in English. Open to undergraduates with the permission of the instructor. Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.615. States, Scribes, and Archives: Medieval Arabic Documentary Cultures.
A historical survey of the bureaucratic practices of medieval Islamic states (in comparative perspective); includes close readings of primary official documents, e.g. petitions, edicts, fiscal receipts, and administrative reports. Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.617. Space, Place, and History.
A workshop on the spatial dimension of modern history. Readings will include monographs, some theoretical readings, and student research, mostly focused on the Americas with some comparison with Western Europe. Open to undergraduate juniors and seniors.
Instructor(s): M. Ryan
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.619. Early Modern France.
Second semester of year-long reading seminar on French history from Louis XIV to the French Revolution. Topics include: absolutism, the Enlightenment, gender and sociability, consumption and trade, the French empire, the French Atlantic, the French Revolution, and the Haitian Revolution.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.

AS.100.620. Early Modern France.
A readings seminar on French history from Louis XIV to the French Revolution. Topics include: absolutism, political culture, the Enlightenment, production and consumption, the French Atlantic, and the French Revolution.
Instructor(s): M. Kwass
Area: Humanities, Social and Behavioral Sciences.

AS.100.624. How to Be a Disciple of the Sages: Norms of Behavior, Ethics and Etiquette in Early Rabbinic Literature.
Moral instruction in early rabbinic literature (Pirqe Aboth, Aboth de-Rabbi Nathan, Derekh Eretz Rabbah and Zuta, Pereq ha-Shalom) is a very revealing example of the composite character of rabbinic Judaism, its manifold, not only Biblical roots, and its intense osmosis of neighboring traditions: Hellenistic and Roman philosophies, early Christian and Islamic doctrines, rules and handbooks of manners from medieval European monasteries and courts. This seminar will investigate the classical sources of Jewish morals in both Jewish and non-Jewish texts. Instructor(s): P. Capelli
Area: Humanities, Social and Behavioral Sciences.

AS.100.630. Modern European Imperialism and the History of Sex and Sexuality.
This reading seminar will explore how the history of sexuality has shaped recent historiographies of European empires.
Instructor(s): T. Shepard.

AS.100.631. Ibero-Atlantic History.
A reading seminar on the history and historiography of the Portuguese and Spanish empires c. 1600-1900.
Instructor(s): G. Paquette
Area: Humanities.

AS.100.633. Spain and its Empire.
This graduate seminar will explore the historiography of Spain and its empire, 1480-1700.
Instructor(s): E. Rowe.

AS.100.635. Topics in European Imperial History.
This graduate reading course covers key topics in European Imperial History, c. 1600-1900.
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.639. Topics in the History and Sociology of Nationalism.
Advanced topics in the history and sociology of nationalism, with special attention to questions of childhood and education in the age of the nation-state; memory and memory-conflicts; nation and European overseas empire. Open to undergraduates with permission of instructor.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.640. Approaches to a Visual History of War in the 20th Century.
The course will examine theoretical aspects of visual history, as well as analyze depictions of war and their propagandistic, aesthetic, and allegorical dimensions from World War I to the present.
Instructor(s): H. Balz
Area: Humanities, Social and Behavioral Sciences.

AS.100.641. Global Catholicism in the Early Modern Period.
Explores religious culture in medieval and early modern Europe, with an emphasis on spiritual beliefs and practices, relics, miracles, pilgrimage, and saint-making. Emphasis on reading and discussing written sources and visual culture. Graduate students only.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.
AS.100.643. Jewish Paths Through Modernity.
Intensive introduction to the key trends and trajectories in modern Jewish history and the major themes in Jewish historiography. Intended to serve both graduate students outside the Jewish history field and students beginning the graduate study of modern Jewish history. Open to undergraduate seniors with the permission of the instructor.
Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.644. Approaches to Brazilian History.
A reading seminar on the history and historiography of Brazil (colonial and national periods). Open to undergraduates with the permission of the instructor.
Instructor(s): G. Paquette
Area: Humanities, Social and Behavioral Sciences.

AS.100.646. Marvels and Wonder in medieval Arabic Culture.
Explores the concept of marvels in different genres of medieval Arabic culture: Qur’anic exegesis; travel literature; ‘ethnography’; cosmography and geography; marvels of the natural world (e.g. hermaphrodites); Muslim views of pre-Islamic (‘pagan’) monuments.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences.

AS.100.650. The American South.
Instructor(s): M. Johnson.

AS.100.651. Readings in Urban and Suburban America: The Twentieth Century.
Introduces students to intellectual trends shaping historical treatments of urban and suburban life in twentieth-century America.
Instructor(s): N. Connolly.

AS.100.661. Racial Literacy in the Archives.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences.

AS.100.666. Topics in Modern Jewish History.
Intensive readings in historiography of modern Jewry, with particular focus on Jewish life in 19th - 20th century Palestine and the State of Israel. Recommended Course Background: AS.100.668
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.670. Directed Readings in the Cultural History of British America and the Early United States.
Reading Seminar focusing on modes of interpretation associated with cultural history. Ordinarily a continuation of AS.100.669 (fall), but other interested graduate students may register with instructor’s permission.
Co-taught by Francois Furstenberg.
Instructor(s): T. Ditz.

AS.100.680. Reading Seminar in Atlantic History 1600-1800.
This reading seminar will highlight some of the major new works and wide-ranging genres in this lively, stimulating field.
Instructor(s): P. Morgan; T. Ditz.

AS.100.681. Research Seminar in Atlantic History, 1600-1800.
Continuation of AS.100.680
Instructor(s): F. Furstenberg
Area: Humanities, Social and Behavioral Sciences.

AS.100.684. Research Seminar in the Atlantic World, 1500-1810.
This seminar selectively explores the emergence and subsequent growth of the Atlantic basin as a site for exchange among and within the continents of Europe, Africa, and the Americas in the early modern era.
Instructor(s): F. Furstenberg.

AS.100.685. Reading Seminar in Atlantic History.
Instructor(s): P. Morgan
Area: Humanities, Social and Behavioral Sciences.

AS.100.687. American Economic History.
Instructor(s): L. Galambos.

AS.100.695. Problems in U.S. Social & Cultural History.
This is a seminar reading widely in U.S. social and cultural history, ranging chronologically this semester from the mid-18th century to the late 19th century.
Instructor(s): R. Walters.

AS.100.696. Problems in American Society and Culture.
An intensive graduate seminar exploring various topics in US social and cultural history, focusing on the period from the late 19th century to the late 20th century.
Instructor(s): R. Walters.

AS.100.699. Neoliberalism.
Readings on the history, theory, and politics of neoliberalism, from midcentury to the present.
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences.

AS.100.700. American Intellectual History.
Readings in late nineteenth- and twentieth-century American social theory and historical works on related themes.
Instructor(s): A. Burgin.

AS.100.702. European Empires in the Indian Ocean.
A reading overview of Portuguese, Dutch, English and French empire in the Indian Ocean.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences.

AS.100.703. Nationhood and Nationalism: theory, historiography, sociologies.
Theories, historiographies, and sociologies of nationhood and nationalism. Nationhood as institutional form, practical category, and site of contestation. Nationalisms and nationalist movements, nation-states and nationalizing states, borderlands, memory struggles. The subjectivities generated by nationalism and national conflict, including forms of national minorityhood. Recent work on national indifference, nation and empire, nation and religion, and supranationalisms and internationalisms.
Instructor(s): K. Moss
Area: Humanities, Social and Behavioral Sciences.

AS.100.704. Sex and the City.
Instructor(s): J. Walkowitz; M. Ryan.

AS.100.705. Decolonization and the "Global North.
This course explores how the mid-20th-century phenomenon often named “decolonization” shaped developments in Europe (including the Soviet Union), the USA, and Canada.
Instructor(s): T. Shepard.

AS.100.707. Sex and the City.
Continuation of AS.100.704. Graduate students only.
Instructor(s): J. Walkowitz; M. Ryan
Area: Humanities, Social and Behavioral Sciences.
AS.100.709. Modern Latin America.
This course will examine selected themes in Modern Latin American history such as legacies of the colonial administrations, the plural societies, political cultures, slavery, and other forms of servitude; religious impact, independence movements, globalization and narco trafficking. Reading knowledge of Spanish required. Reading knowledge of Spanish required.
Graduate Students only
Instructor(s): F. Knight.

AS.100.716. Cultural Theory For Historians.
An examination of modern cultural theories, with emphasis on mass culture and consumerism. Authors include Simmel, Kracauer, Benjamin, Horkheimer, Adorno, Habermas, Barthes, Debord, Baudrillard, Bourdieu, de Certeau, and Lyotard.
Instructor(s): P. Jelavich.

AS.100.719. Transnational Approaches to U.S. History.
Readings on American history in a transnational context since the nineteenth century.
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences.

AS.100.721. Topics In African History.
Critical readings on selected themes in African history and historiography.
Instructor(s): S. Berry.

AS.100.723. Seminar in Mediterranean History: The Fatimids as a Medieval Empire.
The Fatimids have generally been studied as a local Egyptian power or else as competitors to the Abbasids. Yet the dynasty sat astride the lucrative Mediterranean and Indian Ocean trade routes, and its court and capital cities inspired imitators in Umayyad Cordoba and Norman Sicily. This seminar will focus on primary sources from the tenth through fifteenth centuries in Arabic and other languages as well as modern scholarship.
Instructor(s): M. Rustow.

AS.100.728. Historical Writing in the Middle Ages.
The course will begin with readings of literary and critical theory, as a preparation for the study of modes of historical writing in the Middle Ages. We will then read a sampling of medieval historiographical texts, beginning with Eusebius.
Instructor(s): G. Spiegel.

AS.100.729. Reading Seminar: British America and the Early United States in Atlantic Perspective.
Readings in a wide spectrum of approaches to the history of the Atlantic World, British America, and the early United States up to the Civil War.
Instructor(s): F. Furstenberg; T. Ditz.

AS.100.730. Reading Seminar: British America and the Early United States in Atlantic Perspective.
Instructor(s): F. Furstenberg.

Reading seminar on most recent research on French colonial Africa.
Instructor(s): P. Larson.

AS.100.732. Urban Space and City People.
Readings and research in urban history focused on the United States since the 18th century with special attention to gender and race.
Instructor(s): M. Ryan.

AS.100.733. Reading Qing Documents.
Open to advanced undergraduates with at least one semester of Classical Chinese. This course has several objectives. First and foremost, it is a hands-on document reading class designed to familiarize students with the skills, sources, and reference materials necessary to conduct research in Qing history. To that end, we will spend much of our time reading documents. At the same time, we will engage in problem solving exercises designed to develop and enhance basic research skills. Finally, several important archive-based secondary works in the secondary literature are available on reserve for your reference. These works demonstrate the ways in which historians have recently applied archival skills (and materials).
Instructor(s): T. Meyer-Fong.

AS.100.735. Early Modern Britain.
Instructor(s): J. Marshall.

AS.100.736. Early Modern Britain.
Instructor(s): J. Marshall.

AS.100.741. Recent Theoretical Issues in History.
An examination of recent theoretical issues in history, including: history as/and memory, the return of presence in history; the turn to affect and the rise of "neurohistory"; posthistoricism and the uses of literary theory in history; and the uses of photography and visual cultures in history.
Cross-listed with Humanities Center.
Instructor(s): G. Spiegel; M. Fried
Area: Humanities, Social and Behavioral Sciences.

AS.100.743. Topics in Post-1945 European History.
Critical readings on selected themes in recent European history and historiography.
Instructor(s): T. Shepard
Area: Humanities, Social and Behavioral Sciences.

AS.100.744. Twentieth Century France and the French Empire.
We will explore major recent work in the history of France, with particular attention to transnational and imperial questions.
Instructor(s): T. Shepard.

AS.100.749. Social Theory for Historians.
An examination of the works of Marx, Durkheim, and Weber, as examples of the Hegelian, positivist, and hermeneutic traditions of social theory.
Instructor(s): P. Jelavich.

AS.100.750. Victorian Culture and Society.
This course covers major thematic and interpretive approaches to family formations, urban environment, popular nationalism, class cultures, feminism and bodily politics, Empire and racial thought, commercial culture, the media and concepts of the self.
Instructor(s): J. Walkowitz
Area: Humanities, Social and Behavioral Sciences.

AS.100.753. Twentieth Century Seminar.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.

AS.100.755. Twentieth Century Seminar.
Instructor(s): Staff.

AS.100.759. The Cairo Geniza (Spring).
Documentary sources from the Cairo Geniza in Judaeo-Arabic, Arabic, and Hebrew. Paleography, genre, diplomatic, corpo and editorial techniques; historical context, interpretation, historiography and history of the field. Cross-listed with Jewish Studies.
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.
AS.100.760. The Cairo Geniza.
Documentary sources from the Cairo Geniza in Judaeo-Arabic, Arabic, and Hebrew (depending on student interest). Diplomatic, paleography, research methods, historiography, and history of the field. Arabic required, some Hebrew preferred.
Instructor(s): M. Rustow
Area: Humanities, Social and Behavioral Sciences.

AS.100.761. History of Capitalism.
Readings on the history of capitalism since the mid-nineteenth century, with an emphasis on the American context.
Instructor(s): A. Burgin.

AS.100.762. History and Historiography of 19th France in Europe and the World.
We will explore recent and classic studies of 19th-century French history, with particular attention to transnational and colonial questions.
Instructor(s): T. Shepard.

AS.100.763. Comparative World Hist.
Instructor(s): Staff.

AS.100.764. Comparative World Hist.
Instructor(s): Staff.

AS.100.765. Topics in Women's History.
An exploration of recent work in women’s and gender history, focusing on Europe, the Atlantic world, and the United States in the early modern and modern eras. Meets at the same time and place as AS.100.769.
Instructor(s): T. Ditz.

AS.100.766. Problems in Women's History.
An exploration of recent work in modern European and US women’s and gender history, focusing on some of the following: sexuality, cultural production, politics, family formation, work, religion, differences, and civic orders. A continuation of AS.100.765.
Instructor(s): K. Hindmarch-Watson
Area: Humanities, Social and Behavioral Sciences.

AS.100.769. Gender History Workshop.
Workshop for presentation of works-in-progress on the history of women, gender, and/or sexuality, including drafts of dissertation chapters, research papers, talks, and proposals. Students in disciplines other than history are welcome.
Instructor(s): K. Hindmarch-Watson; T. Ditz.

AS.100.770. Gender History Workshop.
Workshop for presentation of works-in-progress on the history of women, gender, and/or sexuality, including drafts of dissertation chapters, research papers, talks, and proposals. Students in disciplines other than history are welcome. Graduate students only.
Instructor(s): K. Hindmarch-Watson
Area: Humanities, Social and Behavioral Sciences.

AS.100.772. The Indian Ocean and European Empire.
A reading seminar on the history and historiography of European Empire in the Indian Ocean region.
Instructor(s): P. Larson.

AS.100.781. The Seminar.
Instructor(s): Staff.

AS.100.782. The Seminar.
Instructor(s): Staff.

AS.100.783. Seminar: Medieval Europe.
Instructor(s): Staff.

AS.100.784. Seminar: Medieval Europe.
Instructor(s): Staff.

AS.100.785. Seminar: Early Modern Europe.
Instructor(s): Staff.

AS.100.786. Seminar: Early Modern Europe.
Instructor(s): Staff.

AS.100.787. Seminar: Modern Europe.
Instructor(s): Staff.

AS.100.788. General Seminar: Modern Europe.
Instructor(s): Staff.

AS.100.789. Seminar: American.
Instructor(s): Staff.

AS.100.790. General Seminar: America.
Instructor(s): Staff.

AS.100.791. Seminar: Latin American.
Instructor(s): Staff.

AS.100.792. General Seminar: Latin America.
Instructor(s): Staff.

AS.100.793. Seminar: African.
Instructor(s): Staff.

AS.100.794. General Seminar: Africa.
Instructor(s): Staff.

AS.100.797. First Year Graduate Workshop.
First year graduate workshop.
Instructor(s): A. Burgin
Area: Humanities, Social and Behavioral Sciences.

AS.100.798. First Year Graduate Workshop.
First year graduate workshop.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.801. Dissertation Research.
Instructor(s): Staff.

AS.100.802. Dissertation Research.
Instructor(s): Staff.

AS.100.803. Independent Study.
Instructor(s): Staff.

AS.100.804. Independent Study.
Instructor(s): A. Burgin; G. Paquette; H. Kim; S. Berry; W. Rowe.

AS.100.821. Fall Practicum.
Instructor(s): W. Rowe.

AS.100.822. Spring Practicum.
Instructor(s): Staff.

AS.100.890. Independent Study.
Instructor(s): Staff.

AS.100.891. Summer Practicum.
Instructor(s): Staff.
Cross Listed Courses

History of Art

AS.010.229. Rethinking the Renaissance: Artistic Exchange Between North and South. 3.0 Credits.
This course examines art made between ca. 1400-1600 that has traditionally been described as belonging to the “Northern Renaissance” (that is, art made in what is today the Netherlands, Belgium, France, Germany and Austria) and the Italian Renaissance (that is, art made on the Italian peninsula). While these two subjects are traditionally taught as separate historical and artistic phenomena, this course will consider possible alternatives to this model. By focusing on artists and art works that traveled in both directions across the Alps, students will have the chance to consider the implications of a more inclusive definition of the Renaissance.
Instructor(s): E. Bernick
Area: Humanities.

AS.010.233. Art and Astrology in the Middle Ages. 3.0 Credits.
This course explores the relationship between art and astrology from the early Middle Ages to the early Renaissance. We look at a wide range of media—mosaic, painting, metalwork, manuscripts, and sculpture—that speak to the central place of astrology in medieval systems of knowledge, and the practical uses of astrology for medicine and politics. Readings and discussions cover a variety of themes, including the transmission of astrological knowledge, the emergence of large-scale astrological mural programs, the use of precious stones and amulets, and the ways in which artworks probe the tensions between astrology and Christian theology. A recurring topic will be principle of "celestial influence”—the idea that the stars emit rays that affect people and events on earth—and its implications for artistic production and reception, as well as how art objects could even predict, or represent predictions of, future events. Primary sources (in English translation) include Albertus Magnus, Abu Ma’shar, al-Kindi, Roger Bacon, and others. Secondary readings include Aby Warburg, Erwin Panofsky, Fritz Saxl, Michael Camille, Georges Didi-Huberman, and others.
Instructor(s): M. Hauknes
Area: Humanities.

AS.010.430. Trans-Mediterranean Visual Culture and the Spanish Empire. 3.0 Credits.
This course focuses on the visual culture and the artistic interconnections among the territories under the global hegemony of the Spanish Empire. Students explore the so-called Spanish Golden Age through the lens of the circulation of ideas, artworks and artists as a practice that significantly shaped Early Modernity. We will navigate and discuss the mutual artistic exchanges between Spain, its American Colonies, its Italian territories (Milan, Naples and Sicily), and its allies (Genoa and Florence), as part of an extraordinarily extended network of political and cultural relationships, across the Mediterranean and beyond. The syllabus includes topics such as: the reception of the Renaissance in Columbus’ mudéjar [Moorish] Seville; traveling Iberian artists in search of Michelangelo’s model; El Greco’s Mediterranean; Titian’s influence on Velázquez’s artistic practice; the visual response to the miraculous catholic images in Latin America, such as the Virgin of Guadalupe, and to the canonization of Rosa of Lima, the first saint of the New World. There will be a final paper.
Instructor(s): F. Loffredo
Area: Humanities.

Classics

AS.040.601. Italian Renaissance Humanism and Modern Humanities.
This course will reflect on certain key moments in the development of Latinate and Italian Renaissance humanism and will also include reading and discussion of certain recent landmark contributions to the history of the modern humanities.
Instructor(s): C. Celenza.

Film and Media Studies

AS.051.396. Modern Paris on Film. 3.0 Credits.
This course uses French film to examine the history of twentieth-century Paris. We will consider how filmmakers interpreted the social, political, and technological transformations that shaped Paris in the modern era, treating movies as expressions of change and means by which filmmakers comment on it. Taught in English. Film screenings Monday 7:30-10:00 PM. $40 lab fee
Instructor(s): L. Mason
Area: Humanities.

AS.051.397. French Masculinities. 3.0 Credits.
Examines changing ideals of masculinity in France after 1960 as they found expression on film, rooting the work of iconic stars and directors in their cultural, political and historical contexts.
Instructor(s): L. Mason
Area: Humanities
Writing Intensive.

AS.061.391. History and Film. 3.0 Credits.
How do films inform, shape, or fundamentally alter our sense of the past? What are the strengths and limitations of cine-history? This course pairs traditional and avant-garde fiction films and documentaries with essays about history, historiography, memory and the political uses of the past to investigate fast-changing relationships between image and text, film and history. Lab fee: $50 Counts toward 300 or 400-level critical studies requirement.
Instructor(s): L. Mason
Area: Humanities
Writing Intensive.

AS.061.421. History and Film. 3.0 Credits.

Anthropology

AS.070.290. Modern South Asia: Bangladesh/Pakistan. 3.0 Credits.
Bangladesh and Pakistan, two major regional players in South Asia, originate in the 1947 Partition of India and shared nationhood between 1947 and 1971, ending with the War of Independence in 1971 in which Bangladesh separated from Pakistan. Since that time the two nation-states have been on different paths that have sometimes mirrored each other. This course brings together contemporary works of national histories, social movements and cultural production to consider the politics of self-differentiation and the points of convergences.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.352. Evolution, Ecology, Becoming. 3.0 Credits.
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.610
Instructor(s): A. Goodfellow, N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.605. Anthropology and the Everyday.
Analysis of the everyday groans under the theoretical weight of concepts such “modernity,” “governmentality,” “capitalism,” “globalization” and more recently “security.” What might a sharper focus on the everyday yield in terms of its own analytical frameworks and empirical descriptions? We read some contemporary greats (Foucault, Derrida, Cavell, de Certeau, Lefebvre). Simultaneously we look at how each has been received within ethnography by reading anthropologists in engagement with them (Mahmood, Ivy, Das, Siegel, Harvey). We ask what critical stakes anthropology maintains in relation to the everyday.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

Near Eastern Studies

AS.130.243. Hammurabi in the Digital Age: Digital Humanities and the Ancient Middle East. 3.0 Credits.
The world's earliest poetry, cities, and empires all hail from the ancient Near East, but the remains of its remarkable cultures are under direct threat by the current conflicts in the Middle East. Digital technologies can help us to study, preserve, and recreate the artifacts that remain, and this class combines the use of such technologies with the study of the ancient world, offering students the chance to critically engage with modern scholarship methods and create their own digital resources, as well as gain familiarity with key themes and features of the ancient Near East, including urbanization, internationalism, and literature.
Instructor(s): M. Lewis
Area: Humanities.

AS.130.328. Ancient Egypt /Africa. 3.0 Credits.
Recent excavation and research have shed light on several ancient cultures of the Nile and its tributaries. We will look at the available archaeological and textual (all Egyptian) evidence for these societies and their interactions with Egypt between 3500 and 300 B.C. We will also discuss research aims and methods employed now and in the past in Egypt and the Sudan.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

History of Science Technology

AS.140.105. History of Medicine. 3.0 Credits.
Course provides an overview of the medical traditions of six ancient cultures; the development of Greek and Islamic traditions in Europe; and the reform and displacement of the Classical traditions during the Scientific Revolution.
Instructor(s): G. Pomata; S. LeJacq
Area: Humanities, Social and Behavioral Sciences.

AS.140.146. History of Public Health in East Asia. 3.0 Credits.
This course examines the history of disease, epidemics, and public health responses in East Asia from the 17th-20th centuries. This public health history emphasizes the interactions, connections, and comparisons among China, Japan, Korea, and Taiwan.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.304. Medicine for and by Women in Early Modern Europe. 3.0 Credits.
This course will examine women's role in early modern European medicine through the reading of early modern medical texts written for or by women. The course is meant for students interested in women's history, the history of medicine, European history.
Instructor(s): G. Pomata
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.381. History of Reproduction. 3.0 Credits.
This course investigates the history of reproduction in American medicine, science, politics, and culture. It explores changing ideas about reproductive bodies, sexuality, and the family as well as practices of contraception, conception, and childbirth.
Instructor(s): B. Gurtler
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.140.413. The White Plague: History of Tuberculosis. 3.0 Credits.
Examination of interrelated scientific, medical, social, and cultural dimensions of tuberculosis from early modernity to the present in various geographical and cultural settings. Extensive reading, research based on primary sources. Juniors and Seniors only. Instructor’s permission for all others. Cross-listed with History and Anthropology.
Instructor(s): D. Todes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.674. Science and Medicine in Early Modern Atlantic World Culture.
How were changes in scientific and medical ideas reflected in cultural products of the early modern Atlantic world? We will study these ideas as they appeared in literary genres such as poetry, utopias, natural histories and travel narratives. Likewise, we will examine the visual culture of the Atlantic space for clues about changing conceptions about the natural world. Our expedition will encompass Anglophone, French and Hispanic regions, and will pay careful attention to hybrid cultural products that reflect the interaction between indigenous cultures and the (changing) European understanding of the natural world.
Instructor(s): M. Portuondo.

German Romance Languages Literatures
AS.211.202. Freshman Seminar: A Thousand Years of Jewish Culture. 3.0 Credits.
This course will introduce students to the history and culture of Ashkenazi Jews through their vernacular, Yiddish, from the settlement of Jews in German-speaking lands in medieval times to the present day. Particular emphasis will be placed on the responses of Yiddish-speaking Jews to the challenges posed by modernity to a traditional society. In addition to studying a wide range of texts—including fiction, poetry, memoir, song, and film—students will learn how to read the Yiddish alphabet, and will prepare a meal of traditional Ashkenazi dishes. No prior knowledge of Yiddish is necessary for this course.
Instructor(s): B. Lang
Area: Humanities.

AS.211.265. Panorama of German Thought. 3.0 Credits.
A unique aspect of the German intellectual tradition is the attention it pays to the role of the subject in constructing the world. While this tendency is associated in particular with Kant who turned philosophy back to the study of the subject’s faculties, it also features prominently in the work of thinkers as varied as Freud, Panofsky, and Einstein, who founded new disciplines (i.e., psychoanalysis, iconology, and quantum mechanics). This course will examine the crucial role that German thought has played in the development not only of modern philosophy but also of modern science and the humanities. Students will become acquainted with an intellectual tradition that is as concerned with what we know as how we know it.
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.211.341. Power and Resistance in French Political Thought. 3.0 Credits.
Even as a strong, divine-right monarchy emerged in France, following the Renaissance wars of religion, rebellious French thinkers never stopped questioning the foundations of power. They focused critically not only on the claims of authority issuing from the top, but also on the submissiveness of the governed and the reach of propaganda. This course examines how power shapes minds and bodies, from absolutism to the Revolution, to democratic laïcité. Readings include works by La Boétie, Montaigne, Loyseau, Bayle, Rousseau, Saint-Just, Maistre, Tocqueville, Foucault, Lefort, Rancière and the Assemblée Nationale. Readings and discussion in English.
Instructor(s): E. Russo
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization. 3.0 Credits.
This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.211.201. Early Modern Jewry in Europe and the Mediterranean. 3.0 Credits.
The course examines the transition from medievalism to modernity among the Jews of Europe and the Mediterranean between the sixteenth and eighteenth centuries, paying attention to both material and intellectual life, and to women and children side by side with merchants and rabbis.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.

AS.211.203. Jews and the British Empire. 3.0 Credits.
What can we learn about Jewish history, politics, and culture by examining Jews in imperial and colonial settings, particularly the British Empire? How has Britain, its empire, history, culture, and language shaped the modern Jewish experience? Over the course of the semester, we will investigate these questions and explore the diverse history of Jews across the British Empire in the modern period. We will move from Britain, to Mandate Palestine, from India to South Africa, and beyond. We will analyze the role that Britain and the British Empire played in the formation of modern Jewish politics and culture, especially Zionism. The course will focus primarily on the 19th and 20th centuries, concluding with an examination of contemporary British antisemitism, anti-Zionism, and relations with Israel.
Instructor(s): E. Imber
Area: Social and Behavioral Sciences.

AS.211.301. Reading the Bible and Encountering its World. 3.0 Credits.
The course examines the interactions between travel and biblical interpretation between the seventeenth and twentieth centuries, paying particular attention to the ways in which travelers to the Middle East and then scholars saw its residents as relics of an unchanging biblical world, whose practices could be used to interpret scriptural texts from both the Old and New Testaments.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.

Jewish Studies Program
AS.193.201. Early Modern Jewry in Europe and the Mediterranean. 3.0 Credits.
The course examines the transition from medievalism to modernity among the Jews of Europe and the Mediterranean between the sixteenth and eighteenth centuries, paying attention to both material and intellectual life, and to women and children side by side with merchants and rabbis.
Instructor(s): E. Horowitz
Area: Social and Behavioral Sciences
Writing Intensive.

AS.211.449. America Through French Eyes: French Travellers to America. 3.0 Credits.
From early colonial efforts in the sixteenth century through the time of the great political revolutions and down to the present, America has exercised a deep fascination on the French. This course will look at French representations of America in art, literature and political thought across the centuries. Through a range of materials including travel accounts, essays, novels, maps, paintings and film, we will investigate how French perceptions of America have shifted over time, often in response to changes in French society and culture. All texts will be read in translation. Course work will include visits to JHU’s Special Collections and the Walters Art Museum downtown
Instructor(s): S. Miglietti
Area: Humanities

AS.211.479. Dante’s Journey through the Afterlife. 3.0 Credits.
Dante’s Divine Comedy presents a complete picture of the medieval world-view in all its aspects: physical (the structure of the cosmos), historical (the major actors from Adam to Dante himself) and moral (a complete system of right and wrong). Dante shows how the Christian religion portrayed itself, other religions, the nature of God, humans, angels and devils, and human society. We will explore these topics both from the viewpoint of Dante’s own time, and in terms of its relevance to our own societal and cultural concerns.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.212.341. Power and Resistance: Approaches to French Political Thought. 3.0 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power; from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétrie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities

AS.212.347. Petrarch and the Beginnings of the Renaissance. 3.0 Credits.
This course will focus on the life, work, and thought of Francesco Petrarca, or “Petrarch.” Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.
Instructor(s): C. Menke; R. Tobias
Area: Humanities
Writing Intensive.

AS.213.749. Modern Subjectivities: Legal, Economic, Political. 3.0 Credits.
The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the “bourgeois,” as the social-economic subject, and the “citoyen” or “citizen” as the political subject. The bourgeois and the citoyen are defined by distinct and opposing conceptions of the “will,” of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of “individual rights” (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1.Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias
Area: Humanities

AS.213.706. Literature, Museums, Mimesis. 3.0 Credits.
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities
Writing Intensive.

AS.213.707. Literature, Museums, Mimesis. 3.0 Credits.
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. AS.214.347. Petrarch and the Beginnings of the Renaissance. 3.0 Credits.
From fault-finding to the crossover of aesthetic and political judgment, criticism never loses sight of its medical cognates critical and crisis. This course examines the emergence and the transformations of critical judgment in the arts, culture and politics, from the early days of its collusion with French monarchical propaganda, to the critical genealogies of the Enlightenment, to the postrevolutionary critique of history, to Foucault’s critique of practices of veridiction. Works by Perrault, Bayle, Diderot, Rousseau, Tocqueville, Cassirer, Koselleck, Derrida, Barthes, Bourdieu, Foucault. Taught in English; most texts available in translation, but knowledge of French recommended.
Instructor(s): E. Russo
Area: Humanities
AS.214.390. Machiavelli: A Renaissance Master. 3.0 Credits.
Who was Niccolò Machiavelli? The author of the Italian Renaissance's most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli's major works and to the intellectual, social, and political contexts that shaped his thinking.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.437. The Intellectual World of the Italian Renaissance. 3.0 Credits.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the "lost" Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin — not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance "humanists," inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their "native" tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3.0 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality; what is illusion; what's natural and what's supernatural? What's human and what's more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto's Orlando furioso (1532) and Tasso's Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy. 3.0 Credits.
Dante's Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante's understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.637. The Intellectual World of the Italian Renaissance.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the "lost" Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin — not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. Giambattista Vico’s Principi di scienza nuova d'intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an "ideal" and "eternal" model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square "sacred history" (the presumed historical accuracy of the Bible) with "profane" or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this "old science" stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.
The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncaglio and Silva Passuni.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.350. Mexico: An interdisciplinary approach to the construction of our image and understanding of Mexico. 3.0 Credits.
The course studies the accounts of the Mexica on the journey and foundation of Tenochtitlan. Later we move on to the clash of cultures with the Spanish conquest (1521). After studying the art of the colonial period, the course focuses of the Mexican Revolution of 1910 and ends with a consideration of the image of the nation in murals and writers such as Octavio Paz, Carlos Fuentes and Elena Garro. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.452. Che Guevara and Magical Realism. 3.0 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara's life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che's great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish
Instructor(s): E. Gonzalez
Area: Humanities

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.
Departing form narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.
Instructor(s): S. Castro-Klaren
Area: Humanities

AS.215.650. Mexico and the Invention of America.
Departing from O’Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero, Humboldt, Dussel and Alzandua will conform part of the readings. Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

Sociology
AS.230.166. Chinese Migration in Modern World History 1500's-2000's. 3.0 Credits.
This interdisciplinary course applies theories of economic sociology to examine the effects of Chinese overseas migration on modern world economy from the sixteenth century to the contemporary era. It examines the contribution of overseas Chinese to the development of capitalism in the following junctures: the East-West economic integration in the pre-modern era, China’s modern transformation after the Opium War (1839-1842), the making of US national economy in the early twentieth century, as well as the postwar economic miracles in the Pacific Rim, among others. Special Note: Fulfills History requirement for GSCD track students.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.377. Colonialism and Anti-Colonialism. 3.0 Credits.
This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

Humanities Center
AS.300.139. Introduction to Intellectual History. 3.0 Credits.
This course offers a conceptual and historical introduction to Intellectual History. What makes the “history of ideas” different from the history of other objects? What, if anything, distinguishes the history of ideas from the history of philosophy? What is it exactly that we call “ideas”? In what sense do they have a history? These are examples of the kind of questions addressed in the course.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.228. Brain and Society. 3.0 Credits.
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a 100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.

AS.300.330. Trauma in Theory, Film, and Fiction. 3.0 Credits.
An examination of the representation of trauma in literary theory, psychiatry, survivor literature, films, novels, and comics. Works by Sebald (“The Emigrants”), Lanzmann (“Shoah”), Spiegelman (“In the Shadow of No Towers”), McCarthy (“Remainder”), and others.
Instructor(s): M. Fried
Area: Humanities, Social and Behavioral Sciences.
AS.300.365. Desire in the Fin de siècle. 3.0 Credits.
This course examines the obsession with desire at the turn of the 20th century in literature, drama, philosophy and social thought and its implications for notions of self and community in modernity. We will read comparatively across European, Russian and American cultures, including Stoker’s Dracula, Hamsun’s Hunger, plays by Chekhov, Strindberg, Ibsen, Wilde, and stories by Tolstoy, Gorky, Chopin and Larsen. Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.383. History of Madness from the Bible to DSM-V. 3.0 Credits.
Madmen, lunatics or the insane, have seen an extraordinary variety of responses and attitudes across the centuries. Whether seen as a “true” phenomenon or as socially constructed “madness” was defined and treated, examined and controlled, diagnosed and “cured” according to the spirit of the time. This course will follow the varied social imageries of “madness” throughout Western history, from the Bible to the contemporary and controversial Diagnostic Statistical Manual (DSM) in its most recent 5th edition. Alongside primary texts by Hippocrates, Avicenna, Pinel, and Freud and secondary texts by Michel Foucault, Ian Hacking, Edward Shorter, and Elaine Showalter, among others, we will acquaint ourselves with first-person accounts of “madness” and its different forms of treatment, ranging from lunatic asylum, through electric-shock treatments and lobotomies to psychoanalysis. The course will explore the interaction between the social and scientific, and political as well as economical factors that have shaped the views of “madness” and its treatment.
Instructor(s): O. Ophir
Area: Humanities.

East Asian Studies

AS.310.103. Modern Japan - 1800 to the Present. 3.0 Credits.
An introduction to the history of Japan from the 18th century to the present. In lectures and discussion we will draw upon a combination of primary source materials (political documents, memoirs, oral histories, journalism, fiction, film) and scholarly writings in order to gain insight into the complex and tumultuous process by which Japan became an industrialized society, a modern nation-state, and a world power.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences.

AS.310.104. Pacific Crossings: East Asia and the US from the 19th Century to the Present. 3.0 Credits.
This course examines the connections between US and East Asian history from the 19th century until today. We will explore how cultural exchange and confrontation shaped humanitarian, nationalist, and socialist projects in the US, China, Korea, and Japan. Readings include memoirs, travelogues, essays, and novels that provide a window into transpacific history.
Instructor(s): A. Bronson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.108. Introduction to Chinese Fiction and Drama. 3.0 Credits.
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.308. The Frontier in Late Imperial China. 3.0 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of “China”. Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China’s northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

Interdepartmental

AS.360.147. Freshmen Seminar: Adam Smith and Karl Marx. 3.0 Credits.
This course will compare the ideas of Adam Smith, the most famous proponent of free trade and free enterprise, with those of Karl Marx, the greatest critic of capitalism. For freshmen only.
Instructor(s): E. Schoenberger; P. Jelavich
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Program in Latin American Studies

AS.361.130. Introduction to Latin American Studies. 3.0 Credits.
The goal of this course is to provide an overview of Latin America, analyzing political and cultural aspects, chronologically organized. We will begin studying the origins of the multi–ethnic societies, starting with the ancient civilizations and their transformation under colonization. It is important to understand the survival of cultural traits among indigenous peasants today in the countries that were the cradle of ancient civilizations: Mexico, Guatemala and the Andean countries. In the republican era the course will focus on the classical Caribbean dictators in the first half of the 20th century and their reflection in the literature, comparing the historical reality with the magic representation in the work of Garcia Marquez. The course will scrutinize the most important revolutions in the continent: the Mexican, Cuban and Bolivian revolutions and the geopolitics of USA in the Americas. Weekly lectures related to the assigned reading will focus on specific periods, topics and regions. After each lecture, we will review the material, connecting specific details from the readings with the more theoretical aspects provided in my lecture. The course has a website where the PowerPoint presentations will be posted. Students are encouraged to post their questions, comments and suggestions on the web after their readings. Students will be given a study guide for each lecture, which will be the basis for the exams. Our perspective on Latin America will be enhanced by a selection of few films related to the topics.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.
AS.361.207. Afro-Latin American Biography. 3.0 Credits.
In this course, we will examine biographical accounts of men and women of African descent in Latin America and in the broader Black Atlantic. These individuals include conquistadors and slaves, saints and sinners, revolutionaries and ordinary people. In their life stories, we will not only examine questions of race, gender, and religiosity that were central to the construction of identity in the early modern Atlantic world, but also the nature of the sources that allow us to tell their stories.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.361.410. Colombia and Venezuela: Postcolonial History and the European Novel. 3.0 Credits.
The intertwined histories of Colombia, Venezuela, Panama, and the Caribbean studied in two novels: Joseph Conrad’s Nostromo (1904) and Juan Javier Vázquez’s The Secret History of Costaguana (2007). Other novelists include Rómulo Gallegos (Doña Bárbara, 1929); Alejo Carpentier (The Lost Steps, 1953), and Gabriel García Márquez (The General in his Labyrinth, 1989).
Instructor(s): E. Gonzalez
Area: Humanities.

Center for Africana Studies
AS.362.104. Introduction to the African Diaspora. 3.0 Credits.
This course will begin in Africa before Atlantic slave trade, move to cover that trade into Brazil, the Caribbean and South Carolina. Comparisons of slave systems with Africa, Brazil, some parts of the Caribbean and Carolina (later South Carolina).
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.

AS.362.122. History of Africa (since 1880). 3.0 Credits.
An introduction to the African past since 1880.
Prerequisites: Students are not allowed to take both 100.122 and 362.122.
Instructor(s): K. Gallon
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.175. Freshman Seminar: Remembering the Black Power Movement. 3.0 Credits.
This course explores trends, developments, contradictions, and dilemmas related to the Black Power Movement. The objective of studying this historical movement is not to engage in nostalgia, but to think through and learn the lessons of this historic social movement. An active participant in the Black Power Movement as a university undergraduate and graduate student, I do not approach this subject merely as a set of interesting intellectual issues and dynamics that can be explored with complete dispassion and objectivity. Rather, I seek to examine critically some of the contradictions and dilemmas that I, too, was caught up in, seeking to come to grips with and clarify my own participation and activities. We study these historical events with the expectation of making a positive contribution to the future.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.204. Women in African History. 3.0 Credits.
Selected readings written by or about notable African women from the 17th century to the present. Themes explored include slavery, power and religion, economics, health and politics.
Instructor(s): P. Romero
Area: Humanities
Writing Intensive.

AS.362.340. Power and Racism. 3.0 Credits.
This course investigates the impact of white supremacy and anti-black racism, as a global system of power, on the political development of the United States of America.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences
Writing Intensive.

AS.362.401. Comparative Slavery in the Americas. 3.0 Credits.
This course examines the development of slavery and racial thought in Latin America and the Atlantic World from the fifteenth century until its demise in the middle and late nineteenth century. Readings in social and cultural history are intended to focus on the life and labor of slaves, while readings from economic and legal history evaluate slavery as an institution. Intellectual histories are also assigned in an attempt to map the development of slavery as an institution typified by racial caste. The primary goal of this course is to give students a background in the major historical debates that have shaped the production of the history of slavery, including questions of identity (creolization vs. “African survivals”), slave agency and control, and economic vs. racial causes of slavery and the slave trade. All of these topics will be examined through the overarching theme of the course, which is the Tannenbaum thesis: namely, to what extent slavery was experienced differently in Latin America, Anglo-America, and in Africa itself.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.450. Critical Thinking in Africana Studies. 3.0 Credits.
This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes
Writing Intensive.

Study of Women, Gender, Sexuality
AS.363.201. Introduction to the Study of Women, Gender, and Sexuality. 3.0 Credits.
This course offers an introduction into the fields of Women’s Studies, Gender Studies, and Sexuality Studies. It explores why we need these fields of inquiry, how they have emerged historically, what some of the major and most interesting contributions are and where we might go from here. The course is meant as a preparation for the other WGS core courses.
Instructor(s): E. Ender
Area: Humanities, Social and Behavioral Sciences.

Music
AS.376.317. Jewish Music. 3.0 Credits.
